**FOR SALE.**  
At South Branch, in the Codroy Valley, as a going concern, a well equipped and productive Farm of 100 acres, of which 16 acres are "intervals", which perennially produces No. 1 Hay without fertilization or re-seeding. Remainder is choice fertile upland, of which 15 acres are under crop and the rest covered with valuable timber which can be profitably sold for paper or lumber stock. This farm is but a few hundred yards by good road from the Railway Station and has an assured market for all its produce in the South Coast ports and at the pulp and paper towns along the railway. On the farm there are 15 head Horned Cattle—some of these pure bred Holsteins—Horses and 50 Sheep; Double and Single Trucks, Sleds, Harness, etc.; also Mowing and Raking Machines, Ploughs, Harrows, etc. All the milk produced will be accepted by the local Butterine Factory, and the Strawberries can be shipped to any destination by express.  
Owing to the owner being compelled to leave the country this valuable property will be sold away below value to an immediate purchaser. Apply to

"Flatterers" OR The Shadow of the Future.

CHAPTER XV. MR. CHEENE HAS A CALLER. "Oh, hush—a moment!" She leaned back, his hand still in hers, pale, if possible, than ever. Was her father's memory that with such tenderness she had kept fresh so many years, now to be blackened—her birthright of honorable pride to be taken from her? Well, might she ask breathing space before listening to detailed evidence of such misfortune! But it was only a few seconds she wavered.

SUFFERED ALL A WOMAN COULD

Mrs. Meyer Finally Found Relief and Health in Lydia E. Pinkham's Vegetable Compound. "I always feel very grateful to you, as some twenty years ago three doctors said I had to have a serious operation. I had a tumor, and pains which would gather and break. I had displacement so bad that I could hardly sit down at times, and it seemed as if I suffered everything that a woman could suffer. Then some one advised me to take Lydia E. Pinkham's Vegetable Compound, and I took it until I was well and saved my operation. I have told women of your wonderful medicine times without number, and I am willing that you should use these facts and my name if you like. I also used your Compound during the Change, and I can do all my own work but the heavy part, and can walk miles every day as I help my husband in the office."—Mrs. J. H. MEYER, 412 South Orange St., Orange, California.

"Then, Jacob, how did the—crash come?" "Well, from all we could find out, Miss Sydney, there was warning months before. It seems that his dividend—the interest on his shares—didn't come in as it should, and he went down to the place, just between Devon and Dorsetshire, to look into it all. I remember the journey, though I didn't know what it was for at the time.

A Terrible Poisoner.

Mary Ann Cotton was easily the most terrible poisoner of the last hundred years in England. How many victims she sent to their untimely and painful deaths will now never be known, but twenty-three were certainly traced to her before she was brought to justice. And among her victims were many innocent children.

USE YOUR HEAD.

A woodpecker pecks. To make the hole bigger. Of sawdust. When building a hut. He works like a nigger. To make the hole bigger—He's sore if His cutter won't cut. He don't bother with plans Of cheap artisans. But there's one thing Can rightly be said:

Fashion Plates.

A PRACTICAL HOUSE DRESS. Pattern 3408 was used to develop this style. It is cut in 4 Sizes: 34, 36, 38, 40, 42, 44, and 46 inches bust measure. A 38 inch size requires 6 1/2 yards of 36 inch material.

A POPULAR PLAY SUIT.

Pattern 3337 is here illustrated. It is cut in 4 Sizes: 2, 4, 6, and 8 years. A 6 year size will require 2 1/2 yards of 27 inch material for the dress and 1 1/2 yard for the bloomers.

Dr. F. STAFFORD & SON, Wholesale and Retail Chemists and Druggists, St. John's, Newfoundland.

of that list, I'm afraid I haven't seen after Lewis as I ought. But it does go such a little way. And the worst of it is that I'll have to end when I end.

## Quebec the Scene of Lord Byng's Inauguration -- King of Hedjaz Proclaims Holy War -- Stirring Appeal for Russian Relief.

**DE VALERA REPLIES.**  
LONDON, Aug. 11. The reply of Eamon De Valera to the British Government's Irish peace proposals was handed to Austin Chamberlain in the House of Commons to-day.

**LLOYD GEORGE RETURNING.**  
PARIS, Aug. 11. The British delegation, through Lord Balfour, this afternoon, informed the newspaper correspondents that Premier Lloyd George had received the reply to the peace proposals of the British Government, and in view of the deadlock on the Upper Silesian question, had decided to return to London with his mission to-morrow morning.

**DIFFERENCES ABSE.**  
PARIS, Aug. 11. It was stated in French quarters to-day that the differences between the French and British viewpoints on the final developing, and that the Conference of the heads of the two Governments and their advisers on this morning had not brought about definite results.

**KING APPEALS FOR RUSSIA.**  
LONDON, Aug. 11. An urgent appeal to the British people for a generous national effort on behalf of a generous Russian has been issued by the Imperial War Relief Fund of which the King is patron. The signers are the Archbishop of Canterbury, Lord Birkenhead and other prominent politicians, writers and clergymen. After emphasizing the desperate conditions in Russia, where all countries scourged by war, none has suffered so terribly as Russia, and none has received so little of the healing gift of sympathy.

**FAMINE HORRORS.**  
RUSSIAN FRONTIER, near Zeltung, Aug. 11. Even their own children being left behind to starve by the maddest peasants are fleeing Siberia or the Ukraine from hunger and death. The German Volga Column is the worst affected of the Russian frontiers. The roads along which thousands of people are emigrating, are daily sprinkled with the bodies of children of the Colonists.

**THE SIX VOTES MYTH.**  
NEW YORK, Aug. 11. Discussing what it terms the renewal of the "Six British Votes Myth" at Washington, the New York Times, this morning, makes a strong plea for re-consideration of the British Dominion's coming Disarmament Conference. The Times says that the whole mission of the Japanese Alliance is to clear the way for President Harding's proposal for a Disarmament Conference, and was due entirely to the Dominion Press, as was much of the change in British sentiment which was evident during the Imperial Conference.

**HOLY WAR DECLARED.**  
ANGORA, Aug. 11. A holy war has been proclaimed by the King of the Hedjaz as a measure against Turkish Nationalists in Asia Minor. It was announced here to-day, the monarch in his call appeals for the saving of Islam.

**LLOYD GEORGE FOR WASHINGTON.**  
LONDON, Aug. 11. The London Times understands that Lord Lloyd George fully intends to accept the invitation to the Washington Conference as official representative of Great Britain.

**LORD BYNG ENTHRONED.**  
QUEBEC, Aug. 11. With the air vibrating from the firing of guns from Quebec's ancient walls, the sounds of whistles from the crowd, firing of bells and the playing of music, Lord Byng of Wemyss, the new Governor-General, landed this morning at the King's wharf, and proceeded to the Provincial Legislative buildings where there were in office with a few minutes before he had equalled the history of the Dominion.

