CAMUEL JOHNSON'S remarkable work entitled "Oriental Relisions," is devoted wholly to the religions and civilization of India; is the result of twenty years' study and reflection of one of the soundest scholars and most acute thinkers of New England, and must be treated with all respect, whether we consider its thoroughness, its logical reasoning, or the conclusion, unacceptable to the majority no doubt, at which it arrives. This conclusion, briefly stated in the introductory chapter, is this: "The mission of Christianity to the heathen is not only for the overthrow of many of their religious peculiarities, but quite as truly for the essential modification of its own."

A gentleman who was engaged n removing the remains of some of his eceased relatives, was asked by an acdeceased relatives, was asked by an acquaintance, who was similarly engaged, to assist him in lifting a coffin from a grave. He did so, and the lid was taken off. To the horror of the small body of spectators of quiet nature, and was thoroughly ac-

who gathered around it, they discovered that the body (which was that of an uncle of the gentleman who was removing it) had been disturbed in the coffin. It was terribly contorted, as if the deceased had died in great agony. The face wore an expression of iutense pain and horror, the arms were drawn up as far as the coffin would admit, and the head was twisted round to the shoulders, from which the flesh had apparently been gnawed by the struggling man. Sickened by the horrid sight, the spectators drew back from the coffin, and looked speechlessly into each other's eyes. Not a word was spoken, but there was not a man present who did not feel that the deceased had been buried alive—probably while in a trance—and had awakened only to perish in his living tomb. The coffin was closed again and taken to the new cemetery where it was decently interred.
