JOURNAL
OF THE
HOUSE OF ASSEMBLY
OF
NEWFOUNDLAND.

Anno Trigesimo Victoriae Reginae.

HIS Excellency ANTHONY MUSGRAVE, Esq., Governor and Commander-in-Chief in and over the Island of Newfoundland and its Dependencies, &c., &c., &c.

Second Session of the Ninth General Assembly.

St. John's, Newfoundland.

JAMES SEATON, PRINTER.

MDCCCLXVII.

PRINTED AT THE "EXPRESS" OFFICE.

PROCLAMATION.

A. MUSGRAVE.
(L. S.)

*VICTORIA, by the Grace of GOD, of
the United Kingdom of Great Bri-
tain and Ireland, Queen, Defender of
the Faith.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS it is Our will and pleasure to issue Our Writ for the Election of ONE Member to serve in the General Assembly of Our Island of Newfoundland, for the WESTERN DIVISION of the Electoral District of St. JOHN'S, in the room of JOHN CASEY, Esquire, whose seat, as Member of the General Assembly of Our said Island, has become vacant by reason of his having accepted the Office of Chairman of the Board of Works, being an office of Emolument from the Crown, under the Act, "providing for the vacation of Seats of Members in certain cases, &c.," We do, therefore, by these presents, make known unto all Our loving subjects, within the aforementioned Division of St. John's West, that the Election of ONE Member to serve in the said General Assembly, shall be held at St. John's, Petty Harbor, and Broad Cove, within the said Division. And that such Election shall be completed within the period of ten complete days from the day of the receipt by the Returning Officer, for the said Division, of Our Writ authorising such Election.

And We do further order and direct that the Nomination of Candidates shall take place on Monday Twenty-eighth May instant, and the Polls shall be taken on Saturday the Second June following, in the said Division; and that the said Election shall be conducted in conformity to the regulations, orders, and directions contained, and set forth in Our Proclamations, bearing date, respectively, the Nineteenth and Twenty-

first days of August, 1865; and in conformity, likewise, with the Laws and Statutes of Our said Island, in that behalf made and provided.

Given under the Great Seal of our Island of Newfoundland, at St. John's, in our said Island, the Eighth day of May, 1866, in the Twenty-ninth Year of Our Reign.

Witness our trusty and well-beloved ANTHONY MUSGRAVE, Esquire, Our Governor and Commander-in-Chief in and over Our said Island of Newfoundland and its Dependencies.

By His Excellency's command,

JOHN BEMISTER,
Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE.
(L. S.)

*VICTORIA, by the Grace of GOD, of
the United Kingdom of Great Bri-
tain and Ireland, Queen, Defender of
the Faith.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS by Our Proclamation made and issued under the Great Seal of Our Island of Newfoundland, bearing date the eighth day of May, A. D., 1866, We declared it to be Our will and pleasure to issue Our Writ for the election of One Member, for the WESTERN DIVISION of the Electoral District of ST. JOHN'S, to serve in the General Assembly of Our Island of Newfoundland, in the room of JOHN CASEY, Esquire, whose seat has become vacant by the acceptance of an Office of Emolument; and among other things we directed that the Nomination of Candidates should take place on MONDAY the 28th day of MAY instant, and that the Polls should be taken on SATURDAY, the second day of JUNE following, in the said Division, and that the Election should be conducted in conformity with the regulations, orders and directions contained and set forth in Our Proclamations, bearing date respectively the nineteenth and twenty-first days of August, 1865, and in conformity, likewise, with the Laws and Statutes of Our said Island, in that behalf made and provided:

And Whereas, for greater convenience in taking the said Polls, we deem it expedient to declare and direct that some alterations and additional Polling Places shall be made, in conducting the Election for the said Division of ST. JOHN'S WEST, that is to say, One Booth at Black Head, at which all Electors residing there—Freshwater and Cape Spear inclusive—shall deliver their votes; One Booth on the Topsail Road, at which all Electors residing between the junction of the Cockpit Road with the Topsail Road aforesaid, at the top of Palk's Hill, and the Western boundary of the said Division, inclusive, shall deliver their

Votes ; One Booth on the Bay Bulls Road, at which all Electors residing between Wateford Bridge and the Northern Goulds' Bridge, shall deliver their Votes ; One additional Booth at Petty Harbor, at which Electors residing on the South Side thereof shall deliver their Votes ; and One Booth at the South Side of St. John's Harbor, at which Electors residing on the said South Side of St. John's Harbor shall deliver their Votes.

Given under the Great Seal of Our aforesaid Island of Newfoundland.

Witness Our trusty and well-beloved ANTHONY MUSGRAVE, Esquire, Our Governor and Commander-in-Chief in and over Our said Island and its Dependencies, at St. John's, in Our said Island, this 29th day of May, 1866, and in the twenty-ninth year of Our Reign.

By His Excellency's command,

JOHN BEMISTER,

Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE,
Governor.
[L. S.]

*By His Excellency ANTHONY MUSGRAVE,
Esquire, Governor and Commander-
in-Chief in and over the Island of
Newfoundland and its Dependencies,
&c., &c.*

TO ALL WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS the GENERAL ASSEMBLY of this Island stands PROROGUED until TUESDAY the THIRD day of JULY instant : and whereas I think fit to PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY the FIFTH day of SEPTEMBER next ensuing : I do, therefore, by this my Proclamation, further PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY the FIFTH day of SEPTEMBER next, as aforesaid : of which all persons concerned are required and commanded to take due notice and govern themselves accordingly.

Given under my hand, and the Great Seal of the Island of Newfoundland, at the Government House, at St. John's, in the said Island, this Second day of July, 1866, and in the Thirtieth Year of Her Majesty's Reign.

By His Excellency's command,

JOHN BEMISTER,

Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE,
Governor.
[L.S.]

*By His Excellency, ANTHONY MUSGRAVE,
Esquire, Governor and Commnnder-in-
Chief in and over the Island of New-
foundland and its Dependencies, &c., &c.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS the GENERAL ASSEMBLY of this Island stands PROROGUED until WEDNESDAY the FIFTH day of SEPTEMBER instant: and whereas I think fit to PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY, the TWENTY-FOURTH day of OCTOBER next: I do, therefore, by this my Proclamation, further PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY the TWENTY-FOURTH day of OCTOBER next, as aforesaid: of which all persons concerned are required and commanded to take due notice and Govern themselves accordingly.

Given under my Hand, and the Great Seal of the Island of Newfoundland, at the Government House, at St. John's, in the said Island, this 4th day of September, 1866, and in the Thirtieth Year of Her Majesty's Reign.

By His Excellency's Command,

Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE.
(L. S.)

*VICTORIA, by the Grace of GOD, of
the United Kingdom of Great Bri-
tain and Ireland, Queen, Defender of
the Faith.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS it is Our will and pleasure to issue Our Writ for the Election of ONE Member to serve in the General Assembly of Our Island of Newfoundland, for the Electoral District of TRINITY, in the room of STEPHEN MARCH, Esquire, whose seat, as Member of the General Assembly of Our said Island, has become vacant by reason of his having accepted the office of General Superintendent of Fisheries, being an office of Emolument from the Crown, under the Act "providing for the vacation of Seats of Members in certain cases, &c.," We do, therefore, by these presents, make known to all Our loving subjects, within the aforementioned District, that the Election of One Member to serve in the said General Assembly, shall be held at Trinity, Old Bonaventure, Catalina, Bird Island Cove, Heart's Content, Hant's Harbor, Old Perlican, Grates Cove, Heart's Ease, and New Harbor, within the said District. And that such Election shall be completed within the period of ten complete days from the day of the receipt by the Returning Officer, for the said District, of Our Writ authorising such Election.

And We do further order and direct that the Nomination of Candidates shall take place on Monday the Twenty-ninth day of October next, and the Polls shall be taken on Saturday the Third day of November following, in the said District; and that the said Election shall be conducted in conformity to the regulations, orders, and directions, contained and set forth in Our Proclamations, bearing date, respectively, the Nineteenth

and Twenty-first days of August, and the Thirtieth day of September, 1865; and in conformity, likewise, with the Laws and Statutes of Our said Island, in that behalf made and provided.

Given under the Great Seal of Our Island of Newfoundland, at St. John's, in Our said Island, the Seventeenth day of September, 1866, in the Thirtieth Year of Our Reign.

Witness Our trusty and well-beloved ANTHONY MUSGRAVE, Esquire, Our Governor and Commander-in-Chief in and over Our said Island of Newfoundland and its Dependencies.

By His Excellency's command,

JOHN BEMISTER,
Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE,
Governor.
[L.S.]

*By His Excellency, ANTHONY MUSGRAVE,
Esquire, Governor and Commander-in-
Chief in and over the Island of New-
foundland and its Dependencies, &c., &c.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS the GENERAL ASSEMBLY of this Island stands PROROGUED until WEDNESDAY the TWENTY-FOURTH day of OCTOBER instant: and whereas I think fit to PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY the TWELFTH day of DECEMBER next: I do, therefore, by this my Proclamation, further PROROGUE the said GENERAL ASSEMBLY until WEDNESDAY the TWELFTH day of DECEMBER next, as aforesaid: of which all persons concerned are required and commanded to take due notice and govern themselves accordingly.

Given under my Hand, and the Great Seal of the Island of Newfoundland, at the Government House, at St. John's, in the said Island, this 22nd day of October, 1866, and in the Thirtieth Year of Her Majesty's Reign.

By His Excellency's Command,

JOHN BEMISTER,
Colonial Secretary.

PROCLAMATION.

A. MUSGRAVE,
Governor.
[L. S.]

*By His Excellency ANTHONY MUSGRAVE,
Esquire, Governor and Commander-
in-Chief in and over the Island of
Newfoundland and its Dependencies,
&c., &c.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS it is necessary that an Election of One Person to serve as Member in the House of Assembly of this Island, should be shortly holden for the Electoral District of Brigus, in consequence of the decease of the late JOHN LEAMON, Esquire ; and it is further necessary that the list of Persons entitled to vote at such Election, in the said District, should be taken and revised in the manner provided by Law :

KNOW YE that by and with the advice of Her Majesty's Council, I do, in compliance with the provisions of an Act passed in the 13th Year of Her Majesty's Reign, entitled " An Act to amend an Act passed in the Fourth Year of the Reign of His late Majesty, entitled, ' An Act for Registering the Names of Persons entitled to vote at Elections ' "—hereby direct that the list of Persons entitled to vote at such Election shall be taken and revised in mannner provided in and by the said Act passed in the Fourth Year of His late Majesty's Reign, and also in accordance with the provisions of a Proclamation dated the First day of July, 1865.

Given under my hand, and the Great Seal of the said Island of Newfoundland, at the Government House, at St. John's, in the said Island, this Fifth day of December, Anno Domini One Thousand Eight Hundred and Sixty-six.

By His Excellency's command,

JOHN BEMISTER,

Colonial Secretary.

PROCLAMATION.

*By His Excellency, ANTHONY MUSGRAVE,
Esquire, Governor and Commander-in-
Chief in and over the Island of New-
foundland and its Dependencies, &c., &c.*

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS the GENERAL ASSEMBLY of this Island stands prorogued until WEDNESDAY the TWELFTH day of DECEMBER instant: and whereas I think fit to PROROGUE the said GENERAL ASSEMBLY until THURSDAY the THIRTY-FIRST day of JANUARY next ensuing: I do, therefore, by this my Proclamation, further PROROGUE the said GENERAL ASSEMBLY until THURSDAY the THIRTY-FIRST day of JANUARY next, as aforesaid, *then to meet for the despatch of business*: of which all persons concerned are required and commanded to take due notice and govern themselves accordingly.

Given under my hand, and the Great Seal of the Island of Newfoundland, at the Government House, at St. John's, in the said Island, this Tenth day of December, 1866, and in the Thirtieth Year of Her Majesty's Reign.

By His Excellency's command,

JOHN BEMISTER,

Colonial Secretary.

JOURNAL AND PROCEEDINGS

OF THE

SECOND SESSION

OF THE

NINTH GENERAL ASSEMBLY

OF

NEWFOUNDLAND.

Thursday, 31st January, 1867.

THE GENERAL ASSEMBLY having, by several Proclamations of His Excellency the Governor, hereunto prefixed, been prorogued until this day, the Members thereof met in the Assembly Room.

By Virtue of a Commission under the Great Seal of this Island, to the Honorables LAURENCE O'BRIEN and JOHN BEMISTER, which is as follows :

*VICTORIA, by the Grace of God, of the
United Kingdom of Great Britain and
Ireland, Queen, Defender of the Faith.*

A. MUSGRAVE.

(L.S.)

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

KNOW YE, that we have constituted and appointed, and by these presents do constitute and appoint, the Honorable LAURENCE O'BRIEN, President of Our Legislative Council of Our Island of Newfoundland, and the Honorable JOHN BEMISTER, a member of the Executive Council of Our said Island, to be Commissioners, they or either of them, jointly or

severally, to administer the oath of allegiance to the undermentioned persons elected to serve in the General Assembly of our said Island, viz:—

| | |
|---------------------------------|---|
| To PETER BRENNAN, Esquire, | District of St. John's West, |
| ROBERT ALSOP, Esquire, | District of Trinity Bay, |
| and ROBERT J. PINSENT, Esquire, | } District of Brigus and Port-de-Grave, |

giving to them or either of them, Our said Commissioners, full power and authority to perform the matters hereinbefore mentioned, and confirming all and whatsoever they or either of them shall do and perform in this behalf. And thereof they or either of them are to make due return under their hands and seals unto Our Governor of our said Island, with these presents annexed.

Given under the Great Seal of Our aforesaid Island.

WITNESS, Our trusty and well beloved ANTHONY MUSGRAVE, Esquire, Our Governor and Commander-in-Chief, in and over Our said Island and its Dependencies, at St. John's, in Our said Island, the twenty-ninth day of January, 1867, and in the Thirtieth year of our Reign.

By His Excellency's Command.

JOHN BEMISTER,
Colonial Secretary.

The Honorable LAURENCE O'BRIEN,
The Honorable JOHN BEMISTER,

Dedimus Potestatem.

Examined,

F. B. T. CARTER,

H. M. Attorney General.

The said Commissioners came, between the hours of twelve and one o'clock in the forenoon of the said 31st day of January, into the Council Chamber, John Stuart, Esqr., the Clerk of Assembly, attending, when the following Members returned for the following Districts, by the Returning Officers, appeared and took and subscribed the Oath of Allegiance, in presence of the said Commissioners.

PETER BRENNAN, Esq., for District of St. John's West.

ROBERT ALSOP, Esq., for District of Trinity Bay.

ROBERT JOHN PINSENT, Esq., for District of Brigus and Port-de-Grave.

And the said Members took their seats for the said several Districts accordingly.

(A Message from His Excellency the Governor.)

At two o'clock, a Message from His Excellency the Governor was delivered by F. W. RENNIE, Esq., the Gentleman Usher of the Black Rod, commanding the immediate attendance of Mr. SPEAKER and the House in the Council Chamber.

Accordingly Mr. SPEAKER and the House attended His Excellency the Governor in the Council Chamber, and being returned,

Mr. SPEAKER informed the House, that when in attendance on His Excellency the Governor, His Excellency had been pleased to make a Speech to both Branches of the Legislature, of which, Mr. SPEAKER said, for the sake of accuracy, he had obtained a copy, and which he read to the House, as follows:—

Mr. President and Honorable Gentlemen of the Legislative Council :

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

For the third time since I have been charged with the administration of the Government, I now have the pleasure of again meeting you in Session assembled; and I recur with much satisfaction to your advice and co-operation.

Since we last met, the successful laying of the Atlantic Telegraph Cables between Europe and America has added another great work to the achievements of modern science and enterprise. The Colonies are thus drawn closer to the Mother Country, and their friendly intercourse with neighbouring States will be strengthened and extended by the increased facilities for communication, which always stimulate Commerce and diffuse knowledge and intelligence. Time has scarcely yet been afforded for this Colony to reap the full benefit which may be expected to accrue, but no doubt when more settled arrangements shall have enabled the Telegraph Company to reduce their charges, the immediate advantage to our Mercantile community of this new triumph of engineering skill will be more fully perceptible.

I regret that I am not able to congratulate you on the prosperity of the Colony during the past year. Unfortunately, from causes to some extent beyond the control and even the knowledge of man, the Fishery has been more unsuccessful than for many years past. And the failure of the Potato Crop, from the sudden ravages of the blight which has before visited this Colony, has been a calamity from which the labouring classes have suffered heavily. My Government have made such provision as is within their means to relieve the distress which is thus caused in many districts of the Colony; but from the nature of our peculiar circumstances, any employment on public works must be of very limited character, and even for undertaking these our means are small.

The frequent failure of the Potato Crop should inculcate upon the people the wisdom of not relying upon any one esculent as the staple product of their farms and gardens; and I am happy to believe that the laudable efforts of the Agricultural Society are doing much to diffuse greater intelligence in this matter. There are few edible roots belonging to a temperate climate which cannot be produced readily in this country, and it is most unwise to depend solely upon the supply of Potatoes, which experience has shown to be so frequently liable to almost entire destruction.

It is only too obvious, from the teachings of past years, that the true remedy for that periodical pauperism of so large a mass of our people, which has become so certain, can only be found in new enterprises, by which occupation can be given to our operative population, especially at that time of the year when the fisheries cannot be prosecuted. With this view, and for the purpose of encouraging the rearing of Sheep, the Act was passed to make provision against their destruction by dogs; and much good may be confidently anticipated from the application, by the Agricultural Society, of funds placed by you at their disposal, for introducing a good breed of Sheep in various Districts.

But while appreciating the benefit which may be so afforded to the community in the establishment of auxiliary occupations, efforts should be redoubled to utilize without waste the wealth for which this Colony has long been celebrated. The value of the Herring Fishery would be greater than it is if prosecuted with more attention; and if sufficient pains were taken to ensure such cure and packing of the fish as is necessary to sustain the character of the produce in foreign markets. I recommend you to consider whether some regulations established by Law for this latter purpose may not be attended with good effect.

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

You will be glad to hear that the Revenue for the past year was equal to the estimated amount. The accounts for 1866, and the estimates for the present year shall be promptly laid before you. You will, no doubt, give careful consideration to the requirements of the Public Service in the provision of necessary means for the maintenance of Public Credit, and the support of the departments of Government.

Mr. President and Honorable Gentlemen of the Council :

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

During the last summer I was enabled to visit many districts of the Southern and Western Coasts, of which I could not previously acquire any personal knowledge. In the course of my tour I obtained much

information, which will be valuable to me in the administration of Public Affairs ; and I used the opportunity for acquainting myself with the circumstances of the settlements, and the character of the country on a considerable part of the West Coast.

The Report of Mr. Murray, the Geological Surveyor, engaged in exploration of portions of the Interior, encourages enterprise in mining, and the success attending some undertakings already commenced affords ground for reasonable expectation that exports of ores will, before long, form a prominent feature in our trade. You are aware that there is reason to believe that considerable Mineral wealth exists in districts of the Island within the limits commonly known as the French Shore : and many applications have recently been made respecting Grants of Land in these localities, which, in obedience to instructions from Her Majesty's Government, I have hitherto been obliged to decline to issue. I shall lay before you a recent Despatch from the Secretary of State relating to this subject, in which he expresses his regret at the inconvenience which results from the unsettled state of the questions respecting British and French rights on the coast, but states that, pending their settlement, he has no alternative but to instruct me, for the present, not to make any grants of Land on that coast. At the same time, Lord Carnarvon expresses the readiness of Her Majesty's Government to re-open the negotiations with the French Government which were broken off in 1860, if only satisfied that there were a reasonable prospect of bringing them to a successful termination. The negotiations referred to were founded on the Report of the Commissioners appointed in 1859, and it was explained in a Despatch from the late Duke of Newcastle, which shall be furnished to you, that the Convention which was then proposed had not " for its object in any way to enlarge the Territorial or Maritime rights of France, or to abridge those of Newfoundland, but primarily, and almost exclusively, to provide a machinery capable of securing that the just rights of each party, under the existing Treaties, shall be respected by the other." His Grace further stated that the comparatively unimportant clauses of the proposed Convention which had not this object, contained provisions which would confer material advantages on some of the inhabitants of Newfoundland ; and that he did not anticipate that they would be considered by the community of Newfoundland, any more than by Her Majesty's Government, either as injurious to their interests, or as involving such modifications of their rights as was contemplated by Mr. Labouchere's Despatch, No. 10, of 26th March, 1857.

I recommend you, therefore, to request Her Majesty's Government to resume these negotiations, of which the settlement would probably remove all obstructions to the effective developement of the territorial resources of the Colony. It would be easy to specify such rights as the Colony is not prepared to relinquish, and, these being excluded from the negotiation, to leave Her Majesty's Government at liberty to complete the proposed agreement.

The importance can hardly be overrated, of the prospect thus opened to us, and of which practical experiment has already demonstrated the value, of developing the mineral wealth of the Colony. Means of employment would then be afforded to numbers of the people who now are without any alternative on failure of the fisheries. And we might hope, under such circumstances, that the revenue would be relieved from those constantly recurring drafts for Poor Relief which have almost entirely paralyzed all effort for legitimate public improvements.

I appointed Commissioners for the purpose of carrying out the object which you had in view in your grant, to enable the representation of the industry and products of this Colony at the International Exhibition of Arts and Industry, to be held at Paris during the next summer. The Commissioners have been active in the discharge of the trust confided to them, and a collection has been forwarded to Paris illustrative of our staple products and our mineral resources, which, as regards the latter especially, I hope may be the means of attracting aid in their effective utilization.

I shall lay before you Despatches from the Secretary of State, in which he recommends some amendments to be made in certain Acts passed during the last session, before they are submitted for confirmation by Her Majesty in Council; and I have no doubt that you will give that attention to his suggestions which their importance deserves.

Several measures of public interest will be submitted for your consideration. I confidently trust in your solicitude for the interests of the people, confided to your care; and assure you of my cordial desire to co-operate with you for the public good.

On motion of Mr. PINSENT, seconded by the CHAIRMAN OF THE BOARD OF WORKS,

Resolved,—That a Select Committee be appointed to prepare a Reply to the Gracious Speech with which His Excellency has been pleased to open the present Session of the Legislature.

Ordered,—That Mr. PINSENT, the CHAIRMAN OF THE BOARD OF WORKS, Mr. KAVANAGH, Mr. GLEN, and Mr. PROWSE, do form the Committee.

Ordered,—That the House, at its rising, do adjourn till Monday next.

Mr. PROWSE gave notice that, on to-morrow, he will move for the appointment of a Committee on Contingencies.

Also, that on to-morrow he will move for the appointment of a Select Committee on the Reporting, Printing and Publishing of this House.

Mr. TALBOT gave notice that he will ask the leader of the Government to cause to be laid on the Table of the House a report of the expenditure of the Road Grant for the District of St. John's West, for 1866, with a statement of the condition of the several roads on which such expenditure had been made, and the probable amount necessary for their future completion and repairs : and also, similar reports in reference to the Several Electoral Districts of this Island.

Mr. RENOUF gave notice that, on to-morrow, he will ask the Hon. the leader of the Government to lay on the Table of the House a detailed statement of all provisions sent to Outports during last Fall, and up to date, on account of able bodied Poor chargeable to next year's Road Grant, showing the quality, prices paid, from whom purchased, and to whom sent.

Also, for a detailed statement of expenditure for casual and permanent Pauper grant of last Session.

Then the House adjourned till Monday next, at 3 of the clock.

Monday, 4th February, 1867.

Mr. GLEN presented a Petition from Patrick Nowlan and others of Mobile, and from George Colbert and others of Bawleen, which were severally received and read, praying for grants to open and repair roads in those localities.

Ordered,—That the said Petitions do lie upon the table.

Mr. GLEN gave notice that, on to-morrow, he would ask the Hon. Receiver General for a return of the Debentures issued and the amount, under the act 29 Vic. Cap. 20.

Also, that he will ask the Hon. Attorney General if any action has been taken on the address of last Session respecting certain publications of the late Professor Stewitz.

Also, that on to-morrow he will ask the Hon. Colonial Secretary for a return from each public establishment, of all Newspapers furnished them at the expense of the Government, the names of Newspapers so furnished, with the number of copies for each department, and the annual amount paid on account of each establishment.

Also, that, on to-morrow, he will ask leave to introduce a Bill to amend the Postal Act.

Also, that, on to-morrow, he will move the House into Committee of the Whole on the following resolutions :

Whereas, a Bill, entitled " An Act for the regulation of the Currency," passed the 25th March, 1863, directing all public accounts to be kept in Dollars and Cents, and the Mercantile Community not having adopted the aforesaid system of Decimal Currency,

Resolved,—That until the Decimal system of Dollars and Cents is made compulsory, or generally adopted in Newfoundland, all public accounts shall be kept, all public monies paid and received, all verdicts received and judgments entered, and other legal proceedings taken, in the currency of Pounds, Shillings and Pence, so as to assimilate them with the accounts kept and monies paid and received by the Mercantile Community.

Resolved,—That a Bill be introduced embodying the foregoing resolutions.

On motion of Mr. PROWSE, seconded by the Hon. SOLICITOR GENERAL,

Resolved,—That a Select Committee be appointed on the Contingencies of the present Session of the Legislature.

Ordered,—That Mr PROWSE, Hon. SOLICITOR GENERAL, Hon. Mr. SHEA, Mr. GLEN, and Mr. RENOUF, do form the Committee.

On motion of Mr. PROWSE, seconded by Mr. BENNETT,

Resolved,—That a Select Committee be appointed on Reporting, Printing, and Publishing the proceedings of this Session of the Assembly.

Ordered,—That Mr. PROWSE, Mr. BENNETT, Mr. TALBOT, Mr. BURTON, and Mr. KAVANAGH, do form the Committee.

Mr. PINSENT, from the Select Committee appointed to prepare an Address of Thanks in reply to the Gracious Speech with which His Excellency the Governor has been pleased to open the present Session of the Legislature, presented the report, which he handed in at the Clerk's table, when it was read a first time.

Ordered,—That the Address be read a second time to-morrow.

Then the House adjourned till to-morrow at 3 of the clock.

Tuesday, 5th February, 1867.

Mr. FUREY presented a Petition from Richard Traviss and others, of Horse Cove, which was received and read, praying for a grant to complete the road from thence to the beach.

Ordered,—That the said Petition do lie upon the table.

Mr. PINSENT gave notice that, on so-morrow, he will ask the Hon. Colonial Secretary to lay upon the table of the House all correspondence had between the Imperial and Local Authorities relative to the granting of Lands on or near those parts of the Coasts of this Island commonly called the French Shore.

Pursuant to Order of the Day, the Address of Thanks in reply to the Speech of His Excellency the Governor, at the opening of the Session, was read a second time.

Ordered,—That the House do resolve itself into Committee of the whole upon the said address to-morrow.

Mr. PINSENT gave notice that, on to-morrow, he will move the suspension of the Rules of the House, relative to the Address of Thanks in reply to His Excellency the Governor's Speech at the opening of the Session.

Mr. GLEN, pursuant to notice, and on leave granted, presented a Bill to amend the Act for the regulation of the Inland Posts, which was read a first time.

Ordered,—That the said Bill be read a second time to-morrow.

The Hon. RECEIVER GENERAL presented a Petition from Robert Mundy, of Pouch Cove, which was received and read, praying for compensation for his services in superintending the erection of the Main Bridge there, last year.

Ordered,—That the said Petition do lie upon the table.

He also presented a Petition from Patrick Gladney and others, of Picco's Pond, Portugal Cove Road, which was received and read, praying for a grant to complete the Protestant Town Road.

Ordered,—That the said Petition do lie upon the table.

At 10 minutes past four o'clock, the names of members present being taken down as follows:—The hon. Attorney General, and hon. Colonial Secretary, the hon. Receiver General, the Chairman of the Board of Works, Mr. Glen, Mr. Renouf and Mr. Furey, Mr. Speaker adjourned the House for want of a quorum.

Wednesday, 6th February, 1867.

The HON. RECEIVER GENERAL, by command of His Excellency the Governor, presented to the House a Return of Debentures issued under Act 29 Vic. Cap. 20.

(For which see Appendix.)

Ordered,—That the said Return do lie upon the table.

Mr. KAVANAGH presented a Petition from John Harvey and others, of Portugal Cove, which was received and read, praying for a grant to repair the road from the main road to the Eastern point of Wm. White's farm.

Ordered,—That the said Petition do lie upon the table.

Pursuant to Order of the Day, the House resolved itself into Committee of the whole, upon the Address of Thanks in reply to the Speech of His Excellency the Governor at the opening of the present Session of the Legislature.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the Address to them referred, and had instructed him to ask leave to sit again on the further consideration thereof.

Ordered,—That the Committee stand first on the Order of the Day for to-morrow.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 7th February, 1867.

The HON. SOLICITOR GENERAL presented Petitions from Joseph Barret and others, of Spaniard's Bay, Green Head, and from Timothy Ryan and others, of Shoal Point, South Side, Harbor Grace, which were severally received and read, praying for grants to improve and make roads in those localities.

Ordered,—That the said Petitions do lie upon table.

Mr. BENNETT presented Petitions from Henry Sheppard and others, of Pass Island, Thomas Stickland and others of Grole, Hermitage Bay, Wm. Thornhill and others, of Brunette Island, and from Joseph Gorman and others, of Miller's Passage, which were severally received and read, praying for grants to open and repair roads in those settlements.

Ordered,—That the said Petitions do lie upon the table.

Mr. PARSONS presented a Petition from John Wall and others, of Shoe Cove, which was received and read, praying for a grant to complete the road from the Pouch Cove Main Line to the Beach there.

Ordered,—That the said Petition do lie upon the table.

The Hon. A. SHEA presented a Petition from Wm. Ryan and others, of Paradise, which was received and read, praying for the erection of a Bridge to connect the Island with the Main Land.

Ordered,—That the said Petition do lie upon the table.

Mr. GLEN presented a Petition from James Gordon and others, of Witless Bay, North Side, which was received and read, praying for a grant to open a road to connect that locality with the Main Line.

Ordered,—That the said Petition do lie upon the table.

Mr. BENNETT presented a Petition from James May and others, of Point Rosey, Fortune Bay, which was received and read, praying for a grant to build a breakwater there.

Ordered,—That the said Petition do lie upon the table.

Mr. BENNETT gave notice that, on to-morrow, he will ask the Hon. Colonial Secretary, for a Return of the money expended from the grant for the purpose of purchasing books for the use of the Protestant Board Schools, of the amount remaining unexpended, and in whose hands, and the number and value of Books on hand, and with whom deposited.

Also that, on to-morrow, he will ask the hon. Attorney General to lay on the table of the House any correspondence between this Government and the Imperial Government, with reference to the appointment of a Consul at St. Peter's.

Mr. RENOUF presented a Petition from Benjamin Squires and others, of Goat Cove and Broad Cove, which was received and read, praying for a grant to complete the Road between those settlements.

Ordered,—That the said Petition do lie upon the table.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of the Address of Thanks.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had passed the Address to them referred, with an amendment, which they had directed him to report to the House, and he handed the Address as amended in at the Clerk's table.

On motion that the report be adopted, Mr. TALBOT moved, in amendment, seconded by Mr. RENOUF,

That the following be inserted after "world", in the second section, "but cannot forbear expressing our regret that the Government had not manifested the public appreciation of an event so replete with prospective benefits to the civilization of the world, by some demonstration suitable to the occasion"; and also by inserting the following clause after the word "year", at the end of the third section, "and the wide-spread destitution which now unhappily prevails, and while thus deploring the existing state of things, we are sorry to find that the Government has not adopted a more considerate course in alleviating the sufferings of the destitute than that which is now pursued, for we regard the system of employing the poor on public roads, and allowing them in return for their labour a scanty allowance of Indian Meal and Molasses, as not the best calculated to relieve their miseries. We would, therefore, express the hope that the Government will see the desirableness of discontinuing the present mode of payment for such labor, and substituting therefor payment in cash in St. John's, and in cash or bread and flour in the outports."

And the question being put on the original motion, the House divided, when there appeared.

For the Motion.—14.

Hon. Attorney General,
 “ Receiver General,
 “ A. Shea,
 The Surveyor General,
 Mr. Prowse,
 “ Pinsent,
 “ Wyatt,
 “ Rorke,
 “ Bennett,
 “ Rendell,
 “ Evans,
 “ Oakley,
 “ Burton,
 “ Knight.

Against the Motion.—3.

Mr. Renouf,
 “ Talbot,
 “ Furey.

So it passed in the affirmative, and ordered accordingly.

Ordered.—That the Rules of the House be suspended in reference to said Address.

Ordered.—That the Address be now read a third time.

And the Address was read a third time accordingly, as follows :—

*To His Excellency ANTHONY MUSGRAVE, Esquire,
 Governor and Commander-in-Chief, in and over
 the Island of Newfoundland, and its Depen-
 dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

We, the Commons House of Assembly of Newfoundland, respectfully reciprocate the cordial greeting with which it has pleased Your Excellency to meet the Legislature at the opening of the present Session.

We concur in Your Excellency's sentiments upon the triumphant issue of that marvellous enterprise which has resulted in the successful laying, and in the perfect working, of two Transatlantic Telegraph Cables, connecting this country with the old World. We trust that Newfoundland may not only participate to the fullest extent in the international advantages thus afforded, but also from her position derive some peculiar benefits.

We deplore with Your Excellency the failure of the Fisheries, combined with the unfavorable issue of Agricultural pursuits, during the past year.

With regard to the former, so much depends upon well-directed enterprise on the part of the Merchant and Planter, and skilfully applied and adventurous industry on the part of the operative Fisherman, that we feel our inability to lend, by legislative action, any very important aid in their successful prosecution and management. With reference, however, to that valuable and ill-conducted branch of our staple industries, the Herring Fishery, we hope that some well-considered legislative enactment may tend to confer a higher character upon the quality of our cured Herring in Foreign markets.

The Legislature has in its power to promote and foster Agricultural and Pastoral pursuits. Those efforts in that direction, to which Your Excellency has referred have, through the valuable agency of the Agricultural Society, been attended with a measure of success which we consider justifies further action; and it is to be expected that the increased and increasing efforts of the Legislature will be met with a corresponding return in the more extended operations of the people, in the culture of the ground, and the raising of sheep.

We are pleased to hear that the Revenue has been equal to the Estimates, and we thank Your Excellency for the promise that the accounts of 1866, and the Estimates for the present year, shall be promptly laid before us.

We are gratified to learn that, by personal visit and inspection, Your Excellency has obtained valuable information as to the physical condition and character of a considerable portion of the Southern and Western Coasts.

We are convinced of the existence of immense undeveloped mineral wealth in this Island; and we regret to learn that any difficulty should have arisen to prevent the issue of Grants of any portion of our Inland Territory to enterprising capitalists, by reason of the French Treaty rights upon certain portions of our Coast. We shall, without delay, after receipt of the promised despatches, give this important subject the grave consideration which it deserves.

We thank Your Excellency for your information relative to the Commission appointed in connection with the Paris International Exhibition, and we hope, with You, that the happy result of its labors will be to attract increased attention to our mineral and other resources.

To the suggestions contained in the despatch to which Your Excel-

lency refers, and to those measures of public interest to be submitted for our consideration, we shall give our earnest attention.

In our Legislative action in general, we shall ever be solicitous for the best interests of the people whose Representatives we are, and we feel confident that we may at all times rely upon your Excellency's cor- cial co-operation and valuable aid.

Ordered,—That the Address do pass.

Ordered,—That the Address be engrossed and presented to His Ex- cellency the Governor by Mr. Speaker and the whole House.

Mr. PROWSE, from the Select Committee to consider the Reporting, Printing and Publishing of this House, presented the Report, which he handed in at the Clerk's Table, where it was read as follows:—

The Select Committee appointed by your Honorable House to consi- der the Reporting, Printing and Publishing of this House, having given the question of the Reporting much consideration, beg to make their preliminary Report. In the first place they recommend that the plan adopted by the House last Session should be discontinued, and in the place of five Reporters, the staff should be reduced to three, at £50 stg., each, for the Session. And in place of having the Reports published daily in one paper, and copied into two others, they should come out daily, in two newspapers published tri-weekly, alternately. In order to carry out this arrangement efficiently, it will be impossible to report each Member's Speech in full, but at the same time the name of each Member taking part in a debate should be given, and each day's proceedings should be so condensed as to bring the day's debate into four columns, and at the same time give a fair statement of the views of each person taking part in the Debate. Under no circumstances whatever, are the Reports to be published later than the day or morning subsequent to delivery of the speeches, except when there is no sitting on Saturday, when the Fri- day's debate may be published either wholly on Saturday or Monday, or partly on either day.

The Committee are of opinion that all Petitions, such as for Roads or of an ordinary character, should be noticed very shortly, giving the name of the Member presenting the Petition, the locality where the road is prayed for, and an abstract of the observations of members thereon,— when the Petition is of an unusual character, Reporters to take fuller notice of it, though still in a condensed form.

Four columns of Royal size paper in Bourgeois type are expected to be published after each day's work, when the debate requires that quan- tity. We recommend that the two papers publishing the debates should receive One Hundred Pounds Sterling each, for the Session, and by this

arrangement your Committee are of opinion the Reporting will be done more efficiently and satisfactorily, and there will be a saving in the expense of \$1400 over the expenditure of last Session, for the same purpose.

D. W. PROWSE, *Chairman.*
 THOMAS R. BENNETT.
 JOHN T. BURTON.

COMMITTEE ROOM, HOUSE OF ASSEMBLY, }
 St, John's, February 5th, 1867. }

Ordered,—That the Report be received.

Mr. PROWSE gave notice that, on to-morrow, he will move the adoption of the foregoing Report.

Mr. WYATT gave notice that, on to-morrow, he will ask the Hon. Attorney General, if the Government intend to make provision for Steam Communication between this Colony, Great Britain and the neighbouring Provinces, on the discontinuance of the Imperial Subsidy to Cunard's Line.

Ordered,—That the House at its rising do adjourn till Monday next, at 11 o'clock.

Then the House adjourned.

Monday, 11th February, 1867.

It being the hour appointed by His Excellency the Governor, to receive Mr. Speaker and the House with the Address of Thanks in reply to His Excellency the Governor's Speech at the opening of the Session,

Mr. SPEAKER and the House went up to Government House, and being returned,

Mr. SPEAKER informed the House that when in attendance on his Excellency the Governor, he had presented the Address of Thanks, to which His Excellency had been pleased to reply as follows :

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

I thank you for your address, and I receive with gratification the assurance it contains that the important subjects which my Government will submit for your deliberation will obtain your careful attention.

When you shall have considered the Despatches which I have furnished to you respecting the question connected with what is known as the "French Shore," I have no doubt that you will agree with me in thinking that the object we have in view, of developing the mineral and other resources contained within those territorial limits, may easily be accomplished through a friendly negotiation between Her Majesty's Government and that of France, for the removal of obstacles which are obstructive to one party, without affording any advantage to the other.

Ordered,—That the said reply do lie upon the table.

Ordered,—That the House do adjourn till 3 o'clock.

And the House adjourned till 3 of the clock accordingly.

The House met at 3 o'clock this day.

Mr. GLEN presented a Petition from Patrick Fortune and others, of Toad's Cove, which was received and read, praying for a grant to rebuild the Breakwater there.

Ordered,—That the said Petition do lie upon the table.

Mr. KAVANAGH presented a Petition from John Grace and others, of Pouch Cove, which was received and read, praying for a grant to open roads in that locality.

Ordered,—That the said Petition do lie upon the table.

Mr. PINSENT presented a Petition from Robert Holland Taylor and others, of Brigus North, which was received and read, praying for a grant to erect a Public Wharf there.

Ordered,—That the said Petition do lie upon the table.

He also presented Petitions from J. N. Leamon and others, of Brigus, and from Richard Walsh and others, of the same place, which were severally received and read, praying for a grant to enable them to procure a supply of pure water.

Ordered,—That the said Petitions do lie upon table.

He also presented Petitions from Nathan Norman and others, of Clark's Beach, and from Theophilus Wills and others, of Salmon Cove, South Side, which were severally received and read, praying for grants to complete roads in those localities.

Ordered,—That the said Petitions do lie upon the table.

Mr. BENNETT gave notice that, on to-morrow, he will ask leave to bring in a Bill, to amend the law regulating Weights and Measures.

Also that, on to-morrow, he will move for an Address to His Excellency, asking that he will be pleased to lay before the House his Despatch to the Imperial Government, on the subject of his tour to the Westward, if not incompatible to the public service.

Mr. RORKE gave notice that, on to-morrow, he will ask the Hon. Leader of the Government, what action and the nature of the arrangements (if any) have been taken in the matter of the Petition from the inhabitants of Carbonear, last session, for the extension and improvement of the Public Wharf at that place.

The Hon. COLONIAL SECRETARY, by command of His Excellency the Governor, presented to the House the following documents.

Despatch from Secretary of State, with enclosure from the Board of Trade, disallowing Act for preventing collisions at sea on the Coasts within the limits of this Colony.

Despatch from Secretary of State, suggesting an amendment in the Act to empower the Superior Courts of this Colony to direct certain offenders to remove therefrom, and for other purposes.

Despatch from Secretary of State, in reply to communication from His Excellency the Governor, reporting his return from a visit to the South and West Coasts of the Island; also having reference to granting Mining Licenses on French Shore, and enclosing copy of Despatch sent to Governor Sir A. Bannerman, 4th March, 1861.

(For which see Appendix.)

Then the House adjourned till to-morrow, at 3 of the clock.

Tuesday, 12th February, 1867.

Mr. PINSENT gave notice that, on to-morrow, he will ask leave to bring in a Bill to provide for the appointment of a Recorder and Police Magistrate for the Central District, and for other purposes.

Mr. RORKE presented a Petition from Mark Hiscock and others, of Carbonear, which was received and read, praying for a grant to complete the road to Crocker's Cove.

Ordered,—That the said Petition do lie upon the table.

Mr. KNIGHT presented a Petition from James Blackler, Constable of Twillingate, which was received and read, praying for an increase of Salary.

Ordered,—That the said Petition do lie upon the table.

The hon. RECEIVER GENERAL, by command of His Excellency the Governor, presented to the House, the following Documents :

Receiver General's Account in Treasury Department, for the year ended 31st December, 1866.

Statement of Assets and Liabilities of the Colony of Newfoundland on 31st December, 1866.

Statement of the Public Debt of the Colony on 31st December, 1866.

Financial Statement of the Affairs of the Colony of Newfoundland, for the year 1867.

Detailed Statement of Salaries to Stipendiary Magistrates, Clerks of the Peace, Constables and Outport Gaolers, for the year 1867.

Estimate for defraying part of the Public Expenditure of the Colony of Newfoundland, for the year 1867.

Customs' Consolidated account current of Receipts and Payments for year ending 31st Dec., 1866.

Return of Number, Tonnage and Crews of Vessels entered and cleared at each Port in Newfoundland in the year 1866, distinguishing vessels with cargo from those in ballast, and British from Foreign Ships; also giving particulars of Shipping registered at the Port of St. John's, on 31st Dec., 1866.

Comparative Statement of Duties and Light Dues collected, and the

expense of collecting the same, at each Port in Newfoundland and Labrador, in the years 1865 and 1866; also showing the Increase and Decrease in 1866, as compared with 1865.

Comparative Statement, shewing the Net amount of Duty collected at each Port, after deducting Drawbacks, Return Duties, &c. in the years 1865 and 1866; also showing the Increase and Decrease in 1866, as compared with 1865.

Comparative Statement of Light Dues collected, showing the Increase and Decrease in the years 1865 and 1866.

Return showing the excess of Revenue over the expense of collecting the same, and *vice versa*, at each Port in the years 1865 and 1866.

Comparative Statement, showing the amount collected for Light Dues, Water Rates, Duties on Coal and Local Distillation, in the years 1865 and 1866; also showing the Increase and Decrease in 1866, as compared with 1865.

Comparative Statement, showing the Total Quantity and Value of Dutiable Goods imported into the Island of Newfoundland and Labrador, in the years 1865 and 1866, together with the amount of Duty collected thereon; also shewing the Increase and Decrease in 1866, as compared with 1865.

Reports of the Collector and Sub-Collector at Labrador.

Report of the Officer in charge of the Revenue Cruiser on the Western Shore.

(For which see Appendix.)

Ordered,—That the said Documents do lie upon the table.

Pursuant to Order of the day, the Bill to amend the Act for the establishment of Inland Posts in this Colony, was read a second time.

Ordered,—That the House do, on to-morrow, resolve itself into Committee of the whole upon the said Bill.

Mr. PROWSE moved, seconded by Mr. BURTON,

That the preliminary report of the Committee on Printing, Reporting and Publishing the proceedings of this Session of the Assembly be adopted.

Whereupon,

Mr. TALBOT moved in amendment, seconded by Mr. RENOUF,

That the Report be amended by inserting the following words,

That Mr. John Rochfort be continued as one of the Reporters of the

Debates of this House, in accordance with the vote of this House in its first Session, fixing his term of service for four years.

And the question being put thereon, the House divided, when there appeared,

For the Amendment—6.

Mr. Renouf,
 “ Talbot,
 “ Kavanagh,
 “ Furey,
 “ Brennan,
 “ Kearney.

Against the Amendment.—14,

Hon. Attorney General,
 “ Colonial Secretary,
 “ Receiver General,
 The Surveyor General,
 Chairman Board of Works,
 Mr. Pinsent,
 “ Knight,
 “ Prowse,
 “ Rorke,
 “ Barron,
 “ Green,
 “ Oakley,
 “ Burton,
 “ Bennett.

So it passed in the negative.

And the question on the original motion being then put, it passed in the affirmative, and

Ordered,—Accordingly.

Mr. BENNETT, pursuant to notice, and on leave granted, presented a Bill to amend the “ Act, for Establishing the Standard Weight of Grain and Pulse, and to regulate the sale of Bread, Coals and other articles,” which was read a first time.

Ordered,—That the Bill be read a second time to-morrow.

On motion of Mr. BENNETT, seconded by Mr. PROWSE,

Resolved,—That the following Address be presented to His Excellency the Governor.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
 Governor and Commander-in-Chief, in and over
 the Island of Newfoundland, and its Depen-
 dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly respectfully request that Your Excellency will be pleased to direct that a Copy of the Despatch to the Imperial Government, relating to Your Excellency's visit to the Western Coast of this Island, be laid upon the table of this House.

HOUSE OF ASSEMBLY, }
 12th February, 1867. }

Ordered,—That the Address be engrossed and presented to His Excellency the Governor, by such members of this House as are of the Honorable Executive Council.

Mr. PINSENT gave notice that, on to-morrow, he will ask leave to bring in a Bill to amend the Wills Act.

Mr. PROWSE gave notice that, on to-morrow, he will move that the Debates of the House be published in the *Express* and *Newfoundlander* newspapers.

Mr. BENNETT gave notice that, on to-morrow, he will ask the Hon. Colonial Secretary, for a detailed statement of the expenditure of \$1800, appropriated last session, for Education, and placed at the disposal of the Clergy of various denominations.

Also that, on to-morrow, he will ask the Honorable Colonial Secretary, for a detailed statement of the expenditure of \$2000, appropriated last session for the purpose of introducing an improved breed of Sheep, and of the proportions given to each District.

The Hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will ask leave to bring in the following Bills :

A Bill, to Improve the relation, between Landlord and Tenant.

A Bill, to continue the Volunteer Organization Act.

A Bill to amend the Banishment Act.

Mr. FUREY, gave notice that, on to-morrow, he will ask the Chairman of the Board of Works for a detailed statement of the expenditure in 1866, on the main line of road between Harbor Main and Brigus, the names of the contractors, the amounts paid to each, and on whom the orders were drawn, by whom the work was inspected, and amount paid for the same.

Mr. RENOUF gave notice that, on to-morrow, he will move the following resolution, in regard to the Reporting and Printing the Debates of this House,

Resolved,—That it being the manifest intention of the Governmental arrangement for the Reporting and Publishing of the Debates of this House, judging from the Reports already published, to prevent the expression of the views of Her Majesty's Opposition to be placed before the public in a fair and impartial manner, and as such an arrangement is at once insulting to the dignity of this House, and calculated to mislead the public as to the views and conduct of their Representatives, the system of Reporting and Publishing the Debates be altogether discontinued, and the expense thereof saved.

Then the House adjourned till to-morrow, at 3 of the clock.

Wednesday, 13th February, 1867.

The Hon. COLONIAL SECRETARY, by command of His Excellency the Governor, presented to the House the following documents :

Financial Secretary's Consolidated Statement of expenditure, for each Particular Service, for the year 1866.

Financial Secretary's detailed Statement of expenditure for Customs Services, for the year 1866.

Consolidated Statement of expenditure by the Stipendiary Poor Commissioner, for the year 1866.

Report of Inspectors of Protestant and Roman Catholic Schools, for year 1866.

Report of General Superintendent of Fisheries at Labrador, for 1866.

Report of Officer protecting Fisheries at Belle Isle, for 1866.

Report of Officer protecting the Fisheries at Cape John, for 1866.

Report in reference to the voyage of Schooner *Pioneer* on a Banking Voyage, for 1866.

Copy of Contract with George Mackinson, for Conception Bay Steamer.

Report of Post Master General, and Returns, for 1866.

Statement of Cost and distribution of Sheep imported by the Agricultural Society, in 1866.

(For which see Appendix.)

Ordered,—That the said Documents do lie upon the table.

Mr. WYATT presented Petitions from Benjamin Sweetland and others, of Trinity, Wm. Cross, and others, of Kirby's Harbour, Richard Nurse and others of English Harbour and Salmon Cove, and from A. W. Bremner and others, of Trinity, which were severally received and read, praying for grants to complete Main and Local Roads in that District.

Ordered,—That the said Petitions do lie upon the table.

Mr. RENOUF presented a Petition from Edward Grant and others, of Great Placentia, which was received and read, setting forth,

That under Her Majesty's Gracious favor, this Colony has for many years enjoyed the blessings and privilege of Self Government and Local Legislation, the imposition and appropriation of duties and taxes, and the general management of its local affairs.

The people regard, therefore, with grave apprehension and alarm, any project which has for its object the Union of the Island of Newfoundland with the other British North American Dependencies of the Crown. Some reasons which might influence them to receive it with favour, are just those which make it undesirable for Newfoundland. The motives which in their case have actuated the Policy of Great Britain for the promotion of the scheme of Confederation, are entirely wanting in ours. We are no cause of offence, we are not in the path of possible aggression, or in the way of attack, unless and until the national cause of Great Britain involves us in a common fate. We are a comparatively small burthen on the Home Government; and in the present condition of affairs obtain those supplies from Britain, which we should under the proposed Union have in a great measure to abandon for the inferior manufactures of Colonies with which we have little trade.

And yet, may it please Your Honorable House, it is proposed to include this Colony in a Confederation, on the basis of the Quebec Convention of 1864, and by this measure to deprive her of those civil, constitutional and territorial rights which she has so long held and so dearly prized; and for a loss so great, there is no offer of a substantial return.

Our taxation, already burdensome, will be assimilated to the much higher Canadian Tariff.

Our Revenues will go the Central Exchequer, and in return we shall receive a sum far below our present income, without any corresponding advantages, no matter how a rapidly growing population, the development of our resources, or our future necessities may call for augmented supplies, not to speak of the constantly increasing demands for public improvements; no matter how large, at any time, our contribution to the Federal finances may be, our receipts from it are proposed to be permanently limited to £112,000 per annum.

The proposed Central Government will also possess the dangerous power to levy duties upon the Exports of a Colony, whose only wealth and industry lie in them, and which, from its peculiar circumstances will be utterly without the means of local taxation wherewith to promote public improvement or relief from a pauperism which to some extent is necessarily chronic and frequently widespread and disastrous.

The chief Exports of Nova Scotia and New Brunswick are expressly exempt from the power of Federal taxation.

The people of Newfoundland have no interest and can derive no benefit whatever from the great public works of Canada, existing or projected. There is no provision even made in the Quebec Convention for a connection by lines of steamers between this Colony and the other Provinces, on the one hand, and Great Britain on the other, while for the North Western Territory, guarantees for complete territorial connection are contained.

These are amongst the objections which apply to the Quebec Convention,—even if the project of Union could on any basis be made applicable or beneficial to this Colony, its trade and people.

Your Petitioners, therefore, humbly pray Your Honorable House, that no negotiations may be had or projects entertained, contemplating the present comprehension of this Colony in any scheme of Union with the other Provinces, until this question, involving as it does the vital interests and future fate of this dependency of the Crown, shall have been definitely submitted to the people at a General Election of Representatives to their House of Assembly.

And, as in duty bound, will ever pray.

EDWARD GRANT,
And others.

I do hereby certify that the within Petition was signed in presence of me, and that the said Petition was read to the public before being signed.

WILLIAM MILLER,
Of Great Placentia.

GREAT PLACENTIA, December, 1866.

Ordered,—That the said Petition do lie upon the table.

Mr. PINSENT, pursuant to notice and on leave granted, presented the following Bills, which were severally read a first time.

A Bill to provide for the appointment of a Recorder and Police Magistrate, in the Central District, and for other purposes.

A Bill to amend an Act passed in the 27th year of Reign of Her present Majesty, entitled an Act for the amendment of the Law with respect to Wills, in this Island.

Ordered,—That the said Bills be severally read a second time on Monday next.

Mr. PROWSE moved, seconded by Mr. WYATT,

That the Debates of this House be published in the *Express* and *Newfoundlander* newspapers.

Whereupon,

Mr. RENOUF moved, in amendment, seconded by Mr. TALBOT.

Resolved,—That it being the manifest intention of the Governmental arrangement for the Reporting and Publishing of the Debates of this House, judging from the Reports already published, to prevent the expression of the views of Her Majesty's Opposition to be placed before the public in a fair and impartial manner; and as such an arrangement is at once insulting to the dignity of this House, and calculated to mislead the public as to the views and conduct of their Representatives, the system of Reporting and Publishing the Debates be altogether discontinued and the expense thereof saved.

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—3.

Mr. Renouf,
 " Talbot,
 " Kavanagh.

Against the Amendment,—15.

Hon. Attorney General,
 " Colonial Secretary,
 " Receiver General,
 " A. Shea,
 " Solicitor General,
 The Surveyor General,
 Chairman Board of Works,
 Mr. Knight,
 " Prowse,
 " Rorke,
 " Green,
 " Oakley,
 " Burton,

Then the House adjourned until to-morrow, at 3 of the clock.

Friday, 22nd February, 1867.

Pursuant to Order of the Day, the Bill to amend the Act to empower the Superior Courts of this Colony to direct certain offenders to remove therefrom, and for other purposes, as engrossed was read a third time.

Ordered,—That the Bill do pass, and be entitled “An Act to amend an Act passed in the 29th year of the Reign of Her present Majesty, entitled ‘An Act to empower the Superior Courts of this Colony to direct certain offenders to remove therefrom, and for other purposes.’”

Ordered,—That the hon. ATTORNEY GENERAL and the hon. SOLICITOR GENERAL do take the Bill to the Legislative Council, and desire their concurrence.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole upon the Despatches from the Secretary of State relative to the French Shore.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The Chairman reported from the Committee, that they had considered the business to them referred, and had come to certain Resolutions thereon, which they had directed him to report to the House, and he handed the Resolutions in at the Clerk’s Table, where they were read, as follows :

Whereas, this House has considered the Despatches laid on the table by command of His Excellency the Governor, from Her Majesty’s Principal Secretary of State for the Colonies, dated March 4, 1861 and December 7, 1866, with reference to the French Shore, and particularly the latter, instructing his Excellency, pending the settlement of questions respecting French and British rights on the coast, not to appoint a British Magistrate or to issue grants of land there ; and whereas the interests of Her Majesty’s subjects in this Colony are directly affected by the aforesaid Instructions, in regard to the maintenance of law and order on parts of the said coast, and in restraining parties, from want of title, from working valuable minerals therein, and engaging in other industrial pursuits besides those of fishery, which would afford remunerative employment to many of our people now in great need.

Resolved,—That this House, while asserting the undoubted right of the Colony to the territory, subject to certain privileges of the French on the Coast ; yet in view of the magnitude of the interests involved, and conflicting opinions on the construction of the Treaties between the two nations ; and with the earnest desire to arrive at a settlement satisfactory to both, are willing, as recommended by His Excellency, in his opening Speech, to consider the terms that may be proposed, with safety to the

Colony, for adjustment of differences arising from existing Treaties, and of securing the just rights of each party thereunder.

Resolved,—That the better to afford due consideration to this important subject, a Select Committee of this House be appointed, to co-operate with a Select Committee of the Legislative Council, and report to this House.

Resolved,—That a Message be sent to the Legislative Council, requesting their concurrence in the foregoing Resolutions.

On motion, that the report be adopted,

Mr. GLEN moved in amendment, seconded by Mr. RENOUF,

That it is not expedient to proceed further in the discussion of the present Despatch, until the documents and despatches which formed the basis of the negotiations which were broken off in 1861 be laid on the table of the House.

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—7.

Mr. Glen,
 “ Renouf,
 “ Furey,
 “ Brennan,
 “ Kearney,
 “ Plowse,
 “ Burton.

Against the Amendment,—16.

Hon. Attorney General,
 “ Solicitor General,
 “ Colonial Secretary,
 “ Receiver General,
 “ A. Shea,
 The Surveyor General,
 Chairman Board of Works,
 Mr. Pinsent,
 “ Knight,
 “ Evans,
 “ Rorke,
 “ Green,
 “ Oakley,
 “ Bennett,
 “ Hogsett,
 “ Parsons.

So it passed in the negative.

And the question on the original motion being then put, it passed in the affirmative, on a similar division, and

Ordered,—Accordingly.

Ordered,—That the hon. Attorney General, hon. Receiver General, Mr. Hogsett, Mr. Renouf, Mr. Pinsent, Mr. Bennett, and Mr. Parsons, do form the Committee.

Ordered,—That the hon. Attorney General and Mr. Hogsett, do take the Message and Resolutions to the Legislative Council.

Mr. HOGSETT gave notice that, on to-morrow, he will ask the hon. Attorney General, if any arrangement has been made by the Government with the New York, Newfoundland, and London Telegraph Company, for the transmission of News by Cable, to the Newfoundland public.

Mr. BURTON gave notice that, on to-morrow, he will ask the hon. the Premier, for a return of the cost of the Printing Establishment belonging to the General Post Office, the name of the printer employed, the amount paid him, and out of what fund, and if he holds any office under Government, (if so) in what department, and the amount of his salary, also the estimated saving to the Colony by the transaction.

Then the House adjourned until Monday next, at 3 of the clock.

Monday, 25th February, 1867.

Mr. RORKE presented a Petition from Nicholas Howel, of Carbonear, which was received and read, praying for compensation for land taken for the public service there.

Ordered,—That the said Petition do lie upon table.

Mr. PINSENT presented a Petition from James Burke and others, of Brigus, which was received and read, praying for a grant to repair the road leading from River Head to the main line.

Ordered,—That the said petition do lie upon the table.

Mr. FUREY presented a Petition from James Walsh and others, of Harbor Main, which was received and read, praying for a grant to complete the road to the Ridge there.

Ordered,—That the said Petition do lie upon the table.

Ordered,—That the notice of motion, for Committee of the Whole on the State of the Colony, take precedence of the Order of the Day for to-morrow.

The Orders of the Day, for the second reading of the Bill to Improve the Practice and simplify the proceedings of the Northern and Southern Circuit Courts, and the Bill to amend the Constitution of the Supreme Court of this Colony, and to abolish the Circuit Courts, being severally read,

Ordered,—That the said Bills be severally read a second time on Thursday next.

Pursuant to order of the day, the House resolved itself into Committee of the whole upon the Bill to facilitate the Recovery of Tenements after due determination of the Tenancy.

The SPEAKER left the Chair.

Mr. BURTON took the Chair of the Committee.

The SPEAKER resumed the Chair.

The Chairman reported that the Committee, had risen for want of a quorum.

At a quarter before 8 o'clock, the names of members present been taking down as follows: Hon. Receiver General, Hon. Colonial Secretary, Hon. Attorney General, the Surveyor General, the Chairman of Board Works, Mr. Green, Mr. Parsons and Mr. Burton, the Speaker adjourned the House for want of a quorum.

Tuesday, 26th February, 1867.

Mr. RENOUF presented a Petition from John Cahil and others, of St. John's, South Side, which was received and read, praying for a grant to complete the road there.

Ordered,—That the said petition do lie upon the table.

Mr. PARSONS presented Petitions from John Nevil and others, of Pouch Cove, Edward Furlong and others, of same place, and from Thomas Vincent and others, of Logy Bay, which were severally received and read, praying for grants to complete roads in those localities.

Ordered,—That the said Petitions do lie upon the table.

The hon. ATTORNEY GENERAL presented a Petition from Peter Cooper and others, Directors of the New York, Newfoundland and London Telegraph Company, which was received and read, setting forth.

That the said Company was incorporated by Act of the Legislature of this Colony, 17th Victoria, Cap. 2.

That the said Company, in the execution of the purposes of the said Act, has expended a capital of Three Millions of Dollars, which amount it is not authorized to exceed.

That since the successful laying of the Ocean Cable, the business of the said Company has so greatly increased, that it is essentially necessary, in order to ensure certainty and due despatch, in transmission of Messages, there should be a second overland line of telegraph from St. John's to Port Hood, also, a cable laid from Placentia, to the continent of America, with a connecting overland line, from Heart's Content to Placentia.

That in the proposed additions to the work of the Company, the Governments of Great Britain and the Colonies, are, with the Commercial Communities and others, deeply interested, and in this Colony, remunerative employment would be afforded to a large number of operatives.

That to enable the Company to commence and complete the said works, an addition of three Millions of Dollars to the present capital, that cannot be exceeded, by the said Act, will be required.

Your Petitioners, therefore, pray that your Honorable House will be pleased to take the foregoing circumstances into consideration, and sanction an enactment for increase of the aforesaid amount.

And in duty bound, will ever pray.

Ordered,—That the said Petition do lie upon the table.

The hon. COLONIAL SECRETARY presented a Petition from Patrick Colford and others, of Red Lands, which was received and read, praying for a grant to open roads there.

Ordered,—That the said Petition do lie upon the table.

The hon. RECEIVER GENERAL presented a Petition from Richard Scott and others, of St. John's, which was received and read, praying for a grant to complete the street called Covel Lane.

Ordered,—That the said petition do lie upon the table.

Mr. RENOUF presented a Petition from Esau Tucker and others, of Broad Cove, which was received and read, praying for a grant to complete roads in that settlement.

Ordered,—That the said petition do lie upon the table.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Messages :

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled, "an Act to amend an Act passed in the 28th year, of the Reign of Her present Majesty, entitled 'An Act to regulate the Inland Posts of this Colony,' " without amendment.

EDWARD MORRIS,

Senior Member.

LEGISLATIVE COUNCIL, }
26th February, 1867. }

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they concur in the Resolutions of the Assembly, of the 22nd, sent up; and have appointed Hon. Messrs, Stabb, Tessier, Clift and Kent, a Select Committee, to meet a Select Committee of the Assembly, in the Committee Room of the Council, on Thursday next, at 11 o'clock, in the

forenoon, to consider the subject matter of the said Resolutions, and to Report thereon.

EDWARD MORRIS,
Senior Member.

LEGISLATIVE COUNCIL, }
26th February, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Messages do lie upon the table.

Mr. BENNETT gave notice that, on to-morrow, he will ask the hon. Colonial Secretary for particulars of the expenditure of \$2513.12 for Shipwrecked Crews, to whom paid, and for what; also, for the particulars of the expenditure of \$196.35 under the reduction of Pauperism Act, to whom the same was paid, and for what.

Mr. PROWSE gave notice that, on to-morrow, he will move the House into Committee of the Whole, on the Landlords and Tenants Bill.

Mr. RENOUF gave notice that, on to-morrow, he will ask the hon. Attorney General if an enquiry has been instituted by the Government in regard to the treatment of a prisoner named Fanning, who lately died in the Lock-up; also, if a Coroner's Inquest has been held; and to lay on the table of the House a copy of the evidence and verdict taken upon the occasion of said inquest (if any).

On motion of Mr. GLEN, seconded by Mr. RENOUF,

Resolved,—That the House do now resolve itself into Committee of the Whole to consider the following Resolutions:—

Whereas,—A Bill entitled “An Act for the Regulation of the Currency,” passed 25th March, 1863, directing all public accounts to be kept in Dollars and Cents, and the Mercantile Community not having adopted the aforesaid system of Decimal Currency,—

Resolved,—That until the Decimal system of Dollars and Cents is made compulsory, or generally adopted in Newfoundland, all public accounts shall be kept, all public monies paid and received, all Verdicts received and Judgments entered, and other legal proceedings taken, in the Currency of pounds, shillings, and pence, so as to assimilate them with the accounts kept and moneys paid and received by the Mercantile Community.

Resolved,—That a Bill be introduced embodying the foregoing Resolution.

And the House resolved itself into the said Committee accordingly.

The SPEAKER left the Chair.

Mr. OAKLEY took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that the Committee had risen.

Ordered,—That the report be received.

On motion of Mr. BENNETT, seconded by Mr. PROWSE,

Resolved,—That the following Address be presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The of Assembly having had under consideration the accompanying Petition from John Garvey, respectfully request that Your Excellency will be pleased to take the said Petition into your favourable consideration, and make such order thereon as may appear reasonable.

Ordered,—That the Address be engrossed and presented to His Excellency the Governor by such members of this House as are of the Hon. Executive Council.

Mr. RENOUF gave notice that, on to-morrow, he will ask the Hon. Receiver General, for a detailed Statement of the amount of \$5469.20 paid as Drawbacks on Flour imported in 1866, with the names of the parties, and the quantities of Flour on which such drawbacks were made ; also for a detailed Return of the amount of duty collected on the Coast of Labrador, for the year 1866, shewing the articles and quantities on which said duties were paid, and by whom paid ; also, for a return of \$1477.04 Labrador balances for 1866, and by whom due.

Also, for a detailed Return of \$2124.83 paid as Labrador salaries, for 1866, and to whom paid, the amount of annual salaries (if any) paid to any of said Labrador Revenue Officers ; also, to whom the sum of \$231 was paid in 1866, as Assistant, in the absence of said Clerk.

Also, for a detailed return of \$1518.29 cost of Revenue Inspection of Western Coast, for 1866, and whether the Officer in charge of said Inspection receives an annual salary from the St. John's Customs, with the name of such Officer, and the annual salary (if any) paid him.

Then the House adjourned until to-morrow, at 3 of the clock.

Wednesday, 27th February, 1867.

Mr. PARSONS presented a Petition from John Woods, of St. John's, which was received and read, setting forth :

That in the month of January, 1863, two pauper families, consisting of two mothers and four or five children, were sent by the Government, as passengers to New York in your petitioner's vessel, the "Arthur" for which your petitioner received a smaller compensation than is usually paid for other passengers.

That on their arrival at New York it was found that, by a law of the State of New York, of which your Petitioner was ignorant, bonds should be given by the owner of any ship or vessel landing emigrants, without any responsible male guardian, that for the period of four years, said emigrants should not become paupers or a burden on the State. In accordance with this law, bonds were demanded of your Petitioner to the amount of Eight Hundred Dollars; but after much trouble and expense, your Petitioner's Agent succeeded in compromising the matter with the Authorities, for one family, by the payment of Fifty Dollars. The other family, your Petitioner had to put to lodging and bring back to St. John's, on the return of the vessel; and he was thereby not only put to much inconvenience, but had to suffer loss to the extent, including amount before mentioned, of Eighty Dollars.

And your Petitioner further sheweth:

That in September, 1866, the Poor Commissioner, on behalf of the Government, engaged of H. K. Dickinson, Esquire, Broker, passages for four children, under the charge of a female relative and guardian, in your Petitioner's vessel the "Jubilee" to Boston.

That both Mr. Dickinson and your Petitioner had reason to believe that no law relating to passengers, similar to that existing in New York, was enforced in Boston, as many passengers in circumstances to be affected by such a law had been taken from this port and landed there, without difficulty or trouble occurring.

That on the arrival of the "Jubilee" at Boston, no objection was raised to the woman; but the children would not be permitted to land except on the following conditions, viz: a bond signed by the Captain on behalf of Owner, in the sum of \$1500 for four years, that said children should not become a burden on the U. S. Government, or the payment of One Hundred Dollars.

As bringing these children back, without their friends, would throw them altogether for support upon the Government of Newfoundland, thereby entailing much greater expense, the Captain decided to pay the sum demanded, viz: One Hundred Dollars.

That your Petitioner, having therefore been subjected to the serious loss of One Hundred and Eighty Dollars, by circumstances of which neither the Government nor your Petitioner had any knowledge, your Petitioner submits to your Hon. House, if he is not fairly and justly entitled to compensation for such loss.

And your Petitioner, as in duty bound, will ever pray, &c.

Ordered,—That the said Petition do lie upon the table.

The hon. RECEIVER GENERAL gave notice that, on Tuesday next, he will move that a Supply be granted to Her Majesty.

Also that, on Friday the 8th March, he will move the House into Committee of the whole on the Supply granted to Her Majesty.

The SURVEYOR GENERAL gave notice that on to-morrow he will ask the Chairman of the Board of Works to lay on the table of the House a

return of the expenditure of \$925 appropriated for the road from Trinity to King's Cove ; also, of the expenditure of \$1000 appropriated for the road leading from Trinity to Bonavista ; and also, the expenditure of \$300 appropriated to road leading from Trinity to Plate Cove, with a statement of amount of work done on each road, if by daily labour or otherwise, the names of labourers and amount earned by each, together, with the Chairman of the Local Board or other authorised Supervisor of the expenditure, orders given to each laborer, and the estimated amount yet required for each road.

Mr. HOGSETT gave notice that, on to-morrow, he will ask the hon. Attorney General [to lay before the House the correspondence that led to the appointment of Deputy Adjutant General of Volunteers, and the reasons for creating such office.

On motion of the hon. RECEIVER GENERAL, [seconded by the hon. COLONIAL SECRETARY,

Resolved,—That the House do, on to-morrow, resolve itself into Committee of the Whole on Ways and Means, and that it stand first on the Order of the Day.

On motion of Mr. PARSONS, seconded by Mr. GLEN,

Resolved,—That the following Address be presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Dependencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly request your Excellency will be pleased to cause to be laid before them a copy of your Excellency's Despatch to the Right Honorable the Secretary of State for the Colonies, upon the State of the Colony, as appeared in the *Pall Mall Gazette*.

Ordered,—That the address be engrossed and presented to His Excellency the Governor by such members of this House as are of the Honorable Executive Council.

On motion of the hon. ATTORNEY GENERAL, seconded by the hon. A. SHEA,

Resolved,—That a Select Committee be appointed to inquire in to the Petition of the New York, Newfoundland and London Telegraph Company.

Ordered,—That the hon. Attorney General, hon A. Shea, Mr. Rendell, Mr. Glen and Mr. Renouf do form the Committee.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 28th February, 1867.

Mr. HOGSETT gave notice that, on to-morrow, he will move for the appointment of a Select Committee to inquire into the management of the Saint John's Hospital, and the necessity for improvement upon the present building, or whether it should be abandoned and a new one built.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole upon Ways and Means.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the business to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee stand first on the Order of the Day for Monday next.

Pursuant to Order of the Day the Bill to amend the Constitution of the Supreme Court and to abolish Circuit Courts, was read a second time.

Ordered,—That the House do, on to-morrow, resolve itself into Committee of the Whole on the said Bill.

On motion of Mr. PROWSE, seconded by Mr. PINSENT,

Resolved,—That the House do now resolve itself into Committee of the Whole, upon the Bill to facilitate the recovery of Tenements after due determination of the Tenancy.

The SPEAKER left the Chair.

Mr. BENNETT took the chair of the Committee.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the Bill to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof

Ordered,—That the Committee have leave to sit again to-morrow.

Mr. PINSENT gave notice that, on to-morrow, he will ask the Chairman of the Board of Works for a detailed account of the expenditure under the head of General Repairs of Roads and Bridges: Also, for the total number of Patients, in 1866, received into the Hospital, Lunatic Asylum and Poor Asylum, respectively, and how many from Outports, and the number from each Outport.

Also, that on to-morrow he will ask the hon. Colonial Secretary for returns of expenditure under the head Permanent and Casual Poor, and to inquire what application is given in practice to the term Casual Poor.

Mr. BENNETT gave notice that, on to-morrow, he will ask the Colonial Secretary for return of the amount of each member of this House, resident in St. John's, as rated for Water and Sewerage assessment: Whether the rates have been paid by them, and what amount in arrears: Whether as principals or agents for Estates, naming each agent and Estate and amount.

Then the House adjourned until to-morrow, at 3 of the clock.

Friday, 1st March, 1867.

Mr. PROWSE gave notice that, on to-morrow, he will ask the Hon. Colonial Secretary to lay on the table of the House, all correspondence between the Imperial Government and the Government of this Colony, relative to the annual maintenance of Cape Pine Light House: Also returns of the amount of Light Dues received by the Imperial Government on account of Cape Race Light House.

Mr. PINSENT presented petitions from Robert H. Taylor and others, of Brigus and Cupids North, which were received and read, praying that a District Surgeon may be appointed for that District.

Ordered,—That the said Petitions do lie upon the table.

Mr. PINSENT gave notice that, on to-morrow, he will move an address to the Governor on the foregoing Petitions, from the District of Brigus and Port-de-Grave, for a District Surgeon.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message:

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed, without amendement, the Bill sent up, entitled "an Act to amend an Act passed in the 29th year of the Reign of Her persent Majesty, entitled 'An Act to Empower the 'Supreme Courts of this Colony to direct certain offenders to remove therefrom, and for other purposes.'"

EDWARD MORRIS,

Senior Member.

LEGISLATIVE COUNCIL, }
1st March, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Message do lie upon the table.

Mr. O'RIELLY presented a Petition from P. Nowlan and others, of Little Placentia, which was received and read, praying for a grant to complete the road from the main line to Sandy Point.

Ordered,—That the said petition do lie upon the table.

Ordered,—That the said petition do lie upon the table.

Mr. PARSONS gave notice that, on to-morrow, he will move for the appointment of a Select Committee on the Petition of John Woods.

Mr. PARSONS presented a Petition from Roger Down and John Hellyer, which was received and read, praying for encouragement for the establishment of a Tanwork here.

Ordered,—That the said Petition do lie upon the table.

Mr. PARSONS gave notice that, on to-morrow, he will move an address to the Governor on the foregoing Petition.

Ordered,—That the House, at its rising, do adjourn till Thursday next. Then the House adjourned till Thursday next, at 3 of the clock.

Thursday, 7th March, 1867.

Mr. BURTON presented Petitions from Joseph Gill and others, of Pinchard's Island, J. Bindon and others, of Salvage, John Hann and others, of Cape Freels, Frederick White and others, of Greenspond, Samuel Winsor and others, of Swain's Island, John Anstey and others, of Fair Island, and from Wm. Kean and others, of Pool's Island, which were severally received and read, praying that a law may be enacted for the regulation of the Seal fishery.

Ordered,—That the said Petitions do lie upon the table.

Mr. O'RIELLY presented a Petition from Patrick Power and others, of Placentia, which was received and read, praying for a grant to make a road round the North East Arm of Great Placentia.

Ordered,—That the said Petition do lie upon the table.

Mr. FURRY presented a Petition from Geo. Kelly and others, of Lance Cove and Seal Cove, South Shore of Conception Bay, which was received and read, praying that Lance Cove, Seal Cove, and Indian Pond, may be included in the St. John's Educational District.

Ordered,—That the said Petition do lie upon the table.

He also presented a Petition from Js. Dwyer and others, of Kelligrews, which was received and read, praying for a grant to complete the bridge over the river there.

Ordered,—That the said Petition do lie upon the table.

Mr. KAVANAGH presented a Petition from Michael Barry and others, of Major's Path, which was received and read, praying for a grant to repair that road.

Ordered,—That the said Petition do lie upon the table.

He also presented a Petition from Wm. Goss and others, of Torbay, which was received and read, praying for a grant to repair the bridge leading from the Battery to Tapper Cove.

Ordered,—That the said Petition do lie upon the table.

The hon. SOLICITOR GENERAL presented a petition from Charles Walker and others, of Harbor Grace, which was received and read, praying for a grant to open a road from Bannerman Road to Lady Pond.

Ordered,—That the said Petition do lie upon the Table.

Mr. HOGSETT gave notice that, on to-morrow, he will ask the Surveyor General, the character of the Stationery imported by him for the use of his office, the reason for such importation, and to lay on the table of the House the original invoice accompanying such importation.

Mr. EVANS presented a petition from Elias Major and others, of Fortune Harbor, which was received and read, praying that similar arrangements as were made last year, for the protection of the Herring Fishery in Fortune Bay, may be adopted this spring.

Ordered,—That the said petition do lie upon the Table.

He also gave notice that, on to-morrow, he will move an address to the Governor on the foregoing petition from the inhabitants of Fortune Harbor.

Mr. RENOUF presented a petition from R. Cuddihy, of St. John's, which was received and read, praying for compensation for damage done to his property in St. John's, by the erection of a Public Hydrant thereon.

Ordered,—That the said petition do lie upon the table.

Mr. RENOUF gave notice that, on to-morrow, he will move an address to His Excellency the Governor on the petition of Richard Cuddihy.

Mr. GLEN moved, seconded by Mr. RENOUF,

That the Bill to repeal the Act, entitled "an Act to reduce the interest payable on the Public Debt of the Colony, under the Act 19 Vic. Cap. 6, and 21 Vic. Cap. 3, and to authorize the consolidation of the Debt therein mentioned," be now read a second time.

And the question being put thereon, the House divided, when there appeared,

For the Motion,—4.

Mr. Glen,
 " Kavanagh,
 " Renouf,
 " Kearney,

Against the Motion,—13.

Hon. Attorney General,
 " Solicitor General,
 " Colonial Secretary,
 " Receiver General,
 The Surveyor General,
 " Chairman Board Works,
 Mr. Pinsent,
 " Knight,
 " Prowse,
 " O'Rielly,
 " Oakley,
 " Burton,
 " Talbot.

So it passed in the negative, and
Ordered,—Accordingly.

On motion of the Hon. ATTORNEY GENERAL, seconded by Mr. GLEN,

Resolved,—That petitions be not received on a day fixed for a special motion, that Wednesday be specially appointed for presenting petitions and notices of motion, and none to be received on any other day after half-past four o'clock, until the order of the day has been disposed of.

Mr. BURTON gave notice that, on to-morrow, he will move for the appointment of a Select Committee, to take evidence and report upon the subject of the Seal Fishery.

Mr. GLEN gave notice that, on Thursday the 14th of March, he will move the House into Committee of the whole on the following resolution, and to take precedence of the orders of the day.

Resolved,—That it is the opinion, of this Committee that the Floating Debt of the Colony be this year consolidated, and the Debentures issued for the same shall bear interest at the rate of per cent, per annum.

Mr. RENOUF gave notice that, on to-morrow, he will ask the Hon. Receiver General for a detailed return of Labrador official Salaries, \$1337.79, for 1865.

Mr. PROWSE gave notice that, on to-morrow, he will move an address to the Governor, on the subject of Cape Pine Light house.

Then the House adjourned till to-morrow, at 3 of the clock.

Friday, 8th March, 1867.

Mr. HOGSETT moved, seconded by the hon. SOLICITOR GENERAL,

That the House do now resolve itself into a Committee of the Whole, on Privilege.

And the question being put thereon, it passed in the negative, and

Ordered,—Accordingly.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of Ways and Means.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had considered the business to them referred, and had come to certain Resolutions thereon, which they had directed him to report to the House, and

he handed the Resolutions in at the Clerk's Table, where they were read, as follows :

Resolved,—That the Act 29 Vic., Cap. 1, entitled "An Act for granting to Her Majesty certain duties on goods, wares and merchandise" be continued to the 20th May, 1868, with the following alterations :—

Pigs' feet and Pigs' hocks subject to same duty as beef and Pigs' heads, all dried fish imported into Newfoundland, subject to a duty of \$1.32.