**CHURCH DESTROYED BY FIRE.**  
OTTAWA, Aug. 11. A fire yesterday swept Aymer, Quebec, and left in its wake the parched and blackened ruin of what was formerly a quiet and picturesque town. At least one death, that of D. G. Lord, 83, was caused by the fire. The fire started in the property owned by Mayor Nash of Aymer at 10 o'clock.

**ROYAL VICTORIA COLLEGE.**  
MONTREAL. RESIDENTIAL COLLEGE FOR WOMEN STUDENTS ATTENDING MCGILL UNIVERSITY.

**Forest Fires in England.**  
A letter received last night by Mr. H. Keefe, from Lord Morris, says things are far from bright in the Old Land. Trade is passing from the country. The decreased output of coal, caused by shorter hours of work and absence of modern methods of mining is having a detrimental effect on the life of the nation. Referring to the drought, the letter says it lasted for 12 weeks from the first of April, with scarcely a drop of rain in the interim. The thermometer rarely went below 79 in the shade. Everything was scorched, the harvest was almost ruined, root crops being 10% below average yield. Forest fires were very frequent, and caused immense destruction. Lord Morris is describing a journey by motor to Leicestershire says he counted no less than 10 distinct fires and there was not one half mile of railway embankment for the whole 500 miles to and from London that was not burned.

**PARK CONCERT.**—The Methodist Guards Band gave a splendid selection of music at the concert held in Bannerman Park last night. A large number of people were present, and seemed pleased with the programme.

THE PRICE OF FISH

That there exists a genuine desire all round to see the price of fish go to the highest figure possible, no one will deny. But it is bound to reflect upon the country at large when there is so much talk of setting the rate per quintal at a higher sum than the demand abroad warrants.

We are in thorough accord with the sentiments expressed by our weekly contemporary The Trade Review, that the present is no time to set fishermen against merchant and vice versa.

There is a very imperfect record of work. It shows work well organized and steadily growing. Missionary work in China by Christians is as though one handful of grain was scattered over a hundred acre field; and the work in Shantung, and of 'Our Own Missionary' is, as it were, one grain out of the handful.

Teas at Bowring Park.

Teas were served yesterday at Bowring Park in aid of the Girls' Industrial Home Association.

SUNDAY SCHOOL SERVICE.—Rev. I. Stocker, Missionary to China, will address the Sunday School children of the different Anglican parishes at a combined service to be held in the Cathedral on Sunday afternoon.

Diocese of Shantung, China.

This Diocese, formed in 1903, is coterminous with the Province of Shantung. Here Bishop Hill, a classmate at St. Augustine's Canterbury, of our Bishop White and Canon Smart, has a growing staff of English and Chinese workers, including three Chinese priests and four deacons.

ENGLISH WORK. Chefoo.—It was here Bishop Scott and Mr. Greenwood landed in 1874. There are two churches, one of which was used for a time as the chapel of a small theological college, where clergy and catechists from the Dioceses of Peking and Shantung received most valuable training.

CHINESE WORK. Tai-an-fu is the headquarters of the Diocese. A little church built in 1894 has now been replaced by a fine Cathedral of stone dedicated to St. Michael and all Angels.

There are good Christian schools for boys and girls at Tai-an-fu. A Chinese priest has full charge of one group of out-stations and the work is growing steadily.

Ping Yin.—Work has begun here at the same time as at Tai-an-fu. Now a beautiful stone church, dedicated in 1906 to St. Stephen as a memorial to Sidney Brooks, is the centre of the work.

Yen-show-fu, near the birthplace of the sage Confucius, was opened in 1909, and has now its preaching-room, hospital and schools, English and Chinese clergy and workers, men and women.

May Adjourn. The longest session of the local legislature comes to a close to-day when adjournment may be taken until December 12th, unless any emergency arises which will require immediate attention.

Committed for Trial.

Stephen Wells, lookout man of the schooner "Fanny W. Freeman" was committed for trial to the Supreme Court to-day by Judge Morris on a charge of manslaughter.

Got Six Months.

A youth was sentenced by Judge Morris to-day in the Magistrate's Court to six months imprisonment for the larceny of several pairs of boots from the N.B. Produce Co. It was the prisoner's third offence.

FRIDAY, August 12. In hot weather there are two apparently distinct troubles that may be reached effectively by Jad Salts—liver troubles, and skin affections caused by the heat.

Train Notes.

The outgoing express was at Bishop's Falls at 3.20 a.m. and is due at Port aux Basques this evening.

Personal.

Dr. H. A. Smith, who was at North Sydney attending his mother's funeral, arrived in the city this morning.

Shipping Notes.

S.S. Rosalind sails to-morrow at 1 p.m. for Halifax and New York. S.S. Sabie I. is due here from North Sydney on Monday morning.

A Crooked Erection.

Under the supervision of the Marine and Fisheries Department, there is being erected a building on the King's wharf, which will, when finished be a disgrace to the city.

False Alarm.

Quite a bit of excitement was caused in the Eastern End of the city at 10.30 last night, when it was reported that someone had drowned in the harbour.

SHEATHING PAPER.—Book orders for Sheathing Paper at AYRE & SONS, LTD., Hardware Dept. Delivery next week.

The Price of Salt.

We understand that the salt now being imported by the Government from St. Pierre is costing \$3.70 per hhd., not including the freight.

Northern Labrador Report. The Minister of Shipping has sent the following message from Geo. Harbour of S.S. Sord, stating that here, having been North to St. John's, just a sign of fish as far as was gone. No quantity anywhere at the weather throughout trip was stormy with heavy seas. At Port there was a fairly good sign of fish but weather conditions were unfavorable. The schr. Sheila K. Gers, master, was lost here in the sea and ice, but crew and gear saved, the salt supply being left on about 40 schrs. North of St. John's. The majority of schooners are of this type, the wind being unfavorable for getting North. Captain P. T. McGraw thinks that with favorable weather fair fishing will be done about coast.

Legislative. THURSDAY, August 11. The House met at two hours, and the Revenue Bill, second reading, was the final stage. The Speaker announced that the House would adjourn on Friday, August 12, at 12 noon. The House adjourned at 12 noon.

Legislative Council.

THURSDAY, Aug. 11.  
The House met at 4 p.m. and after two hours' session cleared off nearly all the outstanding business. The Revenue Bill was given a first reading, and will go to the second reading, and will go to the final stages this afternoon. The Sheep Farming Bill, which was on the Order Paper for a considerable time, has disappeared. The Warehouse Receipts Bill has been sent to a Select Committee. The second reading of the Bill respecting Banks and Chattel Mortgages which was introduced at the sitting has been deferred. The business of the House during the evening was the Bill dealing with illegitimate Children, which went through all its stages. The Public Service Act also passed. The Sales Tax Bill brought forth a lot of questioning by both sides of the House, as there were many amendments in the Bill that were not desired by the Council.

