Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

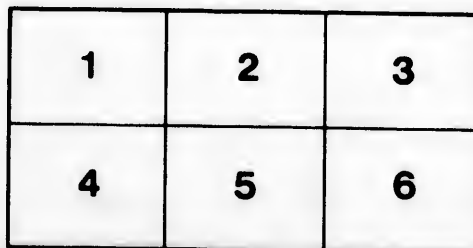

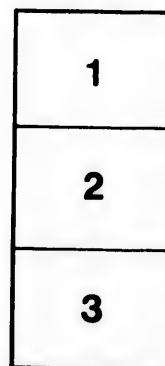

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

British Columbia Directory
1889.

CONTAINING GENERAL INFORMATION AND DIRECTORIES OF
THE VARIOUS CITIES AND SETTLEMENTS IN THE PROVINCE ;

WITH A

CLASSIFIED BUSINESS DIRECTORY.

COMPILED FOR

R. T. WILLIAMS, - - - PUBLISHER.

BROAD AND GOVERNMENT STREETS, VICTORIA.

BY

THOMAS DRAPER, VICTORIA, B. C.

VICTORIA, B. C.:

JAS. A. COHEN, PRINTER, 38 FORT STREET.

1889.

PREFACE.

This, the fourth issue of our series of the Directory of British Columbia, is, as usual, entirely a home production, and the work connected therewith has given employment to a number of persons, and retained within the Province some thousands of dollars.

The book has, in the various cities and settlements, far larger lists of names of residents than any other Directory.

The increasing prosperity of the Province is most encouraging, the climate, the vast and varied mineral and other resources are attracting a large population.

The completion of that grand national highway, the Canadian Pacific Railway, the contemplated extension of the Esquimalt & Nanaimo Railway, northward and southward, and other branch and interior lines, all point to one object, the rapid opening up of the inexhaustible fields of wealth contained within the borders of this Province.

BROAD AND GOVERNMENT STREET,
Victoria, B. C.

MUNICIPAL OFFICERS. 1889

(See also Page 346.)

Reeve—Robert McKee.
 Councillors—Charle Zeoman, James Houston, William Davey, Thomas
 Mufford, John Jolly.
 Clerk—G Rawlinson.

Henry West, mill hand.

Langley Prairie.

In the Dom Electoral District of New Westminster and Provincial of New Westminster District, is on the South side of the Fraser River, about 13 miles from New Westminster on the Yale Road and 3 miles from steam boat landing at Fort Langley. It contains above 3500 acres of deep rich dark loam on clay bottom and is 25 feet above high water. Farming operations are on extensive scale with all the latest kind of agricultural instruments. A Church of England and a Presbyterian Church will shortly be built. There is a Methodist Church and two school houses. A saw mill has been lately erected and the owners will also add shortly a grain and flour mill.

EDUCATION.

ABSTRACTS FROM THE 16TH, ANNUAL REPORT OF THE SUPERINTENDENT OF EDUCATION.

The record of the year is certainly a gratifying one, not only in consideration of the largely increased attendance, but especially on account of the improved condition of the schools and the manifest progress made by the pupils.

The enrollment exceeds that of the previous year by nearly 20 per cent and the increase in average actual daily attendance was almost 16 per cent. The percentage of average attendance for the year was 53.75.

The total number of schools in operation during the year was 92, as follows: 3 High Schools, 3 Ward Schools, 7 Graded Schools, and 79 Common Schools.

These were under the charge of 116 teachers and two monitors.

The aggregate number of Pupils enrolled was 5,345 an increase of 874, and the average actual daily attendance was 2873.38, an increase of 391.90.

This very large increase in enrollment, the largest in any year since the inception of the present school system not only materially affected the graded schools but extended to the majority of rural schools.

The expenditure for Education proper was as follows:

Teachers Salaries.....	\$78,571 60
Incidental Expenses including rent.....	6,489 17
Education Office	3,460 51
	\$88,521 08
	\$88,521 08

Number of School Districts 95; Aggregate Enrollment, 5,345. Average Daily Attendance, 2873.38. Percentage of attendance 53.75.

RMS

TEACHERS.—There has been a marked improvement in the methods of instruction adopted by the teachers during the past year. This is chiefly attributable to the mutual exchange of thought on the practical work of the school room at the annual meeting of the Provincial Teachers Institute, as well as at the more frequent meetings of the several Branch Institutes, and to the visitations made by the teachers to other Schools.

46 Renewal certificates were granted under the provisions of the School Act. Of the 93 candidates at the examination 72 succeeded in obtaining certificates.

MINING LAWS.

Free Miners.

"Free miners" only can have right or interest in mining claims or ditches. A "free miner" must be over 16 years of age. His certificate may be for one year (\$5), or three years (15), and is not transferable. He may enter and mine Crown lands, or, on making compensation, lands occupied for other than mining purposes. To recover wages, must have free miner's certificate.

Record, &c., of Claims.

Claims must be recorded (\$2.50), and re-recorded (\$2.50). Time allowed for record is three days after location, if within ten miles of office—one additional day for every additional ten miles, or fraction thereof. In very remote places, miners, assembled in meeting, may make valid rules temporarily. Transfers of claims or mining interests must be in writing and registered. Free miners may hold any number of claims by purchase, but only two by pre-emption, except in certain cases. Claims may be officially laid over, and leave of absence granted in certain cases, but the rule is that every full claim or full interest must be worked either by owner or agent. A free miner can, by record, get a fair share of water necessary to work claim. A claim is deemed open if unworked for 72 hours on working days, unless for sickness or other reasonable cause.

44

B R I T I S H C O L U M B I A D I R E C T O R Y .

Nature and Size of Ordinary Mining Claims.

Claims, as far as possible, are rectangular and must be staked by post or tree. Sizes are, "bar diggings", 100 feet wide at high-water mark, and thence extend into the river at its lowest water level. "Dry diggings" 100 feet square. "Creek claims" 100 feet long, measured in the direction of the general course of the stream, and shall extend in width from base to base of the hill or bench on each side, but when the benches or hills are less than 100 feet apart the claim shall be 100 feet square. "Bench claims" 100 feet square. "Hill claims" base line fronting a stream 100 feet—parallel side lines at right angles thereto at summit of hill. Posts 100 feet apart. Claims not to come within 100 feet of any gulch or tributary of creek. Measurements horizontal, irrespective of surface inequalities.

Discoverer's Claims.

To one discover, 300 feet in length. To two discoverers, 600 feet in length. To three, 800 feet in length. To four, 1000 feet in length, and to each member of a party beyond four in number, a claim of the ordinary size only.

A new stratum of auriferous earth or gravel situated in a locality where the claims are abandoned, shall, for the above purposes, be deemed a new mine, although the same locality shall have been previously worked at a different level; and dry diggings discovered in the vicinity of bar diggings shall be deemed a new mine, and vice versa. A discoverer's claim shall be reckoned as one ordinary claim.

Creek discovery claims shall extend 1000 feet on each side of the centre of the creek, or as far as the summit.

Leave of Absence.

On discovery of new lode or vein containing minerals, six months. On proving expenditure, in cash, labor, or machinery, of \$1000 on each full interest (without reasonable return) one year. Under other conditions Gold Commissioner has option.

Mineral Claims.

"Mineral claims,"—that is, claims containing, or supposed to contain minerals, precious or base (other than coal), in lodes or veins, or rock in place—shall be 1,500 feet long and 600 feet wide, and, as nearly as possible, in rectangular form. Must have three posts (or tree posts) at equal distances along centre line, with a notice on each. Only one claim on the same lode or vein can be held, except by purchase. Quartz claims are deemed to be mineral claims.

To lawfully hold a Crown grant for a mineral claim, it must be surveyed by a surveyor approved by the Land Office; notice of application for the grant must be posted conspicuously on the land and on the Government office of the district, also inserted for sixty days in the Government Gazette and a newspaper, if any, circulating in the district, and proof must be given to the satis-

PROVINCIAL INFORMATION.—MINING LAWS.

45

fraction of the Government offices that \$1,000 have been bona fide expended in money or labor upon the claim. Or a Crown grant may be got by paying \$25 per acre to the Government, in lieu of representation and expenditure on the claim.

General provisions for ordinary mining claims apply to mineral claims as far as may be.

The proper representation of a "mineral" claim requires that the sum of one hundred dollars, in money, labor, or improvements, shall be expended in the first six months of every year upon the claim, to the satisfaction of a Gold Commissioner, and that the owner shall have obtained a certificate from the Gold Commissioner to that effect, within six months from the location of the claim, and thereafter within the first six months in every year, and shall have recorded the certificate immediately after its issue.

An annual tax of \$1 per acre, or fraction part of an acre, of every mineral claim is payable on the 31st December.

Leases of mining ground, ditch privileges, &c., may be issued, but will not in general be granted for a longer term than ten years, or for a quantity of ground greater than—

In dry diggings, ten acres;

In bar diggings, unworked, half a mile in length along the high-water mark.

In bar diggings worked and abandoned, one mile and a half in length along the high-water mark.

In creek claims, on abandoned creeks, one mile and a half in length.

The regulations as to flumes, ditches, and drainage need not be detailed, but it may be stated that the water taken into a ditch or sluice has to be measured at the ditch or sluice head. No water should be taken into a ditch or sluice except in a trough placed horizontally at the place at which the water enters it. One inch of water means half the quantity that will pass through an orifice two inches high by one inch wide, with a constant head of seven inches above the upper side of the orifice.

Coal Prospecting Licenses.

A twelve months' prospecting license for 480 acres of vacant coal land, in one block, may be granted by the Government on payment of \$25. The licenses may be extended for another year if the licensee has actually explored for coal on payment of \$50. The license is not transferable without notice being given to the Chief Commissioner of Lands and Works. If a licensee wishes to purchase the coal lands, he may do so under the land Act for \$2.50 per acre.

Timber Licenses.

Unlicensed persons, except for farm or mining purposes, &c., are not permitted to cut trees on Crown lands. A timber license may be granted for 1,000 acres for four years on payment of \$10 annually, and 15 cents for each

tree (except hemlock) felled, payable half-yearly. No person can hold more than one license at the same time, and it is not transferable. Millowners cannot saw logs taken from Crown lands (in which are included lands leased at less than ten cents an acre) until the timber dues of twenty cents per thousand feet, board measure, are paid.

PROVINCIAL GOVERNMENT LANDS.

Crown lands in British Columbia are classified as either surveyed or unsurveyed lands, and may be acquired either by record and pre-emption, or by purchase.

Pre-emptions.

The following persons may record or pre-empt Crown lands, viz: Any person being the head of a family, a widow, or a single man over 18 years of age, being a British subject; may record surveyed or unsurveyed Crown lands which are unoccupied, unreserved and unrecorded.

Aliens may also record such surveyed or unsurveyed lands, on making a declaration of intention to become a British subject.

The quantity of land which may be recorded or pre-empted is not to exceed 320 acres northward and eastward of the Cascade or Coast Mountains, or 160 acres in the rest of the Province.

No person can hold more than one pre-emption claim at a time. Prior record or pre-emption of one claim, and all rights under it, are forfeited by subsequent record of pre-emption of another claim.

Land recorded or pre-empted cannot be transferred or conveyed till after a Crown grant has been issued.

Such land, until the Crown grant is issued, is held by occupation. Such occupation must be a bona fide personal residence of the settler or of homestead settler, or his family or agent. Indians or Chinese cannot be agents.

The settler must enter into occupation of the land within thirty days after recording, and must continue to occupy it.

Continuous absence for a longer period than two months consecutively, of the settler or homestead settler, and his agent or family, is deemed cessation of occupation; but leave of absence may be granted not exceeding four months in any one year, inclusive of the two months' absence.

Land is considered abandoned if unoccupied for more than four months in the aggregate in one year, or for more than two months consecutively.

If so abandoned, the land becomes waste land of the Crown, without any cancellation of the record.

The fee on recording is two dollars.

The settler may either have the land surveyed at his own instance, subject to rectification of boundaries, or wait till the Chief Commissioner causes it to be surveyed.

PROVINCIAL INFORMATION.—MINING LAWS.

47

After survey has been made, upon proof, by declaration in writing to himself and two other persons, of occupation from date of pre-emption, and of having made permanent improvements on the land to the value of two dollars and fifty cents per acre, the settler, on producing the pre-emption certificate, obtains a certificate of improvement.

After obtaining the certificate of improvement and paying for the land, the settler is entitled to a Crown grant in fee simple. He pays five dollars therefor.

Payment for Land and Crown Grants.

The price of Crown lands pre-empted, is *one dollar* per acre, which may be paid in *four equal instalments*, as follows—First instalment, two years from date of record or pre-emption, and each other instalment yearly thereafter, until the full amount is paid. But the last instalment is not payable till after the survey.

The Crown grant excludes gold and silver ore, and reserves to the Crown a royalty of five cents per ton on every ton of merchantable coal raised or gotten from the land, not including dross or fine slack. It also reserves to the Crown, since the 7th April, 1887, all timber on the land, except for domestic purposes. A pre-emptor, however, can obtain a license to cut the timber of his pre-emption on payment of dues at the rate of twenty-five cents per 1,000 feet board measurement.

No Crown grant can be issued to an alien who may have recorded or pre-empted by virtue of his declaring his intention to become a British subject, unless he has become naturalized.

The heirs or devisees of the homestead settler are, if resident in the province, entitled to the Crown grant, on his decease.

If they are absent from the province at the time of his death, the Chief Commissioner may dispose of the pre-emption, and make such provision for the person entitled thereto, as he may deem just.

Pre-emption for Partnership Purposes.

Partners, not exceeding four, may pre-empt as a firm 160 acres each west of the Cascades, to each partner, and 320 acres east of the Cascades, to each partner.

Each partner must represent his interest in the firm by actual residence on the land, of himself or agent. But each partner, or his agent need not reside on his particular pre-emption.

The partners, or their agents, may reside together on one homestead, if the homestead be situated on any part of the partnership pre-emption.

For obtaining a certificate of improvement, it is sufficient to show that improvements have been made on some portion of the claim, amounting in the aggregate, to two dollars and fifty cents per acre on the whole land.

ST. JOSEPH'S. Established 1876, Collinson Street. This Hospital is under the control of the Sisters of St. Ann. Visiting Physicians, Dr. Helmcken, Sr., Dr. Helmcken, Jr., and Dr. Davie.

THE IMMIGRANT'S HOME.

Agent, John Jessop, Government Buildings.

Some five years ago when the tide of immigration commenced setting in very strongly to this western province of the Dominion, the Local Government found it necessary to provide temporary shelter for new arrivals with slender means. The two-story building, near the outer wharf, was accordingly secured and partially furnished for their accommodation; and about two years afterwards it was purchased by the Dominion Government, refitted and altered so as to better suit the purpose for which it has since been used. A caretaker is employed, who lives on the premises, and looks after the inmates and the building. From half a dozen to thirty persons or more of various ages and both sexes are usually sheltered in the Home, for periods varying from a night or two to several weeks, according to circumstances. This establishment is in charge of the Dominion Immigration Agent, to whom application must be made for admission at the office in the Government Buildings, James Bay.

VICTORIA.

POPULATION 15,000.

