CHARGES WIDE

Manitoba Legislature Hears Moneys Were Corruptly Employed for Candidate.

LIBERAL CITES A HUNDRED INSTANCES

Accusations Create Profound Sensation in West.

WINNIPEG, Feb. 7. - Sweeping tharges of corruption and intimidation by provincial government work-May were made in the provincial legislature by T. H. Johnson, Liberal

Mr. Johnson opened the matter by reading the following statement in

"I, on my responsibility as a member of this house, charge: that public moneys were improperly and corruptly employed in influencing electors to ty on the constituency of Gimli on the 12th day of May, 1913, clear evidence of which is to be found in tems dence of which is to be found in items in the public accounts aggregating some ninety-three thousand dollars expended directly by the government; that bribery was extensively practiced in this by-election on behalf of E. L. Taylor; that corrupt treating was carried on thruout the constituency to a degree never before known; that liquor was freely dispensed by the agent of Taylor in local option territory and elsewhere; that intimidation was largely practiced; that employes of the Manitoba Government and officers of the law were personally guilty of acts of intimidation, bribery, corrupt treating and distribution of liquor; that violators of the law were protected by officers of the government charged with enforcement of law and order; that prominent among the workers and agents of E. L. Taylor were owners, managers, employes and habitues of notorious drinking reand habitues of notorious drinking resorts in Winnipeg and 'clubs of that class': that this compain class; that this campaign of corrup-tion, intimidation, bribery and illegal use of liquor was directed and managed by prominent members of the Manitoba Legislature." Johnson also cited over 100 special

instances of alleged corrupt practices during the Gimli campaign. The government has not yet replied.

GROCER OPENED DOOR, SMELT GAS, RAN FOR POLICE

Just in Time to Save Mrs. James Long, 134 Brunswick Avenue

When Robert Graham, a grocer, knocked at 134 Brunswick avenue, at noon Saturday and failed to get an answer, he stepped into the hallway and was met by the fumes of escaping gas. Without waiting to further inrestigate, the grocer ran with all speed to the new No. 11 police station, a considerable distance away, and after much delay arrived back at the house in company with two constables.
In the meantime Mrs. James

the wife of a Toronto Street Railway motorman, was lying unconscious in her bedroom with the fumes of escapng gas getting stronger. When set in opening the door and window of the room in which the woman was e came on the scene no time was found, but it was with difficulty that she was revived. A little more delay and it would have been too late to The police explanation of the matter was that the woman was either sick

er despondent. SIR HENRY MENTIONED FOR LONDON POSITION

MONTREAL, Feb. 7 .- One of the topics much discussed here, especially among bankers and business men, is that of successor to the late Lord Strathcona as high commissioner in London. It is, however, conceded that it is likely to be either a Toronto man, or a member of the present govern-ment, or someone prominent in Canadian politics. One Toronto man men-tioned by bankers and brokers here is Sir Henry Pellatt, who they admit here is well posted in Canadian financial and commercial affairs, has social position, has lots of means and probably would be willing to go to London

ARRESTED FOR ST. KITTS POLICE

When John Merithew left St. Catharines more than a year ago, it is alleged he had stolen two valuable sets of harness. On Saturday the Toronto police received word from St. Cathto face the long standing charge.

The Secret Force Against Annexation of Suburbs IS PLACED ON

GIMLI CONTEST Turns on the Fate of the Seven Licenses in York Township.

Accusation That Public The Brewers and all the Trade Are Behind the Seven Thus Affected.

Whence comes a lot of the opposition to the annexation of the suburbs

Many peple would like to know
It crops up in the city council and it crops up, or rather fails to crop
up, at other places, the it gets in its work all the same. Bribery Was Extensively Used in By-Election — Startling

The World was told, with good reason, that this powerful but quiet opposition is inspired by the liquor interests because of the effect, probably the unfair effect, probably annexation of every kind are not enemies of the trade.

It is the only means the owners of these licenses have of defending their investments, and doubtless they are backed by the brewers and liquor

trade generally. Here are some details that show how it works out:

Licenses in York Township:

1 at Todmorden (East).

1 at O'Sullivan's Corners (East).

1 at York Mills (Yonge street).

1 at Cherry's (West, near Elia). 1 at Fairbank (West).

2 at Lambton (West). Four of these licenses (one at Todmorden, two at Lambton, one at Fairbank), are in the immediate annexation belt, and would therefore have to disappear if the city were extended up to St. Clair on the east side, and Gimli was carried by L. E. Taylor for the Roblin Government. The charges will probably be probed after the government has replied.

Mr. Hopson connect the matter by the matter by the carried a first state of a mile north of Eglinton on the west side, as the city cannot by the law, as at present, have any more licenses than the number set out in the city bylaw on the subject.

But, worse than this, as far as the trade is concerned, is the fact that the content of the city bylaw on the subject.

but, worse than this, as far as the trade is concerned, is the fact that the votes in the township which now keep their licenses in existence as against the local option movement, would be in the city, and, therefore, non-effective thereafter in the township, and as a consequence, the local option people would easily make the rest of the township (three licenses) dry. The bulk of the British voters all round the city are opposed to a dry belt.

The World's informant, therefore, says that either Hon. Mr. Hanna or the city itself country in all fairness to the parties concerned make a pro-

the city itself, ought, in all fairness to the parties concerned, make a provision in the law, or bylaw, that in case any hotel in the Township of York be taken into the city the number in the city ought automatically to be increased by the number so taken in; and then, if the citizens care thereafter to reduce the number there might still be some of the hotels left in the outskirts. North Toronto and West Toronto were dry when they came in and are still so. East Toronto and Norway came in wet with five, and now have only three in the city. The city license board wiped two of them out. It is not likely that any opposition will develop to the annexation of 80 acres of the Danforth Glebe estates on Monday, because no licenses, or voters for that matter, are concerned.

GIRL IN FACTORY WORE \$2000 COMB

(Special to The Sunday World)
NEW YORK, Feb. 7.—For two
weeks last month the diamond and bear hair comb of Anna Heid, the actress, valued at \$2000, adorned the raven locks of Rosic Fucciano as she engaged in her daily toil in an east side paper box factory. This period immediately followed Jan. 1, when Miss Held lost the ornament from her hair while walking from the Cafe Beau Arts to the stage door of the Casino Theatre.

It is expected that the terms of the will be made public will be made public within the next week. It is said that a number of bequests have been made to charitable institutions in Toronto and other parts of the country. According to E. W. Cox, his father disposed of the Casino Theatre.

Casino Theatre.

Rosie's mother, Marie, found the comb and took it to her home. Some of Rosie's schoolmates told her that the ornament was made of real diamonds and pearls and Rosie intrusted it to a cousin, who took it to Sellinger's pawnshop. The nawnbroken the nephew, Brown unearthed the story of the finding of the ornament. Two Constables Get to House story of the initing of that she

ONE MORTGAGE

St. James' Church Authorities Blanket Loan of Sixty Thousand Dollars on Properties East of Parliament St.

OVER THREE HUNDRED STORES AND DWELLINGS

Record Mortgage for City in Number of Properties Involved-Land All Out on Long Leases.

Probably the largest blanket mortgage, for the number of properties involved that has ever been but then by Sackville street, on the south by Sydenham street, and on the west by Parliament street. Altogether in the neighborhood of 300 stores or dwellings are affected.

There are nine distinct blocks, as St. David street runs east and west between Sydenham and Wilton. On Pariament street alone there are thirty odd stores or dwellings Several small streets and lanes, such as Regent's Place. Sutton avenue and Blair avenue, esides unnamed thorofares are in-

ceedingly large one it is doubtful if another in Toronto covers so many parcels. The district in which the property lies is one of the oldest sec-tions of the city, and for the most part the dwellings and stores covered by the mortgage are not modern. Most of the houses have very shallow back of the houses have very shallow back yards, while the district is badly cut up with narrow lanes called streets or avenues. From time to time many uncomplimentary remarks have been made against the church for not keeping their holdings in a better condition. The property is leased in twenty-one year terms. One of the officials of St. James' Cathedral, in speaking to The Sunday World, said that the late Hon G. A. Cox and the

Locked in Train, Then Sent To Death in Burning Tunnel PREVENTAL

NINE BLOCKS This is Report of How Ten American Railway Men Met Death at Hands of Mexican Bandits.

> JUAREZ, Feb. 7.—Definite information of the fate of the ten American railroad men captured by Mexican bandits, was still lacking today, altho in this city railroad officials were disposed to discredit the rumor that they, or at least six of them who were on the passenger train, were locked in the train and sent to their deaths in the blazing Cumbre tun- FACTS LEARNED FROM nel. Circumstances thus dar learned are against the truth of the rumor.

According to P. C. Thede, superintendent of the Pearson plant at El Paso, the train stopped at the station of Cumbre. This in only a quarter of a mile from the big Cumbre tunnel, and Mr. Thede said that in that distance the train could not have gained sufficient momentum to bring on a wreck so that all persons in the train would have been killed. There were

The rumors were started by a Mexican who is now believed to have been instructed to tell that story to delay pursuit of the bandits and their

conductors and two American engineers on the freight which was a doubleheader, and was set on fire to destroy the tunnel. A number of Mexican

Two Mexicans who left the train at Cumbre said the pass not held up, but ran into the tunnel innocent of the danger. The fact that none of the crew or passengers have been seen since, altho four days have elapsed, was reckoned as the surest evidence of their fate, for which Maximo Castillo, who failed to leave warning that he had set a freight train on fire in the tunnel, was regarded as responsib

en announced that he had opened nebreak up the negotiations. Evidence

of this conspiracy has been persistent. Two methods have been adopted by the conspirators. One is to innoculate the people with the idea that Mayor Hocken and his supporters have not business proposition. The other is to work up suspicion that a perpetual franchise for the radials will be fastened upon the city.

Mayor Hocken and his supporters have proved beyond a doubt that they have the ability to handle a thirty million business proposition. They are now proving that perpetual franchises for the radials will not be ias-Sir Hugh Graham's Whole

chises for the radials will not be lastened upon the city.

There are two reasons for the conspiracy to break off the negotiations.
One is the hatred The Telegram has for Mayor Hocken since he threw out of the city hall the influence of that newspaper. The Telegram would do anything to defeat any plan Mayor Hocken has for the benefit of the city.
The other reason is that private own-OTTAWA. Feb. 7.—The situation in Quebec and Montreal is watched here with even keener interest as things develop from day to day. The outstanding event of the enquiry at Quebec on Friday so far as the politicians here are concerned, and perhaps even more so as far as the people of Montreal are concerned, was the declaration of war.

Macnab, the editor of The Montreal papers have strenuously fought this Macnab, the editor of The Montreal conspiracy and will probably continue Mail during the proceedings of the into fight it until the negotiations for the

Mail during the proceedings of the investigating committee. Mr. Macnab knows Graham's newspaper record and his life for twenty-five years past, and the two of them worked in the most intimate fashion in many things that have more or less startled the Canadian public, especially at election times, and they also worked together in connection with legislation secured from time to time at Quebec dealing with Montreal franchises. No one doubts now that Macnab has entered on a fight with his former chief, althout the case of Lorne McGibbon, that fights of this kind may come to an end by some kind of settlement and truce. For instance, Lorne McGibbon swore by all which are certainly, extraordinary pre-

Special appointments or consultation at your home, hospital or physician's office can be made by telephoning Main 5573, Write to above address if you live out of city.

WITHIN A MONTH

Building Trade Unions Looking for Unusual Amount of Activity

MORE JOBS THAN MEN

Outlook, Say Officials, is Extremely Bright---Many Large Structures

Fred I. Burgess, own the northwest corner of Yonge and Grenville streets, "so are going to start work soon on the construction of six stores and the largest moving picture theatre in Toronto."

Since the time when the Carlton block was being bought, there has been no great change in the buildings on Yonge street between College and Bloor streets, and the putting up of the structure may start activity in this district. Many investors who bought in the vicinity of the mystery block, with the expectation of turning over their holdings quickly still have the investments on their hands.

Substantial foundations, to carry several more floors, will be used in the store building, which will at present be three storeys high. The stores will take up 100 feet 6 inches of front age, leaving 20 feet for an arcade into the moving picture theatre to be built in the rear. Already a lease has been given to a bank for the corner store.

Speaking about the theatre proposition, Fred A. N. Powell said: "We have not yet decided how much money we will put into the enterprise, as our plans are not yet complete. The idea we are working on

Besides big botels, and the addition to the John Inglis factory, there is the annex to St. Michael's Hospital, and many other buildings which are likely to be erected. "There need be no fear of inactivity in the building trades," was the unanimous opin union men had to offer.

being no other employes about at the time. The pair being missed two hours later, a search ended in their being located. They were in a badly chilled condition, as the temperature of the room was well below zero and

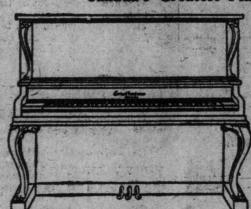

Mrs. James Lee Laidlaw, the wife of the New York banker, who, in com-pany with her husband, has just started on the first conjugal crosscountry "hike" in the history of the suffragist movement on this continent. They are to make a whirlwind trip to Montana, the state where the "Suffs" and "Antis" are fighting tooth and nail; one for the movement, the other against it. In Montana, Mrs. Laidlaw will open headquarters in the City of Butte, where she will have the assistance of Mr. Laidlaw and Miss Jeannette Rankin, the great little suffragist gen-eral. Mrs. Laidlaw is the chairman of the Suffragist movement in Manhattan, and has been an indefatigable worker for the cause. During her visit to the western coast she and her husband will attend the annual state convention of the "Suffs" at Reno. and will investigate the alleged attempted intrigue of the antis with the saloonkeepers and liquor dealers against the suffragist cause. Mrs. Laidlaw is one of the most influential workers in the State of New York, and a very convincing speaker.

Gerhard Heintzman Pianos

Although its value as a musical instrument mustalways be the first consideration, there is another feature of importance in the selection of a pino. The modern home calls for an instrument which shall harmonize in appearance with its surroundings.

Gerhard Heintzman Canada's Greatest Piano

is produced in the finest and most varied line of cases known to the art of piano building. It is fitting that great from

musical standpoint should be made available for every environment.

A beautifully illustrated book showing many of the styles and explaining the wonderful construction of the GERHARD HEINTZMAN piano will be mailed anywhere upon request.

Our only City Salesrooms are:

DECREASE IN HORSES CAUSED BY GASOLINE AND GASTRONOMY GIVE CANADA A GREAT CHANCE

Farmers and Breeders Have Profitable Opportunity Before Them That Will Be Gone in Year — Other Countries Spending Millions to Produce Situation That Has Cost Us Nothing—Remounts Scarce.

The idea prevails in some quarters to follow the lead of Germany or that the British War Office is a conservative. slow-going concern but judging from the strides which have

judging from the strides which have been made during the past few months regarding the remount problem, such an impression is wrong. Things are moving so quickly across the ocean that unless Canada moves with equal speed, the opportunity of a lifetime will be missed by the farmers and breeders of this country.

The Canadian Bureau of Breeding has distributed thorobred sires thruout Canada, and a goodly, crop of young, remounts has been produced. This work has been done at considerable expense to a few individuals, at trifling cost to the government, and at no cost at all to the farmer and breeder. What other countries have spent has secured for a few thousands. For instance, the average cost to Germany of its thorobred sires is \$20.000 each. Canada has secured most of its thorobreds by donation, and they are just as good, if not better than the German sires. Furthermore, most, of these donations were made by foreigners, This phase of the situation was so unprecedented that in the early days of the bureau it was often said that the plan was too good to be true, but time has proved it to be true. The horses are still here, and their number is being increased every year. They will remain here.

To properly grasp the situation it is necessary to know that the crisis of the automobile and the auto-truck, conpled with the high cost of beef, has

conpled with the high cost of beef, has resulted in the cavalry reserves of Europe diminishing to such a startling extent that the remount buyers of half a dezen powers are scurrying around the world in search of cavalry horses.

Abstioirs Beat Bonuses.

Gastronomy and gasolene have joined forces against the horse, Hundreds of thousands of horses in Europe, which a few years ago were available as army reserves in time of stress, have had their peaceful work taken away from them by the auto-truck and the automobile. In spite of bonuses arranged by different governments whereby owners of such horses received from \$15 to \$25 per year, providing such horses were available in case of war, the ewners have found it an unprofitable task, and the horses have gone to the abattoirs to be converted to the conditions of the conditions of the context that and the horses have gone to the abattoirs to be converted to the conditions of the context that and the horses have gone to the abattoirs to be converted to the conditions of the context to the conditions of the context to the conditions of the context to the conditions of verted into food. Horse flesh and its

dressing, served at the fashionable hotels, to our old friend, the long German sausage with the flushed ap-

Sixty thocsand horses were consum-ed for food in Paris alone in 1912, and the demand is increasing to such an extent that the best cuts of horse meat are twenty cents a pound, as against twenty-four cents a pound for Spain, Belgium, Holland, Germany,

Hungary, France and Italy have all gone in for horse meat, and are using not only their own horses, but are securing English horses by the ship-

Every Government At Work. Now, altho the horse may at some become an extinct animal, his last refuge will, undeniably be in sport saddle horse of pleasure and the race norse of sport will be the last to go. Meantime, every progressive govern-ment realizes the necessity of encouraging the production of war horses, and the encouragement of those who

The progress of the gas engine simply means that there must be more and faster cavalry. It means that in future wars mobility will count more than ever, and that mounted riflemen on horses bred in the right manner will form a large part of any successful army. It means that progressive nations must have the right kind of cavalry horses, bred on scientific lines, and also that its fighters most know

ow to sit upon them.
Without going into details as to what ontinental powers are doing, it may be well to glance at the situation in The British War Office, the board of agriculture and the treasury have oined forces to help out the English

Few Half-bred Foals Produced. At the national stallion show, to be held in London next month, \$65,000 will be given in prizes to thorobreds and half-breds. The British Board of Agriculture puts up \$200,000 per year to encourage the breeding of war horses, and to this must be added \$35,-00 a year in extra subsidies. In return for this English farmers and breeders produced in 1912, 1502 halfored foals. This is about one-third of the requirements per year in time of peace, and therefore it does not solve any remount problem. Furthermore, buyers from all over Europe are grabbing English and Irish war horses. To offset this the war office within the past month has decided to increase the payment per head by \$100. Crease the payment per head by \$100. On April 1 a remount commission composed of no fewer than 120 British officers, will be appeling produced under the British flag. England, as stated above, is producing about one-third of the peace supply: India cannot produce suitable horses, neither can Africa; the Australian crop was tried out and found wanting, so the page of the page of the page of the peace supply: India cannot produce suitable horses, neither can Africa; the Australian crop was tried out and found wanting, so the page of the page was tried out and found wanting, so it remains for Canada to jump into the lead in this work and take advantage of the seven years of effort which has already been made by the Canadian Breeding Bureau.

Them about it. If you have a husband, father or friend who is threatened with this awful curse, help him save himself. Used regularly by hospitals and physicians. Has restored happiness to hundreds of homes.

Canada Well Situated. The British Government, during the past fortnight decided that the estabishment of government breeding studs was too costly to be undertaken. Can-ada, with the system already establish-ed, and at a cost absurdly small, is therefore in a first-class position. was too costly to be undertaken. Can-

try at least three million dollars per

is the old situation always brought

about when mechanical power sup-plants animal power. The answer has always been the same Mechanical power always wins. So long as the horse is needed for national defence—and this has been his great mission since the days of primal man—every effort must be made by every thinking country to safeguard and foster the production of horses necessary in war. The menace of the motor was bad enough, but the appetite of man is even worse. Once man starts out to eat anything, the days of that thing are numbered, and the only way to lengthen its days upon the earth is to increase its production. The eating of horse meat is not confined to Europe. Many of us have probably eaten sections of our old friend with the production of the production out knowing it. There is a horse abattoir within six miles of Montreal and a big firm backed by English and Belgian financiers is already operating in Canada, with prospects of wide ex-

Branches, 128 Church Street, Toronto; Ha milton, London, Belleville.

the same thing from the Williamsburg bridge, one of the three connecting links between New York and Brooklyn. Regardless of the fact that the mayor and the commissioner of bridges had refused her permission to do the daring stunt, Miss Bennett, beautiful, charming and versatile, not to mention "nervy," just climbed up to the five-inch rail of the bridge at 1.10 on the afternoon of Feb. 5, and before you could wink an eyelash or say "Jack Robinson," she had calmly stepped off as you or I would step off a car. On the right you can-see the young lady hanging on to her parachute, which opened almost immediately. Almost before the "villum" Dare Devil Rod before the "villun" Dare Devil Rod man Law, the "Human Fly," had taken his header off the same bridge after the fair young bridge jumper, Miss Bennett, had reached the icy waters of the East River. Just to prove how really feminine Miss Bennett is, her very first question after being pulled out of the water, aboard the tug C. P. Raymond, was to ask Mrs. Law, the

wife of the dare devil, if she had brought her powder puff with her.

A Startler.
A man of an inventive turn called on a capitalist who was always on the lookout for new schemes that were likely to prove money makers.

"I have here," said the would-be inventor, producing his model, "an improved alarm clock that will make you jump, no matter how sound asleep you may be."

"What is the improvement about "You will observe that I have, in place of the usual gong, substituted

FRENCH PEOPLE ARE WELL NOURISHED RACE

Statistics Gathered From Two Decades Have Exceptional Scientific Value.

The French have the reputation o being a well-nourished people, or at least a well-fed nation, and this is sustained by Gautier, one of the French experts in the field of nutrition study. added interest, remarks a writer in The Journal of the American Medical Association, because they represent the findings, not of a single day or week, but of no less than two decades. The statistics are those of food con-

The statistics are those of food consumption on the part of the great majority of the inhabitniants of Paris—the "average" inhabitans—derived from public records of taxes paid on foodstuffs and from actual investigation among peasant or "bourgeois" families.

In consideration of the long period over which the records apply and the large number of people, nearly three millions, involved, the discrepancies between rich and poor, undernourished and overfed, are probably in good part equalized. Here are the figures expressed as a daily average:

Obtained from vegetable sources: Bread, 420 frams; green vegetables, 250; cereals, 40; potatoes, 100; sugar, 40; fresh fruits, 70; alcoholic beverages, 432.

432.
From animal sources: Meats, 200 grams; eggs, 24; cheese, 6; butter and oil, 28; milk, 213; to which may be added salt, 20 grams, and water, 950.
This accords well with established

catarrn is a disease of the mucous membrane. It is characterized by a discharge through the nostrils or into the throat. It usually begins with a cold in the head. Beginning in the nostrils it spreads to all the mucous membranes of the body, even getting into the stomach and lungs. The nasty discharge being swallowed, it upsets the stomach, and from the stomach it is taken into the blood, and poisons and deranges the whole body. the whole body.

The disease is all the time inclined to work its way from the nose back into the head—down into the throat—into the bronchial tubes and lungs. Herein is its greatest danger.

STRAIGHT PARTY MANMAY BERUN AGAINST HIM, SAYS JOS. MARTIN

His Defection on Government Matters is Only Thing That Would Lead to His Retire-

Hon. Joseph Martin, member of the British House of Commons for the London constituency of St. Pancras. ex-attorney-general of Manitoba and ex-premier of British Columbia, who New York and London, England, on account of a slight illness, left Saturday night for New York, whence he will sail as soon as possible to the day night for New York, whence he will sail as soon as possible to the old country for the session of parliament which opens in a few days. Hon, Mr. Martin by his sturdy independence of character in all matters political has become very well known thruout the whole of Canada. He has been a member of four legislative bodies, namely, the Manitoba and British Columbia legislatures and the houses of commons of Canada and Great Britain.

Altho a strong supporter of the Asquith government, he has invited the hostility of his strong party convery important matters. On this account he admitted to a Sunday World representative, who interviewed him at the King Edward Saturday, that there is a possibility that a straight party man will be run against him at the next general election in England.

Hon. Mr. Martin had no hesitation in discussing political conditions in Canada and Great Britain with The Sunday World reporter. He wished to deny the rumor that he had any indeny the rumor that he had any intention of resigning from English politics and re-entering the Canadian political field. "Of course," he said, "I may have to retire," referring to the possibility of defeat in the next election. "The government in Britain is very tyrannical and as I have not supported it on all occasions, there is a section of the Liberal party that wants to bring out a straight party man against bring out a straight party man against me. I doubt that this will be done,

the constitutncy to the Liberals, for I will contest the election, no matter how many candidates there are in the of the Unionisis Hon. Mr. Martin thought that they were anxious to drop it. "They have already dropped the food taxes and now a very influential

however, as it would mean the loss of

are capable of anything, and they have indulged in Hooliganism in the house with the connivance of the Speaker, as far as I could see. At least the as far as I could see. At least the Speaker took no means of stopping the disturbance. If such an uproar is attempted again the proper method of dealing with it would be to call in the soldiers and put an end to it."

Questioned about the Canadian political policy. Mr. Martin expressed himself as opposed to the naval poli-

When You Smell the Good Food Cooking

And It Makes You Sick It Is a Sure Sign That You Need Stuart's

Dyspepsia Tablets. It is time to pay attention to your stomach when the sight or the smell of food makes you sick for were this not the fact the stomach would not cause such disgust upon the part of the sense of smell and taste when meal

Cadillac Maintains School of Mechanics

Perhaps the most unique training school of applied mechanics is the one conducted by the Cadillac Motor Car Company, where young men of 18 years and older are taught not only the basic principles of mechanical engineering but the ideals that underlie the construction of Cadillac cars.

This idea was original with Henry M. Leland, president of the Cadillac Cc., in 1907. Mr. Leland foresaw that the growth of the motor car industry would

of the motor car industry would create an abnormal demand for mechanical workers of high ability, and determined to train men in his own shops. The Cadillac school is a

special training department, with equipment of machin-ery and classroom facilities. Under the direction of competent mechanical engineers, the students are given class work in mathematics and mechanical drawings, instruction in the efficient use of various machines for the production of work of the highest grade, and daily lectures illustrated with stereopticon.

To fulfill Mr. Leland's purpose of making the course.

To fuifill Mr. Leland's purpose of making the course thoroly practical, the students are given practical work to do in the various branches, performing their duties the same as journeymen, and under working conditions, and preparing themselves for places as draughtsmen, mechanical engineers, tool-designers and foremen.

A large number of students have been graduated from this Cadillac school, and many have gone forth to responsible positions. Youths under 18 are not eligible to the course. The company pays the students from 14 to 17 cents per hour, awards cash

pays the students from 14 to 17 cents per hour, awards cash prizes as it sees fit during the course, and a bonus of \$100 upon completion of the two years of class, work. In return it asks that applicants be young men of good habits who do not smoke cigarets, chew tobacco or use intoxi-

OVERLAND SALES CO. 53-59 Adelaide St. W., Toronto

Walter Harland Smith, Prop. J. Herbert Smith, Auctioneer

MOTOR TRUCKS at Auction

On account of the time of our entire staff being required to look after the selling of "Overland" Touring Cars and Roadsters, we find it impossible to give proper attention to the selling of Motor Trucks. decided that on

WEDNESDAY MORNING, FEBRUARY 18th AT 11 O'CLOCK SHARP

we shall sell at the above address, without the slightest reserve, the following first-class MOTOR TRUCKS and DELIVERY CARS: One 1,200-lb. Overland, 85 h.p. Motor Delivery Car, with wire sides and storm curtains. Regular price \$1,975.00; slightly used, positively no

One Willys Utility, new one-ton delivery car, with splendid express body, full stationary top and side curtains. This is the most modern and efficient vehicle that has been produced up to the present date for general delivery use. Regular price in Toronto, \$1,975.00; has hard rubber tires on rear where load needs it. Will be sold to highest bidder.

One Garford One-ton Truck, has been used one year; has powerful en-gine, and has frequently handled loads double the weight specified; any one requiring a substantial article at a sacrifice will find this an unusual opportunity, as it will be sold without reserve. Cost \$2,625.00 CASH.

One Gramm Two-ton Truck, one of the best standard trucks in the world. There may be some trucks as good, but there are no better trucks than the Gramm. Has been used a few times for demonstrating and each time by an expert operator, so that it is recommended as a first-class and practically new truck in every way. Has platform body with gates. Exactly same, excepting body, as trucks in use every day by Seaman, Kent and Co., of Toronto, H. J. Ash, Toronto, and others. Regular price \$3,4 5.00 UASH.

One Three-ton Gramm Truck (chassis only). This is undoubtedly worthy, the attention of every firm having any intention of purchasing a truck. It is a standard article and recognized in the trade as one of the most substantial modern vehicles for heavy work in existence. Four tons; under ordinary favorable road conditions could be depended upon by anyone requiring four-ton capacity occasionally. This truck has never been used and the regular cash price, delivered in Toronto, is \$4,400.00 for chassis only. No better opportunity will ever be offered for the purchase of a standard truck of this class, which is absolutely genuine. Also one Electric Two-pessenger Run-about, in good running condition; as

One Four-passenger Cadillac Car, in first class condition; no reserve.

Every opportunity will be afforded intending purchasers for inspection and demonstration of these trucks between now and hour of sale. It will not be possible for anyone to buy these trucks prior to the sale, so that parties coming from other places may rely upon each article advertised

A special invitation is extended to every interested person to attend this important sale. The trucks will be shown in operation, as much as available space will permit, and any reasonable test will be furnished.

ceedingly difficult to avoid the ac-

cumulation of stale bread. If the many and slices were more fully realised, possibilities which lay in the odd crusts there would be less waste.

One of the most interesting weddings of the season took place in Ottawa on Saturday, Jan. 31, at 2.30 in the afternoon, in the Church of St. John the Evangelist, when Marjorie Keturah Stowe, daughter of the late Major W R. Stowe Wainwright and Mrs. Wainwright, was married to Mr. Douglas Henry Nelles, son of the late Mr. Beverley Robinson Nelles, Grimsby, by the Rev. Canon Pollard, assisted by the nue road, Rev. J. F. Gorman. The church was ruary 14. Rev. J. F. Gorman. The church was decorated with a lovely screen of evergreens across the chancel, and the altar banked at either end with palms and ferns, with narcissi and lilies of the valley on the altar. Altho no invitations had been issued, the church was filled with the friends of the bride and groom. As the wedding march from "Lohengrin" was played by the organist. Mr. F. M. S. Jenkins, the lovely bride entered the church with her brother, Mr. Gilbert C. Wainwright, manager of the Bank of Ottawa. Peterboro, who afterwards gave her away, and, preceded by two ushers, Mr. lovely bride entered the church with her brother, Mr. Gilbert C. Wainwright, manager of the Bank of Ottawa. Peterboro. who afterwards gave her away, and, preceded by two ushers, Mr. Gordon McLennan of Ottawa, and Mr. Cecil Wainwright of Toronto. brother of the bride. and also by her sister, Miss Murtel Wainwright, her only attendant, walked slowly up the aisle to the chancel steps, where the groom and his best man. Major E. T. B. Gillmore, were waiting The bride looked very girlish and lovely in her beautiful wedding gown of ivory satin, with a long square train, the kimona corsage and short tunic of Brussels point lace the drapings, caught with small clusters of orange blossoms. She wore a Dutch cap of point lace with tiny sprays of orange blossoms, and a long tuile veil, which fell very gracefully to the bottom of her skirt; she also wore a handsome necklace of moonstones and carried a shower bouquet of mauve orchids and illies of the valley. The bridesmaid. Miss Muriel Wainwright was very pretty in a frock of pink brocade with corsage and short tunic of shadow lace outlined with sable and trimmed with tiny French rosebuds, finished at the back with a large butterfly sash and bow of a deeper shade of pink, a hat of pink tulle with a pink

Bevan Dunbar, of the Royal Canadian Rifies, stationed at kingston, Ont.

Mrs. James E. Walsh gave a bridge party in her pretty apartment at the St. George, when she was wearing a gray satin gown. The decorations in the drawing-room were pink tulies, with foliage and palms. In the drawing-room were pink tulies, with foliage and palms. ON PARLIAMENT HILL &

Special to The Sunday World.

By Tom King.

OTTAWA, Feb. 7.—The opposition got up some steam last night when a concerted attack was made upon Hon. T. W. Crothers and his administration of the labor department. Hon. W. L. Mackenzie King viewed the fray from a seat in the Speaker's gallery and heard himself referred to as a "joke" by irreverent deputies on the government benches. The Liberals started out to worry Mr. Crothers much as Mr. Crothers and other members of the then opposition used to worry-Hon. William Pugsley. Mr. Pugsley, however, never quit smiling, however closely he might be jammed between the river and the wall, but Mr. Crothers last night more than once lost his temper and snapped back as Carvell, Macdonald, Carroll, Neely and others one after another bated him.

With the prime minister and the minister of finance both on the sick list, many a government much like senator-ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; ships. All who are recommended may not get the honors, but no one; is honored unless recommended may not get the honors, but no one; is honored unless recommended may not get the honors, but no one; is honored unless recommended may not get the honors, but no one; is honored unless recommended may not get the honors, but no one; is honored unless recommended may not get the honors, but no one; is honored unless recommended. If our one; is honored unless recommended may not get the honors, but no one; is honored unless recommended in get the honors conferred in Canada is on a par with their discussion of the pardoning power.

And speaking of the pardoning power brings

The house enjoyed itself on Thursday, when, for the first and probably for the last time this session, public bills and orders had precedence. A public bill, it may be explained in passing, is a bill which if it becomes law would have uniform operation that ing, is a bill which if it becomes law would have uniform operation thruout the country, binding upon all persons residing or found therein. A public bill, for example, may seek to amend the Railway Act, the criminal code, the law merchant and the like; a private bill is local in its applicattion and concerns only a limited number of persons. Many public bills are introduced by the government, and, as government orders, have precedence. But in "marliamentary nariance" a public in "parliamentary parlance" a public bill is one dealing with matters of general public interest but introduced

y a private member. Curiously enough, the business to which legislators are supposed to direct and devote their attention, namely, the framing of laws upon general subjects of public interest receives ittle or no attention from parliament. we often hear a man say if I were a law passed," etc, but the parliament-ary machinery is so cunningly devised that is in them. The scriptures were appealed to by both sides with advantage to those who insisted upon capital of the house finds it difficult to have it voted upon, and impossible to have it passed unless it is made a government order and taken in charge by ernment order and taken in charge by some minister of the crown. Of course some minister of the crown. Of course a great deal of legislation, sooner or later adopted by the government, is first introduced by a private member, but the government of the day, as a rule, does not invite discussion or take the opinion of the house upon public measures proposed by private mem-

Theoretically, private members have the right of way for their public bills on first four Thursdays of the session. As a matter of fact, they are lucky to As a matter of fact, they are lucky to get one day out of the four. The first Thursday is opening day, and devoted to ceremonials; the next two Thursdays are usually absorbed by the debate upon the address; the fourth Thursday used to land in the Christmas holiday the sting leaving the member ambiguity. vacation, leaving the member ambitious to move the second reading of his bill neatly marooned for the rest of the session. But when the fourth Thursday came around this session private members with public bills had

a chance to go ahead. Not all of them: Mr. George H. Brad-One before the Women's Canadian Club and one to the students of the Normal School.

Caxton Chapter, I. O. D. E., held their annual meeting January 31. The membership had increased and the finances are in a flourishing condition.

All the officers were reselected and verd. This was because the house de-

"to abolish titles of honor in Cana-da." Mr. Burnham stood upon adamant when he contended that titles made for class distinctions, and that class distinctions were repugnant to the ideals of a true democracy. But titles conferred by custom or common consent are as thick as blackberries, not only in Canada, but also in the United States, and they would not cease to exist were his majesty forever to forego his prerogative. The physician would be called doctor; the dancing master, professor; the militiaclass distinctions were repugnant to and Mrs. Arthur Ogden Wood, 33 Abbott avenue, Toronto, over Sunday.

The latest word of fashion is voiced in the styles we offer for spring, \$45.00 and up for ladies' tailor-made suits G. A. Stitt & Co. Limited, 79 King street west.

MRS. COSBY'S TEA.

physician would be called doctor; the dancing master, professor; the militial man by his rank, whatever it may be while the generous public would probably decorate every lawyer over forty with the title of "judge." What makes a knighthood so attractive is the custom which has grown up of addressing the wife of a knight as "my lady." The King is not to blame for this, but rather our popular teste for titles. rather our popular teste for titles. Take away the prefix of "Sir" from a knight, with the courtesy title of "Lady" from his wife, and no one

with the prime minister and the minister of finance both on the sick list, many a government might be embarrassed, but Hon. George E. Foster is quite at home in leading the house and would be no less at his ease were he to be called upon to make the budget speech. Anyhow, the government is not attempting to do a great deal of business and the opposition is evidently marking time.

The fact is that the politicians on both sides at Ottawa are in danger of becoming cross-eyed in their effort to keep one eye on Toronto and another on Quebec. In those two capitals will the fate of the two political parties be largely influenced by what may happen in the next few months, or even in the next few weeks. The Liberals, who have now against them a solid Ontario and a divided Quebec, hope to see the tables turned. Meanwhile their representatives at Ottawa are sitting tight. Another cause for the apathy and uncertainty at Ottawa is to be found in the persistent rumor that some bill will be brought down giving financial aid to the Canadian Northern—a rumor that apparently finds foundation in the fact that Sir William Mackenzie is so frequently seen in Ottawa.

The house enjoyed itself on Thurswhich Mr. Foster referred when he

"I have no doubt at all that my honorable friend is convinced himself that he is right. But because he is himself convinced that he is right he is not justified in maintaining that everybody who does not agree with him is wrong. I know my honorable friend used two or three expressions that would read us out of decent society on earth and out of any quarter at all in the world to come if we voted against what he considers to be right. But I suppose that is more a matter of argument than of conviction."

Some excellent speeches were made on both sides of the question, and political differences were for the time forgotten. The Liberal members did most of the talking and almost to a man were against capital punishment altho Hon. Frank Oliver stood side by side with W. F. Nickle, the Conservative member for Kingston, in opposing little or no attention from parliament. The newly-elected M.P. comes to Ottawa bent upon having a law passed upon this, that, or the other subject. We often hear a man say "If I were a of our public men but little accustom-

Mr. Wilson of Laval suggested that it be left to the jury in murder cases to decide whether the punishment should be death or life imprisonment should be death or life imprisonment. Nearly every one agreed that some tribunal should have discretion to commute the death sentence, but that our present practice of having a Dominion cabinet sit as a court of appeal was little short of grotesque.

On the whole it may be said that while parliament may not be quite ready now to abolish capital punishment, the current of opinion in that direction is much stronger than might have been anticipated.

Tuesday and Friday, being govern-ment days, were passed in committee of supply. Hon. Mr Crothers encountering some rough weather when he started to steer his estimates for the started to steer his estimates for the labor department into port. Wednesday was a short day, lasting only four hours and for all that was accomplished four minutes would have been sufficient. The opposition brought forth nothing contentious or even interesting. On Monday there was an interesting debate upon a resolution, proposed by Mr. Sinclair, the Liberal member for Guysboro, asking the government to subsidize a line of fast steamers equipped with cold storage for the transportation of fresh fifted marritime provinces to the from the maritime provinces to the New England market. This hardly semed a good way to reduce the high cost of living in Canada but the claim was made that the supply of fish on our Atlantic coast far exceeded the needs of Ontarlo and Quebec. Just

why Canada should subject Just to perform a service which upon Mr. Sinclair's own showing would pay the owner handsomely as a commercial enterprise he did not explain. Member both sides of the house concurred

Chief Justice Haultain Made Some Strong Comments in Real Estate Action

CREW PUT UP A WEEK'S FIGHT FOR LIVES

"Tobeatic's" Captain and Men Were Rescued After Bitter Experience

(Special to The Sunday World.) MOOSE JAW, Feb. 7.—Chief Justice Haultain, in hearing a real estate action in the supreme court yesterday, made some very strong comments on the all too common practice of perjury among allegedly respectable witneses. He spoke of the great difficulty in bringing home the guilt of parties, but promised some close attention to the scandal in Saskatchewan courts in this respect for the future.

His lordship himself to satisfy his suspicions has been acting the part of Sherlock Holmes in this yeary case.

Sherlock Holmes in this very case. Going out of court on the evening previous he listened to two witnesses he suspected of not studying the facts. Yesterday he sent one from the court and cross-examined the other on the conversation he had overheard. This evidently was correctly reported to him by the witness. He then sent for the other man, and caught him after one or two questions in flagrant per-version of facts

The chief justice said he had a good mind to impose a stiff fine right away, but contented himself with saying that he would take the matter up after a decision in the case was arrived at

In the meantime many income earners are being surprised at the peremptory demand of the department to fill in the assessable income blanks or be compelled to make a sworn verbal statement of income.

Dr. Allen of New York City is to be

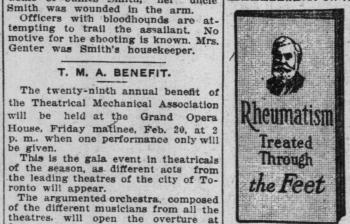

disqualified from election, and he maintained that this should also apply to pledged teetotalers, who, if elected must either vote against all licenses or perjure themselves. An election resulted in the defeat of the teetotal will be \$762,000.