Fresh fish duty free, Bait free, Barley, wheat, unmanufactured wool and raw cotton, free.

3rd. Sec. to be repealed, and the following to stand as the 3rd Section of the Act :—

It shall not be lawful for any Importer of dried fish, to warehouse the same in any of the ports of this Colony or its dependencies, without the payment of the duty hereinbefore imposed ; and the provisions of any Act of this colony with regard to the Warehousing of goods on the first entry thereof, or to the allowance of Drawback upon exportation, shall not, in either case, apply to, or be construed to apply to, such fish ; Provided that this section shall not apply to such fish of British catch and cure, unless otherwise declared by Proclamation of the Governor published in the *Royal Gazette*.

The proviso in the 13th section of the said recited Act, shall not apply to this Act.

Ordered,—That the said Resolutions be adopted.

Resolved,—That a Select Committee be appointed to bring in a Revenue Bill, in accordance with the preceding Resolutions, and with the usual and proper clauses to give effect thereto.

Ordered,—That the hon. Receiver General, Mr. Glen, and Mr. Rendell do form the Committee.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of the Bill to facilitate the recovery of Tenements after due determination of the Tenancy.

The SPEAKER left the chair.

Mr. BENNETT took the chair of the Committee.

The SPEAKER resumed the chair.

The Chairman reported from the Committee, that they had passed the Bill to them referred, with some amendments, which they had directed him to report to the House, and he handed the Bill and amendments in at the Clerk's Table.

And the said amendments, having been read throughout, a first and second time, were, upon the question being put thereon, agreed to by the House.

Ordered,—That the Bill, as amended, be engrossed, and read a third time to-morrow.

On motion of Mr. HOGSETT, seconded by Mr. PROWSE,

Resolved.—That a Select Committee be appointed to enquire into the Management of the St. John's Hospital.

Ordered.—That Mr. Hogsett, Mr. Prowse, Mr. Rorke, Mr. Burton, and Mr. Kearney do form the Committee.

Mr. PINSENT, pursuant to notice, and on leave granted, presented a Bill to amend the Act for the encouragement of Education, which was read a first time.

Ordered.—That the Bill be read a second time to-morrow.

On motion of Mr. PINSENT, seconded by Mr. BENNETT,

Resolved.—That the following Addresses be severally presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petitions from W. E. Shenstone, J. Wilcox and others, inhabitants of Brigus, and Jonathan Spracklin and George Smith—inhabitants of Cupids, praying for a division of the grant for a District Surgeon, Conception Bay, respectfully request that your Excellency will be pleased to take the said Petitions into your favorable consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition from Robert H. Taylor, Edward O'Keefe and others, inhabitants of Brigus, on the subject of a Public Wharf in that District, respectfully request that your Excellency will be pleased to take the said Petition into your favorable consideration, and make such order thereon as may appear reasonable.

Ordered.—That the said several Addresses be engrossed and presented to his Excellency the Governor, by such Members of this House, as are of the hon. Executive Council.

On motion of the hon. RECEIVER GENERAL, seconded by the hon. ATTORNEY GENERAL,

Resolved.—That a Supply be granted to Her Majesty.

Resolved.—That on Tuesday the 12th inst., the House do resolve itself

into Committee of the whole on the Supply granted to Her Majesty, and that it stand first on the order of the day.

Mr. HOGSETT gave notice that, on to-morrow, he will move for the appointment of a Select Committee to draft and report to the House, an address to the Imperial Government embodying the reasons for the adoption by the House of Differential Duties on dried fish imported into this Colony.

The Hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will move for the introduction of a Bill to amend the Commercial Bank Act.

Then the House adjourned till Monday next, at 3 of the clock.

Monday, 11th March, 1867.

Pursuant to order of day, the Bill to facilitate the recovery of Tenements, after due determination of the Tenancy, was read a third time, as engrossed.

Ordered.—That the Bill do pass, and be entitled “An Act to facilitate the recovery of Tenements, after due determination of the Tenancy.”

Ordered.—That the Hons. Solicitor General and Receiver General do take the Bill to the Legislative Council, and desire their concurrence.

Pursuant to order of the day, the Bill to amend the Act for the encouragement of Education, was read a second time.

Ordered.—That the House do, on to-morrow, resolve itself into Committee of the whole upon the said Bill.

On motion of Mr. EVANS, seconded by Mr. BENNETT,

Resolved.—That the following Address be presented to His Excellency the Governor:

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of the inhabitants of Fortune, on the protection of the Herring Fishery, respectfully request that your Excellency will be pleased to take the said Petition into your favorable consideration, and make such order thereon as may appear reasonable.

Ordered.—That the Address be engrossed, and be presented to His Excellency the Governor, by such members of this House as are of the Hon. Executive Council.

motion of Mr. PROWSE, seconded by the SURVEYOR GENERAL,
Resolved,—That the following Address be presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
 Governor and Commander-in-Chief, in and over
 the Island of Newfoundland and its Dependencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under their consideration a Despatch from the Committee of the Privy Council for Trade, dated Whitehall, 9th July, 1856, addressed to H. Merivale, Esq., Under Secretary of State for the Colonies, in which it is stated that the cost of erecting Cape Race Light House will be about £5,160, and the expense of maintaining somewhat over £400, per annum, and that the toll of 1-16th of a penny per ton, on 5,500,000 tons, the amount of shipping which it was then calculated these tolls would be levied on, would yield an annual revenue of £1500; and whereas Cape Race Light House was erected in 1857, and consequently the revenue arising from these tolls has probably been sufficient, in ten years, not only to have paid off the original cost and interest on the erection of the said Light House, but also to have left a large surplus to the credit of the Institution; and whereas the Lords of the Committee of Privy Council for Trade, in reply the proposal contained in the Despatch of the Governor of Newfoundland, of the 8th January, 1856, to the effect that the Light House on Cape Pine, and the tolls for that Light should be placed on the same footing as the Light House on Cape Race and its tolls, their Lordships state "that as soon as they have concluded the arrangements for Cape Race, and have seen how they answer, they will be prepared to consider the proposal; but they think it better to defer its consideration for the present."

The House of Assembly would, therefore, respectfully request Your Excellency, in view of these circumstances, to solicit the Lords of the Committee of Privy Council for Trade, to allow Cape Pine to be placed on the same footing as Cape Race; and whereas a Light House erected at Channel Head, near Cape Ray, on the South Western extremity of this Island, would be of equal value to vessels sailing to and from Great Britain, passing through the Gulf of St. Lawrence, which now contribute towards the maintenance of Cape Race, we would, therefore, respectfully request Your Excellency also to urge upon the Lords of the Committee of the Privy Council for Trade the expediency of building a Light House in such locality, out of the funds derived from Cape Race tolls.

In respectfully urging these considerations upon Your Excellency, the House of Assembly are influenced by the favorable reply given to a similar request in 1856, and also by the fact that the very large number of vessels which benefit by Cape Race Light, derive similar benefits from Cape Pine Light, and a very large proportion of them would also

derive great advantages from a Light House situate on the extreme South Western portion of this Island.

The House of Assembly would respectfully solicit Your Excellency to lend the weight of Your influence in obtaining from the Lords of the Committee of Privy Council for Trade a compliance with the prayer of this Address.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such Members of this House as are of Hon. Executive Council.

On motion of Mr. BURTON, seconded by the SURVEYOR GENERAL,

Resolved,—That a Select Committee be appointed on the Seal Fishery.

Ordered.—That Mr. Burton, Mr. Rorke, Mr. Glen, Mr. Kavanagh, and Mr. Knight, do form the Committee.

The CHAIRMAN OF BOARD OF WORKS gave notice that, on Thursday next, he will move the House into Committee of the whole on Roads and Bridges.

Mr. PINSENT gave notice that, in Committee on Supply, he will propose Resolutions having in view the prospective reduction of the Civil Expenditure, with increased efficiency in the Public Service.

Mr. BENNETT gave notice that, on to-morrow, he will ask leave to introduce a Bill for the further amendment of the Water Company Acts.

The hon. SOLICITOR GENERAL gave notice that, on to-morrow he will ask leave to introduce a Bill, to amend the Volunteer Organization Act.

Mr. BARRON gave notice that, on to-morrow, he will ask the Chairman of Board of Works, for a detailed return of the expenditure of \$300, voted last session for the Cape St. Mary's Shore road.

Mr. RENOUF presented a petition from Samuel Knight and others, of St. John's West, which was received and read, praying for a grant to complete the road from Waterford Bridge past the Lunatic Asylum.

Ordered,—That the said petition do lie upon the table.

Mr. TALBOT presented a petition from Samuel Knight and others, of Old Placentia Road, which was received and read, praying for a grant to repair said Road.

Ordered,—That the said petition do lie upon the Table.

Mr. KEARNEY presented a petition from Mathew Phelan and others, of Ferryland, which was received and read, praying that measures may be adopted to prevent the use of Cod Seines on Fishing Ledges.

Ordered,—That the said Petition do lie upon the Table.

Mr. OAKLEY presented a petition from John Hall and others, of Pinchard's Island, which was received and read, praying for a grant to repair the Bridge connecting the Inner Island.

Ordered,—That the said Petition do lie upon the table.

He also presented a petition from George Parsons and others, of Cat Harbor, which was received and read, praying that a Ferry be established over Wind Mill Brook.

Ordered,—That the said Petition do lie upon the table.

Mr. RORKE presented a petition from Moses Wilshear and others, of Carbonear, which was received and read, praying for the erection of a Pump there.

Ordered,—That the said Petition do lie upon the table.

Mr. RENDELL presented petitions from Wm. Baker, senior and others, of Bird Island Cove, and from A. G. C. Bayly and others, of Bonavista, which were severally received and read, praying for grants to complete roads in those localities.

Ordered,—That the said Petitions do lie upon the table.

Mr. PINSENT presented a petition from Edward O'Keefe and others, of the District of Brigus and Port-de-Grave, which was received and read, praying for a grant to make a road to Village Gulleys.

Ordered,—That the said Petition do lie upon the table.

The CHAIRMAN OF BOARD OF WORKS presented a petition from George Gardner and others, of Heart's Content, which was received and read, praying for the erection of a Lock-up there.

Ordered,—That the said petition do lie upon the table.

Mr. KEARNEY presented a petition from Thomas Badcock and others, of Brigus South, which was received and read, praying for a grant to build a Bridge, to connect the Island with the Main Land.

Ordered,—That the said petition do lie upon the table.

Mr. KNIGHT presented a petition from Thomas Taylor and others, of Morton's harbor, which was received and read, praying for a grant to repair Roads there.

Ordered,—That the said petition do lie upon the table.

Mr. TALBOT presented a petition from Joseph Squires and others, of Broad Cove, which was received and read, praying for a grant to complete roads there.

Ordered,—That the said petition do lie upon the table.

Mr. RENOUF presented a petition from Henry Chaffe and others, of Forest Pond, Wm. Ruby and others, of St. John's West, Wm. Ruby and others, of Heavy Tree road, and from B. Squires and others, of Broad Cove, which were severally received and read, praying for grants to open and repair roads in those localities.

Ordered,—That the said petitions do lie upon the table.

Then the House adjourned till to-morrow at, 3 of the clock.

Tuesday, 12th March, 1867.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole on Supply.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the business to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit again on Friday next.

Pursuant to Order of the Day, the House resolved itself into Committee of the whole upon the Bill to amend the Constitution of the Supreme Court and to abolish the Circuit Courts.

The SPEAKER left the Chair.

Mr. KAVANAGH took the chair of the Committee.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had passed the Bill to them referred, with some amendments, and he handed the Bill and amendments in at the Clerk's table.

And the said amendments, having been read throughout, a first and second time, were, upon the question being put thereon, agreed to by the House.

Ordered,—That the Bill, as amended, be engrossed, and read a third time to-morrow.

Pursuant to Order of the Day, the House resolved itself into Committee of the whole upon the Bill to amend the Acts for the Encouragement of Education.

The SPEAKER left the Chair.

Mr. RORKE took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee that they had made some progress in the Bill to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit again to-morrow.

The HON. SOLICITOR GENERAL, pursuant to notice, and on leave granted, presented a Bill to amend the Volunteer Organization Act, which was read a first time.

Ordered,—That the Bill be read a second time to-morrow.

Mr. BENNETT, pursuant to notice, and on leave granted, presented a Bill to amend the Acts for the establishment of the Water Companies, which was read a first time.

Ordered,—That the Bill be read a second time to-morrow.

The Hon. ATTORNEY GENERAL presented a Petition from Robert Brown, Manager of the Commercial Bank, which was received and read praying for an alteration in the Act of Incorporation.

Ordered,—That the said Petition do lie upon the table.

Mr. RORKE gave notice that, on to-morrow, he will ask the Hon. ATTORNEY GENERAL, if any action has been taken by correspondence with the Nova Scotia Government, or otherwise to bring to justice the trader Green, who assaulted the Collector, Mr. Winter, while in the discharge of his duty at the Labrador, last season.

Mr. RENOUF gave notice that, on to-morrow, he will ask the Chairman of the Board of Works for a detailed return of the Potatoes supplied to Saint John's West, for the year 1866, shewing the names of parties from whom purchased, to whom delivered, and prices paid; also, for a return of the ten per cent. on Road appropriations for St. John's, for year 1866; also, that, on to-morrow, he will ask the Surveyor General for a return of the amount of Rents received annually for the Market House, Telegraph Office, and public wharf, from 1861 to 1866, both inclusive.

Also, that, on to-morrow, he will ask the hon. Colonial Secretary for the following Returns :

Fees received from Sheriffs of Central, Northern and Southern Districts from 1861 to 1866, inclusive.

Return of names and claims of all applicants refused (if any) to the Government for pecuniary assistance for clearing land, under the Act for reduction of Pauperism, 1866.

For detailed return of the sum \$196.55 paid under the Act, for year 1866.

For detailed return of \$3770.32 under expenditure account, Geological Survey, 1866; also, for vouchers for the sum of \$169.28 and \$68.70 supplied for Juries, by J. T. Chambers, 1866.

For return of statement of \$2343.30 disbursements of Savings' Bank, 1866, and the sum of \$200, Savings' Bank, Harbor Grace.

For return of \$15,429.13, loans and discounts; \$59,926.35, mortgages; \$1,310.92, Gower Street property; \$1,436.18, Lazy Bank property; also for a detailed return of the births, deaths and marriages in the several Electoral Districts for 1866, under the Registration Act; also for a return of any monies paid on account of Education or relief of the Poor on the Labrador, since passing of the Act for collecting revenue on that coast.

Mr. PINSENT presented a petition from Stephen Rendell, President of the St. John's Agricultural Society, on behalf of the Society, which was received and read, setting forth :—

That for a number of years the operations of this Society have been approved by the Local Government, and their usefulness recognised by Your Honorable House granting from year to year liberal aid, to enable the Society to carry out the objects for which it was established.

That the money which Your Honorable House was pleased to grant last session, and place at the disposal of the Society, has been expended in such a manner as the Committee believed would be most beneficial to the working classes.

That the improved breeds of live stock imported, and otherwise secured by the Society during the past year, Your Petitioners believe cannot but prove of permanent benefit to the Colonists, and they earnestly urge the necessity for further efforts being made in this direction.

That Your Petitioners have ordered from Great Britain, the United States and Prince Edward Island, seeds of the most approved grasses and cercal crops, and such varieties of the Potato as have withstood the blight.

That the precarious nature of the Potato crop, renders it necessary to direct more attention to the cereals, and with the view of encouraging the growth of Wheat, Barley, Oats and Rye, Your Petitioners are taking steps to procure Hand Mills of the most approved kind, to enable the settlers in the several districts to convert, at a trifling cost, such grain as they produce into Flour and Meal.

That for the means to carry into effect the above-named operations, your Petitioners are mainly dependent upon Legislative aid : they therefore humbly pray, that your Honorable House will be pleased to grant such a sum of money for this purpose, as your Honorable House may deem fit.

And as in duty bound, your Petitioners will ever pray.

Ordered,—That the said Petition do lie upon the Table.

He also presented a petition from Stephen Rendell, President of the Agricultural Society, on behalf of the Society, which was received and read, setting forth ;—

That the Society which your Memorialists represent, has lately drawn the attention of our farmers to the growth of Flax in this Colony, and has held out encouragement by premiums and otherwise, to cultivate this crop as one likely to be of considerable benefit, and afford employment to a number of our people at the season of the year when not engaged in the fisheries.

That your Memorialists have ordered from Great Britain, a quantity of the best Riga Flax Seed, for the ensuing season, and also implements for dressing the fibre.

That it is the intention of the Society, with the view of inducing the farmers to sow this seed, to offer premiums for the best samples of dressed Flax, and further, to offer a fair price for the Flax grown from the seed imported by the Society.

That to accomplish this undertaking must involve an outlay from the Society's funds, of not less than Four Hundred Dollars.

Your Memorialists therefore humbly pray that your Honorable House may be pleased to grant such a sum of money as your Honorable House may deem fit, to enable them to carry out the above named object.

And, as in duty bound, your Memorialists will ever pray.

Ordered,—That the said petition do lie upon the table.

Then the House adjourned till to-morrow at 3 of the clock.

Wednesday, 13th March, 1867.

The Hon. SOLICITOR GENERAL presented a Petition from the Right Revd. Dr. Dalton, of Harbor Grace, which was received and read, setting forth :—

That in the year 1843 Your Honorable House established Grammar Schools in the towns of Harbor Grace and Carbonear, and placed the former under the direction of a majority of Protestants and the latter under a majority of Catholics. To this arrangement the Government assented, and the Boards so constituted, accordingly appointed for their respective Schools, a Catholic Master at Carbonear and a Protestant Master at Harbor Grace.

That in or about the year 1864 two Directors of the Carbonear School having died, one a Catholic and the other a Protestant, the vacancies they caused were, in defiance of the original constitution of that Board, filled by two Protestants.

That, subsequently, the School was abolished by Your Hon. House, and that since its destruction, no Institution of the kind remains to which Catholic youth can be sent without peril to their faith and morals.

Your Petitioner, therefore, earnestly hopes that Your Hon. House will be pleased to grant the necessary funds for the establishment of a Grammar School for the youth of the diocese of Harbor Grace, in accordance with the denominational principle which elsewhere has been and is acted upon, and thereby rescue the Catholics intrusted to his pastoral care from the anomalous and inequitable condition to which the abolition of the Carbonear School has reduced them.

And Your Petitioner, as in duty bound, will ever pray.

Ordered,—That the said Petition do lie upon the table.

The SURVEYOR GENERAL presented a Petition from James Cummins

and others, of King's Cove, Broad Cove, Knight's Cove and Stock Cove, which was received and read, praying for a grant to complete the road from Black Head Bay to Catalina.

Ordered,—That the said petition do lie upon the table.

The Hon. ATTORNEY GENERAL presented a petition from James Inkpen and others, of Burin, which was received and read, praying that Cod-nets may not be allowed to beset on that part of the Western Shore from Northern Head to Red Lands.

Ordered,—That the said petition do lie upon the Table.

Mr. EVANS presented a petition from James Haley and others, of Lamaline, which was received and read, praying that the Steamer *Diamond* may be sent round to protect the Herring Fishery in Fortune Bay, so as to prevent the supply of Bait to the French before the time allowed by the Act.

Ordered,—That the said petition do lie upon the Table.

Mr. KEARNEY presented a petition from Wm. Killegrews and others, of Renewse, which was received and read, praying that the use of Bul-tows in the prosecution of the Fishery may be prohibited.

Ordered,—That the said petition do lie upon the Table.

The hon. SOLICITOR GENERAL gave notice that, on to-morrow, he will move an Address to His Excellency the Governor on the petition of the Right Rev. Dr. Dalton.

Mr. PARSONS gave notice that, on to-morrow, he will move for the appointment of a Select Committee on the petition of John Woods of St. John's.

Also for an Address to the Governor on the petition of Wm. Hellyer and Rodger Down.

Mr. KNIGHT presented a petition from John W. Owen and others, of Twillingate and vicinity, which was received and read, praying for the erection of a Light House on the North West Headland at the entrance of that harbor.

Ordered,—That the said petition do lie upon the table.

Mr. OAKLEY presented a petition from William J. Milner and others, of Greenspond, which was received and read, praying for a grant to erect a Light House on Puffin Island.

Ordered,—That the said petition do lie upon the table.

Mr. FUREY presented a petition from George Kelly and others, of Lance Cove, which was received and read, praying for a grant to make a road from the Pond to the main road.

Ordered,—That the said petition do lie upon the table.

He also presented a petition from Patrick Deady and others, of the South Shore of Conception Bay, which was received and read, praying for a grant to repair the Public Wharf at Topsail.

Ordered,—That the said petition do lie upon the table.

Mr. BRENNAN presented a petition from Laurence Maccassey and others, of Freshwater, which was received and read, praying for a grant to repair the road from Moses Neil's to Wigmore's Gully.

Ordered,—That the said petition do lie upon the table.

The Hon. COLONIAL SECRETARY presented to the House the following Documents :

Report and Statement of the Affairs of the General Water Company, for the year 1866.

Return of cases visited by the Gaol Surgeon, for year 1866.

Return of parties on South Side Water street assessed for Water Rates, including property and consumption Tax, with total amount paid by each.

Statement of affairs of the Cathedral Fire Brigade for year 1866.

Return of Expenditure of \$1800 under Education Act 29 Vic., Cap. 16.

(For which see Appendix.)

Ordered,—That the said Documents do lie upon the table.

Mr. FUREY gave notice that, on to-morrow, he will move an Address to the Governor on the subject of the Public Wharf at Topsail.

Mr. PROUSE gave notice that, on to-morrow, he will move an Address to the Governor, on the petition from Burgeo, for a Canal.

Also, that, on to-morrow, he will ask the Hon. Colonial Secretary for copies of the correspondence between this Government and the Canadian Government, with reference to the erection of a Light House on Channel Head.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 14th March, 1867.

Pursuant to order of the day, the Bill to amend the constitution of the Supreme Courts, and to abolish Circuit Courts, as engrossed, was read a third time.

Ordered,—That the Bill do pass, and be entitled “ An Act to amend the constitution of the Supreme Court, and to abolish Circuit Courts.”

Ordered,—That the hon. ATTORNEY GENERAL and Mr. PINSENT do take the Bill to the Legislative Council, and desire their concurrence.

Ordered,—That the House do, on Thursday next, resolve itself into Committee of the whole, to consider the propriety of consolidating the floating debt of the Colony.

Ordered,—That the order of the day, for second reading of the Bill to amend and simplify the practice of the Circuit Courts be discharged.

Pursuant to order of the day, the following Bills were severally read a second time.

The Bill to amend the Act for the establishment of a Volunteer Force in this Colony.

The Bill to amend the Acts for the establishment of the General Water Company and Harbor Grace Water Company.

Ordered,—That the House do, on to-morrow, resolve itself into Committee of the whole, on the said several Bills.

Ordered,—That the House do, on Thursday next, resolve itself into Committee of the whole on Roads and Bridges.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message :

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled " An Act to amend an Act passed in the 27th year of Her present Majesty, entitled ' An Act for establishing the Standard Weight of Grain and Pulse, and to regulate the sale of Bread, Coals, and other articles,' " without amendment.

EDWARD MORRIS,
Senior Member.

LEGISLATIVE COUNCIL, }
14th March, 1867. }

And then the Messenger withdrew.

Ordered,—That the said message to lie upon the table.

Ordered,—That the following Addresses be presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of Richard Cuddihy, respectfully request that your Excellency will be pleased to take the said Petition into your favorable consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of the Right Rev. Doctor Dalton, respectfully request that Your Excellency will be pleased to take the said Petition into your consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of Patrick Daley and other Inhabitants of Topsail, on the subject of a Public Wharf, respectfully request that Your Excellency will be pleased to take the said Petition into your favorable consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of John Cunningham and others, Inhabitants of Burgeo, on the subject of a Canal, respectfully request that Your Excellency will be pleased to take the said petition into Your favourable consideration, and make such order thereon as may appear reasonable.

Ordered,—That the said several Addresses be engrossed, and presented to His Excellency the Governor, by such members of this House as are of the Honorable Executive Council.

Mr. FUREY presented a petition from Robert Reader, late Stipendiary Magistrate of Old Perlican, which was received and read, praying for compensation for loss of office.

Ordered,—That the said petition do lie upon the table.

Mr. HOGSETT gave notice that, on to-morrow, he will move an Address to the Governor on the foregoing petition of Robert Reader.

Mr. KEARNEY presented a petition from James Lampin, of Harbor Grace, which was received and read, praying for compensation for loss sustained by him from the establishment of endowed schools.

Mr. KEARNEY gave notice that, on to-morrow, he will move an Address to the Governor on the foregoing petition of James Lampin.

The Hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will ask leave to bring in a Bill to amend the Equity Practice Act; also a Bill to protect property of married women deserted by their husbands.

On motion of Mr. HOGSETT, seconded by Mr. GLEN,

Resolved,—That a Select Committee be appointed to draft and report to the House, an Address to the Imperial Government embodying the reasons for the adoption by the House of differential duties on dried fish imported into this Colony.

Ordered,—That Mr. Hogsett, Mr. Glen, the hon. Receiver General, Mr. Rendell and Mr. Rorke do form the Committee.

Mr. RORKE gave notice that, on to-morrow, he will move an Address to the Governor, on the petition from Carbonear praying for a grant of money to erect a Pump near the Public Wharf at that place.

Mr. BENNETT presented a petition from Wm. Burke, and others, of St. Jacques, which was received and read, praying for a grant to enable them to rebuild the Breakwater there.

Ordered,—That the said petition do lie upon the table.

He also presented a petition from Daniel Walters and others, of Jersey Harbor, which was received and read, praying that a Commercial School may be established there.

Ordered,—That the said petition do lie upon the table.

Mr. KAVANAGH presented Petitions from John Salmon and others, of White Hills, John Cashin and others, Freshwater Road, Wm. Ryan and others, Torbay, and from Wm. Burke and others, Flat Rock, which were severally received and read, praying for grants to complete roads in those localities.

Ordered,—That the said petitions do lie upon the table.

The SURVEYOR GENERAL presented a Petition from Robert Strathie and others, of Musgrave Town, which was received and read, praying for a grant to complete the road through that settlement.

Ordered,—That the said Petition do lie upon the Table.

Mr. KEARNEY presented a Petition from Thomas Dalton and others, of Renew's, which was received and read, praying for a grant to complete roads there.

Ordered,—That the said Petition do lie upon the Table.

Mr. O'RIELLEY presented a Petition from Nicholas Furlong and others, of Point Mall, which was received and read, praying for a grant to complete roads in that locality.

Ordered,—That the said Petition do lie upon the Table.

Then the House adjourned till to-morrow, at three of the clock.

Firday, 15th March, 1867.

Pursuant to Order of the Day, the House resolved itself into Committee of the whole, on further consideration of Supply.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the business to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit again on Tuesday next.

The hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will move for the appointment of a Select Committee on the petition of Robert Brown, Manager of the Commercial Bank.

Mr. RENOUF gave notice that, on to-morrow, he will ask the Hon. COLONIAL SECRETARY for a return of the amount of £46 3s., paid Union Bank, in 1864, for purchase of Law Books, charged under the head of Unforeseen Contingencies, the character of said books, and where they have been deposited.

Also for a return of the amount of \$10.74, paid for flogging prisoners, in 1866, with the name of prisoners so flogged, the number of lashes inflicted on each prisoner, the cause of commitment to Penitentiary, the amount paid for each flogging, and whether the Gaol or any other Surgeon was present during the punishment of such prisoners.

Also for copy of vouchers for payment of the following sums in 1865, under head of Shipwrecked Crews, viz. paid J. Shears, £83 16s., on account of *Cadamus* and *Victoria*, wrecked in 1862, and Joseph Shears £50, for services to Shipwrecked Crews, 1862, 1863 and 1864.

Also, that, on to-morrow, he will ask the hon. COLONIAL SECRETARY, for a detailed return of the expenditure of the sum of \$2294.42, expended in 1865, under the head of Geological Survey.

Mr. BURTON gave notice that, on to-morrow, he will ask the hon. COLONIAL SECRETARY, for a copy of the contract with the owner of the Steamer *Ariel*.

Then the House adjourned till to-morrow, at 3 of the clock.

Monday, 18th March, 1867.

On motion of Mr. GLEN, seconded by Mr. PARSONS.

Resolved.—That the House do now resolve itself into Committee of the whole, to consider the necessity of consolidating the Floating Debt of the Colony.

And the House resolved itself into the said Committee, accordingly.

The SPEAKER left the Chair.

Mr. BURTON took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had considered the business to them referred, and had come to a Resolution thereon, which they had directed him to report to the House, and he handed the resolution in at the Clerk's Table.

Resolved.—That towards consolidating the Floating and Debenture Debt of the Colony, the Governor in Council be empowered to raise on loan a sum not exceeding \$150,000, at the lowest rate of interest at which the same can be borrowed, and as may be more particularly declared in an Act for that purpose.

On motion that the report be adopted, Mr. GLEN moved, in amendment, seconded by Mr. RENOUF.

That the Report of the Committee be as follows :—

Resolved.—That it is the opinion of this House, that the Floating Debt of the Colony be this year consolidated, and the Debentures issued for same shall bear interest at the rate of six per cent. per annum.

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—4.

Mr. Glen,
 “ Kavanagh,
 “ Renouf,
 “ Talbot.

Against the Amendment,—17.

Hon. Attorney General,
 “ Solicitor General,
 “ Colonial Secretary,
 “ Receiver General,
 “ A. Shea,

The Surveyor General,

Mr. Knight,
 “ Evans,
 “ Prowse,
 “ Rorke,
 “ Green,
 “ O’Rielly,
 “ Oakley,
 “ Burton,
 “ Bennett,
 “ Hogsett,
 “ Kearney.

So it passed in the negative.

And the question on the original motion being then put, it passed in the affirmative, on a similar division as the foregoing, and

Ordered,—Accordingly.

Ordered,—That the Order of the Day for Committee of the Whole on the Bill to amend the Act for the encouragement of Education, be discharged.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the Bill to amend the Act for the establishment of a Volunteer Force in Newfoundland.

The SPEAKER left the Chair.

MR. KAVANAGH took the chair of the Committee.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had passed the Bill to them referred, without amendment, and he handed the Bill in at the Clerk's table.

Ordered,—That the Bill be engrossed and read a third time to-morrow.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message :

MR. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled " An Act to facilitate the recovery of Tenements, after due determination of the Tenancy," without amendment.

EDWARD MORRIS,
Senior Member.

LEGISLATIVE COUNCIL, }
18th March, 1867. }

And then the Messenger withdrew.

Ordered,—That the said message to lie upon the table.

Pursuant to Order of the Day, the following Bills were severally read a third time as engrossed.

The Bill to continue the Act to provide for the Organization of a Volunteer Force for the protection of Newfoundland.

The Bill to amend the Act, for the amendment of the General Water Company, and also for the Incorporation of the Harbor Grace Water Company.

Ordered,—That the first Bill do pass, and be entitled “ An Act to continue an Act, passed in the 24th and 25th years of the Reign of Her present Majesty, entitled ‘ An Act to provide for the Organization of a Volunteer Force, for the protection of Newfoundland.’ ”

Ordered,—That the hon. Solicitor General and Mr. Renouf, do take the Bill to the Legislative Council, and desire their concurrence.

Ordered,—That the second Bill do pass, and be entitled “ An Act to amend an Act, passed in the 27th year of the Reign of Her present Majesty, and entitled ‘ An Act for the amendment of the General Water Company Acts, and also of the Act for the Incorporation of the Harbor Grace Water Company.’ ”

Ordered,—That the Mr. Bennett and Mr. Rorke, do take the Bill to Legislative Council, and desire their concurrence.

The Hon. ATTORNEY GENERAL, from the Select Committee appointed to inquire into the petition of Alexander MacKay, Manager in Newfoundland of the New York, Newfoundland and London Telegraph Com-

pany, praying for an Act to enable them to increase the Capital Stock of the Company, presented the Report, which he handed in at the Clerk's Table, where it was read, as follows:—

The Select Committee appointed by Your Honorable House to take into consideration the Petition of the New York, Newfoundland and London Telegraph Company, praying for an Act of the Legislature to authorise the increase of the Capital Stock of the said Company to the further extent of Three millions of Dollars, for the purpose of running additional lines of Telegraph wires in this country and a Cable from Placentia Bay to some part of the American continent, beg leave to report that they have taken the evidence on the subject of Mr. Mackay, the Agent of the Company in this Colony, and have given due consideration to the whole matter of the Petition.

Mr. Mackay was unable to furnish the Committee with any statement of accounts of the Expenditure by the Company under their former charter, which enabled them to lay out Three millions of Dollars on Telegraph lines in this country. It is obvious that the information is necessary to enable the House to determine as to the sufficiency of the grounds on which the present application is made. The reason assigned by the Agent of the Company for their inability to produce these accounts, is that by a fire in New York, in 1860, by which Mr. Field's premises were burned, the Books and papers of the Telegraph Company, which were in Mr. Field's possession were destroyed, and no copies are attainable. The Committee, while believing this statement to be correct, regret to be called on to act in the absence of that *data* which is invariably demanded in a case of this description, and by which alone such an application can be satisfactorily sustained.

The Committee, however, being fully alive to the interests involved in the grand undertaking with which this Petition is connected, felt that objections, though just in themselves, and strong enough to prevail in an ordinary case, may yet be insufficient when weighed by the considerations which, directly and indirectly, belong to the present question. The Works now proposed, and for which the additional Capital is said to be necessary, are required to facilitate the business of the Atlantic Cable, and will result, it is believed, and asserted by Mr. MacKay, in a material reduction of the present rates of messages. Employment will also be given, during the coming season, in the construction of the new landlines, to a large number of operatives; and in these facts are embraced advantages of so important a character that the Committee, having further regard to the spirited efforts and sacrifices already made by the New York, Newfoundland and London Telegraph Company, beg to recommend that the prayer of the petition be complied with, by granting the privileges which the Company seek.

It appears in evidence from Mr. MacKay that the Telegraph line between St. John's, and Trepassey has been taken down at the instance of the Company. It is one of the stipulations of the existing charter that

this line of Telegraph shall be maintained and worked ; and the Committee, therefore, feel that the violation of this condition of the charter is without warrant, and they beg to report it for the consideration of the House and the Government.

Respectfully submitted,

F. B. T. CARTER,
A. SHEA,
H. RENOUF,
S. RENDELL,

COMMITTEE ROOM,
HOUSE OF ASSEMBLY,
March 15th, 1867. }

Ordered,—That the said Report be adopted.

Mr. RENOUF presented a petition from Thos. Butler, of St. John's, which was received and read, praying for compensation for loss sustained in being obliged to remove a house from his private property by order of the Government.

Ordered,—That the said petition do lie upon the table.

Mr. PROWSE presented a petition from J. P. Le Gross and others, of Petites, John Cunningham and others, of Rose Blanche and Harbor Le Cow: also from Walter Shelly and others, of Burnt Island, in the District of Burgeo and La Poile, which were severally received and read, praying for grants to complete roads in those localities.

Ordered,—That the said petitions do lie upon the table.

Mr. BARRON gave notice that, on to-morrow, he will ask the Hon. Colonial Secretary, for a return of the name or names of the persons with whom the Government contracted to supply Poor Relief, last fall, in that portion of the District of Placentia and St. Mary's known as Salmonier; also for a return of the name or names of the Commissioners appointed to distribute said Relief, and whether any return has been furnished of the description and amount of work done; and also to ask if the Contractors for the supply of such Poor Relief have been paid any, and what amount, on account, without certificate of the Commissioners.

Mr. KEARNEY gave notice that, on to-morrow, he will move an address to the Governor on the petition from the Inhabitants of Renewse, for deepening the Bar there.

Mr. PARSONS gave notice that, on to-morrow, he will move an address to the Governor on the petition of John Connell, late Chief Constable of Harbor Grace.

Also that, on to-morrow, he will ask the Hon. COLONIAL SECRETARY to lay upon the table of the House, a return of the number of effective men in each Company of the St. John's Volunteer Battalion, the amount of Ball ammunition delivered in 1866 to each Company, the number of accoutrements and Uniforms delivered to each Company; and a general account of the expenditure of the Volunteer Grant in 1866; whether

each Company of the Battalion is entitled to its proportion of said grant, and whether any Uniforms or Accoutrements remain on hand, and if so, in whose possession.

The Hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will ask leave to bring in a Bill to amend the Act for the Incorporation of the New York, Newfoundland and London Telegraph Company.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 21st March, 1867.

The Bill for the Protection of married women in certain cases.

Ordered,—That the said Bills be severally read a second time tomorrow.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message:

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled "An Act to amend the Constitution of the Supreme Court of this Colony, and to abolish the Circuit Courts," with some amendements, to which they request the concurrence of the Assembly.

EDWARD MORRIS,
Senior Member.

LEGISLATIVE COUNCIL, }
27th March, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Message do lie upon the Table.

The amendements of the Legislative Council in and upon the Bill sent up from the Assembly, entitled "An Act to amend the Constitution of the Supreme Court, and to abolish the Circuit Courts", were read a first time, and are as follows:

At the end of the third section add, "The determination of one Judge of the Supreme Court may be reheard, on motion of any party feeling himself agrieved, before two or more Judges, in the manner prescribed by the 5th section."

Fifth Section, on the first line, after the words "Supreme Court," insert in Saint John's, and on the 7th line, after the word "equity," insert "and in Revenue Cases."

Fourteenth Section, on the fifth line, after the word "Judge," insert "on Circuit," and on the eighth line, after the word "there," add "or may have a Special case, Equity suit, or any information action or suit, relating to the Revenue reheard."

Fifteenth Section, after the word "St. John's," on the last line, add,

“and they shall, after the passing of this Act, be styled the Chief Clerks and Registrars of the Supreme Court on Circuit.”

Nineteenth Section, after the word “Court,” on the second and third line, expunge the words “against any person wherever within its jurisdiction, and,” and insert, in lieu thereof, “returnable before the Supreme Court in Saint John’s, or in the District where the Defendant or his Agent may reside,” and on the fourth line, after the word Writs,” insert as may be issued out of St. John’s.”

Twentieth Section, at the end of the last line, add “and any records and proceedings, not carried to final execution at the time that this Act shall come into operation, shall become the records and proceedings of the Supreme Court on Circuit, or otherwise, as the case may be, and final judgment and execution, as if the same had been initiated in the Supreme Court.”

EDWARD MORRIS,
Senior Member.

PASSED THE LEGISLATIVE COUNCIL, }
27th March, 1867. }

Ordered,—That the said amendments be read a second time to-morrow.

On motion of the hon. ATTORNEY GENERAL, seconded by Mr. RENDELL.

Resolved,—That a Select Committee be appointed to report upon the petition of Robert Brown, Esq., the Manager of the Commercial Bank.

Ordered,—That the Hon. Attorney General, Mr. Rendell, Mr. Borke, Mr. Renouf, and Mr. Hogsett, do form the Committee.

On motion of Mr. FUREY seconded, by Mr. HOGSETT.

Resolved,—That the following Address be presented to His Excellency the Governor.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying petition of Robert Reader, respectfully request Your Excellency will be pleased to take the said petition into your consideration, and make such order thereon as may appear reasonable.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such members of this House as are of the Honorable Executive Council.

On motion of Mr. RORKE, seconded by Mr. GREEN,

Resolved,—That the following Address be presented to His Excellency the Governor.

To His Excellency ANTHONY MUSGRAVE, Esquire, Governor and Commander-in-Chief, in and over the Island of Newfoundland and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration, the accompanying petition of John Moran, Stephen B. Pike, and others, inhabitants of Carbonear, on the necessity of a Pump for that locality, respectfully request Your Excellency will be pleased to take the said petition into your consideration, and make such order thereon as may appear reasonable.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such members of this House as are of the honorable Executive Council.

On motion of the hon. SOLICITOR GENERAL, seconded by Mr. RENOUF,

Resolved,—That the following Address be presented to His Excellency the Governor.

To His Excellency ANTHONY MUSGRAVE, Esquire, Governor and Commander-in-Chief, in and over the Island of Newfoundland, and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition from James Lampin, respectfully request that Your Excellency will be pleased to take the said Petition into Your favorable consideration, and make such order thereon as may appear reasonable.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such members of this House as are of the honorable Executive Council.

Pursuant to notice, and on leave granted, the following Bills were severally read a first time.

The Bill to make provision for the Reduction of the Public Expenditure, in prospective abolition of certain offices.

The Bill to amend the Act to Incorporate the New York, Newfoundland and London Telegraph Company.

The Bill to amend the Act to regulate the making and repairing of Roads, Streets, and Bridges within this Colony.

A Bill to amend the Act to preserve the Harbours and Roadsteads of Newfoundland and its Dependences from Nuisances and Obstructions.

A Bill to amend the Acts, for the encouragement of Education.

Ordered,—That the said Bills be severally read a second time to-morrow.

Pursuant to order of the day, the Bill for granting to Her Majesty, certain Duties on Goods, Wares, and Merchandize, was read a second time.

Ordered,—That the House do, on to-morrow, resolve itself into Committee of the whole on the said Bill.

Ordered,—That the House do, on Monday next, resolve itself into Committee of the whole on the State of the Colony.

Mr. PINSENT gave notice that, on to-morrow, he will move an address to the Governor, on Petitions from Brigus relative to Pumps and Wells.

Also that, on to-morrow, he will move resolutions relative to Coastal Steam, and the employment of two Steamers.

The hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will ask leave to introduce a Bill to amend the Jury Acts.

Mr. PROWSE gave notice that, on to-morrow, he will move an address to the Governor, to request His Excellency to obtain from the Colonial Office copies of the Report of the Anglo French Commission on the Fisheries, also the report of Mr Crowe, together with other reports presented to the Imperial Parliament, on the Fisheries of Europe.

Mr. HOGSETT moved, seconded Mr. TALBOT,

That the following Address be presented to His Excellency the Governor.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the subject of the appropriation of a large balance of £600, due the Commercial School at Jersey Harbor, Fortune Bay, are of opinion that under the terms of the Education Act, 21 Vic. Cap. 7, Sec. 3, that School was non-denominational, and that therefore all children of every creed had access thereto : And funds at the disposal of the Government to the credit of that School should have been fairly divided amongst all creeds in that District, according to population.

And further the House of Assembly have no satisfactory evidence, that the Board of Education in Fortune Bay, followed in the distribution of the said balance, the terms prescribed by the statute 29 Vic. Cap. 16, Sec. 1.

The House are, therefore, of opinion, that the Catholic population of Fortune Bay should be paid their share of the balance due the Commercial School of Jersey Harbor.

Ordered,—That the Debate on the above Address be adjourned, until Wednesday next.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 28th March, 1867.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of Roads and Bridges.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had considered the business to them referred, and had come to certain Resolutions thereon, which they had directed him to report to the House, and he handed the said Resolutions in at the Clerk's Table, where they were read as follows :

Resolved,—That there be granted to Her Majesty, Her Heirs and Successors, the sum of Eighty-four Thousand Three Hundred and Twenty Seven Dollars fifty cents, for making and repairing Roads, Streets and Bridges in this Colony.

On Main Lines of Roads, \$24.676, as follows :—

| LOCALITY. | REMARKS. |
|-------------------------------------|--|
| St. John's to Brigus..... | \$2800.00 \$300 to Killegrews, \$2000 from Killegrews to Brigus. |
| Brigus to Carbonear..... | 1100.00 |
| Carbonear to New Perlican..... | 1020.00 |
| Carbonear to Bay-de-Verds..... | 1056.00 |
| Trinity to Bonavista..... | 1080.00 |
| Trinity to King's Cove..... | 1000.00 |
| King's Cove to Tickle Cove..... | 200.00 |
| Northern Main Route..... | 2300.00 |

Then the House adjourned till to-morrow, at 3 of the clock,

Tuesday, 2nd April, 1867.

Mr. HOGSETT, from the Select Committee appointed to inquire into the Management of the Saint John's Hospital, presented the Report, which he handed in at the Clerk's Table, where it was read, as follows:—

The Select Committee appointed by the House of Assembly to enquire into, and report upon the condition of the Saint John's Hospital, beg to report that having taken the accompanying evidence, they are unanimously of opinion that the present Building, from its deficient internal arrangements, its age and general rottenness, as well as from the absence of all those sanitary appliances which are considered necessary in every civilized country for the care and comfort of patients, should not, any longer, be used for the purpose of an Hospital. They are also of

opinion that further repairs upon the present Building are wholly useless, and that a new brick or stone Hospital, capable of containing, at least, one hundred and twenty patients, and with all the modern appliances for ventilation, cleanliness, and other sanitary arrangements, should be built at once. The Committee are also of opinion that the Keeper should reside on the Building, and that his habit of sleeping, as at present, at his own house, is injurious to the interests of the Institution; that there should also be increased male attendance, and especially a Second Dresser, and a male Night-watch.

That from the evidence of the Physician Superintendent of the Hospital, and from the fact that no other Hospital containing the same number of patients is left to the sole charge of one Physician having a large private practice, the Committee are of opinion that there should be either two visiting Physicians, or one resident House Surgeon and a consulting Physician.

All which is respectfully submitted.

G. J. HOGSETT,
Chairman.

JOHN RORKE,
D. W. PROWSE,
JOHN T. BURTON,
MICHAEL KEARNEY.

COMMITTEE ROOM,
HOUSE OF ASSEMBLY, }
2nd April, 1867. }

Ordered,—That the said Report do lie upon the table.

(*For Evidence accompanying see Appendix.*)

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of Supply.

The SPEAKER left the Chair.

Mr. KNIGHT took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the business to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit on Friday next.

Mr. PROWSE gave notice that, on to-morrow, he will move an Address to the Governor, for a Lock-up at Burgeo.

The hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will ask leave to introduce a Bill to amend the Act 29 Vic., Cap. 13; Also, a Bill to amend the Commercial Bank Act.

Also, a Bill respecting the grant of land to C. F. Bennett, Esq.

Then the House adjourned till to-morrow, at 3 of the clock.

Wednesday, 3rd April, 1867.

Ordered,—That the said petitions do lie upon the table.

The hon. ATTORNEY GENERAL, from the Select Committee on the petition of Robert Brown, Manager of the Commercial Bank, presented the Report, which he handed in at the Clerk's Table, where it was read, as follows :—

The Select Committee appointed to inquire into the Petition of Robert Brown, Manager of the Commercial Bank of Newfoundland, praying for some alterations in the Act of Incorporation of said Bank, have taken the same into consideration, and beg to Report that they can see no objection to the Legislature sanctioning the prayer of the Petition.

F. B. T. CARTER,
JOHN RORKE,
S. RENDELL,
GEO. J. HOGSETT.

COMMITTEE ROOM,
HOUSE OF ASSEMBLY,
1st April, 1867. }

Ordered,—That the Report be adopted.

The hon. SOLICITOR GENERAL moved, seconded by Mr. Rorke,

That the following Address be presented to His Excellency the Governor.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly respectfully request that your Excellency will be pleased to cause arrangements to be made for the visit of the "Ariel" or some other suitable steamer, to the Labrador coast, the ensuing summer, at such time as may be deemed most conducive to the interests of the Trade and Colony, for the purpose of obtaining information therefrom, and for other necessary purposes, and for the expenses attending which service, this House will indemnify your Excellency.

Whereupon, the hon. ATTORNEY GENERAL moved, in amendment, seconded by Mr. HOGSETT,

That the following Address be presented to His Excellency the Governor, in lieu thereof,

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly respectfully request that your Excellency will be pleased to take into consideration the expediency of causing arrangements to be made for the visit of the "Ariel" or some suitable steamer, to the Labrador Coast, the ensuing summer, at such time as may be deemed most conducive to the interests of the Trade, for the purpose of obtaining information therefrom, and for the expenses attending such service, this House will indemnify your Excellency.

And the question being put thereon, it passed in the affirmative, and
Ordered,—Accordingly.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such members of this House as are of the honorable Executive Council.

Ordered,—That the following Addresses be severally presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration, the accompanying petition of Richard Delaney and others, inhabitants of Bay Roberts, respecting the loss and injury sustained by Petitioners and others, by discharging ballast in Holton Harbor, Labrador ; respectfully request Your Excellency will be pleased to take the said petition into Your consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petitions from Patrick Furlong ; respectfully request your Excellency will be pleased to take the said Petition into your consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Dependen-
cies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of John Keating, on account of losses referred to in the Petition, respectfully request your Excellency will be pleased to take the said Petition into your favorable consideration, and make such order thereon, as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Dependen-
cies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having under consideration the accompanying Petition of John Connell, respectfully request your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having under consideration the accompanying Petition of William Forestal and others, inhabitants of Renew's, respecting the deepening of the entrance of Renew's Harbour; respectfully request your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petitions of the Agricultural Society, respectfully request Your Excellency will be pleased to take the said Petition into Your consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying petition of John Cunningham and others, on the necessity of a Lock-up at Burgeo, respectfully request Your Excellency will be pleased to take the subject matter of the said Petition into Your consideration and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

Ordered,—That the Bill be engrossed, and read a third time to-morrow.

Pursuant to order of the day, the following Bills were severally read a second time.

The Bill to amend the Act to Incorporate the Commercial Bank.

The Bill for granting to Her Majesty a sum of money for making and repairing Roads, Streets, and Bridges.

The Bill to amend the Act 29 Vic., Cap 13, relating to Marine Courts.

Ordered,—That the House do, on to-morrow, resolve itself into Committee of the Whole, on the said several Bills.

The Hon. ATTORNEY GENERAL, from the Joint Committee of the Council and Assembly, appointed on the subject of British Territorial Rights and French Privileges, on that part of the Coast of this Island called the French Shore, presented the Report, which he handed in at the Clerk's Table, where it was read as follows:—

The Joint Committee appointed by Resolution of the Legislative Council and House of Assembly, in reference to the question of British Territorial Rights and French Privileges, on that part of the Coast of this Island called the French Shore, respectfully report:—

That they have had under consideration the Speech of His Excellency the Governor at the opening of the present session, and the Despatches therein referred to, with the Treaties and other Documents relating to the subject matter of their inquiry.

Your Committee submit that no question can arise under the Treaties, as to the dominion of the soil on the so-called French Shore, in common with the whole Island of Newfoundland, belonging to the Crown of Great Britain; and such right, in all negotiations between the two nations on the subject of the Treaties has never been impeached. But certain privileges are claimed by the French under these Treaties and accompanying Declarations, in making erections and otherwise, on the coast, for fishery purposes; and it is contended that British subjects are prohibited from having fixed settlements there.

Your Committee further submit that, without French permission, it is lawful for British subjects to construct buildings and reside therein, for purposes apart from those of Fishery, and to make use of the strand for all purposes essential to the exercise of the Territorial Dominion of the interior land; and that the term "fixed settlements," referred to in His Britannic Majesty's Declaration, applies only to such as are in connection with the Fisheries.

It would appear to your Committee that the objection to issuing Grants and Licenses has arisen from the construction given by the French to their Treaty right to the use of the shore in connection with the Fishery; and whilst it is advisable that any uncertainty on this point should be removed by amicable arrangement, yet your Committee submit that the territory being unquestionably in Great Britain, the Local Executive is authorized to issue Grants and Licenses for Agricultural

Mining and other purposes which have not for their object the interruption of the French by competition in the Fishery.

In St. George's and White Bays—particularly in the former—are extensive establishments of British subjects, who have been undisturbed at all times, both on land and in the prosecution of a general Fishery.—There is also a growing settlement in the Bay of Islands, where the Cod-fishery is but partially engaged in, and your Committee would deem it manifestly unjust, that unoffending settlers in these places and other parts of the Coast should be molested in their habitations or fishery. On the Coast are French Establishments of a substantial character, unauthorized by the Treaties.

Your Committee are, however, aware that in the construction of the Treaties, as regards the respective rights and privileges of the subjects of both nations, there has not been general acquiescence, and they would recommend a concurrence in any fair adjustment for the better observance and execution of existing Treaties, which did not concede any further rights of Fishery to the French on the Coast of this Island, nor any rights or privileges whatever at Belle Isle and Labrador.

With this view, and in the acceptance of the suggestions of Her Majesty's Imperial Government, for the resumption of negotiations with the Government of France, in order that the utilization of Territorial rights may no longer be obstructed,—

Your Committee recommend that the Legislature should state to Her Majesty's Government, that they are not prepared to agree to any concessions to the Government of France which would convey to the French, rights of Fishery which they do not now possess, but they would recommend the Legislature to consent that the valuable and important right to purchase Bait, both Herring and Caplin, on the Southern Coast, be conceded to the French, at such time as British subjects may lawfully take the same.

It being thus clearly understood that any further concession with regard to rights of fishery are to be excluded from the negotiation, your Committee are of opinion that it would be desirable for the interests of all parties, if Her Majesty's Government should be able to make such an arrangement with the Government of France as would embrace the following matters, viz :

1.—The Establishment of a Joint Naval Commission which shall only take cognisance of such matters as relate to the Fisheries, and in case of disagreement, reference to be made to the respective Governments; all other questions shall be dealt with by the competent authorities.

2.—That the existing British settlements in St. George's Bay, including Cod Roy, the Bay of Islands, and White Bay, shall remain undisturbed, and that there shall be no interruption by the French to fishing by the British in those Bays; nor interference with their buildings and enclosures there, nor with any erections or buildings on any part of the French shore which do not interfere with the fishery privileges of the

French, as shall be determined by the Commissioners; nor shall British subjects be molested in fishing on any part where they do not actually interrupt the French by their competition.

3.—That no building or enclosure which shall have been erected for five years, shall be removed as interfering with the French fishing privileges, without compensation, to be determined on by the Commissioners; but no compensation shall be payable for any Building or enclosure hereafter erected without the consent of the Commissioners.

4.—That the Commissioners, should determine the limit or boundary line, to which the French may prosecute their fishery; the British having the exclusive right of Salmon fishing in rivers.

5.—That the breadth of strand of which the French should have the right of use should be defined, thus removing objections to grants of land beyond the boundary so to be defined, and within the same for mining purposes, right being reserved to the British Government, to erect on such strand works of a Military or other Public character; and to British subjects, for wharves and buildings necessary for mining, trading and other purposes apart from the Fishery, in places selected with the permission of the Commissioners.

On the basis of the foregoing propositions, your Committee respectfully recommend that the Legislature should request Her Majesty's Government to resume negotiations with the Government of France for such an agreement as will accomplish these objects, while ensuring the effectual execution of existing Treaties, and the sustainment thereunder of the rights of the subjects of both nations.

N. STABB,
Chairman,

F. B. T. CARTER,
 R. J. PINSENT, JR.,
 T. R. BENNETT,
 JOHN KENT.

COMMITTEE ROOM, }
 8th April, 1867. }

Ordered,—That the Report do lie upon the table.

The Hon. ATTORNEY GENERAL gave notice that, on to-morrow, he will move the adoption of the Report of the Committee on British Territorial Rights and French Privileges: also for an Address to the Governor on the same subject.

Mr. KNIGHT gave notice that, on to-morrow, he will move an Address to the Governor on the petition of Smith McKay and others, for a road to Tilt Cove Mine.

THE CHAIRMAN OF THE BOARD OF WORKS presented a petition from Peter Coleman, Packet Master between Trinity and New Perlican, which was received and read, praying for an increased allowance to enable him to carry out the service.

Ordered,—That the said petition do lie upon the table.

Mr. KAVANAGH presented petitions from Michael Fennessy and others, of Middle Cove, John Delaney and others, of Pine River, John Sankey and others, of Torbay, from Matthew Cullen and others, of same place, John Pownder and others, of Torbay, North side, and from Patrick O'Donnell and others, of Outer Cove, which were severally received and read, praying for grants to open and complete roads in those localities.

Ordered,—That the said petitions do lie upon the table.

He also presented a petition from James J Winser and others, of Queen's Road, which was received and read, praying that additional sewerage may be provided in that locality.

Ordered,—That the said petition do lie upon the table.

Mr. O'RIELLEY presented a petition from Thomas English and others, of Point Lance, which was received and read, praying for a grant to open a road from thence to their Fishing Rooms.

Ordered,—That the said petition do lie upon the table.

Mr. RENDELL presented a petition from Thomas Hyde and others, of Red Head Cove, which was received and read, praying for a grant to complete the road from thence to the Bay de Verds main line of road.

Ordered,—That the said petition do lie upon the table.

The Hon. COLONIAL SECRETARY presented a petition from Patrick Colford and others, of Red Lands, which was received and read, praying for a grant to enable them to blast a rock obstructing the access to their Fishing rooms.

Ordered,—That the said petition do lie upon the table.

The Hon COLONIAL SECRETARY gave notice that, on to-morrow, he will move an address to His Excellency the Governor, on the foregoing petition of P. Colford and others.

Mr. KAVANAGH gave notice that, on to-morrow, he will move an Address to the Governor on the petition of James J. Winser and others.

Then the House adjourned till to-morrow, at 3 of the clock.

Wednesday, 10th April, 1857.

Pursuant to order of the day, the following Bills were severally read a third time.

The Bill to amend the Act to Incorporate the New York, Newfoundland, and London Telegraph Company.

The Bill to amend the Act for the encouragement of Education.

The Bill to amend the Act for regulating the making and repairing of Roads, Streets and Bridges within this Colony.

The Bill to amend the Act to Preserve the Harbours and Roadsteads of Newfoundland and its Dependencies from Nuisances and Obstructions.

Ordered.—That the first Bill do pass, and be entitled “An Act to amend an Act, passed in the 17th year of the Reign of her present Majesty, entitled ‘An Act to Incorporate a Company under the style and title of the New York, Newfoundland and London Telegraph Company.’”

Ordered.—That the second Bill do pass, and be entitled “An Act to amend the Acts for the encouragement of Education.”

Ordered.—That the third Bill do pass, and be entitled “An Act to amend an Act, passed in the 27th year of the Reign of her present Majesty, entitled ‘An Act to regulate the making and repairing of Roads, Streets and Bridges within this Colony.’”

Ordered.—That the fourth bill do pass, and be entitled “An Act to amend an Act, passed in the second year of the reign of Her present Majesty, entitled ‘An Act to preserve the Harbours and Roadsteads of Newfoundland and its Dependencies from Nuisances and Obstructions.’”

Ordered.—That Mr. PINSENT and Mr. HOGSETT do take the Bills to the Legislative Council, and desire their concurrence.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message:

Mr. SPEAKER,

The Legislative Council respectfully request that the House of Assembly will furnish this House with the Evidence or Report in proof of the allegations or matter whereon the Bill entitled “An Act to amend an Act passed in the 15th year of the Reign of Her present Majesty, entitled ‘An Act to Incorporate a Company under the style and title of the New York, Newfoundland and London Telegraph Company,’” is founded.

NICHOLAS STABB,
Senior Member Presiding.

LEGISLATIVE COUNCIL, }
10th April, 1867. }

And then the Messenger withdrew.

Ordered.—That the said Message do lie upon the table.

Pursuant to Order of the Day, the Amendments of the Legislative Council upon the Bill to amend the Constitution of the Supreme Court of this Colony, and to abolish the Circuit Courts, were read a third time.

Ordered.—That the amendments do pass, and that a Message be sent to the Legislative Council, acquainting them that this House concurs therein.

Ordered,—That the Hon. COLONIAL SECRETARY and Mr. PINSENT do take the Message to the Legislative Council.

Ordered,—That the following Addresses be severally presented to His Excellency the Governor:

To His Excellency ANTHONY MUGRAVE, Esquire, Governor and Commander-in-Chief, in and over the Island of Newfoundland and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly having had under consideration the accompanying Petition of J. Winser and others inhabitants of St. John's, respectfully request that Your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

To His Excellency ANTHONY MUSGRAVE, Esquire, Governor and Commander-in-Chief, in and over the Island of Newfoundland and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly having had under consideration the subject of Local Steam Communication, would respectfully suggest the desirability of providing two steamers for the prosecution of that service, as well as for the special purposes for which it often becomes necessary to employ steamers.

The House of Assembly submits that this important Public Service cannot be efficiently and satisfactorily performed with one Steamer of the character of the vessel now employed.

The House would, therefore, request that, for its information, the next session, Your Excellency will cause steps to be taken to ascertain the likelihood of obtaining suitable vessels, particularly for the Western Coastal Service, with the probable annual cost thereof, and what subsidy the French Government at St. Pierre, Miquelon, would be willing to contribute, and the feasibility of extending Western Steam Communication to Nova Scotia, and the probable cost of such extension.

To His Excellency ANTHONY MUSGRAVE, Esquire, Governor and Commander-in-Chief, in and over the Island of Newfoundland and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying petition of James Leamon and others, inhabitants of Brigus, on

the subject of Pumps and Wells, respectfully request that Your Excellency will be pleased to take the said petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of John Hellyer and Roger Down, respectfully request that Your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanyine Petition of Patrick Dealy and others, on the subject of the Top-sail Lime Quarry, respectfully request that Your Excellency will be pleased to take the said petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Report of a Select Committee on the subject of the St. John's Hospital, respectfully request that Your Excellency will be pleased to take the said Report into consideration, and take such course as may be within the means of the Government towards remedying the evils complained of, and this House will indemnify Your Excellency.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depen-
dencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying petition of Samuel Cose, respectfully request that Your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the great utility of a Harbor of Refuge at Long Pond, and the willingness of the Inhabitants of that settlement in appropriating a portion of their Road Grant, this season, in aid of this useful purpose, respectfully request that Your Excellency will be pleased to take the matter into consideration, and make such order thereon as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had attention called to the present state of the Toad's Cove Breakwater, respectfully request that Your Excellency will be pleased to take the subject into consideration, and make such order therein as may appear reasonable.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Petition of Smith McKay and others, inhabitants of the North Shore of Green Bay and Bay of Notre Dame, on the subject of Roads and Postal Communication, respectfully request that Your Excellency will be pleased to take the said Petition into consideration, and make such order thereon as may appear reasonable.

Ordered,—That the said several Addresses be engrossed, and presented to His Excellency the Governor by such Members of this House as are of the Hon. Executive Council.

On motion of Mr. KAVANAGH, seconded by Mr. TALBOT,

Resolved,—That a Select Committee be appointed to enquire into the petition of John Woods.

Ordered,—That Mr. Kavanagh, Mr. Talbot, Mr. Rendell, Mr. Rorke, and Mr. Pinsent do form the Committee.

The hon. RECEIVER GENERAL, pursuant to notice, and on leave granted, presented the following Bills, which were severally read a first time :

The Bill to consolidate a portion of the Public Debt of the Colony.

The Bill for granting to Her Majesty a sum of money for defraying the Civil Expenditure of the Colony, for the year 1867.

A Bill to Indemnify His Excellency the Governor for certain monies advanced by him on account of the Public Service.

Ordered,—That the said Bills be severally read a second time to-morrow.

On motion of the Hon. ATTORNEY GENERAL, seconded by the hon. COLONIAL SECRETARY,

Resolved,—That the Rules of the House be suspended in reference to Bills, during the remainder of the Session.

Then the House adjourned till to-morrow, at 3 of the clock.

Thursday, 11th April, 1867.

The hon. RECEIVER GENERAL presented a petition from Wm. Pitts and others, of St. John's, which was received and read, praying that measures may be adopted to lessen the expenses of collecting the Water Tax.

Ordered,—That the said petition do lie upon the table.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message :—

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled, "An Act for granting to Her Majesty certain duties on Goods, Wares and Merchandize imported into this Colony and its Dependencies, without amendment."

NICHOLAS STABB,
Senior Member Presiding.

LEGISLATIVE COUNCIL, }
11th April, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Message do lie upon the table.

On motion of the hon. ATTORNEY GENERAL, seconded by the hon. COLONIAL SECRETARY,

Resolved,—That the following Message be sent to the Legislative Council :

MR. PRESIDENT,

The House of Assembly beg leave to annex, for the information of the Hon. Legislative Council, copy of Report of the Select Committee appointed to take into consideration the Petition of the New-York, New-

foundland and London Telegraph Company, praying for an Act of the Legislature to authorise the increase of the Capital Stock of the said Company, to the further extent of Three Millions of Dollars, for the purpose of running additional lines of Telegraph Wires in this country and a Cable from Placentia Bay to some part of the American Continent, being the proof of the allegations or matter whereon the Bill entitled "An Act to amend an Act passed in the 17th year of the Reign of Her present Majesty, entitled 'An Act to Incorporate a Company, under the Style and Title of the New York, Newfoundland and London Telegraph Company,' " has been founded.

(For Report, see page 92.)

Ordered,—That the hon. ATTORNEY GENERAL and the hon. COLONIAL SECRETARY do take the Message to the Legislative Council.

The Order of the Day for the adoption of the Report of the Joint Committee of the Council and Assembly on French Shore Territorial Rights, being read.

On motion of the hon. ATTORNEY GENERAL, seconded by the hon. COLONIAL SECRETARY,

Resolved,—That the House do now resolve itself into Committee of the Whole upon the said Report.

And the House resolved itself into the said Committee accordingly.

The SPEAKER left the Chair.

Mr. OAKLEY took the Chair of the Committee.

The SPEAKER resumed the Chair.

The CHAIRMAN reported from the Committee, that they had considered the business to them referred, and had made some progress therein, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit again.

Then the House adjourned till to-morrow, at 3 of the clock.

Friday, 12th April, 1857.

Mr. RENOUF presented a petition from John Stack and others, of Middle Cove, which was received and read, praying for a grant to open a road from the East side of that settlement.

Ordered,—That the said petition to lie upon the table.

A Message from the Legislative Council.

The Master-in-Chancery to the Legislative Council brought down the following Messages :

MR. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the following Bills sent up, namely : A Bill entitled " An Act to amend an Act, passed in the twenty eighth year of the Reign of Her present Majesty, entitled ' An Act to regulate the Making and Repairing Roads, Streets and Bridges, within this Colony.' "

A Bill entitled " An Act to amend the Acts for the Encouragement of Education in this Colony."

And a Bill entitled " An Act to amend An Act passed in the seventeenth year of the reign of Her present Majesty, entitled ' An Act to Incorporate a Company under the style and title of the New York, Newfoundland and London Telegraph Company,' " without amendment.

NICHOLAS STABB,
Senior Member Presiding.

LEGISLATIVE COUNCIL, }
12th April, 1867. }

MR. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up, entitled " An Act to amend an Act passed in second year of the reign of Her present Majesty, entitled ' An Act to preserve the Harbors and Roadsteads of Newfoundland and its Dependencies from Nuisances and Obstructions,' " with some amendments, to which they request the concurrence of the Assembly.

LAURENCE O'BRIEN,
President.

PASSED THE LEGISLATIVE
COUNCIL, 24th April, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Messages do lie upon the table.

The SPEAKER left the Chair.

Mr. OAKLEY took the chair of the Committee.

And the House having sat till 12 o'clock,

Thursday, 25th April, 1867.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had made some progress in the business to them referred, and had instructed him to ask leave to sit again, on the further consideration thereof.

Ordered,—That the Committee have leave to sit again.

Then the House adjourned till three of the clock.

Pursuant to Order of the Day, the House resolved itself into Committee of the Whole, upon the further consideration of the Report of the Joint Committee in reference to the question of British Territorial Rights and French Privileges, on the French Shore.

The SPEAKER left the chair.

Mr. OAKLEY took the chair of the Committee.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had passed the resolutions to them referred, with some amendments, which they had directed him to report to the House, and he handed the Report and amendments in at the Clerk's Table.

On motion that the Report be adopted,

Mr. HOGSETT moved, in amendment, seconded by Mr. GLEN,

This House having under consideration the Despatch No. 19, from Lord Carrarvon, late Secretary of State for the Colonies, and bearing date the seventh day of December, A.D., 1866, to His Excellency Governor Musgrave, beg to Report :

1st.—That, under the Treaties of Utrecht and Versailles, the right to the Island of Newfoundland and the adjacent Islands is vested in Her Majesty, the Queen of Great Britain, from which your Committee argue that the power of issuing grants of land, whether for mineral or Agricultural purposes, within that Territory, of right belongs to Her Majesty.

2nd.—Your Committee, whilst they notice in the Despatch that a prohibition is contained against the issue of such grants on the French Shore, fail to observe any clear or definite reason for such prohibition; and whilst your Committee would be desirous of meeting the objections of the Imperial Government in a spirit calculated to lead to a settlement of any questions in dispute in the construction of the Treaties between Her Majesty's Government and the Government of France, on the subject of their respective rights in the Island of Newfoundland and of the Fisheries thereof; yet, in the absence of any knowledge on the part of your Committee, as to the points of dispute between the two Governments, they feel that they would be premature in pointing out matters for compromise which eventfully might embarrass negotiations and suggest objections which were never contemplated by French statesmen.

3rd.—That as the proceedings of the Commission which was appointed in 1861 must be in the knowledge of the Imperial Government, and the objections and rights then urged by the French Government fully known to them, your Committee consider that such objections and demands should be communicated to the local Government, so that they and the Legislature would be in a position to deal with the whole matter in a practical manner, in view of the interests of Her Majesty's subjects in this Colony and the obligations of the Parent State. Your Committee are, therefore, of opinion that the Legislature should by address apply to His Excellency the Governor, respectfully requesting him to urge the views of the Legislature upon the Imperial Government, and seek to obtain the reasons required, for the information of the Legislature at its next sittings.

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—5.

Mr. Hogsett,
 “ Glen,
 “ Renouf,
 “ Talbot,
 “ Furey.

Against the Amendment,—14.

Hon. Attorney General,
 “ Solicitor General,
 “ Colonial Secretary,
 “ Receiver General,
 The Surveyor General,
 Mr. Rendell,
 “ Pinsent,
 “ Knight,
 “ Prowse,
 “ Rorke,
 “ Barron,
 “ Burton,
 “ Parsons,
 “ Kavanagh.

So it passed in the negative,

And the question on the original motion being then put,

Mr. HOGSETT moved, in amendment, seconded by Mr. RENOUF,
 That the following clause be expunged from the Report.

“ Your Committee recommend that the Legislature should state to Her Majesty’s Government, that they are not prepared to agree to any concessions to the Government of France, which should convey to the French rights of Fishery which they do not now possess, under existing Treaties, but they would recommend the Legislature to consent that the valuable and important right to purchase Bait, both Herring and Caplin, on the Southern coast, be conceded to the French, at such times as British subjects may lawfully take the same, upon the terms herein contained being agreed upon.”

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—7.

Mr. Hogsett,
 “ Glen,
 “ Renouf,
 “ Talbot,
 “ Kearney,
 “ Furey,
 “ Prowse.

Against the Amendment,—15.

Hon. Attorney General,
 “ Receiver General,
 “ Colonial Secretary,
 “ Solicitor General,
 The Surveyor General,
 The Chairman Board of Works,
 Mr. Rendell,
 “ Pinsent,
 “ Knight,
 “ Rorke,
 “ Barron,
 “ Oakley,
 “ Burton,
 “ Parsons,
 “ Kavanagh.

So it passed in the negative.

And the question on the original motion being then put,

Mr. HOGSETT moved in amendment, seconded by Mr. RENOUF,

That the following words be added to the second clause of the ninth paragraph, after the word "Government": Provided that in the establishment of such Joint Naval Commission, the Colony of Newfoundland shall be represented by a party appointed by the Government thereof.

And the question being put thereon, the House divided, when there appeared,

For the Amendment,—6.

Mr. Hogsett,
 " Renouf,
 " Furey,
 " Glen,
 " Kearney,
 " Talbot.

Against the Amendment,—13.

Hon. Attorney General,
 " Colonial Secretary,
 " Receiver General,
 " Solicitor General,
 The Surveyor General,
 Chairman Board of Works,
 Mr. Rendell,
 " Knight,
 " Rorke,
 " Pinsent,
 " Barron,
 " Prowse,
 " Kavanagh.

So it passed in the negative.

And the question in the original motion being then put,

Mr. RENOUF moved in amendment, seconded by Mr. HOGSETT,

That the following words be added to the last clause of the Report.—
 And further that in the prosecution of such negotiations, this House are of opinion, that the Colony of Newfoundland should be represented by a party to be appointed by the Government thereof.

And the question being put therein, it passed in the negative, on a similar division, as the foregoing.

And the question being again put on the original motion, it passed in the affirmative, and,

Ordered,—Accordingly.

The said Report, as amended, was read by the Clerk, as follows:—

The Joint Committee appointed by Resolution of the Legislative Council and House of Assembly, in reference to the question of British Territorial Rights and French Privileges, on that part of the Coast of this Island called the French Shore, respectfully report:—

That they have had under consideration the speech of His Excellency the Governor at the opening of the present session, and the despatch

therein referred to, with the Treaties and other documents relating to the subject matter of their inquiry.

Your Committee submit that no question can arise, under the treaties, as to the dominion of the soil on the so-called French Shore, in common with the whole Island of Newfoundland, belonging to the Crown of Great Britain; and such right, in all negotiations between the two nations on the subject of the treaties has never been impeached. But certain privileges are claimed by the French, under these treaties and accompanying declarations, in making erections and otherwise on the coast, for fishery purposes; and it is contended that British subjects are prohibited from having fixed settlements there.

Your Committee further submit that, without French permission, it is lawful for British subjects to construct buildings and reside therein, for purposes apart from those of fishery, and to make use of the strand for all purposes essential to the exercise of the Territorial Dominion of the interior land, and that the term "fixed settlements," referred to in His Britannic Majesty's Declaration, applies only to such as are in connection with the Fisheries. On the coast are French establishments of a substantial character, unauthorized by the Treaties.

It would appear to your Committee that the objection to issuing Grants and Licenses has arisen from the construction given by the French to their treaty right to the use of the shore in connection with the Fishery; and whilst it is advisable that any uncertainty on this point should be removed by amicable arrangement, yet your Committee submit that the territory being unquestionably in Great Britain, the local Executive is authorized to issue Grants and Licenses for Agricultural, Mining, and other purposes which have not for their object the interruption of the French by competition in the Fishery.

Your Committee are however aware that in the construction of the treaties, as regards the respective rights and privileges of the subjects of both nations, there has not been general acquiescence, and they would recommend a concurrence in any fair adjustment for the better observance and execution of existing Treaties which did not concede any further rights of Fishery to the French on the coast of this Island, nor any rights or privileges whatever at Belle Isle, and Labrador.

With this view, and in the acceptance of the suggestions of Her Majesty's Imperial Government, for the resumption of negotiations with the Government of France, in order that the utilization of territorial rights may no longer be obstructed,—

Your Committee recommend that the Legislature should state to Her Majesty's Government, that they are not prepared to agree to any concessions to the Government of France which should convey to the French rights of Fishery which they do not now possess under existing

*quite
correct*

Treaties, but they would recommend the Legislature to consent that the valuable and important right to purchase Bait, both Herring and Caplin, on the Southern coast, be conceded to the French at such times as British subjects may lawfully take the same, upon the terms herein contained being agreed upon.

It being thus clearly understood that any further concession with regard to rights of fishery are to be excluded from the negotiation, your Committee are of opinion that it would be desirable for the interests of all parties, if Her Majesty's Government should be able to make such an arrangement with the Government of France as would embrace the following matters, viz :—

1.—The establishment of a Joint Naval Commission which shall only take cognisance of such matters as relate to the Fisheries, and in case of disagreement, reference to be made to the respective Governments ; all other questions shall be dealt with by the competent authorities.

2.—That the existing British settlements in St. George's Bay, Cod Roy and the Bay of Islands, Bonne Bay and White Bay, shall remain undisturbed, and that there shall be no interruption by the French to fishing by the British in those Bays ; nor interference with their buildings and enclosures there, nor with any erections or buildings on any part of the French shore which do not actually interfere with the fishery privileges of the French, as shall be determined by the Commissioners, nor shall British subjects be molested in fishing on any part where they do not actually interrupt the French by their competition.

3.—That no Building or enclosure which shall have been erected for five years shall be removed as interfering with the French fishing privileges, without compensation, to be determined on by the Commissioners ; but no compensation shall be payable for any such Building or enclosure hereafter erected without the consent of the Commissioners.

4.—That the Commissioners should determine the limit or boundary line, to which the French may prosecute their fishery ; the British having the exclusive right of Salmon and all other fishing in rivers.

5.—That the breadth of strand of which the French should have the right of temporary use for fishery purposes should be defined ; thus removing objections to grants of land for all purposes beyond the boundary so to be defined, and within the same for mining purposes, right being reserved to the British Government to erect on such strand works of a Military or other Public character ; and to British subjects for wharves and buildings necessary for mining, trading and other purposes apart from the fishery, in places selected with the permission of the Commissioners

On the basis of the foregoing propositions your Committee respectfully recommend that the Legislature should request Her Majesty's Govern-

With the exception of the above, the Commission should be empowered to determine the limit or boundary line, to which the French may prosecute their fishery ; the British having the exclusive right of Salmon and all other fishing in rivers.

ment to resume negotiations with the Government of France, for such an agreement as will accomplish these objects, while ensuring the effectual execution of existing Treaties, and the sustainment thereunder of the rights of the subjects of both nations.

Ordered,—That the following Message be sent to the Legislative Council:

MR PRESIDENT,—

The House of Assembly have passed the Report of the Joint Committee of the Legislative Council and this House, on the subject of British Territorial Rights and French Privileges on the French Shore, with some amendments, as herewith accompanied, to which they respectfully request the assent of the Legislative Council.

Amendments made by the House of Assembly, in and upon the Report of the Joint Committee appointed by Resolution of the Legislative Council and House of Assembly, in reference to the Question of British Territorial Rights and French Privileges on that part of the coast of this Island called the French Shore.

2nd Clause.—Seventh line, expunge the word “the” between “all” and “Negociations,” insert after “Negociations,” “between,” and expunge the word “of,” in the same line.

3rd Clause.—Add the following words after Fisheries, at the end thereof, “On the coast are French Establishments of a substantial character, unauthorized by the Treaties.”

Expunge the 5th Clause.

8th Clause.—4th line, between the words “possess,” and “but,” insert “under existing Treaties,” and add, after the word “same,” at the end of this clause, the words “upon the terms herein contained being agreed “upon.”

11th Clause.—Expunge the word “including,” in the 2nd line: insert “Boone Bay” after “Island,” in the 11th line: insert the word “actually” between “not” and interfere,” in the eleventh line.

12th Clause.—8th line, insert “such” between “any” and “Building.”

13th Clause.—5th line, after “Salmon” insert “and all other.”

14th Clause.—After the word “of” in 3rd line, insert the words “temporary use for Fishery purposes,” after the word “lands” in the 5th line, insert “for all purposes.”

W. V. WHITEWAY,

Speaker.

PASSED THE HOUSE OF ASSEMBLY, }
25th April, 1867. }

Ordered,—That the hon. ATTORNEY GENERAL and the hon. COLONIAL SECRETARY do take the Message to the Legislative Council.

Ordered,—That the following Address be presented to His Excellency the Governor :

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Comraander-in-Chief, in and over
the Island of Newfoundland and its Depend-
encies.*

MAY IT PLEASE YOUR EXCELLENCY,—

The House of Assembly, having had under consideration the accompanying Joint Report of this House and the Legislative Council, on the question of British Territorial Rights and French Privileges, on that part of the Coast of this Island called the French Shore, respectfully request that Your Excellency, will be pleased to transmit the same to Her Majesty's Principal Secretary of State for the Colonies.

Ordered,—That the Address be engrossed, and presented to His Excellency the Governor, by such Members of this House as are of the Hon. Executive Council.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Message :

MR. SPEAKER,—

The Legislative Council acquaint the House of Assembly, that they have adopted and passed the Report of the Joint Committee on the the question of British Territorial Rights and French Privileges, on that part of the Coast of this Island called the French Shore, together with the amendments made thereon by the House of Assembly, without amendment.

EDWARD MORRIS,
Senior Member.

LEGISLATIVE COUNCIL, }
25th April, 1867. }

And then the Messenger withdrew.

Ordered,—That the said Message do lie upon the table.