Victoria, at the South Eastern extremity of Vancouver Island is the capital of the province and the terminus of the Esquimalt & Nanaimo Railway, and has daily steam connection with the terminus of the C. P. R., it will doubtless be connected by ferry with the American railways extending to the Eastern states and California. Daily communication with American Sound, ports is afforded by a most efficient service. In entering the harbor, a mariner sails first Northerly, thence Easterly about a mile and half while on the Eastern side of the harbor for a mile in length is the present wharfage frontage. Surrounding this sheet of water which is almost in the form of the letter Z the city proper is built. Vessels frequently unload at the wharf of Messrs Welch, Rithet & Co at Rithetville on the Eastern side of the entrance where excellent wharfage facilities are afforded for those of the deepest draft. The question is sometimes asked by strangers why the City of Victoria was not built at Esquimalt a more commodious harbor and the head quarters of Her Majesty's Navy on the Pacific, three miles westward? It is obvious that the early establishment by the Hudson's Bay Company of Fort Victoria was doubtless due to the fact that most of the Indians congregated at Victoria, the harbor was easy of access for them and their principal village was situated here. It was in those days the natural trade centre and it has continued to the present time. Although not a rival to her two sister cities, Vancouver and New Westminster (both on the mainland) the future prospects of trade and the steady growth of all the cities in British Columbia is an assured fact and Victoria from her excellent geographical position, her lovely climate, charming drives and every worldly comfort afforded her energetic citizens, will grow and prosper far beyond the expectations of many who may in any way be doubtful of the future strides she will make. It is said that it is easy to make assertions, but a difficult matter to prove them of course the building up of Victoria to a very large city will take time; for the sake of argument, and as an illustration what time will do in this respect. the whole of the United States with her vast prairies and wealth of mine and forest increased in population very slowly during the first twenty five years of the Nation's growth; Victoria if not altogether the metropolis of British Columbia, is nevertheless the metropolis of Vancouver Island and as such, if nothing more, her future prosperity is assured. The forest wealth at her doors is with judicious management practically inexhaustable; tin, coal, iron, timber, fish and more than made the mother country great is to be found in vast quantities on Vancouver Island, and with the incoming of population and increased development of her vast resources, who can gainsay that Victoria in a few years, will make gigantic strides? The city holds fifth position in the Dominion in regard to her imports, exports and revenue, with one railway already terminating within the city limits and the intended construction of the Victoria, Saanich and

New Westminster Line, also the extension of the Esquimalt and Nanaimo Railway, Northward to Seymour Narrows and Southward to join the American system of railways. Victoria is destined in the near future to have a railway area far exceeding all previous expectations.

The following information is gleaned from Mayor Grant's report for 1888. Deaths during the year (1888) 267. Value of fire department apparatus, \$26,000.00. Salaries paid to fire department, \$3,769.00. The City Assessment roll shows value of Real Estate \$7,000,000. Total expenditure for Corporation purposes, \$257,887.10

The city is well provided with every facility for the travelling public, communication being daily with all outside cities. The following are a few of the numerous industries carried on successfully within the city limits:—

Dash and door factories, planing and saw mills, sail lofts, boat and ship building yards, breweries, soda water and syrup factories, coffee and spice mills, tanneries, saddle and harness makers, barrel and furniture factories, rice mills, broom and mat factories, corset works, stove factories, blacksmiths and foundries, boot and shoe factories, piano manufactories, waggon and carriage making, pork packing establishments, rubber stamp works, cigar factories, lithographic and chromo-lithographic printing, job printing, blank book manufacturing, bookbinding and paper ruling, brick making, cracker bakeries, manufacturing jewellers, soap works, paper box manufactory and others, too numerous to mention.

The private residences and public buildings of Victoria will in many instances compare most favorably with Eastern cities of similar size, notably the new court house on Bastion square, the bank of British Columbia, Mr. E. G. Prior's (M. P.) extensive hardware and agricultural house, Mr. Henry Young's "the White House" and Mr. David Spencer's "Spencer's Arcade" the Colonist building, the Jubilee Hospital and the new St. Andrew's Church, Mr J. D. Pemberton's Victoria block, the Opera House and Clarence Hotel, are a few among the best buildings in the city. The works for the accommodation of "C" Battery Canadian Militia, occupies a beautiful spot on the Western side of Victoria harbor.

The residence of the Hon. Robert Dunsmuir, costing about \$500,000, is an architectural improvement to Victoria that her citizens should be justly proud of; beautiful homes costing from \$20,000 to \$30,000 are to be met with in favored parts of the city, the palatial residence of Mr. Jas. A. Grahame, late of the Hudson's Bay Co, is an ornament to the Northern part of the charming site of Victoria, Mr. N. P. Snowden's residence, on the Arri, commands a most attractive and beautiful spot, Mr W. J. Macaulay's near the park overlooking the straits, and in full view of the grand Olympic mountains is a charming situation. Capt. Jno. Irving's and Hon. Jno. Robson's beautiful residences, James Bay, are models of modern design.

A free public library under the able management of Jas. McGregor L. L. D. as librarian, has been established as it fills a long felt want, it will doubtless be much appreciated.

Victoria, while enjoying every modern improvement and convenience, such as telephonic and telegraphic communication, is now about to have an electric

tramway and lighting company. The streets have long since been lighted by electric lights. It seems, while enjoying these advantages over older systems her climate, as shown by the following statement, is at all times unexcelled. Fruit trees were in full blossom on March 20th, 1839, and wild flowers were to be found in the fields in great profusion during the early part of the same month. To further illustrate the mildness of the climate of Victoria, the following extract is taken from Mr. W. T. Livock's meteorological report:—

Maximum temperature during Nov, 1883, 57°. While during Dec. it was 59°, the minimum was 26° for both months. No snow fell in Victoria during the fall of 1888 and winter of 1889.

Two of the most important works of interest and intimately connected with the future prosperity of Victoria is the Esquimalt & Nanaimo Railway and the Canadian Pacific Navigation Co. A short description of each is of importance.

ESQUIMALT AND NANAIMO RAILWAY.

This line of Railway, in length, seventy-five miles, was undertaken by the company, of which Hon. Robert Dunsmuir is President, on the terms of the famous Settlement Bill, which gave to the company a land grant and subsidy of \$750,000. This amount went but a short way towards the construction of the line, some portions of which were of a formidable character, taxing the skill of the engineers, besides making heavy drafts upon the private capital of the company. Construction was commenced in the month of October, 1884, and finished in August, 1886, the last spike having been driven on the 13th of the latter month by the Right Honorable Sir John A. Macdonald, Premier of the Dominion. The line has since been in continuous operation, and the trains, hitherto free from a single accident, arrive and depart punctually on time. A considerable portion of the road on the South end runs through a country affording most charming scenery and the line can boast of one tunnel, fifteen miles from Victoria. Shawnigan Lake, skirted by the railway, twenty-eight miles from Victoria, is a sheet of water about seven miles in length, of great natural beauty, abounding in trout and surrounded by wooded hills where large game is plentiful. An hotel has been established on the banks of the lake by Mr C. Morton where pleasure boats may be hired and fine accommodation obtained. The stations along the line of railway are in suitable localities and are amply sufficient for the present or prospective business of the line. During the time the railway has been in operation it has been much appreciated by the travelling public as shortening the trip to Nanaimo. A seat in a comfortable and elegant passenger coach running thirty miles an hour and covering the distance between Victoria to Nanaimo in a few hours is certainly a great convenience. Hon. Robert Dunsmuir, to whose energy and public spiritedness almost alone we are indebted for the railway, is the head of the well-known firm of R Dunsmuir & Sons owners of the Wellington collieries.

CANADIAN PACIFIC NAVIGATION COMPANY, Ltd.

This Company was incorporated in the spring of 1883 and commenced business with the steamers "Princess Louise," "Enterprise," "Otter,"

BRITISH COLUMBIA DIRECTORY.

"R. P. Rithet," "William Irving," and "Rellance." Shortly afterward steamers "Western Slope" and "Gertrude" were purchased, and in July of the same year, the fast and commodious steamer "Yosemite" was added to the fleet, which has since been increased by the purchase or building of the following steamers, viz: "Wilson G Hunt," "Maude," "Premier," and "Islander," thus placing this company in a position to transact any business in connection with water transportation that the public may demand, and offering superior inducements for the public patronage, by the number of steamers being a guarantee to fulfill any undertaking in the water transportation of British Columbia.

Daily trips are made between Victoria and Vancouver: tri-weekly trips between Victoria and New Westminster, there connecting each trip, during river navigation, with river steamers of the same company, for Hope, Popcum, Sumas, Chilliwack, Langley and way landings on Fraser River; semi-monthly trips to Fort Simpson, Metlahkatla, Skeena River, Bella Bella, Alert Bay, and intermediate ports on the Northern Coast, which when inducements are offered, are extended to Naas River, ports on the West Coast and those of Queen Charlotte Islands carrying Her Majesty's mails over these various routes. Trips are also made to Barclay Sound and other points as occasion requires.

This company has been, since its inauguration under the able management of Captain John Irving. The Board of Directors are:

T R Smith (President) Sir J W Trutch, R Dunsmuir, Esq; R P Rithet, Esq, Captain John Irving (Manager.) J H Lawson, Esq, (Secretary,) and Messrs F W Vincent, G A Carleton and C S Baxter fill the positions of Assistant Manager, General Freight Agent and General Passenger Agent.

The general offices of the Company are at No. 64 Wharf street, being adjacent to their wharves and warehouses.

PROVINCIAL MUSEUM.

A Government Institution, but also, largely aided by public contributions, opened about one year and a half ago, it has already become a place of considerable interest. Its collection, which is daily increasing, contains at the present time over fifteen hundred specimens, chiefly samples of ores, representing the different mining districts throughout the province, and specimens of Natural history, among the latter, are about five hundred native birds and twenty-six mammals. There are also some two hundred implements of Indian manufacture.

Its list of regular contributors number 240 and contain representatives from nearly every district in the province, including Kootenay, Cariboo and far away Casslar, showing that a hearty co-operation of the general public, and a widespread interest in the establishment of a collection of the natural products of the country has been awakened.

The collection is now being placed in the capacious building lately occupied by the Supreme Court, (Government Buildings, James Bay, where

the arrangement and classification of the various specimens will be arranged by the curator.

In the products of its mountains, rivers and forests—in the treasures which lie hid beneath its stretch of six hundred miles of sea, few countries can boast of more varied or prolific resources than British Columbia, and material enough can therefore be found within its boundaries to form one of the most interesting and instructive collections in the Dominion. But the province is one of "magnificent distances," and beyond the regular routes of travel, are expensive and difficult to explore. So much so that it is somewhat beyond the means of this institution to reach out its arms to the remotest corner and gather in the stores that there await it. The Directory therefore earnestly and respectfully requests all parties, especially those residing in distant portions of the province to collect and forward to the museum specimens procurable in their locality which in their opinion may be of interest in promoting a general knowledge of the country and its resources.

VICTORIA DISTRICT.

*The Arm, Craigflower, Cadboro Bay, Cedar Hill,
Beacon Hill, Clover Point and Mount Tolmie.*

Victoria District contains above twenty-seven square miles and includes Victoria City, The Gorge, Cadboro Bay and the several bays along the eastern shore, Gordon Head, Mount Tolmie and Cedar Hill. It is bounded on the South and East by Haro Straits, on the West by Victoria Arm (an inlet from the harbor) and on the North by Lake District. Residential houses are springing up in all parts of this section, the situation being most desirable and within a short distance of the City. From Victoria there are many excellent drives especially to Cadboro Bay where the scenery with a view of the Straits is very beautiful. The largest farms are more particularly in the neighborhood of Cedar Hill and Cadboro Bay. The surrounding country is picturesque in the extreme, abounding in hill and dale, valley and lake. The roads are noted for their excellence. There are several churches and schools throughout the district. The climate is excellent, extremes of temperature are unknown. Fruit raising is becoming a noted feature in this favored section of Vancouver Island.

ESQUIMALT TOWN AND DISTRICT.

*Including, Highland, Parson's Bridge, Goldstream,
Langford Lake and Belmont.*

In the Dominion Electoral District of Victoria and Provincial of Esqui-
malt. The town is situated about $3\frac{1}{2}$ miles from Victoria on a small
peninsula, and is the chief naval station for H. M. ships on the Pacific
Coast. The arsenal contains large quantities of stores and usual ordinance
supplies of all descriptions. The Dry Dock was commenced in the
year 1875, and was formally opened for service on the 21st July, 1887
(Jubilee year.) Its length on centre line is 450 feet, and depth at ordinary
tide 27 feet with an entrance capacity of 55 feet. The cost was about
\$900,000; the material used in its construction was Portland cement, con-
cret faced with sandstone. There is a complete system of hydrants and a
full supply of water with a pressure of 70 lbs to the square inch in case of
fire, it is also fitted up with the electric light, in fact with all the most
modern improvements, making the dock one of, if not the best on the
Pacific Coast.

Stages run four times daily, to and fro, from Victoria, and the E & N rail-
way has a station within a short distance from the town.

ESQUIMALT DISTRICT embraces the settlements of Colwood, west of
Esquimalt, Goldstream north east, Aldermere and Highland north. There
are many prosperous farmers in these districts and several residential houses
those on the Esquimalt harbor front commanding excellent views of the
extremely picturesque scenery. At Colwood the Belmont Tanning Co have
large factories etc, within half a mile of the main road.

METCHOSIN DISTRICT.

Including Happy Valley, Rocky Point and Becher Bay.

This section of Vancouver Island in the Peminnion Electoral District of Victoria and Provincial of Esquimalt, is situated south-west from Victoria, reached by stages and distant about fifteen miles. It is essentially a farming district, there being extensive cattle and sheep ranges on the adjacent hills.

By a recent act of the Provincial Legislature a charter for a branch line of railway was granted, with a projected terminus at Becher Bay, an extensive harbor at the southern extremity of the district. This section is particularly noted for its charming scenery and as a rural suburb, in consequence of its close proximity to Victoria and Esquimalt, will at all times be a favorite resort for riding and driving parties.

ROCKY POINT is south and Happy Valley in north-east part of Metchosin. An Episcopal church dedicated to St. Mary was consecrated in 1873. Excellent public schools are provided. The Dominion quarantine hospital is in this district

SOOKE.

Sooke situated about 23 miles south-west from Victoria, is a thriving settlement and amongst the first on the Island. The soil is mostly black loam and clayey loam with clay subsoil, and is very productive. Cereals, fruit and vegetables thrive well, oats have been sown as late as July 1st in some of the swamps, and a crop of hay taken off in September, having attained a height of five feet. Apples, pears, and plumbs do exceedingly well, and some of the pears are the finest in the Province; turnips have weighed from twenty to thirty pounds each. Iron of a good quality, and copper are in the district, the copper mine having been worked several months this year. Souke harbor is a splendid sheet of water, and salmon are very plentiful in it. The "Woodside Mill" owned and run by the Muir Bros., carry on a lumbering business. Mr. James Keill, cooper, does a good business. There are also a few good sites that might be obtained and used to advantage, for public works, such as sugar refining, animal charcoal, &c, especially when the proposed extension of the E & N Ry to Becher Bay or Souke is completed. There is communication twice

a week with Victoria by a good wagon road; mails go once a week. A sloop owned by Mr. Jackson plys between Sooke and Victoria. There are two schools in the district, and church service is held once a month. Sooke is one of the favorite hunting grounds of the Victorians—a large number of deer have been killed in the district this season—grouse and quail are plentiful, brant and a variety of ducks are found all over the district. Good fishing is to be had both in fresh and salt water.

OTTER POINT.

Otter Point in the Dominion Electoral District of Vancouver and Provincial on Esquimalt, is situated south-west of Sooke to which it joins. All the hemlock bark used in the Victoria tanneries is procured from this section. There is considerable good land open for settlement. The soil is principally a clay loam, producing splendid crops of clover, grasses, roots and grains. The district is of coal formation, and copper ore has been found. Cattle and sheep thrive well.