When an effort was made last year to increase the pay of the police, and it falled, there was an understanding that the increase would be given this year.

Revolutionists at Cape Haitien Are Reported to Have Executed Several People

WASHINGTON, Feb. 7.—Dominant interests of the United States in Haiti are expected to cause the British naval commander at Port au Prince, who ranks above Capt. Russell of battleship South Carolina, to defer to the leader-ship of the American commander in any steps that may be taken. If the situation were to become more serious an American rear-admiral might be

Execution of several persons by the revolutionists at Cape Haitien Thursday night is reported. Theodore has consented to the landing of Monplaisir and sixteen men at Cape Haitien, and Dorcilion left there yesterday with twenty followers. Bluejackets from the gunboat Nashville are patroling a portion of the town.

SONS OF TEMPERANCE HOLD ANNUAL MEETING

Four hundred members of the Sons of Temperance attended the sixty-first on Saturday afternoon and evening in the Frances Willard Hall, Gerrard st. District Visitor Patriarch W. H. Tice presided, and during the afternoon session an interesting address on the progress of temperance was given by Controller McCarthy.

The organization is the oldest tem-

perance society in Toronto, having been founded in 1842. There are in all sixty-four sections in Ontario, four of which are in the South York division. which includes the city branches, new branch will be added next week. At the evening session Rev. Dr. Co-burn and Mr. Hassard addressed the meeting, giving explanatory talks on the anti-temperance tactics inaugur-ated by Judge Durand.

In connection with the adult body is the cadet movement, which is proving successful, three cadet corps having been recently formed in a single day by Grand Patriarch Tice in Manitoulin Island.

RECEIVED PRISONER COURT LET HIM OFF

Man Who Confessed Lawyer's Share in Escape Also Given Immunity From Prosecution

WINNIPEG, Feb. .7-Frank Holt appeared in the police court this morning on a charge laid by the provincial police of receiving and comforting the being the escaped prisoner. John Krafschenko. He pleaded guilty and was let go on suspended sentence after Magistrate Macdonald had implied that he was more of a fool than a villain. Crown Prosecutor Grafiam announced that no charge would be laid egainst Buyton

Will Stake This Medicine Against Your Time

A Few Days Will Be Sufficient to Prove its Value in Your Disease

1—Pain in the back.
2—Too frequent desire to urinate.
3—Nervousness. loss of first.
4—Pain or soreness in the bladder.
5—Weak. watery blood.
6—Gas or rain in the stomach.
7—General debility, weakness. dizzing.
8—Pain or soreness under right rib.
9—Saintle rhoumatism.

A few minutes of your time for a few days and I will demonstrate to you, without expense to yourself, that I have a medicine that drives Uric Acid poison from the system and by so doing conquers kidney trouble, bladder trouble and rheumatism. I don't ask you to take my word for it, but simply want you to let me send you some of this medicine so that you can use it personally.

I am trying to convince sufferers from these diseases that I have something far better than the usual run of remedies, treatments and such things, and the only way I can demonstrate that fact is to go to the expense of compounding the medicine and sending it out free of charge. This I am glad to do for any sufferer who will take the time to write me. Understand, I will not send you a valueless "sample, proof or test treatment," nor will I send you a package of medicine and say that you can use some of it and pay for the rest, but I will send you a supply free of charge and you will not be asked to pay for this gift nor will you be under any obligations.

All I want to know is that you have a disease for which my medicine is intended, as it is not a "cure-all," and I give herewith some of the leading symptoms of kidney, bladder and rheumatic troubles. If you notice one or more of these symptoms you need this medicine, and I will be glad to send you some of it if you will write me the number of the symptoms you have, give your age, and your name and address My address is Dr. T. Frank Lynott, 505 Franklin Building, Toronto, On You promise me nothing; you pay me nothing for it. All I ask, a there shall be no mistake, is that you send me the numbers of you symptoms or a description in your own words, and that you take the medicine according to the directions I send you. It is my way of getting publicity for my medicine so that it will become widely known.

You will agree when you have used satisfaction if they are curable, espe- HIM or HER, and here is an oppos it that it dissolves and drives out uric cially when you consider no expense tunity to find out without cost, obliacid poison. It tones the kidneys so is involved, and I willingly give you gation or important loss of time that they work in harmony with the fair-minded afflicted person wants to turning point in your life. bradder. LONDON CURFEW **BELL STILL RINGS**

incoln's Inn Chapel Continues the Practice of Tolling Bedtime.

LONDON, Feb. 7.—It is not known that a curfew is still rung in London at the present day, in Lincoln's Inn, althe the hour of ringing has been changed from 8 to 9 p.m., and the lights are not extinguished. The bell which is now rung was brought from Cadix by the iil-fated Robert Devereaux; Earl of Essex, in 1596 The ringing of the curfew is looked upon as a very important part of the chief porter's duty, and at 8.45 each evening he makes his way to the tower of the Lincoln's Inn Chapel, and as soon as the last stroke of nine has sounded he strikes the curfew fifty times.

Ford Production Board Feature at Montreal Show

What it means to build a thousand or more automo-biles a day is difficult for the biles a day is dimenit for the average person to appreciate, but this huge output of the Ford Motor Company of Detroit, and the Ford Motor Company of Canada, Limited, was illustrated at the Montreal Automobile Show by a device that was a little more vivid than un ordinary statement of figures.

A large blackboard, ruled off

so that a section could represent overy hour of the day was placed in a conspicuous part of the Ford exhibit. The number of cars made each hour by the American and Canadian plants was challed up in the correspond chalked up in the corres ing section of the board, the report being received by telegraph. Totals were carried over from day to day and the grand total of Ford cars manufactured since the cars manufactured since the inception of the business ten years ago was also figured out each day. On one occasion, for example, the total for the day showed 1280 cars, and the grand total of Fords inufactured was over 400,-

This board proved a great magnet, for crowds surround-ed it at all times, fascinated by the changing figures. It was almost as the the well known slogan, "Watch the Fords Go By," had been changed temporarily to changed temporarily to "Watch the Fords Grow," for the spectator with a bit of imagination seemed actually to visualize in some sense the ceaseless multiplication of cars and to grasp in some measure the significance of the huge totals.

HOW THE MAORIS COOK IN NATURE'S KITCHEN

The Maoris of northern New Zealand, while more fond of cooked food than other of the natives, and who gratify their tastes in that respect, are not obliged to bother with fires, for they built their huts on the edge of geysers, and cook in nature's kitchen.

A recent traveler, describing the ways of these primitive people, says that the huts of the Maoris, to the number of a couple of hundred, will be scattered around a boiling pond in this the women will put their water kettles to boil, or hang wide-meshed flax bags, filled with potatoes and wait until they are cooked. **POLICE MAKE A**

True, the potatoes cooked in their skins taste a little of sulphur, but that is the right flavor for a Maori palate—the haut-goat for the brown gourmet. For the cooking of meats the fumaroles, or holes thru which steam escapes from the ground, are used. A box with a wooden grating for a bottom is placed on the ground over the hole. In this the Maori woman places the meat, well covered with tin or iron pots. An old sugar bag is then spread over the box, and the crude apparatus is left until the imprisoned steam has completely cooked the joint.

PAIGE 36-\$1,700

PAIGE Prices are Low Because PAIGE Credit is High

HE financial strength of the Paige Company is a factor contributing in a very important degree to the low prices of Paige cars. Couple this stability with the economical management of the company, the low overhead cost in production, and the large output, and you have the secret of the

It is because of these economy factors, which lower the costs without cheapening the cars, that the Paige "36" touring car is sold for only \$1,700.

Without the backing of these distinctive Paige economy factors, the Paige "36" would have to be sold at a price around \$2,000. And at that price it would be still a big value.

116-inch wheelbase; powerful, quiet Paige motor, 4 x 5; unit power plant; multiple disc cork insert clutch; silent chain drive for cam shaft, pump and generator. A score of other features, many found elsewhere only

Notice carefully the body of the car. Splendid lines. Lots of style. Notice the wide doors. They give you a hint of the room inside. It's really a big five-passenger body. Wide seats. No cramping. Extra deep Turkish cushions.

It's a comfort car, this Paige "36," and mechanically it is marvelous. There are many cars similarly priced, but no car similarly built at the price. or near it. The more you investigate the better you'll know this. We urge comparisons.

LOOK AT THE The Paige leads just as distinctly on equipment EQUIPMENT as it leads on construction.

The Gray & Davis Large Unit Electric Starting and Lighting System is not found on any other car in the Paige price field. You do find it on the costliest cars. It's recognized as the most efficient electric equipment. That's why it is on this car.

Other regular equipment includes Bosch Magneto, rain-vision and ventilating windshield built into body, silk mohair top and tan-lined top boot, jiffy curtains, Stewart revolving dial speedometer, 12-inch electric headlights, 5 demountable rims, 34 x 4 Goodyear, Goodrich or Diamond tires with non-skid in rear, electric horn and all incidental equipment.

Here, then, is the car you want. You want it BRING YOUR because of its intrinsic worth, and you want the OWN EXPERT advantage of its under-price. Come see it now. TO JUDGE IT Come judge it by the highest standards you know. If you aren't thoroughly informed on automobile values bring an expert with you. The more a man knows about cars the more he appreciates the Paige.

against the white ant on land and the teredo in salt water.

Greenheart, according to a government report, has been known to stand in wharves for over thirty years and logs that have remained in water for a hundred years are in sound condition.

All the gates piers and jettles of the Liverpool docks, and almost all the lock-gates of the Bridgewater Canal in Engined are of greenheart. Fifty pairs of lock-gates in the Manchester (England) Ship Canal are made of it. There is no known limit to the durability of lock-gates of greenheart; the wood is far more durable than the iron bolts and other fastenings.

durable than the iron bolts and other fastenings.

When the greenheart dock-gates of Liverpool harbor were removed, in order that the channel might be deepened and widened, the wood originally used in their construction was used in building the new gates. So the wood in the gates of the Canada dock, built in 1856, was used again when the dock was rebuilt in 1894. All the sills and fenders in the lock-gates of the Panama Canal are of greenheart.

Greenheart's extraordinary resistance to decay is probably owing to the presence of an alkaloid known as bibirine, and also to certain resinous substances known as tyloses. The latter are reddishbrown masses of living cells that grow in solid masses within little cavities that they often fill completely. As they grow with the tree they turn black and make the wood of the older trees black.

SUNDAY MORNING

In the Two Fare Belt---Annexation

The World has drawn the above map to outline two main questions now before the citizens of Toronto and its suburbs, namely: Streets railway purchase and annexation. These two things very much infold one with the other. The map also throws some light on the riding of South York, which comes up with the redistribution at Ottawa.

The dotted line shows the bounds of Toronto as they were over ten years ago, before the redistribution bill of 1903. The heavy black line years ago, before the redistribution bill of 1903. The heavy black line shows the city bounds of today. The pieces taken in about double the area of the then city. All the parts taken in were in the Township of York and in the riding of South York. The population of South York was at that time 25,000, and included the whole township, as well as West Toronto, North Toronto, East Toronto, Midway, North Rosedale, Deer Park, etc. Now the population of the above annexes is over 70,000, and of all South York, close on 100,000. This is some growth. Greater Toronto, thus outlined, has grown from 17,000 to 70,000 in twelve years! As to area and progress, South York is the senior constituency in the present Toronto.

But the great feature of the map is that it shows that in this newer section of the city—we call it Greater Toronto in the map—above and be-yond the dotted line, He all the two-fare street car belts, and even some three-fare belts! All north of the C. P. tracks have to pay two fares, and some three! The extreme section of West Toronto, North Toronto, East Toronto, have to pay three fares for street cars to get to the city hall!

Next: This Greater Toronto is the richest and most progressive part of

Toronto. It includes the high-class residential sections of North Rosedale, Deer Park, The Hill, Davenport Ridge, North Toronto, St. Clair west, Danforth avenue and the great industrial and manufacturing section of West Toronto. It belts the whole of Old Toronto, and from a parliamentary point of view is the most progressive constituency in Canada. What South York thinks today, all Canada thinks five years hence.

What has South York to do with street car purchase and annexation?

Just this: All these people in Greater Toronto want a single street car fare
and the only organized voice they have had up to the present has been thru
The World, and their member, W. F. Maclean.

The latter has seen all this growth, has been intimately associated with

the people, has been at their meetings, has written up their views, has preached Greater Toronto all the time, and done all these things regardless of the pinpricks and brickbats of others. South York has, up to the present, been their only bond of union. Greater Toronto is substantially South York. It may not be two months from now. But they'll still have the bond

of Greater Toronto, and single fares! These people are almost solid for

Now as to annexation: The World believes a still Greater Toronto is ready to be annexed—that will add over 100,000 people in three years. But there is a section of the community who believe that municipal growth is a curse! Look at that Greater Toronto set out in the map and say if you can that these annexations have proved a curse to Toronto. Is West Toronto, that great hive of manufacturing, a curse? And there are factories of still greater magnitude willing to come here if they can get sites for their factories, and at the same time, homes for their work people with municipal conveniences, and single fares on street cars.

It was this Greater Toronto coming into the city that made down-town property go from \$2000 to \$10,000 a foot in the centre and correspondingly advance outwardly; and another annexation belt will carry these increased and increasing values right up to Bloor street, making Yonge and Bloor the

What do the members of the board of trade, the businessmen of Toronto, the factory owners, think of this map and what it tells as to Toronto's growth, and what effect single street car fares for eight miles in every direc-

Civic Car Lines, Bloor Street, Viaduct and Annexation

The above map also makes plain the effect the continuous opposition of The Telegram and The Globe to any kind of annexation has on the Bloor

hese improv	ements cost:-	
Mileage	Car Lines	
3.5	Danforth avenue	\$ 562,000
3.10	St. Clair Avenue	686,000
1.85	Gerrard street	252,000
8.53		\$1,500,000
.47	Viaduct (estimated)	2,500,000
9.00		\$4,000,000
Maria Cara Cara Cara Cara Cara Cara Cara		The second second second second

Let us take the viaduct and the Danforth line first. This is an outlay of \$3,012,000 for capital and a yearly charge for interest of \$120,000. From Broadview to Leslie street (about half-a-mile) the city takes in the From Broadview to Leslie street (about half-a-mile) the city takes in the quarter-of-a-mile north of Danforth; most of the rest and of the great highway, has only 250 feet north of the car line! Immediately north of Danforth and East of Rosedale there are, right alongside of the city bounds, four or five big interests that own over 1000 acres that have grown in value from, say, \$500 to at least \$5,000 an acre, some to \$8,000! This value has been made largely by the prospective viaduct, and the civic street cars, and yet they pay not one cent towards the cost of these great improvements. They continue to grow enormously in value and pay nothing. Worse than that, they fight annexation and tell the small property owners about them, that they'll be taxed to death by annexation, that the city doesn't want them and that they'll get no improvements anyway, when they doesn't want them and that they'll get no improvements anyway, when they

But the "land butcher" of The Telegram seeks annexation, is willing to pay city taxes, to start people building, to start industries; these other big fellows, who sit still on the nest will not subdivide, will not annex; they fight annexation and grow into land millionaires under township taxation. These are the people who have the especial protection of The Telegram. But these are the men who are battening—and battening is the word—on the city's improvements. Will The Telegram measure off this land and tell the public "all about it now," as Harry Lauder says?

Where are the aldermen of No. 1 ward and the board of control in this

And the same thing is practically true of the St. Clair avenue car line which cost nearly \$700,000, besides interest and annual loss. If the country north of St. Clair avenue was taken in, it would help to make that car line self-sustaining and a lot of taxes would be added to the city and substantial growth in the way of high-class development would result. What do the aldermen of the northwest section of the city think and what do the public think of the policy of The Telegram that would starve this expensive civic car line system and which, if continued, will make the car line a burden on the city, ratner than a benefit to its people? Sir Henry Pellatt and other "land butchers" in that portion of the city are spending large sums of money on development; they are building bridges on their property, are willing to pay for water pipes and pavements and to carry the burdens of city taxes and new civic car lines! but by the policy of The Telegram they are denied this opportunity and though they seek the city's progress, are declared to be nothing but "land butchers" and enemies of the City of Toronto!

Must Meet Demands.

If the builder of the apartment wishes to cater to a high class tenant, he is confronted with the fact that he must build his house with such conveniences as the renter will expect. These, in fact, have become so closely identified with the better class of structures as to be viewed as a simple obligation, and should be so deemed. If there is a real desire for attaining the best, will it be profitable to overliook the essentials that will bring these about? What are the conveniences that the best tenants are now demanding? Are these unreasonable, and will they still demand more?

Doubtless the owners have only themselves to blame for much of the change that has come about. There always has been that desire to outdot.

live in an apartment. There is the garage for his machine. It has come only as a necessity. It will be further augmented with other conveniences. They are bound to come, and the man willing to pay for these will be found ready and willing to do so.

The most important matter in this way is to place a limit on the additional features that are in reality of little actual value. The furnishing of an apartment must be looked upon as an apartment must be looked upon as a matter for very serious consideration both by broker and owner. It is not what is offered to the tenant so much as to offer him conveniences that will in reality be helpful to him in solving the problems of the day.

the landlord and the agent. Altho the same feeling prevails in dwellings and stores, it is not so pronounced as in the apartment houses.

The modern apartment house has truth offers the most homelike sur-roundings to the tenant. There will The modern apartment house has come to be viewed with a new meaning, and in a great many cases has change the lives of the occupants to a certain extent. Apartment house life as a rule tends to make a person more exacting in their notion as to their actual needs and the conveniences which they require.

home The bathrooms, kitchens and will offer at least some of these attributes. One sees a sign of this in a strong desire for the living-room and the sleeping porch. There will come a longing for the yard, and its homelike pleasures. There will come a longing for the seclusion that many apartments a frontage of 40 feet on Yonge street actual needs and the conveniences which they require.

The modern apartment house has even the living-rooms are now heated and lighted with either of these, and are made more desirable on account of the additional comfort. The electric range is replacing the gas range in some of the highest-grade apartments to make a person more exacting in their notion as to their actual needs and the conveniences which they require.

The apartment house is the living-room and the sleeping porch. There will come a longing for the seclusion that many apartments do not at this time offer the ments do not at this time offer the property.

The apartment house is trong desire for the living-room and the sleeping porch. There will come a longing for the seclusion that many apartments do not at this time offer the property.

The apartment has not as yet reached its limitations. It is continually undergoing an evolution, and this

change that has come about. There always has been that desire to outdo the other man, and with this object in view where will the matter terminate? There are a certain number of adjuncts that are and should be found in every modern apartment or residence structure.

These are not to be considered as luxuries, in a strict sense, because they give to the tenant only such conveniences as will make this type of residence a source of pleasure and comfort to him and his family.

It is property includes apartment as we find it today, even apartment as we find it today, even apartment as we find it today, even with its many comforts. It will be the older ideas in a newer form, but never older ideas that have so long been identified with what we are pleased to call home in its broad sense. In a word, the day will come when the apartment must replace the home in apartment must replace the home in any cases, and this will have to offer a substitute that is in reality more than a name as we sometimes find the apartment as we find it today, even with its many comforts. It will be the older ideas that have so long been identified with what we are pleased to call home in its broad sense. In a word, the day will come when the apartment must replace the home in many cases, and this will have to offer a substitute that is in reality more as a substitute that is in reality more as a substitute that is in reali

STRATHCONA'S WILL SHOWED DISPOSITION TO KEEP MOST OF IMMENSE FORTUNE IN FAMILY

Text of Last Testament—W est Has No Reason to Feel That Donald Smith Was Grateful for What it Had on: Accomplished for Him- Details of Bequests.

So far, nothing has been disclosed in connection with Lord Strathcona's will to make it of extraordinary inwhere with such lavish hand. It may be said the gift to Yale that the people of Canada. The bulk of his fortune goes to his daughter, Lady Strathcona, or rather to her eldest son, who is to succeed to the releast son, who is to succeed to the will will compete the title. Generous sums are given in the way of completing former bequests to the women's college in connection with McGill. to the Royal Victoria Hospital, and the University of Yale has properly received half-amilion of money. But there is no outstanding substantial bequest of a fresh and new character disclosed in the will which could be construed as a recognition by him of his Canadian eligible. The work of the ward, of 32 queen Anne street. Gallows:

"First.—I direct my trustees (his blower, are as looking on the word, wife of Robert Jered Bliss Howard, of 32 queen Anne street. Gallows:

"First.—I direct my trustees (his bequest and direct my trustees) and the word of the said residue and to divide the sain and the sain supplied to the said Royal Victoria. Hospital of Montreal, Canada, a corporation of money. But there is no outstanding substantial bequest of a fresh and new character disclosed in the will which could be construed as a recognition by him of his Canadian eligible and the word of 32 queen Anne street. Edinburgh on being pre-eminently a Hudson's Bay man, and we had all along expected that he would show his recognition of his early life and his service of the Hudson's Bay company, on the Red River and he provinces beyond by a substantial bequest to university edu
where all hands (Propher and Margaret Charlotte Howard of St. Paul. M.

"Royal Victoria Hospital, Montreal.—"Royal Victoria Hospital of Montreal, Canada, a corplate with Lord Mount Stephen a maintenance from the text of the will with Lord Mount Stephen a maintenance from the text of the will with Lord Mount Stephen a maintenance from the text of the will depend on the said residue of the said resi terest to the people of Canada. The bulk of his fortune goes to his daughter, Lady Strathcona, or rather to her eldest son, who is to succeed to career in the service of the Hudson's Bay Company, on the Red River and in the provinces beyond by a substantial bequest to university education in the city of Winnipeg, and perhaps Edmonton. Apparently the province of Ontario is the least remembered in any way; and we imagine McGill, which he helped at times and substantially, is disappointed.

The expenses of executing this trust and the company of the thudsand pounds.

"Second—I direct my trustees to pay to the trustees under the said settlement of the 15th of June. 1903, the sum of five hundred thousand pounds therefore any will, and his children, amed in my will, and his children, amed in my will, and his children, amed in my will, and subject the same of five thousand pounds in addition to the sum of twenty-five thousand pounds mentioned in the fifth article of my will, and subject to the same conditions in all respects.

Remission of Debts.

"I provide that if any beneficiary, under any testamentary writing, all beneficiary such testamentary writing, all benefit to the same conditions in all respects.

Remission of Debts.

"I remit and cancel the debts ow-disposed of as part of residue of my

agine McGill, which he helped at times and substantially, is disappointed.

Nobody has a right to dictate what a rich man shall do with his money. All we can say, is that Lord Strathcona, who was worth at least \$50,000,000, largely made on this side, has not fololwed the example of American milionaires to the south of us, who have got into the habit of leaving great public benefactions behind to pay the income thereof to my has not fololwed the example of Amthem. Lord Strathcona has preferred to dispose of his property largely from a family point of view. All his bene-factions of the past seem to have been carefully planned with the idea of being credited and heralded in all directions by a flattering press. Even our good friend, The Toronto Mail, in an pointed at the way this great fortune centrated, with one great object in view, and that is strengthening the position of her descendants.

Winnipeg Telegram: It will not escape notice that the Canadian west, which laid the foundation of the Strathcona fortunes, and opened the way to a public career which made his name famous, is quite passed over. The omission will arouse no resentment in the west. But it may be permitted in the circumstances to remark af a time when so much is being said of his services to the west,

With Exception of Canadian Commerce ...216 Pacific, Issues Were Reactionary

NEW YORK, Feb. 7 .- First prices of stocks today were lower. Canadian Pacific and Cotton Oil rose 3-4, but otherwise the reactionary movement of yesterday made further progress. Losses of 1 to 2 points were recorded in International Harvester, Biscuit and California Petroleum; Rock Island at 8, the preferred at 18 3-8, and the colbonds at 44 3-4, made new low

The market closed easy. Forced liquidation of Rock Island securities discouraged efforts to bring up prices today. Altho the initial downward today. Altho the initial downward tendency was checked quickly, the market was spiritless, with a heavy undertone. New low records were made in the Rock Island group. The common dropped to 6 3-4, the pre-ferred to 12 1-2 and the collaterals to Bear operators, who have been York Central was offered freely at intervals and declined to 90 1-8. Bonds were easy.

Erickson Perkins & Co. (J. G. Beaty), 14 West King street, Toronto, report the following fluctuations on the New York Cotton Exchange: were easy.

A further reduction in our bank rate is not just now considered likely. The present great ease in private discount rates has been accentuated by the fact that the Bank of England has apparently put £6,000,000 into bills within three weeks. These are believed to be short term investments, thus giving the bank a reserve power over the general situation later in the year.

NEW YORK, Feb. 7.—The statement of the actual condition of clearing house banks and trust companies for the week shows they hold \$40,058,000
reserve in excess of legal requirements. This is an increase of \$215,100 from last week.

The present great ease in private discount rates has been accentuated by the fact that the Bank of England has apparently put £6,000,000 into bills within three weeks. These are believed to be short term investments, thus giving the bank a reserve power over the general situation later in the year.

The French position is improving, but it is still strained. The real explanation of the offering of the Belgian and Hungarian loans here is that Pensian condition. Leans, increase of \$215,100 from last week.

LONDON. Feb. 7 .- The borough council of the southeastern suburb of Camberwell passed a resolution today

THREW INK POT AT SATAN'S HEAD

Stains Are Still Preserved in Spot Where Martin Luther Translated Bible.

BERLIN, Feb. 7.—Vicitors to the famous Castle of Wartburg, in Germany, are always very carefully shown a big black patch on the wall The room where this stain upon the wall is shown was occupied by Martin Luther when he was imprisoned in this castle, and here he commenced his famous translation of the Bible. The tradition is that Satan appeared to him in this room in order to make certain plausible suggestions to the great reformer. His reply was to take up his inkstand and shy it at his visitor's head. It crashed and smashed against the wall, leaving a stain which has been reverently preserved ever since.

has been reverently preserved ever since.

Undoubtedly the most interesting room in Scotland is the sleeping chamber of Mary, Queen of Scots, in the Palace of Holyrood, which still stands as it was when she occupied it. The walls are hung with tapestry, and half covered by it is a small door leading to Queen Mary's secret stair. It was by this secret stair, in the year 1566 that the assassins of the queen's Italian secretary, Rizzio, entered the royal apartment. He was murdered with daggers in the presence of the queen and his body dragged out of the room. The stains of blood on the floor are still pointed out, and are still plainly visible.

still pointed out, and are still plainly visible.

After witnessing Napoleon's interview with Bismarck at a wayside cottage, and his subsequent surrender, Archibald Forbes and a fellow war correspondent slept in the chateau which the fallen emperor had occupied the night before. The bedroom was just as Napoleon had left it, and by the bed the open book with which he had read himself to sleep. It was Lytton's "Last of the Barons." Sitting at the adjoining writing table, Forbes wrote his despatches whilst his companion gnawed at a ham-bone, their sole remainder of food. Irate at the little eating it furnished, he flung it across the room, and upset the inkstand into which Forbes was dipping. When Forbes revisited the chateau a month or so later, the ink stain was pointed out as caused by Napoleon's rage on learning the German terms of peace.

MILITARY LIFE HAS MANY ADVANTAGES

No Trouble Should Be Experienced in Getting Recruits if Statements Are True.

LONDON, Feb. 7.—If the advertisements now appearing in the British
newspapers for recruits for the army
are not highly overdrawn, it is a wonder that there is any trouble in filling
the ranks twice over.

LONDON, Feb. 7.—If the advertisements now appearing in the British
which reached the Aero Club of
America last night, and all of them
are to make the Monte Carlo Casino
their goal. It is pointed out that not only is the

value.

Airmen Start Simultaneously From Seven European Capitals

NEW YORK, Feb. 7.—(Can. Press. -From seven capitals in Europe airmen are to take flight simultaneously on April 20, according to a cablegram

For the first airman from each city net pay greater than that of the ord-inary workman but that "daily disa prize of \$5000 will be waiting. Be-

Radium and other radioactive bodies give off not only one kind of rays, but a series of rays or emanations, just as crude petroleum yields a series of oils by distillation, from the lightest to the heaviest lubricating oil or mineral wax, says The Pathfinder.

The various rays which radium produces have been named according to the letters of the Greek alphabet. The "alpha" rays are the ones that were first encountered, the "beta" rays next, and the "gamma" rays third, etc. These gamma rays behave so very much like X-rays that it has been supposed they were the same, but no absolute proof of this has been made until recently.

A peculiarity of the X-rays has been that no trace of "interference," as it is called, could be found—this interference being a general characteristic of all light waves. However, now it has been proved, and shown by photographs, that there is interference present even in the X-rays.

Thus it is found that the X-rays are

ARE MAKING NO MOVE

Special to The Sunday World. MONTREAL, Feb. 7.—Rumors have een rife in Montreal that express companies are about to cut down their STOP WORRYING ABOUT YOUR rates to compete with the parcel post HEAD NOISES AND Don't worry about those head noises of yours and don't neglect them. Worry only makes them worse, but something must be done, or you will be Deaf. Express Company, however, admitted they had heard rumors and more than half expected the railway com-mission, who govern thee rates thru CUT OUT THIS COUPON the interstate commerce commission, to effect a reduction in their rates, and they will be guided entirely and abide by such instructions. They had received no instructions yet, however, to be guided entirely by these instructions if they come.

They mentioned that already they

had had to make a reduction of 25 per cent. on parcels coming from the United States to Canada, in conformity with an order of the interstate commerce commission. This 25 per cent. came into operation on Feb. 1. On the other hand, Dominion and Canadian companies do not anticipate any order of reduction from the rail-way commission, but said if such orders came they would have to comply. They considered rates had been so cut of late years that they had reach-

ZERO WEATHER FOR SUNDAY AND MONDAY

Wouldn't you like your case to be like this one from Saskatchewan?

"Quite free from any noises in the head or any sign of deafness."

Or this one from Winnipeg?

"I can hear as good as I ever did, thank God! and there are no head noises whatever now."

Or this one from Nova Scotla? "I never have those dreadful head noises any more."

Or this one from Montreal from a man sixty years old? "My hearing is fine how, at the same of the street of the whole universe."

If you want to know how to be cured of your head and ear noises, all you need to do is this: answer the questions, yes or no, write your name and address plainly on the dotted lines, cut out the Free Medical Advice Coupen and mail it at once to the short of the solution of the coupon above send it to Ear Specialist Sproule, 32 Trade description of your case and medical advice free as tothe proper treatment. City, who aspire to honors, got a terrible thrashing at Leicester.

Palace Win.

In London district the great game on Saturday was that between Swindon and Crystal Palace, the two clubs who are striving for the Southern League championship. Contrary to expectations, Crystal Palace won, and the clubs are now level—33 points each—but the Palace have the benefit of one more game to play than their rivals. The other games do not in any way affect the table, and the results are in accord with anticipations.

Liverpool Fall.

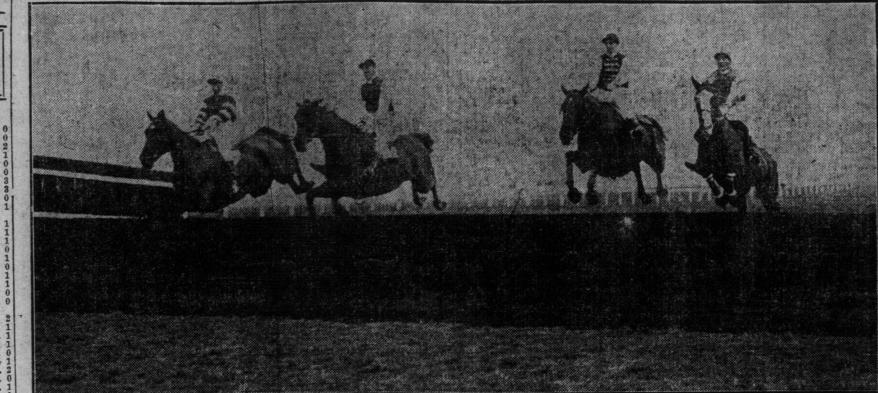

That Sheffield Wednesday are now a much-improved team is evidenced by that yictory over Liverpool at Anfield Park, and it may be confidently assumed that David McLean's return to the ranks at Hillsboro Park has wrought the desired change. Blackburn, the leaders of the First League, just managed to get home in front of the "Rams" at Derby, and still have a comfortable lead in the table. Newcastle pleased their supporters a little better today, and may yet escape relegation, a disaster which the club could hardly afford to face. A very creditable result was that recorded by Chelsea at Preston, and it is evident that the "Pensioners" are not in the least way shaky.

shaky. Woolwich Lose One.

That point lost at Bury on Saturday by Woolwich allows Notts County to advance to the leading position in the second division, the "Lacemen" having won their game with Clapton. Wolverhampton got a setback from Bristol City, and it seems strange that the "Wolves" on their rowrnr rgrorunrd should fall to a team so far down on the table. Hull, who are also in the running, disappointed their friends, they only being able to divide with Birmingham, while Leeds City, who aspire to honors, got a terrible thrashing at Leicester.

NEW BOWLING ASSOCIATION WILL DO WONDERS FOR GAME

Tenpin Leagues to Be Handled NEWS HAVE SERIES Toronto Will Be Well Represented at the A.B.C. Tournament in Buffalo.

By J. C. Chestnut

Out in Front in Athenaeum A

That the bowlers of Toronto will be anxious to boost along anything that will help their leagues and tournaments is certain. The same kind of associations have been the very life of the game wherever formed, and is sure to be here. With a body that could decipline by suspension or expulsion bowlers that would not live up to the rules of the leauses they entered, there would surely be less squabbling or defaulted games than in the past.

The movement is one that should receive the support and endorsation of every bowling club in Toronto, as well as the bowlers, for although alley owners, or any person financially interested in a bowling place is debarred from holding any office whatever, it would be the means of establishing the game on a better and more permanent basis.

The membership fee is twenty-five cents for each individual bowler, and for every team affiliated the association, from their funds, forward one dollar to the A.B.C., which qualifies such team to compete in the annual tournament. The date for closing entiries to this year's tournament at Buffalo, which will take place from March 9 to 26, is close at hand, being Feb. 18. Entry blanks may be obtained at all clubs. At present the following teams are likely to enter: Collett and Sproule (already entered), Toronto Rowing Club, three teams; Ruerseld Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probably three teams; Riverside Athletic Club, one team; R.C.B.C., two or probab

Spirited Rolling in T.B.C. Fivepin League --- Business League Going Well.

The Toronto Bowling Club Fivepin League completed their first series at the College alleys the past week, with the Senators returned winners after the most grueling and exciting race in years. Up to the finish last Monday night it was only a one game margin for Senators over Woodgreens, their nearest rivals and opponents in the final clash, but therewith the old boys proceeded to put the clampers on the first leg of the season by annexing all three games. The Woodgreens put up a game fight and all but grabbed the last two games, the second being tossed away after a lead of over 50 pins in the seventh frame, while the last game was lost by only 6 pins. The Senators, however, who are no strangers to championship honors, having won the title two years ago, are to Represented at the A.B.C.

Feds Not Coming? Yes, Will Be Here

Organized Ball Says No, While President Gilmore is Empha. tic in His Statement 'That Third League Will Be on the

CHICAGO, Feb. 7.—Toronto may be dropped from the Federal League circuit, and the club's franchise may be transferred to Cleveland, Cincinnati or New York, according to intimations from Federal League club officials, who gathered here today for a con-

Several New Yorkers are said to be eager to finance a Federal League club, and it was rumored that an option has been obtained on the old Brooklyn grounds, which would be used for games the first season. The New York men are said to be willing to build a new park the second year. to build a new park the second year. First authoritative information of a change in the make-up of the new league was a statement yesterday by Charles Weeghman, owner of the Chicago Club, who said he was almost certain Toronto would be dropped. Inability to finance a club in that city in accordance with the opinions of other club-owners is said to be the reason for the contemplated change, which may be made at today's meeting.

cleveland interests, which formerly held the franchise turned over to Toronto, as no available grounds could be procured in Cleveland, are said to have acquired a suitable site, and are said to be willing to take back the franchise.

franchise.

Promoters in Cincinnati have an nounced they are anxious to have a Federal League team in that city, which is known as the seat of organized baseball.

Should the Canadian city's franchise be turned over to New York, it is understood that severa: of the major league players who have been signed by other Federal clubs would

be turned over to the New York team. Plans for a court fight for the services of Gus Williams, George Baumgardner and Sam Agnew, members of the St. Louis American League team, who are said to have signed an agreement with the Kansas City Federal Club, and to have later signed contracts with the Browns, also will be considered at today's meeting.

Direct contradiction of the reports that Toronto might be dropped was given by Precident Gilmore, who returned from his eastern trip.

"There is no truth in the report that Toronto is to be dropped," said Gilmore. "I found everything satis-

mary:

I was only a kid.
"The mighty John L Sullivan wouldn't meet Peter Jackson, for he was considered the greatest fighting machine in the world. Well, I had the nerve and the confidence in myself to tackle him. It was a bitter fight, and the Jackson was a botter fight.

"Of course, fighting has changed a great deal. I was the first Queensberry champion, and the man who introduced the hit-and-get-away style. Johnson, representing another method entirely, fights just the opposite to the way I did. I hit and get away. Johnson waits, blocks and counters

"Perhaps nature helped to make Johnson a great fighter, in that she made him flat-footed, and about. What did he do then?
Why, simply remained in one position, and became a wizard at blocking and countering. It wasn't till he got to be uncanny at this style that he got aggressive at all, and then a poor field of contenders helped to make him stand head and shoulders over the rest of them.

"But, with all that, Johnson is a wonderfully cool fellow. Now, I tried my level best to get his goat at Reno. He simply would not let it be got. I did everything that a man ever did in a corner to rattle him. I kidded and kidded, and between rounds I

repeat the first minute's attack—any second. It served to keep him coming at me, and I took advantage of his mistakes and showed him up as he never was showed up before.

"I would have been given that decision that night without question if I hadn't bounded back into one of his pilits delivers as I seemed." one of his pile-drivers as I came off the ropes. But that's another story.
"My point is that I fought my hardest for one minute of the three, and rested up for two, by simply moving away and letting Jeff do all the rough work. That

thought I'd disconcert him by going into a neutral corner and keeping up a rapid-fire lot of talk that I figured would nettle him into giving Jeff an opening that everybody seemed to be praying for. Well, the long and short of it was that Johnson began to kid me back. I couldn't get him on anything. All things considered, he made a wonderful fight that day. Finally he turned the laughs on me in such genuine style that on me in such genuine style that I stopped kidding him and tried to

AN IMPRESSION

get Jeff started. It wasn't to be, that's all.

"But, back to the hopes, Levinsky. Willard and Gunboat Smith seem to stand out the best. Willard has all the greatest natural advantages of a fighter, except go-aheadedness. I think that, with proper schooling, he will develop into a good man. Of course that hesitating nature of his is not going to help him very much. Someone will have to break him of that trait.

"Willard is over-cautious. Jack Johnson was exactly like him when he began. Didn't Johnson stay away from Sam McVey in San Francisco for 20 rounds before he would open up and fight? He blocked, countered, and sidd around until the last 18 seconds of the fight, when he brought the Oxnard Giant down and out like an ox, with a smash on the jaw. "Then, take Gunboat Smith. I've heard it said that the Gunner was too small! How soon the

fans forget all about ring history! Just think of the greatest hitters that ever lived, who were little fellows and who battled the heavies. There was Choynski, McCoy, Fitzsimmons. Walcott and Ketchel. They were light fellows, and they have no equals in the history of the game as hitters. Jeffries will tell you that Choynski hit him the hardest blow ever landed on him in a ring. Fitzsimmons, a deadly hitter, will attest the heft of Choyns

THE RUSHING AND

usefulness. A man like Willard, big, strong, and a hitter, might turn the trick. But, don't forget that the black man is nearer the animal race than we are. A negro has the natural speed of a deer or a rabbit, if it is developed. Johnson is like either of these animals in the ring. He's a wonderful timer of his blows. And he's powerful, too. You know he actually tossed Jeff all around the ring at Reno. Paris life may have showed him up, but until it does, he's safe among the hopes at hand."

IT LOOKS AS IF M'FARLAND

"One of my pet theories was to make the other fellow do all the rushing and tearing by simply bluffing him into the notion that you were just about to start to fight him off his feet.

"Take my fight of 23 rounds with Jeffries, at Coney Island: I bluffed that big fellow all thru that fight until I had him desperate. I'd come tearing out of my

put off at his own request, the sports have about given up hope of seeing these two gladiators settle their dif-

ferences in the ring.

Gibson assures me the match is positively "on," and that Packey and Mike will meet in a ten round go at the Garden during the first week in March. He claims the postponement will benefit both boys in that it will allow them more time to train, and. from a financial standpoint, it will help everybody interested. February 12. (Lincoln's birthday), the original date. was a sorry choice for the meeting. Gibson argues, as experience has demonstrated that New Yorkers turn to other forms of amusement on such

ance at boxing events suffers.

