Evidences of Bungling Continue To Be Made Apparent to Citizens.

As a steam producer, for heating purposes, the expensive equipment of the incinerator has "fallen down hard." Handicapped by the varying fuel qualities of the refuse that is destroyed, and by lack of boiler space, there can be no regulation of the amount of surplus steam that can be turned into the feed pipes, designed

to feed Victoria Hospital. After a series of experiments and tests by engineers both of Victoria Hospital and of the incinerator plant supervised by H. P. Elliott, engineer in charge of the installation, it has been found impossible to secure any normal or standard quantity of heat that can be turned over to the hospi-

'We cannot supply any fixed amount of heat," declared Chairman B. W. Bennett, of the board of works this morning. "We have gone into the pro position and it can't be done. Our business is to destroy garbage, and while the incinerator is doing that all right, without regular coal fuel for boilers and a larger botler area, we cannot hope to heat the hospital, nor can we guarantee to heat any one por tion of it, either."

The fact that without the recom mended expenditure of \$7,000-per th report of H. P. OFFICIAL'S APT SIMILE ON PROPOSED SEPARATION

'If I Had Butcher and Grocery Store, I'd Know Which Was Paying."

An apt simile of the present waterworks-electrical department separation question was voiced at the city hall this morning: "If I had a butcher shop and a grocery store together, I'd want to find out which was the best paying proposition," said an official. "If one was supporting the other, then I'd shut the dead one up. It's the same in this question. Separate the two departments and show which one is really paying the best. The people voted for the separation. Now they are trying to tell us the people didn't know what they were voting for. Well, if they did it's up to the people, not to Bill Spittal or anyone else."

[Canadian Press.] Chicago, Ill., Oct. 29 .- Another chapter in the nation-wide story of the throughout the country and culminated in the fatal explosion in Los Angeles in 1910, was written today when the case was called before the United States circuit court of appeals. Thirty of the thirty-three labor

union officials who were adjudged fully guilty with the McNamara brothers in promoting explosions, ask that the present court set aside the verdicts rendered at Indianapolis last December, and that they be given a new trial. Opposed to them, the Federal Government asks that the convicted men be sent back to prison at Leavenworth, Kas., to serve out their terms. A Heavy Sentence. A sentence of seven years, the heav-

Provincial Premiers Want Big Share of Customs and Excise Revenue—Remarkable Attitude in Regard To Incorporated Companies' Stocks. and Bonds.

Mr. Hookaway told the court CASE IS NOW PENDING IN THE COURTS

[Special to The Advertiser.] Ottawa, Oct. 29 .- There appears to be wo "jokers" in the resolutions prepared by the Provincial Premiers for adoption by the Dominion Government,

The demand for 10 per cent of the customs and excise revenue of Canada is regarded in the first place as exorbitant. It would mean more than doubling the Provincial subsidies. Canada now pays the provinces about \$11,000,000 a year. A Big Increase.

Should the demand for 10 per cent granted, the federal treasury would next year pay the provinces about \$24,000.000. Woman's Daring and Courage Saved Lives of Thirty-Seven

[Canadian Press.]

Philadelphia, Oct. 29.-A woman's daring and courage in a terrific hurricane off Cape Hatteras saved the big American bark John Ena, from destruction and the lives of the crew of thirty-seven men. The heroine is the wife of Captain Charles V. Olsen, master of the craft. On Oct. 21 the bark, which had been within 100 miles of this port three weeks ago, and had been blown back nearly to Bermuda, ran into a hurricane off the coast of North Carolina.

Startled by a particularly heavy sea, Mrs. Olsen looked out of the captain's office in time to see the terrified sailor at the wheel desert his post. She rushed on deck and crept along till she clutched the wheel. With almost superhuman strength she swung the heavy wheel over and brought the ship about.

Captain Olsen worked his way back over the wreckage and found his wife clinging to the wheel. Her bravery and quick action had saved the bark and its crew.

Useless Red-Tape.

In civic administration there is always more or less red-tape, but recent actions on the part of the Ontario Legislature have so increased the wide ness and color of this "red" tape, that it imposes a hardship on those who desire to accomplish anything in mu-nicipal progress. One of the most striking illustrations of what the provincially-imposed red-tape can do is shown by an application that was made to the board of works for an 85foot sewer on Ridout street south between Craig and Bruce streets.

There were insufficient signers the petition to have it go through the

council in the usual way. Therefore recourse to the board of health to recommend the sewer on sanitary grounds was advised. After this recommendation was secured the deputation was informed that the 85-foot sewer would be put through the council by a two-thirds vote, after having first been recommended by the board of works as well. Absorbing Local Debentures.

Chatham and other of the smaller nunicipalities surrounding London have lately been availing themselves of the scheme, advocated here last summer, of purchasing municipal debentures issues by local capital. Comparatively large issues have

been taken up by home investors in many of the smaller cities. It is hardly possible that London could have raised the \$765,000 issue, that represented its last debenture sale, in the city itself, but it has been declared since that the possibility of part at least of the issue being absorbed by ocal investors caused the banks that loaned the city funds with the depentures as collateral, to come forward with their offers of assistance, which were accepted. London has penture sales this year than the great majority of municipalities, whose debentures have failed to secure a ready sale, owing to the tightness in the

is it likely to be. According to Chairman E. R. Dennis, of the board of education, the married teachers here give the best of satisfaction. Indeed, he declared that parents of children in the grades taught by mothers were much in favor of the idea, preferring to have their children in those rooms than in any others in the school.

