

CALGARY, WEDNESDAY, JULY 24, 1912

ELEVENTH YEAR—No. 124

## A MODEL FILTRATION SYSTEM, OF 12,000,000 GALLON CAPACITY, PLANNED FOR CALGARY

Scheme Contemplates Dam and Intake Two and a Half Miles Above Present Intake, and a New Sedimentation Tank of Enormous Capacity

SYSTEM WILL NECESSITATE EXPENDITURE OF \$400,000

PLANNED along the lines of the model filtration system at Saskatoon, except that the Calgary system is projected to provide 12,000,000 gallons daily, for against the 4,000,000 daily capacity of the Saskatoon works, the water extension and filtration project approved by the city council Monday night probably will be submitted to the voters of this city within a month.

The accompanying plan, roughly sketched by City Engineer Child, shows only the extension to the gravity system that is provided for in the bylaw approved by the aldermen Monday. A new filtration system is planned to be located about a quarter of a mile above the big reservoir now building some two miles from Calgary.

When the filter is constructed, the 30-inch main shown on the accompanying sketch, will discharge into the filter works, and thence into the reservoir. The filter works will be elevated some fifty feet above the reservoir.

**Dam Is Planned**

The extension of the gravity system provides for a dam and an intake two and a half miles above the present intake, a new sedimentation tank having a capacity of 12,000,000 gallons, and two miles of a new 42-inch wooden stave pipe lines. City Engineer Child has prepared the plans so that eventually this new pipe line can be extended ten miles farther on to the proposed new filter works, giving the city an additional pipe line. For the present, however, as shown on the accompanying sketch, the two miles of 42-inch wooden stave pipe will be connected with the present 30-inch main to the city by about a half mile of 20-inch steel main.

The extension, as it will be presented to the people of Calgary provides for an appropriation of approximately \$400,000, which will cover the expense of building the new intake and dam, the new sedimentation tank, two miles of 42-inch wooden stave pipe, the half mile of 20-inch steel main, and the new filter works, and also lining the reservoir with concrete. The filter works will cost \$250,000, estimated, when completed. The system will provide Calgary with a model water supply.

**Black Can Be Done This Season.**

The Engineer Child estimates that the majority of the work can be completed this season before the cold weather sets in. The concrete will be laid in November, but the wooden pipe work can be carried on through the winter. The engineer estimates that the extension and filtration system can be easily be in operation by next summer.

While the new filtration system, as planned by Engineer Child, is along the lines of the Saskatoon system, there are some radical differences, and these consist mainly in cost and maintenance. The cost of maintenance of the new system, estimated, is \$4.57 per million gallons, an immensely lower figure than the maintenance cost of the Saskatoon system.

This great difference is due to two chief factors. The Calgary system will operate entirely by gravity, while the Saskatoon system is operated by a pump. (Continued on page 8)

## POLICE CONNIVANCE IN ROSENTHAL MURDER SAYS DISTRICT ATTORNEY

Prosecutor Whitman Flatly Throws Down Gauntlet to Police Department

Important Revelations Made by Harry Vallon, a Notorious Gambler and Gamester

Wife of Dead Gambler Gives Particulars of Husband's Meeting With Police

Authorities Searching for Gun Men Supposed Implicated in the Affair

**NEW YORK, July 24.**—Important developments in the Rosenthal case were expected to follow a meeting at the district attorney's office last night at which Harry Vallon, the

HERMAN ROSENTHAL, Gambler in former shot to death in New York city, just a few hours before he was to appear before the grand jury to tell of the dealings of the New York police with the New York gamblers.

dapper gambler and gamester who was in the murder car the night Rosenthal was shot, made a statement to Deputy Police Commissioner Dougherty and District Attorney Whitman. Up to an early hour this morning, no further arrests had been made and Dougherty intimated that none would be made until later.

Apparently the authorities were elated at the information secured from Vallon although the nature of the disclosures were not divulged. (Continued on page eight)

## C.N. PAYS TWO MILLION FOR WATER FRONT AT NEW WESTMINSTER

Vancouver, July 23.—Purchases of water frontage at Westminster have lately been made by the Canadian Northern railway at a cost of just under two million dollars. Yesterday the site of the Royal City Mill, which burned a month ago, was sold to the Canadian Northern for \$650,000. A little over a million was paid recently for a series of lots along the city waterfront. The purchases made are for local shipping facilities in conjunction with the ocean shipping plants which the company intends to carry out at Port Maitland.

## DESIRE OF GERMANY FOR WAR WITH ENGLAND A MYTH SAYS REICHSTAG VICE-PRESIDENT

Eminent German Statesman, Passing Through Canada, Gives Out Interview Concerning Anglo-German Relations; Says His Country is Misunderstood

## NAVAL EXPANSION IS NOT FOR AGGRESSIVE PURPOSES

"We Want to Live in Peace With England He Declares, and All Talk of Menace to England is Result of French Jingoism Who Would Embroil Two Nations

**VANCOUVER, July 23.**—"The German menace now occupying so much attention, is only a myth. Belief in its existence has been encouraged by French Chauvinists or ultra-patriots with the idea of embroiling Great Britain and Germany. I think that war between these two countries is inconceivable. It is unfortunate that an element among the British people misunderstand the aims and aspirations of my countrymen," said Dr. Herman Paasche, vice-president of the reichstag, or German federal parliament, to a representative of the W.A.P. here today.

The distinguished visitor and his wife reached here this morning by the C.P.R. from the east, and were met by the residents of the German embassy. They were sailing for the Orient on the Empress of India tomorrow. The German Colonies of the Shantung peninsula of China, Japan, India and Java are included in their itinerary.

"We want to live in peace with England and with the rest of the world. Our policy is one of defence, not defiance," continued Dr. Paasche in discussing Anglo-German relations. "It is unfortunate that the policy of the German nation is misunderstood, thanks to the misrepresentations of our avowed enemies. I feel certain that the great majority of the people in the British Empire, like the great majority of the people of the German Empire, desire peace and not war. Germany never will be the aggressor."

"Of course, the misunderstanding, so far as England is concerned, is due to the increase of the German navy during recent years, a policy that is supported by the national liberal party as warmly as it is by the conservatives. The growth of our navy is a natural evolution in harmony with the expansion and development of the German empire and the strong position our nation occupies as a military power. Under our export trade has attained to almost two-thirds of that of Great Britain, and is growing by leaps and bounds. Our iron and steel production is now over sixteen million tons, or double that of our British neighbor, and the same applies to other industries. Under these circumstances we feel justified in protecting our interests, lines of communication, and sea-borne commerce. It must be understood that we have no designs on any other part of the world.

**Not Against England.**

"War sometimes comes unbidden, and like other nations, we believe in being prepared for any emergency. However, I feel I speak Germany's sentiment when I declare that our navy is being built with the object of striking a blow at the British empire, a self-respecting nation."

## LOCAL TAXICAB MEN ASK COUNCIL TO FIX A LEGAL RATE FOR THE HIRE OF MOTORS

**AUTOMOBILE DRIVERS** of Calgary who have cars for rent have petitioned the city council to have a legal rate fixed for the hire of taxicabs and touring cars. At the session last night a petition was submitted by Mr. J. Batchelor, of the Motor Transportation Company, asking that the aldermanic body fix the rate. In this way it is hoped to do away with the disputes that so frequently occur between drivers and passengers. The petition read in part as follows:

"In other cities in Canada both the owners and users of cars are protected by a by-law giving authority to the police to settle any dispute that may arise between a taxicab driver and his fare, and the rates to be charged are set forth in the by-law so that the only question that can arise is one of mileage or of time. Here at the present time the driver has no option but to accept the fares tendered by the passenger, or to charge the passenger to be settled afterwards, and the only way these charges can be collected is by the customary procedure under the small debts law. In this way liveries are losing a large amount of money each day and they are at the mercy of the passengers they carry."

The petition was referred to the commissioners for consideration. As conditions are now there is no maximum rate fixed by law and the driver and fare are forced to arbitrate at the conclusion of each trip. With a legal rate established, this annoyance would be done away with.

## GOSSIPS THINK REPEAL OF RECIPROcity WOULD RESTORE DUTY ON PULP

Washington, July 23.—Political gossip point out that one effect of the repeal of the Canadian reciprocity agreement as a whole would be to restore wood-pulp and paper to the dutiable list. These products come from Canada free under the only operative clause of the agreement.

The United States government began an investigation today to determine whether the right of free entry should be extended to wood-pulp and paper made from certain crown land wood in British Columbia and that province recently removed the restrictions on exportation. Ordinarily this action would abolish the duties. Secretary of State Knox will make the investigation.

As the restrictions are removed only on part of the crown lands in British Columbia, Secretary of the Treasury McVeigh will be called upon to decide whether they constitute a subdivision of territory which can be recognized under the law or whether the restrictions must be abrogated on all the crown lands in the province. The question involves much wood-pulp and paper for the west.

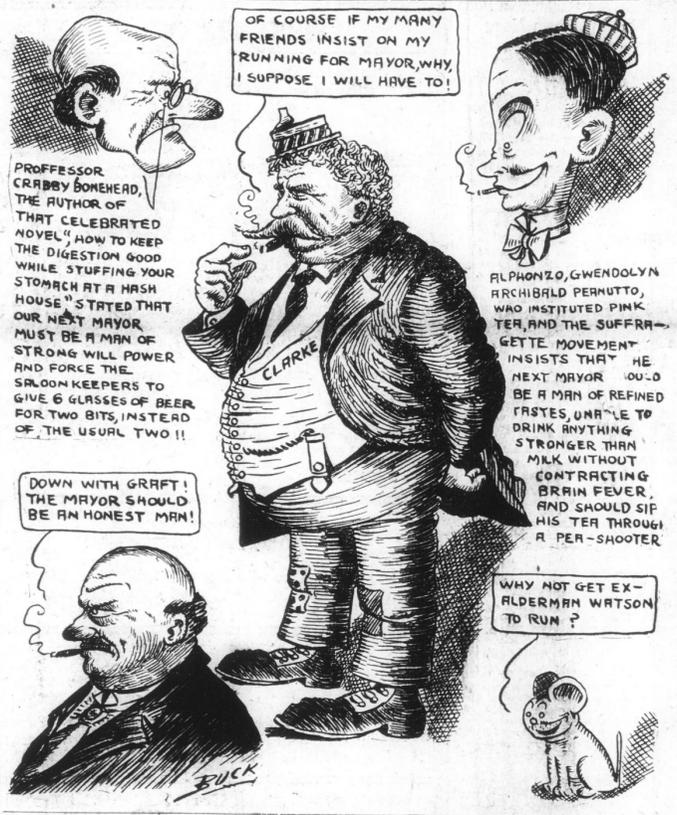

## DOCTORS AND NURSES WHO WENT TO REGINA'S SUCCOR ARE GENEROUS

Regina, Sask., July 23.—In response to requests for accounts, the Moose Jaw doctors who came to Regina on the night of the cyclone have written saying their services were given without a thought of reward, nor will they accept money. The Moose Jaw nurses have written to the same effect, and the Regina nurses who gave their services at the time have returned the checks sent them, without exception.

A check for \$12,000 has been added to the contribution of the Canadian Manufacturers' association, making \$25,000 in all from that body. An agreement has been reached between the Bank of Commerce and the Saskatchewan Hotel company, and the bank will now proceed in the erection of its building here. The findings of the King's hotel encroached 21-2 feet on the bank's property, and the matter, which has been in the courts, has delayed the erection of the building more than a year.