The President of the Council entered if the tax was to be collected for articles for church use. Mr. F. McGrath pointed out that these articles were not exempt. While debating this matter he proposed the question what is raw wool within the meaning of the act and did the manufacturer have to pay double tax if he bought his materials from an importer. He cited a basket who buying yeast, currants or other ingredients locally at the 5% on the articles after the manufacturer's tax. Mr. G. Winter said he understood that the manufacturer was to be protected to some extent. Mr. John Jones then moved in a discussion. Before the Bill went through a rather awkward situation as it was discovered that in the document that was passed all the "Resolutions" instead of "Being a money bill the Council could not make any amendment. It was as was suggested by Sir F. McGrath that it pass all its amendments in the form in which it was passed up but that the alternative was necessary. The suggestion was adopted.

The Income Tax Bill was put through all its stages. When in Committee Sir P. T. McGrath took occasion to object to the principle of extending the Governor and the Judges to the Supreme Court from this tax. England not even the King is exempt. He would not advocate that the present Governor should be made liable because it would be for a misunderstanding, but there was a reason why the tax should not apply in the case of future Governors, who should not be allowed to travel more than their official duties called for. All the economy that was not to be practiced at the expense of the Governor and the Judges and it was only fair that the same who were being exempted by the Bill should contribute their quota to the general revenue. The question relating to the salaries of servants upon its second reading spoken to by Hon. George Shea. He said that he was not in favor of the salary developed upon him of the charge of this Bill. He knew that it would bear hard on a large number of the civil servants, but the salary of the Governor and the Judges was not to be touched. There was an alternative left to the Government, but that was a drastic action had to be taken. He hoped that the future might be brighter so that the hardship imposed could be removed.

Mr. F. McGrath, in reply, said every one feels that the Government might have refrained from decreasing the smaller salaries, and had acted more wisely if they left them untouched. Economy was necessary; it could be practiced in other directions, one of which was to be the topping off of the new Department. Money had also been saved where it was being spent on works that give no returns. Sir Patrick, regarding the general condition of the colony referred to the various sources of revenue particularly Bell Island and the West Coast fishing industry. Valuing codfish at 10 cents per quintal, Sir Patrick gave it his opinion that seven and a half cents in revenue would be the outcome of that that we could expect. In his opinion that the decision of the Government to adjourn till after the next election and he would be in the interim serious attention would be given to the railway.

The Bill passed all its stages, after the second reading, in Committee and third reading being dealt with this afternoon's sitting. The House adjourned at 6 p.m. until 10 p.m. to-day.

Thursday, August 14th, Cape Garden Party. Grand Air Concert. Luncheon was served during afternoon.

League Football.

PELIDIAN WIN FIRST GAME.  
The Pelidians won their first game in the League football series last night when they defeated the Etobon by 3 goals to 1. The game was an excellent one, and was played in a very spirited manner. In the first half the Pelidians scored twice, Payn and Ewing doing the scoring. In the second half the Etobon scored once, but the Pelidians became very fast until they scored four goals in the last half.

Wedding To-Morrow.

Miss Mollie McKay, daughter of Mr. McKay of the Evening Telegram and Mr. H. P. Harvey, will be married at the home of the bride's mother, Mrs. McKay, on Monday morning, by Rev. S. S. Schem for Halifax, N.S. The bride will afterwards take a train for Bridgewater, Nova Scotia, where the honeymoon will be spent.

**TO-DAY'S MESSAGES.**

**SHIPPING BOARD HAS A HOODOO.**  
MADRID, Aug. 11.  
The United States Shipping Board steamer Black Arrow sank early this morning off Cape Blanco, on the West coast of Spain. The steamer was on its way from Havana to Santander. The crew and passengers were all saved, but it was thought the ship and its cargo were entirely lost.

**PAYMENT WILL BE MADE.**  
BERLIN, Aug. 11.  
Vorwaerts to-day announced that the payment of one billion gold marks to the Allies would be made on August 30, according to schedule. The newspaper also states that dissolution of German self-protection troops in Upper Silesia would take place soon.

**AS A LAST RESORT.**  
PARIS, Aug. 11.  
Premier Briand, late to-night, informed the British delegation that he would be willing to accept, as a last resort, the Sforza line in Silesia, according to the Havas Agency. This line gives Poland the Western part of the industrial district, notably Głiwitz Zabrze and Tarnowitz.

**FAVORABLE REPLY.**  
PARIS, Aug. 11.  
Premier Lloyd George studied the Sinn Fein reply until a late hour this evening. It was then announced by members of the British delegation that Lloyd George would make no statement on the situation until after a Cabinet meeting on Saturday. A report that negotiations have been broken off is denied by British and official circles. It was declared that the reply was of a nature to permit further parleys.

**OPTIMISM PREVAILS.**  
DUBLIN, Aug. 11.  
No responsible Sinn Feiner, who knows, will give any hint of the nature of De Valera's reply, even if the Government proposals have leaked out, but the inference drawn by those in contact with Sinn Fein leaders and Government officials, is that both seem in better spirits than would be possible if a renewal of the struggle were feared. The general tone among Sinn Fein leaders, seemingly, is one of confidence and this is observed among the rank and file as well as among officials and released members of the Irish Republican Parliament talk as if they had no idea of returning to jail.

**DEADLOCKED.**  
PARIS, Aug. 11.  
The French and British Prime Ministers are far from an agreement upon the new line dividing Upper Silesia, drawn by experts appointed for this purpose by them Tuesday evening. Therefore the work of the Supreme Council, which has had under advisement the Silesian problem, cannot be completed for the present, nor is it possible to forecast any outcome of differences which have arisen over the knotty German-Polish question.

**The Rubicon.**  
The Rubicon is the ancient name of a stream flowing into the Adriatic, which formed the boundary between Cisalpine Gaul and Italy proper. The phrase "to cross the Rubicon" has come to mean to take an irrevocable step, from the familiar story of its passage by Caesar, who, by crossing it in 49 B.C., virtually declared war against the Republic.

**Royalty in Greenland.**

Godthaab, Greenland, July 10. (By wireless via Reykjavik and Copenhagen).—For the first time in its history, Greenland has been entertaining royalty. King Christian and Queen Alexandrine of Denmark arrived here on the steamer Island, from Iceland and received a warm welcome from the Eskimo population. After rounding Cape Farewell at a considerable distance to avoid the ice, the weather changed from foggy to clear and the rocky west coast of Greenland, glittering with ice, was sighted against fantastically-colored clouds. For some time the Island and her escort, the warship Fylla, had to thread their way through a stretch of drifting ice and several icebergs were seen near the vessels. Just outside the skerries off Godthaab, a single Eskimo kayak appeared and its sole occupant was taken on board the Island and presented with a rifle by the King. Inside the bay, encircled with snowclad mountains a whole squadron of kayaks rowed out to greet the royal party who admired the skill with which the Eskimos handled their craft. The native women wore the characteristic many-colored Greenland costume, with short breeches and long skin boots. After landing a reception was held followed by religious service and the rest of the day was given up to festivities. The King was presented with a kayak and the Queen with a blanket of elder skins. The royal party afterward left for northern Greenland and are expected home by the end of the month.

