SIR WILFRID AND THE EXTREMISTS

WHERE LAURIER STANDS

Honored by Women

When a woman speaks of her silent secret suffering she trusts you. Millions have bestowed this mark of confidence on Dr. R. V. Pierce, of Buffalo, N. Y. Everywhere there are women who bear witness to the wonder-working, curing-power of Dr. Pierce's Favorite Prescription—which saves the suffering sex from pain, and successfully grapples with woman's weaknesses and stubborn ills.

IT MAKES WEAK WOMEN STRONG
IT MAKES SICK WOMEN WELL.

No woman's appeal was ever misdirected or her confidence misplaced when she wrote for advice, to the World's Dispensary Medical Association, Dr. R. V. Pierce, President, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets induce mild natural bowel movement once a day.

The Brains of John Bull's Junior Partner.

By Arthur Hawkes.

There are all sorts of funny readings abroad about the firm of John Bull unlimited, and especially about the Old Fellow himself. He seldom takes a good look at himself, and until lately he has not cared a grumme what other people thought of him.

John Bull has regarded himself as a good-natured soul who is taking care of a few bits of land scattered around the globe in the interests of civilization generally, a sort of political philanthropist. The other fellows in the international field don't regard him in the light. They think he is a grasping old coider who, instead of being satisfied with control of all the strategic strongholds of land and sea power, puts up an awful howl as soon as anybody else looks around for a second-rate coaling station, or a bit of rock from which his traders may saunter into a hitherto undiscovered market.

What these people are most puzzled about is the way this old John Bull keeps the affections of his children, who have become his partners. "Why," they say, "he used to declare that they would soon leave him, and here they are closer than ever to the Old Gentleman with the side whiskers and the peculiar pants."

Just so. The way the British Empire keeps together is a regular Chinese puzzle to all sorts of clever statesmen. They can't make it out at Washington. Some times we can't make it out ourselves. This loose, strong, splendid partnership that girdles the world and has none of the ordinary forces of Imperial compul-

sion about it. The Dominion is one of the junior partners.

"Junior Partner" hasn't a very cocoa-whoop sound. It is a bigger name than it looks. Mr. Sifton, in a memorable speech against Reciprocity in the House of Commons put the fact more picturesquely: "The Rising Hope of the British Empire." You know firms with the junior partners become the Pillars of Reliance. The John Bull Unlimited is one of them.

Canada is a miracle within the Empire as the Empire is a miracle among the nations of the earth. The impossible has not yet been achieved. They used to say that you could not allow an overseas Dominion of the Crown to have responsible government in exactly the same way as the United Kingdom. They said that a Colonial Governor should not be compelled to accept the advice of his Ministers when they had a majority of the popular House. But these things are done and the Imperial bond is closer and warmer than it has ever been.

All this means that the obligation upon Canadian statesmanship is more subtle and tremendous than it has ever been. We have established a Department of External Affairs to handle our peculiar three-cornered relationships, but this Department is not specially charged with the duty of keeping our internal population well informed about the niceties of our external relations.

You cannot expect a farmer in the Saskatchewan valley to be well informed about the possibilities of trouble that may lie within our connection with India, Australia and South Africa. He is the great statesman who, knowing all the

intricacies of statecraft, which he cannot publish, can guide the great body of public opinion aright on the big, underlying principles which dominate national action.

The brains of Canadian statesmanship, I mean statesmanship; not the erection of a post-office here, of a bridge there, and the handing out of a job somewhere else, must be directed to making clear the two-fold, fundamental basis of our national progress—the development of Canadian commerce in Canadian channels, and the extending of the right idea of Canadian action. I prestige, in its relation to international and inter-Imperial affairs.

Here is something to cling to, that the English speaking people are the great potentiality in the modern world. They are broadly divided into the Empire and the Republic. In the re-adjustment of influence that is taking place within the Empire Canada is rapidly advancing towards the first place.

Canada has the advantage of being alongside of the United States. From being neglected by Downing Street and regarded by the United States as a very poor relation to be acknowledged by a cup of cold water and a few kind words, she is regarded with almost jealous anxiety by the United Kingdom and the

United States. The remarkable spectacle has been seen of the President of the United States going up and down his country beseeching the people to make a deal with Canada which would secure commercial union with and give to the United States control of the wheat trade between Canada and Europe.

The position of Canada between the United States and Great Britain is the position of the boy in the middle of the see-saw who sends the parties at the end of the plank up and down as he wills. Canada was growing along splendidly from this point of view. The only trans-continental railway of America was ours as a means of expanding our trade in our own way. The Government undertook a second transcontinental, and is heavily aiding a third.

The brains of Canadian statesmanship were required for the fulfilment of the national policies, which were undertaken with so much care and for sight. We needed time to consolidate our force and to bring into national sentiment the aliens to our genius. Instead we are invited to reverse our method for one which the shrewd, experienced leaders of the Republic are sure will deflect the life-blood of commerce into their arteries and make our future commercially subsidiary to theirs.

They have warned us. It is time we warned ourselves.

Mining Investments.

(Boston Herald.)

In copper shores particularly, so dear to the hearts of New England investors, the last three years have witnessed an almost steady diminution of divided returns. The latest reduction is that ordered by the directors of the Wolverine copper mining company, who have cut the semi-annual dividend from \$4 to \$5 share. The primary cause of the smaller distribution is of course the low price of copper metal market. There is, however, another important contributor to reason which investors are prone to overlook.

Mines, strictly speaking, do not pay dividends. They contribute assets. When these which consist of ore reserves, are gone, the life of a mine is ended. The only recourse is to shut up shop or try to eke out a livelihood by smelting the ores taken from nearby mines. The return on mining shares thus should be higher than on railroads or industrials.

There are, for example, outstanding 30,000 shares of Wolverine stock, par \$25 on which \$15 has been paid in. This means an original investment of only \$780,000. The company began paying dividends in 1899, and has disbursed to date to stockholders a total of \$114 per share in 14 years, or a grand total of \$5,840,000 on an original investment of less than \$1,000,000.

The original shareholders thus have little occasion for complaint. For those who brought the stock, however, in 1906 and 1907, at fancy prices, when the dividend was \$17 a share, the situation is different. The mine doubtless has many years of production ahead, but holders of all mining stock must not overlook that their returns are essentially a distribution of assets.

Pigs as Lawn Mowers.

Suburban Field of Usefulness Open To the Guinea Variety.

A curious but successful experiment is being made on a number of private lawns in Kent and is about to be tried by a golf club in the neighborhood of Greenwich. The idea is the novel one of substituting the guinea pig for the mowing machine and the weed killer.

Around the lawn is arranged a low wire barrier and into the enclosure are turned a number of guinea pigs or better a passage is made from their hutch to the lawn. According to the Consul and Trade Reports the animals at once attack all the worst weeds, the paintains first, then the dandelions and daisies.

These broad leaved plants, which no mowing machine will touch, are killed by the persistent cutting of the guinea pig's teeth. When they have finished the weeds which are broad leaved and

succulent they proceed to the grass. In a short time the lawn looks as if it had been cut by the closest machine. The persistent cutting of the leaves kills the weeds, which can stand almost any other treatment, but does no harm to the grass.

One lawn formerly a mass of weeds has been made to grow nothing but the finer grasses. Another is still under process of treatment. The half of it in which guinea pigs were first set to work has been cut quite even and very close. For golfing it is as fast again as it was under the administration of the mowing machine and not a weed is visible. The other half, where the animals have just been turned loose, is a mass of dandelions.

In this neighborhood it has been found that the guinea pigs do not suffer at all by being left to work in winter as well as in summer. Indeed, they are healthier than under the usual treatment of those who keep them as pets. An astonishing demand for the animals has grown up in the neighborhood, and if the inland golf clubs, which have great difficulties with plantains, take to the new method the guinea pig population is likely to go up in the ratio that the natural fecundity of the animal suggests.

Canada's Navy.

How to Tell a Naval Officer's Rank.

Two stripes indicate a lieutenant, an engineer-lieutenant, a surgeon, or a paymaster, always having regard to the gold circle on the uppermost stripe for the lieutenant, or the purple, red or white cloth between the stripes, and no circle for the other branches. Three stripes, of which the middle one is only half the thickness of the other two, indicate a senior lieutenant or senior engineer, a staff surgeon or a staff paymaster; while three stripes all of the same thickness denote a commander, a fleet surgeon, or a fleet paymaster.

A captain has four stripes. Officers of admiral's rank have always one broad gold stripe nearest the cuff, and from one to four thinner gold stripes above it. Thus a rear admiral has the broad stripe and one stripe above it; a vice admiral has two above, an admiral has three while an admiral of the fleet, of whom there are only five on the active list, one of whom is King George's has four. An admiral always wears a signalletter, as do the officers on his staff, such as his flag lieutenant or his secretary.

Midshipmen have no stripes, as they are not commissioned officers; but they have a small square of white cloth of the collars of their coats.

Half Moose, Half Elk.

A Product of a Region Where the Deer Family Congregates.

"No other locality is known where so many of the Genus Cervus are contained together as in Kittson county, in the north-western corner of Minnesota," said Charles Hallock, the sportsman and nature student. "Within an area of less than seventy-five miles are found moose, elk, caribou and the distinct varieties of blacktail and whitetail deer."

The two latter, scarcely ever found together, meet there. The caribou is seldom found elsewhere in company with either of them. There the elk contests the eastern-most limits of his present range, and the caribou occupies the most southern confines of his, while the lordly moose, noblest of the Cervidae, ranges the middle ground of that great northern thoroughfare of migration which reaches from Nova Scotia to Alaska without a break or interruption.

"I have seen a rare freak of nature, a product of that occupancy of a single range by so many different representatives of one genus, which shows the horns of a moose and an elk, each perfectly developed on one frontal bone, but all one antler, half moose, half elk. What the animal that wore these horns was like I was unable to ascertain. I should not suppose though that hybridity would manifest itself in the horns alone. Under the conditions of habitat hybridity would not only be quite possible but even natural."

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Breakwater and Breastwork, Richibucto, South Beach, N. B.," will be received at this office until 4 p.m. on Wednesday, September 27, 1911, for the construction of a Breakwater at Richibucto, on the South Beach, Kent County, N. B.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of E. T. P. Sheven, Esq., District Engineer, St. John N. B., Geoffrey Steel, Esq., District Engineer, Chatham, N. B., and on application to the Postmaster at Richibucto, N. B.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, September 2, 1911.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Why Plants Wilt

If you cut a flower off and put it in a glass of water, it keeps its head up pretty well for a long time. If you do not put it into water at once, it wilts. Why? In the first place, the plant takes up water and keeps it in its cells. In the second place it wilts because it can get no water, and what is in the plant soon leaves through the stomata. That is, the water is pumped out by the dry air and with none to replace it, the plant wilts. Water is all that keeps tender plants or tender parts of trees from wilting or collapsing.

Force water through a hose and it has a tendency to straighten out. Cut off the water force and it collapses. This is exactly what happens when a plant fails to get enough water.

Severed grass soon becomes good hay if it is handled right. Try this for a lesson in hay making. Cut a handful of clover and put it in the hot sun to dry. Put another handful in the shade where it can't dry so fast. In three hours see which is the best hay. Take the handful and twist it in your hands. In one case, the sundried hay will have brittle leaves and green, juicy stems, while the shade cured hay will be more thoroughly cured and not so brittle. It is the best hay and will keep best.

Why?