Gibson has selected the March date for the reason that a big delegation of sporting men from Chicago and other cities will be in New York at that time to assist in the home-coming reception to the world's touring ball players chaperoned by Charley Comiskey and Johnny McGraw, and figures that the gate receipts will be increased several thousands of dollars as a result. Despite these optimistic utterances the sports are peevish and look upon the "postponement" as the equivalent

to calling the match off for good.
Story is in circulation around town that Gibbons lost whatever chance he had of getting Packey in the ring when he was to remain and to the Bush of getting Packey in the ring when he was up to him to change his system.

NEW YORK, February 7.—(Special to The Sunday World.)—The post-ponement of the Packey McFarland-Mike Gibbons bout, originally set for next Thursday evening at Madison Square Garden, is a big disappointment to local fight fans. Notwith slanding Matchmaker Billy Gibson's announcement that the match has been put off at his own request, the sports have about given up hope of seeing these two gladiators settle their difference of the packey was a world of confidence in his ability to beat Mike and while he is not given to loud boasting I also shown that he has jong felt he is the story and getaway rame.

Wolgast. He would be a Rivers in Miliwaukee and it looks as ¥ the lesson he head of several second raters has knocked some sense into the boy's head. Ad has always entertained a pretty good opinion of his ability and unless a great deal was at stake seldom trained as he should have done. But after being outpointed by the vet-gran, Tommy Murphy, and one or two onclusion that if he was to remain a headline ring attraction it was up to him to change his system.

I had several letters from Milwaukee where Ad trained for the Rivers bout. The change his eystem.

I had several etters from Milwaukee where Ad trained for the Rivers bout. The change his eystem.

I had several etters from Milwaukee where Ad trained for the Rivers bout. The change his eystem.

I had several etters from Milwaukee where Ad trained for the Rivers bout. The change his eystem.

I had several etters from Milwaukee where Ad trained for the Rivers bout and they told me the former champion and town probable to could outlight Jo

My congratuations to the former champion, and may he keep up his good work. Evidently Ad is sincere in his demands for a return match with Willie Ritchie. He will not lack support now that he demonstrated that he still has the "Indian sign" on

a pity if his efforts to bring the two greatest boxers in the country together should prove to have been wasted.

Kid Williams Shows the Goods.
Kid Williams proved his class by stopping Eddie Campi in twelve rounds last week. And the victory leaves him alone in the field of eligibles for the championship now held by Jonhhy Coulon. Williams has done everything required of him and is entitled to a crack at the title.

Champlon Coulon's showing with some youngster recently was greatly inferior to the form Williams and campi have displayed in their recent contests. It is the popular impression that Johnny will never consent to a meeting with Williams, and would rather lose the title by default than take a chance with the Baltimore terror in a long contest. While I do not agree with the critics who have expressed this opinion, I doubt whether Coulon will ever be able to round into good enough shape to beat the Kid. Johnny, if wise, will retire—that is, if satisfied in his own mind that his recent long illness has robbed him of they power to recover his old

Somebody Put One Over on O'Rourke?

NEW YORK, Feb. 2.—Whether or not Tom O'Rourke, the fight promoter, was on friendly terms with Epictetus during his college days is an open question, but he certainly showed rare judgment in picking out a motto for his seal. The seal is stamped on all tickets for the National Sporting Club, and is decorated with the fitting legend. "Prae Omnia Taurus" Translated more or less freely into English, these three Latin words inform the reader that Mr. O'Rourke's motto is, "Before O'Rourke's motto is "Before everything else, the bull."

ent youth and if given opportunity enough may succeed in landing one of those sleep producers of his on the Mex. But if Rivers beats him again there will not be any doubt of his su-

periority.

I saw Ritchie and Cross box in New York. Cross fought the best battle of his lifetime that night. If he can repeat against Rivers he has a fine chance to win. But that Ritchie showing may have been the one big battle he had left in his system. He may have outfought himself that night at the Garden.

Word comes from San Francisco that the Gunboat Smith-Jess Willard match, scheduled for July 4, has been cinched, and that there is no longer any doubt that the two leaders of the white hope brigade will clash on the big holiday.

White Hopes Are Really Matched I understand that Tom Jones, manager for Willard, is guaranteeing Smith something like \$7500 to get the match. Pretty good money for a

sger for Willard, is guaranteeing Smith something like \$7500 to get the match. Pretty good money for a "near champion," but, then, I am glad to hear that Smith is in position to make his own terms. Fighting is a hard game and a fighter is worth whatever he can get.

The Gunboat, with all due respect for his mighty kick, may not be so independent after Willard gets thru with him in July. It is no sure thing the Gunner will best Willard on points as he did a year ago. Jess has learned a lot since then and every time he has met a man the second time his work has shown great improvement over the first trial. California fight fans seem to think Smith will be easy for Willard in spite of the fact that he has a decision on points over the big Texan to his credit. For some reason the Gunboat has never shown his best form on the coast, and is regarded there as an extremely lucky fighter. His defeat of Arthur Pelky was not exactly a brilliant performance, and is quite overshadowed by the knockout of that pretender by Kid Kenneth, a

practically unknown heavy, in five or six rounds.

Jim Buckley, Smith's manager, says the Gunboat will stop Willard next time. Tom Jones is equally emphatic in telling what Jess will do to the Gunner. Well, time will tell, and, fortunately, the Fourth is not so very far off after all.

FATALITY AT MIDLAND.

French Champion a Hustler Carpentier Gets the Money

Got a Pot for Knocking Bombardier Wells Out in Short Order—Would Be a Big Drawing Card on This Side of Water.

(By lconcolast)

NEW YORK Feb. 7.—Georges Carpentier becomes the best heavyweight attraction in the boxing world Georges won a guarantee of \$13.000, and a side bet of \$5000 by beating Bombardier Wells. He can repeat the sum if he boxes "Gunboat" Smith in London, a match that is now under way, and he can draw great houses in America. In France, his home country, where he is idolized, he is under a nine months' ban for meeting a dub who was billed.

NEW YORK. Feb. 7.—Georges Carpentier becomes the best heavyweight attraction in the boxing world. Georges won a guarantee of \$13.000, and a side bet of \$5000 by beating Bombardier Wells. He can repeat the sum if he boxes "Gunboat" Smith in London, a match that is now under way, and he can draw great houses in America. In France, his home country, where he is idolized, he is under a nine months' ban for meeting a dub who was billed under a well-known fighter's name. He cannot appear in a ring there until the bars are lifted.

Outside of being the best card of any heavyweight living, Carpentier has the distinction of having made more money out of boxing than any man but Jeffries If the boilermaker had not fought Johnson this Frenchman would, today, be the crowned Croesus of the game. At that he holds one record that of making a historic sum in less time than any puglist. Eighteen housand dollars for beating Wells in one winute and thirty seconds. How do you like that? Poor pay. Every time Carpentier steps in a ring he draws at least \$5000, and often much more. He has made close to \$200,000. We've had our white hope tragedies, and our white hope successes—very few of the latter, however—but out of the whole web of heavyweight strife here have only been four developed who stood by themselves—Luther McCarty, "Gunboat" Smith, George Carpentier, and Bombardier Wells. I name Wells because he showed flashes of brainy and skillful fighting. When he won he won impressively. When he lost he lost quickly, and by the "hayo" route. He did not stew along like Morris, Willard Rodel and some more making the public sick and tized of him.

Carpentier is a good fighting man. True he has not done mighty things.

him.

Corpentier is a good fighting manTruc he has not done mighty things,
but his record far surpasses that of
the majority of American hopes. In
the first place, when he was lighter
than now he beat Frank Loughrey, or
Lewis American welterweight champion. After that he licked Jim Sullivan, middleweight champion of Eng-

Great Season Ending In the Fireside League

Teams Will Soon Be Down to Spring Training-Giants and Athletics Safe From Federal Raids - Baseball Gossip.

NEW YORK, Feb. 7.—The winter league season is drawing rapidly to a close, and what with the Federal League and Joe Tinker it has been an unusually interesting one. Within a few days now the athletes will be winging their way southward, and the regular spring crop of "phenome".

winging their way southward, and the regular spring crop of "phenoms" will begin to bloom. And as usual most of them will be bloomers.

It will also be possible within a few weeks to tell just how the Federal League really stands. Claims and counter claims have been so widely at variance that it is doubtful if any-body knows, not even Glimour, Weegman or Hanlon, just how many hig league players will line up with the new organization. The estimates run all the way from 18 to 83. The correct figure is somewhere between the two.

I'm inclined to believe if the Federals can muster an average of 5 or 6 recognized men of big league calibre, they will pull thru provided the men with money do not become discouraged. If they last thru the coming season they have every chance to devaled an enough jumpers to fill out real. velop enough jumpers to fill out real big league teams and become firmly

There are two teams which do not seem to have suffered from Federal raids, The Athletics and the Glants, and there's a reason Ball players who have about a two to one chance to cut in the world's series money are not likely to take any chances.

Snodgrass, Wilson, and Frome are

the only Giants who have been reputed on the fence, and they have now it is said, dropped to the McGraw side. George Stovall is said to have thrown out feelers in the direction of Christy Mathewson and Chief Meycre, but gave it up without any sections. ers, but gave it up without any serious attempt, when he found that Matty's income is something like \$30,000 from his salary, his world's series money, his royalties on books and plays, his newspaper writings and winter base-ball, and that the big Indian is making more than even the big salaries the Federals are offering. Beside both these men have determined with Mc-Graw's consent to finish their baseball careers under the Giant flag. In fact the big stars of the grames are the careers and the stars of the grames are the careers and the stars of the grames are the careers and the stars of the grames are the careers and the stars of the grames are the careers under the Giant flag. In fact the big stars of the game seem generally to have resisted temptation. It would be interesting to see the new contracts of men like Cobb, Jackson, Speaker, Johnson, Collins and others, and find just what it has cost the magnate to keep them happy and contented.

The importance of the sacrifice fly is becoming better recognized in base-ball, and more credit is being given for their run producing arives, which is proper. The New Yorker's footed character last season making only 27.
The Browns were credited with 28.
Ithe Nationals with 38, the White Sox with 38, the Naps with 48, the White Elephants with 46, the Red Sox with 51, and the Tigers with 52. ague in hits of this

51, and the Tigers with 58.
Two Johns born in Massachusetts—
McInnis of Philadelphia and Collins of Chicago, set the pace in manufacturing serial sacrifices in 1912. Each athlete raised eleven. The 1912 leader in raps of this sort was Sam Crawford of Detroit. He made an even dozen

The sacrifice fly rule made no difference in the batting credits of Danny Murphy, Jack Lelivelt, Frank Gilhooley or Olaf Henriksen, all of whom were 300 hitters, but it added cight points to Ty Cobb's mark, five to Sam Crawford's, eight to Tris Speakers', three to Joe Jackson's, four to Larry Lajole's, six to Eidle Collin's, four to Frank Barker's, seven to Jack McImpis', one to Amos Strunk's, three McImpis', one to Amos Strunk's, three to Herman Schaefer's, and three to Arnold Gandil's.

Arnold Gandil's.

There has been a good deal said recently of the ingratitude of ball-players, who have jumped to the Federal League, after in some instances being kept on the payroll of clubs for months or years, giving little return for the money. This is bosh, No manager keeps a man on the payroll unless there is good reason to roll unless there is good reason to believe he is going to be worth more money than he pays him. No man is kept on the rolls no matter how valuable he has been unless he produces the goods and plays ball better than any other available man. The relation between players

any other available man. The relation between player and club is that of cold blooded business, with the player getting none the best of it.

If a player can better himself by jumping there is no reason in sense or morals why he should not do it. But he should be mighty certain he really is bettering himself.

Hanus Wagner will be 40 years old before the coming season has gone very far. Leaving out the question as to whether the big Dutchman has any equal as a fielding shortstop, there can be no question that with the bat he is beyond compare. For seventeen years. Honus has never hit below the 300 mark. A number of things can happen in reventement of things can happen in seventeen years, and it is almost impossible not to figure in at least one off-season. Nap Lajoie, an even harder hitter than Honus, has known two such years Wagner is the only big leaguer in the game who has passed the 40 mark. Pd. Plank is crowding him close'y with 39 years behind him, but the Gettys-burg Guide has seen ave less seasons

of service.

Honus has been a doddering old ruin for a number of seasons, but no one has yet been good enough to step in and take his job. We know of one umpire at least in he National who figured Wagner last season as still the greatest shorts op in his circuit, of even greater all-around value than the brilliant Maranville, the hardworking Fletcher or Joseph Burt Tinker.

In the coming years, Cobb, Speaker, Jackson, or Baker may go 17 years without dropping below .300, but it is

by no means certain. Joe Jackson has evidently put the feat of the hereafter into Ty Cobb's heart, for next spring for the first time in years and years. Tyrus Raymend will so far forget his lordly standing as to ming. with ordinary mortals on a training trip. He'll join the Tigers in March this year instead of April.

ENGLISH GOLFERS FOR THE STATES

NEW YORK. Feb. 7.—Alexander Findlay, widely known thruout golfing circles, and a former member of the Dyker Meadow Golf Club, who managed the American and Canadian tour last fall for Harry Varden and Edward Ray, it is said, is now figure for arranging dates for six of the greatest golfers in the Edward Ray, it is said, is now figure for arranging dates for six of, the greatest golfers in the world to visit this country during the coming season. In addition to Ray and Varden the players mentioned are James Braid, J. H. Taylor, George Duncan and "Abe" Mitchell. Last year Varden and Ray played over forty matches in various, parts of the United States and Canada, and then did not play half the matches they could have had.

Westminster Again Defeats Vancouver

President Gi more of the Federal Baseball League

James A. Gilmore, the subject of this photograph, was comparatively unknown outside of Chicago, his home, until he was elected to the presidency of the Federal League, that aggregation of shrewd business men who tall say, when you mention the name Gilmore: "Who, that fellow, why he used to sell coal in Chicago, what does he know about baseball anyway?" Some of that is true. Mr. Gilmore was one of the most successful coal salesmen in Chicago, and he used to sell a wonderful amount of coal annually. He knows the baseball game like every fan knows it, and every angle and nook and corner of the game is known to him thru the study of the great pastime. Mr. Gilmore is shrewd, smart, agreeable and suave. A student of human nature, and a born fighter, he is the kind of man one likes to call friend. He is one of the trio who are engineering the Federal League, and like himself, the other two, Charles Weeghman and W. M. Walker, are also products of Chicago, the headquarters of the new organization.

Stories of Famous Masterpieces EDITED BY DONALD G. FRENCH

5. Pope's Essay on Man: The Gospel of "Know Thyself."

WHETHER or not we are prepared to concede that "The Essay on Man" is real poetry, we must admit that it has it has been seen as a second secon HETHER or not we are prepared to concede that "The Essay on Man" is real poetry, we must admit that it has been widely read and even more widely quoted (in parts). Pope, himself, sets forth the plan of the poem in this fashion: "Having proposed to write some pieces of human life and manners, such as come home to men's business and bosoms, I thought it more satisfactory to begin with considering man in the abstract, his nature and his state; since, to prove any moral duty, to enforce any moral precept, or to examine the perfection or imperfection of any creature whatsoever, it is necessary first to know what condition and relation it is placed in and what is the proper end and purpose of its being." Further, he continues, "If I could flatter myself that this essay had any merit, it is in steering betwixt the extremes of doctrine seemingly opposite, in passing over terms utterly unintelligible, and in forming a temperate, yet not inconsistent, a short yet not imperfect system of ethics."

In Pope's time it was customary for the writer to address his work to

In Pope's time it was customary for the writer to address his work to some person of note who might assist him in giving it publicity or perhaps return the compliment of dedication or adress by something substantial in the way of money or preferment. Hence Pope's "Awake, My St. John!" is not the aprostrophe of an imaginative writer to a saint of bygone times. It is simply a bit of tactful and shrewd attention given to Lord Bolingbroke

HIS poem, or rather essay in verse, is divided into four "epistles," wherein the writer seeks to demonstrate his system of philosophy in reference to: (1), the nature and state of man with respect to the universe; (2), with respect to himself as an individual; (3), with respect to society; (4, with respect to happiness. In fine, his purpose is expressed in the line to "typhicate the ways of God to man"

(4), with respect to happiness. In fine, his purpose is expressed in the line to "vindicate the ways of God to man."

He argues that "We can reason but from what we know," and as we know nothing of the world's beyond "'Tis ours to trace Him only in our own." He does not deem man imperfect, but a being suited to his place and rank in the creation, agreeable to the general order of things, and conformable to ends and relations to him unknown. Man, he sees as subordinate to the dispensations of God; below the scale of man is noticed the subordination of creature to creature and of all creatures to man. Some of the more striking epigrams found in this first epistle are:—

Then say not, man's imperfect, Heaven in fault; Say rather man's as perfect as he ought. Heaven from all creatures hides the book of fate. All but the page prescribed their present state.

Lo, the poor Indian! whose untutored mind Sees God in clouds, or hears Him in the wind.

All are but parts of one stupendous whole, whose body Nature is, and God the soul.

All nature is but art, unknown to thee; All chance, direction, which thou canst not see; All discord, harmony not understood; All partial evil, universal good: And spite of pride in erring reason's spite, One truth to clear, whatever is, is right.

THE business of man then, is not to pry into God, but to study himself. The second epistle says: "The proper study of mankind is man." In this Pope proceeds to discourse upon man's powers and frailties. He shows the need of self-love and reason, discusses the passions and their use; show how man's mixed nature contains both virtue and vice. Our passions and imperfections, however, combine to bring about the desired ends of Providence and the general good. Some popular quotations which are found in this section are:

> Vice is a monster of so frightful mien, As, to be hated, needs but to be seen; Yet, seen too oft, familiar with her face, We first endure, then pity, then embrace. Behold the child by Nature's kindly law, Pleased with a rattle, tickled with a straw.

ERE, then, we rest, says the poet, in opening his discussion on "Man with respect to society": "The Universal Cause acts to one end, but acts by various laws." The whole universe he sees as one system of society. Nothing is made wholly for itself, not yet wholly for another. In the third epistle he talks of instinct and reason, and the way they affect society, in animals, in mankind. He traces the origin of forms of government the origin of religion, the origin of superstition and tyranny. Listen to him berate the man who regards himself as "lord of creation":—

Has God, thou fool! worked solely for thy good; Thy joy, thy pastime, thy attire, thy food? Who for thy table feeds the wanton fawn, For him as kindly spread the flowery lawn; Is it for thee the lark ascends and sings? Joy tunes his voice, joy elevates his wings. Is it for thee the linnet pours his throat?

Love of his own and raptures swell the note, The bounding steed you pompously bestride, Shares with his lord the pleasure and the pride.

APPINESS, the topic of poets and prose writers from the beginning of writing, is the theme of the last epistle. Pope's idea is that happiness is the end of all men and attainable by all. Fixed to no spot is happiness sincere,
'Tis nowhere to be found, or everywhere

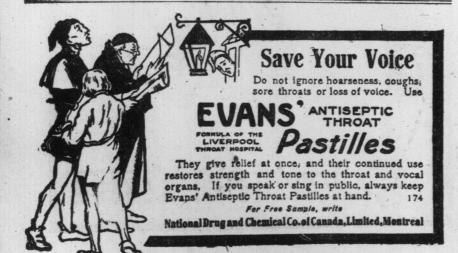

Tis never to be bought, but always free. And further to enlarge upon this phase of the topic, he writes:-

Honor and shame from no condition rise; Act well your part, there all their honor lies. Fortune in men has some small difference made, One flaunts in rage, one flutters in brocade; The cobbler aproned, and the parson gowned, The friar hooded, and the monarch crowned, "What differ more (you cry) than crown and cowl?"
I'll tell you, friend! a wise man and a fool. You'll find, if once the monarch acts the monk Or, cobbler-like, the parson will be drunk Worth makes the man, and want of it, the fellow; The rest is all but leather or prunella.

The closing couplet sums up epigrammatically the argument of the

Virtue only makes our bliss below; And all our knowledge is, ourselves to know.

UDGING by our present day stands, Pope's "Essay" is scarcely poetic. Nowadays poets do not write essays. In fact, real poets of the present day have little to do with real didactic, argumentative or satirical verse; but, in Pope's time, English literature was passing thru a transition period. The Elizabethan era had produced a "nest of singing birds." Poetry seemed to be the natural vehicle of literary expression. Pope adopted the heroic couplet and built his epigrams upon it and welded them together. This passed for poetry until there came the "romantic revival" which has, forever, I think, shown that there is a distinct cleavage, not only in atti-tude of mind, but also in choice of subject and vocabularly between poetry and prose. One critic points out that the excellence of Pope's "Essay on Man" depends, not upon any logical development of a system of philosophy, but upon the catchy and effective epigrams and aphorisms, which, taken by themselves, are true, aithough they may have little relation to the central conception. It is a case of sifting a deal of chaff for a little wheat; that the wheat is so high grade that the labor is worth while.

Literary Competitions

The prize answer to the "Favorite Character' contest is published below, the winner being Miss Helen

Favorite Quotation Contest, Quote from memory your favorite passage of verse or prose, and tell about the poem or selection from which it is taken, also why you prefer it, Answers not to exceed 200 words. This contest has been extended to

February 20.

Best New Book Contest.—Write a descriptive review of the "best new book," in your estimation, published in 1913 or 1914. Answer not to exceed 500 words. This contest closes February 27.

A handsome prize book will be given for the best answer in each

MY FAVORITE CHARACTER.

By Helen Fortier.

WHEN SELECTING a favorite character from fiction we have a very wide range from which to choose From all kinds of characters there stands out among the most loveable the most beautiful and the most sincere, that of Sudney Carton whose slorious. of Sydney Carton, whose glorious, unselfish character and death have been so ably depicted for us by Charles Dickens, in his renowned book called "The Tale of Two

It was in the time of the French revolution. Sydney Carton was an Englishman of good descent. He had no family and few friends. Being fairly rich, he had both time and money to waste, and the good traits of his character were overpowered by his indolent habits.

Living in England with her aged father was a Miss Manette, with whom Sidney was much in love. But Lucie Manette loved Charles Darnay, whom she married. The likeness between Darnay nad Carton

ness between Darnay nad Carton was very much noticed, many peo-ple taking them for brothers. . . .

W HEN FRANCE began to be so was really French, considered it his duty to go back to his native land. Among other aristocrats, he was suspected and tried. His accusation was based on the fact that his father, uncle and grandfather had been tyrants and oppressors. The revolutionary juries brooked no restraint on their accusations. Darnay was condemned to death within 24 hours. He was allowed to bid his wife bood-bye and was then hurried off to the prison from which no one ever emerged except to death.

Then it was that Sydney Carton's beautiful character was revealed. was really French, consid-

beautiful character was revealed. Loving Lucie as he did, he could not bear to see her suffering. planned to die in Darnay's place. He had some influence with one of the guards of the prison, and, thru him, gained admission to Darnay. time appointed for the execution 3 o'clock. At 2 o'clock, Darnay was pacing his prison, fully prepared for death, when Carton entered. After a few words of greeting, Carton drugged Darnay with a powerful but harmless drug. While the latter was unconscious Carton exchanged their clothing, and then, in Darnay's apparel, he called the guard, telling him to bring a litter for his friend, who had fainted. Thus Darnay was carried away to safety, while his noble friend awaited death in the

HREE O'CLOCK drew nearer and nearer, and at last Sydney heard the sound of hur-ried steps and of doors opening. Then the guard came and ushered him out to the large hall, where the rest of the condemned were waiting. Soon the tumbrils, of large, open carts, were filled with the victims. The awful guillotins came in view. Sydney Carton stepped to the platform when his turn came. Never had so peaceful a face been seen in that terrible place. The destroying engine did its work quick-ly, and that noble soul left this earth. He died as a true gentle-man, ready to face his God and sacrificing his life so cheerfully for one he loved.

New Books

THE REVOLT OF DEMOCRACY.

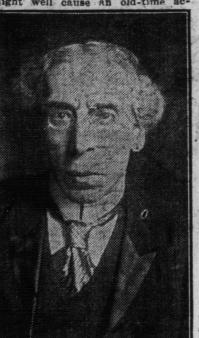

LFRED RUSSELL WALLACE A may be regarded as co-discoverer with Darwin of the theory of evolution. His recent death at the advanced age of 90 years recalls to us the fact that for over half a century he has been the pre-eminent British authority on biological science. His attention, however, was not given exclusively to this science for he took an active interest in problems of social economics. For thirty years he was president of the Land Nationalization Society of England. In this capacity he considered from time to time many inquiries into matters relating to tenancy, sweating, unemployment, low wages, unhealthy trade, bad and overcrowded dwellings and the depopulation of the rural districts.
In "The Revolt of the Democracy"

(Cassell & Co., publishers), Prof. Wallace presents his opinion on such matters as strikes, wages, remedy for unemployment. After dicussing the claim of the workers and giving the views of many leaders in the labor movement, he submits this "simple and practical suggestion" for the relief of destitution: "The only certain way to abolish starvation, not when it is too late, but in its very earliest stages, is free bread I imagine the outcry against this: 'Fraud! loafing! pauperization!' etc. etc. Perhaps so; perhaps not. But even if it must be so, better give bread to a hundred loafers than re-fuse it to a hundred who are starv-All who want it, all who have not money enough to buy wholesome food and other necessaries, must be able to get this bread with the minimum of trouble." And he goes on to outline his plan for the distribution of free bread. The whole discussion conducted with clearness, force,

Israel Zangwill Becomes a Dandy

How Marriage Has Changed Zangwill From One of the Most Careless Dressers Into a Real Dandy. His "Melting Pot" Now Being Published in London For Frst Time BY HAYDEN CHURCH

E VERY NOW and then I run across Israel Zangwill, either in the Strand or in the near-by publishing district, of which Bedford and Henrietta streets, in succession to the more famous Paternoster Row, are now the heart, and whenever I do so I marvel at the change that has been wrought in this author in the past few years. The sartorial change, that is, which might well cause an old-time ac-

ISRAEL ZANGWILL, WHO, SINCE HIS MARRIAGE, HAS BECOME QUITE AN IMMACULATE DRESS-

quaintance to quote Shakspere and cry, "Bless thee, Zangwill, thou art translated indeed!" For Zangwill who, prior to his

marriage to the accomplished daughter of the late Professor Ayrton, was the very limit of bohemian carelessness in his dress, is now a veritable Beau Brunmel, or "absolute the bounder of lute nut," as the popular slang phrase goes. He is in town at pretion in book form and the produc by a dramatic society of his "The Melting Pot," which play, over here, and I noticed him close to his publisher's in Bedford street, yesterday, attired in the glossiest of silk hats and the richest of astrak han-lined overcoats, to which add trousers creased to perfection, and be-spatted patent leathers, which reflected the mild sunlight which we were favored that day. What a change from the Zangwill of a few years back, whom the private secretary of an acquaintance of mine came within one of mistaking for a pedlar, and whose attire was less disreputable than linen! Of course it was just the regardlessness of appearances that goes with the literary temperament in excelsis, but surely none but a woman could have wrought the miracle that has been wrought in the author of "Merely Mary Ann."

Far End, away in the heart of the beautiful Sussex country, but Zangwill still keeps up his old bachelor quarters at 3 Hare Court, in the classic temple. I well remember the first time I called in the last days of October, when all London was enwrapped in a phenomenally early fog of the "pea-scup" variety. I was the bearer of a letter of introduction, but for a few moments, after a typically bed-raggled London "slavey" had shown me into his study, Zangwill, who was busy at his desk, seemed to be wholly unconscious of my presence. Accordingly I had opportunity to take him in in detail, and told myself that never had I seen so illgroomed a man of genius. An instant later, however, Zangwill had come out of his trance and greeted me courteously, after which his glance wandered to the window.
"Ah, the fogs," he murmured, dreamily, "the fogs! They come too early, like the Christmas numbers."

THE ZANGWILLS now live at

INFLUENCE. By Wilfrid Thorley. A bell stroke moves the dew From leaf to ground, The far away outflew

What Shall I Read?

That breath of sound.
When drenched flowers o'erflow
Their chalices,
Deeper the nets must go

In far-off seas.

Beside the Bonnie Brier Bush: By Ian Maclaren. The rugged tenderness of the domestic life of the Scot was never better portrayed than here. The Red Badge of Courage: By Stephen Crane. An inspiring and realistic tale of a raw recruit's first battle

-inspiring because it is a record of the conquest of cowardice. Hlawatha: By Henry W. Longfellow. Legendary lore of the American Indian tribes, cast into highly musical verse.

Hans Brinker: Or, The Sliver Skates:

By Mary Mapes Dodge. A juvenile classic giving a capital picture of life in Hallend.

classic giving a capital picture of life in Holland.

A Doll's House: By Henrik Ibsen. A dramatic presentation of the problem of a marriage in which a material and not a spiritual tie exists between the parties to the compact. Consequently, according to Ibsen, a wrecked houchold. "Ghosts," in the same volume (in some editions), illustrates realistically "the sins of the parents visited upon the children?"

Life of Gladstone: By G. W. E. Russell. The world-wide prominence attained by this "Grand Old Man" of England, makes his biography a work of value to every citizen of the empire.

Literary Gossip.

Somebody, who for the first time had heard of W. Morgan Shuster, the young American treasurer-general of young American treasurer-general of Persia, in spite of whose efforts Persia fell a victim to her powerful neighbor on the north, and who has told this dramatic story in "The Strangling of Persia," asked "Who is this man, W. Morgan Shuster?" A prompt, but not too accurate, reply was, "Oh, he is the man who strangled Persia."

Harvey J. O'Higgins is publishing a new book of short stories entitled "Silent Sam."

A friend who knows Marie Corelli well imparts the important information that her favorite recreations are reading and music. She is passionately fond of flowers, too, it seems, and cut blossoms adorn most of her rooms. She also makes a hobby of collecting rare old books.

SHORT NAMES.

Miss Eda Ek, of Brockton, Mass., says she has the shortest name in the United States. She bears a good old Swedish patronyn her ancestors—John Ek—was a famous explorer. Even shorter names, however, are to be found in France. A Normandy magnate bears the title of Marquis d'O, and some years ago a well known Paris cafe was kept by Madame Therese O. She had a son who caused the papers some amusement when he reached the age for military service. He declared his inability to write, and was told to make a cross on the recruiting papers. Where-upon a journalist suggested that O is quite as easy to write as X.

Names with only one letter have been bestowed on places as well as persons. There is a village called O in Normandy, not far from Argenton. Two Chinese towns are named respectively Y and U. There is a river Y in Holland, and one of the heave of the Zuyder bears the the bays of the Zuyder bears the same brief name. France has a river and Sweden a town of the

With The Canadian Poets Non Omnis Moriar

BY PAULINE JOHNSON

Pauline Johnson, was, by right of birth, an Indian princess of the Mohawk tribe. She was born on the Indian reserve near Brantford, Ontario. For many years she traveled thru Canada, Great Britain and the United States, giving recitals from her poems. Her poems are marked by their exquisite lyrical quality, citals from her poems. Her poems are marked by their exquisite lyrical quality, citals from her poems and an indomitable spirit which shows itself in the poem we are love of the courage with which she faced and endured a long and painful likeness exemplified that spirit in her own life. Still "unappalled" she reached that port a few months ago and was laid to rest amid the trees of her adopted home.

In the teeth of the Word that bars my track, In the swirl of the Ebb that sucks me down, In the face of the storm that flings me back On the wrath of a Deep grown mountainous-walled, I, I, tide by tide, and tack by tack, As far as the chains will let me free-I, threading a course unbuoyed and black, And feeling the night where the fanged rocks frown, Ere the last spar sail, shall have somehow crawled To that Port whence shone no light for me; Where, wrecked, if you will, but unappalled, I shall know I am stronger than my Sea. -From "The Oxford Book of Canadian Verse."

Correct English.

THE FLOATING PARTICIPLE.

Doctors talk of a disease called floating kidney; akin to it is a writer's ailment which may be called "floating participle." Even in the "near classics" we may find symptoms of the disease. This misuse of the participle is caused by forgetting that in its adjectival value it must relate to and modify some noun (or substantive).

Notice this example: WAITING outside the station in the midnight wind, the cupola LIGHT of the Auditorium could be seen. If we analyze this sentence we must put "waiting" as a modifier of the noun "light"; then the sentence would mean that "the light was walting outside of the station"—and this is a "reductio ad absurdum." A slight change will amend the sentence: Waiting outside the station.

... WE could see the cupolalight.

The participle no longer "floats" in the air, but is attached corrected to "we"

A picturesque and almost ludicrous case of misrelated participle comes to my mind. It read thus: "WALK-ING across the street, a FLORIST'S WINDOW attracted my attention." No doubt it would. The mental pic-ture of that florist's window walking across the street has more than once relaxed the tension of my seriousminded facial muscles. You realize now, I suppose, that the sentence should read: "As I walked across the street, etc.," or, "while I was walk-

About the participle, bear this in mind: tack it on to a suitable support; don't leave it floating.

Surgeons in a St. Louis hospital recently removed a woman's kid-neys, drained them of mercurial poison and replaced them. At last acproved, and her chances for recovery

Speaking in London recently, C. E. S. Phillips hinted that the time may come when radium will furnish power for driving ships and operating other machinery. He stated that 20,000 tons of radium are contained in the waters of the sea, and that one ton of it, in point of radio-energy, is equal to 1.500,000 tons of

The Faithful Servant

BY G. H. FISHER

In quest of knowledge I must brave the desert's burning sands;

A faithful servant and a friend Man always finds in me;

For him I scale the mountains and the valleys I explore:

For him I search the ocean's bed, to add to wisdom's store.

The pathway of the stars I map, I measure time and space;

Down in the bowels of the earth I dig and delve nad drill: High up among the clouds I soar, my mission to fulfil.

I do Man's slightest bidding: I'm his humble servant, Work.

With zeal that does not falter and that knows not how to shirk,

In his behalf, both night and day, I toil unceasingly!

I do not shrink when duty calls to frigid Polar lands,

I print in books and magazines a record of Man's fame.

I burrow in the ancient tombs of some forgotten race;

All this I do, and more, that Man may ever wiser grow:

That all the joy of living he, in time, may come to know.

I analyze and classify, the birds and flowers I name:

THINKING AND WRITING.

By Marc N. Goodnow.
HERE is a curious anomaly about this writing game; you can't write unless you think.
It is very strange, and yet it is very true; the some of us often forget its application in our own cases. You might do needlework without think-ing and never prick your finger; you might wash dishes without breaking a plate, and it might not be a hard thing to dig good ditches and never think about it at all. But I believe that you can't write very much that is big without thinking. It seems to be a necessary complement or accessory of the craft of writing; many times I have wished it were not; and each time I have ignored it with neophytic hauteur I have had a terrible fall.

Once upon a time a story almost once upon a time a story almost burst my brain with its insistent clamor for freedom, and with the hot haste of delivering a new thought-child I sat down and wrote it out. It was a great idea, thought I; certain-ly a worthy one, and destined mayhap to catch the watchful eye of critical readers who could appreciate real literary merit It was not to make my fame, perhaps, but I had the feel-ing that it was to become a founda-tion stone in my temple of Ego. . . .

SUBMITTED the new creation to an editor, who looked it over carefully. Then he glanced up at me with a kindly smile which smacked of fatherly affection and said: "You've missed the real point of this story, the spark that would make that would make it pulsate as a "I didn't think about that," said L

when he had explained
"Of course; you didn't fhink. I
know that. But why didn't you?"
That was the point: "Why didn't
I think?" Why don't we all think?

I carried the advice around with me until it became firmly imbedded in my scribbling constitution, and now I'm passing it on to you. A great many writers will say to beginners: Write, write, write! Let me go behind that and say to you with all striven and failed striven again and failed striven yet once more and succeeded: Think think, think! the earnestness of a soul that has may be somewhat painful to

do it. They even say that a man killed himself by thinking, but the chances are if he hadn't thought himself to death he might have been shot in some thoughtless mo-ment or hung for not thinking, so the odds are even in the end.
One would be safe in the rather sage assertion that the search of all editors for better material to print in their pages would not be half so hard a search if those who expect to be paid for their contri-butions would think, think, think Anybody can write, and perhaps anybody can think, but it isn't everybody to be sure, who thinks before writ-

ing. Sometimes we wouldn't write at all if we thought first. That ter-rible phrase, "It might have been" is in the habit of visiting those who have written without thinking. The act may mean the difference between success and failure. It may mean genius or it may mean only hack. It may mean the high class magazine or it may mean the pennydreadful or worse .- The Editor Maga-

Is Cancer Increasing?

UCH DIFFERENCE of opinion exists both among physicians and the general public as to whether more deaths now occur from cancer than was formerly the case. On the one hand, it is held that more accurate vital statistics, improved means of diagnosis and the general progress of medical knowl-edge in the community all tend to increase the appparent death-rate It is not that more people die

from cancer, people say, but that we know of more cases of death from cancer than was formerly the case. There is, also, in the community, a floating body of opinion that cancer is infectious, that cancer is hereditary, or that cancer is found in certain bouses or in certain clicertain houses, or in certain cli-mates. One sometimes hears the expression "cancer houses," and it has even been said that people who eat tomatoes are more liable to have cancer! Surely folly could no farther go, unless it was in the case of the physician who once assured the writer that all diseases were really caused by eating white bread! An

instant's thought would dispose of all these theories as more or less absurd.

. . . HERE IS, however, great reareason to think that cancer is more prevalent than it used to be. This was recently brought out by a valuable and carefully preout by a valuable and carefully pre-pared paper on the subject by Mr. Frederick L. Hoffman, of the Pru-dential Insurance Company of America, presented to the Clinical Congress of Surgeons of North Am-erica in Chicago recently. Mr. Hoffman thinks that the increase in the liability of the population of the United States to suffer from cancer is greater than that indicated by the mortality returns, which are indeed sufficiently alarming, and we may add that on the whole the statistics available for Canada confirm this impression so far as Canadians are concerned. Mr. Hoffman thinks that the mortality in the United States from cancer in men and wo-men over forty has decidedly in-creased. The following are some of his figures ;

cancer in the United States in 1912 is about 71,000. It must be remembered that the registration area of the United States, that is the part of the country where sufficiently accurate vital statistics are kept is not much over half of the whole area of the United States. Of the above mentioned deaths from cancer, 28,041 were deaths from cancer of the stomach and liver: 9271 was after the stomach deaths from cancer of the stomach and liver; 9371 were of the intestinal tract; 2769 were of the buceal cavity; and 2627 were of the skin. the remainder being of other organs. Mr. Hoffman points out that the death rate from cancer in the United States increased from 37.2 per 100.000 population for the five years ending with 1876 to 30.5 per 100.000 population for the five years ending with 1911. This certainly seems a very serious increase, and it must be remembered that a good many cases of cancer are cured by operation, so that a certain number operation, so that a certain number of lives are now saved that would formerly have gone to swell the

above mortality rate. In Ontario, for example, the an-

By Dr. Helen MacMurchy

such an inquiry should be to convince the community that when anything appears amiss, such as a lump where there should not be a lump, or a discharge, or sore, or anything else of the kind makes its appearance, it would be only common sense to find out from a skilful and honest physician what the matter is, and that this should be done at once. In nothing is delay more fatal than in malignant disease. What can be done to cure today cannot be done tomorrow. Alarm and panic are to be deprecated. But people who have the necessary knowledge about themselves and their health, as a rule, are the very ones who are not alarmed. They apply to matters of health the

same good judgment and .common

sense and promptitude that they use

Kit's Column

A Weekly Letter of Comment and Opinion

A Dissertation on Mr. Punch.
RANDER Matthews, no doubt BRANDER Matthews, no doubt in view of the general outcry against indecency in literature and the drama, playfully attacks Mr. Punch as the most immoral character ever seen on the stage. And a very good argument he makes of it. But did ever a play draw more delighted audiences than Punch and Judy? I remember when the Toronto Exhibition would be nowhere without it. The very moment the first squeak went forth from that disreputable but delightful villain, Mr. Punch, a ring of people gathered m:raculously. His hold upon public favor is undeniable. In whatever by-street, square or alley the Punch and Judy man pitches his queer theatre, he is sure of an queer theatre, he is sure of an audience. The pity is that of late he has taken a vacation somewhere, which we devoutly wish him

Joy, terror and amusement in an extraordinary jumble are gathered into the quasi-gruesome story: there is even a touch of pathos in the farcial play whether over the tragic fate of poor Judy or dog Toby in his wilted ruffle, or the unfortunate infant Punch, we cannot say, but many a childish tear has say, but many a childish tear has been shed, and many a little storm of rage has stirred a child's heart when standing under the tawdry "proscenium" we watched enthralled, the unrolling of that most human drama. How we hated Mr. Punch! The blows he rained on the poor negro, the harmless clown, the worthy policeman were bad enough, but when he smote Judy and banged the baby we were the most heartthe baby we were the most heart-broken and raging little children to be found anywhere in Ireland.

Betty's curse for Mr Punch seem-

ed of all others to fit the occasion.