**One Great Sea Service.**

Earl Beatty On the Men of the Mercantile Marine.

Handsome tribute to the great exploits of the men of the mercantile marine was paid by Earl Beatty, while unveiling a tablet erected by the General Steam Navigation Company to the memory of the men in its service who lost their lives in the war. Earl Beatty said that one of the outstanding facts of the great war was the welding together of the two great sea services into one, and to-day the Royal Navy and the mercantile marine were one service, the one great service of the sea. As a member of the Royal Navy it was a matter of great satisfaction that he was permitted to say something of the great honour and respect which the Royal Navy held and had for those officers and men of the other branch of the sea service. It was a matter of common knowledge, almost hackneyed by repetition, that no British ship ever failed to sail for want of a crew. The risks which these men took were not the average risks of war, but they had to meet and to deal with a piracy, the thoroughness and virulence of which was not reckoned with in this humane country of ours. It was imperative that the lines of communication should be kept open, and that a protection should be offered to those men who provided the sinews of war, but such protection as was possible gave them but a sporting chance. It would be right to say that it was not the efficacy of the anti-submarine methods which enabled these lines of communication to be maintained, but rather the stout hearts and the great courage of the British seamen. "To-day, it is sad to think," proceeded Earl Beatty, "that owing to the economic distress, there are many who have served their country in this capacity who are on their beam-ends. It is impossible for shipping companies to find commands for a man when there are no ships. I have had brought to my notice only recently cases of master-mariners of great records, faultless in their lives, who are now on the rocks for lack of employment. What the remedy is, I don't know, but surely, in time it will be possible to find a remedy?" That company was amongst those that had suffered much, he added, and he thought he was right in saying that very nearly 30 ships were lost in the service of the Empire, a great record, and one for which it was suffering to-day.—Ex.

**The Big Fight.**

People are still talking about the Dempsey-Carpentier fight. Some queer things come out after such affairs are over. Few realize that while ninety thousand, mostly Americans, were watching what are in sporting parlance called the "big fights," the United States transport Wheaton slipped into the Hoboken docks, carrying the bodies of more than five thousand real fighters aboard to be buried in their native ground, and only a handful of American Legion men and veterans of foreign wars were there to welcome them. Then Dempsey came out in Chicago, where he had fled to escape arrest by officers of the Law and Order League, with a statement to the effect that just about the time of the last round two mysterious men, one with a towel in his hand ready to throw, had appeared mysteriously at his corner of the fight platform, evidently bent upon creating confusion by throwing the towel in the ring. Dempsey was told by a friend and assistant, Mike Trant, that the men claimed to have been placed there by Rickard. They were supposed to have been handed over to the police. None of the dozens of reporters present saw the two mysterious men, nor is it known what became of them. But Dempsey and Trant insist that they were there.

And then, to cap the climax, comes the statement from a doctor employed by Carpentier that the latter had strained the thumb which went back on him in the third round, so badly some time previously to the match that it was hardly fit to fight with on July 2. The doctor had kept this fact a secret even from Descombes, Carpentier's manager. It is such stories coming out afterwards that shake popular confidence in professional sport.

**Fashions and Fads.**

A great deal of hand embroidery is seen on children's frocks. A middie blouse for sports wear is knitted in vivid blazer stripes. A striped vest of linen features a fluffy not ruffle down the front. A hat of tangerine velvet is trimmed with white suede flowers. Plain and brocaded chiffon velvets make many smart fall gowns. Suit coats show a tendency to preserve the flat line, back and front. A frock of black mat crepe has floating panels of black Chantilly lace. Flannel middies are much worn. They are developed in black and white.

—One-Piece Porcelain Food Chambers—  
—Rounded Inside Corners

With food chambers made in one piece, with no seams or joints to collect grease or dirt; lined with hard, non-scratchable porcelain, the Leonard is easy to clean and a constant safeguard against tainted food. Rounded inside front corners, which also make cleaning easy, may be had only in the Leonard Cleanable. Feel for them when you go to buy.

The genius of C. H. Leonard, pioneer of the refrigerator industry, is responsible for the perfection of the

**LEONARD Cleanable Refrigerator**

Such master touches as the removable waste pipe, easily cleaned; the self-closing, air-tight, Leonard locks; ten heat-resisting walls of insulation, the device which positively prevents leaking, thus insuring the durability of the refrigerator; and the "non-sweating" waste pipe—these were all created by Leonard and are to be had in no other refrigerator. One out of every seven refrigerators sold is made by Leonard. It is the logical result of Leonard superiority. Don't fail to see the Leonard. Come in today. ### Cat Out Consignments.

According to present indications, there will be good demand in the United States markets for large and medium Newfoundland herring of the Scotch pack method. One buyer has already at this early stage written to a firm here, stating that he will be in the market to purchase the fish here on the spot, and that though the new tariff regulations of the United States might bear heavily on herring, yet the shippers should not mind it, thus insuring that the price will be sufficient to offset the extra tariff charges. We understand the United States market is now practically empty of Scotch pack herring. The Scotch pack the past season was practically nil, due considerably to the big coal strike in the British Isles, which necessitated the laying up of the steam drifters. The Alaska herring trade has to look to this country for its supply of large and medium fish.

It is important, however, if we wish to retain this trade that strict attention be given to the grading of the fish and of their cure. And we would impress upon the packers the advisability of cutting out the consignments and insist on outright sale. It is just as well to keep their fish in their stores here, as it is to ship them to New York and get no returns. While you hold your goods we retain control of them, but when you consign them you place yourself at the mercy of the consignee and the outcome is usually very unsatisfactory to you.—Western Star.

### Invention of the Balloon.

The idea of soaring through the clouds was not conceived in the brain of an adventurer nor in the workshop of a great inventor. It first occurred to a cloistered monk, Brother Albert of Saxony an Augustine monk who lived in the fourteenth century, first conceived the invention. The actual one was made by Francesco Mendosa, a Portuguese Jesuit, who died in 1528. His experiments followed, but the substance of Albert's and Mendosa's inventiveness was not made really practical until Henry Cavendish, the English chemist, discovered in 1782 that hydrogen was 10.8 times lighter than air. Progress became rapid after this, and before long European inventors began to improve on the prevailing methods. The first attempt at a "dirigible" is credited to J. B. Laite, a Frenchman, who in 1783 exhibited the model of an "aerial ship," equipped with a screw before the Academy of Sciences at Paris.

### What About Refrigerator Prices?

Pre-war refrigerator prices! You do not have to wait for "Like a Clean China Dish" refrigerator prices to come down. They are on pre-war basis now. They were not increased like other commodities so you are safe in coming today to see and purchase a Leonard Cleanable Refrigerator at this store.

They are shown in styles and prices to fit your home and your purse.

One out of every seven refrigerators sold is a Leonard. It is the refrigerator which is famous for its one-piece porcelain food chambers, which are so easy to clean due to the rounded inside corners and the famous patented rounded inside front corner, the non-leaking device, and the Leonard patented trap.