SAANICH.

The peninsular of Saanich comprises the districts of North and South Saanich and Lake, in the Dominion Electoral District of Vancouver and provincial of Victoria district; is situated North of Victoria, and comprises about 40,000 acres, mostly all farming land, the soil although varying considerably is, more particularly in the extensive valleys and prairies, of a rich black loam having a depth of from 8 inches to 2 feet, while that bordering on the coast is chiefly comprised of lime and shell (detritus) the latter being a valuable fertilizer for the garden and orchard. In the northern part of the Peninsular coal of a superior quality has been discovered. During the next session of Parliament application will be made by a company to construct a railway from Victoria to a point near Shoal Harbor and Swartz Bay at North Saanich, thence to Garry Point, Lulu Landing, also to the South side of the Fraser River, near Canoe Pass and to connect with the Canadian Pacific Railway and the railway system of the United States. If completed it will undoubtedly be a great benefit to the Peninsular, bringing as it will the market of the Mainland to within easy distance, for the sale of the large quantities of farm and orchard produce cultivated in this district.

At North Saanich, Messrs. Brackman & Ker, have an extensive grist flour mill employing many hands; and this summer extensive brick fields have been started by Messrs. Copeland & Smith. The Saanich Lime Co's have large kilns, where they manufacture all grades of lime, supplying the mainland and the island extensively. The East and West coast steamers call at frequent intervals at the commodious wharf situated close to the flour mills. The agricultural society has been established some 20 years and annually holds an exhibition in their extensive hall, which is enclosed in about 4 acres of land. There are two English churches with a permanent rector, the Rev'd Gregory, and one Catholic, and three public schools. Stages leave Victoria for South Saanich Lake and North Saanich. The East and West roads run the entire length of the Peninsular, and are distant about 2½ mile apart. During the season salmon are very plentiful in the waters which separate the peninsular from Cowichan, and good trout fishing can be had in the several streams and lakes in the district.

SALT SPRING ISLAND.

Burgoyne and Vesuvius Bays, Ganges and Fulford Harbors and Beaver Point.

Salt Spring Island, in the Dominion Electoral district of Vancouver and Provincial of Cowichan, is the principal of the many islands lying in the Gulf of Georgia between Vancouver Island and the Mainland, and is reached by steamer from Victoria (50 miles) and Nanaimo (40 miles) the steamer calling at Vesuvius and Burgoyne bays and Beaver point. The New Westminster steamer also calls. It is well settled, very little land remaining in the hands of the Government. The roads to the various parts of the island are remarkably good. Its position between the three centres of population, Victoria, Vancouver and Nanaimo affords a great advantage over many parts of the Province, and enables the settlers to reach the best markets. As a fruit growing district and also for sheep raising it stands unrivalled, whilst in its numerous valleys is found a large quantity of first class agricultural land kept in a state of fertility by washings from the hills. It will probably be known in the near future more for its minerals than other products. Coal is found in all directions, at present only in small seams and pockets, but in many instances show that extensive fields await development. The salt springs more particularly at the North end of the Island will probably be used some day in the manufacture of a household commodity. The stone for constructing the Esquimalt Dry Dock was obtained from a quarry in the Island. Cushion Lake is the resort of picnic parties from all parts. Climate is very healthy, and the scenery magnificent commanding a great stretch of land and sea. There are three public schools, and the spiritual wants are attended to by clergymen of three denominations. There are several good harbors, viz: Fulford Harbor, Long Harbor, Ganges Harbor, and Vesuvius and Burgoyne Bays, etc. A Good

Reid, Saturna, Samuel, Narrow and Tumbo, all situated on the great waterway for all vessels from Victoria, (35 miles) Vancouver. (35 miles) New Westminster (35 miles) and the coaling port of Nanaimo, (34 miles.) There are many excellent farms in this district, producing abundant crops of grain and first-class fruit. Cattle, sheep and hogs are also raised in large numbers. Fish is very plentiful in the passages and straits that divide the several Islands. Deer and grouse abound in moderate numbers. The Alder, Maple, Douglas Pine and Cedar, timber the valley and hillsides. There is every indication of Coal in the settlement.

MAPLE BAY.

Maple Bay in the electoral district of Vancouver and Provincial of Cowichan, a snug harbor on the Eastern side of Cowichan District, has ample wharves, and is a calling port of the East Coast steamers. The excellent yearly agricultural shows are one attractive feature of this place. It is the outlet or shipping port of an extensive agricultural section. A general store, post office and hotel are established here.

SHAWNIGAN,

Including Cobble Hill.

Shawnigan District, in the Dominion Electoral District of Vancouver and Provincial Electoral District of Cowichan, having its centre at Cobble Hill. an important station on the E. & N. Ry, 31 miles from Victoria. There are good roads leading to all parts of the settlement, which is principally agricultural. There is also a lime quarry and kiln, and the excellent quality of the lime has already established for it a demand in the Province.

A large and comfortable hotel, with general store attached, has just been erected close to the station, which will prove very convenient to sportsmen and travellers generally.

KOKSILAH,

Koksilah in the Dominion Electoral District of Vancouver, and Provincial Electoral District of Cowichan, is a settlement situated about midway between Victoria (38 miles) and Nanaimo (35 miles) and is a station on the Esquimalt & Nanaimo Railway. The population of this district is already considerable, numbering over 30 settlers within an area of four square miles, whose splendid farms and industrial enterprise compare favorably with the working results of other districts. The rate of progress since the opening up by the railway received an important impetus, and the result is that there has been drawn to Koksilah not only settlers of capital, who now invest with perfect confidence, but it has also stimulated the poorer settlers who formerly vacated their farms for more remunerative work to apply themselves diligently to the improvement of their homesteads and the cultivation of the soil.

COWICHAN DISTRICT DIRECTORY.

195

CHEMAINUS.

Including Oyster Bay Thetis & Kuper Islands.

In the Dominion Electoral District of Vancouver and Provincial of Cowichan, is situated on Horse Shoe Bay, which affords excellent anchorage and protection for the vessels which load lumber at the saw mill, the property of Croft & Angus. The mill cuts sixty thousand feet per diem, the principal part of which is exported. There is an excellent Hotel, also store and Court House. The Railway station is close to the mill and steamboat landing. The water supply is excellent. There are a number of fine farms in the vicinity.

COWICHAN DIRECTORY.

197

COWICHAN,

Consists of the sub-districts of Cowichan, Quamiehan, Shawnigan, Comlaken, Somenos, Sabtlan and Chemainus, and the adjacent Islands of Salt Spring, Galiano, Mayne, Pender, Saturna, Moresby, Prevost, Portland, Kuper, Thetis and Reld.

Cowichan Lake, perhaps the finest and largest lake on Vancouver Island, about twenty-five miles in length, environed with bold mountains and magnificent cedar and pine forrests and is famed as a fishing and hunting resort. A stage takes the tourists from Duncan's station to the Cowichan Lake Hotel (24 miles) or a pleasant canoe journey may be taken up the Cowichan River, with good fishing en route. Attracted by the beautiful surroundings and excellent sport numerous settlers have made their homes at the Lake, and the land available for agricultural purposes is being rapidly taken up.

At Duncan's station a site for a town has been laid out and buildings are springing up in every direction. Here the fine agricultural hall of the Cowichan and Salt Spring Agricultural Society occupies an eligible and convenient position alongside the railway and the Quamiehan Hotel and Beaumont House afford every accomodation to travellers.

SOMENOS.

Somenos, in the Dominion electoral district of Vancouver and Provincial of Cowichan, is situated on the Esquimalt & Nanaimo Railway, about thirty-five miles from Nanaimo and forty miles from Victoria. It is the largest district in the Municipality of North Cowichan. Its chief industry is agriculture. Butter is extensively made and is one of the chief products of the place; grain, roots, vegetables and fruits are also extensively grown and are unexcelled both for quality and quantity. Its scenery is both grand and picturesque; and any person wishing to have a grand view could not do better than to climb mount Prevost, the most prominent mountain in

Somenos, and judge for himself of its grandeur. Somenos is the most important district in Cowichan for game, deer, ducks, grouse &c being found in abundance, fish also abound in the lakes and creeks, and sportsmen could not do better than take a trip to this part of the world where the climate is unexcelled for mild winters and cool summers. One drawback to Somenos is that there is no hotel for visitors to stop at which long felt want we hope will soon be supplied. The shortest route to Cowichan Lake, the well-known sporting place, where it is unsurpassed for fish &c, is from Somenos station.

NANAIMO.

The site now occupied by the city of Nanaimo was bought by the Hudson's Bay Company from the Indians in the winter of 1852, and was established by the company as a trading post and mining village, where they carried on operations until 1862, when the town plot, mining works and buildings, together with an extensive tract of country which had been acquired by special grant from the Crown, were purchased by the Vancouver Coal Mining and Land Company, [Limited]. The population of the city and neighborhood is estimated at about 7,000. This number is being continually added to by immigration of miners, mechanics, laborers and settlers, with, in many cases, their families; this influx of new population will in all probability be steadily maintained by the progressive development of the coal fields and the stimulus of additional railway construction northward during the next few years.

The city of Nanaimo, in the midst of a rich mineral region abounding in first class coal, with extensive colliery works in full operation, surrounded with good farming and stock country, and possessing exceptionally natural facilities and resources, is destined to attain a high position of industrial, manufacturing and commercial importance and prosperity. The city wharves regularly receive steamships from San Francisco, Portland, Or., Alaska and other foreign ports, as well as from Victoria, Vancouver, New Westminster and coast ports, and a fleet of trading and coaling vessels. The merchants and mechanics of Nanaimo have been long known in the commercial world for their good business standing; and on the whole there are few communities where thrift and contentment so generally prevail as in this city.

The mainspring of the coal industry of Nanaimo is the enterprising British joint stock company, known as the Vancouver Coal Mining and Land Company [Limited], whose proprietary rights are ably represented in the city by their superintendent, Mr. Samuel M Robins, J. P.

The line of the Esquimalt & Nanaimo Railway, built by the Hon. Robert Dunsmuir, M. P. P., and his associates, passes near the city, affording rapid and excellent railway communication.

B. W.

The remarkable growth of Nanaimo during the past year proves the correctness of the prediction in the last B. C. Directory that it was destined to attain a high position of industrial and manufacturing importance. The population of the city and neighborhood has almost doubled its former number; many substantial and ornate buildings have been erected; and the industries, shipping and trade of the place are extensively enlarged by the development of new coal mines, yielding large supplies; and manufactories and houses of business are well established, all affording gratifying and unmistakable evidence of the prosperous advance being made by Nanaimo. Further marks of progress may be indicated. The Nanaimo Water Works Company now furnish an abundant supply of excellent water from a pure source at Chase river, for domestic, manufacturing, mining and shipping purposes, and by means of hydrants, sufficient in number for the extinguishing of fires throughout the city.

The Nanaimo Gas Company meets all requirements for illumination, as evinced by the well lighted streets, places of business and public institutions. The Telephone Company has accomplished the construction of a servicable system of speedy communication amongst business men.

The Dominion Government are doing good work in removing from the Harbor some obstructions to navigation and have constructed a canal across Dolhelta peninsula that is a boon to voyagers between the settlement on Gabriola Island and Nanaimo.

The miles of new roads and streets lately opened and graded in the city and its suburbs, the colliery work, railways and wharves which have been newly made and are still in progress, the considerable municipal and governmental improvements are all noteworthy especially the new school house and the court house built by the Provincial Government. The Bank of British Columbia have successfully established a branch in the city under the management of Mr. Geo. Cruickshank (the contractor being Mr. Geo. Mesher of Victoria.) A larger Presbyterian church rears its spire, while it is said the Methodists will shortly follow with a new church on Wallace street. From the numerous fine brick buildings it would seem that the city has fairly entered upon a brick era of its existence.

The prosperity enjoyed by Nanaimo is largely owing to the opening of fresh coal mines in the immediate neighborhood, and the substitution of white labor for the hordes of Chinese formerly employed in the mines. It is contemplated to sink an extensive shaft near the East Wellington mines on the lands of the Vancouver Coal Co.

WELLINGTON.

Wellington in the domain electoral district of Vancouver and provincial of Nanaimo comprises North, East and South Wellington and is exclusively a mining district. Departure Bay is about three miles north of Nanaimo and is the shipping point of the Wellington collieries owned by Messrs. Dunsmuir & Sons. These collieries are situated in the Mountain and Wellington districts and comprise the Wellington mine and adit level (not now worked) and Nos. 3, 4, 5 and 6 pits.

The coal in these mines is worked on the pillar and stall system, large pillars of coal are left, being nearly one-third of the bulk of the coal. An examination is made monthly by a deputation of the miners employed, they being furnished with everything requisite to make a complete examination.

The out put for the year 1888, was 198,392 tons, the number of hands employed 695, earning per day from \$3.50 to \$4.50

No. 3 pit in the valley of the Millstream river is worked with the fan shaft as upcast and all the workings are by way of a slope starting about 70 yards south from the bottom of the shaft. Ventilation is good, is on the separate split system, one on the south side and two main divisions to the north side of the slope.

No. 4 pit is down on the top of a high bluff overlooking the Mildstream valley. The coal is worked from what are known as the north and south side workings; the workings of the mine are on the same system as No. 3 pit except a small place on the south side where they are now opening out to the long wall system. Ventilation is good, motive a large fan on the top of the upcast shaft, kept constantly running by a powerful steam engine, and also on the separate split system.

No. 5 pit. From this pit there is a branch line from the E & N Railway. Ventilation is very good; motive power a large fan on top of the upcast shaft and also ventilation by the separate split system with five main divisions.

In this pit occurred the disastrous explosion on Jan. 24th, 1887 when 77 lives were lost, 31 being white men and 46 chinese.

No. 6 sinking shaft is fully 900 yards east of No. 4 pit and not far from No. 2 of the East Wellington Co's shaft. This pit is now down 775 feet and will have to go nearly 200 feet further before coal is reached. The railway system is already extended to this pit.

East Wellington Collieries owned by the East Wellington Coal Co, (R. Chandler Esq) consists of No. 1 and 2 shafts, and are worked on the long wall system. The two shafts are fully half a mile apart in a direct course, the places are connected underground and by the winding of the workings there are 1400 yards of a level to connect. Ventilation is good, motive power, a furnace at No. 1 pit, one division of which is upcast for both places, the other division being the downcast for the part of the workings of No. 1 pit. The air comes in at one end of the division and out at the other and as the goul behind is well filled there is not much chance for gas to collect.

The output of coal for 1888 was 30,092 tons, giving employment to 132 men, earning per pay being from \$3.00 to \$5.00.

GABRIOLA ISLAND.

In the Dominion Electoral District of Vancouver and Provincial of Nanaimo, a noted Island in the Gulf of Georgia, about eight miles in length and close to the Vancouver shore, it contains valuable coal measures, farming and mineral lands. There are schools at both the north and the south ends of the Island. The principal market is Nanaimo.

NANOOSE BAY.

Nanoose Bay in the Dominion Electoral district of Vancouver and Provincial of Nanaimo is situated about eight miles north of Nanaimo and within five miles of the Wellington colonies. The district extends to Englishman's river or Parksville, a distance of about 12 miles by 6 miles wide. It is entirely a farming community. The bay, 4 miles by 1½ miles, affords good sheltered anchorage for vessels.

COMOX.