Asaya-Neurall
THE NEW REMEDY FOR
Nervous Exhaustion
Nervous exhaustion, the ailment of the age, results from the destruction of nerve cells by overstrain faster than they are rebuilt. The only remedy is Food, Rest and increased nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite and digestion, restores buoyancy of spirits. \$1.50 per bottle. Obtain from the following:
Andrew McGea, Back Bay,
W. S. H. Jackson, Portland,
Hills, Condit & Co., St. George.

Good
tea is the result of
care and experience
in blending—must be
the combination of fine
flavor, smooth strength
and richness. Because
all these elements are
so generously included
in Red Rose Tea it
well merits the term
"good tea."

**RED ROSE
TEA** is good tea

THE GRANITE TOWN GREETINGS

Here is a real tea-treat that will surpass your fond recollection of "the nicest cup of tea I ever tasted"!
King Cole tea will truly make an even nicer cup of tea an everyday reality. Such richness, such vigorous fullness of flavor, such pleasant smoothness were never concentrated so deliciously in your tea-cup before.
And the cup you enjoy a month hence will be as nice as your very first sip. Its delicious flavor never varies. You will love it more and more.

YOU'LL LIKE THE FLAVOUR

LORD'S COVE

A large number went by motor boat to St. Andrews Thursday to listen to the address given by T. A. Hartt of that place. Mrs. Minnie Gowan spent Friday in this place.
Mrs. Thomas Barker and Mrs. M. C. Stuart spent Wednesday with Mrs. Sargent at St. A.
The Crescents played their last game of ball on Aug. 16th, this game was played with the professional players from Lake Utopia and proved to be one of the most enjoyable games of the season. The professional players time is his own, but the Crescents being only fishermen and nearly all married men, have to catch their fish first and then afterwards play ball. So when the fish started for St. John the Crescents had to start for there too! Popping that when next summer comes they will be able to play ball again.
Dr. Minor of Calais was called here on Wednesday last owing to the illness of Mrs. James Hadou.
Dr. Bennett of Lubec was called here on Wednesday last to attend Miss George Pendleton who is ill at the home of her aunt Mrs. Luther Lambert.
Ladies from Stuart Town enjoyed the singing here on Sunday evening.
Mrs. G. B. Stuart called on friends at Butlers Point Wednesday last.
Mr. and Mrs. Frank Greenlaw spent Tuesday and Wednesday in St. Stephen where Mrs. Greenlaw is receiving medical attendance.
Mr. and Mrs. I. B. Cline attended the St. Stephen fair.
Rev. Mr. Lambert lead the Wednesday evening service.
Burpee Morang called on M. C. Stuart Thursday last.
Mrs. Chas. Lambert called on her sister Mrs. Calista Stuart Thursday.
Miss Flora Stuart called on Mrs. Thos. Barker recently.
Mrs. Sumner Stuart and son Burton visited Mrs. G. I. Stuart last week.
The little son of Burpee Morang's was very badly bitten by a dog last week.

BEAVER HARBOR

Miss Gertrude Stuart and her friend Mr. Walker of Waltham have returned home after spending a short time with relatives here.
G. W. McKay returned from a business trip to St. John on Wednesday.
A pie social was held in the hall on Wednesday evening. Rev. Mr. and Mrs. Brown and family were present and the evening passed very pleasantly, the pastor taking this time to get acquainted with his people. The proceeds of the social amounted to \$37 which will be used to defray the expenses of Mr. Brown's moving here.
G. F. Paul of Island Falls, Me., is spending his vacation with friends here.
Burpee Bates returned to his duties at Cambelton on Wednesday.
Clifford Nodding, Percy Eldridge and Edmund O'Brien went to St. Stephen on Wednesday.

Frank Dickson attended the Chr. Co. exhibition, returning home on Monday of this week.
Joshua Hawkins and Maurice Eldridge drove to St. Andrews on Nomination day. Several others went there by motor boat.
Mrs. Kennison was the guest of Mrs. Wm. Hawkins this week.
Mrs. Sydney Munro and Mrs. Louise Eldridge spent a day of last week with friends in Penfield.
Whalen, the little son of Mr. and Mrs. Albert Paul is very ill with inflammation of the bowels.
Mr. and Mrs. John Kehoe, of Boston Mass., are visiting relatives here.
A political meeting was held on Friday evening by Mr. Hartt, Conservative candidate and W. C. H. Gimmer, there was a good attendance.
Fred Gillespie of Penfield spent a few hours of Monday in the village.
Miss Shea who was nursing Capt. Dan. Thompson with typhoid fever, was called to her home in St. John by the serious illness of her sister, Miss Gregory has taken her place. Mr. Thompson still remains very ill.
A Liberal meeting was held on Monday evening Senator Gilmer and George M. Byron and G. U. Wright acted as chairman.
Basil Paul returned home on Monday from business trip to Shelburne and other towns.
Mr. and Mrs. Chas. Bennett and Fred Bennett left on Thursday for their home at Stanley Bridge, P. E. I., while here they were the guests of Mr. and Mrs. I. McDougall.
Mrs. Bernard Boyle and son Harold left on Connors Bros. on Thursday. They will attend the exhibition at Fredericton and also visit friends at Weisford and St. John before returning.
Mr. and Mrs. Melvin Mashimney and baby Melba of Macs Bay spent Thursday at the home of Mrs. Elizabeth Barry.
Alberta Wright has arrived home from Calais where she spent a few days. She was accompanied by her grandfather Mr. Wm. Johnson of that place.
Scott E. Morril of St. John called on friends on Monday.
Miss Sadie Brown has been attending the millinery openings in St. John returning home on Saturday.
Frank Kinsman and Victor Sparks left on Monday for Halifax to join D. G. S. "Curlew."
Hayward Sparks went to Eastport by motor boat on Monday.
Harry Budd of St. Stephen agent for Thomas Hartt in the coming election in this district arrived on Monday.
Mr. and Mrs. Allen Paul went to Eastport by motor boat Friday.
J. Melvin Eldridge returned home from St. John on Wednesday.
Capt. John Snow of Digby is here with a schooner load of apples which he is selling at reasonable prices.
"Mary, is there a single good thing about these great wide hats that women are wearing?" "Yes, John, there is; when two women meet they can't kiss each other now."

Novel Potato Party.

The hostess passed to each lady a well washed potato of rather long, slender shape. Then each one was given four small wire hairpins, four small black tacks, two fancy paper napkins with gayly colored borders and a supply of pins. There were scissors and tubes of library paste.
The order was to construct a doll. With prizes to be awarded for the best and poorest specimens, the ladies worked with amazing zeal. This going back to childhood days was thoroughly enjoyed and while none had manufactured potato dolls before, nearly everyone confessed to the clothespin variety, and it was surprising the array of attractive little figures that emerged from the hands of these erstwhile creative artists.
The hairpins were used for arms and legs, the tacks made eyes, nose and mouth, and it was astonishing the variety of facial expressions achieved. All sorts of garments were made from the napkins which were pinned and pasted into shape.
There were babies, children, Japs in kimonos, sunbonnet toddlers, ladies of high and low degree, all acknowledging a common potato for their origin.
The prizes were in keeping with the novelty of the pastime. The first one a large sweet potato pie filled with fluffy meringue; the consolation offering was several quarts of new potatoes in a most charming green basket.

Fortune Founded on Two Revolver Shots.

The Boy Spido, who tried to kill King Edward, now a Member of Brussels Council.
Brussels, Sept. 14.—Should King George of England visit Brussels on his travel next year it is likely that he will be greeted by, among others, a young man who tried to murder his father, Edward VII.
Spido, who was a 15-year-old boy fired a revolver shot into the air perfunctorily near the head of foreign royalty. At the time he was placed in a reformatory as irresponsible and remained there three years. At the end of that period he was not only certified to be sane, but exceedingly clever. During his incarceration he patented four inventions, one of them being the train door handle now in use all over Europe.
Being allowed to join the army, he promptly rose from the ranks, married and established himself in business in Brussels. Next he blossomed forth as a politician of the red flag order. He quickly came to the front, his speeches being heralded as by "the only man who ever tried to kill a king and escaped the vengeance of society." He is now on the high road to the Senate and eventually may be mayor of the city.

The Loneliness of Iceland.

A traveller in Iceland says that he journeyed more than fifty miles from the capital, Reykjavik, and saw only two or three farms in all that distance.
"In all this time," he says, "I had not seen even a sapling. Extinct volcanoes surrounded us on every side. Dust storms swept down from their scarred sides. Distant gleams of glittering ice from the glaciers dazzled us when the sun shone upon them. But here, in a land where there is almost no fuel, and where few crops beside hay and turnips can be raised, I found books and cheerful conversation, an outlook on life and a knowledge of current events which I have not always found in populous cities. There are no schools outside of Reykjavik, for children cannot walk ten miles each way to a schoolhouse, and even such a schoolhouse would accommodate but two or three families. But the itinerant pedagogue goes about from house to house, carrying his store of learning with him, and leaving behind him much intellectual stimulus and a desire to know what is going on beyond the bounds of the island."

These Cool Nights

Remind us that it is time to put on Heavy Underwear. We have Fleece Ld. shirts and drawers, 35, 50 & 60 cents per garment! Unshrinkable Wool Underwear 75, 90 & \$1.00 per garment. Stanfield's heavy unshrinkable underwear \$1.25 per garment. Men's heavy all wool sweaters, 1.50 to \$2.50. Men's and Boy's coat sweaters from 75 cents to \$2.50 each.

China to Build a Modern Navy.

St. Petersburg, Sept. 13.—A Pekin dispatch says that the Ministry of Marine has drawn up its programme, which will give China at the end of seven years a fleet of eight battleships, twenty cruisers, ten smaller vessels and fifty torpedo boats and destroyers. It also provides for four naval arsenals.

Spain Under Martial Law

(Canadian Press.)
Madrid, Sept. 19.—King Alfonso today signed a decree suspending the constitutional guarantees throughout Spain. This is equivalent to declaring the country under martial law.
This act, which has been under consideration for some days, was taken to give the government powers to deal sharply and promptly with revolutionary plans are being furthered under cover of working men's strikes.
Well known Republican parliamentary leaders stand aside from the movement which is Socialist and destructive in character.

Troops Wounded Twenty-six.

Bilbao, Sept. 19.—Troops this afternoon fired on a crowd that was endeavoring to free prisoners, including strike leaders who were being taken through the streets. Twenty-six persons were wounded. The situation is grave.

Canadian Press

Southampton, England, Sept. 20.—The great steamship Olympic, of the White Star line, which left Southampton shortly before noon today with a great crowd of returning American tourists, lies off Calshot Castle at the entrance to Southampton harbor, tonight, with a gaping hole in her side as the result of a collision with the British protected cruiser Hawke. Fortunately no lives were lost and of the 2,000 or more passengers and crews of the vessel no one was even injured. The accident occurred a few miles from the spot where the American liner St. Paul and the British cruiser Gladiator collided nearly four years ago, and, as in the previous case, the warship came off second best, so far as can be ascertained tonight.

The extent of the damage to the liner, however, cannot be decided until she is docked and an examination is made of the rent which the cruiser's ram cut in her side.
Wall Street Brokers go to the Wall
New York, Sept. 9.—The failure of L. B. Wilson and Co., Wall street brokers, was announced yesterday afternoon at the Consolidated Stock Exchange. News of the impending failure caused the circulation yesterday of sensational reports that a large sum had been stolen from a well known firm of bankers.
L. B. Wilson, head of the firm, declared Friday that his financial embarrassment is due entirely to his partner, B. M. Ferguson, who disappeared a few days ago. Besides being under heavy indebtedness to the firm, Mr. Wilson charged Ferguson had falsified the customers' accounts. A general assignment for the benefit of the creditors has been made.