"May the devil draw him thru a wran's quill," she would say, which consoled us immensely until the tri-umphant miscreant in a hand to hand fight with the "divil" vanquished that horned villain and emerged victorious.

Then we came to the conclusion that the wicked thrive here below.

The immorality of Mr. Punch. T IS in this that the immorality of Mr. Punch strikes us as ex-tremely shocking. He "lives tremely shocking. He "lives happy ever afterwards" like the good prince and beautiful princess in the fairy tale. After a career of crime before which that of the greatest thief and murderer the world has ever known pales, Mr. Punch hangs the hangman and settles down to a life of ease. Of course, the long nosed reprobate is not and long nosed reprobate is not and never was a human being. He is only a six mch puppet, a fantastic joke, pulled hither and thither by means of strings in his inside. He hasn't even a voice, loud as he squeaks, but he is very real for all that. And he is very, very old, more than four centuries old, in fact. He he migrated to France, then came over to England with King William frem Holland or with the Huguenot refugees from France It is a moot point, but Evelyn mentions him as at Covent Garden in 1667, and that busy little man, Mr Pepys, saw him as early as 1662. In any case, the vicissitudes in Mr. Punch's career have been many and varied. He has traveled over every road in the world: from a country inn to the court at Versallies, from the quays of Amsterdam to the palace at the Hague; from the glories of Covent Garden to a Whitechapel slum and from that to the International exbibition at Toronto, Canada. Everythere his delicious squeak has been heard, likewise the horrible blows of his baton. Everyone has gone down before him, wife, infant, clown, policeman, nangman, and the devil himself. Talk of a rigid moral stand-

use each day of

color of youth in the face.

immorality in an army of girls from Rector's each and all going the Easiest Way. Only, as we said before, Punch is but a puppet of wood, while the other unfortunates are puppets of fate.

The Despot.

HERE IS one despot who rules in every country and upholds the flag of tyranny with calm the flag of tyranny with calm and unconscious effrontery, an irresponsible despot, who is quite careless of the dignity of human nature, and who issues his decrees with clamorous imperiousness. That despot is the baby. I remember writing all this about that young fellow years ago, but, as we all know, history repeats, itself—and here he is again.

A philosopher who was probably fraudulent and hard hearted old bachelor, wrote an essay in which he contended that no consistent thinker could possibly discover the ultimate use of bables. He forgot that they might blossom into irreverent and syni-cal old bachelors like himself. I would like to see our philosopher interviewed by a deputation of practical young matrons, each one with a haby which was triumphantly held aloft. Wouldn't he knuckle under in no time and pretend to discover a separate and distinct charm in each little derling. tinct charm in each little darling, and wouldn't he confide cynical and savage remarks to his fox terrier when—the maternal brigade departed—these two good friends were sitting by the comfortable study fire, and ward him with hard knockings of his total?

But—we sympathize in many ways with that sarcastic bachelor philos-opher who maintains that babies are the ruination of domestic peace and

Why? Because King Baby teaches a man hpyocrisy; he lays the very foundations of morality for at least the first year of his life. He is presented to a grinning father, who is distinctly afraid of him, and is told "Baby is the very image of you." The unhappy man hastily puts his hand to his nose (to make sure that he has one) and stares aghest at he has one) and stares aghast at the pink squirming bundle that is scowling up at him and kicking its ridiculous legs without any apparent motive; if faith, a baby strips a man of any lingering remains of vanity as a wind storm strips a tree of its

Daddy and the Despot.

HEN, the baby it is who turns a truthful man into a liar. A most immoral proceeding. His father, poor victim of deceit, shamelessly asserts to the delighted little mother the totally unfounded and untruthful statement that baby—that mere lump of mere putty—is-a "per-fect little beauty!" Could depravity go farther than that? And when baby howis assent his dad wonders where he keeps his voice He is so little and it is so big. He must be quite hollow inside—like Marley's ghost—only full of fearful sounds, which is all very well during the day, but at night! Oh, those new, paterndelightful nights!! His fatherhis chief slave—is slumbering soundafter the day's work, when thru a dream wherein he sees his best speculation rapidly turning giant golden nuggets, an unfortunate sound pierces. At first he stirs uneasily and murmurs words uncomplimentary to cats-then the sound gradually grows clearer and shriller, and the unhappy wretch jumps up shiveting for he knows it is the king who is promulgating his nocturnal edict. The wild chant of the despot rings thru the night. His father may be a hard man, and a dictatorial with his clerks, and henchmen, but he obeys that clarion summons like a very sheep. He tries coaxing, bobard for the drama! Beside Mr. bing, imploring—all sorts of hypo-

On Quarreling

By A Spectator.
O YOU permit quarreling in

or absurd. Your brain beats to a dull measure. Frequently you feel that you are "written out"-burnt

to ash like a fire. A frightful despair catches you. Time is racing on, and the hour for "copy" is at hand, and there is not an idea left in the world. I tell you that the most

journalist. It is on those days when the brain is dull, when the heart is

broken with trouble and grief, when your mental activity is far below par

that training steps in, and, seizing the pen flings black lines on the pa-

per, and for this once saves you from dismissal and utter hopeless-

ness. And, what does it mean — this training? Infinite patience and

humility, courage, indefatigable application, a habit of observation that

becomes so keen that it is auto-matic; an unfathomable memory

straint, and, above all and before all,

will power, self-re-

the world. I tell you that the rigid training is necessary to

your home? A fine young woman said to me the other day:-"Do you know that I am convinced that I would love my brother and my sister better today had I not

been allowed to quarrel with them in childhood?"

"Oh, nonsense! childish quarrels!" I said, "what are they?" "Well, they are not so trivial as you may think," she said quite seriously. "You never had a sister and brother, but I have, and I feel very sure that the quarreling we did in youth has left a bitter flavor thru the years. There are fine and delicate edges of tender feeling broken off by it. Unconsciously you mention the cause of the disagreement to this friend and to that, and there you are, side-stepping from absolute

family loyalty. Do you see?" "It had never occurred to me," "The only thing that I had noticed about it is that to be mixed ip with scrappers is very uncom fortable, indeed. I nearly always wash my face and take a little walk

afterward, if I can!" "Yes," she agreed, laughing, "and you stand first on one foot, then on tother, and know not where to turn or what to say."

"There is a splendid mother of my acquaintance," she went on, "who opened my eyes to the truth about quarreling. She has a large family of dear, bright, laughing children. I am with them as often as I can be and am never so happy anywhere as there. She told me one day that she never allowed her children to quarrel. I asked in amazement how she prevented it. 'Oh, I don't know,' she said, 'the children just know I won't permit it' And then she told queer thing: 'Once or twice they have started to fuss and scrap, and when I heard them I just dropped everything, put on a coat and went out for a long walk. It upsets me so, and makes me so nervous. I can't stand it, you know. I walked and walked, and one time did not get home till nine o'clock at night.

"The atmosphere of that home is wonderful. If ever I have little ones they shall be taught not to quarrel," said my friend, feelingly.

ious, so terrified! But it taught them

The children were frantic, so

I found what she said very interesting. Perhaps grown-up quarrels are just a habit from childhood. Perhaps all sorts of contention, perhaps divorce might be checked by insisting upon harmony among little

A Prophesy - - -By Elbert Hubbard *

TO OBTAIN a place, a free field, a harmonious expression for your powers—this is life.

To be tied down, pinned to a task that is repugnant, and have the shrill voice of necessity whistling eternally in your ears: "Do this or starve," is to starve-for it starves the heart, the soul-and all the higher aspirations of your being pine away and

Art is beauty, and beauty is gratification, a peace and a solace to every normal man and woman. Beautiful sounds, beautiful colors, beautiful proportions, beautiful thoughts-how our souls hunger for them! Matter is mind in an opaque form; and all beauty is but a symbol of spirit.

And this beauty mirrors the best in the soul of man—it shows the spirit of God that runs thru him. . . .

ONCE A LETTER was sent by the Queen of Italy to every reigning queen of Europe asking that the recipient make a promise to wear upon her clothing no lace except that which was made by hand. Every person who received this letter responded; and a letter from Queen Victoria was one of the first answers to the appeal.

Schools were established where stris were taught to make beautiful things with their hands. When they acquired the necessary definess of ingers, and the right taste and judgment, materials were supplied them, and a market was promised for the product.

. . . ND WE find Mr. Robert Barrett Browning—a man with kingly pedigree, the only child of
Robert Browning and Elizabeth Barrett—following the idea of the gracicus queen. Mr. Browning established and endowed a manufactory for
the making of hand-made lace, as a
loving monument to his father and
mother. This institution gives work
to five hundred women. I've called
it a manufactory, but it is not just
that, for the work is mostly done that, for the work is mostly done at the homes of the workers, who live in the viliages scattered about Ven-ice. Each worker is paid according to the quality of her work. It is quality, not quantity, that counts— —and so the constant incentive is held out for each woman to do her

To this factory once came an old woman past eighty. Her husband had been drowned at sea; her sons had been killed in the war; and she was alone with two grandchildren was alone with two grandchildren to care for. She came with a piece of elaborate lace on which she had worked three months. The work was very uneven, for the woman was old, her fingers were stiff, and her eyesight was faulty.

The superintendent showed the work to Mr. Browning and asked: "What shall we do?"

"Pay her for it pay her for it" said Mr. Browning, "and give it to e—she has done the best she could." And so, for several years, has come each three months, hobbling on her cane, this old woman who deposits her work and joyfully carries away her silver knotted in a handkerchief.

. . . BUT MOST of the work that passes thru the Browning Memorial is rarely beautiful. and goes to those who covet it. And strangely enough (or not), the quality of the lace made is no better nor more beautiful than that made by the nuns in the convents of the Middle Ages. There are things you cannot improve upon. You cannot better the work of Praxiteles. The marbles of the Greeks are at once the inspiration and hopeless tantalization of every men, who models in the inspiration and nopeless tantan-zation of every man who models in clay or puts chisel and mallet to stone. In ethics you cannot better the Golden Rule. "In philosophy," says Emerson, "say what you will —it is all to be found in Plato."

And in bookmaking we cannot improve on the work of the Venetians, or that of the monks of the Middle Ages. All we have gained has been in speed—and what we have gained in speed we have lost in power. . . .

S O WE find William Morris, that man who could do more things and, lo them well than any man of the nineteeth century, going back to the method of the olden time in making books. He made the matrices for his type himself, and with his friend. Burne-Jones, cut initials and ornaments in wood for head and ornaments in wood for head bands, tail-pieces and title pages.

And these books were printed on paper made from pure linen rags, made just as paper was made in the thirteenth century And the helpers who made these books found a joy in their works and something may in their work; and something more

in their work; and something more than a living wage.

And behold, the people who loved good books proved more numerous than was at first supposed—and they bought the books and paid for them. In making these books it was the constant motto: "How good can they be made?—not how cheap."

And so the manufacturers of furniture and laces, and cloth and books.

And so the manufacturers of fur-niture and laces, and cloth and books, gradually awoke to the fact that there was some people who preferred to have a few good things than a great many cheap ones,

RT IS THE expression of man's joy in his work. And when you read a beautiful poem that makes your heart throb with gladness, you are simply partaking of the emotions that the author felt when he wrote it.

To possess a piece of work that the workman made in joyous animation is a source of joy to the possessor. Carry this idea one step further, and you see why the painting done by the hand of a man with soul and animate con prevents an application. spirit can never be replaced by

When you look upon a beautiful painting you in some way catch the spirit of the artist who did the work; and the armiess marbles of Greece, done five hundred years before the birth of Christ, yet subdue us into

And this love of the work done by the marriage of hand and brain can never quite go out of fashion—for we are, men and women, and our hopes and aims and final destiny are at last one—where one enjoys, all enjoy, where one suffers, all suffer.

S AY WHAT you will of the cold-ness and selfishness of men. at the last we long for the companionship and the fellowship of our kind. We are lost children, and our kind. We are lost children, and when alone and the darkness begins to gather, we sigh for the close relationship of the brothers and sisters we knew in our childhood, and cry for the gentle arms that once rocked us to sleep. We are homesick amid this sad, mad rush for wealth, and place, and power. The calm of the country invites, and we fain would do with less things, and go back to simplicity and rest

ND SO it came about that about the year 2001 men began to think, and they saw that to think, and they saw that to work all day with your head, and never with your hands, failed to being content. The most successful man was unhappy, and they turned at last from the city to the country.

They said: "Let us go home—all is so quiet there." They found, having taken a little time, that there was beauty in the country they had quite forgotten, and the memody of the water running over the pebbles, hastening to the sea, was a song of gladness. They saw, too, that animals and birds that lived in the open air never went into decline—that the chipmunk's, health did not fail, nor the quail have nervous prostration.

chipmunk's health did not fail, nor the quail have nervous prostration. The thought came to them that life is expression, and art is the voice of joy that the workman finds in his work. So they worked with their hands. They carved in wood and made useful furniture, or they printed books and illumined them, and illustrated them after the manner of the monks of the olden time. And others became skillful in working with leather and bound the books in a most artistic and beautiful way. ing with leather and bound the books in a most artistic and beautiful way. And these people found that the best joy in life comes from work well done. The women were no longer the mere pets or playthings of the men—all worked and worked with heads and hands. And the women were the comrades and companions of the men.

of the men-So, the a man were rich, he did not feel ashamed to wear the garb of a workingman. And working with his hands, he came to understand and comprehend the needs of the poor. And a right understanding and brotherhood sprang up between them. And those who had formerly worked from daylight until dark, now found And those who had formerly worked from daylight until dark, now found that a few hours' work a day sufficed. In the past, as a great many never worked with their hands at all others had to work all the time. So the toilers had time to think, to read and enjoy; and as those who had formerly only used their heads now used their hands, nervous prostration took wing, and Dr. Bright and his pet disease became obsolete.

ND THEY planted trees, and forests grew; the birds came back and made the boughs melodious with their songs of love. The sewage was used to fertilize the land instead of to pollute the rivers; and fishes played hide and seek in the bright waters; and as ways had been found to consume the carbon instead of liberating it in a cloud of soot, the sun's rays fell in golden beams, carrying health and

And the people found that happiness, and a reasonable content followed a just and proper exercise of one's faculties. They further discovered that man had a triple nature; physical, mental and spiritual, and that to work a certain number of physical, mental and spiritual that to work a certain number of hours daily with one's hands is the part of wisdom, in that it gives zest to the exercise of the mental and spiritual natures. They further found that the exercise of the spiritual or emotional nature thru music, or the contemplation of beauty, was a necessity as much as food and drink.

HEY ALSO discovered that the unrest and ruin wrought thru novertaxed nerves in days agone, came largely from owning too many things. So they simplified and found after all that the best of life is not to be gotten thru the ownership of many things; it comes from daying the days that less nearest these doing the duty that lies nearest thee.

They said, "life is expression, and They said. "life is expression, and we are endeavoring to express the beauty that is in our hearts. This life is full of gladness, and mayhap it is the gateway to another, and to live well here is surely the best preparation for a life to come. God is good and we are not afraid."

SKIN DEFECTS IN INVISIBLE

THE EYE of photography may see much that is hidden from the human optic. Forscan whatever is printed on the sensitized paper of the photograph, which may thus serve as a medium to translate into visible wavelengths the rays, above and below the visible spectrum, that do not affect the retina. The interesting revelations made by the aid photography with infra-red ultra-violet rays by Professor Wood, of Johns Hopkins, will be remembered by our readers. The possibil-ity of using this method in the diag-nosis of disease is now suggested by experiments made by G. Michaud and F. Tristan, of Costa Rica State College. These show that the short-er the wave-length of the light used in photography, the more clearly does it emphasize skin-defects and other small surface markings. These are practically absent when the photograph is made by infra-red rays, whose waves are long; more visible by ordinary light, and especially noticeable by the short waves of the ultra-violet. Hence to appear free from blemish in a photograph should have it taken by infra-red rays, while the physician who wishes blemishes to show as conspicuously as possible, for examination, will use the ultra-violet.

It is announced that F. Marino, a bacteriologist of the Pasteur Insti-tute, has discovered that tubercle bacilli are fatal to other germs; they resist the action of heat and are neutralized neither by antituberculosis serum nor by ordinary blood serum. In short, the tubercle bacilli are apparently immune from other germs, and it is therefore de-duced that vaccines and serums intended for the cure of tuberculosis

Yet Has Failed to Fathom the

an's existence.

With cold-blooded calculation she wants above all other gifts-LOVE. so remarkable a lecturer in the Sor- the woman of science. She goes to There is little doubt, in the light of bonne, where she holds the distinctive work to plan freedom for the man

THE OPPROBRIOUS term, "old maid," is entirely out of date. If you would keep up with the times, you must now say "bach-elor girl," for such the unmarried woman of today is in every sense of the word. Whether she lives at home or in apartments, she enjoys the same freedom as her brother she comes and goes without ques-

Some critics contend that the higher education is responsible for this outbreak of womankind. Possibly this is so, but certainly woman in general is much improved and broadened by the change.

Statistics, prove that college girls do marry, but it must be conceded that quite a number do not. After four years of freedom from home restraints, bound only by the laws of self-government or some other form or the honor system, they find it difficult to slip into place again as a mere cog in the household ma-chinery. Well-to-do fathers have struggled against their daughters leaving the protection of the home to take up positions, but all to no

FEW YEARS ago a girl who had been graduated from one of our normal schools soon found how hard it was to live on the salary paid to teachers in the lower grades, and after having stood the children as long as she could, she decided that if she were ever going to get anywhere she must special-

So she drew all of her money out of the building association, and persuaded her sister to do the same, and went away to a school of gymnastics in New England. The first year she was all right, but the sec-ond year she was obliged to teach a night class, and was graduated owing the school for a year's tuition. She was fortunate enough to get a position right away as supervisor of

position right away as supervisor of gymnastics in a large town, and during the year she held this position paid back her debt to the school.

Being offered a position as instructor of gymnastics ni her home town, she accepted it at once. It was not long before she had paid her sister what she owed her, had money ahead, and was able to lend her father a considerable sum for use in his business. She utilized every possible means to increase her meome, teaching both night and afternoon classes in addition to her

regular school work.
. She has worked herself up in her chosen line so well that she is now in charge of the gymnastic instruc-tion in a girl's school in a large city. She has money in bonds, in the building association. in life insurance, in the savings fund: she has traveled thru the west, she has been

to Florida, she has had a trip to Europe. She has refused several offers of marriage; she makes as much as any ordinary man, and has not brought herself to be willing to

NOTHER young girl as she grew up silently observed the struggles of a sister ten years older than herself to keep her head above water. She saw this sister graduate from school and almost immediately. immediately marry the man she loved. She saw the arrival of babies and bills, the constant effort to make both ends meet; she saw how this and that was always being needed for the house and never forthcoming, and how the mother was always denying herself for the sake of the

So when it came to her turn to be So when it came to her turn to be graduated, she resolved not to take any chances on matrimony. She, too, could see no opportunity for advancement in the general field of teaching, so she attended a stenography class at night, and in the summer studied bookkeeping.

The next fall she entered the office of a large corporation and it was

fice of a large corporation, and it was not long before her college training and her own inherent talent for busi-ness won her the position of private secretary to the head of the firm. She now has her own flat and supports her mother in the bargain. . . .

NOTHER graduate from a high school with a similar inclination toward commercial life, took a course at a business college, and thereupon entered the of-fice of a real estate firm. Here she soon mastered the details of the usiness, and, resolving to start out for herself some day, she lived on next to nothing, saving every cent she possibly could.

One day, while driving thru the

suburbs, she was suddenly seized with the idea that the city must in time grow out to this particular section. She at once resigned her posi-tion, to rent a modest little office in this tract. At first it was a hard pull, but soon the fields gave way to blocks of houses, apartments and flats, and as business grew steadily better she was able to buy the entire block in which her little office

Now she is white-haired, but just s tall and broad-shouldered as ever, and second to no masculine competi-tor in business acumen and ability. She has been too wise to move to another locality, and today she still occupies the same office she rented years ago.

S TILL another girl found after graduation that her father's health was failing and that

the family fortunes were on the wane. Her brother held only a small position, and could not be depended on for much assistance. She hated the idea of having to teach school, so always having been handy with her needle and being possessed of an eye for the artistic in line and color she announced her decision of opening a dressmaking establish-

The family held up their hands in

The family held up their hands in horror, bemoaning the four years wasted; but she resolved to show them that her training could be used every bit as well in a business enterprise as in a classroom and she finally succeeded in borrowing enough cash from an uncle to rent a house in a fashionable part of the town, and to install a few girls.

She was just about beginning to get on her feet, even the supporting both her father and her mother, when her brother married and brought home his wife. The girl could not bring herself to put them out, especially after he lost his position and a baby was expected. After the baby came the brother got something to do and things began to be a little

A man she liked asked her to A man she liked asked her to marry him, but with such a large family dependent on her the girl did not dare to accept. A few years later, when the brother was on Easy street, and in a home of his own. and the father dead, the same man asked her again, but by that time the pulse of success was in her blood, and the could not say yes.

SOMETIMES girls graduate from college to go back to luxurious homes. They cannot accustom themselves to the inanities of society, the parents will not allow them to take a position, so they become interested in social problems.

her four years were over. She was fired with enthusiasm, and was constantly doing all sorts of unconventional things to help downtrodden humanity. She appeared suddenly in the night court to go ball for a lot of girl strikers she had never seen before, and yet was clever enough to keep her name out of the papers for six long weeks and the cause of the strikers before the public.

On another occasion, in order to aid a certain society that was collecting statistics about women workers, she went out as a laborer into the laundries of the town and worked there for four whole months, with never a question being raised at any time as to her not belonging to the class with which she had affiliated herself

She gave away money right and left to institutions, settlement houses and individuals. Her young life came suddenly to a most tragic end with her work only just begun. While investigating the labor camps of her native state her motor skidded, and she was thrown to the ground.

T is the single women who have the leisure to help their less fortunate sisters, the spinsters who lead all of the great movements. The married women may sympathize, but little hands clutch at their skirts and pull them back. Their single sisters, on the other hand, have the opportunity to become famous, to be respected the world over as leaders of humanity.

There are professional women galore among the fraternity of the

. . .

bachelorhood. There are some mar-ried women in the newspaper busi-ness, but there are more single wo-men possessed of facile pens, the reporter's sense, and executive abil-ity. Doctors there are galore, and really the woman doctor has come to be recognized more and more as a necessary institution in our modern life.

TET, with all our pre-empting of our brother's prerogratives, we have not lost our sense of sex, nor our ability to be delightfully feminine as to clothes and frivolities. The other day at an alumnae luncheon, I found myself seated next to a girl whom I recognized as having been a student about to graduate the year I entered high school. She was dressed in the height of fashlon, with plenty of frills, chiffons, and touches of fur. She laughed the whole time at the She laughed the whole time at the silliest jokes, with an alluring display of dimples and even teeth. Finally she said to me, "And how are

you these days?"

"All right," I replied, "except for the usual headaches." She looked at me more closely at

"Don't you think your headaches

"Don't you think your headaches might come from your eyes? Why don't you consult a doctor?"

"Perhaps they do. Give me the name of a good occulist and I will," I answered half joking.

"Why not come to my office?"

For a moment I could only sit and stare, but finally I got back enough breath to ask her address.

Gained a Foothold in the Advertising

WAS tired of teaching school and longed to earn my living in some other way. I had faithfully accompanied faltering first grade feet thru the mysteries of "two plus two," "I see the cat," and "The trees are green in the spring."

I had dignified wavering scrawls as hand writing, and I had painstak-ingly arranged artistic groups of apples and potatoes, in order that my pupils' education in drawing might not be neglected. I had praised the diligent, and prodded the braised into action, I had lectured the transgressor and dried the tears of the oppressed, and at the end of years I realized that I was tired not only in body but in mind. I had given my personality out bit by bit until little remained, it seemed to

When the school closed I left the building one June afternoon, resolved that I would never again re-enter as a teacher, if, during my vacation, I could find other occupation that pleased me better. I had no particular line of work in mind, but I was determined to change my occupation, and I had confidence enough in myself to believe that I should succeed at something else.

I did not mention my determination to anyone. Even my family had not the remotest idea that I was dissatisfied. Mine was not of a communicative nature, and if my plans miscarried I had a lively wead of the inevitable. "I told you so. You might have known better." . . .

WAS in the third week of my vacation, before I had even the faintest gleam of an idea. Then, a car ride I took to a little summer resort, just outside the town in which I lived, set me thinking. was on the way home, as I sat idly trying to shorten the ride by readthe various advertisements posted at the top of the side walls of the car, that the thought suddenly came to me. "I wonder if I could

not write advertisements."
That night after supper I locked myself in my room, and after an evening of the hardest kind of labor produced three "ads," which struck me as being very good, but which were in reality very flat and gingerless. They served their purpose, however, for they gave me sufficient confidence in myself to approach the owner of the only department store in our little city with the modest request that he place me on his advertising staff. I did not show him the three "ads" I had written Why, I do not know. Something whispered to me to hold them back, the at the time I talked with Mr. K they were in my hand bag. In the light of subsequent circumstances it was better that he did not see them. Had he read them, I am reasonably

sure that he would have bowed me out of his office with the politely in-definite assurance, that if there should be a chance for me he would let me know.

As it was, he listened with com mendable patience to what I had to say, asked me a few questions, and finally told me to write a number of advertisements about anything I pleased and bring them in to him. I went home feeling that I had gained a little ground, and that it would not be my fault if I did not

Again I half decided to show him the three advertisements I had written. Then I changed my mind and after carefully reading over in the newspaper the daily advertisement for the store, whose owner I had interviewed, I wrote half a dozen little 'ads' about various articles to be had in that store. In order to do this, I was obliged to visit the store, going from counter to counter to get the information about the various articles I intended to describe. I took notes as I went and wrote the ads the moment I reached home, while the detail was still fresh in almost a week. I wrote and rewrote them until I felt that I had put forth

. . . . T WAS a moment fraught with suspense for me, when seated at one side of his desk I eagerly scrutinized M. K's face as he read my attempts at advertising. His expression told me nothing, however. sphinx. "Would you be willing to work without salary for awhile?"

my best efforts. Then I took them

to Mr. K's office.

"For how long?" I questioned. "Until I know what you can do," he replied kindly. "There is a place the advertising department for a bright woman. Mr. R's assistant is going to leave the store before long. You may be the very person we want, but we shall have to try you out. first."

I replied rather loftily that until he was perfectly certain that he needed me I should not expect to be paid a salary, but the moment he decided that he did need my services, I expected my salary to begin with that moment. He laughed a little and sa d that he would see to that part of it, and that I should come to work the next morning.

My announcement that evening at the supper table that I was going to work in K's department store was received with protests and jeers. The protests were from my mother and sister. The jeers were from my seventeen-year-old brother, who immediately set up a cry of "Cash." in a shrill, falsetto voice. He was rather impressed when I remarked with algulty that I was going into the advertising department, and even designed to ask questions about how I obtained the position. Mother mourned over me and declared that I ought to rest in the summer in order to go back to school in the fall. I replied that if I made good in the store I did not intend to teach the next year. Both mother and my sister shook their heads over my "foolishness," but father, who up to this point had said nothing, advised me to try my hand at writing advertisements. I would know long before school began whether it was worth while to go on, he said. For the right person there was more money in advertising than in school teaching.

WENT to my new work next morning with that thought in mind. I had been fortunate

HILE eggs are so expensive

enough to secure the position. Now it rested with me to keep it. I put all my energy and intelligence into my copy that week; and when Saturday came I was presented with an envelope containing a salary. Not a very large one, but large enough to open my eyes to what I might someday be able to earn if I per-severed. Mr. K also said he thought I had done very wel!, and 'f I continued as I had begun, I might stay. When fall came Mr. K and I had a talk, and the next day I sent in my resignation as teacher to the board of education, and adopted advertising for good and all. I remained at Mr. K's for three years, then came the opportunity for which I had been watching for over a year, and I went into the advertising department of a large store here. After being with this house several years I received

the offer of a position from

largest store in the city. This I accepted and with this firm I have remained up to the present.

I have never regretted making the change of occupation. Not only is my salary far above what I would have received by this time as a teacher, but the work is vastly more pleasant. By that I do not mean to say that there is anything easy or simple about writing advertisements. There are days when the words you would summon to your command, are tantalizingly out of mind, and there are other days when there is nothing new under the sun, when every line one writes reeks of staleness, just as there are days when the ads fairly write themselves. But whether one's days are bad or good, it is all interesting, and I have come to believe that it is the work that was cut out for me.

You may be sure I went.

things which is most dimedit for the active woman in the home to do. And that is do nothing at all. She must shut the infected room up tight for a period of twenty-four hours, and surely not less than twelve hours. This is in order to give the dust time to settle for it is positively known that disease germs are carknown that disease germs are carried thru the air in the particles of dust which pervade the atmosphere. . . .

Steam as a Germ Catcher.

HEN the room has been subjected to the "silent treatment" she must enter ment" she must enter it very gently so as not to stir up the dust and wipe off everything with a solution of bichloride of mercury. A cloth which has been wrung out of the solution should be used for this wet-dusting or wiping process. The solution should be made by dissolving an ordinary bichloride tablet in a pint of water. If bichloride of mercury is not available a solution of carbolic acid made up of one part carbolic acid to twenty parts of wacarbolic acid to twenty parts of wa-

by injecting steam into the room. If it be steam heated, turn one of the valves and let the steam pour into the room for an hour or two. If there is no steam a kettle of water may be permitted to boil over a gas jet for a couple of hours. Germa adhere to make places and they will here to moist places and they will fall to the floor in the form of arti-ficial "dew" or steam, where they may be taken up by generously wip-ing the floor with the bichloride or carbolic solution. To convey the hangings curtains or bed covers thru without adopting precautionary measures is to invite future trouble, so the house nurse should wrap them in a sheet which has been dipped in a carbolic solution. Bichloride cannot well be used for this specific purpose unless the sheet or cloth into which the things are to be carried is to be not used again for the solution will turn cotton or

linen yellow. Once removed, the bedclothes should be thoroly boiled, and about the best thing that can be done with the mattress is to burn it. It can, of course, be made fit for use by proper sterilization, but there are no facilities in the ordinary household for sterffizing an article the size of a nattress, so your only course make some arrangements with the department of health in your community, which may have at its command some of the big steam sterilization plants especially constructed

PRACTICAL NURSING

Hints to the Home Nurse

Sanitation and Antisepsis.

JITHIN recent years members of the medical profession. of the medical profession, the health departments of the city. woman's clubs and many civic and welfare organizations have done much to educate the public as to the best means of preventing disease and safeguarding the health by sanitation. We now know that to insure health we must have fresh air, light, proper drainage and plenty of soap and water, and we have learned that the insistence that these things be provided for in every place where men dwell is for preventive purposes. Instruction along this line where men dwell is for preventive purposes. Instruction along this line does not, however, give to the home nurse the information she needs as to the specific methods to be employed in getting rid of disease germs once they have installed themselves in the home.

in the home.

The room which has been vacated by the scarlet fever patient, the diphtheria patient, the smallpox patient; those suffering from the once-belittled diseases of children—measles, mumps, whooping-cough, and chickenpox, as well as tuberculosis, must undergo a well defined rigorous treatment which covers a period of several days, It is supposed of course, that during the occupancy of the patient all unnecessary articles of furniture, hangings and coverings have been re-

ings and coverings have been removed from the room.

When the room has been vacated by the convalescent the first duty of the home nurse is to do one of those things which is most difficult for the certain warmen in the home to do

A very effective aid will be secured

for the purpose

Germs Harder to Kill Than Bugs.

RDINARY fumigating, such as was affected by the housewife of other days, will not suffice for the home nurse. The fumes of sulphur burned on a coal shovel or in the form of sulphur candles, cannot be made strong enough to kill germs, altho flies and certain in-sects may be killed by the fumes. Disease breeding microbes, like cats. have nine lives. The spores, or eggs, are harder to kill than the full

cess is employed it must be repeated on three or four consecutive days to render the room safe.

Fumigating is effectively done in hospitals by forcing a powerful formaldehyde vapor into a room which has been prepared for this treatment by sealing all cracks and apertures. In many communities this method of temployating is employed by the health. ligating is employed by the he department as a routine measure against the spread of infectious dis-

You are probably thinking about your home medicine chest or closed now. remembering that old "saw" "an ounce of prevention is worth a pound of cure." Since we are on the subject of sanitation and antiseptics a few specific pointers will prove valuable. The home nurse is apt to reason that if bichloride of mercury is such an effective destroyer of is such an effective destroyer of germs—a powerful disinfectant—it will be fine to use it for cleaning your scissors, knives, needles and similar articles which may have been called articles which may have been called into play, but it is not the best agent for this purpose. The common name of bichloride is corrosive sublimate and it will corrode iron and steel and ruin linens when used in strong solution. A solution made up of one part of carbolic acid to twenty parts of water is better for such uses, and the most effective means of treating dishes, silverware and similar articles which have been in use in an infected room is to boil them in a solution of plain baking soda. Milk of lime or chloride of soda Milk of lime or chloride of lime are the best things for use in drains and vessels used in the sick

THE PRINCIPAL thing to be remembered in disinfecting with solutions is that the disinfect-

solutions is that the disinfectant must come in contact with the substance for a prescribed length of time in order that it may be effectual. A mere washing with the solution of pouring it over the object will be of little use.

The home nurse will pardon a slight leaning toward the technical at this point, it is hoped, that a few things may be made clear about disinfectants, germicides and deodorants. The chemicals used for the destruction of bacteria are called germicides; those which arrest and prevent development disinfectants. In a broad sense germicides are destroyers and disinfectants are preventives. The same chemical soluventives. The same chemical solutions may belong to either class according to their strength. If you make a solution of carbolic acid weaker than five per cent, you will have a disinfectant—the solution is not strong enough to destroy all germs. The full five per cent. sogerms. The full five per cent. so-lution is a germicide. Carbolic is also a deodorant, as will be recog-nized by those familiar with the clean smell in a hospital. But there are deodorants which are not germ-icides. The home nurse will, of course handle any of these powerful drugs with care.

> Tyranny of Sunday Dinner Tradition

Why Sunday should be sacred to a midday dinner, and the balance of the day devoted to digestion is not evident. It does seem rather material that so much must be sacrificed to mere feeding, when it is possible to have a good hot meal that will not require more than a half-hour in its preparation.

If it must be a roast, a loin of veal, a leg of pork or a pair of chickens will be just as good if they are roasted on Saturday and set away in the dripping pan, and given the last half hour in a good hot oven on the day of saving. A steak peeds but haif hour in a good hot oven on the day of serving. A steak needs but little time and loin chops are better than the average leg of lamb.

Potatoes, if boiled for twenty minutes in their skins, can be finished in the gyen during the same half

in the even during the same half hour; or cold boiled ones can be hour; or cold boiled ones can be browned in the pan with the heating roast. If chops are the choice, the frying of the potatoes in deep fat, is a matter of a few minutes. Spaghetti with cheese or tomato sauce, is a good substitute for potatoes, and the browning can be done in a few minutes. Any of the green vegetables can be boiled the day before, drained and reheated with butter. Cauliflower or opions can be rejuvenated with their cream dressing, and those vegetables that require long cooking can safely be simmering while the housekeeper is at church while the housekeeper is at church or taking the rest that is always considered a masculine right on the one day a week.

IN THE KITCHEN

the average home, one should know of different salad dressings which lose none of their fine flavor if eggs are not included. One may use olive oil or butter for the purpose. It should be boiled with red pepper and celery seed, then strained. Replace it in the vessel when strained and to it add desired amount of salt, sugar and mustard, with a fourth teaspoonful of cornstarch to a small quantity of dressing to give it the smooth effect obtained with eggs. Beat this with an egg beater, add a very small quantity of vinegar and, when pos-sible, the least bit of whipped cream. The secret of an exceptionally deli-cious mayonnaise is the vinegar It is spiced and sweetened brown sugar, and strained for use. It gives that flavor over which one is certain to wonder "what can to remove artificial glaze which is a it be" and yet cannot discover the coating of talcum, and a glue-like substance in which pure rice is im-. . . nersed before it is ready for mar-

Salted Fish.

O wonder your salt fish have the briny flavor offer. of soaking. You forgot to lay them in the water with the skin side up and the salt could not soak thru thee skin. Clean them carefully, turn them in the water with skin up and change the water twice. Fold them double or in their natural form, and the thin ones will not be fried dry and tasteless, while the delicate flavor will be delicious.

. . . Cooking Cranberries. TO cook cranberries as they are brought from the market is to meet a keen disappointment in a delicate berry which many persons do not enjoy because its wild flavor is unpleasant to the taste. Clean the berries, place them in a

pan with sufficient water to cover them, and add a half teaspoon of soda. Boil the berries in the soda water until you hear them busting. Drain the water from them; it will be found a greenish-black, rinse them in cold water, then cook with sugar. It removes the "tang" and less sugar is needed to sweeten them if cooked in this way. The same method has been used successfully in cooking soup beans, from which the greenish water removes a poisonous substance, makes the bean clear and white when when cooked, and they cook in less time, too. Others have used soda water for cooking rice for a few minutes

. . . Decorations.

HE little touches that add to the attractive appearance of many dishes when brought to the table are not known to the younger housewives who are inexperienced in such matters. Take the wide leaves of lettuce, say two,

with a few tender tips from the yel-low leaves of celery, and roll all into a tight cigar-shaped roll. When you wish to garnish the roast of beef take your seissors, snip off half-inch pieces from the vegetable cigar, and you will have some pretty green and yellow rosettes. Make use of your wide tined fork by dragging it around the platter of mashed potatoes. The deep furrows will brown quickly in the oven, and will be even more tempting if sprinkled with cheese and dotted with butter. To make the tiny flecks of parsley seen on baked vegetable pies or floating on soups, get the clean tips, roll into a ball, snip into fine particles with the scissors and sprinkle the same To quickly prepare a salad you

can use almost any preserved fruit such as canned peaches or quartered pears by placing them on lettuce leaves and garnishing with mayonnaise and English walnuts.

The gelatin desserts are so devoid of any real taste that many persons inice for the foundation. use grape juice for the foundation. Boil it, add the gelatin, preferably a

berry flavor, and when cool add it to

. . . PINT of cream can be doubled by adding to it the beaten yolk of one egg and a teaspoonful of cornstarch cooked in a half pint of milk. Add a teaspoonful of sugar and beat all with the egg beater. It is difficult to detect this from real cream for serving with dessert, fruit, etc.

Grind all orange and lemon peel in the meat or food chopper, and enough sugar to cover it, and keep the mixture on a porcelain or china platter until it is sufficiently dry to place in a closed box, then use it for flavoring cakes and puddings.

When an extra double-boiler is not

handy, use a pudding pan for the lowed vessel and place in the bottom of it the tin lid from a can. The small lid should be large enough, however, to hold the pan in which you cook the food. This lid allows the water to circulate around the middle pan, and it does not boil or splatter on the stove. A ring or

even a small iron ring serves the same purpose.

All home-made syrups which are more or less likely to "sugar" if not consumed at once will be free from all sugary grit if boiled in less water to which a little cream of tartar has to which a little cream of tartar has been added. Table syrup should be quickly made, and if too much water is added and boiled too long, the result is a sugary syrup at the best,

De Snowbira

By Dr. Wm. H. Drumn "O leetle bird dat's come to us w'en stormy win' she's blowin'. An' ev'ry fiel' an' mountain top is cover wit' de snow, How far from home you're flyin', nobody's never knowin', For spen' wit' us de winter tam, mon cher petit oiseau!

A WASTED DAY

BY RICHARD HARDING DAVIS

THEN its turn came, the private secretary, somewhat apologetically, laid the let-in front of the Wisest Man in

Wall Street.
"From Mrs. Austin, probation of ficer, Court of General Sessions," he explained. "Wants a letter about Spear. He's been convicted of theft. Comes up for sentence Tuesday."
"Spear?" repeated Arnold Thorn-

"Young fellow, stenographer, used to do your letters last summer going in and out on the train."

The great man nodded. "I re-

in and out on the train."

The great man nodded. "I remember. What about him?"

The habitual gloom of the private secretary was lightened by a grin.

"Went on the loose: had with him about five hundred dollars belonging to the firm; he's with Isaacs & Sons now, she people on Sixth avenue. Met a woman, and woke up without the money. The next morning he offered to make good, but Isaacs called in a policeman. When they looked into it, they found the boy had been drunk. They tried to withdraw the charge, but he'd been committed. Now, the probation officer is trying to get the judge to suspend sentence. A letter from you, sir, would—"

It was evident the mind of the great man was elsewhere. Young men who, drunk or sober, spent the firm's money on women who disappeared before sunrise did not appeal to him. Another letter submitted that morning had come from his art agent in Europe. In Florence he had discovered the Correggio he had been sent to find. It was undoubtedly genuine, and he asked to be instructed by cable. The price was forty thousand dollars. With one eye closed, and the other keenly regarding the inkstand, Mr. Thorndike decided to pay the price; and with the facility of long practice dismissed the Correggio, and snapped his mind back to the present.