In the Dominion Electoral District of Vancouver and Provincial of Comox.
 No part of Vancouver Island offers more inducements than this section.
 Although from the steamboat landing, or Comox town, as some call
 it, or Port Augusta as it is called on the map, to the end of the present set-
 tlement, no matter in which way he goes, every lot is taken up consecutively
 and settled upon.

It may be described as prairie, alder-bottom, open-land, swamps and heavy
 timber, yielding when cleared equal to the Delta lands of the Fraser, is
 neither subject to overflow, nor pestered with mosquitoes. The alder-

bottom is good land, inclined to be wet during the winter, but that will remedy itself as larger areas are improved. It is easily cleared, very productive, and the stumps soon rot, tracts of this kind of land are to be found from the landing to Cape Mudge, a distance of twenty miles, nowhere in large areas, but the individual places are most desirable. The open land is chiefly scrub oak, willow and poplar, has some surface stone, but no rock, the soil, a clay-loam, a good yielder, and earlier in the season than any of the rest. The swamps are the most desirable of the unoccupied lands, they are mostly old beaver dams, varying in size from a few acres to 500 acres, they are covered with wild grasses, and on the drier ones scrubby brush. There is little chopping to be done but they are wet and must be ditched, some of these swamps have lakes near them and sufficient water fall for 20 to 40 horse power for four or five months of the year; many of them are very beautiful in the dry season, and when reclaimed will be inexhaustible in fertility. These lakes are a favorite resort for trout, and the swamps of all kinds of game the Elk here finds all his wants supplied. Surrounding these swamps are acres of alder and cedar, the latter being easily worked for building purposes. The heavy timbered land is good soil but the cost of clearing will prevent any great extent of it from being reclaimed until the cost of labor is greatly reduced. All kinds of grains are grown successfully, fall and spring wheat, or corn tomatoes and the like, mature and do well. Everything that constitutes grain and deer may be found here, snow-capped mountains, lakes, winding rivers, and fertile valleys and great areas of timber.

Port Augusta is a fairly good harbor, at the wharf are all the conveniences of a town of 10,000 people. Stores, hotels, livery stables, blacksmith shop, butcher shop, shoe shop, private boarding house, etc., supplies can be had at Victoria prices. In the settlement are three churches, Episcopalian, Presbyterian and Roman Catholic, the Methodist body have a missionary who holds services in different parts of the settlement. Three public schools, about 4 miles apart, a weekly mail, 2 steamers a week from Nanaimo, 10 miles, from which point you can go to Vancouver or Victoria, also a steamer plying between Victoria and the mines, which are directly across the bay from the settlement wharf or landing, as is called. Its distance from Victoria has been its only drawback, that difficulty is not now felt with the frequent communication by steamers. The opening of the mines has infused new energy into the settlers and a bright prospect is before it. The iron deposits at Texada Island, whether the ore be smelted there or at Comox, must greatly add to its prosperity. There are two Saw mills, one has been running for years to supply local wants. It has excellent water power and may be increased in power to meet the growing demand. It is centrally situated on the Courtney river; at this point a town is being surveyed and plotted off, there is a post office, blacksmith shop, church, farm houses and private houses all around this centre. The other mill is owned and worked by the syndicate at the mines for their own use, as this company is starting a town there, for a time at least they will require all the lumber they make. It is admitted by all who have tried it that this is the sportsman's paradise, elk, deer, grouse, geese, ducks, cranes, bears and panthers are plentiful in their haunts for the larger animals you must go back a long distance from the settlement.

BRITISH COLUMBIA DIRECTORY.

The rivers and lakes team with fish, and give the followers of Isaac Walton full scope for his patience and lugenity. Temperature depends on the distance from the coast. At the landing the plough may be at work and 4 miles inland quite a severe frost, the lowest may be put at 10 deg. of frost, the highest 110 in the sun; winter begins with December and ends with March, often shorter, never severe. Many allow their cattle to run in the woods all winter. Labor is high but not plentiful, while the logging camps are in operation, they pay good wages, as high as \$75 a month and found. At the mines a large number of men will find employment outside of the experienced miner in clearing land, making roads, railroading, bridge building, etc, wages, according to nature of the work. Farm hands get \$20 a month all the year round and found; \$35 to \$40 during the summer months, labor in this line is equal to the demand.

This is not a gold producing country, only small quantities having been found, but it is shown by the geological surveys to be a vast bed of coal. An attempt was made some years ago to open up the coal measures, but now the company, owning the lands, has opened them in many places, is building a railway from the pits to the sea, a distance of 14 miles, and expect to put out 2000 tons daily within the next six months. The locomotive is already on the ground, and the bridging and track ready for the rails, an enormous wharf constructed for the convenience of their shipping, and from the energy of the owners we may feel sure the industry will be prosecuted vigorously. The number of men employed in this trade alone, will quadruple the population of Comox.

ALBERNI.

Alberni, in the Dominion Electoral District of Vancouver, and Provincial of Nanaimo is situated, in the centre of the Western Coast of Vancouver Island, distance from Victoria about 135 miles and having a monthly service of steamers between them. Alberni valley is about 20 miles long by 6 miles wide, it is somewhat heavily timbered but easily cleared. The natural resources are, besides agricultural, timber and fish, coal is known to exist, also gold and copper. The Somass river runs through the valley and joins an arm of the sea called the Alberni Canal, which widens out towards the west Coast and is termed Barclay Sound. From the landing at Alberni to Cape Beale light house, at the mouth of Barclay Sound is about 30 miles. There is a good road to the East Coast by Cameron Lake Englishman's River on the East Coast is distant 32 miles. During the present year an excellent pass was discovered through the mountains to Comox and shortly undoubtedly a good wagon road will be made. Uchuckliset, 20 miles down the canal, is the chief station of the Barclay Sound Fishing Company; further on, about 6 miles, Mr. Logan carries on an extensive dog fish oil business. Alberni settlement is about four years old, although there are pioneer settlers that have been there many years. Already many farms and homesteads are flourishing. A townsite has recently been surveyed at the head of navigation. There are two post offices, east and west side of the Somass river with a weekly mail service with Nanaimo and two public schools. An Ontario firm intends shortly erecting a large saw mill on the north side of the canal a distance from the settlement about four miles, and many other industries will shortly, without doubt, be commenced. Alberni will become before long a very important place, it is hoped the Dominion Government will quickly move in the matter of granting a sufficient steamboat subsidy so that the settlers by their pluck and energy who have gone into this rich valley may not be without proper and frequent means of communication with the outside world.

ENGLISHMAN'S RIVER OR PARKSVILLE.

Parksville, in the Dominion Electoral District of Vancouver and Provincial of Nanaimo, is located on the east coast of Vancouver Island; distant from Nanaimo by steam boat 20 miles, and from Wellington station on the Esquimalt and Nanaimo Railway, by a good wagon road, 15 miles. It is comparatively a new settlement, but everything tends to make it a most important one. The farming belt lies about 8 miles south and 15 miles north-west. Messrs Hirst Bros have about 200 acres and Messrs Nelson, Parks & Sons 480 acres. The Messrs Lees have beautiful farms.

YALE

Yale, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is on the right bank of the Fraser river, about 110 miles from its mouth, also a station on the Canadian Pacific Railway, 104 miles from Vancouver and 2801 miles from Montreal. Yale is practically the head of navigation on the Fraser. The town stands in a small area surrounded by lofty wooded hills, and was previous to the removal of the railway, repair, etc, shops to Vancouver, of considerable importance, but now Indians and Chinese are the chief inhabitants. Mining is still carried on extensively around Yale, the Prince George, the Queen Silver and the Gold Bar Mining Companies being the most important. A number of Chinese are engaged in washing gold on the rivers bars. A Church of England school for girls, under the control of the sisters of All Hallows, is an excellent institution.

SPENCE'S BRIDGE

Spence's Bridge, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale—a station on the Canadian Pacific Railway, 175 miles from Vancouver, and 2725 miles from Montreal—is situated on both sides of the Thompson River, connected by a substantial bridge, also about equal distance 80 miles east of Yale and West of Kamloops, and 47 miles from Nicola Lake. It is a distributing point for the Nicola valley. The old wagon road up this valley to the Cariboo Country here crosses the river.

LYTTON

Lytton, in the Dominion Electoral District of Yale and Kootenay, and Provincial of Yale, is situated at the junction of the Fraser and Thompson rivers, a station on the Canadian Pacific Railway, distance from Vancouver 153 miles, from Montreal 2747 miles; altitude 675 feet. The town is very prosperous and a large trade is done with the Indians, they being very numerous, the Chinese also have several large stores. The town is named after Lord Lytton, at one time Colonial Secretary.

ASHCROFT

Ashcroft, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale. is situated on the South Thompson river, the Bonaparte river entering the Thompson about one mile from the town. It is one of the most important stations on the Pacific Division of the Canadian Pacific Railway; distance from Vancouver 207 miles, from Montreal 2698 miles, altitude 1075 feet. Extensive stock raising is carried on in the vicinity. It is the departure and trading posts for Cariboo, Clinton, Lillooet and other settlements in the northern interior of the Province, and daily may be seen pack mules and trains of freight wagons heavily laden drawn by oxen arrive and depart. A large flour mill is located on the junction of the Bonaparte and Thompson rivers and the B. C. Express Co have their headquarters in the town, their stages leave weekly for Cariboo and three times a week for Clinton, connecting at Clinton with a stage for Lillooet. The climate is exceptionally mild; dry and extremely healthy. Several first class hotels are near the station. The Ashcroft and the Cariboo are both first class.

CACHE CREEK

Including Bonaparte Valley Directory.

Cache Creek Valley, in the Dominion Electoral District of Yale and Koot-
 enay and Provincial of Yale, is situated on the Cariboo and Savona Ferry
 roads, six miles from Ashcroft on the C P R. Some of the best farms in the
 Upper Country are here. C. A. Semlin, M P P, has a fine farm on which a large
 quantity of hay and grain are raised, and Harper's ranche, consisting of many
 acres of good arable land. There is also a large number of cattle reared on these
 ranches. On the Bonaparte, Park's ranch is beautifully situated and has
 never failing water for irrigation purposes. All the ranches in the valley
 raise a great number of cattle for the Vancouver and Victoria markets. There
 is a fine summer range on Hat Creek, which flows into the Bonaparte at
 Cargile's. The Bonaparte is settled all along from Cache Creek to the 124,
 when the Cariboo road turns off northward. The best quality of potatoes
 grown in the country are raised in this valley, and commands the highest
 prices. The land is peculiarly adapted to raising root plants. Twenty miles
 from Ashcroft is the 124 Mile House kept by Jacob Mundorf who is known for
 setting an excellent table for travellers on their way up country. The stage
 changes horses here at noon on its way to Clinton. At the 126 Maiden Creek
 is the finely cultivated farm of Mr. Dougherty, who raises large quantities of
 farm produce.

LILLOOET

Lillooet, in the Dominion Electoral District of Cariboo and Lillooet and Provincial of Lillooet, is situated on the right bank of the Fraser river and is reached from Ashcroft by the B, C. Express Co's stages, 58 miles, from Clinton 47 miles and from Lytton by trail 40 miles. The stages making close connection at Clinton with those for Ashcroft and Cariboo. The valley here is about six miles in length by four in breadth. The famous Seton Lake is three miles south, the length of which is fifteen miles and only separated from Lake Anderson by about one mile, the latter being about seventeen miles in length. The agricultural land in this district is very rich, and the farmers are prosperous. Quartz has been discovered on Cayoose creek and Anderson Lake. There are, at time of writing, 95 mineral claims recorded. The prospects for a permanent camp are exceedingly good; the ore is free

PAVILION.

Pavilion, in the Dominion Electoral District of Cariboo and Lillooet and Provincial of Lillooet, lies between Lillooet and Clinton, twenty one miles from the former, and twenty six miles from the latter, on the Lillooet-Alexandria wagon road made in 1862. It is also directly connected with the Yale-Cariboo road by the Marble Canyon road (an excellent work effected by the present Government.) The distance from Ashcroft station on the C. P. Railway is 41 miles. Cereals, vegetables and fruits of all kinds, come to perfection in this district. At the Fountain excellent grapes are grown and the cultivation of the vine could, without doubt, be profitably pursued on the lower benches of the Fraser. There are ample summer ranges for much stock, and many cattle and horses are raised. Provision is also made for stock in winter. It is also well adapted for sheep.

CLINTON.

Clinton, in the Dominion Electoral District of Cariboo and Lillooet and Provincial of Lillooet. Thirty-two miles from Ashcroft is the village of Clinton, the stage generally stays here for the night. Clinton is a central point of the settlements towards and on the Fraser. The Lillooet and other roads form a junction here. The post office, which is a distributing point, two stores, two hotels, a blacksmith, carpenter and tin shop, owned by McLellan & Co., jail and Government agency are the principal places. Five miles from Clinton, on the Bonaparte is the Mound farm owned by W Saul. Large quantities of hay and wheat of the finest quality are raised as well as excellent potatoes. Mr. Saul has also a stock farm and has the best stock of horses reared in the province. There are a few ranches along the

ERSKINE'S Boot and Shoe Emboorium, }

Lillooet road to Kelly's Lake, twelve miles from Clinton. This lake contains fine trout and is important for the sportsman. Pavilion Mountain is reached twenty miles from Clinton and contains extensive ranches and stock farms. Lillooet, about 94 miles from Clinton is situated on the Fraser and had been in former years a lively place when miners passed up to the gold fields of Cariboo. A few miles from Lillooet is the famous Bonanza Ledge which promises to be the most valuable discovery yet made in the province; the quality of ore is unsurpassed. The assays milling tests are good and in a short time this mine will be developed, it is owned by Messrs Bell, Gould, Ward, Soues, McB Smith and Harvey. The climate of Lillooet is well known for its mildness and grapes and vegetables are grown in profusion. There are a few ranches, stores and hotels in the village. The future of this vicinity promises well owing to the discovery of quartz. There are many locations which yield ore of free milling quartz. On Bridge River 29 thousand acres of the best white and yellow pine land in the world are purchased by two gentlemen who intend to raft the lumber down the Fraser to market on the Coast. This is a new industry for the interior, and the enterprise deserves success and encouragement.

70 MILE HOUSE

Is situated 23 miles from Clinton, in the same district, on the Cariboo road. This extensive stock farm is owned by Wm. Boyd; vast quantities of prime butter are made here every season. The table is well furnished and travellers are supplied with every comfort. In the fall this is the paradise for sportsmen; geese, ducks, grouse, deer and bear are plentiful. Green Lake a beautiful sheet of water is near the 70.

LAC LA HACHE

Including Chimney Creek and Bridge Creek, Etc.

Lac La Hache in the Dominion Electoral District of Cariboo and Provincial of Lillooet, is situated on the Cariboo wagon road about 100 miles from Ashcroft station, on Canadian Pacific Railway and 68 miles from the town of Clinton. Farming, stock raising and butter making are the principal industries in the valley, between 40 and 50 thousand lbs of butter is the annual product. The lake is eleven miles long and about one to three wide and abounds in fine fish. All game are found in great numbers. Stages pass weekly to Barkerville and Ashcroft.

100 MILE HOUSE

Is 55 miles from Clinton, owned by T. Macaulay Hamilton. Mr. H. has a valuable stock range and a good business stand. Here the Lac La Hache Valley may be said to begin. Lac La Hache Lake is an extensive sheet water containing large quantities of fish which are caught by seine and salted. There are many stock farms along the valley. At the 108 kept by W Walker the stage changes horses; here is also a telegraph office. W. Able, W. Kinlays and others are the principal ranchers.