This last week Mr. Pardee, the Opposition whip, has taken charge of the organization, and speaking at different points. With W. M. German, he held a humper meeting in the town hall Monday night. Mackenzie King has pretty well covered the riding.

Walkerton and Carrick Township are the big centres of interest. In Carrick the population is largely German. The emergency and navy question have been used to the advantage of each side. In Walkerton the Government party is doing everything to offset Truax's personal following, which contains come off better with its bond and de- quite a Conservative vote. Tonight Mr. Truax has a meeting in every important centre, being addressed by prominent Liberals, while the Conservatives are holding a final rally in Walkerton, with Hon. Thos. London, Oct. 29.—The policemen of London have become inoculated with the trade union germ, and a provisional committee drawn from their ranks is enrolling members in what has been named the Metropolitan Poice Trade Union.

Every member of the force below the rank of superintendent is eligible for membership, and the men are joining in such numbers that the organizers anticipate that the union will be strong enough by Christmas to force the authorities to recognize it. The metropolitan police force at the end of 1912 consisted of 88 superintendents, 668, inspectors, 2,687 sergeants, and 17,011 policemen, making a total of 20,889, but this figure has been somewhat increased this year.

LONDON, WEDNESDAY, OCT. 29. NEW ZEALAND DISCARDS CONTRIBUTION.

Tory point of view. He has taken the first step towards civil service reform New Zealand has decided to build by dismissing Liberal officeholders as her own navy on the Australian plan, fast as he can. In some departments there have been more dismissals in his first purchasing a ship or ships in two years than in Sir Wilfrid Laurier's Great Britain as the nucleus. She folfifteen. When he gets all the Liberals lows Australia in discarding the outout, and fills their places with good worn subsidy system, into which the party men, then he will doubtless be Borden Government would drive this ready to hedge the service with barriers, and thus secure his own friends in their positions whenever a

New Zealand's change of front is a staggering blow to the centralizers in Canada and the mother country. They have been continually citing the little Dominion as the true exemplar of imperialistic spirit and purpose. They assumed that she had permanently set her feet upon the path of centralization in naval affairs. In Canada particularly, her gift of a Dreadnought to Great Britain has been made a reproach to Canadians who favor a Canadian policy.

New Zealand's pretext for the change is the admiralty's failure to station two cruisers of the Bristol type in New Zealand waters, as promised, but doubtless she has been influenced by Australia's example and by the requirements of local defence. Australia has now assembled a powerful squadron in her own waters, manned by Australians and controlled by the Australian Covernment, New Zealand has contrasted her own unprotected her neighbor's great She has spent millions, but has nothing to show for it-in Pacific waters. At the back of all miliand naval expenditures of the two countries is the dread of the Orient, and the problem of Pacific defence And this problem is Canada's as much as theirs. Australia felt she had been betraved when Canada, under a change of rulers, denied her obligations to assist in upholding British interests in the Pacific, and tried to throw, her

millions into the North Sea. New Zealand has now joined Australia in a policy dictated no less by national sentiment and self-respect than by practical requirements. Canada will revert to the same policy when the Canadian people have an opportunity to decide the question. Happily her Government has not yet been able to fasten upon her the servile system abandoned by her sisters under the Southern Cross.

CIVIL SERVICE REFORM.

Discussing the question of patronage, the Toronto News, which professes great faith in the virtue and ability of the present Government, says that "it will be fortunate for the country when Mr. Borden is able to redeem his pledges to extend the competitive system to the outside service."

Quite so: with the emphasis on the "when." Mr. Borden has been in power two years: what has he done? He has raised the salaries of the civil service. That was all right; but it was also good practical politics, that might help to secure the goodwill of the class benefitted. But what has he done to fulfil the pledges he made when he was asking to be made premier? The Liberal Government started the movement for reform by placing the inside service at Ottawa under a commission. Its intention was, London? Why is it a crime for the as soon as the machinery was in working order, and experience had shown majority? The minority may not like what changes would be necessary, to it. But if that justifies rebellion then bring in the outside service also. But the Mexican system is justifiable and before they could do anything they wise. When you do not like the rule went out of power, and Mr. Borden of the majority take up arms and came in. What has he done in two shoot enough of the majority to

years? It is no answer to say that the Government has not had time. Cabinet ministers do not spend time over details in working out changes in a department. All that they do is to say what they want, and their subordinates make the plans. The Government has its commission, which has been dealing with this matter for the last three years or more, and by this time it knows what is required. All Mr. Borden has to do is to tell the commission he is ready to put the outside service in its charge, and the plans will be handed to him the next

Even without proceeding to bring all the outside service under the commission, he has had abundant opportunity to show his sympathy with the idea of which he was such an advocate when in Opposition-promotion by merit. Of all the vacancies that policy is less imperialistic than Sir

Wilfrid's. The Borden-Bourassa alhave occurred during the last two liance is still in existence for practical years how many have been filled by promotion? There is a case in point purposes. By-elections, for instance. not many miles from London. In a

George Clancey Is In Hospital in a Serious Condition Through Accident.

As a result of a heavy 3-inch plank toppling off a freight elevator striking him a severe blow on the head George Clancey, an employee of a Talbot street firm, is now in a precarious condition in Victoria Hospital, suffering from concussion of the brain.

It appears that a consignment of galvanized iron had been taken up by the elevator to the first floor. Because of the bulkiness of the iron it was found necessary to place heavy planks perpendicular to the floor of the car as a means of support. The shipment unloaded, the elevator was lowered to the ground floor, and Clancey, who was in charge, proceeded to remove meved by the strength of horses, and the planks. [Canadian Press.]

