2 pair for 95c

Fine Quality French Peas

The small sweet early pea. Regular 25c a tin. Special at

5 tins for 95c

Here and There

In order to handle the grain this fall the Fort William, Ont. force of 350 elevator men will be increased to 700. From 120 to 150 grain trimmers will be employed.

For the five months to August, 1923, Canadian newsprint exports were valued at \$35,303,043 against \$27,257,882 for the same period in 1922. Pulp exports in the same period were valued at \$20,008,461 against \$16,075,533.

Grain loading on Canadian Pacific lines during the month of September totalled 26,376 cars or 38,245,200 bushels. This at the beginning of the loading season which was two weeks late this year on account of the retarded harvest.

This has been the greatest season for automobile tourists Montreal has ever experienced, according to the Secretary of the Automobile Club of Canada. Cars, he stated, had come into the city over the King Edward Highway at the rate of two hundred a day, an unusual number from California, Florida, Carolina and Virginia being noticeable.

There was nearly \$160,000,000 increase in the total trade of Canada for the first five months of the current fiscal year, according to a report made by the Department of Customs and Excise. The total trade of the Dominion, according to the return, for the five months ending with August, was \$785,000,000, as against \$626,000,000 during the same period a year ago. Imports during the period were about \$393,000,000, as against \$303,000,000 a year ago, while exports of Canadian produce rose from \$316,000,000 approximately to \$386,000,000.

There is a heavy demand for bushmen, according to the Government Labor Bureau at Montreal. The big lumber companies have been engaging men for the bush, and the prospects are that the demand will be sufficient to make fall and winter conditions good. Wages paid this year by the lumber companies are higher than last year, the rates paid being \$40 and \$45 a month, whereas a year ago the schedule was down to \$28 a month.

With the completion of the harbor works now in progress, Montreal will be in a much better position in 1924 to handle a record flow of grain than ever before. Windmill Point elevator will be increased by 1,250,000 bushels storage capacity, making its total capacity 3,250,000. Four additional shipping berths are being provided at this elevator and will be in commission early next month, and the elevator's loading capacity will be increased from 50,000 to 90,000 bushels an hour.

W. C. LANGFORD Waterdown

Locals

Mr. Stewart Mitchell is visiting his brother George in Detroit.

Dr. C. K. McGregor spent last week with his brother, Dr. J. O. McGregor.

The local Orange Lodge held a card party in their lodge room last Wednesday evening.

The Misses Evelyn and Ena Griffin of Hamilton, spent the week end with Miss Myrtle Dale.

Mrs. A. L. Featherston has returned from Brantford where she has been visiting her daughter, Mrs. C. King.

Dr. Flannigan of Montreal, who was umpire at the Queens-Tiger football game, spent the week end at Clunes.

Mr. William Smith met with a very bad accident last Wednesday night by falling down stairs at Metzger's barber shop.

Dr. S. Ross of Elk Point, Alberta, who has been visiting his parents at Halifax, is the guest of Dr. Douglas McGregor at Clunes this week.

The Young Peoples' League of the Methodist church entertained the A. Y. P. A. of Grace church and Knox church society on Wednesday evening.

The W. A. A. A. is having an At Home in the Memorial Hall Friday evening, December 5th. The evening will be spent with games, cards, dancing and refreshments.

Mr. Edgar Cummins of Rochester, N. Y., who motored here this week to visit relatives in Waterdown and vicinity, returned to his home accompanied by his niece, Miss Helen Mitchell.

Sunday evening Dr. Irwin will speak on "The Bible—How the Books were preserved and gathered into a volume." In the morning his subject will be "Three Sufficient Reasons."

Poultry Increase Income.

Produce infertile eggs by removing the roosters from the flock in the summer time.

Provide clean nests and keep eggs clean.

Gather the eggs twice daily during the summer, to prevent them from being heated by the hen.

Keep them in a cool dry place away from the flies.

Market them at least twice each week.

Insist that they be bought on a quality basis.

Producers are admonished not to wash eggs.

High School Literary Society

The Waterdown High School Literary Society held its second successful meeting on Thursday, November 20th. The meeting opened sharp at 3.30 p. m. with the president in the chair. Miss Connell was appointed critic for the afternoon. The program was taken in charge by the third form students. The first number was a piano duet by Miss Z. Bogle and Miss M. McCartney, and Mr. W. Hendershot favored with a reading. The feature of the afternoon were the minute speeches, the victims being Miss Connell, Miss C. Stock, Miss E. Thompson, C. Goodbrand and Mr. Gould.

The Misses A. Vance, I. Madden, B. Bousfield, R. Bolton and M. Baker entertained with a short skit entitled "Men Not Wanted" which proved to be contrary to its title. Another reading by Miss N. Walker was greatly appreciated by all, after which everyone joined in singing a familiar selection.

The Sun-Dial was read by Miss B. Jones, and proved a great success. The critic's remarks were then given by Miss Connell, and the meeting came to a close by singing the National Anthem.