Come in today and you will be gratified at the fairness of the prices.

### An Old Academian

HONORED BY CLUB MATES.

Mr. T. W. Cragg, of Concord, N.H., is a passenger on the Rosalind, visiting St. John's after an absence of 27 years. Mr. Cragg, who is well known in the city, is one of the founders of the Old Academics Club, and an enthusiastic leader in music and amateur theatricals, both in the Club and in the B.I.S., has made good in his adopted home, and has had the honor of representing a division of the City of Concord in the Legislature of New Hampshire. When he arrived yesterday, a group of his old chums hurriedly got together and tendered him an old-time Newfoundland welcome. The clans gathered and repaired to Brennan's hospitable hearth, where an informal reception was held, and he was guest of the boys to a dinner served in Mrs. Brennan's best manner. The Old Minstrel Club was represented by Mr. H. W. LeMessurier, C.M.G., who presided with his well known grace and bonhomie, and the B.I.S. Dramatic Club by Mr. W. J. Higgins, M.H.A., and Mr. P. Moore, M.H.A. The toast of the evening was proposed in a felicitous manner by the genial chairman, and was enthusiastically received by the whole company. Mr. Cragg responded in his well known old-time manner and brought back to his audience many pleasant memories of early days. Songs, speeches, old-time club choruses and reminiscences followed each other in rapid succession, contributions being made by the one and only Professor Hutton, H. Y. Mott, Jno. Barron, "Nattie" Snow, W. J. Higgins, P. F. Moore, J. V. O'Dea, P. Bradshaw, T. Barron, W. J. Carroll and others, and they appeared to renew their youth and for the nonce were care-free boys again. The guest of the evening must certainly have felt flattered by the warmth and evident sincerity of the many pleasant events that were recalled of his early associations with all present. After they had "Rocked at Ship" till the welkin rang, and sang "Auld Lang Syne, the company dispersed after having spent a very pleasant evening. The announcement that Mr. Cragg would revisit the haunts of his youth here, and bring his family along in a longer visit was received with great satisfaction by his friends, who hope to avail of the opportunity to run off an old-time Academics entertainment for some charitable object during his stay. Mr. Cragg takes away the pleasantest memories of his short visit, and the sincere wish of his friends that his next one will be soon and longer.

### Premiers of Empire Address the King.

(Canadian Press Cable)

London, Aug. 7.—An address presented by the members of the imperial conference to King George after reaffirming their loyal devotion says:—"We have been conscious throughout our deliberations of the unanimous conviction that the most essential of the links that bind our widely spread peoples in the crown and it is our determination that no changes in our status as peoples or as of governments will weaken our common allegiance to the empire and its sovereign. Knowing your majesty's deep interest in all that touches your people's happiness, we trust that our labors in this time of world-wide unrest may be satisfactory to you and conduce to the welfare and fidelity of the dominions as well as to the peace of the world. We pray that your majesty and her majesty Queen Mary may long be spared to enjoy the affection of your subjects and to see all classes equally recovered from the strain and sacrifices of the war."

### Silk Made From Milk.

At the present time France leads the way in the manufacturing of various useful articles from milk, which is first turned into curds, then parboiled and exposed to the air, and finally treated with a certain kind of spirit. After this the milk will have turned into a substance as plastic as putty which can be very easily moulded or rolled.

With judicious care in the boiling and spirit treatment, the milk may be brought to any desired consistency, and can even be used as a substitute—and a remarkably good one, too—for silk, in the manufacture of fine underwear; or it may be soiled enough to serve as a good imitation of ivory.

Swedust, too, is easily treated so that it may be used in the manufacture of a widely assorted number of articles, among which are "silk" socks, sausage casings (a horrible idea), gramophone records and many others. The "silk" looks and feels like silk, but is, of course, very much less expensive. The sausage covers are made by treating the swedust chemically and rolling it out in a thin line.

## Newfoundland And Its Blind.

(By J. M. Howley.)

Article I.

### INTRODUCTORY.

The recent editorials appearing in our daily papers, regarding the munificent gift made by Hon. Sir Edgar Bowring, K.C.M.G. of Waterford Hall, for the purposes of training the blind of Newfoundland, must naturally incline our people, whilst acknowledging gratefully the philanthropy of the donor, to take into consideration the purposes for which the gift has been made.

Having been in communication with Mr. John Weir, late of the Halifax Institution for the Blind, recently, and having gained from him a lot of information as to what is being done in other countries, and what can be done here, for those of our people who are so severely handicapped as to be unable in their present state, to adequately care for themselves, I have decided to be one of the fools who "rush in where angels fear to tread," and to give to the public the fullest data at my command, concerning the designs and hopes of those who have taken upon themselves the training and equipment of their fellow countrymen on whom Providence has visited the saddest of all afflictions.

Though I should wish that some sabler pen than mine would give this matter the publicity it deserves, my apology for thus placing myself before the public must be, primarily, and the cause itself, and secondarily, the interest that my various conversations with Mr. Weir have aroused in me, and which I trust, my feeble efforts may be effective in engendering in the rest of my fellow countrymen. And I am emboldened in my effort by the well known open heartedness and kindly sympathy of Newfoundlanders as a whole.

I propose in a series of articles, to lay before the reading public such information as has been detailed to me, comprising the necessities of the blind in the matter of training, the proposition of the Institution for Training and Employment of the Blind in Newfoundland, and the need of sympathetic interest in the work on the part of the general public.

The census of 1911 gives the total number of blind people in this country as 287. There is reason to believe that this number includes only those who are unable to distinguish light from darkness, or in other words those who are "stone blind." But there is another class which comes within the category of blind as regards training; and that is those who through incompetence of vision are unable to read, and who, though they may be able to distinguish objects vaguely, are nevertheless, incompetent without necessary training, to engage in any remunerative occupation. This class is estimated to contain nearly as many more as the number appearing under the head of blind in the census above referred to. So that, in the matter of training and employment, there are upwards of five hundred cases to be considered. Think of it, you people who are blessed with full powers of vision! Five hundred of our fellow countrymen, who through no fault of their own, are debarred for the whole period of their existence, from enjoying the pleasures that delight the eye, and being forced to a life of idleness, and probably, in a great many cases, of dependency.

From a material standpoint, these people are to-day, and without training, will be for all their lives, a burden on the state and on their relatives. By the establishment of such an institution as is proposed they can be trained in various trades suitable to their conditions, and made happy and prosperous, and changed from a liability to the state to a decided asset. What one of us is there who would not lend his kindly sympathy to bring about such a state? What one of us is there who would not wholeheartedly assist to lighten the burden that must necessarily hang over him to whom the precious boon of sight has been denied?

### Personal.

Mr. Wilfred Swaffield, accompanied by his wife and child, arrived on the last Sagona from Davis' Inlet, where he was stationed the past three years as the Hudson Bay Co.'s agent. He leaves again by the Sebastopol, on Monday next, for Okak, to which station he has been transferred.