Washington, D. C., Oct. 29.-Repre sentatives of the National Grain Dealers' Association today formally notified Secretary Houston, of the department of agriculture, that the organization favored the Government's proposed standardization of foreign grades.

The adoption of the new grades by the association was over the protest of representatives of the Baltimore Chamber of Commerce, which declared that the promulgation of the new grades would seriously affect their export trade, the largest in the country. Many of the speakers at the hearings today, while favoring the proposed grades, urged modifications. In place of the Government's proposed number three corn with moisture content of 17.5 per cent., they urged the substitution of a grade to be called "standard," and making the Government's proposed No. 4 a No. 3, with a moisture test of 19.5 per cent.

This, they pointed out, would leave the present grades practically unchanged and would give the producer an incentive to produce a "standard" grain with a moisture test of 17.5 per In view of the action of the Grain Dealers' Association, the agricultural department officials expect no other

WHEN MILADY DRESSES FOR BRIDGE

This frock has just been completed by one of the best-known New York fesigners as a bridge and afternoon costume for one of the society brides of the autumn. Silk poplin was chosen for the material fashloned on the simple frapery lines that give the new figure effect and with just a tiny slash of the keet—for the slash is still in the mode. The bolero opens over a vest and lower sleeves of the softest batiste, machine embroidered in imitation of hand work. The button strap sandals are most French and very stylish.

TIMELY CARE OF THE HANDS AND NAILS.

With the first frosts of winter close at hand carefully, and dry with a soft towel. Fur doors, it behooves the woman who When the hands are thoroughly dried, for the first fosts of white close at hand carefully, and dry with a soft ower, has no maid to assist her in her house-hold duties to look to her hands, if she would keep them pretty and soft in spite of her manifold duties about kitchen and dining-room. For if the hands are in goodly condition before winter sets in, they will not be so likely to crack and chap and roughen up when the really hard and trying weather sets in. This is for the hands, as it has a tendency to the time not only to lay in a supply of glycerine and witch hazel—one of the hands have been in hot dishwater or in the rinsing waters of vegetables or potatoes, they should be carefully washed and wilped, the cuticle gently pushed back from the nails, and glycerine and witch hazel to one part of glycerine—well rubbed into one part of glycerine—well rubbed into the skin of the hands, while the fingers are gently massaged up and down. It hands should be of the very best, as poor sounds rather a bother to be told this, creams will only do harm that it will but in reality it is the simplest and easiest thing to do. Then at night, before going else, a little prevention is worth pounds to bed, wash the hands thoroughly in warm water, with a teaspoonful of oat-meal and a pinch of powdered orris root, keeping the hands in goodly condition use the nail brush, going over the whole throughout the season of cold and frosts.

The Women's Canadian Club of Toronto column. Would you kindly answer the following questions:

1. I have known a young lady (19 years old) for about five years, and know her people real well. Lately she has been going with a young man with whom I am fairly well acquainted. I have asked her to go with me frequently to concerts, etc. Now, do you think I am justified in asking for her company like this?? She seems

quite willing to do so, although it may be from the standpoint of friendship alone.

2. On coming from church on a Sunday night, is it proper, on meeting a girl friend about your own age, accompanied by stone jers expected in return for first issue of "The Tatler" for this season, was read by the joint of the Children's Mid Society of Sarnia, the secretary reported a 6-months-old haby placed in a good country home, and another baby by a girl you do not know, to accompany them home?

2. Yes, Algernon, it will be quite proper to ask if you may, anyway.

A man may remove his overcoat either in the vestibule or when he reaches his seat. If there is an usher, he leads the way to a seat, the girl follows, then her escort; but if a couple have to find ammonia. Do not forget this, because it counteracts injury to the fabric. Javelle water must not be used on colored fabrics unless one wishes them to be bleached. It is an excellent bleaching agent, and will take out nearly all colors, as well as stains. MAY RESORT TO

Effort Made To Prevent Separation of Waterworks and Hydro.

EVASION SEEMS PROBABLE

People's Mandate To Be Annulled by Handing Control to Hydro Commission.

In spite of the fact that the mandate of the people, expressed by their votes last January, was decidedly in favor of the separation of the water and electrical departments, an effort is now being made to prevent this separation. When the question of the abolition of the water commission was submitted to the ratepayers at the last municipal election, 2,079 voted for the abolition, the bylaw carrying by a majority of 281.

Despite the clearly-expressed desire of the ratepayers, it is being freely mated at the city hall that the separation will never go into effect. The fiscal year of the water commission ends in November, and it was planned according to the bylaw, that the sep aration would take place then. As yet no report has been received on the apany effort been made to provide the necessary machinery for the carrying on separation takes place.

Two Alternatives Exist.