## CONDITIONS UNCERTAIN

Tokio, July 23.—The official bulletin on the emperor's condition at 6 p.m. reads: "The emperor slept well, Temperature 104, pulse 96, respiration 32. General condition unchanged."

## WHAT THE GREAT WEST DID YESTERDAY

**Calgary.** Council passes bylaw providing for the construction of a \$400,000 filtration plant.

**In Kelowna.** The government inspectors visiting the district declare that the fruit trees are in an absolutely healthy condition. No serious pests have been found in the entire district.

**In Edmonton.** A special train of fifty Edmonton wholesale manufacturers are on a seven-day trip through the tributary district. They cover over 2,000 miles.

**In Winnipeg.** An Illinois man, judging horses at the exhibition in Winnipeg, is so impressed with Western Canada that he will bring a wealthy colony of Illinois farmers to settle in the prairie provinces.

**In Victoria.** Oak Bay building permits, this year to date are \$510,000. This exceeds the total of last year.

**In Vancouver.** The erection of over \$500,000 worth of new buildings proposed in the immediate future. It includes one of fifteen stories, cost \$60,000; three ten storey, \$1,700,000; one nine storey, \$100,000; two eight storey, \$200,000; three four storey, \$160,000; two apartments, \$350,000; Vancouver club, \$250,000; Y. M. C. A., \$250,000; P. C. Bible society, \$22,000; school, \$150,000; police station, \$175,000; hotel, \$150,000; girls' home, \$100,000; Anglican church, \$100,000; Methodist church, \$50,000; viaduct, \$150,000.

**In Regina.** The board of trade last year showed Regina business \$150,000,000. This year it will total \$200,000,000. The street railway, municipal, shows a profit for June of \$1,700.

**In Brandon.** Contract let for the new winter fair building. When completed it will be the finest structure of its kind on the continent. New Canadian Pacific depot opened.

**In Fort Williams.** Car and foundry company open an office preparatory to the erection of a mill and half dollar plant.

## WEATHER OF THE WEST: MORE SHOWERS

## BRONCHO BUSTERS WORK IN MUD FOR PLUMBERS

Delegates Go Out to Victoria Park to See Work Out of Rough Riders

American Expert Delivers an Address on Heating and Ventilation

Jupiter Pluvius was most unkind to the delegates to the seventeenth annual convention of the Canadian Society of Domestic Sanitary and Heating Engineers yesterday. Following the business session yesterday morning, the visitors journeyed to the "wild west" parade ground, near Victoria Park. Broncho busting contests were in order, and a regular wild west show might have been held had not the elements interfered. The ground was anything but favorable underfoot and the wild west show was perhaps tame. The broncho busting was a regular wild west show as illustration of roping and broncho riding that was worth while. (Continued on page eight)

## AFTER TOMORROW NATURAL GAS COMES; EXIT GOLD

Blowing Out of the Big Trunk Mains is Now About Completed

Connection Will Be Made With Local Gas Laterals Some Time Tonight

Natural gas in Calgary, for heating and lighting purposes, will be a reality Thursday, according to a statement issued yesterday by the Canadian Western Natural Gas, Light, Heat, and Power company officials.

It was announced yesterday that the work of "blowing out" the mains within the city limits had been practically completed, and that by tomorrow residents of this city would be burning natural gas. Natural gas from Bow Island was favorably understood and the wild west show was perhaps tame. The broncho busting was a regular wild west show as illustration of roping and broncho riding that was worth while. (Continued on page eight)

## AN EFFORT BEING MADE TO CLEAR ELEVATORS

Alerta Pacific Will Be Ready for the Bumper Crop in Prospect

If Fine Weather Comes and the Harvest is Early Will Be No Difficulty

That every elevator company in the Calgary district is making strenuous efforts to get the elevators cleared in readiness for the bumper grain crop of 1912, are reports that come in from every section. The Alberta Pacific company, one of the leading grain concerns of the province, is well along in this work and expects to have their elevators all cleared by the time the harvesting begins.

"The whole situation now," said a prominent elevator official yesterday, "is one of the expeditious handling of the grain is concerned, depends largely upon the kind of weather we get for the next two or three weeks. Fine weather would be a great help." (Continued on page 8)

## VIRGINIA SHERIFF SHOT AND TROOPS CALLED OUT

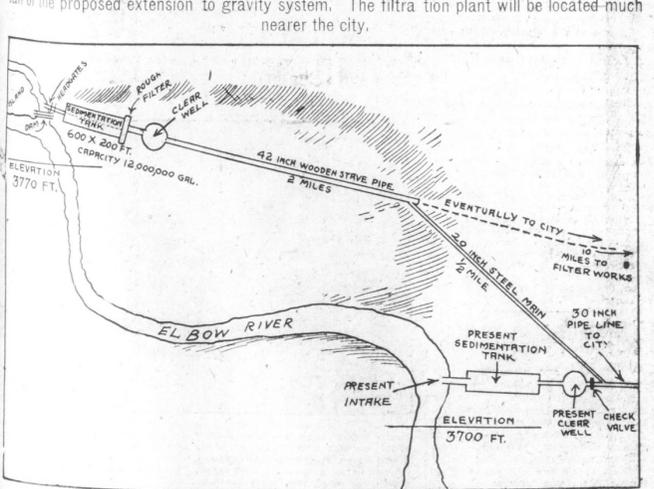

Charleson, W. Va., July 23.—One company of militia and a machine gun squad left here early tonight for Payton, Boone county, where a deputy sheriff was fatally shot today during a fight with striking coal miners. Sheriff South-pin was shot, no details of the trouble have yet been received.

Payton adjoins the Paint Creek region, where miners have been on strike for several months. Adjutant General Elliott accompanied the troops. Payton will be reached before morning.

## OLD TIME MERCHANT WHO IS ABOUT TO RETIRE

G. C. Robinson, who has been in business in Calgary for more than two years, is about to retire. He will hold a closing out sale starting Saturday. The store will be reached before morning.

Mr. Robinson has announced that he will devote his interest in the store to his family. The Robinson store has been leased to other parties for a period of seven years.

Plan of the proposed extension to gravity system. The filtration plant will be located much nearer the city.

THE AERO-UNICYCLE IS THE LATEST AND IS FAST

It Slips Along at the Rapid Rate of 720 Miles an Hour at Ordinary Speed

Machine is an Aluminum Hoop Which is Blown Along by Propellers

St. Louis, July 23.—"Merely we'll roll along, roll along" 12 miles a minute, 720 miles an hour, 19,200 miles from sun to sun in a hoop!

Get that right—a hoop! That is what the speed maniac of the future may be doing.

The aero-unicycle is the last word in speed. It is destined to do for the racing auto and the speediest motorcycle what they did to old Dobbin.

"The only limit is a man's ability to live while he travels, and an unobstructed roadway," says Clinton Coates, inventor of the aero-unicycle.

Along the inner rim of the hoop and on each side travel three sets of three rollers or wheels on ball bearings.

These support the framework, the motor and the rider, and keep them level with the ground.

There is no traction. The propellers, 41 inches wide, having a forward thrust of 50 pounds with each revolution, blow the hoop along just as a boy with a stick knocks his hoop along the walk.

Explains the "Hoop" Inside the hoop is a saddle for the rider, the motor, and handles, with which are connected two wires leading to the steering rudder.

Coates and his co-inventor, William McDonald, explained the working of the aero-unicycle. At five in the morning before the curious were awake, William Hunter, a professional motorcyclist, rolled the unicycle out.

Hunter leaped on the saddle, started the motor—six horsepower—and coasted "cranked" the machine by turning the propeller. The hoop began to revolve, the rider and the machinery riding along on the inner rim.

With three revolutions Hunter leaned forward on his saddle, thereby drawing up the two small wheels about a foot from the ground, and he was off. A mechanical counter of revolutions of the hoop told us he was rolling 52 miles an hour. He had the queer vehicle under perfect control, turning and stopping at will.

Some Speeder, Too. "The hoop will cover a mile in 250 revolutions," said Coates, "and an engine capable of driving the hoop 3,000 revolutions a minute can be arranged.

That gives the machine a speed capacity of 12 miles a minute, or 720 miles an hour, a velocity at which no person could probably live, even with wind shields and oxygen tanks for breathing.

"There are these dangers: Striking an obstruction, getting into the small ball-bearing wheels out of its track. Either one would mean a sure and sudden death to the rider. They are mere possibilities, though."

Here is what the aero-unicycle rider could do if he could reach Coates' top-notch speed estimate. Going around the earth along the northern line of the north temperate zone, and supposing he rode a path about the globe before him, a rider could make 13,280 miles in 24 hours. That is about as fast as the earth turns on its axis at that meridian.

Going with the sun, the rider would never encounter night, always would the sun shine over him; going opposite the sun, the rider would have two days and two nights every 24 hours, that is, that satisfy the dare-devil's lust for fast, faster, fastest?

Getting down to shorter trips, he could roll from New York to Toledo in 58 minutes; from New York to St. Paul in one hour and 54 minutes; to Omaha in two hours and one minute; to Denver in two hours and 46 minutes; and to San Francisco in four hours and 15 minutes.

That Would Season Him From the Boston Transcript. She—So you've seen Papa. Did he say anything about your being too young?

He—Yes, but he said when I once began to pay your bills I would age rapidly enough.

Weariness Changed to Vigor

That Quickly-Removed Feeling Was Quickly Remedied and Health Restored

Story of a Merchant Who Almost Lost His Business and His Health Through Neglecting Early Symptoms of Disease

"My life for years has been of a sedentary character," writes T. B. Fitchfield, head of a well known firm in Buckingham. "Nine hours every day I spent at office work and took exercise only on Sunday. I disregarded the symptoms of ill health which were all too apparent to my family. I grew thin, then pale, and before long I was jaundiced—eyes and skin were yellow, my strength and nerve energy were lowered, and I was quite unfit for business. In the morning a lightness in the stomach, particularly when I bent over, made me very worried about my health. Most of the laxative medicines I found no effect, and knowing that I had to be at business every day I neglected myself rather than risk further weakness. Of course I grew worse, but by a happy chance I began to use Dr. Hamilton's Pills. I was forcibly struck by the fact that they neither caused griping nor nausea, and it seemed incredible that pills could tone, cleanse and regulate the system without causing any unpleasant after effects. Dr. Hamilton's Pills acted with me just as gentle as nature—they gave new life to my liver, strengthened my stomach, and won me back to perfect good health. My skin is clear, dizziness has disappeared, and my appetite, strength, spirits are perfect."

Refuse anything offered you instead of Dr. Hamilton's Pills, which are sure to cure. Sold in 25c boxes, five for \$1.00, at all druggists and storekeepers, or postpaid from The Cattaraugus Co., Buffalo, N. Y., and Kingston, Canada.

Store Opens 8.45 a.m. Closes 6 p.m. Saturdays 9.30 p.m.

## HALF HOLIDAY SPECIALS

These weekly bargain events with their abundant economies are eagerly appreciated by an expectant public, and every week sees bigger crowds thronging the aisles and counters of this busy store. The only remark we wish to make concerning today's special offers is that they are the best yet—the pre-stacking sale left in its wake all manner of odd lots and small remainders. In four short hours Wednesday we mean to make a clean sweep of most of them—these prices will do it.