Mr. Norman S. Parsons, who was of us in the Bank of Nova Scotia at New Campbellton, N.B., has been transferred to Kingston, Jamaica, and has proceeded via New York to take up his new duties. Congratulations.

Messrs. J. Wallace and E. Waugh, who have been visiting St. John's in connection with the new fish spinning machine, left by yesterday's express en route to Seattle.

Mr. Peter O'Brien who has spent a two month holiday in Canada and the States returned by yesterday's express.

The train leaves St. John's on Sunday, August 14th, at 1.30 p.m., for Cape Broyle Garden Party. Be sure to be on time.

## The War Memorial.

Editor Evening Telegram.  
Dear Sir,—May I be permitted space to make one or two comments in connection with the article headed "The War Memorial. What is the public doing?" in your issue of last evening.

While agreeing absolutely with the general sentiment of the article, there is one remark that the writer makes that is absolutely out of order. He says "Church and other charitable affairs are always well patronized as they should be. Surely these organizations can spare a small part of the large proceeds they obtain through their garden parties and other affairs towards the War Memorial."

At almost the first meeting of the Executive Committee of the War Memorial it was decided that the Memorial should be erected by voluntary subscription only—that is by persons giving a definite subscription towards the object without coercion and without getting any tangible return for their subscription other than the knowledge that they have helped in the erection—to quote War Memorial certificate—"of a suitable Monument in Memory of their Countrymen who gave up their lives in the cause of Freedom and Humanity."

It was therefore decided that however appropriate garden parties, theatrical entertainments and other amusement giving money making enterprises were for charitable purposes they were absolutely inappropriate in connection with the War Memorial. For instance there can be no objection in the world to spending a pleasant afternoon at a Garden Party, eating a three dollar tea (for which one pays twenty five cents or a dollar) and losing a few dollars on the "Wheel of Fortune" when the proceeds go to a lot of orphaned kids but to erect a Memorial to the dead of the Newfoundland Regiment through the proceeds of eating, drinking, buying raffle tickets and generally having a good time would be singularly inappropriate.

The Executive Committee of the Newfoundland War Memorial feeling almost unanimously that way about the matter decided to decline all offer of amusement giving enterprises to be started in aid of the object. Surely, that being the case, it would be absolutely inconsistent to ask or suggest to the promoters of such entertainments in aid of other objects to hand over any part of their proceeds to the Memorial. There is just one other thing in connection with this matter, however. A lady friend of the Methodist Orphanage purchased a Certificate in the War Memorial Company Unlimited (price one dollar) for each child in that institution. If friends of the other Orphanages would do the same thing for the inmates of the other Orphanages it would be an excellent example followed both from a charitable and sentimental view point.

With regard to the general subscription list, voluntary subscription (large and small) are most earnestly desired from the large proportion of the public who have not yet subscribed. The public may rest assured that a Memorial is going to be erected even if the Committee can only spend the twelve thousand dollars odd they have in hand at date. That the Monument (if more money is not received) may also be a monument to the apathy of a large number of Newfoundlanders who did not subscribe will be regrettable but that can be remedied by everyone sending in a subscription towards the Memorial right away or handing same to one of the authorized collectors that are now being appointed in the shops, factories and clubs throughout the city and in the outports. Thanking you for space,

Yours very truly,  
P. E. OUTERBRIDGE, Hon. Secy.-Treas. Nfd. War Memorial Committee.  
August 12, 1921.

### Important to Small Car Owners.

"As the Municipal Council is now advertising for 1921 Motor Car taxes, the following letter received by the Secretary of the Newfoundland Motor Association this week in connection with the refund promised small car owners last season will be of timely interest:

"The Secretary Nfd. Motor Association.  
"Dear Sir,—In reply to your favor of the 8th inst., with reference to refund promised to certain car owners last season, I beg to say that there is a section in the 'Amending Schedule to the Act for the Maintenance of certain Public Roads' which provides for this refund.

"So as to make the matter quite clear, I have communicated with the Secretary of the Municipal Council and also sent him a list of the Ford and Chevrolet car owners who paid the extra tax last year and I do not anticipate any trouble in this connection.

"Yours truly,  
(Sgd.) R. HIBBS,  
"Secy. Nfd. Road Commission."

(The above letter is inserted at the expense of the Nfd. Motor Association for the information of those interested. If you have not yet joined the Association won't you do so? P. E. Outerbridge, Secy.-Treas.)

## Lantic Sugar is Guaranteed Pure Cane Sugar. ISN'T THIS QUEER?

Lantic packages are full weight.

Shopkeepers who have not bought Lantic Sugar in packages (2's and 5's) tell us that people will not buy sugar in packages.

Shopkeepers who bought Lantic Sugar in packages in June bought again in July and are still giving us repeat orders.

If people are not buying it, where is it going? We are selling thousands of packages.

And here's a strange thing. Those of our customers who buy Lantic Sugar in packages are selling more sugar than those who buy sugar in barrels only.

This is what we think. We think that shopkeepers who say, "People won't buy Lantic Sugar in packages" don't know what they're talking about.

### Near Abraham's Birthplace.

Many interesting and valuable discoveries have been made in recent excavations in the neighborhood of Abraham's birthplace by Dr. Hall, of the British Museum Egyptian Department.

Dr. Hall's researches have led to the conclusion that the Babylonian city of Ur, from which the patriarch Abraham set forth on his wanderings to the promised land, existed long before King Urengur repaired it 2,500 years before the Christian era.

The excavations revealed a number of copper iron heads, probably intended to be supporters of a throne. Eyes made of shell, and Jasper teeth and tongue, all fastened on with copper wire were also found. These heads were of cast copper.

To cast copper is an exceptionally difficult operation, and the accomplishment of it is an indication of the high point of civilization attained by these early dwellers of Lower Babylonia.

As the heads were hollow, they were filled with bitumen and clay to make them more durable. This fact explains most probably the enigma of the image mentioned in Daniel, which was a mixture of metal and clay.

Two wonderful columns were discovered. The trunk of these columns were covered with diamond-shaped scales, fastened with copper wire. These scales were red, black and white. Nothing like these columns has ever been seen before. It is an absolute novelty in archaeology.

Editor Evening Telegram.  
Dear Sir.—This is an extract from a letter just written to the Government. The situation is going to be very serious this winter unless some one looks ahead and does something. Sincerely yours,  
WILFRED T. GRENFELL,  
M.D., F.R.C.S.  
Flower's Cove, August 4, 1921.