There are two ways in which separation might be prevented. One of these is the evasion of the question on a technicality, and the other is by submitting the question to the ratepayers ronto last night, and when she failed again. After the treatment accorded it to turn up her husband began to make at the last municipal election, it is inquiries for her. Mrs. Ernst tele-hardly likely that the opponents of the graphed from Halifax on landing that measure would try conclusions again she was sick, but would travel through on a popular vote, so it seems as if to Toronto all the same, evasion would be the only possible

course left for them. Under the terms of the separation the control of the waterworks is left with the council. No specification as to management or system is made, so it is therefore claimed that it would be possible for the council to assume control of the waterworks, nominally and then instruct the water commission to continue as at present, Tech nically it is claimed to be within the council's rights to defeat the object of the people's mandate in this manner, and furthermore it is said that it will be the procedure if the Graham electrification clique in the council can be whipped into line. Judging from

People's Wish Ignored. The fact that the order of the counthe management as at present would be equivalent to a direct contravention of the expressed desire of a majority of the ratepayers, cuts little figure with those who are determined to prevent the divorce of the waterworks and hydro at any and all costs. Hiding behind the technical powers that ellow the council to make any arcansements to manage the department the commission will be allowed to continue as heretofore. The only difference will be the nominal yoke of sufferance, so to speek, that will be placed on the commission. It is a safe prediction that if the arrangement ever goes through that the utility commissioners instead of being responsible to THE PEOPLE for their control of the water

system, will be responsible to the COUNCIL ONLY. KILLED GIRL AND THEN SUICIDED

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says WALK TWENTY MILES a well-known authority. Meat forms uric acid which excites the kidneys. they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood then we get sick. Nearly all rheumatism, headaches, liver trouble, nerv ousness, dizziness, sleepiessuess and urinary disorders come from sluggish kidnevs.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or at tended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation

thus ending bladder weakness. Jad Salts is inexpensive and can not injure; makes a delightful effervescent lithia-water drink, which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications. THINGS TO SAY ABOUT DIRECTORS

In Letter To Advertiser He Explains a Lot More About That Epistle Which the London Baseball Club Directors Claim They Never Even Re-

ceived.

Dear Sir.—In the columns of your issue of Oct. 25 President Stevely states that my letter, published in Saturday merning's Free Press is all lies. And he also states he wonders how I am keeping It up, when he says I am In the wrong He knows he is in wrong, and does not want to give up. You know that two or three directors can tell more lies than one manager when they get facily heads together. I want to ask Mr. Stevely where he got the dope about my board and other things that they asked me when I was up there last spring It they didn't get my letter with my terms in it? How was it they told me they didn't want to be bothered with paying my board? They also wanted to know what I meant by having in my letter that I was to have full control of the club here, and fire whoever I had a mind to. They also asked me this, for example: "Supposing you are sore at Bierbauer; would you let him go?" And I replied that I would let anyone as if I thought they were not giving me their best services, which I know Bierbauer did. Now if they did not get my letter, how could they ask me all these questions? This is what I would like them to explain to the London fans.

The Duniop Matter.

Now in regards to Dunlop, they certainly are in wrong. There was not a player on the team who could get any more money without getting an order from me. Now, they let Dunlop go to them and get \$100 without an order from me. Why did they give him this \$100 without an order? In getting the \$100 without the directors, who are all supposed. Dear Sir,—in the columns of your issue of Oct. 25 President Stevely states that

Mr. Stevely knows who is in wrong, and If I knew that I was in wrong I certainly would not have brought the matter up. Mr. Stevely knows who is in wrong, and I can swear that everything that I have said is absolutely the truth. If Mr. Stevely and Mr. Buzzell will think it over they will remember when they called on me at Windsor, after I had met them in London. Well, the whole thing about it Windsor, Oct. 27.

Mr. Gillean came down to Windsor to see me, and if their memories are good they know they had that letter with them that day. I wish the fans would read this over very carefully and see for themselves who is telling all the lies—Mr. Stevely, Mr. O'Neil, Mr. Buzzell, or Mr. Rube Deneau. Yours very truly.

GEO. DENEAU.

Windsor, Oct. 27.

Sporting Editor Advertiser, London, Ont .: is: Mr. Stevely will not admit receiving my letter, as he knew it would cost him extra at the end of the season.

In their letter to the Free Press they try to make the fans believe I had charge of all the club's affairs. Now this is not

A Cheaper Club Than Last Year.

My work as manager was to look after my players, which L.did. They had a business manager to look after the financial affairs. Now, if the people of London will listen to this they will know I could not have brought any extra expense on the directors because the club I had this season cost oyer \$500 less than the club of (1912) last year, and I know that the fans got better ball this season than they did last season.

Furthermore, I wish to tell the fans the

than they did last season.

Furthermore, I wish to tell the fans the letter I speak of was written by my sister-in-law on some of Mr. Burkhart's stationery in Detroit. He saw her writing it, and he wanted to know who Geo. Deneau was. She told him, and he said it ledted wretty good to him. Then this Deneau was. She told him, and he said it looked pretty good to him. Then this fall he asked her if I was to receive a piece of money out of selling players to Cleveland, which he read in the paper, and she replied "Yes."

Now, there are only two or three of the directors who are causing all of this

Now, there are only two of three of the directors who are causing all of this trouble. There are two of them who know nothing of this affair at all, and I don't want the fans to think it is all of them; and I guess the fans know who I had to deal with all summer.

Not the Right Letter, Mr. Stevely says he has proof of his side of the story. He had that letter I woote him after I met him in London. Dunlop said he was to split with me. Now, the people of London certainly know that the directors, who are all supposed to be shrewd businessmen, would not hand out \$100 to a player to be split with their manager. If the people will just think this matter over it will take them but a few seconds to see who is in wrong.

Does anyone think that I could tell all of this if it was not the truth, and not all lies, as Mr. Stevely says? "I guess not."

