SAYS THE PICTON NEWS: A gentleman passed through Picton last week from P. E. Island on his way to Chicago, which had been his home for more than a dozen years. When a young man, being of an adventurous turn of mind, he left his island home to seek his fortune in the west, leaving behind his brothers who concluded to remain on the farm. This gentleman has been fairly successful in his business, but on re-visiting his old home was somewhat surprised to find that his brothers had been quite as successful as himself. They had been industrious and had used their brains as well as their hands in their work on the farm, and without a tithe of the business care and anxiety that had worried their brother had become well-to-do. The moral is that a young man may do worse than remain on the farm.

AN ANTIQUARY, Mr. DeLoach, says:—Hon. Lambert Burns, of Boston, one of the Federalist chieftains, comes from the era of the lumbering industry. In conversation with the Press correspondent, he said distinctly: "The present open winter will inflict thousands of dollars worth of damage on the lumbermen of Maine. There are hundreds of men employed in the Penobscot region. Previous to these rains they have done very little. Some of them have come out—some, some and all. Others go so far north that they cannot get out, and their teams are in the woods eating their heads off. The millmen to the lumbering affecting all branches of business, resulting in a general depression. Hereafter in our region it therefore impairs the commercial credit, so that it places the people in a bad way."

She had 900 miles of the most improved heavy type cable, which she will use in the Gulf of Mexico and Texas, for the Mexican and Central and South American Telegraph Companies, which will duplicate the gift systems of these companies, providing increased facilities, and insuring the most rapid telegraphic communication by the American route, via Galveston, with Valparaiso, Chile, Buenos Ayres, the Argentine Republic and all other important places in South America.

CASE OF THE BELLE. Various rumors being afloat as to the cause of the detention of the steamship *Surmation* on her last trip from Liverpool to this port, a Mail reporter interviewed Mr. Morrow, of S. Cunard & Co., who gave the following reasons why said vessel was detained.

When the *Surmation* was about to leave Liverpool, it was found very difficult to secure a few frames which the steamer wanted, owing to a strike among the frames and engineers in Liverpool. As a consequence the steamer was detained a day in port. Not being able to secure the usual freight, the frames, new lumber had to be taken. They became sick on the passage, which impeded the progress of the ship, thus causing the vessel to make a long passage.—*Halifax Mail, 18th inst.*

AN IMMENSE CATCH OF FISH. GLOUCESTER, Jan. 16.—Yesterday afternoon the schooner *Lizzie Griffin*, Capt. John A. Griffin, came with a catch of Atlantic wharves. She had arrived from a Grand Bank halibut trip. The captain was offered the wharves at the Halibut Company, the Boston Company, who now seem to have their innings in the game of buying, and the wharves for white fish and 8 cents per pound for gray, or 9 cents right through. They are, however, more influential than Keshier and are likely to overthrow him. These aggressions to the ranks of the wharves will have the effect of reinforcing the revolt which would have died out if the Germans had not returned from the coast.

A HEARTLESS SHOYLOCK. A Chicago despatch of the 18th says Max Metzger borrowed \$80 last fall to pay the mortgage on his furniture, which was taken by the sheriff. After a time he was known out of work and was unable to meet the payments on his mortgage. The holder was lenient with him and let him pay in installments. The mortgage was passed into unknown hands. Last night, when he returned from work, he found the holder of the mortgage had broken into the house and stripped it of everything, leaving his three small children only in possession of the bare walls. The police will endeavor to find the heartless shark. The way the mortgage was cleared out, the way was something extraordinary. They began by carrying out everything the apartment contained. The contents of the stove and it was taken away. A loaf of bread left on the table for the children was also taken and the contents of a pitcher of milk were spilled on the floor, so the men could take the pitcher. The man who took the pitcher, the man who took the pitcher, the man who took the pitcher.

PATRICIA: A STORY OF A WOMAN'S CONSCY.

CHAPTER I.

"Do you mean to tell me, Patricia, that you would not like to be married and have a house of your own?" Patricia Carlisle turned round quickly to answer the question, her friend, Rose Maynard.