"Spear had a letter from us when he left, didn't he?" he asked. "What he has developed into since he left us—" he shrugged his shoulders. The secretary withdrew the letter, and slipped another in its place.

secretary withdrew the letter, and sipped another in its place.
"Homer Firth, the landscape man," he chanted, "wants permission to use blue flint on the new road, with the first send to plant silver fire.

use blue flint on the new road, with turf gutters, and to plant sliver firs each side. Says it will run to about five thousand dollars a mile."

"No!" protested the great man firmly, "blue flint makes a country place look like a cemetery. Mine looks too much like a cemetery now. Landscape gardeners!" he exclaimed impatiently. "Their only idea is to insult nature. The place was better the day I bought it, when it was running wild; you could pick flowers all the way to the gates." Pleased ers all the way to the gates." Pleased that it should have recurred to him, the great man smiled. "Why, Spear," he exclaimed. "always took in a bunch of them for his mother. Don't you remember, we used to see him before breakfast wandering around the grounds picking flowers?" Mr. Thorndike nodded briskly. "I like his taking flowers to his

"He said it was to his mother,"
suggested the secretary, gloomily.
"Well, he picked the flowers, anyway," laughed Mr. Thorndike. He
didn't pick our pockets. And he
had the run of the house in those
days. As far as we know," he dictated, "he was satisfactory. Don't say more than that."

The secretary scribbled a mark with his pencil. "And the land-scape man?"
"Tell him," commanded Thorn-

dike, "I want a wood road, suitable to a farm; and to let the trees grow where God planted them." As his car slid downtown on Tues-As his car slid downtown on Tuesday morning the mind of Arnold Thorndike was occupied with such details of daily routine as the purchase of a railroad, the Japanese loan, the new wing to his art gallery, and an attack that morning, in his own powspaper, uson his pet his own newspaper, upon his pet trust, But his busy mind was not too occupied to return the salutes of the traffic policemen who cleared the way for him. Or, by some gen-ius of memory, to recall the fact that

Watch the feet that

now trip lightly. All of them had corns.

But the owners learned of Blue-jay. They applied it in a minute. There was no more pain. The corn was forgotten. And in two days the corn came

Soon or late you will treat your corns in that way. You will stop the paring, stop the old-time treat-ments. You will deal with corns in a scientific way.

You will take them out, with no soreness, no pain, no inconvenience. Nearly half the corns in the country are now ended by Blue-jaya million corns a month.

Why wait? Other ways, as you well know, don't really end a corn. Why don't you try this easy, painless,

most effective way? Why don't you try it now?

it was on this morning young Spear was to be sentenced for theft. It was a charming morning. Spring was at its full tide, and the air was sweet and clean, Mr. Thorndike considered whimsically that to send a man to tell with the memory of such

sidered whimsically that to send a man to jail with the memory of such a morning clinging to him was adding a year to his sentence. He regretted he had not given the probation officer a stronger letter. He remembered the young man now, and favorably. A shy, silent youth, deft in work, and at other times conscious and embarrassed. But that, on the part of a stenographer, in the presence of the Wisest Man in Wall Street, was not unnatural. On occasions, Mr. Thorndike had put even royalty—frayed, impecunious royalty, on the lookout for a loan— at its ease.

The hood of the car was down.

The hood of the car was down, and the taste of the air, warmed by the sun, was grateful. It was at this time, a year before, that young Spear picked the spring flowers to take to his mother. A year from now where would young Spear be?

It was characteristic of the great man to act quickly, so quickly that his friends declared he was a slave to impulse. It was these same impulses, leading so invariably to success, that made his enemies call him the Wisest Man. He leaned forward and touched the chauffeur's shoulder. "Stop at the Court of General Sessions," he commanded. What he proposed to do would take but a few minutes. A word, a personal word from him to the district attorney, or the judge, would be enough. He recalled that a Sunday Special had once calculated that the working time of Arnold Thorndike brought him in two hundred dollars a minute. At that rate, keeping Spear out of prison would cost a thousand dollars.

thousand dollars. Out of the sunshine Mr. Thorn-Out of the sunshine Mr. Thorn-dike stepped into the gloom of an echoing rotunda, shut in on every side, hung by balconies, lit, many stories overhead, by a dirty skylight. The place was damp, the air acrid with the smell of stale tobacco juice, and foul with the presence of juice, and foul with the presence of many unwashed humans. A policeman, chewing stolidly, nodded toward an elevator shaft, and other policemen nodded him further on to the office of the district attorney. There Arnold Thorndike breathed more freely. He was again among his own people. He could not help but appreciate the dramatic qualities of the situation; that the richest man in Wall street should appear in person to plead for a humble and weaker brother. He knew he could not escape recognition, his face was too er brother. He knew he could not escape recognition, his face was too well known, but, he trusted, for the sake of Spear, the reporters would make no display of his visit. With a deprecatory laugh, he explained why he had come. But the outburst of approbation he had anticipated did not follow.

The district attorney ran his finger briskly down a printed card.
"Henry Spear," he exclaimed, "that's your man. Part Three, Judge Fallon. Andrews is in that court." He walked to the door of his private office. "Andrews!" he called.
He introduced an alert, broadshouldered young man of years of much indiscretion and with a charming and inconsequent manner. The district attorney ran his fin-

"Mr. Thorndike is interested" in Henry Spear, coming up for sentence in Part Three this morning. Wants to speak for him, Take him over The district attorney shook hands

quickly, and retreated to his private office. Mr. Andrews took out a cigaret and, as he crossed the floor, "Come with me," he commanded. Somewhat puzzled, slightly annoyed, but enjoying withal the novelty of the environment and the curtness of his reception. Mr. Thorndike followed. He decided that, in his ignorance, he had wasted his own time and that of the prosecuting attorney. He should at once have sent in his card to the judge. As he understood it Mr. Andrews was now derstood it, Mr. Andrews was now conducting him to that dignitary, nd, in a moment, he would be free to return to his own affairs. which were the affairs of two continents. But Mr. Andrews led him to an office, bare and small, and offered him a chair, and handed him a morning newspaper. There were people

clamation. He wanted to protest, but his clear mind showed him that and the situation as it now was forced upon him struck him as amusing. He laughed good-naturedly and reached for the desk telephone.

"May I use this?" he asked. spoke to the Wall street office.

Mr. Andrews, with genial patience, had remained silent. Now he turned upon his visitors. A Levantine. burly, unshaven, and soiled, towered truculently above him. Young Mr. Andrews, with his swivel chair tilted back, his hands clasped behind his head, his cigaret hanging from his lips, regarded the man dispassionately.

"You gotta hell of a nerve to come to see me." he commented cheerfully. To Mr. Thorndike, the form of greeting was novel. So great did it differ from the procedure of his own office, that he listened with interest.

"Was it you," demanded young Andrews, in a puzzled tine, "or your

brother who tried to knife me?" Mr. Thorndike. unaccustomed to cross the pavement to his office unless escorted by bank messengers and plainciothes men, felt the room growing rapidly smaller: the figure of the truculent Greek loomed to heroic proportions. The hand of the banker went vaguely to his chin, and from there fell to his pearl pin, which he hastily covered.

"Get out!" said young Andrews, "and don't show your face here—"
The door slammed upon the flying Greek. Young Andrews swung his swivel chair so that, over his shoulder, he could see Mr. Thorndike. "I don't like his face," he explained.

A kindly eyed, sad woman with a basket on her knee, smiled upon Andrews with the far-illarity of an old acquaintance. "Is that woman going to get a divorce from my son." she asked, "now that he's in trouble?"
"Now that he's in Sing Sing?"
corrected Mr. Andrews. "I hope so!
She deserves it. That son of yours,"
he declared emphatically, "Is no

The brutality shocked Mr. Thorndike. For the woman he felt a thrill of sympathy. but at once saw that of sympathy, but at once saw that it was superfluous. From the secure and lofty heights of motherhood, Mrs. Bernard smiled down upon the assistant district attorney as upon a naughty child. She did not even deign a protest. She continued merely to smile. The smile reminded Thorndike of the smile on the face

===

"That's all right, Joe." called young Mr. Andrews, "he's with me." They entered the court and passed down an aisle to a railed enclosure in which were high oak chairs. Again, in his effort to follow, Mr. Thorndike was halted, but the first tipstaff came to his rescue. "All right." he signalled, "he's with Mr. Andrews."

Mr. Andrews pointed to one of the oak chairs. "You sit there," he commanded, "it's reserved for members of the bar; but it's all right. You're with me."

You're with me."

Distinctly annoyed slightly bewildered, the banker sank between
the arms of a chair. He felt he
had lost his individuality. Andrews had become his sponsor. Because of Andrews he was tolerated.
Because Andrews had a pull he was
permitted to sit as an equal among
police court lawyers. No longer was
he Arnold Thorndike. He was
merely the man "with Mr. Andrews."

Then even Andrews abandoned
him. "The judge'll be here in a
minute now," said the assistant district attorney, and went inside a minute now," said the assistant district attorney, and went inside a railed enclosure in front of the judge's bench. There he greeted another assistant district attorney whose years were those of even greater indiscretion than the years of

Mr. Andrews. Seated on the rail, with their hands in their pockets and their backs turned to Mr. Thorndike they laughed and talked together. This subject of discourse was one Mike

idea was preposterous. No one better than himself knew what his time was really worth.

In half an hour there was a board meeting; later, he was to hold a post-morten on a railroad; at every post-morten on a railroad; at every moment questions were being asked by telegraph; by cable, questions that involved the credit of individuals, of firms, of even the country. And the one man who could answer them was risking untold sums only that he might say a good word for an idle apprentice. Inside the railed enclosure a lawyer was reading a type-written speech. He assured his honor that he must have more time to prepare his case. It was one of honor that he must have more time to prepare his case. It was one of immense importance. The name of a most respectable business house was involved, and a sum of no less than nine hundred dollars. Nine hundred dollars! The contrast struck Mr. Thorndike's sense of humor full in the centre. Unknowingly, he laughed, and found himself as conspicuous as tho he had appeared suddenly in his night clothes. The tipstaffs beat upon the rail, the lawyer he had interrupted uttered an indignant exclamation, Andrews came hurriedly toward him, and the

indignant exclamation. Andrews came hirriedly toward him, and the young judge slowly turned his head.

"Those persons," he said, "who cannot respect the dignity of this court will leave it." As he spoke, with his eyes fixed on those of Mr. Thorndike, the latter saw that the young judge had suddenly recognized him. But the fact of his identity did not cause the frown to relax or the rebuke to halt

Third man from the last." A long line, guarded in front and rear, shuffled into the court room, and as ordered, ranged themselves against the wall. Among them were old men and young boys, well-dressed, clever-looking rascals, collarless tramps, fierce-eyed aliens, smooth-shaven, thin lined. fierce-eyed aliens, smooth-shaven, thin-lipped Broadwayards — and

Spear, his head hanging, with lips white and cheeks ashen, and his eyes heavy with shame. Mr. Thorndike had risen, and in farewell, was holding out his hand farewell, was holding out his name to Andrews. He turned, and across the court room the eyes of the financier and the stenographer met. At the sight of the great man, Spear flushed crimson, and then his look of despair slowly disappeared; and into his eyes there came incredulously hope and gratitude. He turned his head suddenly to the wall.

wall.

Mr. Thorndike stood irresolute, and then sank back into his chair.

The first man in the line was already at 'he railing, and the questions put to him by the judge were being repeated to him by the other assistant district atorney and a court attendant. His muttered answers were in turn repeated to answers were in turn repeated to the judge.

"Says he's married, naturalized citizen, Lutheran Church, die-cutter by profession."

The probation officer, her hands filled with papers, bustled forward

and whispered:

"Mrs. Austin says." continued the district attorney. "she's looked into this case, and asks to have the man turned over to her. He has a wife and three children; has supported them for five years."

"To the wife in count?" the judge.

"Is the wife in court?" the judge A thin, washed-out, pretty wo-man stood up, and clasped her hands in front of her. "Has this man been a good husband to you, madam?" asked the

band to you madam?" asked the young judge.

The woman broke into vehement assurances. No man could have been a better husband. Would she take him back. Indeed she would take him back. She held out her hands as the she would physically drag her husband from the pillory.

The judge bowed toward the probation officer, and she beckened the prisoner to her.

prisoner to her.

Other men followed, and in the fortune of each Mr. Thorndike found himself, to his surprise, taking a personal interest. It was as good as a play. It reminded him of the Sicilians he had seen in London in their little sordid tragedies. don in their little sordid tragedies. Only these actors were appearing in their proper persons in real dramas of a life he did not know, but which appealed to something that had been long untouched long in disuse. It was an uncomfortable sensation that left him restless because, as he appreciated, it needed expression, an outlet. He found this partially in praising, thru Andrews, the young judge who had publicly rebuked him. Mr. Thorndike found him astute, sane; his queries intelligent, his comments just. And this probation officer, she, too, was capable, was she not? Smiling at his interest in what to him was an old story, the younger man nodded.

"I like her looks," whispered the

"I like her looks," whispered the great man. "like her clear eyes and clean skin. She strikes me as able, full of energy, and yet womanly. These men when they come under her charge," he insisted eagerly, "need money to start again,

He spoke anxiously. He believed he had found the clew to his restlessness. It was a desire to help; to be of use to these failures who had fallen and who were being lifted to their feet.

Andrews looked at him curiously.

"Anything you give her," he answered, "would be well invested."
"If you will tell me her name and address?" whispered the banker. He was much given to charity, but it had been perfunctory, it was extended on the advice of his secretary. In helping here, he felt a genial glow of personal pleasure. It was much more satisfactory than giving an Old Master to his pri-

In the rear of the court-room there was a scuffle that caused eveveryone to turn and look.

A man, who had tried to force his way past the tipstaffs, was being violently ejected, and, as he disappeared, he waved a paper toward Mr. Thorndike. The banker recognized him as his chief clerk. Andrews rose anxiously. "That man

drews rose anxiously. "That man wanted to get to you. I'll see what it is. Maybe it's important."

Mr. Thorndike pulled him back.
"Maybe it is." he said dryly.
"But I can't see him now. I'm Slowly the long line of derelicts, of birds of prey, of sorry, weak failures, passed before the seat of judgment. Mr. Thorndike had moved into a chair nearer to the rail, and from time to time made a note upon the back of an envelope. He had forgotten the time or had chosen to disregard it. So great was his interest that he had forgotten the particular derelict he had come to serve.

until Spear stood almost at his el-Thorndike turned eagerly to the udge, and saw that he was listening to a rotund, gray little man with beady, bird-like eyes, who, as he talked, bowed and gesticulated. Behind him stood a younger man, a more modern edition of the other. He also bowed, and, behind gold eyeglasses, smiled ingratiatingly.

The judge nodded, and, leaning forward, for a few moments fixed his eyes upon the prisoner.

his eyes upon the prisoner.

"You are a very fortunate young man." he said. He laid his hand upon a pile of letter. "When you were your own worst enemy, your friends came to help you. These letters speak for you; your employers, whom you robbed, have pleaded with me in your favor. It is urged, in your behalf, that at the time you committed the crime of which you are found guilty, you were intoxicated. In the eyes of the law, that is no excuse. Some men can drink and keep their senses. It appears you cannot. When you drink you are a menace to yourself—and, as is shown by this crime, to the comshown by this crime, to the community, Therefore, you must not drink. In view of the good character to which your friends have testifled, and on the condition that you do not touch liquor, I will not sen-tence you to jail, but will place you

in charge of the probation officer."

The judge leaned back in his chair and beckoned to Mr. Andrews. It was The judge leaned back in his chair and beckoned to Mr. Andrews. It was finished. Spear was free, and from different parts of the court-room people were moving toward the door. Their numbers showed that the friends of the young man had been many. Mr. Thorndike felt a certain twinge of disappointment. Even the the result relieved and pleased him he wished, in bringing it about, he had had some part.

he wished in bringing it about he had had some part.

He begrudged to Isaacs & Sons the credit of having given Spear his liberty. His morning had been wasted. He had neglected his own interests, and in no way assisted those of Spear. He was moving out of the railed enclosure when Andrews called him by name.

railed enclosure when Andrews called him by name.

"His honor," he said impressively, "wishes to speak to you."

The judge leaned over his desk and shook Mr. Thorndike by the hand. Then he made a speech. The speech was about public-spirited citizens who, to the neglect of their own interests, came to assist the ends of justice, and fellow-creatures in misfortune. He purposely spoke in a loud voice, and every one stopped to oud voice, and every one stopped to

"The law, Mr. Thorndike, is not vindictive." he said. "It wishes only to be just. Nor can it be swayed by wealth or political or social influences. But when there is good in a man. I, personally, want to know it, and when gentlemen like yourself, of your standing in this city, come here to speak a good word for a man, we would stultify the purpose of justice if we did not listen. I thank you for coming, and I wish more of our citizens were as unselfish and public-spirited."

It was all quite absurd and most

public-spirited."

It was all quite absurd and most embarrassing, but inwardly Mr. Thorndike glowed with I easure. It was a long time since any one had had the audacity to tell him he had done well. From the friends of Spear there was a ripple of applause, which no tipstaff took it upon himself to suppress, and to the accompaniment of this. Mr. Thorndike walked to the corridor, He was pleased with himself and with his fellowmen. He shook hands with Isaacs Sons, and congratulated them upon their public spirit, and the typewriter firm upon their public spirit. And then he saw Spear standing apart regarding him doubtfully. Spear did not offer his hand, but Mr. Thorndike took it, and shook it, and said: "I want to meet your moand said: "I want to meet your mo-

And when Mrs. Spear tried to stop sobbing long enough to tell him how happy she was, and how grateful, he instead told her what a fine son she had, and that he remembered when Spear used to carry flowers to town for her. And she remembered it, too, and thanked him for the flowers. And he told Spear, when Isaacs & Sans went bankrupt, which at the rate they were giving away their money to the Hebrew Hospital would be very soon, Spear must come back to him. And Isaacs & Sons were back to him. And Isaacs & Sons were delighted at the great man's pleasantry, and afterward repeated it many times, calling upon each other to bear witness, and Spear felt as tho some one had given him a new backbone, and Andrews, who was guiding Thorndike out of the building, was thinking to himself what a great confidence man had been lost when Thorndike became a banker.

The chief clerk and two bank mes-sengers were waiting by the auto-mobile with written calls for help from the office. They pounced upon the banker and almost lifted him into

"There's still time!" panted the chief clerk.

"There is not!" answered Mr. Thorndike. His tone was rebellious defiant. It carried all the authority of a spoiled child of fortune "I've wasted most of this day," he declared. "and I intend to waste the rest of it. Andrews," he called. "jump in, and I'll give you a lunch at Sherry's."

The vigilant protector of the public dashed back into the building. "Wait till I get my hat!" he called. As the two truants rolled up the avenue the spring sunshine warmed them, the sense of duties neglected added zest to their holiday, and "There's still time!" panted the

added zest to their holiday, and young Mr. Andrews laughed aloud.
Mr. Thorndike raised his eyebrows

inquiringly.
"I was wondering," said Andrews, "how much it cost you to keep Spear out of jail?"
"I don't care," said the great man guiltily; "it was worth it."

VICTOR HUGO ON TOYS.

Vigtor Hugo, the great French writer, who was born early in the nineteenth century, once lived on the island of Guernsey, in the English channel. Several manuscript copies of the speeches he made at the dinners which he gave on Christmas Day for the poor children whom he loved and tried to help have just been found there. It was his custom to have a large Christmas been found there. It was his custom to have a large Christmas tree prepared for each party, with a gift on it for each child. How the boys and girls of those days must have loved this great man who did so much to make their lives bright and pleasant! Those who have read the story of little Cosette in his book, "Les Miserables," will not be surprised at the kind words which he expressed in the following address, made at one of the Christmas dinners:

"My Dear Little Children: Among the toys to be given you, you will find neither guns, cannons, swords nor other murderous weapons, nor anything else which might give you an idea of war or destruction. War is an abominable thing. Men of all countries are made for loving, not for killing, one another.

"Among the toys that I offer you the little girls will find dolls—excellent playthings which will com-

lent playthings which will com-mence to fit them for the role of motherhood which they will play later in their lives.

"For the boys there are little boats, little locomotives, and, in fact, everything which will present the idea of work and progress, and not that of destruction to their intelli-

Experiments have shown that the addition of certain other metals to iron will produce alloys that resist the corrosive action of the atmosphere much better than the pure iron. Nickel and copper gave the best results, but the former, on account of its cost. Is not practical. Only a very small amount of copper is necessary to produce the desired result and prevent rust.

waiting in the room; strange people, only like those Mr. Thorndike had seen on ferry-boats. They leaned forward toward young Mr. Andrews, fawning, their eyes wide with appre-"The judge leaned over the bench and shook Mr. Thorndyke's hand." Mr. Thorndike refused the newspaper. "I thought I was going to see the judge," he suggested. "Court doesn't open for a few minutes yet," said the assistant disa mother in a painting by Murilla had Corns

trict attorney. "Judge is always anyway." Mr. Thorndike suppressed an ex-

there was nothing against which, with reason, he could protest. He could not complain because these people were not apparently aware of the sacrifice he was making. He had come among them to perform a kindly act. He recognized that he must not stultify it by a show of irritation. He had precipitated himself into a game of which he did not know the rules. That was all. Next time he would know better. Next time he would send a clerk. But he was not without a sense of humor,

explained he would be a few min-utes late. He directed what should be done if the larket opened in a certain way. The gave rapid orders on many different matters, asked to have read to him a cablegram he expected from Petersburg, and one

Donlin, as he appeared in vaude-To Mr. Thorndike it was evident

he had lately presented to the chapel in the college he had given to his native town.

"That son of yours," repeated young Andrews. "is a leech. He's robbed you, robbed his wife. Best thing I ever did for you was to send him up the river." The mother smiled upon him be-

seechingly. "Could you give me a pass?" she Young Andrews flung up his hands and appealed to Thorndike.

"Isn't that just like a mother?"
he protested. "That son of hers has broken her heart, tramped on her, cheated her; hasn't left her a cent; and she comes to me for a page 30. and she comes to me for a pass, so she can kiss him thru the bars! And

I'll bet she's got a cake for him in hat basket!"
The mother laughed happily; she that basket!' knew now she would gef the pass.
"Mothers," explained Mr. Andrews, from the depths of his wisdom, "are from the depths of his wisdom, "are all like that; your mother, my mother. If you went to jail, your mother would be just like that."

Mr. Thorndike bowed his head politely. He had never considered going to jail, or whether, if he did, his mother would bring him cake in a basket. Apparently there were many aspects and accidents of life not included in his experience.

Young Andrews sprang to his feet,

Young Andrews sprang to his feet, and, with the force of a hose flush-

and, with the force of a nose flushing a gutter, swept his soiled visitors into the hall.

"Come on!" he called to the Wisest Man. "the court is open."

In the corridors were many people and with his eyes on the broad shoulders of the assistant district shoulders of the assistant district attorney, Thorndike pushed his way thru them. The people who blocked his progress were of the class unknown to him. Their looks were anxious. furtive, miserable. They stodd in little groups, listening anxious. furtive, miserable. They stodd in little groups, listening eagerly to a sharp-faced lawyer, or, in sullen despair, eyeing each other. At a door a tipstaff laid his hand roughly on the arms of Mr. Thorn-dike.

that young Andrews had

"Sit down!" whispered Andrews.

forgotten him. He arose, and touched his sleeve. With infinite sar-casm Mr. Thorndike began: "My engagements are not pressing, A court attendant beat with his palm upon the rail.

"The judge is coming."
Mr. Thorndike sat down. The court attendant droned loudly words Mr. Thorndike could not distinguish. There was a rustle of silk, and from a door behind him the judge stalked past. He was a young man, the type of the Tammany politician. On his shrewd, alert, Irish-American features was an expression of unnatural gloom. With a smile, Mr. Thorndike observed that it was as little suited served that it was as little sured to the countenance of the young judge as was the robe to his shoulders. Mr. Thorndike was still smiling when young Andrews leaned over the rail.

"Stand up!" he hissed. Mr. Thorndike tread up!

dike stood up. After the court attendant had uttered more unintelligible words, ev-eryone sat down; and the financier again moved hurriedly to the rail.
"I would like to speak to him now

before he begins," he whispered. "I can't wait." Mr. Andrews stared in amazement.
The banker had not believed the young man could look so serious.

"Speak to him, now!" exclaimed the district attorney. "You've got to wait till your man comes up. If you speak to the judge, now—" The voice of Andrews faded away in

offended, but convinced that it was only by the grace of Andrews he had escaped a dungeon, Mr. Thorn-dike retreated to his arm, chair.

The clock on the wall showed him that, already, he had given to young Spear one hour and a quarter. The

unuttered. In even, icy tones the judge continued: "And it is well they should re-member that the law is no respector persons, and that the dignity of this court will be enforced, no matter who the offender may happen

Andrews slipped into the chair beside Mr. Thorndike, and grinned sympathetically.
"Sorry!" he whispered. "Should have warned you. We won't be long now." he added encouragingly. "As soon as this fellow finishes his argument, the judge'll take up the sentences. Your man seems to have other friends: Isaacs & Sons are here, and the typewriter firm who taught him; but what you say will help most. It won't be more than a couple of hours now."
"A couple of hours!" Mr. Thorndike raged inwardly. A couple of hours in this place, where he had been publicly humiliated. He smiled, a thin, shark-like smile. Those

who made it their business to study his expressions, on seeing it, would have fled. Young Andrews, not being acquainted with the moods of the great man, added cheerfully: "By I o'clock, anyway."
Mr. Thorndike began grimly to pull on his gloves. For all he cared now young Spear could go hang. Andrews nudged his elbow.

"See that old lady in the front row?" he whispered. "That's Mrs. Spear. What did I tell you? mothers are all alike. She's not tak-'By 1 o'clock, anyway."

thers are all alike. She's not taken her eyes off you since court opened. She knows you're her one best bet." Impatiently Mr. Thorndike raised his head. He saw a little whitehaired woman who stared at him. In her eyes was the same look he had seen in the eyes of men who, at times of panic, fied to him, beseech-

fortunes, if only he would save their honor. "And here comes the prisoners," Andrews whispered. * "See Spear?

Stories By Readers About the Sunday World

By Children Under Twelve

These stories are the best submitted on "The Sunday World." They were written by children under twelve years of age. Last Sunday those childern of twelve and over who wrote the best stories about "The Sunday World," had the pleasure of seeing their stories in print, but by mistake the heading said they were written by children under twelve.

The Sunday World. First Prize Story.
The Sunday World is a paper published in the City of Toronto and is distributed to every house on Sun-

Well, I live out in the country, and my uncle lives in Toronto, and I have been a reader of The Sunday World for three years. He sends it to me every week. It is such an interesting paper. I just long for the day to come when 'l get it and I can hardly wait till I open it. First of all I strike for the comics. I couldn't live without seeing them. The printer knows what pleases little girls like me. I read them over and over again and then my mother looks at them.

I have all the comics I have got during the three years except some that have got torn and when I have nothing else to do I take them out and read them all. Then, I get the

and read them all. Then, I get the page entitled "Children's Hour." I love to read about the children who have won the Smiling Face Button and about John, and the Dog, Mutt. John must be a very bad boy. I think he deserves a licking.

Of course, I glance over the rest of the paper, but it is not interesting at all. But the rest say, "That is where all the news is." I know a few sections of The Sunday World. I will name them: First, Comic Section; second, Pictorial Section; Editorial Section; Magazine Section.

All the children in my school always say, "Oh, let us see the comics and I will like you." So I let them see them. Everyone enjoys reading it. Well, I guess this is all I know about The Sunday World, only I wish they always will continue

only I wish they always will continue publishing it. Written by Eleanor Barbey,

Victoria Road, Ont Box 21.

Major.

Second Prize Story.

Well! it is easy enough to begin this story because it is firmly impressed on my mind. It was in the winter of 1912. Our home is in Muskoka and I have heard my daddy say that we are over two thousand feet higher up in the air than our little friends in the city. Our household consists of five people; there hold consists of five people; there is grandad, grandma, my daddy, and mother, brother Frankie and my-self. I am called Normie. We have two cows and three horses besides lots of chickens and one of the nicest collie dogs you ever knew. We call him Major and as this story has to do with him mostly, you will agree with me that he quite deserves his name. Now, Brother Frankie is our mail carrier and he rides to Port Anna H. Appleban, Bennie Appleban, Ida Appleban, 185 Arthur st.
Etta Hawes, Adeline Hawes, Or-Sydney twice a week on old black Kate and up in that part of the Kate and up in that part of the country, as you must know, the snow reaches to the top of the fence and it is very hard semetimes for us to get down to Port Sydney for our mail. Now, Grandpa used to live in Toronto and he likes to get all the news from the city and this time I am speaking of he looked forward each week to the coming of a very popular newspaper and Monday was the day for Frankie's trip to the postoffice. The snow was three feet the day for Frankle's trip to the postoffice. The snow was three feet deep, the postoffice was four and ahalf miles away, and it was still snowing. Grandma has daughters living in the city but she was the first one to raise any objection to Frankle making the trip on such a

Frankie making the trip on such a day as it was. Of course we all agreed with Grandma and said so; Grandad did not say anything but went upstairs to his own room and we know he was wishing for his Henry Cassels, 14 years, Bond we knew he was wishing for his favorite paper. Frankie loves his grandad, as we What Jackie Found in His Stocking. Jackie's father came home on Wednesday looking very sad. "What all do, so he said he would be able to make the trip all right, and he talked is the matter my dear?" said his wife. "The manager of our firm in such a brave and determined way that we did not have the heart to has a new salesman and doesn't turn him against his purpose. So mother got him ready while daddy saddled old Kate and we all went out need me," was the answer. Saturday soon came and Jackie asked his other if he could get The Sunday to the gate to see him off. I knew "I'm afraid not," said she. mother was anxious about him tho "We havn't much money now." This she did not say very much, but I knew was sad news for Jackie as he enthat old Katie was a strong, faithful old beast and Frankie was a joyed Twins very much.
At last it was the happy Christmas eve., and Jackie hung up his stocking hoping that Santa visit him that night. Jackie woke very early the next morning and ran down stairs to see what Santa had brought him, but to his disappoint-

good rider for a boy, and so when the time came to expect him I put on my stocking cap and coat and wad-ed out to the big gate to meet him and Major came too. It had stopped snowing then. Major gave a bark as we neared the road and ment he found his stocking just as off he went like a shot down the road. Presently I heard Frankie's But Jackie did not cry because welcome voice encouraging Kate to get up, and pretty soon he came up to the gate and I could tell there he was a member of the Smiling to the gate and I could tell there was something wrong when I saw his face. We walked up to the house in silence and mother come to greet her boy and she too saw that something was wrong. Mother looked at Frankie and then at his mailbag and then we understood he had lost grandna's paper. I believe that When Jackie went to put on his stocking he felt something hard in the toe. He looked in, and what do you think he found? Why! \$2.50, with a card saying "with love from the S. F. Club." "Just what I wanted," cried Jackie, "I shall just have enough to lost grandpa's paper. I believe that buy The Sunday World for a year."
Helen Belton, if he had been a girl, like me, he would have cried, but mother has good ideas and this time she called 95 Walmer Rd., City. good ideas and this time she called Major to her and Major answered with a bark. She put her arms around his neck and said, "Major, my good dog, try to understand me, Frankie has lost The Sunday World good Major doggie," and, pointing down the road, said, "Will you go and find it for me," and to this day I really believe he understood every word she said, for off he went as hard as he could go and in about fifteen minutes back he came with a long parcel in his mouth and, joy of joys, it was The Sunday World.

> supper that hight. We were all glad, Frankie and I especially, for we are very fond of the comic pic-tures and the Children's Hour, but grandpa declares the whole paper is Miss T. N. Pryce, Clinton street, city.

> of joys, it war The Sunday World, and you can wager Major got a good supper that night. We were all

ing for her father to bring home The Sunday World to see if the Smiling Face Club list had her name in it. At last her father came. She took the paper. First thing she turned

Ruth was excited. She was wait-

over the pages and at last came to "The Children's Hour." She smiled, while her busy eyes ran down the column. At last she saw near the end her very own name. At this she was overjoved.

She turned to the picture part and, looking over it, who should she see but her own dear wee cousin. She ran and showed her mother and her mother was very pleased.

mother was very pleased.

Ruth cut the picture out and put it in one of the little frames she had made at the kindergarten. She then hung it in her little room and when ever she sees it she always thinks of The Sunday World.

Yours Very Sincerely.

Yours Very Sincerely, Reta Brad, 7e 11. 55 Hazelton avenue. P. S.: A member of the Smiling Face Ciub.

Six stories deserving special mention, written by "Hour" readers.

Toronto, Dec. 21, 1913. Once upon a time there was a dog, and its master was very old. One day the dog disappeared and did not return for two or three days, but when it did come it was foot-sore and weary, and in its mouth was The Toronto Sunday World. It lay down at the master's feet panting and exhausted, for it had tramped for miles, and must have stolen The Toronto Sunday World from a news boys' stand. Lillian Hammond, 30 Scollard St. Age, 11 years.

Toronto. Plenty, Sask. Tommy.

There was once a lady who lived out on the prairie. She had a little boy; his name was Tommy.

One evening little Tommy wasn't feeling very well. When his father came home he brought The Sunday World with him. Tommy's mother always read to him, but Tommy didn't want to hear it that night. mother read to him about Question Mark and Turvey; also about the Twins and their Dog Mutt.

They would look at the Comic Tommy liked to look at Buster Brown, and the mischief he

Myrtle Brennan, 11 years, 102 Dundas street.

years old he joined the Smiling Face Club; he got a button and wore it all the time. When other children saw it they joined the Smiling Face Club, too; some of them would draw and send their work in to The Sun-

day World.

He would read little stories to his mother. She often said she was glad Tommy belonged to the Smiling Face Club, because he is such a jolly little fellow now.

Composed and written by Age, 10 years. Lillian E. Carlson. Jimmy And The Twins.

Little Jimmy's mother said: "Jimmy, I want you to get a paper from the little newsboy round the

"Oh, goody!" said Jimmy, "I know

which paper I'm going to buy, and he was off like a shot. When he got there he spotted the little boy in a minute, and asked him for a Sunday World, and with a merry twinkle in his eye the boy gave one Jimmy. When he brought it home he gave one half to his mother and kept the other half for himself. Now, why do you suppose he did

Why! the one half which he had had The Children's Hour in it. Atho little Jinimy is only five years old he can read, and his mother and he both smiled as they read about the funny pranks of the rins, and about Question Mark and Turvey.

His Ma and Pa both enjoy reading the other parts of the paper, too.
One day as Jimmy was playing out in the street with his friends, two boys who looked very much like niggers came along all covered with

Of course, as everybody knows, Jimmy is a very inquisitive boy, and As I was saying before, he went

why they were covered with soot.
They told him that they were The Twins of the Children's Hour. Then John told him that on Christmas Eve., when Santa Claus was on the roof of their house, they climbed into the chimney to see what they

were to get.

They got a licking and a few more things.

Then they showed Jimmy an S.F.C. button and said:

"Don't you see Who are we? We are The Twins Of the S.F.C." And then they both walked away

By Hannah Cohen, 37½ Oxford St., City.

Toronto, Ont., December 22, 1913.
Every Saturday night I am waiting for seven o'clock to appear, for The Sunday World is usually out at that time. I do not wait for Sunday to come to look at it, for I usually look at it on Saturday night. I only wish that it would appear earlier, for usually I am waiting for it.

My two favorites are the Comic Section and The Children's Hour. Of the comics I only loved that of Their Only Child, Happy Hooligan, and Howson Lotts. Now I love Dimples, Buster Brown and Clumsy Claud, as he generally does more harm than help. Mrs. Timekiller has a lovely name for every time she kills her husband, or in some way she makes a fool of him, and of The Children's Hour; it is all nice. There are a few more things I like, but the rest are not for me, and I do not bother my head much about,

I am eleven years of age. I remain your sincerely, Rose Gianvecchio, 187 York St., Toronto.

The Delivery Boy.

Tom Wilson lived with his mother and sister Florence in the City of Orkton. He was a delivery boy for Jackson Jackson's. They were the only good storekeepers in the city. One day just before Xmas Mr. Jackson told Tom to go to Squire Lent's, about five miles away. Tom was very cold going, as the wind Lent's, about five miles away. Tom was very cold going, as the wind was in his face. However, he reached the squires house in a short time. Mr. Lent was in, and gave Tom \$5.00 for a Xmas present, at which Tom was overjoyed. He bought The Evening Sun, and looked

for a place for his mother, as they were very poor. His mother got a place as cook at a large house. On Christmas they ordered The Toronto Sunday World for a year. And the family started the New Year in Lappiness all thru a loving boy.

sent you a poem starting with "Dear little flowers so sweet," etc., for which I wish to thank you very much for printing. Following is my new "Jean's Visit to Fairyland."

Once upon a time when Jean was put to bed she had no idea of going to sleep, so she got up and went to the window and looked out and then sighed: "Oh, dear! How I should like to go. I really must go, for I am signed.

like to go. I really must go, for I am sure there is such a place in the world or people would never be able to tell fairy tales." "Quite right, why don't you go." said a voice behind her. She turned to see a little man no higher than her knee. His body was made of a bean, his head of a pea, his legs and arms of toothpicks. "Oh!" said Jean, a little frightened. "I don't know the way." "Why, all you have to do is follow the soft green moss till you get to a grove of rose trees where they dance." "I of rose trees where they dance." "I believe I'll try right away." said Jean. So, taking the ladder which the little man had given her, she got

out of the window and down the ladder and into the woods
"Please sir," asked Jean, would you mind telling me your name?"
"It's Rumplestiltzkin," said the lit-

At last they came to the most At last they came to the most beautiful of rose trees. The roses they bore were as large as your head. From inside came a sound of music and a clatter of dishes. On they went, and what do you think they saw? Why, a big toad stool covered with leaves of dew. Rumplestitzkin led Jean up to the toad stools and gave her a leaf. She drank the dew, and then jointd in the dance. When it was finished one of the fairies said she would have to go, as it was near time for the sun rising. was near time for the sun rising. She asked the fairy how she would get home? The fairy took up the get home? The fairy took up the golden horn that hung at his side, blew a blast on it, and up came a winged monkey and carried her home before she could say Jack Robinson. In a few minutes Jean jumped into bed, exclaiming, "Rless my buttons, it's half-past five! I had better get to sleep before nurse catches me up." And in a few minutes Jean was in and in a few minutes Jean was in

TEIGST-AND UREATEST WEST

Richer Than the Mississippi Basin is the Empire Which Canada is Almost Ready to Throw Open to the Whole World===The Mackenzie River Valley.

Into the newly-opened plains of vast open prairie, may be considered arable land. There are 200,000 square miles of heavily timbered South Western Siberia two million immigrants are yearly pouring.

Canada's turn is next. It comes with the opening of the "barren lands" of the valley of the Mackenzie. The same world position, the same climate, a richer soil, await the millions who will be drawn to this silent empire.

Canada stands where stood the United States before the peopling of the fertile valley of the Mississippi. To acquaint Canadians with their destiny, The Sunday World today begins a series of articles. The spectacular mineral wealth of this billion acre area, the breeding place of a new generation of Canadian millionaires, comes first.

I am the land that listens, I am the authentic information that what was land that broods; regarded as a mere Arctic waste is Steeped in eternal beauty, crystalline waters and woods. Long have I waited lonely, shunned

as a thing accursed, Monstrous, moody, pathetic, the last of the lands and the first; Visioning camp-fires at twilight, sad with a longing forlorn.

Feeling my womb over-pregnant with the seed of cities unborn. Wild and wide are my berders, stern as death is my sway; And I wait for the men who will

But I will not be won in a day.

By D. J. Benham. Stretching away for over 2000 miles beyond the furthest flung frontier of organized settlement in Canada lies a vast, virgin land—an empire—practically unexplored and un-known, and yet capable of produc-ing food sufficient to feed a popu-lation of 500,000,000 people. This may seem incredible at this stage of the world's development but it is true world's development, but it is true. It is a land richly endowed with natural resources of the greatest economic value; a land where there with a climate conducive to the production of the finest grades of cereals and small fruits; vast timber reaches: illimitable fisheries: the world's greatest fur-producing re-serve; and a remarkable diversity of minerals, including gold, silver, platinum, iron, coal, petroleum, salt. copper, mica, asphalt, sulphur, saltpetre, red ochre, porcelain clay, gypsum, vitreous sands, plumbago, and probably nickel. This is the great hinterland of northwestern Canada, comprising all the territory between the Hudson's Bay and the Rocky Mountains, and the Saskatchewan River on the south to

the Arctic Ocean on the north. For two and a half centuries glamor of romantic interest been attached to it, as thru-out that long period it has been indissolubly linked with the fur trade, and that gigantic, rich, mysterious corporation, the Hudson's Bay Company. It, too, has been a land of mystery, shunned and abandoned by all save the agents of the fur trade, and a few adventurous spirits such as are always found at the edge of things. Its vastness and remoteness have effectually barred the way to a comprehensive the world in ignorance as to its actions. Thus has it been allowed to remain practically a terra incognita, under the popular misconception that it is only an uninhabitable, barren, ice-bound region—"the great white silence" — adapted only to the purposes of a perpetual fur-producing

A Fertile Land

Larger Than Australia

Never was a popular conception ore at variance with actual facts. It has been entirely dissipated during the past few years, during which time it has been established by regarded as a mere Arctic waste is in reality a land of marvelously diversified natural resources, and so pregnant with possibilities for development as to almost stagger the imagination — a land with an assured ultimate destiny as one of the greatest agricultural and mineral and timber producing regions of this and timber producing regions of this continent, if not of the entire world. But Canadians have been too busy developing the more accessible portions of their country to devote any attention to the heritage with which they have been endowed for future generations in this vast hinterland However, one cannot but wonder that such resources as abound in the

northland have been allowed to lie so long absolutely latent, or that at least a general knowledge of them has not been disseminated.