Later on, Mr. Stevely, Mr. Buzzeli and Mr. Gillean came down to Windsor to see me, and if their memories are good they

Now "Knock 'Em Stiff" Brown Is After Old Eli

George ("Knock 'Em Stiff") Brown, the middleweight fighter, missed his calling. He should have missed his calling. He should have been a politician. Why? He can't keep out of print. If he isn't being traded off by some enterprising manager, he is performing daring deeds in some other way, but summing them all up, Knock 'Em Stiff's best line is not unlike that of a comedian Brown is credited with pulling more funny stuff in and out of the ring than Rudy Unholz or Patsy Hogan or ever Kid Broad. However, his lates one tops them all—it hasn't even been tied. Here it is:

Brown was looking over the newspapers the other night to see just how many times Brown's name was mentioned. He found it only once, and that in a head, but put him in a good humor It read:

"Brown is weak for Yale." happened something George rushed up to his manager demanding to know who gave out that story. "Who's afraid of that story. "Who's arraid that story. "Who's aird I was weak f Yale? I can lick him. Who This way out.

of Manslaughter Against Former Heavyweight For McCarthy's Death Has Been Dropped.

[Canadian Press.] Caigary, Alta., Oct. 28.—Crown Attorney Shortt has announced that the crown has dropped the charge of manslaughter against Tommy Burns, former heavy-weight champion, in connection with the death of Luther McCarty in the prize ring here last May.

Tommy Burns and Arthur Pelkey pass-ed through London yesterday afternoon on their way to Hanover, Burns' birthblace. They have been spending the past week or two in Chatham, Windsor and week or two in Chainam, Windsor and Detroit. They were only in London for an hour, arriving about 4 o'clock, and leaving about 5 o'clock. After a short stay in Hanover, they will leave for the Pacific coast, where Pelkey will likely meet some of the other "writer hones." neet some of the other "white hopes.

When Jack Dillon and Eddie McGoorty clash at Milwaukee on the night of Nov. 3, an exciting battle should result. These boys are close to the head of the middle-weight division, as they are said to be very evenly matched in weight.

While both claim to be able to make the middleweight limit they would probably like 180 much better tionse during the coming season, class tionse during the coming season, class tionse during the coming season, class owners are expected to be prepared to make a deposit of at least \$25,000, the money to be placed with the league officials or deposited in local banks of cities. They are both fighting in great form these times, and being keen rivals they have the Milwaukee fans a are bound to give the Milwaukee fans a good run for the money. McGoorty is said to be a trifle more clever than Dillon, but Jack is stronger and a more aggres-sive fighter.

Injury to Cross Gives Wolgast a Glimmer of Hope

Cadillac, Mich., Oct. 28.—Ad Wolgast, himself suffering from a pair of fractured ribs, is not ex when he heard of Leach Cross' in jury and the consequent postponement of the Brooklyn fighter's bout with the champion, Willie Ritchie. "For," said Adolph, "Now it means that I may get a chance to challenge the widness of the said to the said the said to challenge the winner. And if I do—" and all of that sort of thing. The erstwhile champion is as confident as ever of his ability to come back, and is also dreaming of a match Dec. 1, at one of two Milwaukee clubs which are after it. Ad is spending his time here hunting and getting in first-class shape. HOUSES, ROOMS, TO LET.

SMILE is nature's beef, wine and iron. So let's all have one today. Perhaps the little bit of reprint below will help. It is taken from a back number of "Fame,"

a sprightly little advertising publication, and the man who wrote it signed himself merely "D. H. T.

"One small typographical error is often responsible for quite a startling and undesirable effect.

For instance, this from a tasty ad in an Iowa paper: "Blank's shoes are accepted as the standard of shoe excellence by many swell dresses. They cost more, but we hate them." "Hate" was written "have," of course, in the copy.

Or this from a Chicago daily: "In the Oxford season the careful dresser is particularly exacting as to her nose." Just an "n" instead of an "h," that's all

Or this, also from Chicago: "Our white doods have created a positive commotion among the ladies."

Or this, which appeared in a Kansas paper: "Buy now while the assortment is dull"-intended beyond question for "full."

Or this, the effect of a misplaced comma: "Extremes of fashion meet when a man wears a blank hat, upon his head a pair of also blank shoes upon Or this, from a low-grade magazine of large cir-

culation: "Use -- soap, the world's pest." Anyone can guess what was meant.

Or any of these. Correct them to suit yourself: Fastidiou slivers stick to --- Ham and Bacon."

"Take a course in physical training at --and get stung." (A rank error.)

"Have us make your old carpets into beautiful of rads.

"Boys, for a good bat go to -- 's drug store." (This caused great morriment in a certain "dry"

"Blank's condensed milk makes a flend of everyone who teles it."

"I wish no better evidence of progress than the prosperity which we gave to Canada during those fifteen years of our administration," said he. (Applause.)

A Mere Fiasco.

Failing to succeed against its policy continued Sir Wilfrid, the opponents of his administration had endeavored to succeed by alleging corruption, and appointed a commission to delve deep into its record to discover corrupt and scandalous transactions That commission had had the courage to make a report, but it had failed absolutely to find anything corrupt, although it turned out that one of the commissioners himself had to be investigated. Cries of boodling and graft were heard about the construction of the National Transcontinental Railway, and to discover this another the Conservative press had declared of an emergency. moned and attended to the injured that the report read that no corruption had been found. No Misconduct.

"So far as misconduct was charged against the Government which lost power two years ago, I am proud to say that there is not a man in this audience who has reason to blush for the Liberal chieftain with ringing tones. Of the present administration he was unable to speak of its record, for the Borden Government had done nothing, although it was alleged that the Senate, which was at present Liberal, had killed some of their measures. "If that is the charge," Sir Wilfrid went on, "I have this to say, that the present administration at Ot-Canada from the days of the Family the republic of Salvador is flooded as Compact, of evil repute." What Will Be Done? "Is it possible that such actions can be condoned by the electors of Bruce? Have we come to it in this year of 1913 that the principles of responsible government, for which our fathers have fought and which they gained at great cost, are so far forgotten that when the Senate of Canada would compel the Government to submit its action for the sanction of Parliament you are willing to let them go on?"