THE GRANITE TOWN GREETINGS

Personals.

Mavor McGee was home for the election.

D. Bassen arrived here on Wednesday and will remain over Sunday. Mr. Bassen has purchased a dwelling house in St. John and intends moving his family there next spring.

Miss Kent and Miss Ethel McNichol spent last week at St. Stephen the guests of the Misses Branscombe, Mildred Todd and Gladys Blair. Miss McNichol continuing on to her home at Cambridge Mass.

Messrs. Mellev and Otto Kennedy arrived home on Tuesday for a few days.

Leo and Louis McGarran who have been at Sylvania, C. B. arrived home on Thursday. Louis expects to return on Monday while Leo will likely remain home for a month or two.

T. L. Simmons of Ottawa spent a few days here this week leaving again on Tuesday. Mrs. Simmons will remain some time longer.

Dr. Russell and family who have been visiting here for the past two months, returned to their home at Buffalo N. Y., on Wednesday.

N. Cameron, wife and daughter Mrs. Fulton who are spending the summer at their cottage at Mascarene left on Wednesday for a week at his home in St. John and while there to cast his vote.

David Nichol of Elmcroft was in town Wednesday, he is selling out his farm stock, machines etc., and has given an option on his farm to the Power Co. and will likely leave for the west in 2 or 3 months where the most of his relatives now reside.

Thos. Magowan who has been spending the past two months with his daughters at Deer Island returned home on Wednesday looking fine after his outing.

Edward O'Neil left last Monday to take in the Fredericton exhibition, and returned via St. John arriving home on Thursday.

Arthur Braudley who has been in the northwest since last fall is expected home to-day (Thursday) and may possibly remain here.

Arthur G. Brown, St. John came here by the morning train Thursday to vote returning again by the afternoon train, he was accompanied back by his mother and also his brother Herbert.

W. M. Maxwell, now of Boston is visiting with relatives here this week.

Everett McKav was home for election.

H. R. Lawrence arrived at St. John Wednesday night from Alberta, called by the sudden death of his mother, he will meet the remains on arrival at St. John Thursday night at which place the funeral takes place to-day.

Chas. Burgess of Boston has been the guest of W. J. Maxwell during the past week.

Frank Smith who was Captain and Coach for the ball team during the summer and who since Labor Day has been visiting friends and relatives at St. John and other places was in town to-day Thursday leaving to resume his college studies.

Mrs. Judson Storey entertained about 20 friends Tuesday evening to a China shower party in honor of Miss Eva Meating.

Josp. Meating arrived home Thursday and will remain for some days.

Elmer McLaughlin came home Thursday. Invitations are out for the marriage of Miss Eva Meating eldest daughter of Henry Meating, to Harold H. Goss, ceremony to take place at the bride's home on Tuesday next at 9 a. m. The happy young couple will leave by the morning train for St. Stephen, Woodstock and St. John, on their return they intend to board with the Groom's parents for the winter.

Major Arnold, wife, daughter and sister who have been the guests of his son camping at the Lake returned to his home at Sussex on Wednesday.

Quite a number of absent town people arrived here this week most of them while here to cast their vote on one or the other side as their various ideas suggest among them are Fred and Edwin Armstrong, Chas. Watson Saml. Austin Jr., and Danl. Matheson who are employed at St. John; Chas. Blaney, A. G. Stewart and John McCarty at Woodland and John Kadley now of Calais Me.

Eldrado Gilmor of Second Falls still continues in about the same condition as reported last week.

BACK BAY

The home of Mr. and Mrs. David Cook was brightened by the arrival of a young son.

Miss Clara Dines spent Saturday and Sunday with her sister Mrs. S. C. Leavitt.

A daughter arrived at the home of Mr. and Mrs. Charlie Hooper on Monday.

Mrs. H. Hanley is on the sick list.

Steamship Business at Montreal.

(Gazette.)

With four ocean liners already arrived in port this week, and ten more in river and gulf, it is estimated that over a million and a half tons of freight will have been unloaded and reloaded in the Montreal harbor before the end of the week. Every vessel, owing to the accumulation of goods in the English ports during the strikes, has her holds crammed from keel to deck, while loads as large as are awaiting transportation for the return voyage here. Millions of dollars worth of goods are already piled up on the wharves and in the spacious sheds of the Harbor Commissioners, and the fact that though the present week will probably establish the record for the season, every thing is running as smoothly on the water front as if only half the work were being done, testifies remarkably to the efficiency of the harbor's facilities. The vessels already arrived this week have a total tonnage of 14,403 tons, and those on the way total 48,211 tons, a grand total of 62,614 tons.

Canadians for Imperial Service.

In military circles the increase in the number of Canadian appointments to the Imperial army is welcomed, writes an English correspondent. "Canadians" said an officer to the writer, "are so eager to make most of their time here and anxious to learn the science of their profession that they receive a ready welcome." The Royal Military College at Kingston has a great reputation on this side for turning out good men. The Official Gazette announces the following promotions of gentlemen cadets from that institution: A. B. Van Straubenzee to be second Lieutenant, Royal Artillery; G. G. McKenzie, Second Lieutenant, Royal Scots Fusiliers; J. L. McLennan, Second Lieutenant Army Service Corps; H. K. Silver, Second Lieutenant, with a view to his appointment to the Indian Army.

Carefully Explained.

"Good-bye," said Mrs. James to her husband, as she left for a short visit to her mother. "I've put everything in order for you. If you can't find anything write me and I'll let you know where it is."

Two days later Mr. James missed a favorite hat of his and wrote to ask where it had been put. This is the reply:

"I think I put it in the wardrobe in the front bed-room, but if it isn't there you might try in the hat-stand drawer, or the hall table. Or perhaps it has fallen behind the dressing-table in our bed-room. I think it's upstairs somewhere. P. S. - Perhaps after all I changed it at the door for some ferns."

Drawing the Credit Line.

(Boston Transcript)

Tailor-1 must have cash down on your wedding suit, Mr. Parks.

Customer-But haven't I always paid my bills on the minute?

Tailor-Yes, Mr. Parks; but remember that after this you won't have the handling of your own money.

Morgan to the Rescue. An Odd Report.

New York, N. Y., Sept. 19.-A cable to the World from Paris says:

J. P. Morgan has been asked by German financial interests to lend part of the money that may be needed to avert any possible panic and failures that may threaten in Germany. Mr. Morgan has agreed to lend the money and at 7 per cent. interest.

The condition is that the German Government accept France's proposals relative to Morocco and the Congo. The American millionaire expressing the opinion that a prompt acceptance of the proposals will of itself go far to relieve the financial uneasiness.
 Such is the wide-spread belief in financial circles here. Bankers and diplomats say that if the report is true it indicates that Germany has been bluffing that she cannot go to war if she would for she has not the sinews of war.
 Latest reports seem to indicate an early settlement of the Morocco trouble.

Tenders Wanted

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Dredging Boutouche Harbor, N. B.," will be received until 4.00 P.M., on Tuesday, October 3, 1911, for dredging required at Boutouche Harbor, N. B.
 Tenders will not be considered unless made on the forms supplied, and signed with the actual signatures of tenderers.
 Combined specification and form of tender can be obtained on application to the Secretary, Department of Public Works, Ottawa. Tenderers must include the towing of the plant to and from the work. Only dredges can be employed which are registered in Canada at the time of the filing of Tenders. Contractors must be ready to begin work within thirty days after the date they have been notified of the acceptance of their tender.
 Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, for five per cent of the contract price which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.
 The Department does not bind itself to accept the lowest or any tender.
 By order,
R. C. DESROCHERS,
 Secretary,
 Department of Public Works,
 Ottawa, September 16, 1911.
 Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

The Tipping Evil.

About the time that two of the largest Chicago hotels announced the desire that guests should not tip employes, the Tribune printed a letter from a travelling statesman, who said that the obnoxious tipping habit is ruining the men who travel on commission. He wrote that tips are expected from travellers by hotel employes of all sorts, and that the cost of hotel room is now what it once was with meals included.
 "The 'American plan' hotel is almost a thing of the past in cities of any size. The traveller pays the old price for the lodging now and must buy his meals extra. This, with the tips to barber, shoe black, waiter, chambermaid and 'bellboy' doubles the former cost of hotel life.
 The spendthrift and greedy tourist abroad has fixed the tipping habit upon all civilized countries, and even the Governor-General of the Sudan has been compelled to post notices to tourists there not to scatter money broadcast among those who do not earn it, and thus demoralize the natives, as was done in Egypt.

The Arms of the Medici.

Few persons seeing the signs of vast wealth of our avuncular relatives in most thoroughfares in London pause to consider their origin. Of course it is the balls of gold to which we refer. Not only may they be taken as indications of wealth, but as a sign that pledges are received. But the balls do not indicate what they really are. They are the arms of the Medici family. Whoever has visited Florence will recall the three balls alternated with the red lilies. But how comes it that the decorations of the Tuscan palace have found their way to London?
 The explanation is not difficult if we give the subject a moment's thought. The first gold changers to settle in London, as in Paris, were the Florentines or Lombards. They chose Lombard street as the place where they would carry on their business. These early settlers are perpetuated today by the bankers. In the early days the inhabitants counted among their number some of the Medici family and to inspire confidence they exhibited their family arms, to which they had a perfect right. The family of Medici is extinct today, but their arms survive them, the present users think the respectability of the origin too greatly to be dispensed with.

Very Latest News About The "Stone of Destiny"

London, Sept. 18. It has been left to the twentieth century to add one of the most amazing traditions to the many surrounding the famous "stone of destiny" which for six centuries has reposed beneath the British coronation chair. The most familiar of the mediaeval legend traditions is that the stone was the one used by Jacob for his pillow at Bethel. Preaching yesterday at Westminster Abbey, Archdeacon Wilberforce astonished the congregation by quoting a well known antiquarian who has specially studied stones as saying that the destiny is also the rock from which Moses struck water for the thirsting children of Israel.

RESULTS OF PREVIOUS GENERAL ELECTIONS.

Standing of Parties After Contests at Polls.

(From the Parliamentary Companion.)

The following is a summary of the Dominion General Elections since Confederation, showing the standing of the parties:

	1867							Total
	Ont.	Que.	N. B.	N. S.	Man.	P. E. I.	Terr.	Total
Libs.	36	20	16	8				80
Cons.	47	45	3	7				103
	1872							
	50	27	10	9	1	0		103
	38	38	11	7	3	6		103
	1874							
	64	33	17	11	2	0	6	133
	24	32	4	5	2	6	0	73
	1878							
	29	20	14	11	1	0	1	76
	59	45	7	5	3	6	5	137
	1882							
	38	17	6	6	3	0	2	72
	54	48	15	10	2	6	4	139
	1887							
	40	32	8	6	1	0	6	87
	52	35	13	10	4	6	0	128
	1891							
	44	35	5	3	1	0	4	92
	48	30	16	13	4	6	2	123
	1896							
	48	40	10	5	2	4	2	112
	1900							
	37	53	15	9	3	4	3	133
	55	7	5	5	4	2	2	89
	1904							
	37	54	18	7	7	1	7	139
	48	11	0	6	3	0	3	74
	1908							
	36	53	11	12	3	2	2	110
	48	11	2	6	1	8	5	81

In 1908 Saskatchewan returned 9 Liberals and 1 Conservative, and Ont. 2 Independents and Quebec 1 Indpt. Alberta 4 Liberals and 3 Cons. and Yukon 1 Liberal.