"We are trying to teach people to give up trying to get flour at all, and live on cornmeal, oatmeal, and potatoes, so as to have enough this winter to sustain life—so as to have a margin to give away among their worse of neighbors. Very few have any potatoes—it is almost impossible to grow them—and if they could have a schooner come from Prince Edward Island without duties it might avert a great deal of suffering, and save many lives. The fishing here has been very bad, and the failure of the People's Store has further impoverished them. The unavoidable facts are:  
1. There are a number of families starving now, and many more are certain to starve this winter unless something is done.  
2. The independent families are terribly apprehensive of being themselves starved by the foodless ones.  
3. The remedy is that cheaper foods, e.g., Potatoes, Cornmeal, Oatmeal, Rye, must take the place of flour.  
4. On this North coast the fishing is a failure, and very few vegetables are grown.  
5. Beri-beri results from lack of certain vitamins, not found in white flour diet; and forms a vicious circle, paralyzing the victims from carrying anything, and so leaving an unfeeling maddard.  
6. If Prince Edward Island vegetables may come in free this winter from Cape John to Port Saunders, a great saving to the Colony may be effected—a far greater one than the loss of a few dollars duty would suggest."

**Nova Scotia Woman Has Gained Twenty Pounds in Weight By Taking Tanlac.**

"I could talk all day long about the good Tanlac has done for me and then not tell half of it," said Mrs. Irving Keddy, Tuft's Cove, Yarmouth, N.S. "I had stomach troubles for a long time. After meals gas would form on my stomach, pressing up into my chest and causing awful pains, and sometimes it seemed that I would smother. I scarcely knew what it was to sleep, just rolled and tossed most of the night and when morning came I felt so tired I didn't want to get up. I had a headache many mornings and felt nervous all the time. I fell off until I was little more than a shadow and was so weak I could hardly hold up my head.  
"I took the advice of a lawyer friend of ours and gave Tanlac a trial. I can eat anything I want now and never have a trace of indigestion afterwards. I have gained twenty pounds in weight and everybody tells me I look the picture of health and I certainly ought to, for I never felt any better in my life. Instead of dragging myself around now like I used to I can get out and walk two miles and enjoy every step of the way."

**The Drought in England**

Despite some local showers, there are no signs of any real break in the almost universal and unprecedented drought. The rainfall for the last nine months is less than half the average. Leaves are falling from the trees, the spring-sown corn is lamentably short in the straw, the meadow grass is refusing to grow, the cows are beginning to give less milk, and on some fruit farms even the apples are being burned instead of ripened. It is the most serious drought within living memory. The need for strict economy in the use of water is imperative, and the authorities ought to take drastic steps in every case of deliberate or reckless waste.—Daily Mail, July 9.

**Prospectors Had a Trying Trip.**

**PARTY WHICH WENT TO LABRADOR RETURNS GREATLY DISAPPOINTED.**

SYDNEY, N.S., Aug. 8.—It was a sad and disillusioned party of timber prospectors who reached Sydney to-day from Labrador, via Louisburg, after a long voyage north in the wrecking steamer La Canadienne, to inspect some timber limits which they say they recently purchased from a Newfoundland man, paying \$20,000 down to bind the bargain.  
H. C. Bell, of Montreal, heads the expedition, and he has with him his son, Leo Bell, Milton Bell, of Halifax; R. W. Edwards, of Jordan, N.Y.; James R. Cannon, of Udon, N.Y.; J. G. Hoffman, of the Kelleys Lumber Company, Udon; John D. Roach, a Quebec Government timber cruiser, Montreal, and M. De Moylesman, of Mohawk, N.Y.  
The party left Louisburg July 14 for Labrador and had nothing but hard luck the whole trip. They intended to inspect a timber limit of 148 square miles at Stag Bay. Their vessel broke down and had to be repaired at North Sydney, from whence a fresh start was made. At Stag Bay the engine broke down again, making the return trip very slow, so that they ran out of provisions and suffered other privations. While inspecting part of the property, their motor boat ran aground and the party attribute their escape to the courage and resourcefulness of the Eskimo guides.  
Within fourteen miles of Louisburg on the return the engine broke down completely, almost on the same spot where the tug Musquash, a sister ship, was lost a few days ago.  
Bell, head of the expedition, is looking for timber to fill an order for Holland of 60,000 cords of pulp wood a year for ten years.  
Mr. Edwards declared they had been told they would find the best of pulp timber, but had found instead nothing but scrub spruce. "It is too cold for anything else to grow there," he declared, "even if there was wood, there is nothing to float it down to the sea in."  
The Belles will next investigate New Brunswick properties, and meanwhile contemplate legal action to recover their \$20,000.

**Pompous and Pretentious.**  
THE TIMES ARTICLE ON LORD CURZON.  
"We understand that Lord Curzon has passed sentence of excommunication upon The Times for its impetuosity in alluding to his 'pompous and pretentious manner' and his 'business incapacity' as exhibited in the present state of his Department. While our regret at being thus classed among the impious is suitably profound, we must confess our inability to recant our heresies, inasmuch as they, like many heresies, contain a salutary, albeit a disturbing, element of truth. This, we imagine, is the real reason for the promulgation of the major ban. Lord Curzon has many qualities, but they seem not to enable him to join sincerely in the prayer of Robert Burns that some power would give us the gift to see ourselves as others see us. He appears to wish that the gift should be given to others to see him as he sees himself. Be this as it may, we receive his sentence with equanimity, and with a hope that some bountiful power may one day bestow upon him a sense of humour.  
"As to the Department over which he presides, the state of inefficiency and subservience into which he has allowed it to fall is a matter of national concern, since it tends to upset the balance of our constitutional safeguards. In the course of its long history, The Times has often had to discharge the painful duty of criticising the shortcomings of Foreign Secretaries and of opposing, sometimes violently, the vagaries of their policies. Some of those Foreign Secretaries have, in consequence, visited it with their displeasure—and have lived to regret such ebullitions of wounded vanity. In the end, they have invariably found it to their interest, and to that of the country, again to see the support of The Times. We therefore await with calmness the day when Lord Curzon, or his successor, shall realize the foolishness—to quote some classical advice—"not to seem senseless of the bob," even when he may feel himself to have been "very wisely hit."

**The Yellow Peril.**

**BIGGEST CLOUD ON THE HORIZON OF THE WORLD.**  
Paris, July. (Associated Press)—Dr. A. F. Legendre, a French writer on Chinese and Asiatic subjects gained from 25 years of travel and observation in the Far East, warns the world in his latest work that "Asia is at the white man's doors, 900,000,000 strong." The biggest cloud on the horizon of the future, he says is the "yellow peril." The white race, Dr. Legendre says, "lost face," as the Oriental puts it, when Japan defeated Russia. During the great war, he writes, Japan multiplied her resources and saved her strength while