He held high ideals, to which the young men might aspire, and of which the older men might be proud. He asked if there were one hundred men in Canada who would studiously insult Sir Wilfrid Laurier, but that very thing was done at the last session of Parliament. He referred to the guillomethod of amending the rules, and declared that the high-handed action of the Government was erowded through Parliament in the face of a man who knew more about parliamentary usage than any other member in the House. The claim of an emergency was against the statement of Mr. Churchill in 1909 that the British navy was not in need of help, but whatever Canada was prepared to offer the motherland would be glad to accept. Sir Wilfrid scorned the idea of secret correspondence with the Canadian Government. "The emergency was simply the difficulty of the Borden Government with its imperialistic simporters on the one hand and the reactionary tendency of the Nationalist supporters on the one hand and the reactionary tendency of the Nationalist They said there was a German peril.

The last stages of the present ne gotiations betwen the street railway and the local electrical department are expected to be reached this week by a conference between the street railway, the local commission and the Ontario power commission, final power to either accept or reject the proposals being vested in the later body.

Can't Deliver Power.

The street railway company's amendment to the proposal submitted by the water commission calls for 1,000-horsepower to be delivered to the company by Dec. 15. It now seems as if this will be a physical impossibility, Only 500-horsepower of direct current can be supplied in that time by the purchase of second-hand "con verting' machinery, on which the local commission was relying to supply the needed juice in the specified time. To supply sufficient equipment to meet the full demands of the railwaywhich is a reserve power of 1,000norsepower as a minimum and 3,000norsepower as a maximum, would require something like three months The converting machinery for changing the alternating hydro current into direct current, suitable for the use of the local street railway system, would Parts of it, he said, had been "tampered

Will Occupy Garage.

If the contract goes through the machinery for "transforming" will be housed in the garage annex to the workshops. Until the addition to the north end of the power station is completed, the autos of the local departments and of the Ontario commission, as well, will have to be kept in their present garages. It is the intention of the water commission not only to extend the present pumping and electrical station as far north as the present distributing tower, but to run this addition east to about half the distance occupied by the reservoir. This would cive an L-shaped building, with the oot of the L on Horton street, or a Ushaped building, if the detached workshops and garage to the rear of the sub-station were taken into consideration. An extension has to be made to the station in any event, say the water commissioners, and the installation of the necessary transforming equipment would only mean that it would have to be made a little larger.

London Women Were Really Trying To Help Strikers' Children.

[Special to The Advertiser.] Dublin, Oct. 29 .- The dropping of the prosecution of Mrs. Dora Monteflore, a ondon philanthropist, and Mrs. Lucille Rand was virtually decided on today when the case against them on a charge of kidnapping Irish children came up before the police magistrate

The two women had taken a leading part in arranging for the children of the Irish transport workers to be transferred to England to be saved from starvation and cared for there during the continuance of the strike which started early in September. Their efforts were opposed by the Catholic clergy who objected to the children being sent to Protestant

At the hearing today the attorney for the defendants explained that the women's action had been misunderstood. There was, he said, a touch of humor in charging them with kidnapping when they were really on an errand of mercy. They had not commit-ted any crime, he declared, but had perhaps acted indiscreetly The Attorney-General for Ireland

then consented to an adjournment of the case for a month which is taken as an indication that it will not come up again.

ANYTHING BUT LUCKY

Shareholders, However, Have Decided Upon an Entire Reorganization of Company'

[Canadian Press.]

Winnipeg, Man., Oct. 29. - The end tire reorganization of the finances of the Lucky Jim Mine was under discussion at a meeting of shareholders last night. The meeting was held at the request of the Winnipeg directors of the company. The request was made that the directors should present the financial position of the property. Hon. Hugh Armstrong, the president, reviewed briefly the history of the mine and went on to show what had been done since the present directors took office. He pointed out that after they assumed office it had been discovered that the title to the property was not vested in the mining company, and the directors deemed it advisable to pay the amount of money necessary for a clear title. In order to do this it was necessary that a mortgage company be given a first mortgage amounting to \$32,000. Since then \$40,000 has been advanced the company. Since the mine had been in operation ore had been shipped valued at \$107,902, and after all expenses had ben paid, net value \$43,537 went to the credit of the mine exclusive of mining and development charges at the mine.

Mr. Armstrong stated that all the rich ore had been exhausted and nothe ing remained but to exploit the lower grade of ore.

A second mortgage had been taken out on account of advances made and the total liability of the company is now \$81,000. Foreclosure proceedings have been taken by the first mortgage holders and \$25,000 is also needed to finance new work.

The directors have asked for proxa ies from shareholders, authorizing the reorganizing and an assessment of 5 cents, a share on stock, the money to be used for paying off liabilities and mortgages and for the development of the mine.

Police Station It To Be Heated With Greene-Swift Steam.

Another old relic used by the city, which dates back many years, is be thrown in the discard shortly and modern appliances used in its place, It is the old steam boiler in the police station that has furnished inadequate heat for the place for many years.