Mr. PROWSE, from the Select Committee appointed to inquire into the Contingencies of the present Session of the Legislature, presented the Report, which he handed in at the Clerk's Table, where it was read, as follows :—

The Select Committee appointed to inquire into the Contingent expenses of the Legislature, for the present Session, beg leave to Report

that they have attended to the duty to them referred, and have come to the following Resolutions thereon:—

Resolved,—That there be paid to the Speaker, Members, Officers and Servants of the House, for their services during the present Session, as follows:—

\$20517.37

We recommend to the favorable consideration of the House, the claim of the three Reporters to an increase of salary, for their increased labor during the Session.

D. W. PROWSE,
Chairman,
 JOHN KAVANAGH,
 J. BEMISTER,
 JOHN HAYWARD,
 THOS. GLEN,
 JOHN T. BURTON,
 EDWARD EVANS,
 T. TALBOT.

Ordered,—That the said Report be adopted.

Mr. PROWSE, in accordance with the foregoing Report, presented a Bill to provide for the Contingent Expenses of the Legislature, which, on leave granted, was read a first and second time.

Ordered,—That the House do now resolve itself into Committee of the Whole, on the said Bill.

And the House resolved itself into the said Committee accordingly.

The SPEAKER left the chair.

Mr. KNIGHT took the chair of the Committee.

The SPEAKER resumed the chair.

The CHAIRMAN reported from the Committee, that they had passed the Bill to them referred, without amendment, and he handed the Bill in at the Clerk's Table.

Ordered,—That the Bill be read a third time this day, and the said Bill was read a third time accordingly.

Ordered,—That the Bill do pass and be entitled "An Act to provide for the Contingent Expenses of the Legislature."

Ordered,—That the Hon. RECEIVER GENERAL and Mr. PROWSE do take the Bill to the Legislative Council, and desire their concurrence.

And the House having sat till 12 o'clock.

Friday, 26th April, 1867.

The SPEAKER informed the House that it was the intention of His Excellency the Governor to prorogue the present Session of the Legislature, at two o'clock this day.

Mr. RENOUF presented a petition from Prescott Emerson, A. J. W. McNeilly, and R. J. Kent, Official Reporters of the House of Assembly, which was received and read, praying for increase of salary, owing to their having performed more work during the Session than required by their contract.

Ordered,—That the said Petition do lie upon the table.

Mr. GLEN presented a Petition from E. D. Shea and James Seaton, Publishers of the Debates of the Assembly, this Session, which was received and read, praying for increased compensation.

Ordered,—That the said Petition do lie upon the table.

Mr. RENOUF gave notice that, on the first day of next Session, he will move that the Reporting and Publishing of the Debates of this House be discontinued, and that the Reporting and Publishing the Debates and Proceedings be left open to the public press.

Ordered,—That the House, at its rising, do adjourn till 11 o'clock.

Then the House adjourned until 11 of the clock.

The House met, pursuant to adjournment.

(A Message from the Legislative Council.)

The Master-in-Chancery to the Legislative Council brought down the following Messages :—

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they have passed the Bill sent up for concurrence, entitled "An Act to provide for the Contingent Expenses of the Legislature," without amendment."

LAURENCE O'BRIEN,
President.

LEGISLATIVE COUNCIL, 26th April, 1867.

Mr. SPEAKER,

The Legislative Council acquaint the House of Assembly, that they concur in, and have passed the Address sent up, to His Excellency the Governor, on the question of British Territorial Rights and French Privileges on that part of the coast of this Island called the French Shore, without amendment.

LAURENCE O'BRIEN,
President.

LEGISLATIVE COUNCIL, 26th April, 1867.

And then the Messenger withdrew.

Ordered,—That the said Messages do lie upon the table.

(A Message from His Excellency the Governor.)

At 2 o'clock, a Message from His Excellency the Governor was delivered by W. F. Rennie, Esq., the gentleman Usher of the Black Rod, commanding the immediate attendance of Mr. Speaker and the House in the Council Chamber.

Accordingly, Mr. Speaker and the House attended His Excellency the Governor in the Council Chamber, when His Excellency was pleased to assent to the following Bill :

An Act to amend the Constitution of the Supreme Court of this Colony, and to abolish the Circuit Courts.

An Act to amend the Practice of the Superior Courts, as regards the Estates of Infants and of persons of Unsound Mind.

An Act to amend the Acts for the Encouragement of Education.

An Act for the Protection of Married Women, in certain cases.

An Act to amend an Act passed in the Twenty-eight year of the Reign of Her Present Majesty, entitled "An Act to regulate the Inland Posts of this Colony."

An Act to amend an Act passed in the Twenty-ninth year of the Reign of Her Present Majesty, entitled "An Act to empower the Superior Courts of this Colony to direct certain Offenders to remove therefrom, and for other purposes."

An Act to amend an Act passed in the Twenty-ninth year of the Reign of Her Present Majesty, entitled "An Act to make Provision for the Constitution of a Marine Court of Enquiry in this Colony."

An Act further to amend an Act passed in the Nineteenth year of the Reign of Her Present Majesty, entitled "An Act to determine the qualification of Jurors to serve in the several Courts of this Island, and to regulate the Empanelling of Juries therein."

An Act to amend an Act passed in the Twenty-eight year of the Reign of Her Present Majesty, entitled "An Act to regulate the Making and Repairing of Roads, Streets, and Bridges in this Colony."

An Act to continue an Act passed in the Twenty-fourth and Twenty-fifth years of the Reign of Her Present Majesty, entitled "An Act to provide for the Organization of a Volunteer Force for the Protection of Newfoundland."

An Act to amend an Act passed in the Second year of the Reign of Her Present Majesty, entitled "An Act to preserve the Harbours and Roadsteads of Newfoundland and its Dependencies from Nuisances and Obstructions."

An Act to amend an Act passed in the Twenty-seventh year of the Reign of Her Present Majesty, entitled "An Act for the Amendment of

the General Water Company Acts, and also of the Act for the Incorporation of the Harbor Grace Water Company.

An Act to amend an Act passed in the Seventeenth year of the Reign of Her Present Majesty, entitled "An Act to Incorporate a Company under the Style and Title of the New York, Newfoundland and London Telegraph Company."

An Act to amend an Act passed in the Twenty-first year of the Reign of Her Present Majesty, entitled "An Act to Incorporate the Commercial Bank of Newfoundland."

An Act to amend an Act passed in the Twenty-seventh year of the Reign of Her Present Majesty entitled "An Act for establishing the Standard Weights of Grain and Pulse, and to Regulate the sale of Bread, Coals, and other Articles."

An Act to facilitate the Recovery of Tenements after due determination of the Tenancy.

An Act for Granting to Her Majesty certain Duties on Goods, Wares, and Merchandize Imported into this Colony and its Dependencies.

An Act for Granting to Her Majesty a sum of money for Defraying the Expenses of the Civil Government of this Colony, for the year ending the Thirty-first day of December, One Thousand Eight Hundred and Sixty-seven, and for other purposes.

An Act for Granting to Her Majesty a sum of Money for Constructing and Repairing Roads, Streets, and Bridges in this Colony.

An Act to Indemnify His Excellency the Governor of Newfoundland for certain Sums of Money advanced by him from the Colonial Treasury, for the Service of the Colony.

An Act to Authorize the Consolidation of part of the Public Debt of this Colony.

An Act to Provide for the Contingent Expenses of the Legislature.

His Excellency was then pleased to make the following Speech :—

Mr. President and Honorable Gentlemen of the Council :

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

The completion of the duties which have engaged your attention during the Session, enables me to release you from further attendance.

I know that many Members of your Honorable Bodies have important occupations requiring their presense in other places at this season of the year, to which they are anxious to return.

I am happy to be able to congratulate you on the generally successful issue of the Seal Fishery, and I trust that the ensuing season may be attended with not less fortunate results from the chief occupation of the people.

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

I thank you for the provision which you have made for Public Service.

Mr. President and Honorable Gentlemen of the Council :

Mr. Speaker and Gentlemen of the Honorable House of Assembly :

I shall have much pleasure in transmitting to the Secretary of State the Report of the Joint Committee appointed by you on the questions relating to what is commonly known as the French Shore, which was adopted by your Honorable Houses. I am certain that Her Majesty's Government will gladly endeavour to carry into effect the views thus expressed by the Local Legislature; and I trust that their expression will lead to such an understanding with the Government of France as will practically remove the vexed questions with regard to our Fisheries which have proved so irritating for many years past, and will be found to be satisfactory to Public feeling, as well as substantially beneficial to the best interests of the Colony.

The Act of the Imperial Parliament recently passed for the Union of Canada, Nova Scotia, and New Brunswick, has accomplished, in respect of these Provinces, the proposal for the Confederation of all the British North American Possessions. The measure contains provisions for the admission of this Colony, in common with others not yet included, upon terms hereafter to be settled. It becomes the duty of each Member of your Bodies to carefully investigate this subject, in order that when at your next meeting it may be again brought under consideration of the Legislature, you may be able deliberately to choose the course to take with regard to the most important question which the community has yet been called upon to decide, and which, in any case, must exercise the greatest influence on its future fortunes. This duty will not be less important than any others which devolve upon you in respect of the constituencies whom you represent, and whose true interests will no doubt obtain you careful consideration.

I earnestly trust that, under the blessing of the Almighty Ruler of all events, your influence and your efforts may be guided towards the promotion of the general prosperity and contentment of the People of this Colony.

After which the President of the Legislative Council, by Command of His Excellency the Governor, said :

GENTLEMEN,

It is the pleasure of His Excellency the Governor, that this General Assembly be prorogued till Wednesday the 3rd day of July, and this General Assembly is accordingly prorogued till Wednesday the 3rd day of July next, to be then here holden.

JOHN STUART,
Clerk, General Assembly.

Postal Returns.

REPORT OF THE POST MASTER GENERAL, FOR 1866.

GENERAL POST OFFICE,
St. John's, 1st February, 1867.

SIR,—

I have the honor to submit, for the information of the Governor and Executive Council, my Seventh general Report of the Newfoundland Post Office, for the year ended 31st December, 1866, with the accompanying Returns, numbering from 1 to 12, shewing the details of the business and transactions of this branch of the public service during that period.

No. 1.—Statement, Account Current, shows the amount of Revenue collected from all sources to be \$11,968.22, being a small increase of \$87.00 on last year's account in the gross revenue collected.

The amount of Postage Stamps sold in 1866 is more than double that of 1865, and the amount collected for Inland and British Packet Postage shews a corresponding decrease the past year, as compared with 1865, as follows :—

| | 1866. | 1865. |
|---|-------------------|-------------------|
| Amount of Inland Postages and Fees..... | \$1259.38 | \$2780.47 |
| Amount British Packet Postage..... | 3122.07 | 5524.19 |
| Amount Postage Stamps sold..... | 7586.77 | 3575.90 |
| | <u>\$11968.22</u> | <u>\$11880.56</u> |

No. 2.—Statement shews the amount of British Packet Postages collected during the year ended 31st December, 1866.

No. 3.—Statement of Inland Postage collected, year ended 31st December, 1866.

No. 4.—Statement of the amount of Inland and British Packet Postage collected, and of Postage Stamps sold, during the year ended 31st December, 1866.

No. 5.—Statement of Postage Stamp Account, for year ended 31st December, 1866.

Postal Returns.

No. 6.—Statement of amount paid for Mail transportation, for the year ended 31st December, 1866.

No. 7.—Statement of amount of Salaries paid to Post Masters, Way Masters, Clerks, &c., for the year ended 31st December, 1866.

No. 8.—Statement embracing a Report of applications for missing Letters, for year ended 31st December, 1866.

No. 9.—Statement embracing a Record of Letters of value amongst Dead Letters, and how they were disposed of.

No. 10.—Statement exhibiting the extent of Money Order transactions between Newfoundland, the United Kingdom, and the British Possessions, during the year ended 31st December, 1866.

No. 11.—Statement of the number and amount of Money Orders issued and paid, and the commissions received at the several Post Offices, during the year ended 31st December, 1866.

No. 12.—Table of Sailings of the *Ariel*, North and West, shewing the dates of her arrival and departure from each port of call, during the year ended 31st December 1866.

The number of Letters, Imperial and Local, received and despatched during the year, was over 151,000; newspapers, about 220,000.

The number of Registered Letters received and despatched was 1098.

| | |
|-------------------------------|------|
| Registered at St. John's..... | 576 |
| At Outport Offices..... | 198 |
| In other countries..... | 324 |
| | 1098 |

The number of Dead Letters disposed of, Local and Foreign, 1691.

| | |
|--|------|
| Received from Outport Postmasters..... | 1121 |
| “ “ London..... | 152 |
| “ “ United States..... | 418 |
| | 1691 |

| | |
|---|-----|
| Returned to London, United States and British Provinces..... | 726 |
| To owners in Newfoundland..... | 965 |

I regret that the facilities given the public for the transmission of Parcels by Post have not been much availed of; also, the Pillar Letter Boxes for receiving Letters for town delivery, (and which I consider a

Postal Returns.

great public accommodation,) are not as much patronized as they should be.

The Money Order business is rapidly progressing,—the number of Orders issued and paid during the year was 1061, amounting to \$20,583.24. The number issued and paid in 1865, was 707, amounting to \$13,111.92.

It will be pleasing to the Government to learn that no loss or fraud has arisen since the introduction of the Money Order system.

On the 24th of November, application was made to His Grace the Post Master General of London, requesting permission to establish an exchange of Money Orders between Newfoundland and the British West India Islands; and His Grace states in his reply, that none of the Post Offices in the British West Indies are under his control, and that the question rests entirely with the Colonies themselves.

I shall take the liberty, at an early day, to request the Executive to bring the matter under the notice of the authorities in the West India Islands.

The New Brunswick Government have not yet adopted the Money Order system with this Colony.

A Way Office has been established at English Harbor, and a Courier in connexion therewith, to take Letters to and from Beloram and adjacent places. The Packet Boat running between Harbor Breton and Garnish calls at English Harbor, going and returning.

A Mail Courier has been established between Burin and Lamaline, calling at the intermediate places, Little and Great St. Lawrence and Lawn, and receives and delivers Letters and Papers at each settlement, going and returning.

The first Mail was despatched (overland) for the Northern settlements on the 3rd ultimo. I trust, from the pains that have been taken to make the arrangement more satisfactory than heretofore, that the service will be performed with more speed and regularity; but, at the same time, it must be borne in mind, that nothing has been done during the year to remove the falling timber and other obstructions, which so impeded the Mail Couriers on their route, as to compel them to abandon it at several places. Through the kindness of the Colonial Secretary and the Board of Works, I was permitted to get Tilts erected at suitable places along the line, which has been done.

A Messenger has been established between Bloody Bay and Salvage;

Postal Returns.

and also between Twillingate and Little Bay of Islands, for the winter months only.

In connection with the Northern Mail route, temporary Way-Officers were appointed at Come by-Chance, Shoal Harbor, (Random Sound,) and Fresh Water.

Arrangements have been made at Trinity and Random Sound, for conveying Mails to and from St. John's and Trinity, in the event of the Packet Boat in Trinity Bay being impeded by ice, or otherwise.

Having, in the foregoing, given a brief Report of the transactions of the Post Office for the year, I would beg leave to state that throughout the whole of the Post Office Department, the utmost unity and harmony prevail, and a most anxious desire is evinced on the part of the Officers, to discharge their duties satisfactorily.

I have the honor to be, Sir,

Your obedient servant,

JOHN DELANY,
Postmaster General.

Honorable JOHN BEMISTER,
Colonial Secretary.

SCHEDULE.

Accompanying this Report are the following Returns:—

- No. 1.—Account Current.
- 2.—Statement of British Packet Postages collected.
- 3.—Inland Postage.
- 4.—British Postage and Postage Stamps.
- 5.—Statement of Postage Stamp Account.
- 6.—Mail Transportation.

JOHN DELANEY,
Postmaster General.

Crown Lands.

REPORT OF THE SURVEYOR GENERAL OF NEWFOUNDLAND, FOR THE YEAR ENDING 31ST DECEMBER, 1866.

*To His Excellency ANTHONY MUSGRAVE, Esquire,
Governor and Commander-in-Chief, in and over
the Island of Newfoundland and its Dependencies.*

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honor to furnish you herewith my report of the state and management of Crown Lands for the year ending December 31st, 1866, and of all proceedings connected therewith; also with some suggestions which I feel may be productive of benefit to the Department under any control, and for the advancement of the Agricultural interests of this Island.

For the past year 214 grants of Land for Agricultural purposes have been issued, containing 1016 Acres, 2 roods and 18 perches, being a considerable increase on that for the previous year, viz:—

| | | A. | R. | P. | | |
|----------|----------------------|------|----|----|--------|----------|
| In 1865, | 52 Grants containing | 609 | 2 | 28 | Amount | \$383.77 |
| “ | 1866, 214 ditto | 1016 | 2 | 18 | “ | 733.15 |

The number of Applications for Grants and Licences to search for Minerals are Thirty two, being an increase on the previous year, 1865, viz:—

| | | Sq. Miles. | | |
|----------|------------------------------------|------------|--------|----------|
| In 1865, | 23 Licences to search, containing, | 69. | Amount | \$530.77 |
| “ | “ 2 Grants | “ 2. | “ | 115.38 |
| | | | | \$646.15 |

| | | Sq. Miles. | | |
|----------|------------------------------------|------------|--------|----------|
| In 1866, | 30 Licences to search, containing, | 90. | Amount | \$892.31 |
| “ | “ 2 Grants | “ 2. | “ | 92.31 |
| | | | | \$984.62 |

Out of the number of applications made the year ending 31st December, 1866, the following have been issued, viz:—

| | | |
|---|--------|----------|
| 1 Grant of Tilt Cove Mine..... | Amount | \$46.15 |
| 1 ditto of Lawn “ | “ | 23.08 |
| 18 Licences to search, at various places..... | “ | 415.38 |
| | | \$484.61 |

Crown Lands.

Independently of the number of Grants issued the past year, 164 are now lying over for delivery, besides 362 Diagrams of Surveys made by the various Outport Deputy Surveyors.

There is also a considerable number of Petitions or applications now before this office for Agricultural land, by parties desirous of purchasing the same, and others for licenses under the Act 23 Vic., Cap. 3, and under the Act of last Session "for the reduction of Pauperism by the encouragement of Agriculture."

It is therefore evident, as well as gratifying to find by the increased demand for land for Agricultural purposes (notwithstanding the Potato failure of the past season) that parties who gave their attention only to the fishery for their support, are at last alive to the necessity of farming, as a more reliable means of support for themselves and families; as an instance of this, fully one-fourth more of Potatoes were sown the past year than in any previous year, and that principally by persons who had cleared land to sow them, who never before had done so.

As there exists a growing desire for the cultivation of land, to meet the wants of applicants, particularly in the neighborhood of St. John's, immediate attention should be given to laying out roads for new locations, and especially in having those re-opened, which were formerly reserved, but which have been inclosed by those having lands adjoining; much land now shut up would thereby be rendered available.

It is also to be regretted that extensive tracts of land should have been granted, as was formerly done, to parties who alone obtained them on speculation, and which still remain in their wild state.

Those parties are demanding excessive rates for the same, thus obstructing the settlement and improvement of the country, whilst considerable sums have yearly been spent for the making and repairing of roads, adjoining the same, consequently I would strongly urge upon the Legislature to make some enactments by which such land-owners should contribute towards the repairs of adjoining roads by a moderate yearly assessment; and in default of payment, such portions of the land should be sold at Auction to meet the same; thus we should form a fund for the improvement of roads contiguous thereto; besides the advantage of bringing into market various lots of land available to the many persons now seeking it for cultivation as a means of support to themselves and families.

In many of the outports necessity also exists of forming new locations to meet the demands of applicants for land, and to blocking off the same previous to parties settling or squatting thereon, in order to secure

Crown Lands.

some degree of uniformity, with the necessary reservations for roads, which would obviate the trouble hitherto experienced in the formation of good lines of roads, saving considerable expense for compensation in removing fences and preventing any land being blocked up or rendered inaccessible.

On my visit to "Musgrave Town," in Bonavista Bay, the past year, I found parties who had settled there, had taken their land adjoining one another, and that along a distance of about four miles, cultivating parts of the same without any consideration where roads would be desirable in connecting one side of the Bay with the other, or making the back land available for further settlement; therefore I experienced much difficulty by endeavoring to evade as far as possible the removal of fences, or running through land upon which any labor had been expended for purposes of cultivation.

To effect the accomplishment of the necessary surveys required for applicants on the outlying roads within the District of St. John's, it becomes an imperative necessity for an increased staff to this Department, the cost of which would in a great measure, if not altogether, be met by an increased sale of land.

In 1860 an Act was passed by the Legislature offering, under certain conditions, free grants of land to parties willing to cultivate the same. In 1862 a Minute of Council was promulgated offering further inducements. In 1863 an Address was passed by the Legislature to His Excellency, praying, "that surveys of waste land be made in the various settlements of the Island, and allotments made suitable to the wants of the Inhabitants"; and again, in the session of last year, still further inducements were offered, but I very much fear such wise intentions of the Government and the Legislature in offering these increased inducements for cultivation, and the improvement of the country and its people will be fruitless, if greater facilities or attention cannot be given by this Department. Many persons, the past autumn, who applied for land, desirous of immediately cultivating the same, could not be attended to or located, in consequence. The necessity, therefore, for such increased assistance I have not failed in bringing under your Excellency's notice, through communication forwarded to the Colonial Secretary.

There are now over twenty Outport Deputy Surveyors. It can therefore be easily imagined how one person alone in the office can test the accuracy of their numerous surveys,—draft grants therefrom and Register the same, besides the multifarious other duties of this office—most of these acting in the outports are not professional land Surveyors, and, with few exceptions, are incompetent, thus entailing the greater care and trouble upon the office.

Crown Lands.

In the present financial position of the Colony I should indeed be sorry to cause a heavier expense, in increasing the staff of this Department, than is imperatively necessary, but I feel I may be permitted to state that I have now the smallest staff ever known in the office, when not one fourth of the work was before it.

As Your Excellency has manifested such a deep interest in promoting Agriculture, I feel it a duty incumbent on this Department to afford every facility in carrying out these views.

As it may be desirable for Your Excellency to be informed of the expense attending this Department, prior to recommending additional assistance to it, I beg to give a condensed statement of receipts and expenses for the year ending 31st December, 1866, in carrying out the "Crown Lands Act," irrespective of the salaries in the Supply Bill.

Dr.

| | | |
|---|----------|-----------|
| Outport Deputy Surveyors and Clerk in Office.. | \$687.45 | |
| F. R. Page, overpaid on Land..... | 11.72 | |
| Incidental expenses of Office, maps, &c..... | 62.76 | |
| | | \$761.93 |
| This sum to credit of "carrying out Crown Lands Act."..... | 435.40 | |
| | | \$1197.33 |

Cr.

| | | |

| Receipt of Fees on Crown Grants..... | \$734.33 | |
| Less this amount paid to my Predecessor..... | 21.61 | |
| | | \$712.72 |
| Ditto on Licences, &c, for Mineral Grants..... | 484.61 | |
| | | \$1197.33 |

I have particularly to draw your Excellency's attention to the inconvenience and loss of time which is felt in this Department, by having its early Registry Books of Crown Grants kept in the Supreme Court, it being then compulsory on parties obtaining grants of Crown Lands to have the same registered there—Memorandums or outlines of Grants issued were only kept in the Surveyor General's Office, and that without Diagrams of same affixed thereto, or even marked off on the maps of the office; therefore, when applications are made to me for Land, I am at a loss to decide if such has been before granted or not: a further necessity

Crown Lands.

exists in having the Registry Books referred to removed to the Surveyor General's Office, in order to complete our maps, which are so essential to the good working of that Office in having them kept up. This Department being now by recent Acts an office of Registry for all Crown Land Grants, hence a greater necessity exists in having the Registry of all Grants of Crown Lands entered in the one office, which would be as great a convenience to the Public as it would be to this Department.

As many Mining Grants have been, and will be applied for during this season, it seems necessary that competent person only should be employed, and some well defined course adopted in regulating such surveys by the Rules and Regulations prescribed by a Minute of Council dated Sept. 16th, 1861. One square mile can be granted to parties holding a License of three square miles for the right of search; but it does not define what extent of frontage such party or applicant may be entitled to.—If a large amount of frontage to that of rearage be given, nearly the whole of the seaboard of Notredame Bay would be monopolized. Surveys, therefore, become most necessary to define the site for roads, so that back land may be rendered accessible, and for transit of Ore, &c. to the Seaboard for shipment,—when those are reserved and mapped off, well arranged lots of mineral lands may then be laid out, with a view of disposal of same, either by granting as heretofore, or by selling in lots, as in Canada.

With regard to our timber lands, and of parties erecting saw or other mills thereon, it appears to me that some alteration is necessary, as the Act 23rd Vic., Cap. 3, which gives a grant in fee to those erecting a saw or other mill, of no less a quantity than two hundred Acres, and without stipulating that in the event of the grantee abandoning the same, or inability to continue to work his mill, the land should again, within twelve months, revert to the Crown. By such stipulations much of our finest land may be spared from being rendered unavailable to parties desirous of cultivating the same.

The amount of frontage on any River or Lake fixed by the said Act, is too much. I am of opinion that not more than fifty acres of timber land be granted to any one person desirous of erecting a saw or other mill, having a frontage of not more than one fourth or fifth—that any further quantity required by the same person, may be held under a License for a given period, at a yearly rental; or purchased at Auction at an upset price, to be fixed by a Minute of Council according to the position and quality of Timber and ability of the applicant to work the same.

Every care should be taken to make our finest Agricultural lands

Crown Lands.

available to parties for Agricultural purposes, as it is daily becoming more and more apparent that to depend upon the fisheries alone for support is too doubtful : attention to farming therefore must necessarily be given. The many persons who have already abandoned the sea shore for more favoured localities are by their improved condition causing greater numbers to follow their praiseworthy example. Such are the numbers now gone to "Musgrave Town" in Bonavista Bay, that a road will have to be opened from the locality to Sweet Bay in order to afford sufficient land required for settlers. To meet the demands or wants of those already settling there, over fifteen hundred acres will be required.

The number of applications for land now before this office, and the number of petitions which up to this time have been presented to the Legislature, praying for assistance to open up new roads to avail themselves of land now accessible, indicate sufficiently the growing desire, as I have before stated, of parties giving their attention to farming as the best auxiliary to the fishery. This desire may be attributed in a great degree to the "Bill for preventing Pauperism by promoting Agriculture," introduced the past session by the Hon. Mr. Shea, and passed into law, of which the good effects are now beginning to be developed.

In Harbor Main a new location has been anxiously desired by its members, Messrs. Hogsett and Fury, to be fixed upon, to be surveyed, and allotments made of the same to meet the wants of many of their constituents, but from want of a Surveyor in that District, and being short handed in this office, the matter has remained unattended to. Arrangements, however, have since been made by me to effect its accomplishment early in the coming season, and I have to hope I shall be enabled to meet the desires of the many applicants now requiring surveys at Pouch Cove, the Bauline road, the new cut road at Flat Rock, at Protestant Town near Portugal Cove, at the Goulds and other outlying settlements of this District, and those of the outports generally.

It is gratifying to find that those persons who, following the example of Mr. John Stares, purpose leaving St. John's to settle on the fine lands of those Northern Bays, are practical farmers, whose example in shewing what may be accomplished will necessarily be of importance to others not accustomed to farming.

Those Bays, being so well sheltered, are fully three weeks in advance of St. John's in earliness of crop, of which Mr. Stares has sufficiently informed himself, and feels confident that wheat sown there will be as certain a crop as in the neighbouring provinces. With this view the Agricultural Society has, I am happy to state, ordered, for early spring use, some seed Wheat, Rye, and Buckwheat, in order to stimulate the Out-

Crown Lands.

port people to grow it, which, in my opinion, they will only be too glad to do. The Agricultural Society are also desirous of importing a few Hand Mills, thus meeting the objection which formerly prevailed, of the uselessness of growing grain, there not being the means of grinding it into Meal.

Through the instrumentality of the Agricultural Society much good has already been accomplished, not only in St. John's, but in the Outports, of which I am acquainted, by the introduction of an improved description of seed Potatoes, of seeds of different kinds, of an improved breed of Horses and Horned Cattle, of an improved breed of Sheep, and through the additional support of the Government, in extending and stimulating an increased attention to rearing the same, of facilitating farming operations by the introduction of improved farming implements. They have also under consideration the applications from Bonavista and other Outports, which recommend the importation of some male Donkeys, with a view of rearing Mules, in order to supersede the use of the Dog for slide hauling and other draught purposes, upon which the outport people at present set so great a value, but which is so detrimental to the rearing of Sheep.

The Agricultural Society, in order to further the views of Your Excellency, enunciated in your Speech at the opening of this Session, have been recommending greater attention to the growing of other esculents, rather than depending solely on the supply of Potatoes.

Before concluding this Report, I cannot but refer to my visit to "Musgrave Town" in the latter part of June last. I left St. John's in the steamer "Ariel" on the 27th, and on the morning of the 29th arrived there, when I was much surprised to find how far the crops were in advance of those in and about St. John's.—There I found the Potato fields trenched for the last time, whilst in St. John's they were only appearing above ground. The industry which was here displayed by the enterprising settlers was very remarkable, although many were away to the fishery from each family, yet with the persons left behind a spirit of energy and perseverance was very manifest—all appeared busily engaged either with their land or in the completion of their dwellings; and it is with pleasure that I have to compliment them on the good taste which they have exhibited in the style of their buildings, and the sites which they have chosen for the same; also in leaving pretty little groves of trees of various kinds, interspersed among their cultivated grounds, thus affording a pleasing and parklike appearance. The Mountain Ash, which grows to large dimensions in this locality, being in full bloom at the time of my visit, afforded a most remarkable and beautiful sight.

The number of new settlers, up to this date, were twenty-three, all of

Crown Lands.

whom were making very great progress, and I feel it only justice in mentioning a case amongst the many of remarkable perseverance and industry.

A Mr. John Oldford and his family left Bonavista only in November, 1865, (the fall before my visit,) and with the aid of his two sons, built a temporary dwelling for the family—they cleared nearly two acres of land ready for next spring's crop. They built a beautifully modelled schooner of about sixty tons—making her sails, fitting all her rigging, and had her ready for sea early in May; and before my leaving the locality, they had returned in her with their first fish, and refitted for the Labrador, besides preparing Limber and Lumber for their new dwelling house, which was far advanced. Others immigrating there also at the same time, had not only built temporary buildings for themselves and families, but had cleared much land, some sufficient to sow six barrels of seed Potatoes, some a greater quantity, also a quantity of Oats, Vetches, Turnips and Garden produce, whilst during the winter they had prepared sufficient timber and board, for the erection of their new buildings, and had the same far advanced.

In this settlement great facilities are afforded to settlers; cows and other horned cattle may be supported, all the year round, by the quantities of palm growing there, of which they are so fond—quantities of wild Vetches also abound there, and wild fruits in great abundance, including the Hazel Nut, Wild Gooseberry, &c., &c.

The few former settlers in this locality, with one exception, are all well to do, one person having no less than fifteen head of horned cattle—some pigs and many sheep, and who entirely depends upon the produce of his farm for his and his family's support.

In other localities throughout the Island many are the instances in which parties who have given their attention to farming, are rendered happy and comfortable, and in easy circumstances.

Feb. 25th.—Since writing the above, and intending to conclude this Report, I have been favored with some despatches from my Deputy-Surveyor living in "Musgrave Town," under date of the 12th inst., extracts of which I give as follows:—

"I have made considerable progress in my survey's for those who had been waiting since the fall of 1865. I have also measured off seven or eight lots on the South Side, for new settlers; they have commenced building their fishing stages and flakes, preparatory to their availing themselves of the spring to clear some land. There are now over seventy applicants for land here, besides the St. John's men. Many persons

Crown Lands.

are also applying to me to measure land in Bloody Bay for them. Before doing so, I must wait your instructions. We have had a fine winter for clearing land, but I don't know how or where people are to get seed potatoes to put in it. The people here are satisfied of your doing the best in getting them seeds, and for the extension of our roads. I don't know what we should have done without the road which was cut out and bridged, with the money you got last year for us, as we had to walk on it all this winter, the harbor not being frozen over at any time during the winter. The sheep you kindly sent and distributed amongst us are all doing well. It is a fine winter for cattle, our cows have only been home a few times this winter."

I have the honor to be,

Your Excellency's most obedient Servant,

JOHN H. WARREN,

Surveyor General.

Crown Lands.

NICHOLAS NICHOLE,
Chairman.

CARBONEAR,
Dec., 28th, 1866. }

Board of Works.

the District of Carbonear, for the year 1866.

| Amount Un- expended. | Over expended. | Amount requir- ed to Complete Roads. | General Remarks. |
|-------------------------|----------------|--|------------------|
| | | | |

Board of Works.

Detailed Expenditure under Road Act, 29 Vic., Cap. 3,

| Locality. | Grant, Less 10 per cent. | Rate of Wages or Contract. | Expenditure. |
|---|--------------------------------|-------------------------------|-------------------|
| In and about the Town and settlement of Bay Roberts. | £ s. 209 5. | 2s.6d., 3s., 3s.6d. | £ s. d. 172 7 11. |
| Coley's Point..... | 56 5. | " " " | 48 7 4. |

BAY ROBERTS,
31st Dec., 1866. }

Detailed Expenditure under Road Act, 29 Vic., Cap. 3,

| Locality. | Grant. | Rate of Wages or Contract. | Expenditure. |
|-----------------------|------------------|-------------------------------|------------------|
| Upper Island Cove.... | £ s. d. 113 15 0 | 2s., 3s., per day. | £ s. d. 113 15 0 |
| Bishop's Cove..... | 47 12 6 | 2s., 3s., per day. | 47 12 6 |
| Bryant's Cove..... | 40 0 0 | 2s., 2s.6d., 3s., " | 40 0 0 |

UPPER ISLAND COVE, }
Nov. 3rd, 1866. }

Board of Works.

for the District of Bay Roberts, for the year 1866.

| Amount unex- pended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|-------------------------|-------------------|--|--|
| £ s. d. 36 17 1. | | | Frost setting in, Labor was necessarily discon- tinued, or the whole a- mount would be expend- ed. |
| 7 17 8. | | | |

WM. S. GREEN, *Chairman.*

for the District of Harbor Grace, for the year 1866.

| Amount unex- pended. | Over expended. | Amount required to Complete Roads. | General Remarks. |
|-------------------------|-------------------|--|---|
| | | | The Amount granted for Bishop's Cove, is not sufficient to make and repair the Roads. As the length of roads is so great, nearly 3 miles, it would take nearly the whole amount to keep it in good repair. As the length of roads in Bryant's Cove is so long, nearly 3 miles, the grant so small, it will take nearly the whole grant to keep it in re- pair. |
| | | | |

THOMAS STEVENSON, *Chairman,*
For Upper Island Cove Road Board.

| | 9 day's work. | | <p>With regard to this amount as spent from Red Lands to Bay-de-Verds, inclusive, by way of Local grants, I can avouch for its being spent to the very best purposes, both with respect to Roads and Bridges, in and about those localities, which you will please observe, as particularized in this Report, all of which, exclusive of Bay-de-Verds proper, where you will find 20 men, with H. Blundell, skipper, who did their work admirably, yet their names not being mentioned, owing to the Rev. Oliver Rouse, not doing so, not thinking it requisite, yet if this should not be sufficiently explicit, I will, if required, send on the names of those parties.</p> <p>I believe the Roads and Bridges in those localities to be in as good, if not better repair than in any other District, at any others of the Outports, yet there is still room for improvement.</p> |

| Amount Un- expended. | Nc. of Days or Contract. | Amount requir- ed to finish Roads. | General Remarks. |
|-------------------------|-------------------------------|--|---|
| | Building & repairing Bridges. | | This amount, spent on Main line, would, I believe, give satisfaction to the Board of Works, if they could but see Bridges built and repaired, as well as improvements made on such parts of the Road most needing it; yet as the Main line has been so neglected in past years, it will yet take a considerable amount to make it all we would wish to see it; but one thing I can say, one may travel in safety and somewhat comfortably in any sort of a wheeled Vehicle, from the Upper to the lower part of this section of the Bay-de-Verds District, which certainly could not be done without much risk some little time previous. |

Board of Works.

Bay-de-Verds to Red Head, District of Bay-de-Verds, for the year 1866.

| Amount unex- pended. | Length of Road done. | Amount required to finish Road. | General Remarks. |
|-------------------------|------------------------------------|--|--|
| | Making, in the whole, 164 perches. | It will take, at the least, \$200 to accomplish the finishing of this Road. | This amount spent on the Red Head line, has been spent to good purpose, as those persons employed on the same did justice both to themselves and your Board in thus performing their work in such a satisfactory manner, and I would say, as they have not had fair play shown them, as far as their not having but little of past road appropriations, they should not be uncared for by those to whom they look up as their representative or representatives, as they as a people have not been but little, in any, poor on Government. This Road in question is one of the worst I have ever yet travelled on, in fact no person can go on horse back either for life or death. |

JOHN LOUIS,
Chairman of Road Board.

Board of Works.

CATALINA, }
Nov. 21st, 1866. }

Board of Works.

for part of the District of Trinity, for the year 1866.

| Amount unexpended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|--------------------|----------------|--|--|
| | | Cannot state with any degree of accuracy or precision. | In consequence of the failure of the Cod Fishery and of the Potato Crop, these grants have been expended in the application of labor of able-bodied poor, at rates of pay varying from or between two shillings and sixpence to three shillings per day. And the work thus done may be described as Road making and repairing to extent of grant, at perches of 8 feet wide by 1 foot deep at about three shillings per perch. |

ALEXANDER BREMNER,

Chairman Board of Road Commissioners,
for this Division of Trinity District.

Board of Works.

Board of Works.

of Trinity Bag South, for the year 1866, on Main Line from New Perlican to Grates Cove.

| Amount Un- expended. | Over expended. | Amount requir- ed to finish Roads. | General Remarks. |
|-------------------------|----------------|--|--|
| | | | <p>The Amount of this Account has been labour for, last fall, last spring, and this present fall, by persons who received Government food last winter and spring, according to their agreement.</p> <p>I cannot state what amount there is unexpended, as I understand that some part of the Grant has been expended this fall, by the Road Commissioners, of New Perlican. How much I can't say, and if I mistake not, there was a balance left, unexpended, last year, of about \$190. I have done my best to get all the work done by them, I probably could, but they will never work so well, or perform so much labour for food that is eaten, or for Seed Potatoes, as they will when they have to receive cash after their work is finished.</p> |

WITLESS BAY, }
Dec. 31st, 1866. }

Board of Works.

Detailed Expenditure under Road Act, 28 Vic., Cap. 16, for

| Locality. | Grant. | Rate of Wages or Contract. | Expenditure. |
|---------------|----------------------|---|-------------------|
| Lamaline..... | Local, \$200.00 | On bridge, per day \$0.80. | Local \$176.50 |
| | MainLine \$300.00 | Onroad per perch \$1.00 On timber for bridge, per cord \$4.20 On timber for wharf, per cord, \$4.80. | |

Board of Works.

the District of Burin, for the year 1866.

| Amount unex- pended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|-------------------------|----------------|--|---|
| \$23.50 | | \$200.00 | The bridge will require about \$200 to complete it, and about the same amount would be required for the public wharf or breakwater. You will observe that the grant for the Lamaline portion of the main line of road is still unexpended, which is owing to no survey having been made. We expected an officer would be appointed in St. John's for that purpose, but since such has not been done, the Members of this Board, (with one exception) have thought it expedient to appoint a Surveyor for this locality, and have commenced the work accordingly, which may still be completed in the course of a month. |
| Main Lines. \$300.00 | | | |

JOHN PITMAN,

Chairman of Commissioners.

N. B.—As I did not receive your circular of the 12th ult. until yesterday, I could not furnish this account before.

BURIN, January 5, 1867.

Board of Works.

Burin, for the year 1866,—Garnish Main Road, from Burin to Tide's Bridge.

| Amount unexpended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|--------------------|----------------|------------------------------------|---|
| | | | This road requires a great deal of repair, and to complete the New Line through Mr. Marshall's farm would require about £150 more to make it passable. The old road over the barrens is quite impracticable; at the Barber's Brook, we would require a bridge, the probable cost would be £30. The road should be raised eight feet for a distance of 40 yards on the Western side of the bridge. At the Salmonier, a new bridge will be required in a year or two; we have shored it for a time; this bridge and piers would cost at least £60 to £70. We should receive more than half the grant, as from the Tide's Brook to Garnish the road is not half so expensive to make. Besides, the population in Garnish is not to be compared to Burin, and the people there are all independent. |

F. BERTEAU, Chairman of Burin Commissioners.

Board of Works.

Detailed Expenditure under Road Act, 29 Vic., Cap. 3, for the

| Locality. | Grant. | Rate of Wages or Contract. | Expenditure. |

Board of Works.

District of Fortune Bay, Harbor Breton, for the year 1866.

| Amount Un-expended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|---------------------|----------------|------------------------------------|---------------------------------|
| | | \$300.00 | |
| | | 100.00 | |
| | | 80.00 | |
| | | | |
| | | 200.00 | To open the line through a Bog. |

THOMAS BIRKETT,
Chairman.

Board of Works.

Detailed Expenditure under Road Act, 29 Vic., Cap. 3, for

| Locality. | Grant. | Rate of Wages or Contract. | Expenditure. |
|--|----------|----------------------------|--------------|
| Between Garnish and Frenchman's Cove | \$100.00 | \$1.00 per day. | \$100.00 |
| Main Line between Garnish and Burin..... | 246.50 | 1.00 per day. | 246.50 |

Board of Works.

the District of Fortune Bay, for the year 1866.

| Amount unexpended. | Length of Road done. | Amount required to complete Roads. | General Remarks. |
|--------------------|----------------------|------------------------------------|--|
| | 75 perches. | \$500.00 | This Road requires a very large amount. It will extend over 20 miles, to Grand Bank and Fortune. There are a great many Brooks and soft Marshes, making it at times quite impassable. The Grand Bank and Fortune Courier travels this Road, and (owing to the badness of the Road.) it often takes him two or three days to travel, which could be done easily in one, if the road was better, thus causing a great delay to the mails. |
| | 300 perches. | \$800.00 | The money expended this Autumn was all that has been expended on this side of the Road for the last eight years. Consequently the road, (especially near our Harbor,) was greatly out of repair. With our share of the Grant we have repaired over 300 perches, built one Bridge, and repaired three others, and opened the trenches where required, the whole extent, thus putting it in very good repair to what is called the half-way house, (about 7 miles.) From that to the suspension Bridge about 3 miles, it is still in a wretched condition, being in some places quite impassible, and would require, I should think, an outlay of at least, \$800.00 |

GEO. T. R. SNELGROVE,
Chairman Road Board, Garnish.

A. STERLING, Inspector.

ENGLISH HARBOR, }
14th Nov. 1866. }

Board of Works.

Fortune Bay, for the year 1866, under English Harbor Board, Albert Inspector.

| Amount unexpended. | Over expended. | Amount required to complete Roads. | General Remarks. |
|--------------------------|----------------|------------------------------------|---|
| to Mr. Sterling | | \$4,000.00 | This road will be about 22 miles when completed. It will connect seventeen different harbours, all of which are inhabited, some of them being the largest settlements in this district. The local Boards have been expending all their money on this road, and only three harbors have roads in them in consequence. It is important that this main line, which connects nearly the whole North side of Fortune Bay, should be completed. At present there are nine miles of good road, the balance, say 13 to 15 miles is wilderness or woods. One thousand dollars, it is thought, is the smallest amount that the Chairman Board of Works will recommend on this important line. |

THOMAS R. BENNETT,
Chairman, Road Board.

Board of Works.

Education.

**REPORT UPON THE INSPECTION OF PROTESTANT SCHOOLS
IN NEWFOUNDLAND, FOR THE YEAR 1866.**

SIR,—

According to requirement, at the close of another travelling season, I respectfully submit my Report upon the schools visited, with such general remarks and suggestions as seem apposite to the subject, and the annual accounts received from the several Educational Boards.

There has been such a considerable addition to the number of schools established by the Boards since I first travelled as Inspector, that I find it impossible now to visit them all in one season, being without any certain means of conveyance, and therefore can only reach the extreme points of the North and West alternately. The most northern school inspected this year was at Cape Freels. Of the school operations during the past year in the three districts beyond this I regret that I am not in a position to give much information, not having received the usual returns from the Moreton's Harbor Board and the Fogo Board. I have reason to believe that matters are not in a prosperous state in the former District. Shoe Cove School is vacant; also Moreton's Harbor and Nipper's Harbor have been without teachers for some part of the year, and I think Little Bay Islands school has been closed. The former teacher of Shoe Cove has, I understand, been encouraged to open a School at Tilt Cove, and receives much patronage there. The Chairman writes me that he has now six Masters under engagement, which is the usual number.

I have heard from the Chairman of the Twillingate District that the vacancy at Herring Neck West has been filled, so that the usual number of schools is in operation; and Miss Pride, a trained pupil teacher, will be engaged to open a school at Back Harbor as soon as a school-room is prepared.

Returns have not been missing from the Fogo District for many years before. The late Chairman made them out for transmission, but as he removed from the District, he left them with his successor for his information, who has neglected to send them to the Colonial office or to myself. The education affairs however are in an active state; a new school has been opened in Change Island to accommodate the families residing too far from the long established one, and all the others are in operation, excepting that at Cat Harbour, which I very much regret to say is still closed, as there is a fine premises there, and the school would be so useful. The inhabitants will have to look to their representatives for redress of this wrong, and I believe the easiest and surest way of governing a school there would be to include Cat Harbor in the Greenspond District, as recommended in a former Report.

Education.

NOTES ON THE INSPECTION OF THE SCHOOLS VISITED.

CAPE FREELS.

The premises are in excellent condition and kept very neat. Present at examination twenty-eight, the same number as on the books; several of the children are from families belonging to Spaniard's Bay, who came here during the summer months and leave early in the fall; the attendance in winter therefore is small, about ten or twelve. The attainments of the pupils are low, and especially faulty in spelling, owing to the adoption of a bad method of teaching it, which should be given up for a better one.

PINCHARD'S ISLAND.

Present thirty, on the list forty-five; fifteen stood for examination in the first division; the reading, spelling and writing of the first class (about half the number) very good; cypher to reduction, copies neat and progressive. The scholars are much younger than I have been accustomed to see in this school and fewer in the first class. The school-books are very old, shabby and scarce. The premises require repairs and better furniture. The teacher's house giving but little accommodation for a family man, the master, I perceive, uses the school-room for storing some of his personal effects; this must be avoided and the school-room kept clear of all incumbrances.

POOL'S ISLAND.

Teacher gone to St. John's. The Chairman says that the school is successfully conducted.

GREENSPOND.

There is no Board school here yet, but it is resolved to establish one, and preparations are made for the erection of a becoming school-house. A plan was submitted to me which is a good one, and I was glad to have the opportunity of somewhat improving it. The School belonging to the Newfoundland School Society had been closed during some months, and was re opened by Mr. Lind while I was there. There is much teaching required to be done in Greenspond, for the children have been neglected lately and are backward.

FAIR ISLAND.

On books now twenty-two, in winter thirty. Present to-day twenty-five. Commenced last fall twelvemonths; all were then ignorant;

Education.

nine read well in Testament, spelling moderate ; others in easy reading and spelling. This was a station of the Newfoundland School Society, but it has been abandoned since. The premises are not in good order, and were never finished.

GOOSEBERRY ISLANDS.

I found the school in the same creditable state of discipline and proficiency as formerly, and I feel sure that it afforded pleasure to the pupils as well as to the master and myself to go through an examination. Their performances in singing were very pleasing. The school premises require repairs without further delay. After the children were dismissed the parents assembled in the school-room, to whom I gave a short address, recommending them always to take a lively interest in the school, and to purchase some good books for their children who leave school, so that they may continue to improve in knowledge.

FLAT ISLAND.

The examination of this school gave me every satisfaction. Present thirty-five ; thirty-seven on the list now, in winter forty-five. The order and behaviour excellent, nearly all can read in the Scripture ; the first class cypher in the Rule of Three. Much poetry committed to memory, as well as the catechism and tables. The school is most creditably conducted, and the teacher otherwise makes himself a very useful person in the settlement.

SALVAGE.

An agent of the Newfoundland School Society is stationed here, who, by diligence in his calling, has obtained the good report of all his neighbours ; his school is much larger than I have seen it formerly, and is ably managed. The school premises are completely worn out and decayed, requiring a new erection. I have since heard that the inhabitants purpose to build a new school-house.

OPEN HALL.

Best attendance twenty-eight, in April ; now on the list twenty, average attendance eighteen ; all rather young, but well advanced for their years. Fourteen out of twenty read the Scriptures and write on paper or slates ; the writing is excellent. The teacher has greatly improved the building and grounds by his own labor.

Education.

TICKLE COVE.

Attendance now only fourteen. in winter twenty. Two read the Testament, four in easy reading; children are very young. Several families have removed from this harbor within the past three years, which accounts for the diminished number in the school.

KIELS.

Best attendance in May, then fifty-two. On the list now forty-six. Children attend very regularly. First class read, write, and spell well, cyphering to Proportion and Practice. Second class read well; all the rest in easy reading. School very successfully conducted, and rather well supplied with books.

KING'S COVE.

I cannot understand why the school in this place is not in a more prosperous condition; the teacher explains that it is owing to so many deaths among the young during the past few years; but I think there must be indifference to education on the part of the parents, for the teacher is quite competent and bears an excellent character. Twenty were present at examination, all very young, merely learning to read; no first class. A better school-room wanted.

NEWMAN'S COVE.

Teacher ill. Attendance book looked over shews that the attendance is very small for the place. No school-room is yet provided, nor is there a prospect of one, not much good has been done here. The teacher goes to Amherst Cove for the winter months, and there he has a school-room and the attendance is much better. Some change requires to be made at Newman's Cove. If the people are really so indifferent to education as it appears, it would be better to let the people of Amherst Cove have all the services of the teacher. The said Coves are only about two miles apart.

BONAVISTA.

The three schools maintained here by public funds, I found in successful operation, the attendance rather lower than usual, and the children of a younger age, consequently the attainments are lower; a new school-room is much needed at Canaile and Bayly's Cove, but I see no preparations for supplying the want; indeed the school ought not to have been commenced until the school-rooms were built.

Education.

LITTLE CATALINA.

As unsatisfactory as ever—all but useless, although the school-room is now suitable and comfortable, excepting that the fixed stools should not be allowed.

BIRD ISLAND COVE.

The teacher informed me that on account of his family being afflicted with a contagious disease the school was closed for the present. The school is always in a low state, chiefly for want of more means; only £25 is allowed for this place, with such a considerable population, whereas the Bonavista Board gives £30 to Newman's Cove. I have always urged the advantage of joining Bird Island Cove with Bonavista District.

CATALINA.

On books fifty-three and the attendance regular. School well classified and under good discipline. The teacher, Mr. Manuel, commenced last April, and seems well qualified for his duties; he is competent to teach Navigation. Room comfortable and well supplied.

CATALINA, WESLEYAN.

Forty-three on the list in March, present eighteen. Many of the children are away to day berry-picking. A large proportion able to read; writing in copies moderate; school doing fair.

ENGLISH HARBOR.

In March and April the list shews fifty-four scholars in attendance; the number is much smaller now, and the best scholars are away. The first class read fair in the Testament, but spell very imperfectly. Those learning to read are not suited with proper books. The school-room particularly neat and clean.

SALMON COVE.

On books forty. Present thirty-five. First class, ten, read and spell well, write fair, and cypher in Practice. Second class read in Testament and easy narrative. Third class ditto. School orderly and well classified, and progressing satisfactorily. Some first and second class books wanted.

Education.

TRINITY, NORTH SIDE.

The attendance ranges between forty and sixty, all doing well. Some class books wanted.

CUCKOLD'S COVE.

This station has been vacant about seven years. As I was passing by, hearing that school was now kept there, I went to inspect it, but found that it was a private school. A worthy resident of the place, pitying the destitution of the children, has sent to St. John's for a young woman, a relation of his (who formerly resided there, to keep a school. She appeared glad of my call; seventeen children were in attendance, three read in the Testament, the rest in spelling, who were quite ignorant when they entered, and her charge is ninepence per month. Lucy Flect appears much interested in her school, and is doing a public good. I would therefore strongly recommend the Board to make her some acknowledgment.

TROUTY.

On list thirty-three, usual attendance twenty-seven, present eighteen. All of the first class away, five of the second read moderately in second book; very dull in answering questions upon the subject; no copy books kept at present; three others reading in first book, the rest but just out of letters. School-room yet very unfinished, not at all fit for use in winter,

NEW BONAVENTURE.

On books thirty-two. Present twenty-eight. Seventeen stood in first class; reading and spelling good; some cypher in Practice. All doing well for their ages.

BRITISH HARBOR.

Not visited. It is however in operation, and conducted by the same teacher as when last reported.

IRELAND'S EYE.—Vacant.

HEART'S EASE.

Not visited; too difficult to reach, no chance offering.

Education.

CHANCE COVE.

Vacant. This is to be regretted, as the people have always shewn a great interest in education, and have done so much in the way of erecting the necessary buildings.

NEW HARAOR

Does not deserve a teacher one day longer, till the people can better appreciate his services. For the last six months the number on books has not exceeded six, and the average attendance four.—The Teacher gives no other explanation of the short attendance than the indifference of the parents to education; certainly he is both competent and willing to teach, and there is nothing in his character which renders him unpopular. The school-room also is both comfortable and conveniently placed. The inhabitants should be publicly told that unless they avail of the school it will be closed and the money spent in doing good somewhere else.

HEART'S DELIGHT.

Not visited, having heard that the teacher was taking her holidays. It is now under the charge of Miss Pitman, of New Perlican.

HEART'S CONTENT.

Under an agent of the Newfoundland School Society. On books ninety-six, average sixty five, and the ages of scholars pretty high; nearly all the first away. Those examined did well in reading and writing from dictation; some neatly executed copy and cyphering books shown. Tables and Catechism well known. Third class read and spell in second book. Children are taught to sing well, and three of the girls sang a round extremely well.

NEW PERLICAN.

School closed. Teacher just about removing to Greenspond.

SCILLY COVE.

This school has been in a backward state for some years. The present teacher has not had charge long. He has a large attendance, and has secured good order. The first class read and spell moderately, are backward in cyphering. The attainments may be expected to be much higher next year.

Education.

HANT'S HARBOR.

On books now forty-seven ; many more in the fall. Present thirty-seven. First class, five read in the Bible well, spell moderately, writing good, and cyphering well advanced, entering books kept. Second class eight, read well in Testament, write tolerably in copies. Third class, eight, spell in two syllables.

SEAL COVE.

I found many of the best scholars have left ; however the others are carefully taught and are getting on well. Thirty-four present, forty-one on the list. The premises are kept in good order.

RUSSELL'S COVE.

Was not in operation during the summer.

OLD PERLICAN.

The teacher was gone to St. John's, so that the school was not open. I understand that the Board for the District has made a present of ten pounds worth of books to the school, which were long needed.

GRATES COVE.—Not visited.

BAY DE VERDS,

By the kindness of some friend the school has lately been supplied with suitable books, which has enabled the teacher to put his school in a more efficient condition. On books forty, attendance thirty-five, thirteen read and spell well, write moderately ; thirteen others spell in monosyllables. One girl between five and six years of age has committed to memory many chapters in the Testament, which she repeats perfectly. The school-house comfortable, but wanting finish-outside.

ISLAND COVE,

The school is well attended. 80 names on the list last March, and there are more that can read now than at former inspection ; but the teacher labors under a great disadvantage for want of proper school books and furniture. Those learning to read are using single leaves from Testaments, Catechisms and other books much to difficult for them. This, too, is a friendless school. If the teacher were assisted and encouraged as he ought to be, I am persuaded he would be a successful teacher.

Education.

NORTHERN BAY.

School was kept in the forenoon, and seven were present; in the afternoon when I called the teacher was gone to a funeral. Only three or four pieces of old Bible and two slates were in the school. No school at Burnt Point to-day. I hear that Mr. Curtis's daughter teaches there now, but she is also gone to the funeral. These schools appear no better than usual. I am sorry to see that my inspection and reporting has not been the means of improving them.

OCHRE PIT COVE.

A short attendance to-day, and those present suffering much from cold, as for want of a joint of funnelling no fire can be made, and for want of some trifling repairs to the doorstep the cold wind could not be kept out. Feeling miserably chilled myself I took the liberty of dismissing them earlier than usual. Thirty-five names were on the list. Six read in the Testament, and eight in easy narrative; several copy and cyphering books written out last winter were produced. Some new class books have been lately supplied by the Chairman.

WESTERN BAY (NORTH SIDE.)

Children away to-day in consequence of the cold weather and the unsuitability of the room used for a school-house. The new building is in the same condition as seen last fall, about half done.

WESTERN BAY.

On the list thirty-two, present thirty. None reading the Testament, twelve read fair in the second book, as many more in monosyllables. Some poor attempt made at repairing the building, no lock on the door, and the Register torn up by intruders; attendance very low in the summer—between ten and two.

ADAM'S COVE vacant.

BLACK HEAD, COMMERCIAL.

Forty names now on the list, in winter seventy, present thirty one. First class, twelve, doing well in reading, writing and cyphering; second class read well in third book. School well classified and found in books; good order kept. The room quite comfortable, everything satisfactory. The other schools in the District might be made just as useful and commendatory as this one.

Education.

PERRY'S COVE.

Twenty-three on the books ; about fifteen attend ; nine present ; three read very well and write tolerably ; three others spell in two syllables. School in a low state ; badly off for books.

FRESHWATER.

School closed some months on account of teacher's illness ; his brother took charge 15th October, and seems quite competent. Present thirty ; seventeen read in the Testament and write in copies moderately ; about four others in easy reading. The attainments have not been satisfactory for the last three years, in a great measure owing to a want of proper school books. If the present teacher were supplied with a sufficiency of school requisites, and the room finished and suitably furnished, I am confident he would considerably raise the character of the school, and yet the cost would be trifling.

CARBONEAR (WESLEYAN.)

This school is largely attended, especially in the winter months. It is efficiently conducted, and the attainments of the first class are high for an elementary school ; also the room is commodious and comfortable. Twenty-one in first class present, reading in fourth book good, spelling perfect, dictation good, copy and cyphering books are beautifully written ; those subjects committed to memory recommended in my last report ; drawing maps practised, and grammar taught. The other classes are kept well employed, and are making good progress. The management of this school shows that occupation is order.

VICTORIA VILLAGE.

Present sixteen, on the list thirty. Nine read fairly in the Testament, say the multiplication table, write on paper tolerably. School useful ; kept in the teacher's house. Several children in the neighborhood do not attend for want of clothes.

CARBONEAR (EPISCOPALIAN.)

Fifty names now the list, but one hundred and sixteen last spring ; present thirty-nine. First class thirteen ; reading in Scripture fair, spelling ditto ; some creditable copies exhibited, but many are carelessly written ; second class read in dissyllables poorly. Third class spelling easy lessons. The room beautifully painted inside and outside, and books supplied.

Education.

CARBONEAR, SOUTH SIDE.

On the list in March fifty-four, and the attendance regular. In July, after the Labrador fleet had sailed, twenty-eight. Present to-day, thirty-one. First division, twelve, read Testament indifferently, spell ditto, write ditto; class books wanted. Second division, fifteen spelling monosyllables.

MOSQUITO.

On the list thirty four names, the attendance about twenty. The elder ones read very well, and needle work taught to the girls.

BEAR'S COVE

Keeps up the usual attendance; but the children being very young the attainments are low.

HARBOR GRACE.

On list one hundred and twenty-six; present ninety-five, the room being crowded. Forty-five read the Testament. It is as well conducted as may be expected, considering the large number and the want of space. A new school was opened this year at Mr. Stevenson's, at the west end; but, though it is doubtless a convenience to some few children, I think more benefit would arise to the public by enlarging the up-harbor school, and employing a mistress there with the master.

SOUTH SIDE, HARBOR GRACE.

Present forty-seven. Room comfortable; fifteen read and spell well in the Testament, write in copies rather carelessly, know tables well, and some cypher to Rule of Three; eighteen in third class, in easy reading.

ISLAND COVE.

Although a change of masters has been made twice in a short time, the high character of this school has been well sustained. The attendance is large (one hundred and six on the list) and the attainments of the several classes quite creditable; ample books are supplied, and the room in good condition.

BAY ROBERTS (WEST).

The attendance is smaller than usual, owing to sickness prevailing;

Education.

thirty-six present out of seventy-five on the list. First class, five, read spell fair in third book ; write well. Second class, four read well in the Testament, spelling faulty. Eight read in monosyllables. The room comfortable ; an old unsuitable master's desk ought to be replaced.

BAY, ROBERTS (EAST.)

On the list one hundred, present forty. The children younger than at former inspections, and the attainments not quite so high. The teacher competent and attentive, school well supplied with books, &c., and the room comfortable ; its appearance however would be improved by white-washing the loft.

COLEY'S POINT.

On books seventy four, average attendance sixty-five, present fifty-two. First class, seventeen read and spell well, write fair, backward in arithmetic. Second class, twelve, read fair in the Testament. In this and the other two schools belonging to the Bay Roberts Board the rule is successfully carried out of collecting the fees quarterly in advance.

CLARK'S BEACH.

This school has improved since I last visited it. The discipline is good, and it is well supplied with books. On the list fifty-nine. The first class read and spell creditably, also repeat tables, and answer questions in geography well ; writing fair. Second class read and spell well in second book. The whole school exercised in questions upon miscellaneous subjects ; and I observe that the teacher has been a careful reader of the remarks in previous school reports for the guidance of Masters.

BRIGUS (COMMERCIAL.)

On the list seventeen, present fourteen. First class, five, read and spell freely and correctly in books of general information, cypher to practice, and enter their work very neatly, also write well ; backward in geography and grammar. Second class read in Scripture extracts ; the rest in monosyllables, being very young.

BURNT HEAD AND BULL COVE.

Schools were not inspected, in consequence of my taking a severe cold so that I had to return home. The Chairman of the Brigus District

Education.

informed me that the Board having lately erected a teacher's residence at Clark's Beach, and contracted for the building of a school-room at Salmon Cove, they have no funds wherewith to assist Seal Cove on the South Shore.

DISTRICT OF ST. JOHN'S.

All the schools belonging to this District are satisfactorily conducted, with two or three exceptions. The attendance at the Topsail School became so low that the Board resolved upon closing it at the end of the year. The attainments of the children at Belle Isle School are not satisfactory; considering the small number of scholars to be instructed they ought to be much further advanced. The teaching in the Broad Cove school is quite efficient. Magotty Cove School is much in the state as it has been for years past, the attainments not as high as can reasonably be desired. I have not seen Bauline School; it is only open during the summer months.

SOUTH SIDE (EPISCOPALIAN,)

Has a large attendance, about eighty, and is most efficiently managed. The teaching is most successful in reading, spelling and writing. Some of the first class pupils have drawn some well executed copies of the maps. The Schcol building is much improved.

THE PRESBYTERIAN SCHOOL

Is in a flourishing condition. It is conducted in a quiet, happy and successful manner; the pupils of the several classes acquitted themselves most creditably in their different studies, including all the branches of a good English Education.

The St. John's Board of Education has lately passed a code of rules and regulations relative to the appointment and supervision of its Pupil Teachers, which I perceive has obtained the sanction of the Governor in Council. They were much needed, and are suitable; I have only to hope that these useful regulations may be brought to bear upon the Pupil Teachers belonging to the other Boards. If the St. John's Board will offer to examine and supervise all the Pupil Teachers, and the other Boards will depute the authority to do so, as they cannot do it themselves, much good will be accomplished. The regulations at present only affect three out of fifteen Pupil Teachers.

FERRYLAND

Not visited, and no Returns received. The whole grant is only £10.

Education.

HARBOR BUFFITT.

Highest number on the list in any part of the year thirty-six, average attendance twenty; present fourteen; eight read well in Testament, spell fair, cypher to compound rules, write tolerably well; know tables and catechism; younger ones not supplied with books, singing good. To be regretted that there is not a better attendance.

SOUND ISLAND (WESLEYAN.)

Present thirteen. On the list twenty-nine. Eight read, write, and spell fairly; copies moderate; tables and catechism said, some cypher to Rule of Three. The attainments are low; but it must be noticed that the older scholars are away.

WOODY ISLAND.

From eleven to fifteen on the list; children holding reading books, and appeared about half way through them; but I found that only one knew the letters. The teacher spends four months a year here, and four months at Spencer's Cove, and the same at Arnold's Cove; so that the children have only four months to learn in, and eight months to relapse in. I see that this regulation does not succeed.

ISLE OF VALEN.

Present twelve. Five reading in the Testament fairly; spell ditto, writing moderate; say multiplication to six times, younger ones reading in monosyllables. The families remove to the woods in winter. Miss Perchard has been here about twelve months; nearly all the scholars were ignorant then, so that she has done as well as may be expected.

ODERIN.

Usual attendance thirteen. present nine; four read and spell fairly, write ditto, multiplication tables to seven times, say catechism well. Others learning to read; all rather young. School kept in Mr. Bayley's house.

PORT-AU-BRAS.

In charge of Miss Burfet. Eighteen on the list; of whom four read, write and cypher fairly.

Education.

PATH END.

Attendance varies from thirteen in winter to thirty in summer. About six read in the Testament, and write tolerably; as many more in easy reading; deficient in tables and cyphering. No appearance of the erection of a school-room yet.

SHIP COVE (COMMERCIAL EPISCOPALIAN.)

On the list twenty-five. Children very young; the older scholars lately left. Two of the first class remaining are well advanced in cyphering and writing, about half read fairly; but not loud enough. Books well supplied, and the room comfortable. Nine adult pupils attended last winter, and made good progress.

COLLINS COVE (COMMERCIAL WESLEYAN.)

The school in charge of Miss Wagg, and creditably conducted. Considerable progress has been made since last inspection, though some of the credit of this improvement must be due to the late teacher. Thirty-four present, the usual number; sixteen in the first class acquitted themselves well in reading, spelling, writing, tables, grammar and recitations.

GREAT BURIN.

Improved since last inspection; present twenty-four. The reading very good, spelling fair, writing careless. School-room requiring repairs.

BURIN BAY.

Was closed during the winter; re-opened in June. On the list seventeen. The teacher being very competent and faithful, it is a pity that more children do not avail of her services. The older ones read very well, spell ditto, write fair, cypher in Compound Rules, and are advanced in Grammar. Room very neat.

SPOON COVE.

School well taught, and the children are in a creditable state for their age. On list thirty-two; present twenty-two. Books wanted for the lower classes.

MORTIER BAY.

About sixteen attended in summer, and many more in winter; it is a humble affair, but useful, and does not cost the Board much.

Education.

ST. LAWRENCE.

Although I knew there was no school in operation there, I was desirous of seeing the school-room, and making inquiries about the probability of getting a teacher. There is a very snug and suitable school-room just finished. There are twenty-two Protestant families residing here, and about thirty children of a schoolable age. The grant to the District is only £34, and as the teacher at Lamaline is paid £25 (as little as a teacher can have), there are only £9 left for St. Lawrence, which is too small a sum to do anything with. I would earnestly recommend the Government to grant a special sum, say of £20, to St. Lawrence.

The schools in Fortune Bay were not inspected this year; they were fully reported last. In consequence of the Commercial Board being defunct, the Elementary Board will have a large sum to lay out in the District, which will add to the number of schools and greatly improve the school buildings; but as no change was made till after the 30th of June, the Chairman had not put me in position to report the progress made. I think it is to be regretted that the Commercial Board did not build a teacher's house in Harbor Briton while such a large balance was at their disposal, as it would be an inducement for a respectable teacher to reside there. I trust that the Elementary Board will see to it that all the money they lay out in building shall be strictly speaking on Board property, as the Act directs.

On arriving at Harbor Breton I found that Miss White had that day taken charge of the school there, in place of Miss Chapman resigned. Miss Chapman conducted this school many years with much credit for £15 per annum. I would recommend that the Board should present her with a bonus,

The Chairman of the Burgeo Board thus writes—"You had an opportunity of inspecting the school in Lower Burgeo, and I think you will agree with me in saying it is progressing satisfactorily. The school at Rameo has been in operation only one year, and is giving general content. I visited it a few weeks ago and was much surprised at the progress made in so short a time." Whilst my opinion coincides with the Chairman's relative to the condition of the Burgeo school, I dare say he in return will agree with me when I note that Hunt's Island School requires a beneficial change.

LaPlant school happened to be closed the day I was there; it is in the same state as when last reported, but having greater need of a new school-house.

Education.

ROSE BLANCHE.

I heard that the teacher had left, and another was not yet appointed.

CHANNEL.

Attendance very regular, between forty and fifty, none over 12 years. The writing is excellent, and the books neatly kept. The people pay willingly twenty shillings per child, but the friendless and poor are free. The master has been in charge two years, and gives general satisfaction.

GENERAL OBSERVATIONS.

Being desirous of ascertaining the number of children neglecting to attend school where the opportunity is presented, I appended the three following questions to the blank forms of annual returns which I sent out this year. The replies are not complete, for many Teachers filled out their annual returns upon last year's blanks, which they had by them, and some few replied so indefinitely that no use could be made of them. From thirty-three returns wherein the questions are distinctly answered, just conclusions for the whole may, I think, be formed.

Query 1.—How many children of a schoolable age are residing with in a convenient distance of the school, that do not attend ?

Query 2.—What is the cause, in your opinion, of the non-attendance of the absentees ?

Query 3.—Do you know of any that stay away to avoid the payment of the school fees ?

From these thirty-three returns I make the following deductions.—There are one thousand nine hundred and thirty-three children attending these schools, and eight hundred and sixty-four residing within reach of them that do not attend at all. This is I think a fair ratio to apply to the whole number, showing that forty-four per cent of the children residing in the outports, where no private schools are kept, are not benefitted by the provision made by the Government for their education, and are therefore growing up in ignorance. *This revelation should beget serious concern*, and call forth some efforts to be made to reduce this large per centage of absentees.

The causes assigned by the teachers are poverty, want of clothing, and indifference to education on the part of the parents. Very few, it appears, are kept away to avoid the payment of the school fees, for the teachers

Education.

are not exacting, and in many cases forego them altogether. I just give one teacher's replies as a sample of the rest:—

“ 2.—The non-attendance of many is owing to the poverty of the parents, who cannot afford to clothe their children decently enough to send them to school, but in others to the indifference which parents manifest towards the education of their offspring.

“ 3.—I cannot say positively that I know from the parents that their children are kept home in order to avoid the payment of the school fees, but from the conduct of some who can pay the school fees and neglect to do so, and whose children are now kept at home, I charge some parents with this fault.”

NUMBER AND ATTAINMENTS OF PUPILS.

For the first time since I have reported upon the schools I find that the number of children attending the Elementary and Commercial schools has not increased upon the previous year. In fact the numbers are slightly less. Last year the returns gave six thousand five hundred and twenty-eight pupils, this year six thousand four hundred and forty-nine. Also the children that stood before me for examination were of a lower average age than in any previous year. The attainments however show no retrogression; from the returns I ascertain that two thousand seven hundred and sixty-six, or forty per cent. can read in the Holy Scriptures, and two thousand three hundred and twenty-one, or thirty-six per cent, write in copies. In 1859 the readers were thirty-six per cent, and the writers on paper twenty-four per cent., so that it appears a considerable advance has been made since then. I can only attribute the falling off in the totals to the increase of poverty;—for where the struggle is too severe for daily bread, education will not be much regarded.

FINANCIAL RETURNS.

I have received Financial Statements from nineteen School Boards, and there are still wanting those from Ferryland, Placentia Bay, Burin, Lamaline, Grand Bank and Channel. By adding up the returns furnished, I find that these nineteen Boards have spent this year £4749 8s. 4d. and have added just £10 to the former balance. The amount has been expended in the following manner:

| | | | |
|-----------------------------------|-------|----|---|
| Teachers' Salaries..... | £3964 | 14 | 2 |
| Repairs and School Erections..... | 291 | 16 | 9 |
| Rents | 65 | 19 | 0 |
| School Books..... | 265 | 15 | 0 |
| Fuel..... | 26 | 19 | 3 |
| Secretaries | 97 | 6 | 6 |
| Incidentals | 36 | 17 | 8 |

Education.

It will be useful to make a comparison between the expenditure of 1859, the first year that affords the data, to see in what direction expenditure is increasing or lessening.

| | 1859. per cent. | 1866. per cent. |
|-------------------------------------|--------------------|--------------------|
| Teachers' Salaries | 68.7 | 83.5 |
| Building and Repairs | 21.3 | 6.1 |
| Rents | 1.8 | 1.4 |
| Expended in school requisites | 4.1 | 5.6 |
| Fuel | 0.6 | 0.6 |
| Secretaries | 2.1 | 2.0 |
| Incidentals | 1.4 | 0.8 |
| | 100 | 100 |

It will thus be seen that a much larger proportion of the grant is now expended for its more legitimate purpose, the payment of teachers' salaries, and more is laid out in school books.

Five thousand five hundred and sixty-three is the number of the children attending the schools maintained by the nineteen Boards sending in Financial Returns, and as the amount expended by them for all purposes was £4749 8s. 4d. currency, therefore the cost of education per head has been this year seventeen shillings and a penny currency. It was twenty-one shillings in 1859, including the denominational and commercial schools.

SCHOOL BOOKS.

I am happy to report that the schools are becoming better supplied with books of the approved kinds, and therefore uniformity in this particular is being promoted. Still there are many schools not supplied with any books by the Board to which they belong. The Greenspond Board has the largest book charge this year, viz., £32 12s. 8d., and £31 last year; nevertheless some of their schools were very deficient of needful class books.

SCHOOLS ANNUALLY EXAMINED.

The schools in the St. John's, Harbor Grace and Bay Roberts district are annually examined by a deputation from their respective Boards. The good effect of such examinations cannot be overestimated, and it is to be hoped that the other Boards will follow the example.

A PROPOSAL TO THE INSPECTOR.

The Chairman of the Bay Robert's Board proposed that, as soon as convenient after my inspection of the schools under his direction, I should

Education.

state to him in writing in what particulars I considered they might be improved, and the Board would thankfully receive my recommendations and endeavor to carry them out as fully as possible, as they were most desirous of promoting in every way the efficiency of their schools; and said that he thought in this way my inspection would be made directly beneficial. I see no objection at all to meeting this proposal in the same good faith in which it is made, should the Government sanction it; and I would be glad to do the same for all the Boards.

TO TEACHERS.

In my last year's Report (a copy of which was sent to every teacher) I signified to them the subjects in which I should examine the first classes the ensuing season. I regret that the greater number paid no attention to the notice, and had not taken the trouble to make any special preparation for examination; some few however did, and gave much satisfaction. The attention of the teacher is requested to the same subjects for another season.

I am rather surprised at the unreadiness I perceive in some teachers to effect themselves some small repairs about their school-rooms. They will put up with the inconvenience and discomfort of a broken window, a disordered funnel, rickety desk or stool, for months, nay for ever, until some one else repairs them. This is excusable in a female, but for a hearty man to be so helpless or begrudging of his labor on the building where he is earning his support, is anything but creditable.

TRIAL OF A NEW MODE OF PAYMENT.

In those places where the school fees are not paid, or amount to a mere trifle, it is evident the teacher has no inducement to exert himself to increase the number of his scholars, or to forward their progress in education. It is all the same to him whether there are many or few at school, or whether they are in the alphabet or the fifth book; he receives nothing more for successful efforts, and nothing less for habitual neglects. The great motive power in the world is self-interest. It keeps the world in healthful activity, and is accomplishing wonders; it cannot be dispensed with in any department without loss. I would therefore suggest that some of the Boards should try the experiment with their unsatisfactory schools, of *paying their teachers so much per scholar*—say at the rate of five shillings per head per year for all on the list who have attended a month, five shillings additional for all that can read in the Testament; five shillings additional for all that can write good small hand, and cypher in the compound rules; five shillings additional for all that can work the rule of three and write from dictation, and five shillings additional for all that can pass an examination in geography and grammar. The Boards can afford to be liberal in their scale of payments; and give

Education.

a teacher a fair chance of making a good salary, for their unsatisfactory schools are costing them near £2 per scholar. I am persuaded that this plan would effect better results in all the schools ; but at first it would be well to try it with the unsatisfactory ones. I believe there is nothing in the Education Act which would prevent the adoption of this mode of payment.

PUPIL TEACHERS.

It is highly desirable that the Pupil Teachers should pass an annual examination. The St. John's Board has made a rule to examine theirs, but the other Boards cannot do the same. I asked the Secretary of the St. John's Board if they would undertake to examine the Pupil Teachers of the outport Boards, that I might give notice of it to those concerned in them. He replied that they would not mind the trouble, but he thought it might create a jealousy, and that the Inspector was the proper person. I have no objection to do so if duly authorized, and would be pleased to be brought into some relation with the Pupil Teachers.

WANT OF BOOKS.

There is a great want of reading matter in most of the outports, and I have reason to know that many who leave school with a fair knowledge of reading and writing, nearly forget what they have learned for want of practice. In my addresses to the school children I strongly urged the propriety of both males and females remaining in their own homes after night-fall and occupying themselves in reading or some useful employment, as there is such a prevailing habit in many of the outports for the young people of both sexes to stroll about the streets till a late hour of the night, to their own injury and the annoyance of quiet householders ; but I could not be forgetful of how unattractive are many of their homes, for want of the means of both pleasant occupation and amusement. I would recommend the Teachers to endeavor to get subscribers to a small library among the young men ; five shillings each per year will support it. I have proved it. Also it would have a beneficial effect if the men of influence in the different harbors would undertake to give lectures upon practical subjects during the winter months.

The foregoing Report is respectfully submitted, and

I have the honor to remain, Sir,

Your most obedient servant,

JOHN HADDON,

Inspector Protestant Schools.

Hon. J BEMISTER,

Colonial Secretary.

Education.

RULES AND REGULATIONS OF THE ST. JOHN'S PROTESTANT BOARD OF EDUCATION, REGARDING THE APPOINTMENT AND SUPERVISION OF PUPIL TEACHERS.

1st.—That every Candidate for the situation of Pupil Teacher shall be required to appear before the Board for the purpose of being examined; and that this examination shall embrace, in Scripture the Pentateuch and four Gospels; in Arithmetic as far as a Practice; Writing from Dictation, and the elements of Geography and English Grammar.

2nd.—That no one shall be appointed as Pupil Teacher under the age of sixteen.

3rd.—That the course of training shall extend over three years, unless in cases in which the Board shall see reason to shorten the term.

4th.—That Parents or Guardians of such as may be appointed Pupil Teachers shall enter into an Indenture, binding them to serve the Board as Teachers, after the termination of their apprenticeship, for such term as may be agreed on.

5th.—That in cases in which the Pupil Teachers do not reside with their parents, during the term of their apprenticeship, the names of the persons with whom they may desire to live shall be submitted to the Board for their approval.

6th.—That the Pupil Teacher shall be required to pass an annual examination before the Board; and that the Masters of the Academies in which they are under training, be requested to furnish an annual report of their general progress and conduct.

7th.—That the subjects of examination shall be as follows: At the end of the first year the Pupil Teachers shall be examined on the outlines of English History: Arithmetic, to Decimal Fractions: English Grammar—Parsing and Rules of Syntax: the Geography of the British Isles and British America: Scripture—the Pentateuch, and Books of Joshua and Judges. At the close of the second year the examination to embrace—Outlines of the History of Greece and Rome: Geography of Europe: Arithmetic, as far as Evolution: Elements of Mensuration: Scripture—the Books of Samuel, and the Gospels and Acts of the Apostles: Original Composition. At the close of the third year the examination to embrace: in Scripture, the Books of Kings, and Sacred Geography: Arithmetic—the whole: The Geography of the United States,

Education.

Asia and Africa: Exercise on the Maps; Mensuration: Original Composition: English Grammar—the whole: Elements of Science. At such Annual Examination the Pupil Teachers to be required to give a lesson to a class in presence of the Board.

8th.—That should any Pupil Teachers fail to conduct themselves properly, or not make due application to the required studies, the Board shall have the power of dismissing such, and nominating others in their room.