Europe lost 20,000,000 men and to-day suffers depressing, intellectual, moral—and economic debility. Great Britain, the author holds, erred in supporting Japan through her "marriage of reason" with the Pacific Empire, an alliance "now proving so embarrassing."  
"Imperialistic Germanism and Sovietism now are a union," he adds, in expounding his theory that Japanese and German expansion, each toward the other, threaten to bridge the old Russian bulwark against Asiatic invasion of Europe and call for prompt action by the white man to save himself from the domination he sees impending in the steadily increasing crystallization of "Asia for the Asiatics." Sentiment, particularly among the Musselmans of Russia, he says, cannot save herself; she must be helped with a new brand of statesmanship.  
Detailed studies of Asiatic economic resources are given by Dr. Legendre to support his assertion that the yellow race may become sellers instead of buyers unless the white race develops its commerce in every way and seeks to produce cheaply, antipating Asiatic competition by establishing factories in Asia and by increasing production in all of Europe's colonies. Among many illustrations of Asiatic resources, the author cites Siberian exports of butter that went from 36,000,000 pounds in 1900 to 100,000,000 pounds in 1918 and much of which was sold as "Danish" butter.  
Formidable and imminent as the author deems Asiatic competition, he nevertheless concedes to the white race superior working ability and greater leadership. "It must at last be realized, however," he says, "that hereafter, it is Asia face to face with Europe." "Pan-Asianism is a reality," he concludes, "and the Peace Conference ingenuously, did all it could to favor it, particularly on the Shantung question." This "error," Dr. Legendre says, the United States, "the only champions of China, saw and from now on America will raise herself against any show of political immorality or spoliation."

**DON'T THINK**  
That Libby's Evaporated Milk is just for special dishes.  
It is true that it whips like cream, that it makes wonderfully smooth and rich ice cream, that it adds immeasurably to the flavor of unique desserts—  
—but you can use it—and save money—in all your regular cooking!  
If a recipe calls for milk you simply add water to Libby's—use as much water as you do milk—and you have milk of guaranteed purity, of exceptional richness.  
It is always fresh; always ready.  
If the recipe calls for cream, use Libby's as it is. It is pure, rich milk—from the finest dairy sections of the United States—with more than half of the water removed and nothing added. Milk like cream at a cost of only one third of bottled cream!  
Try Libby's Evaporated Milk in soups, in gravies, in creaming potatoes, in cakes, puddings and breads.  
Use it as cream on your breakfast foods and in your coffee.

Time is flying. Every tick of the clock calls a human soul from time to eternity. You do not know when it will tick for you to go. Nearly 100,000 people died since this hour yesterday. Many of them, a short time before, had been as strong and healthy as you are now, they had been planning about their summer vacation, or about their coming joy rides, or their business, or the thousand and one things that men and women are always thinking about, but they never thought of death, and it came when least expected. Where are they to-day? Where will you be in a few years hence? One thing is certain, you will not be here; and a few years later on, if any, will know that you ever had been here, but you will still be you, and your place, position and station will be what you make them while here. Think of it seriously and then you will be sure to get ready for it.

There is a law in Mississippi, to the effect that a man cannot register who cannot read the Constitution. An exception is: If a man cannot read, the registration officer may read to him a section of the State Constitution, and if he can explain its meaning to the satisfaction of the official he may be registered. It will be observed that the official has the power of decision, and

of course, a white man's explanation is accepted while a Negro's is rejected. It is a very simple and effective method. But once, just once, a Negro got by. He had gone in to register, and as a matter of form the official read from the Constitution the provision I have just quoted. "What does it mean?" "Dat means," assured the coloured man, "dat a nigger can't vote in Mississippi." The answer was so keen that the official came through like a good sport and registered the Negro.

**Steamship Runs  
Rum Blockade.**

New York—Blockade-running re-  
sultant of Civil War days, with all  
the danger and the high wages  
with contraband liquor still  
disclosed as a result of the seizure  
of booze smuggling ships by Federal  
authorities in the last few days.  
Fresh from their triumph at the  
capture of New Haven of the Jennie  
T., sword sloop, loaded with  
expensive liquors from the Bahamas  
and other islands, customs officials are bending  
every energy to break up the great  
smuggling combine which they  
are convinced is responsible for flood-  
ing Atlantic seaports with whiskey.  
Developments show that while the  
customs authorities are meeting ob-  
stacles in the difficulty of obtaining  
efficient ships and men to concentrate  
on the illicit booze smuggling, the  
smugglers are becoming more and  
more daring.

**Mocked by Steamer.**

A big tramp steamer, openly ad-  
vancing her mission, cruised back  
off Atlantic City defying the cus-  
tom officials within the three-mile  
limit. Running close to the limit of  
the law, she broke out pennants on her  
masts bearing a mocking signal to  
the state customs men:

"Lay down your money and come on  
and get it."  
Another vessel, a schooner, was re-  
ported sixteen miles off Atlantic  
City, bound toward. Both vessels, cus-  
tomers believe, intend to cruise  
in the neighborhood until light  
falls under a curtain of darkness can  
catch their sides, unload the booze,  
and scatter to nearby inlets where they  
will despatch it by motor truck to ad-  
jacent cities.

The tramp steamer, it is said, has  
been sighted off Atlantic City fre-  
quently before, and immediately after  
disappearance there has been a  
noticeable increase in the secretive  
trade of liquor ashore.

Questioning of Carl Miller, one of  
the eighteen men arrested on the Jen-  
nie T., the police say, shows he is the  
man who made the bargain with Capt.  
Miller of the vessel to land the  
load of liquor in New Haven. Mil-  
ler, who is still locked up at police  
quarters, admitted to the police  
that he gave a fictitious name when ar-  
rested. He refused to make known his  
real name, but declared that he is a  
resident of Greenport, L. I.

He was alone on the craft with Capt.  
Miller he is said to have admitted, and  
in steering a course to this city  
he had piloted the captain into  
high seas, where they met the  
steamer that transferred the contraband  
load to the Jennie T.

Although, with the capture of the  
ship, at New Haven, with 300 cases  
of liquor aboard, the federal authori-  
ties secured their first victory in the fight  
against the big smuggling trade, cus-  
tom officials are frankly pessimistic  
about both here and in Washing-  
ton, admitting that they have no craft  
to hunt down the blockade runners and  
to patrol entirely to coast guard ser-  
vice. A setback in the work of break-  
ing up the liquor smuggling came  
when Commissioner Hayes in Wash-  
ington said that coast guard authori-  
ties had informed him they cannot lend  
boats to the customs service to  
patrol the coast against smugglers.  
It is reported as they are at present with  
only a few gasoline  
boats in each port, the customs offi-  
cials admit that they cannot pretend  
to stop smuggling.

**Wake Up! England.**

How much longer English members  
of the nation are to be led by the wild  
excesses of South Wales? It is a per-  
petual question and one that has a  
strong application than to miners only.  
The national reputation for common  
sense, does not come from Wales or  
Ireland, but from Eng-  
land, and if we are to retain it, Eng-  
land must wake up and make its  
weight felt on both sides of the  
channel. There may be some chance  
of peace of which we stand so  
in need. But peace itself will  
help us unless we use it to work  
and to produce more than we  
consume; have done since the war  
dispute has robbed us of  
the best months of the year.  
Summer months are passing, and  
"holiday spirit" will soon be up-  
on the lips. There must be for  
the nation, can no  
afford to make holiday. Eng-  
land must wake up and work for her  
life—London Times.