## GREAT FIVE DAYS' SALE IN WOMEN'S READY-TO-WEAR DEPT.

In addition to these half holiday specials, you can this morning take advantage of the manifold savings made possible by the Sale of Women's, Girls and Misses Other Apparel, which started this morning. Balance of all lines advertised in last night's store news, and many additional special values of which space does not permit mention will be prominently displayed throughout the department, and the Saving in every instance will average from One-Third to Half the Actual Values.

### JUDICIAL COMMITTEE OF THE PRIVY COUNCIL RESERVES JUDGMENT IN NE TEMERE CASE

London, July 23.—I. F. Hellmuth, K. C., continuing his argument before the judicial committee of the privy council, urged that the provision now sought in the new marriage act would be at variance with the code. In the case of two Roman Catholics, marriage could only be validly solemnized before a Roman Catholic priest because no other minister upon a true construction of the code had the necessary authority to solemnize such.

Lord Chancellor Loreburn referred to articles in the code based on decisions of the council of Trent. Hellmuth contended that the greatest evil which could befall a country would be legislation leading to laxity in the solemnization of marriage. Clarendon, as decreed by the council of Trent and recognized by the code of Quebec, was based on the general French law that a clandestine marriage was no marriage. If any other than priest could solemnize marriage in the province, this result would be to render marriage less stable socially and produce the evil which the law desired to remedy.

E. C. Gouffron, representing the attorney general of Quebec then opened the case for that province. When this bill was introduced by a private member, the question at once presented itself whether the Dominion Parliament in allowing such a bill to be proposed was not acting ultra vires.

Lord Atkinson.—The question seems to me to be this: "Is a person married before a Roman Catholic priest? This is a singular request."

Mr. Gouffron in reply said that when the matter was before the superior court of Canada, the request of the attorney general of Quebec that the question of what is the effect of the law in Quebec should be left unanswered by that court was acceded to.

Lord Atkinson.—"You say that the bill does not in trench on civil rights?"

Nesbitt.—"I say it does not do so; it does not import to do so."

Lord Atkinson failed to see how it was not an interference with the solemnization of marriage to say that it was legal for any person authorized to solemnize marriage, not between persons of one class, but between persons of any class, if, as the law stood, marriages between certain persons could only be valid when solemnized before a priest.

The lord chancellor asked if a provincial tribunal declared a certain marriage, unless solemnized in a particular way, should be null and void, would a declaration of nullity, giving the power of the right to marry again be an infringement on the jurisdiction of the dominion parliament?

Nesbitt.—"Certainly it would be."

At the conclusion of the arguments, Mr. Gouffron pointed out that these lordships had not yet heard the argument of question two, which raised the question of the Roman Catholic who married otherwise than before a priest.

Lord Chancellor Loreburn said they would not hear argument on that point they were not prepared to decide that point.

But if it had to be considered, with reference to points which they would decide, the parties concerned would have due notice.

In his reply to the argument of counsel representing Quebec, Wallace Nesbitt, K. C., was asked the following question:

Lord Atkinson.—"Your contention is that a man can say he is married, although he failed to go through the ceremony as described in this or that particular provision, assuming, of course, that he did was legal?"

Nesbitt.—"Exactly. Parliament cannot say you are not married, unless, in addition to the rites imposed on all persons getting married, you, in addition to the rites imposed by a particular province where the solemnization happened to take place. Why should any such restriction be placed on persons desiring to get married who are of all sorts of nationalities? There are absolutely a dozen types of nationality settling in western Canada. Has the dominion any right to say that the law shall treat as valid, any marriage such persons shall contract which has been duly performed according to law, although the parties may not have gone through the ceremony required by some enactment made by that particular province. This act is intended to protect and does nothing more than protect the marriage contract which is already in existence against an attempt by the province to impair its validity."

Their lordships reserved decision; the lord chancellor saying they were greatly indebted to counsel for the extremely able arguments addressed them on each side.

Ralph Studvin, treasurer at Kelth's, has had many funny experiences in his career. This is his funniest: A man came to the window and asked for two seats. Studvin explained to him that he did not have two seats together. "Well, haven't you two anywhere near together?" persisted the man. "We have two seats but there is a post between them," answered the treasurer. "Oh, that's all right; let my wife with whom I'm going," replied the man.

### BORDEN FORGETS CANADA DECLARES LA PRESSE

Montreal, July 23.—La Presse, discussing Canada's naval contribution to imperial defence, says in part:

"Canada is the granary of the empire. Is not that the most useful manner in which to contribute to imperial defence? We supported Sir Wilfrid Laurier without hesitation when he consented to prepare little by little a Canadian navy for the defence of our own territory, but what Mr. Borden proposes today is not the same thing. Led astray by a false sentimentalism, intoxicated by incense which mounts to his nostrils from the Unionist centers, he sees nothing now but the empire and forgets Canada."

"What he proposes is nothing more than the progressive effacement of our national autonomy."

"We cannot follow him so far. Canada is ready to help Great Britain generously, but it has no need to sacrifice for that any one of its present rights."

### MOTORIST SENT TO JAIL

Washington, July 23.—Thirty days in jail without the option of a fine was the sentence a local court imposed today on Clyde Withers, an automobile driver, who ran down a man alighting from a street car. Witnesses swore Withers passed the stopping trolley at high speed and did not wait to clear of his victim's injury.

### Toronto Live Stock

Toronto, July 23.—The light receipts at the city cattle market today were brought up in short order at good steady prices with the opening today. Butcher receipts were 600 to 700 for choice loins, and medium and common ones sold from 600 to 600. Stockers were steady at 500 to 525. Calves were a little firmer, 600 to 650. Sheep and lambs continued to be weak and about 1/2 lower than last week, quality for quality.

Hogs were on the upward move again, another peg of ten cents higher being reached today. Hogs, fed and watered, now cost 800 to 825.

Today's quotations: Export cattle, choice, 750 to 775. Medium, 600 to 725. Bulls, 500 to 600. Butcher's choice, 700 to 725. Medium, 600 to 725. Common, 400 to 500. Butcher's cows, choice, 500 to 600. Medium, common, 300 to 325. Canals, 60 to 250. Bulls, 450 to 525. Feeders, 400 to 500. Bulls, 500 to 550. Steers, 400 to 500. Sheep, 400 to 450. Springers, 400 to 450.

Sheep: Ewes, light, 400 to 450; heavy, 250 to 400; hogs, per hundred, 200 to 250. Lambs, per hundred, pounds, 750 to 850.

Hogs, fed and watered, \$20 to \$25. F.O.B., 775 to 785.

Cattle, each, 450 to 500.

STRONG ASSURANCE OF PEACE

If a state of preparedness for war is the greatest assurance of peace it is obvious that the British government is taking the surest course to avoid world conflagration which most probably would follow should war between Great Britain and Germany come, and every citizen of the empire will applaud the attitude of the Imperial government as enunciated by the First Lord of the Admiralty in his speech dealing with the supplementary naval estimates in the house of commons Monday.

The war between Britain and Germany is not a matter of life and death to the British people. It is the judgment of The Albertan but that such an unhappy culmination of the ambitions of the great war lord are very much more remote than they were Monday morning we have no doubt. We are of the opinion that the government at London is not especially apprehensive of an immediate conflict but rather that the statesmen at the head of the affairs of the empire believe that the ambition of the German emperor to place Germany in the position now occupied by Great Britain, that of the first nation of the world, must inevitably lead to war should Germany ever approach sufficiently close to naval supremacy to render a successful war possible.

The Albertan does not agree with the assertion that the utterance of Mr. Churchill will cause greater concern to the country than any warning that has gone before, at least, it is our judgment that there is no justification for such concern if it is felt. On the contrary, we think there is reason for entertaining feelings of greater security than ever, in the assurance that the British government will not permit a condition to arise calculated to place the waging of a successful war by Germany among the things that are possible.

It is our view that the home government is quite justified in finding a very large measure of comfort in the attitude of Canada and that should hostilities ever really materialize, Canada's contribution to the defense of the empire would be found to be immeasurably greater than has as yet been proposed by any government.

We do not think it matters seriously what measures may be proposed by one government or another or what policies may be advocated by one party or another in Canada, as designed to fix a definite contribution by the Dominion to Imperial defense, should a declaration of war between Germany and Great Britain ever be pronounced for it is our conviction that if that time ever comes, the people of Canada would rise up and unitedly stand at the disposal of the crown, all our vast and rapidly increasing riches in men and money.

And The Albertan is inclined to the belief that the British government would be justified in entertaining a very comforting feeling that the enormous resources of Canada would not be all that would be at the disposal of Great Britain should there be a war with Germany. We have always heard a lot said about blood being thicker than water. Discount the verity of the time-honored saying as much as you like, and there is still a measure of truth in it, which in our belief, ought to be very comforting.

There is in Canada, a great deal of American blood and in our belief, the percentage of it is very small which does not pay as earnest and sincere allegiance to the Imperial tie as any that had its nativity in the empire. Aspersions are many times cast at the loyalty of the Americans in Canada but as a rule they are broad-minded enough to recognize that such utterances are the ravings of little minds or are made use of in the heat of political discussions entirely for effect and do not allow it to affect the loyalty of their feelings. The fact is, that let an American remain in Canada long enough to acquire appreciation of our institutions and he will challenge the right of any man to claim himself a better Canadian than he is.

and young America would go marching shoulder to shoulder with young Canada to the defense of the British Empire. To The Albertan it seems singular indeed, if it be true, that any thoughtful person can but believe that this must be true and it seems equally beyond comprehension that Germany should not have a very keen realization that it is true. Assuredly it must be a most extraordinarily exaggerated ego which can lead Germany to a belief that she could hope to wage successful war against Great Britain.

PROGRESSIVENESS SEEMS NEEDED
If the opposition which seems to exist in the city council to the report of the investigation committee can be taken as an index of actual conditions in the administration of the business of Calgary, it would seem apparent that the move in favor of progressiveness in civic affairs has not been started any too soon.

From the action of certain of the members of the city council it would appear that an effort may be made to defeat the recommendations of the committee which conducted the investigation into the conduct of the city's business. That such a move could receive any considerable support, seems incomprehensible to The Albertan. We like to think that the gentlemen who comprise the council are conscientious and aim to do the best for the people of Calgary who pay the taxes that can be done but if, after the evidence produced before the committee, councilmen can be found who will lend themselves to an effort to block the reforms the committee suggested, they must not feel aggrieved if confidence in them cannot longer be retained.

If it should come to pass that the recommendations of the committee's report should be defeated and the officials recommended for dismissal should be permitted to retain their offices to the end of their terms, with the certainty that the same poor management for which they were condemned, will go on—for they cannot be expected to do better if they can successfully defy the will of the people—then it will be pretty nearly time for a genuinely progressive ticket to sweep the city.

Those people who would like to see the city's business managed along good business lines will hope sincerely that the movement will be genuinely progressive.

TRY TO COMPROMISE PLEASE
It will be extremely unfortunate if the controversy between the striking stone workers should result in the failure to complete the school buildings in course of erection in this city, this season.

The report of the superintendent of city schools is to the effect that the schools are very badly needed and that if they are not completed in time for their use at the time contemplated, inconvenience of large proportions will be experienced. The laborers who are directly responsible for holding up this work should recognize that they are just as much interested in having the schools of the city carried on properly as anyone else and if there be a basis upon which they can get together and allow the school buildings to be finished, undoubtedly it is to their best interests to find it.

Is there not some means by which they can compromise their differences, at least to the extent of permitting the schools to go on to completion?

EDITORIAL NOTES
Calgary seems to have secured some very desirable publicity through sending a delegate to the Boston Town Planning convention.