It is 125 years since Mackenzie discovered the great river of the north which hears its name but strange to which bears its name, bht, strange to say, up to the present time this country has failed to profit by the discovery of that mighty waterway, by which it is possible to link Edmonton with Vancouver virtually by water, or to add materially to the knowledge of the great lone land prises an area larger than the entire continent of Australia, and equal to two-thirds of Europe, inequal to two-thirds of Danyay, cluding the British Isles, Norway, Sweden, Denmark, Germany, Austria, part of France and Russia in extent of teritory, arable land, pastoral areas, and navigable waters, and in the value of timber, mineral and fisheries; while in capacity to support population it exceeds European region referred to.

Amazon Is This River's Only Peer

Think of one river draining such a vast and wealthy expanse of terri-tory and yet being practically un-mapped and generally unknown! Every Canadian child at school is drilled on every river of importance

in Europe, Asia and Africa, yet not one in twenty of them is aware of the fact that the noble Mackenzie, with its 2750 miles of navigable waters, leading into 4000 miles of lake coast, is a greater river than any in those three continents; that it much wider and deeper than the St. Lawrence; longer and more expansive than the Mississippi; and of all the rivers of the world the Amazon is its only peer. Neither have they been given any idea of the character and resources of its tributary regions in which, according to a report submitted to the Canadian senate by the Schultz committe, there is an estimated area of 656,000 square miles (408,840,000 acres) suited to the growing of potatoes; 407,000 square miles adapted to the growing of barley; and 316.-000 square miles (202,240,000 acres) adapted to the production of wheat There is a pastoral area of 860,000 square miles, of which 26,000 square miles is open prairie with occasional groves, the remainder being more or less wooded, but of it

country, all exclusive of that area within the Arctic circle known as the Barren Lands, and comprising 400,000 square miles.
Of course, much of the vast area

has yet to be explored and the character and resources have to be unfolded to the world. Hitherto, for the only authentic information concerning it. Canadians have been largely indebted to the intelligent observations of the Hudson's Bay Company officials, missionaries, and mounted police; but these have been more or less restricted in their scope, being largely confined to the watercourses and lake coasts, with only a general knowledge of the adjacent territory. Certain sections have been comparatively well explored by Dominion government geologists, botanists and surveyors, much valuable information having her collected they these sources as early as 25 years ago; but only from a very insignificant portion or percentage of the entire hinterland. percentage of the entire hinterland.
The reason for this is found in the lack of adequate transportation facilities, and the great distance from a base of supplies which have been considered sufficient to make the exploration work difficult, if not actually impossible.

Settlers Going in and Railways Are Following

However, within the past few years, the unrivalled wheat lands of the great Peace River valley, which comprises a portion of the Mac-kenzie basin, and in which there are 100,000,000 acres admirably adapted to agriculture, including the wooded areas to be cleared, have awakened a keen, world-wide interest in this northland, which has been accentuated by the discovery of petroleum and asphalt of a high grade. Settlers are now pouring in-leaving the transportation difficulties to solve themselves, intent only on securing a choice of the desirable lands available. The railroads are fully alive to the situation, and all the big trunk lines are preparing to they can lay the steel. Thus inaccessibility of the countrychief detriment to its exploration and development-will shortly be a thing of the past; and it will be possible to convey supplies from any railway point beyond the Athabasca River to any part of the great northern wilderness quickly and cheaply by utilizing its unrivalled system of waterways. Systematic exploration must certainly follow this opening of be anticipated that the result will astonish the world, especially in the revelation of mineral wealth.

Gold to Be Found

In Many Places

For years it was argued by geologists that none of the valuable met-als existed on the east slope of the Rockies, but that all deposits of such existed on the Pacific slope, where there is a metalliferous area thirteen hundred miles in length by an average width of 500 miles, goldbearing rocks predominating. This area is much larger than the corresponding mining region of the United States; but the geologists erred in their supposition that the western slope had a monopoly of these valuable minerals. The cursory exploration of the Mackenzie valley conducted by the Schultz committee in 1888, revealed the fect that there is an auriferous area along the head-waters of the Peace, Liard and Peel rivers of an estimated extent of 150,000 to 200,000 square miles. There is another area along the west coast of the Hudson Bay, but its extent or value is unknown. Gold has also been found in certain sections of the Barren Lands; but it is in the head-waters of the Peace and Liard rivers that the richest fields are looked for, inasmuch as the sands of these rivers are comparatively rich in the prelous metal. Silver has also been found in

paying quantities in the territor; ributary to the upper Liard and Peace rivers. Very little is known, however, of the extent of the deposits or the character of the rocks.

Enough Coal to Serve All Canada

Semi-bituminous and lignite coals seem to be indigenous to the entire north country. The latter is found everywhere almost, and for the most part is of a very high grade. There is no longer room for the slightest doubt that the great coal areas of Alberta and Saskatchewan extend right thru to the coast of the Arctic Ocean. Thruout the Peace River Valley, and along the lower Mac kenzie, and to the west of the mouth of that river coal of an excellent grade is frequently met with, the outcropping indicating deposits of great extent and richness. In some places these coal deposits have been burning for years, and are still being ravaged by subterranean fires un-checked and uncared for, as they

have for ages past.

Near Hudson's Hope, just west of the big rapids on the Peace River there is a very fine deposit of anthracite or semi-anthracite, and further west in the foothills there are seams of hituminaus coal of a very superof bituminous coal of a very superior grade. Excellent lignite for domestic and steam purposes is found along the South Pine River and its branches, and east thereof along the

homestead reserve Coal also exists in large quantities around Lesser Slave Lake, while in the country tributary to the Mac-leod and Pembina Rivers, both tri-butaries of the Athabasca River, some of the richest coal fields of the continent have been discovered. On the Pembina there are seams exposed showing a thickness of fourteen feet, and of unknown depth, tho in one place the out-cropping shows from near the top of the bank to the water 180 feet below.

There is enough coal in that great centuries, for in addition to following the valley of the Mackenzie to the Arctic coast, the fields also extend easterly to the Hudson Bay, thruout thousands of square miles of territory. Rev. Father Pettitot, a Jesuit missionary, who is a clever and experienced geologist, and one familiar with all that vast region in a general way, tells us that he has been informed by the Esquimaux that there are great tertiary deposits to the west of Cape Bathurst which have been burning for years just as have those further west pre-viously referred to. The same phenomena have been noted by the natives in several other places the east of the mouth of the Mackenzie many hundreds of miles, Rev. Father Pettitot is of the opinion, however, that some of these subterranean fires in that locality may possibly be of volcanic origin Fires Burning in

Coal Fields Centuries

Near Fort Norman there is a lignite field which was on fire whe Mackenzie discovered the river, and which has been burning steadily ever since, and for how long before no one may even venture an esti-mate. Describing this area Rev. Father Pettitot says:—"Six miles above Fort Norman, and for an extent of eight or ten miles, the Mackenzie is bounded on the right bank by a precipice which reaches at first 150 feet in height, and gradually di-minishes in height to thirty feet. It is a vast tertiary deposit composed of alternate stratifications of variable schist, lignite, pipe-clay and vegetable mould. The schists are in a state of combustion, winter and summer; but the subterranean fire, stinking of bitumen, is intermittent and breaks out sometimes at one point and sometimes at another. It is not always visible on the surface, "The soil is very hot, damp and

movable in the vicinity of these smoke holes. Walking is obstructed by heaps of volcanic earth and puz-The pipe-clay has been roasted by the subterranean fires and transformed into brick. It conains, or rather is nothing but an immense mass of leaves of trees, the paremchyma of which has been destroyed; but the fibres and all the liniments appear upon the thin bed of clay which covers them in such a way as to resemble impressions. Geologists cannot fail to find an interesting field there.

"Porcelain clay, red ochre, and asphalt hardened by the action of water are also to be remarked there in great quantities." Vast Salt Mines

The existence of salt in large quantities all along the Athabasca and Mackenzie Rivers has been well known to the fur traders and the Indians since the very earliest re-cords available; but it was only

quite recently that the vastness of some of these deposits was proven

gion." One of these sait fields is said to be 300 miles by 600 miles in ex-tent, and the beds are of immense thickness and superb quality. What is believed to be the finest salt in the world, exceeding even the fam-ous brands of continental Europe, is found at Salt River, on the Slave is found at Salt River, on the Slave River, where there is a mountain of it Around the base of this mountain there are almost innumerable springs, the salt of which crystallizes during the winter, and in the spring it is possible to gather it in any quantity desired, and of a natural quality which makes it the peer of any produced in the world. Only a short distance from these springs rock salt is found in great layers only a few inches under the ground. It is found in many other places in that section of the country, and the deposits are commonly supand the deposits are commonly sup-posed to cover vast areas; and at any rate they are sufficiently ex-tensive to supply the world with salt

for many ages to come were trans-portation facilities available. His Grace Bishop Clut, one of the pioneer missionaries of the north, and one of the greatest authorities

concerning that portion of the country, stated that he used this salt on his table during his residence in the north, just as nature had crystallized it and purified it at the springs; and it was equally as good as any salt which had ever been placed before him in Canada been placed before him in Canada or Europe.

The sait has been used at all the Hudson Bay Company posts thruout the Mackenzie River country ever since they were established there.

Great Iron Deposits

On the right bank of the Macket zie River opposite Fort Good Hope where there are natural ramparts of limestone, large deposits of hems tite have/been found; also sulphate of iron and sulphate of magnesia. Iron is found in many other places, but chiefly around Lake Athabasca and Great Slave Lake.

Alum also constantly exudes from issures in the rocks at this point, and red ochre is present also in

large quantities, Further down the river at "The Second Ramparts," or "The Nar-rows," as it is called by the river travelers, the limestone banks exude alum and saltpetre.

Fine Sulphur Springs

Along the Clearwater River which is a tributary of the Athabasca, there are a number of very fine sulphur springs, and the these are found in many parts of the country the ones on the Clearwater are the finest and most powerful. The odor from them is said to be so strong at certain seasons of the year that when travelers are passing they are obliged to hold their noses to being suffocated by the

and Robert Courtney, tenor, will assist in the program, which promises to be of unusual excellence.

Lilli Lehmann has given 200,000 kronen to the new temple of music to be opened in honor of Mozart in Salzburg next August. The inaugural ceremonies will extend over a period of ten days and the first performance will be devoted to the sacred works of the composer, Lilli Lehmann singing the master's great "Hallelujah." The Vienna Philharmonic Orchestra, under Nikisch and Muck, will demonstrate in its program the "Evolution of Symphomic Music on Austrian Soil," from Bruckner to the present day. Mozart's three great symphonies will be feature of the festival.

Jacques Coini, who has directed the stages of many important opera houses in Europe, will, next season, alternate as artistic director between the Century Opera and the Metropolitan.

privilege to study with a good master, but it is happiness to study with a teacher who has unbounded enthusiasm and magnetism. Professor Hambourg's extraordinary gift as a pedagogue can only be fully appreciated by those who have been his pupils. His teaching leaves an indelible and everlasting impression. Nothing can be more interesting than watching the professor giving a lesson to an advanced pupil. The characteristic figure paces the room, now stopping to give some luminous explanation, now inning with lightning fingers over the keys. His lessons consists of as many varied explanations as there are notes in the composition. Now he sings a passage with the expression the composer intended, now it is his want to illustrate some orchestra color

Mr. Atherton Furlong Corrects Impression

Editor The Sunday World:-Re ferring to an item in your issue of ast Sunday, the 1st inst., headed "Opera Directors Praises Voice of Toronto Singer," I wish to correct the impression implied therein that two of the singers mentioned Signor Caruso and Mme. Edith Walsh are pupils of Otto Morando, and that their favorable showing before Mr. Theodore Bauer, director of the National Opera Company of Canada is due to other tuition than mine. Both Signor Caruso and Mme. Walsh have been The widow of Edvard Grieg has been in Berlin supervising rehearsals of the Grieg music to be used in the first production at the Berlin Royal Theatre of Ibsen's "Peer Gynt."

Caruso and Mine. Waish nave been and are now being taught and being introduced to the Toronto public solely by myself, and it is scarcely fair to me to infer or imply that they have been trained by someone else. As regards Miss Marjorie Dennis, the As regards Miss Marjorie Dennis, the third of the four young people men-tioned in the article, altho she is not now under my tutelage, the greater part of her training, or for three and A number of Maud Kennedy's pupils whole musical career was under my one half years was with me, and her direction and thru my pecuniary assistance. To the hosts of musicians in England and Toronto, those who heard her here when I brought her out at Forester's Hall, on May 4, 1912,

I am very truly yours, Atherton Furlong.

MENDELSSOHN CHOIR ENGLAND TO HAVE **AGAIN TRIUMPHANT** ITS OWN BAYREUTH

Plan to Erect Theatre at Glastonbury, Where Arthurian Legend May Be Preserved.

England's reverence for the Arthurian legend threatens to outrival that of Germany for the great music drama of Wagner. A scheme, which is intended to be national, is already outlined for the erection of a theatre at

An organization known as The Music League, has been established in New York with a capital of \$50,000 its aim being to aid young artists by securing engagements for them, at the game time protecting them from the agents who charge exorbitant fees for their exploitation. The founders are wealthy society women, including: Mrs. E. Harriman, Mrs. Otto Kahn, wife of the chairman of the Metropoliwife of the chairman of the Metropolitan Opera Company; Mrs. Ogden Mills Reid and Mrs. Willard Straight. The formation of the league is not only for the benefit of young artists, but even those of established reputation are often victims of unscrupulous man-agers, and all may have the protec-tion of those acquainted with condi-tions both in America and Europe. The hew organization will exact a ten per cent, commission on engagements se-cured by it, and it is thought that the innovation will prove most welcome and beneficial.

SCHUBERT CHOIR'S SPLENDID PROGRAM

The splendid program of choral works, male cheruses, ladies' choruses, orchestral selections, and solos by the brilliant coloratura prima donna Mme. de Pasquali, at the concert of the Schubert Choir in Massey Hall will

of the Continent.

audiences, representative of the mutered to be national, is already outlined for the erection of a theatre at diastonbury, where the Arthurian Legend may be preserved for the nation and for the rest of the world. Glastonbury is supposed to be the centre of that mythical land where Arthur and his knights performed their deeds of valor, and it is there that those deeds are to be perpetuated in a cycle of musical dramas, the first of which has already been completed, and is entitled "The Birth of Arthur." The scheme is meeting with the support of the influential people of the land. Thomas Beecham, with characteristic generosity, has placed his orchestra at the service of those who are most interested in the movement.

The Steinbach Piano

A Remarkable Piano for \$275.00

It's an instrument on which there is expended more ability, more skill, and better Piano craftmanship, to say nothing of better materials, than on ANY of the best-known Pianos at its price, an instrument wrought out with the idea that time is the enemy of everything mediocre: Built to give lasting satisfaction, while selling at a figure lower than a worth-while Piano has ever been sold, and on terms to suit the reasonable convenience of the purchaser.

The Steinbach Piano is specially made to our own specifications. Tone is mellow and sweet, and of far greater singing quality than you expect to find it. New, plain Colonial design. It comes in mahogany case, high-polish or satin-finish, also in handsome—mission case, fumed or weathered-oak finish. "Most remarkable and best piane value in Canada" cannot carry as strong conviction as the seeing of it with one's own eyes, and thus we extend to you the cordial invitation to some, see, and hear. The simple worded statement:

will be in no way barren without it, and no longer need Priscilla pine away waiting for her true love to discover her. No—great as is the important part that love plays in the average life, there are many other things also im-

In G. H. Well's recent book, "The Passionate Friends," he tells the story Passionate Friends." he tells the story of a clergyman's son falling in love with Lady Mary, but having no money he cannot hope to have the lady, altho she loves him. Lady Mary prefers to marry for money, but having conscientious scruples about really giving nerself as a wife while in love with nother man, she makes some arrangement by which she only appeared to be this extraordinary man's life, and simply graced the many city and country mansions as their mistress. After some years Stephen, the clergyman's son, arrives on the scenes, be comes intimate in the Lady Mary's home, and assumes friendship for the husband, with the result that the Lady Mary gives herself secretly to her lover, prating all the time about the sacred right of the individual to be free. The husband discovers their se-cret, and in order to avoid divorce and a public scandal, Lady Mary becomes the husband's wife in reality, the lover goes abroad for three years and mar-ries an old mutual friend. The Lady Mary has two children by her husband, and Stephen's wife has two children

also. A promise to never see each other is rigidly kept till accidently they meet in Switzerland. They break their promise, and spend an enjoyable and romantic day together in ideal surroundings Alas—they are found out and the enraged husband at once enters action for a divorce. The Lady Mary

and so the story ends. No Moral in This Story

Usually H. G. Wells' stories lead somewhere, suggest some remedy, give "some way out" but I fail to see that this story leads anywhere. He tells that the love of Lady Mary and her lover was both love and friendship freely given, and that this kind of love, this almost sister love, must replace the seductive and abject love of women the seductive and abject love of women who waste the world today.

"Yet," he says, "she was owned, mastered, forced into concealment," and exclaims, "What alternative was there for her?" "What alternative is there for any woman?" "She might have kept her freedom by some illpaid work, and at the price of every other impulse in her swift and eager.

other impulse in her swift and eager nature." "She might have become one of those poor neuters—an independent woman." "Life was made impossible for her, and she was forced to die."
"She was destroyed not merely by the unconsidered, undisciplined passions of her husband and her lover, but by the vast tradition that sustains and en-forces the subjugation of her sex" Now, for H. G. Wells to let the hero of his story utter such words as "That poor neuter—an independent woman," shows him to be sadiy out of vision of the woman of today, nor had he ever read Whitman's "A Woman Waits for Me." He says Mary has identified herself with something world-wide, and

Mr. Wells might have drawn the moral that society must not take one exceptional act in the life of a person, committed under abnormal circumstances or in youth, and let this brand the whole life of the individual Because youth inadvertantly chooses the wrong mate, Mrs. Grundy, or the church, or the state should not clamp and rivet them together to the eternal destruction of both. There is more immorality in unhappiness than appears on the surface, and it should be the sentimental emotion, on reading this

story. If a woman sells herself for wealth and social position, let her be at least honorable and pay her honest debts by giving herself. If she has no more pride of her body, yes, and of her soul, than to put them in the balance with creature compared and paying the second selection. on the surface, and it should be the on the surface, and it should be the function of government to regulate laws that will protect the happiness of its units. But there are dreamers dreaming, and there are thinkers thinking, and the greatest of them are evolving a philosophy of life that time will incorporate into our laws, and into our customs—new and better ideals will take the place of the cruel and immoral ones now dying so hard.

That Edward Carpenter has written "Love's Coming of Age," and it is not branded; that Whitman's "Leaves of Grass" are now admitted to the mails;

branded; that Whitman's "Leaves of Grass" are now admitted to the mails; that Ellen Key's "Love and Marriage" has a large English edition, and that Charlotte Perkin's Gilman's "Woman and Economics" is translated into cleven different languages, and that her "Man Made World" has had an ex-And just here is where H. G. Wells is getting behind the times, and why the present generation of women is reading "Women and Labor." Never in the author was the outlook

The Last and Greatest West

Richer Than Mississippi Basin Is Empire Which Canada Is Almost Ready to Throw Open to the Whole World-The Mackenzie River Valley.

Continued From Page Two-

found in a number of other widely separated localities also. Coppermining may yet form one of the greatest industries of the north. River Flows Thru

Big Beds of Asphalt

Thruout the valley of the Mackenzie there are enormous deposits of asphaltum or natural pitch. and it is known to be indigenous to at least 100,000 square miles of territory. It exists along the Athabasca river in many places, but it is specially plentiful in the vicinity of Fort McMurray, the centre of the petroleum area, all along the Mackenzie, and on the rivers and lakes to the east of that river. Some of these deposits are of marvelous extent, and one or two of the lakes of it, in the vicinity of Fort McMurray may yet supply the asphalt market of Canada. On the Athabasca river it pours out of the river banks for a distance of fifty miles; and the same distance of fifty miles; and the same prodigality of nature is to be noted far up along the Mackenzie, where in the summer it boils out and runs down the banks; and in these places large quantities of it are to be found afterwards along the river edges. It is very adhesive; and some of the samples which have been brought out and analyzed have been pronouned the equal of the best Trinidad asphalt for street purposes. It resembles the English pitch, but has not the smell of tar. The Hudson's Bay Company officers use it for caulking their boats, and find it serves the purposes very well, while serves the purposes very well. while at Fort McMurray, it has been used for the roofing of houses; and when hardened is said to resemble the

asphalt pavements of our cities.
Reporting upon these asphaltum
deposits, Dr. R. Bell, says: "In descending the Athabasca it was first
observed a few miles above the junction of the Clearwater branch, below which it becomes more conspicuous, forming the whole bank
of the river with the exception of of the river with the exception of a few feet of limestone at the base, for a distance of many miles. "These banks are sometimes about These banks are sometimes about 150 feet in height, and frequently maintain an elevation of 100 feet for a considerable distance Except where they have been long ex-

cept where they have been long exposed to the weather they generally look as black as coal. A thick tar is often seen draining out of the deposits, and in numerous places on the ground at the foot of either bank, or on terraces lower than their summits, this tar collects in pools, or flows in sluggish streams to lower levels among the peaky materials flows in sluggish streams to lower levels among the peaty materials in the woods. The surface of these accumulations of tar is usually covered with a hardened pitchy crust. The boatmen on the river break thru this crust in order to get at the underlying tar, which they use for pitching their boats. Some parts of the banks are rendered plastic en masse from being over-saturated with asphalt, and in warm weather they slide grdually down in to the bed of the river, incorporating the

bed of the river, incorporating the boulders and pebbles in their course."

Of High Quality One authority has stated that these northern asphalt deposits are em-inently suited to high-class paving work, as "they possess the most important qualifications of a first-class bituminous concrete, namely, in-timate combination of the mineral and organic constituents, and to a degree which no artificial prepara-tion of the kind could be expected

tion of the kind could be expected to possess.

An experiment was made by Dr. Bell in order to ascertain the greatest state of purity to which the bitumen could be brought, and it was found that of the \$1.73 per cent of sand in the original sample, 69 26 per cent had been removed, the extracted bitumen containing 50.1 per cent sand, and—owing to the extreme fineness of the latter—it may be questioned if the purification could be effected beyond this point.

The interest in this peculiar mineral has of late been very keen, and is increasing with the prospect

mineral has of late been very keen, and is increasing with the prospect of a railway entering that section in the immediate future. The enormous quantity has been variously estimated, but from most recent report on it submitted to the geological survey department it would appear that this deposit is much the largest in the known world, either of tar-sand, or asphalt or pure bitumen. The out-crop commences about of tar-sand, or asphalt or pure bitumen. The out-crop commences about
30 miles from Fort McMurray in a
southerly direction, along the Athabasca River, and continues for many
miles along the river. It extends to
the east and west for at least 30
miles, and varies in thickness from
20 to 225 feet, with an average thickness of about 150 feet.
Another large out-cropping is
known to exist near the Fifth Meri-

known to exist near the Fifth Mert-dian, about 90 miles west of Fort McMurray; and still another is reported 120 miles east, near Buffalo Lake, and in the Province of Sas-

katchewan. These are unquestionably all part of the same field.

The commercial value of these great deposits, of course, have yet to be determined by actual test, but large European interests have been making examinations recently, and if the railroads reach there soon, and the quality of the tar-sand is up to expectations, very important industries are sure to arise around it.

Can Make Fine Glass

The sand thus extracted from the bitumen, when the work is carefully done is almost free from bitumen, and might after being heated to redness in a reverberatory furnace to destroy any little adhering bitumen, be advantageously utilized in the manufacture of some of the better and higher grades of glass. This treatment for separation is so simple that it can be done with the simplest form of utensils right beside the deposits.

Other Minerals

Platinum has been found in the rocky sections of the country near Hudson's Bay, and it is said that diamonds of a low grade exist in that same locality, tho this may be considered doubtful. Immense deposits of mica abound in the far western portion within the Rocky Mountain ranges. In one of these deposits in Northern British Columbia with which the writer is familiar a vein of mica over three feet wide is exposed for at least fifty miles. In another locality is the famous "mica mountain," which is said to be of more economic value than all the gold of the Yukon, if it were accessible to transportation. sible to transportation

Oil Companies Are Quietly Exploring Land

The existence of oil thruout a wide area of the north has been a matter of general knowledge for many years, and altho considerable prospecting has been done and much money expended in taking in machinery to sink wells, very little is known of the actual results achieved beyond the fact that a high grade oil has been struck. However, those associated with the enterprises, while carefully guarding their secrets, are spending money in development with a prodigality which indicates their confidence in the future of the fields. Others who ought to know have expressed their strongest convictions that those northern areas will yet produce oil in sufficient quantities produce oil in sufficient quantities to compete with any regions of the world. The British government is known to have been rather anxiously watching the results of the development work with a view to providing a future fuel supply for the Imperial navy.

The preliminary investigations and explorations conducted under

and explorations conducted under the auspices of the Senate committee away back in 1888 indicated that the petroleum area extended over a region of 40,000 square miles, within the following boundaries, namely: "a line drawn due north from the foot of the Cascade Rapids on the Clearwater River to the south shore of the Athabaska Lake; northerly by the said lake shore and the Quatre Fourche and Peace Rivers; westerly by the Peace River, and a straight line from the Peace River Landing to the westerly limit of Lesser Slave Lake; southerly by the ser Slave Lake; southerly by the said lake and the river discharging into it the Athabaska river and the Clearwater river as far up as the point of beginning." The committee clearwater river as far up as the point of beginning." The committee recommended that this region be reserved from exploitation until it could be fully explored and its exact oil-producing capabilities ascertained; but this wise provision has not been made.

Railway Network Is

Projected Thru Country While it is impossible to give more than a mere idea of the enormous mineral and agricultural wealth of the vast hinterland in an article such as this, it may be possible to stimulate and develop a general interest in this store-house of Nature which we have been too prone to overlook and disregard as worthless. It now only awaits the enterprise of man and the capital to make this wealth commercially available to the world. Already a network of railroads is projected thruout the entire north, and the laying of Canadian Northern railway steel to Athabaska Landing, the head of the Mackenzie river system of waterways; the construction the head of the Mackenzie river sys-tem of waterways; the construction of the Onoway branch of the same system of railway which is ultimate-ly to tap the Pacific Coast thru the Pine Pass; the Alberta and Eastern railway, and the Peace River, Dun-vegan and B.C. (McArthur road) will do much to open the country for human industry and reveal to the world its illimitable riches

An Irishman and a Frenchman were disputing over the nationality of a friend of theirs. "I say," said the Frenchman, "that he was born in France; therefore he is a Frenchman."

"Not at all," said Pat. "Begorra, if a cat should have kittens in the oven, would you call them biscuits?"

THE TORONTO SUNDAY WORLD

A week-end newspaper published every week in the year by The World Newspaper Company of Toronto, Limited; H. J. Maclean, Managing Director.

World Building, Toronto. No. 40 West Richmond Street.

Telephone calls: Main 5308—Private Branch Exchange connecting all departments.

For sale by all Newsdealers, Newsboys, and on all Railway trains—complete in five sections, Fifty or more pages. Printed in one to four colors. When you buy The Toronto Sunday World you are entitled to five sections, viz.—Art Section, Magazine Section, Editorial Section, Comic Section and News Sporting Section. Readers are requested to advise the publishers if the copy purchased is incomplete or mutilated. By mail to subscribers in Canada and Great Britain at \$2.00 per year. To addresses in the United States \$2.50 per year.

Caution—When mailing complete single copies of The Sunday World, affix four cents postage, otherwise the recipient will be required to pay double the shortage. THE TORONTO DAILY WORLD

Canada's brightest morning newspaper, by mail to any address in Canada; Great Britain or the United States for \$3.00 per year, or 25 cents per month. Delivered in Toronto and Hamilton before breakfast, and for sale by all Newsdealers, Newsboys and on all Railway trains.

Cyclecar Entering a Brand
New Field, Says Manufacturer—Notes of Automobie
Business and of Men.

(Special to The Sunday World.)
DETROIT. Feb. 7.—"Many prominent people in the automobile industry have formed hasty conclusions

formed hasty conclusion about the cyclecar," says Mr. J. J. Batterman, general sales manager of the Scripps-Booth Cyclecar Co. "and are regarding it in the light of a menace to some branches of the auto-mobile industry." The careful student of the real status of the cyclecar will quickly see that it is entering into a brand new field, where every-thing that has preceded it has ventured unsuccessfully. The motor cycle has been ideal in its field of the single passenger. It is the simplest, most economical and lowest-priced method of motor transportation for one per-son that ever has or may exist. But extra saddle to a motor cycle you person, and which, therefore, will never be permanently popular. Just once to other cyclecar clubs, and individual members will be accepted over-development of the type, so the for membership where no clubs exist, but they did and sold them by the accepted for membership where no clubs exist, two-passenger automobile is an un- but der-development of its possibilities for the automobile type. When you take a five-passenger automobile chassis and place two seats upon it you encounter waste-waste in weight, cost, maintenance and depre-Even when you design a special little two-passenger automobile of usual dimensions, there is still lacking the utmost in low cost and light weight for two passengers. Beweight for two passengers. Be-tween these two types of motor-driven vehicles comes the cyclecar. the ideal vehicle for two passengers with absolutely the minimum of weight, cost and up-keep expenses, combined with durability and strength by reason of its tread. It is a type which has come to stay, and which will be built and sold in constantly-increasing numbers to a new class of buyers, who have been expectantly waiting many years for the coming waiting many years for the coming of the small low-priced popular car. A glance at the number of inquiries and actual sales already made by the few road races \$200.000, and much more is road races \$200.000, and much more is cars will convince the most sceptical without a shadow of a doubt"

Two very striking young ladies Chicago Automobile Show, have caused a congestion in that part of the building again and again, and forced the original big tours the first for the the show authorities to seld men to Glidden trophy, was routed to the clear a way thru the aisles. The two White Mountains, and was one of the young ladies operate the top without most successful tours ever conducted leaving the car, and with the utmost Since 1905 the roads have been so imease, and seem to like the work, as proved that the 1914 Glidden will prove that the provention of these careful and tourists in general. One of the state of the first for the care and seem to the first for the care it was day and night, and again, and tourists in general. One of the show authorities to seld men to Glidden trophy, was routed to the clear a way thru the aisless. ease, and seem to like the work, as they keep it up day and night ap-parently without tiring.

The Cyclecar Association of. Am- try are expected to enter. erica is the name of the national or-ganization of the cyclecar clubs of America, formed by representatives of the cyclecar clubs of Chicago, De-troit, New York, and Indianapolis, held at the new Southern Hotel, Chicago, Wednesday, Jan. 28, at 10 o'clock in the morning. The meeting was called by the Chicago Cyclecar Club. The delegates of the four interested organizations were 12 in number: Charles P. Root, president, and O. R. secretary, Chicago Cyclecar F. Ed. Spooner, president, J. P. LaVigne, vice-president, R. C. Albertus, treasurer, and C. E. Bar-Albertus, treasurer, and C. E. Barton, J. W. Grummond and N. A., Pabst Detroit Cyclecar Club; R. F. left Chicago after the auto show for Kelsey, vice-president, and H. J. Jacobs, New York Cyclecar Club; and the guest of James Couzens, vice-president of the Ford Motor Company, who can for him. Mr. Plaintiff started for the for him. The delegates placed Charles P. Root in the chair as temporary chairman. reported Mr. Couzens has his headand F. Ed. Spooner as temporary secretary, and after the passage of the resolution covering the formation of a national association, "uniting the different cyclecar clubs and controlling the sport," the delegates adopted the name and elected officers as follows: Charles P. Root, president; R. F.
Kelsey, vice-president; Fred Mertz,
president Hoosier Motor Club, Indianapolis, second vice-president; J. P.
LaVigne, second vice-president; F.
Ed. Spooner, secretary; Chester S.
Ricker, treasurer, and Joseph Anglada R. Welf P. Colling Colling Colling Speeds and Speeds Spooner Speeds S Ricker, treasurer, and Joseph Anglada, O. R. Woolf, R. C. Albertus and George T. Briggs, directors. The organization passed a motion to the ef-

can Automobile Association colors. The makers when seen, said that they had decided to work in harmony with the A. A. A. as a body, but that no action looking to forcing the cyclecar association of America to rescind its action, had been taken. The cyclecarists and the makers, are entirely in harmony in their action.

The meeting of the Lincoln Highway Association held in Chicago during show week showed about one-half of the \$10.000.000 necessary to the actual start of building work on the highway, to have been collected. The entire amount will have to be in the back before the seed building work will go on, but various sections of the country have already started work upon the sections of the roadway which has all been plainly marked. Touring by Lincoln Highway to the Panama-Pacific Exposition in 1915 will be possible in the opinion of the officials. cided once and for all time to control cyclecar sport, and touring, and the president was delegated to appoint the various committees to take charge of the sport. The association will work independently but in harmony with all other organizations in road, track and speedway racing, in hill climbing and touring contests, and will work for good roads and in the legislative field.

Representatives of the Automobile Chamber of Commerce took occasion during the automobile show week at Chicago, to hold conferences with President W. H. McIntyre of the Cy-clecar Manufacturers' National Assohold conferen clation with regard to plans for the 1915 national show. The cyclecar manufacturers, providing they desire to do so, will form a division of the

portant action was the adoption of the classification of cars as adopted by the Cyclecar Manufacturers' National Association, but with the change to 71 cubic inches displacement as the maximum for cycle cars, a change that will be adopted by the cars, a change that will the change to 71 cubic inches displacement as the maximum for cycle cars, a change that will the change to 71 cubic inches displacement as the maximum for cycle cars, a change that will the change to 71 cubic inches displacement as the maximum for cycle cars, a change that will the change to 71 cubic inches displacement as the maximum for cycle cars, a change that will be calculated by the classification of the national shows in 1915. be adopted by the makers, and also car of the cyclecar class in mind, and the amendment styling all cyclecars of motorcycle type—a development which is not satisfactory for the additional person, and which therefore, will never be permanently popular. Just once to other cyclecar clubs, and intle cars, but, they did and sold them by thousands. There are hundreds of them still in use in Detroit and Michigan, and Howard Watrous, in but at such points as there are clubs all members will have to be members of the organization holding membership for that district. General many sensational road runs between Detroit and Chicago and return, used a Hupmobile numbered 88, one of the original 100 cars made. Watrous made membership for that district, General rules for contests on speedways and tracks, road and hill, and for great touring contests were discussed, and plans for a most active season for 1914 were outlined briefly. Directors of the organization, which includes all of the officers, form the committee on constitution and bylaws, which are to be drawn up by a sub-committee. the Detroit-Chicago trip in 12 hours. The Hupp Motor Car Company worked away from their original object of building a car for the masses, and the larger car of today was brought forth. In years gone by there were other cars that were in reality cars of the cycle-car class as it is known today, including the Baby Covert, which with a 40-inch tread and light wire wheels. made the St. Louis tour of 1903, and the Cameron car of 1900, which had a narrow tread, light wire wheels and cyclecar construction of the light car class as it is known today.

> A gasoline consumption test was re-cently featured in Chicago, and Chiand F. E. Edwards, former chairman of offered for purses in speedway and road races \$200.000, and much more is likely to be added as the makers take a more active interest in the sport.
>
> The proposition to conduct the Glidden tour for 1914, to the Mount Washsnow, and hail and sleet. The clutch was not thrown out at any time, that being one of the stipulations of the contents. More than one-third of the contents. More than one-third of the distance of the run was against a stiff wind, with a temperature of about 37.

Walter E. Flanders' appearance at the Chicago show almost caused a congestion in the main aisle of the Coleseum Tuesday, for Mr. Flanders, in the history of nine-tenths of the exhibitors, and the attendants had never been seen before at an automobile show. In fact this was his first visit to any automobile exhibition in twelve years, and he refused totally to say anything with regard to comparison between the last show he attended and the present exhibition. Everyone seemed to know the great Detroit manufacturer, and head of the Maxwell Company, by sight, as he passed thru the aisles paying attention only to the magnificent exhibits on either side.

offered for a great annual road tour of the cyclecar users of America, one for the cyclecar, one for the light car, and the third for the small car class. These trophies have all been arranged for and will be announced as soon as the deeds have been signed, turning them over to the C. A. A for contest. The first tour will be a most important event and may be from Chicago to New York, or Boston via Detroit. Rules similar to those adopted for the Glidden tour will be adopted, and the trophies will be perennial, and will be supplemented by others, which will become the permanent property of the winners. The manufacturers thruout America, seen at the Chicago show, New York to the Ormond Daytona Beach in February of 1915. This tour will carry the cyclecarists to the races on the beach, which will reopen that celebrated course in fitting and strik-

ELWOOD HAYNES TELLS OF HIS FIRST **GASOLENE WAGON**

One Horse-Power Upright Engine on a Small Truck-Made Seven Miles an Hour.

Elwood Haynes, the oldest automobile manufacturer in America, the man to whom we are indebted for the gasoline automobile, is still a young man. He is but 56 years old. He was born in Portland, Indiana. At the age of fourteen he invented an apparatus for making oxygen gas and succeeded in melting brass, cast-iron and highcarbon steel, using a furnace and highcarbon steel, using a furnace and
blower of his own construction.
At twenty-one he entered the Worcester Polytechnic Institute and graduated three years later, taking as his
thesis, "The Effect of Tungsten on
Iron and Steel." He discovered tungsten steel the seem very ten steel the seem very ten.

ten steel the same year, a metal now in common use.

Returning to Portland, Indiana, his home town, Mr. Haynes became principal of the Portland High School, which post he held during the years 1883-1884. The year following he entered the Johns Hapkins University, Baltimore. Md., and took a post-graduate course in chemistry and biology, and, returning again to Portland, Indiana, he taught science in the Eastern Indiana Normal School for the next two years.

next two years.

Mr. Haynes then entered the commercial field, accepting the managership of the Portland Natural Gas & Oil Company of Portland, Indiana, and during his connection with that company he invented and perfected a small vapor thermostat.

The year 1890 found Mr. Haynes identified with the Indiana Natural Gas & Oil Company of Chicago, Illinois, in the capacity of field supernext two years.

nois, in the capacity of field super-intendent. His work necessitated a great deal of driving and it occurred to him that some better means of locomotion over the highways than the horse and buggy might be produced. In his recent autobiography Mr. Haynes, speaking of his early experi-ences in connection with the "horse-

less carriage," writes as follows:

Trouble With the Horse.

"I found that the great trouble with the horse was his lack of endurance. I accordingly laid plans for the construction of a mechanically propelled vehicle for use on the highway. The use of a steam engine was first conpower, and as this showed little prom-a car of this description for the reason

"I next considered electricity but found that the lightest battery obtainable weighed over twelve hundred pounds for a capacity of twelve horse hours, and as this showed little promise of success, I gave it no further consideration and proceeded to consider the gasoline engine. Even the lightest engines made at that time were heavy per unit of power and rather crude in construction

"In the fall of 1892 I moved to Ko komo, Indiana, and the following sum mer I had my plans sufficiently matured to begin the actual construction of the 'horseless carriage.' I ordered a one horsepower marine, upright two-cylinder gasoline engine. This motor barely gave one brake horse-power and weighed 180 pounds. It is Three valuable trophies are to be interesting to note, in this connection. that an aeroplane motor of the same weight readily gives 40 horsepower "The little machine was built up in the form of a small truck. Its total weight, when completed, was 820 lbs. July 4, 1894, when ready for test, it miles behind a horse carriage and

started on a level turnpike.

Seven Miles An Hour.

"It moved off at once at a speed of about seven miles per hour and was driven about one and one-half miles further into the country. It was then to Kokomo without making a single

"I was convinced, upon this return were most enthusiastic regarding the proposition, and also regarding the 'horseless carriage' altho I did not at proposition, and also regarding the proposed dual tour, from Chicago and proposed dual tour, from Chicago and and imposing.

