**INTERNATIONAL  
BUYERS OF  
SPECIAL CROPS AND PULSES**

This 1991 directory, of Special Crops and Pulse buyers was produced by the Agri-Food Division, of External Affairs and International Trade Canada, with the assistance of our Canadian Embassies. A separate United States version is also available.

There are some Countries missing from this issue as it goes to press. However, the intention is to up-date the directory annually if possible, and the next issue will include more Countries and detailed information on products of interest to the buyers. Trade Associations and Councils have been included where the information was available.

The Buyers listed in this directory are generally known to our Trade Offices. However, it is the responsibility of the individual Canadian exporter to check the commercial standing of any firms with which commercial arrangements are being contemplated or entered in to.

Any comments or suggestions, particularly from Canadian exporters, on the form or content of this publication in time for the next up-date would be welcome.

**SPECIAL CROPS AND PULSES****CUBA**

" Most promising opportunities are for sales of red kidney beans and green peas (combined annual import of 10 000 MT). Pinto beans are only imported when price for red kidney beans is too high or there is a low supply situation of red beans. Any sales efforts to Cuba should be supported with minimal 360 day credit term. Such sales are Limited by available limits of EDC section 27."

- Deputy Director of Alimport - Emerio Izquierdo

Through experience Finnish importers have found traders in the Netherlands can offer better prices and terms than direct contacts in Canada. Buckwheat, millet, canary seed, coriander, caraway, and wild rice have negligible import potential or are unknown on the market. Sunflower seeds are imported mainly for crushing purposes. Major suppliers are Hungary and Bulgaria. The total import in 1989 was 198 tons of which 179 was of Canadian origin. Import of most oilseed requires import permits and are granted only if domestic supply does not meet demand. Permits are granted to crushers directly.

**The Three Oilseed Crushers in Finland are:**

**Hankkija Group**  
P.O. Box 1  
00641 Helsinki

## SPECIAL CROPS AND PULSES

### **MALAYSIA**

#### LIST OF IMPORTERS FOR BEANS AND PULSES

In Malaysia, beans and pulses are mainly imported in bulk for either packaging or local canning operations for re-export purposes. However, soybeans are imported for crushing and milling, as well as for processing into soybean drinks. Local consumption of beans and pulses is still small, with major consumers being local vegetarians, who are commonly found among the Chinese and Indian communities. Major local outlets are sundry\grocery stores, supermarkets, night floating markets, and "wet markets". Although local markets for pulses is growing as Malaysians become increasingly health concious, believed prospects for Canadian exporters currently lie best with Malaysian bulk importers. FYI total annual import of pulses into Malaysia approximatly 15 million U.S. dollars.

#### AGENTS FOR SOYA BEANS