134 MILE HOUSE.

This ranche is owned by Mr. Wm Morrison. It is an extensive stock farm and a great quantity of hay is cut for stock. This is also one of the stations of the stage to Cariboo. Great quantities of butter are made along this valley and command a fair price

150 MILE HOUSE.

Including Chimney Creek Horsefly, and Williams Lake.

In the Dominion Electoral District of Cariboo and Lillooet and Provincial of Cariboo. Is situated 135 miles from Ashcroft and is generally reached by regular stages in these days. There is one well stocked store and hotel kept by Veith & Borland. The Horsefly is about 41 miles from here and promises to be an extensive mining field for placer diggings. There are also fine ranches in this vicinity, The Mission school and farm are within a few miles of the 150 and also an Indian reserve. Twelve miles from the 150 is Williams Lake, near which is the extensive ranch of Wm. Pinchbeck. Root crops average from ten to fifteen tons to the acre. A grist mill and saw mill, in which the most improved machinery is used. Near the head of Williams Lake, not far from St. Joseph's Mission is the fine farm owned by C. B. Eagle. The fertility of the soil where water can be procured for irrigation is inexhaustable; yet the prosperity of the interior depends on the mineral development. The general prosperity of the district has not been what might be expected of a new country where energy and capital would develop its resources. Capitalists invest only when there is a certainty of receiving a return for their investments. At present miners look more to the future and the hope that they will turn out well. A few quartz mills working successfully would give an impetus to business

VAN WINKLE OR STANLEY

Van Winkle, or Stanley, in the Electoral District of Cariboo and Lillooet, and Provincial of Cariboo, is reached from Ashcroft by the B. C. Express Co's stages, distance about 280 miles. Van Winkle is entirely inhabited by Chinese, the Europeans having occupied Stanley, a mile westward, and here the Chinese carry on the principal trade. Owing to the want of capital several large shaft houses containing some very fine steam power are allowed to remain idle and rusting. Lightning Creek running through Stanley has been imperfectly worked, owing to the same cause. The settlers are living in hopes of times improving and returning once more to the prosperous times of ten years ago.

BRITISH COLUMBIA DIRECTORY.

BARKERVILLE.

Including Antler Creek, Conkling Gulch, Cunningham Creek, Germansen Creek, Grouse Creek, Grub Creek, Lightning Creek, Munson River, Mosquito Creek, Richfield, Slate Creek, Stouts Gulch, Sugar Creek, Williams Creek.

Barkerville, in the Dominion Electoral District of Cariboo and Lillooet and Provincial of Cariboo is situated on Williams Creek at the termination of the Cariboo wagon road, is reached by the B C Express Co's stages from Ashcroft, distance 285 miles. This creek has supplied many millions of the dollars taken out of the Cariboo district. The shallow and easily worked portion being nearly exhausted, hydraulic pipes now occupy the attention of the alluvia miners; washing away banks from 40 to 90 feet deep by the help of a great pressure of water. Many quartz reefs are to be seen cropping out in and about Barkerville and it is hoped that with the aid of the Government testing mill about to be erected, much of the latent wealth of the district will be made available. Here are located the Government agent and assay offices, court house, school, post office, churches, etc. The mail arrives weekly.

Government Agent and Gold Commissioner—John Bowron.

NICOLA VALLEY.

Including Coulties and Stump Lake

Nicola is centrally situated, being distant from Kamloops 69 miles, Spence's Bridge 50 miles, Hope 80 miles, Granite Creek 69 miles, Similkameen 60 miles. A good and well kept wagon road extends from Kamloops to Spence's Bridge, passing through nearly all of Nicola Valley. A mail coach makes weekly trips over the entire route as follows. Clark's express leaves Kamloops with mails and passengers every Monday morning and reaches Central post office, foot of Nicola Lake, at night, on Tuesday proceeds to Spence's Bridge; returns from Spence's Bridge to Nicola every Thursday, on Friday to Kamloops. The mail service on this route is well performed, passenger and express freight rates are moderate, the line is equipped with good horses and comfortable coaches.

Nicola Valley has five post offices, Lower Nicola, Coulties, Nicola (central) Quilchena and Rockford. Douglas and Minnie Lakes mails are dropped at Quilchena office. Nicola and Coulties are money order offices. Lower Nicola is a thriving little settlement, contains a general store, public school, saw and grist mill, its surroundings are pleasant, white population, farmers and stock raisers; a large Indian reservation is adjacent.

Coulties is a centre of importance, has a large general store (Blair & Co) good hotel, blacksmith and butcher shops. It is a point where several avenues converge. Nicola and Sivona trail, Granite Creek and Hope-Nicola trails is a distributing point for mails, merchandise etc, and is flanked by large agricultural, pastoral and mining interests; the coal deposits in immediate vicinity are extensive, the article is pronounced excellent by local blacksmiths, there are also promising quartz lodes which are now being prospected, the "Coultie-Pardu" tunnel being some 150 feet in length and still steadily advancing. Quartz experts speak favorably of its ultimate success, the ore assays well

ERSKINE'S Boot and Shoe Emporium, }

in gold and silver and is easily crushed. Contiguous and extensive body of magnetic iron ore, rich enough to invite expenditure of capital, when the other latent sources of wealth are a little better developed; in the near future Contlies is expected to assume prominent and prosperous mining proportions.

Nicola has so far been the chief centre of the district, contains a large general store kept by the enterprising A. E. Howse, in connection with the store is a lumber yard and portable steam saw mill, planers and other moderate attachments. The Government land office, court house and jail are located here, church public school, hotel and private boarding house, blacksmith carpenter and butcher shops, Chinese laundry and bake shop, grist mill, Presbyterian and Methodist parsonages, besides a number of imposing and comfortable private residences.

The location foot of Lake Nicola is pretty and pleasant, cheerful rides and drives, boating, fishing, shooting, pure air, good water and other attractions which make it a health resort for many afflicted with lung complaints,

Quilchina is another point where the Douglas and Minnie Lake road tap the main line; it is the "rendez-vous" of the cattle men; here the festive, fearless "cow boy" relates his acquaintance with the bovine denizens of the prairie. Vale and height contain a good general store (R. Charters) and one of the best hotels in the interior, few stop there who do not leave satisfied with the many good things mine host "O'Rourke" so generously provides

Rockford and Stump Lake are the next points of importance the traveller passes on a trip from Kamloops to Spence's Bridge, there are good houses of accommodation at both places.

Stump Lake has, within the last two years, attained much notoriety through its quartz attractions. The London Nicola Mining Co have, and are still expending large sums of money in testing the extent and remunerative character of the ore found within their limits, outsiders in such enterprises have to be satisfied with such information as external developments afford, but they to the ordinary miner and observer speak hopefully as to future undertakings

The White Star Mine (Patterson & Henderson) upon which during the past summer crushing and concentrating machinery has been worked is, doing much to demonstrate the practicability of the Stump Lake ores being profitably worked

The Hipburn and other companies are also busily engaged in prospecting their respective locations. Nearly all engaged in the development of the buried treasure to become rich, is a heartfelt wish of the entire community.

Nicola has hitherto been chiefly known as a stock raising centre, its proximity to the coast and accessibly at all times of the year, places it first as a meat supplying emporium to the city of the sea.

The Douglas Lake Cattle Co's reserves afford to those interested in cattle a pleasant time, when the genial manager (J. B. Greves) takes the visitor round and modestly shows many animals of great merit, amongst which must be mentioned a recent and expensive importation in the young Clyde Stallion "The Boss," first prize winner at last meeting of Royal Highland Agricultural Society's show held at Edinburgh. As one Ameri-

can stock journal styled him, "one of the best drought colts that has crossed the Atlantic." A company spirited enough to invest such a large sum in a single animal, deserves success and support.

Agricultural pursuits have so far only been followed to supply local wants, and never did that although all common roots and cereals do well; hay for winter keep of stock is the main object and large quantities are annually stored from natural and artificial grasses. Small fruits are grown in profusion, apples, plums and cherries are being every where tried, and in some instances appear to flourish. The floral world is sweetly represented in the bloom and beauty of the hardy varieties. Nearly all the lands in the Nicola district are bought up and fenced in.

ROCKFORD.

Rockford, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale. The Nicola and Star Mining and Milling Co. are developing their several claims; the principal, the Star, which is turning out large quantities of fine ore. A tramway runs down the inclined shaft over which trucks are run bringing up the ore to the surface. The Tubal Cain, the Joshua, (acknowledged to be the best developed mine in British Columbia, the ore being very rich, composed of sulphurates and lead, carrying gold, silver and gray copper), the King William, the Planet and many others, The mines are beautifully situated on the shores of Stump Lake and everything tends to a prosperous and paying quartz mining camp. A large number of Italians are employed.

LOWER NICOLA.

Lower Nicola, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is reached by stage from Spence's Bridge twice a week, distance 35 miles. It is a thriving and prosperous little settlement, having several stores, public school, saw and grist mill. The Star Mining Co. have recently erected concentrating works and have constructed a good road to the mine, which bids fair to handsomely repay the cost of development. The district is also supposed to be rich in coal, but as yet little has been done in that direction.

SAVONAS

Savonas, originally called Savona Ferry in the Electoral District of Yale and Kootenay and Provincial of Yale, is situated on the Kamloops Lake at the mouth of the Thompson River; a station on the Canadian Pacific Railway, 227 miles from Vancouver and 2678 miles from Montreal. The principal commercial houses are on the opposite side of the lake to the station, which is reached by a substantial bridge. The scenery around is very beautiful while the lake affords much sport in fishing and sailing. There are several good ranches in the neighborhood and two first class hotels and a brewery.

KAMLOOPS

Kamloops, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is beautifully situated on the forks of the North and South Thompson Rivers, is an important divisional station on the Canadian Pacific Railway, 252 miles from Vancouver and 2653 miles from Montreal. There are practically two towns, the old and the new, the former being some distance from the depot, the latter, which adjoins, is being rapidly built, there being three hotels, the bank buildings, several stores and a large number of private dwelling houses. It is a distributing centre for the Nicola and Priest Valleys, Okanagan and Spallumcheen country; in these fertile districts there are many farms of large acreage. Extensive cattle ranges abound in the immediate vicinity, the bunch grass being most nutritious. The Shuswap Milling Company have a saw and grist mill in full activity in the old town. Great excitement still continues over the discovery of coal, numerous claims are constantly being recorded, the country being staked off for many miles on either side of

The gulch. A Methodist church has just been completed, and an Episcopal is being erected; the convent has been removed from its former site—two miles west—to grounds near the Catholic church. The climate is very dry and healthy, the dry belt extending to the United States boundary on the south, and to Lytton and Shuswap Lake on the east and west. High hills, unworthy the name of mountains, overlook the city, they being lightly timbered. The central prison for the whole of the interior is here located. Hotels are plentiful, ample and good accommodation are to be found in each. The foundations of a large and prosperous city are undoubtedly laid; already great efforts are being made to incorporate a municipal government with its mayor and aldermen.

GRAND PRAIRIE.

Grand Prairie, in the Dominion Electoral District of Yale and Kootenay, and Provincial of Yale, is a flourishing agricultural and stock-raising settlement 36 miles southeast of Kamloops and 18 miles from Duck's station, the nearest accessible point on the C. P. R. Is traversed by the Kamloops-Okanagan wagon road, and connected with the Douglas Lake country, thirty miles distance, by a trail; is well watered the principal stream being Salmon River; has abundance of excellent timber, soil fertile, but needing irrigation, weekly stage communication with Kamloops, Spallumcheen and Okanagan, good public school with fair attendance, monthly religious services by the Presbyterians and Church of England. Forms an important point for wintering cattle, large quantities of hay being cut on the meadows at the eastern end of the prairie. Has portable saw mill, cutting six to eight thousand feet a day. Abundance of game in the vicinity. Population about eighty.

SICAMOUS.

Sicamous, in the Dominion Electoral district of Yale and Kootenay and Provincial of Yale, a station on the Canadian Pacific Railway, distant from Vancouver 327 miles and Montreal 2568 miles altitude 1300 feet, is one of the most attractive places on the railway, affording as it does a fine view of the Shuswap Lake and surroundings. The Spallumcheen River empties its waters at this point and is a place of considerable activity, being the shipping point for the whole of the in-lying district of Spallumcheen, Okanagan and Vernon. The Enderby flour mill steamer leaves for Enderby tri-weekly during the summer season. Schubert's stage leaves Mondays and Fridays for Vernon, Okanagan and Spallumcheen.

SHUSWAP.

Shuswap, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is a station on the Canadian Pacific Railway about 33 miles east of Kamloops and distant from Vancouver 270 miles and Montreal 2820 miles. Farming is the principal industry, large crops of potatoes, butter and milk being shipped by the railway to the Eastern and Western markets. There is a good hotel at the station with another about three miles at foot of Little Shuswap Lake kept by Messrs Chase & Co.

REVELSTOKE DIRECTORY.

317

REVELSTOKE

At One Time Called Farwell.

Revelstoke, in the Dominion Electoral District of Yale and Kootenay and Provincial of Kootenay, is situated about 1½ miles from the station (a railway divisional point) on the Canadian Pacific Railway, distance from Vancouver 381 mile, from Montreal 2524, altitude 1475 feet. A new town is fast springing up adjoining the railway station. It is a supply centre for the West Kootenay district. The Columbia River Transportation Company's steamer makes regular trips to Sproat's Landing at the mouth of the Kootenay, calling at Hot Springs and Deer Park. The Columbia is navigable southward to the International boundary, 200 miles, and expands into the Arrow Lakes about 12 miles below Revelstoke. The famous Toad or Mineral Mountain is reached by the steamer which passes within 26 miles. The hotel accommodation is excellent—two—the Victoria and the Central being located in the old town, and the C. P. R. Boarding House in the new.

Gold Commissioner and Stipendiary Magistrate—G. M. Sproat.

Recorder and Constable—J. Kirkup.

Post Master—T. A. W. Gordon. Telegraph Office.

ILLECILLEWAET

Illecillewaet in the Dom. Electoral District of Yale and Kootenay and Provincial of Kootenay, a station on the Canadian Pacific Railway distant from Vancouver 409 miles and from Montreal 2496 miles. Situated on the Illecillewaet River, at an altitude of 3,538 feet, is essentially a mining town. The chief mines at present being worked are the Selkirk Mining Coy and those of Messrs Colvin, Kennedy & Wood, Silver and Gold is the principal ore but undoubtedly the surrounding mountains are rich in all kinds of minerals. A Saw Mill is within half a mile of the town which supplies the Railway for their snow sheds. Cariboo are plentiful from here down to the Columbia.

WEST KOOTENAY.

Is the largest silver ore shipping district in the Province, has four established camps, namely: Illecillewaet (on the C. P. R.) Toad Mountain (near Nelson) Hot Springs and Hendryx Camps (on Kootenay Lake) Good placer diggings at Big Bend and elsewhere; two gold quartz crushing mills in course of erection near Nelson; iron abundant; fine clay and building stone, timber, fir, pine, spruce, cedar, tamarac, in great quantity; scenery attractive; climate fine, river and lake fishing and big game shooting good Present population of district about 500.

J. F. Hume, J. P., agent for the steamboats on Columbia River, Revelstoke.
 Henry Anderson, Constable and Recorder, Nelson
 John McLeod, Station Agent, Revelstoke.

GOLDEN.