"The best speed obtained by the lit-tle machine in this condition was about eight miles per hour, whereas nineteen years later, the Haynes 'Six, Model 23, on which I was a passenger during the 1913 tour of the Indiana Automobile Manufacturers' Associa-tion, from Indianapolis to Los Ange-les, coasted into Columbia, Mo., over an excellent stretch of highway at

les, coasted into Columbia, Mo., over an excellent stretch of highway at forty miles per hour."

Elwood Haynes drove the "horseless carriage" in and around Kokomo. Indiana, for several years, much to the amusement of the natives of that city for many years following, the littly machine was used by the Haynes Automobile Company for exhibition purposes, but, due to the severe handling to which it was subjected in shipping it from point to point, all over the country, it was ultimately gifted by Mr. Haynes to the Smithsonian Institution, Washington, D. C., where it still stands on exhibition.

To Elwood Haynes much credit is also due for the development and per fection of the gasoline automobile. I was he who introduced aluminum if the construction of the automobile en gine, which metal is now used universally for that purpose. He built the first side-door car. introduced the throttling carburetor, the jump-spark electric ignition, the magneto, and

throttling carburetor, the jump-spark electric ignition, the magneto, and numerous other electrical and mechanical devices, considered essentia in the automobile of today.

Of Elwood Haynes, one contempor

Of Elwood Haynes, one contempor ary writes: "The rude carriage that was a curiosity twenty years ago and less—the vehicle that vied with the two-headed calf and the wild man of Borneo at the country fairs—was the beginning of the greatest transportation aid, since the birth of civilization Because of it our standards of living have become higher. It will broaden the horizon of all of us."

GASOLINE STATION AT TEMPERANCE-SHEPPARD

The Standard Automobile Supply Company has opened its station at the corner of Sheppard and Temperance streets. It is equipped with two 500-gallon gasoline tanks, and the lat- Attracting Considerable At- Indianapolis Speedway Acest and fastest pumps and filters. The company promies quick and high-class service. Their announcement in-tifates that other stations are to be opened up-town later on.

The manufacture and service departments of the R-C-H Corporation will be operated by a recently incorporated company, which has taken over the R-C-H property at the foot of Lycaste avenue, and the building of cars by the new company will be begun at once. The new company will be begun at once. The new company will be begun at once. The new company will be begun at once of the same as the old corporation and is headed by Charles P. Sieder of the Sieder Manufacturing Company. A car has been designed for this year, the manufacture of which will be begun immediately. The company expects to be delivering cars at the end of thirty days, and says that contracts have been closed for 2000 cars.

Mrs. Leonis K Northam, a Los Angeles apprisownam, has Omer Toft, her driver, in Europe negotiating for a Delags, or some other car for entry in all of the great races of the year. Over \$200,000 has been offered for contests on the road and speedways for 1914, and the channess of gain are entiting to a sportsman. Mrs. Northam does not care to drive herself, but desires to see her colors brought to the front with a racing auto just as they have been carried to the fore with horses, aeroplanes, and other forms of sport. E. C. Patterson, C. J. Schroeder, W. A. Thompson and other sportsmen are all in the lists for 1914 with cars and first-class drivers ready and will-ing to a store of relating the course of the fore with horses, aeroplanes, and other forms of sport. E. C. Patterson, C. J. Schroeder, W. A. Thompson and other sportsmen are all in the lists for 1914 with cars and first-class drivers ready and will-ing to stand expenses and take a famility and the cars and first-class drivers ready and will-ing to stand expenses and take a chance.

As a means of relieving the congest-class and the care from the motor fast enough to start on the road and specular to the care of the car

As a means of relieving the congest-ed traffic conditions on Woodward ave-nue the Studebaker Corporation has ordered its interplant transportation system to reroute its regular runs so that in the future the trucks and pickup cars which it operates, will not use Detroit's main thorofare except for short distances, and where absolutely necessary. This order applies to more than forty vehicles which are used to connect the plants of the company on

The Wanted Six

Has Come-a Quality Six to Sell at \$2300 Light, Handsome, More Economical than Fours

NEW

HUDSON

SIXES

Six-40-\$2300

Six-54-\$2950

This is the latest from Howard E. Coffin, the great HUDSON engineer.

The man who built the first high-grade Four to ell under \$3600. Then the first to sell under \$2500. Then the HUDSON Six-54—the first qualty Six to sell under \$3000. Now he comes out with the HUDSON Six-40-

the first high-grade Six below \$2500-the mosttalked-about car of the year.

But Price Isn't All In this Six he employs a small-bore, long-stroke motor. It consumes far less fuel than any equal-powered Four.

And the car underweighs any comparable Four. Many Fours in this class weigh 40 per cent. more.

f. o. b. Detroit, Duty Paid It weighs 400 pounds less than last year's HUDSON "37"-it consumes one-fourth less fuel. Yet this is a Six, with 123-inch wheel base and two disappearing extra tonneau seats.

Now Legions Can Own Sixes

The Six of the past has been high-priced, heavy, wasteful. The costly cars have long been Sixes. But the man who wanted modest price and weight, modest operative cost, has been confined

underbids Fours in all these particulars. And the thousands of men who buy cars in this class can enjoy the six-cylinder luxury. The smooth-running Six, with its flexibility,

its lack of vibration, its overlapping strokes, its tire economy, enters a new and enormous field.

Now comes a Six—a high-grade Six—which

New Ideals in Beauty This HUDSON Six-40 also shows in countless ways new ideals in beauty and equipment. It has the streamline body, the coming type. It has hand-buffed leather upholstery. It has the convenient, new "One-Man" top with quick-adjusting curtains attached.

He assured port and be and left a the smaller treatment. The sociation of the sociation of

Some of these have been in connection with automobile shows, while others have shown the two-wheelers exclusively.

The motorcycle and accessory show, these have been in connection with automobile shows, while others have shown the two-wheelers exclusively. The motorcycle and accessory show, which is to occupy a large area at the coming Toronto show will be by far the best ever held in Canada. The average citizen is learning more every day to appreciate the advantages of the two-wheeler over the more expensive motorcar. We frequently hear the remark from intending buyers that the cost of a motorcycle and side-car is almost as great as that of a runabout or light automobile.

Boost, boys, boost, for the T. M. C. Who have made \$3.00 their member

For members all-big or small-Who back to the country have heard

the call. Be you young, or old, there is nothing A ride o'er the road to make you eat;

And the country air you will always find. with plenty of power, will cost in the neighborhood of \$400. But, anyone who has had any experience with motor vehicles will truthfully tell you that it is not the original cost of the vehicle that runs into your hank Keeps you young and fresh of mind, It beats any game you ever did play— Does a motorcycle ride o'er the King's Highway.

the vehicle that runs into your bank account. It is the up-keep and running expenses that mount up, and this is where the motorcycle wins every time. The most economical car on the market today can not be operated at less than six cents per mile for a distance of ten thousand miles, while the average two-wheeler, with plenty of power will not cost over 2 cents a mile to operate for the same distance. There will be many to dispute these statements, and there may be individual cases where the same distance. There will be many to dispute these statements, and there may be individual cases where the same distance, has been covered with less expense, but a fair average of the ordinary motorcar and motorcycle enthusiast will verify these figures, and the man who drives a big car spends from 20 to 50 cents a mile to cover the same the vehicle that runs into your bank account. It is the up-keep and running expenses that mount up, and this will verify these figures, and the man who drives a big car spends from 20 to 50 cents a mile to cover the same amount of ground. The motorcycle has reached a state of perfection where the obsolute may cover the same and the cover the same are the cover the same and the cover the same are the cover the same are the cover the

All the dealers are looking forward to a big year. Many of the larger concerns have arranged for space at the absolute novice may operate it with the greatest of ease, and the fact with the greatest of ease, and the fact that many men who have driven cars, are now turning to the motorcycle for the simple reason that they obtain the same service for one-third the expense, plainly shows the cause of their popularity.

Motorcycles will form an important part of the automobile show at Grand a lively campaign for new members.

Motorcycles will form an important part of the automobile show at Grand Rapids, Mich., on February 9, 1914 It is expected that about 40 models will be on exhibit. Under the direction of the Motorcycle Club of St. Louis, a most successful exclusive motorcycle show was held in St. Louis recently. It is estimated that more than 4,000 persons attended. Another interesting motorcycle exhibit was held in Cleveland in connection with the automobile show at Wigmore Coliseum.

Plans Many Events. Among the many motorcycle clubs which are already making definite plans for the coming season's events is the Short Grass Club, of Kansas, which is one of the strongest motorcycle organizations of the country. For the past two summers the Short Grass Club has staged extensive tours which have attracted the attention of the Lincoln Highway association; U. S. Senator Pomerene, Cong. Whitacre, sults a vast deal more manipulation of the country. cycle organizations of the country.

The tour of 1912 was considered the biggest event of the kind ever undertaken. About 200 riders took part in the tour, which covered 1,000 miles and extended over a period of fifteen days. The tourists took along complete camping outfits and were ac-companied by their own brass band. Seven farmers signed agreements to Lauridsen uses a motorcycle Last year the Short Grass Club formed one of the tours which centered in but plans for the event are rapidly taking shape. San Francisco is bidding for the 1915 annual meet of the F. A. M., and if the convention goes there the Short Grass Club expects to ride to the coast awheel next year.

Of the villages and the distances to the villages and the distances to the villages and the distances to the state will be put up by the officials of five towns in these two counties. In all the marking of six counties in Ohio has been arranged as soom as the weather permits. It is believed the state will ore, is an Club in connection with the Dodge City Auto and Commercial Clubs. Dodge City has a two-mile dirt track where the Fourth of July competition will be staged, and plans are being made for the erection of a grandstand capable of seating 3,000 people. It is said that the event will be international in extent, and that noted riders of England, France and Canada will asked to compete.

Lee Oldfield, the former race driver. s completing his first three cars at Minneapolis, and came to Chicago where at the show, he met many members of the trade, some of whom promsed him business as soon as he was

OVER A MILLION MAGNETOS IN USE

They Are Making Good More Extensively Than Ever on Motor Vehicles.

In the early days of motoring, there were many recruits coming into the ranks of the "Knights of the Steering Wheel," who pronounced the magneto a "Mystery Box," but years have passed since, and today it can be claimed that conditions are quite the reverse; for in the majority of cases, a look of suspicion would appear on the face of the veriest novice if he were advised that his choice might be ther than magneto—equipt.
Undoubtedly, it would be safe to say

that there are over 1,000,000 magneto equipt cars running in America today. That condition in itself seems sufficient proof that the magneto has made good. And it has—has more than good. And it has—has more than made good, if that can be. Even those who have followed closely

Even those who have followed closely the history of the motor car do not always realize the part that the magneto has played in making the engine efficient and reliable. The progress made in speed, efficiency and economy is unthinkingly attributed to general refinement of the engine itself. Advances in refinement have been made, it is true, much higher powers are being obtained from engines of given dimensions, much smoother running, and better pulling thru a wide range of speeds; but when thru a wide range of speeds; but when it comes to regularity of performance day by day and month after month, the magneto is scarcely given due

Many motorists found that with Many motorists found that with a weak mixture the magneto fired regularly and well where battery systems would fail. That this was no unsubstantiated belief has long since been clearly proven. It was in 1907, so far as the States was concerned, that the critical period in magneto history occurred. It was no novelty but the great majority of car manufacturers and motorists did not trust. facturers and motorists did not trust it fully. They admitted the magneto RMERS AND CITY

It fully. They admitted the magneto gave better results on the road than the battery did, but it was an absolute mystery to them, and they felt that it was an apparatus that would fail them at any time, and one they would be utterly unable to put right, and, therefore, they used it with distrust, and, one might say, never with out complete duplicate ignition in a battery system, so that if the (to them) mysterious magneto went wrong, they could come home using the auxiliary battery which they understood so much better. Of course, an entire duplicate system is

Have You Seen Odder Things?

Queer, Unusual, Funny Incidents, Quaint Signs and Customs That Have Come Under Eagle Eye of Sunday World Readers.

THE DOG WATCH.

Have you ever noticed the large dog corner of Queen and Yonge streets?
Several times recently while I have been out of the office during lunch been out of the office during lunch hours. I have noticed this large brown and white dog lying quietly on the corner of the street to the great discomfort of pedestrians, who were compelled to walk around it. Whom it belongs to nobody seems to know, but the crossing policeman told me when I asked him that it makes itself quite at home.

Field arouse at home. Euclid avenue.

AN ODD THING TO DO.

While walking down Bay street one day recently during a thaw I was at-tracted by a little boy, street urchin, who was filling a water pistol in a puddle. An automobile came up behind him and blew its horn, but he didn't move. He stood there until his pistol was full, completely blocking traffic for, I should say, over a mi

unusual organization. It acts exactly as other groups of people act. It is a lot of imitators who are led by a few. Wherefore, when the head and front of it in Washington, the family in the White House, decides to do what it has been doing all its life, society decides to do that same thing, irrespective of whether it has done it in the past.

Miss Wilson Trims Hats.

That, in a few words, is why Washington is active for philanthropy and why the clever diners-out have to be able to converse about alleys—since alleys are regarded as the homes of poverty and suffering; but it is a difficult, almost an impossible, thing for people to be leaders in practical, helpful charity unless they have been "up against it" themselves or have been accustomed to do actual work for themselves. This is why the Wilsons were the very people to make charity—real, effective charity—the dominant

Satisfied Him. when a fellow is traveling a long distance, all by himself, he gets lonesome and has a hankering to talk to anybody who looks as if he might be the least bit companionable. You know how that is?

Well, other people feel that way, too. So why do you get mad when some total stranger bores you? Wouldn't you like to bore some other total stranger? Well, then!

wouldn't you like to bore some other total stranger? Well, then!

In the smoking-room of an east-bound Pullman the other evening, there were two men — one of them grouchy, the other one receptive.

After smoking two indifferent cigars, the latter said to the for-

EMOTION PICTURES

"BAPTISM OF FIRE" AT WINDSOR THEATRE

The Windsor Theatre, corner Colleg and Dufferin streets, is well adapted i every respect to fill the bill as a thorol comfortable family place of amusemen. The building, which was recently built is well ventilated, having high ceiling and plenty of breathing space. The theatre is under new management an a high-class program of six reels, including a special feature each night, will be the program, supplemented with in strumental music. For next week the following features will be run: Tuesday next, "Baptism of Fire," in 3 parts, will be the leading feature.

BONITA THEATRE

IS HOUSE OF FEATURES The Bonita still continues to draw the crowds, and deservedly so. Many theatres resort to the policy of giving premiums as an inducement to increased patronage, but it is questionable if this is a wise step. Special attractions in good photo plays will always be appreciated and eventually win out if consistently used. For Monday and Tuesday the leading feature will be "Romance and Duty," a two-reel drama. As a special attraction the management has secured for Wednesday and Thursday, a sensational drama in four parts, entitled "Black Thirteen. On Friday and Saturday "The Frame Up" will be the leading attraction.

'ABSINTHE" AT THE BIG NICKEL THEATRE

The leading attraction at the Big Nickel Theatre, Yonge street, for Monday and Tuesday will be that splendid moral story, "Absinthe," in four parts, featuring King Baggot, the most popular motion picture actor.
This is a wonderful story, pointing out the curse of taking this terrible spirit. It is exceptionally well acted, and is a feature full of intense interest.

For Wednesday and Thursday the chief feature will be "Werewolf," a two-reel special production.

"Romance of a Photograph" has been secured for Friday and Saturday.

Julia Marlowe, wno was attacked Julia Marlowe, who was attacked with acute appendicitis while playing in Los Angeles, arrived in New York a short time ago, crossing the continent for medical advice. She was accompanied by a trained nurse.

Dr. Joseph Bissell, of No. 46 West Fifty-ninth street, after making an examination, found Miss Marlowe's condition favorable and an immediate operation unnecessary. The patient sat up in bed most of the time during sat up in bed most of the time during the trip.

The Sothern-Marlowe company continues its tour, Miss Marlowe's roles being taken by understudies.

FINE PROGRAM AT

ASTER THEATRE appearing in a series of detective playe

"Michael Arnold and Dr. Lynn," a particularly fine and attractive drama, is to be the chief feature at the Aster Theatre on Monday and Tuesday, This play, which is in two parts, is practically new to this city. It has been very highly spoken of in other places where the film has been shown.

On Wednesday and Thursday "Coryphee," a splendid two-reel feature, with Florence Lawrence as the leading character, will be produced. "For Friday and Saturday the management of this house has secured "Werewolf," a two-reel drama.

INTERESTING PLAYS "Michael Arnold and Dr. Lynn," a

"TWO ORDEALS" AT

"The Two Ordeals." the second installment of "The Adventures of Kathlyn," is to be the leading attraction at the U-Kum Theatre on Monday and Tuesday. This is an interesting seriel story, and those who is a specially fine two-reel play of particular interest, will be shown.

Will be The Story of David Grass, and incidents.

The chief feature of the week's program is however to be shown on Wednesday and Thursday, which two nights are devoted exclusively to comedies. This arrangement has proved very popular with the patrons of this house. at the U-Kum Theatre on Monday and Tuesday. This is an interesting seriel story, and those who are following it will enjoy the second number, which contains many very fine features.
On Wednesday and Thursday a two-

reel drama of special interest will be shown, entitled "When Strong Wills This theatre is exceedingly comfortable and inviting, which induces a particularly good class of people to this Waterloo" this theatre has secured what is, without the slightest doubt the most wonderful picture every introduced to the public.

SUCCESS OF DEER

PARK AUDITORIUM

So great has been the success of the feature service which has been introduced at the Deer Park Auditorium that the management has made arrangements whereby they are to show some of the very latest and best high-class motion picture plays pro-

For this week the following features have been secured: Monday and Tuesday "The Toil of the Marshes." a two-reel drama. Wednesday and Thursday, "Master of the Garden," a two-reel Selig drama. In addition to this high feature the marking "Particle." this big feature the weekly "British Pathe Gazette will be shown, introducing all the latest interesting events from the old land. Friday and Saturday, "House of Discord," in two parts. Another feature of exceptional merit has been secured for these two days, when "Satan." a most wonderful four-reel drams, will be introduced. This is perhaps, one of the strongest features procurable.

GREAT FEATURES AT THE ROYAL GEORGE

the road. One day he was scooped The leading feature of the Monon a story; this made him so mad that day and Tuesday program at the Royhe hurried back to the office and resigned—he had decided that if he could al George Theatre, Dufferin and St Clair, is to be "The Power of Conget scooped so easily that he would never make a good newspaper man, so science," a two-reel drama of particular interest

lar interest.

The chief attraction of the week, however, will be shown on Wednesday and Thursday, when "The Battle of Waterloo" the very best and most one of Waterloo" the very best and most one of waterloo, waterloop waterlo of Waterloo," the very best and most interesting film ever presented to this city will be the feature. No other picture has been seen by so many people. It holds the record for the length of stay at one theatre, and was the most talked of feature in the city. The English patrons of this theatre should be much internteresting film ever presented to this of this theatre should be much interested in this wonderful production.

"BATTLE OF WATERLOO" AT KING GEORGE Funny

Monday and Tuesday are to be field one hum days at the King George Theatre, Bloor street, when "Battle of Waterloo," the novels. very best and most interesting motion picture ever presented will be

is looked upon in magazine circles as being the coming man. The Universal offers him a new field for putting to use his talent for making people laugh No picture ever caused the sensation as did this, when first introduced to

as did this, when first introduced to Teronto. Only one other picture ever made a stay of twe weeks at one theatre, and then shown at several other houses in the neighborhood. This picture holds the record for the number of people having seen it.

What makes this picture doubly interesting is the fact that the acting was on actual Waterloo battle ground. The acting is wonderful.

Patrons of this theatre who intend seeing this feature would be well advised to reach the theatre early and se prevent a long wait, had left it all to charity.

MADISON THEATRE

The success which has attended the Madison Theatre, Bloor and Bathurst, since its opening, is a clear sign that patrons are well satisfied with the class of entertainment which is given.

During the past week several vaude-ville turns of exceptional ability were produced and several of the very best motion picture plays.

motion picture plays.

The, chief attraction for Monday, Tuesday and Wednesday of this week will be a special two-reel drama entitled "Too Late." This is a production of exceptional interest and is one that should appeal to the patrons of this fine theatre.

The other attractions will include several of the latest and best comedies and dramas.

BIG AUDIENCE AT PARK THEATRE

Last week's program at this popular house was thoroly enjoyed by the thousands who attended. The comedy novelty act by Bradford and Glenny was most exciting and well received, as also the numbers contributed by Charles Noire, in a musical act, and Du Barry and Leigh, in a singing talking novelty. Miss Anna B. Edwards, a soprano singer of no mean calibre, made quite a hit; her powerful and round tonal qualities being much above the average. On Wednesday, amateurs' night, no less than fifteen toed the line, with the result that the crowded audience had something to do in selecting the prize winners. If you feel depressed, or things look blue, invest 15 cents at the Park on Amateur Night and you'll forget all your troubles—that's something worth knowing. The attempts made by some of our budding artists are worth a dollar to hear, and the good-humored audience extend their sympathy—very much so—if the performer happens to be a bit off color. That this Wednesday novelty is fully appreciated, there isn't the slightest doubt. 1400 to 1500 admissions speak for its popularity.

COMEDY NIGHTS AT YORK THEATRE

In addition to this big attraction with several others will be shown during the week, in addition to the usual offered received and saturday the mangement of this house has secured werewolf," a two-reel drams.

INTERESTING PLAYS

AT PRINCE GEORGE

At the Prince George Theatre on Monday evening the leading feature will be "The Story of David Greig," an exceptionally interesting photo
"The Crusaders, or Jerusalem Delivered," is to be the leading atraction at the York Theatre, Yonge street, on Monday and Tuesday. This is a wonderful biblical story in four parts and took months of hard toll together with an expenditure of \$50,000 to produce.

The subject is taken from the celebrated poem of Torquato Tasse, whose words and ideas have been closely followed by the film makers. The story is sublime in character and abounds in stirring episodes and remarkable scenes and incidents.

SPECIAL FEATURE AT WILLOWVALE THEATRE

As an extra special attraction the management of the Willowvale Thea-tre has secured for Monday, Tuesday and Wednesday, at considerable expense, "Tess of the D'Urbervilles," taken from Thomas Hardy's sublime taken from Thomas Hardy's sublime story. The character role in this production is played by Mrs. Fiske, America's leading actress. The story is most interesting, the acting is exceptionally good, while the photography is the best seen in the business. The greatest feature of the productions. **MOTION PICTURE** The greatest feature of the produc-tion, however, is the wonderful set-tings, which are of most beautiful Noted Magazine Humorist

On Thursday the leading attraction will be, "A Man in the World of Men," a two-reel drama featuring Edwin August in a double exposure scene. The chief feature of the program on Friday and Saturday is "Prairie Trail." a two-real drama of special in-

"BLACK THIRTEEN" AT CARLTON THEATRE

The special feature at the Carlton Theatre, Parliament street for Mon-day and Tuesday will be a sensational drama, in four parts, entitled "Black Thirteen."

This is a story of special merit While the story contains many exceptionally thrilling incidents it does not run the length of so many of these teresting story.
For Wednesday and Thursday "The

Toll of the Marshes" has been secured. This is also a very fine story, and is in two reels. The leading feature for Friday and Saturday will be "Daughter of the Underworld," in two parts.

BLOOR PALACE HAS BIG PROGRAM

This well established and popular theatre is coming rapidly to the front as a feature house. Special attractions are always a good drawing card, and the management are up to the minute in their endeavor to give the minute in their endeavor to give the public a real good show. For Monday and Tuesday two special features are billed: "Black Thirteen." a famous European play in four parts, and "Over the Cliff." a three-reel drama. On Wednesday and Thursday "The White Squaw" wil be the chief attraction, and Friday and Saturday a thrilling fighting story, "War of the Cattle Ranch" will be featured. Popular music, rendered by a first-class orchestra adds much to an otherwise good program, For a year he has been conducting a page in Judge, called "Watching Our Funny World Go By." He writes the humor for Leslie's Weekly, and does He also writes humorous

The Liebler Company, which is managing Cyril Maude, have announced a performance of Feb. 18, at Wallack's Theatre. A call for volunteers for the cast will be announced shortly. St. Mary's Free Hospital for Children will

Mary's Free Hospital for Children will have the receipts.

An organization, styled "Playere' Equal Suffrage League of America," has been formed in Boston, of which the officers are: Mrs. Guy Currier, president; Priscilla Webster vice-president; Mrs. F. B. Milliken, secretary and treasurer; Maud Milton, Lotta Crabtree, Mrs. Arthur Cheney (formerly Julia Arthur), and Mrs. Richard Bennett, directors.

Motion Picture Plays

Just Kids.

"Just Kids." is an exceedingly pretty story, the chief characters being enacted by children. It deals with a party where the three children are introduced. Harmony does not reign supreme during the evening. One child hides his father's revolver and puts it under his pillow. He retires for the night, but is visited by a nightmare in which he sees himself eloping with his sweetheart. During his dream he goes thru many adventures meeting the villain at every turn. Several times he shoots him with his father's revolver. The play is wonderfully acted considering the ages of the little folks. The characters of the hero and heroine are played with considerable skill, but the villain seems to want a little courage. This is, however, a splendid offering.

"Heaven Will Protect the Workins"

"The Militant"
This play contains many good points. The story deals with the woman's war in England, and shows an election campaign between a suffragette leader and an antisuffragette. The acting is perhaps the chief feature of the play, this being of a particularly high order, but the photography is in some places very poor, ignorance of English politics is shown to a marked extent in the ending. a terrible villain trying all means to get a poor sum-chewing girl under his influence. The acting is good but the plot is very old, and is one that

get a poor gum-chewing girl under his influence. The acting is good but the plot is very old, and is one that is so common in comedies.

"Uncle Jerry's Namesake."

Here is a comedy that is really worth while. It is doubtful if we have ever seen better acting in a laugh making picture than is shown in this. The plot apparently has been taken from "Baby Mine," for it bears such a marked resemblance, the only difference being that there are four babies in place of three. One of the best players in the production was one of the babies whose laugh was the chief feature.

"The Third Degree."

The Third Degree."

The Third Degree which was shown for the first time in Toronto during the peat week, is a particularly fine silent drama taken from an original play.

As is the case in most of these transformed productions there seems to bust a little lacking. It is almost impossible to say what it is, but it does not add to the beauty of the play. Anyone who has seen "The Third Degree" will appreciate the motion picture form better than those who do not know it. It seems somewhat hard to follow without prevent it is a wonderfully well acted drama, and can be classed among the very best. The story is much longer than the original, but this adds to the production.

It is a wonderfully well acted drama, and can be classed among the very best. The story is much longer than the original, but this adds to the production.

of the babies whose laugh was the chief feature.

The Last Scene of All.

A charming offering of acting by these players, all of them, but especially by John Sturgson and Sally Crute, a love story of an actor is made real and even poignantly interesting to us. It is revealed in the dream pictures of an old and dying actor who is seated in his garret, and turning the leaves of his scrap book. Each page brings its vivid memory of stage triumphs, of love, of professional jealousy, of sorrow which becomes the tyrant of the man's soul and finally of death.

The Last Scene of All.

It starts with the life of young Howard Jeffries while at college, when he meets Annie, the waitress. It shows with great force the using of "The Third Degree" by the detective. It shows, perhaps better than the original play, the wonderful patience of the self confesser murderful patience of the self confesser mu

MADE PICTURE A **BIT TOO REALISTIC**

Large Pilot Boat Crashed Into the Wharf at Full Speed.

The spectacle of a large pilot boat dashing into a wharf at full speed and wrecking a section of the wharf, is a

dashing into a wharf at full speed and wrecking a section of the wharf, is a bit of exciting melodrama which forced its way into Al. E. Christie's newest Nestor comedy, "She Was Only a Working Girl," whether the director would have it so or not.

Lee Moran and Eddle Lyons were on the pilot boat which was being chased by a police boat. The action in the scene demanded that the pilot boat steam up to the wharf, where the principals were to land. The man is charge of the boat attempted to make an extraordinary sensational landing, with the result that when the boat at earns to swear, smoke and drink. Who has inherited its father's came alongside the wharf he could not stop it and it crashed into the pilos, tearing out a section of the wharf and throwing all on the boat to the deck. Lord Twenlow sends his Chaplain to fear, that she will lose the love of the boat to the deck. Players' Production, Which Will Be Released Shortly. Miss Marin Sais, the popular lead-One of the chief features of the casm has had definite effect and at Famous Players program will be released on Feb. 16, when "A Lady of
Quality," will be introduced to the
public for the first time.

Casm has had definite effect and at
the striking of the midnight hour, she
gives the toast to the assembled noblemen: "Behold me for the last time
clad in trousers!" Later she appears
occupies with such good grace. Dur-Quality," will be introduced to the public for the first time.

This company has been the means of presenting several of the world's most famous players in motion pictures, but it is doubtful if any more popular actress can be found than Miss Cecelia Loftus who plays the leading role in this beautiful play.

The story is as follows:—

News is received by Sir Jeoffrey, a dissolute roue, whose contempt for the other sex extends even to his own daughters, of the arrival of another in the public of the position which she cald in trousers!"

Later she appears in the last time clad in trousers!"

Later she appears in the finery of in the finery of a lady of quality, and from that moment bends every effort to attain that title legitimately. Sir John Oxon plies all his wiles to win her untutored heart, and she finally falls a victim to his flattery. Secretly she meets him in the great halls. Nevertheless, Oxon wins her confidence, and she bestows her first kiss upon his lips; but not without a price, and she bestows her first kiss upon his lips; but not without a price, and she bestows her first kiss upon his lips; but not without a price, and she bestows her first kiss upon his lips; but not without a price, and she bestows her first kiss upon his lips; but not without a price, and she clad in trousers!"

Later she appears in the finery of in the hall dressed in all the finery of a lady of quality, and from that moccupies with such good grace. During her association with Kalem, which has extended over a number of years. This charming young woman has portitle legitimately. Sir John Oxon plies all his wiles to win her untutored heart in the hall dressed in all the finery of in the head over a number of years. The lady of quality, and from that mochant her refreshing personality never fails to hold and entertain the patrons of the photo-play.

Miss Sais is a descendant of one of the other sex extends even to his own descended over a number of years. The story of the position which section in the hall dressed in all the f

> "My friends ask me if I am crazy," said he "because I choose to take chances in a biplane rather than in an automobile. Most real pleasure has an element of danger in it, and I guess that's why I am determined to fly above the clouds in my own machine operated by myself."

"Home, Sweet Home"

A homeless man wrote "Home, Sweet Home!" per-haps no other could have expressed the intense longing---the yearning---the keen pangs of a heart starving for home---for hearthstone and loved ones. John Howard Payne, the author of the words, died in Tunis, a lonely exile, in 1852.

Certainly no words and no music could convey with more feeling that greatest of passions of the human heart--the desire for a home of its own. But one other desire on earth surpasses it--and that comes--mercifully--only to old age --when it longs for its home "not built with hands, eternal in the heavens."

This world-wide song, with its touching melody and words, occurs in Bishop's opera of "Clari, the Maid of Milan," brought out at Covent Garden in 1823. In the published music it is called a "Sicilian Air"—but it is probably Bishop's own. It was the favorite encore of Jenny Lind---and thousands wept when they heard her sing it.

NEVER SAY DIE"

What the Theatres Offer This Week

"Fine Feathers." Princess.

"Fine Feathers," H. H. Frazee's famous all-star production of Eugene Walter's dramatic sensation, with its Cort Theatre, Chicago, where its success was sensational. In fact, so great has been the success of "Fine Feathway" great has been the success of "Fine Feathers" that four companies are now presenting the play on the road. But a few cities are to see the original allstar cast in this play, and in the spe-clal tour are included four Canadian cities, of which this is one. The won-derful east includes such famous stars as Robert Edeson, Wilton Lackaye, Max Figman, Rose Coghlan, Florence Rockwell and Lydia Dickson, players who are as well known in London as they are in New York or in Canada. The metropolitan newspapers and magazines devoted columns and pages

here is an excerpt from his review:

"Not many twentieth century dramas have been told us at once so truthfully, so beautifully and so mercilessly as 'Fine Feathers.' It is a sincere and genuine projection of the social life of our time under certain conditions and the nighest cultivation in the players, and in this feature alone 'Fine Feathers,' as played by Robert Edeson, Wilton Lackaye Max Figman, Rose Coghlan, Florence Rockwell, Lydia Dickson, and the others is a red letter event in many others is a red letter event in many others are alone of the social life of our time under certain conditions. ditions, well known and not uncom- weary pages of useless froth and in-mon. It is exquisitely projected, both ane miming."

it is merciless in its final and inescap-able demonstration of the eternal law of compensation. The big, overwhelming truth is in the denouement. Somebody has to pay—pay for himself, for the love he has known and aroused. for the friendship and the happiness and all the costly gaiety, for the sins and original cast, will come to the Prinselfshness, the vanity and the page-cess Theatre for a week beginning antry that are so valuey and yet so Monday, February 9, and the playsoers of this city are preparing themselves for a rare treat. The play will
be seen here just as it was presented
for 150 nights at the Astor Theatre on
Broadway, and for six months at the
Cort Theatre, Chicago, where its success was sensational. In fact, so ture that in its finality it appeals to the thoughtful beholder as a most truth-

proof."
Concerning the performance of the Concerning the performance of the play, the writer proceeds:

With a cast so exquisitely balanced and so equally shared by some of the steamboat "Belle Creole," fol-With a cast so exquisitely balanced and so equally shared by some of the finest actors—men and women—that the American stage can boast—it is not necessary to dwell upon the excellence of the presentment. It is staged with such utter accuracy, such smooth competence and such adequacy in investiture that it will remain for to a discussion of "Fine Feathers" and everyone interested in the theatre is long in the memory as a much delayed familiar with the merits of the play.

John H. Raferty, the well-known English critic, was in New York at the time of the play's presentation, and there is an even of the play's presentation, and the play is a much delayed yet deserving tribute to the intelligent play some time of the play. sumate artistry and the highest cultivation in the players, and in this fea-

Alexandra Julia Dean, in Mark Swan's new comedy, "Her Own Money," from the Comedy Theatre, New York, will be the attraction at the Alexandra Theatre, this week, with the usual matinees on Thursday and Saturday. Among the plays of the season that deal vitally with vital issues of the omestic life of today is this new medy by Mark Swan, which had an extended engagement at the Comedy Theatre, New York City. The play discloses typical conditions in a typical American home, and presents, as its principal characters, a typical its principal characters, a typical young married couple. In its more serious aspect, it voices the complaint of all wives everywhere, against the custom which decrees their responsibility for the home, its making and its maintenance, and excludes them from fair participation in the family income, Mrs. Alden has long rebelled in spirit, if not in deed, against the generally-accepted method of procedure which prevails in American homes and compels American wives

"The White Slave." Grand

"The White Slave," a picturesque stage story of the south is the offering at the Grand Opera House this week, with matinees on Wednesday and Saturday. Bartley Campbell's great play is good enough to have made the reputation of any playwright. The originality displayed in "My Partner," the charm of the "Galley Slave," and it is possible to present this great the dramatic surprises contained in "Siberia," are all surpassed in "The White Slave." The writing of this play was to Mr. Campbell a labor of love. He had lived in the south and wrote without a suspicion of prejudice on the subject of slavery. His knowledge of human nature made it an easy task for him to picture the everyday life of the southern people. He made a hero of a Kentucky-bred boy, and the true nobility of his charcaters proves his tender regard for the people of the southland. Bartley Campbell was as much a poet as a playwright, and it has been written! "The White Slave," a picturesque stage story of the south is the offering at the Grand Opera House this week, with matinees on Wednesday and Saturday. Bartley Campbell's great the people of the southland. Bartley Campbell was as much a poet as a playwright, and it has been written that "The White Slave," contained fifty miniature poems, while the language employed in unfolding his story is far above the average.

"The White Slave," demands a luxurious setting; the scenic grandeur of the lower Mississiphi valley is

ful proposition which answers its own problem with final and undeniable proof."

of the lower Mississippi valley is graphically set forth. There is a plantation scene with several choruses. bell's Southern romance

a manner as to give it all the attractiveness of an original production, and with this end in view they have caused a complete new scenic investiture to be provided which has been painted by Walter Burridge, the well known scenic artist, who made the original models and painted the production for "The White Slave" thirty years ago. An excellent dramatic cast has been secured to impersonate the lifelike characters with which the play abounds.

This season they are offering "From Stage Carpenter to Ackter." Charles van as the stage carpenter has come into lasting fame and Fanny Van are among the favorites who play at Shea's. Shea's homes and compels American wives to ask their husbands for money with which to defray household expenses. Circumstances suddenly arise to bring the matter to an issue and in the scenes and situation. The Enchanted Pool." Twenty danwith which to detray household expenses. Circumstances suddenly arise to bring the matter to an issue, and, in the scenes and situations that follow the woman's argument is convincingly set forth. At the same time husband and wife are brought face to face with separation, and this unhappy conclusion is only avoided when the husband is induced to see the justice of the wife's complaint. Mrs. Alden has innocently appears as Amphitrite. The legend of Neptune's garden is that at the sound of the human voice one of the many beautiful statues it contains and this unhappy conclusion is only avoided when the husband is induced to see the justice of the wife's complaint. Mrs. Alden has innocently appealed to a mutual friend Mrs. Beecher, to assist her in assisting her husband. By Mr. Alden and by Mrs. Becher, the act is misconstrued and the immediate result is temporary separation and Mrs. Alden's demonstration of her ability to support herself in a business venture of her own selection.

The characters are extraordinarily genuine, and convincing, and the entanglement in which they find themselves tho it has its more important phase, is decidedly amusing. "Her own Money," in short, is a comedy, with laughter in dialog and incident, and distinctly different from the general character of the season's prolucts in that it is clean, wholesome and healthful. Julia Dean appears in the title role, and in her support will be seen a notable company of players, in cluding Helen Lee, Mabel Carruthers. Maude Durrand, Lionel Adams, Waiter Wilson and Phillips Tead.

"The White Slave."

The Robinstone of the wife's garden is that at the sound of the human voice one of the many beautiful statues it contains will come to life and will seek the the same water from which all Neptune's people are trongent which all Neptune's people are trongent which is said to have the power of restoring the charm of the Norelds, whole is altered to have the power of restoring the statues to marble after they have been are dancing. Rodo, an interloper, who has also discovered the existence of the charm, attempts to steal it. Martiness selzes house from the general character of the season's prolucts in that it is clean, wholesome and the limit the proposal proposal

vinced that he has drowned the interloper. Becoming demented by thinking of the murder, he escapes from
his attendants and again comes to the
garden, followed by Beryl, who uses
every means of keeping him from the
pool. Finally, at the sound of dance
music, they are carried away with it.

Two Shocks Out of Five Thrillers Are Certain In N. Y.'s Dreadful Playhouse "What Happened to Mary," Owen Davis' new play suggested by the "Mary" stories which have been running in the Ladies World, was successfully produced at the Fulton Theatre, New York City, last season, and also at the Majorite Hope and also at the Majori Thrillers Are Certain In

Most Brutal Scene Ever Shown Is in "The Kiss in the Dark" at the Princess Theatre-Great Opera, "Moses," to Be Presented With Chorus of 1500.

By W. Bob Holland.

NEW YORK, Feb. 7. — Sophisticated persons who go to the Princess of this scene as done by Henry MesTheatre, the little playhouse that tayer and May Buckley. Had it been

NEW YORK, Feb. 7.— Sopnisticated of persons who go to the Princess Theotre, the little playhouse that grints on its program a warning that it is no place for a minister's hired man, the young girl, or the prudish prude will get at least two shocks out of the present collection of five little plays. They will be shocked that there is nothing salacious in any of the playiets, and they will also be shocked by the most brutal score ever depicted on a New York stage.

The Princess Theatre acveedly aims to shock and to thrill. It usually succeeds. Only a short time ago it should not be considered in the present college of the princess the play was substituted. The Princess is modeled after the famous grand Guignoi of Paris, and some of its thrillers have come from that celebrated the metitution. So one should not be critical or pedantic in talking or in writing of the Princess. The only question to be considered is: Does it do if well?

The answer to this double question in the present of the company are celever and are well trained, and if a person likes that sort of a thing, he will be satisfied with what he sees at the Princess. But about the thriller of the present bill: It comes from the Grand by the most first on the present of the company are celever and are well trained, and if a person likes that sort of a thing, he will be satisfied with what he sees at the Princess. But about the thriller of the present bill: It comes from the Grand by the princes and many the princess the princes of which he presented in the present of the company are celever and are well trained, and if a person likes that sort of a thing, he will be satisfied with what he sees at the Princess.

But about the thriller of the present of the company are celever and are well trained, and if a person like shat sort of a thing, he will be satisfied with what he sees at the Princess. Fine and the princess is well done, and when the management of S. M. De Pasquali, and the princess is modeled after the famous princes and the princess is the pri

be satisfied with what he sees at the Princess.

But, about the thriller of the present bill; It comes from the Grand Guignol, and is called "A Kiss in the Dark." It bore the name of "Vitriol" in the French version. A man has been blinded and disfigured with vitriol thrown in his face by a woman. She is on trial for the crime, but he refuses to be a witness, refuses to aid the prosecution, and seems to be still under the spell of the woman's charm. After her acquittal, she comes to see him at his urgent request.