The boiler is famous for the amount, of coal it consumed without throwing out much heat, and at a recent meeting of the police commissioners, it was decided to have the station and barns heated by steam piped from the Greene-Swift plant, a few doors dis-

Workmen started on the excavations for the pipes this morning, but were stopped by the owner of the building between the police station and the Greene-Swift building, who claimed they were damaging his place by digging under it. It is expected that some arrangement will be made this after-

The pipes are being brought in from Carling street through the lane, and as the patrol cannot get out over the excavations, it is kept standing in voters, with a view to enlisting their front of the station.

his commodity has experienced an advance of 10 cents in the past week. The wholesale price on local market this morning averaged 90 to 95 cents per bag, while some lots brought as high as \$1 per bag. It is difficult to estimate the retail price because of these conditions, but probably 70 to 75 cents will be asked.

The price of hay has also soared hecause of the inclemency of the weather. The price obtained this morning was \$13 to \$16.50, with the offering small and the usual demand. Straw is also a scant offering at \$8 for choice wheat straw, and \$6 for the inferior

street. Then there are the sentimental and sanitary reasons, too - there would have been no objection because of the proximity of the plant and the consequent passage of garbage-laden carts, in front of the hospital and beside it, and the carting of coal to the institution would have been avoided. With its own siding on the London and Port Stanley tracks, coal, by carload lots,

and cheaper, would be possible. In connection with the whole transaction there has been a laxity typical of the civic administration London has rushed on itself. No engineer ever passed on the contracts, nor was any advice as to the possibility of heating the hospital ever secured.

FOR 18 YEARS "MAC" HAS GONE TO WOODS

Party of Aldermen and Others Under His Guidance This Year.

At noon today the "city hall" hunting party left, via the C. P. R., for Toronto, where it entrains tonight for its hunting "lodge" on Eighteen Mile Island, in the Big French River. Heading the party of eight were Chairman B. W. Bennett of the board of works; Ald. W. E. Robnson and License Inspector J. W. Callum. The personnel of the rest of the

party was Messrs. Tom Baker, Alex. Muir, Richard Winnett, Ed. Keyes and R Ferguson Early tomorrow morning the party will reach the end of its rail journey-Big Railway Board, Woods station on the Sudbury line of the C. P. R. Here a gasoline launch will take the party on the first 12 miles of its water journey, the last stage of which

will be by canoe. Sandy McCallum is the only member of the party who has hunted on the Big French before, and it was 16 years ago that the veteran hunter of the party last tramped the woods that surround Eighteen Mile Island. For years Deer Lake has been the happy hunting ground of Messrs. Bennett, McCallum, Muir and Robinson, the original members of the party, but forest fires last spring demoltaked the log cabin and camping outfit, so a shift in hunting grounds was made. Lower prices abroad, together with offer-ings here for foreign account, influenced weeks, arriving back in London the tone of the market at the outset. 80-YEAR-OLD TEACHER

Former Detroit Pedagogue Lectures in London on New Doctrines for Keeping Well.

Professor C. L. Wells, of Detroit, Mich., an octogenarian, who recently arrived in this city, has been giving interesting lectures, or "health talks," to large audiences in the Y. M. C. A. His work is of a practical nature and all experiments, used as illustrations, are made comprehensive by careful explanations. For many years he was a teacher, and later an inspector of public schools, in the American city. Failing health, however, com-pelled him to retire. While applying common sense methods of health restoration, he solved many perplexing problems concerning the care of the body, both in health and sickness, and also worked out many original the ories in the practice of keeping per-

manently well.
Since that time he has been lecturing and forming health classes in many cities on the continent, and at present he is a deacon of Woodward Avenue Baptist Church, Detroit, and is in his 80th year, although his appearance emphatically denied this

APOLOGY WAS MADE

This Resulted in Dropping of Assault Case in Police Court.

A charge of assault preferred against Ira Carling by William Lowe was withdrawn in police court this morning on payment of \$1.85 costs. Both men were employed by the London Street Railway Company, and about a month ago became involved in an argument. Since that time one of the men has left the service of the company, and as Carling made an apology to Lowe and paid the costs of the case the court allowed the matter to drop.

A workman employed on the West London bridge, who is affected by the cold and wet quite frequently, and takes a drop of liquor to drive the chills away, his second appearance within a week this morning on a charge of being drunk. As he was allowed to go the last time with a warning, his visit this morning cost him \$10, with the option of 21 days in jail

A woman charged with disorderly conduct was allowed to go on promising to get out of town this afternoon.

The talent providing the evening's entertainment were without exception members of he school, and they delighted their audience with an excellent program. Perhaps the most appreciated numbers at a concert of this kind are those rendered by the primary class. Several entertaining chorus numbers were warmly encored by the audience, for

the performance of the little folks was very pleasing, and provided considerble amusement. It would be difficult o select any "features" from the renainder of the program. The entire entertainment was of a high standard of excellence throughout. During the evening the school orchestra rendered several appropriate selections, and Mr. W. CANADA AND UNITED STATES JOINED BY BONDS OF PEACE

Dr. Frank H. Severance, of Buffalo, Touches On the Peace Centenary Before the Members of the Historical Society.

addressed the London and Middlesex Historical Society in the Normal School Tuesday night on the subject, "The Lower Lake Regions and the Peace Centenary." His lecture, aithough lengthy, was listened to with manifest interest by an audience that nearly filled the large assembly-room of the school. Mr. T. H. Purdom, K.C., president of the society, presided, and in his opening remarks expressed the opinion that the United States was leading the world in peace. There was no such war spirit in the United States as there is in England. He spoke of the work of President Taft on behalf of peace and the desire for peace of other recent American presidents, in-

cluding President Wilson An Unthinkable Thing. War between the United States and England or Canada, was unthinkable, said Mr. Purdom. And so long as peace continued would the ties tween the two countries be strengthened. Ig the Canadian Government would take ten per cent. of what it would cost to build a navy and grow heat on some of the vacant tracts of land in the northwest, said Mr. Purdom, it would be a great object lesson. Canada would then show England and line in the '30s, and that comic opera Germany what she can do in peace.
"There are millions of people in England and Germany," he said, "who dispute over the Alabama claims was suffer today because their forefathers only smoothed over by the wise statesfought too much. American civil war, although it was to Boys Used For War. "The Government might better show the nations what it can do in raising grain than in training boys for war; for war is largely carried on by boys and young men.'