9th.—That at the close of their apprenticeship, the Pupil Teachers, if found qualified, at the final examination, to undertake the duties of Teachers, shall receive a Certificate signed by the Chairman of the Board.

Approved in Council.

(Signed,)

A. MUSGRAVE.

Education.

**REPORT UPON THE INSPECTION OF CATHOLIC SCHOOLS,
FOR THE YEAR 1866.**

INTRODUCTORY REMARKS.

The regular attendance of Pupils to the Catholic Schools during the past summer has been seriously affected by the large amount of sickness that prevailed, especially among the young children, in some of districts visited by me during my late inspection of these schools. In some instances the schools, as a matter of safety, were obliged to be closed, for periods varying from one to two months. A few localities have suffered severely from the sickness alluded to, and their schools will no doubt exhibit, for some time to come, in the diminished number of their pupils, the severity of the epidemic that visited these localities. It is gratifying to know, however, that in the majority of places visited by this epidemic, the number of deaths among the children has been few; and in those localities where the Schools were unavoidably closed for some time they have recommenced their operations with but few gaps in the registered number of their pupils.

The School Returns, for the present year, however, are not at all affected by whatever lessening of pupils that may have resulted from the visitation of this sickness; as these returns are made up to the 1st of July, and the appearance of the epidemic generally took place subsequent to that date.

STATISTICS FURNISHED BY THE TABLES.

The School Returns given in this year's Report amount to 101, which is a larger number than is given in any previous Report. These Returns show an increase in the aggregate number of pupils on the books, as well as in the average attendance. But this would naturally be expected from the increased number of School Returns given this year.

The following is the general summary of the School Returns for this year:—

| | |
|-------------------------------------|------|
| Number of Schools..... | 101 |
| Number of Pupils on Books..... | 5276 |
| Average Daily Attendance..... | 2699 |
| As far as Easy Reading..... | 2162 |
| Reading with Ease..... | 1449 |
| Writing on Paper..... | 1407 |
| Elementary rules of Arithmetic..... | 1455 |
| Advanced rules of Arithmetic..... | 570 |
| Geography..... | 424 |
| Grammar..... | 390 |
| Mathematics..... | 32 |

Education.

As has been shown in last year's Report, the attainments of the children attending the Catholic Schools have been much improved since the year 1858. This improvement has chiefly taken place since the schools have been supplied with books, &c. &c. The Statistics given in the general summary of the School Returns would show that there has been no falling off in the condition of the schools the past year with respect to the attainments of the children. A slight increase has taken place in the number of pupils learning Geography and Grammar the past year. In the Returns for the year 1858 the number given as learning these two branches was one in forty of the entire number on the books. This year the Returns give one in thirteen of the entire number attending school as learning Geography and Grammar, one in nine cyphering as far as the rule of three and rules further advanced, and one in four learning the Elementary rules of Arithmetic, writing on paper and reading with ease. The latter item is the only one correctness of which I would be inclined to question, but knowing as I do how very apt some teachers are to class their pupils too high, and give them credit for a style of reading they do not possess, I feel bound to make these remarks.

All the other Statistical items pertaining to a school, such as the number writing or cyphering, &c. &c., can easily be ascertained by the teacher, and correctly given, but the degree of proficiency attained by his pupils in reading being a matter of opinion, he is liable to over-rate their abilities. In fact I have been frequently compelled to make teachers alter their Returns in this particular.

As a copy of this Report will be forwarded to each of the Catholic Teachers, I would request the attention of the entire to my remarks on this subject, and to impress on them the necessity of having their school returns made out with a strict regard to truth, and free from the slightest exaggeration in any particular.

The Returns from the Convent Schools in the Diocese of St. John's, this year, number 13, being an increase of two schools since last year's Return. One of these schools is situated at Torbay, and the other at Petty Harbor. In both these localities there is a large Catholic population, and the very great advantages which the establishment of these Conventual schools is capable of conferring upon the youthful female population of these two settlements, will, I trust, be duly appreciated and availed of. I visited both these schools during the summer, and though but a short time in operation, they were yet exhibiting the success attending the tuition of the Ladies who had charge of them. The school-rooms in each of these localities is large, lofty and well finished, and provided with the necessary school furniture.

Education.

These 13 Convent Schools have over 2000 pupils entered on their books, with a daily average for the year of more than 1400. The attainments of these children are much above the pupils attending the Board schools. About one half of the entire number are reading, writing, either on slates or paper, and ciphering, and about one third learning geography and grammar.

The School fees have been falling off in amount, year after year, for the last three or four years. This year it is less than last year by about £15. Considering however the depressed condition of the country generally during these years, this decrease of the school fees is not surprising.

When I applied this summer at the College of St. Bonaventure to ascertain the number of pupils that were attending the Training School, I was informed there were then only three. If the vacancies have not already been filled up it is to be hoped that the Chairmen of those Districts where such vacancies have occurred will lose no time in taking the necessary steps to do so.

We are not by any means provided with sufficient material to select teachers from, as there is scarcely a District in which the Chairman would not at present find it difficult to find a suitable male teacher to take charge of one of his schools, were there a vacancy to occur.

In the letter containing the necessary instructions for my guidance which I received from the Secretary's Office, previous to my starting on my tour of inspection, my attention has been called to two matters connected with the financial statement of the previous year. The following paragraph refers to the first:—

“In looking over your Report for 1865, the attention of the Government has been directed to a charge of £60 in your Financial statement as paid to Secretary of Harbor Grace Board. Such amount is very largely in excess of any other Board, St. John's being next in amount, £30. The Government deem such an appropriation for such service to be at all times objectionable, except to a very limited extent, but more particularly so when there would appear to be an overexpenditure of £182 18s. 2d.”

I wrote to the Right Revd. Dr. Dalton, the Chairman of the Harbor Grace Board, calling his attention to the foregoing extract from my instructions, and I have been favored with a reply from his Lordship in which he states; that “the £60 for Secretary was voted unanimously by

Education.

the Board at its first meeting, without any suggestion from me either directly or indirectly."

The second matter referred to is as follows:—

"You will be careful in having accurate Financial Returns prepared, and in any case where they have not been correctly furnished, you had better, should the time admit of it, return them for amendment."

Desirous of carrying out the wishes of the Government in this matter, I supplied the Chairmen with the printed forms in the early part of the summer, requesting them to furnish me with the Financial statement at their earliest convenience, so that I might return it for amendment should it need it. The greater number of these Returns were not sent to me until the latter part of the year. The majority of them are however quite correct, and with one exception, the errors in the others are not material.

In the printed forms at present used for the Financial Statement there are no columns to enable the Chairman to account for the receiving and expenditure of the money voted by the 21st Section of the Education Act for the purchase of books, &c., &c., and the want of which I believe to be the cause, in some instances, of some seeming errors in these Returns. At all events, as it would be desirable to see how this money is expended, I will insert the necessary columns for the purpose in the forms with which the Chairmen will be supplied next year.

I have given this year a more detailed statement of the Schools I visited than was given in last year's Report; and although I am happy to be able to state that the majority of the Schools inspected are well conducted, there are still too many in which no improvement has taken place, as will be seen from the Report. The Schools that are still backward are in almost every case either totally unprovided, or at best but poorly supplied with the needed requisites.

And until these Schools are supplied with books, but especially reading books, I entertain but slight hopes of any improvement taking place in them.

With these remarks I beg leave to submit my report.

MICHAEL J. KELLY,
Inspector Catholic Schools.

Education.

REPORT.

DISTRICT OF FORTUNE BAY.

In the District of Fortune Bay the number of Catholic Schools has been increased within the past year by three additional ones: viz., one at St. Jaques, one at Sagona, and one at English Harbor. The chairman, Rev. E. Brennan, expects to be enabled to continue this large but, much needed addition to his Schools, partly from funds supplied by the Right Rev. Dr. Mullock, out of the money voted last session to meet such exceptional cases as Fortune Bay, where the Catholic population is comparatively so small and at the same time so scattered, and partly by the contributions of the inhabitants themselves, who, at the request of the Rev. Chairman, willingly agreed to pay a portion of the salary of the teacher.

These schools are now attended by 115 pupils.

HARBOR BRETON SCHOOL has the smallest attendance of any of the five schools, the daily average for the year being but 10, the number I found attending while Harbor Breton. The school room is comfortable, and the children attending were fairly supplied with books. As these ten were however, the youngest of the pupils attending the school, they were not far advanced; indeed the attainments of the children generally are rather low, only one pupil writing on paper and cyphering beyond the elementary rules of arithmetic.

The teacher, Mr. Garvey, who has been a pupil in the Training school, had charge of the school but for a short time previous to my visit. I have no doubt he will be able to show a more favorable state of things on my next visit.

GREAT JARVIS SCHOOL continues in charge of the same teacher, Mr. Dunn, who, although an old man, fulfils his duties satisfactorily.

THE SAGONA SCHOOL is held at present in the Chapel. There were seventeen children present; seven were writing on paper, and three cyphering as far as the rule of three; reading, spelling and knowledge of catechism was good. On the whole, the school is well conducted by the teacher, Mrs. Sharp.

THE SCHOOL AT ENGLISH HARBOR is conducted by a Miss Sparrow, and the St. Jaques School by a Mr. McEvoy, both of whom, I am enabled to say, are good teachers, having previously met them as teachers

Education.

elsewhere. These schools were commenced about the middle of June last. I did not visit them, but I saw the teacher of St. Jaques school, who informed me that his school was well supplied with books, and that the attendance of the children was very regular. I have been furnished with school returns from all these schools.

DISTRICT OF BURIN.

THE COMMERCIAL SCHOOL AT BURIN I found in the charge of Mr. Harney, who was teacher of it some years before. The school-room has been improved since my last visit, and some new desks and forms have been supplied. The attendance to the school however continues to be small, and as the majority of these are very young children, the character of the school is in consequence quite elementary. There were 17 in attendance on the day I visited the school, and but few of these were at all advanced. Only 5 of the entire number attending the school are writing on paper, and but two cyphering in the advanced rules. The salary of the teacher has been reduced by the Board £10; it is now £70.

FOX COVE SCHOOL.—13 children attending; 5 writing on paper, 3 of whom were just commencing—none advanced beyond the elementary rules of arithmetic—reading, spelling and catechism fair. A supply of second class reading books required. The teacher, Miss Murphy, had charge of the school for only six weeks previous to my visit.

BEAU BOIS SCHOOL continues to be well conducted by Miss Walsh. Copy and cyphering books shown well kept; reading of first class in third class books fair; spelling, catechism and tables very good. There were seventeen children present. The attendance during the summer is very good, but during the winter not more than five or six pupils attend, in consequence of so many families leaving the settlement to live in the woods during that season.

ST. LAWRENCE SCHOOL was not in operation during the time I was in the Burin District; but the teacher who was to take charge of it arrived in Burin before I left. He has been about five years in the Training school, and of course must be quite competent to take charge of a school. The chairman of the District, Rev. Richard O'Donnell, informed me that the teacher's sister, who has been educated at the Presentation Convent School at St. John's, was also engaged to take charge of the females attending the same school; so that the boys and girls of the settlement will thus have an opportunity of receiving an education suited to their sex.

Education.

This school has always had a very large attendance of pupils; and knowing the deep interest Rev. Chairman takes in having it efficiently conducted, I trust that his praiseworthy exertions to effect that object will be attended with success.

The Oderin school was attended by thirty pupils on my visiting it.— A few copies shown, the writing in which was very indifferent. The school altogether is very elementary in its character, there being no less than forty-one children of the whole number attending in the alphabet and words of one syllable.

The remaining three schools of the district were in operation, conducted by female teachers, and were going on favorably.

DISTRICTS OF GREAT AND LITTLE PLACENTIA.

The School-house at Great Placentia has been painted, and some repairs made on it since my previous visit; some necessary out-offices have also been provided. The attendance of pupils to this school is very regular, there were forty eight present on my visiting it. A large number of copy and cyphering books were exhibited for inspection. The writing on the whole was creditable for young children. Only two present were learning grammar and geography, although the teacher gives in his return thirty as learning the latter, and twenty-three the former branches.

No doubt the more advanced pupils are generally absent from school, during the summer, yet I am inclined to question the accuracy of the return in the above particulars. In spelling, reading, tables and catechism, pupils were tolerably proficient. Only one pupil present was learning the advanced rules of arithmetic.

There is no alteration in the school in the north-east Arm from last Report. The teacher is allowed to take two months of the summer for the purpose of fishing, as his salary is only £18. This long cessation of the school, taken in connection with the almost total absence of the necessary requisites for teaching, even when the school is in operation, precludes the possibility of any great improvement taking place. The Distress and Branch Schools were not visited.

LITTLE PLACENTIA SCHOOL was closed on the 18th of October, 1865, in consequence of the resignation of the teacher, and was re-opened on the 14th of May following. I found sixty children attending the school on my inspecting it, but even this was under the average attendance, which has been about eighty since its re-opening. The copy and cy-

Education.

phering books exhibited, of which there were a great number, were very neatly kept, and writing generally good ; first class of readers read well ; second class tolerably so ; spelling, catechism, and tables fair. Some additional desks have been provided, and school-room painted ; the school is also well supplied with books, &c. The present teacher, Mr. Freeman, has been some time in the training school, to qualify himself for his present position, the duties of which I have no doubt he will zealously discharge.

The school at Fox Harbor is certainly the reverse in every thing to the one at Little Placentia. The school house is nothing better than a hut, and a portion of it is occupied by the teacher as a dwelling ; and the miserably small space used as a school room has neither desks nor forms. In this room I found thirty-one children huddled together, the majority of whom were unprovided with a book of any description. Only four pupils had copy books, but a large number were capable of writing on paper, and the teacher, Mrs. Bird, writes a very superior hand, and indeed appears quite competent to conduct an Elementary school, if she were only provided with the ordinary requirements to enable her to do so.

But, first of all, a proper schoolhouse should be built. The funds at present in the hands of the Chairman having chiefly accumulated from the cessation of the Little Placentia School, the Board, I understand, is unwilling to appropriate it for any educational purpose outside the settlement. But I think if the inhabitants of Fox Harbor would only show a proper spirit in the matter, and set about at once to erect a suitable schoolhouse, the Board, I am sure, would second their efforts, by applying a part at least of the funds at their disposal to enable them to complete it. If, on the contrary, the inhabitants refuse to contribute their share, I would advise the Board to close the school until such time as the funds accumulated from its cessation would enable them to erect the schoolhouse solely from the school funds.

DISTRICT OF ST. MARY'S.

In the Commercial School at St. Mary's I found twenty-two children assembled, all of whom were quite young. The attendance of pupils was somewhat larger at the time of my visit and for a short time previous than usual, but the average for the year is still very small, being only fourteen. I am sorry to say that the school has not at all improved in character since last report of it. Only one of the whole number attending the school writing on paper, and but four cyphering, and these in the elementary rules. Some of the pupils are learning geography or grammar.

Education.

The teacher handed me a written statement, in which he endeavored to account for the low state of the school. The chief points stated were—the very irregular attendance of the pupils, the want of the necessary requisites for the school—especially books; and he also complains that the school is never visited by any one in the settlement, and no interest apparently taken in its success; and finally he suggests that examination of the pupils should take place occasionally, at which the parents might attend.

While I quite agree with the teacher as to the necessity of an ample supply of all requisites to the School, and also the desirability of the visitations and examinations he suggests, and the general adoption of which I have before now strongly advocated, yet I cannot help expressing my surprise that such an exceptional course should be necessary at St. Mary's more than any other locality, to ensure even a reasonable attendance.

There ought to be a daily attendance of from fifty to sixty pupils at this school, and this it never had. Each year I find the attendance lessening, until it has come down to an average daily attendance, for the past two years, of fourteen pupils.

There were seventeen assembled at the school north side of Salmonier. In reading, spelling, tables and catechism, the children, considering their age, were fairly proficient, only one pupil writing on paper, and five in the elementary rules of arithmetic. A very poor supply of books, and the schoolroom is in a very unfinished state, neither ceiled at the sides nor over head, and one of the windows not yet put in.

The schoolhouse at the south side is in a much more finished state, requiring only a second flooring. There were sixteen children present. The writing in copies shown pretty good; spelling and catechism fair; reading indifferent; school fairly supplied with books. The school at River-head was closed when I was passing that settlement, but the teacher's return shows it to be on a par, as to attendance and proficiency of pupils, with the two previous schools.

Besides the schools just mentioned, there are four small schools, if they can be so called, the teachers of which receive £25 between them, as salary, from the Board—that is, £10 to one, and £5 each to the other three. Of course much cannot be expected from these in the way of education; but the localities where they are held are situated some distance from each other, and separated by water, and consequently no central position could be selected for a school to prevent this subdivision.

Education.

This is, however, a sample of the difficulties experienced by many of the Boards in the extern districts in the division of the school funds at their disposal. Limiting the number of schools, and thereby having the means of employing competent teachers, and making them in every respect efficient schools, would leave some of the smaller localities in the same districts without any participation in the Education Grant whatever; while, on the other hand, a subdivision of the grant, so that all or even a majority of the settlements might share in its benefits, must necessarily result in the formation of schools of a very elementary character. And, in view of these difficulties, some allowance should be made for the absence of some improvements that may still be wanting in districts thus circumstanced.

DISTRICT OF HARBOR MAIN.

The Holyrood school was closed on my first visit to this District, in the month of June, and continued so for two months, in consequence of the prevalence of sickness in the settlement. On my second visit in September I found the school in operation, with an attendance of fifty-two pupils; nearly all of the more advanced pupils were however absent; the school continues to be well conducted. A historical class has been formed by the teacher, the school being provided with the Christian Brothers' Historical Class-book. Only four of the class, which numbers 20, were present, and these read well and answered questions touching the principal events recorded in the chapter they had just read, with tolerable correctness. The reading of the second and third classes was also good; spelling, catechism and tables very correct; entering and copy books well kept.

The school at the north-side of Holyrood is also well-conducted. There were twenty-four children present, all of whom were well advanced for their relative ages. The first class read well in third class books, spelled the principal words in third lesson, and generally gave correct answers as to their meaning. The eldest child in the class was only ten years of age. In arithmetic also the children were well instructed, one boy not ten years of age was working Practice, and understood it well. In all the other branches the children showed a careful training on the part of their teacher.

On a second visit I made to the school, I found forty-seven children attending.

Only fifteen children were assembled in the Chapel Cove school. This school did not show anything like the creditable state of improvement

APPENDIX.

Education.

exhibited in the one just described. The writing in the copies shown was very poor, and none of the pupils were entering their sums, although some were stated to be far advanced in cyphering. In all other matters children backwards. No register kept for three weeks previous to my visit.

There were twenty-five children present, on my visit to the Harbor Main school, nearly all of whom were very young. The teacher of the school is a very old man, and the school in consequence may not be so successfully conducted as it would be in more youthful hands. He has been however a very successful teacher in his day, and notwithstanding his age, the copy and cyphering books of the absent pupils that were exhibited, showed he still could claim the merit of being able to forward his pupils in these branches, in the latter of which some were working Barter and Rebate or Discount.

On visiting the Salmon Cove school, I found fifty children attending, which is about the average daily attendance for the year. This school is very well conducted. A very large number of copy books exhibited, the writing in which was very good, especially that of the female pupils. Entering books very neatly kept. As many as fifty pupils attending the school were cyphering, twenty-five being in the advanced rule, some as far as Double False Position, &c. The first and second classes read well and afterwards spelled the most difficult words in their lesson, and generally gave ready answers as to their meaning. A class of Arithmetic, went through their exercises very creditably. The first class of Grammar and Geography was absent, but the second class acquitted themselves very well in both these branches.

On entering the Cat's Cove School, I found the younger children up in their several classes, the elder ones acting as monitors under the supervision of the teacher. Sixty children were present, and the Register shows a very good attendance throughout the year. The writing of the pupils was very poor. A class of Arithmetic worked their sums correctly, and with tolerable quickness. First class read fairly, and parsed a sentence in their lesson tolerably correct; spelling, knowledge of catechism and tables being of an average character.

The school at Collier's has, by the Education Act of last Session, been taken from the Brigus District, and placed under the Harbor Main Board. A Mr. Hearne has now charge of the school. He has been at the training school for some time. I found the school much improved under his management, although he had charge of it but for one month previous to my visit. A very great increase in the attendance has taken place;

Education.

on the day I visited it, it was fifty-four. The pupils were divided into classes, and something like method introduced in conducting the school. The attainments of the children attending this school being always very low, no great change for the better could be expected to have taken place for the short time the present teacher had charge of it.

The school at the South Side of Holyrood was closed on my first visit to this District, from the same cause that affected the Holyrood school. The Bacon Cove school was not visited.

DISTRICT OF BRIGUS.

TURK'S GUT SCHOOL.—Twenty-four children present ; writing in copy and entering books very good for young children ; reading of first class pretty fair ; spelling and catechism good ; tables deficient.

There were but eleven pupils attending the Brigus school on my visiting it. This small attendance was caused by the prevalence of sickness among the children of the town. The examination of the children present was quite satisfactory. Reading, grammar, geography and arithmetic were all gone through creditably. In the latter branch seven of the pupils were far advanced, two having gone through the entire course, and were then commencing navigation ; and these children were under eleven years of age.

CUPIDS SCHOOL.—Twenty-six present, chiefly very young children. The writing in copy and entering books was tolerable ; some of the pupils capable of writing on paper had no copy books. The first and second classes read fairly, and generally gave correct answers as to the meaning of the words in their lessons ; spelling, tables and catechism good.

I visited the Northern Gut school in the month of May, for the purpose of seeing it previous to the children leaving who were going with their parents to the Labrador. There was not however as full an attendance on that day as usual. Only one of the first class, and eight of the second being present ; reading very poor, writing in majority of copies shown fair, children well instructed in catechism and tables, spelling fair. Arithmetic has not been taught in class according to my instructions.

The school on the Goulds road has been well attended since its opening. I visited it several times during the past year. It has now been in operation twelve months, and the progress made by the children during

Education.

that time is very satisfactory. With some few exceptions, the children, when the school opened, were merely in the alphabet, and now sixty-five of the entire number on the register (eighty-five) are spelling words of two and three syllables, and capable of reading easy sentences, eight writing on slates, six on paper, and two cyphering in elementary rules. The teacher, a Mr. Haberlin, is most attentive and painstaking, as the steady progress made by his pupils indicates.

The operations of the Bay Roberts school have been much impeded during the latter part of the summer and fall, and indeed up to the time of my visit, from the visitation to that locality of the epidemic already alluded to. I deferred inspecting this school until the fall, in the hope of having a better attendance than I would have had in the summer. But the breaking out of the sickness among the children has frustrated my expectations in that respect; the attendance since then being merely nominal; and when I visited the school 5th, January, only a few children were attending. The Register showed however a good attendance up to the time of the appearance of the epidemic.

DISTRICTS UNDER HARBOR GRACE BOARD.

SPANIARD'S BAY SCHOOL.—Only eight children present. The attendance throughout the year is small. The copy and cyphering books of the children were kept neat, and the writing pretty good. Some of the pupils of the first class were present and only two of the second. They read well in third-class books. Pupils tolerably proficient in spelling and catechism. A supply of reading books required for the school.

The Commercial School at River head of Harbor Grace has been very poorly during the summer. Only fourteen were attending the school on the day I visited it, and these were quite young children, the majority only just commencing to spell. All the grown boys were at the Labrador, and in fact it is only during the latter part of the year and in winter that this school is in proper working order. The copy and cyphering books of the absent pupils were very creditable, a fair per centage of boys being in the advanced rules of Arithmetic.

The female school at River Head, conducted by Mrs. Stapleton, had also a small attendance when I visited it, but appeared to be doing a great deal for the small sum received by the teacher from the Board, £6. I am sorry to see that the contributions from the parents of the children towards sustaining the school have this year been but £1 8s.

The other female school in this neighbourhood was closed, as the teacher was unwell.

Education.

Pretty much the same remarks apply to the St. Patrick school with regard to attendance of pupils as those made on the River Head school. The attendance during the summer is very small, considering the number on the Register, one hundred and six. There were only twenty-eight present on my visiting the school, but in the winter months the attendance is often ninety. A very large number of copy and cyphering books were exhibited, there being as many as seventy of the pupils writing on paper. All these books were neatly kept, the writing in many being very good. Only a few of the boys present belonged to the first class, and these showed a fair proficiency in their studies. The examination of the junior classes was quite satisfactory also.

There was a small attendance in the Mosquito school also on the day I inspected it, only ten pupils being present. The average attendance for the year shows a considerable falling off from the previous years. Some copy and entering books of the absent pupils were shown, which were tolerably well kept. Only two of the children present were reading. The Register was imperfectly kept, to which the teacher's attention was called.

The two remaining Schools of the Harbor Grace District were not visited, but they were visited the previous year.

Mr. Mackey has retaken charge of the Carbonear school; thirty-two children were in attendance on my visiting it. Only four pupils of the first class were present; and these read very well, they were also well instructed in Arithmetic, Grammar and Geography, but in teaching in the latter branch the want of maps was a great impediment. A class of very young boys cyphered in the elementary rules very well.

The books in the hands of the younger children were so diversified that the teacher was compelled to teach them separately, which not only adds considerably to his labors, but the time thus spent must necessarily interfere with his duties to the advanced classes. A supply of school tablets or cards would be found very useful for the young children.

The attendance at the Crocker's Cove school, except for a few months in the spring, is very small indeed. During the months of April and May the attendance is best, when it averages about twenty. I found only two attending the school; and during the summer months the attendance seldom exceeds half a dozen. This small attendance is the more surprising in view of the pains taken by the Board to provide for the pupils' comfort. The school room is a most comfortable one, and provided with every requisite necessary.

Education.

The teacher too is provided with religious books for distribution among the children attending the school.

I visited the schools in the Bay-de-Verds District in the early part of July, and I regret to state that from a variety of causes I found almost the entire of the schools closed at the time I visited them.

Western Bay school was closed since the 19th of February, in consequence of the illness of the teacher. He had sent in his resignation a short time previous to my visit. I was, however, by him with the school Return, and on looking over the Register I found the daily average attendance to be about twelve up to the time of the closing of the school.

Broad Cove school was also closed on my visiting it, the teacher having gone that morning to Harbor Grace to solicit his appointment to the school at Western Bay.

Northern Bay school was closed in consequence of the resignation of the teacher, who left some months previous to my visit to take charge of the Bonavista school, and no person had been appointed to succeed him up to that time.

Job's Cove school was closed in consequence of the teacher taking his vacation. I sent word to him to meet me at the school house on the following day, which he did, and I was thus enabled to see the Register and the copy books of the pupils. Only a portion of those who could write on paper were provided with materials to do so. The writing showed a progressive improvement. The school requires a supply of reading books; half a dozen each of the first, second and third class books would be necessary.

Low Point school had been closed for three months previous to my visit, in consequence of the prevalence of fever in the settlement, of which a number of the inhabitants died during the previous winter and spring. The attendance to the school for the year was in consequence very small. The average being only eight.

I found the school attended by only three children.

BAY-DE-VERD'S SCHOOL.—Present thirty-six.—All the pupils of the first class were absent, being at the fishery. The second and third classes, of which there were ten in the former and twelve in the latter, read tolerably well, considering the age of the children, spelling and catechism fair. In the elementary rules of arithmetic, pupils very defi-

Education.

cient; showed teacher a system of exercising them in class. None of the pupils present were learning grammar or geography. Only a few copy-books were presented for inspection, in consequence of the teacher permitting the absent pupils to take theirs home with them. This schoolhouse requires painting and also some repairs to the porch. All the other schoolhouses in the district are in very good repair.

DISTRICT OF ST. JOHN'S.

I visited a few of the schools in this District in June and the remain-
in October.

SPRINGFIELD SCHOOL.—Seventeen present, which is about the daily average for the year. Writing in copy-books pretty good. Three of the first class present; reading fair, spelling and catechism good.

River Head school continues to be well attended. There were but sixty-one present on the day I inspected it, which is far below the average. Examined three classes in reading, spelling, tables and catechism. Reading was a fair average, and in the three latter, pupils were well instructed, their answers being correct and quick; copy and entering books well kept. A class of grammar and geography had but recently been formed.

ORPHAN ASYLUM SCHOOL.—The children were up in their several classes when I entered the lower school. These classes conducted by monitors were from the alphabet up to easy reading, the number present being sixty-two. A few of the boys present were commencing to write on paper and cyphering in the elementary rules. In the upper school there were sixty-eight attending. A very large number of copy and entering books were presented for examination. The writing was of course of various degrees of proficiency; in general it was good, and the books well kept. A majority of the boys present were far advanced in arithmetic. Reading of pupils generally good; knowledge of grammar and geography good. The attendance to both the schools was very regular, and the numbers increasing at the time of my visit.

In the Kilbride school I found but eleven children attending, 16th June. I visited the school a second time on the 16th October, when the number in school was even less, but the Register showed an average attendance of nearly twenty between these two dates; five pupils writing on paper and three read in second class books; reading and writing very poor; teacher complains of the irregular attendance of pupils and the want of books.

Education.

PETTY HARDOR SCHOOL.—Forty-two present. Copy and entering books well kept. One boy of fourteen years was learning Navigation, and both his entering and Navigation books were very creditable; reading, spelling and tables very bad; only four reading books in school and these not alike. Fully twenty-five of the children present were spelling words of one and two syllables, and only two were writing on paper.—A number of the children present were unprovided with books. School-house requires some repairs.

The Goulds School is held in a room of a private house. Teacher had charge since June. Present eleven; only one pupil writing on paper. Not one reading book in the school, and a poor supply of other books. School-room furnished with school tables; children very backward.

BLACKHEAD SCHOOL.—Eighteen pupils attending. Register shows a very good attendance during winter months. Teacher stated that eighteen of his pupils were writing on paper, but had not one copy book to produce. One entering book exhibited, in which the sums were entered in the most slovenly manner. Not one reading book in the school, only two of the children present could read; spelling very bad. School house requires some repairs.

QUIDI VIDI SCHOOL.—Twenty-two present. About twenty copies presented for inspection, the larger number of these were the productions of children just commencing to write on paper. Only one pupil attending the school as far advanced as the Rule of three. Attainments of children present low. The teacher had charge of the school only since the previous December. I have no doubt of the school improving under his management. The school is poorly supplied with books, and the school-house requires some repairs.

BALLY HALLY SCHOOL.—Present twelve. No classes formed in the school, the teacher preferring to teach his pupils separately, although several of them had books alike. With one exception, none present were further advanced than the elementary rules of arithmetic; and these rules were very correctly worked by the children learning them. Reading and writing of pupils indifferent; spelling very bad. The teacher stated that he had received from the Board, some time previously, a supply of reading books, table books, and catechisms. Some of these were given gratuitously to the pupils, and others were sold, the money received for the latter the teacher thought he was entitled to retain.

FRESHWATER SCHOOL.—Only eight children present. The attendance

Education.

to this school is very irregular and decreasing. A few copy books, very indifferently kept, were exhibited for inspection.

The Logy Bay School was closed from the 15th of August to within a few weeks of my visit in October, in consequence of the prevalence of fever in the neighbourhood. 11 pupils of the school died in the course of a few weeks, and at the time of my visit there were seven children from the settlement in the Hospital. There were only four children in school; the attendance, up to the closing of the school in August, was very good. Copy and entering books exhibited were neatly kept, and writing remarkably good for young children. Some of these had belonged to the children who had died. Some very creditable specimens of needle work were also shown.

The Outer Cove School was closed, and had been so from the latter part of August, from the same cause as closed the Logy Bay School—the prevalence of fever in the settlement.

TORBAY SCHOOL.—Thirteen present. Some very poorly kept copy and entering books shown, to only two of which there were any dates to show when they were written. Only one boy present could read; spelling very bad. The schoolhouse is in good repair, but requires to be painted on the outside, and a stove to be supplied to the school room.

When I arrived at the Flat Rock School none of the pupils had assembled, although it was fully time for their attendance. I waited until after 11 o'clock, and up to that time only two children came. The teacher stated that four of his pupils were writing on paper and learning the advanced rules of arithmetic, but he had neither copy nor entering book to produce. There is not a single reading book in this school; the teacher stated that his pupils use spelling and prayer books for that purpose.

COADY'S WELL SCHOOL—Present eight. Only a few copies shown, as there are but six pupils attending the school writing and cyphering. In spelling, tables and catechism children answered very correctly. There were four reading books in the school, but none of them alike. Some of the children attending the school were unprovided with any books.

WINDSOR LAKE SCHOOL.—Present six, all of whom were very young. The writing in the few copy books exhibited was good. Four of the absent pupils were said to be cyphering as far as Practice. The attendance to the school is small, especially in winter. The school house is in a very poor state of repair.

Education.

PORTUGAL COVE SCHOOL.—Eighteen present, all very young children, five just commencing to read, and the remainder either in the alphabet or spelling words of one syllable. Only two of the pupils attending the school were cyphering, two reading books in the school, and some of the pupils attending the school, capable of writing, were unprovided with paper. The attendance to the school in winter is very small.

I visited the Topsail road school twice during the summer, and on both occasions there were but few children attending the school. One of the days however was a very inclement one. But the attendance throughout the year is much smaller than it ought to be. The inhabitants of that locality have been provided with a very fine school house and with a competent teacher to conduct it, and it is somewhat disheartening to see how badly these advantages are appreciated.

There were but seven children attending the Topsail school on the day I visited it. There were eighteen on the Register, and none of these were writing or cyphering. Children poorly supplied with books, and their attainments low.

The Kelligrews School was not in operation when I visited it on the 12th June. The Pouch Cove, Belle Isle, and Freshwater schools were not visited.

Education.

Education.

REMARKS.

Nos. 1 and 2.—A small increase appears in the balance on hand from last year, being, I presume, caused by the money received for books.

Nos. 3, 4, 5, 6, 7 and 8 correct.

No. 9.—Correct. This includes £4 12s. 4d. received for books sold to the children attending the schools of Harbor Main.

Nos. 10 and 11.—Correct.

No. 12.—There is no balance struck, the Chairman stating in a letter accompanying the Return, that he could not tell whether he was in funds or not until he would see the manager of the Bank where his school moneys were deposited. A similar omission took place in the Financial Return furnished last year, no balance either for or against the Board was made out. If the items, however, in these two returns be correct, an over expenditure has taken place the past two years to a large amount.

Nos. 13 and 14.—These two returns appear to be made up to May, instead of the 1st of July. In all other respects they are correct.

No. 15.—Correct.

Fisheries.

REPORT OF THE GENERAL SUPERINTENDENT OF FISHERIES THE DURING SUMMER OF 1866.

(Copy.)

On the 5th July I left St. John's for the Straits, in the schooner *Hawk*, a vessel well suited for the service. Calling off Bay-de-Verde I was informed that the fishery up to date had been poor. An American whaler was here with one fish. In the evening anchored at Old Perlican, and left next morning.

7th July.—Off Bonavista Cape. Passed by a number of fishing boats; bait plenty; fish scarce.

8th July.—Calm, off Cape Freels. In the evening the wind came in from the S. E.

9th July.—Blowing strong from the N. E. Passed Cape Fogo.

10th July.—Took a strong breeze from the N. E., and ran into Shoe Cove for shelter. Whilst here I visited for the first time Mr. C. F. Bennett's copper mine at Tilt Cove; where I found nearly one hundred men busily employed, receiving four shillings a day all the year round. Their houses were neat and comfortable. A large barque had just arrived, and was about to load with ore from this mine. Other copper mines are about to be opened, which I hope will be as beneficial to the people as this one.

11th July.—Left early in the morning, and on the 12th landed Revd. Mr. Temple at Englee on the French Shore. The English residents on this coast are nearly all well off, and latterly have been turning their attention more to agricultural pursuits,—one person having ten cows, and another fifty sheep, so that they are enabled to make the greater part of their own clothing. The seals they kill in the winter, with their catch of codfish and salmon in summer, add considerably to their means of living. Those who have large coasters lay them up on this shore to carry on the seal fishery.

13th July.—Left at 4 a. m. Saw a large French man-of-war off the Grey Islands, apparently taking soundings. In the afternoon it came very stormy with a strong breeze from the S. E. Reached Quirpon just at dark, and gladly took shelter. Nearly all the French merchants on the Eastern part of this coast have abandoned their establishments, on account of the failure of the fishery, which failure old and experienced

Fisheries.

French captains attribute to the use of bultows and large seines. The latter are not to be employed on this shore for the next five years.

14th July.—Left early in the morning and called off Belle Isle. No French fishermen to be seen.

15th July.—At Henley Harbor. Wind strong from the N. W. No cod fish to be caught, and salmon very scarce. Those favored with large craft were making preparations to go north, seeking fish. The resident population here are becoming subjects of poverty, owing to both the seal and cod fisheries being failures for several years back. A few are trying to get to the Bay of Islands the winter, intending to return again in the summer.

16th July.—Made sail at 2 a. m. : Called off Chateau and Black Bay.

17th July.—Reached Red Bay. Up to date the fishermen had not caught enough to supply their daily wants. A small schooner, owned by Nathaniel Pike, was fitted out here, last winter, for the seal fishery, with a crew of fourteen men, who, at the close of the voyage, had ten pounds a man.

18th July.—Left Red Bay, and called off East and West St. Modeste and Pied Noir Bar. No French had yet visited this coast.

19th July.—Called off Lance-au-Loup. Was informed by Messrs. Stabb, Row & Co's. agent that they would sustain a heavy loss, on account of their fishermen not being down in time. The fish were on this part of the coast ten days earlier than usual, which, I believe, was general on the whole of Labrador. Whilst cruising the Straits, I discovered a batteau, and followed her into Lance-au-Loup. The crew professed to have despatches for one Mr. Le Fèveure, who carries on a small business here. I was quite satisfied, from past experience, that they were looking for bait, knowing how they disguise their craft, and practice every kind of deception. It turned out afterwards that I was quite correct, for I caught them shortly after with a load, and their only plea was "one of the residents sold it to us." The bait had now left their coast, and I was confident that a number of trespassers would soon be over.

20th July.—Cruising the Straits. Several French shaloupes appeared; but as soon as they discovered the *Hawk*, returned to their own shore till the night. Next morning they were in every principal bait cove from Pied Noir to Forteau.

Fisheries.

21st July.—Caught three French craft making in for Fox Cove, where the Lance-au-Loup people generally fish, and can supply themselves with bait any time in the day. The French commenced this day, and continued to carry away bait, which had been sold them by a resident there, until there was not a Caplin left in the Cove. Our fishermen were indignant that such a grave injury should be done them, and it nearly led to a serious quarrel.

22nd July.—Spent the Sabbath at Forteau. Shortly after the morning service, a boat and crew arrived from East St. Modeste, for Rev. Mr. Dobie. The resident minister on this coast has many privations, and is exposed to hardships and dangers. He has to visit nearly all the people by water, for there are but few roads.

Mr. Ellis has an establishment on the eastern side of Forteau, (which formerly belonged to Mr. Bennett,) and conducts the Codfishery in a most enterprising manner. There are also two large Jersey establishments on the Western side. The agents complain, that whilst our Government make them pay duty, they do not receive their proportion of the money granted for roads, schools, &c.

23rd July.—Cruised the Straits, French craft constantly coming and going, carrying off large quantities of bait, which they purchased of some of the fishermen. Arrived at Blanc Sablon. Messrs. Dequetteville, Brothers have a large amount invested here, and employ a number of men. Formerly they brought all their fishermen from Jersey, but finding that bringing them out and taking them back, was very expensive, they have been getting a number of men from Gaspe, these last few years. The latter gave them a good deal of trouble last year, insisting upon being sent home three weeks before the usual time, and would not go fishing while the other boats were bringing in three and four quintals a day. The agents, most determined men, kept them on bread and water, to bring them to their senses; but as they all had large accounts with their merchants, and seeing the fishery was poor, they took the advantage of their employers, knowing there was no way they could be punished. Those agents, for the future, will take a number of our fishermen; they had a few this year, who pleased them very much, and although the voyage was not an average one, they made fair wages.

24th July.—Found a number of French fishing vessels between Isle-au-Bois and Green Island, setting large bultows, to the great injury of our fishermen. As the Isle-au-Bois was the Western part of my station, I was not sure whether I had a right to interfere with them; but, fortunately, the Canadian Commissioner arrived in his yacht, which is fitted

Fisheries.

in naval style, with a crew of eighteen men and officers. He soon started them off, but as soon as he went West, they returned. I gave them a start, and kept an eye on this place afterwards. Messrs. LeBoutillier, Brothers have a splendid establishment on Isle-au-Bois, and carry on a very extensive fishery. Three small Jersey establishments are on this Island.

25th July.—Cruised the Straits. French taking about a thousand barrels of bait a day from our waters, supplied by a few persons on the Labrador. When the bait leaves their coast, they not only take a supply from our waters for their hooks, but also carry away thousands of barrels to scatter in the waters, and thus prevent the fish from coming down to our fishermen in the Straits. The people at Red Bay, and along the coast, these last few years, cannot average five quintals a man till all the bait is swept from their coast by the French; then the fish finds its way down, and they kill their voyage in September. French hooks have been found in fish, this year, passing down the Straits,—a proof that our fish is intercepted by bultows. From this time till the 31st. I was constantly cruising from Belle Isle to Isle-au-Bois, touching at the different harbours, endeavouring to prevent the French taking fish and bait from our waters; but having no power to seize, they took advantage of my position.

1st August.—Cruising the Straits. Large steamers passing and re-passing. Scarcely an iceberg to be seen on the coast, something unusual. The fishery being almost a failure, hundreds of coasters were moving up and down in search of fish.

2nd August until the 10th.—Cruising from Belle Isle to Isle-au-Bois, Every day numbers of batteaux and shaloupes crossing and recrossing. Anchored at Isle-au-Bois, and saw the agent; twenty boats were lying at their moorings, which had been fitted out for the Gaspé fishermen, who would not go out, while other boats were bringing in three and four quintals a day. This was very trying to the agent, after supplying them with everything necessary for their families and the voyage. As H. M. Ship *Lilly*, intended to be stationed on this coast, was detained on account of the laying of the Cable, it was not in my power to remedy this evil.

From the 10th to the 15th.—Cruised from Forteau to Pied Noir, closely watching the latter, as it is the last place where bait can be had.—When the French had taken the last caplin on the Bar, they commenced to take Lance, depriving hundreds of our fishermen of bait; and the fisheries being such a failure in Newfoundland; craft of all descriptions

Fisheries.

were centred in this place, fully expecting a supply. I had much to contend with, as the people reflected on me for not preventing such proceedings against their best interests.

21st August.—Cruised the Straits; took shelter at Red Bay. The fishery had improved as soon as the French stopped taking bait. Mr. Penney, who supplies largely for the fishery in this settlement, gives it as his opinion, that if the French are not prevented taking bait from our waters, the people will have to leave their homes or starve.

Left Red Bay on the 23rd, and called off all the coves and creeks as I passed down the Straits. I found, in a place called Wild Bight, a number of batteaux and a large French codsèine, concealed in a little creek, where they thought the Hawk would not venture. I ordered my boat to be manned, and after a good deal of parleying, got them under weigh, and followed them partly across the Straits.

24th August.—Took shelter at Battle Harbor. In the morning the *Diamond* arrived from St. John's, with the mail, and news of the successful laying of the Atlantic Cable.

25th August.—Started for Belle Isle. Not a Frenchman had been seen near the Island for the summer. Last year I took seven batteaux, and gave the men a fright, which might have been the cause of their not appearing. A large number of British fishermen were about the Island, and nearly every cove was filled with small craft from Newfoundland.

28th August.—Cruised the Straits; took shelter at Cape Charles. Large shoals of herring had struck in, and every one was employed night and day. It is impossible to estimate the great benefit this fishery confers upon the people. For ten days any quantity could be barred or netted, even from 1000 to 1500 barrels could be barred in a few minutes. From Battle and Sizes Harbors to Cape Charles, there must have been 25,000 barrels barred at one time. This is the only way the herring fishery can be profitably carried on, as herrings barred in large seines will keep good for twenty days, can be taken from the net and cured as required. A great many Nova Scotia vessels visit this coast late in the fall, laden with fresh beef, pork, poultry, and all kinds of vegetables. The residents and others can thus find a ready market for their herring, and are thus supplied with the necessaries of life. After six years' experience, I would respectfully suggest to the Legislature, the propriety of repealing that part of the Herring Act which refers to what is termed "barring," so that every man may have free access to those shoals of wealth when they come within reach.

Fisheries.

29th August.—Went to Battle Harbor.—Left next day for Sizes Harbor. Found it filled with craft from the Northward. Some had scarcely any codfish, but were loaded with herring. This made many stand well with their merchants, who, otherwise, would have been badly off.

31st August.—Anchored at Cape Charles.

4th September.—Went to Belle Isle. Found no Frenchmen on the fishing ground. Started for the French Shore. The Salmon fishery here has been destroyed by nets being set across the mouths of the principal rivers. It would be money well spent if an experienced man were brought out from England to improve this valuable fishery.

As steam has been introduced into Newfoundland waters, to carry on the Seal fishery, I believe that if a number of fore-and-afters, with small crews, wintered on this shore for that fishery, they would do well, taking one with another. These are the crafts in which to make men of the rising youths, for the present fishery has destroyed the prospects of thousands; and hundreds of our planters, once independent, are now subjects of poverty. In Nova Scotia the fisheries are conducted in schooners, and I have seen as many as one hundred in a fleet. I paid an interpreter in order to ascertain the names of the shaloupes and batteaux found enroaching, and also the residence of their owners; but as they erased their names and changed crews, it was impossible to get an accurate statement. The following can be relied on:—

19th July.—One batteau, belonging to Messieurs Fontaine, of St. Malo, fishing at Port au Choix.

23rd July.—Schooner *Clipper*, Francois, Jouble master, belonging to Messieurs Lenie, of St. Malo, buying bait from British subjects at Lance au Loup.

24th July.—Schooner *St. Ann*, of St. John's Island, belonging to Messieurs Lenegard, St. Malo, buying bait from the Lance au Diable people.

31st July.—Schooner *Clipper*, belonging to Messieurs Lenie, St. Malo, buying bait from the Lance au Diable people. One batteau belonging to Messieurs Fontaine, St. Malo, Chatelier, master, buying bait at Lance au Diable.

8th August.—Two batteaux and one codseine boat, belonging to Messieurs Madicorne, of Grand-ville, fishing at Cape Norman, Edward du Pond, codseine master, Joseph Anconard and Louis Brilliant, batteaux

Fisheries.

masters. Schooner *Trump*, of St. Peter's, Berchall, master and owner, fishing at East Modeste.

14th August.—One shaloupe, aubert, master and owner, belonging to LaPoile, fishing at Green Island. Aubert is married to a British subject, was master of a British schooner for eighteen years, and has a permit to fish on English grounds from captains of British ships of war.

16th August.—A schooner belonging to Messieurs Lenie, of St. Malo, Jean Le Bic, master, buying herring from the people at Pied Noir.

REMARKS.

I cannot close this Report without bearing my strongest testimony against the suicidal traffic in bait, at present carried on with the French at the Labrador, and the effects of which will sometimes, even at the height of the fishery, leave our own people without a sufficient supply, and which traffic, independently of other evils, furnishes such an easy opportunity of encroachments upon our fishery grounds, when, as is but too often the case, the French grounds should fail in consequence of their destructive mode of conducting the fishery by bultows and large seines. This is an evil which will increase year by year, and when it is remembered the very large outlay embarked by the merchants and planters of Newfoundland in that fishery, and the thousands of men, women, and children dependent thereon for their yearly support, I need not, I conceive, say anything further to induce the Government and the Legislature to take such steps as may be necessary to check the evil of which there is so very much reason at present to complain.

Respectfully submitted,

(Signed,)

STEPHEN MARCH.

Fisheries.

**REPORT ON FISHERY PROTECTION AT CAPE ST. JOHN,
DURING THE SUMMER OF 1866.**

June 10th.—Arrived at Shoe Cove.

14th.—3 French Vessels arrived at Lascie.

Captain Rebore,
 “ Menyar,
 “ Botone.

15th.—Sent boat and five hands to the Cape. Commenced making shelter for the summer.

16th.—Men employed on shore.

17th.—5 seine boats came to the Cape. Guard boat took her place at the boundary.

18th.—27 Batteaux came to the South Bill. No fish worth notice.

19th.—Caplin landed at Mansfield Bight; fish very scarce, one seine hauled about 10 qtls.

20th.—Left Brinie's Cove at daylight, went to the boundary, 4 seines at the South Bill, and 9 Batteaux hauled 14,000 fish, men doing but little with the hook and line.

21st.—Strong Wind South. Frenchmen at Middle Bill all day.

22nd.—At daylight left Brinie's Cove and rowed to the limit, weather fine; only a few boats at the boundary, fish very scarce. Frenchmen looking blue, took about 200 qtls. from the Cape to-day for about 60 men.

23rd.—Rowed to the Cape, seven French boats rowing round, fish scarce. Frenchmen inquired if there was much fish in Notre Dame Bay. Hauled to-day at South Bill 16,000 fish, or 150 qtls., according to the French reckoning.

24th.—At 3 a. m. went to the limit. Frenchmen uncovered and commenced work, done but little for the day.

25th.—Strong Wind S. E. French North of the Cape.

Fisheries.

June 26th.—Wind S. W. Great many small craft going North, saw few Frenchmen all day, fish very scarce at the Cape.

27th.—Rowed to the Cape at 3 a. m., 4 seines at the boundary, hauled to-day 26,000 fish. Hook and line men doing very little.

28th.—At sunrise left the Camp and rowed to the limit. Frenchmen uncovered and began to row along shore, took from the South Bill to-day 30,000 fish for 5 Seines.

29th.—At 3 a. m. left Brinie's Cove, wind West, most of the French at Middle Bill. At 3 p. m. spoke Seine Master, said he hauled at North West Point 5,000 fish, complained very much of the voyage.

30th.—Strong Wind N. E., most of the Lascie boats in the South of the Cape doing very little all day.

July 1st.—Rowed to boundary, Frenchmen anchored at Mother Burke, too much sea on for hauling. Hook and line doing a little, Frenchmen quite discouraged about the voyage.

2nd.—Sea more moderate. Frenchmen very busy, took to-day from the limit 19,000 fish for 4 seines.

3rd.—Wind East with heavy tumble. French North of the Cape not doing much.

4th.—Wind South, sea calm, Frenchmen at Middle Bill, fish scarce.

5th.—Rowed to Cape at sunrise, French at the South Bill, hauled to-day at the limit 18,000 fish.

6th.—Strong Wind South, boats at North Bill.

7th.—At 3 a. m. rowed to the boundary, saw but few boats all day.

8th.—Left Brinie's Cove at daylight, 3 seines at South Bill, hauled 9,000 fish.

9th.—No Frenchmen at the Cape all day.

10th.—Saw but 4 boats for the day, fish scarce.

11th.—At Daylight went to Cape, saw no French all day, at noon the

Fisheries.

Schooner *Hawk*, with Superintendent of the Fisheries on board, passed the Cape, going North.

12th.—Saw only six Batteaux for the day.

13th.—No Frenchmen at the Cape.

14th.—Saw but one seine for the day; eight Batteau at the Middle Bill, fish scarce.

15th.—At daylight left the camp for the Cape, saw but nine boats all day; one seine took from the limit 4000 fish, enquired if there was any fish at Shoe Cove, said the fish was very scarce down the shore, some vessels not more than 100 qtls. on shore.

16th.—Strong wind S. E., saw no French for the day, fish very scarce in Mansfield Bight, and also at Shoe Cove.

17th.—No Frenchmen South of Middle Bill, some appearance of fish on the bottom. Shoe Cove fishermen began to sink the codnets.

18th.—Saw only seven batteaux at the North Bill, some fish taken from the codnets in Mansfield Bight.

19th.—Three seine boats came to the limit, one hauled 6000 fish, one 4000, and one 3000. No fish for the hook and line.

20th.—At daylight rowed to the Cape. four seine boats at the boundary, took to-day 10,000 fish, or one hundred qtls. according to French reckoning.

21st.—Left Brinie's Cove at 3 a. m., strong wind south. Frenchmen in Cape Cove, not doing much.

22nd.—Wind S. E., bad weather, nothing done at the Cape.

23rd.—Saw no French all day.

24th.—Frenchmen north of the Cape.

25th.—French boats North of the Cape.

26th.—Saw eleven batteaux at the Middle Bill and one seine.

27th.—Left Brinie's Cove at 3 a. m., 14 batteaux at the boundary.

Fisheries.

done nothing with the hook. Some quantity of fish taken out of codnets in Mansfield Bight by the Shoe Cove men.

28th.—Saw only 12 French boats all day, fish scarce.

29th.—Wind N. N. E., with sea. French boats in Mansfield Bight for shelter.

30th.—Wind W. N. W. strong. Frenchmen left for the Cape, done very little for the day. No caplin in Cape Cove.

31st.—Rowed to the boundary, four seines at the limit. Hauled in all to-day about 30 qtls., codnets doing well.

August 1st.—At daylight French uncovered, and began to look for fish at 6 a. m. French boats went North of the Cape.

2nd.—Saw no French for the day, Shoe Cove men doing well with the codnets.

3rd.—Wind S. W. Saw no Frenchmen. Caplin gone, some fish on the bottom in Mansfield Bight.

4th.—One seine at the South Bill, asked seine master where all the boats were, said they went to Condohash, (Bryant's Cove,) this morning. Asked him what fish he had hauled, said 100,000 fish, about 900 qtls., the rest of the seines not so much, one had but 30,000 fish.

5th.—No French at the Cape until 5 p. m. ; two seine boats came round North Bill, remained in Cape Cove.

6th.—At daylight rowed to the Cape, saw but seven batteaux for the day, fish very scarce.

7th.—At 3 a. m. guard boat dropt graplin at limit, saw but nine batteaux at the Cape, saw several batteaux going out to Gull Island, spoke batteau master, said all their seines were landed, fish scarce at the Cape.

8th.—Fourteen batteau at the Cape, hook and line men not doing much. Codnets in Mansfield Bight doing well.

9th.—Wind N. E., strong breeze, several boats at the boundary, fish don't eat, some herring in Mansfield Bight, spoke batteau man, asked

Fisheries.

him if they got any fish at Gull Island, said not much, about 400 fish for each boat, said the boats that were at Horse Islands had done very well last week.

10th.—Some sea on, few boats at the South Bill, fish very scarce. Shoe Cove Codnets doing well, no bait for the hook-and-line men.

11th.—No Frenchmen at the Cape.

12th.—Saw but 4 boats for the day.

13th.—Only 9 Batteaux at the Cape for the day, saw several boats out to the Gull Island, ask Batteau master what bait they had, said they caught some squid in Lascie.

14th.—Several boats at the Cape not doing much.

15th.—Wind S. W., fine weather, little or no fish.

16th.—No French boats at the Cape for the day, several Shoe Cove punts going round the Cape to try the Frenchmen if they would allow them to take squid in Harbor round.

17th.—But 6 Batteaux at the Cape.

18th.—Rowed to Cape, saw but 9 boats for the day.

19th.—Wind South, and heavy rain and thunder, no fish at the Cape of any account.

20th.—Saw no boats at the Cape, some Shoe Cove punts came from Harbor round with squids, dropped graplin at Middle Bill and done well.

21st.—13 Batteaux came to South Bill at 7 a. m., took two or three hundred fish for a boat.

22nd.—Several boats at North West Point.

23rd.—Saw no boats.

24th.—No Frenchmen, a number of small craft passing from the Labrador.

25th.—Saw but 3 or 4 Batteaux all day, fish scarce.

Fisheries.

August 26th.—Wind N. W., 10 Batteaux at North West Point.

27th.—Saw no Batteaux for the day.

28th.—Saw 7 Batteaux at Middle Bill, 7 at South, fish very scarce.

29th.—No Frenchmen at the Cape.

30th.—Saw no boats.

31st.—4 Batteaux at the North West Point.

September 1st.—From this date saw nothing worth noticing, boat and crew remained in Mansfield Bight until the 1st of October, visiting the Cape when the weather would permit.

In conclusion, I beg leave to state, that the voyage of the French is much worse than last season ; one ship left Lascie on the 10th with a load of salt for St. Peter's, her catch being 500 qtls. one 1,200 qtls. and one 800 qtls. I must also state that the French did the Shoe Cove men good service in allowing them to catch squids in their harbor. The voyage in Shoe Cove is short of last summer, the average catch of Codnet men about 45 qtls., the hook-and-line men about 22 qtls., that is those men that got no nets, the two last vessels left Lascie the 4th of October.

(Signed,)

HENRY KNIGHT.

Fisheries.

REPORT ON FISHERY PROTECTION AT BELLE ISLE, DURING SUMMER OF 1865.

July 8th.—Left Old Perlican for Belle Isle, and on our arrival found that the fish and bait had struck in. Several boats from Newfoundland were favored with a few days good fishing but as soon as the bait left, the fish followed. It is an uncommon thing for caplin to remain about this Island more than a week. As the fishery was almost a failure in Newfoundland, a great many craft were making their way to the Northward, the smaller ones putting up at Belle Isle. Every creek was filled. Fifty boats would be out at a time, and as there was no bait, they had to use the jigger, which was the cause of the fish leaving so soon.

18th.—Wind S. W., a large mail steamer passed by. Saw the light house keeper, a man well suited for the office he holds. Every thing was in perfect order. He informed me that the seals were very numerous about the Island last spring, from the 10th to the 20th April. Mail steamers going by every week.

30th.—Several vessels passed to the Northward. Some to carry on a herring fishery, others for dry fish. Not a French craft was seen near the Island for the season. It may have been from the fright the Commodore gave them last summer when he seized six of their batteaux. A great many British fishermen were around the Island, and the first time for these last twenty years the fishery was a failure at Belle Isle.

August 10th.—The green fish catchers, early on the coast, were making their way home. This was a cheering sight, to see them amply rewarded for their toil. Had the fishermen been earlier at Labrador, they would have done much better. The Commissioner in the "*Hawk*" gave us an occasional call and for the first time those last six years, had no trouble with French trespassers. He had many storms to contend with, whilst discharging his duty in the Straits. The "*Hawk*" ran to Lark Harbor for shelter, and remained there a day and night. We were all glad to hear that they had succeeded in laying the cable. Large numbers of green fish catchers passing, bound home.

31st.—The weather began to get stormy, and it is such a dangerous place, those that had not good moorings. Four craft held on till the

Fisheries.

20th September, thinking, as the fish passed to the Eastward from the Straits, they would have a good catch like other falls, but they were sadly disappointed. A coaster called on her way home from Labrador, and I took this opportunity of getting a passage for myself and crew. The Government act wisely in protecting the fishery at Belle Isle, as hundreds of our fishermen resort there, and this is the only summer they have been disappointed.

(Signed.)

JAMES MARCH.

Fisheries.

ST. JOHN'S, Nov. 3rd, 1866.

Hon'ble COLONIAL SECRETARY.

DEAR SIR,—We beg to enclose to you the general record, copied from the Log Book, kept on board the schooner *Pioneer*, 71 tons register, fitted out by us for a Banking and fishing voyage during the past season, in accordance with the Act of the Legislature for the encouragement of the deep sea fisheries.

In explanation of the errata and informalities which appear on the original copy from the Log Book of the *Pioneer*, signed by Capt. Bartlett, we may observe that it was hurriedly done on the evening of the 4th October, just a day or two after the vessel's arrival back to this port, and when it was decided to pay off Capt. Bartlett, so as to allow of his return to Boston by the *Chedabucto*, leaving early on the following day.

You will readily understand from the "extracts from the Log Book" that the voyage has not been a successful one, and it may not be amiss in us, on the present occasion, to give you our views of the main causes why it has not been remunerative, especially as it is well understood the French and American fishermen have been very prosperous.

We may preface our following observations by stating, that in every detail that suggested itself to us, we did everything in our power to ensure success. The *Pioneer* was a new vessel built for the express purpose of employing her as a Banking vessel. Capt. Bartlett was engaged for our service at Gloucester, U. S. as an experienced fisherman, at \$1000 United States currency as wages for the season, and his passage paid by us from and to Boston. We now think that we have not been very fortunate in the selection of a Captain—and his failure in not securing a good voyage has partly arisen from defective judgment, combined with a want of local knowledge, to enable him more readily to secure good bait at the proper times and seasons. Next, owing to the ice being so late in Trinity Bay, the vessel was detained there from this cause for three weeks, and this detention combined with the still further delay occasioned by going to St. Mary's Bay for bait, instead of Fortune Bay or St. Peter's, was the loss of one and a half month of *the best fishing time*, or in other words the first trip of the *Pioneer* was a loss instead of a *gain*, owing solely to these circumstances,

Such are the leading features which, in our opinion, have led to failure in our experiment at the deep sea fishery, but we still have faith

Fisheries.

in it, and purpose once again to make trial. The experience gained by *our own fishermen* on the voyage herein described has been such as to give us confidence that they can successfully prosecute the Bank fishery next season, and we hope to have the *Pioneer* so engaged by the end of March, or early in April next year.

We remain, Sir,

Your very obedient Servants,

JOB, BROTHERS & Co.

Fisheries.

EXTRACT FROM THE LOG BOOK KEPT ON BOARD THE
SCHOONER "*PIONEER*," 71 TONS REGISTER, BARTLETT
MASTER, ON A FISHING AND BANKING VOYAGE, SEA-
SON 1866.

March 19th.—Israel M. Bartlett arrived this day from Boston, in the Brig *Seamew*, having been engaged by Job, Brothers & Co., to take charge of the *Pioneer*, on a banking voyage.

29th.—Captain Bartlett left overland for Hant's Harbor, where the Schooner *Pioneer* was ready for launching, new from the stocks.

April 20th.—Owing to Ice in Trinity Bay and on the Coast, could not possibly get to St. John's before this day.

28th.—Having completed outfits in St. John's, sailed on this day for St. Mary's Bay, to procure Bait, and in prosecution of the voyage, having on board a crew of 12 men all told.

29th.—Returned to St. John's Harbor, not being able to get round Cape Spear, on account of Ice.

30th.—Re-sailed to St. John's, but fog and heavy weather, with the wind on shore, forced us for shelter into Cape Broyle, where we lay wind bound until.

May 4th.—When we proceeded for St. Mary's, for the purpose of getting Bait, arrived at St. Mary's Harbor on the 7th May, and cruised to Great Colinet, Salmon River, and others places in the Bay, but failed in procuring bait sufficient, until

14th.—But gales and head winds prevented our going to sea until

17th.—When we left for St. Peter's Bank, where we anchored and commenced fishing. At this time the French Bankers had been on the ground for nearly a month, and some of them were loaded or nearly so. We continued fishing on this Bank with varied success, until we shifted and anchored on Banquereau Bank, on

28th.—Continued fishing on this Bank, and frequently shifting ground, losing one of our boats on

June 13th.—And on the following day, finding fish continue scarce,

Fisheries.

and bait becoming stale, weighed anchor, and proceeded towards the Cape Breton Coast, came too, Amherst Island, bearing N. E. by E.,

19th.—When we set Bultows, and also fished from the deck, occasionally going to land for the purpose of procuring fresh bait, which, when obtained, we now and then made good takes of fish. We continued on the Cape Breton Coast from Cape North to Sydney, with difficulty procuring bait, and not in sufficient quantity to keep us continually on the fishing ground. We fished sometimes with Bultows, and sometimes with Hook and Line, from the deck of the craft.

August 1st.—Set sail for St. John's, to land Fish and refit.

8th.—Arrived at St. John's, landed at Webber's Room 380 qtls. fish, docked the vessel, graved her bottom, took on board Provisions, Water, Squid, and Salted Caplin Bait, and re-sailed for the Banks on the 16th August.

18th.—Reached anchorage in Lat. 46. 6. N., Long. 55. 42. W., and commenced to fish, so continued until 21st., when we ran to Scatarie Bank and anchored, afterwards finding the bait we had on board not good, we frequently ran for land, setting nets to procure bait.

31st.—Heavy weather and head pitch, discovered our bowsprit sprung, and on the following day, we ran for Sydney, and between Sept. 1st. and 6th., we procured and fitted a new bowsprit.

Sept. 6th.—Again put to sea, anchoring and fishing at different points off the Cape Breton Coast from this date until October, when finding weather very stormy, and fish scarce, we gave up the voyage, returning to St. John's.

Oct. 4th.—Landed 70½ qtls. Cod Fish.

St. John's, Newfoundland, }
 Oct. 5th, 1866. }

(Signed,)

ISRAEL M. BARTLETT,
 Master of the Schooner *Pioneer*.

Board of Works.

REPORT OF THE BOARD OF WORKS, FOR THE YEAR 1866.

BOARD OF WORK'S OFFICE, }
December 31, 1866. }

SIR,—

The Board of Works beg leave to transmit, for the information of His Excellency the Governor in Council, the following Reports of services under their control for the year ending 31st December, 1866.

Report of the Physician of the St. John's Hospital.

Report of the Physician of the Asylum for the Insane.

Return of Inmates in the Poor Asylum.

Report of J. T. Nevill, Esq., Inspector of Public Works, of requirements of public buildings for the year 1867.

Report of Mr. Inspector Oke, on the Light House service, for the year 1866.

Report of Mr. John Maher on road service, for the year 1866.

Report of Mr. John Maher on the Sewerage of the town of St. John's.

Report of Mr. Byrne on the Road from Brigus to Topsail, and from Brigus to Carbonear, also from Spaniard's Bay to New Harbour.

Report from Mr. Allen on Road between Goulds and Trepassey.

Consolidated statement of expenditure under Road Act, 29 Vic. Cap. 3, for 1866, and detailed statement of expenditure on the various services under the control of this Department, for the year ending 1866.

In transmitting these Reports, the Board avail themselves of the opportunity of making some observations on the foregoing subjects.

ST. JOHN'S HOSPITAL.

The expenditure on this Institution, in consequence of the great increase in the number of patients admitted during the year, of whom a very large proportion were fever cases, has been considerably augment-

Board of Works.

ed, the total increase in numbers being no less than 260 persons, involving an increased outlay of \$1582 over that of last year. The imperfect condition of this building as a curative institution has been repeatedly complained of, but as this subject, as also its internal arrangements may probably become the subject of Legislative enquiry and investigation, during the approaching Session, the Board refrain from making any further observations on this subject than those contained in the report of the Chairman in November last.

LUNATIC ASYLUM.

This Institution continues, under the administration of the Physician Superintendent, to merit the eulogium annually accorded it, considering the limited means at his disposal for the accommodation of the inmates. The Board would respectfully urge that additional space should be procured as soon as the funds of the Colony will admit. The very large consumption of fuel now required for heating and other purposes, to which the Board have directed their attention, may, they consider, be reduced by building a casing of brick around the boiler, at a cost not exceeding £15 to £20; thus a very considerable saving may be annually effected. The expenses of this institution, although large, the Board are of opinion are not greater than suffice to maintain it in a state of efficiency. The necessity of a coal shed has before been brought under the notice of the Executive. This want is as yet unremedied, but we hope will be speedily attended to.

THE POOR ASYLUM.

Under the management of Mr. and Mrs. Downey, continues to merit approval. Nothing can exceed the cleanliness and order prevailing therein. Their responsibilities have been greatly enhanced by the introduction into this establishment of 19 Lunatic Paupers, there being no room for their reception in the Lunatic Asylum. This is a subject of regret, and the Board hope that at no distant time sufficient space may be provided for them in the proper Asylum, and under the needful Medical supervision.

Mr. Nevill's report fully sets forth the present condition of the public Buildings under his inspection, and the necessary expenditure required for their effectual maintenance.

Mr. Oke's report contains all requisite information on the highly important subject of Light Houses, which, under his inspection, are maintained in the highest state of efficiency. The only increase in the expenditure, of any importance, has been occasioned by the alteration at

Board of Works.

Cape Pine, which has been commended by the Imperial Government, and in the partial construction of a road to Brunette Island Light House.

THE PENITENTIARY.

This institution was recently visited by the Board, and the cleanliness which was observed throughout the whole building reflects the highest praise on the Gaoler, and elicited a general expression of satisfaction. The number of prisoners was at that time not more than twelve, a state of things which, considering the fearful impressure of destitution which at present exists, is highly creditable to the community. The Board respectfully suggest that some means of employment should be afforded to the prisoners, within the Building, when the state of the weather prevents them from useful labour out of doors.

Mr. Inspector Maher's general report on the roads under his immediate control, during the past year, is so complete and ample, that it is sufficient for the Board to express their concurrence therewith, and to refer to it for more particular information.

Mr. Surveyor Byrne's report sets forth the work performed during the past season, between Brigus and Topsail, and the sum he deems requisite to complete those roads. Also on the road from Brigus to Carbonear, and from Spaniard's Bay to New Harbor, with estimate for completing the same—the last named road requiring an amount much greater than may be at the disposal of the Government for some time yet to come.

Mr. Allan's report of the road from the Goulds to Trepassey, contains full information as to its present condition, and the further requirements for the same.

The defects at Waterford Bridge, on examination, having proved more extensive than were anticipated, have been made good, but at a cost considerably exceeding the amount of the grant—the restoration was completed by the employment of tradesmen at daily wages.

A new and very substantial Bridge has been built at Pouch Cove, the cost of which has been much greater than the grant provided for; the excess in this as in the former, has been obtained by application to the Executive.

Owing to the late arrival from Liverpool of the Iron work required for the Rocky River Bridge, it became impossible to complete it so as to

Board of Works.

be made available for the present year. The two trusses have now been framed, and all the materials, except bedding, prepared, so that the whole can be proceeded with whenever the state of the river will allow: and it is to be hoped that another season will not elapse without a ready means of crossing this dangerous stream.

The Board again respectfully urge the necessity of improving the condition of Water Street, which, on the re-opening of spring and the departure of the ice and snow, (which now conceal its defects,) will be in such a state that traffic thereon will be all but suspended.

The Board are also of opinion that the repairs on main roads should be, as has been before recommended, where practicable, let out to contractors residing in the vicinity, for distances not exceeding three miles.

Mr. Maher's report on sewerage, with the sectional maps in the office of the Board of Works, shows the progress that has been made under his supervision. A considerable part of the town yet requires this necessary convenience; and the means at disposal for this department of the Public service being nearly exhausted, it is to be hoped the Government may be enabled to make suitable provision therefor.

The office of the Board of Works has no provision either for a map of the Island or of the Bays; nor even of the main roads throughout the Island, and under control of the Board, a defect so manifest that we trust it will, before the expiration of another year, be remedied.

Respectfully submitted by

ROBERT ALSOP,

Chairman.

JOHN STUART,

Secretary.

Board of Works.

REPORT OF THE SUPERINTENDENT OF PUBLIC BUILDINGS, FOR THE YEAR 1867.

DEPARTMENT OF PUBLIC BUILDINGS, }
 Superintendent's Office, 19th Feb., 1867. }

SIR,—

I have the honor herewith to submit my annual report of the condition of the various Public Buildings under my charge, together with estimates of the expenditure required during the current year.

You will doubtless notice the much smaller sums to which they amount than those of last year, and this is caused by

1st.—The fact that the Public Buildings are now generally in a good substantial state of repair, owing to the considerable expenditure in recent years, for pointing, slating and other work to the fabric of the buildings.

2nd.—To the omission of the estimate for the expenditure at Government House, as during the past year a change was made by the Executive, and the control placed in the hands of His Excellency the Governor.

3rd.—To the omission from the estimate, of the items recommended in my last year's report, with regard to a drain for the Poor House (\$600), the Hospital repairs (\$2000), and the ventilation and warming of the Court House (\$1200), works which are still as necessary as ever, but which seemed to demand a special consideration.

Any attempt to repair the Hospital so as to retain the present fabric for such a purpose is, I believe, much to be deprecated. It will entail a very large expenditure, (how much can scarcely be told until the work of repair is commenced,) and the result will be most inefficient. No repair can remedy the want of light and height in the wards, and consequent deficiency of cubic space, so necessary for the proper treatment of patients. It is also difficult to do anything to an old building, so as to secure efficient ventilation. When all is done that its nature will permit for its improvement, it will still be unfit for use as an Hospital; and I say this advisedly, from my previous experience of Hospital requirements; and I might strengthen my position by quoting authorities; but the report of the Medical Commission of 1865 renders it unnecessary.

Board of Works.

I am aware that the erection of a new Hospital, will be a serious expense ; but a plan can be so designed as to permit of its being done in sections, and so spreading the cost over a considerable time. This mode of building will allow of the retention of the present excellent site, and the old Hospital can be used until a portion of the new one is ready for use.

The drain from the Poor House, referred to, would be a most important sanitary improvement ; but it would require an arrangement to be made with the Proprietor of the land intervening between the Poor House and Hospital.

The warming and ventilation of the Court House is also very much needed.

The repairs effected at the Factory during the past year have been of very great service, and the building may now be considered *safe*, though a large outlay is still required to put it in good condition, notwithstanding the additional repairs effected at the expense of the Society of St. Vincent-de-Paul, such as making good the lower floor, and laying on the Town Water, constructing Water Closets, &c., all of which add very much to the usefulness of the place.

I cannot close without making some remarks relative to Harbor Grace Gaol. Its condition as to cleanliness is all that can be desired, but it is dark and unwholesome, and would draw down the denunciations of a Howard or a Jebb. As I only visited it officially for the first time during the past year, I cannot allow this earliest opportunity to pass without mentioning my opinion concerning it.

I have the honor to be,

Sir,

Your obedient servant,

J. T. NEVILL,

Superintendent of Public Buildings.

ROBERT ALSOP, Esq., M. P. P.
 Chairman of the Board of Works,
 &c., &c., &c.

Board of Works.

LUNATIC ASYLUM.

I have again to report upon the necessity of erecting a shed wherein to store coals, the cost of which will be \$550.

The external wood work requires painting, and some of the fences coating with tar, the cost of which will be \$400, and \$150 for ordinary incidental expenses.

A quantity of iron pipe, taps, valves, some cast iron cisterns and tools, and a steam pump have been ordered, but have not all arrived. The cost of the whole will be about \$400.

Total estimated expenditure, \$1500.

ST. JOHN'S HOSPITAL.

With regard to this Hospital I cannot do better than quote my report of last year, with the additional remark that the time since elapsed has increased the defects and deficiencies of the structure. At that time I stated that "the sanitary condition of this building is very bad, and the report of the Medical Commission appointed last summer" (1865) "justifies me in saying that little can be done with the present building short of such alterations as would cost as much, and in effect be reconstructing it; and beyond this it is structurally very defective; the roofs are leaky; the floors are rotting; the plastering falling down; the sashes loose; the outside unpainted; and altogether it becomes a matter of doubtful economy to effect any repairs, particularly as the building, when repaired, would be so ill adapted for its uses. A less sum than \$2000 would be useless (if it is determined that the present building is to remain) to make it in any way fit for Hospital purposes, and a further sum of the same amount to repair the structural defects." Temporary repairs will require \$200 to make them.

ASYLUM FOR THE POOR.

The exterior of this building should receive early attention, as the roof requires coating, some part of the walls varnishing; and I should propose an outlay to the amount of \$400 for these purposes. Incidental repairs \$100. Total estimated expenditure, \$500.

COURT HOUSE.

As I have mentioned in my two last reports, the "internal wood-work of the Court Room and some of the Offices require painting, and the

Board of Works.

ceilings want coloring." As this building does not immediately require any substantial repairs, I should advise that these internal works be done, so that the edifice may be put into a state of cleanliness and comfort. The estimated cost of this is \$800, and incidental repairs will require \$200, making in all \$1000. During the past year some fears were expressed as to the safety of this building, but I think they were groundless, and arose from the accidental falling of the ceiling in the Chief Clerk and Registrar's office,—an accident caused by the extremely improper storage of a large quantity of splits and peat fuel upon the mere ceiling joists, which eventually gave way under such a burden.

Much settlement has undoubtedly taken place in the outer walls; but I believe it to have reached its ultimate point, and that so long as care is taken to keep the exterior pointed and weather-tight, there is no danger of further subsidence. Since I have been the Incumbent of the office of Superintendent of Public Buildings, I have carefully examined the edifice with this special view; and I have not during that time detected any change or settlement, and my last examination was made this day with the same result.

PENITENTIARY.

The sides of this building require pointing, and when this is done the exterior will be in such a condition as not to require any further outlay for some time. The two gables were most efficiently done last season, and an outlay of \$280 will complete the exterior repairs. Incidental repairs \$200. Total \$480.

The cleanliness of this building is admirable; not a speck of dirt or a cobweb can be found in any part, though the falling of the plastering is a constant source of annoyance. It was in the first place a very improper mode of internal finishing for a prison; and patching it from time to time seems a great waste of money, as it is but done to be redone at an early period. The best remedy I can suggest seems to be the removal of the plastering and to ceil the prison rooms with boarding. To do this at once throughout would be costly, and I should propose that, as accidents occur, the repairs should be effected with wood, with a view to the ultimate completion of the whole in that manner. The cost of this is included in the amount put down for incidental repairs.

The construction of a hard-labour crank pumping machine was sanctioned last year, and is ready for erection whenever the weather will allow of the completion of the well by the prisoners. The pump would have been ready for use last fall, but for the necessity of waiting for the

Board of Works.

prisoners' work, which could not be carried out efficiently, owing to the changes in officers, and at one time from their being short in number.

COLONIAL BUILDING.

The general state of repair of this building, after the extensive pointing received during the past three years, is such as to render any special work unnecessary. Some painting is required, one or two offices need papering and coloring, and the entrance gates are rotten. These works, with ordinary incidental expenses, will cost \$700.

CUSTOM HOUSE.

The fabric of this building is in good condition. The sashes and frames should be painted, and the walls and ceilings of the Receiver General's office white-washed and colored, and the wood-work painted and varnished.

Including incidental expenditure, the estimated cost is \$200.

BLOCK HOUSE.

A small latrine, for the use of the signal men and their families, is much needed, which, with ordinary incidental expenses, will require \$100.

DRILL SHED.

This new building should be coated and painted as soon as the season will allow, and a fence and gates are required at the front, the estimated cost of the whole of which is \$250.

BRIGUS COURT HOUSE.

The additions recently made should be painted, and some presses are required for keeping the books and papers, the cost of which will be \$120.

BONAVISTA COURT HOUSE.

Two additional rooms are required by the Magistrate, and will cost \$120.

HARBOR GRACE COURT HOUSE.

The repairs of which I prepared a specification last spring, and for the execution of which no tender was received in answer to a public

Board of Works.

advertisement. have been partially carried out in a most satisfactory and economical manner, by the management of the Sheriff, Garland Gaden, Esq.

The steps and platform by which the Court Room and offices are approached, are in a very bad condition, and these works, with the repairs left unexecuted last year, will cost \$250.

ABSTRACT OF ESTIMATES.

Respectfully submitted,

J. T. NEVILL,
Superintendent of Public Buildings.

Board of Works.

REPORT OF MR. JOHN MAHER, UPON THE POSTAL ROADS AND ROADS IN ST. JOHN'S, EAST AND WEST.

St. JOHN'S, 31st December, 1866.

SIR,—

Agreeably to your instructions, I beg leave to submit the following Report upon the Postal Roads and Roads in St. John's East and West, under my supervision during the past year.

POSTAL ROADS.

The amount appropriated for the Placentia and St. Mary's Main Line was expended as follows :—Contracts were entered into with parties living on the Line, making twelve lots of the whole distance (Holyrood to Great Placentia, 55 miles.) When I commenced my inspection of this road in June last, I found the Bridges in such a dangerous state that it was necessary to build one hundred and twenty-two new bridges, some of them thirty-five feet span (crossing deep and rapid rivers), such as the Cataract and Back River Bridges, which are now entirely new, including abutments, railings, &c.

In consequence of this expenditure it could not be expected that much repairs could be done on the road with the amount at our disposal. Only six miles of the road have been gravelled ; two new branch roads made and gravelled leading to the site of Rocky River bridge ; on the north side of the river seventy-two perches were made, fourteen feet wide ; on the south side thirty-three perches. This new line, when open for traffic, will cut off two steep hills leading to and from the old temporary bridge.