The members counted in the "Independent" column, in accordance with their own declarations to the editor of the Canadian Parliamentary Guide, are as follows:

W. F. Maclean, York South, "Independent."
 W. Russell, Toronto East, "Independent."

THE POPULAR VOTE.

According to a statement compiled by the Clerk of the Crown in Chancery, the popular vote by province, in the general election of 1908, exclusive of the Yukon, was as follows:

	Lib.	Con.
Ontario	224,821	236,019
Quebec	158,393	129,634
Nova Scotia	56,588	54,500
New Brunswick	40,716	34,945
Prince Edward Island	14,496	14,286
Manitoba	30,915	37,149
British Columbia	13,412	23,956
Alberta	23,777	22,185
Saskatchewan	33,415	25,997
Total	596,533	579,571

In the foregoing table all independent candidates are classed as in opposition to the successful candidate and an analysis of the vote, according to the stated predilections of the candidates makes the result stand: Liberals, 587,664; Conservatives, 563,547; Independents, 54,893.

The qualified vote in the constituencies of South York, Ont., Rouville, Que. and Comox Atlin, B. C., where the elections were by acclamation, was not taken into calculation in the above.

Slopin, the Russian Premier who was shot last Friday by an assassin died on the 18th, much interest is now displayed as to how the Czar will fill the vacancy.

MC2465 POOR DOCUMENT

THE GRANITE TOWN GREETINGS

Distressing Headaches.

Headaches are largely the result of disordered kidneys. Mrs. Hall, 84 Flora Street, St. Thomas, Ont., says: "I suffered for years with a most distressing nature. They would come on me suddenly, and would last for days at a time. These were usually accompanied by spells of dizziness that would leave me unable to attend to my house duties. My back was weak and caused me much suffering through the night. I had doctored for years, but all to no avail. Nothing benefited me and my condition was gradually becoming worse. I learned of Booth's Kidney Pills. One box gave me a complete and lasting cure. I have not had a headache or dizzy spell since and I feel like a new person again."

Booth's Kidney Pills are sold by all druggists, etc. box, under a guarantee to refund your money if they fail to relieve any disease having its origin in the kidneys or bladder. Postpaid from the R. T. Booth Co., Ltd., Fort Erie, Ont. Sold and guaranteed by J. Sutton Clark.

Why Germany Wants Morocco.

The iron supply of the world is rapidly dwindling. A statistician, writing in the *Centralblatt der Huette und Walzwerke* (Berlin), the organ of the German iron industry, calculates that in ten years England's iron ore will be exhausted. Even the United States, which yields a third of the 100,000,000 tons mined through out the world annually, cannot keep up her yield for more than fifty years. Germany has a supply, we are told, for thirty years, France for seven hundred years. Far-sighted Germany, according to the *Continental Correspondence* (Berlin), is therefore turning her attention to other foreign deposits. It has been discovered that there are large beds of iron ore in southern Morocco. Hence the obstinacy with which the Kaiser's Government hangs on to Agadir, the hinterland of which abounds in ferruginous deposits.

An Historical Bank Run.

One of the most exciting bank runs in history was on an English bank, but not in England. Down in Buenos Ayres, the English have the management of the most of the financial institutions. In 1891 Buenos Ayres saw a series of bank runs during which every Spanish bank in the city closed. But the sturdy Englishmen kept open their "London and River Plate Bank," amid scenes of the most exciting panic. Thousands of persons lined up, but still the English cashier paid out money, calmly. Finally, in the afternoon the English manager announced from the balcony, the victory of the bank over its enemies, amid the tumultuous applause of thousands. Argentine finances were saved, and what looked like a great South American revolution was ended by the placid Anglo-Saxons.

Harold Hates It.

"Mother," said little Harold, "Didn't father say yesterday that we must save money?"
"Yes, dear."
"And he would like me to help, would he not, mother?"
"Yes, dear."
"Then, mother, I've got an idea that'll save quite a lot of money."
"What is it, Harold?"
"Why, you wash me two or three times a day, mother don't you?"
"Yes."
"Well, look what a lot of money you'd save if you only washed me once a month. I wouldn't mind it, mother, really I wouldn't!"

When the Duke and Duchess of Connaught sail for Canada on October 6, they will be accompanied by the following staff:—Major H. C. Lowther, G. M. G., M. V. O., D. S. O. (Scots Guards), Military Secretary; Capt. T. H. Rivers-Balkeley, G. M. G., M. V. O. (Scots Guards), Controller of the Household and Esquary; Capt. W. Long, D. S. O. (Royal Scots Greys), Aide-de-Camp; Capt. H. C. Buller (Rifle Brigade), Aide-de-Camp; and Capt. E. S. Worthington, M. V. O., R. A. M. C., Medical Officer.

CAMEO KIRBY

W. B. M. Ferguson

Copyright 1909, by the Amalgam Magazine Company

They refused to corroborate the falsehood. "No, sir," he said sternly. "We have a better way."
Tom, abandoning himself to rage and chagrin, turned upon M. Veaudry and Aaron. "You cowardly snobs!" he cried. "You go back on me now when I had this man where I could pay him what I owed him. There are twenty men around this house who would stamp his life out like a rattlesnake. Give me that pistol!"
"Give him the pistol. Give him forty," added Kirby, hotly as Judge Pleydell hesitated. "I'll teach you to skulk behind trees and rob a dead man, to swear a murder on me," he added passionately, turning upon his neighbor. "I am clear of your lies. I am within the law now, and you are outside it. Take your pistol, and in your friends to help you, and I'll make it!"
"No! No!" cried Adele piteously. He turned, nastier than an effort his bitter passion. "And," he finished curtly, with a formal bow, "I will make them welcome. It shall never be said of me that I was inoperative in my own house."

Obnoxious to the others, his declaration had been aimed at Adele, and, despite the suave courtesy with which it was delivered, she was acutely conscious of a certain bitter undercurrent of irony in the words, reinforced by the sardonic challenge of his eyes. "Your own house," she echoed slowly. "Did you say that?"
"It is mine tonight."
She stared at him, wide-eyed and tremulous with sudden fear and horror, as if the phantasmagoria of some hideous dream, a being whom she had swiftly learned to cherish, had in a breath turned into a venomous reptile, its wicked head drawn back to strike.

"There is only one man in the world who could make that claim," she whispered, choking over her own words, as she still stared with horrified fascination—"only one man in the world who could make that claim!"
"Don't you see who the scoundrel is?" cried Tom, with brutal contempt. Kirby bowed gravely to Adele Randall.

"Come Kirby—at your service, madam. I told you the bad prime always stayed too long," he added sadly, bitterly.

CHAPTER XIII.

IMMEDIATELY following Kirby's dramatic denunciation Adele had given a little cry and promptly fainted, while her brother attempted another ineffectual assault upon his enemy. With difficulty he was hauled out of the room by Aaron and M. Veaudry before blood was shed. Kirby, being in no humor to stand further insults from his accuser, then Adele was escorted from the room by old Mammy Lena, Croup's wife, while Judge Pleydell remained the balcony and dismissed the patiently waiting posse.

Unwillingly the posse dispersed, some returning to New Orleans, while the indelible old judge retired indoors and sought his two friends, leaving Kirby and Huncie in undisputed possession of the ground floor. "Well, gentlemen," began Pleydell in a businesslike voice, "there is only one thing to be done, and that is to adhere to our original plan. It is no time now to deplore our mutual blindness. The fact remains that that d—d low gambler has claimed the plantation, as we expected, though I admit he took an unusual for and devilish roundabout method of doing so."

"If I had had any help he wouldn't be here now," interrupted Tom Randall sullenly, glowering at Aaron and M. Veaudry. "I'll fix him yet!"
"Not you alone, but the four of us," corrected Pleydell, "and we'll give him a fairer chance than he deserves, with the meantime, Tom, you must control yourself and keep out of his way until the ladies have left the house, for no violence must be indulged in in their presence. Your poor sister has stood about all she can bear, I reckon, though I'm glad she discovered in time the true character of that designing villain!"

"You mean to insinuate that he despises us?" asked Tom, springing to his feet in a fresh access of fury.
M. Veaudry laid a restraining hand upon his arm. "It is that I do not think Mr. Kirby has acted as other than a gentleman to a lady," he said pacifically, glancing significantly at Pleydell.

"Gentleman?" sneered young Randall. "As if he knew the meaning of the word! But if he had dared to address Adele I would go down now and—"
"You must learn to control yourself, sir," interposed the judge, somewhat testily, irritated at the boy's mad outburst. "I think you can safely leave the honor of the family in the mature

and capable hands of your cousin. You have misinterpreted my words," he added, ignoring the other's shrug at the mention of Aaron's supposed abilities. "For Amole is quite right. Mr. Kirby evidently has one virtue he knows his limits—and your sister is not one to be impressed by such a character even if masquerading under such an honorable name as Colonel Moreau. To return to the real theme, is it agreed, then, that we adhere to our original plan?"

As Tom sulkily refused to speak, Aaron asked gravely: "You mean that the ladies go to your plantation, Judge Pleydell, while we remain for the ostensible purpose of formally handing over the estate to—that man? The ladies are to be kept in ignorance of our real purpose?"
"I'd shoot him and be done with it," snarled young Randall. "He'll slip through your fingers again—see if he doesn't!"

"Yes, the ladies are to be kept in entire ignorance," agreed Pleydell, ignoring the boy's observation. "Likewise M. Veaudry and I are to be concealed who accompanies him—no warning, mind, for they are desperate characters who hesitate at nothing." Miss Adele was naturally aghast at the idea of remaining under this roof one minute longer than is absolutely necessary. To complete our ostensible purpose before the servants we are leaving, here to return, and let Miss Adele pack up and take with her such things as belonged to her mother and upon which this scoundrel can have no legal claim. By the way, we must assume charge of Colonel Moreau's portmanteau, with such effects as it may contain. It is our duty to inquire if he left any next of kin and to return his belongings to them. Poor gentleman—no honorable, citrations and claims. I regret that I had not the extreme honor of meeting him while he was yet living."

As a guest of the portmanteau, Aaron entered the deserted drawing room Kirby, pacing the balcony, haled him from the window.
"Mr. Randall, if you think that excitable young cousin of yours is ready to listen to me there's something I've got to tell him," he said quietly, mastering his irritation.
"It is our intention that you shall see him, sir, as the ladies have gone," replied Aaron, with a significant look on the other.

"When the ladies have gone?" echoed Kirby, entirely without comprehension, for he had never contemplated such a move.
Mr. Randall nodded.
"Mr. Kirby," he said coldly, "in lieu of honor to the dead man who has lost this place to you his children do not oppose your possession. But you can scarcely imagine they would be willing to see the night under this roof once you had claimed it."

Without comment Kirby returned to the balcony. He looked old and careworn, but the words had struck him to the quick. Twice within the past hour he had sent a request for an interview to Adele, and as yet she had made no answer. This then, was the explanation. Evidently he was to be denied a chance to see her to look upon. He did not greatly wonder, for he could never see the memory of her beautiful look and cry when the mask had fallen and the bad prince stood revealed. After all, the penalty for his remaining had been immensurably greater than he had anticipated.

Meanwhile Aaron had bent over the portmanteau, which still lay open upon a chair as Judge Pleydell had left it. In searching for Colonel Moreau's Derringer the contents of the suit case had been somewhat disarranged, and the methodical Aaron now withdrew a badly crumpled coat, intending to fold it neatly before replacing it. As he did so a red morocco box fell from one of the pockets. Aaron, about to return it, suddenly started and held it under the light of an adjacent lamp, for the inscription on the lid which had arrested his attention was: "Margaret Randall to her husband, John Randall."