Truly this is an age of specialists. Down in Santa Barbara there is operating a chicken thief who uses an auto and steals only thoroughbred hens.

Daily in the city hall there is the usual grist of juvenile delinquents arraigned before officers of the Children's Aid society. Query. Would properly supervised playgrounds solve the vacation boy problem in Calgary?

ZAPATISTAS ATTACK A PASSENGER TRAIN; SIXTY KILLED

Mine is Placed Under Railroad Track, Which Explodes as Train Passes Over

Following Explosion Zapatistas Pour Muderous Volley on the Passengers
Federalists on Train Make a Gallant Fight; Nearly All are Killed

Mexico City, July 23.—More than 60 persons were killed and many were wounded in an attack by Zapatistas on a passenger train between Mexico City and Cuernavaca, Morelos, early today.

The Zapatistas, said to number 500, placed a mine under the railroad track, which exploded as the locomotive passed over it. The overturned engine hardly had settled when the Zapatistas sprang up from their hiding and opened a murderous fire into the train.

First the object of their attack was a second class coach in which were riding a number of military escort, with a captain and two lieutenants. The federalists got out of the car as quickly as possible and answered the fire of the assailants, but their efforts were futile. The command, with the exception of five wounded and two who escaped, were killed.

A strict guard has been placed over all survivors since their arrival here. Reports which have leaked out state that only nine of the thirty passengers in the second class coach were killed, outright and that the remainder were burned to death when the rebels set fire to the train.

Emiliano Gomez Arrested
San Antonio, Tex., July 23.—Emiliano Vasquez Gorz, for a short time provisional president of Mexico, was arrested tonight by secret service officers and taken to the United States consular office. About the same time Francisco Guzman, Gomez's private secretary, and Dr. P. Rueda were taken into custody on the streets and Perez and Felipe Miramon were arrested while boarding a train for El Paso.

Violated Neutrality Laws
El Paso, Tex., July 23.—Victor Ochoa, original Mexican revolutionist against President Diaz two years ago, was arrested here today by the American federal authorities and was charged with a violation of the neutrality laws. Ochoa is alleged to have been implicated with the arrival here several days ago of a consignment of 14,000 rounds of ammunition and several cases of rifles, presumably intended for the use of the revolutionists.

Reliable advices from the interior declare that less than 1,000 rebels are left behind Juarez and Matamoros, the southern-most outpost of rebels of the Mexican Northwestern Railroad. That a small band of rebels has dashed in behind Chihuahua City and burned some bridges near Bachimca, forty-six miles away, was confirmed today by the telegrams from Chihuahua. No trains have arrived in Chihuahua from Torreon in three days.

HUDSON'S BAY COMPANY

STORE CLOSSES WEDNESDAY AT ONE P.M.
Special Values For a Brisk Morning's Shopping

Women's Wash Dresses
Regular 2.45 to 4.50
Today 9 a.m. \$1.95
You will be agreeably surprised to find what splendid dresses that this small sum will buy today.

Women's Cloth Suits
Final Clearance, Reg. 21.50 to 40 for 11.50
This is the biggest Suit Bargain that we have offered this season, and you will save a lot of money by taking advantage of it.

Odd Pieces of China, Etc., Reg. up to \$3.00 for 50c
Can you afford to let the small sum of 50c stand between you and artistic, useful and needed articles of china, brass, etc.?

WHEN EMPLOYERS AND MEN RECOGNIZE EACH OTHERS' POSITION DIFFICULTIES CEASE

Labor Member of Parliament Declares Present Unrest is Not Revolutionary But That Labor is Merely Seeking Fair Share of General Prosperity
(Ey. W. Hamilton Rhodes.)
London, July 4.—Mr. John Ward, M. P., in an interview on labor disputes, says that once it is universally recognized that workmen and employers should acknowledge each other's position in modern industry and commerce, a great many of the difficulties will be removed.

MIKADO CONTINUES TO IMPROVE; SLEEPS WELL

Tokio, July 23.—The condition of Mutsuhito the Emperor of Japan continues to improve, according to the report of the court physicians this afternoon. A bulletin issued at 1 o'clock this afternoon says: "His majesty slept throughout the morning. His temperature is now 38.70. Otherwise there is no change."

Ideas of a Plain Man
By DR. FRANK CRANE

TRUTH
SITURE lies about literary men during their lives and eulogy lies about them after their death," said Voltaire.
But why complain? Why all this everyday indignation we hear expressed by all sorts and conditions of men and women, such as: "I am not understood," "I am not appreciated," "If people would only tell the truth about me," and the like?
As a matter of fact, who wants the truth, the whole truth, and nothing but the truth known about himself? Not I, for one.

RHODES SCHOLARSHIPS TO AMERICAN COLLEGES

Dr. Parkin Has Approached Morgan and Carnegie With New Scheme
London, July 18.—At a luncheon of the American Women's Society in London yesterday, Dr. Geo. Parkin, organizing representative of the Rhodes Scholarship Trust, said he had approached Mr. J. P. Morgan, Mr. Andrew Carnegie and other wealthy Americans with a plan for duplicating the Rhodes Scholarship in America.
Each life has its little private truths, alters too sacred for other eyes, and reserves of cowardice or folly perhaps for the shame of none but itself. Spare them.
Let love not probe too deeply in its desire to know the inmost thought and feeling; for when there is no more a veil over the central shrine it is hard to keep the shekinah burning.

# Mainly About Women

BY ELIZABETH BAILEY

TELEPHONE 2380

Miss Currie Love has returned from a short business trip to Chicago.

Miss Marion Fox left for her home in Toronto yesterday.

Mrs. Graham and Miss Hodgins of Ottawa are guests at the Y. W. C. A.

Mr. Bert Polle of High River spent Monday in the city.

Mr. Jack Sharpe, Y. M. C. A. boys' secretary, left for the east on Monday night.

Miss Stella Jones of Washington is visiting her cousin, Miss Della Jones, Seventh avenue west.

Mr. Harvey Taylor has left on a holiday trip to Vancouver and Seattle.

Miss L. K. Meising of the C. P. R. offices London, England, is a guest at Braemar Lodge.

Mr. and Mrs. A. W. Macorquodale spent yesterday in the city, en route to Edmonton.

Mrs. H. Fitzgerald and Mrs. A. N. Hobbick are visiting Mrs. R. H. Hardy in Medicine Hat.

Mrs. E. V. Diver of London, England, arrived in the city yesterday, and is a guest at the Arlington Hotel.

Rev. A. Mahaffy and Mrs. Mahaffy left yesterday for Midnapore, where they will camp a couple of weeks.

Waldo, Minor, Campbell, Aldred, and Clarence Price left this afternoon for Banff and Calgary, where they will spend their vacation—Leithbridge, New.

The primary branch of the Sunday school of the Church of the Redeemer will hold their annual picnic today at St. George's Island. Parents are requested to have their children meet at Paget hall not later than 1:30 p.m., when they will proceed by car to the island, and return by the same way at 8:15 p.m.

Should the weather be unfavorable they will be entertained at Paget hall.

**Imprisoned Minds**  
(Copyright: 1912, by Lillian Russell.)  
The child that is punished for venturing its imagination is being criminally imprisoned. Our souls are full of noble aspirations, great longings and ambitions to do something in this world to lift us out of the mediocrity of just living. When we were children we always wanted to be the central figure of all the games. There never was a girl so homely and plain that she did not aspire to be the sleeping beauty in the tableau of that name.

Every one cannot travel and learn, and many who have the wealth and advantage to travel, do travel, but learn nothing, the world passes them by, and when once the world neglects to interest man or woman, then they may as well be counted among the pebbles of the sea, for there is no place in Heaven for them.

**Nemo Corsets are the last word in the corset makers' art.** They are a strong, well made garment, and for a lady who is particularly hard on her corset, are the best make we know of. We have a model here for every style of figure and the prices range from \$3.50 to \$6.50 a pair. Come and let us show you.

**HVERGAL-ON-THE-HILL** College Heights, Toronto  
Junior School  
for the convenience of pupils resident in the Northern and Western parts of the City. Large playing grounds of nearly level, healthy, beautiful, and sunny location. Under the direct supervision of Miss Krox, assisted by specialists in every department.  
For illustrated calendars and prospectus apply to the Bureau.  
SCHOOL YEAR 1912-1913. R. MILLICAMP, Hon. Sec.-Treas.

## Good Housekeeping

By Jane Eddington

**Some Plain Dishes**  
The plain, simple, almost homely dishes are in demand. The ordinary and wholesome must make up the larger part of our everyday fare. While it is the duty of the writer on cookery to be as suggestive as possible, yet she must constantly recur to the everyday things.

**Vanilla Cakes**—One cup of sugar, one-half cup of butter, one-half a teaspoon of soda, one teaspoon of cream of tartar, three cups of flour, and vanilla flavoring. Drop from a teaspoon in buttered pans and bake in a quick oven.—M. S. L.

**French Cake**—To be made at time of making any cake. Line half a dozen tins with this pastry, making care to keep it whole; put in one tablespoonful of jelly, and on that about the same amount of fruit, such as cake. Frost top and sides.—Mrs. G. M. P.

**Caramel Cake**—One cup of sugar, one-half cup of butter, two eggs, one-half a cup of milk, one teaspoonful of cream of tartar, one-half a teaspoonful of soda, two scant cups of flour, half a cup of raisins, and one-half a cup of nuts. Bake in a tin lined with paper. Frost with cream and nuts.—Mrs. A. M. P.

**Hermits**—Two eggs, one cup and a half of sugar, one-half a cup of butter, one teaspoon of soda dissolved in two tablespoons of sweet milk, one cup of stoned raisins chopped fine, one teaspoon each of nutmeg, cloves, and allspice. Mix very stiff. Cut with a cork cutter.—Mrs. E. A. W.

**Hermits II**—One cup of butter, one cup and a half of sugar, three eggs, one teaspoonful each of all kinds of spice, one cup of chopped raisins, one-half a teaspoonful of soda dissolved in two tablespoons of sweet milk, one cup of stoned raisins, one-half a cup of nuts, and one-half a cup of walnuts. Bake in a tin lined with paper. Frost with cream and nuts.—Mrs. M. W. C.

**Nice Pickles**—One quart of raw white cabbage chopped fine, one quart of boiled red beets chopped fine, one cup of sugar, one tablespoonful of salt, one teaspoonful of black pepper, one cup of ground horseradish, cover with cold cider vinegar and keep from air.—Mrs. M. W. C.

**Chicken Chest**—Take two or more nice chickens put until tender in a little water as possible; chop, but not too fine; season well with salt and pepper, boil six or eight eggs, slice hard, slice and line dishes or molds and pour in the chicken while hot, with a little of the liquor poured over it. Press down and slice when cold; serve with bits of celery.—Mrs. H. L.

**Blind Hare**—Three pounds of minced veal, three pounds of minced beef, eight eggs well beaten, three stalks of parsley, the same amount of bread crumbs, pepper, salt two grated nutmegs, a heaping teaspoonful of ground cinnamon. Mix well together form into oval shaped loaf, smooth it and sprinkle cracker or bread crumbs over the top. Bake in a moderate oven three hours. Slice when cold.—Mrs. J. C. W.

**Cream Cheese and Cherry Salad**—Make small balls of the cream cheese; slice the cherries. Cut the cherries in halves and place a half cherry on two sides of the cheese balls. Serve on hearts of lettuce, with French dressing, highly seasoned with paprika.