A steep hill leading to the Cataract Bridge has also been cut down. Where heretofore it would be difficult for a horse to haul an empty car, can now be passed over with the greatest ease. Several large rocks near the mountain tilt, very dangerous for wheeled vehicles, were removed by blasting. Considerable improvement has been made on Block-house Hill near Great Placentia, the road widened and a safety wall built.

The whole of the work on this line of road has been done in a very satisfactory manner. Several miles yet require to be widened, particularly from Holyrood to Salmonier Bridge. The road, in some places, is so narrow that it was found necessary to cut down the trees on both

Board of Works.

sides of the road, as it sometimes happens they fall across the road, making the travelling very dangerous in the night time and in snowy weather. Until this road is finished to its full width, and side drains formed, it will require an annual grant of \$1600, the want of which causes many parts of the road to be carried away by freshets both in spring and fall.

On that portion of the road between Salmonier and St. Mary's, sixty-six new bridges have been constructed and the cut-waters of the two main bridges (Little Harbor and Salmonier) have been repaired and sheathed with iron. The wings of both these bridges, which were nearly carried away last spring by the flood and ice, have been thoroughly repaired and newly planked. Seven miles of the road have been gravelled. It will require an annual expenditure of \$400 for repairs, &c.

On the Black Duck Gully road, leading from the St. Mary's road to Salmonier, three hundred and fifty perches have been gravelled, and all the large stumps and stones removed. This road will require an expenditure of \$240 to finish it.

On the road between Great and Little Placentia, three hundred and ninety perches have been gravelled, one new bridge built and four repaired, four new cross drains built, covered with flags. A further grant of \$600 expended on this road would enable wheeled vehicles to pass between the two settlements.

CAPE SHORE ROAD.

The amount appropriated for this road has been expended in the construction of new bridges, as follows:—

| | | | |
|------------------------|-----------------|-----------|-----------|
| Glindon's Cove Bridge, | length 55 feet, | including | abutment. |
| Barrisway Bridge, | length 141 feet | " | " |
| Costelet Bridge, | length 56 feet | " | " |
| Distress Bridge, | length 58 feet | " | " |

Four small bridges have been repaired.

ST. JOHN'S WEST.

PETTY HARBOR ROAD.

Eighty perches of this Road have been gravelled, from Gregory Griffin's to its junction with the Bay Bulls Road; and all the large stones and boulders removed. This portion of the Petty Harbor Road was in a very bad condition, and will yet require an expenditure of \$120 to finish it.

Board of Works.

PETTY HARBOR.

South side, Petty Harbor.—Four cross drains constructed, covered with flags, and four perches railing erected.

Road from Pridham's round the Point.—Twenty-seven perches road opened, twelve feet wide, by daily labour and fences erected; about five hundred dollars would complete this road to Maddock's Cove.

From Windgap to Maddock's Cove.—Ninety perches gravelled, and side drains cleaned and scoured.

Forest Pond Road.—One hundred and thirty perches of this road have been gravelled, and four bridges constructed. An expenditure of one hundred and twenty dollars would put this road in a good state of repair.

Rielly's Road, near Forest Pond.—Eighty perches gravelled, and two bridges built.

ROAD DOWN THE SOUTH SIDE OF THE HARBOR OF ST. JOHN'S.

Considerable improvement has been made on this road, particularly near Messrs. Job, Brothers & Co. and McBride & Co's. premises. The road has been widened and all the large stones projecting into the road removed by blasting; three large cross drains constructed, covered with flags, and two hundred and fifty feet of plank road made, leading to the premises of Messrs. Baine, Johnston & Co., a side walk constructed along the south side of the road, commencing at the entrance of Job, Brothers & Co., and thence along by McLea's premises. The road along the rear of McLea's premises is made eight feet wide through a solid rock. A good road is now completed from Mudge's, eastward to Murphy's fishing room, as far as it is possible to extend it, without incurring a large outlay of several thousand dollars. I would recommend a grant of eighty dollars to keep this road in repair, and to complete an improvement eastward of McLea's premises.

POKEHAM PATH.

Sixty perches gravelled, and side drains cleared, and a new bridge constructed, covered with plank, and railed,

Board of Works.

Plank Road towards St. Patrick's Chapel.—Five perches of this road planked, new beams and uprights, eighteen feet long, put up the whole length of the Plank Road, towards Brine's Cottage, west of Job's Lane.

Tank Lane has been repaired, a new bridge constructed, and a cross drain on Barter's Hill repaired.

Mahon's Lane.—Six perches of fence erected.

George's Street, between William's Lane and Adelaide street, has been gravelled its full width, and side drains formed.

Road from the Cock Pit Road towards Monkby's Pond.—Eighty perches of new road opened, made and gravelled nine feet wide.

The sum appropriated for the improvement of the road from Broad Cove Hill towards Topsail road was expended in gravelling three miles and a half of the road, and erecting three bridges.

The sum allowed for improving Broad Cove Hill was expended in cutting down a portion of the Hill, clearing the side drains, and repairing and covering a large cross drain.

TOPSAIL ROAD.

Four cross drains have been constructed as follows :—

| | | | | |
|------------|---------|------------|------|-----------------|
| 25 feet of | 22 inch | Clay Pipes | near | School House. |
| 26 | " | 9 | " | near Quigley's. |
| 30 | " | 22 | " | near Dunn's. |

1 stone cross drain near Farrell's.

Bridge near Brookfield, 12 feet span, has been repaired, two new stonements boarded at the bottom, and ten perches of the road and twenty perches side drains cleared near John Nevill's. A cross drain has been repaired near Vail's Mill, covered with plank, new beams and boarded on the bottom.

Board of Works.

ROAD LEADING FROM PORTUGAL COVE ROAD TO BROAD COVE.

Six new bridges have been constructed, and eighty perches of the road gravelled, and side drains cleared. A sum of one hundred and sixty dollars would put the road in good order.

BROAD COVE SETTLEMENT.

Sixteen perches of road gravelled and side drains cleared ; three new cross drains built. The main bridge leading to the Church road has been thoroughly repaired and gravelled.

King's Road to Goat's Cove.—Twenty perches gravelled and side drains cleared and deepened.

ROAD FROM ST. JOHN'S TO WATERFORD BRIDGE.

Forty-five perches gravelled and side drains deepened ; a cross drain built, covered with plank, and a large rock blasted near the residence of the Hon. Judge Little.

Old Placentia Road.—The amount appropriated for this road was expended in daily labour, commencing south of Dunscomb's Bridge, and extending to the Swamps beyond Knight's Cottage. The ruts were filled with broken stone, and covered with gravel. Forty perches of the road received a covering of gravel in the centre, average depth four inches, and eight feet in breadth. One hundred and fifty perches of drains are paved and cleared at both sides, and one cross drain made, built with stone and covered with flags.

Lunatic Asylum Road to Dunscomb's Bridge.—Amount expended in daily labour, commencing at the Lunatic Asylum gate ; filled the ruts with broken stones, and repaired two cross drains, and covered them with flags ; two new cross drains made twenty-four feet, in length, with stone abutments, and covered with flags. The hill leading by Capt. White's farm cut down to a depth of three feet to the extent of ninety perches in length, blazed all the large trees and stumps beyond White's towards Coughlan's, one hundred perches in length, and widened the road thirty feet. This portion of the road should be raised by filling to a height of four feet. The whole was coated over with small stones and covered with gravel to a breadth of fifteen feet. The road was opened through Coughlan's farm thirty feet wide, and a longer fence put up, measuring one hundred and one perches in extent.

Board of Works.

The opening of this road is of the greatest service to the residents at Pearl Town, enabling them to come to St. John's by an easy and commodious route, instead of by the Topsail road. In the Winter time it affords facilities to the residents on the Topsail road to carry their wood, long sticks, &c., to market. It is sometimes very difficult to work the Topsail road, eastward of Brookfield, on account of heavy snow drifts. The road by the Lunatic Asylum being more sheltered, it is always passable. To complete the road throughout, a further expenditure of \$300 would be required.

DEER'S MARSH ROAD.

Amount expended by contract on this part of the road, to Edward Walsh's farm, a side drain opened at the western side of the road, and a covering of small stones put over the road to the breadth of eight feet and gravelled over. Extent improved about sixty perches.

The amount for old repairs for that part of the Deer's Marsh road passing by Patrick Walsh's farm towards the bridge near Samuel Knight's boundary expended by contract. This portion of the road leads through a bog, about eighty perches in length, a drain was opened at each side, and the centre of the road covered with stones and gravelled.

Deer's Marsh Road, South River.—A new bridge has been constructed, sixteen feet span, and sixteen perches of new road opened and made. A sum of \$120 would be necessary to complete this road.

A substantial new bridge has been constructed over South River near Walker's, sixteen feet span, with stone abutments, railing, and embankments on both sides.

Road between Brennan's and Murphy's.—Ninety perches gravelled, and side drains cleaned and scoured.

ST. JOHN'S EAST.

MAIN LINES.

ROAD FROM ST. JOHN'S TO PORTUGAL COVE.

About one and half miles of this Road have been gravelled and finished the past summer. Two cross drains made with Tubular Drain Pipes, and three large bridges built, covered with plank.

Board of Works.

ROAD FROM ST. JOHN'S TO POUCH COVE.

Six hundred and fifty perches of this road have been gravelled and finished in a very satisfactory manner, and five hundred perches of side drains cleared and scoured. Eight bridges built, covered with flags.

LOCAL ROADS.

TORBAY SECTION.

Road from Torbay to Bauleen.—One and three quarter miles of this road is completely finished, and gravelled, twelve feet wide in the centre, the side drains being formed sixteen feet apart. For a distance of twenty perches the road was raised five feet high, with embankments and retaining walls formed of rubble stone and sods; eight cross drains were made, covered with flags.

Larkin's Road.—Twenty-one perches gravelled, two cross drains built and the side drains deepened and scoured for a distance of eighteen perches.

Road leading to Power and Snellgrove's.—Eighteen perches of new road made, bog boughed and longcred, and the road gravelled nine feet wide.

Road towards Kyran Whelan's.—Twenty perches made and gravelled, and two cross drains built, covered with flags.

Road by Bradburry's and Charles Tapper's.—This road has been filled and gravelled for a distance of sixty perches from the main road; the filling has been laid on to a height of two feet over the greater portion of the road, and two large cross drains were made, covered with flags. On that portion of the road towards Tapper's eighteen perches were gravelled, the large stones and boulders removed and the side drains deepened.

This road still requires considerable outlay to put it in a thoroughly repaired condition.

Whitty's Road.—From Waterman's House to Tapper's Cove Road, a distance of forty perches has been gravelled. The large stones and boulders have been removed by blasting. Two large cross drains covered with flags, and two bridges covered with plank, have been constructed. The road is now in very good order for the above distance.

Board of Works.

Martin's Road.—This road has been widened for a distance of ten perches by the removal of John Martin's fence, and forty perches made and thoroughly gravelled, side drains deepened and scoured, and a large cross drain constructed, covered with flags. This road is now finished from the main road to the dwelling house of William Martin.

Collins's Road.—For a distance of fifteen perches the land has been raised two and a half feet high, and side drains formed; one cross drain covered with flags built, and all the loose stones and rubbish that formerly encumbered the road removed.

Road to Mahon's land, South Side.—Twenty perches of new road made and gravelled, twelve feet wide, side drains formed on both sides of the road, and two cross drains built.

White's Road.—Twelve perches of the road gravelled, side drains cleared and covered.

Road towards Hickey's and others.—The grant for this road has been applied toward building a new bridge, twenty feet long by nine feet wide. The bridge is constructed in a very substantial manner with stone abutments, and railed.

Road towards the farms of Barron and others.—Twenty-five perches gravelled and side drains cleared and scoured.

Road by Morry's and Malone's.—The whole length of the road (forty-four perches) has been thoroughly repaired and gravelled.

Road to the farms of Grace and others.—Twenty-four perches of new road made and gravelled, nine feet wide, two stone cross drains constructed.

Codner's Road, from Torbay Bridge.—Twenty-five perches gravelled and two stone cross drains built.

Bridge at Torbay Beach has been put in a good state of repair.

Road by Morry's to the Beach.—The total length to this road (eighty perches) has been thoroughly gravelled, the side drains deepened and scoured and three large stone cross drains constructed. A very substantial retaining wall has been built, thirty-four long by five feet high, and railed; several of the large rocks and boulders in the centre of road had to be removed by blasting. I would recommend a further grant of

Board of Works.

one hundred and twenty dollars, to connect this road with the Beach road near the bridge.

Road by Finn's and Redmond's.—Thirty-six perches of this road have been completed towards the fishing room.

Road to fishing room of James Goss and others.—Eighteen perches from the main road have been finished.

Ellard's Road.—Twenty-two perches gravelled and two stone cross drain's built. The side drains, for a distance of eighteen perches, have been deepened and scoured.

Road to North Pond.—Thirty perches gravelled, and all the large stones removed. This road is now passable for wheeled vehicles to North Pond.

Road to farms of Michael Byrne and others.—Eighteen perches of new road made over a bog, which was first boughed and longered, and gravelled nine feet wide.

Manning's Hill.—A passage has been opened up this hill, through a solid rock, thirty-five feet long, nine feet wide and five feet deep, containing fifty-nine cubic yards of rock cutting. The stone thrown out by the blast (about four tons) were broken and applied towards raising the road between the cutting and the main road, and thereby making the ascent much easier. A further grant of eighty dollars will complete this road and improve the road towards the farms.

The improvement made on this hill has been for many years required, as it now enables horses with heavy loads to pass over with ease, instead of making a circuit of a mile to reach the top, as heretofore.

Tapper's Cove Road.—A new bridge, forty feet long, has been built over a stream at the termination of the road in Tapper's Cove. The construction of the bridge is a decided improvement in this locality, as the Cove is the only place in Torbay from which a boat can be launched with safety, in a heavy sea.

A bridge or plank road sixty feet long has also been constructed on this road over a dangerous gulch formed by a land slip which carried away a considerable portion of the roadway, leaving only four feet of a passage. This was the first attended to when the work commenced in the spring. Both bridges have been constructed in a very substantial manner, and railed. Considerable improvements have also been made

Board of Works.

in the remaining portion of the road, eighteen perches of the road gravelled near Dodd's fishing room, and thirty perches of longer fence erected on the most dangerous parts of the road. A grant of one hundred and twenty dollars will put this road in a thorough state of repair.

FLAT ROCK.

Road Leading by Stamp's to Burial Ground.—Sixty perches gravelled, side drains cleared and deepened, one cross drain constructed, and considerable improvement made on remainder of road.

Burke's Road.—Thirty-five perches of new Road made and finished, twelve feet wide, two stone cross drains constructed.

Road to the farms of Reddy and others.—Forty perches finished and gravelled, nine feet wide.

Road by Cornelius Power's.—Twenty perches of the road gravelled, and a bridge, ten feet span, constructed.

Road to Seal Cove Settlement.—This road has been opened and stumped its whole distance (two miles). Forty perches gravelled, and one hundred and twenty perches of bog longered and boughed.

POUCH COVE.

Constant Gully Road.—Fifty-five perches gravelled, twelve feet wide, four bridges built, and side drains opened.

Moulton's Road.—Fifty-three perches of this road and side drains formed.

Road to the farm of Shea and others.—One hundred and twenty-five perches of road opened.

School House Road.—Nine perches gravelled and finished, nine feet wide, two side drains formed.

Grouchey's Road.—Eighty-eight perches of this road have been made, and one new bridge built.

Toole and Moran's Road.—Fifty-three perches of road opened, ten feet wide. Three cross drains constructed.

Board of Works.

Main Bridge, Pouch Cove, has been newly built of eighteen feet span, length one hundred and twenty-six feet, and height twenty feet, from the bed of the river. The stone abutments of this bridge contain nearly two hundred and sixty-five perches mason work, and a railing erected on both sides. The work has been done in a substantial and workmanlike manner.

MIDDLE COVE.

Branch road towards John Roach's. Fifteen perches of new roay made and gravelled, ten feet wide, and one cross drain, three feet wide and two feet deep, constructed, covered with flags.

Road over Pine River.—Twenty-five perches of new road made and gravelled, ten feet wide, side drains formed, eight feet from centre of road.

A new bridge has been erected on the Beach at Middle Cove, twelve feet span, with stone abutments.

FRESHWATER.

Kinsella's Road.—Thirty-eight perches of new road made and gravelled, nine feet wide; nearly all the large rocks and boulders had to be removed by blasting.

Houlihan's Road.—Thirty perches of new road made and gravelled, twelve feet wide. A grant of twenty dollars will complete this road to the fishing rooms.

Malone's Road.—Eighteen perches finished. This road is now completed, and will require no further outlay for some years.

OUTER COVE.

Branch road to the farm of Kelly, &c.—Eighteen perches gravelled, and a large cross drain built, covered with flags; a hollow has been filled four feet high, for a distance of five perches, on both sides of the cross drains.

Road to the farm of Brine, &c.—Fifty perches have been repaired, a cross drain, renewed, and covered with flags, and a hill near the main road lowered two feet. A grant of thirty dollars, to continue this road beyond Brine's, would be very desirable.

Board of Works.

LOGY BAY.

Ryan's Bridge to Fishing rooms.—Twenty-eight perches of this road have been gravelled and finished; the retaining wall on the lower side of the road has been thoroughly repaired, and twelve feet of new work built.

Vincent's Road.—Eighteen perches of new road opened and made, and side drains formed.

Road to the farms of Devereux, &c.—Thirty-five perches of new road made and gravelled, nine feet wide.

Road to the fishing rooms of Dyer, &c.—A rock that heretofore projected into the centre of the road has been removed by blasting, and twelve perches of the road gravelled.

PORTUGAL COVE.

Goff's Bridge to Goat's Cove.—Thirty perches of the road gravelled, three stone cross drains built, and one new bridge constructed, twenty-two feet long by twelve feet wide, with stone abutments and railing; twenty-four perches of railing erected on the lower side of the road.

Protestant Town.—Two hundred and fifty perches of new road opened, made and gravelled ten feet wide; one new bridge built, twenty feet span, and railed.

Road by Harvey and White's.—Sixteen perches opened and gravelled, and all the large stones removed.

Road by the farm of Thomas Cook.—Fifty perches of new road opened made and gravelled, sixteen feet wide, with side drains formed, and two, cross drains made with nine inch clay pipes.

LeMerchant road (between Portugal Cove road and Torbay.)—Two miles of this road have been gravelled, and the side drains opened, eighteen cross drains constructed, with stone abutments, and covered with four inch spruce sticks. Four large bridges repaired.

Major's Path (between Portugal Cove road and Torbay road.)—Eighty perches of this road have been gravelled; there are no side drains on this road, as it has sufficient rounding in the centre to carry off the water. It would be very desirable if this road could be continued on to

Board of Works.

meet the Logy Bay road. An expenditure of two hundred dollars would be sufficient.

ROADS IN THE NEIGHBORHOOD OF ST. JOHN'S.

Road by Roman Catholic Cemetery to Newtown and Sandpits.—Ninety-five perches of road gravelled, side drains deepened and scoured, a large cross drain constructed covered with flags. Considerable improvement has been made on the road between Newtown and Sandpits.

Road from Rawlins's Cross to Long Pond Bridge.—Seventy-five perches gravelled, and one hundred and twenty perches of side drains cleared and scoured, four cross drains constructed covered with flags. A further grant of eighty dollars would put this road in a thorough state of repair.

Circular Road.—Eighty perches gravelled, and two bridges repaired.

Long Pond to Newtown.—Fifty-five perches gravelled, and side drains cleared and scoured.

Long Pond to Three Pond Barrens.—One hundred and fifty perches gravelled from Long Pond Bridge, and the hill above Mount Scio lowered eighteen inches, and side drains formed for a distance of one hundred and twenty yards, on each side of the hill.

White Hills.—Sixty-four perches gravelled, and two large cross drains constructed.

Quidi Vidi round the Pond.—Sixty perches gravelled near the Penitentiary, and thirty perches in the neighbourhood of Quidi Vidi. Considerable improvements have been made on the road north side of the Pond, and two large cross drains constructed, with stone abutments, and covered with flags and plank.

Hanton's Road.—Built retaining wall, thirty feet long by ten high, nine perches gravelled.

Covel Lane.—Considerable improvement has been made in this lane; all the large stones projecting above the surface were removed by blasting, and distributed on the road for filling.

George's Town.—Eight perches of the road have been gravelled, and ten perches of side drains paved.

Board of Works.

Lane in rear Old Chapel.—Eight perches of a substantial boarded fence erected and the retaining wall thoroughly repaired, a considerable portion of which had to be rebuilt with lime and sand mortar. Considerable improvement has been made on the road leading to King's bridge; from Queen's bakehouse to the Circular Road, the road has been raised in the centre eighteen inches, the side drains deepened, and five cross drains rebuilt, covered with flags. From thence to King's Bridge the Road has been thoroughly gravelled, the whole finished with a smooth and even surface.

I have the honor to be,

Your obedient servant,

JOHN MAHER.

To ROBERT ALSOP, Esq.,
Chairman Board Works,
Esq., Esq., &c.

Board of Works.

REPORT ON THE ROAD FROM BRIGUS TO TOPSAIL.

ST. JOHN'S, December 30, 1866.

That part of the new line between Brigus and Bull Cove local road (distance about $2\frac{1}{2}$ miles) was, last spring, coarse and bad. It has been partially improved and made tolerably smooth. To put it into good repair it would still require at least one hundred pounds.

Turk's Gut section of the new line (length about a mile and three-quarters and thirty perches) avoids very steep hills on the old road. It was opened a few years ago, and to make it was set up to auction the past summer into sixteen lots. The knaps have been lowered from one to five feet, and the hollows raised to similar proportions, the road brought into easy planes and made from twelve to fifteen feet wide, the small bridges built with stones and covered with flags; it is all but finished, and none now use the old road at that place.

Collier's section on the new line (length a little more than a mile) has, like the former section, been opened some time since, to avoid very steep hills on the old road. It was also set up to auction in ten lots, and made similar to Turk's Gut section, and although not so level, horses have trotted up the steepest inclinations with a waggon and four men.

On these two sections there are three bridges from eight to thirty-five feet long, that will before long require new covering.

The middle or Bedlam section of the new line between Collier's and Turk's Gut, was opened a few years ago; there were no funds to do anything to it last summer. If that section were made, all the steep hills on the old road between Brigus and Cat's Cove would be avoided; it is about a mile and a half and a half quarter in length. To make a good road of it would cost about four hundred and fifty pounds.

At Cat's Cove there is about seventy perches of new line that was marked at the same time with the other sections, which has since been fenced in. To make the necessary improvements at that place would cost about one hundred and thirty pounds. The floods of September did much damage to the roads, which caused considerable expence. There were several cross drains and bridges between Cat's Cove and Holyrood rebuilt and others repaired, and several pieces of road repaired and gravelled. Between Holyrood and Topsail several cross-drains and bridges have been repaired.

Board of Works.

That part of the road in the vicinity of Middle Arm of Cat's Cove that was opened and partially made about eight years since, to avoid high and steep hills on the old road, has not been finished. There are several knaps and hollows at that place that yet require improvement. North of Salmon Cove Bridge there is a hollow where the water at times lodges on the road and makes it difficult for travellers to pass. Costello's bridge at Salmon Cove is getting old, will require a new bridge next summer. To make the necessary improvements at Cat's Cove and Salmon Cove would take at least two hundred and fifty pounds. To put the bridges and road from Salmon Cove to Holyrood into good repair would cost about one hundred and twenty pounds, and from Holyrood to Topsail, to put the road into similar repair would require two hundred pounds. Although the old road between Collier's and Turk's Gut section of the new line is still used and very bad, I think it would be more advisable to make the middle section of the new line above named, than to expend more on the old road than what would keep the bridges passable, as it would become almost useless if the middle section were made. About twenty pounds would repair the bridges.

ROAD FROM BRIGUS TO CARBONEAR.

Between Brigus and Southern Gut parts of the road have been improved by taking up large stones and gravelling the worst parts. Lawless's Hill, north of Northern Gut, which was very bad, has been much improved, several parts of the road between that and Harbor Grace have been partially repaired, a bridge South of Bay Roberts has been rebuilt. About five perches of a wall and a rail have been put to the causeway at Spaniard's Bay Bridge. Ryan's Bridge, near the same place, and several others have been repaired. A new small bridge has been made on Spaniard's Bay Ridge, to prevent the water that collects in the side drain injuring the road, and a covered drain made near Courage's Beach, to take the water off, which used to run over the road at that place. Except the expence of changing the road at the steep hills that could be avoided, a couple hundred pounds would put the road from Brigus to Harbor Grace into fair order.

Between Harbor Grace and Carbonear the bridge north of the Catholic Cemetry and a few smaller ones have been repaired and parts of the road partially improved, parts of it are still coarse, and some of the side drains require to be cleared, and a drain required near Harbor Grace Courthouse, to take away the water that at times overflows the road at that place. It would take at least a hundred pounds to make that drain and other necessary repairs on that road.

**REPORT ON THE ROAD BETWEEN SPANIARD'S BAY AND
NEW HARBOR.**

St. JOHN'S, DECEMBER 30, 1866.

Parts of the road that has been used on Spaniard's Bay side are very steep, part of which is over a high and steep ridge called the Lookout, and part of this so steep as to have been called the stairs. According to instructions, I marked a new line (distance more than four and a half miles) which avoids all these steep parts. Afterwards I set it up to auction in nine lots, to be opened 15 feet in width, clear of trees, stumps, &c. The half next New Harbor, although there are some steep knaps, is fair for travellers and cattle. The whole distance is about thirteen miles and a quarter. To make a good road of it would require at least fifteen hundred pounds.

Board of Works.

**REPORT ON THE ROAD FROM THE BLACKHEAD ROAD
TO MADDOX COVE.**

ST. JOHN'S DECEMBER 30, 1866.

According to instructions, I marked the above line of road; length through the woods about two miles and a half quarter, the steepest part of which is so near a level that you would merely know which way the water would run along the road. After its being marked, I set it by auction on the 21st September, in nine lots, to be opened 15 feet in width, clear of trees, stumps, &c., which has been done. There is a large part of the land through which it passes, fit for agricultural purposes. By this line the people of Maddox Cove now travel to and from St. John's, and it is useful for those travelling between Petty Harbor and Blackhead. To make a good road of it would require at least three hundred pounds.

Board of Works.

REPORT OF THE INSPECTOR OF LIGHT HOUSES.

LIGHT HOUSE DEPARTMENT,
31st December, 1866.

For the information of His Excellency the Governor, the Inspector has the honor to submit his Annual Report on the several Light Houses in the Colony, with an approximate estimate of their efficient maintenance for the year 1867, adding such general remarks as apply themselves to that branch of the Public service.

CAPE SPEAR LIGHT HOUSE.

In addition to my last estimate, \$60 have, in accordance with the directions of the Board Works, been expended on the Road between Black Head and the Cape. To render this Road available for the transit of stores, &c., from that settlement to the Light House, and to be otherwise generally useful, a further sum of \$40 will be required.

The present creditable condition of this establishment will, for the ensuing year, be sustained without any outlay in addition to the usual supply of Oil, stores, &c.

FORT AMHERST.

The Roof the Keeper's Dwelling being found defective, it has been newly shingled, which with \$61 expended on the Road, has caused an unexpected outlay of \$160.

HARBOUR GRACE ISLAND.

The Store, Boat, and a part of the Landing stage carried away by the unprecedented high sea, the present month, will have to be replaced, this service, together with the contemplated and very necessary addition to the building for the accommodation of the Assistant Keeper and his family, I have estimated at \$720.

The Keepers here are old and deserving servants, and are justly entitled to accommodation in keeping with that provided at the other Light Houses.

HARBOUR GRACE BEACON.

On a former occasion your Inspector pointed out the danger to which

Board of Works.

this building was exposed by the encroachments of the sea on the Beach. The sea now flows to within a few feet of its foundation, the Building is out of plumb, and to insure its stability some precautionary measures are necessary.

I would recommend about 100 stakes to be driven into the Beach where most exposed to the action of the sea. At Harbor Breton I observed, under similar circumstances, this plan to have been adopted with success. For this service £10 is set down as the estimate.

CAPE BONAVISTA.

In a late gale the shaft of the chimney (which is of Freestone) blew down, which, with some damage to the Roof, has been secured for the winter, the cost consequent on these repairs in a permanent manner forms an item in the general Estimate.

OFFER WADHAM.

The tower to be recoated with cement and painted. Dwelling in part shingled and clapboarded, and with some other minor Carpenter's work, estimated at \$320.

CAPE ST. MARY'S.

Two bridges connected with this establishment, to replace those carried away (by flood) late last season have been erected, and the necessary repairs to the Road leading to the Light House have been attended to. Provision in the annexed estimate for any extra outlay at this station during the ensuing year, has not been found necessary.

GREEN ISLAND, BACCALIEU ISLAND, AND DODDING HEAD.

No extra expenditure has been incurred at either of these establishments, the past year, neither will any be required the year ensuing.

The Keeper of the former station died in September last, and the Assistant keeper at Fort Amherst has charge at Green Island for the winter.

BRUNET ISLAND.

The completion of the road to the Lighthouse has been attended by an outlay considerably beyond that contemplated.

Repairs to the wharf and store, as well as some other necessary carpenter's work have been provided for in the general estimate.

Board of Works.

CAPE RACE AND CAPE PINE.

It was stated in my previous Annual Report, that the Imperial Government had determined on changing Cape Race Light from a Fixed to a Revolving—and Cape Pine Light from a Revolving to a Fixed Light—and that the necessary machinery and apparatus had been received.

Their Lordships the Committee of Privy Council for Trade having intrusted to me this undertaking, the work was commenced in July, with an anxiety for its successful completion, only to be experienced by those charged with similar duties; and it is a source of much gratification to find, that the contemplated advantages to Navigation, consequent on the changes in question, have been fully realized; and that the manner in which they have been carried out (as will appear by the annexed copy of a Despatch from the Colonial Minister.) have merited their Lordships' special notice and approval. At both Cape Race and Cape Pine the sanctioned and somewhat extensive necessary repairs have been completed.

In my journey from Cape Pine to Trepassay, by land, a distance of 13½ miles. I had an opportunity of witnessing the state of the road. A sum not exceeding \$100 will put it in tolerable repairs.

The late Keeper, Capt. Hearder, died in September, and the removal of the Assistant Keeper from Cape Race to take charge at Cape Pine, together with the ill health of the Keeper at Cape Race, have rendered the appointment of a new Keeper, and Assistant Keeper at Cape necessary.

REMARKS.

The table annexed to the estimate will serve to shew the distance between each Light House in the Colony, including the French Light at St. Pierre's.

From Brunet Island Light to the Wadhams, a distance of 389 miles, there are eleven Light Houses, the greatest distance between any two, say from Cape Bonavista Light to the Wadhams, 70 Nautical or something over 80 English Miles, and a glance at the General Chart of the Island will shew that the dangers with which Navigation has to contend, both with regard to their character and extent in that locality, are unequalled on any other part of our coast. The losses there in one year have been serious, and the tonnage which passes and repasses in a season must be very considerable. As to the best site for a Light on the coast referred to, the opinions, as might be expected, are conflicting according to the value which is set on the various elements and interests which

Board of Works.

enter into, and bias the enquiry. In such cases what should be done is, carefully to weigh all the circumstances of the locality, and give that site the preference which gives the greatest balance of interest to Navigation.

The best position for a sea Light should never be rejected for the sake of the more immediate benefit of some neighbouring Port. And the interest of Navigation, as well, as the true welfare of the Port itself, will be better served by first placing your sea Light where it ought to be, and as your means will afford, adding, on a smaller scale, such subsidiary lights to the entrance of such Ports as are most frequented and regarded as Harbours of Refuge.

To shew the consequences which the injudicious choice of a Light for any particular locality, even in a pecuniary point of view, will entail, it will be only necessary to advert to the first four Lights which were erected in this Colony, viz:—

Cape Spear, Harbor Grace Island, Cape Bonavista, and Cape Pine. The united expenditure of seal oil, for one year, of these four establishments, is 2250 gallons, and that of the remaining eight Lights *only* 2170 gallons, or eighty gallons less than that expended by the four Lights I have named.

In conclusion it only remains for me to add, that the several Light Houses are in a creditable condition, and have been provided with every necessary to insure their efficient usefulness.

Respectfully submitted, by

ROBERT OKE,
Inspector Light Houses.

ROBERT ALSOP, Esq.,
Chairman Board Works.

Board of Works.

SECRETARY'S OFFICE. }
31st Dec., 1867. }

SIR,—

I have the pleasure of transmitting you, by directions of His Excellency the Governor, the annexed copy of a Dispatch from the Secretary of State for the Colonies, upon the subject of the changes in the Lights at Cape Race and Cape Pine.

I have the honor to be, Sir,

Your obedient servant,

(Signed,) JOHN BEMISTER,

Colonial Secretary.

To ROBERT OKE, Esq.,
Inspector Light Houses.

DOWNING STREET, }
7th Dec., 1866. }

SIR,—

I have the honour to acknowledge the receipt of your Despatch, No. 123, of the 15th October, reporting the successful completion of the authorized changes in Cape Race and Cape Pine Lights.

The Lords of the Committee of Privy Council for Trade have requested me to express to you the gratification which they feel on receiving this intelligence, and to thank Mr. Oke, for the successful and skilful manner in which he has carried out these alterations.

I have the honor to be,

Your obedient humble servant,

(Signed,)

CARNARVON.

ROBERT OKE,
Inspector, Light Houses.

Board of Works.

**REPORT OF PROCEEDINGS ON THE GREAT NORTHERN
MAIL ROUTE, FOR THE YEAR 1866, BY MR. GEO. CARTER.**

SIR,—

In submitting a review of my proceedings on the section of the Great Northern Mail Route between Shoal Harbor in Trinity Bay and Bay of Bulls Arm, I would make a few prefatory remarks.

Whilst assisting in remodelling the New Harbor line, I received an intimation in September, through the Secretary of the Board, that it was their intention at once to proceed with the survey of the Northern Mail route, with a request to return as soon as possible to receive instructions for carrying out the work. I came back on the 9th, and on the 21st Mr. Byrne informed me that "he was instructed to prepare things for my information," and that on Saturday the 22nd we would begin to arrange for the voyage. On the details for our arrangements, it is not here further necessary to enlarge than passingly to notice his advice that it might not be well to close an arrangement with the men I might require.

During the perfecting of the arrangements, I procured a craft at a nominal cost, employed men, provisioned for three months, and on the 4th October, received in St. John's from your predecessor in office the suggestions and plans of Mr. T. Byrne for my guidance in reference to the route, and hastened to Topsail to begin the voyage. Part of my men that night betook themselves on board; the remainder waited for daylight to embark. Before the dawn arose a violent storm, our vessel disappeared, and was neither seen nor heard of until the morning of the 6th, when she was perceived through a telescope sheltering under Kelly's Island. The sea did not abate until the 7th to admit of boarding, when we left the South Shore of Conception Bay, fetched Bonaventure on the night of the 8th, and, through Smith's Sound, arrived at Shoal Harbor on the 11th; but having followed too relyingly the Book of Sailing Directions, we grounded, during a storm of rain and wind, upon the bar at the conjunction of Smith's and Random Sounds, which occasioned a day's delay. This storm raged incessantly until the night of the 12th. On Saturday 13th, the landing of camp, provision and tools was completed, having already experienced the inconvenience of too rigid an economy in selecting a craft. On the Friday, 12th, I had taken with me one of Mr. Byrne's old hands to survey Shoal Harbor river, preparatory to the erection of a temporary bridge for our accommodation, and had gone along its northern bank about three miles. The drenching rain of the

Board of Works.

past and present day, although not conducive to personal comfort, had contributed to swell the volume of water in the river, and impress me with the unchanged conviction that more than a temporary bridge should span this formidable impediment in the pathway of the courier. During a minute observation, I perceived but three eligible sites for a bridge across ; on one of these sites the former had been thrown (three of its beams, washed ashore, still indicating its locality) in the vicinity of another. Distant about a mile from the harbor was a grove of timber of the requisite dimensions. The width of this river at its narrowest measurement exceeded eighty feet ; its average breadth is about one hundred and twenty. Its character, in general, assimilates to the river from Waterford Bridge to the mill-dam, the banks of a more regular height, the bed deeper, but the magnitude of its volume far exceeding that of its metropolitan sister.

Returning in the cold north-east rain, the cabin filled with men and smoke,—(we had but one wretchedly small stove beneath deck)—and heartily desiring that I were not here, I read over again and again the suggestions of your Surveyor, and having ascertained from them that “ had he the work to do, he would open a new line altogether, instead of improving the old one,” I resolved before I altered materially the present, to examine it from Shoal Harbor to Bay of Bulls, conceiving that diffidence suggested the necessity of so radical a change. Had it been practicable to have furnished me with these suggestions a few days previous to my leaving, to have received an explanation of them on his plan, this embarrassment might not have occurred. My next perplexity was the employment of the men during my absence ;—to have taken the body of men with me would have been absurd, when two or three, at most, would have sufficed in making general observations.

Weighing deeply these and other considerations, and that I had been more than ordinarily fortunate in the collection of my company, having one bridge contractor, four schooner builders, and the majority of the remainder “ handy men,” I determined to test practically their skill in the construction of a temporary bridge, and that on Monday the 15th they should divide, one part on the North, the other on the South of the river, and work towards each other.

On the Saturday, camp, &c., had been landed on the South side of Shoal Harbour, and with great difficulty conveyed among the tangle and through the plashes by Pitman's Pond path, as I supposed, into the Clode Sound line, and thence southerly along the line towards the top of the ridge, about a mile distant from the site on which the bridge was to be erected. I am thus particular in describing the locality of the tent, as

Board of Works.

its site was selected because of the conformation of the various ridges of hills, and that I was almost certain, from the first distant view in Shoal Harbour, that through the Gap on that ridge westward of the tent, would be the passage of the line towards Bay-of-Bulls.

On Sunday the rain held up until noon, when it poured with fresh vigour.

On Monday the bridging began, after some accidental delay, amply compensated for by the briskness which a little honest rivalry infused into the work from either side. By the close of the day the men had proved their capability of erecting such a structure as would bear the hard tests to which it must here be subjected; one of these is the pressure of rafting ice to the height of fourteen feet from the bed of the river, sufficiently indicated by the trees along the banks barked on their river faces to that height, from the friction of the ice.

The labor of two men spared from the bridge was profitably invested in widening part of the line towards the tent, that needed no other modification. Having thus provided all suitable employment, I found myself at liberty occasionally to push along the line, first to Dark-Hole River; then beyond, and wherever I could gain a point of vantage for a bearing or observation, the loftiness of the forest ever obstructing the view.

To describe the appearance of the Hill ranges is difficult, and foreign to the general purpose of a report. Suffice it to say, that one lofty ridge, the Sienite Mountain, advances southward, steep and abrupt on the south of the River, within two and a half miles of Shoal Harbor, when it gradually softens down to a gentle slope towards the River and the Harbor, (such as would instantly take the cultivator's eye), but tending to Dark Hole, two miles below Shoal Harbor, maintains a steep decline on the S. W. Another elevated chain (still S. W.) the "Double Mountain Ridge," runs parallel with this, towards Lower Shoal Harbor, half a mile below Dark Hole. Around, over or among these difficult ridges the Line must wind, for behind them is the "White Mountain" range, the dominating one, at right angles to the others, and fencing them in on the north, well on to Bay of Bulls. Mr. Byrne's Line having ascended to the *summit* of the first parallel, by necessity descended too far south in lowering itself into the valley in which flows the Dark Hole River, improperly so called, as it empties into Lower Shoal Harbor River; and before it could break through the Double Mountain ridge, was pushed on and on, by spur after spur of that ridge, towards and beyond Lower Shoal Harbor. Hence, the course being well S. W., it

Board of Works.

had to return on the opposite side (the S. W.) of this mountain, to regain what it had lost of its westerly course, and thus forced into an irregular curve. This again brought the line into contact with Lower Shoal Harbor River, of less volume than the Upper one, but defended along its circuitous course by precipitous banks and a rampart of hills. Here, then, I discovered the true motive which induced Mr. Byrne to suggest so radical an alteration of the line; and here I found, after much toil, many drenchings and patient observation, both on the water and the land, that the tent had been erected, as I surmised, at the turning point, and that the gap before alluded to afforded the right passage from the "Tent-ridge," west, over an elbow of the range across the head of the valley to Dark-Hole River, thence gently winding up into a corresponding peak to the Double-Mountain ridge to the long plateau to the west, over and beyond which less difficulty was experienced, until I approached the above Shoal-Harbor river amid a jumble of conical hillocks and ponds.

I will now revert to a circumstance which, combined with my previous inclination and observations, decided me in attempting a permanent crection over Shoal Harbor river.

In an interview with the mail courier between Shoal Harbor and La Manche. I questioned him of the route he followed. He told me, without equivocation, that he usually took Mr. Byrne's line from Bay-of-Bulls to the Southwest Arm, where but little improvement was needed; he then dropped down from the elevated ground, crossed the neck between that and Random Sound, came out at Lee Bight, and if the Sound was securely frozen, travelled by it to Mr. Tilley's in Upper Shoal Harbor. If the Sound was unsafe, he took the strand from Lee Bight to Deep Bight; then through the lead of marshes north of the Man Mountain into Mr. Joseph Tilley's wood-path, out to Lower Shoal Harbor, and thence up by the strand to the Upper Harbor. At other times, when the marshes were hard, from the Lookout over Hainsford's Barrens into Deep Bight, and thence by one of the routes before named. I invited him to tell me honestly the reason he did not travel by Mr. Byrne's line all the distance. He replied, partly because the other was nearer to his residence at Red Beach, the south entrance to upper Shoal Harbor, partly and principally because of the obstructions from lying timber, underneath to be stretched over, and over head to be stooped under—very distressing to a man laden with sixty pounds weight, from the alders and white wood branches that entangled, retarded his progress, the narrowness of the line allowing young fir or spruce trees, bending under a weight of snow or silver thaw to block up the way here and there; and beyond all the unbridged rivers. "Give me," said he, "a clear line wide enough to travel, without obstruction, and bridge the rivers, and I shall but rarely endanger my safety, on the Sound." He

Board of Works.

also said that tilts ought to be provided, within a moderate distance of each other: that although the Post Master General had commissioned him to build two, a third was required between Black Brook (running into the S. W. Arm) and Shoal Harbor.

In conversation with the intelligent settlers of both Shoal Harbors, I perceived that the opinion was unanimous, that a line almost as short and more level, could be opened nearer the Sound, less westerly than Mr. Byrne's, conjoin the local and northern lines and the settlement of Dark Hole, Upper and Lower Shoal Harbors, Deep-Bight, and South West Upper Arm. Allowing for the local tinge of sentiment, and, I conceived that, supposing they were nearly right, this section of the Northern Route would be benefited from the double fund, its own and the Local one, that the settlers would save the public expense of keeping the line open from one settlement to another, for their own convenience in travelling, and also (not unworthy of consideration) that the funds of the Northern line would serve a double purpose, in aiding scattered settlers to reach each others' habitations.

Again I balanced these advantages, by picturing to my mind, the probable along-shore path that might have united St. John's, Petty Harbor, Shoal Bay, the Spout, and Bay-of-Bulls (S.E.) with the present direct line by Waterford Bridge, Blockmaker's Hall, the Gould's, embellished with its rich agricultural improvements and resources,—

With the suggestions of your old and well proved Surveyor to keep more westerly than his line,—

With the fertility of the soil, at least so far as I had examined, in-shore,—

I argued that the remotest localities would not be distant, at the furthest, three miles, and others much less, from the Trunk line, that the Sound affords them a tolerable path in summer, and when frozen, away (though I acknowledge a dangerous one) in the winter. The argument to the feelings of the compulsory barbarity of drawing corpses on slides over the leading marshes, and cutting a way through the woods to the public burying place in U. S. Harbor, is replied to by each settlement having its own place of sepulture. Their fears, that the width and manner in which I was opening the line, would invite intruders to settle, or at least avail of it, (as they remarked it was a horse path I was making,) to destroy those preserves of timber which they had so carefully husbanded for continuous employment of their saw mills, I attempted to allay, by soliciting them to use the path first themselves; by assuring them that the progress of civilization was inevitable, and could not be

Board of Works.

retarded by local interests ; that one meaning of the word was destruction of timber, or inversion of the natural order of things, and substitution of an improved one ; that though they were never so careful over their preserves, they were thinning them gradually, and would themselves ultimately destroy them, to provide for the enlarging necessities of their increasing families ; and that the adoption or substitution of millstones with or for saws, was simple, and would enable them to keep pace with the rapid changes that were irresistibly going forward, and would soon make themselves as perceptible in the attractive recesses of Trinity Bay as elsewhere.

Having thus, as I believed, carefully weighed the arrangements respecting the claimant lines, I determined, for the present, to confine my alterations between the bridge and the tent, until I had thoroughly investigated the character of the localities for the best level. The remembrance of the *old* New Harbor line and other more costly ones, the present abandonment of which, with their improvement, would prove a gain to the Colony, established this resolution. The labors of the men were therefore immediately directed to the provision and fashioning of timber for a permanent construction across Shoal Harbor River.

By thus dividing my attention, I was enabled, with one assistant, my chainman, to prosecute searching investigations by water and land, a work of no light labour and hardship, nothing decreased by the extraordinary storminess of the season.

During one of these investigations, I essayed to reach Bay-of-Bulls Arm, travelling by Mr. Byrne's Line, here and there entangled by a rapid growth of alder and underwood, with lying timber, such as annually falling, should at least every second year be removed, which could easily be accomplished by the payment of a trifling sum to some honest settler to run over so many miles of the line, clear out the occasional windfalls. In one part where it adjoins the Lower Shoal Harbor wood-path, the falling of wood had completely blocked the passage, leaving a vacancy among the tall trees into which a whirlwind must have rushed, prostrating them in such inextricable confusion that some time elapsed before I could regain the line. I had *this time* with me *two men* and provision for five days. At the close of the first, we halted in a large thicket of fine spruce abutting upon a marsh, and sheltered under a canopy of spruce felled to lodge against each other, with an interlacing of branches beneath. In the stillness of the night the big unfrequent drops pattered a warning ; then came the pouring rain, heavier and heavier, until our house no longer afforded protection. Daylight brought no diminution, and (Sunday though it was) part of a tilt was erected, and under it we willingly retreated.

Beard of Works.

Monday was diversified by rain and snow commingled, bitterly cold. The men enlarged and further secured the tilt, while, for observation, I traversed the barrens to the north, bounded by ponds and three well wooded conical hills; one, remarkable for the nakedness of its summit. It was a blinding day of snow and rain on this unsheltered plain; nevertheless I discovered that to the north of these the line could not go, nor, quite as far south as the tilt. Here then were the limits, north and south, narrowed to half a mile, betwixt which the line must run; part of the ponds discharged into Deep Bight River adjacent; our tilt lay north from Deep Bight, N. W. from the naked Man Mountain, admirably adapted to afford the accommodation the courier solicited. This was fortunate, proved by an expedition next day over Hainsford's Barrens, to the Look-out (N. E.) at the head of S. W. Arm, still along the line. Here, then, I discovered the avoidance of two long circuits, by keeping, as Mr. Byrne suggested, west of the first line, and the length and unevenness of the one nearer the Sound, proposed to unite the local interests. The information so anxiously sought was now satisfactorily obtained; this N. E. mountain, towering and conspicuous became a look-out for me, the terminus of one section of the line. Between this and Bay-of-Bulls, the courier travelled Mr. Byrne's track without a murmur. Upon this section, then, I concentrated (I believe prudently) the improvements, and fulfilled my instructions to amend the line.

My remarks appear unintentionally to have extended themselves over so many pages that I may incur criticism for diffuseness. I will therefore briefly sum up the result of the labors of my ten men for the fifty-five days they were at work.

The energies of the crew were now confined to the collection and preparation of materials for the bridge, which gradually accumulated, and were deposited in their proper resting places:—wharf pieces, bedding, studding, ballast, trenails, covering and beams, the *latter* of admirable proportions, and *felled* within a radius of 350 yards. Such materials as are in this edifice will not again easily be gathered here. Their amazing ponderosity rendered necessary the aid of a powerful axe-man, whose services I obtained for a week, poor fellow much to his loss, from a severe wound which he received in our service by the glancing of his axe, that crippled him for a month.

The men fulfilled their tasks with alacrity and cheerfulness, whether thigh deep in the river, among the dripping branches, or staggering under the weight of the heavy timber. The magnitude of these difficulties appeared to infuse a determination to overcome them. Neither rain, snow, chilling blast or swelling flood abated their zeal.

Board of Works.

Three large wharves of peculiar construction were built, those against and upon the banks obtusely triangular, with the points obliquely to the stream, (to glide the ice into the stream,) rather below the angles of the double diamond in the centre, to prevent a jam of the pans thrust aside by its cutwater ; these wharves were guarded by close and well trenailed studding wherever the friction of ice could be anticipated.

Despite the exertions of the men the heavy work slowly advanced to its completion, partly because of the forgetfulness to provide augers (for the loan of which and other implements we were indebted to the politeness of the Messrs. Tilley,) those we obtained being unprovided with the screw aid ; partly because of the quantity of material required for a bridge 163 links in length, or with its south platform, 198, with an average depth of 25 links, and the double diamond 120 long. A more accurate idea may be gathered by enumerating the pieces of timber :—

Studding 131 pieces ;—120, 18 feet, 6 to 7 inches in small end ; 21, —10 feet, 6 to 7 inches small end.

Longering, 331.

Gump Heads, 213.

Beams, 15,—length 45 feet ; 7 inches small end.

Treenails, Bedding (not counted.)

Boring and trenailing with our appliances were tedious. Against the tons of ballast the only murmurs I heard of were made ; but it was necessary to provide a solid resistance (if it should occur) to the weight of fourteen feet of rafted ice, aided by the impetus of the stream.

Time failing to erect king or queen posts for support, we removed the longering from the widest span, and having placed it in security, substituted a few longers between the beams lengthwise, and added the protection of a hand-rail. The inducement to remove the longering was the apprehension of a great weight of snow damaging the beams until they became secure. This, as far as I can ascertain, is nearly as large a bridge as that about to be erected over Rocky River. During the progress of construction my chainman opened half a mile from the landing place at *lower water*, in Shoal Harbor, and with the occasional aid of a man, worked it out to Mr. Byrne's Line, exceeding a mile, which I altered somewhat towards the river, avoiding a few sharp rises around hillocks which I left to the East. We then gradually drew on to Dark-Hole

Board of Works.

River. By this time Diamond Bridge was completed, the tent was struck and sent on board, with orders to Butler and Gosse to meet us with the craft at Deep-Bight, towards which, despite the storms of snow, and the sky for covering by night, we pushed on the line, (already marked by myself and assistant) bridging Dark-Hole River, a span of thirty feet, and all the smaller streams, preserving the width and *evenness* with which I had begun, and longering the plashes, until we reached Lower Shoal Harbor River, quiet and placid as it evenly emerges from its source (one of a chain of ponds North of the Tilt Barrens before alluded to). Across this also we threw a temporary bridge nearly thirty feet in span. This was completed by moonlight on Saturday 15th Dec. night. Here our food failed us; some of the crew retreated for the night to our last bivouac; two accompanied me on to the tilt, about half a mile over the barrens, where, before a glowing fire, we enjoyed a comfortable repose, though the wind blew keenly from the north, and snow-showers fell. We had now but one bag of bread on board our craft, and could not procure more. To her we all hastened on Sunday morning by a new line, which I had directed to be opened from Goose Marsh, on Mr. Byrne's Line to Deep-Bight. Thus then the Line is complete either from Deep-Bight or the Look-out, along Mr. Byrne's Line, to the tilt; thence up the Barrens by the *new* line, to Shoal Harbor, a pedestrian may now walk from one Shoal Harbor, a pedestrian may now walk from one Shoal Harbor river to the other dry shod in bluchers. From the general features of the wood I apprehend no difficulty in continuing the new line direct as it was going on to the look-out. But were I to undertake again such a task, I should prefer having but half the number of men until I had prepared, by careful observation and marking, to push a larger body on as fast as they could cut their way and convey food.

I think I am correct in stating that ten men will open one mile per day as wide as the courier can require,—that is as wide as the unobstructed swing of the axe on both sides, without bridging wharf requiring rivers. The hardship, the wearing and tearing of clothes and amount of food required, especially in such a season as the past fall, would not be compensated for without 3s. per day, excepting idle days, per man.

I would make some suggestions on the opening of a line from Random Sound over Random Island diagonally, towards the second bend in Smith's Sound, as a facility to the courier going to Bonaventure, previous to the more expensive and circuitous, the safer line around George's Brook over the main land, from Upper Shoal Harbor to Bonaventure; but that I have already exceeded the limit of a report and the instructions I received.

I would also, in conclusion, state, from the declaration of Mr. Byrne,

Board of Works.

and the testimony of the courier, that the line from Shoal Harbor to Clode Sound or Freshwater Bay is so defined as to be susceptible of little improvement, and ready for road making operations.

From my own observations I concur with Mr. Byrne, as to the agricultural capabilities as far as I have examined.

GEORGE CARTER.

To ROBERT ALSOP, Esq.,
Chairman of the Board of Works,
&c. &c.

Board of Works.

**ESTIMATE FOR THE COMPLETION OF THE
LEMARCHANT ROAD.**

ST. JOHN'S,
Feb. 19th, 1867. }

SIR,—

In accordance with your instructions, I beg leave to submit the following Report, in reference to the LeMarchant Road.

The road is now open from Cook's Town, to the Lazy Bank Road, a distance of over 1000 yards.

From the Lazy Bank Road to Patrick Street, the road is not yet open, a piece of land belonging to P. M. Barron, Esq., (about 200 feet), not being yet compensated for.

From Flower Hill to Cook's Town, about six hundred yards of the road was gravelled, the past summer, twelve feet wide, and the road made available for wheeled vehicles. To finish this portion of the road, will require an expenditure of two hundred and fifty pounds.

To open and make the remainder of the road to Pokeham Path, will require an expenditure of five hundred pounds, not to include Mr. Barron's Compensation, which may amount to Thirty pounds.

I have the honor to be,

Your obedient Servant,

JOHN MAHER.

ROBERT ALSOP, Esq.,

Chairman Board Work.

The deviation from the plan as laid down in the Chart, was undertaken by the late Chairman, Mr. Casey, with the approval of Mr. Byrne, the Surveyor, who considered it greatly improved the road, substituting, as it did, for an obtuse angle, a curve. After the completion of the road, as amended, it was ascertained that the property of the late Rev. Mr. Waldron had been considerably injured thereby, consequently the fence has been removed to the line as delineated on the plan, and at the expense of Mr. Casey.

ROBERT ALSOP,

Chairman Board Works

St. John's, Feb. 21st., 1867.

Board of Works.

EMPLOYMENT OF PRISONERS, PENITENTIARY.

The prisoners in the Penitentiary are at present employed, in improving the grounds when the weather is suitable, also, in cleaning, washing and scrubbing.

The convict Taylor, in making, mending and repairing bed and other clothing.

Convict Painter,—Painting.

Female convict, employed mending clothing, as required.

The construction of a hard labour crank Pumping Machine was sanctioned last year, and is ready for erection, whenever the weather will allow the completion of the well by the prisoners.

This Pump would have been ready for use last fall, but for the necessity of waiting for the prisoners' work, which could not be carried out efficiently owing to the illness of Mr. Brace, and subsequently, from change of officers. All convicts are put to pump-labour, in spells limited to 5 minutes, to be repeated at the discretion of the Gaoler. 100 strokes of the pump are to be given each 5 minutes.

ROBERT ALSOP,
Chairman, Board Works.

Saint John's, }
Feb. 21st 1867. }

The Chairman has already had some correspondence with Mr. McGill, with a view to a more regular system of employment for the prisoners, during the term of their imprisonment.

R. A.

St. John's, 3rd March, 1867.

Board of Works.

**REPORT OF THE MEDICAL ATTENDANT OF THE ST. JOHN'S
HOSPITAL, FOR THE YEAR 1866.**

St. JOHN'S, January 21st, 1867.

SIR,—

In presenting the St. John's Hospital Report, for 1866, I beg to refer to the Tabular Report annexed, as indicating all particulars.

The number of patients under treatment in the Institution during said year, exceeded about double the average number for the past seven years, which was owing to the prevalence of Typhus and Scarlet Fever, but particularly of the former.

The Patients sent to Hospital with Fever, are generally of the poorer class, whose constitutions are exhausted by poverty, and coming from crowded localities, where little or no attention is paid to ventilation or cleanliness, and it will be observed that many patients are admitted to the Hospital in a dying state. These causes will account, in a great measure, for the rate of mortality. Owing to the increase of patients from Fever, &c., (which it is feared, with other epidemics, may be looked forward to as a periodical occurrence.) for months every ward was overcrowded, proving the unfitness of the building to meet the requirements of our population under the exigencies of epidemic disease.

The want of proper means of ventilation, and the overcrowded state of the wards, no doubt, tends materially to diminish the chances of cure; and further, the impurity of air, from these causes, is greatly increased by storing vegetables in the cellars, which are immediately under the wards, and diffuses a heavy sickening odour of decomposition more or less throughout the building.

The attention of the Government is respectfully called to the Sanitary Report, made by order of His Excellency, the Governor, and presented in 1865, wherein the necessity of a new Hospital was strongly recommended by the Commission; and nothing less than a new building fitted up with all modern appliances and improvements, can give a fair chance to Physician and patients.

I would wish to refer the Board to former Annual Reports, wherein various improvements and alterations in the present building were requested, such as fitting up the old attics, drainage, &c., &c., and which,

Board of Works.

though urgently required, have not, as yet, been attended to—but it is hoped that the delay of the Government, in these matters, may be attributed to their determination to go to no additional expense in patching up the old building, when a new Hospital is so closely in prospective.

I have the honor, Sir,
 To remain,
 Your obedient Servant.

THOMAS McKEN, M. D.,
Hospital Surgeon.

ROBERT ALSOP, Esq., M.H.A.,
Chairman Board of Works,
 &c., &c., &c.

P. S.—I will avail myself of the present opportunity of adverting to my duties at the Poor House, by visiting and prescribing for the inmates. All simple cases, I attend, and prescribe for, at the Poor House, but cases of a severe kind, I send to the Hospital, as no provision has heretofore been made for nursing at the Poor House. My duties and responsibilities there have been considerably increased within the past year, owing to the admission of Lunatic Patients under my care. A portion of the western end of the building having been fitted into wards for their reception, nurses have been appointed for this class of patients.

T. Mc. K.

Board of Works.

St. JOHN'S,
1st March, 1867.

SIR,—

In reply to your communication, dated 26th ult., received to-day, relative to notice of Mr. Pincent, to ask the Chairman of the Board of Works, what was the total number of Patients in 1866 received into the St. John's Hospital?—How many from Outports? and the number from each Outport?" I beg to enclose the following statement, namely:—

JOHN STUART, Esq.,
Secretary, Board of Works,
&c., &c., &c.

Board of Works.

REPORT OF THE PHYSICIAN SUPERINTENDENT OF THE HOSPITAL FOR THE INSANE.

31st December, 1866.

The number of cases admitted into the Institution, during the past year, is 30 ; of dismissals 29 ; and of deaths 5 ; whilst 19 other insane persons could not be received, and were sent, consequently, to the Poor-house, where 5 had also remained from the preceding year, from the impossibility of providing for them in the proper Asylum, a very sad state of things, which can be remedied only by the addition of such wards to those already existing in this Hospital, as I have represented to be requisite, for several years past.

The whole number of cases under treatment, in the past twelvemonths, is 131 ; to which number may be added, 24 admitted to the Poor-house, making the total number provided for in Public Institutions, 155, for the year 1866. All of these ought, of course, to have been admitted into the Asylum specially provided for their treatment, had it been possible.

The prevalence of suicidal propensities in some of the female patients, notably in one to an extraordinary extent ; obliged me to employ an additional attendant, the strictest watch by night and day having been required, to prevent the successful accomplishment of this terrible morbid purpose.

The general health of the inmates has been as remarkably good, under Divine Providence, as heretofore—the more strikingly so, in 1866, —that the fatal epidemic which has desolated so many hearths in St. John's, and swept away in its awful career four of the Superintendent's own family in the Institution itself ; whilst several of the attendants and servants suffered under its attacks—entirely spared the patients ! And here I must take leave to offer a humble tribute to the memory of one of the first victims of this virulent disease ; and to whom the Asylum inmates owe a debt of gratitude for faithful services—to the memory of the late Rev. William Walsh, P. P., of St. Patrick's, that most amiable servant of God, too early removed from us.

It will be observed that a less total number of patients have been under treatment, this year, than in the one preceding it—but that a greater number have been admitted within the year than in 1865, which is accounted for by the Board of Works having removed all those who could well be removed from the Asylum, to the Poor-house, to facilitate the

Board of Works.

admission into the former of recent curable cases of insanity, many of which were very pressing instances—(yet it is to be feared that some such, if not many, were of necessity refused admittance). Thus our total number of inmates was reduced, but the number of recent admissions increased; an evident advantage in one sense, but counterbalanced by the repugnance manifested by the relations of the insane to placing them in the Poor House, instead of the Asylum—and by the temporary nature and comparatively unsuitable character of the accommodations provided for them in the former.

There has been no variation or addition to the occupations or amusements of the patients during the past year, although so much desired. The Superintendent purchased a set of Skittles for the exercise and amusement of the male patients, but has not succeeded in having an alley built up for the game, and they remain consequently unused. Sawing firewood, and a small amount of farmwork, have constituted all the healthful employment it has been possible to afford, in the male department. In the female department, making and mending the clothing of the Institution has afforded sufficient in-door occupation for a considerable number of patients. Out of doors, the gardens and enclosed airing grounds, as well as the small farm, have supplied the means of allowing plenty of fresh air and some exercise to all the patients—but nevertheless, of too monotonous a character. Without the means of spending a shilling in any purpose, but that of supplying the Asylum with absolute necessities, it is evidently impossible so to add to its means for usefulness as was formerly contemplated and hoped for by the Superintendent, and from time to time suggested by him. Ornamenting the grounds and extending the gardens, at a moderate expense, would give excellent and curative employment to many patients—enliven their daily life, and render their abode more pleasant to their own eyes, as well as to those of the public—and none so much as the insane feel the opposite effects of dull and dreary, instead of cheerful and beautiful homes. A little certainly is done, year by year, with this object in view but how little? The total want of funds may tell. The very fences surrounding the airing grounds remain rough and unpainted, and much of the grounds is yet unimproved from a state of nature. Within doors much remains to be done to brighten the appearance of the day-rooms and corridors; to attract the eye by prints or paintings, and other apparently minor things, not without great value in the treatment of insane convalescents and of no little importance to those whose lives are spent in the same dull round, year after year, in the wards of a Lunatic Asylum. In winter, especially, are in-door employments and amusements required to sustain the weakened or failing mental activity of the inmates. Many games might be introduced suitable to the faculties of the insane—and amusing and illustrated books would be found of much service. Debar

Board of Works.

red from intercourse with the outer world, the insane require to be kept continually occupied or amused like children, to prevent their minds becoming total blanks, and their whole beings receding to the condition of animals. In all Asylums this want is much felt, even under the advantages of ample means well spent—how much more must this want be felt in this Institution ?

In July last the Asylum was visited by three officials from the *Great Eastern*, Mr. Willoughby Smith, Dr. ———, and Mr. Laws, who very kindly interested themselves in the various patients and their histories ; and the former was good enough to leave a very handsome memorial of his visit.

The Lunatic Asylum is about entering upon the 20th year of its existence as a public Institution, and it is but just to observe that Newfoundland has, since its foundation, reaped the benefit of her philanthropy in originating it, by pointing to some of her citizens in nearly every community from Cape John to Cape Ray, who, having once been inmates, for the most dreaded of all diseases, are now happily restored to society in the full enjoyment of their faculties. Nor is it a small thing that the chronically insane, of the present inmates, many of them old residents, are in the most comfortable and protected position of which their malady admits ; always also with the hope present in their minds, that their cure is possible, although prolonged.

The ministrations of the Rev. C. Medley, and of the late Rev. W. Walsh, and other Clergymen, are thankfully acknowledged in behalf of the patients belonging to their respective flocks, as heretofore.

From Mr. Sparke of London, the files of the *Times* newspaper, for the use of the patients, are still regularly received, and together with the weekly issues of the *St. John's Times*, sent by the Editor, are also thankfully acknowledged.

The Asylum Buildings are in need of some repairs, which have been long delayed, especially in two particulars, viz :—The unfinished ceilings of the male retired wing ; and the Coal-house, projected but unbuilt.

The Farm has yielded a good crop of hay ; and a large crop of potatoes, which however, suffered severely from the epidemic disease which now annually affects that vegetable. The use of firewood instead of

Board of Works.

coals, in the steam-boiler, during the warmer months of the year, has proved, as before, a great boon to hundreds of families in the Western District, who, by supplying each a portion of the wood, in the most trying season of the year, and receiving cash for it from the Board of Works, have been in many instances relieved from very pressing necessities.

Respectfully submitted by

HENRY HUNT STABB, M. D.,
Physician Superintendent.

JOHN MAHER.

St. John's, Dec. 31st, 1866.

Board of Works.

REPORT OF MR. M. ALLEN, ON MAIN ROAD FROM ST. JOHN'S TOWARDS TREPASSEY, FOR THE YEAR 1866.

ROBERT ALSOP, ESQUIRE,
Chairman Board Works.

SIR,—

I beg leave to submit the following Report, on that portion of the Southern line of road from St. John's to Trepassey, which came under my superintendance.

From Waterford Bridge to *Northern Gould's Bridge*, distance five miles, the work was done by contract; the road was bad, ruts deep, which were filled with stones, all large rocks and stumps removed and a coat of gravel put on, one bridge and a cross drain made, and side drains cleaned where necessary. The sum allowed for this road was not sufficient to accomplish the whole, and I thought it better to make it as far as the money would reach; there is now about half a mile to be made, would cost about \$40.

From this Bridge to Bay Bulls Big Pond, the road was bad. I spent \$25 on this part; two miles from Bay Bulls big pond the road was nearly closed with trees, which were cut and the road made good; the drains were cleaned where necessary, five cross drains renewed, and a good deal of the road gravelled where necessary.

From Bay Bulls to Witless Bay the road was not bad, one cross drain and a bridge, 40 feet long, repaired and covered with some old and new longers; another bridge at Witless Bay 100 feet long covered with plank to the breadth of 7 feet over old covering; this bridge is bad and dangerous, and will require to be made new next spring.

From Witless Bay to Mobile a bridge at Frog Marsh, 40 feet long repaired, covered with some new and old longers, and one new beam placed therein, some large stones removed. The road from this place to Mobile is in a fair condition, and at Mobile two bridges, 72 feet long, repaired, new beams, and covered with 3 inch plank, 7 feet wide, over the old covering. Near this place the road was cut across with water, in two places, which made it dangerous for vehicles to pass, those places were made and put in good condition, from this to *Toad's Cove* the road is very good. At *Toad's Cove* two cross drains, one of stone and one of wood made; and beyond this place three bridges repaired, covered with

Board of Works.

plank and longers, and ten new beams placed therein. The abutments all rotten and would require to be renewed in the spring; there is no material to be had in this place in summer, it could be had in winter at a small expense. Some distance from this another bridge covered, and nothing done from this place by me until I went to Cape Broyle, where I put up a new bridge which cost \$40.

All the work from LeManche to Renew's was done by Mr. William Carter. I cannot tell what was done to roads and bridges by him; any information that I could give you will please look to my report of the Southern Main Line, submitted to the Board of Works last spring. All the bridges on the Main Line are in a bad state, and if material would be provided during winter the cost of repairing them would be small. The road from Waterford Bridge to Bay Bulls would require to be well drained, as the greater part of the road is over soft ground; the cost of draining and gravelling would be \$80 per mile. From Bay Bulls to La Manche, the road is in a very good state, and for a small sum could be put in a way to keep good for a long time, the great evil is, the drains on either side filling up, \$20 per mile would be sufficient. The plank used for covering the bridges this year can be made available for new bridges, should the Government make provision for their construction next season.

Yours, &c.,

MICHAEL ALLEN,

Reports.

LABRADOR.—COLLECTOR WINTER'S REPORT.

CUSTOM HOUSE, St. John's, }
 9th Feb., 1867. }

SIR,—

I have the honor to submit the following Report on the Revenue Service on the coast of Labrador for the past season.

We left St. John's on the 31st May, and were delayed on the passage till the 21st June, when we arrived at Blanc Sablon. This being thirteen days later than the date of our arrival the year previous, we were not, as we had been that year, early enough to meet the arrivals of the first vessels from Jersey. Nine had arrived, and their cargoes been landed.

We landed Mr. Knight, and, leaving him to attend to his district, we proceeded on our way down the coast as in former years.

In the course of our proceedings in carrying out the service there occurred little worthy of special notice. Our work was merely a repetition of that of former years, presenting no new features, and not marked by any different occurrences.

We visited, as formerly, all the ports at which there was any probability of collecting duties, or meeting with vessels with dutiable goods.

We were fortunate in not only meeting with the merchants' vessels upon their arrival at several ports, but also in falling in with the trading vessels passing along the coast. From diligent inquiries which I made at each place, I believe that only one trader escaped payment of duties for the season. The merchants who would be interested in discovering them and knowing of their avoiding payment, if such had happened, did not mention a single case but the one I have referred to.

The increase in the duties over last year, to the amount of about \$2642, arises not only from the duties imposed on provisions, but also from an increase on the trade and importations. One case I may mention, as that of Messrs. Ridley & Sons, who have purchased the premises of Messrs. T. & D. Slade at Venison Tickle, which, for the past few years, have been closed up, and where they have begun to trade and to import from Foreign countries.

I wish to take advantage of this first opportunity I have had to remark upon a portion of the Report of Mr. Knight, Preventive Officer at Blanc Sablon, for 1865.

Reports.

September 6th.—“Went to Red Bay; found there the Revenue Cutter *Volant*. To my great surprise learned from the Collector and Judge that it was their intention to proceed at once to St. John's. This I considered a very serious matter, inasmuch as the whole Eastern Coast would be left free for Canadian and Halifax traders to carry on the smuggling business, and also that some vessels were expected with late supplies from Britain. Some parties pay their duties promptly, consequently they are desirous that every one engaged in the Labrador trade should do the same. The *Volant* sailed a few days afterwards for St. John's.”

This would appear to those unacquainted with all the facts, to imply a most serious charge either of want of knowledge of the service, or of wilful disregard of duty on my part. My reason for leaving the Labrador when I did, I have already explained. To show how unsupported by facts his statements are, and therefore how incorrect his opinion upon such a matter must be, I need only refer to what actually occurred. On visiting the Labrador last spring, I made it my first business to enquire what arrivals took place after we had left the fall previous, and to what extent the Revenue had suffered from smuggling. I found that *the only* importations of dutiable goods, after we left, were by Messrs. T. & D. Slade and Messrs. Hunt & Henley. Those firms very honorably gave me an account of those importations, and paid all the duties thereon. So far therefore from the Revenue suffering by our leaving, there was a great saving effected; as, even had I been able to stay later, my doing so would only have entailed additional expense, without compensating returns.

Mr. Knight's conduct in the matter, in whatever light it may be viewed, appears to me, to say the least, very strange. I am at a loss to account for the motive that induced a person whom I had done all in my power to forward, and recommend favorably to the Government, (as will be seen by reference to my Report of '64, to bring forward a charge against me so serious in its nature, one which was calculated to throw discredit on the manner in which I had discharged my duty, and to injure me in the estimation of every one unacquainted with all the facts, who might read this report, and a charge, the worst feature in which is that it is so utterly unfounded.

It is to be remembered further that Mr. Knight was only a subordinate officer, whose duties were limited to a certain district. I consider therefore that any opinions offered by him, as to the manner of conducting the whole service were not merely gratuitous, but even presumptuous, particularly when such opinions amount to a charge against his superior.

Reports.

officer, who was entrusted with the whole work of which his (Mr. Knight's) was a part, and from whom he actually held his appointment.

With regard to Mr. Knight himself, and the manner in which he has discharged his duties, I have only to say, that had he been possessed of that extraordinary judgment and power of discrimination, which would appear from the tone of his Report, and of which a certain amount are necessary in his position, and had he bestowed that care upon, and taken that interest, in his own duties which he appear to have bestowed upon mine, he would not have had so large a proportion of dishonored bills to the debit of his Collections.

I am happy to say that the duties were collected from all parties without difficulty, and that no opposition was offered, and no resistance made to necessitate the adoption of forcible or compulsory measures, such as we met with the first year or two. One high-handed and shameful exception, however, I must bring before your notice. On the 21st July, when on our way to Cartwright, we fell in with what we supposed and afterwards found to be a trading vessel. As soon as she perceived us she hauled her wind and stood off to sea. Knowing that it was useless to chase her, we passed on as if taking no notice of her. We soon lost sight of her in the fog, but in a short time she again made her appearance, standing for where we first saw her.

On our arrival at Cartwright, I informed Mr. Goodridge, Messrs. Hunt & Henley's agent, of what we had seen. He said he knew the vessel; that she belonged to a trader named Green; that Green intended visiting their salmon posts, and would no doubt carry off a great quantity of produce from his dealers. He also asserted firmly that if I did not catch Green, and by collecting duties from him, give their house that protection to which they were entitled, they also would resist payment of duties. I showed him the difficult position in which I was placed. Our vessel, although as good a one as could be got in Newfoundland, was by no means a match for Nova Scotia traders, and it was impossible to get at them except by catching them when lying in port; and our boats were insufficient for crossing the Bays or staying out by night. I asked him, knowing that he would accede if he really desired that I should catch Green, to lend me one of his whaleboats, and said that I would spend the night in search of him. He readily complied, and sent two men with me as pilots. We accordingly lost no time in making the necessary preparations for proceeding in search of Green. We had no sooner got outside the harbor, than we saw a vessel approaching us with colours flying, and recognized her at once as the *Emblem*, Green, master. We passed to windward of her, and Green knowing that ours was a salmon collecting boat, and not knowing who

Reports.

was on board, hove to when off one of their salmon posts. When we were far enough ahead to be able to board her, we bore away, and came down on her, which we no sooner did than Green got under way to make his escape, having ascertained who we were. On approaching the vessel, we saw the crew armed with boathooks and oars, ready to resist by force any attempt to board her. Seeing this I ordered the man at the helm to steer for the boat which was fastened to the stern of the vessel, which we succeeded in laying hold of. Green then came aft and spoke to the mate of the *Volant* and myself, using threatening language. I told him my business, and asked for his papers. His only answer was that he would *have the life of the first person* that boarded him. When he saw that I did not mind his threats, he seized a gun, and taking aim at the crew and myself, snapt it. I then immediately ordered the boat to be hauled up, intending to board her before he would have time to put on another cap. On coming close to the vessel two men on board the schooner struck our boat, one with a boathook the other with a pole, and were sloving her off, when I went forward and knocked away both boat-hook and pole, which I had no sooner done, than I received a heavy blow on the head with the but end of an oar, dealt by Green himself. I was stunned with the blow, and was falling overboard when the mate caught me and carried me aft, where I remained senseless for several minutes, the men meanwhile holding on to the boat at the stern of the vessel. When I had sufficiently recovered to understand our position, I was asked what was to be done. I said let her go, as we were unable to overcome such resistance. On our return to the *Volant*, I laid the case before the Judge, who took down my statement and those of the crew.

I have stated this matter thus particularly, both for the purpose of showing the difficulties under which we labor in endeavouring to carry out the service efficiently, and also to show the sort of characters we have to deal with. Nothing but fear of the consequences will deter some of them from going to any lengths in opposing the law, and defying its officers. The blow which Green gave me might have been fatal for aught he knew or cared. If measures be not taken to bring him to justice, the effect will be to declare that such acts may be committed with impunity. The result is easily predicted, violence will be resorted to whenever there is a prospect of its succeeding: the law will be set at defiance, and even the lives of officers, entrusted with a serious and responsible duty, will not be safe.

I have the honor to be, Sir,

Your obedient humble servant;

J. WINTER, *Collector, Labrador.*

The Hon'ble JOHN KENT,
Receiver General, &c., &c., St. John's.

 Reports.

 LABRADOR.—MR. KNIGHT'S REPORT.

ST. JOHN'S NEWFOUNDLAND, }
 24th December, 1866. }

SIR,—

I have the honour to make the following Report relative to the Collection of Revenue in the Straits of Belle Isle, the past season.

On the 30th May, I left St. John's in the Revenue Cutter *Volant*, in company with Judge Sweetland and Collector Winter. Proceeding northward, we arrived at Seldom-Come-By the next evening, and were detained in this place until the morning of the

3rd June.—At 6 a. m. the *Volant* got under way, and, running by Stag Harbor, we passed Twillingate at noon. At 2 p. m. a squall came from the north east; we were obliged to go into Twillingate Harbor and anchor. We were detained here by unfavorable winds until the morning of the

5th June.—Sailed at daylight, and arrived at Hooping Harbor, on the French Shore; the next evening, easterly winds prevailing, we were detained in this harbor until Saturday the

16th June.—Sailed from Hooping Harbor, and arrived at Henley, on the Labrador Coast, the next day at noon, in company with several Newfoundland fishing vessels.

21st June.—Wind north-east. Left Henley at 10 a. m. and arrived at Blanc Sablon at 8 p. m. The vessels belonging to the several Jersey establishments had previously arrived at this port and at Forteau, and most of the fishing supplies landed. Two vessels from Quebec, laden with flour, &c., had also arrived, discharged, and sailed previous to our arrival. The invoices and manifests of these vessels were produced by the agents of the establishments, and duties, amounting to \$1408.54 paid, in cash and by Bills payable in Jersey. Up to this date very little had been done with the codfishery. As early as may May, fish had come in to the Coast in this neighbourhood in abundance; but shortly after the arrival of the Jersey fishing vessels it struck off and became scarce. At Forteau and Lance-a-Loup I heard the same reports, and every one engaged in the codfishery had reason to regret that they had not sooner arrived on the Coast. To the Westward, at Bonne Esperance, within Canadian jurisdiction, where, last year, fish was so plentiful, nothing now was doing, and the inhabitants had not a fish to eat.

 Reports.

23rd June.—Cutter *Volant* left Blanc Sablon for the eastern Coast.

25th June.—The Schooner *Triumph*, of Halifax, supplied by Mr. Pitts, arrived from Anchor Point, a port on the Newfoundland side of the Straits, and having entered and paid duties, by draft on the owners in Halifax, traded here for a few days and proceeded down the coast.

27th June.—Anticipating the arrival of a vessel at Pinware Bay from Quebec, to take a cargo of herring that had remained there all the winter, I left Blanc Sablon this day, calling at Forteau, Lance-au-Loup and West St. Modeste; at each of these places no vessels had arrived but those from Newfoundland. On reaching Pinware I learned that the vessel expected had arrived and was at East St. Modeste. I accordingly walked to that place. The supercargo produced the necessary papers, entered his vessel, and paid the duties.

28th June.—Still at East St. Modeste, saw a vessel passing east, supposed to be going to Red Bay. I took passage for that place, and got there at midnight. After daylight, went on board the vessel that had arrived the previous evening, which proved to be the *Emblem*, Green, master, from Halifax. The captain informed me that he called at Blanc Sablon to enter (which I afterwards found to be correct) before proceeding down the coast, and was told that in all probability I was in the neighbourhood of Red Bay. I at once entered this vessel; half the amount of duties was paid in cash; the captain gave me his note of hand for the balance, which has since been paid. In the several harbors from Lance au-Loup the cod fishery was very bad, and the prospect of a successful catch very discouraging.

3rd July.—Left Red Bay at 4 a.m., and got to West St. Modeste in the afternoon. Found there a vessel from the Canadian shore. The Captain entered and paid duties.

4th July.—Left West St. Modeste; called at Lance-au-Loup, and Forteau, and got back to Blanc Sablon on

7th July.—Found ten Nova Scotia fishing vessels anchored in Blanc Sablon Bay, lately arrived from Bonne Esperance, on the Canadian side. To my inquiries about the fishery to the Westward, I was informed that it was almost a total failure, but more plentiful than at this place. Some of the vessels had their boats out, others did not prepare for fishing at all; and when the wind came from the eastward, they left for the Canadian Shore.