Dr. Severance after referring the signing of the treaty of Ghent on Christmas Eve, 1814, pointed out how up to that time the lower lake regions had been the scene of great strife almost from the first coming of the white man to America. Trouble had begun over French and English rivalry for the beaver fur trade. First the priest came, then the explorer, then the soldier, and these and the "courier de bois," and the Red Indian, passed and repassed across the scene in picturesque procession. The establishrisoned with handfuls of homesick soldiers culminated in the Seven-Years' War. Then came the Revoluionary War, when from old Fort Niagara British soldiers led hordes of wild Indians down into the Mohawk valley to scalp and tomahawk the old and feeble settlers, and carry back the

Dr. Frank H. Severance, of Buffalo, | northern Ohio. Friendly feelings grew up between the pioneers on both sides of Niagara and the lakes. Of the U. E. Loyalists, Dr. Severance said there was no truer aristocracy in America. But free and friendly intercourse was cut short by the outbreak of the war of 1812. That war cost the United States \$50,000,000 and 50,000 lives, and only served to strengthen the ties that bound Canada to the motherland. But out of it grew the principle of nonarmament on the lakes, and today the Canadian and American frontier is an object lesson to the world. Recently Perry's victory on Lake Erie had been celebrated in American

cities, but in these celebrations there had been no note of exultation, but simply the recognition of a valiant Today, said Dr. Severance, there were probably 10,000 Canadians living in

Buffalo and Americans in great numbers were settling in the Canadian Northwest.

Several Serious Situations. Peace between the-two countries in the last centuries had been maintained several times by a close margin. There was the burning of the Carowar, the Fenian raid in the '60s, that might have made trouble. And the

On Christmas Eve, 1914, it was proposed to hold religious services Look Young! Bring Back Its not have been avoided, not even the throughout the English-speaking world. Secular services would be held in the lakeside cities, and the women of America were arranging to raise a fund to erect a statue of Queen Victoria in Washington. In reciprocation it was proposed to place a statue of Washington in Westminster Abbey. Travelling fellowships for students were to be arranged, the journalists of the different countries were to exchange visits, and a memorial bridge

was to be built across Niagara. More Sentiment For Peace. The feeling towards war was changing, said Dr. Severance. Arbitration was preferred to an appeal to arms. "New Internationalism" was showing the people of different countries how to co-operate in worthy objects independent of Government. The entire disarmament of the nations might never be seen by those present, but undeniably the people of the world were becoming more and more peace-

Mr. Purdom, in expressing appreciation of Dr. Severance's address, said that the time was fast approaching when universal peace would reign. If Germany, England and the United States would say, "No war," there would be no war. Civilization was making war impossible, war which was nothing but wholesale murder at best. Capt. T. J. Murphy, seconding a vote of thanks to the lecturer moved by Dr. Campbell, said he was in favor of peace, but complained of a feeling Western Ontario that there should be

The Militia's Place. He claimed that without a militia inside of two weeks there would be war right in London, that buildings would be broken into and stores looted. He said the police could not prevent it, if there were not a militia at the back of the law and the police. At the time of the street car strike a few years ago, street cars were burned on the streets, but a small company soldiers marching down town with

bayonets and guns made peace, he If the newspapers would only give the people both sides of the question. said Capt. Murphy, the people would see the obvious reason and necessity for having an armed force in the coun-He reminded the audience that according to existing law, every man between certain ages was regarded as a soldier, and if his services were needed and he declined to serve, could be court-martialed and shot.

Others who spoke briefly were: Mr James H. Coyne, of St. Thomas: Prof. John Dearness and Mr. D. Rogers. A finely-rendered plane duet by Misses Golden and Thompson was received, and several pleasing solos excellently sung by Miss Mc Bride called for repeated encores from

A New Novel by Charles Marriott Author of THE CATFISH

THE Wondrous Wife deals vitally with the lives of people who are the rule, not the exception, depicting them as they really are, disclosing their aspirations, their motives, their emotions.

No finer character has been created in recent fiction than that of the heroine of this story, Margaret, The Wondrous

The leading critics in England and America have long ranked Charles Marriott among the great realistic-idealistic novelists. With the publication of The Catfish his audience has vastly increased. At all Booksellers. \$1.35 net. THE BOBBS-MERRILL CO., Publishers

Natural Color, Gloss and

Thickness. Common garden sage brewed into a eavy tea with sulphur and alcohol added, will turn gray, streaked and faded hair beautifully dark and luxuriant, remove every bit of dandruff, stop scalp itching and falling hair. Just a few applications will prove a revelation if your hair is fading, gray or dry, scraggly and thin. Mixing the Sage Tea and Sulphur recipe at home, hough, is troublesome. An easier way is to get the ready-to-use tonic, costing shout 50 cents a large bottle, at drug

stores, know as "Wyeth's Sage and

Sulphur Hair Remedy," thus avoiding lot of muss. While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveess. By darkening your hair with Wyeth's Sage and Sulphur, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.