**Banana à la Richelieu**—Three-quarters cup of sugar, three-quarters cup of water, one tablespoonful of butter, one and one-half tablespoons of lemon juice, two bananas cut lengthwise, and then crosswise, and one-eighth teaspoon of salt; one pint of boiled rice. Make a syrup of the sugar and water; boil three minutes; add lemon juice, butter and bananas and cook five minutes. Put the rice in a dish to serve and arrange over it the bananas; pour over the syrup.

**Glazed Cream**—Soak one-half box of pulverized gelatin in one cupful of cold water for several hours (or overnight). Add one cupful of hot water, one scant cupful of sugar, and some preserved ginger cut fine. Stir all together until it begins to thicken, then add two cupfuls of cream whipped stiff, and set away to harden.

**Summer Recipe.**  
Norwegian Potatoes—One pint of raw diced potatoes, one cup of raw diced carrots, one small onion, four tablespoons of butter, one-half teaspoon of salt. Slice the onion and saute it in two tablespoons of the butter; use care that it does not burn. Add the potatoes and carrots, and turn into a greased baking dish; add enough boiling water to keep moist, and bake closely covered until potatoes are soft. Drain off the water and salt. Set in the oven uncovered to brown.

**HIS WIFE'S WAGES**  
How much truth is there in the words of the poet who tells of her who exchanged her maiden gladness for a name and for a ring. The woman of wealth who weds exchanges the position of petted daughter for that of humored, idolized wife, with few added cares.

That is a wrong view of the matter on his part and should be a forewarning of future difficulties in this direction. For the kind of man who expects his wife to be an upper servant, as it were, doing the entire work of his house for his board and clothes.

The wife does not ask money as salary or wages, but she has a right to expect a certain amount as part of the money which he promised her at the altar she would be endowed with. She does not presume that she will have to wait until he dies to have this contract carried out, but on the contrary that he will share with her as she goes along.

Even a housekeeper would resent too close an inquiry into the expenditures and consider that her judgment was competent as to how much she should invest; that a dollar or two more than had been calculated should not be argued over.

The paid housekeeper has an advantage over the unpaid wife. She is not called upon to give up any of her earnings for sudden reverses. She can leave whenever she chooses, having no life compact on her hands.

No man who loves his wife and can afford her a handsome income should allow her to be without it. Being a wife does not always bring its rightful reward.

Meet husbands mean well and trade schools in Europe and America.

She was married in 1883 to Franklin Conrad Woolman. She was assistant in domestic economy from 1888 to 1897, and has been professor of domestic arts in the Teachers' College since 1897.

She was organizer and first director of the Manhattan Trade School for Girls, which she administered for ten years. She is regarded as the creator of this scheme of industrial education.

She organized as a part of the work at the New Practical Arts School of Teachers' College, a course in occupational and trade education, in which teachers in trade art, trade academic work, elementary sewing, millinery, and advanced dressmaking may be trained.

Woolman has been vice-president of the New York Association of Sewing Schools and is a member of the editorial advisory committee of "Vocational Education," vice-president of the American Home Economics Association, member of the National Consumers' League, the Public Education Association, Armstrong Association, Women's Municipal League, Academy of Political Science, National Society for the Promotion of Industrial Education, and the National Council of Women's Municipal League.

She was president of the National Council of Women's Municipal League, and many other organizations. Among her best known writings are text-books for teachers. The Women's Educational and Industrial Union has had only three presidents since its organization in 1892. It was incorporated a year later, with Dr. Harriet C. C. as president. Mrs. Amy Morton Diaz was her successor, and Mrs. Mary C. E. was followed her in the office. These three women all gave their time and devoted interest to the up-building of the work. Mrs. Woolman is the first professionally trained and married president. The union now has a membership of 1,884.

**FACTS AND FANCIES**  
Mrs. Mary Schenck Woolman, one of the best known educators in the field of trade and vocational work has been elected president of the Women's Educational and Industrial Union. This announcement was made by the directors, although Mrs. Woolman will not take up her official duties in Boston until next February.

Mrs. Woolman was born in Camden, N.J., on April 28, 1869, the daughter of Dr. John Voorhees and Maria, nee Keen Schenck. She was graduated from the Longmeadow School of Philadelphia and the University of Pennsylvania, the Teachers' College, and Columbia. She devoted seven years to the study of the arts and crafts revival

## FRANCHISE TO WOMEN WILL NOT PRODUCE GREAT CHANGES

Women Suffrage Will Only Extend the Numbers Who Vote

Women's Greatest Sphere is in Directing Expenditure of Money

Economic Reasons Why Girls Do Not Want to Enter Matrimony

"I do not look for any great changes, either for better or for worse, when women obtain the franchise. It is not much inclined to attach much importance to the question of either women or men, and the simple right of a vote," said Professor James Short, chairman of the civil service commission, Ottawa, in his address to the members of the Women's Canadian club yesterday afternoon in the public library.

"Men can live complete lives, and many of them do, without ever casting a vote. The steadily regarding the franchise as containing no obligation, and they think and vote accordingly. A great many men who vote, vote for the individual who is nominated rather than for the soundness of the principles which he represents.

"Women's functions are those that prepare conditions for law. An ordinary individual's life is not worked out by law. Indeed, law is only a register of what ought to be done in case of dispute, mainly private rights. It is but a fragment of life.

"The great work of a modern community doesn't rise out of law. Law does not dominate the individual, but he is governed by the courage of his own convictions.

"If women had the franchise, it only means an extension of the numbers who are voting rather than addition to the soundness of principles."

"Women, with the exception of the militant suffragettes, who are in the minority, do not understand the laws and after all, there are few questions which are not of equal interest to both men and women.

"There is a difference between the duties of men and women, because women as a class have more leisure, compared to the men who have the more stringent calls of business. Women keep up the finer side of life, while men, from sheer business necessity, can't keep it up."

"The wealth made at the present time is enormous, and it is made from nature in the most approved methods. But the reckless, harem-arrangement, unreasonable way of spending it is one of the big problems of today. It is the cause of the high price of living. There is no economy or attention given to the use of it in the most efficient way for the service of the community.

"The women, certainly, are the best of this problem. They can devise ways of benefiting the community, and of developing the secondary interests of our life that makes our civilization. Therefore the obligation rests on the women to give character to the expenditure of wealth and see that it is devoted to the very highest possible use, such as charitable organizations, hospitals, churches, and literary pursuits.

**Some Modern Problems.**  
"Our ancestors were dominated absolutely by a blind recognition of custom. But the rapidity of the progress of our age is in the breaking of the customs or fashions, and it is done by the pioneer individual, not by the community, but because we are no longer under the group restrictions, then women, as individuals are given the opportunity of individual advancement."

"This gives rise to economic social work as men, they should be treated on the same basis, such as salary, etc. But men have to support a family on the same salary, for we haven't emancipated them from that obligation."

"This interferes with marriage, because girls do not want to marry men who get the same same salary as they do, especially when the obligations are doubled. These peculiar conditions arise from the emancipation of women."

Professor Short's clever address was listened to with interest by the women, as individuals are given the opportunity of individual advancement. It was well received, and it threw a new light on some of the immediate problems of the day.

SPRIT OF TOLERATION GROWING IN IRELAND CONCERNING THE HOME RULE PROPOSALS

Assembly of Presbyterian Church Decided Not to Pronounce Against Measure; Those Who Desire Happier Times in Ulster May Take Heart of Grace

Dublin, July 24.—All who desire happier relations between the people of North-East Ulster and the rest of Ireland have reason to take fresh heart from what occurred at the general assembly of the Presbyterian Church of Ireland last Friday...

The report of an assembly committee which was appointed to prepare a statement in place thereof to be presented to the effect that in view of the declarations made at the Presbyterian assembly on February 12, it was not necessary for the general assembly to make any pronouncement on the subject of Home Rule at present...

The disastrous effect of Free Trade on Irish industry is clearly shown. While the population of Ireland fell from 4,100,000 in 1841 to 4,443,000 in 1901, or 46 per cent, the members employed in manufacturing industries fell in the same period from 329,000 to 239,000, or 27 per cent...

"Under a reform of the British fiscal policy, which is responsible for so much of the decline of Irish agriculture and industry, it would be possible to give direct encouragement to Irish industries as well as to those of the rest of the Kingdom."

"Natural conditions in Ireland are favorable to the creation of tobacco and sugar industries, and it would be the object of the Government to encourage them in various ways, as well as the linen, shipbuilding, woolen, boot and shoe, furniture, and other industries which have a substantial footing in that country."

"In Ireland, as in Great Britain, there has been some recovery in agriculture in recent years, but taking a forty year survey it is seen that in no part of the United Kingdom has the decline of agriculture been more marked than in Ireland."

"The tariff commission has issued a report which contains a list of those who had charge of the resolutions against Home Rule with the result that by midnight on Thursday the Government already referred to was arranged, and all those present at the conference joined in signing the document. Although it has been suggested that those in opposition to the declaration against Home Rule should have been forward, it was probably a wise omission on their part that they were not named in the report."

They have a true safety base head, with silent tips. Will never explode if stepped on. Eddy's Matches have satisfied Canadians since 1851—accept no others.

In crime, but they caused him uneasiness on account of which he was not able to congratulate the grand jury as he had done on previous occasions. Twenty-six bills were sent before the grand jury.

In the Nisi Prius court this week before Justice Boyd and a county Dublin jury, five men, Patrick Callahan, Michael Furey, Daniel Kearns, Martin Moran, and Thomas Brennan, were charged with having on January 21 assembled with arms at Loughness, in the county Galway, and discharged shots at 13 men with intent to murder.

The attorney-general said that the 13 men were returning from Loughness in the evening from a meeting of the United Irish League. When at Craughwell they were fired upon by a party of men concealed in a haggard. The 13 men and a daughter of the president of a branch of the league, drove on three cars, and when the lead car was passing the haggard of a man named William Furey, between 15 and 20 shots were fired from revolvers.

Patrick Kelly, who was on the first car, said that he believed that he saw three of the prisoners in the haggard—Callahan, Kearns and Furey. In cross-examination he said that the people on the cars were singing and jeering at those in the haggard. He was questioned as to the hostility in the haggard towards the Gaelic Athletic Club, to which the travellers belonged. Questioned also as to the boyfishing and the beating of a man named Mannion, he admitted that he was present when Mannion was assaulted.

Michael Howley also identified Furey, Callahan and Kearns. In cross-examination he said that he did not know how many of the prisoners' houses shots had been fired.

No evidence was called for the defence, and Mr. Lynch, addressed the jury on behalf of the prosecution, pointing out the fact that although the witnesses now identified some of the prisoners, they did not identify them when the police were inquiring into the matter at the time.

The prisoners were acquitted.

MODEL FILTRATION SYSTEM

(Continued from Page 1) pumping system. Secondly, filtration of the Saskatoon supply by means of chemical coagulants is necessary for a much longer period than the Calgary system will require.

The engineer's figure of \$4.57 per million gallons for maintenance includes depreciation, figured at 2 per cent on \$200,000, the cost of the filtration works and interest, sinking fund charges, wages of two men at \$250 a month, cost of coagulants, and all other incidental charges. It is figured that the coagulants will be required only for about two months of the year.

New Intake 75 Feet Higher. As indicated on the accompanying sketch, the elevation of the present intake is 3,700 feet. The elevation of the proposed new intake two and a half miles further up the Elbow river will be 3,770 feet. The advantage of this is manifest as it provides an additional head of 70 feet. In the season when the water gets low at the present intake, the flow will continue to be supplied at the necessary rate by the 42 inch wooden main and 20 inch steel main connecting with the 30 inch main to the filter works and yards.