Reports.

9th July.—No fish taken by the hook and line men. One of Messrs. DeQuetteville's seines hauled, this day, 75 quintals.

11th July.—Nova Scotia fishing vessels going down the Straits. Commodore Fortier, Canadian Commissioner, arrived; reports the fishery as far west as Gaspé a total failure.

17th July.—Schooner *Nancy* from Halifax arrived, and entered before proceeding down the coast.

19th July.—No fish with the hook and line, and but little with the seines.

20th July.—Left Blanc Sablon, and went to Forteau.

23rd July.—Went to Lance-au-Loup. Found here several Newfoundland fishing vessels. Very little fish to be caught. Ten Nova Scotia fishing vessels arrived from the eastward, and reported no fish all along the coast.

25th July.—Got to Red Bay. No traders had arrived during my absence; Codfish still very scarce. Nova Scotia fishing vessels coming from the eastward and bound home—some with 60 to 80 quintals each.

27th July.—Left Red Bay in a Bonavista fishing boat, and got to West St. Modeste. 40 Bonavista and Trinity boats fishing in this place; but little doing. Proceeded on to Forteau, and got to Blanc Sablon on the

28th July.—Found that no strange vessel had arrived at this place during my absence down the coast.

1st August.—Heard to day that Messrs. De Quetteville's seine boat at Forteau had made the first haul of herring.

3rd August.—A boat arrived to day from Salmon Bay. One of the men informed me that 80 sail of Nova Scotia fishing vessels had sailed for home, from Bonne Esperance with from 50 to 150 quintals each.

4th August.—Good fishing this day on the banks to the westward of Blanc Sablon.

8th August.—Very good fishing this day at Blanc Sablon and at Forteau. A boat arrived from the Newfoundland side of the Straits. From the men I learned that the fishery on that coast was very poor, but that the French with their bultows were doing well. I also received infor-

Reports.

mation that a Halifax trading vessel had sailed from that shore, bound to Red Bay.

9th August.—Left Blanc Sablon with the intention of going as far as Red Bay.

10th August.—Left Forteau and arrived at Pinware Bay that night. At this place were two American fishing vessels. The Captains entered and paid duties on salt and herring barrels.

11th August.—Proceeded on to Red Bay. On my arrival found that no vessel had come to this place since my last visit; but glad to find that the fishery was improving, and the people looking forward to obtaining even yet a good catch. Herring had also struck in on the coast, but of very small size.

12th August.—Still at Red Bay.

13th August.—The vessel I was expecting arrived to day, and proved to be the *Maria*, Rood, master, from Halifax, trading for herring. The captain entered his vessel, and gave me a draft on Messrs. McLeod & Co., of Halifax, for a mount of duties.

15th August.—Still at Red Bay. Fishery improving—Hook and line men doing well—the fish taken being of large size and of good quality.

16th August.—Left Red Bay; got as far as East St. Modeste same day. Fishery improving in this neighborhood also.

17th August.—Proceeded on as far as Lauce-au-Loup. Detained in this place two days, owing to the bad weather.

20th August.—Got on to Blanc Sablon.

21st August.—The brig *C. T. Sutton*, to Messrs. LeBoutellier, Brothers, arrived from New Carlisle.

22nd August.—Schooner *Marie Lousie*, from Quebec, with a cargo of provisions for the several Jersey establishments, arrived.

24th August.—Three vessels arrived from Quebec, laden with provisions, &c., bound to West St. Modeste and Red Bay, to trade for herring.

 Reports.

25th August.—Schooners *Adelaide* and *Sea Bird* arrived from Quebec, also engaged in the herring trade.

26th August.—Schooner *Independence*, arrived from Quebec, bound to West St. Modeste, also engaged in the herring trade.

30th August.—Schooner *Emeline* arrived from Quebec in ballast.

1st. September.—Schooner *Agility*, of Halifax, arrived from Newfoundland side of the straits, entered and paid duties.

4th September.—Strong West North West wind to-day. A Canadian trader passed on to the eastward, without calling into Blanc Sablon to enter.

5th September.—Steamer *Diamond* arrived from the eastern coast, and sailed in two hours for Twillingate. Schooner *G. J. Z.* also arrived. On boarding this vessel the Captain produced his clearance. Collector Winter had entered this vessel at Cartwright.

6th September.—Left Blanc Sablon with the intention of going on to Red Bay, if necessary. Remained at Forteau for the night. Herring in abundance, but very small.

7th September.—Went on to Lance-a-Loup.

8th September.—Proceeded on to Lance Diable and West St. Modeste. Herring in abundance in these places also. The inhabitants and Bonavista and Trinity Bay fishermen busily engaged with the seine.

10th September.—Walked to Pinware Bay—found at anchor in this place, trading for herring, schooner *Canopus* from Quebec. This vessel had passed, but did not call at Blanc Sablon on the 4th instant. Captain entered his vessel and paid the duties.

11th September.—Proceeded on to East St. Modeste—in the evening we had heavy wind and rain abundance,—a vessel arrived at Pinware. The next morning I got a passage back, and boarded the *Emblem*, Green master, which vessel I had entered in Red Bay on 30th June. Took passage for Red Bay same afternoon.

13th September.—Two traders at Red Bay, the *Laurel* and *Delina*—the former at once entered, the latter had entered at Blanc Sablon, on 24th August.

Reports.

14th September.—Still at Red Bay—schooner *Maria Dina*, Quebec trader, arrived from Newfoundland shore—this vessel was entered at Blanc Sablon on 24th August.

17th September.—Took passage in a fishing boat going to Carroll's Cove. The wind unfavorable and heavy sea, we were obliged to return to Red Bay. Same afternoon a Quebec vessel, *La Chance*, master, with a full cargo of Herring from St. Francis Harbor, came into anchorage. On boarding her I found that the inward cargo from Quebec had been reported to Collector Winter.

18th September.—Left Red Bay, and got as far as East St. Modeste.

19th September.—Proceeded on to West St. Modeste—found here the schooner *Otonabee*, Quebec trader. The Captain entered and paid duties.

20th September.—Proceeded on to Forteau.

21st September.—At Forteau. Here I found schooner *G. D. F.* from Gaspe, to Messrs. Le Boutellier, Bros. with cargo for this place and Blanc Sablon. This vessel's papers had been left at Isle-au-Bois on her arrival. In the afternoon I left Forteau to walk to Blanc Sablon, a distance of 13 miles. The next day I received the necessary papers, and walked back to Forteau, entered the vessel, and received for amount of duties a draft payable in St. John's.

23rd September.—Sunday. Remained at Forteau.

24th September.—As some Jersey vessels had already sailed, and others preparing to leave the Coast, and no vessel expected, I left Forteau this day for Red Bay, calling at Lance-au-Loup, West St. Modeste, and East St. Modeste.

25th September.—Proceeded on to Red Bay. Found here the Revenue Cutter *Volant*.

29th September.—Took passage in the *Volant* for St. John's. Anchored at Henley in the afternoon.

30th September.—Sailed from Henley, and anchored at St. John's on the morning of 5th October.

Reports.

| Cod and Seal Oil, tuns..... | 92 |

The Codfishery in the Straits of Belle Isle has been a very poor one this season. At Isle-au-Bois, Forteau and Red Bay, there was tolerably good fishing towards the close of the voyage, and more particularly at the latter place. At Lance-au-Loup, Lance Diable, East and West St. Modeste, the catch was very small. The Salmon fishery a total failure; also the Seal fishery in the spring. The herring fishery only middling, although herring came to the coast in abundance in some places; two-thirds, however, were so small as to be not worth saving; in consequence, therefore, of the failure of these fisheries many families on that coast are in poverty, and must be sustained by those of their neighbours who may be in better circumstances.

The establishing of schools on the coast of Labrador is now occupying the attention of the inhabitants. At present there is no school in the Straits within our jurisdiction. Last year Mrs. Odell at Pinware instructed 30 children; and to my own knowledge they made very great proficiency both in reading and writing. The school was closed last summer, the small sum the teacher received having been discontinued. At Red Bay also is a large population, and the inhabitants are very desirous that the Government would assist them in having their children educated.

I have the honor to be, Sir,

Your most obedient Servant,

M. T. KNIGHT,

Sub Collector, Straits Belle Isle.

Honorable JOHN KENT,
Receiver General,
&c., &c., &c.

Reports.

**REPORT OF MR. REDDIN RELATIVE TO PROCEEDINGS ON
WESTERN SHORE.**

SIR,—

I have the honor to report that, in accordance with your instructions, I sailed on the 30th May last, in the Schooner *Caroline*, which vessel had been hired by the Government, and placed under my direction to cruise on the Western Shore for the protection of the Revenue.

In consequence of the loss of the *Caroline* at St. Pierre, on the 22nd September, together with my papers and effects of every kind, I am unable to refer to dates and some statistics which I had prepared; I can therefore only endeavour to furnish from memory, a summary of my proceedings, and some of the events which came under my notice during the past summer.

GREAT PLACENTIA.

This was the first harbor I visited, and here I found very little business of any description, being done. This is a very fine harbor, but rather difficult of access, the place generally has the appearance of being abandoned by merchants and dealers of all kinds. The people of this harbor sometimes assist themselves a little by carrying firewood to St. Pierre, in return for which they bring back provisions; but there is so little done in this way that it cannot be said to be of much benefit, besides it is only the owners of large boats who can avail of this traffic.

ODERIN.

Previous to my arrival there had not been an Officer of Customs at this harbor for some time, and having been informed that there were considerable quantities of goods in store, which had been imported from St. Pierre, I concluded to search the premises of the different parties doing business here; accordingly, on the day of my arrival, I examined all the business premises in this harbor; but I found nothing which I could say had been illegally imported.

Hearing that a boat was expected from St. Pierre, I decided on waiting for her to arrive. After remaining two days this craft came into the harbor; I have already made a report of the movements of this craft and my proceedings relative thereto.

{ This harbor is seldom visited by traders; there are four or five resi-

Reports.

dent dealers, who supply the people engaged in the fishery ; but these dealers are often defrauded by the fishermen, who sell their fish to traders frequenting the numerous small harbors in the neighbourhood of Oderin.

BURIN.

At this harbor I did not find anything worthy of note. Traders very rarely visit Burin, as the resident Merchants are quite able to meet the requirements of the people.

Before leaving Oderin I had been informed that several traders were at Fox Cove, a small harbor near Burin. As this was not a safe harbor for the *Caroline*, I decided on proceeding to Fox Cove by land ; and with this intention I called on the sub-collector, who readily consented to accompany me. The distance by land is about seven miles, and the road is good. On arriving at Fox Cove we found six traders, all of whom we searched and found that their cargoes had come from Saint John's, either directly or at second hand.

Owing to the formation of Burin harbor, and the numerous coves and harbors adjacent, it is very difficult for the Officer of Customs to perform his duty efficiently without the assistance of a boat and crew—at the same time it is very questionable if the increase of revenue would be equivalent to the expense of keeping a boat employed permanently.

SAINT LAWRENCE.

When I visited this harbor I found several traders, all of whom had paid duties on their cargoes and had been examined by the Preventive Officer before I arrived.

This is a very fine harbor for vessels of light draft of water, and the people most successful every year in catching fish—they are seldom below an average voyage. Judging from this it would be reasonable to suppose that the people of St. Lawrence are prosperous and independent ; but on the contrary they are, with few exceptions, very poor, owing chiefly, as I believe, to their disposing of their fish to traders, as they take it out of the water, instead of splitting and making their own fish.

The price of round fish, when I was at Saint Lawrence, was seven shillings per hundred weight, and in return the people were obliged to take goods at exorbitant prices, and the worst feature in this trading system is that those traders do not carry the goods which are really ne-

Reports.

cessary to the people, but those articles upon which they can make the most profit. This leads to extravagance and improvidence, for people take many things which they do not require, because they can be easily obtained, and the consequence is, that after catching a large quantity of fish during the summer, many families are reduced to poverty before the next fishing season.

I was surprised to find so fine a harbour without a resident supplying merchant, and the condition of the people at St. Lawrence cannot improve until they are supplied with the means of curing their own fish. The traders who frequent this harbour will not supply such, as it is their interest to oblige the people to sell their fish as they catch it.

To give an idea of the prices which are obtained by traders, in exchange for fish, I would mention that Ram, which is bought at St. Pierre for two francs, is sold along the Western Shore at eight shillings per gallon. I had a list of prices prepared, but unfortunately I have lost this along with everything else.

Saint Lawrence contains about seventy families, who depend entirely on the fishery for a livelihood, although the land is as favorable in this locality, for agricultural purposes, as any I have seen in Newfoundland.

The want of a resident Magistrate was much complained of.

LAWN.

While the *Caroline* was detained at St. Lawrence by calm weather and fog, I proceeded by land to Lawn, a distance of about ten miles.

Although at times there are a great many traders at this harbor, I did not meet any when I visited it.

This is not considered a safe harbor for vessels, as they are exposed to nearly every wind, but small craft can find good shelter here.

The fishing grounds in the vicinity of Lawn are very productive, and the people of St. Lawrence come here to fish, when fish is scarce on their own ground.

I found great difficulty in walking to Lawn, as there is no road and the land is swampy.

Reports.

LAMALINE.

At this harbor I did not find any traders. The Sub-Collector informed me that very little business had been done here this summer. This harbor is difficult of access, and consequently not much frequented by traders.

There is a good deal of illicit trade carried on with St. Pierre by means of fishing boats belonging to Lamaline and other harbors. These boats go to St. Pierre from the fishing ground and return with supplies for their families. This species of smuggling is very difficult to prevent, as these boats all appear to come from the fishing grounds, and it is impossible for the Officer of Customs to board every fishing boat. Certainly, a great deal might be done if the Officer were provided with a boat and crew.

The Sub-Collector at Lamaline stated that he required a writ of Assistance as he often received information of smuggled goods being concealed.

SAINT PIERRE.

I visited this harbour, for the first time, early in July, where I remained two days. At that time I did not observe much business doing with the Newfoundland people. Again, about the middle of July, I was obliged to put into this harbour in order to repair some damage which the *Caroline* had sustained by striking a rock when coming out of Lamaline, which caused her to make a great deal of water. We were three weeks repairing the vessel, during which time I had leisure to observe the system of trade carried on between St. Pierre and the Western Shore of Newfoundland.

The articles chiefly taken by the Newfoundland people are bread, pork, flour, butter, molasses, sugar and tobacco; and in some instances they take large quantities of rum. A great many of these articles are purchased with the money which our people receive for bait; but a very large portion is on account of fish which is delivered to agents on the Newfoundland shore, and by them forwarded to St. John's, where it is sold for cash, and the proceeds remitted to St. Pierre. Thus the supplying trade of a great portion of the western shore is diverted from St. John's to St. Pierre, and the merchants at St. John's are obliged to pay cash for this fish which should come to them in return for supplies; and all the profits on the supplies for this immense quantity of fish, as well as a great loss to the revenue, go to enrich the supplier at St. Pierre.

Reports.

GRAND BANK AND FORTUNE.

When the repairs of the *Caroline* were completed I proceeded to Grand Bank, where I arrived on the same day that I left St. Pierre.

As there was not a sufficient depth of water, on the bars at the entrances of the harbour of Grand Bank or Fortune, to bring the *Caroline* into either of these harbours, I landed at Grand Bank, and after consulting with the Preventive Officer I proceeded to Fortune by land.

I was surprised to find that Fortune harbor contained so many inhabitants. It has quite the appearance of a thickly peopled town; and as nearly all the supplies for this harbor, as well as for Grand Bank, are imported from St. Pierre, there ought to be a considerable revenue derived from these harbors.

The people at Grand Bank and Fortune do not seem to pay very great attention to the prosecution of the fishery; having smart schooners, they rather depend on carrying bait to the French and freighting coastwise, and, on account of the high price obtained for bait during a part of the past summer, I have known the owner of a small schooner to make more money in a fortnight than the same crew could expect from a prosperous summer's fishery.

HARBOR BRETON.

As the anchorage at Grand Bank was not very safe we went to Harbor Breton to await a favorable wind to return to Lamaline. At the harbour I did not see anything to attract my attention, and after remaining two days we sailed for Lamaline.

From Lamaline I returned to St. Lawrence, Burin and Oderin, and from Oderin I intended to visit Red Island and some harbors in that vicinity; but after remaining at Oderin for ten days, during which time we experienced very heavy gales of wind, I was obliged to abandon the idea of visiting any harbors to the Eastward of Oderin, as it was then the 19th September, and I was anxious to be at St. Pierre during the time when the Newfoundland people were settling their accounts and taking their supplies for the winter.

On Thursday, the 20th September, I sailed from Oderin and called at Burin, where I only remained one hour, and then proceeded on to St. Pierre.

We arrived at St. Pierre on Friday the 21st September, and came to

Reports.

anchor in the Roadstead at 1 p. m. We anchored in the roadstead as Capt. Cook did not consider it prudent to go inside the harbor amongst so many vessels as were there at anchor. Particularly as we only intended to remain, at the latest, until Monday the 24th of September, when it was my intention to sail for St. John's direct.

Immediately after we had anchored I went on shore, telling the Capt. to send the boat for me at six o'clock in the evening; but that, if the weather should be rough and unfavorable for our leaving for St. John's, I would not in that case return on board until the following evening. According to this arrangement, as the weather was disagreeable, and heavy rain coming on. I remained on shore for the night. On Saturday morning, the weather being very fine, I walked to the place where the *Caroline* was at anchor, and saw that she was all right. I then returned to St. Pierre and spent the day observing the amount of goods which were being taken by the Newfoundland people.

The day was very fine with a fresh breeze, and during the day I went twice to the Roadstead for the purpose of going on board the *Caroline*, but I could not succeed in getting the boat to come for me; and, not having any particular business on board the *Caroline*, I returned to St. Pierre for the night. There was no appearance of a gale until about 7 p.m.

At 9 p.m. the crew of the *Caroline* came to me with the melancholy tidings that the *Caroline* had been sunk by a large French brig which drifted down on her, and that Captain Cook had perished.

The men being nearly exhausted by their exertions in saving themselves, and their clothes, being drenched in the surf, I was obliged to provide some clothing for them. Most of the business places were closed for the night, and I applied to Monsieur Crassin, who kindly supplied the men with some clothing, altho' at the time I was unknown to him; and I would here express my gratitude to this gentleman for his kindness to myself and the crew of the *Caroline*.

On this occasion I spent two days at St. Pierre before the loss of the *Caroline*, and four days after that sad event; and, this being the season when the Newfoundland people take their supplies for the winter, I had a good opportunity of observing the extent of the trade carried on between St. Pierre and the harbors on the Western Shore of Newfoundland.

I was prepared to find a considerable amount of business doing at this

Reports.

season. but I had no idea of the extent of it. There were craft from every harbor from Great Placentia to Channel, and each seemed to take a full cargo; the greater part, if not the whole, of which would be landed in Newfoundland free of duty.

I think there was as much business transacted with our people. and as much supplies issued, as could be done by the largest Mercantile house at St. John's, and this too besides all the supplies that were taken to the Newfoundland shore during the summer months.

Knowing that this large amount of business is injurious to the interests of Newfoundland in many ways, I would most respectfully submit that too much cannot be done to prevent this illicit traffic, and to turn this extensive trade into its legitimate channel.

The system of supplying bait offers many inducements to smuggling, as the high price obtained for bait supplies the Newfoundland people with money for which they have no immediate use, as most of the bait carriers are in comfortable circumstances, and they can find many things in St. Pierre which yield them large profits so long as they can land them in Newfoundland free of duty. Besides this traffic in which they are immediately concerned themselves, the masters of these schooners employed in carrying bait, often engage to smuggle goods for parties having correspondence with St. Pierre.

I have only heard of three French traders being on the coast this summer, and they all paid duties on their cargoes.

From all I have been able to learn, the French traders do more injury to the people with whom they deal than any other traders who come among them, because they always buy dried fish, and rarely carry away really useful articles to give in exchange; their cargo always contains a large quantity of spirits, and this fish which they induce the people to sell to them, is, in many cases, paid for by merchants and other traders, who supply the people while engaged in catching it. Thus these French traders induce intemperance and dishonesty.

The majority of the inhabitants at the several places which I visited, seemed much pleased that the Government had sent a cruiser to prevent illicit traffic. At Saint Lawrence, in particular, I was told that our being on the coast had a most beneficial effect, inasmuch as it prevented traders from bringing large quantities of spirits, and consequently this harbor was unusually quiet and peaceable.

There is a great deal of smuggling carried on by both our own and

Reports.

French traders, which might be prevented by a steam cruiser, but as they frequent small harbors, which lie between harbors where Officers of Customs are appointed, and these harbors being, in many instances, dangerous to approach, a sailing vessel cannot reach them; besides, these traders know, by the prevailing wind, when they may expect a sailing cruiser to come upon them, and therefore they carry on their business without any fear of being interfered with by a sailing cruiser. This, along with the intense fog and calm weather, render it impossible to carry out the protection of the Revenue effectively with a sailing vessel; another reason for employing a steamer would be that these harbors could be visited more frequently, and a greater extent of coast could be protected; and I have reason to believe that smuggling is carried on to a considerable extent further to the westward than I could extend my observation.

There are a great many small harbors in the different bays, in each of which there are a few residents who catch a considerable quantity of fish; and as there are not any Officers of Customs stationed at these places, they are quite open to smuggling, and I believe they are extensively used for this purpose. Still I do not think there would be sufficient revenue collected at these places to defray the expense of keeping an Officer at each place, and they could be well protected by a steam cruiser.

I would respectfully suggest, as a means of protecting the Revenue, that an Act be passed by the Legislature compelling all boats and crafts of every description, whether employed in the fishery or not, to enter at a Custom House whenever they arrive from St. Pierre, with cargo or in ballast. By this means those boats which go to St. Pierre from the fishing ground would be obliged to inform the Officer of Customs of their proceedings. The same Act might also oblige all trading vessels or boats to have on board a manifest of their cargo signed by some Officer of Customs. The plea at present is that not being registered, they are not obliged to clear at the Customs when they carry goods coastwise, and the most of the trading is done by persons either owning or hiring unregistered craft. The French traders also hire these boats from our people for the purpose of trading, and it is sometimes very difficult to decide where they have acted illegally; but if all trading crafts were obliged, under any circumstances, to carry a manifest of their cargo, duly signed, an Officer's duty would be much more clear.

At present there is no local Act regulating the registry of ships, and, by the Merchant Shipping Act, vessels under a certain size, and not *wholly* decked, are not required to be registered, and in order to evade

Reports.

this Act many persons have large craft in which they have a small portion without deck; but these are as regularly sea going as any other vessels, and I would respectfully suggest the necessity of either obliging all boats, over a *certain length*, to be registered, or of subjecting all boats and craft to the same regulations as if registered.

I am quite convinced that a steam cruiser on the Western Shore will always afford a protection to the Revenue, quite equal to the expense incurred, and I have been assured by the Officers of Customs, at the ports which I visited, that a cruiser being on the coast was a very great support to them in the discharge of their duty.

The fishery, as far as I could obtain information, will not be far below an average, from Burin along the Western Shore; but from Burin to the Eastward it is very bad. In some parts of Placentia Bay the catch will not exceed ten quintals per man. At Oderin the catch up to the 10th September would give about twenty-five quintals per man.

There was very little fish taken at any of the places which I visited, in the caplin season, and after the 1st September there seemed to be more fish on the grounds, but bait was scarce. Those persons who succeeded in obtaining bait were reported as doing well when I left Oderin on the 20th September.

Should the Government decide on sending a cruiser to the westward next season, I would most respectfully suggest that the cruise should begin on the 1st May, instead of the 1st June; as when I arrived at some harbors last season where I expected to find some smuggled goods, I found that most of the stock had been issued to dealers, and consequently, even if goods had been illegally imported, they were off the importer's premises before I arrived; and I have reason to believe that some goods escaped in this manner.

I have the honor to be, Sir,

Your most obedient Servant,

WILLIAM REDDIN.

The Honorable
The RECEIVER GENERAL.

Reports.

RETURN OF LICENSES ISSUED TO VESSELS OF THE UNITED STATES TO ENJOY THE SAME RIGHTS OF FISHERY AS UNDER THE RECIPROCITY TREATY—EXPENSE OF CRUIZER ON SOUTHERN COAST, AND REVENUE COLLECTED.

CUSTOM HOUSE,
St. John's, 21st Feb., 1867. }

Reports.

LETTER FROM A MURRAY, Esq., TO HIS EXCELLENCY THE GOVERNOR, STATING THAT HIS PRELIMINARY REPORT AND PLANS ARE NOT YET COMPLETED, OWING TO HIS ACCIDENT, AND GIVING A BRIEF SUMMARY OF HIS PROCEEDINGS DURING THE PAST SEASON.

(COPY.)

ST. JOHN'S NEWFOUNDLAND. }
January 28th, 1867. }

MAY IT PLEASE YOUR EXCELLENCY,—

In consequence of a serious injury I had the misfortune to meet with, while prosecuting my labors on the west coast of this Island, last summer, I have been incapable since my return here of completing the material requisite to illustrate the results of my recent investigations, upon which to frame a preliminary report to be laid before the Legislature. The work, however, is now in progress, and with the assistance of Mr. J. T. Neville, who is working up the plans from my field drawings, I hope to be prepared to furnish you with the required documents in the course of next month.

In the early part of the season I took the opportunity, while detained at St. John's, to measure a section of the rocks near Topsail, and on Kelly's Island in Conception Bay, which section, together with certain facts since ascertained, is likely to reveal some very important information as to the geological structure of the country. I was afterwards chiefly occupied in continuing the examination of the carboniferous formation on the western side of the Island, commenced last year; and in connexion with the examination I found it necessary to make topographical survey of the rivers Great Codroy and Humber, as well as a portion of the Country between Flat Bay in the Bay St. George and the mountains to the Southward; and a good section of the carboniferous measures was obtained along the Coast between Cape Anguille and Cape Ray.

A partial examination was also made of the Coast between Cape St. George and the Humber River; and various parts were visited on the Southern Coast of the Island, during the latter part of the season, for the purpose of acquiring as much information as possible on the subject of the general distribution of the geological formations, together with the mode of occurrence of certain metaliferous ores.

Plans of the country surveyed will be submitted to your Excellency on

Reports.

a scale of one statute mile to one inch, together with a general plan on a scale of four miles to one inch, brought to connect with my survey of 1865, which will serve to explain the text of the narrative intended to accompany them.

I trust it will be admitted, when the documents alluded to are laid before your Excellency and Council, that the work done, so far as it goes, gives considerable useful information, which in course of time may turn to the advantage of the Colony ; although I am too well aware that it might have been much more perfect, had it not been for the untoward accident that has rendered me a cripple to the present day.

I endeavoured whilst prosecuting my explorations to collect some specimens of the rocks and minerals of the country, in aid of the local Commissioners for the Great Exhibition, shortly to be held in Paris ; but this collection is also quite unequal to what it might have been, had my physical condition permitted more active exertion ; yet it is still my ambition, should I receive permission from the Government, to visit Europe for a part of the coming summer, to do my best to draw public attention to the mineral and agricultural resources of this country, which I have little hesitation in saying, are, in the meantime, only very imperfectly understood.

I have, &c.,

(Signed.)

ALEXANDER MURRAY.

His Excellency

The Governor, &c., &c., &c.
of Newfoundland.

Reports.

GEOLOGICAL SURVEY OFFICE,
Montreal, 1st May, 1866. }

SIR,—

Mr. MURRAY has submitted to me the results of his Geological Explorations in Newfoundland during the last two seasons ; and it gives me much satisfaction to observe the progress he has already made in developing the general structure of the eastern part of the island. Before he commenced his labors, Mr. Richardson, under my instruction, had already visited the western coast, with the view of ascertaining facts to elucidate points connected with the Geology of Canada. It was then ascertained that a trough of Lower Silurian rocks must underlie the northern part of the Gulf of St. Lawrence, gradually narrowing towards the Strait of Belle Isle, one side of the trough rising on the coast of Labrador while the other forms the western shore of Newfoundland, from Bonne Bay to Cape Norman. On each side of the Strait these rocks were found to rest on Laurentian gneiss, and the mass of this ancient system, which presents itself in this part of Newfoundland, was ascertained to extend from the neighborhood of Bonne Bay to within twelve or fifteen miles of Hare Bay ; but its breadth was not determined. Mr. Murray's investigations have since proved that this mass of Laurentian rocks spreads in breadth to the Atlantic coast of the great northern peninsula of the island ; that the base of the Lower Silurian strata, sweeping round the northern extremity of the gneiss, comes upon the coast near Canada Bay, and again strikes into the land at Cony Arm in White Bay, where the Lower are overlaid by Upper Silurian deposits, followed by others of Devonian age. Farther to the south-east, the Laurentian and Silurian series become partially and unconformably covered up by rocks of the carboniferous age, in two or three separate areas, which have heretofore been mentioned by Mr. Jukes. One of them is upon Grand Pond, and another at St. George's Bay. In his traverse last year from Hall's Bay to St. George's Bay, Mr. Murray traced the western margin of the more northern of these for about thirty miles, and observed the more southern at several points on the north and south-east shores of the bay which has last been mentioned.

Having thus ascertained the general position of these carboniferous areas, it is important to determine, with as little delay as possible, what workable seams of coal may be associated with them, and Mr. Murray proposes to devote the chief part of his investigation, during the ensuing season, to this end, as well as to trace as far as he can the outcrop course of any seams he may discover. The nearest coal deposits to those of Newfoundland are the beds worked at Sydney on the Island of Cape Breton, and it is not unreasonable to suppose it probable that there will be a general analogy in the character of the measures on the oppo-

Reports.

site sides of the water dividing them. At Sydney between the base of the coal measures and the workable seams there is a thickness of barren strata of between 3000 and 4000 feet, and if the same condition exist in Newfoundland, it will depend upon the attitude of the strata whether we may expect the occurrence of coal beds there, to become available to commerce. Mr. Murray observed a regular coal seam of six inches in thickness; but this would not be workable. Mr. Jukes has reported one of three feet; but at Sydney there are four workable seams, measuring altogether upwards of nineteen feet in a thickness of 2000 feet, that at the bottom being three feet; and no time should be lost in determining such facts as will make it known whether these seams exist, or may reasonably be searched for by capitalists in the carboniferous areas of Newfoundland.

Mr. Murray's explorations on the east side of the northern peninsula, and Mr. Richardson's on the west, have shewn that the Lower Silurian series, in its distribution in the northern part of Newfoundland, is characterised by a great spread of that portion of it, which in Canadian Geology has been termed the Quebec group. This group may conveniently be separated into three divisions, the middle one of which has proved rich in metalliferous deposits in its course from the Southern Atlantic States of the American Union to Canada, and through Eastern Canada to Gaspé. The indications observed by Mr. Murray are sufficient to authorise the expectation that the formation will prove productive in Newfoundland also; and the Tilt Cove and Terra Nova mines, which are both in serpentine, belonging to the middle division, are evidences that a detailed investigation of the distribution of the Quebec group is only second in importance, in an economic point of view, to that of the carboniferous series. The occurrence of serpentine in the more southern part of Newfoundland has been pointed out in various isolated places by Mr. Jukes, and it appears to me probable that the rock will in most, if not all, of these be found to be related to the Quebec group. The scattered facts already known thus prepare us to expect a great development of the metalliferous division of the group in the Southern as well as in the Northern portion of the island, convincing me that a thorough knowledge of a great portion of the mineral wealth of the province will be vastly promoted by a careful and connected exploration of the Lower Silurian series.

I have now the honor to transmit to you the accompanying report of his first exploration, addressed to me by Mr. Murray while I was in England last year. The study of it required a reference to a collection of specimens which had been forwarded to the Office of the Canadian Survey for examination, and the death of my brother, Mr. James Logan,

Reports.

soon after my return to Canada, forced me to postpone the consideration of it longer than I wished.

I have the honor to be, Sir,

Your most obedient servant,

W. E. LOGAN.

To the Hon. F. B. T. CARTER,

Attorney General,

St. John's, Newfoundland.

Reports.

REPORT OF ALEXANDER MURRAY, Esq., ADDRESSED TO
SIR W. E. LOGAN, L. L. D., F. R. S., DIRECTOR OF THE GEO-
LOGICAL SURVEY OF CANADA.

LONDON, 11th April, 1865.

SIR,—

In accordance with an arrangement made by yourself with the Government of Newfoundland, by which I was selected to make a geological investigation of that province, I left Montreal, accompanied by Mr. H. H. Beckett, as assistant, on the 18th of May last, and reached St. John's, Newfoundland, on the 31st of the same month, when I immediately placed myself in communication with the Honorable H. W. Hoyles, Attorney General, to receive final instructions.

It being your desire that the great northern peninsula of the Island should be examined, as a commencement of the investigation, where most of the sea coast is well exposed, the Provincial Government were pleased, on my recommendation, to charter a schooner of twenty-seven tons burden, called the *A. M. W.*, of Harbor Grace, with a crew consisting of a pilot, commanding, and four seamen, for the service. It was not, however, until the 22nd of June that the vessel was refitted and ready for sea; and during the interval, I employed my time in partially examining that portion of the peninsula of Avalon, lying between St. John's and Topsail Head, in Conception Bay.

We finally left St. John's upon the 23rd of June, and reached Twillingate, a port of some importance, near the entrance of the Bay of Exploits, on the 27th of the same month, having been much detained on the voyage by fog and stormy weather. On the 30th of June, we reached Little Bay, where the examination was begun in earnest at Terra Nova Mine, and where advantage was taken of the opportunity to explore the coast and portions of the interior, between that Bay and Ming's Bight. After leaving Little Bay, we proceeded to examine the northern peninsula, making excursions into the interior on every convenient occasion, and by the time this part of the work was accomplished, the season had advanced to the 3rd of October, after which we repaired to Twillingate to refit the vessel. Finally, a rather hurried excursion was made to Hall's Bay; and the Indian Brook, a large stream which falls into that Bay, was ascended for a considerable distance; after which we sailed for St. John's, and reached that port on the 3rd of November.

Reports.

SEQUENCE AND DISTRIBUTION OF THE ROCKS OF THE GREAT NORTHERN PENINSULA.

The rock masses observed in the Great Northern Peninsula are recognised as belonging to the following geological formations, which are given in ascending order :

- I. Laurentian Series.
- | | | |
|-----------------------------|---|------------------|
| II. Lower Silurian Series. | } | 1. Potsdam Group |
| III. Upper Silurian Series. | | 2. Quebec Group. |
- IV. Devonian Series.

I. LAURENTIAN SERIES.

The rocks classed under this head occupy upwards of fifty miles of the eastern coast of the northern peninsula, extending from Little Cony Arm in White Bay, to within a few miles of Canada Bay. About four miles to the southward of the entrance to this Bay they strike into the land; and, keeping to the westward of the Bay and of the Clouds' Mountains; which are intermediate, they run a northerly course. The most northern exposure of them which was seen occurred between three and four miles west of the Long Arm of Canada Bay, on a brook joining the arm towards the upper end. Here the strike still continues northward, but there is little doubt that the limit of the gneiss beyond this will soon turn gradually westward to join the most northern position where Mr. Richardson observed the hills composed of it, on his visit to the western side of the peninsula in 1862.

In an exposure of the gneiss met with, a little more than two miles up Salt-water Pond Brook, the rock, which is of a reddish colour, is fine grained, and is composed chiefly of flesh-red orthoclase felspar, with white quartz, and brown or black mica. It is interstratified with layers consisting chiefly of fine black mica with grains of white quartz, and by these black bands it was easy to observe that the dip is to the eastward. In the two brooks which have been mentioned there were no great exposures of the gneiss, but the loose blocks observed in the beds of the streams and on their banks on each side, made it evident that what is given above is the general character of the gneiss in this part. Many blocks of greenstone were associated with those of gneiss, and on Salt-water Pond Brook dykes of a similar description were seen intersecting the gneiss.

In Hooping Harbor the general mass of rock is gneiss; but at the mouth of the brook, which flows in at the head of the north-east cove of

Reports.

the harbor, there are heavy bands of what cannot be distinguished from granite, some parts of them redish and others gray, according to the color of the felspar, which is sometimes in large tabular crystals, the quartz being whitish and in fine grains, while the mica is usually black and in small scales. On the east side of the cove these bands of granite alternate very regularly with thick beds of coarse black mica slate, clearly shewing the stratified character of the rock, and giving a dip of S. 88° E. \angle 30°. Farther south, but on the same side of the harbor, there is a great amount of milk-white gneiss, deriving its color from opaque white orthoclase felspar, and white translucent quartz, but having well-defined marks of stratification in darker and lighter parallel gray streaks, deriving their color from the presence of more or less black mica. At the head of the western cove or arm of the harbor, there is a great mass of a somewhat coarse flesh-red granite in which no stratification could be made out, but it was overlaid by finely laminated beds of gneiss, and these upon the north shore of the cove appeared to be nearly horizontal. The cliffs on each side of the western arm, which rise almost perpendicularly to heights of between 650 and 700 feet. are all gneiss with bands of mica-slate, large tabular crystals of flesh-red felspar being often observed in the strata. The dip at the head of the western arm is S. 80° E. \angle 25°, but there are numerous undulations and contortions, which render it difficult to establish an average. In these cliffs, and generally in the harbor, the gneiss is cut by many fine grained greenstone dykes, some of which are of great thickness, one of them on the east side of the harbor measured 130 feet across. These dykes appear generally about parallel with one another, their course being N. 54° E. and S. \angle 54° W. Small veins of pegmatite, consisting of flesh-red orthoclase felspar, with some grains of quartz, are abundant in some places. At the extremity of the cape on the east side of the entrance to Hooping Harbor copper pyrites was observed disseminated in a small mass of quartz, constituting a nest in the white gneiss of that part. No visible vein was connected with the mass, and it is only worthy of remark as shewing that the rock is not destitute of this ore, which may possibly be found in larger quantity in some other place in the neighborhood.

Between Hooping Harbor and Bay Fourchette the rocks seem to be all very much of the same character as those above described; but the strata composing the cliffs within this bay, and the banks on either side of the stream which falls in at its western extremity, appear to be less red in color than those further north, and the contortions which they show are more numerous. The highest point seen from the anchorage on the north side of the bay rose up almost vertically from the water's edge to the height of 904 feet.

The gneiss at Grand Vache is much like that at Bay Fourchette. In

Reports.

some beds it is red, and in others gray. It is in general fine grained, and frequent layers of whitish quartzite and black mica-slate are interstratified in it. The strata are cut by dykes of fine grained greenstone, numerous veins of pinkish calc-spar reticulate through the rocks, intersecting both the strata and the dykes, and cracks and joints in the rocks are frequently lined with a pellicle of specular iron. The prevailing dip of the strata is here about S. 70° E. $<40^{\circ}$ — 50° .

Going southward the limit of the Laurentian gneiss enters upon the land in a small bay about two and a half miles south of the Devil's Cove, on the east side of White Bay, and between this recess and Little Cony Arm, a narrow strip of the succeeding formation separates it from the water. It is about a quarter of a mile from the water, at the head of Little Cony Arm, where the gneiss is red in color and rather coarse in grain. It is interstratified with bands of black mica-slate, and a considerable mass of the latter rock, perhaps 500 feet in thickness, forms the eastern limit of the exposure. In the cliffs a little back from the extremity of the arm, the strata are contorted, but the general dip of the gneiss is here nearly vertical, the strike being about north and south. At the mouth of the small brook, however, in south-west corner of the Arm, there are some beds of dark gray gneiss which dip S. 46° E. $<55^{\circ}$.

From Little Cony Arm the limit of the Laurentian gneiss pursues a somewhat sinuous course southward, and the last exposures of it visited were met with about five miles westward of Gold Cove, near the upper end of White Bay. Here the gneiss is of a dark gray color, and its constituents are grayish orthoclase felspar, and grayish quartz with black hornblende, and dark brown mica usually in very minute scales. The strata are a good deal corrugated; and white quartz veins are numerous, some of them running in the strike of the rock, and others somewhat oblique to it, while the strata are intersected by many dykes of dark gray fine grained greenstone. The general trend of the strata and of the hill ranges is here about south by west.

From this spot to that where Mr. Richardson left the Laurentian gneiss, in tracing its limit south-eastward near Bonne Bay, the distance in a straight line, a little south of west, is about thirty miles. It is extremely probable that the same rock composes the country the whole way; but where the sides of this Laurentian mass, which forms the backbone of the Northern peninsula, will ultimately join in their trend southward, can only be determined, by future exploration.

The rocks which have thus been described are considered Laurentian, not merely from the lithological resemblance which they bear to the strata

Reports.

of that series in various parts of Canada, but also from the relation they are seen to have to the Lower Silurian series, which unconformably covers them up in the northern part of the peninsula. They there present an exact analogy with the conditions of the masses seen on the north side of the Straits of Belle Isle, the gneiss of which is distant from the nearest part of that of Newfoundland not more than forty miles, while it is uninterruptedly connected with the great continental spread of the series in Canada. In Canada the Laurentian gneiss is in some parts interstratified with enormous bands of crystalline limestone, and it is usually in these or in the vicinity of them, that are met with the Laurentian minerals of economic importance, while the valleys that are underlaid by the limestones often give a considerable amount of surface capable of settlement. The economic minerals are the magnetic and specular ores of iron, the ores of lead and of copper, apatite or phosphate of lime, mica, and graphite or plumbago. None of these bands of crystalline limestone have yet been met with among the gneiss of the northern peninsula, but it is only the rim of the 3000 square miles of it that are there spread out, that has thus far been examined; the calcareous bands may yet be found in the interior, should the examination at some future time be carried into greater detail. It will be seen by the description already given that the only traces observed of any of the economic substances mentioned, were thin leaf like veins of specular iron in Grande Vache Bay, and a nest of copper pyrites at Hooping Harbor.

II. LOWER SILURIAN SERIES.

1. *Potsdam Group*.—Immediately east of the Laurentian gneiss in the neighbourhood of Canada Bay, the Clouds' Mountains rise to a greater height than any part of the country for many miles around, and their bold and fantastic outline forms a picturesque and conspicuous feature readily recognisable for a great distance. Three of the highest summits, on all of which the compass was affected by great local attraction, were found by triangulation to be 1173, 944 and 920 feet above the level of the sea. The first of these, called the Capped Mountain, is on the north side of Salt-water Pond Brook, and the other two on the south. The rocks composing these hills consist at the base of a great thickness of dark gray slates, not very well seen, but probably amounting to upwards of 1500 feet. These are followed by dark gray and occasionally drab coloured slates with many interstratified conglomerate beds, not in general exceeding six inches in thickness, holding small quartz pebbles in the same slaty base. This mass may attain a thickness of about 500 feet, and it is surmounted by about forty feet of a dark purplish-gray diorite, apparently of an amygdaloidal character, containing nodules and numerous small masses of impure epidote and jaspery peroxyd of iron, and by thin leaf-like veins of the same jaspery ore it is cut in many places.

Reports.

The upper bed of this mass of strata, thus amounting to about 2000 feet, which we may designate as Division A, is seen at the summit of the more northern of the two hills which are south of Salt-water Pond Brook, from which the diorite slopes with the geographical surface at an angle of about fourteen degrees towards Canada Bay. The margin of the Bay, however, from the point north of Weymouth Cove to Hellmouth, a distance of about six miles is composed of overlying rocks, while for six miles farther, to the Gouffre, it consists of those of the Clouds' Mountain range. Between the Gouffre and Canada Harbor, the coast is again composed of the overlying rocks.

In the bed of Salt-water Pond Brook, at the junction of the strata of the Clouds' Mountain range, with the Laurentian gneiss, they are vertical; farther removed from the gneiss, but somewhat to the northwest of the brook, they are highly tilted with an inclination to the north-eastward; but descending the Brook to within less than a mile from its mouth, the beds gradually present a moderate degree of regularity, with a dip N. 26 W. \angle 18°. Between this and the pond, there is an interval of concealment of about three quarters of a mile, which is succeeded by exposures of higher rocks around the pond and at the entrance of the Long Arm. From these the following ascending series of deposits is gathered, the base being at the mouth of the brook, and the summit at the point on the north side of the entrance to the Long arm. These rocks may be designated as Division B.

| | FEET. |
|---|-------|
| 1.—Yellowish and gray argillaceous and somewhat micaceous slates with gray compact limestone, having a conchoidal fracture, interstratified towards the middle in beds of from two to three feet, and white and yellowish sandstone or quartzite in thin beds towards the top..... | 300 |
| 2.—Blue limestone having a conchoidal fracture, in beds of from five to ten inches, with a one foot bed of reddish variegated limestone towards the middle, almost made up of fragments of trilobite; among them <i>Olenellus Vermontanus</i> (Hall), occurs; and weathered surfaces of other calcareous beds, in some parts show the remains of fucoids..... | 400 |
| 3.—Black and gray slates in bands of from fifteen to twenty feet, interstratified with beds of white sandstone of from five to seven inches thick, and of pale gray arenaceous limestone weathering yellowish and probably dolomitic, in beds of from five to ten inches thick. | |

Reports.

| | FEET. |
|---|-------|
| Brought forward..... | 700 |
| Near the base, the exposed surfaces of some of the calcareous beds are covered with small reddish nodules, which probably replace organic remains; these were observed at the entrance of Salt-water Pond..... | 53 |
| 4.—Black or dark-gray slates, many of them hard and silicious, interstratified with beds of quartzite; some of the slates contain many instances of a <i>Lingula</i> , which appears, according to Mr. Billings, to be a new species, but allied to <i>L. Prima</i> | 300 |
| 5.—Blue and gray limestone, in beds of eighteen inches and two feet..... | 100 |
| | 1153 |

The locality in which *Olenellus Vermontanus* was observed was at the entrance to the Long Arm, and the presence of this fossil in deposit 3, with a brachiopod so nearly allied to *Lingula Prima* in 4, leave little doubt that the strata in the above section belong to the Potsdam Group, of which the trilobite is peculiarly characteristic, both on the west side of the gneiss in Newfoundland, and on the north side of the Strait of Belle Isle. Although the strata of the Clouds' Mountain range was nowhere seen in immediate contact with this recognized part of the Potsdam Group, yet as they apparently plunge beneath it, without any observed reason to suppose a want of conformity, they will both, for the present be classed together.

The strata of the above section, in their strike to the south-eastward, come against those of the two hills south of Salt-water Pond Brook, belonging to the Clouds' Mountain range, while the strata of the Capped Mountain run against the Laurentian gneiss. By this it is evident that there is here, on the south-east side of the valley of Salt-water Pond Brook, a great fault throwing the measures up on the eastward side. The course of this fault is N. 53° E. and S. 53° W. The horizontal displacement produced by it appears to be between two and three miles, but the data are not sufficient to enable me to state with exactness the vertical amount. This upthrow carries a portion of the strata of Division B to the point between the Long Arm and Weymouth Cove, and the rocks already alluded to as forming the coast from this point to Hell Mouth and from the Gouffre to Canada Harbor, belong to them. At Beaver Cove, which is intermediate between Weymouth Cove and Hell Mouth, the strata consist of sandstones or quartzites surmounted by dark

Reports.

gray somewhat calcareous slates with a dip S. 20° E. $<22^{\circ}$ - 30° , probably corresponding with the upper part of B 3. The long point on the east side of the Gouffre Cove is composed of limestones, pale gray at the bottom and white at the top, exposed for about 100 paces across the measures, in a cliff of from 100 to 120 feet high. In this the strata dip at various high angles, presenting many corrugations, which render it difficult to determine the exact thickness; but it probably exceeds 200 feet. These limestones are supposed to be equivalent to those of B 5, with an additional thickness, and they are underlaid by a mass of disturbed and corrugated slates, which would occupy the horizon of B 4. Similar rocks appear to form the promontory on the west side of Canada Harbor. The limestones appear to be about the same thickness, and the upper part of them being pure white and fine grained and capable of receiving a high polish, would afford a considerable amount of good material for ornamental marble.

At the Head of Canada Harbor these white limestones are brought abruptly against slates with quartzites and diorites, belonging to a higher formation, by a great down-throw fault running S. 31° W. The position of the fault is marked by the occurrence of several caverns in the limestone, from one of which there issues a beautiful stream of clear cold water. The fault crossing the entrance to Canada Bay, strikes into a small cove on the inside of the point separating Bide Arm from the Atlantic. Its effect upon the strata carries the strike parallel with it, and on the inside of the point they are exposed in a highly disturbed condition, and divided from the slates and diorites of the higher rock by a narrow belt of bog or low springy land, which marks the position of the fault. The fault here appears to run N. 19° E., keeping a little inland from the eastern shore of Bide Arm, and nearly parallel with it towards the northern extremity of the Arm. The exposures of Englee Island, which is immediately west of the point separating Bide Arm from the Atlantic, consist on the west side of the slates of B 4, and on the east of the pale gray and white limestones of B 5. The dip on the island is about S. 76° E. $<25^{\circ}$ - 32° , and the whole of the strata together with the limestones in the channel, up to the fault, have an estimated thickness of 1300 feet; of this about 400 feet would belong to the slates, and about 900 feet to the pale gray and white limestones, which is probably their total volume. As in the case of the limestones of Canada Harbor, of which they are evidently a continuation with additional thickness, some of the beds are very white and compact, and will afford material available as ornamental marble; but the rock has a prevailing pale bluish tinge, and it is frequently streaked and spotted with pale blue and pale rose red, which would probably be found an objection to its use for the higher works of art.

On leaving the North end of Englee Island the strike appears to

Reports.

make sudden sweep to the north-westward, and at the point of the peninsula which divides Bide Arm from the main body of Canada Bay, a series of calcareous strata are exposed, which are considered an addition to the measures already mentioned, and may be designated Division C. In ascending order they are as follows:—

| | FEET. |
|--|-------|
| 1.—Bluish-gray, white-weathering compact limestone, in a few beds of two and three feet, shewing fine lines of lamination on the out-cropping edges; the rock is penetrated by vertical forms resembling <i>Scolithus</i> , and on weathered surfaces there are scattered forms which appear to be obscure remains of fucoids..... | 7 |
| 2.—Pale-gray limestone in two massive beds, penetrated by numerous forms resembling <i>Scolithus</i> . The rock has a conchoidal fracture, and it is probably suited for marble..... | 5 |
| 3.—Pale blue hard limestone, presenting occasional obscure remains of fucoids on weathered surfaces..... | 1 |
| 4.—Pale gray white weathering limestone, in two massive beds, shewing vertical cleavage lines | 8 |
| 5.—Dark blue nearly black limestone, which weathers very white; it is protracted by vertical forms supposed to be <i>Scolithus</i> ; the weathered surfaces of beds are covered with brown reddish patches, supposed to be the remains of fucoids or corals..... | 6 |
| 6.—Gray limestone filled with silicified sub-globular forms, supposed to be organic remains | 1 |
| 7.—Bluish gray compact limestone in beds of from one to two feet thick, with scattered forms on weathered surfaces, supposed to be the remains of fucoids..... | 11 |
| 8.—Brownish impure limestone not well exposed..... | 21 |
| 9.—Bluish hard limestone, with a conchoidal fracture, in beds varying from one to four inches in thickness... | 18 |
| 10.—Pale bluish limestone, in alternating thick and thin beds varying from one foot to one inch. This forms the crest of a bold cliff facing the sea..... | 20 |
| 11.—Blue, white-weathering limestone in two massive beds.. | 6 |
| 12.—Bluish-gray brown-weathering slates, interstratified with beds of bluish limestone varying in thickness from ten to fifteen inches, the weathered surfaces of which | |

Carried forward..... 104

Reports.

| | FEET. |
|--|-------|
| Brought forward..... | 104 |
| are sometimes covered with obscure organic forms supposed to be fucoids..... | 66 |
| 13.—Bluish-gray white weathering limestones in one massive bed..... | 10 |
| 14.—Dark-brown slates and bluish and whitish limestones, limestones in alternating beds—the uppermost bed of limestone weathers to a straw yellow, and is probably dolomitic..... | 50 |
| 15.—Bluish and dark-gray massive limestone interstratified with brown slates in equal quantities, the whole mass forming an undulating surface in the interior of the country. The limestone at the summit holds numerous nodules of black chert, weathering yellowish, which are arranged in layers parallel with the stratification..... | 660 |
| | 890 |

At the base of the cliff, where the section commences, the dip is S. 44° E. <26°, and at the top of the outer crest it is S. 44° E. <34°; but in Bide Arm, some distance from the Point, the inclination is irregular, and sometimes approaches verticality, and the thickness of the latter part of the section may be understated. Nearly the whole of the peninsula between Bide Arm and the main body of Canada Bay is composed of the rocks of this division. The cherty limestone at the top is seen towards the extremity of the arm on the west side, where the dip is S. 73° E. <85°, while the rocks at the base of the division strike along the west side of the peninsula gradually turning more north, and leaving room for a part of the white limestones of the previous division at two points on the coast included in the first three miles. The strike is nearly due-north, beyond this, for five miles, thence gradually turning more eastward towards the Salt water Pond fault.

Following the formation northward from the section of Salt-water Pond, both sides of the Long Arm seem to be composed of the Division B. In the bed of the brook flowing in, near the upper end on the west side, are seen the fucoidal limestones of B 4; and at the mouth of the brook there occur the limestones whose surfaces are covered with the reddish nodules characterising the base of B 5. The formation was not traced into the country northward from this, and nothing of it was seen in Hare Bay, though it is probable that the upper part of it approaches

Reports.

the coast somewhere near the West Brook, in the south western part of the Bay.

The total thickness of the Potsdam Group, as far as collected from the examination of Canada Bay, appears to be as follows :—

| | FEET. |
|--|-------|
| A. Clouds' Mountains bluish-gray slates, conglomerates and diorite..... | 2500 |
| B. Salt-water Pond bluish-gray, black, blue, reddish and white limestones, yellowish, gray and black slates, and gray and white sandstones, in some parts holding <i>Olenellus Vermontanus</i> , <i>Lingula</i> , <i>Scholithus</i> and <i>Fucoids</i> | 2000 |
| C. Light and dark blue limestones, and brown slates with cherty limestone at the top..... | 900 |
| | 5400 |

Between the cliff shewing the cherty limestone in Bide Arm, and the recognised strata of the succeeding formation, there is a depression, which appears to run all the way to the North-east Arm. The rocks under this are concealed, and may add something to the volume of the Potsdam Group.

In the neighborhood of Salt-water Pond, the strata of the Clouds' Mountain range have a direct breadth of nearly three miles ; but at the Gouffre the breadth is not more than about three quarters of a mile. Whether this is to be wholly attributed to an increase of the dip, or whether it may be partly due to a thinning of the mass, is not quite certain. But in the next exposures, southward, in which strata belonging to them occur, the Clouds' Mountain beds cannot be recognized with any degree of certainty. The localities of these exposures are at Great and Little Cony Arms. It has already been mentioned that the Laurentian gneiss, back from the extremity of Little Cony Arm, terminates in a considerable mass of black mica slate. Between this and the succeeding exposures of rock, there occurs an interval of concealment, in which a depression runs in the strike, both northward and southward from the Arm, forming on the south side the valley of a small stream. On the east side of the depression there is seen another series of rocks, of which the following is an ascending section :—

| | FEET. |
|---|-------|
| 1.—Pale bluish-gray mica slates, with yellowish brown iron stains, softer and more finely laminated than those of the Laurentian series ; and more uniform both in color and texture..... | 300 |
| Carried forward..... | 306 |

Reports.

| | 1776 |

This section is obtained from the cliffs on the north side of Little Cony Arm, where the dip is E. 65° -- 70° , and where the section extends across the measure for a distance of about 750 yards. At the eastward end of the line the strata turn up again with an opposite dip, forming an synclinal, the east side of which gives a repetition of most of the calcareous part of the section, before reaching the point at the entrance of the arm on the north side. A short distance along the coast from the corresponding point, on the opposite side, the strata are seen to turn over again, forming an anticlinal, and with an east dip the limestones plunge under the surface of Great Cony Arm. The character of the limestones of this section, and their relation to the Laurentian gneiss, render it pretty certain that they are a continuation of the calcareous rock of Canada Bay, and therefore belong to the Potsdam Group.

From the axis of the anticlinal which has just been mentioned, the water of Great Cony Arm is about seven-eighths of a mile wide, and on the opposite side there rises an escarpment, composed of whitish granitoid very quartzose mica slates. They have a breadth of about a mile and a quarter, and then sink beneath overlying unconformable rocks. They present a somewhat uniform character for their whole breadth, as seen at the extremity of Cony Arm Head. They are somewhat corrugated, but generally dip to the eastward at a high angle. Supposing that the average inclination of forty-five degrees be given them, and that they are repeated by the undulations between two and three times, they would have a thickness of probably 1500 or 2000 feet. Whether they belong to the Potsdam group it is difficult to say. No rocks like them have anywhere been found in this group, and they more resemble some

Reports.

of the strata of the Metamorphosed Sillery series, as seen, but not in any such great volume, in the Eastern Townships of Canada. Should they prove to be of this series, then the intermediate strata of the Quebec group might be supposed to be buried beneath the waters of Great Cony Arm. But there is here scarcely room for them, and no certain traces of them have yet been met with in the run of the measures further south in this neighbourhood. It would therefore be necessary to allow the existence of a great downthrow fault to bring the Sillery series into the position occupied by these mica slates.

The mica slates gradually approach the limestones in their Southward trend, and about a mile up a considerable brook, which flows into Great Cony Arm at its southern extremity, the distance between them is about the third of a mile. This position is upwards of a mile west of Frenchman's Cove. At the extremity of Jackson's Arm, which is two and a-half miles further south, the mica slates have a breadth of about a mile, in the western half of which they form high ridges inland, while the limestones rise about half a mile further in, on the west side of a valley lying between them. These formations were here left trending southward, but they were not met with again in their southern distribution. The limestones are supposed to accompany the Laurentian gneiss in its course west of Sop's Arm, but the mica slates did not appear on the coast at the extremity of it.

At Hauling Point, on the east side of White Bay, there is an exhibition of limestone. The color of the rock is for the most part white, but sometimes of a pale rose-red. Some parts of it weather yellowish, and these are occasionally dolomitic. It is coarsely crystalline, and mica is disseminated through it; and though probably a good material for burning into quick lime, it is inapplicable to any structural purpose. The dip of the rock is north-westward, and at the lower part it becomes interstratified with mica slate. On the east side of a cove inside of Hauling Point, which would be beneath the previously mentioned rock, a coarse quartzose granitoid mica slate is met with, and a similar rock prevails along both sides of the western arm up to its extremity, a distance of nearly three miles across the measures. Here strong hard bands of micaceous gneiss come in, bearing some resemblance to that of the Laurentian series. The mica slate which overlies it strongly resembles that of Cony Arm Head. If it be supposed that the gneiss of the Western Arm is Laurentian, it would be fair to infer that the mica slate of Cony Arm Head must be older than the Sillery series, and be brought into the place by an upthrow instead of a downthrow fault. The limestone of Hauling Point, notwithstanding its very different crystalline condition from that of Great and Little Cony Arms, might then be supposed to represent it, and the coarse quartzose granitoid mica slate on the opposite sides of White Bay

Reports.

to be in the form of a trough, with the Potsdam group above it. It will be necessary, however, that a great deal more should be ascertained of the rocks eastward of White Bay, before such a question can be satisfactorily determined.

2.—*Quebec Group*.—Returning to Canada Bay, we find in the north east corner of Bide Arm, a series of black limestones, many of them weathering yellow and probably magnesian. Between these and the cherty limestone at the top of the previous formation there intervenes the breadth of the Arm ; and, as has already been mentioned, a corresponding depression, under which the rocks are concealed, runs from the northwest corner of Bide Arm to the North-eastern Arm. Of this Arm the east side is wholly covered with boulders ; a good deal of the west also is concealed ; but near the mouth of the brook at the northern extremity there are a few exposures of limestone, and it is here that the base of the previous formation would strike the continuation of the great fault of Salt Water Pond. On both sides of the North-west Arm, but especially on the west, there are exposures of limestone, and near the outlet of the brook, which falls into this Arm at its northern extremity, two massive beds of the rock are met with. The lower one is a deep blue, and weathers light yellow, being probably magnesian. It contains a number of gray, blackish-weathering rudely subspheroidal concretions, —some of them are of enormous size. One of them measures nine feet in diameter, and several were observed measuring three feet. The upper bed is of a pale gray on fracture, but weathers yellowish brown, being probably magnesian. The dip of these beds is N. 50° E $< 10^{\circ}$, and about half a mile up the stream higher strata occur, consisting of about thirty feet of gray and white limestone, in beds of from three inches to three feet, some of them weathering yellow. The exposed surfaces of many are covered with obscure remains of fucoids and other fossils, and among the latter Mr. Billings recognises, in addition to fragments of trilobites and orthoceratites, *Maclurea crenulata* (Billings) *M. Speciosa* (B.), and *M. Normani* (B.) These fossils belong to the calciferous formation, which is the lowest of those that are classed under the designation of the Quebec group. It would thus appear that the base of the group stretches from Bide Arm to the North-west Arm, with a north-western trend, and it is probable that, after running a few miles farther with this strike, it will turn up northward to Hare Bay.

Reports.

SECTION, BELVIE BAY, HARE BAY.

Horizontal and Vertical Scale, an inch to a mile.

- | | |
|------------------------------------|------------------------------|
| 1. Gray magnesian limestones. | 7. Brownish conglomerates. |
| 2. Black limestones. | 8. Black slates. |
| 3. White limestones. | 9. Yellowish-white dolomite. |
| 4. Dark gray magnesian limestones. | 10. Diorites, Dolomites, &c. |
| 5. Brownish calcareous shales. | L. Sea level. |
| 6. Greenish calcareous slates. | f. Faults. |

Belvie Bay, which forms the south-western part of Hare Bay, has a very irregularly indented coast. It presents many deep coves and many long, sharp promontories, and it is studded with many islands. The exposures of rock are numerous, and a good transverse section was obtained, extending from the neighborhood of the Southern Arm, on the west side of the Bay, to Spring's Arm, which is on the south side of Hare Bay, and somewhat beyond the eastern limit of Belvie Bay, the distance being eight and a-half miles. The following appears to be the series of deposits which occur on it, as gathered from the exposures on each side of the line, and they are given in ascending order. The lowest deposit, however, of the section, does not reach the base of the formation. How much is wanting is uncertain, but it cannot be less than 500 feet.

FEET.

- 1.—Gray yellow weathering limestone, probably magnesian, in beds varying from three inches to one foot, with occasional thin partings of calcareous slate; on weathered surfaces there occur obscure remains of fucoïds, with other undeterminable fossils..... 600
- 2.—Black limestone in beds varying from six to twelve inches in thickness, followed by dark gray yellow weathering, and probably magnesian limestones, in beds of from eight inches to one foot, separated by thin layers of greenish calcareous shale, which at the summit becomes of considerable thickness, and is interstrati-

| fied with thin beds of dark gray yellowish weathering limestone; the whole are terminated by a bed of brownish-black bituminous limestone; the limestones are for the most part fossiliferous, and among the fossils are <i>Murchisoni Simulatrix</i> , <i>Maclurea Normani</i> , <i>Piloceras Northeni</i> , <i>Orthoceras Allumettense</i> , and <i>Bathyrurus Nero</i> | 260 |
| 3.—White compact limestone with a conchoidal fracture, in beds varying from four to eight inches, aggregations of which alternate with beds of pale gray somewhat shaly limestone of about the same dimensions. The gray limestones are fossiliferous, but the fossils are so fragmentary that it is difficult to determine them..... | 580 |
| 4.—Dark gray yellow-weathering limestones, probably magnesian, in beds varying in thickness from three to eight inches, separated from one another by dark brownish yellow-weathering shales in thicknesses of from six to twelve inches..... | 130 |
| 5.—Dark brownish yellow-weathering calcareous shales, with thin occasional bands of dark gray yellow-weathering limestones..... | 260 |
| 6.—Greenish calcareous shales interstratified at considerable intervals with thin bands of gray yellow-weathering limestone, exhibiting occasional faint traces of fucoids and other fossils, among which a <i>Holopea</i> was met with in Spring Arm. In several parts of the breadth from which this thickness is calculated there are intervals of concealment..... | 500 |
| 7.—Brownish conglomerate holding pebbles of white quartz and fragments of black shale and bottle green diorite: the whole is studded with cubic crystals of iron pyrites, which cause the exterior to present a rusty brown color | 20 |
| 8.—Black slates with a cleavage independent of the bedding, and probably fit for roofing in some parts of the thickness..... | 1100 |
| 9.—Yellowish-white dolomite, weathering brownish-yellow, in beds varying from two to three feet in thickness, separated by beds of gray yellow-weathering hard slates of from three to five inches thick. The dolomite is very fully studded with cubes of iron pyrites..... | 200 |
| | 2700 |

Reports.

Above this there occurs a series of interstratified diorites, quartzites and slates, with some bands of conglomerate, having calcareous and other pebbles. The whole mass is very much corrugated, and it is therefore difficult to estimate its thickness, but it probably does not exceed 400 or 500 feet. On the north side of Hare Bay, in How Harbor, a similar series of altered rocks is seen overlaid by a mountain mass of serpentine. The hill in which it occurs has a vertical height of 500 feet above the sea, with a horizontal distance of a half mile from the outcrop of the base to the axis of the hill, with a dip towards it of twenty degrees; allowing for possible undulations, this would give 500 feet more, so that the volume of the serpentine may be 1000 feet.

The thickness from the base of the Group to the summit of the black slates (8) would thus be about 3000 feet, and the dolomite, diorite and serpentine 1600 or 1700 feet more, making a total volume of 4700 feet. In the General Report on the Geology of Canada, published in 1863, the Quebec Group series on the western sides of the Northern peninsula to the summit of a mass of black slates, holding compound grapholites, to which the black slates of Belvie Bay are supposed to be equivalent, is given as about 4000 feet thick, while the diorites and serpentines are estimated at 1000 feet.

It will be seen from the accompanying plan and section how the measures are distributed on the coast and islands of Belvie Bay, and the general attitude they present in the exposures. Although the usual attitude of the beds shews but little disturbance over the greater part of area in the vicinity of Belvie Bay, there is nevertheless evidence of two dislocations of considerable magnitude. One of these was observed at the point between Shoal Arm and the main body of the Bay, where the black limestones, sinking beneath the surface on the west side of the promontory, are brought up again on the east side of a small synclinal from a depth of about 200 feet. The other is on the west side of Spring's Arm. Here the greenish calcareous slates and gray limestones are brought from beneath on the east, and placed in juxtaposition with the diorites overlying the black slates, the amount of displacement being between 1500 and 2000 feet. These faults appear to be nearly parallel to one another, their course being about S. 23° W.

From the promontory south of the western arm to the northern arm, the coast of Hare Bay presents a beach composed in general of sand and limestone gravel, with a flat wide-spread marshy country behind it, studded with innumerable ponds. There is no exposure of rocks along it until reaching a Cove about a mile and a-half to the westward of the northern arm, where the limestones, of which a section has been given, are repeated, composing the promontory and the island between the Cove and the Arm.

Reports.

The whole of the calcareous strata are comprehended in a distance of about a mile and a-half across the measures, and among the fossils obtained from them are *Murchisonia Simulatrix*, *Maclurea Speciosa*, *Piloceras Canadense*, *Orthoceras* — ? and *Bathyrurus*, with several other species of gastropods and cephalopods, including a new species of *Lituities* but all in a fragmentary condition. The dip is here eastward, with a somewhat regular slope of twenty-four degrees across the measures containing the limestones, giving a thickness of about 3000 feet. At the north-eastern end of the island which has been mentioned, the limestones are overlaid by a small amount of the black slates, but between the base of these and a mass of diorites, which appears on the opposite side of the northern arm, there would be room for a thickness of the black slates equalling 1000 feet. The breadth and dip of the diorites and their accompanying rocks would give a thickness of 400 or 500 feet; and it is here that the serpentine mountains overlooking How Harbor seem to show, as has already been stated, a thickness of about 1000 feet.

From the head of the northern arm the diorites run along the coast for seven or eight miles, apparently crossing the mouth of How Harbor in their course. It is probable that they then re-enter upon the land and turn up to the north-east. In the north-western part of Hare Bay, the diorites thus appear to form the extremity of a trough of which the serpentines constitute the centre. To the south of the south-eastern part of Pistolet Bay, Mr. Richardson observed mountains of serpentine, which probably form the northern extremity of this synclinal range. In How Harbor the black slates, interstratified near their summit with conglomerates holding numerous pebbles of limestone, greenstone, and flat fragments of hard slate, rise from beneath the diorites in an irregular dome, and around the harbor the serpentine is arranged in several bold projecting mountain escarpments, while one mass on the west side of the harbor near the entrance forms an isolated hill. Within the harbor the black slates were often marked by the presence of iron pyrites, and in some of the beds near the interstratified conglomerates the quantity occasionally seemed almost sufficient to be made economically available. The diorites also often appeared to abound in the same mineral, and on the west side of the entrance to the harbor there were some indications that copper pyrites sometimes accompanied it.

On an excursion to the north-westward extending between four and five miles from the Cove at the base of the limestones, over a flat country studded with clumps of small spruces and balsam-firs, of which the trees seldom exceeded twenty feet in height, with moss and marsh and innumerable small ponds occupying the intervals, the strata met with were limestones spread out in nearly horizontal layers. Bare surfaces

Reports.

of rock occasionally extended over areas of a square mile; these generally exhibited fragmentary fossils, of which from the hardness of the rock it was very difficult to obtain specimens. They consisted, however, for the most part of convoluted shells and orthoceratites, and much resembled the species already mentioned. The general surface seemed to be scarcely more than twenty or thirty feet above the level of the sea, and only one exception to the dead level was met with in a hill of limestone which rose to about 100 feet. As seen from the high hills over How Harbor, a country of the same character appeared to extend northward to Pistolet Bay, rising over the waters of which four icebergs could be counted, whilst a little to the left the mountains of Labrador presented a faint blue undulating line over the horizon. A similar dead level extended to the westward as far as the eye could reach; but over this level, to the south-west there arose in the distance a range of mountains the nearest point of which appeared to be from twenty to twenty-five miles distant, being probably the most northern part of the area occupied by the Laurentian rocks.

On the north side of Hare Bay there is a portion of the coast, between the point at which the diorites re-enter upon the land and Ireland Cove, that has not been examined; but as seen from the deck of the schooner it presented an abrupt cliff to the sea, rising to a height of between twenty and thirty feet, maintained evenly for four or five miles; from this the surface in the interior gradually rose to a height of 150 or 200 feet, forming a valley running north-eastward between two parallel ranges of higher ground. It was supposed possible that the coast might here be occupied by the black slates. To the east of Ireland Cove the coast gradually becomes more bold, and an examination was made of it about two miles from the Cove in that direction. The rock consists of a greenish hard splintery slate, breaking into long fragments; and in a small peninsula extending about 100 yards out from the main run of the shore, there was observed an exposure of about ninety feet across the measures, in which the slate appeared to have a nodular structure, presenting ovoid or uniform masses pressed on one another, which in the four feet next the shore were partially separated from one another by thin whitish reticulating springs of calcareous matter, which gave the surface the aspect of marbled paper, and over this occurred a band of about forty feet of a maroon-purplish color. The dip of the slate in this neighbourhood was S. 57° E. \sphericalangle 45°; but going eastward the slate appeared to undulate, and it occupied the coast for a distance of three miles to the east side of Seal Cove.

These slates continue along the coast forming the point north of the entrance to Goose Cove, as well as the whole of the peninsula south of this Cove, and forming Goose Cape, in which they appear to have a

Reports.

north dip, as ascertained at the summit of the highest point of the peninsula, which is 380 feet above the sea, and stands directly south of the isthmus. North of the peninsula the rocks of Goose Cove are green and gray jasperoid slates, and they are interstratified with many thin bands of quartzite. Among these are some thicker bands, which assume the character of a fine conglomerate from the presence of small pebbles of white translucent quartz. Epidote is associated with these slates, sometimes running in small patches with the slates, and sometimes reticulating through them in small veins. White quartz cuts the slates and quartzites in thin irregular veins, and occasionally occurs in nests or bunches in the rock associated with copper pyrites. One of these bunches or patches of lenticular form measured about three feet in length with the breadth of a foot in the middle. The copper ore was irregularly disseminated in small masses, the largest of which was about two inches in length by a quarter of an inch thick. The rocks here and elsewhere in the neighbourhood appear to be very much contorted, rendering it impossible to determine their volume. The following sketch of some of the smaller convolutions was taken in the north-east corner of Goose Cove. It represents a mass of rock which occurs in a cliff about fifty yards long by about twenty feet high.

CONTORTED STRATA.

GOOSE COVE, HARE BAY.

A foot-path leads from the north-east corner of Goose Cove to Grevalliere Harbor, running northward, the distance being about two miles. The summit of a hill, 553 feet above the sea, to the east of the path about half a mile from the Cove, is composed of black hornblende slate; the breadth of it is about a hundred yards, and a dip is here S. 65° W. \sphericalangle 28. The thickness of the mass would thus be about 130 feet. The summit of another hill, called the Sugar Loaf, distant about a quarter of a mile southward in the strike, appeared to be composed of the same rock, but what geological place it has in relation to the Goose Cove rocks is uncertain; it is probably beneath them. On the foot path, the rocks seen every now and then for the whole distance were green slates, much resembling those of Goose Cove; but arriving at Grevalliere Harbor a cliff of about twenty feet in height displayed a bed of quartzite at the bottom, surmounted by a band of arenaceous very impure

Reports.

limestone, followed by a mass of soft green slates, which appeared to be chloritic; cracks and fissures in the rock are frequently filled with calc-spar. The dip was S. 78° E. $\angle 10^{\circ}$. The facts ascertained in the neighborhood of this part of Hare Bay appear too scanty to determine the exact geological relation of the masses in the Quebec Group; but the hard green slates, of which they chiefly consist, resemble in aspect the green diorite slates of the Eastern Townships of Canada, and the hornblende of Sugar Loaf Hill would appear to favor the supposition that they are of a diorite character here. They would thus belong to that part of the group which holds the serpentines, and is so often found rich in copper ores and other metalliferous minerals. No great mass of serpentine, however, was seen in the neighborhood, although it is probable that such may occur more in the interior.

On the south side of Hare Bay, about a mile to the east of the diorites of Spring Arm, where the section across Belvie Bay terminates, the dip of the measures is S. 25° E. $\angle 60^{\circ}$, and a line across the measures, running from Hare Bay to Maiden Arm, gives the following section reduced to vertical thickness.

| | FEET. |
|--|-------|
| 1.—Greenish hard jasperoid slates..... | 500 |
| 2.—Pale sea-green quartzites; on the exterior it is opaque-white from the effects of fire, but for the sixteenth of an inch beneath the surface it is dark-brown. The mass is divided into beds of from one to two feet, by darker green slates, in beds varying from six to fifteen inches, and thin veins of white quartz run with the strike..... | 150 |
| 3.—Blue jaspery very hard and compact slates..... | 120 |
| 7.—Dark gray quartzite including small rounded grains or pebbles of white quartz giving a speckled aspect; fine grains of iron pyrites are scattered through the rock, which is divided into beds varying in thickness of from ten to fifteen inches separated by green hard slates of from one to three feet.... | 70 |
| 8.—Green hard slate interstratified at intervals of from one to a hundred feet by layers of greenish-gray brown-weathering diorite of from one to four feet in thickness | 500 |
| 9.—Black compact slates in layers of from twelve to eighteen inches, interstratified with dark gray slate weathering rusty brown. The measures beyond this become concealed, and the mass of black slates may be much thicker than here given..... | 30 |

 1375.

Reports.

Although the dip was all one way, it is not impossible that the deposits 1 and 8 may be the same from a break or undulation, and the black slates may be those beneath the diorites. They occur again on the east side of the Arm towards the exit, where they have a thickness of 300 or 400 feet. It is probable that the green slates and diorites overlying the black slates are kept at the surface by undulation all along the coast to the Fishot Islands; and at Havre du Four a series of rocks belonging to this horizon, consisting of gray sandstones and fine conglomerates, with pebbles of white quartz, interstratified with bands of green diorite slates, and overlaid by a considerable mass of similar slates showing brown and black bands in addition to green present folds, is illustrated in the accompanying transverse vertical section.

SECTION, HARBOR DU FOUR.

Horizontal and Vertical Scale, three inches to a mile

- a. Quartzites and fine conglomerates.
- b. Sandstones and green slates.
- c. Black, green and brown slates.
- L. Sea level.

Similar rocks are displayed along the coast to St. Julien, but here there appears to be a change. The Island of St. Julien, and the several promontories which divide the bay into the Great and Little Harbors, and Great Goose Cove, consist of coarse grayish or greenish sandstones and conglomerates, interstratified with green, purple, and black argillaceous shales. The sandstones are composed of rounded grains of transparent, translucent and opaque-white quartz, with others of white felspar held together by a sparing quantity of a gray or greenish argillaceous matter with a very small amount of carbonate of lime. The same minerals compose the conglomerates, in which the pebbles, consisting of quartz, are in general about the size of peas; but in some bands, as in one which runs through the length of St. Julien Island, attain a diameter of between two and three inches. The strata in general dip nearly south-east at high angles, and stand in many instances in a vertical attitude. At the head of the eastern harbor, on the east side of a series of black and gray arenaceous shales, running parallel with the shore, they have a general south-east dip, but display many twists and corrugations. When the slates are crossed by streamlets they present a rusty brown color, from the decomposition of iron pyrites, which is disseminated in the rocks,

Reports.

and they are cut by large white quartz veins, without the exhibition, however, of any metaliferous ores. Sandstones and fine conglomerates occur on the west side of the bay; and on this side, at a spot bearing N. 80° W. from the north point of St. Julien Island, the strata, consisting of conglomerate beds varying from eight to eighteen inches in thickness, parted by thin layers of green arenaceous shale, are cut by numerous quartz veins which runs in various directions. One of these, traceable from the shore for between thirty and forty yards, is seen in the cliff, and holds yellow sulphuret of copper, while the rock is much stained with blue and green carbonates, resulting from the decomposition of the sulphuret. The ore is a nearly pure sulphuret, and it appears to be pretty continuously distributed in the vein, which in the cliff is rarely over three inches wide, though it seems to increase a little proceeding inland, before it becomes covered up.

On the promontory dividing the two harbors a series of black slates, interstratified with bands of sandstone of between two and three feet thick, stands nearly or altogether in a vertical attitude, and from the unequal wear of the sandstones, thin jagged edges start up in prominent separate masses in the plane of the bed, many feet above the general level; and several of these in succession in some places appear like a colonnade. These sandstone pillars strongly resemble those of Tourette, near Cape Chatte on the St. Lawrence, and the rocks of the two localities have so much in common that it is probable they belong to the same horizon. The St. Julien sandstones would thus appear to belong to the sillery series, which constitutes the upper part of the Quebec Group.

Croce Harbor is situated between four and five miles to the south-west of St. Julien. At the head of the harbor, and for a considerable distance up the brooks which fall into it there, the measures are chiefly black calcareous slates with beds of limestone conglomerate apparently near the top. These rocks are vertical or highly tilted, with an inclination to the eastward; they have a breadth of more than a mile, within which distance however there may be more than one repetition. They are succeeded to the eastward by quartzites and diorite slates, with beds of orgillite passing into finely laminated micaceous slates. These rocks probably belong to the lower and middle divisions of the Quebec Group. But near the mid-length of the harbor, there are evidences of a fault running north-easterly, and slightly oblique to the stratification. It appears to be a down-throw to the south-eastward, and it brings in a series of rocks similar to those of St. Julien, consisting of sandstone and conglomerates interstratified with slates, which, in addition to green and purple, are in some places red; thus establishing a still further resemblance to the sillery series. The general bearing of the fault would carry it to the west side of St. Julien's Bay, perhaps a little in from the

Reports.

shore, and it would thus run by the small vein of copper ore which has been described as occurring there. Though the quantity of the ore is not sufficient to be economically available, the vein might become of more significance should it be found to have any connection with the fault; for this, being a displacement of some importance, it might possibly give an opportunity for a larger secretion of the ore.