"Margaret Randall—that was Adele's mother," he exclaimed in wonder.
"What is that?" asked M. Veaudry, entering the room and noting the other's interest.
"Something that fell from Colonel Moreau's portmanteau," replied Aaron, opening the box and examining its contents. "You see, it is the miniature of Adele's mother that that gambler won the night he won the plantation," nodding to the balcony where Kirby could be heard pacing back and forth. "You know he got even my poor cousin's jewels. This is set with diamonds. Look—half of them are gone."

"To the pawnshop, eh?" ventured M. Veaudry. "Yet you found it in Colonel Moreau's portmanteau? It is very strange. How has it come there?"
"No one knows but Colonel Moreau, and he can't answer anything now," said Aaron solemnly. "You better give this box to Tom."
Like his older brother, the General has proved an unwilling participant in Judge Pleydell's maneuver. The child strongly disapproved of the idea, for he was now summarily hauled out of bed and forced to exchange the known comforts of that article for the doubtful accommodations of the drawing room sofa.

"What for do they make me get up in the middle of the night?" he sleepily demanded as Croup made up the impromptu bed in the now deserted room. "What for do they dress me again?"
"Y's gwine to Judge Pleydell's plantation, honey," patiently explained the old servant for the tenth time. "Dey go'n pack up all y' 'fitt' clothes an' all dem toys y' had when y' was a baby. Dey ain't gwine to 'sturb y' so much hyah."

"But I don't want to go to Judge Pleydell's plantation," peevishly protested the child. "Aren't we ever coming back here to live again?"
"No, I don't hardly expect so, if I marse. Yo' kaint stay no mo' hyah, honey, an' ole Croup kaint go nowhif y' 'fitt' all's no mo'. Ole nigger got a new marse now. Yo' must sleep honey. I wake yo' when dey ready. If' marse, Heeh, honey, heeh!" And Croup lightly tiptoed from the room as the General nodded drowsily and then closed his weary eyes.

And thus Kirby found him. As if conscious of the other's gaze, the boy instantly awoke with a start and sat bolt upright, throwing off his impromptu covers.
"I've got to have a talk with you," he said gravely. "No! I won't go to

"THEY ALL HATE YOU, DON'T THEY?"
sleep, and if you leave I'll get up. I want some more light. I'm going to have some things the way you want them."
Recognizing that flight was useless and that the child was in deadly earnest, Kirby obediently turned up the lamp.
"It strikes me," he said mildly, "you'll very very near getting a good many things the way you want them."
"You come and sit here," peremptorily ordered the General, pointing to a stool beside the sofa. And again the man obeyed. For a moment the child was silent, gravely contemplating his pseudo heir. "What is a d—d low gambler?" he suddenly inquired.

"It's what some people call me," replied Kirby after a pause. "I'm sorry they do it before you."
"They don't like you any more, do they—specially Dele?" He all at once

\$100 REWARD, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Take Hall's Family Pills for constipation.

A Vacation Jaunt to Alaska And The Yukon.

One of the most delightfully interesting and scenic trips available during the vacation days of college life may be enjoyed by the student who is privileged during the summer months to visit the mountainous districts of the Yukon Territory, via the Pacific coast and Alaska. If pleasure is to be derived from actual observation of nature's great forces at work among mountain chains and valleys, in canyons, rapids, tortuous rivers and immense fields of glaciers; or if it be a joy to watch a struggle which is fast changing a country from a frozen mass of mountain chains and disorganized valleys into a land of wealth, enterprise and a high civilization, there is certainly no spot more ideal than this northern land.

Of the journey from the east by the C. P. R. lines to Vancouver on the Pacific coast nothing new can be written, although to the traveler who crosses the prairie country and the gorgeous Rockies for the first time there are wonders in store which are ever new. Equally interesting and still more pict-

uresque is the June passage up the Pacific coast from Vancouver to Skagway, Alaska. Here one can enjoy an ocean journey of 1,000 miles almost entirely through beautiful land-locked inner passages in which the influence of the Pacific waves is seldom ever felt.

On either side of the route, for hundreds of miles along the coast, tower the snow-capped peaks and ranges of the coast mountains, presenting a grander and more imposing view as the journey progresses northwards to the latitude where the first glacier begins to drift oceanwards. Here, too, following the progress to the north, the snow-line is observed to creep farther and farther down the mountain slopes from an elevation of 6,000 feet along the southern British Columbian coast to about 1,000 feet along the coast of Alaska. This lowering of the snow-line is followed by a gradual change in temperature and the influence of the north country winds is more keenly felt.

A change in the phenomena of nature more marked still is the shortening of the hours of the night. Darkness descends more and more reluctantly from evening to evening, fading gradually in twilight, till at Skagway the break from day to day is barely noticeable.

At Skagway, the gateway of the Yukon, the real novelty of life in the north begins and we drink the first draught of a gold fever which has lingered in the atmosphere since the alluring days of the early eighties. Mountains capped in perpetual snows rise abruptly for thousands of feet from all sides of the cozy little valley in which the comfortable town of Skagway is situated. It is a matter of some surprise to the traveler to learn that the White Pass & Yukon Railway here begins its route over the summit, through northern British Columbia to White Horse, Yukon Territory, the connecting point between the railway and Yukon River steamers.

Upon arriving at the station one sees a peculiar novelty and fascination at every turn. The bulletin nomenclature has a flavor of the mountain snows, and glacier views are everywhere prominently displayed.

The general make-up of the White Pass & Yukon Railway is very interesting. Passenger cars are tiny, but neat and comfortable, track narrow gauge and engines especially designed to afford high power and friction at the expense of speed. Freight and passage rates on this route set the pace for the Alaskan prices. Issued tickets call for twenty cents a mile, while freight charges vary from \$40 to \$80 a ton. It is not a surprise to learn that this is the best paying railroad in America, and history affirms that the first sixty miles had paid for their construction while the remaining fifty two miles were being built.

The old prospectors who have outlived the famous Klondike rush still remember when freight on rails over the summit was charged at the compromising rate of fifty cents a pound.

The journey over the summit of the coast mountains to White Pass, a distance of 20.4 miles, will never be forgotten by the traveler who has any appreciation of a steady climb by rail up, up, up the precipitous sides of wild and rugged mountains. Leaving Skagway with the sun shining and the flowers in bloom, the passenger is within one hour at an elevation of 2,800 feet above sea-level, amid perpetual snows. The construction of such a track, the tunnelling of mountain slopes and bridging of the fearful abysses and canyons are monuments to human skill and inexhaustible energy.

All along the route to the summit the old pack trail over which thousands of prosperous toiled to the Klondike in the early nineties is plainly visible, some times in the sloping talus heaps along the mountain bases as well as through the timber patches hundreds of feet below, with here and there a rudely-constructed cabin standing as a reminder of the severities endured during makeshift days.

Just before reaching the summit at White Pass station the train passes through a tunnel, thence over a steel cantilever bridge 215 feet above the bottom of the canyon. The view obtained here is one which will always live in the memory. In a few minutes from this point White Pass station is reached and the train pulls into Canadian territory. Here the flags of two nations float side by side over the international boundary line guarding the commercial affairs of the United States and Canada.

From this point to Carcross, a distance of about twenty seven miles, the train ride is most beautiful, the rails following closely the east shore of Lake Bennett along mountain sides which rise abruptly out of water.

At Carcross the train passes over a swing bridge which is noted as the most northerly swing bridge on the American continent. Here the passengers for Astin district, northern British Columbia, leave the train to join the lake steamer Cleaner, making bi-weekly trips up Tachish Lake and Taku Arm into Astin.

Carcross is a fascinating little town consisting of two hotels, about twenty small residences and cabins, the station and the Lake Shore plant. Sitting on the verandah of one of the hotels at 11.30 p. m. on a bright day in June we pen in the twilight our first letters home. At this season there is no darkness, only one and a half hours of twilight.

By J. Lanning.

MOTHERS! Preserve Your Children's Hair.

Every mother should see that her children's hair is dressed with Parisian Sage, the wonderful hair restorer and germicide. A little neglect on your part now, may mean much loss of beauty when your girl grows up.

Prevention Better Than Cure.
Parisian Sage is a rigidly guaranteed hair restorer and cures all scalp diseases, prevents hair from falling out and creates a rich luxuriant growth of hair, a glory to woman and the pride of man.

A pleasant hair dressing—ladies like it, and your druggist J. Sutton Clark guarantees every bottle that he sells at 50c, and stands ready to refund your money if it fails to do its work. By mail postpaid from Giroux Manufacturing Co., Fort Erie, Ont. See that the girl with the Auburn hair is on every package. Sold and guaranteed by J. Sutton Clark.

Self-denial of Parents.

Parents, as a rule, feel it their duty to give their children all the advantages in their power, and, although it is no special credit to them that they do so, there is a thing like parents denying themselves too much in order that their children may have fine education. Mothers will slave and work themselves old long before their time in order that their girls may have accomplishments, which, although they afford pleasure are of no profit to them. Fathers spend their hard earned money on college education for their boys, and too often make mere fools out of them. Then, if there is no nobility in the nature of their children they return no thanks for all this self-denial on the part of their parents.

It is no doubt a pleasure for a parent to have an ambitious child and to see such attending his efforts. But then it is sad to see such a child ignore the kind parents, who have worked so hard that he might attain his ambition, just because they speak in simpler accents and their manners are not so polished as his own. This is not always the case, and happy are the parents whose children are so noble that they never tire in returning love for all that they have sacrificed for them, and proudly display their parents when an opportunity presents. "This is my mother" or "my father" always brings a smile of happiness to the face of the beloved parent.

To give the younger generation all the advantages which can possibly be afforded is indeed a duty to the parents, but in order to keep the youth among them and not efface themselves entirely for the sake of the children. To become prematurely old for the sake of the children is not a parent's duty, and no child will countenance such a procedure if he has a conscience.

For Sale

14 tons of hay, 3 milch cows, 2 beef cattle, 3 young cattle, 1 Horse five years old weighing 1600 lbs., 1 truck wagon, 1 top buggy, 1 express wagon, 1 pump, 3 sets of harness, 1 single mower, 1 harrow, 1 horse rake, 1 hay cutter, 1 pitching machine, 2 sets of bob sleds, 1 long sled, 1 cream separator, 1 organ with the rest of my household furniture.

Manager LEWIS CONNORS
Blacks Harbor, N. B.

Ottawa, Sept. 14.—A bulletin on the field crops of Canada issued today gives their average condition by provinces at the end of August, together with estimates of the production of spring wheat, oats and barley at that time. The per cent condition of wheat is given as 86.80, of oats 81.44 and of barley 84.73, which is about five to seven per cent higher than last year and nearly the same as two years ago. The other crops range in condition from 80 to 86 per cent and are generally somewhat lower than in 1909 and 1910. The rains of August hindered the ripening of grain and some injury was caused by hail storms, low temperature and rust. Towards the end of the month frosts prevailed in many sections of the Northwest provinces, the full extent of which could not be determined at the date of the reports, but in the case of wheat, oats and barley production was lowered by probably 12 per cent, which has been followed in table. In the older provinces the grains ripened earlier and little damage was sustained excepting from drought in some localities, and the reported condition was 75 or over.