Between the present sedimentation tank and the inlet of the new 20 inch steel main, there will be installed an automatic check valve so that when the water is low at the present intake, it will be cut off automatically and the flow delivered through the new intake, and 42 inch wooden main entirely.

A comparison of the proposed Calgary filtration works with the filtration works at Saskatoon, on which they are modelled to a large extent, is interesting, especially as regards the method of filtration. The filtration system is a combined mechanical filter with chemical auxiliary.

At Saskatoon, the water to be filtered is taken from the Saskatchewan river at a point opposite the existing pumping station and thence flows by gravity into deep wells from whence it is pumped to the sedimentation basins. This is the first difference between the Calgary supply will be drawn from behind the new dam into the new sedimentation tank where the first settling takes place. The new tank will be divided into two compartments, as shown by the dotted line, so that while one is in use, the other can be the case of the old intake and the flow of water flows from the sedimentation tanks of the Calgary system into the clear wells, where further settling takes place, but there also will be provided at the new sedimentation tank a system of intake rough sand and gravel filters as shown in the sketch.

Two Systems Compared. The water will then flow on through the 30 inch main to the new filtration works to be located a quarter of a mile above the new reservoir, and from this point on, the Calgary process is precisely similar to the Saskatoon plan, save that the use of chemical coagulants is not necessary for nearly so long a period.

The Saskatoon filter works have six filter units. The Calgary filter, as planned by Engineer Child, will have three units, each capable of handling 4,000,000 gallons per day. Each of these units is sub-divided into four individual sections, each of these having a capacity of filtering 1,000,000 gallons per day. The filtration process is then precisely similar to the Saskatoon system, which is described by Professor T. Aird Murray, C. E., in the Canadian Engineer in part as follows:

"During the process of filtration, the water flows into and fills the concrete pocket in front of each of the filter units, rises to a level with the top of the steel supply and wash troughs, spills over onto the sand bed, filters through the sand and gravel, and is collected by the bronze strainers into the wrought iron strainer at the bottom. It is then conveyed through the central cast iron manifold collecting pipe and across the front of the filter to the effluent rate controller.

"The effluent rate controllers are set to deliver a given quantity of water under a head of 10 feet, 6 inches, and are capable of adjustment to within 20 per cent above or below the normal rate for which they are designed; they in turn deliver the filtered water to the filtered water storage reservoir, located beneath the six filter units."

Calgary Water Delivered By Gravity. At this point, another difference occurs between the Calgary and Saskatoon systems as in the Calgary system, the filtered water is either delivered into the city mains supplying consumers is into the big storage tank by moving the disc on its axis and allowing the water to pass through the filter. The filtered water is pumped into the main.

"I'm Going to Robinson's Wednesday. It's Going to be a Great Day at Their July Sale"

Just look at these items. They are just such items as we've been offering all through this July Sale. We are making a great effort to clear our shelves, racks and counters, of all Summer Goods. We need all the room taken up by these goods for the new fall stuffs, which will be here now very shortly. Every line of Summer Goods is now reduced so low in price, as to move them quickly. And such prices—Good, Big, Safe Savings. If you have already attended this sale, it will pay you to come again for your share of the good things offered. These mentioned here are only a few, there are many more. Sale Tickets all over the store direct you to Worth While Savings.

For Today -- A Stirring Sale of Hosiery

Hundreds of pairs of Good Quality Hosiery, marked below actual values to create lively selling in the Hosiery Department. Here, then, is the hosiery buying opportunity you have been waiting for—a saving occasion which comes too seldom to be missed. And since hosiery needs crop up during every week of the year, you hardly need any convincing arguments as to the savings to be derived from buying now at least all summer needs.

Sale starts 9 o'clock this morning and the price \$1.45

ROBINSON & COMPANY 108 EIGHTH AVE. EAST

ing on the bottom with the finer grades towards the surface, or the sand settles in relation to its specific gravity. The air the wash water supply, and waste valves are now closed, and the influent and filtered water of waste valves opened, allowing the treated water to filter through the sand bed as during the process of filtration, the water passing to the drain until the clay particles which were not raised during the process to the waste trough are carried off to the drain and until the water is about the color of the filtered water being supplied to the filter.

"The filtered water to waste valve is then closed and the effluent valve opened, placing the filter in operation, and allowing the water to pass through the effluent rate controller to the filtered water storage well beneath the filter.

"On each of the operating tables is located a test bibb for drawing samples of filtered water at any time while the filter is in operation. "In the laboratory equipment is included a test basin having properly marked bibbs for taking samples of filtered water from each of the filters, also provision for taking samples of the raw and treated water before and after coagulation. The samples of the water are pumped by the use of a hydraulic lift from the sources of the supply to the bibbs. "By opening the bibbs, on the operating tables and test basin, the pressure is released to the hydraulic lifts which places them in operation. "How the Chemical Plant Works. "The feeding plant consists of four concrete solution tanks located in the second story of the machinery end of the filtration plant, two for the preparation and mixing of sulphate of alumina and two for hypo-chloride of lime. "In the sulphate of alumina solution tank, the chemical is placed in lump form in wooden dissolving trays and filtered water allowed to spray over the material until it is dissolved and the solution tanks are filled with

Fifty Only White Parasols at 50c each

Early this morning at prompt 9 o'clock these fifty white parasols are placed on the counter. Pick one as quick as you can, for you see the quantity is only small. They are made of plain white linen finished material, over good strong frames with wooden handles. Worth \$1.50. 50c This morning

White Muslim Underskirts, Good Quality Too, 85c

These are made from good sheer quality White Muslins, the frill is trimmed with lace, a very good looking skirt; just such a skirt as you generally pay \$1.50 for at ordinary times. You can surely make room in your summer wardrobe for a couple of these. Basement 85c

Twenty Five Per Cent. Discount Off Linen and Tweed Coats.

Today we'll expect big things up on the Second Floor in the Coat Section, for we are placing on sale our entire stock of Linen Coats and Tweed Coats at a discount of 25 per cent. This is certainly a big come-down in price and you'll want to look into this as early in the day as possible. Every Coat goes at 25 per cent. Less.

Still More House Dresses to clear at \$2.50

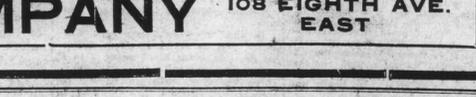

The prices grow smaller as this sale goes on. Talking of House Dresses, there is a line that has been in stock for only a few days. They are made of prints in the butcher blues, trimmed with self colored and fancy materials. This is indeed a very nice dress and a bargain addition at this price; quantity is limited \$2.50

A Clean Up in These Mull Dresses at \$4.50

Dainty little summer Dresses, mulls and muslins; such colors as pink, sky and white. These are very dainty and pretty styles, trimmed with val laces and insertions. Of course, this price is away less than you expected to pay for such a dress as this, but you'll have to come early today to secure one, as there are only a few \$4.50

Such a Pretty Kimona and for So Little Money \$2.95

That will be the opinion of all the ladies who purchase one of these Long Kimonas today. Listen, while we tell you about them. They are full length, and made of that Japanese Crepe Cloth, which is so serviceable for kimonas as it washes so well. They come in floral patterns, light and dark colors, and trimmed with mercerized satin, in contrasting colors; and we will add that you could not possibly procure the material in one of these garments for this price. Need we urge you to make a few choice early in the day, 2nd floor, today. \$2.95

ROYALTY STARTS FOR THE MARITIME PROVINCES

Quebec, July 23.—Previous to embarking on the government steamer, Earl Gray this afternoon, for a trip to the maritime provinces, the Duke and Duchess of Cornwall, Princess Patricia and party visited Ursula's convent evincing keen interest in the historical relics. They will sail tomorrow. The vessel has been sumptuously fitted for the distinguished passengers and will be manned during the trip by officers and sailors of the Niobe, in command of Comdr. White, R. N.

Regulation of Chemicals Described.

"The solution which is to be fed to the water passes through a screen made of lead and iron respectively, to the orifice compartment of the weir boxes. The orifice is composed of a glass disc containing accurately ground or bevel edged holes or orifices calibrated for delivering given quantities under the constant head which is maintained in the weir box.

"This orifice is capable of adjustment by moving the disc on its axis until the orifice of the desired size is located in the place opposite the discharge from the weir box. The solution is then fed by gravity through pipes composed of metals best adapted to withstand the action of the respective chemical, passing through a slight feed in the laboratory, which permits the operator of the plant to see at a glance whether the feeding

apparatus is working or not. "From the sight feed, the sulphate of alumina passes to the point of application above mentioned in the coagulating basin and the hypo-chloride of lime solution is fed to the filtered water storage reservoir. "The apparatus for agitating the chemical solution tanks is provided ample space for storing sulphate of alumina and hypo-chloride of lime. "The building is provided with a cat head or hoist for raising this material from the ground to the chemical storage room."

To Measure All City Water Used. "Engineer Child is now having installed at the present intake a water meter which will accurately measure the rate of flow of water through the 30 inch pipe to the city. The water at the present time is delivered from the 48 inch main to consumers by means of a 20 inch main coming in at the northern section of Calgary and an 18 inch main coming in at the southern section. When the filter works are completed these mains will deliver from the filtered water supply instead of the 30 inch main as at present. "I am more than delighted to see the council going ahead with the water extension and filtration system," said Engineer Child yesterday. "It has been a bug-bear to me for months. Of course, I will miss my favorite fish coming down the pipes, but I guess we all can stand the loss of the fish to get pure water."

The only opposition that can arise to the water extension plan is based on the fear that the expenditure of nearly a half million dollars will mean a corresponding rise in the water rates. The city is already using some eight million gallons a day, and in the opinion of experts, much of this is due to leakage and waste as it means a per capita usage of 200 gallons daily, while the maximum limit of consumption for other cities is figured at 100 gallons daily. "Would Meter All Water. Engineer Child pointed out a remedy

WESTMINSTER DELEGATES CONSIGN JONES AND HIS TEAM TO HADES; WALK OUT AND BREAK UP B.C. ASSOCIATION

Rather Unparliamentary Language Used by the Westminster Delegates When Con Jones Tries to Force Rearranged Schedule Down Their Throats

SALMON BELLIES WITHDRAW TEAM FROM THE LEAGUE

Commission Will Try to Get Some Eastern Players and Form New Team to Complete Schedule; Westminster Will Go on a Tour of the East

Vancouver, July 23.—The British Columbia Lacrosse association "busted up" this evening with a beautiful declaration in most unparliamentary language after a short meeting held at the Elysium hotel.

Next Saturday game in the original schedule had been fixed for Westminster while September 14 was to be played in Vancouver.

After the retirement of Westminster, the Vancouver executive arranged that Con Jones, manager in Vancouver, and one other official are to go east, leaving tomorrow night, to secure seven or eight men for a new team.

JOE PATCHEN II. WINS RICH RUBE MARQUARD STARTS CHAMBER OF COMMERCE ON ANOTHER WINNING STREAK

Rod McKenzie's Horse Performed for Special Benefit of Sir Rodman Roblin

Deseret, July 23.—R. J. McKenzie, of Westminster, had the satisfaction today of watching his splendid horse, Joe Patchen II, duplicate last year's performance of his stable mate, Vernon McKinney, and capture the rich chamber of commerce stakes.