In Croc Harbor, the fault comes to the shore near the Genille Fishing establishment, and on the opposite side it probably runs into Pelletier's Cove. In the peninsula of Cape Rouge, some six or seven miles to the southward, there occurs a fault, with a downthrow to the south-east, affecting a higher series of rocks to be hereafter described. This is probably a continuation of the Croc Harbor fault, in which case it would come out upon the coast about five miles south of the harbor, and the coast that far probably belongs to the sillery series. This series was observed by Mr. Richardson some short distance to the east of Pistolet Bay, and from its trend in that part it was supposed that its base would run into the Atlantic at St. Lunaire Bay.

With the exception of the peninsula of Cape Rouge, and that of Cape Fox, the coast appears to be formed of rocks of the middle division of the Quebec group to the entrance of Canada Bay. It has already been mentioned, that between Engle Island, and the point at the northern side of the entrance to this bay, a fault brings the white limestones of the Potsdam group on the west, against the diorites of the middle division of the Quebec group on the east; and that the same condition of circumstances is observable in Canada Harbor, on the south side of the bay. From Canada Harbor the bearing of the fault would carry it to a Cove on the coast between three and four miles to the southward, and here the fault brings the diorites of Canada Head, belonging to the middle division of the Quebec Group, against the Laurentian gneiss without the intervention of the lower division of the Quebec Group or any part of the Potsdam. From this it would appear that this dislocation must be here a down-throw to the eastward of about 8000 feet. It diminishes, however, towards Canada Bay, where the displacement appears to be about 4500 feet. From the convergence of this great dislocation and that of Salt-water Pond, it is probable that they would meet before reaching Hare Bay. The Salt-water Pond fault is a down-throw to the westward. Its influence therefore would diminish that of Canada Harbor fault. We accordingly find that the dislocation near Spring's Arm on Hare Bay, which is probably a continuation of the other two united, is only from 1500 to 2000 feet. Where the Spring's Arm fault strikes into the land on the north side of Hare Bay, has not yet been ascertained, but it will probably be somewhere near Ireland Cove. The study of these great breaks in the rocks of the country is a subject of

Reports.

great interest, and independent of the evidence they give of the great dynamic forces which have fractured the earth's crust, and the influence they have on the geographical distribution of the geological formations, they may be found to possess an economic value; for they must have originally been connected with extensive fissures, and where they traverse rocks charged with metalliferous minerals, they may have given opportunity for the secretion of corresponding ores, and be found to hold valuable metalliferous lodes.

That part of the Quebec Group which in Canada is rich in the more valuable metals is the middle division, composed of dolomites, diorites and serpentines, such as those shown to extend with a considerable breadth for a distance of seventy miles on the East side of the Northern peninsula; and in this connection it may be remarked, that without having had an opportunity to thoroughly trace the structure in the localities where they occur further east, similar rocks were observed in several places on the coast, between White Bay and St. John's. One of these is Little Bay, or Baie Verte, where serpentine rocks are pretty largely developed towards the head of the Bay, in the neighborhood of the Terra Nova Mine. Another is Ming's Bight, four or five miles to the eastward, where rocks of the same kind rise in a high hill range, keeping the east coast of the Bay, and striking inland in a south-westerly direction. Associated with the serpentines in this neighborhood, there are bands of anorthosite rock, diorite, dolomite, and a calcareo-magnesian rock, stained green with oxyd of chromium; and at Terranova Mine the series was found to rest upon a blackish or brownish finely laminated talcoid slate. These rocks are in some parts marked with chromic iron, and in many with the sulphurets of iron and copper, occasionally in quantities economically available. Beneath the whole in Little Bay, a great mass of mica slates strikes inland in a south-westerly direction from Coachman's Cove. They run up into the hills of the peninsula which divides Little Bay from White Bay, and may correspond with the mica slates of the western arm there already described. Near the central part of the peninsula, between Little Bay and Ming's Bight, a considerable breadth of granitic rock occurs. It does not give much indication of gneissoid structure, but it has a north-east and south-west trend, parallel with the other rocks on either side, and with the gneiss and mica slate of the peninsula to the west, and may belong to the Laurentian series. From the distribution of the rocks in these two peninsulas, it would seem probable that there runs longitudinally through each of them an anticlinal axis, and that the rocks of the middle division of the Quebec Group are arranged in a synclinal form in each of the bays, in which they rest upon the Laurentian series, without the interposition of the lower division or of the Potsdam group.

Reports.

Serpentines are also represented as known at Tilt Cove and Round Harbor, on the peninsula which terminates at Cape St. John; and further south; rocks, which are probably of the same series, are exhibited on the islands of Hall's Bay, and again at Twillingate. In each of the latter cases they appear to be related to a considerable volume of limestone; but all this section of country requires a great amount of careful examination before any detailed description can be entered upon.

Mention has already been made of the presence of copper ore in the middle division of the Quebec Group at How Harbor, Goose Cove, and the western side of St. Julien's Bay; and although the quantity observed was not in any of these instances great, they yet serve to show that the ores of the metal accompany these deposits in their distribution in Newfoundland as well as in Canada, and render it reasonable to expect the discovery of available quantities in those parts of the country hereafter.— This is still further confirmed by their occurrence in the rocks of the middle division on both sides of Little Bay and at the Head of the Bay at the Terranova mine, and by indications observed on the west side of Ming's Bight, in several places in the vicinity of Twillingate, and on Sandy Cove Island at the entrance of Hall's Bay. At Tilt Cove and Round Harbor copper ores are reported to be largely exhibited; but the plan of my exploration did not afford me time to visit these localities. Their value, however, has been made known by the enterprise of Mr. C. F. Bennett, of St. John's, who has obtained from the Government of the Colony the exclusive right of searching for minerals over a very extensive tract of country, and has entered upon mining operations at Tilt Cove with a fair prospect of a profitable return.

Iron pyrites was found to accompany the copper pyrites in most of the localities in which the latter occurred; but it was often met with disseminated in the rocks by itself, particularly in the black slates of the lower division of the Quebec Group, where occasionally, as at How Harbor, it seemed almost sufficient in quantity to be made available for practical purposes. The largest deposit of it, however, that came under my observation was in association with the serpentine of the middle division at the Terranova Mine. The Terranova Mine is situated at the junction of two streams, called from their relative position the North-west and South-west Brooks, whose united waters, flowing north-easterly for about a mile and a quarter, fall into the upper extremity of Little Bay. The deposit upon which the mine has been opened, appears to be a stratified mass of iron and cobby pyrites, with intercalations of hard clay slate, and it is interposed between a considerable volume of serpentine on the one side and of chloritic slate on the other. The metalliferous band has

Reports.

a considerable breadth, probably thirty feet or even more, and within that width there are strata of solid or nearly solid iron pyrites of from four to five feet thick. The general dip is about S. 80° E. $<80^{\circ}$. The upper part of it is chiefly iron pyrites, some of which is strongly magnetic; but in the lower part the yellow sulphuret of copper is pretty generally disseminated in combination with that of iron, and in some spots in considerable proportion.

When first discovered, the exposure presented a mass of ore projecting along the bottom of the main stream from the point of land separating the north-west and south-west brooks; but the channels of both these brooks having been changed near this junction for the convenience of mining, the waters of the north-west brook alone now flow over it. To prove the mine five shafts have been sunk, numbered from 1 to 5, in the order in which they were excavated. Two of these are upon the metalliferous band, while the other three, so far as they go, have been excavated in the rock of the country. The strike of the mineral mass naturally exposed is N. 20° E. and S. 20° W. true, the magnetical variation being about N. 35° W. A short distance from the natural junction of the brooks, in what appeared to be the run of the metalliferous band southward, No. 1 shaft was sunk in hard clay slate, without striking the band at thirty-eight feet. No. 2 shaft was then sunk on the left bank of the main stream, in what appeared to be the run of the band northward. It was carried to a depth of twelve fathoms, through serpentine, without reaching the metalliferous band. From the bottom of this shaft a drift was carried south-eastward for a distance of between seventy and a hundred feet, through serpentine all the way, passing beneath the main stream. Another shaft, No. 3, was then sunk to a depth of eight fathoms, about four chains from No. 2 in the bearing S. 50° E. This is also through serpentine, which was found to be cut by numerous veins of calspar with frequent specks of copper pyrites and small masses of native copper. No. 4 shaft is sunk on the metalliferous band close by the natural junction of the two brooks. At the time of my visit it had been excavated to a depth of twenty fathoms. From this shaft a gallery had been driven along the band northward for about 100 feet in the strike, at the depth of ten fathoms, and another from the bottom of the shaft, in the same direction for the same distance. Both these galleries pass under the north west brook. At the termination of each there appears to be a twist in the stratification. No. 5 shaft called also Bell's shaft, is situated about a chain from No. 2 in the bearing S. 55° W. In it the metalliferous band was struck at the depth of ten fathoms. It is said that from the neighborhood of No. 4 shaft the band separates into two branches, going southward, and it is supposed that the reason why No. 1 shaft missed the band, is that the shaft is sunk in the rock between the two branches. The whole circumstances of the

Reports.

case induce me to think that we have here a short, sharp twist, or overlap, in the stratification, and that the band will run more regularly southward from the eastward of the two branches into which it appears to be divided at the junction of the stream, and more regularly northward from No. 5 shaft, in the general strike of the serpentine and the other rocks associated with it.

The investigations of Dr. T. Sterry Hunt, the chemist and mineralogist of the Geological Survey of Canada, have shewn that traces of chromium and nickel appear to be almost universally diffused in the serpentines of the Quebec Group in Canada and in the United States, and analyses by him of several specimens from Pistolet Bay and Little Bay indicate that the serpentines of Newfoundland will not be an exception. It is therefore reasonable to expect the occurrence of these metals in available quantities in the island. The ore in which the chromium of commerce usually occurs, is in its combination with iron, and chromic iron has been obtained in Canada in several places in economic quantities. Although the ore was met with in Little Bay, the quantity was confined to mere crystals in the rock; but it strengthens the expectation of finding it in more abundance in other parts.

Serpentine is a rock capable of receiving a high polish, and it is extensively used in commerce for architectural purposes of a decorative character. For such purposes, any amount of it might be obtained in How Harbor, Little Bay, Ming's Bight, and wherever else it has been reported.

III. UPPER SILURIAN SERIES.

Proceeding southward along the coast of White Bay, from Cony Arm Head, which, as has already been stated, is composed of coarse quartzose mica slates possibly of Laurentian age, there accumulate on these mica slates a series of rocks traceable to Jackson's Arm. Jackson's Arm runs into the land nearly at right angles to the strike; and here these upper rocks have a transverse breadth of about two miles. The following section of them in ascending order from the mica slates on which they are seen to rest, is taken from the north side of the Arm, in which the measures appear to be broken by three faults, causing what are supposed to be modified repetitions of some of the masses.

FEET.

- 1.—Coarse conglomerates with a light gray arenaceo-micaeous matrix, which is slightly calcareous. The masses enclosed consist of pebbles and boulders of gneiss, large rounded fragments of whitish or light gray mica slate, some of a darker gray greenstone, reddish gray quart-

Reports.

| | FEET. |
|--|-------|
| zite, and occasional smaller masses of limestone. Among these there is a good deal of finer material of the same character, slightly calcareous, and mica schist runs in irregular flakes and patches in the general direction of the stratification, but its cleavage often partially conforms to the rounded surfaces of the boulders and pebbles. The beds are very massive, and they appear to be divided by gray mica schist..... | 400 |
| 2.—Sea-green slates, occasionally interstratified with dark gray or blackish fine silky surfaced slates, some of which are harder than others..... | 300 |
| 3.—Gray coarse rough arenaceo-micaceous schist, frequently passing into fine conglomerates with pebbles similar in mineral character to those of the coarser conglomerates beneath, but none of them exceeding the size of a hen's egg; the pebbles are sometimes arranged in regular layers parallel to the stratification, and bands of dark gray clay-slate are occasionally interstratified in the mass..... | 400 |
| 4.—Gray micaceous and arenaceous slates..... | 250 |
| 5.—Green and black slates at the base, succeeded by gray arenaceous slate, which is interstratified with thin bands of limestone..... | 650 |
| 6.—Green, bluish and blackish slates interstratified with gray flaggy sandstones; the slates enclose nodules of pinkish calcspar, and veins of the same cut the strata..... | 250 |
| 7.—Grayish-blue limestone in a single bed | 7 |
| 8.—Gray calcareo arenaceous slates, interstratified with greenish sandstones with a heavy mass of gray, white weathering sandstones at the top..... | 543 |

f, f, f, Faults.

Reports.

The above section can only be considered as giving an approximation to the truth. The three faults which dislocate the rocks, and are all considered upthrows on the east side, render it difficult to follow the sequence with exactitude, and some of the masses which are supposed to be in a general way equivalent on opposite sides of the faults, appear in different parts to be modified in volume, and somewhat in lithological character, by different degrees of metamorphic action. The most western of the faults occurs in a small cove, upwards of half a mile from the upper end of the arm. It seems to be an upthrow of probably 1000 feet, and by it the coarse conglomerates (1) which rest upon the mica slates at the upper end of the Arm, are repeated on the east side of the Cove. The fault appears to be coincident with a vein or dyke of felspathic rock, of which several occur, though they do not in every case greatly dislocate the measures. They are uniform in their appearance; the rock weathers yellow, but when fresh broken has a pale yellowish-pink color; it is very fine grained, and has a conchoidal fracture. Some of the dykes run with the strata and others intersect them; and they vary in thickness from one to thirty feet. They are cut by white quartz veins, which are confined to them, and do not run with the strata on each side. The second fault occurs upwards of two miles from the upper end of the Arm, where the coast suddenly runs northward for about half a mile into a pretty deep cove. The fault does not seem to dislocate the measures more than about 200 feet. The third fault occurs in the inhabited Cove about 400 yards from the outside point of the Arm. It is supposed to be a dislocation of perhaps 1200 feet. On the west side of it and of the Cove there is an abrupt low hill formed of strong masses of quartzite, some of which appear to have a slaty cleavage; they are supposed to belong to the summit of the section, but would give a much greater volume to this part of it than the amount stated. On the east side of the cove there is a pale pinkish white splintery felspathic rock, of which the relation to the others is not well understood, but it appears to be connected with the slates and sandstones of the deposit 6, but is probably intrusive. In addition to the granitoid compact fine grained felspathic dykes there are others in the upper part of the arm, which consist of horn-brown splintery apparently felspathic rock, which like the others run in some places with the stratification and in others oblique to it.

These rocks run along the coast to the southward of Jackson's Arm, and extend to the upper end of Sop's Arm. As well as the coast they form Sop Island, and Goat Island, which is inside of it, and from their westward limit to Sop's Arm to the outside of the former island they have a transverse breadth of upwards of seven miles. In this neighborhood they seem to be even more dislocated, contorted and disturbed than they are in Jackson's Arm, and much more altered. Their geene-

Reports.

ral identity however, is sufficiently evident. At the upper end of Sop Island, on the west side, the strata are in general very highly tilted, often quite vertical, with a strike about S. S. W., and they consist of slates, quartzites, and conglomerates, the enclosed masses in the last being quartz, slate, greenstone and red felspar, with a few scattered fragments of blood red jasper. One band of rock has the aspect of a conglomerate which has been fused into a solid mass, in which the paste and enclosed fragments are so melted into one another as to make it difficult to define their respective limits. The slates, as at Jackson's Arm, are speckled with nodules, patches and short veins of pink calcspar, and the strata are intersected by dykes of pale yellowish-red or pink feldspathic rock, weathering to a pale sulphur yellow. In these, small cubes of iron pyrites are abundant, and the feldspathic rock is cut by veins of quartz which do not penetrate the strata on either side. From the Northern extremity of the island what appears to be a great porphyritic dyke runs through it, in the general strike of the stratification, and enters upon the south side of Sop's Arm at a promontory which is nearly two miles eastward of Spear Point. The dyke consists of reddish feldspathic rock, which appears to be a species of petrosilex, enclosing felspar crystals of a pale flesh red, with a yellowish tinge. On the surface it has a granitoid aspect, and its color is a light dull amber brown, blotched with pale reddish, yellowish and whitish spots. At the northern end of the island the dyke is flanked on the east side by a mass of pale pinkish yellow weathering petrosilex, making the relation of the great and small dykes sufficiently evident. Where the dyke leaves the island on the south side, the rock has a transverse columnar structure, and in it disseminated are many small cubes of iron pyrites. At the northern end of the island the dyke has a breadth of about a quarter of a mile, and in mid-length of the island it apparently swells to a greater width, and comes out on the south side somewhat narrower than it is at the northern extremity, but accompanied on the west side by altered conglomerates, which it is sometimes difficult to distinguish from it.

At the upper end of Sop's Arm there appears to be another mass of porphyry, which, with a difference in color, has much the same character as the dyke of Sop Island. It is in general of a reddish or purplish gray, with pale flesh-red and white grains of felspar. The rock is intersected by innumerable white quartz veins, some of them pretty large, and some of them shewing small quantities of specular iron. This mass forms a low range of bare hills across the extremity of a promontory between two pretty deep coves, in the northern part of the eastern end of the Arm. The strike of the mass is about S. 30°--40° W., and there is more of the same kind of rock further southward at the point west of the brook which falls into the Southern Cove in this part of the Arm. On the west side of the rock there are grass-green slates, which appear to be of a

Reports.

chloritic character, and they are mottled and irregularly marked with pea-green epidote; but on the east side, it is followed by what are considered to be altered conglomerates, in which, however, the enclosed masses, some of which are very large, and the paste, are seemingly so fused into one another, while the paste closely resembles the petrosilex of the porphyry, that it is really very difficult to say whether both rocks should be classed as porphyries or as altered conglomerates, or the one to be distinguished by a different name from the other.

Between the conglomerates of Sop Island and those of the eastern end of Sop Arm, the rock of the Western part of Sop Island, of Goat Island, and of the main coast, appear to be slates of various shades of green, often marked by pink calcspar in nodules, patches and short veins, of occasional interstratified sandstones, sometimes fit for flagging, with calcareo-arenaceous bands and occasional impure limestones weathering brownish. East of Bartlet's Cove, which is an indentation on the south side at the south-western extremity of Sop Island, there was seen a thickness of fifty feet of black slates. These rocks are in several places characterized by fossils, which are somewhat obscure; but though few of them could be specifically determined, they have yet, according to Mr. Billings, a general aspect allied to that of Upper Silurian types. It would, however, for the present, be impossible to say to what horizon in this series the different divisions of rocks of Jackson's Arm and of Sop's Arm may belong, and it may be proper to remark that while no doubt is entertained of the general equivalency of the rocks of the two localities, all the places in which organic remains were observed occur in the neighborhood of Sop's Arm.

One of these localities is in Bartlet's Cove. Here the fossils occur in calcareo-arenaceous flagstones, and the genera observed in addition to numerous fucoids and crinoidal stems, were a *Murchisonia*, an *Orthoceras* and a *Graptolithus*. At a point on the main coast half way between Spear Point and the promontory occupied by the porphyry which strikes over from Sop Island, organic remains were met with in strata somewhat similar to those of Bartlet's Cove. They consisted of fucoids, crinoidal stems and an *Orthoceras*. On the western side of Goat Island, still in the same description of strata, in addition to fragments of crinoidal columns, there they met with a *Syringopora*, and *Favosites Gothlandica*. Many of the specimens of coral were here replaced by white and in some instances pink calcspar.

The rocks of Sop Island Goat Island, Sop Arm, and the neighboring main coast are intersected by many veins of white quartz, some of which contain specular iron generally in small quantity, and others the yellow

Reports.

sulphuret of copper. One of the former is seen associated with the porphyritic rock described at the east end of Sop's Arm. It presents druses lined with six-sided terminated prisms of transparent and translucent quartz, and these are in many places invested with steel gray specular iron, and in others with minute scales of red hematite. A vein of a similar character intersects green scales on the south side of the Arm, about two miles from the upper end; a probable continuation of it, still in green slates, runs parallel with the strike through the eastern end of Goat Island, and is probably still continued across a point on the coast, about two miles further northward. Another occurs on Sop Island, on the opposite side of the narrows between it and Goat Island. In this are enclosed masses of Prussian-green chlorite, which is penetrated by projecting prisms of transparent quartz, and peroxyd of iron in steel gray and red scales is disseminated in small quantities in the vein. In Bartlet's Cove a somewhat similar white quartz vein occurs, which was marked by the presence of copper pyrites sparingly disseminated. But on the east side of Sop Island, about a mile from the north end, there appears to be a fault or dislocation constituting a lode, in which the yellow sulphuret of copper occurs in more abundance. The bearing of the lode is S. 56° W., and the mass between the walls is made up of crushed and broken fragments of the rock on either side, which belongs to the porphyritic dyke running through the island, with fragments of slate. The width of the lode varies from a few inches to a foot, and throughout this the yellow sulphuret is abundantly disseminated in small grains. It also appears to penetrate in a small degree the walls on either side of the lode, which are much stained by green carbonate. An average sample of the lode has yielded to analysis 3.1 per cent of metallic copper.

The limestones of the formation appear in general to be too impure for burning into quick lime; but there are several bands of the rock which might be very well adapted for building, and occasionally a good coarse sample of whetstone may be procured from the slaty portions of the formation.

The eastern limit of the formation appears to run into the cove on the west side of Spear Point, where it is succeeded by rocks supposed to belong to a higher formation. The general dip of the strata is to the south-eastward across the whole breadth, but the occurrence of the conglomerates on each side suggests that it may be arranged in the form of a trough between the parallel belts of porphyry, with an overturn on the south east side. It seems probable, however, that the rise of the conglomerates on this side, perhaps occasioned by the intrusion of the porphyry, is only to be considered an undulation subordinate to a wider trough lying in White Bay.

Reports.

IV. DEVONIAN SERIES.

In describing the dislocation which crosses Croc Harbor, mention was made of the peninsula of Cape Rouge and of Cape Fox. These peninsulas are joined to the main coast by very narrow necks of land, and between the peninsulas is situated Cape Rouge Harbor. Both peninsulas are composed of the same rocks, the strata striking across the harbor from the one to the other in a general N. N. E. and S. S. W. bearing. The Cape Rouge peninsula on the northern side of the harbor gives the largest development of these rocks, and the coast along this part of the harbor was selected to obtain a section. The direct breadth across the the measures from the neck of the peninsula to the Atlantic on the outside is just about two miles, but in this the strata are arranged in the form of a trough, with the dislocation which has been alluded to running through it nearly on the strike, at one-third of the breadth from the neck of the peninsula; and towards this dislocation the strata dip in opposite directions, at angles varying from 34° to 51° . A greater volume of strata crops out on the south-eastward side of the trough than on the north-westward; and as those at the base on the latter side do not make their re-appearance on the other, it is concluded that the dislocation is a down-throw on the south-eastern side, equal in amount to at least the difference in volume between the two. The base of the strata on the north-western side approaches the diorites and quartzites of the middle division of the Quebec group, and are supposed to rest upon them unconformably, and the following is a description of the series in ascending order:—

FEET.

| | |
|--|-----|
| 1.—Coarse conglomerates, of which the paste is a grayish micaceous sand, and the enclosed pebbles consist chiefly of reddish gray diorite, opaque white quartz, bluish quartzite, and occasional red jasper. The conglomerates are in massive beds, and are interstratified with bands of greenish gray micaceous sandstone..... | 93 |
| 2.—Greenish-gray micaceous sandstone, with ripple-mark on some of the surfaces, and occasional carbonized broken remains of plants | 8 |
| 3.—Coarse conglomerates as before | 18 |
| 4.—Measures concealed | 40 |
| 5.—Black slates interstratified with thin beds of gray hard sandstone, followed by reddish slates at the top..... | 15 |
| Carried forward..... | 174 |

Reports.

| | FEET. |
|--|-------|
| Brought forward..... | 174 |
| 6.—Coarse conglomerates, as before, in massive beds, interstratified with grayish slaty bands..... | 29 |
| 7.—Measures concealed | 60 |
| 8.—Reddish slaty micacious sandstones, becoming blackish-gray at the top; the surfaces of the beds show coarse ripple mark..... | 11 |
| 9.—Measures concealed | 29 |
| 11.—Dark gray dolomite in thin beds, some of which weather yellow; the surfaces of some of the beds are occasionally marked with reticulating crack casts..... | 37 |
| | 340 |

These strata occur in the isthmus joining the peninsula of Cape Rouge with the mainland, and from isthmus the coast of the peninsula and the stripe so nearly coincide for upwards of a mile, that no additional strata can, for that distance, be safely gathered from it. Between this point and the fault, however, the shore becomes obliquely transverse to the measures. The direct breadth across them is about a quarter of a mile, and the average slope of the strata thirty-four degrees, which would give a thickness of about 750 feet. This consists of red and black slates interstratified with greenish-gray sandstones.

The section on the opposite side of the fault occupies the coast to the outside of the harbor, and gives the following strata in descending order:—

| | FEET. |
|--|-------|
| 1.—Red, green, and black slates with a mass of greenish-gray sandstones at the top..... | 650 |
| 2.—Measures concealed, in a valley having a breadth of about thirty chains | 1000? |
| 3.—Red slates with bands of red and green sandstone..... | 1450 |
| 4.—Red, black, and green slates interstratified with sandstones and yellow-weathering bands, probably dolomites..... | 450 |
| | 3550 |

The transverse breadth of the section is about ninety chains, the in-

Reports.

clination near the fault is 36° which gradually increases and becomes 51° on the outside of the harbor. This would give about the same vertical thickness, in which, however, it is taken for granted that the strata concealed under the valley (2) are not affected by any undulation or displacement. It would appear from this that with the conglomerates at the base the whole thickness would be about 3750 feet, and that the fault may be considered a displacement of about 2500 feet.

Groais Island is eastward from Cape Rouge about nine miles. The north end, and probably the whole island, consists of coarse quartzose mica slate, like that of Cony Arm Head, and it is cut by white quartz veins carrying small quantities of copper pyrites. At the north-west corner, cliffs of the mica slate rise vertically up from the water for 350 feet, and the dip appears to be N. 35° - 45° W. $\angle 37^{\circ}$ - 45° . The small island north of this corner consists of strata belonging to the series displayed at Cape Rouge Harbor. They appear to unconformably overlie the mica slate of Groais, their dip being S. 80° W. $\angle 18$, and they consist, at the base of a cliff in which they are seen, of coarse conglomerates with enclosed masses of mica slate in an arenaceous paste. The conglomerates are surmounted by about seventy feet of red and gray sandstones and red slates, which are capped by about thirty feet of conglomerates, interstratified with green arenaceous shales and sandstones, and the surface of some of the sandstones display carbonised comminuted plants.

On reference to Dr. J. W. Dawson, of McGill College, Montreal, so well known for his great skill in fossil botany, the plants belonging to this formation obtained here, and at Cape Rouge Harbor, he has favored me with the succeeding remarks. "Though all the specimens are obscure, there seem to be among them the following forms:—

1. *Psilophyton*, like *P. princeps*.
2. *Lepidodendron*, decorticated, resembling *L. chenungense*.
3. *Sigillaria*, a small portion of a stem not specifically determinable.
4. Striated stems, probably stipes of ferns.
5. *Sphenopteris*, a small obscure leaflet.

"The supposed fossil wood and carbonaceous matter shew no structure. Though the collection does not afford sufficient material to warrant a decided opinion, I should be inclined to refer it to the Upper Devonian, rather than to any other period."

The formation would then appear to be equivalent to part of what have been called the Gaspé sandstones, in the Geology of Canada. The

Reports.

rocks under description certainly bears a strong general resemblance to a portion of this group; but they also, in some degree, resemble the Bonaventure formation of Gaspé, equivalent to the lower carboniferous of Nova Scotia. Until more definite evidence is obtained, however, it will be convenient to class them provisionally, as belonging to the Devonian series.

From the Gaspé sandstones at the eastern extremity of Canada, petroleum springs issue in many places, and as it is from the Devonian series that petroleum is obtained in such abundance in Pennsylvania and in Western Canada, it seems reasonable to expect that available quantities of the substance will reward researches in Gaspé. No springs of petroleum were observed in the vicinity of Cape Rouge Harbor, but concentric nodules of irregular and sometimes elongated form were occasionally met with in black hard argillaceous slates towards the base of the formation, which, on fracture, were found to be charged with the oil, and the fact is one not to be lost sight of.

In the deep cove next west of Spear Point in White Bay, red, green and black slates strike into the land, a short distance west of one of the points mentioned as giving fossils allied to the Upper Silurian types; and it seems probable we have here the junction of the Upper Silurian and Devonian series. Similar red, green, and black slates form the west side of White Bay from Spear Point to the entrance of Salt Water Pond; on both sides of which conglomerates occur, and contorted red and green slates with gray sandstones and conglomerates, continue on the west side of the Bay on the way to Gold Cove at the head. From the lithological character of these rocks and the geographical relation they bear to the Upper Silurian near Spear Point, it is assumed that they are contemporaneous with those of Cape Rouge, and belong to the Devonian series. But as the few fossils obtained are too obscure to be in any way identified, the most satisfactory evidence is still wanting. The disturbances of this part are very great, the strata are frequently inverted or much contorted; so that to follow out the structure minutely would be a labor requiring more time than I felt to be at my disposal. The general arrangement, however, exclusive of minor complications, seems to show that the formation lies in a sharp narrow trough supported by the Upper Silurian series, keeping the west side of White Bay to its head, and there including Miller's Island. Farther inland to the southward the trough may lose its sharpness, and spread out in the valley of River Head Brook.

The presence of small quantities of carbonaceous matter, occurring occasionally in the rocks at Cape Rouge, has given rise to rumours of the existence of coal seams there, and in other locations in the neighborhood where the formation is exposed. One thin exceptional seam of

Reports.

coal is known to occur in the equivalent rocks of Gaspé (Geology of Canada, p. 395.) Its thickness does not exceed one inch, and it is the only one which has been detected in a thickness of strata exceeding 7000 feet belonging to the formation, which are nearly all exposed on the Gaspé Coast, in the Gulf of St. Lawrence. The formation is beneath the horizon of that series of rocks, which from the presence of workable coal seams in it, is truly called the carboniferous; and nothing that we know of the lower formation in America, or that I have observed on the coast of the Northern peninsula of Newfoundland, would justify the expectation of discovering coal beds in it of any commercial importance.

On the north coast of Hall's Bay there occurs a conglomerate chiefly of red color, with interstratified beds of gray and red sandstone. Similar rocks are partially exposed, resting on syenite on the south-east side towards the head of the bay. They form also the islands at the entrance to Indian Brook, and both sides of the brook as far as we ascended. The strata are usually only slightly tilted, while other apparently older rocks come up at intervals considerably disturbed; but a great accumulation of drift which is extensively spread over the valley of the stream generally conceals the older rocks, and the junction of the two was nowhere observed. There is little doubt, however, that the conglomerate rests upon the disturbed rocks unconformably, and it may possibly be of a later age than the Devonian; but the absence of fossils, without further evidence, must leave the matter in suspense. Small specimens of coal which have been found near the upper rock in Hall's Bay are no evidence of any weight on the point, as these are clearly a part of the ancient drift, and may have been derived from carboniferous rocks further north.

V. SUPERFICIAL DRIFT.

Superficial deposits on the Great Northern Peninsula of Newfoundland may be said to have no existence, except in the shape of great erratic blocks, with which the country generally and the valley particularly are covered; nearly the whole of the finer material having been swept into the sea. The surfaces of the rocks are often smoothly rounded; and they sometimes exhibit the parallel grooves and scratches of glacial action. In Beaver Cove of Canada Bay, and at the exit of this bay, they were observed bearing S. 25° E., which is just about the bearing of the valley from the head of Long Arm to the exit of the bay. The most Northern drift deposit of any consequence that was met with was at the head of Little Bay near the Terranova Mine, where there is a thickness of probably fifty or sixty feet of stratified clay, gravel and sand, containing modern marine shells at the height of about forty feet above high water mark. The surfaces of the rocks, next the shore, are here some-

Reports.

times smoothly rounded and marked by parallel scratches. Their bearing is S. 56° W., which is the general bearing of the valley. Further south, the drift becomes more important, and it extends over a large area north-west of Hall's Bay, and up the valley of Indian Brook. The banks of the stream expose high sections of stratified clay, which is sometimes of a reddish, and sometimes of a drab or bluish color. It is usually surmounted by beds of sand or gravel, or an admixture of the two, and it gives, in many instances, a considerable extent of flat or gently undulating country, thickly covered with forest trees, such as white pine, balsam, fir, poplar and birch, some of which are often of large size. Considerable tracts through this part of the country seem to possess the ordinary requirements of agriculture, and would be eligible for settlement. The clays appear suitable for the manufacture of bricks, and the timber, in many places, is sufficiently abundant for the construction of dwelling houses, and such like purposes.

I have the honor to be,

Sir,

Your most obedient Servant,

(Signed),

ALEXANDER MURRAY.

APPENDIX.

ANALYSIS BY DR. STERBY HUNT, F. R. S., &c., &c., &c., GEOLOGICAL
SURVEY OF CANADA.

SPECIMENS FROM NEWFOUNDLAND.

1.—*Ruby Silver*, Placentia Bay, is a pure sulph-arseniet of silver, and gave 65.28 per cent. of silver; theory demands 65.40. This ore is incrustated with a little chlorid of silver (horn silver.)

2.—*Sulphuret of Lead* from Placentia, imbedded in green fluorspar, contains no appreciable amount of silver.

3.—White Mineral from Fortune Bay, is effloresced *Sulphate of Soda* (*glauber salt*) mixed with a little sand, an interesting substance sometimes found with gypseous rocks.

4.—*Copper Pyrites* from Tilt Cove, gave 23.3 per cent. of copper.

5.—*Iron Pyrites* from Terra Nova Mine, contained by a trace of copper and no other metals, (nickel cobalt, etc.)

6.—*Copper Pyrites*, ore from Shaft, No. 4, Terra Nova mine. Of this specimen portions were taken by Mr. Oatey, who crushed several pounds which he declared to be a fair sample of the mass. This yielded 3.1 per cent. of copper, (three and 1-10th per cent.)

E. polystachyon.
Polypodium phegopteris.
P. dryopteris.
Allosorus gracilis.
Asplenium felix-fœmina.
A. virde, (and dwarf variety of Do.)
Woodsia ilvensis.
W. hyperborea (? if *glabella* of authors.)
Aspidium spirulosum, H.
Onoclea sensibilis.
Cystopteris fragilis.
C. bulbifera.

 58 Species.

* These specimens were sent to Professor Gray.

Reports.

Osmunda claytoniana.

Lycopodium annotinum.

There is also a species of *Linaria*, which, I presume, has escaped from gardens.

The above specimens are of interest as additions to the number of catalogued plants of Newfoundland. *Calluna vulgaris* and *Asplenium viride* are particularly so, as adding to the few localities in America previously ascertained for these plants.

I have retained specimens of the species, of which these were duplicates, for the College collection, and return the others in the original papers with loose labels.

J. W. DAWSON.

Reports.

PRELIMINARY REPORT OF A. MURRAY, Esq., ON HIS GEOLOGICAL SURVEY OF 1867.

ST. JOHN'S, NEWFOUNDLAND,
1st March, 1867.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honor to furnish you with the following narrative of my proceedings in the prosecution of the Geological Survey of the Island during the past season, preliminary to a more detailed report which, in due course, I shall be prepared to present through Sir W. E. LOGAN.

As in the course of my investigations it was necessary to visit places on the coast remotely distant from each other, with which there was no direct communication, it was deemed expedient that I should be supplied with a small vessel for that purpose, and accordingly the schooner *A. M. W.*, of Harbor Grace, with a crew of four men, was placed at my disposal.

After some little unavoidable detention in fitting out the vessel, I sailed from St. John's on the 4th July, and returned thither on the 21st November, 1866.

The plan of the expedition was (as already intimated by Sir W. E. LOGAN, in his letter to Hon. F. B. T. CARTER, accompanying my report to him for the year 1864,) to follow out the limits and distribution of the coal formation, which had been partially examined last year, and to trace out any workable seams that might be met with; at the same time to take particular note of the older formations at the various parts that might be visited, in order to be the better prepared to follow out their distribution at a future time.

In connection with the examination, a considerable amount of topographical surveying was required, there being no recently published charts of those parts of the Western Coast which were likely to be convenient as starting points; I therefore deemed it necessary to supply myself with a good chronometer, for the purpose of ascertaining longitude from time to time, by means of which, with latitude found by observations of the sun or a star, the position of such places might be laid down with some degree of accuracy.

The earlier part of the season was devoted to an examination of the Coast between Cape Ray and Cape Anguille, where a good section of the

Reports.

coal formation was obtained, and a survey was made of the Great Codroy River and valley; I then proceeded to the Bay of Islands, examined the Coast between Cape St. George and Round Head on the way, and commencing in Humber Arm, surveyed the main River and Valley for about 50 miles up its course, by which I was enabled to connect the work of the present with that of last year. Lastly—I repaired to the Bay of St. George, with the intention of extending my survey from the South Coast of the Bay by the valleys of the various brooks, so as to connect that part with the survey of the Great Codroy; thereby also obtaining a transverse section of the coal measures of that region. This part of my plan was but partially accomplished, as I only succeeded in surveying the Flat Bay; at the same time, fixing the position of the most conspicuous mountains to the Southward by triangulation, and scaling two of the streams, viz., the Barachois and Flat Bay Brooks.

My operations during a considerable part of the season, and particularly while in St. George's Bay, were materially retarded in consequence of a very serious accident which I had the misfortune to meet with while examining the cliffs near Cape St. George, by which I was rendered incapable of walking without assistance, and had to limit my investigation to such places as were more or less accessible by a boat or canoe. Under these circumstances I was with the greatest reluctance compelled to abandon my intended visit to the spot where a three-foot seam of coal is represented to exist by Mr. JUKES in his work on the Geology of Newfoundland, and which I had resolved to examine and trace to its furthest limits, in order to ascertain whether or not it was likely to prove of commercial importance.

Previously to sailing from St. John's, I visited Topsail and Kelly's Island in Conception Bay, for the purpose of ascertaining the relation between the rocks which form the lofty cliffs of the main land there, and those of the sea coast and the group of Islands; a subject which may probably turn out to be one of paramount importance when further investigated, in revealing the geological structure of the Island.

A very good section of the more recent formation was obtained on Manuel's Brook, at Topsail Head, and at Kelly's Island; but the obscurity or absence of organic remains renders it still inadvisable to express too decided an opinion as to the horizon to which they belong, or the age of the series upon which they repose unconformably.*

*Since the above was written a fossil has been placed in my hands by C. F. Bennett, Esq., which is said to have been found by Mr. A. Harvey of this place, on the larger Belle Isle in Conception Bay. A photograph of this fossil was forwarded to E. BILLINGS, Esq., Palaeontologist of the Geological Survey of Canada, who at once recognised it to be "*Cruziana Semiplicate*" (Salter), a form characteristic of the singular flags near the extreme base of the Silurian system.

Reports.

Returning from the westward, several parts of the Southern Shore were visited, and every possible opportunity taken to obtain information respecting mineral indications and the character of the rocks with which they were associated. Thus some considerable time was occupied in Hermitage Bay and Bay Despair, where I was much indebted to Mr. Bradshaw, Collector of Customs at Gaultois, for assistance; and finally the season was concluded by visiting the LaManche Lead Mine, near the head of Placentia Bay, touching at Burin, Isle Valen, and other parts on the western side of the Bay, on the way thither.

GEOGRAPHICAL DESCRIPTION OF THE GREAT CODROY RIVER.*

The Great Codroy River runs into the sea in lat. $47^{\circ} 50' 14''$, long $59^{\circ} 19' 55''$, between fifteen and sixteen miles north from Cape Ray, and about six miles south easterly from Cape Anguille. The entrance from the sea is very narrow, passing between banks of sand and gravel, and several bars and reefs of the same material stretch outwards to a considerable distance, which moreover are frequently shifted in position by the violence of the storms from without by which they are assailed, rendering the approach even for small craft very difficult and dangerous; although when once inside there is an excellent harbor, sheltered thoroughly from all weathers.

Measuring from the lower part of the estuary, a little way North from the point where the latitude and longitude were ascertained, (*see plan*,) the general courses ascending the river are as follows.

| | Miles | Ch's | | Rise. |
|-------------------------------|-------|------|---------------------------------|------------|
| 1st reach, N. 81° E. | 6 | " | to head of estuary or lagoon. | Tidewater. |
| 2nd reach, N. 55° E. | 8 | 60 | to the lower main fork (say). | .18 feet |
| 3rd reach, N. 53° E. | 4 | 60 | to second main fork, | .15 " |
| 4th reach, N. 86° E. | 3 | 25 | to the end of survey, | .12 " |

The lower part of the first reach is wide and open, but flat and shallow over the whole area, except where the main channel cuts through, where there is sufficient water to float vessels of considerable size for upwards of three miles, when high tide. The upper part of the same reach also spreads over a large space, but it includes some low Islands which extend nearly to the point where the current of the river becomes perceptible.

The second reach is more or less rapid, and at a little over four miles

* All the bearings are from the true Meridian.

Reports.

up it, or about half way to the lower main fork, there is a little fall of about 2 feet; the total rise on the whole reach being estimated to be about 18 feet. At the head of this reach the river is split into two streams, of about equal size, the one turning a little North towards the Anguille range of hills, for about 3 miles, after which it bends again to the Eastward at the Southern base of these hills, and runs parallel to them; while the other bears upwards on the third reach in nearly the same course as before, gradually approaching the Cape Ray or Long Range of mountains, which it enters on the 4th reach above the second large fork. The second fork joins the main river on the south side, proceeding from a gorge of the Cape Ray mountains, at about one mile distant from it. Between the 1st and 2nd forks the main river was estimated to fall at the rate of about three feet in a mile, making a total of about 15 feet, and the upper reach, where it becomes a mountain torrent, at the rate of about 4 feet, giving about 12 feet more to the end of the survey; thus giving a rise in the measured length of the stream of about 45 feet.

Besides the forks already mentioned, there are numerous tributaries to this river falling in on either side, among the most important of which there are two in the lower reach on the north side, flowing from the Anguille range; one opposite the 1st. fork, at the head of the 2nd. reach, falling from the Cape Ray mountains, and one coming in opposite the 2nd. fork, at the head of the 3rd. reach, which proceeds from the north eastward. The stream at the time of my visit was low, and the measurements had to be made on foot all the way, but when well supplied with water it is easily navigable for canoe up to the second fork.

On the coast, four miles south from the outlet of the Great Codroy River, is Larkin Point, immediately south of which the waters of the Little Codroy River are poured into the sea.

This stream runs parallel to, and not far from the north-western base of the Cape Ray range for the whole or greater part of its course, receiving many tributary streams from the mountains on its way. Above the estuary, at its mouth, it is very shallow and rapid, and inaccessible for canoe navigation.

The Cape Ray mountains, which bound the fine valley drained by these two streams on the south-east side, are bold, bare, barren and picturesque, but they nowhere attain an elevation much above two thousand feet, and are for the most part, according to measurements made both by triangulation and barometrical observations, considerably below that altitude. On the other hand the Cape Anguille range,

Reports.

which bounds the valley on the northern side, presents a soft and gentle outline, where the higher elevations attain an altitude of from one thousand to thirteen hundred feet, richly covered by forest nearly to the summits.

The flat or low land, forming the lower part of the valley between the two ranges of hills, extends, on the sea coast, from the neighborhood of Trainvain Brook, three miles South from the mouth of little Codroy River, to within a short distance of Cape Anguille, giving a breadth of twelve statute miles ; but the hill ranges converging slightly towards each other in their North eastern course into the interior, the valley gradually becomes more and more contracted in width, until shut in nearly altogether, where the main stream at the end of the survey becomes split up among the mountains of the long range into a succession of small turbulent mountain brooks.

The area occupied by level or gently undulating land in the valley amounts, by rough measurement on the plan, to about 7½ square miles, or 48,000 square acres, a very large proportion of which is available for settlement. For the most part, the country is well wooded with stout mixed timber, consisting chiefly of Spruce, Balsam-firs, Yellow Birch, frequently of large size, White Birch and Tamarack ; but there are also frequent spots of barren or spongy marsh entirely void of timber, or only maintaining a very stunted growth of evergreens or small tamarack bushes. The Islands and flats of the lower part of the Great Codroy River yield a luxuriant growth of wild grass, affording an ample supply of admirable fodder for cattle. Along the sea coast, between Trainvain Brook and the little village of Codroy, the country is partially settled all the way, the attention of the settlers being about equally divided between the cultivation of the land and fishing operations ; but up the Great Codroy River, which is more or less occupied on either side of the estuary, the calling of the inhabitants appears to be more nearly purely agricultural, and it may be fairly stated that, notwithstanding the very rude process by which the land is cultivated, the crops produced of grass, grain and roots, highly testify to the excellence of the soil in which they grow. Cattle and sheep are raised upon most of these small farms, producing most excellent beef and mutton, besides dairy produce of the very best description.

The greater portion of the Anguille, and some portions of the lower slopes of the Cape Ray ranges also, are quite capable of improvement, and if cleared of timber and sown in grass, would afford grazing land not easily surpassed in any country.

Reports.

ST. GEORGE'S BAY AND COAST TO HUMBER ARM, BAY OF ISLANDS.

While examining this part of the Western shores, I took every available opportunity of getting astronomical observations, in order to correct, as far as possible, certain discrepancies suspected to exist in the published charts. The result has proved of importance, as a very considerable error in both latitude and longitude was found to exist in the representation of a great part of St. George's Bay, and the Bay of Islands.

These corrections must be taken only as approximative, but as the geographical position, found by the observations taken at one or two well marked places, very nearly coincided with those determined by Captain S. Cloue of the French Imperial Navy (whose admirable and well known accuracy requires no comment), they may be taken as moderately trustworthy. St. George's Harbour, the only harbour in the Bay, was one of the parts found to be very inaccurately represented, not only as regards geographical position, but in the contour of the coast, so that it was deemed necessary to triangulate the whole of Flat Bay in order to get sufficiently accurate data to start with before fixing the position of the mountains and rivers of the interior. Harbor or Sandy Point, at the entrance to Flat Bay, is in latitude $48^{\circ} 27' 27''$ N. and longitude $58^{\circ} 30' 30''$ W. It is the termination of a long low spit of gravel and sand, projecting from the mainland for nearly six miles, and enclosing Flat Bay and St. George's Harbor. There is an excellent and secure anchorage for vessels of nearly all sizes immediately under this point, and a moderately deep, although somewhat tortuous and narrow channel, runs up nearly the whole length of Flat Bay, but all the rest of its area is exceedingly shallow, much of it being entirely dry at low ebb tides.

A stream known as the Barrachois brook falls into the sea a little was outside of Flat Bay, the entrance being about S. E. of Harbor Point, and another of about equal size, called the Flat Bay brook, falls in near the head of Flat Bay. Both these streams were found to be navigable for canoes for a considerable distance.

The course of the Barrachois in a general bearing is N. 65° E. for eight and quarter miles, at which distance it opens out into a suite of small lakes at the base of the long range of mountains, bearing upwards on the same course for about two and a half miles more, then turning sharply to the southward, the upper lake lies for nearly two miles transversely across the hill range, and contracts again at the end of that distance into a narrow and rapid mountain brook. The Flat Bay brook bears upwards on its general course S. 76° E., seven miles 60 chains, through an undulating country to the mountain range, which it intersects through

Reports.

a narrow gorge, at that distance, still maintaining the same upward bearing for some four or five miles more in a narrow mountain valley, receiving numerous tributary streams on either side.

The stream is very rapid, from the outlet to the mountains, but after entering the gorge the current becomes moderate, as far as it was ascended. At the point where the main stream enters the mountain gorge it is joined by a tributary on the right side flowing from the south-eastward, in the forks of which stands a remarkable and prominently conspicuous hill, which was termed the Cairn Mountain, from the circumstance of a monument having been erected on it, and which afforded an excellent object for triangulation. The summit of this mountain where the monument stands, was found to be ten hundred and twelve feet above the level of the sea. The north-western flank of the long range of mountains will thus be seen to run in a nearly straight direction, about N. 36° E., from the upper forks of the Codroy towards the Cairn mountain on Flat Bay Brook, crossing the Barrachois at the lakes, and striking for Hare Head at the head of the Grand Pond. Between the hills and the southern coast of St. George's Bay the land is level or undulating, for the most part, thickly grown over by a fine growth of mixed forest timber, and drained by numerous streams, several of which besides the two already described, are navigable for small boats or canoes for several miles inland. This tract is bounded on the south-west by the high land of Cape Anguille, which rises into a wooded mountainous country about half way between the Cape and the head of Flat Bay, extending across to the southward to the northern main fork of the Great Codroy River. The maximum width of the level region between the sea and the long range is from ten to twelve miles, but this width decreases advancing to the north eastward, and is reduced to about five miles opposite the Cairn Mountain, while it becomes narrower still at the Barrachois brook.

By a rough measurement made upon the plan, the area of the region lying between the mountains and the sea is about one hundred and ninety two square miles, or one hundred and twenty-two thousand eight hundred and eighty square acres, a very large proportion of which is available for settlement. On the north side of the Bay St. George, also, there is a considerable area of fine agricultural country, extending from the coast between Indian Head and the isthmus of Port-a-Port, to the range of the Table Mountains, roughly estimated at about ten miles in length by an average of three in breadth, or about thirty square miles, equal to nineteen thousand two hundred square acres. The present settlement of this fine region is limited to some straggling farms along the coast on either side of the Bay, on which, however, excellent crops of

Reports.

grain grass, potatoes, and turnips are raised; winter wheat has been grown successfully on Mr. Romain's farm on the north side of the Bay; and the hardier varieties of that grain might no doubt be cultivated to a larger extent, where there a mill in the country to make it into flour; and as there is ample water-power upon every brook, mills would readily be constructed if an impetus were once given to purely agricultural pursuits. Many of these small farms even now maintain good stocks of cattle, sheep, horses pigs, &c., &c., the condition of all of which gives ample testimony to the capabilities of the soil on which they have been raised.

THE HUMBER ARM AND RIVER.

Considerable discrepancies were found to exist in the position of this coast as represented in the published charts, especially towards the mouth of the Humber River, where there was found to be an error of upwards of two minutes of latitude; and as one prominent position where observations were taken—namely, the gravel point in Lark Harbour—agrees with the result obtained by M. Clouc at the same place, within a few seconds, the outline given upon the accompanying plan may be relied on as tolerably near the truth.

Brake's Landing, at the entrance to the Humber River, was found to be in latitude $48^{\circ} 57' 53''$ N. and longitude $57^{\circ} 55' 32''$ West. The following are the bearings and distances of the river, exclusive of minor turns up its course, as far as surveyed.

- 1st. Course.—From Brake's Landing to the head of the lower rapids, at station 9, S. 61° E., distance three miles and four chains.
- 2nd. Course.—From station 9 to entrance into Deer Lake, N. 60° E., distance eight miles and sixty-three chains.
- 3rd Course.—Deer Lake, from Governor's Point to head of Lake, N. 42° E. distance fifteen miles and seven chains.
- 4th. Course.—Head of Deer Lake to forks of Grand Pond, N. 44° E., distance five miles and fourteen chains.
- 5th. Course.—From Grand Pond forks to Beaver Pond, N. 38° E., distance four miles and twelve chains.
- 6th Course.—From Beaver Pond to Great Bend, N. 56° E., distance eight miles and forty-six chains.

The upper part of the arm, towards the entrance to the river, is very shallow over a large area, much of which becomes nearly dry at low

Reports.

water ; but there is a deep channel, although somewhat tortuous, by which small vessels can enter the stream : and there is very good anchorage outside the shoals a little way westward of Brake's Landing.

The first or lower course of the river passes through a narrow gorge bounded on either side by lofty calcareous crags, which in some parts rise nearly vertically from the water's edge in cliffs of one thousand feet or more, the whole body of the magnificent river being pent up within sometimes less than a chain in width. The current is tolerably strong and the water deep, in this course, and towards the end of it there is a moderately strong rapid. Above this rapid the river opens out wide, flowing through a very picturesque valley, the current being moderate all the way until within about a mile of the lower end of the Deer Lake, where another pretty strong rapid occurs. The rise from the sea to the level of Deer Lake was estimated to be only about ten feet. Following the course over Deer Lake to the junction with the Grand Pond branch, the current is sluggish, the river wide, sometimes opening to upwards of a quarter of a mile the water usually deep, and is very easily ascended by boats of any ordinary draught. A little way above the junction of the Grand Pond branch, the stream becomes very turbulent, the first rapid making a fall of eleven feet in about a quarter of a mile ; and it is more or less rapid and often shallow and difficult of ascent for canoes all the way, except at two parts, where it opens into what are called the Seal Pool and Beaver Pond, where it is still wide and deep. There is also a stretch of some two miles, where the current is moderate, below the great bend, above which it turns up in a south and southwest course for about a mile, and then, bending round again in the prevailing north-eastern direction, for another mile and a half, comes to a vertical fall of about ten feet, where our ascent terminated. The estimated rise above the sea at the top of the fall was about ninety feet. Above the fall the general course is said to be a little eastward of north for about eight or nine miles, where it reaches within less than ten miles of the head of White Bay ; and then, turning westerly for a few miles, runs along the base of the mountains, and finally turns south westerly and terminates at Adce's Pond, within about twelve miles distance from the head of Deer Lake, and some twenty miles from the eastern arm of Bonne Bay.

The Grand Pond branch was only ascended for a little over a mile, at the end of which distance the stream becomes violently rapid, and although practicable for canoe navigation all the way to the Grand Pond, it is exceedingly difficult and dangerous.*

*Judging from the description given of these rapids, the rise must be at least about thirty-eight feet ; therefore allowing about two feet for the fall of the stream from the forks to Deer Lake, and ten feet as the height of Deer Lake, the Grand Pond will be about fifty feet above the sea, instead of thirty-six feet, as given last year ; and all the other heights on the west side of the water-shed will be also proportionally higher than represented.

Reports.

The hills at the lower reach of the river, although very precipitous and broken, are nevertheless covered by a dense growth of forest trees, among which are many pines and spruces of large size, well adapted for spars or lumber.

Above and immediately upon entering the 2nd reach, the valley opens out with a narrow fringe of fine flat land on either side of the river, lying between it and the mountains, which varies in width and extent to Deer Lake; while at Deer Lake it expands gradually more and more, and on the northern side it is in some parts upwards of three miles wide. The southern side is more contracted until reaching towards the upper end of the lake, where a great expanse of flat or rolling country spreads away to the eastward and northwards, reaching in the former direction to the Grand Pond. Above Deer Lake the flat country is of great breadth, more particularly above the forks; the mountain range which bounds it on the west side pointing in the direction of Adee's Pond at head of the river on one hand, while on the other it extends to the base of the low wooded range west of Sandy Pond, and this level tract extends upwards on the river's course to the western bend, which is said to be less than ten miles distant from the head of White Bay. By a rough measurement of this large tract of country made upon the plan there would be an area of about four hundred and twenty-nine square miles, or two hundred and seventy-four thousand five hundred and sixty square acres, at least one half of which is probably well adapted for raising almost every kind of agricultural produce.

Independently of its agricultural capabilities, this fine tract of country seems to present inducements for other branches of industry and enterprise, in the quality of its timber, much of which is excellent. Tamarack or juniper is not rare; yellow birch of large dimensions is abundant; white pine and spruce grow in the greatest profusion, frequently of a size and quality not greatly inferior, if not equal to the best that is now largely brought into market in Gaspé and other parts of the lower province of Canada. The natural facilities this part of the island presents for communication also from shore to shore are very great, the valley is easily accessible by water from the Bay of Islands to the Grand Pond forks while the country further north is well adapted for laying out roads, and a road of less than ten miles from the northern bend would open up the whole from the head of White Bay.

Water power to drive machinery is everywhere obtainable, either in the main river as on the upper part of the stream, or in the numerous brooks that fall into Deer Lake and the lower reaches.

Thousands of square miles of country have been laid out in townships

Reports.

and already partially settled in Canada, either for purposes of lumbering or farming, on the northern shores of lake Huron and many parts of the lower Province, far inferior, in most respects, to this region of Newfoundland, which there can scarcely be a doubt is capable of supporting a very large population.

The mountains of the region, although very rugged and unusually barren at the summits, do not reach in any case a very high elevation. The range known as the "Blown-me-down," which runs to the water's edge, destitute of timber from top to bottom, opposite Harbour Island, at the entrance to the arm, appears to be the highest, one summit of which was found by triangulation to be two thousand and eighty-six feet above the sea. Near the river the most conspicuous of the hills, and apparently about the highest, is Mount Musgrave, (called so in honor of Your Excellency's recent visit to this part of the country.) which, towering over the lower ranges towards the mouth, and bearing directly on the line of the lower reach, attains altitude of eighteen hundred and sixty-four feet. Further inland and towards Deer Lake the general heights are still more moderate, the highest measurement being only ten hundred and forty-one feet over the level of the lake.

In entering on the geological part of the subject, I shall in the meantime confine my remarks to an account of the general distribution of the carboniferous series, and to the geographical and geological position of the various economic materials which have come under my notice, deferring a more minute detail of the facts and circumstances ascertained, until the collection of specimens already forwarded to Montreal have been duly examined and analyzed, when I shall be prepared to send in a report to Sir W. E. LOGAN.

DISTRIBUTION OF THE CARBONIFEROUS FORMATION.

The rocks recognized as belonging to the carboniferous age occupy three distinct areas, being separated from each other by ridges of the older formations, upon which they unconformably repose. For convenience they may be classed as the St. George's trough, the Port-a-Port trough, and the Inland trough of the Humber River and Grand Pond.

The south-eastern edge of the St. George's trough follows the base of the Cape Ray or long range of Laurentian mountains, from near the entrance of Trauvain, brook in nearly a straight line towards the upper forks of the Great Codroy River, and then apparently still keeping towards the base of the mountain range to the Cairn mountain in Flat Bay-brook, crossing the Barrachois brook a little below the lakes, and

Reports.

striking for the arm of St. George's River. The northern edge of the same trough appears to be partially divided by a mass of crystalline metamorphic rocks, the age of which has not yet been satisfactorily ascertained, which forms a sharp ridge of hills terminating at Indian Head, on the west side of which the out-crop of the formation sweeps round towards the base of the Table Mountain Range of Lower Silurian limestone, and runs out on the shore a mile west of Romain's brook, near the isthmus of Port-a-Port.

The Port-a-Port trough is divided from the St. George's trough by a ridge of Lower Silurian limestone, which extends along the coast across the measures from Cape St. George to a point nearly opposite to Red Island. Red Island is all a coarse conglomerate of carboniferous age, and from it the outcrop was supposed to strike easterly across the peninsula of Port-a-Port into Port-a-Port Bay, the whole country to the north of which was supposed to belong to the same formation, except the high land called Round Head, which probably protrudes through it. The flat valley of Cod River is also probably spread over by rocks of carboniferous age, but was not examined.

The western outcrop of the Humber trough strikes inland from the lower end of Deer Lake, resting against the eastern flank of the long range of Gneissoid mountains, which run on their northerly course towards Adee's Pond at the head of the river, and then along the left bank of the river towards the western shores of White Bay. The eastern outcrop runs along the edge of the upper end of Deer Lake, making a narrow fringe between the lake and gneissoid mountains, until within about a mile of its head, when it sweeps round to the eastward, towards the Grand Pond, resting on the flank of the Laurentian hills, which constitute the nucleus of the ridge between the two great lakes. The remainder of the outcrop of the inland trough within the Grand Pond country, has already been described in a former communication.

The coast between Cape Anguille and Larkin's Point, at the mouth of the Little Codroy river, displays some fine exposures of this formation. Between Cape Anguille and Codroy Island the exposures consist of strong beds of dark grey sandstone, dark blue or blackish limestone, coarse conglomerate, and a mass of black indurated shale, with their seams of snowy gypsum interstratified with beds of limestone and calcareous sandstone. The western side of Codroy Island exhibits a section of dark grey sandstone, in thick beds, sometimes of conglomerate character, the pebbles arranged parallel to the stratification, with brownish and dark blue, hard, compact, slightly calcareous sandstones, some thin bedded greenish coarse-grained micaceous sandstones, with brown arenaceous and micaceous shales; while on the eastern side, at the point of

Reports.

the cove, some beds of hard dark blue limestone alternate with brown, yellow weathering sandstones in thin beds. In mostly all of the above-mentioned strata, comminuted and carbonized plants were observed, in some cases in great profusion, especially among the softer sandstones and shales; and at the northern end of Codroy Island an accumulation of vegetable remains of about two inches thick may be styled a thin seam of coal.

The coast southerly from Codroy Island displays cliffs of red and green marls, with thinnish beds of black or dark brown, sometimes nodular, limestone, associated with which are vast masses of gypsum; the strata very much corrugated, contorted and broken, especially at the immediate contact with the gypsum, which sometimes contain great fragments of beds of limestone enclosed within the gypseous paste. Towards Woody Cape the high precipitous cliffs consist of green and reddish calcareous sandstone, with greenish, black and dark blue frequently nodular limestone and calcareous shales in nearly vertical strata. Fossil shells were found in some of the calcareous beds; calamites and other plants are abundant in some of the sandstones.

Between Woody Cape and Stormy Point the gypseous masses with their associated measures, are again brought out on the coast, the strata being sharply folded over and repeated; beyond Stormy Cape the older strata are concealed up to the entrance to the Great Codroy River. In consequence of the numerous folds and repetitions by which the rocks are affected between Cape Anguille and Stormy Point the thickness of the accumulation remains somewhat uncertain.

On the coast between the Great and Little Codroy Rivers a section of the measures was obtained in pretty regular sequence, consisting of green and red conglomerates, sandstones, red and green marls, and red, green and black shales, the whole accumulation of which amounted to a thickness of two thousand three hundred and six feet. All this mass of strata is very micaceous, and most of the beds are more or less characterised by the presence of carbonized plants,—in some parts the carbonaceous material derived from an accumulation of them being found packed in irregular beds and nests: but in no case did there appear to exist anything like a workable seam of coal.

The course of the Great Codroy River runs a little obliquely across the lower portions of the measures, the calcareous parts, with masses of gypsum, coming out on Ryan's brook a little way back from the estuary; while the limestones were observed on or near the right bank of the river, both above and below the falls, and further on crossing the 1st fork about a mile and a half above the junction of the streams.

Reports.

The measures, both on the coast and the river sections, were found uniformly to dip to the south-eastward (except where a few small disturbances occasion a slight break or undulation) towards the Cape Ray range of mountains, until within a very short distance of the gneiss, where they were usually either highly tilted, inclining in the opposite directions, or vertical. Thus disturbances were visible on the coast near Trainvain brook, on the banks of the streams near the mountains in the neighbourhood of the 1st fork, and at the junction of gneiss above the 2nd fork, affording evidence of a great break or fault, which shall presently be more particularly referred to.

The high land at Cape Anguille runs upon the axis of an anticlinal, the north eastern extension of which is mentioned by Mr. Jukes as crossing the 1st and 2nd brooks in the country about three miles from the coast of St. George's Bay. On both sides of the Cape the rocks are disturbed, but are more conspicuously so on the St. George's Bay side, where the cliffs show many complicated contortions; and whether any other formation may protrude through the carboniferous, on or near the crown of the anticlinal arch, has not yet been ascertained. Mr. Jukes also mentions the recurrence of the gypseous masses and associated rocks, resembling those of Codroy, on either side of the anticlinal on the 2nd brook, and at eight miles from the coast he states having seen a bed of coal three feet thick, which however was not traced. At about that distance from the coast there is reason to suspect that the great fault already alluded to may have the effect of cutting off part of that seam, and bringing the lower measures once more to the surface on the south-eastern side.

Evidences of the presence of the gypseous part of the formation were perceived near the base of the mountains, a short distance to the westward of the Cairn Mountain, where were a set of enormous cavities, resembling inverted cones of almost perfect symmetry, sometimes nearly one hundred and fifty feet in diameter at the surface, with a depth of from sixty to eighty feet to the apex of the cone, in the strike of which some fragments of Gypsum were found on the bed of a small brook which falls into Flat Bay brook just before it enters the gorge of the mountain range. A coarse conglomerate was also observed on this brook associated with bright red marls, and some small fragments of coal were found strewed at a few parts along its bed and banks.

Course conglomerate is exposed upon the banks of Flat Bay Brook, dipping irregularly to the eastward, which apparently strikes across to Flat Bay, where, with a north-easterly inclination, it rests upon beds of limestone; and at the mouth of Flat Bay brook beds of limestone are

Reports.

exposed, with red marls and conglomerate beds resting on them, which dip to the northward.

The mode of occurrence of the lower measures of the formation, with the associated masses of gypsum on the north side of St. George's Bay, were described in the narrative of last year. A fault is there represented, letting down a confused mass of carboniferous limestone among the limestones of calciferous age inside of Port-a-Port Bay, and a calcareous vein holding galena is represented as indicating the position of the dislocation. The effects of this fault were observed again this season on the outer coast near Red Island, where limestone holding fossils of carboniferous age were found entangled with Silurian strata, the rocks being thrown down on the northern side, while patches of flat beds (which however were not accessible) resting in unconformable relation to the upturned strata of the cliffs were supposed to be of the same formation. The disturbances which affect the cliffs on the main land at this part do not reach Red Island, which is of a coarse red conglomerate, with intercalations here and there of great lenticular masses of coarse brown sandstone. The cliffs on the south side of the island attain an altitude of well nigh three hundred feet, while at the northern extremity they are not much over one hundred feet, shewing a gentle inclination very regularly to the northward.

The flat land of the peninsulas between the sea and Port-a-Port Bay was considered, from the aspect of the country, to be spread over by the arenaceous and calcareous rocks of the lower portions of the carboniferous formation; but in consequence of the accident to myself, which occurred while on this part of the coast, it was not visited.

At Deer Lake the formation is again recognized on the west side, in some strong beds of coarse conglomerate dipping at a very small angle to the north-eastward, which line the lake shore, a little way north from the island near the lower end of the lake; and by numerous large angular slabs of red, green, and brown sandstone which are strewn abundantly on the banks and shores further up, and are exposed in low cliffs on a brook called Coal Brook, where the strata are nearly horizontal. On the eastern side of Deer Lake the conglomerate is exposed, with some beds of limestone at its base, turned up vertically, or inclining at a very high angle towards the lake, striking along the shore and resting against the gneiss of the mountains, the disturbance being evidently connected with a fault running in a north-easterly direction, with a down-throw on the north-west side. Above the forks of the Grand Pond branch the banks expose strata of very bright red sandstone with bright red marls, usually quite or nearly quite flat, until

Reports.

within a short distance of the lower or John's Fall, where the rock consists of brownish and red sandstone in thickish beds which are somewhat tilted with a dip towards the north-west. At John's Fall the rock is a coarse conglomerate with red sandstone, the former in beds sometimes upwards of five feet thick, which is underlaid by black and greenish calcareous shale. Above John's Fall the banks, which sometimes are upwards of thirty feet high, exhibit black and greenish calcareous and argillaceous shales, interstratified with beds of dark grey nodular limestone, varying in thickness from one to seven inches, in nearly horizontal strata, which continue to be exposed up the long reach at the great bend and on either side of the river to the foot of the upper fall, where they again dip below the coarse conglomerate, inclining at a moderate angle up the river to the north-eastward showing a flat anticlinal between the two falls.

There appears to be evidence to show that the great fault of which mention has been made as affecting the strata in the Great Codroy valley, intersects the Island diagonally from shore to shore, running in an almost perfectly straight line from near the entrance of the little Codroy River to White Bay.

The coal rocks were perceived to be disturbed along the base of the Cape Ray mountains, wherever visited from Trainvain brook to upper the forks of the Great Codroy, at the base of the hills near the Cairn Mountain, on the east side of Deer Lake, and near John's Fall, on the Humber—while the Silurian limestones at the head of Spruce brook, which are directly in the line of the dislocation, are much disturbed, and the coarse conglomerates of Miller's Island and the western shores of White Bay are turned up vertically. The value of this fault was not accurately ascertained, but as in some parts, as at Trainvain brook, it seems to bring up strata low down in the coal formation, against measures which may be assumed to be three thousand feet higher in the formation, it may be equal to that amount and probably more.

I have been thus particular in describing this dislocation, not simply as a feature of great geological importance, but as materially affecting the probability of workable seams of coal being found to exist in the coal measures of the interior. There is, no doubt, a very considerable breadth of country spread over by coal measures between Sandy Pond on the one hand and Adee's Pond and the Laurentian Mountains on the other; but the strata being mostly flat, as has been shewn in the valley of the Humber, and an upthrow fault occurring on the Sandy Pond side of the trough, bringing lower measures to the surface on the eastern side of the dislocation, it is not unreasonable to infer that the whole or greater amount of strata consist of lower members of the formation, in which, so far as at present known, seams of workable coal do not appear to exist.

Reports.

ECONOMIC MATERIALS.

The economic materials observed during the season, at various parts, were Copper, Lead, Iron, Plumbago, Building Stones of Granite, Sandstone, and Limestone, Limestone for burning, Whetstones, black, white and variegated Marbles, Serpentine, Gypsum (white and grey), Red Ochre, Shell Marls, Peat and Clay.

COPPER ORE.

A beautiful sample of vitreous grey copper ore was obtained from Rock Cove, near Grandy's Point in Placentia Bay, which appears, by the description given of the locality, to run in veins; and indications of similar ore, together with native copper, are reported to exist at various parts in Fortune Bay: copper was also observed associated with other minerals at the LaManche Mines in Placentia Bay. At this place it is chiefly indicated by the presence of green carbonate of copper diffused through the calcareous matrix of the vein, and nodules of malachite occur usually near the walls of the lode.

LEAD.

Crystals of galena were observed in quartz veins, cutting the gneiss of the island, on Deer Lake, and on the point of the main land opposite. The rock at this part is chiefly mica slate constituted for the greater part of fine grains of white quartz, and small scales of silvery mica; small coarse garnets and cubical iron pyrites are sprinkled through the mass in abundance. The strata are cut by numerous veins of semi-translucent white quartz, the largest of which is about three feet wide, running in a north and south direction, with numerous smaller veins radiating from it east and west. A few specks of galena were observed in the main vein, but it was chiefly in the smaller ones that the ore seemed to occur.

At Parrody's Head, near the head of the Bay Despair, galena was found in white quartz veins through which calc-spar is disseminated, but not in large proportion. These veins run irregularly, intersecting black plumbagenous occasionally slightly calcareous slate, which was supposed to be of lower Silurian age, and is the rock of the country over a very large area of the surrounding region.

The LaManche mine is situated near the north eastern extremity of Placentia Bay, between Little Southern Harbor and Little Bay. The vein that is worked for lead varies in width from three to six feet, and is chiefly of calc-spar, much of which is tinged of a pale pinkish ame-

Reports.

thystine color. Sulphate of barytes, quartz and fluor spar are more or less distributed through the vein, the walls of which are frequently lined with beautiful crystals of amethystine quartz, and occasionally with green or blue malachite.

The ore is distributed irregularly through the whole thickness of the vein, sometimes in "veeghs," as termed by the miners, or pockets; but there appears to be also a pretty regular and continuous string of ore near the middle of the lode, of from one to four inches thickness, from whence the "prell ore," as it is termed, is derived. The run of the vein is about N. 63° E. from the water's edge, and its altitude vertical, maintaining that course and altitude with great regularity, and being traceable on the surface for a considerable distance. The lode cuts a set of green, very hard and brittle compact cherty or jaspery slates, which cleave exactly with the bedding, and for the most part weather an opaque white, which discoloration extends into the stone for an inch or more. The dip on the south-eastern side of the lode is about N. 27° W. \sphericalangle 25°; that on the north side points in the same direction but with an increased rate of inclination. From the position of the vein to the entrance of Little Southern Harbour the measures gradually accumulate upon this dip, but as there are several dislocations observed in the cliffs it is probable the same strata may be repeated. A considerable amount of red strata are visible in the cliffs, of a hard jaspery character, alternating with rock of a dark bottle-green color, having the aspect of diorite; but being incapable of landing to examine that part of the coast, I am unable to state the mineral character with certainty.

It will require much further investigation to determine with any amount of certainty the geological horizon which these rocks may represent; but it may be stated that the mineral character and general aspect of the strata bear a very strong resemblance to the rocks at the Topsail cliffs in Conception Bay, where the evidence tends to show that rocks of lower Silurian age succeed them unconformably. Indications of lead ore, moreover, have been perceived near the coast between Topsail Head and Portugal Cove; and more recently the same ore has been found in veins intersecting the slates and sandstones in the immediate vicinity of St. John's*

IRON.

Near the junction of the coal measures with the gneiss on the Great Codroy River some bands of a very ferruginous character were observed interstratified with the latter rocks. These bands are of a reddish brown color, hard, brittle and with a conchoidal fracture, the broken surfaces presenting occasionally a metallic lustre.

* I was informed at the LaManche mines that the amount of ore shipped during the years 1858-9 amounted to 2,354,987 lbs., or 1049 2227-2240 tons.

Reports.

Much of the gneiss in this locality is of a bright red color, which is derived from the prevalence of bright red orthoclase felspar over the other constituents, which consist of small grains of semitranslucent white quartz and small scales of mica.

In this locality, and for some distance down the stream, large slabs and fragments of pure white crystalline limestone, with specs of graphite and silvery mica, were observed to occur in abundance; from which circumstance it was assumed that strata of that character must rest *in situ* somewhere among the Laurentian Rocks further into the interior.

Some beautiful specimens of magnetic Iron ore were procured from the neighbourhood of the Cairn Mountain, near Flat Bay Brook, which, judging from the quantity distributed over the surface of the ground, is probably derived from a large and important mass in that neighbourhood. The rocks with which the ore seems to be associated are of an opaque white color, for the most part being chiefly composed of white orthoclase felspar with quartz, in a small proportion, and Labradorite.

PLUMBAGO.

This mineral was found to be pretty generally disseminated in a set of black shaly slates on the islands and main shores towards the head of the Bay Despair. On the north side of Richard's Island it has been taken out in considerable quantities by the neighbouring residents for usual household purposes, and it was observed to occur in the same rocks on the banks of the brook by the Indian settlement, at the entrance to the Conne River. The mineral appeared to be in the greatest abundance where the strata were affected by cracks or dislocations, which, on Richard's Island, Isle Bois and the northern side of Long Island, are of frequent occurrence. The age of these plumbaginous slates is doubtful, but, it was considered probable, will prove eventually to be lower Silurian, and may be the equivalent of the slates and shales of Manuel's Brook and the islands of Conception Bay.

The slates in Bay Despair are usually more or less calcareous, and are intersected by veins of both calcspar and white quartz.

They usually display a fibrous structure, with a silky glistening surface, sometimes covered over by remarkable crystals, and abounding with decomposing iron pyrites.

GYPSUM.

Gypsum abounds in the lower part of the carboniferous system, and

Reports.

is largely developed on the coast near Codroy and in the Bay St. George. The vast masses which come out in the cliffs between Codroy Island and the Great Codroy River, can hardly fail to prove some day of very great value and importance. The color of the greater portion of the masses on the Codroy side of Cape Anguille is grey, and usually presents a regularly laminated appearance by the presence of thin scales of a black substance which alternates with the soft white gypsum : but there are portions very white also, and the associated marls are frequently streaked with those seams of snowy fibrous gypsum. The little Harbor on Codroy Island is sufficiently favorable shelter for small vessels, and the Codroy Roads, having a fair anchorage for larger sized craft outside during the summer months, there does not appear to be any great difficulty to overcome in having these great deposits opened out to commercial enterprise. Large quantities of gypsum are annually taken for the Lower Canada market from the Magdalene Islands, where probably the facilities for working the material are not greatly more favourable than in this part of Newfoundland.

The great mass of gypsum at the entrance to Romain's brook was described in the narrative of last year's exploration. It is chiefly pure white, and is admirably suited for stucco purposes ; but the want of shelter for vessels at that part, offers a considerable obstacle to the shipment of the material. The gypsum of the south coast of St. George's Bay and in the interior I had no opportunity of visiting.

MARBLES.

The fossiliferous limestone of Topsail Head takes a high polish and affords a very handsome description of variegated marble, some cubes of which were sent to be shewn as specimens at the ensuing exhibition at Paris. Some of the variegated red and white beds of limestone near Cape St. George are likely to yield a good and ornamental material, and one strong pale drab coloured bed which comes out in the cliffs nearly opposite Red Island, is particularly fine in grain, takes a very high polish, and might be taken in blocks of any size under five feet in thickness. This bed seems to be of very pure lime, and is sometimes upwards of seven feet thick. The position of this stratum of rock, however, cannot be said to be favourable, as the only anchorage near is under the beach at Red Island, which affords shelter from northerly winds only ; but as it strikes inland and probably runs across to the Port-a-Port side of the peninsula, it is possible enough some parts may be found where it might be quarried to advantage.

Marbles of various kinds occur at certain parts of the Bay of Islands. The cliffs at the entrance to the Humber River yield white, black and

Reports.

variegated red and white limestone, a large portion of which is capable of being used for many ornamental purposes, although so far as I have yet been able to ascertain, the white variety seems usually to be too coarsely crystalline for statuary purposes. Just below the lower rapids a vein of compact calcareous spar between two and a half and three feet wide may be seen on the right bank of the river cutting the strata and running up the face of the cliff with great regularity, and many more similar veins occur on both sides both above and below. Some white and variegated marble has been obtained from this large vein which, although susceptible of giving a smooth surface, is mostly too coarse in texture to be considered of high quality as an ornamental stone; but I am informed by Mr. Makim, of this place, that higher up the hill, near where this vein comes out, a pure white marble may be obtained from *beds* which may prove to be of more importance. Some beds of black limestone of very fine grain, hard and compact, the exposed surfaces of which are sometimes characterised by obscure silicified organic remains, occur also in the lower reach of the Humber River, which are capable of receiving a fine polish, and at a place called Cook's Cove, on the south side of the Humber Arm, a beautiful and homogeneous sample of jet black marble was obtained from a bed about six inches thick, and in immediate contact with a conglomerate limestone.

Still another variety of marble may be found at York Harbor, where a great mass of Serpentine, which forms an adjacent range of hills, comes to the water's edge. Some specimens were obtained from this locality, and sent with others of the collection for exhibition; but as these were derived from broken fragments of the exposed outcrops, they can hardly be taken as fair samples of the general quality of the rock. The color is a dark bottle green, with black and sometimes white streaks; but the rock being brittle and a good deal shattered, probably by the influence of the weather, the surfaces polished were not very satisfactory. A beautiful specimen of serpentine, however, was produced for exhibition by C. F. Bennett, Esq., from Little Bay, near the Terra Nova mine.

BUILDING STONE.—GRANITE.

A very coarse dark reddish granite occupies a considerable portion of the coast at LaPoile, the prevailing color being derived from large irregularly formed crystals of red felspar, which usually give the exposed surface the aspect of a conglomerate when viewed at a little distance. A finer grained quality of granite is found to intersect the coarse mass, sometimes of a red, and at other times of a whitish grey color. The coarse variety is very hard, tough, and durable, and would doubtless have a grand and imposing effect in large and massive structures. The

Reports.

age of the coarse grained rock is undetermined ; the intersecting veins however penetrate into a set of blackish or dark blue and greenish slates, which come against the granite at Little LaPoile, indicating a more recent origin than the slates, which are probably lower Silurian. An exactly similar coarse granite was observed in 1864 at the other extreme of the island, at Cat Cove, near Cape Freels.

A beautiful variety of granite occurs at Rose Blanche, where there is an excellent small Harbour, about twelve miles west from LaPoile. The color of the rock is of a whitish gray, it is rather fine grained, and is constituted of white quartz, white felspar, and brown mica. Blocks of this granite are easily procurable in almost any requisite size all along the shore, and in inexhaustable quantity.

SANDSTONES.