Golden in the Dominion Electoral district of Yale and Kootenay and Provincial of Kootenay, a station on the Canadian Pacific Railway, distant from Vancouver 477 miles and Montreal 2428 miles, is situated on the banks of the Columbia river at the mouth of the Wapta, at an altitude of 2550 feet. Steamers of the Kootenay Mail Line leave twice a week for various points

and the Lakes at the head of the river about 100 miles. The Jubilee Mountain, 36 miles from Golden is exceedingly rich in silver and copper, the steamer passing at its base. A company proposes erecting smelting works, providing the Provincial Government will grant a subsidy of \$10,000. There are good grazing lands between the Lakes and Golden. An excursion up the river would repay the lovers of scenery and also the sportsman.

ENDERBY.

Enderby, in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is situated on the banks of the Spallumcheen River at the head of navigation, being 23 miles south of Sicamous, 7 miles from Lansdowne and 28 miles from Vernon, and is the most important town in the district. The principal feature of Enderby is the Columbia flour mills, this magnificent roller mill is the only one in the Province and its capacity is 100 barrels per day. The mill is fitted with all the latest improved flour mill machinery. The mill has given a great impetus to the trade of Enderby, the quality and superiority of its flour has gained high reputation. In the near future it will undoubtedly command the whole of the flour trade of British Columbia, especially the mainland. The bill for the Shuswap and Okanagan Railway, which is to run from Sicamous, via Enderby to a point on the Okanagan Lake, is passed and operations commenced. when completed the hitherto inadequate means of conveying the flour will have been overcome. The construction of the railway is mainly due to the persevering efforts and ability of a worthy resident -Mr. Moses Lumby. The land near the mill is now laid out in town lots by Messrs Lambly Bros. In addition to several well supplied stores there is a Presbyterian church and a public school house just completed.

Post Master—Oliver Harvey.

FAIRMONT SPRINGS

Fairmont Springs, in the Dominion Electoral District of Yale and Kootenay and Provincial of Kootenay, are a group of hot springs near the lower end of Upper Columbia Lakes, of considerable medical value, containing lime, magnesia and sulphur. Four of the springs bubble up at the bottom of a ravine in close proximity to an ice cold mountain stream, two others are on the summit of a hill a short distance away, the sediment having

formed natural bath tubs round the openings about seven feet long, three feet wide, and two feet deep. From the hill there is a most magnificent view, comprising the three Columbia Lakes and intervening channels with the Rocky mountains to the east and Selkirks to the west. The springs are within ten minutes walk of a first class hotel and post office, which are on the wagon road between the steamboat landing and Wild Horse Creek, about eight miles from the Landing and 110 miles from Golden on the C. P. Railway. These springs are daily attracting more attention and will undoubtedly become quite a resort for invalids and tourists seeking health and scenery.

WINDERMERE

Windermere, in the Dominion Electoral District of Yale and Kootenay and Provincial of Kootenay, about 110 miles from Golden is reached in summer by steamer on the Columbia river and in winter by trail, 90 miles from Golden. During the past summer a great many prospectors have been at work on Dutch Creek, Toby Creek, Horse Creek and Windermere mountain, the minerals found are rock ore, gold, silver, copper, etc. Rich and extensive discoveries have been made in the mountains back of Windermere and on Toby Creek. The ore carries a large percentage of copper, and from \$27 to \$83 in silver to the ton. There is an excellent hotel under the direction of Messrs. Cummings and Preslar.

ROCK CREEK

Rock Creek, in the Dominion Electoral District of Yale and Kootenay, and Provincial of Kootenay, 210 miles from Spokane Falls, 160 miles from Hope on the C. P. R., 4200 feet above the sea level. The placer diggings on Rock Creek have paid well during the last two years, having taken out about \$140,000 in dust. The quartz ledges are looking well as far as prospected. Machinery for hydraulic mining has been shipped in this season and will commence operations in the spring to wash down the gravel banks at the mouth of Rock Creek.

OKANAGON AND OKANAGON MISSION

In the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is reached from Kamloops by stage (Shubert's), distance 100 miles, also by steamer "Red Star" from Sicamous to Enderby, thence by stage. The valley, taking its length and area of valuable agricultural land may be reckoned one of the principal in British Columbia. It extends from the Head of Lake Okanagon to the Fort at the mouth of the Okanagon river. The lake is 75 miles long with good land the entire length. The Roman Catholic centre of the Okanagon country is at the Mission

SPALLUMCHEEN

Enderby mills owned by Messrs Welch, Rithet & Co., Victoria, are in this valley also the Deep Creek mills owned by L. W. Patten. There are about 160,000 head of cattle, a steam portable saw mill and numerous steam thrashers. Upwards of 2,000 tons of grain are shipped annually. The length of the valley is about thirty miles, For lack of railway facilities not over one-fifth of the rich land of this section is under cultivation. On the completion of the S. & O. Ry. (see map) this rich interior portion of our Province will be rapidly developed

KEREMEOS

Keremeos in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is a settlement in the valley of the Similkameen. The valley is about eighty miles in length and varying from one to three miles in width, a great portion being a canyon with precipitous rock bluffs. The valley is well adapted to agriculture, but more particularly to stock-raising. It is reached from Hope, 110 miles, and also from Okanagan Mission mail route, 60 miles. There has lately been rich quartz discovered in the vicinity of Keremeos. Osayous Lake is 25 miles and Rock Creek the rich quartz mines, 45 miles from Keremeos.

DELTA MUNICIPALITY.

This highly important agricultural and pastoral section of the district of New Westminster occupies that portion of the south arm of the Fraser river that extends from the municipality of Surrey on the east to the Gulf of Georgia on the west embracing within its borders some of the finest land on the Pacific Coast, the section being noted for the remarkable fertility of its soil. This settlement comprises about 40,000 acres of rich delta land of deep black earth with a clay bottom, yielding immense crops of timothy hay, oats, barley, wheat, potatoes and fruit, also dairy produce in abundance. In addition to what the cultivated fields of the Delta produce there is an immense growth of wild grasses, such as blue joint, bunch grass, clover etc. affording ample feed for cattle and only on occasional winters do stock require extra feeding. There is a good wagon road extending from east to west through this district and also several roads extending north and south, all of which afford excellent facilities for shipment of the produce from the farms. The main outlet of the settlement is Ladner's Landing, so called after one of the pioneer settlers, who, in years past, saw the future value of the lands in this neighborhood and located there. A railway company has been formed to run a line from Popcum, a few miles above Chilliwack, to Ladner's Landing, a distance of about seventy miles, which will greatly enhance the value of property in this settlement.

Ladner's Landing is about seventy miles distant from Victoria, twelve miles from New Westminster, about twenty miles from the terminal city of Vancouver and forty miles from the town of Nanaimo, which places form the principal markets for farm produce. The mail steamers running between New Westminster and Victoria deliver the mails six times a week at Ladner's Landing post office. There are also steamers running from this place to the coal mining town of Nanaimo, and the terminal city of Vancouver. This settlement contains seven large salmon canning establishments, employing from fifteen hundred to twenty five hundred men during the fishing season, there are also four free public schools situated within this settlement with a resident teacher for each school. Game is abundant, especially wild fowl which gather here in large numbers late in the fall. The Canadian goose, the white and crow goose,

mallard duck, pin tail and other well known varieties afford rare sport for the lover of the gun. The Delta district is destined in the near future to become the garden of British Columbia, and to those seeking a home amongst a thriving and industrious people, with land of exceeding richness, in which every acre is a garden within itself, no more inviting spot can be found than the Delta District. The Victoria, Saanich and New Westminster Railway have already surveyed their line to run through the settlement to about Dea's Island, thence crossing the Fraser to Richmond and the much talked of C. P. Railway, will cross Fraser near its mouth, thence through the center of the municipality, to Surrey to connect with the American system of railways, which when done will place us in an enviable position and will greatly help to develop our highly favored part of this Province.

The Most Elegantly Appointed Tailoring Parlors on the Coast.
WALTER BARNSTREY & Co., 119 Government Street, Victoria, B. C.

S. R. R. (now under construction) traverses nearly the whole distance, from Brownsville to the boundary through this corporation, on the way passing through the thriving settlements of North Surrey. Serpentine, Clover Valley, and Hall's Prairie, this road, when completed, will place Surrey in a position second to none in British Columbia. There are four school districts in Surrey each provided with school house, etc, these are located at Clover Valley, Mud Bay, Hall's Prairie, and Kensington Prairie, affording ample education facilities. There are five post offices within the corporation, viz: Clover Valley, Mud Bay, Hall's Prairie, Elgin and Surrey Centre, with a weekly mail (which will soon be increased to a daily), there are several churches in the district; the road system is good and is constantly being improved and extended. there are now five stages plying between New Westminster and the various centres of this corporation. The Dominion Government have, during the past two years, expended considerable money in the improvement of navigation on the Nicomekle and Serpentine rivers, this will assist materially in the development of the farming lands contiguous to the rivers, there is very little Government land unoccupied now, of course there is any quantity of land that can be purchased, and at very reasonable rates, during the last season there were raised in the neighborhood of seven hundred tons of grain besides other produce, the soil throughout the district being of excellent quality, and producing abundant crops of all the cereals, roots, hay, hops, fruit, etc. A saw and grist mill is an urgent requirement in the district and there is no doubt but that the council would give every encouragement to parties establishing such industries here. During the past season Mr. Wm. Ross has erected a first class hotel at St. Leonard's, on Semiahmos Bay at the boundary line, this will be the means of making our resources known in a great measure, and will no doubt attract large numbers of tourists and others, who cannot but admire and enjoy the delightful bathing facilities, drives, walks, etc, on the beach, together with the excellent shooting and fishing in the neighborhood.

A scheme is on foot to construct a dyke across Mud Bay, from Blackies Spit, on the Surrey side to the high land on the Delta; in the event of this being done an extensive area of the most valuable land in the Province will be reclaimed. The people of this corporation are fully alive to the splendid future in store for their adopted home and are therefore working well to accomplish this object. There is also a thriving agricultural Association here, which is inclined to assist materially in our internal development.

HOPE AND POPCUM—NEW WEST. DIST.

353

HOPE AND POPCUM

Hope in the Dominion Electoral District of Yale and Kootenay and Provincial of Yale, is situated on the opposite side of the river to the station about one hundred miles from the mouth of the Fraser and reached by the Canadian Pacific Railway, ninety miles from Vancouver and 2875 miles from Montreal, also by weekly steam boat service from New Westminster. It was once a prosperous town and is still of considerable importance, being the chief trading post for the hunters and miners going to the Similkameen and Rock Creek country. Silver ore, yielding high assays has been found near Hope and the prospects give every promise of early development. The Eureka Silver Mining Company is located within seven miles of the town, and quite recently quartz gold has been discovered, the inhabitants awaiting eagerly the result of several assayists. It is also practically the head of navigation on the Fraser although occasionally steamers ascend as far as Yale. The contemplated Government road, if carried out, will open up a vast agricultural district at present difficult of approach.

Popcum is a small village a few miles from Hope, the surrounding scenery being usually beautiful. One large saw mill is in full work.

HARRISON RIVER

Harrison River, in the Dominion Electoral District of New Westminster and Provincial of New Westminster district, is situated about half a mile from Harrison station on the C. P. R., distant from Vancouver 63 miles, Montreal 2842 miles, and can also be reached by steam boat from New Westminster. Previous to the opening of the Fraser route in 1864, the only access to the northern interior of the Province was by way of the Harrison valley. The entire flat is an Indian reserve.

AGASSIZ—NEW WEST. DIST.

355

AGASSIZ

Agassiz originally called Ferny Combe, in the Dominion Electoral District of Yale and Kootenay and Provincial of New Westminster, is situated on the North bank of the Fraser River and extends from Farris Bluffs to Sea Bird Bluffs about twelve miles; also a station on the Canadian Pacific Railway; 72 miles from Vancouver and 2833 miles from Montreal. It is entirely a farming settlement, the chief one and the second oldest in the Fraser Valley being owned by L. L. Agassiz. The Harrison Hot Springs are within five miles of the station; famous for their curative powers, many invalids suffering from rheumatism and kindred complaints, deriving great benefit from their use. A stage meets each train for the excellent hotel erected by J. R. Brown, which is most pleasantly located, surrounded by picturesque mountains and facing Harrison Lake on the south shore which is forty miles long and five wide. He has lately opened a separate hotel replete with all conveniences over the baths for the exclusive use of the infirm. A small steamer and many pleasure boats are for hire on the lake, where splendid fishing can be enjoyed and also in the various trout streams in the neighborhood.

**MAPLE RIDGE MUNICIPALITY
 AND PORT HAMMOND.**

This extensive municipality is situated on the right bank of the Fraser River, on which it has a frontage of about 16 miles, and is bounded on the east and west by the Stave and Pitt rivers respectively. There is a very considerable area of easily cleared timber, such as elder and vine maple, while the soil throughout is excellent. Dairy farming and fruit culture are the principal pursuits of the settlers. The large tract of prairie, known as the Pitt Meadows, has hitherto been comparatively useless, but a company is now being formed to undertake its reclamation from the Fraser River summer flood. There is daily communication with Victoria, Vancouver. New Westminster and the interior by water and rail.

At Port Hammond, four and a half miles east of the Pitt river, there are a railway station, post, telegraph and money order offices, a wharf, owned by the C. P. N. Co. at which steamers going both up and down the river stop daily; hotels, stores, etc., and about half a mile from the station, the Anglican and Methodist churches, public school, and Town Hall provide for religious and educational facilities and a place for the transaction of public business. Still travelling east after passing the Big Slide, the buildings at Port Haney come into view, here the brickyards are located, and rising conspicuously above the railway the Roman Catholic and Presbyterian churches command attention. There is also another public school, while a flag station, wharf, post office, hotel and two stores add much to the convenience of the settlement. From this point salmon packed in ice are shipped to the east in the season.

Beyond Kanaka Creek, the railway passes through the well known thriving orchards of Mr. Robertson, and thence follows the river to Whonnock station a short distance west of Stave river. At Whonnock a post office and public school provide for the requirements of the eastern end of the municipality. A trunk road, with numerous branches, is in course of construction, and it is intended to continue it both east and west to the municipal limits.

Some three or four miles from the Fraser and, roughly speaking, running parallel to it is the Lillooet, a tributary of the Pitt river, a rapid mountain stream fairly well stocked with trout.

With thousands of acres of magnificent soil, with a daily train service across the continent, with telegraphic and daily postal communication with the rest of the world and with daily steamer connection with the principal markets in the Province, the municipality cannot fail to gain in importance from year to year.

PORT MOODY

Port Moody is situated on a land locked and commodious harbor at the head of Burrard Inlet, 12 miles from the terminal city of Vancouver and distant from New Westminster 6 miles and 105 miles from Victoria. The town at present consists of about 100 buildings, many of which are large and substantial, comprising hotels, general stores etc.; population being one hundred and fifty. It was formerly declared the terminus of the C. P. Railroad. The bay is navigable for shipping of the largest tonnage affording good anchorage and perfect security from storms. Nature has regarded Port Moody with great partiality in supplying it with abundance of splendid water from the numerous mountain streams. The central position of the town and being on the line of the C. P. R., combined with the excellent timber and farming lands near by will, without doubt, irrespective of the numerous drawbacks the place has had, cause Port Moody to always remain a place of considerable importance. J. T. Scott, J. A. Clarke, J. Miller and W. Elson are the chief pioneers of the place. On Wednesday, January 23rd, 1884, the first through train to Yale left Port Moody.

NEW WESTMINSTER—DESCRIPTIVE.

363

New Westminster City—Descriptive.

POPULATION—5,000.