Joe Patchen II. won the stakes at Deseret, July 23, by a margin of 1 1/2 lengths over the second runner, the handsome bay word and he pulled away. Behind the two leaders, the next contest being for third and fourth money.

BAXTER BROS. Phone 41338. Contractors of Cement Walks, Floors, Steps, Curbs, Ornamental Castings. Anything in the Cement Work.

INTER-CITY SoccerMatch Calgary versus Edmonton. At Edmonton Saturday, July 27. A special low rate of \$4.35 for the round trip has been secured by the Calgary League.

SWEDEN TAKES HONORS AT THE OLYMPIAD

Stockholm, July 22.—The Olympic games concluded today with the finish of the yacht races. With the points gained in the yachting events, Sweden leads the nations in the number of points in all events.

BUSY WEEK FOR FOOTERS

The present week will be a busy one for the Municipal football league, as games being scheduled for as many days. Tonight the City Hall and Police teams meet at Victoria Park.

REGINA CYCLONE GHOUL RELIEVED OF SENTENCE

Regina, July 23.—A man named Solias, sentenced to 12 months imprisonment for theft at the time of the cyclone here, was released this morning by order of Judge Lambert.

WOLGAST PASSES UP THE BOUT

Los Angeles, July 23.—Ad Wolgast will not fight Joe Rivers on Labor Day. The champion plans to go to Oregon for a long rest, and will not put on gloves until before the first of next year.

Star Southpan of Giants Had Reds at His Mercy Yesterday, Baseball Results

The Giants seem to have gotten back to their stride again, as they near home after the disastrous road trip, Rube Marquard holding the Cincinnati Reds in the palm of his hand throughout yesterday's game and leading the team to a 5-1 victory.

In the American league, the Athletics, playing at home, again defeated St. Louis, the score being 5 to 4. Detroit bunched five hits with three bases on balls and a hit by pitcher Cliff Grooms, in the ninth, scoring seven runs and defeating Washington 12 to 7, in a game played in the national capital yesterday.

Wonder if they have heard of Bessie Longanecker? New York, July 23.—The National League, through President Lynch, has purchased the release of Cy Young from the Boston Red Sox.

TY COBB CLIMBS TO TOP OF HEAP OF SLUGGERS

**DISPUTE OF WORKMEN RETARDS BUILDING ON SIX SCHOOL STRUCTURES**

Quarrel Between Stonemasons and Stonecutters Causes Serious Handicap  
Hundreds of Students Cannot be Cared for Unless the Schools are Finished

CONSTRUCTION work upon six school buildings in Calgary has been discontinued owing to the differences between the stonemasons and the stonecutters. Work at the King George school was resumed yesterday by the brickmasons but no stonecutters participated in the construction work.

Superintendent H. McClelland, in charge of school construction, attempted yesterday to have a meeting of contractors with a view of planning some remedy for the present situation. The meeting probably will be held today. At the session the advisability of substituting concrete for stone work will be considered. If the differences between the stonemasons and the stonecutters cannot be adjusted it is likely that brick or concrete will be substituted for the stone.

Calgary has several thousand school children to care for at the opening of the next semester. The school population has been increasing proportionately with the growth of the city and unless the seven new school buildings now under construction are completed by September first Calgary will find itself in a position to be unable to care for the young seekers of knowledge.

The international officials have interested themselves in the Calgary dispute and, according to local labor men, it is largely due to the presence of an international man in this city that the strike between the stonemasons and the stonecutters has been drawn out so long.

Some action will have to be taken immediately. Calgary's new school buildings must be completed as soon as possible in order to accommodate the students in this city.

An international agent who has been extremely busy in Calgary during the past few weeks is held partially accountable for the differences between the cutters and the masons. According to expressions given out by both cutters and masons, they have no particular grievance but they feel that they are obligated by an international rule. Without the interference of the international union, the local parties to the dispute feel that they would be able to adjust their differences.

The contractors are not involved. But the situation has reached a stage where the builders feel that they should adopt brick or concrete rather than have the school buildings held up. The proposition to make substitutions will be thrashed out today.

AGREEMENT OF WHEAT IN SASKATCHEWAN IS MORE THAN REST OF DOMINION

Has Five and Half Million Acres Sown; Total Grain Acreage is Ten Million

But for Unfavorable Conditions Grain Area Would Have Been Much Greater

Increase Over 1911 is: Wheat Three per Cent., Oats Ten, Barley and Flax Nine

Wheat Crop All Headed Out, Harvest to be Week or Ten Days Earlier

Regina, July 23.—The statistical branch of the department of agriculture has issued the following estimate of Saskatchewan's crop acreage. This year the province has 9,194,814 acres under wheat, oats, barley and flax. This is an increase in the grain crop of 522,389 acres, or 6.76 per cent over the total acreage sown to grains last year.

The acreage under wheat is 5,484,092, an increase of 151,844 acres, or 2.9 per cent, over last year's wheat area. In acreage Saskatchewan exceeds the rest of the Dominion by over a half million acres.

Many factors contributed to keep down the wheat acreage this year. In the first place, only about one fifth of the usual fall plowing was done. Then the spring was cold and wet, and the land, noticeably that summer, was long in drying out. This delayed early seeding. The previous year's crop was again late seeding, and the majority of the farmers stopped seeding of wheat earlier than usual.

The oat acreage shows an advance of 104,670 acres. This year's acreage is 2,421,382, an increase of 222,126 acres over the crop of 1911. Oats have been on the gradual increase for some years. The areas under barley and flax also continue to extend. Barley shows an increase of 9.04 per cent, and flax 9.22 per cent over last year's acreage. The acreages are: Barley, 2,671,139 and flax, 1,115,567. Barley is coming into greater favor because of the market indications of better prices.

| Grain.   |            |            |           |
|----------|------------|------------|-----------|
|          | 1912       | 1911       | p. c. In. |
| Wheat    | 5,484,092  | 5,232,248  | 2.90      |
| Oats     | 2,421,382  | 2,192,806  | 10.45     |
| Barley   | 2,671,139  | 2,442,298  | 9.04      |
| Flax     | 1,115,567  | 922,409    | 9.22      |
| Province | 11,692,180 | 10,969,761 | 6.76      |

The wheat crop throughout the province is not fully headed out. Seventy-five per cent of the entire crop is so well advanced that farmers are looking forward to a harvest from a week to ten days earlier than last year. The weather at the last two weeks was cool and showery. Some points reported slight frosts, but no resultant damage to the grain.

The change to warmer weather has brought the crop forward more rapidly. Owing to the early cool spell early grain has not come through so well as the later sown grain. Black rust has made its appearance but there are no reports of damage so far. Damage from hail to date would appear to be remarkably light. Present indications are that harvest will begin in the province between the 15th and 20th of August. In quite a number of points it will be even a week earlier than the Marquis wheat. There are very many further ahead than any other varieties. The early cool spell, which occurred in June adversely affected the crop on stubble. It will not be so satisfactory a crop as expected. The sowing of summer fallow is practically all done.

**GAVE TAFT TARIFF BOARD A NEW LEASE OF LIFE**

Washington, July 23.—President Taft's tariff board secured the promise of one more year's life from the senate today. After a short fight that body by a vote of 34 to 20, authorized an expenditure of \$225,000 for another year's work of investigation by the tariff experts. Whether the application is finally made will depend on the strength with which the house resists the senate's demands. The house refused to provide for the tariff board when it formed the sundry bill, and its conferees are expected to fight the provision when the big supply measure is sent into conference between the two houses.

**GUNMEN WHO SHOT ROSENTHAL DOWN FALL INTO DRAGNET OF NEW YORK POLICE**

NEW YORK, July 23.—The gunmen wanted for the killing of the gambler, Herman Rosenthal, are beginning to fall into the nets. Harry Valon, one of five notorious gangsters who were in the "Murder Car" the night Rosenthal was shot surrendered himself to the police this morning and within ten days Deputy Commissioner Dougherty expects to round up the whole gang. With the men who actually did the shooting in the toils, the main work of Dougherty will commence, that of trying to learn the identity of the conspirators who so greatly desired that Rosenthal be done away with before he could make further revelations of relation between police and gamblers.

Valon has nothing of the appearance of the gangster of the meaner sort. His appearance at police headquarters dumbfounded the desk sergeant and he had to convince the detectives as to his identity before they locked him up.

**LEWIS DESANDIS, FIANCE OF GALICIAN GIRL, IS STABBED BY RIVALS**

JEALOUSY resulting from the betrothal of a Galician girl, resulted in the stabbing of Lewis Desandis last night near 217 North East Riverside. Desandis' assailant has not yet been apprehended.

According to stories told by friends of the wounded man, he was engaged to marry a Galician girl in the Riverside district. Desandis journeyed to Riverside to call upon his fiancee when he was attacked by two men. He was stabbed about the face and chest, after which his assailants fled. The injured man was removed to his home. By the time the police officers reached the scene of the stabbing, the assailants had made their escape. Detectives were detailed to investigate.

**GRAND TRUNK PACIFIC TO BE COMPLETED AND OPEN FOR TRAFFIC BEFORE END OF 1914**

VANCOUVER, July 23.—Collingwood Schrieber, of Ottawa, general consulting engineer of the Dominion government and chief government engineer of the Grand Trunk Pacific railway, reached here today. He has just completed an inspection of the line as far as a point on the south fork of the Fraser, forty miles west of the summit of the Yellowhead Pass.

"I have every confidence that the main line of the Grand Trunk Pacific railway to Prince Rupert will be finished and in operation before the end of 1914. I think it will be ready before that period but it will take some time to get the roadbed in shape for traffic," said Mr. Schrieber to the W.A.P.

Mr. Schrieber will be joined here tomorrow by B. B. Kelliher, chief engineer of the Grand Trunk Pacific, who left him at Tete Jaune Cache to proceed westward over the line to Fort George. Mr. Kelliher is coming out via Ashcroft. They will leave here Thursday for Prince Rupert, and will go inland to inspect the G.T.P. line as far as Alhambra in the Bulkley Valley.

Mr. Schrieber stated that there is a labor scarcity in the construction camp west of the Yellowhead Pass, the payroll only numbering 3,500 names where double that force could be employed to advantage.

**CALGARY BREWING AND MALTING COMPANY ISSUES \$1,250,000 FIVE PER CENT. BONDS**

That an expansion of business is contemplated by the Calgary Brewing & Maltng company is indicated by dispatches from London, England, stating that the concern has issued approximately a million and a quarter dollars of five per cent, first mortgage sinking fund gold bonds at 88. The issue is quoted nominally at 1 per cent discount, and the funds will be employed in financing contemplated expansion of the company.

"The bond issue," said a local representative of the company, "will include provision for some improvements but the major portion is to be used in expanding the business."

Naturally, the details of the extensions planned are not public, but their extensive nature is indicated by the magnitude of the bond issue, as well as the prosperous financial condition of the company.

**SEVEN GIRLS DEAD; MANY INJURED IN FACTORY FIRE IN LONDON**

Blaze in Celluloid Christmas Card Establishment Where Many Girls Employed

Flames Cut Off Only Route of Egress from the Building, Entrapping Inmates

Some Escaped by Walking the Plank and Many Leaped from the Windows

London, July 23.—Seven girls were killed, five fatally injured, and several others severely injured in a fire which occurred in a four storey building in Moor Lane, in the heart of the city, occupied by celluloid Christmas card manufacturers who employ many women and girls. The fire started in a front room on the top floor and spread quickly. To reach the stairs, the girls in the back room had to pass through the front room, and before they realized the danger, the flames had cut off the means of escape. In a few minutes the back room was ablaze. Some of the girls managed to reach the roof by crossing a plank to the next building, ten feet distant, but one missed her footing and fell.