A good material for building may be procured in ample abundance from the sandstones of Kelly's Island, in Conception Bay. The stone is usually of a greenish tinge, sometimes weathering yellowish ; some beds are very hard and difficult to dress with the hammer ; others are freer in the grain, and dress with facility. The sandstones of Kelly's Island rest upon a set of brownish shaly slates ; and beds of that description are interstratified with them. Portions of the measures are slightly calcareous, and most of the sandstones are somewhat micaceous. The horizon of these rocks, together with the slates and limestones of Manuel's Brook and Topsail Head, is supposed to be down in the Silurian system.

Admirable building stone is obtainable at many parts from the sandstones of the Carboniferous rocks ; instances of which may be specified as occurring on Codroy Island, in the section between the great and little rivers Codroy, and on the Great Codroy River. The rock on Codroy Island, where the bands are thick, is frequently slightly calcareous, and is very hard and compact ; the centre part of the bed being of a pale bluish grey on fracture, while the exposed surfaces weather of a drab or yellowish color. Some of the beds south of Codroy River are a drab freestone slightly coarse in grain, and always more or less micaceous ; yielding a handsome material, which is easily worked. Beds of this description were also observed in several parts on the banks of the Great Codroy River.

WHETSTONES AND GRINDSTONES.

Some of the sandstone beds of the coal formation, on the Great Codroy River, near the falls, and at one or two places in the coast section, would produce good scythe stones ; and near Cape Anguille, pieces of a

Reports.

slightly calcareous slate of the very finest texture, very hard and of a dark grey color, were found of excellent quality as hones for knives, and are probably well adapted for finer tools or instruments. Many sandstone beds of the coal measures might be used for grindstones; some of the best hitherto observed were found on the Grand Pond, near the foot of Old Harry Mountains; while at Whetstone Point, on the opposite side of the same lake, scythe and coarse hone-stones in unbounded quantity may be picked off the beach or worked out of the adjacent cliffs.

LIMESTONES.

The cliffs of Cape St. George and the coast north from it are apparently more or less magnesian in quality; but beds occur of very pure lime at some parts, among which may be enumerated, in particular, the pale drab stratum, already alluded to under the head of marble. Some of the dark coloured bituminous and fossiliferous beds of the calciferous formation, such as those that skirt the coast inside the isthmus of Port-a-Port, are no doubt of good material for burning.

Many beds in the cliffs of limestone at the entrance to the Humber River, which are supposed to be chiefly of the calciferous age, may be found to possess all the requisites for burning into lime; and some of those which outcrop in the Humber Arm at Cook's Cove and other places, associated with limestone conglomerate, may also be found available for the same purpose.

The limestone beds in the lower coal measures also are probably capable, in many instances, for making good lime, examples of which may be instanced as occurring on the coast near Codroy, and thence cropping out at intervals near the right bank of the Great Codroy River, particularly at Ryan's Brook, where there is a considerable thickness of this rock exposed, associated with sandstone and masses of gypsum.

A limestone occurs at the entrance to Ship Cove, at Burin, on the west side of Placentia Bay, which was supposed to be the equivalent of the rock of Topsail Head; and very low down in the Silurian System.

It occurs in two bands, one from fifteen to twenty feet thick, the other from thirty to forty feet, divided by black calcareous shales, and overlaid by similar shaly and slaty strata, containing a brown material supposed to be an oxide of manganese, with which the surrounding parts are discolored. The color of the limestone on fracture is pale blue, weathering drab on the exposed surfaces, some of which exhibit obscure forms supposed to be organic, probably fucoids. This rock has been quarried to some extent for the purpose of burning into lime.

Reports.

RED OCHRE.

The material is derived from the red marls of the coal measures, and has been frequently used by the inhabitants near the coast of St. George's Bay, as a red paint and as red chalk. It was observed upon the banks of the Flat Bay Brook, and on the Humber River above Beaver Pond. It is also reported to be found on the banks of the brooks between Flat Bay and the high land of Cape Anguille.

CLAY.

At the extreme head of the Bay of Despair, at the entrance to the Conne River, there is a deposit of stiff blue regularly stratified clay, apparently quite free from lime, which probably may be found fit for the manufacture of either common or fire bricks; and possibly for some pottery purposes. A rude attempt was observed to have been made to burn bricks upon the spot, which did not appear to have been successful, probably in consequence of want of proper appliances. When burned it becomes an Indian red color.

SHELL MARL AND PEAT.

Peat is extensively spread over the flat country of the Codroy most of the way; and at Capelin Cove it forms the upper part of the bank in a thickness at some parts of five feet or more, resting upon a bed of shell marl, which in its turn is underlaid by another bed of peat from six to ten inches thick. The shore banks between Flat Bay and the gut also are capped with peat, and the same is probably the case over a great part of the flat coal measure area which has not been visited. The value of this substance as a fuel need not be commented upon.

A deposit of fresh water shell marl was observed on the coast of St. George's Bay, between Romain's brook and the isthmus of Port-a-Port, about half a mile from the former.

The deposit is not very extensive, but of considerable thickness; it is white and contains Planorbis and other fresh water shells, and rests on a bed of sea-weed about eighteen inches in thickness, which reposes on clay with pebbles and small boulders.

The bottom of the bed of sea-weed is about twelve feet over high water mark. Shell marl is useful as an agricultural manure, and when sufficiently pure answers a good purpose as a white-wash.

Reports.

ORNAMENTAL STONES.

Red, and green, and brown jaspers were frequently found on the shores of the Humber Arm, and in the valley of the Humber River: they were also observed in sundry places in St. George's Bay and on Flat Bay Brook. These probably take their origin in beds or veins of lower Silurian age, but frequently occur as smoothly rounded pebbles in the conglomerates of the coal measures. The red jaspers, in particular, are frequently capable of taking a high polish, and might be cut into brooches, seals and other personal ornaments.

The Labradorite of Cairn Mountain, some cleavage planes of which are opalescent, reflecting various beautiful colors, when placed at a certain angle to the rays of light, may, in some cases, be found as a handsome ornamental material. Its prevalent color at this part is a pale yellowish white.

The malachite found lining the walls of the vein at the LaManche mine, as far as my present information goes, has only been found in small quantities.

PETROLEUM.

This substance was reported as existing on Middle Point of Port-a-Port, in my narrative of last year. Since then a sample of oil has been procured from the spot by C. F. Bennett, Esq.: but having been unable to visit that part, I can give no further particulars as to the mode of its occurrence. Petroleum is now stated to have been discovered in the neighborhood of Bonne Bay; but not having visited the locality, I am still ignorant of the conditions under which it is produced.

QUARTZ VEINS.

Samples were taken of quartz veins from Deer Lake, Humber Arm, and Bay Despair, which have been forwarded to Montreal for chemical analysis, the conditions under which they were found to occur giving reason to presume the possibility of some trace of the precious metals being discovered.

I have the honor to be,

Your Excellency's most obedient servant,

ALEXANDER MURRAY,

Geological Surveyor:

To His Excellency

ANTHONY MUSGRAVE, Esq.

Reports.

REPORT OF THE DIRECTORS OF THE GENERAL WATER COMPANY, 1866.

The Directors of the General Water Company, in submitting their statement of Accounts for the past year, beg leave to call the attention of the Government to the charge on account of Fire Companies, which, during the past year, amounted to the sum of £451. The charge for this service was formerly borne by the General Revenue, and did not form any part of the ground work on which the Board of Directors based their calculations in determining the amount of the rates necessary to produce the required sum for ordinary expenses. The imposition of this charge on the revenue of the Water Company has therefore involved the Directors in a Debt which they cannot pay without further taxation on the rate payers, unless the Government relieve them from the cost they have been obliged to incur on this account, and which, the Directors feel, is not a fair charge on their resources—and which moreover, until the institution of the Water Company, was otherwise provided for.

In other respects the expenditure has been fully within that of any former year, under the several heads of outlay, and the Directors have the satisfaction of reporting that the works are in a condition of perfect efficiency.

From the fact of there not being any Reservoir in connection with the Water Works, the supply of the town is often affected by the disturbance of the water in the Lake, and the Directors have therefore entered on the construction of a Breakwater across the end of the Lake near which the supply Pipe enters. This will obviate the inconvenience hitherto felt from the deposit with which the water has been impregnated after stormy weather, and will besides prevent the incrustation of the pipes, which, in process of time, would be a matter of serious consideration.

The Board are also glad to state that this work has been contracted for at a sum far below that which was estimated for this service. The amount of the estimate was £185, while the contract has been made for £130, under which it is now being most satisfactorily carried out.

Respectfully submitted.

P. M. BARRON,
Secretary.

The sum of \$2700 under the head of “ balance at debit of loan account,” was paid in the first instance by the Government, and subsequently ordered to be repaid by the Water Company.

PIERCE M. BARRON, *Secretary.*

The above amount, \$2700, was paid by the Government in 1862, 1863 and 1854, as per detailed accounts of the Financial Secretary, to the Collector of Rates, on account salary, before the Assessment was fixed, and to the Appraisers under the Water Company Act. It was brought forward in the Assets and Liabilities of the Colony, 31st Dec., 1864, as an Asset, and paid by the Water Company in 1865.

J. BEMISTER, *Colonial Secretary.*

15th April, 1867.

Reports.

**ANNUAL REPORT OF THE HARBOR GRACE WATER
COMPANY.**

SIR,—

The Directors of the Harbor Grace Water Company, beg leave to transmit herewith, for the information of the Government, a statement of their affairs for the past year, showing a balance in the hands of the Treasurer of £429 15 6 currency, after the payment of interest for the last half year ending 30th June.

They have much pleasure in stating that the works of the Company, since last report, have continued in most satisfactory operation; that the embankment at Bannerman Lake requires some repairs of a trifling nature, but on the whole is firm and secure, having borne the pressure of the past season without yielding.

They also beg to state that it has been found necessary to order a fresh lot of pipes and other materials to meet the present and proximate requirements of the Company, partly with a view of extending their operations. Also a new Hose complete of six hundred feet in length, and a new fire bell for western part of the town.

The Directors are of opinion that the new materials, hose, fire bell, &c., &c., will absorb the greater part of the balance in hand.

I have the honor to be,

Sir,

Your most obedient servant,

T. HARRISON RIDLEY,

President.

Despatches.

DESPATCH FROM SECRETARY OF STATE TO HIS EXCEL-
 LENCY THE GOVERNOR ON REVENUE BILL, DATED 19TH
 SEPTEMBER, 1866.

(COPY.)

Newfoundland,

No. 12.

SIR,—

DOWNING STREET,

19th September, 1866.

I have had under my consideration the Act passed by the Legislature of Newfoundland in its late Session, No. 364, entitled "An Act for granting to Her Majesty certain Duties on Goods, Wares, and Merchandize imported into this Colony and its Dependencies."

I regret to observe that the Legislature of Newfoundland have imposed a differential duty on Fish, a course contrary to the policy which has long been pursued by the Imperial Government. This enactment is inconsistent with the stipulations of existing Imperial Treaties, which provide that the produce and manufactures of particular Foreign Countries, when imported into any British Possessions, shall be liable to no other Duties than are imposed on similar articles of British origin. In virtue of these Treaties, Belgium and the Zollverein by express stipulations, and indirectly all Countries having Treaties containing "most favored nation" articles, may at any time claim the exemption accorded by this Act to British Fish, and should any of these Countries, at any future time, demand admission for their fish on the same terms as British caught fish, their claims could not be disputed.

As the Act is one under which the Revenue of Customs for the current year has for some time been in actual course of collection, and as it expires on the 20th of May next, I will not expose the Island to the inconvenience which would follow from advising its disallowance. But Her Majesty's Government cannot concur in Commercial Legislation which is inconsistent not only with the established policy of this country, but with express engagements made with Foreign Powers; and I must therefore instruct you that you will not be at liberty to assent to any renewed enactment of differential duties. I doubt not that the Legislature, on being made acquainted with the contents of this Despatch, will cheerfully recognise the necessity of avoiding all legislation which is at variance with the principles and obligations of the Mother Country.

I have the honor to be, Sir,

Your most obedient humble servant,

(Signed,) CARNARVON.

Governor MUSGRAVE,
 &c., &c., &c.

Despatches.

DESPATCH FROM HIS EXCELLENCY THE GOVERNOR, TO
SECRETARY OF STATE, ON DIFFERENTIAL DUTIES ON
FOREIGN FISH, DATED 25TH OCTOBER, 1866.

(COPY.)

No. 124.

GOVERNMENT HOUSE,
Newfoundland, 25th Oct., 1866. }

MY LORD,—

I have had the honor to receive your Lordship's Despatch, No. 12, of the 19th September, respecting the imposition of a differential duty on Foreign Fish in the Revenue Act of last Session, and I have communicated your Lordship's observations and instructions to the Executive Council.

In practice, the differential duty would only apply to fish of French catch or cure, and this, even if admitted free, would never be imported for consumption in a place where almost the only product is fish, and that is produced in abundance. But the system of bounties given by the French Government, and the differential duties imposed by the Spanish Government, for instance, in favor of fish imported under the Spanish flag, render it of great importance to our trade that French fish should not be brought into our Ports for exportation under Foreign flags. No differential duty imposed upon it, will however, operate to prevent this without the provisions of the 3rd Section of the Act, which enacts that no fish not exempted from duty shall be warehoused without payment of duty, or shall be allowed the usual drawback on exportation. This Section has formed part of every Revenue Act for several years past, having been first inserted in the Act of 1859, and together with the exemption of British fish from duty in all Acts since the beginning of the Reciprocity Treaty with the United States, has had the effect of giving that protection against French Fish, without any ostensible differential duty, which it is now sought to retain, though the mode of doing so is open to objection, and as far as the differential duty alone would operate, is without effect. But no action of the Reciprocity Treaty with the United States, and the contemporaneous fiscal regulations with regard to importation from the neighbouring Provinces, of the same articles as those to which that Treaty referred, has been more clearly defined than the establishment of a differential duty in favor of United States and British produce as against that of the rest of the world. United States and British American fish being admitted free under these provisions, it was only necessary, in the late Revenue Acts, to impose a

Despatches.

duty on "fish" without discrimination, to obtain what in operation was a protective duty.

On the termination of the Reciprocity Treaty with the United States, the local administration have not shewn any disposition to continue a system of protective duties on any articles which might be imported for consumption; but the peculiar relations of this Colony to the French fishery at our door, cause them to regard it as of great importance to retain a protection against the inequitable competition of the French, which they have incidentally enjoyed during the continuance of the Reciprocity Treaty.

I forward to your Lordship a copy of a Minute made by the Receiver General upon the subject of your Despatch, which will serve to shew the soreness of feeling which still exists with respect to the advantages enjoyed by the French in their prosecution of the fishery; but I particularly call your attention to the memorandum annexed to his Minute with regard to the existing bounties given by the French Government, which will at once illustrate the foregoing remarks. It will be seen that a bounty of 20 francs per metric quintal (equal to two quintals avoirdupois) is given on all fish exported to any foreign transatlantic Port, provided there is a French Consular Agent residing there. Thus, fish sent from St. Pierre, on our own coast, to St. John's, would be entitled to this bounty; which is equal to about 8s. 4d. per cwt. The Spanish Tariff imposes a differential duty on fish imported direct from the fisheries in foreign vessels, which gives an advantage to Spanish vessels in their own Ports of about 2s. 6d. stg., per quintal. If the importation is not direct from the fisheries, the difference in favor of Spanish vessels amounts to about 4s. 3d. But Spanish or other Foreign vessels are not allowed by the French Government to load at St. Peter's; and it is now proposed by the French fish merchants, to make use of British Ports to reap the double advantage of the French bounty and the Spanish differential duty, by sending their fish to Halifax or some other British Port, to be shipped there in Spanish vessels.

It is obvious that the Newfoundland Trade suffers seriously from a competition supported by artificial protection at their expense in this manner; and the Legislature may be excused for regarding the article of fish as entitled to be excepted, under these circumstances in their case, from the application of the general principles of Free Trade. If French Bounties were abolished, and British caught fish admitted into France on the same terms as French fish, I believe there would not be the least desire to impose any discriminating Customs Regulations.

It appears to me, however, that the object of the Local Legislature

Despatches.

would be accomplished without the imposition of differential duties, if it may be permitted to enact simply that no Foreign fish may be warehoused for exportation without payment of duty, and that no drawback upon exportation shall be payable in respect of such Foreign fish.

An exceptional provision such as this would, I think, be fairly justifiable in the peculiar case of this Colony; while it would avoid infraction of the general principle, that no distinction should be made between Foreign and British articles alike intended in good faith for consumption within the limits of the Colony.

I have the honor to be,

My Lord,

Your most obedient humble servant,

(Signed.)

A. MUSGRAVE.

The Right Hon'ble

THE EARL OF CARNARVON.

Despatches.

**LETTER FROM RECEIVER GENERAL TO HIS EXCELLENCY
THE GOVERNOR, ON DIFFERENTIAL DUTIES ON FOREIGN
FISH.**

RECEIVER GENERAL'S OFFICE.
St. John's Newfoundland. }
October 23rd, 1866.

SIR,—

I have the honor to acknowledge the receipt of a Despatch, addressed to your Excellency by the Right Honorable the Secretary of State for the Colonies, 19th Sept., 1866, No. 12, wherein he regrets to observe that the Legislature of Newfoundland have imposed differential duties on Foreign Fish.

Your Excellency having been pleased to refer the above Despatch to me as Receiver General, for a Minute of my observations I may desire to offer on the remarks of the Secretary of State, I have the honor to submit the following in explanation, and permit me to say, in justification of the introduction in the Revenue Act of 1866, of the provision to which objection is made.

I have the honor to be,

Your Excellency's obedient humble Servant,

JOHN, KENT,
Receiver General.

REMARKS.

The Right Honorable the Secretary says "I regret to observe that the Legislature of Newfoundland have imposed a differential duty on Foreign Fish, a course contrary to the policy which so long has been pursued by the Imperial Government."

In reply, I beg to remark that in the seven preceding Revenue Acts, namely 22nd, 23rd, 24th, 25th, 26th, 27th and 28th Vic., Cap. 1, differential duties were imposed. The effect of the statutable provisions contained in these Acts was to admit various articles the produce of the United States of America and of Great Britain and certain of her Dependencies duty free, and to impose a tax on similar articles the produce of any other countries. These several Acts were assented to by the Queen in Council.

Despatches.

It may be argued that these were exceptional cases, arising from Treaty Stipulations.

That reasoning may be maintained as to articles the produce of the United States; but it cannot apply in relation to articles the produce of Great Britain and her Dependencies. The Revenue Act of 1866 is objected to for containing a similar provision to those seven Acts already recited.

The verbiage in the Act of 1866, varies from that of the others, the effect is the same, modified by the consideration that whereas in the preceding Acts differential duties were maintained in relation to numerous articles of import, in the Act of 1866 fish of foreign catch and cure is alone subjected to a duty.

The section in the Act of 1866, on Warehousing, is a literal transcript of the provisions of the other Acts.

I hope your Excellency will not consider that I am indulging in extraneous matters, if I make some observations on the policy which influences the Legislature in sanctioning a differential duty on foreign caught fish.

The slight differential duty on foreign caught fish, in practice, applies to fish caught and cured by the fishermen of France. Its imposition serves to indicate the current of opinion which pervades the Legislature and the inhabitants of this Colony, growing out of what they consider to be the total absence of consideration for their interests which the statesmen of the Parent country exhibited in the Treaties with France.

This dissatisfaction arises from two causes:—

First.—The alienation of their natural rights to the French; and second, the powerful aid that the French Government yields to encourage their Fisheries.

In relation to the first cause, they complain that the best parts of their coasts have been ceded to the French, and of which they (the French) have, *de facto*, the exclusive possession. That on a large portion of the country they (the inhabitants) are denied the right of ownership in the soil.

That the operation of British Treaties with France, under the most favored nation clause, is altogether one sided, the fishermen of France

Despatches.

having a right to import into our Island their fish, while our fish is excluded from their Ports.

The second cause of dissatisfaction is the effect of contrast. Whilst the statesmen of France view the Fisheries of Newfoundland, in an Imperial point of view, as of the greatest national importance, modern British Statesmen ignore the traditions in relation to our Fisheries which have been handed down to us by such historical characters as the first LORD CHATHAM. By the kindness of a friend I have been supplied with the annexed statement containing an account of the Bounties given by the Government of France to aid the Fisheries carried on by French subjects.

The bounty on dried codfish, independent of the bounty on the outfit, is equivalent to two dollars per quintal of 112lbs. avoirdupois.

In this statement Your Excellency will perceive another effort further to interfere with our trade—the effect of these bounties—the unfair competition produced by which must eventually place the Fisheries of Newfoundland in the hands of the French.

To prove the value attached to these Fisheries by the Ministers and Statesmen of France, I will conclude by making the following quotation from a report made by a Commission appointed by the French Government in 1851, on the subject of the Fisheries, and contained in Andrew's Report on Colonial and Lake Trade in 1852. The Report says—“The great Fisheries still remain to us; and in order to preserve them we must continue the encouragements they have received, even at periods when a commercial and colonial prosperity, infinitely superior to that now existing, multiplied our shipping and created abundance of seamen. It is on our fisheries that, at this day, repose all the most serious hopes of our maritime enlistments.

“In fact the fisheries give employment to a great number of men whom a laborious navigation, under climates of extreme rigour, speedily forms to the profession of the seas.

“No other school can compare with this in preparing them so well, and in numbers so important, for the service of the Navy.”

FRENCH BOUNTIES.

The last regulation on bounties for the Cod-fishery is the law of 28th July, 1860, which is to remain in operation until July, 1871, when it is

Despatches.

to be revised according to the practice established since the first law on bounties of July, 1767, to revise these regulations from time to time.

There are two kind of bounties.

1st.—Bounty on the outfit, (Primes d'armement,) viz:—

1o.—50 francs per man employed in *fishing and drying* fish on the coast of Newfoundland, St. Pierre and Miquelon, or the *Grand Bank*.

2o.—50 francs per man employed in fishing in the Iceland Seas, the fish being brought green to France, (the French not being allowed to dry fish on the coast of Iceland.)

3o.—30 francs per man employed in fishing, *without drying*, on the *Grand Bank* of Newfoundland, (the fish being only salted on board and brought *green* to the French ports to be dried there.)

2nd.—Bounties on the produce of French fisheries.

1o.—20 francs per metric quintal (equal to two quintals avoirdupois, in round numbers) of dried Cod-fish exported, either direct from the French fisheries, or from the bonded warehouse of a French Port, to the French Colonies of America, the East Indies and the Western Coast of Africa, or any Foreign *transatlantic* port, provided there is a French Consular Agent residing in such port.

2o.—16 francs per *metric quintal* of fish exported either direct from the French fisheries, or from the bonded warehouse of a French Port, to European and other Countries in the Mediterranean, excepting Sardinia and Algeria.

3o.—16 francs per *metric quintal* of fish imported in any of the French Colonies in America and the East Indies, or in any foreign transatlantic country from a French port, where it has not been warehoused (which means that the fish has not been landed, but re-exported in the same vessel in which it came from the fisheries.)

4o.—12 francs per *metric quintal* of fish exported, either direct from the French fisheries, or from a French port, to Sardinia or Algeria.

5o.—20 francs per metric quintal of cod roes from the fish caught by the vessel which brings them to France.

Despatches.

The bounty on the outfit is paid only once during the season, whether the vessel makes one or more voyages.

The bounty on the produce is paid only on fish fit for the consumption of the country where it is landed; and no bounty would be paid on fish which, by its bad quality, would not find buyers at any price.

The fish must be exported *exclusively* in *French vessels*; but it is not required that it should be the same vessels which are employed in the fishery; and the bounty is paid without regard to the distance of the foreign port where the fish is sold, from the French fishery grounds. So that a cargo landed in St. John's, Newfoundland, or in Sydney, Cape Breton, or Halifax, will get the same bounty of 20 francs per metric quintal, as if it was landed in a United States or a Brazilian port. In former times, the law named the foreign ports where the cargoes could be carried; but now the only conditions required, is that a French Consular Agent (whatever may be his rank) should reside in the Foreign Port where the fish is landed and sold.

It is contemplated now by some French Fish Merchants to make arrangements with Spanish owners to send their vessels to Halifax, where they will receive their cargo from a French vessel direct from St. Pierre on the French Shore of Newfoundland; and thus the shippers will profit of the double advantage of the French export bounty and the *Spanish differential import duty*.

The Outfit bounty is not distributed among the men, it is paid to the Merchant, and added to the profits of the voyage, at the end of which *the ship* is to get *four fifths* of the *net produce*, the remaining fifth being distributed as follows:—

| | | | |
|-----------------------------|----------------|--------|-----------------------------|
| The Captain..... | 2 | shares | (and primage as hereafter.) |
| The Mate..... | $1\frac{1}{3}$ | “ | “ |
| The Salter..... | $1\frac{3}{8}$ | “ | “ |
| The 1st Fishing Master..... | $1\frac{1}{4}$ | “ | “ |
| The 2nd ditto..... | $1\frac{1}{4}$ | “ | “ |
| Each Sailor..... | 1 | “ | “ |
| Each Apprentice..... | $\frac{3}{4}$ | “ | “ |
| Cabin Boy..... | $\frac{1}{2}$ | “ | “ |

The primage to the Captain is 1st, 2 per cent. on the *gross product* of the voyage; 2nd, 15 francs for *each thousand fish above fifty thousand*.

The *Mate* gets a primage of about *one-fourth* of that of the Captain.

The *Salter*, a primage of three-fourths of the mate's.

Each fishing master, a primage equal to one-half the primage of the *Salter*.

Despatches.

DUTIES ON COD FISH IN SPAIN.

| Per English Quintal. | SPANISH FLAG. | | FOREIGN FLAG. | |

18th January, 1867.

SIR,—

I have had under consideration the explanations contained in your Despatch of 25th October last and its enclosures, with respect to an Act passed by the Legislature of Newfoundland in its late session, entitled "An Act for granting to Her Majesty certain Duties on Goods, Wares, and Merchandize imported into this Colony and its Dependencies," and to that part of it which imposes a differential duty on fish.

I have before informed you, in my despatch of 19th September last, that I would not, under the peculiar circumstances of the case, expose the Island to the inconvenience which would follow from advising the disallowance of that Act; but I must state to you that I still entertain the opinion expressed in my Despatch of the 19th September, as to the unsatisfactory character of that enactment which relates to the duty on Foreign Fish. Nor does your proposal appear to me to remove the objections to such legislation.

I trust that the whole matter will be carefully considered before the expiration of the present Act; and in the meantime I should be glad to learn from you whether the three following propositions embody the objects which you desire to see carried out.

1.—That fish brought into Newfoundland harbors, and sold for consumption, whether brought by British or foreign Vessels, should not be taxed.

2.—That fish brought into harbor, and stored with a view to exportation, if brought by Newfoundland fishing Vessels, should not be taxed.

3.—That fish brought into harbor by any other than Newfoundland Vessels, whether British, Canadian, or Foreign, and stored for exportation, should be taxed.

Despatches.

In conclusion, I wish to state that Her Majesty's Government are fully alive to the importance of the Newfoundland Fishery Trade, and ready to give their favorable consideration to any measure (not inconsistent of course with existing Imperial treaties or interests) by which that Trade can be made a source of greater prosperity to the Colony.

I have the honor to be,

Sir,

Your most obedient humble servant,

(Signed,)

CARNARVON.

Despatches.

DESPATCH FROM HIS EXCELLENCY THE GOVERNOR TO THE SECRETARY OF STATE, IN REFERENCE TO HIS VISIT TO THE WESTERN COAST OF THIS ISLAND, IN 1866.

(Copy,)

No. 116.

GOVERNMENT HOUSE,
NEWFOUNDLAND,
7th August, 1866. }

MY LORD,—

I have the honor to report my return from my visit to the South and West Coasts of the Colony, which I acquainted you in my Despatch, No. 112, of 10th July, that it was my intention to proceed upon.

2.—I have acquired, in the course of my tour, much information, which will be very useful to me in the discharge of my duties, but I need scarcely trouble you with details of comparatively unimportant character.

3.—On the portion of the coast known as the French Shore, I abstained from doing any official act, but several applications for grants of land in the Bay of Islands were submitted to me, the consideration of which I deferred; and, from personal observation, I have received strong confirmation of the opinions which I expressed in my former Despatches, that the augmentation in number and population of the settlements on the West Coast will be rapid, and that unless some provision can be made for the preservation of order and administration of the Law, a state of affairs may arise, which, to say the least, will then be difficult to treat.

4.—The great advantage enjoyed by the residents on the Bay of Islands, from the possession of a winter Herring Fishery, prosecuted with nets under the ice, in an interesting and peculiar manner, which yielded more than 30,000 barrels for exportation during the last season, has attracted the attention of many new settlers, who are coming in to participate in its benefits. One of those who had been resident in the Bay for some little time, and applied for a grant of the land he is occupying, gave to me, as the reason for his application, that he believed it would not be long before almost all available land would be appropriated, and that he desired to secure his family legal possession.

5.—Marble, which seems to be of a valuable description, has been dis-

Despatches.

covered in large quantity on the River Humber, which flows into Bay of Islands. The Timber on the Banks and on those of the Lake called the Deer Pond, out of which it flows some miles inland, and which I was able to visit, is of fine quality. And Coal and Copper, and even Gold, are said to have been found by persons who are as yet unwilling to make known the places of their discovery.

6.—A little further to the North, beyond Bonne Bay, a Nova Scotian gentleman is about to bore for Petroleum with some prospect of success. And to the South, at Ports-aux-Ports, are strong indications of Lead, on land for which also a grant is desired.

7.—But besides these Mineral deposits, so likely to attract an adventurous population, the agricultural capabilities of the whole coast, but more especially of St. George's Bay and the Banks of Great Cod Roy River, are such as must ensure appreciation whenever the wants of a growing population have to be supplied with the products of husbandry. It would be well for the large proportion of our fishing population on the East Coast if they enjoyed half the substantial prosperity which I saw surrounding settlers on the Banks of the Cod Roy who live entirely by farming.

I have the honor to be,

My Lord,

Your most obedient humble servant,

(Signed,)

A. MUSGRAVE.

The Right Hon'ble

THE EARL OF CARNARVON.

Despatches.

DESPATCH IN REPLY TO COMMUNICATION FROM HIS EXCELLENCY GOVERNOR MUSGRAVE, REPORTING HIS RETURN FROM A VISIT TO THE S. & W. COASTS OF THE ISLAND; ALSO HAVING REFERENCE TO GRANTING MINING LICENSES ON FRENCH SHORE, AND ENCLOSING COPY OF DESPATCH SENT TO GOVERNOR SIR A. BANNERMAN, 4TH MARCH, 1861.

(COPY,)

Newfoundland.

No. 19.

DOWNING STREET,
7th December, 1866. }

SIR,—

I have had under my consideration your Despatch No. 116 of the 8th August, 1866, reporting your return from a visit to the South and West Coasts of Newfoundland, and communicating to me the impressions you derived from the journey.

I have also received from you a more recent despatch, enclosing a memorial from Mr. C. F. Bennett, who appears to have been engaged in searching for Minerals on the West Coast of Newfoundland.

Mr. Bennett does not seem to be fully aware that some of the conclusions which have been advocated from time to time by the British Government in relation to the French Shore, and to its neighbouring waters, have never been admitted by the Government of France, and that it is the difference which has hitherto existed on these points between the two Governments which creates a difficulty in dealing with the Coasts of Newfoundland in the manner most calculated to develop the resources of the Colony. Her Majesty's Government much regret the unsettled state of this question, and the serious inconvenience to which this leads. But it would be a far graver evil to embroil the Government of England in a dispute with that of France on the grounds which a careful consideration of existing Treaties did not clearly justify. They are unable, therefore, to treat as decided questions which are really matter of controversy. They would, however, most readily re-open the negotiations with the French Government, which were broken off in 1861, if only satisfied that there were a reasonable prospect of bringing them to a successful termination. Meanwhile, pending the settlement of the questions of French and British rights on the coast, I am unable to autho-

Despatches.

rize the appointment of a British Magistrate on the so-called French Shore, nor have I any alternative but to instruct you, for the present, not to make any grants of land on that Coast.

There is no doubt that the provisions of the existing Treaties, as they stand, are ill adapted to meet the real exigencies either of the French Fishermen or of the Newfoundland Colonists ; and might be greatly modified for the advantage of both parties. And I should gladly resume negotiations with a view to such a modification ; but I think it necessary to add that any such negotiation must be attended with considerable difficulty, so long as it is liable to be disturbed by unforeseen objections on the part of the Colony.

I have the honor to be,

Sir,

(Signed,)

CARNARVON.

GOVERNOR MUSGRAVE,
&c., &c., &c.

(COPY.)

Newfoundland.

No. 80.

DOWNING STREET,
4th March, 1861. }

SIR,—

I have received your Despatches, Nos. 11 and 12, of the 30th ultimo, enclosing addresses from the House of Assembly of Newfoundland, and from certain Members of your Executive Council, respecting a convention for regulating the Newfoundland Fisheries, which is at present in course of negotiation between the English and French Governments.

Despatches.

You acted rightly in forwarding to me these addresses ; and in your statements to the Assembly you have accurately represented the views of Her Majesty's Government.

It is plain that the responsibility of securing to French fishermen the free exercise of every right guaranteed to them by existing Treaties rests on the British Government which made those Treaties. This obligation they cannot transfer to the Colony of Newfoundland, but are bound themselves to discharge frankly and effectually. Subject to that obligation Her Majesty's Government are most anxious not only to protect and advance the interests of Newfoundland, but in all local questions to ascertain, and as far as possible defer to, the wishes of the Colonists.

The convention now proposed has not for its object in any way to enlarge the " Maritime or territorial rights" of France, or to abridge those of Newfoundland ; but primarily and almost exclusively to provide a machinery capable of securing that the just rights of each party under the existing Treaties shall be respected by the other.

The comparatively unimportant clauses of the Convention which have not this object, contain provisions which will confer material advantages on some of the inhabitants of Newfoundland, and embrace nothing which, in the opinion of Her Majesty's Government, falls within the spirit of Mr. Labouchere's promise, which was not lost sight of by them throughout the protracted negotiations with the French Government.

I make these observations to prevent misconception. But I do not anticipate that the provisions of the Convention will be considered by the community of Newfoundland, any more than they are by Her Majesty's Government, either as injurious to their interests or as involving such modification of their rights as was contemplated in Mr. Labouchere's Despatch. I regret much that it is not in my power at once to authorize you to communicate a copy of that Convention to the Government and Legislature of the Colony.

I have the honor to be,

Sir,

Despatches.

DESPATCH (WITH ENCLOSURE FROM BOARD OF TRADE)
DISALLOWING ACT FOR PREVENTING COLLISIONS AT
SEA ON THE COASTS WITHIN THE LIMITS OF THIS
COLONY.

(COPY.)

Newfoundland,

No. 15.

DOWNING STREET,
13th October, 1866.

SIR,—

I have had under my consideration the Act passed by the Legislature of Newfoundland during their late session, No. 373, entitled "an Act for preventing Collisions at Sea on the coast within the limits of the Jurisdiction of this Colony."

Enclosed is a Copy of a letter on the subject from the Department of the Lords of the Committee of Privy Council for Trade.

The sea is the highway of nations, and the rules made by a great Country for the safety of mariners from all parts of the world must be uniform throughout its possessions, especially as those Rules have been adopted by all other maritime nations. The Regulations in Newfoundland must conform to those established by England, in concert with other Powers, which in fact are legally obligatory on all British Ships, including those of the Colony of Newfoundland, and extend to the sea, whether within or without the Colonial jurisdiction.

I cannot, therefore, advise Her Majesty to confirm the present Act. As it has a suspending clause, it is unnecessary that an order should be made by Her Majesty in Council for its disallowance. But you will take such measures as appear to you necessary for causing the Imperial Rules for the prevention of collisions at sea to be unequivocally established within the maritime jurisdiction of Newfoundland. A copy of these Rules was sent to Newfoundland in a Circular Despatch from this Department dated the 29th of January, 1863, but for your convenience I enclose some spare copies.

I have the honor to be,

Sir,

Your most obedient servant,

(Signed,)

CARNARVON.

Governor MUSGRAVE,

&c., &c., &c.

Despatches.

MR. FARRER TO THE UNDER-SECRETARY OF STATE.

BOARD OF TRADE,

Whitehall, 13th Aug., 1866.

SIR,—

I am directed by the Board of Trade to acknowledge the receipt of your letter of the 31st ultimo, transmitting, for the consideration of this Board, the transcript of an Act of the Newfoundland Legislature for preventing Collisions at sea on the Coast within the limits of the jurisdiction of the Colony, and requesting the opinion of the Board of Trade whether it may properly be submitted for Her Majesty's confirmation.

In reply I am to observe that the Rules laid down in the Colonial Act differ materially, in certain important points, from the Imperial and International Rules for preventing Collisions at Sea, which are at present in almost universal use.

The Imperial Rules say that a Sailing Ship under weigh shall carry green and red lights, and that all ships, when at anchor in a Road or Fairway, shall carry a White Light not more than twenty feet above deck, that open boats shall show, when they do not carry fixed Red and Green Lights, lanterns with Red and Green Slides.

The Newfoundland Act says that Coasting vessels, Fishing vessels, and open Boats shall all carry a White Light at the Mast Head.

It is true that an exception is made of vessels which carry Lights according to Imperial Legislation, but this does not meet the case. They may be bound to carry them, and yet may not do so.

Serious questions might thus be raised *e. g.* Supposing a British or French Ship fitted with Lights according to the Imperial and International Rules, was to come into Collision with a Newfoundland Coaster carrying Lights according to the Colonial Act.

The Act, it is to be observed, is not confined or meant to be confined to inland Colonial Waters.

Again, the Imperial Rules say that in a Fog, Steam Ships under weigh shall use a whistle, Sailing Vessels under weigh shall use a Fog Horn, and not under weigh a Bell.

Despatches.

The Colonial Act says that all vessels shall use a Fog Horn, whether under weigh or not.

It is most important for the security of Ships that the Imperial Rules should be preserved in their integrity and according to the arrangements made with other Nations. Her Majesty's Government are bound to take every step in their power to effect this object. Under these circumstances, and for the reasons above stated, this Board cannot advise that the Newfoundland Act, as it stands, should be submitted for Her Majesty's confirmation.

I have, &c.,

(Signed,)

T. H. FARRER.

The Under-Secretary of State,
Colonial Office.

Despatches.

DESPATCH FROM THE SECRETARY OF STATE FOR THE
COLONIES TO GOVERNOR MUSGRAVE, SUGGESTING AN
AMENDMENT ON THE BANISHMENT ACT.

(COPY.)

Newfoundland.

No. 16.

DOWNING STREET, }
15th October, 1866. }

SIR,—

I have had under my consideration the Act passed during the last session of the Legislature of Newfoundland, and transmitted to me in your Despatch, No. 106, of the 11th June last, entitled Cap. XIV. "An Act to empower the Superior Courts of this Colony to direct certain offenders to remove therefrom, and for other purposes."

The words in Section 1, "without delay," coupled with the enactment that if the person does not depart, he may be arrested and detained by any person and imprisoned *without warrant*, might give rise to some hardship, as there is no provision in the proposed statute as to who is to say what is delay in each case, or to guard against abuse in "*any person*" arresting and detaining, on the score that there has been delay. I think the Court should be authorized to name the time within which the convict is to leave, and that then he should be subject to arrest if found in the Colony after that time, and before the expiration of his sentence.

I have, therefore, to instruct you to submit to the Legislature the propriety of amending the Law in the above particulars, and when so amended I shall be happy to recommend that it should be left to its operation.

I have the honor to be,

Sir,

Your most obedient humble servant,

(Signed,)

CARNARVON.

GOVERNOR MUSGRAVE,

Despatches.

DESPATCH FROM SECRETARY OF STATE (WITH ENCLOSURE FROM BOARD OF TRADE) STATING THAT 7TH SECTION OF THE ACT, PROVIDING FOR THE CONSTITUTION OF A MARINE COURT OF ENQUIRY SHOULD BE REPEALED.

(COPY.)

Newfoundland.

No. 21.

DOWNING STREET,
7th December, 1867. }

SIR,—

I have referred to the Board of Trade and to the Law Officers of the Crown an Act transmitted in your Despatch No. 106, of the 11th June, and entitled "An Act to make provision for the constitution of a Marine Court of enquiry in this Colony."

I annex a copy of a letter which I have received from the Board of Trade, from which you will perceive that the 7th Section of the Act is founded on a misapprehension and should be repealed.

The intention with which the 10th Section is passed, is evidently a very proper one, and the clause appears to have been well considered, but I regret to find that in the opinion of the Officers effect cannot safely be given to it without a risk of raising inconvenient questions with foreign powers.

I have, therefore, to request that you will take steps to procure the repeal of these two clauses. I presume that your Ministers will readily give you their assistance in obtaining from the Legislature these necessary alterations of what, I hope, will prove a useful Law.

I have &c.,

(Signed,

CARNARVON.

Governor MUSGRAVE,
&c., &c., &c.

Despatches.

MR. FARRER TO THE UNDER-SECRETARY OF STATE.

BOARD OF TRADE,
Whitehall, 30th Aug., 1866.

(COPY.)

SIR,—

I am directed by the Board of Trade to acknowledge the receipt of your letter of the 31st ultimo, transmitting a transcript (herewith returned) of an Act passed at the last Session of the Newfoundland Legislature, Cap. XIII. entitled "An Act to make provision for the constitution of a Marine Court of Enquiry in this Colony," and requesting that Lord Carnarvon may be informed whether the Board of Trade are of opinion that this Act may properly be submitted for Her Majesty's confirmation.

In reply I am to acquaint you for the information of Lord Carnarvon, that the Board of Trade see no reason for objecting to the Act.

I am, however, to point out that section 7 which provides for the payments to members of the Court out of the Mercantile Marine Fund has been adopted under a misapprehension, since the Board of Trade have no power to pay the expenses of Colonial enquiries out of that fund. As, however, the Section requires the consent of the Board of Trade, it cannot operate wrongly—but with the view of preventing misapprehension, it would, this Board think, be well that this provision should be repealed when there is an opportunity.

In the meantime the Board of Trade are of opinion that the Act in question may properly be submitted for Her Majesty's confirmation.

I have, &c.,

(Signed.)

T. H. FARRER.

The Under-Secretary of State,
Colonial Office.

Miscellaneous.

COPY OF CONTRACT WITH GEO. MAKINSON, FOR NEW STEAMER IN CONCEPTION BAY, 29TH SEP7., 1866.

(COPY.)

ARTICLES OF AGREEMENT made and entered into this twenty-ninth day of September in the year of Our Lord One Thousand Eight Hundred and Sixty-Six, between the Honorable John Bemister, of St. John's, in the Island of Newfoundland, Colonial Secretary, on behalf of the Government of Newfoundland, of the one part, and George Makinson of Harbor Grace, in the said Island, of the other part, whereby the said George Makinson, hereinafter styled Contractor, promises and agrees for the consideration hereinafter mentioned, to provide for the Government of Newfoundland a new, good and efficient steam boat of not less than one hundred tons gross tonnage and with sufficient horse power to give an average speed of nine knots per hour, for the conveyance of Mails and Passengers to and fro, between the several ports in Conception Bay, for the period of six years, such service to commence and be computed from the first day of October next, the trips of the said boat to be as follows : that is to say, she is to ply five days in every week, from the said first day of October to the 31st December, and thereafter from the first of April, in each year during this contract, to the said 31st December, while the navigation continues open, from Harbor Grace to and from Portugal Cove, calling at such intermediate places as may from time to time be named by the said Government, and in the three months of January, February and March, in each year aforesaid, to ply to and fro once in every week, calling as aforementioned, and the said contractor also promises and agrees that the said steamer (she having been surveyed and approved by the Government) shall be and will continue seaworthy during the continuance of this contract, that she shall to the approval of the Government be and continue well and sufficiently manned and equipped, supplied with good and efficient machinery, engines and boilers, sails, rigging, with two good boats, one of which shall be a life boat, and with at least twenty-five life buoys, and with all other things requisite for the services herein contracted for, that the Governor in Council may at any time during the continuance of this contract, order a survey of the said vessel, her machinery, engines and boilers, and if the result of such survey should require the repair of the said machinery, or the replacing of the boiler by a new one, or any other repair of any description to the said vessel, the Governor in Council shall have the power to order the same to be repaired or replaced as the case may be, and in the case of the boiler, if to be replaced by a new one, such new boiler shall be duly tested by a Government Engineer; that in case a new boiler shall be required the said contractor shall have a reasonable time

Miscellaneous.

from the time of the service of the Government notification, to that effect on the contractor, his agent in Newfoundland or the captain of the said steamer to provide the same; and where repairs are required the said contractor shall have a reasonable time to complete the same, from the service of a like notice on either of the parties before mentioned, during either of these periods the subsidy to cease, unless the said contractor shall in case of the renewal of the boiler put on a suitable steamer, and in case of the repairs, if default shall be made in the performance of the regular trips. It being also provided that the subsidy shall cease whenever the usual trips shall not be performed, by default or insufficiency of the contractor or of the said Boat, whether notice shall have been given by the Government or not; that the said contractor agrees to convey on the routes aforesaid, free of charge, the Judges, Officers and attendants of the Circuit Courts, and Officers travelling on the Public service, (provided it shall be competent to the parties hereto to substitute a reasonable deduction as may be agreed on, from the subsidy hereinafter mentioned, in lieu of this condition,) and that the said boat shall be comfortably fitted up to accommodate cabin and steerage passengers, pursuant to the regulations of the Board of Trade; and that she shall receive the aforesaid mails when ready for delivery at the Post Offices and Way Offices, at such times as the Government may direct, and deliver the same without delay to the respective couriers or Post Offices to which they may be directed, and the said contractor doth also agree, upon such days, as the weather may prevent the said Boat from crossing the said Bay, to send the mails to St. John's by land, and that he will in the nine months aforesaid, that is, from the 1st April to 31st December in each year, be ready four hours after the arrival of the English mail, at St. John's, to receive at Portugal Cove, and in case the steamer should be prevented crossing the Bay, then to receive at St. John's, and carry to Harbor Grace and other places, all such mails as may be delivered to him for that purpose, and also to bring back mails when delivered to him in time for the departure of such mails; that the said contractor, shall, upon any casualty occurring to prevent the performance of the regular trips of the said steamer, forthwith notify the Postmaster General of the same, and also that he shall supply the place of the above mentioned steam boat by another efficient steamer, whenever the first mentioned, by any casualty shall be prevented from performing the usual trips; and shall also, if at the time of such casualty the mails shall be in possession of the contractor, forward them without delay to their destination, that it shall be competent for the Government to send the said steamer on any special services they may require to have performed, paying the contractor a reasonable compensation for any extra work, or expenditure thereby occasioned, and that it shall also be competent to the Government, should the con-

Miscellaneous.

tractor fail in the performance of any of the conditions aforesaid, to determine this contract, at any time, by three months' notice in writing. And the said John Bemister, Colonial Secretary, as aforesaid, for and on behalf of the Government of Newfoundland, and for and on behalf of his successors in Office, hereby promises and agrees with the said contractor, that he, the said John Bemister, on the faithful performance of this contract, by the said contractor, shall, and will, pay to the said contractor, the sum of six thousand four hundred and sixty-two dollars yearly, and every year, during the said period of six years, in quarterly payments, after the first October of this year. Lastly, it is hereby declared and agreed, that should the Government, during the continuance of this contract, construct a Breakwater at Portugal Cove, then the said subsidy is to be reduced annually by the sum of four hundred and sixty one dollars and fifty-four cents, and that should the said contractor fail in the performance of any of the conditions aforesaid, he shall be subject to, and forfeit a penalty of one thousand dollars, in addition to the suspension of the subsidy, as before provided.

GIVEN under our hands, the day and
year first before written.

 EVIDENCE TAKEN BY THE SELECT COMMITTEE ON THE
 ST. JOHN'S HOSPITAL.

 COMMITTEE ROOM,
 HOUSE OF ASSEMBLY,
 16th March, 1867. }

The Select Committee appointed to enquire into the Saint John's Hospital, met this day.

P R E S E N T :

MR. HOGSETT, *Chairman.*
 " RORKE,
 " BURTON,
 " KEARNEY.

JOHN PROWSE, Keeper—*Examined.*

I am the keeper of the Saint John's Hospital, have been so for the past twelve years. I live in the building, but do not sleep there—the building is damp underneath, quite mouldy. My apartments are underground. I attend at all hours. I remain there until twelve o'clock and later if required. I reside near to the Hospital. I have also a house in the country. I get leave to visit it once or twice a week. I never sleep there. Doctor Carson, while Physician of the Hospital, visited the Hospital generally twice a day, at 10 and 7 o'clock, Dr. McKen generally visits about 12 o'clock. I think an earlier hour would be better, sometimes we are up as late as 12 o'clock. The Doctor's general hour is from half past nine till eleven—he sometimes comes at ten o'clock, and keeps us up till half past twelve. The necessities of the Hospital do not require us to be kept till that hour. The Doctor visits twice a day, not more than once or twice has he omitted to do so. I think eight at night and ten in the morning suitable hours for visiting. Dr. Carson adhered to these rules. There were times when Dr. McKen was absent from sickness, and Dr. Fraser visited for him. I have a little knowledge of medicine. There is a great deal of business for one Physician. There never had been a patient suffered from want of a visit from the Doctor or some one for him. There was a large quantity of fever this summer. In fever cases the clothes are fumigated. If the clothes are fit, the clothes are returned to the patient on leaving the Hospital. We were obliged to convert the attic into a Fever ward, as the Fever wards would not contain all the patients. I consider it a fit place, has plenty of ventilation,

Miscellaneous.

it is the best part of the building, a fever ward holds four patients. We have forty cases of fever now. Our and five in each ward; there is eight wards and the attic; sometimes two small children are put in one bed, when crowded. The patients now are nearly all convalescent. We give them the run of the new building, also the yard. We sometimes keep them eight or ten days after they become convalescent. Dr. Carson had an assistant—Dr. Rochfort. Dr. McKen never calls in one except in cases of amputation. The Hospital has been as efficiently attended since Dr. Carson's death as during his lifetime. I do not think the Hospital such a building as Patients could be efficiently treated in. Doctor Rochfort visited once a day, and in cases of emergency consulted. The Hospital is just the same conducted as in Doctor Carson's time. The rules are just the same, and carried out as strictly except as in the visits, there was not a day during the life time of Dr. Carson that the Hospital was not visited by one of the Physicians. If Doctor McKen was out of town he would leave word where he was. We have now in the Hospital 90 patients, half of them Chronic Diseases, some having ulcers. The Matron has charge of the Hospital at night, she does not know any thing about Medicine. I am not frequently called up at night, the orders are to send for me. I have no staff under me. I dress all the wounds, sometimes I get the assistance of a convalescent patient, sometimes the messenger, he is placed under my control and the Matron's, I am more of an Apothecary. There is one man acts as Porter. I also keep the accounts, I make out Reports weekly. The Female servants attend the Female patients. There are 20 women and 70 men patients relying on the Doctor and my attendance. If a patient should be taken suddenly there is no person to render assistance until I am sent for. There is no male night watch. There are female attendants who attend the male patients. There are 10 Female servants, 2 for Fever wards, myself and messenger attend on the male patients. We generally call on convalescent patients for assistance. The Rules of the Hospital do not compel them to assist. There are Rules and Regulations in the Hospital. Don't think the services of convalescent patients as efficient as if persons were especially appointed for that service. We have two male servants; one laid up at present with fever, his name is (Connolly.) He came from the Poor House, he is under no wages; he washes the sores, I have no dresser but myself. The servants are under the control of the Matron. There are only 3 male servants connected with the Hospital. Connolly the porter and myself. Connolly sleeps in the Hospital.

AGNES COWAN, Matron—Examined.

Have been two years Matron, lived in the Hospital six years as Sub-Matron; my salary is £30. I have ten servants under me, six nurses attend the male and female sick patients, two washerwomen, 2 cooks,

Miscellaneous.

one man as messenger; he is the only one we can call on except a convalescent patient. The messenger shifts the patients, the nurse is present, the messenger assists. There is no male watch at night. There are three female nurses at night. I do not consider the building suitable for an Hospital, it is all but falling to pieces, the sills are rotten. Eight servants sleeps in one room about half the size of this room. The Fever Wards are crowded the others not so, the attic is not fit for use, it was not used in Dr. Carson's time—it was used during Dr. Rochfort and McKen's time, I am of opinion one Physician is sufficient to attend the Hospital, think one sufficient; Dr. McKen does it efficiently. The Doctor's stay is at least an hour and a half each day, the visits, in the morning about eleven o'clock, at night about ten o'clock. We have at the Hospital three female night watches. There is no male attendant, but the messenger, sleeps in the Hospital. Mr. Prowse, the Keeper, has not slept in the Hospital since I have been Matron. In case of emergency we could get no assistance in the Hospital, we had but once occasion to send for the Doctor.—Archdeacon Kelly, Mr. Prince, Father Mowley and Father Scott, visit the Hospital as Clergymen.

DR. MCKEN, *Examined*,—

Physician St. John's Hospital. Superintendent since 1860. Have had sole charge since January, 1865. Hours of attendance from 9 to 12, a. m., and from 7 to 9½ p. m. In cases of emergency I frequently visit between hours. I am not aware that the late Dr. Carson visited the Hospital at regular hours. I believe he visited earlier in the summer, on his return to and from his country seat to town. I have visited the Hospital regularly twice every day, with the exception of two or three times, and on these occasions I visited once. I have always been at hand during cases of emergency. I have a large private practice. I also visit out harbors. I was called to Petty Harbor a short time since, and was absent about three hours. I remember sleeping in Petty Harbor one night on account of a snow storm. The Government gave me the privilege of consulting any other Physician in cases where I might deem it necessary. The fee for consultation is half a guinea, for assistance at an operation one guinea. In one fever case I consulted Dr. Shea. I can efficiently attend the Hospital, as well as my private practice. My salary is £150. I consider this sum by far too little. The late Dr. Carson, when in charge, seldom had over 50 patients, and sometimes as few as 20. I never had fewer than 50, and that only for a few days. I have generally had from 60 to 100. I could not give up my private practice for the Hospital. I condemn the present building *in toto*. It is too small, old, damp, and rotten. The accommodation for the servants bad, being underground. I would recommend a stone or brick building. I consider the present staff sufficient for the management of the Hospi-

Miscellaneous.

al. I sometimes avail myself of the assistance of convalescent patients. The nurses on duty for the night are the night watch. There are two male servants, Connolly and Bennett, who sleep in the Hospital, and whose services are available for messages, or otherwise, when called upon. In some cases, I employ supernumerary nurses for one or more weeks. I consider female nurses much better than male. I am aware that in other Hospitals, there are more than one Physician. I do not find my private practice to interfere with my duties at the Hospital. One dresser with the assistance he can command is sufficient for the Hospital. In fewer cases of a mild kind, I have put two children in one bed, but more from necessity than choice. I am quite certain, as regards Medical Attendance, the duties at the St. John's Hospital are efficiently performed, as also, as regards cleanliness, comfort, &c., as much so, as the appliances of the building will permit. Baths are absolutely necessary, but we have no room for them. We are obliged to use, from time to time, the shipper bath, port bath, &c. Typhus or Scarlet Fevers, never had their origin in the Hospital; they were imported from Town. There are 3 water-closets, the only one in use being outside the building. The inside ones are not fit for use, on account of their being choked.

ADDENDA.

Bad as the Hospital is as an institution for the treatment of the sick, it is, by no means deserving the designation of a "Pest House", as the following calculations and comparisons will show. The whole mortality of patients admitted into the infirmary at Edinburgh, is seldom below 1 in 10. Of the whole deaths from fever, at the following Towns, the proportions falling on the different ages stated, were as follows:—

| | under 10. | 10 to 20. | above 20. |
|-----------|--------------|--------------|--------------|
| Edinburgh | 12 per cent. | 29 per cent. | 70 per cent. |
| Glasgow | 12 " | 29 " | 70 " |
| Perth | 15 " | 30 " | 69 " |
| Dundee | 19 " | 51 " | 48 " |

The whole mortality, out of 705 patients admitted into the St. John's Hospital for 1866, was $14\frac{1}{2}$ per cent. But deducting 45 cases, which were admitted in a dying state, will reduce the average to 8 per cent, which should be taken as the nearest correct standard.

In addition to my duties at the Hospital, I have attended the inmates of the Poor Asylum, for the past six years. My services there have been very much increased within the past two years, owing to the admission of Lunatic Patients, under my care.

THOMAS MCKEN, M. D., &c.

Miscellaneous.

J. T. NEVILL, *Superintendent of Public Buildings, Examined,*—

I am connected with the Board of Works. I know the character of the St. John's Hospital. It is not a Building suited to the wants of this Country. It is perfectly unsuited for a Hospital, it is rotten in the lower floors. The smell in the Building is offensive—the rooms are all too low ; they are only 8½ feet high. The Building is badly arranged ; it is dark and badly ventilated. There are no water closets. There is also an absence of cubic space. I was not called on for a plan of an Hospital. I could furnish you one in a few days. I am aware of the Water Company's Water being in the Wash House. I have recommended nothing to be done in the shape of repairs to the Hospital, this year, as being perfectly useless.

The Committee then adjourned.

COMMITTEE ROOM,
HOUSE OF ASSEMBLY,
20th March, 1867. }

The Committee met this day,

P R E S E N T :

MR. HOGSETT, *Chairman.*

“ PROWSE,

“ BURTON,

“ KEARNEY,

“ RORKE.

THE VENERABLE ARCHDEACON KELLY, *Examined,*—

Has been in the habit of visiting the Hospital the past three months, had seen considerable defects in the sanitary arrangements of the Hospital, also the want of sufficient cleanliness ; in the Fever ward I found clothes rolled up in a heap on a bed. I enquired the reason those things were left there, and was told that it was not the proper day for washing.

Miscellaneous.

Cannot say how long they remained there, at least one or two days, that was about two months ago. My impression of the Matron is that she is not of sufficient age or experience. I always found her anxious to attend to any suggestions I made her. I consider the building wholly unsuited for an Hospital. I have had some experience in Hospitals, and think it is the worst I have ever seen. I think the Doctor's attendance regular, the entries are all in the same handwriting. I am of opinion there ought to be a regular House Surgeon. I do not think that justice can be done the Hospital by one Medical Practitioner. I visited the Hospital on Thursday last, do not know the number of Fever patients. I know nothing of the Water arrangements. There is a bad smell arising from defective Sewerage, the whole building should be changed, I believe it to be the opinion of most Medical Men that wooden buildings are unsuited for Hospitals. I am not aware of any convalescent Patient leaving the Hospital carrying Fever with them. I have never heard of an instance. I do not think there is a sufficient number of nurses in the Hospital to do justice to the Patients. There is one nurse for something like 30 patients. The Fever Patients are distributed, some up stairs, some down—and no means of communication except by call, no Bells. There are male attendants. I do not think that such an institution should be left without a male night watch. I am of opinion the Keeper should live in the building. I am also of opinion that some of the nurses are too young, one in particular; none of the nurses seems to have had any training, some of them have been formerly patients, and then became nurses.

REV. M. HARVEY.—*Examined.*

I have been in the habit of visiting St. John's Hospital during the last fourteen years. I consider the building utterly unfit for the purposes of a Public Hospital. There are no arrangements for ventilation, no sewerage, and not a single water-closet in a building having at the present time about one hundred inmates. The result of these deficiencies is that, in the wards, the air is most impure, frequently loaded with animal effluvia; and a heavy, offensive smell pervades the whole building. Patients have told me that in the mornings, after the doors and windows have been closed for ten hours, the atmosphere is almost suffocating and perfectly poisonous, especially when the wards are filled with patients. I am strongly of opinion that the effect of this on the patients is to retard recovery, to intensify diseases of all kinds, and, in many instances, to destroy lives that, in a properly regulated hospital, might have been preserved. The want of drainage and ventilation in a building often crowded with patients, many of them suffering from infectious diseases, has, in the course of years, converted this old damp wooden erection into a sort of pest-house, that could only be purified by fire. The very soil around it, as well as the walls, must, I think, be saturated with im-

Miscellaneous.

purities. It should be razed to the foundations. Its condition is a disgrace to the community, the sleeping apartments of the nurses are in the basement storey; the space allowed them is utterly insufficient; the rooms excessively damp, the walls sometimes dripping with moisture; and thus their health is undermined, and their lives are shortened. The chimneys are very defective. When a high wind blows from a certain quarter, I have known some of the wards filled with smoke, the fires put out, and the ashes driven about the room. In a heavy gale, lately, the seams of the building opened considerably; and in scrubbing the upper floors the water now streams down, in several places, on those below.

I believe the Hospital is kept in as good condition as it is possible, under such disadvantageous circumstances. I have never seen anything indicating a want of attention to cleanliness. As far as I have observed, the floors are kept clean; also the beds and persons of the patients. When patients arrive, as they frequently do, in a condition indescribably filthy, before being placed in a ward, their clothing is removed (often buried,) and after a bath, garments belonging to the hospital are supplied. On going out, either their own clothes, after being washed, or new ones are given them. When the shocking condition of many of the poorer patients on their admission, and the defective appliances of the Hospital are taken into account, the degree of cleanliness maintained is very creditable to those in charge, and must require the utmost vigilance and activity.

I consider the Matron to be a very conscientious person, extremely kind to the patients, and attentive to their wants; one who never spares herself, or shrinks from visiting the worst cases of infectious diseases. In my opinion, she discharges her duties most satisfactorily, and does her utmost to overcome difficulties. I have often heard the patients speak very gratefully of her attentions. From her intelligence, activity and experience of six years in the Hospital, I consider her to be a person well-qualified for such an important office.

I am of opinion that there should be a resident Physician at the Hospital, whose whole time should be devoted to his duties. Patients often require the services of the physician during the night: cases of accidents, requiring prompt attention are sometimes brought in; for these, as well as for the right management of the whole Hospital, I consider the presence of the physician on the spot indispensable. There should also be a night watch; and the keeper of the building should reside on the premises. In cases of difficult operations, the resident physician should have power to call in one or more surgeons as assistants. The Fever ward should be apart from the rest of the building; and no communication should be allowed between it and other wards.

Miscellaneous.

No dereliction of duty on the part of Dr. McKen has come under my observation. No patient ever made a complaint to me regarding him. I do not know of any fever patient having been sent away too soon from the Hospital, and thus spreading disease. I believe Dr. McKen is very kind to the patients, and allows them to remain till thoroughly recovered. I have no knowledge of the doctor's visits to the Hospital. I never opened the visiting book. I consider that this matter belongs to the department of the authorities who have the supervision of the Hospital.

I do not know much regarding the conduct of the nurses. I think the staff of nurses insufficient for the number of patients during the winter season. I consider that a nurse twenty-five years of age is old enough to take charge. Elderly persons cannot stand fatigue and night-watching. There should be two male attendants to assist nurses, when required, so that their services may not involve any violation of delicacy. I believe there are such male attendants at present.

ADDITIONAL STATEMENT.

On Friday the 29th April I visited the Hospital. A patient informed me that in the ward in which he was the stench became so horrible during the forenoon, that all who were able to move had to fly, and some almost fainted. The cause was two patients in the ward who were suffering from very loathsome diseases. For such cases there should be a separate ward. When I was there, the smell was almost intolerable.

I would respectfully urge on the Government the necessity of *immediately* commencing the erection of a new stone-built Hospital. If commenced now, and pushed on vigorously, it might be ready for occupation by the end of next summer, or even sooner. I know of no public improvement for which there is such an urgent necessity. Under the present arrangements life is being sacrificed, and the lives of all who visit the Hospital—doctors, nurses, relatives of the sick, clergymen, are imperilled. Meantime, until a new Hospital is completed, much might be done to ameliorate matters. An excellent drain has been laid down some time ago, but strange to say, though brought close to the building, it has never been used. The erection of half a dozen water closets throughout the building, and their connection with this sewer, would cost but a small sum, and would do much to remove the foul smells that now prevail. The wash-house, kitchens, &c. should also have branch-drains opening into this sewer. A simple ventilating apparatus could easily be placed in each ward, and thus the premises would

Miscellaneous.

become much wholesomer. A few baths also could easily be erected as the supply of water is abundant. A hundred and twenty pounds would effect these improvements, and save many lives.

M. HARVEY.

Rev. Mr. McRAE, *Examined*,—

I have visited the St. John's Hospital, for about nine years. I fully concur in the opinions of the previous witnesses as regards the sanitary condition of the Hospital. There is an utter lack of ventilation, the structure of the building is bad, a wooden building is wholly unsuitable. Fever and Erysipelas tend to become permanent diseases. The air of the building is bad; noxious vapors arise from different causes. I have found Tobacco smoking in a ward; cannot say if allowed or not. If allowed, it should be in a room detached from the building. The absence of Water Closets is disgraceful. The Doctor, to the best of my knowledge, has attended punctually. I consider visits at given intervals insufficient. I think the attendance of one Medical Practitioner insufficient in my opinion there should be a resident Physician. I think the number of nurses insufficient—in the case of a patient being attacked by lunacy, or delirium tremens after coming in, a female nurse could not well manage without the assistance of some male attendant; the attendance of male nurses is absolutely necessary; in every well conducted Hospital they have them. In the absence of a resident physician there should be some male assistance. I consider the present Matron, in all respects, suitable, it would be better perhaps if she was a few years older, she is well spoken of by the patients. I am aware it is a difficult thing to procure nurses. In the absence of efficient nurses, they must be content with the best they can get.

ELLEN MURPHY, *Examined*,—

I am Cook in the Hospital. I have nothing to do with patients. There is a Sub-Matron, her name is Hannah Murphy. Doctor McKen attends regularly. I am four years in the Hospital. I never knew him to be absent one day; he must come through the kitchen to his Surgery—he has been sick, but never absent—he never missed one day for the past four years; he comes to the Hospital never later than ten, he never kept the whole of the Hospital up waiting for him till 12, he never remains later than 12. We go to bed at ten, rise at 6. There are two night nurses, two up and two down, and two in the Fever Ward; that is all the servants, eight in all, including wash house. There is no male attendant on watch at night. The keeper leaves when the Doctor leaves—he lives near St. Patrick's Chapel. I sleep in the basement storey. There are three beds in the room; it is not wholesome. The

Miscellaneous.

Fever nurses sleeps up stairs. Six sleep in the room. At night the whole building is left at the mercy of three women. There are gas lights in the sick wards. Miss Cowan, the Matron keeps no watch. Bennett, the Messenger, is there to go for the Doctor if required, and Michael Avery acts as Messenger; they sleep in the Long Room, among the chronic patients.

The Committee then adjourned.

COMMITTEE ROOM,
21^{ts} March, 1867. }

The Committee met this day,

P R E S E N T :

MR. HOGSETT, *Chairman*,
“ RORKE,
“ KEARNEY,
“ PROWSE.

The Chairman laid before the Committee the following letters :—

March 20th, 1867.

MY DEAR SIR,—

The Saint John's Hospital is not in any way adapted for the purpose intended, and I believe the witness who called it a "Pest House" was quite correct. The person who urged me to try and influence the Government even as a point of economy, to build a new Hospital, was Dr. Auckland, physician to the Prince of Wales. In its present state, ill-ventilated and confined, *its cost* in 20 years will be, in *cash*, more than would build a good Hospital, adapted for the present and future population. I don't speak of the lives of the poor people at all, they appear to be of no value, though when you consider the orphans left, even on that score there is no economy. I hope, if the Government decide to do their

Miscellaneous.

duty and build a new Hospital, they will send home for plans, when all the hygienic requirements will be taken into account ; and that the health of the community and the money raised will not be jobbed away by local interested mismanagement. If you don't pay a health tax (as I said last spring to you about opening up the circular road, and cleansing the town) in money, you must pay it in lives, as we have experienced. A filthy town and a bad hospital, are the dearest *luxuries* you can indulge in ; cleanliness and civilization the cheapest.

Yours, &c., &c.

† J. T. MULLOCK.

P. S.—I wish you would read this to the members on Committee.

ST. PATRICK'S, }
River Head. }

SIR,—

Imperative duties have prevented my attending the Committee of Enquiry upon the Hospital.

Having been absent from town all day till now, I was also unable to answer the Committee's note before.

I feel the less regret at this, as I feel I cannot render any information about the Hospital that could be deemed important.

I have never visited the Hospital except when called upon to minister to the dangerously ill. Such calls have not been frequent since I have been stationed in River Head, and I think this fact speaks well for the medical and other conduct of the establishment.

My slight experience of the Hospital has shewn me nothing to be dissatisfied with, except what I esteem the general unfitness and unhealthiness of the building itself.

Perhaps I ought to add that a religious classification of patients has been introduced there. While I admit the right of Clergymen of other denominations to do as they think fit with members strictly of their own flock, I nevertheless respectfully submit my opinion, that such classification is useless, and indirectly injurious, useless because it will not prevent a R. C. Clergyman from visiting any person whatever who *may desire expressly* his attendance, which is the object it aims at ; injurious because it is carrying sectarian feeling to an extreme which cannot be comforting to the patient whose religion is ticketed over his head, as if he

Miscellaneous.

could not confess it himself, or recant it, in spite of the ticket, if he thought fit ; injurious too, because it will undoubtedly, in some cases, beget distinctions and inquisitions.

I do not object to the proceeding, I merely state my opinion of it.

R. R. V. HOWLEY.

Doctor FRASER, *Examined*,—

Is a practising Physician ; has had occasion to visit the St. John's Hospital occasionally. Do not know the numbers of nurses. I am not aware, from personal observation, that they keep night watches. A male night watch is essential in a Public Institution. I think it desirable for the Keeper of the Hospital to live in it. I consider three female nurses sufficient to give alarm and call for the assistance of males in the event of fire or other casualty occurring. I have attended Hospitals in other countries. Cannot say they have male watches ; the number of nurses required depends on the number of patients in Hospital. Three nurses not sufficient to attend on from 120 to 130 persons. I have always found the orders given by me, whilst attending on private patients, carried out. I never had but one complaint made to me by a patient. I never turned my attention to the internal arrangements of the Hospital. I think the building very unsuitable, ill arranged, badly lighted, worse ventilated. There is nothing of the appearance of a Hospital about it, and and it is altogether unsuited for the requirements of one. Never saw an Hospital without a resident House Surgeon, with Medical Superintendents as well. I should say it is quite possible for one Medical man to attend the ninety patients in an Hospital, even with private practice. Even with an epidemic in town, a medical man could do so, if he devoted the whole of his time to his profession. At the same time I think it would be desirable to have more than one Medical attendant for such an institution, but do not think it absolutely necessary. I do not agree with having stated hours for the medical man to visit the Hospital ; he should visit it regularly. I think the Medical man the best judge at what time to visit. Think a stated hour would put the servants on their guard as to the Doctor's visits. I think the St. John's Hospital was well conducted under Dr. Carson, as I believe it to be under present management. I do not think the Hospital, from its present character, would have the effect of directly spreading epidemic disease in town. I think, from the defects of the Building itself, it must increase the amount of disease there.

JAMES N. FRASER, M. D.

CHARLES CROWDY, M. D., *Examined*,—

Have been in practice some nineteen years. I have visited the Saint John's Hospital, not much latterly. Dr. Simms attends to that part of the practice. I was one of the Medical Commission appointed to report upon the Hospital. I have no knowledge of its internal arrangements.

Miscellaneous.

I occasionally visit it. I think it ought to have a resident Physician: I never knew an Hospital without one. I consider an Hospital having a hundred and twenty beds, a large one for a Provincial Hospital—consider large wards desirable. Think six nurses sufficient for an Hospital containing ninety patients—think one nurse to forty patients insufficient. I think a male night watch necessary; women would be unfit for assistance if a fractured patient was brought in. A male night watch, for the safety of the building is necessary. I do not think that the internal arrangement of the Hospital could be carried on efficiently when the Keeper sleeps out of the Hospital, and when the only assistants are two male attendants, paupers, I am of opinion that there should be a second Dresser, the man who compounds the medicines should not dress the wounds. I consider the building wholly unfit for an Hospital—unfit for the sick and those who attend them, such as Physicians, Clergymen, &c. There are no separate rooms for convalescent patients. No separate wards, the attic used for Fever patients; it is an unfit place to keep a convalescent patient in. It is not within my knowledge of any complaint against the Medical man. It is wholly unfit for an Hospital and is daily increasing so. I consider it would be a risk to put up a building in sections. Consider it better to build a new one. I think the Poor House would suit as a temporary building or Hospital while one was building, without any injury to the general health of the patients. If a Hospital were built and properly conducted, no danger would arise from it to the health of the town—no risk to the neighborhood, if properly conducted.

DR. CHARLES RENOUF, *Examined*,—

I am a practising physician for about twenty seven years, occasionally attended the Saint John's Hospital. I have had private patients there. I have assisted Dr. McKen in surgical operations. During my visits I have seen nothing improper in the internal management of the Hospital. I am not aware of the number of nurses. I should say one nurse to forty-six patients, insufficient especially so if in Fever wards. I have attended the Edinburgh Hospital; it is the practice to have only female nurses there. I would not consider the Hospital properly attended to, where the Keeper is allowed to sleep out of the Hospital. I was not one of the Medical Commission on the St. John's Hospital. It is my opinion that the building is imperfect in many ways; bad ventilation. I have discovered offensive odors on entering. The sanitary arrangements is wholly unfit for an Hospital. No water, or water closets, to maintain the health of individuals. It is wholly unsuited for the purposes of an Hospital. From its condition it tends more to spread disease, and makes the disease more malignant. Two physicians, in my opinion, paying regular visits would do well—a resident physician better. I think it utterly impossi-

Miscellaneous.

ble for one man with a large private practice, to pay fair attention to the Hospital, I never knew an Hospital having 80 beds without a resident physician. I think one physician during the late epidemic, and having a private practice to attend to, could not attend to an Institution of the kind. I think it utterly impossible.

DR. BUNTING, *Examined*,—

I am a practitioner of twenty years' standing. Had the management of the Hospital for ten years, very frequently visited it since my resignation. Am not aware of anything wrong in the management of the Institution. Have had private patients there very frequently, never heard of any complaint from them of neglect. My orders were always attended to. Do not consider six nurses sufficient to perform day and night work. Do not see the necessity of a male night watch. Think decidedly the Keeper should reside in the building; it is the duty of the nurses to attend to the wants of patients in their wards. The building is unsuited for the purposes of an Hospital. The wards are not of sufficient height, want of proper ventilation, not properly heated, defective sewerage, no water closets, &c. Am not aware of anything wrong in the conduct of the nurses.

Question.—Is it within your knowledge that the Medical attendant has been absent, or any interruption in his attendance?

I decline answering that question.

DR. HENRY SHEA, *Examined*,—

I have practised as a physician for the past eight years. Since 1858 have had occasion to visit the St. John's Hospital. I consider the number of nurses insufficient. I think a male night watch absolutely necessary. I consider baths indispensable; there is none in the St. John's Hospital, ventilation imperfect. There are no water closets. The Hospital is too small; the atmosphere of the building is bad; it is very difficult to treat patients in a building of this description. I do not think one physician with an out door practice could attend to the duty of the Hospital efficiently—an hospital in other countries, with 50 or 60 beds, has two. The building is wholly unsuited, for the want of accommodation during an Epidemic, as we have had patients leaving, would carry disease. In other hospitals there are convalescent wards. The attic, in the Saint John's Hospital are used as wards.

The Clerk was instructed to communicate with Dr. McKen, St. John's Hospital, Mr. Downey, Poor House, informing them of the intention of

Miscellaneous.

the Committee to visit the Hospital and Poor House on Saturday morning next, at 10 o'clock : also to request the attendance of J. T. Nevill, Esq., Superintendent of Public Buildings.

The Committee then adjourned.

**CASE OF JOHN CONNELL, LATE CHIEF CONSTABLE AT
HARBOR GRACE.**

(COPY.)

 SECRETARY'S OFFICE, }
 14th June, 1861. }

GENTLEMEN,—

A few weeks since the Government, in consequence of various matters which came under their notice in respect of the Harbor Grace Riots, considered it necessary to suspend Chief Constable Connell from his Office. Since that time the presence of important business has prevented the Government from giving further attention to this case, but as that pressure has now in a great degree ceased, they desire to have his conduct inquired into, with the view of either dismissing him altogether, should he be found to have deserved this punishment, or of restoring him to his former position, should no misconduct be proved against him. For the purpose of making the necessary inquiries in this matter, the Government are desirous of availing themselves of your services, and they will feel obliged if you will undertake this duty, and report the result of your investigation to them. The grounds of complaint against Mr. Connell are drunkenness and neglect of duty not on any one occasion only, but generally, so as to disqualify him for the satisfactory discharge of the duties of his important office. In making this enquiry you will, of course, avail yourself of the evidence of the Police Officers, Magistrates, Clerks of the Peace, and such other persons as by their habit of official communication with Mr. Connell, may be most competent to testify upon these points, as well as of all others who have material evidence to offer, and you will also be kind enough to give Mr. Connell, by himself and his witnesses, a full hearing, furnishing him with a copy of this communication, and permitting his attendance at your proceedings, and his examination of the witnesses against him.

I have, &c.,

(Signed,)

 R. CARTER,
Acting Colonial Secretary.

Messrs. JOHN MUNN,

" JOSEPH PETERS,

" WILLIAM H. RIDLEY,

" GARLAND C. GADEN,

Or any two of them,

Harbor Grace.

 SECRETARY'S OFFICE, }
 5th July, 1861. }

SIR,—

I am directed by the Governor to acquaint you that His Excellency brought under the consideration of the Council, the subject of the alleged misconduct of John Connell, Chief Constable at Harbor Grace, together with the evidence taken upon this subject, before yourself and Mr. Gaden, the Commissioners appointed for that purpose, and the evidence having been read, it was

Resolved,—“ That the charge preferred against the said John Connell, of neglect of duty and habitual drunkenness, has been fully sustained, and that as offences of that character, particularly in an Officer to whose care life and property are frequently entrusted, cannot be overlooked, the said John Connell be dismissed from his Office, receiving, however, in consideration of former services, full pay to the 30th day of June last.”

His Excellency is pleased to approve of and confirm the Resolution in question.

I have, &c.,

(Signed.)

R. CARTER,

Acting Colonial Secretary.

JOSEPH PETERS, Esq., J. P.,
 Harbor Grace.

(COPY.)

 SECRETARY'S OFFICE, }

 REPORT OF T. S. DWYER, INSPECTOR OF WEIGHTS AND
 MEASURES, 1866.

 SAINT JOHN'S, }
 January 1st, 1867. }

SIR,—

I have the honor to forward, for the information of the Government, a Report of my duties for the past year.

In accordance with the amendment of the Weights and Measures Act, of last Session, I visited the different shops, stores, and premises, where Weights and Measures were used, marking such as were correct, and adjusting any that required it.

I would respectfully beg leave to suggest that there should be some restriction placed on the use of so many different sizes of Rods, as there at present used in gauging oil, molasses, spirits, &c., &c., varying in the size from $\frac{3}{8}$ inch square to $\frac{3}{4}$ inch, and tending to endless disputes. The point of a small Rod, fitting more closely in the package or cask than the larger ones, will consequently make a difference in the measurement of a hogshead of over one gallon, and so in proportion to the size of the vessel. I am sustained in the opinion by many interested parties, that but one size Rod should be used, and which should not be larger than $\frac{5}{8}$ inch, nor less than $\frac{1}{2}$ inch square; or, if a second size Rod be allowed, it should not be larger than $\frac{3}{4}$ inch square, and used only for gauging molasses, these being the dimensions of the Rods adjusted by me and used by H. M. Customs.

It may not be irrelevant in this Report, to allude to a case brought under my notice the past summer, and which sufficiently proves the necessity for some further supervision to protect the interests of the trade. I was requested, by a highly respectable firm in town, to attend, officially, at the weighing of fifty barrels of Pork, which was after being landed and intended for this market. Out of the entire lot, only two weighed 200lbs. the remainder ranging from 170lbs. upwards, and averaging, on the whole, only 186lbs. This occurred at a time when pork was selling in the market at from 24 to 26 dollars per barrel.

I have received, in fees, the past year, the sum of \$354.19, and adjust.