He is a repulsive object. The wo-

He is a repulsive object. The wo-man drops to her knees and begs ed to San'Francisco by Mrs. Phoebe forgiveness. He takes her hand, as if to caress her, and begs for a kiss.

There will be a chorus of 1500 at these which she reluctantly consents to give him.

Once he has her securely in his grasp, he tells her that she shall suffer as he has suffered; that he will serve her as she served him; that he intends to blind and to disfigure her with a bottle of acid he has. He holds her and slowly and delibeerately pours the vitriol over her face and eyes.

Raps Paste Pot Plays

Miss Dean is by no means a stranger to the Toronto public, as she was an important factor in the play, "The Lily," as presented by David Belasco four years ago. Since that time, Miss Dean's engagements have been confined exclusively to New York City, where she created the leading role in "Bought and Paid For," which she played with success for two years. The present is Miss Dean's first starring yenture.

and public to have fewer and better ones. I do not decry novels as the source of inspiration for dramatists.

On the contrary, I think it a great field, but I think two or three deposits have resulted in the current crucible of the book plays that may well be moulded into aphorisms, perhaps axioms for future guidance.

Some of Her Axioms.

"First: Novelists are rarely dramatists.

WHAT HAPPENED TO MARY COMING TO THE GRANL

Theatre, New York City, last season, and also at the Majestic Theatre, Boston, It was pronounced by the presand public a worthy successor to succeive as "The Old Homestead," "Wa, Down Bast," and "Shore Acres," Mary is a girl of refined and gentiways, reared in a fishing village on small island in Chesepeake Bay, by man who calls himself her uncle, Howas the only storekeeper in the place and Mary was compelled to wor, hard about the store and house; be friended only by an old sea captain,

LILLIAN LEE ANDERSON-

adventures occur in the third act, a lawyer's office where she is employed as stenographer, and marries the unlikeable hero, a woman-hating lawyer. In this new play Mr. Davis points out a pronounced moral, and in doing so has created an offering that has been universally praised in every city in which it has been presented.

Season he safled for London, sang 18 performances at Covent Garden; salled the day after his last performance at Sydney of the day after his last performance at Sydney of the day after his last performance at Sydney of the day after his last performance at Covent Garden; salled the day after his last performance for Australia; opened at Sydney two days after arrival; and is singing 50 concerts in Australia, 11 of which occurred in Sydney within three weeks, all to packed houses.

Salling again January 17, on the

"The Temple of the Lion"

This Is the Most Fearsome Experience of the Harried and Beautiful Kathlyn, in a Picturesque Ruin, Where the Wandering Pilgrims Come to Worship and Where Savage Lions Pace Lonely Corriders-"The Adventures of Kathlyn."

theater with his land mines, saving Kathlyn from the hungry lions, he dragged her from the wreckage to a secluded spot close by, where Ramabai and Pundita were waiting with elephants. So they all are elevated into the howdahs; the mahouts prod the big beasts and then follows a flight thru the jungle. Finally follows a flight thru the jungle. Finally following morning the natives, discovering the dawn of the morning, they stop for water. A baboon runs close to the trail, frightening Kathlyn's elephant manner to be high priestess in their temple; and henceforth she must keep alive by night fortune. He could sing as many as dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a priestess but a prisoner. One night in the Parisian underworld and its strange denizens—"apaches" of both stumbles against an idol—it falls and is broken into a thousand pieces. The following morning the natives, discovering the destruction, are enraged beyond endurance, rushing at Kathlyn as if to the follows a significant priestess in their temple; and henceforth she must keep alive by night fortune. He could sing as many as dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a priestess in their temple; and henceforth she must keep alive by night fortune. He could sing a dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a dozen songs a night without apparation that region. The unhappy young queen again finds herself not only a dozen songs a night without apparation that region the providing the fortune. He could sing a dozen songs a night without apparation that region the individual that the providing that the providing that the providing that the providing that the pri close by, where Ramabai and Pundita were waiting with elephants. So they all are elevated into the howdahs; the mahouts prod the big beasts and then follows a flight thru the jungle. Finally in the dawn of the morning, they stop for water. A baboon runs close to the trail, frightening Kathlyn's elephant mount, which runs away. The mahout tries to stop the terrified beats, but he is thrown against a tree, and the elephant continues its frantic pace with Kathlyn alone. The other members of the entourage pursue her; but the runaway gains so fast that Kathlyn is soon lost to their view in the recesses of the forest.

Again a Strange Captive.

Miss Deans a stranger do the Toronto public, as she was an important factor in the play, "The state of deep roves as the through the state of the play of the state of the play of the stranger and public to have fewer and better of inspiration for dramatiests, and the play of the stranger of the play of the stranger of the full value of the control of the stranger of the full value of the control of the stranger of the full value of the cost of the stiftings, and all the advantage of and stranger counted, if not entirely dispelled, after the opening performance in each city, and all the advantage of an active, and the second of the stranger of the stranger of the full value of the cost of

In Strand's Serial Play

Public interest in "The Adventures of Kathlyn" continues unabated. The first three days of this week will present the lovely and persecuted heroine passing thru another barrowing experience, this time in the ruined Temple of the Lion.

'After the daring and cunning of the American engineer blew up the Ampth theater with its land mines saving Kath-

slay her. She wards them off, reminding them that as high priestess her person is sacred. Then fortunately recurs to her the accomplishment of her girlhood days with clay modeling in her far away California studio: She plans to save herself from the fury of the fanatics by telling them that she has the power to recreate their idol. She orders clay and water and at once begins modeling a reproduction of the idol from memory. When the natives behold this completed work of art, they fail to the ground in abject obeisance, and she stands intrenched more strongly than ever in their reverence. Thus she again saves her life by her ready wit and her facility of accomplishment.

The marauding lion has grown bolder and hungrier and now makes his rounds on the portico in broad daylight. Having escaped the fury of the mob, Kathlyn now is about to become the prey of a savage beast. She flies for her life from the temple to the river. It would appear that only a miracle could save her now.

'CHANSONNIER,' WHO MADE MILLIONS, IS TO WRITE NOVE

Romantic Career of Aristide Bris ant, Renowned Character of Paris Night Life.

PARIS, Feb. 7 .- Aristide Bruant, the illionaire "chansonnier." is about to blish a new book of Paris life, palmy days of the "Chat Noir." and its "gentleman" proprietor, Rodolphe Salis, the nocturnal pleasure see of Montmartre were somewhat surprised at the sudden appearance on the stage of a strangely-clad "chanson-nier." The newcomes nier." The newcomer, who appeared to be about 20 years of age, wore a purple shirt, from which a head like a Roman cameo emerged. A mass of dark brown hair brought the pale clean-shaven face into still greater clean-shaven face into still greater relief. A dark corduroy suit and boots reaching nearly to the knees completed the picture. Even Salis himself was impressed, while the blass growd of night-birds held their breaths. They were not disappointed. In a tenor voice of immense strength and charm, which sent cold shivers down the spines of the assembled "noceurs," he began the song which made him famous:

Sa maman s'appelait Flora, Elle connaissait pas son papa; Toute jeune on la mit a l'école;

Papa, c'etait un lapin, Qui s'appelait J. B. Chopin, Et pu'avait son domicile,

There was a verse about every quatter of Paris, and every word of the song was pronounced with a crystal-line clearness which penetrated the ear like a trumpet call. Aristide Bruant, who had been allowed to come on as an "extra turn," got a prodigious round of applause when his song was over, and was engaged on the spot at \$20 a night, a large salary in those days. He was smart enough to sign an engagement for one year only, and during that time the "Chat Noir" was packed to suffocation every night with all the "monde" and "demi-monde" in search of a new sensation.

"monde" and "demi-monde" in search of a new sensation.

His Cabaret Successful.

Bruant, who was not deficient in busines talent demanded double his original salary at the end of a year, and got it. At the end of his second year he had saved enough money to start a place of his own. This was the death knell of the "Chat Noir" which valnly tried to replace Bruant by imitators, who copied him in every detail, but it was no use. Bruant's cabaret drew the town. Another stroke of genius on his part was to hurl insults at the head of everybody who came to his show. New-comers were sometimes annoyed or comers were sometimes annoyed or frightened, but they soon learned to enjoy the joke. By charging \$2 for ad-

victs.
One of his greatest successes was his song about "Biribi." the penal settlement for criminal soldiers. This place is admittedly a hell upon place is admittedly a hell upon their black. earth, where the men are treated with ferocious cruelty by their black guardians. Even the most hardened "fetards" shuddered when they Bruant begin:

A Biribi, c'est en Afrique,
Ousque le plus fort,
Est oblige de poser sa chique.
Et de faire le mort.
Aristide Bruant is a millionaire nous
and the owner of a magnificent chaand the owner of a magnificent charteau in Normandy. Age and prosperity have dimmed his eye and softened his voice, and he no longer sings the songs that made him famous. But he is still faithful to his early "heroes." The only difference is that he writes novels about them, instead of celebrating them in verse.

LOEW'S THIS WEEK.

The coming week at Loew's Yonge Street Theatre will find a program liberally supplied with feature attractions. One of these will be "The Maid of Nicobar," a miniature musical comedy with a chorus of cleveryoung women and good comedians. Another will be "The Pardon," with George Drury Hart. This is a thrilling dramatic sketch depicting the struggle of a governor, who would ling dramatic sketch depicting the struggle of a governor, who would follow the dictates of conscience and duty. The third headliner will be "Onaip," originator of the "flying piano." This novelty created a furore at the New York Hippodrome for two years. There is yet to be seen the equal of "Onaip's" feat of suspending a piano and player in midair, on a clear stage with all lights on, and without the use of illusion-creating without the use of illusion-creating "drops" or draperies Other offerings will be Brier and King, with some new songs and dances; Merlin, the talkative card-trickster; Caits Brothers, "The Tailor-Made Boys," featuring Master Lew Caits, the dancing midget. The Taylor Georges, accentric midget; The Two Georges, eccentric acrobats; and others. Photoplays will mplete the program.

Indignant passenger (to railway manager): "Here, I say, I got a cinder in my eye from one of your conder in my eye from one of your confounded engines, and it cost me
four and six for a doctor to get it
out and dress the eye. Now, what
do you propose to do in the matter?"

SUNDAY MORNING

BY Y. NOTT

Most of us cannot hope to be Heroes on land, nor on the sea. It is enough for us to try To be "a decent sort of guy."

The common, ordinary chap's
Not marked in red upon life's map.
It's got to be enough for us
To be "a decent kind of cuss."

Prize packages are rare, you'll find, But don't let that obsess your mind; Just fix your eyes upon this goal, To be "a rather decent soul."

Sam's Soft Pedal.

Even Ald. Sam McBride, the champion long distance speecher of the city hall, strove to call a halt on useless chatter 'tother day. For these

Modern Improvements.

"De mortuis nil nisi bonum," and all that sore of thing; but we would pause to observe that when old Bill Wordsworth chose to picture utter desolation in the form of "a forsaken bird's-nest filled with snow," he had never seen a local option barroon on a Sunday night.

His Devilish Due.

It is likely that when a certain John O'Neil, of the board of control, undertook to stick with Texas Tommy Church for the oig show, he thought that he was to see it rather than be it. Give him credit, boys, he still

Giggle, Gol Durn Ye!

Our Lady kicks if we should go Out with a gent to see the show; We're sore—Ah, such a world as this is!—

Nothing Plainer. Certainly, sir, when an unemployed, tubercular bookkeeper with one leg refuses to undertake the labors of Hercules for a dime a day, it proves conclusively that all of the jobless are a lazy, malingering lot, who divide their time equally between sleeping and dodging work.

Out of Nazareth?

It is a surprising thing that so many great men have come from wretched little villages where a new idea never dares to poke its nose, and still when we look at such places we are convinced that the only thing that could be done would be to come from them.

And it Sometimes Works.

When we are feeling blue as blazes, About the tricks that Fortune plays us, We grin and stand before the glass To fool ourselve

It Is to Laugh. Did you ever watch a fine, fat traveling salesman trying to be a good

fellow, buying temperance beer for the bunch at the willage inn! Life is war-and you know what old Bill Sherman said about that!

There may be something smaller than the small talk of a small town.

There may be, but we have neither seen nor heard it. That's Us.

We are a most contented cuss; When things are bad, they might be wuss. For instance, when we've froze our feet— We're glad we haven't prickly heat.

This Week's Litany.

FROM cigars with punctured wrappers, from old tadies with pink ones, from hotel meals in the "dry belt," from the humor of the village wit, from mutilation by country barbers, from listening telephone operators and from listening to telephone operators, from pious horse traders, from nonalcoholic beer, from deodorized devilishness, from church raffles, from melodeons, from plug tobacco, from the game of checkers, from spats, from cultured chorus ladies, from hair tonics, from noonday dinner, from monocles, from rural iniquity, from British pride, from liver pills and choir politics—Good Lord deliver us,

From the Heart.

Who steals my purse, steals truly trash; Who steals my meal, steals only hash; Who steals my boots, steals chiefly holes, For they have perforated soles.
One theft can fill my soul with wrath— That of hot water for my bath!

We should like to explain to the guy that put the sub in submarine that there is such a thing as overdoing it.

Answers to Correspondents.

ANXIOUS MOTHER, Bolton, Ont .- You ask whether you should let your sixteen-year-old daughter go toboganning with the bank clerk. Sure what it was.

MUSIC LOVER, Kenora, Ont .- We agree with you that there are better methods of converting a perfectly good piano into second-rate kindling than that employed by Ignatz Paderewski. We would suggest an axe, but have no desire to be dogmatic.

The dictionary will explain the meaning of man's uttered words, but what will tell you what he means when he utters them?

We are not sure that we would like to look into the mind of the clergyman who can pray at a hanging-"Forgive us our trespasses, as we forgive them that trespass against us."

The Man from Mimico remarks that, as far as he can make out, "Appearances" are things by which it would never do to judge, but which must, nevertheless, be kept up.

A rural community is one where church and public house enter into competition on the basis of the relative merits of their driving sheds.

Anomalies.

Sam McBride beseeching silence. A lumber jack smoking a cigarette. Tommy Church reading The Telegram under a Hydro light. A debutante eating onions on the night of the Rose Ball. Madame Butterfly, a grand opera, presented by a Canadian company, in which an American naval lieutenant and his Japanese wife warble Wop ditties at one another.

Life's Greatest Pest.

Mosquitoes, tight shoes and discontinuancees of the lighting service must all give place as grouch-producers to the man who sings, "Sympathy" in the bathroom when we are trying to slumber out the blessed Sabbath

Scheme Is Likely.

pened to be a frosty night, and the frost had stuck to my whiskers, and the sister thinking it was a bit of fluff tried to pull it off, and I think she felt as bad as I did when she found out

EVER EMBARRASSED ?

You've been embarrassed, surely. In-to the life of everybody there comes a time when one blushes with confua time when one blushes with confusion and stammers in agony. After ward you laugh over the incident. The Sunday World would like to have you write of your embarrassment. If it is published you will be sent \$1.00.

Write away. If you felt like a nickle you may make a dollar. Address Embarrassment Column, Toronto Sunday World.

She was very literary and he was not. He had spent a harrowing evening discussing authors of whom he knew nothing, and their books of which he knew less.

Presently the maiden asked,

course, you've read 'Romeo and Juliet'?"
He floundered helplessly for a mo-

ment, and then, having a brilliant thought, blurted out, happily:

"I've read 'Romeo'!"

Olive and Gerald, while out walking, met a vicious bulldog, and Gerald's conduct in the next few moments left much to be desired. When they had safely passed Olive turned to Gerald and said, reproach-

"Why, Gerald! And you said you would face death for me."
"I know I did," answered Gerald, "and I meant it. But that buildog

Toronto Should Have a Civic Aquarium; Nothing Would Draw Such Crowds

In Other Cities Aquariums Are More Popular Than Zoos-Thousands of Fish Fans Here Want Well Arranged and Complete Exhibit While Children Would Take Just As Much Interest In It As They Do In the Animals—Easy to Keep and Not Costly to Start.

about the scarcity of sufficient air to breathe, so dense and constant was the crowd.

Never Spends Its

The aquarium is an acknowledged success. Every city that boasts a collection of fish has learned that it is the most popular, as well as the most educational of all free exhibits. An aquarium occupies very little room, and while this city has an embryo collection of fish at the Riverdale Zoo, arranged in a nook of the animal house, no one has ever started to get together a collection worthy a city the size of Toronto.

The people here are exceptionally

worthy a city the size of Toronto.

The people here are exceptionally good fish fans. This is shown by the great interest that is taken in the annual exhibit at the exhibition where tens of thosuands of people spend hours watching the actions and antics of a hundred varieties of the first spend force.

Toronto, today, boasts of a fine park

Toronto, today, boasts of a fine park system, but the city has been woefully behind the times in providing free amusement for the public, its zoo and its art galleries being surpassed by several cities on the continent, of even less pretentious size.

The average Torontonian can listen to as "fish story," with open mouth and wondering eyes, he absorbs the "honest" description of a six-foot trout with a green upper lip that turned red when hooked. Toronto children, while they have a most wonderful knowledge of the difference between multiplication and division, or a baseball and a mask, would hardly dismany would soon become expert in fish lore, for in places where an aquarium is among the city institutions, the children take even more interest in the fishes than they do in the animals at the zoological gardens.

Riverdale or Allan

Gardens Ideal Site. That the removal of the zoo from Riverdale Park to a northern site, that will alleviate the present crowded conditions will empty several buildings that may be used for keeping, during the year round, some of the fish that are so interesting in the fall at the exhibition. Or to get the thing fish that are so interesting in the lain at the exhibition. Or to get the thing started at once a building could be erected in Allan Gardens. It has plenty of space and is central.

To go on with the fish story.

Why hasn't Toronto a representative civic aquarium?

Week the lung breathing mammals in the exhibit were gossiping frightfully about the scarcity of sufficient air to breathe, so dense and constant was the addition to the list—like the arrival addition to the list—like the arrival and the scarcity of sufficient air to breathe, so dense and constant was the addition to the list—like the arrival and the scarcity of sufficient air to breathe, so dense and constant was the addition to the list—like the arrival and the scarcity of sufficient air to breather, so dense and constant was the addition to the list—like the arrival and the scarcity of sufficient air to breather, so dense and constant was the ling breathing mammals in the exhibit were gossiping frightfully about the scarcity of sufficient air to breather, so dense and constant was the linguistic and the scarcity of sufficient air to breather, so dense and constant was the linguistic and the scarcity of sufficient air to breather, so dense and constant was the linguistic and the scarcity of sufficient air to breather, so dense and constant was the linguistic and the scarcity of sufficient air to breather, so dense and constant was the linguistic and the scarcity of sufficient air to breather.

logical gardens in Bronx Park averages about one-third of that of the aquarium. And while this may be in part explained by the better location of the aquarium, it also is largely due to the fact that while a zoo of some description is a feature of the park system in every city of consequence in the in every city of consequence in country there are few aquariums.

Public Flocks When New Species Arrive.

Naturally a public exhibit that ap-I heard some one say, "I beg your pardon," and on looking up I found I had said these words to my employer.

"Henry!" "Mamie!"

My most embarrassing moment was when I was going with my husband as a steady companion. He was always saying he would never marry a waitress, they being all flirts. He did not know I was a waitress until one day he suddenly dropped in and ordered ham and eggs in the restaurant where I was working. You can imagine my content to supposition to an aquarium in Toronto, in fact, many officials have additional fact is noted that the aquarium has never expended its full allowance of \$50,000 a year, provided by the city and spent under the direction of the New York Zoological Society, the pride is easily understood.

But even the amimals at the Zoological galous.

Naturally a public exhibit that appeals every year for seventeen years to over two and a half million people—one-half the population of Greater New York—is pointed to with pride by the men responsible; and when the additional fact is noted that the aquarium has never expended its full allowance of \$50,000 a year, provided by the city and spent under the direction of the New York Zoological Society, the pride is easily understood.

But even the men ment was a quarium has never expended its full allowance of \$50,000 a year, provided by the city and spent under the direction of the New York Zoological Society, the pride is easily understood.

But even the men responsible; and when the additional fact is noted that the aquarium has never expended its full allowance of \$50,000 a year, provided by the city and spent under the direction of the New York Zoological Society, the pride is easily understood.

But even the men responsible; and when the additional fact is noted that the aquarium has never expended its full allowance of \$50,000 a year, provided by the city and spent under the direction of the New York Zoological Society, the pride is easily understood.

But even the men responsible; and when the additional fact is noted that the ap

lic exhibit in the world can boast a finer record, or one more consistently maintained.

It is these most impressive figures that first strike the investigator in considering the importance of an aquarium to the public of any city and its attraction to the annual influx of visitors. Even a much smaller aquarium, in a much smaller community, that situated on Belle Isle, Detroit is already over the million mark. Since 1905 there never has been a year in which the attendance in New York has fallen below 2,000,000, and in 1909-'10 it went above 3,000,000. In 1909, with the Hudson-Fulton celebration to boost it. 3,803,501 persons visited the exhibit. The daily average that year was 10,-420. There have been days when as many as 25,000 people have gone thru the turnstiles to look at the fish.

The attendance at the famous zoological gardens in Bronx Park averages about one-third of that of the squarium. And while this may be in part

There is also quite as much human interest in the population of an aquarium as there is in the population of a zoo. Thus, you may learn from the gentlemanly attendant whenever he has a few minutes between bouts with the visitors, instructing them to check their canes and umbrellas and kindly keep to the right as they pass along, that there are two garpike,, one a common, the other a short-nosed variety, which are 18 years

The Most Exciting Moment of My Life

When was it? Do you still have a vivid recollection of it? Could you tell it so that it would thrill your reader? Was it when she accepted or when you were almost killed or was it the luckiest moment of your life? If it came about in any of these or any other way, just try and write it so that the editor will really be thrilled. If he is, your letter will be printed in the Excitement Column and you will receive one dollar for your part.

DO YOU KNOW A REAL ODDITY

them to check their canes and umbrellas and kindly keep to the right as they pass along, that there are two garpike,, one a common, the other a short-nosed variety, which are 18 years old and still living happily in their tanks; that the good old mud fish celebrated the other day the tweifth anniversary of his birth; that the pearl roach is 10 years old and still chipper; that there is an eight-year-old gold fish, proud of his years and strong for the attention he receives in the aquarium. The old loggerhead turtle is 12½ years old, while his Pacific green brother has reached 15 years without a struggle. We were not surprised to learn that the best helibender, in or out of water.

The largest "muskie" the aquarium ever entertained lived six years, and there were two sturgeon that lived for five years before they got disgusted ham and eggs in the restaurant where I was working. You can imagine my terrible shock. All I said was terrible shock. All I said was meaning, but now I am his some explaining, but now I am his soming explicitly for that purpose an aquarium would be built without department of which I am not very proud and you can imagine my embarrassment when of which I am not very proud and you can imagine my embarrassment when of which I am not very proud and you can imagine my embarrassment when of expense, and the said "Mamie." It took is a splicitly for that purpose an aquarium would be built without department of which I am not very proud and you can imagine my embarrassment when of expense, and the said "Mamie." It took is a splicitly for that purpose an aquarium would be built without department of the small area occupied by an aquarium is one of its greatest talking points, for wille a zoo needs many acres of space, an up-to-date and in every way complete aquarium can be built on a few thousand square feet of land near the central part of the dull things. Of the 3.000,000 the five years before they got disgusted with there were two sturgeon that lived for its artists has a wonderful seem that there were two sturgeon that lived for its artists has a wonderful seem the five years before they got disgusted with the strong in the record he with the strong the record house of the manual visitors, for instance, a competition to five years before they got disgusted with the strong in the record he with the strong the record house of the manual visitors, for instance, a competition to the same old matter of expense. There, is the dull things. Of the 3.000,000 the that if the manual visitors, for instance, a competition to the same old matter of expense. There, is the dull things. Of the 3.000,000 the that if the damnual visitors, for instance, a competition that the there in two disguards there were two sturgeon that lived for the annual visitors, for instance, a competition that the there in the delight there were tweat subst Arthabasca." Miss Kathleen Munn shows delicacy of coloring in her sketch of "A Sheep Pasture," and Miss Marion Long has a number of attractive studies. One dainty pastel, "Russian Ballet," had for its inspiration Anna Pavlowa's marvellous dancing, and in her sketch of "In the Garden," there is a sparkle of summer light and air. "Lady Boy," by Miss Estelle Kerr, a characteristic picture of childhood, is another favorite. Mr. Frederick Challoner, who paints such delightful mural decorations, is represented by a number of miniature pictures. Tho tiny in size, they are brilliant and expressive in action and brimful of life and color harmony. Some new exhibitors, Mr. Arthur Lismer, Mr. Walter Tolles, and Mr. Tom Thomson, have several very attractive

mer, Mr. Walter Tolles, and Mr. Tom Thomson, have several very attractive sketches. Some delicately tinted, typically Canadian scenes are from the brush of Owen Staples, while Mrs. Dignam, president of the W. A. A., is delightfully represented by "Pines and Dunes." Mr. Dudley Ward has several of his striking and wierdly humorous drawings and, as usual, they are some of the most pleasing in the exhibition. "The Elopement," by this original artist, is especially full of character. "Albion's Rocky Coast," by Mr. F. M. Beil-Smith, is full of visorous atmosphere, and broadly handled, and is characteristic of the sincerely beautiful colorings used by this well known artist. Three exquisite water med—News Notes of Artists and Collectors

Tinting the Hair

One of the popular ladies' fashions in Paris just now is to wear hair colored to harmonize with the shade of the dress material worn. Transformations of fawn, green, blue, etc. While this fashion may never become the vogue in Canada, tinting of the hair is already meeting with much favor. Ladies who desire to have their hair tinted will find our facilities for this work unexcelled. We can impart any tint desired to the hair, and our process is absolutely harmless. Our advice is always at your service, free of charge.

Animals In the Home Foster Humane Spirit Among Boys and Girls

The work of the Humane Society ought to commend itself in a manner to women. There are, we know, a good number who are taking an active interest in the work. The society has a fair number of women's names on its roll, but there are hundreds more who might be publicly associated with the cause, and thousands who might carry out its prin-

ciples within the seclusion of the home. Teachers, especially, might draw a delightful and beneficial lesson from the illustration given by Mr. Adam Brown of Hamilton at Convocation Hall, at the meeting of the Humane Society, during the recent visit of the Duke of Connaugnt. Mr. Brown said that in the schools of Scotland a lesson is given daily on kindness to animals. This may not be in general use, but in any case, Mr. Brown followeed up his statement by the recitation of the case of seven thousand of the pupils, who had been so taught, and whose career had been followed, and in no case had anyone been convicted of any criminal offence. On the other hand, two thousand who had not been fortunate enough to have this early training, when questioned on the subject, stated, with but twelve exceptions, that in childhood they had

Woman Can Help Fight High Prices By Making Farm Life Attractive

There is nothing at this moment of such general interest as the high cost of living. Fortunately or unfortunately, we must all eat. Food, therefore, becomes a subject to which thought must be given by the entire community.

Bobbie Burns epitomized the varying attitudes towards food by the men of his times, when he wrote:

done a great deal to improve conditions and make life in the country livable and attractive. Persuading the authorities in their localities to do everything possible in the way of local, improvements, to cover the country with good roads to make the school houses centres from which should go out schemes of many describes her in The Coming National Scriptions for making the neighborhood not only materially prosperous but picturesquely beautiful, to take away from our farming landscape the much difficulty I could get her to say anything at all about herself. Here

The World Window

Toronto's Civic

If the city council and heads of departments are what they ought to be much good should result from the recent municipal survey. It has disclosed many deficiencies and a great lack of order and system. Possibly the investigators may have made some minor mistakes and

inaccuracies and already a regrettable tendency is apparent to fasten on these in order to discredit the whole report. The attitude of the official mind is normally hostile to the introduction of new methods. It regards reforms as tacit reflections on the older regime. It rests content with things as they are not as they ought to be. Therefore, the ordinary official hates to have the public disturbed. Better bury faults and errors than have them recalled and their repetition prevented. Fortunately, the result of the recent survey will be an overhauling of the city's business system, and the establishment of a permanent organization of business men whose aim is not only the improvement of the city's administration, but the creation of a livelier public spirit. Apathy has been largely responsible for the defects of the past.

Our politicians are so busy with the strategy and tactics of party campaigning that they pay little attention to the initiation and enactment of really practical reforms. In this matter of the high cost of living, the fact that the

Politics and Practical Reforms

market prices of nearly all necessaries have steadily risen to an almost prohibitive point is bandied back and forwards in an attempt to make out of it some party capital. That tariffs do not largely enter into the problem is shown by the figures. Britain, under free trade, has suffered from the price advance much less than Canada or the United States, but Australia, New Zealand, and France, all protected countries are in the like favorable situation. On the other hand, it is generally conceded that the leading factor in the high cost of living is the complicated and expensive system of distribution. Carefully prepared statistics have shown conclusively that the expense of distribution more than equals the sum paid the actual producers, a condition which ought not to exist and should certainly be remedied by the elimination of the unnecessary intermediaries between producers and consumers.

Cheap Distribu-Commodities

Every year we are told that large quantities of farm and orchard products are allowed to rot on or in the ground because it would not pay the growers to cart them to the nearest city market. Yet all the time con-

sumers in the cities are paying extravagant prices for similar products and would be only too pleased to have larger and cheaper supplies, which they might easily have, even though the farmers received adequate compensation for their products. It has taken ordinary consumers a long time to realize that they can secure at least a partial remedy by their own act. Men have grumbled and done very little else, and it has been left to the women to devise a practical and practicable method of bringing the farm and the house into closer and more immediate relationship. The Housewives' Leagues that originated in New York, and are now found in all sections of the United States, have become very valuable agencies, not only in food distribution, but in raising the standards of quality and improving sale conditions. They have found, too, the important aid supplied by cheap parcel post service.

Good Roads Necessity

Where efficient assistance can be best rendered by governments and legislatures, is by the provision of good roads. Yet even the improvement of the highways cannot apparently be removed from the party arena. With

good roads and proper facilities for marketing their products, farmers would find it profitable to dispose of all their produce instead of allowing part to waste unused. But many cities, Toronto included, fail to furnish marketing facilities, and not content with that neglect, place every possible obstacle in the way of direct trade between producer and consumer. Markets, say the blockers of reform, will not be used in Toronto. Why should Toronto differ from many other cities in this respect? Free and open markets flourish elsewhere and have proved to be specially helpful to the poorer classes. These recent sales by the Housewives' League of the city show, if proof were needed, that markets where farm produce can be bought at reasonable prices are needed and would be supported.

Ever since the legislature of Illinois granted equality of suffrage the leaders in the movement have been engaged in a campaign of instruction among the women of the state. The result was

Woman Suffrage Illinois

seen in the large registration in Chicago preparatory to their exercising the right of franchise at the spring aldermanic primaries. The campaign managers in that city kept four principal objects in view-to instruct the new voters in the routine of voting, to get 200,000 of them to register, to get that number to vote at the primaries and to see that they also vote on election day. On Tuesday last, too, for the first time in the history of Chicago, about 700 women acted as judges and clerks of election. Naturally, much interest was taken in the registration, and it was found that many women accompanied their husbands to the places of registration, among them being the mayor and Mrs. Harrison. No trouble seems to have been experienced in getting the women to state their ages, and it would be unkind to press the enquiry whether the number of years was in all cases according to fact. It will be more profitable to learn whether the women voters will improve civic conditions,

"IF I COULD ONLY GET 'EM IN LINE"

Public Electric Power for New York State

Ontario's Hydro-electric System continues steadily to expand, with the growing number of municipalities and smaller com munities desirious of starting in its benefits. The scheme of a government-owned main distributing plant supplying power at cost to cities, towns and rural districts, with each carrying out its own service, was in all respects a good one. This not alone, because of the immediate advantage derived from provision of cheap electric light and power, but also because of the training and experience that is being afforded in the conduct of public undertakings. All the dire prophesies of the opponents of the policy of government and municipal ownership and operation have been disproved. Prices have been cut in half and even the companies that professed themselves totally unable to understand how reductions in rates could be made, have shown their ability to survive the strain. But the history of the Hydro-Electric System carries that and other lessons, and discloses the burden which would have been imposed on the public of Ontario had the field been left to unfettered occupation by private corporations.

Ontario's success has had a stimulating effect on the advocates of public ownership in the United States. In New York State, for instance, the conservative commission has prepared three bills relating to the control and development of hydro-electric power. The first measure proposes to give the state power to regulate the flow of streams; to erect and maintain storage reservoirs; to acquire by condemnation process or purchase water rights and power plants and to construct or otherwise acquire property of any nature necessary for the development, transmission and distribution of hydro-electric energy, Power is also given the commission to contract with municipal corporations on public service companies for the sale to them of state-generated power, In his message presented to the New York legislature last month, Governor Glynn pointed out that all water powers allowed to

run to waste was a deterrent to the commercial supremacy of the state.

The second of the three bills deals with the matter of hydro-electric power in the Albany district. It authorizes the commission to develop from the surplus waters of canals and canalized streams and to sell current to municipalities or other customers. This bill carries an appropriation of \$650,-000, of which \$282,000 is to be available in 1914. The third bill is similar to the second, except that it authorizes the commission to construct a hydro-electric plant at any selected point along the line of the barge canal and appropriates \$700,000 for this purpose, of which \$300,000 will be available this year. Upon the passage of these measures the State of New York will be definitely committed to the principle of state generation, transmission, distribution, and sale of electric power to municipalities and other customers that may contract for its supply. As will be seen, the scheme in its main features, resembles that operated by the Government of Ontario.

The Northern Trend

The greatest block of cars during the evening rush hours is not downtown, but at College, Carlton and Yonge streets, an intersection which many still think is uptown. What holds the up-Yonge cars in a jerky-moving string three blocks long is as much the heavily-laden and constant cars crossing Yonge, as the great number of cars that are needed nowadays to carry the people living in the north end. The number of those who work in the west and live in the east, and those who work in the east and live in the west, has, in the last two or three years, rapidly swelled the total of those who treat coming downtown as an

It all drives home the point that Toronto is moving and living farther north. In no time the Carlton and College streets will be cutting thru the downtown district, just as Queen street today traverses the retail section. The changes that mark the northward trend appear small in themselves when recorded in the real estate columns, but in the aggregate they are a mountain of evidence of the new order of things,

CRUSTS AND CRUMBS

By Albert Ernest Stafford

lor's book of poems. "Canadian Seasons." and I did so because it seemed to me to chronicle the actual native-born life of the country, its habits and thought. Its atmosphere and environment. Its facts and its features, better than any book of the kind I had ever met. It would convey to the foreign reader a more accurate impression of what he might expect to find in rural Canada than almost any other book I could mention, and do it in a very simple and charming way. I have been favored with the perusal of another book of Canadian poetry of an entirely different order by Dr. A. D. Watson, which equally well merits attention, the for quite other qualities than Mr. Taylor's. It is significant that within so short a space two such volumes should be issued and I understand Miss Marjorie Pickthall has also recently issued a notable book of verse, the I have not seen it. And I hear besides, that a new Canadian authology has just been published, which I have not got either. Such activity in the poetic world at least justifies me in devoting some space to Dr. Watson's volume. Its title is "Love and the Universe," and it is very handsomely produced by the Macmillan

chords but he, too, has followe way of Demas, though not we heart-clute. It is pleasant to find, then, the present to find in a prophet in Israel, and that Watson, if not in the first rar work a prophet in Israel, and that Watson, if not in the first rar work a prophet in Israel, and that Watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work a prophet in Israel, and that watson, if not in the first rar work, and that watson, if not in the first rar work, and that watson, if not in t

poetic feeling and language. She finds in Dr. Watson one who comes after the "good grey poet." She mentions some of the great masters of the past. "Then Walt Whitman came singing thru the land the chant of the Universal Good and God in everything; and after him arose a perfect flood of the new song in which Poetry found herself at last a being not more of earth than air, not less of God than man, but fashioned. If the earth which bore her, for the uses of evolution, to be new created by the thought of men's hearts, passing from one revelation of truth to another. So, happily, our writers still make odes to lovers but their highest song is dedicated to Love itself. Still are the legends of the gods immortal, but the mightlest theme is God. It is in this newest and greatest guise," says Miss Hale. "that the Spirit of Poetry has come very near and touched the lips of one of our Canadian singers. Dr. Albert D. Watson of Toronto." She characterizes the various classes of the poems, and adds, as I must quote, "finally, for all adorers of that great blossom, the rose of fourteen petals, that even modern Poetry still wears close to her heart, there are sonnets." I rather fancy sonnets my-

who sing because they must are always the more popular, quite irrespective of their merits, but the enduring quality of their fame depends on the technical perfection of their literary gift. The magical power over words is usually a spontaneous faculty or almost spontaneous. It is possible with fine taste to achieve rhetorically something almost as good. It is said that spiritualistic mediums, whose phenomena are quite genuine but whose powers sometimes fail them, are occasionally tempted to eke out the real with imitations and tricks. I feel sure that William Wordsworth was often tempted in this way, and succumbed. And there were other fine imitators who never had a genuine gleam of the light that never was on sea or land, who have set up excellent attempts at descriptor.

that William Wordsworth was often tempted in this way, and succumbed. And there were other fine imitators who never had a genuine gleam of the light that never was on sea or land, who have set up excellent attempts at deception. Like the columns in the city hall they profess to be pophyry, but are only stucce, and reveal their true character in time. I am not soing to say who are the succe poets among the "immortais" of the character behind tinto a hundred lines or less in each reveal their true character in time. I am not soing to say who are the succe poets among the "immortais" of the character behind tinto a hundred lines or less in each extended the porphyry, but it is entired to the porphyry for last the porphyry, but it is entired to the property, but it is less that the first they had been a caster conscience, and repetition of Jacob's wrestling at the did example of this historical sense combined with vivid dramatic effect. In "Israel" there is a striking interpretation of Jacob's wrestling at the fock plant of the control of Jacob's wrestling at the prock jabbok. "Two men contended in the spectral dawn; the man I was valuable material with a stucce in the protect of the protect

petals, that even modern Poetry still wears close to her heart, there are sonnets." I rather fancy sonnets myself.

HE POETS fall into two classes, according to their style, and into two other divisions according to their substance. They are rhetorical or lyric, and they are didactic or creative and descriptive. The lyric and creative need descriptive. The lyric and creative poets have the inspiration of the over-world, and the rhetorical and didactic poets evolve their songs out of their heads, instead of out of their hearts. But it often happens that the substance of their heart finds its channel of expression thruthe head, and much of our cultured poetic expression is of this order, and is valuable just to the extent that the heart inflames it. I think most of the disputes about the pre-eminence of one poet over another are due to the failure to distinguish these classes, or to the preference of the critic for one more than the other. I believe that the creative poets, the heart singers, who sing because they must, are always the more popular, quite irrespective of their fame depends on the technical perfection of their literary sift. The magical power over words is usually a spontaneous faculty or almost as good. It is said that spiritualistic mediums, whose phenomena are quite genuine but whose powers agentalized fall the presence of the chiral apprentice. It is possible with fine taste to schieve rhetorically something almost as good. It is said that spiritualistic mediums, whose phenomena are quite genuine but whose powers agentalized fall the presence of the control of their literary sight. The magical power over words is usually a spontaneous faculty or almost as good. It is said that spiritualistic mediums, whose phenomena are quite genuine but whose powers agentalized fall the presence of the control of the complex of the control of their literary is the control of th

SCENE FROM BARTLEY CAMPBELL'S FAMOUS PLAY, "THE WHITE SLAVE," AT THE GRAND THIS WEEK.

Bartley Campbell's famous play, "The White Slave," will be the attraction at the Grand all this week. The author wrote many excellent dramas, replete with human interest and breathing a pure and healthy sentiment, but none of them exceeded his masterpiece, "The White Slave," in running over the whole gamut of human emotions, touching chords of sweetness with an artist's loving hand

man who would betray her. She escause he is a Kentuckian, but because of his innate villainy and cruelty. That love has no special abiding place, and that hate can live and wrong and do its work in every clime and rule, these are the truths which the dramatist tells. A rich embroidery surrounds the language, and the analysis of a lighter tone to the sombre parts of the play. To sum it up, the work in oappeal to passion or prejudice. The sweetness with an artist's loving hand and changing at times to fitful bursts of passion. In this beautiful story of southern life in the ante-bellum days the writer showed his knowledge of human nature; that real life is not a poem, a stream gliding along between banks of flowers and overarched alternately by the sunlight and the stars. It has its noise and its turmoil; its hours of farce and tragedy; its hates as well as its loves; and he who groups these changes together deftly and from the rude material lying around produces a rich mosaic, harmonious in color and tone, is as much an artist as a Canova or a Messonier. The story of the drama is a simple one. A girl grows up in an aristocratic southern home under the belief that she is an octoroon, and falls a slave into the hands of a