"If I loved some one, and he loved me, I suppose I should wish to wed him; but as to talking of marriage in the abstract as you do, I can not understand it. You speak of getting a husband or house?"

"Well, my dear, there is not much that is hard or prickly in your present life at the Abbey."

"Not so very young—let me see—Lawrence Hazledan must be now thirty? I am a distant cousin of his mother. He was like her—a very handsome youth—remember, before he went abroad. Why, Patricia, what a chance for you there; a man comparatively young, very good looking, and heir to the Abbey."

CHAPTER II.

Patricia Carlisle was the adopted daughter of Mr. Hazledan. He had taken the forlorn creature of fifteen years from her dead mother's side to his own home.

"It is not so certain," quickly put in Patricia. "Oh!" ejaculated Mrs. Maynard, with a look of surprise.

"What a tall, fair man, with blue eyes and a long brown moustache; his complexion had become sunburnt, but the forehead had become white as ivory."

"I do not know where the charm lay in him, but he had a certain something about him, which made him seem so different from the women who once spoke to him contented."

"On first sight he had decided that Patricia Carlisle was a little insignificant and person—very plain; but before the week was out, strange to say, he was generally to be found by her side."

"When Mrs. Carlisle died, Geoffrey Hazledan stood by her side. As her feeble gaze rested on her child with a sad yearning gaze, he said, 'God bless you, my dear child, and may you be as happy as I was.'"

"God bless you, my dear child, and may you be as happy as I was." Patricia Carlisle had only one gift, only one feature in her face, little else to refer to from plainness—this was a pair of singularly beautiful eyes.

CHAPTER III.

The month passed, and in the bright June days Lawrence Hazledan arrived at the Abbey. He had been absent from England six years. Now, as he passed by the green pasture lands dotted with cattle, or the beautiful woods of the Abbey estate, he looked with a feeling of keen pleasure over that broad domain, which there seemed no reason to doubt would in time be his own.

"The carriage had been in waiting for Lawrence at the station, and when the train came slowly puffing into the terminus, Mr. Hazledan came to meet him with outstretched hands."

"How are you, Lawrence? After your long absence I am very glad to see you."

"Oh, not you, sir; there's plenty of life in you yet." Then they went in the carriage and bowling along the road.

"Pat! what an odd name for a young lady!" Patricia, after her survey, which was a long and loving one, for she was deeply attached to the old house, walked up the winding road, and passed through an iron gate into the fine avenue bordered on each side by cypress trees.

"I do not know where the charm lay in him, but he had a certain something about him, which made him seem so different from the women who once spoke to him contented."

"On first sight he had decided that Patricia Carlisle was a little insignificant and person—very plain; but before the week was out, strange to say, he was generally to be found by her side."

CHAPTER IV.

In a dreamlike joy passed the days then with Patricia. It is very sweet to be loved; and while the gulf between the two remains unspanned there is nothing so like a gleam of heaven."

"What a tall, fair man, with blue eyes and a long brown moustache; his complexion had become sunburnt, but the forehead had become white as ivory."

"I do not know where the charm lay in him, but he had a certain something about him, which made him seem so different from the women who once spoke to him contented."

"On first sight he had decided that Patricia Carlisle was a little insignificant and person—very plain; but before the week was out, strange to say, he was generally to be found by her side."

"When Mrs. Carlisle died, Geoffrey Hazledan stood by her side. As her feeble gaze rested on her child with a sad yearning gaze, he said, 'God bless you, my dear child, and may you be as happy as I was.'"

"God bless you, my dear child, and may you be as happy as I was." Patricia Carlisle had only one gift, only one feature in her face, little else to refer to from plainness—this was a pair of singularly beautiful eyes.

CHAPTER V.

It was a fine old mansion, which once had been a conventual establishment of great note and much wealth. Cowled nuns had solemnly trod the broad walks, and intoned their Vespers and Compline in the richly ornamented chapel.