The average yield of spring wheat is estimated at 19.14 bushels per acre for the Dominion, which is seven bushels more than last year, and the total yield at 186,928,000 bushels. The fall wheat was reported last month at 17,706,000 bushels, being grown almost wholly in Ontario and Alberta. The total wheat yield of the country is therefore estimated to be 204,635,000 bushels or \$1,849,000 more than last year at the same date, and the average at 35.81 bushels per acre, being more than last year by 7.10 bushels. The average for barley is also higher than last year by 7.31 bushels, and the total yield is estimated at 51,559,000 bushels as against 39,388,000 bushels for last year.

The estimated yield of spring wheat for Manitoba, Saskatchewan and Alberta this year is 181,535,000 bushels, of fall wheat 3,193,000 bushels, of oats 204,758,000 bushels and of spring wheat, 1,082,000 bushels of fall wheat, 92,201,000 bushels of oats and 14,723,000 bushels of barley in the previous year.

In Prince Edward Island, Nova Scotia and New Brunswick the estimated yield of spring wheat is 1,453,000 bushels, of oats and 2,389,000 bushels of barley; and in Ontario 2,165,000 bushels of spring wheat, 14,513,000 bushels of fall wheat, 102,077,000 bushels of oats and 18,528,000 bushels of barley.

The final estimates of last year printed in the December Monthly gave the production for the whole country as 16,610,000 bushels fall wheat, 133,379,000 bushels spring wheat, 323,449,000 bushels oats and 45,147,600 bushels barley.

The October number of the Census Monthly will give the statistics of the areas of held crops of the Dominion this year as taken by the Census of the first of June.

Revolutionary Spirit in Spain

Madrid, Sept. 14.—Strikers are breaking out all over Spain. They are of a revolutionary character, and the Government shows signs of grave alarm. The Constitution was suspended yesterday at Bilbao, and to-day at Vizcaya. Fights are occurring frequently between the troops and the strikers, especially at Bilbao, where 5,000 soldiers have already been concentrated and more are arriving.

Pablo Iglesias the Spanish Socialist leader, and Rodrigo Soriano, one of the most prominent Republicans in the country, both members of the chamber of Deputies, are at the head of the strike movement and are doing their best to give it an anti-Monarchical complexion.

To add to the Government's troubles, there are fresh signs of hostility on the part of the natives of the Spanish sphere of influence in North Africa.

It is officially announced that a Spanish colonel and fifteen men were killed in a battle on Kert River. The native losses were much heavier, but they are still undisclosed.

Should Spain become involved in a fresh unpopular African campaign at such a time of unrest at home, as at present, the consequences would likely be most serious.

A Bad Stomach.

Mrs. S. Keast, of Clarksburg, Ont., says: "A bad stomach trouble that had bothered me for years, baffled and puzzled skilled physicians, was nicely relieved by Mi-o-na. My food would not digest but fermented in my stomach forming a gas that gave me untold suffering and pain and also made me weak, nervous, irritable and unable to rest. Since using Mi-o-na I can go to bed at night and sleep and wake up in the morning refreshed. I cannot speak too highly of Mi-o-na.

The dyspeptic nervous or other wise, who does not give Mi-o-na a trial is losing an opportunity to regain health, for Mi-o-na Tablets are guaranteed to cure dyspepsia and all stomach disturbances, such as vomiting of pregnancy, sea or car sickness and the stomach sickness after excessive indulgence. All druggists, 50c. or from the R. T. Booth Co., Ltd., Fort Erie, Ont. Sold and guaranteed by J. Sutton Clark.

Case of Blind Justice

Peasant Convicted of Murder He Never Committed

The sum of \$6,000 has just been awarded by the Cher Assize Court in France as a compensation for seventeen years' penal servitude undergone by a peasant named Charles Michaud, who received a life sentence for a murder he did not commit.

A rich old peasant farmer was murdered and Michaud, a neighbor, was convicted, chiefly on the evidence of a necktie which had belonged to the dead man and of some stains of his clothes supposed to be blood. Michaud protested his innocence throughout and declared that he knew nothing about the tie and that the stains were caused by cider. He was convicted and sent to French Guiana for life.

While he was there a fellow convict confessed or rather boasted that he had committed the murder. This man later succeeded in escaping from the penal settlement, but newspapers having taken up his case and found confirmation of his story, the Court of Cassation decided that his confession was the necessary new fact which would allow it to set aside the condemnation and order a new trial.

Michaud, who was twenty-nine when convicted, is now forty-six, but looks like a broken down old man. His wife always convinced of his innocence, was present at the second trial. His counsel asked for \$20,000 damages, but the court

awarded \$6,000 and the awarding of the judgment.

Boot Economy

When buying boots, cheap or expensive, many coppers can be saved by rubbing the soles and heels with a little boiled linseed oil. The oil hardens the leather, and keeps the wet from penetrating to the feet. The process must be repeated every other evening till the leather will absorb no more oil.

New shoes should be allowed to stand overnight in a pan in which just enough olive oil to cover the soles has been poured. They will last much longer and will never squeak.

To take axle grease out of goods, rub the spot with lard. Rub the goods in the hands as if washing, let stay in three hours, then wash out in cold water, using plenty of soap.

Sharks Prefer Whale.

Mr. Frank T. Bullen has introduced to a Hull (England) audience to the delights of whaling. It was a singular thing, he said, but he had never seen or heard of a shark attacking a man when there was a whale about. He had seen a man washed off the back of a whale, and although there were 200 or 500 sharks busy all round the whale, they never paid any attention to him at all. A mere miserable morsel of a man was no use to them when there was a whale about. He spent the whole of one Christmas afternoon until sunset on the back of a whale which in rolling, had wrecked their boat. They well, the sun dries the leaves in a crisp the first thing, so they can't pump the water out of the stems. The shark could have had a chance to stay green long enough to quite thoroughly pump the water from the stems through the leaves before they wilted.

So if you want good hay, don't lay it out thin in a hot sun. Better soon rake it into loose windrows, so the bulk of it will be shaded and the wind can go through. Any hay will keep if it is cured, so you can't wring any juice out of the stems when you twist a hay-stalk.

"John," she said gently, "you are interested in temperance movements, are you not?" "Of course I am," he answered. "Well, suppose you go and make a few of them at the pump handle. I want a full of water at once."

"Can't you assume a little more pleasing expression on countenance?" asked the photographer.

"Y-yes, sir," hesitatingly answered the sitter. "Wait a minute and I'll take off these new shoes."—Chicago Tribune.

FRIDAY, SEPT., 22 1911

Europe in the Field of Invention.

"Everybody is familiar with the claim that American inventors, engineers and manufacturers led the world," says Engineering News. "A vast amount of boasting has been done about American ingenuity and originality and enterprise. If this claim were well founded it would be indeed matter for national pride, and a quarter century or more ago such a claim had a good deal to justify it. There are a number of fields of invention and manufacture in which the pioneer work was done by Americans; and in which the statistics of exports still testify to our high standing."

"But," continues the News, "when one views the whole field of engineering and industry and particularly the progress of the last twenty-five years, it is rather humiliating to confess that, instead of being in the lead, the United States are lagging far in the rear."

"Take, for example, the advances made in iron and steel metallurgy during the last twenty-five years. Some original contributions have been made to the art by American inventors in that time, of course, but the great advances which have been made have almost all originated abroad. We are to-day something like five years behind Germany in iron and steel metallurgy, and such innovations as are being introduced by our iron and steel manufacturers are most of them merely following the lead set by foreigners years ago."

"We do not believe this is because American engineers are any less ingenious or original than those of Europe, though they may indeed be deficient in training and scientific education compared with those of Germany. We believe the main cause is the wholesale consolidation which has taken place in American industry. A huge organization is too clumsy to take up the development of an original idea. With the market closely controlled and profits assured by following standard methods, those who control our trusts do not want the bother of developing anything new."

The News instances metallurgy only by way of illustration. There are plenty of other fields of industry where exactly the same condition exists. Americans are building the same machines and using the same methods of a dozen years ago, and the real advances in the art are being made by European inventors and manufacturers.

"Those 'effete' nations of Europe actually appear to take certain pride in doing new things that are worth while. Original work by engineers and designers is encouraged and rewarded. In some cases American manufacturers take up these foreign inventions after they have been developed on the other side of the water, and after four or five years the new improvement begins to be introduced here. In other cases a dozen

years or more elapse before any American has enterprise enough to introduce here what has proved to be excellent on the other side of the ocean.

"It would be easy to cite fifty or a hundred important inventions of the last quarter of a century which have originated in Europe."

"A noticeable illustration of the lack of originality in the present day American industry is the development of the internal combustion engine. There is no doubt that the application of this type of prime mover to a wide range of uses has been the most important development in mechanical engineering of the past twenty-five years; but the original work in this field has almost all been done abroad. We have merely copied the Europe inventions. Of course there are some few meritorious details of design which have been worked out by Americans, but nearly all the really notable advances in the field of gas and oil engines from the beginning have been made in Europe."

The Legend of the Rain-Tree

During the last few months American newspapers have revived the well-known tale of the "Peruvian rain-tree," which affords protection against drought. The leaves of this tree are said to have the property of condensing atmospheric moisture in large quantities and precipitating it in the form of rain. According to one writer: "The water falls from the leaves and oozes from the trunk and forms veritable rivers, which can be led as irrigating canals to any point desired. Making liberal allowance for evaporation and infiltration, a sq. mile grove of the trees would supply for distribution about 100,000 gallons of water daily."

On the strength of similar stories one of the trees to which the name "rain-tree" has been most often applied, viz. Albizia (or Pithecolobium) Suman, has lately been exploited and sold extensively in Australia. The virtues claimed for it have proved to be altogether illusory, although it is useful as a shade-tree, and is widely planted for this purpose in semi-tropical and tropical countries.

The legend of the "rain-tree" or "raining tree" dates back to the stories of the Fortunata Isles, where no rain fell from the skies and the soil was refreshed by the moisture shed by a tree of the sorts described. The early navigators brought home stories of similar trees in the East Indies, in Guinea, Brazil, etc. The Peruvian rain-tree appears to have been brought to the notice of the world by the reports of a United States consul in Peru, about 1877. These reports were widely quoted at the time, and led the government of India to seek information on the subject from authorities of Kew Gardens. The investigation of W. T. Thistleton Dyer brought to light a plausible explanation of at least a part of the rain-tree stories.

The traveler Spruce reported his own experiences with the rain-tree as follows: "The Tania-casi, or rain-tree of the eastern Peruvian Andes, is not a myth, but a fact, although not exactly in the way popular rumo has lately presented it. I first witnessed the phenomenon in September, 1855, when residing at Tarapoto. I had gone one morning at day-break, with two assistants, into the adjacent wooded hills to botanize. A little after seven o'clock we came under a lowish spreading tree, from which with a perfectly clear sky overhead a smart rain was falling. A glance upward showed a multitude of cicadas sucking the juices of the tender young branches and leaves, and squirting forth slender streams of limpid fluid."

This is not the only explanation. That many plants spontaneously exude moisture under suitable conditions is well known. The phenomenon is called "guttation," and has perhaps been most fully described by A. Burgerstein in his work "Die Transpiration der Pflanzen" (Jena 1904). The moisture drawn up from the roots of the plants most frequently passes off into the air in a gaseous form; i. e., by transpiration. If the air is saturated with moisture, and if the supply of moisture to the roots is copious, then liquid drops will be exuded sometimes in larger quantities. Mollisch records a case in which a single leaf of species of *Colocasia* gave off 190 drops per minute. Burgerstein gives

a list of 241 plants, belonging to 101 families, in which guttation has been observed.