The city of New Westminster is built upon the north bank of the Fraser river about sixteen miles from the Gulf of Georgia, and is the only river port for ocean going vessels, in British Columbia.

The town is laid out in the modern way—the streets crossing each other at right angles—and is lighted with gas. As the soil of the townsite is for the most part of a gravelly porous character, the work of street-making is comparatively easy, and has been kept fairly well up to the mark, notwithstanding the rapid growth of the past few years. No regular water works exist so far; the natural supply being abundant and of excellent quality; but the first steps have been taken for the introduction of a gravitation system, the source of supply being an elevated mountain lake (Coquitlam) some twelve miles away. There are two hospitals, one public, and one under the direction of the Sisters of St. Mary; at both of which skilled physicians are in attendance. The Provincial Lunatic Asylum and Penitentiary are situated a short distance outside the city limits.

Although a few miles from the main line of the Canadian Pacific Railway (being connected therewith by a short branch) New Westminster has means of communication with other places, which are not surpassed by any other town in British Columbia. The river on whose banks it is built gives it a magnificent water way to all the chief settlements of the District, and to these, steamers run almost daily during nearly the whole year. The closing of navigation by frost will not, in a term of years, average more than one week in the fifty-two. With Victoria, communication can be had six times weekly *via* Vancouver (time, about eight hours) and three times weekly by direct steamer (time, about seven hours). Daily trains on the C. P. R. afford communication with the interior of the Province, the Northwest Territories and the Eastern parts of the Dominion and the United States; while the suburban service of the same line (thrice daily) supplemented by daily stages, puts the city in close connection with Vancouver, and practically places at its disposal the outside service of that port. In one direction only, viz.: with the United States territories to the south, are its means of intercourse defective, but the construction of the Southern Railway, now going on, will remedy that. Trains will be running on this line early in the fall of 1889. A line of rail and ferry, shortening the trip to about two and a half hours, is projected between New Westminster and Victoria. The preliminary surveys are finished, and the completion of the work is only a question of time. The Pacific headquarters of the C. P. R. system of telegraphs is located in

ATES STREET

the town, and it has telephone connection with Vancouver and Port Moody. Mail communication, of course, is daily with the east and all important points in the Province. During 1838 the Royal City Mills have loaded a number of vessels with timber and deals for foreign ports, and another large lumber mill, for foreign and eastern trade, will be built early in 1889.

In addition to its central situation and accessibility, New Westminster offers many advantages as a place of residence. In the surrounding scenery, especially as viewed from the higher points of the townsite, the lover of the beautiful in nature will find—in the winding river reaches, the green expanses of meadow and delta land, set in the darker green of the bordering forest, backed by the blue-gray hills, and sentineled by the farther peaks, which tower, snow-capped and majestic against the horizon—a picture of which the eye never tires. The climate of the Province is elsewhere described, but it may be appropriately mentioned here, that the citizens of New Westminster claim for it (supporting their contention by pointing out the sheltered situation of the town) a balmy air, a more equable temperature, than can be found elsewhere, even in this favored land.

As a quiet, industrious, law-abiding community, New Westminster has always ranked high. It is noted also as a healthy place, in fact it has enjoyed a rare immunity from moral and physical epidemics. The Roman Catholic, Episcopal, Reformed Episcopal, Presbyterian, Methodist, and Baptist denominations have church buildings which would do credit to larger places, and these are liberally supported and well attended. There is a fairly prosperous Y. M. C. Association, several private and denominational schools, and a free public school (with high school in connection) employing seven trained teachers. There is also a public library, at which the leading papers of the English-speaking world are on file, so that it is quite possible for a resident to keep up with the stream of current events. There is a large public park, just outside the city limits; and the rifle and artillery corps, as well as the cricket, baseball and football clubs, and rifle association, are stimulated and encouraged by a healthy public sentiment. Municipal taxation is not oppressive, and as the taxable area is continually extending, the city will be easily able to carry the cost of all the public works which its growth makes necessary.

It is just about thirty-one years since the axes began to ring on the townsite—then clothed with a dense growth of the stately Douglas pine—and in those years the place has experienced several mutations of fortune. First there was a period of mild "boom," extending over four or five years, during which the town grew to considerable proportions; but the limit of its advancement (it being then little more than the first point of trans-shipment for the up-country trade) was soon reached, and eight or nine years of something like stagnation followed; until, with the development of Provincial resources, New Westminster began to feel the healthier pulse of a true intrinsic growth, and since that time its progress has been steady and rapid, and its citizens have now the satisfaction of seeing abundant evidence that it has passed the critical stage, and of knowing that, while it may experience

NEW WESTMINSTER—DESCRIPTIVE.

365

the common alternations of brisk and dull times, its growth and prosperity are as thoroughly assured as those of any other city on the continent.

The causes of this confidence are not far to seek. Built on a sunny slope, above a noble reach of river, New Westminster enjoys all the advantages which a fine situation gives; and with its broad streets, its many fine public buildings, its handsome residences, and numerous gardens, it is emphatically attractive to the eye, and has, of late years especially, received unstinted praises from new comers and tourists. By its situation on the river it is the natural centre of the rich and fertile Fraser Valley, and commands a large and growing trade with neighboring settlements; and the enterprise of its merchants and manufacturers is rapidly opening to its fish, lumber and fruit, the markets of the Northwest, and even of the Eastern Provinces. It is the chief centre of the fishing industry of the Province, and its timber trade, which has of late been largely extended, will be before the close of 1889 fully equal that of any part of British Columbia. The rapid development of these industries, coupled with the growth of agriculture in the surrounding districts, has led to the establishment of other manufacturing concerns, such as a woollen mill, foundries, machine shops, carriage and wagon factories, furniture factories, etc. These wealth producing concerns, in turn, involve large additions to the residential portions of the city, and large improvements, chiefly in the substitution of brick for wood, in business premises. One of the recently erected blocks (the Masonic and I. O. O. F) covering one-fifth of an acre, and three stories in height, ranks among the finest buildings of its class on the Pacific Coast. It is within the mark to say that the New Westminster of to-day is to the New Westminster of eight years ago, as three to one; and the fact that the place has thus grown and prospered "on its merits," without any forcing process whatever, furnishes the best possible guarantee of its future prosperity.

BRITISH COLUMBIA DIRECTORY.

The Coquitlam Water Works Co., Ltd.

Office Masonic Block.

This Company was incorporated by Act of the Legislature of B. C. in 1886, for the purpose of supplying water from the Coquitlam Lake to the cities of Vancouver and New Westminster.

The source of supply lies at an elevation of 435 feet above high tide level. Its distance from New Westminster is about fifteen miles, and from Vancouver, by the Company's proposed route, about twenty-four miles. The pipe track is cleared to New Westminster. The Company proposes to lay its mains of rivited steel plate pipe. The cost of its whole system of works, as designed will approximate \$400,000. The part of the works for the supply of New Westminster, it is expected, will be completed during 1889.

TRANSPORTATION.

Railways.

See descriptive article for N. W. Southern R. R., now under construction.

CANADIAN PACIFIC RAILWAY.—To Vancouver, distance 25 miles, calling at and making connection with the eastern and western trains at Westminster Junction, (9 miles.)

Steamships.

CANADIAN PACIFIC NAVIGATION Co.—Steamers to Victoria and way Landings, tri weekly.

CANADIAN PACIFIC NAVIGATION Co.—Steamer "Wm Irving," tri-weekly in summer, to Hope and way landings, in winter to Chilliwack and way landings.

STEAMER "ROBERT DUNSMUIR."—Weekly to Nanaimo and Comox, carrying H M mails, also weekly to Vancouver and Nanaimo.

STEAMER "THE FAIRY QUEEN."—Runs at frequent intervals, to the North Arm, returning same day.

There are several steamers owned by private firms, plying between the various canneries.

Stages.

G. R. RAYMOND's line to Vancouver, daily returning same day. Carrying H. M. mails. Office Townsend's stables, Columbia street corner Douglas.

D. S. MILLER's line to Blaine tri-weekly, returning following days, making close connection on Tuesdays and Saturdays with the steamers for Whatcom and Seattle, Office Transfer stables, Columbia street near C. P. R. depot.

WHITE & GEE's line; to Blaine, passing through Elgin, tri-weekly, making close connection on Tuesdays and Saturdays, with steamers for Whatcom and Seattle. Office Wise's stables.

SURREY EXPRESS line for Surrey Centre, Clover Valley and Hall's Prairie, weekly, each Saturday, returning each Friday, Office Wise's stables.

THE RONISCH PIANOS

*Are unsurpassed for Tone
Tone and Durability.*

C. A. LOMBARD & CO., SOLE AGENTS, VICTORIA.

VANCOUVER DESCRIPTIVE.

VANCOUVER CITY DESCRIPTION

The City of Vancouver, the terminus on the Pacific Coast of the Canadian Pacific Railway occupies a commanding position on Burrard Inlet, English Bay and False Creek.

The city is laid out in blocks and squares, the streets run east and west parallel to the Inlet, whose sinuosities, the city follows for about four miles; and north and south. Some 35 miles of streets are graded, several miles of which are gravelled and planked. The total number of street side walks is some fifteen miles. The streets and side walks are well constructed and maintained in the best condition. The site on which the city is built, can scarcely be excelled. The ground rises gradually from the north, south, east and west to a centre, on which is erected the Hotel Vancouver and a number of expensive granite and brick buildings as well as substantial residences. These command a magnificent view of the lower harbors of the city, the waters and shipping of the Inlet, English Bay, the gulf of Georgia and False Creek, as well as the mountains on the opposite shore, whose grandeur, is admired by all who visit the city.

The growth of Vancouver may be termed phenomenal, where the city of 11,000 souls stands to day, three years ago, the major portion of it was a dense virgin forest. The fire of the 13th of June, 1886, with but a few exceptions wiped the young city out of existence. At that period, the population is variously estimated to have been 1200 to 2500 people. The value of the city property then is unknown, for no assessment had been made of the city. At the present time the assessed value as returned by the City Treasurer and Assessor is placed at \$6,604,000 for the current year. The voters' list embraces about 2,000 names.

Vancouver is the Canadian terminus for the Oriental Steamship Service. Vessels arrive and depart regularly once a month for Japan and China and other ports in the Pacific. A direct line to Australia and New Zealand is shortly to be established and will receive a subsidy from the Imperial and Canadian governments for carrying Her Majesty's mails. A daily steamship service is also established between Victoria; a regularly weekly one with San Francisco; a semi-weekly one with Port Townsend, Seattle and Tacoma; a tri-weekly line to New Westminster; a semi-weekly one to Nanaimo and Comox and an irregular one to the North Arm of the Fraser and other coast ports. Three trains run each way between Vancouver and New Westminster. A transcontinental train departs and arrives daily including Sunday. Steam ferry plys between the city and Moodyville and other places on the Inlet. Two mails a day, are sent to and received from New Westminster, Sunday excepted.

The city is lighted by gas and electricity. A system of water works, said to be one of the best in the world, is now completed. Work has begun on the street railway. A railway is projected, known as the Short Line connecting the waters on Burrard Inlet and those of the Fraser by way, of Lake Burnaby, as well as another to Richmond municipality; thence across the Fraser up through the Delta Section and Langely towards Nooksack. The

C. P. R. and Postal telegraph service is in the city, connecting the systems of the world with Vancouver. The head quarters of the company will shortly be removed to Vancouver. There is a telephone service throughout the city and also a connection with New Westminster.

In Vancouver are located the largest works of the C. P. R. west of Winnipeg, also the offices of the Pacific Coast division Officials and their staff of Assistants.

The wharfage accommodation and shipping facilities although already extensive are entirely inadequate to the increasing business of the port. Extensive additions are shortly to be made. When these are completed Vancouver's harbor will equal that of any other city on the coast.

Vancouver's industries are as varied as they are numerous and include sawmills, of which there are ten, whose annual cut will aggregate close upon 200,000,000 feet; sash, door and blind factories; shingle and furniture factories; foundries and machine shops, a quartz reducing and smelting works; breweries, waggon and carriage factories, blacksmith shops, tinsmiths and many other industries. The establishment of a beet root sugar refinery, a paper mill, paint works; grist mill, tanneries, soap works, net works are in contemplation.

The various religious denominations are represented. The Church of England has two churches, St. James and Christ. The latter just organized. The Roman Catholics one church; the erection of two others is in contemplation. The Presbyterian church of Canada, has two commodious churches, one in each end of the city. The Wesleyan and Methodists are worshipping in two buildings at present, but their new church, the handsomest one in the province, is approaching completion. The Congregationalists and the Baptists, each have churches, that of the former now in course of erection, will be a commanding edifice. The Y. M. C. A. are also contemplating the erection of a beautiful building. The Salvation Army are in considerable force and have a barracks of their own.

The city is well provided with schools, there being already three, all of which are crowded and tax the time of the teachers to the utmost in looking after so many.

The secret and benevolent societies are all represented, as well as other organizations, all of which are in a flourishing condition.

VANCOUVER WATER WORKS—President, Capt. John Irving. Directors, Sir J. W. Trutch, C. M. G., R. P. Rithet, Thomas Earle, D. M. Eberts. Secretary, J. W. McFarland, Chief Engineer, G. A. Keefer, C. E., Resident Engineer, H. B. Smith, C. E.

Incorporated in April 1886, for the purpose of supplying the City of Vancouver with water obtained from the Capilano river which is a mountain stream of considerable magnitude, being reported to be no less than fifty miles in length, and averaging for a distance of 7 miles up stream (the only portion which has as yet been surveyed) a width of 150 feet at low water. It rises in the snow crowned mountains of the Howe Sound district and flows almost due south, emptying into Furrard Inlet at the First Narrows. The source is not a mountain lake, but the accumulated waters derived from melted snow and ice falling from the mountain summit. Being a mountain stream it is throughout its whole course very rapid, averaging 5 feet per second, and falling at the rate of 70 to 100 feet per mile; The point where the supply is taken from is 6½ miles up stream. At which place the river was carefully gauged and ascertained to be discharging at extreme low water an average of four hundred and fifty millions of gallons per 24 hours.

HASTINGS.

Hastings is situate on the south side of the Inlet, three miles from Vancouver by a good road, and is connected with New Westminster and Vancouver by the Candian Pacific Railway. It is the "Brighton" of the Mainland and the fashionable resort for visitors, especially during the summer months. The "Brighton" Hotel is one of the best and most popular hotels on the Mainland.

Vancouver
Fox —, shingle maker
Hanson Hans, barkeeper
Myers Jno P, logger
Rutherford R, gentleman
St Germain, shingle maker
Wilkinson Michael, clerk, (Rand Bros) Vancouver

MOODYVILLE.

Is situated on the north shore of the Inlet, distant from Vancouver about two miles. It has a population of about three hundred and fifty, chiefly officers and employes of the Moodyville Sawmill Co. which extensive establishment occupies a site on the water's front near the center of the town. Moodyville has its churches, common school, well kept reading room and a first-class hotel. It is also the headquarters for the steam ferry boats which constantly ply to all points on the Inlet.