Two were seized by the flames before they could gain the dizzy bridge, and a large number leaped from the roof of the building. Five of the girls were burned to death.

The response of the fire department was prompt but the swiftness of the flames' behchire from the windows prevented effective use of the fire escapes.

**MAPLE LEAF CLUB RAIDED; FIFTEEN ARRESTED**

The police raided the Maple Leaf club, a social institution of color, late last night, and took in fifteen Dartmouth beaus, who are said to have been gambling. Inspector Nutt was in charge of the raiding squad. Charges of vagrancy were preferred against those arrested.

**AFTER TOMORROW NATURAL GAS COMES; EXIT COLD**  
(Continued from Page 1.)

The flow from Bow Island is a remarkable one, and the pressure is so great that great care has to be exercised in switching the connections. A pressure of four ounces is arranged for natural gas in the residence districts, and eight ounces for the factories.

By Thursday evening it is expected that Calgary will be burning natural gas for domestic and manufacturing purposes.

**POLICE CONNIVANCE IN ROSENTHAL MURDER**  
(Continued from Page 1.)

ed. All that Commissioner Dougherty would say was that, "Valon was in the murder car," and that an important arrest was expected shortly.

Mr. Whitman has flatly thrown down the gauntlet to the police department, declaring "the murder smelt of police connivance."

Interest was largely centred today in the appearance before the grand jury of Mrs. Rosenthal, widow of the murdered gambler. The district attorney has hoped to get many facts from Mrs. Rosenthal, who is believed to have had an intimate knowledge of her husband's affairs and his alleged dealings with the police.

Mrs. Rosenthal is believed to have told the grand jury today much about the meeting her husband had with Police Lieutenant Charles Becker, who, according to Rosenthal, was his silent partner in his place on West Forty-fifth street.

athletic games scheduled were cancelled.

J. M. Kinealy, president of the American Society of Heating and Ventilating Engineers, delivered an address during the afternoon on "Heating and Ventilation" at the convention hall.

Mr. Kinealy dwelt at length upon the necessity of proper heating and ventilation arrangements, and explained how such arrangements should be made.

Today there will be another business session and an address on "Sanitation and Its Value to Modern Civilization" and there will be a banquet in the evening.

WHAT DEATH FROM ELECTRICITY FEELS LIKE; ELECTRICIANS TELL A GRAPHIC STORY

Felt as Though a Giant Vice Was Being Put All About Him; Then Came a Deafening Roar Followed by Flashes of Electricity; Oblivion

HIS SENSATION of remembering a sensation as though giant vices had been put all around every part of his body and were being suddenly squeezed cruelly in on me, it seemed as though I were being pushed and compressed and as though every muscle was tight. Then I remembered nothing."—Franz Halten.

Washington, July 23.—Revealing the sensations experienced by persons killed in the electric chair, and showing the various varieties of electric currents, the testimony yesterday afternoon was given during the coroner's inquest into the cause of the deaths of Daniel Kelly and William James Moran, the two electricians who were killed last Monday in the Edison building on the corner of the Washington and Electric Company.

Two men died from the effects of a shock from 4,000 volts of electricity which struck through the bodies of the two men without killing them. A verdict finding that the two men came to their deaths accidentally was returned by the coroner's jury after testimony of the men subjected to the shock and several electricians had declared that no one should be blamed for the accident. It was declared that Norman Norton, the man through whose body the electricity first passed, was entirely blameless of any carelessness.

Norton was foreman of a group of electricians who were working on a transformer in the cellar of the car barn. It was explained with him by Franz Halten, George Pickering and the two men who were killed. There were several inches of water in the cellar from the heavy rain of Sunday.

Behind Norton on a wall were some insulated wires carrying heavy charges of electricity. The accident happened when Norton's arm touched the wire, causing the heavy voltage through his body to the transformer and thence to the four men who were touching it.

been held spellbound the coroner's jury and spectators at the inquest as he recalled his impressions of the ordeal through which he passed. Outside of some scratches on his neck, received when he fell, he bore no evidence of the shock.

"First I was nearly blinded by a terrific flash which seemed to shoot out all around us," said Halten. "Then came a deafening roar, followed instantly by another flash and another roar, even more terrible than the first. Then I remember having a sensation as though giant vices had been put all around every part of my body and were being suddenly squeezed cruelly in on me. I seemed as though I were being pushed and compressed and as though every muscle was tight. All at once the feeling was over in an instant, and then I did not remember anything."

"When I came to, about fifteen minutes later, after some men had carried me to the hospital, I felt only a curious tingling sensation. My head ached slightly, and still hurts some. Outside of that I have had no trouble since the accident."

That Halten was accurately describing the last feelings of a man being electrocuted in an electric chair was vividly in the minds of everybody present. It was declared that his companions probably are the only people in the world who ever experienced this feeling so vividly was declared to be a fact by the expert present.

Accident is Unprecedented L. E. Sinclair, general manager of the Potomac Electric Power Company, declared that he had never before known of such an accident. He said that neither of the dead men had any wounds on their bodies. He described how Norton had been unconscious for thirty minutes following the accident.

S. E. Folsom, superintendent of the sub-station, gave expert testimony on the effects of electricity on the human body, and declared that he had known people being killed by as low a voltage as 550. Mr. Folsom told how he was shocked in 1909, and showed where two of the fingers of his right hand had been burned off at the time.

"At that time I had a kind of vibration feeling," said Mr. Folsom. "I saw sparks and then had a kind of sensation. That was all I knew."

Just why two of the men should have been killed, while three others, including Norton, through whom the electricity first passed, were slightly injured only, none of the experts could decide. They said it was one of the "franks of electricity," but declared that the physical condition of the men might have had something to do with it.

SILK COAT for \$15.00—Plain black taffeta silk coats; 60 inches long, made perfectly plain. Regular \$20.00. Sale price, each \$15.00.

PALISSY THE POTTER

UNDREDS of years ago there was born in a village of France on the Garonne river a little lad named Bernard Palissy. North of him a h a o m e stretched out a heath of broom and almost endless forests of chestnut and walnut, through which roamed a great variety of birds. There were a few other dwellers in the fine old forests besides the glass, who for generations had made the wonderful colored windows for the French cathedrals. But the people who wrought in glass were set aside by the French cathedrals, and what was their artistic work esteemed that even the proud nobles might work in the glass trade without fear of being looked down upon. One day he carried some fragments covered with a carefully thought-out mixture to the kiln belonging to some potter in the forest, and these potter's hands were busy at work to bake them. When they had baked for some four hours Palissy found one fragment perfectly covered with a white glaze. "My joy was such," he said, "that I felt myself another man." But his joy was short-lived, for when he tried to make a fresh mixture to spread over the remainder of the pieces he failed entirely to obtain the looked-for result. Life had done what he wanted, but he could not do it again. He was much too poor to get help, and his household he did not want it, but he worked night and day, grinding into fine powder the substances he had used for his first success. Try as he would, however, the substances would not bake, and he himself was almost driven to despair. He discovered the secret of the glaze, and he knew how to make it adhere to and form part of the pot. One time a victory appeared certain some fresh misfortune occurred. For instance, the kiln was full of small pebbles, and the fragments were broken up and mixed with the glaze. When the enamel was spread over the surface of each piece, as usual, as it was possible to do, the result of every one who touched it instead of being as smooth and lustrous as Palissy hoped it would be. He had to discard the fragments from such accidents. Palissy invented little cases in which to put the pots while in the kiln, and these were of a very useful use. And now the artist in Palissy awoke, and he fashioned lobsters and lizards and other animals, and after a long while he could turn them out as he wished. The green of the lizards sometimes got burned off the surface, and the result was properly fixed. The artist in Palissy was a wealthy man and could make what price he chose.

IS GOING TO SPLIT BOTH THE OLD PARTIES

Roosevelt Makes First Speech Since Chicago Convention, to New Yorkers. Tells Third Party Organizers Will Fight on Live Issues, Not Dead Ones. New York, July 23.—In his first speech since he returned from Chicago, Colonel Roosevelt today set forth his reasons for leading in the formation of a new party. His address was delivered at a meeting of the New York state county chairmen. "No man knows better than I," said the colonel, "that enthusiasm and high principles cannot be effective without organization and work. A great responsibility rests upon you men here who are undertaking the organization of a new party, which is to stand four-square to the democracy, which is to be literally the party of the people. It will fight on live issues and not dead ones. It will embody a protest against the corruption in both of the old party machines. It will be a party into which ex-democrats and ex-republicans, without regard to the political past, are to come in on an exact equality and have each the same share in the party management. "When we get this started, it will be a party not only representing the people at election time, but will represent the people in the party management. We are going to see that it is organized so it will be impossible for any fifty-three men chosen four years before by politicians, to stand superior to all the voters of a great state like California, and that if the state has not shaped its laws according to a given plan, and the state shall not be disfranchised. "My own judgment is that Messrs. Barnes, Penrose, Guggenheim, and company made a poor swap when they took two stolen delegates from California in place of the electoral vote of California. They were not contented with that. They swapped the electoral vote of Massachusetts for two delegates. I think it was about as responsible a swap as was ever made by politicians."

GERMANY NOT DISTURBED BY NAVAL DEBATE

Papers Praise Churchill But Criticize Shifting Responsibility for Naval Increase. Berlin, July 23.—German public opinion is neither disturbed nor irritated over yesterday's naval debate in the house of commons in London. The papers praise the speech, but criticize, however, the attempt to throw the responsibility for increased armaments on Germany. The Vorworte Zeitung, in commenting on the subject, points out that the increase in the German fleet was due to the tone of the British statements during the Moroccan crisis, which compelled every German to regard an increased German fleet as a commandment of self-preservation. The Vorworte Zeitung takes up Arthur J. Balfour's phrase, in which he referred to senseless competition in ship building, and asks: "Who is responsible? It was not Germany that invented dreadnoughts, super-dreadnoughts, and submarines." A responsible official corroborated the standpoint of the press, and asserted unequivocally that the speech delivered by David Lloyd George, chancellor of the exchequer, at the mansion house, London, in 1911, was the direct and sole cause of the German naval bill.

JOHN MITCHELL MUST GO TO JAIL FOR 9 MONTHS

Washington, D. C., July 23.—John Mitchell, Vice-President of the American Federation of Labor, today was sentenced in the Supreme Court of the District of Columbia to nine months' imprisonment for contempt of Court growing out of the Bucks Stove and Range Co. case. An appeal was taken, and \$4,000 bail furnished to abide by the decision of the upper court. In the same case President Samuel Gompers recently was sentenced to one year and Secretary Frank Morrison to six months.

ALPINE-AVOLA COMPANY OF WORLD-FAMED STARS

The forthcoming engagement at our Sherman Grand, starting Thursday, July 25, for three days and Saturday matinee, of the great Albin-Avolo aggregation of world famed stars is of such importance that an extract from a recent issue of a Butte, Mont., paper is given herewith. "Albin makes good the claim that he is the greatest illusionist and magician before the American public today. His marvelous work must be seen before you can understand. It would require columns of this paper to describe them. In addition to his wonderful illusions seen here, he brings with him new ones. Over 500,000 has been expended on this act alone. Albin, Mont., paper is given herewith. "Albin makes good the claim that he is the greatest illusionist and magician before the American public today.