This process goes on chiefly at night, and in cloudy and foggy weather; i. e., when the relative humidity of the air is highest. It is altogether probable that in the moister parts of the tropics there are trees which exhibit this phenomenon in such a degree that the name "rain-tree" may be fittingly applied to them. It is, however, certain that no such process can occur in a dry climate, and that the proposal to plant the rain-tree as a panacea against drought is entirely chimerical.—*St. Am.*

Juvenile Prodigies.

(From the London Chronicle)
Of all juvenile prodigies was there ever one to compare with Master Betty, the Infant Roscius? The press of the day voted him "a very extraordinary phenomenon. . . . playing marbles in a morning and Richard III. in the evening; . . . an inspired being . . . of exquisite judgment and sensibility. . . . the energy of whose delivery was such as to leave all description at a distance. . . . The intelligence of manner, the eloquence of the eye when speech was denied, the rapid yet judicious transitions from prostrate affliction to dignified resentment, are qualities which a Garrick might display." The Edinburgh manager was in fear that the young actor's voice would not fill the house. "My dear sir," said the twelve-year-old genius, "I beg you will be under no apprehensions upon that score, for if my voice does not fill your house my playing will."

Writing for the stage seems always to have attracted the prodigy. Douglas Jerrold wrote his successful farce, "More Frightened Than Hart," before he was fifteen, and Lope de Vega the famous Spaniard, was not fourteen when his first play was produced. And William Ireland produced his Shakespeare forgeries, which were good enough to deceive the learned, when he was about fifteen.

Dutch Settlement for Saskatchewan.

(Regina Leader.)
T. Krull, Jr., of Mijchrecht, Holland, is on his way back to Holland. He came to Canada a few months ago for the purpose of studying the agricultural conditions in this country and selecting a suitable tract of land for establishing a colony of experienced Dutch farmers. He covered all the Eastern as well as the Western provinces, and the most adaptable place he found for his people was in the country around Punnichy, Sask., along the Grand Trunk Pacific.

He has already made preliminary arrangements to have his people move to Canada next spring, and next summer a couple of hundred of new homes will be built by Hollandish immigrants around Punnichy.

Mr. Krull is the son of a prosperous farmer in Holland, and his neighbors, hearing so much about the opportunities in Canada, decided to investigate the possibilities for themselves by sending him on a trip to this country. He is very enthusiastic over the development taking place in Western Canada, and said it certainly was a revelation to him to see such substantial towns and well established farms along the Grand Trunk Pacific, considering this line had only been in existence about three years.

The new-comers from Holland intend to engage in mixed farming and follow their old pursuit of dairying and cattle raising which makes "small Holland" so prominent all over the world. Mr. Krull's first attention to Canada was attracted by the splendid exhibit of the Grand Trunk Pacific at the World's Fair in Brussels, Belgium, in 1910.

Nervous Young Girls.

One is rather shocked in this day of athletics and fresh air to know how prevalent neurasthenia is among young girls. One is constantly hearing of nervous break-downs while girls are still too young to know the meaning of nerves. This condition has been laid at the door of the school life by eminent authorities.

It seems that the practically continuous time table of the school life of the present day is responsible for the development of nerves. Girls overtrained in

athletics and in the class-room develop a restless incapacity to interest and occupy themselves satisfactorily when they return to their homes.

To this grinding and pushing is also due the fact that valuable knowledge of character is so assimilated that it fails to make life a comprehensible and interesting whole. The failure is a serious defect in any system of education.

It is equally injurious on the other hand, to fill a girl's life with such a continuous round of games and lessons that no time to be digested. The modern girl undoubtedly needs more leisure.

The art of assimilation is what will make a girl into the competent, self-reliant who will be able to enjoy applying what she has learned to any circumstance she may find herself in, one who will be able to reward all forms of athletics in their proper proportion and not become morbid if she is withdrawn from their influence.

One cannot quarrel with games as a means of exercise if they are not carried to the extreme, but that seems to a great extent to be just the tendency of the schoolgirl's training.

Consequently educators are beginning to see the advantage of giving girls proper exercise by means of practical work. There is a satisfaction in it that cannot find a counterpart in games.—*Ex.*

NOTICE OF SALE

To Alvin S. Murphy, late of the parish of Dumbarton, in the county of Charlotte and Province of New Brunswick, Farmer, and to all others to whom it may in wise concern:

Notice is hereby given that under and by virtue of the terms of the power of sale contained in a mortgage made between Alvin S. Murphy of the one part, and Irwin E. Gillmor of the other part, bearing date the third day of May, A. D. 1909, and duly recorded in the Records of Charlotte county, in Book No. 40, at pages 343 to 346, there will, default having been made in the payment of moneys secured by said mortgage, be sold at private sale at the residence of the said Irwin E. Gillmor at Bonny River, County of Charlotte, Province of New Brunswick, on Thursday the 21st day of Sept. A. D. 1911, at 3 o'clock in the afternoon. Land described in said mortgage as follows: "All that certain lot of land situated in Pleasant Ridge in said Parish of Dumbarton, County and Province aforesaid, bounded and described as follows-to-wit: Bounded on the west by Bonny Brook, so called, on the north by land owned by John New, on the east by the Boundary line of the granted land on the east of Pleasant Ridge, on the south by and owned by the heirs of one Robert McCowan. Containing 175 acres more or less." Together with the buildings thereon and the privileges thereto belonging.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, Sept. 7, 1911.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

South Sea Island Women.

When a South Sea Island mother wishes to chastise her child she seldom resorts to slapping, and slippers, of course, she has none. Instead of using the forms of punishment customary among civilized mothers, she pulls the child's hair, or bites some part of the body, generally the fleshy part of the arm. In wandering about the villages one sees many children having on their bodies sores produced by wounds inflicted by their mother's teeth. When a mother wishes to caress her child she deftly draws her thumb across its eyebrows or cheek or gently seizes its cheek between her teeth. The rubbing of noses is also a mark of affection among the Kingsmill Islanders, as it is among the Maoris of New Zealand.

The Parnell monument in Dublin, which has cost about 9,000 pounds, is now complete. The unveiling will take place on October 1, when the ceremony will be performed by Mr. John Redmond, M. P. The memorial consists of a bronze statue of heroic size—the work of the late

NOTICE

Owing to the failure of the Lords Cove Team to keep their engagement on Labor Day or to even notify us as to their intention, so that we could arrange with some other team for the day, and to the fact that we have had several games postponed on account of rain, which we could not arrange later, we have been under more expense than our gate receipts will cover so we respectfully ask all whose names are attached to the Guarantee Fund would hand their amounts to the Treasurer.

John C. O'Brien
St. George B. B. A.

St. Gaudens, the celebrated American sculptor—set on a pedestal at the foot of a great triangular shaft, whose tripod crown rises more than 60 feet.

"Yes," said the musician in a reminiscent mood, "my wife fell in love with me and married me when I was 'earning to play the cornet.'"

"Are you sure," asked his friend, "that she married you because she loved you, or to make you stop practising on the cornet?"

EXECUTORS NOTICE

All persons having any claims against the estate of the late Kinsman P. Cillmor are requested to present the same duly attested within thirty days from date and all persons indebted to same estate are requested to make immediate payment to the undersigned.

Dated Saint George, the 22nd day of August, A.D., 1911.

W. C. H. GRIMMER, Executor.

Why He Swore

"Ain't Mick awarnin' beautifully below! What's up?"

"Sure I dropped his pick on his head."

"E must be wild."

"Yes, it was his best pick."

Well-Loaded Magazines.

At a well known club in New York the other day one of those bores who are the bane of all clubs drew his chair up to Robert W. Chambers, and said genially: "Chambers, you are writing at the rate of two, and sometimes three novels every year, to say nothing of your annual sheaf of short stories. Aren't you afraid that a time will come when you have written yourself out?"

"My dear sir," Mr. Chambers replied, "I have no such fear. Just look at your own case. You have been talking for more than sixty years, and yet you have not talked yourself out, have you?"

The C. P. R.'s New Empresses.

Further details than have appeared are now available regarding the two new 'Empress' steamships being built on the Clyde by the Fairfield Company. They will not only be larger but in other respects different from the Empress of Ireland and Empress of Britain. They are to have what are called "cruiser sterns" wherein the underbody aft will be cut away as in the case of a fast warship, while the rudder will be of the new type hitherto associated in the merchant service with only a few channel steamers, as, for instance, with the turbine steamer Dieppe, which the Fairfield Company built in 1905 for the Newhaven-Dieppe service of the London, Brighton and South Coast Company. The peculiarity consists mainly in the fact that the rudder is hung from one pintle at the top, and is not supported below in any way, in this respect differing from the balanced rudder usually associated with warships. It will, in fact, be like a large spade hung by the shaft. Neither the cruiser stern nor the "spade" rudder has ever been adopted before in vessels so large as the new Canadian Pacific Railway boats.

THE REVIVAL OF THE CAMEO

Antique Shops of Europe Doing Good Business.

An early Victorian fashion revival is the cameo, which is being worn on hats or for clasping the belt at the wrist or even at the wrist. The cameo shows of Paris and London are being transferred for cameos. The pink and creamy tints of these ornaments are considered wonderfully becoming and as the finishing touch to white evening gowns they are looked upon as indispensable at the present moment.

Jade, too, which has been out of fashion and is to be seen ranging in tint from darkest green to pure white, is of a delicate bright green is the most popular and is used in necklaces of rounded beads carefully matched. Crops for earrings and cabochons mounted in various ways alone or with pearls and diamonds.

A GREAT CAPTAIN OF INDUSTRY

Words of Louis Stevenson Form the Keynote of Great Career.

"To travel hopefully is better than to arrive, and the true success is labor." These words, once written by Robert Louis Stevenson, hang above the desk of Mr. H. Gordon Stridger, the head of the enormous store in Oxford street, London, who was recently the victim in a motor smash. They provide the keynote of the character of the man who, starting life as a shop-receiver, made such good use of his opportunities that by the time he was thirty, he was a partner in the Marshall Field store in Chicago—a store which has earned joint fortunes for its owners amounting to over \$500,000. Mr. Stridger had retired from business, when, growing tired of a life of idleness, he turned his eyes towards London and ultimately founded the huge business in Oxford street.

OLDEST RULER OF EUROPE

Prince Regent of Bavaria Ninety years of age.

The oldest ruler in Europe is the Prince Regent of Bavaria, upon whom on the occasion of his ninetieth birthday, recently, King George conferred the Order of the Garter. He has had the unique experience of acting as regent of that country during the minority of two kings. Twenty-five years ago the Prince Regent's nephew, King Louis II. of Bavaria, was declared insane, and the Prince was proclaimed regent. Three days later the king committed suicide, and was succeeded by King Otto, who is now sixty-three years of age, and who has been insane since 1875. The Prince is extremely popular in Bavaria on account of his sporting proclivities.

UPPER LETANG.

Mrs. and Mrs. John Spinney and son Vernon have returned to their home in Berlin, N. B. after spending the summer with friends here.

Mr. and Mrs. Thompson Gray are guests of his sister Mrs. Isaac Spinney. Misses Margaret MacAleen and Callahan have returned to their homes in St. John after spending a few weeks with Mrs. H. Brown.

Miss Bertha Brown has returned home after spending a few weeks in Beaver Harbor.

Mrs. Frank Thompson and daughter Teresa have returned to their home in Blacks Harbor after spending a couple of weeks with Mrs. W. Childs.

Mrs. Wm. Stewart and family were guests of Mrs. J. A. Brown one evening recently.

Mr. John Brown who has been seriously ill is slightly improved.