Letters Patent in the year 1880. It embraces an area of about 30,000 acres and contains about four or five hundred residents in addition to which may be considered a floating population, during the busy season, of nearly as many more. The soil, being a sedimentary and vegetable deposit, is of superior quality. All the cereals are successfully grown, oats form the principal crop in this line and the average yield per acre may be put down at 75 bushels, although instances are on record of much larger returns. Wheat is not much grown but instances have occurred where eighty bushels per acre have been secured. A large portion of the cultivated land is in meadow timothy, which generally yield three and sometimes four tons to the acre. Some meadows have been under grass for the last eighteen years and very little, if any, deterioration in quantity or quality, can be detected, in fact the older the meadow the finer and better the hay appears to be. Root crops yield most abundantly and a better location for the raising of hops could not be found. Fruit culture may now be classed as an industry, though only in its infancy, it will in the near future become of great importance. Pear and plum trees planted more than twenty years ago are still in full bearing, the trees being loaded with fruit nearly every year. Apple trees planted in the spring of 1886 produced fruit in 1888, which received a diploma at the fair in Toronto in the fall of that year; the orchard from which these were taken, numbering 800 trees, bids fair this year to have a very large yield. Three salmon canneries were in successful operation during last season and there will be six this year, viz: Ewen & Co., J. H. Todd & Son, English & Co., and a Montreal firm on the South Arm, the latter at Steve's Landing; J. H. Todd & Son, and D. H. Mun & Co., in the North Arm. The municipality contains three post offices, viz: North Arm, Sea Island and Lulu Island, with several stores in successful operation, one at each of the canneries, one at Sea Island post office, one at Lulu Island post office and one at Steves' Landing, the latter includes a seed store carried on by an enterprising seedsman and raiser of thoroughbred Holstein cattle, Berkshire pigs, and poultry, being within easy distance by water from New Westminster, Victoria, Nanaimo and Vancouver, the facilities for reaching these markets are admirable. Those living on the South Arm have a tri-weekly service to New Westminster, and the same on alternate days to Victoria. A regular steam service from the North Arm to Vancouver is in operation and is a great service in carrying the produce, hay, grain, vegetables, etc, to that market. A steam service four days in the week, with Westminster, which will, under the fostering interests of that city, it is expected, develop itself into a daily service. The short road to Vancouver through the C. P. R. Co's property has just been completed, and as soon as the bridges are opened (which it is earnestly hoped may be accomplished during the present year) the farmers will avail themselves of this easy and convenient access to the market at Vancouver, which city will depend largely on this locality for its supply of farm and garden produce.

CHILLIWACK,

Including Centreville.

Chilliwack, in the Dominion Electoral District of New Westminster and Provincial of New Westminster District, is situated on the south bank of the Fraser river, distant from New Westminster about fifty miles, and having steamboat connection daily with New Westminster, Vancouver, Victoria, etc. It is a fertile valley from twelve to fifteen miles in width, surrounded with lofty mountains. The soil, owing to its exuberant richness, produces crops of mammoth growth. All kinds of cereals and vegetables grow and ripen well, also melons and tomatoes. Fruits of all kinds and even those of a warmer clime ripen to perfection, and there is no doubt that fruit raising will soon be a profitable industry in this section of the country.

Entering the municipality from the east and following the Yale and Westminster road, at the foot of Cheam Mountains are the Popeum saw mills with its lathes and machinery worked by never failing water power and having an almost endless supply of timber within reach. Two miles westward is the Indian village of Cheam, beyond this, passing through thick woods for nearly eight miles, is the Cheam school district, with its well attended public schools and very excellent farms, and four miles further is the growing town of Centreville, destined before long to become a town of considerable importance situate as it is about midway between Hope and New Westminster. Here there are three churches, with resident ministers, a town hall, an agricultural society hall (an annual meeting being held in its grounds of four acres) two hotels, several stores, post office, telegraph office, money order office and savings bank, etc. Following the Trunk road westward for about a mile is a branch road to the South, along which there are many excellent farms and quite a rising settlement, with a post office, cheese factory and a public school. The climate is most invigorating, and those seeking a home

free from the extremes of heat and cold and in the midst of mountain scenery, will find Chilliwack possesses as fine agricultural land and offers as great inducements to settlers as any portion of the Province. Extensive timber limits have recently been located on the south side of the settlement which will give employment to a large number of men. On the north side of the river and within a short distance of the settlement is the Provincial model farm.

KOOTENAY DISTRICT.

This district consists of 3 great valleys, viz: The LOWER KOOTENAY VALLEY, about 1700 feet above sea level, is approachable at present from the Northern Pacific Railway (Kootenay station or Lake Pend d'Oreille) thence a good wagon road 32 miles long leads to Bonner's Ferry, on the Lower Kootenay River; from here steamers ply down the river 100 miles to Kootenay Lake, 90 miles long, famous for the immense deposits of galena (silver and lead ores), on its banks. This valley will soon be one of the richest agricultural districts in America, the soil (alluvial loam) on the flat along the river being of wonderful richness and great depth. At present the Kootenay bottoms are subject to an annual overflow, which makes agricultural development impossible. The Kootenay Valleys Co, Limited, of London, England, consisting of English capitalists, propose to prevent the overflow by suitable works at the outlet of the lake (deepening it), and as soon as this is accomplished the wonderfully productive Lower Kootenay Valley will become one of the choicest localities for fruit growing and farming, including hops and maize, for both of which the soil and climate are most suitable. Two railways, the Kootenay Railway and Transportation Company and the Kootenay & Athabasca Railway Company, have obtained charters and have surveyed their routes, the one to connect the Kootenay Lake with the Columbia River (25 miles); the other to build a line from the north end of the Kootenay Lake to the C. P. R., at the western crossing of the Columbia, the great mineral deposits on the Lake being in both cases the inducements.

The UPPER KOOTENAY VALLEY lies parallel with the lower valley; but nearer the base of the Rocky Mountains, the two valleys being separated by a spur of the Selkirks, over which fairly good trails for pack horses lead, is of an entirely different character. The bottom land along the Upper Kootenay River is not so extensive as in the lower valley, nor is it subject to heavy overflows. On either side of the river, there extends for many miles an excellent bunch grass country. The forests are of pine-like character, open, with no underbush. The river is navigable for shallow draft steamers, and the Kootenay Valley Co propose also to operate largely in this valley by constructing a short (one mile long) navigable canal across the low watershed between the Kootenay and the Columbia, so as to connect the Kootenay with the navigable waters of the Columbia, where there are already two steamers plying, thus obtaining for the whole valley direct steamer communication with Golden, a station on the C. P. R.

The Upper Kootenay Valley has a length of some 90 miles and is some 600 or 700 feet higher than the lower Kootenay Valley, but equally favored in climate respects, as it lies at the very base of the Rocky Mountains, which rise to a great height, sheltering it completely towards the north and east and acting as a desirable "catch," diverting the warm Pacific or Chinook breezes into the valley, so that snow never remains long on the ground

and ploughing can be commenced usually by the middle of February. The winters are short, with bright, clear days, but occasional short spells of severe cold are experienced. The summers are dry and the heat is never oppressive, while summer frosts are almost unknown in either of the Kootenay valleys. Hops and all the more delicate crops thrive uncommonly well. The cattle and horses, particularly the latter, are fine, and hitherto they have wintered out without feed or shelter. There are three or four hundred Indians (Upper Kootenays) in the valley, whose services would come in useful for certain work, such as hop picking. The Dominion Government has established a mounted police post in the valley; hitherto a single constable has sufficed for whites and Indians. The Mineral development of the Upper Kootenay has been much retarded by the valley's isolated position and difficulties of transportation. Up to last year all supplies and tools had to be packed in on horse back from Idaho Territory (Sandpoint), over 150 miles of rough mountain trails, the freight alone amounting to 10 cents per pound. Under these circumstances no machinery could be got in, and without that all mining must necessarily remain of the most primitive kind.

The timber in the Upper Kootenay Valley is remarkably fine, particularly the tamarac (larch), and yellow pine species. Both these kinds will soon come into great demand down the Columbia River, where, owing to an abrupt change in the climate from a dry to a wet zone neither of these trees is found.

The Upper Kootenay Valley can best be reached from Golden, on the C. P. R. by steamers Duchess and Marion, which make two trips a week (115 miles) from the valley several low passes (Vermillion, Crow's Nest and Kootenay Passes), lead across to the North West Territory over fair trails and with good feed. In future these routes will be the cattle trails by which the eastern market can be gained at little expense for shipping. Likewise can the Northern Pacific Railway be reached over easy country, so that the settlers will have the choice of two routes for shipping produce and stock, the best cure for high freight rates.

The COLUMBIA VALLEY comprises the great bend of the Columbia River round the Selkirks, which is undoubtedly the most majestic group of mountains in North America. The valley, following the Columbia, is 440 miles long; but only the uppermost portions are available for agricultural or stockraising purposes, the remainder being a densely timbered and rocky country of much future importance, however, on account of its mineral richness. The three chief places in the valley are Golden at the mouth of Kickinghorse River, where the C. P. R. first strikes the Columbia River, after descending from the Rocky Mountains. It is of some importance as the distributing point for the Kootenay Valleys. Seventeen miles farther down the Columbia river is Donald, containing roundhouses and workshops of the C. P. R. Finally, Farwell, or Revelstoke, as the railway company call it, which again is the distributing point for the Big Bend mines, where quartz mining (gold) has a bright future.

NORTHERN COAST, ETC.

553

NORTHERN COAST, NORTHERN INTERIOR.

Including Metlakuhli, Skeena River, Port Essington, Fort Simpson, Fort Rupert, Naas River & District, Alert Bay, Bella Bella, Bella Coola, Smith's Inlet, Massett. O-Wee-Kay-No, Kit a Maat, Skidegate, Omineca, Hope Island, Hyaqust, Hesquaikt, Nootka S, Vitall Creek, Queen Charlotte Islands.

QUEEN CHARLOTTE ISLANDS.

The general character of these islands is mountainous and heavily timbered. The extreme length is about 179 Geographical miles, width about 100 miles. The mining resources of these islands are undoubtedly very extensive. The only industry established is the Skidegate oil company which, enterprise is confined to the manufacture of oil from a small species of shark, commonly known as the dog-fish. The chief trading places on the Islands are at Massett and Skidegate Inlet. The chief item in trade is fur seals, in which about \$10,000 of trade is annually done.

The Hydah Indians of these islands are famous for their carving in wood, silver and slate, and their crest poles adorn every village. They are, beyond doubt, the best canoe makers on the coast.

Anthracite coal of a superior quality is being mined on the north island, if it is found in as well a defined seam as is expected the result of the present development will be, a very profitable industry will have been established that is much needed in these parts; 70 tons of this coal was brought to Victoria during last month and had a ready sale at \$20 per ton. Bituminous coal beds of considerable extent are said to exist on the Islands.

MASSETT.

C. M. S. mission in charge of Rev. C. Harrison with about 400 followers. The Church is very well finished and furnished, a native supplice choir—Day school, assisted by the Dominion Government. Hudson's Bay Co's post in charge of R. F. Dodd. Stock raising is being successfully carried on in the neighborhood. Steamer about twice a year, safe journey in canoe during summer months.

SKIDEGATE.

Methodist Mission in charge of Rev. Mr. Miller, and school assisted by Dominion Government.

NAAS RIVER AND DISTRICT.

Naas river ranks third in size of British Columbia rivers, and waters the country north of the Skeena. On the right bank, close to the mouth, is the C. M. S. Mission village of Kincolith; population about 255. School, assisted by the Dominion Government. A village council, under Indian

554

BRITISH COLUMBIA DIRECTORY.

advancement act, several well equipped canneries are located along the Naas River, and thousands of Indians are engaged in fishing during the salmon and collichan run.

The Methodist Mission at Greenville is in charge of Rev. A. E. Green, and there is a school where Indians are taught the habits of civilized life. At Aiyoush, some distance up the river the C. M. S. have a mission in charge of Mr. J. B. McCullough. The winters are very severe, the thermometer falling from 40 to 50 degree below zero for weeks in succession. Gold is found in small quantities, and also croppings of coal, when properly prospected no doubt much wealth will be discovered.

PORT SIMPSON.

This fort, H. B. Co., is situated on the North-west end of the Simpshean Peninsula, separated from the south end of Alaska by the Portland Inlet. The town is situated on a sloping hill-side, and has a population of 800 Indians and about 50 whites who are chiefly engaged in the fishing and fur business. The village has a fire brigade, a bass band, a rifle company, a fine hall and two restaurants. The Methodists have a large church and home for girls containing about 25 pupils, there is also a day school assisted by the Dominion Government. Methodist Mission is located here.

METLAKAHTLA.

Is situated some twenty miles south of Fort Simpson, and is an Indian settlement with a population of about 125 Indians and 25 whites, a good industrial school for 25 pupils maintained by the Dominion Government, one store kept by John Cunningham. The industries prosecuted here are a saw mill, a salmon cannery, blacksmith's work, and other mechanical arts. The C. M. S. have a Mission here.

SKEENA RIVER.

Is situated fifteen miles south of Metlakahtla, and is the second largest in British Columbia. The river is navigable for a distance for steamers and canoes to the head of the Babine Lake.

The Skeena is a prolific salmon stream, and fish of the finest quality are procured. Seven canneries in operation, during the season an attractive feature are the hot springs opposite Aberdeen, about three miles from Port Essington and the capital mountain goat hunting in the neighborhood, with beautiful scenery and fine falls.

PORT ESSINGTON.

Is the principal settlement on the Skeena, contains a church of England and a Methodist church, saw-mill and other evidences of civilization, Mr. R. Cunningham carries on a large trade. At each of the other canneries there is a store.

KIT-A-MAAT.

About 100 miles down the coast, is an Indian village, and has a population of 250.

BELLA BELLA.

Is distant from Victoria about 400 miles, and is an Indian village with a population of about 250; Methodist Mission and school and one trader.

Immense Assortment of Boots and Shoes.

555

BELLA COOLA.

Is situated at the head of Burke Channel, and was formerly the landing place for Cariboo miners. The Indians are quite numerous, and the country abounds with fur-bearing animals.

SMITH'S INLET.

A good size stream empties into this inlet. up which the Salmon run in large numbers, and several canneries have been established in this neighborhood since the issue of the last directory.

O-WEE-KAY-NO.

Is situated at the head of Rivers Inlet, where the well-known canning establishment of Shotbolt & Co is located. The Indians in this neighborhood number about 150. and speak the Bella Bella Indian language.

FORT RUPERT.

This post is situated near the Northern extremity of Vancouver Island, and was established by the Hudson Bay Company for a trading post.

ALERT BAY.

Is situated about twenty miles south of Fort Rupert, on Cormorant Island, and a convenient stopping place for vessels on their way to and from the Northern ports of British Columbia and Alaska Territory. One cannery and C. M. S. mission and school in charge of Rev. Mr. Hall.

CASSIAR DIRECTORY ETC.

559

CASSIAR DISTRICT.

*Including Laketon, McDames Creek, Lorne Creek
Telegraph Creek,*

The district of Cassiar is situated along the north-western boundaries of the province. The population is about 400. Attention was first drawn to Cassiar by the discovery of gold on Thibert creek, in 1873. The principal streams on which mining has been prosecuted profitably are the Dease, Thibert, McDame and Walker creeks. The district has produced over \$5,000,000 in gold.

The features of the district are mountainous, being of little use for agricultural purposes, except on the Stickeen River, where there are a few farms which produce grain of the best quality and all the harder kinds of vegetables of excellent quality. The miners are supplied with vegetables from the last named farms, the product being regulated by the demand.

The southern portion of the district being on the coast, has produced, during the last nine years, in salmon, furs and gold, a considerable contribution to the exports of this Province. The average yearly exports from Cassiar during the time mentioned has been about \$700,000.

Its rivers and lakes teem with fish, and its forests abound with game. There is not the least doubt that remunerative gold deposits are waiting to be developed, and a mining population will be found in this country for many years to come.