Mr. Elmer Spinney of the railroad staff spent Sunday with his parents here.

Mrs. Geo. McCormick and Miss Alice McHugh called on friends here on Sunday last.

Mr. Geo. Spinney and Mr. Wm. Stewart passed through here with their thrashing machine on Tuesday last enroute to Utopia.

Mr. and Mrs. Frank Faloon have returned home from St. Stephen and Waweig.

Misses Spinney and Frost were guests of Edith Brown one evening last week.

Amy Oliver passed through Letang on Sunday.

Misses Alice and Kathleen Brown were guests of their cousin Mrs. Mac Riordan of Utopia Sunday.

IN THE

"GREETINGS"

LOCALS

As we go to press to-day (Thursday) the votes of all the Dominion are being counted, the most authentic reports from all parts of the Dominion indicate a sweeping victory for Reciprocity and the Liberal party, and there is very little doubt but that Sir Wilfrid will be again sustained by a handsome majority.

\$50,000 firm at Carvina, Me., five buildings constituting one fourth of the business section was destroyed including the electric Light Plant and the Ireland Bros. Grist Mill, the principal industry of the village, the loss of this plant being about \$30,000.

Quite a serious wreck occurred near Lepreau on Tuesday when a special freight was derailed, this time both the Engineer and Fireman were seriously injured, a wrecking crew was sent out from St. John and the wreck was speedily closed so as not to impede the regular train which came along pretty near on time the next morning.

Good fortune continues to follow the scandalous management of the road this being the first accident to cause injury for some time out of the many that have occurred, but the record some time will break and some terrible accident will result from the disgraceful management of the road.

The Annual Convention of Charlotte County Sunday School Association will be held at St. George on Sept. 24th and 26th. Each school is entitled to send two delegates besides its Superintendent and Pastor. It is hoped that all the schools in the County will be represented. It is very important that delegates be elected at once and their names sent to the chairman of the entertainment committee, Miss Edna O'Brien, St. George, on or before Sept. 23rd. All persons going to the convention over a railroad must ask and procure a standard certificate and purchase a single ticket at one first class fare. The certificate when signed by the President of the Association will procure a ticket for the return passage free if fifty attend or for one quarter fare if ten or more attend. Will all the Superintendents please attend to this that we may have a good attendance.

(Signed) W. H. Barnham, President.

Results of Census May be Announced During Next Week.

Ottawa, Sept. 11 Chief Census Commissioner Buz announced today that an official bulletin on the census of Canada would be available probably next week. The enumeration is practically complete, save for the addition of absentees.

--Ex.

Bank of England

The Bank of England's position, as a result of large gold reserves and reduced loans, has been exceptionally strong. It is possible that the Bank's unusually drastic curtailment of ordinary loans reflects a desire to hold itself in shape to control the money market at any moment. No one expects actual stringency, but an uncomfortable autumn, with chronic credit disturbances, is apparently ahead.

--London Correspondence New York Evening Post.

Aeroplane Trip Around the World.

Paris, Sept. 19--Aviator Maell with Rene Millien as passenger is about to start on a moonplane upon the first aeroplane trip around the world. It is figured that the trip will require ten months. The start will be made from Paris and thence the aviator will proceed to Spain, Algeria, Tunis and, thence by steamer to India, across India through the Red Sea, to Australia by steamer to South America, a flight over that continent, thence by a steamer to Africa, and then northward by air line.

LOCALS

One of the prettiest weddings of the season was solemnized at the home of Mr. and Mrs. Wm. Spinney on Saturday 16th, when their son Alfred was united in marriage to Miss Sarah E. McGill of Liverpool, Eng. The ceremony was performed by Rev. E. A. MacPhee. The bride was gowned in white silk embroidered and carried a bouquet of pink carnations. Miss Ina Forbes of Montreal acted as bridesmaid and was gowned in white lawn and carried a bouquet of sweet peas. The groom was supported by his brother Wm. Spinney Jr. After the ceremony a sumptuous supper was served. The bride was the recipient of many beautiful and useful presents, among them being a China dinner set from Senator and Mrs. S. Gilmour, Toilet set from Mr. and Mrs. A. D. Herron, Glass set, Mrs. Wm. Spinney; Parlor lamp Wm. Spinney Sr.; China berry set, Mr. and Mrs. Geo. McCormick; Clock, Wm. Spinney Jr.; Silver pickle stand, Joe McCue; Glass berry set, Mr. and Mrs. Steven Spinney; Water set Charles Murray; Silver spoon, Miss Bessie Goodell; Fruit dish and pitcher, Miss Winifred Doyle; Table linen, Miss Forbes and Mrs. Siers of Montreal; Silver butter knife, Marshall Goodell; Parlor lamp, R. Spinney; China jewel case, Otis Goodell; Crina cake plate, Jennie Murray; Silver pitcher, Miss Lena Spinney; Silver coffee pot, Mr. and Mrs. Noel M. Leavitt; Pie plate, Masters Chas. and Fred plimley.

Obituary

Minnie, wife of Chas. Epps of Epps, Davis & Co. passed to her rest on Friday of last week. She has been a sufferer for some years, and for some time has been unable to get around only by a wheel chair. She bore her suffering patiently and while death was not unexpected at the last it came very quickly she having been about in her usual health two days before her death. She leaves her husband, two sons and two little daughters to mourn the loss of a kind and devoted wife and mother.

The death of Mary Louise Lawrence took place at the home of her two sisters on Tuesday morning, Sept. 19.

Though not looked for, as Mrs. Lawrence had been, in falling health for some time, her death was nevertheless a shock to her many friends. Mrs. Lawrence was the eldest daughter of the late Hugh and Mary McCallum of St. George and widow of the late Bela R. Lawrence of St. John, N. B. Mr. Lawrence at one time did quite an extensive lumbering business on the New River under the firm name of Prescott & Lawrence.

Hugh R. Lawrence who with his wife and three children reside at St. George is the only surviving child of a family of nine, six dying in early childhood.

The funeral of Mrs. Lawrence will take place on Friday, Sept. 22 from 120 Orange St., St. John, the home of Mrs. John M. Lawrence, widow of the eldest son of the deceased. Hugh R. of St. George, John M. who died in Denver, Colorado and a sister Fanny B. who died in Santa Clara, Cal. are the three who reached the age of maturity.

Card of Thanks.

Mr. and Mrs. Matthew Fallon of Letang wish to thank their many friends for their help and assistance during his illness.

Married:--At the Baptist Parsonage, Town, on Thursday last 14th, Miss Elsie A. Tucker of Letete, N. B. was married to Mr. Arthur A. Osborn of Cambridge, Mass., by Rev. E. A. MacPhee.

She Was Wise.

She was a bright girl and her escort, who was also her intended, was delighted to find how quickly she grasped the points of the game.

She got on so well that he ventured a light witticism on the subject. "Baseball reminds me of the household," he remarked; "there's the plate, the batter, the fowls, the flies, etc."

"And it reminds me of marriage," she retorted; "first the diamond when they are engaged, then the struggles and the hits, then the men going out, and finally the difficulty they have in getting home." And he sat and thought and thought.

THE GRANITE TOWN GREETINGS

HYGMEI! Death to Catarrh Germs.

Hygmei (pronounced High-o-mei) means death to catarrh germs in a few hours. It is the only guaranteed Catarrh Cure.

When you use Hygmei, you don't swallow nauseating drugs. You simply breathe in the soothing, pleasant and antiseptic Hygmei air through a little pocket inhaler. As this medicated and vaporized air passes over the inflamed parts, relief comes almost at once and a cure follows.

Your druggist J. Sutton Clark will sell you a complete outfit for \$1.00 and what is more he will refund your money if after using Hygmei according to directions, it fails to do all that we claim. Hygmei is guaranteed to cure catarrh, croup, grippe, cold in the head, asthma, etc. Hygmei can be obtained from all druggists and dealers, or postpaid on receipt of price from The R. T. Booth Co., Ltd., Fort Erie, Ont.

Baroness Rothschild Marries a Poor Man.

London, Sept. 10.—Baroness Valentine von Rothschild, a daughter of the late Baron Albert von Rothschild, head of the Vienna branch of the house, has married Siegmund Springer, a Londoner without a fortune, who was a booster for a firm of stock brokers.

The fortune of the Baroness is estimated at 100,000,000 kronen, or about \$20,000,000.

Baroness Valentine von Rothschild, whose mother, Bettina von Rothschild, was a first cousin and wife of Baron von Rothschild, was 25 on May 25 of this year. Baron Albert von Rothschild, father of the young woman, died last February. Baroness Valentine's mother died of cancer four years after the birth of the youngest of the Baroness Valentine's six brothers.

Baron George, the oldest brother of the young woman, just reported to be married, lost his mind. Baron

Oct 1, her youngest brother, committed suicide on July 13, 1909, in his father's home in Vienna, three months after reaching his majority, because of his father's opposition to his marriage with a young and good-looking but not very rich American girl. The girl was the daughter of a doctor in a Western city.

A Telephone Disease.

Miss Susan Gaspell, who took up the serious nervous strain to which telephone girls are subjected, in one chapter of her new novel, "The Visioning," calls attention to the fact that so serious is the strain that it has given rise to a new disease, with a new name "telentis." An official committee of physicians recently used the word in London. So severe is the nervous debility of many telephone girls that they are unfitted for marriage. The officials of telephone companies are doing something to lessen the strain, by re-arrangement and shortening of hours of work; and this problem of keeping the girl operators healthy is one of the most severe which they must face.

In "The Visioning," a telephone girl declares: "The real pleasures were going over the wire. It was my business to make the connections that arranged those pleasures. A little red light would flash—sometimes it would flash straight into my brain—and I'd say 'Number, please.' Then 'Life would pass through the cords. That was the closest I came to it—operating the cords that it went through. There was a whole city full of it—beautiful, laughing, loving life. And, oh, I used to get so tired operating the cords of life, sometimes when I left my chair the whole world was one big, red light. And at night they danced dances for me—those little red lights."

England's Tallest Tomb

Near the well-known seaport of Southampton, England, there is a remarkable edifice known as Peterson's Tower. The erection is all the more singular because

it marks the burying place of a certain John Peterson, a wealthy tea planter. The man appears to have been rather an eccentric individual, and in order to prove to the world his belief in concrete as a building material set about the construction of this great tower.

The building took many years to complete, but is entirely of concrete, and by the time the final layers had been placed had reached an altitude of more than three hundred feet. It is about forty years since the tower was erected, and its present condition is certainly a justification of the faith of the builder. As has been indicated, Peterson left instructions that his body should be placed under the tower, and this was accordingly carried out. Another desire that the chamber at the summit should contain a light was defeated by the firm stand which Trinity House, the light-house authority, took on the matter. Such an illumination would have been visible for miles out at sea, and would naturally have proved very misleading to sailors.

The Democratization of England.

Perhaps the proportion of the population that is riding on somebody else's back is too great in England. British leisure, the result of British wealth, has been a thing to wonder at for generations. It has not been unfruitful. It has produced many great and very many useful men, and a cultivated society, and its full share of profitable leadership. But political power in England rests by no means as stably as it did in the hands of men who have never had to earn their living. The steady shifting of power to the democracy is a natural detail of progress and an evidence of national health and sound institutions, but it is undoubtedly agitating to conservative observers. Public opinion governs Great Britain now, as it does the United States. That is what the railroad strikers had to consider, and that, no doubt, was the most influential force in ending the strike. It is the great body of the English people that in the end must hold the scales between the labor unions and the rest of society.---Harper's Weekly.