"When Peggy Comes to Town"

A grand musical concert under the auspices of St. Thomas Church, will be given Thursday evening, December 4th. The program will consist of high class musical and humorous sketches and entitled "When Peggy Comes to Town" given by the young people of Holy Family Church, of Hamilton. These amateur entertainers have appeared before large audiences in Hamilton and elsewhere and have always been well received. The Holy Family Orchestra will be in attendance.

Millgrove

Mr. John Everitt has purchased a new car.

Mr. and Mrs. Robert Flatt have returned after visiting friends in and around Simcoe.

Mr. Graves is renovating his house in the village.

The Women's Institute met at the home of Mrs. G. F. Griffin last Wednesday afternoon.

Our hunters have returned home after shooting their full allowance of deer.

Miss Helen Mitchell of Waterdown visited friends here this week.

Mr. and Mrs. C. M. Flatt are visiting in Toronto.

Mr. and Mrs. Geo. Jennings of Burlington Beach visited in the village on Sunday last.

Miss Eileen Pepper was visiting friends near St. Catharines Sunday last.

Mrs. Roy Gray is lying very ill at her home here.

Teaching 40 or 50 Pupils the Piano at Once

Not so many years ago, a person who ventured the suggestion that a whole class of 40 or 50 pupils could be taught the piano successfully at once would have been branded as an idiot. But not so to-day, for that this can be done, and is being done, there is no doubt.

In the United States to-day class teaching of the piano, violin and other musical instruments is not uncommon. A number of fine pianists, violinists, etc., have become efficient players, indeed, through this method of mass teaching. In Canada the method of instructing groups of school pupils in the violin has been tried in such centres as Ottawa, but the writer has not heard of a case where whole classes have been given instruction in the piano at one time here in this country.

One will here probably say, "Well, teaching a number of pupils to play the violin simultaneously is a much easier matter than teaching a group the piano." This will not be denied, but nevertheless school music supervisors in the United States—where music has become a force to be reckoned with—have approved of a plan for teaching the piano en masse.

The first necessity, of course, they saw was to secure an inexpensive instrument resembling a piano keyboard, that could be carried about at any time and anywhere, and so simple in construction that it "never gets out of order." Accordingly, after continual experimentation, a one-piece keyboard with "v" shaped corrugations instead of flat white keys, was born, and this instrument in the hands of each pupil has become the medium for class piano instruction.

One of the best authorities in the country remarked, upon examining this keyboard invention, "It looks as though you had solved the problem of class instruction." That the underlying ideas were correct, was abundantly proved by the results achieved.

Far off places

You need not deny yourself the pleasure of hearing famous singers, noted lecturers, wonderful concerts in distant cities just because you cannot travel. If you own a

ISSUE No. 48-24

with the experimental class of twenty pupils at the Lowell School, Boston; none of these pupils played the piano, and but five had pianos in their homes. At the end of ten weeks all played from memory a number of pieces ranging from sixteen to forty measures each, played all of the triad inversions and their roots, played four finger scales with alternate hands beginning with any degree of the scale, played four octave arpeggios with alternate hands, using the various chord positions, read instantly any intervals within an octave, named any pitches of the major scale, transposed their simpler pieces to three keys, and got good tone and good legatos when they went to the piano. (During the lessons one pupil always played the piece or exercise on the piano, while the rest of the class did the same thing on their keyboards).

In spite of the fact that this class work was done late in the afternoon after a full day's work in school, all were enthusiastic, as proved by the fact that they always asked the privilege of playing on the piano at the close of the lesson, and invariably left the room singing some of the tunes they had learned.

In conclusion, it goes without saying that a large portion of this class will continue their lessons with private teachers, and that some of the parents of the fifteen who did not have pianos will buy pianos.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Carthage in England.

The ruined temple at Virginia Water, Surrey, England, is always something of a mystery to visitors to that beauty spot, which was at one time a dreary swamp. Standing in a romantic glen, its columns look as though they had been undisturbed for two thousand years. The fact is that the temple has been in its present position about a century. Its original site was ancient Carthage.

On several of the stones are inscriptions. One in Greek, on an altar stone, tells how the structure was dedicated to Jupiter and to the other gods worshipping in the temple. Others are written in Latin. One of these reads: "Marcus Julius erected this to his most beloved wife Domitia Rogata, who lived twenty-three years."

At one time a fine group of ancient Greek statuary stood near these columns from Carthage. When William IV. opened the lovely grounds to the public, however, these statues were so shamefully mutilated by visitors that they were completely ruined, and the public were again excluded until the reign of Queen Victoria.

Locate Historic Spot.

The aid of Miss Annie Thompson, Brantford centenarian, will be sought by the Brant Historical Society in fixing the exact location of Brant's ford over the Grand River. This was so named because Chief Joseph Brant, Indian warrior and leader of Revolutionary days, who headed the exodus of a portion of the Six Nations to Canada when the Colonists won their revolt, used it frequently. From this name was derived the present name of the city. It is located north of the present river crossing by means of the Lorne Bridge, and the Historic Sites and Monuments Board is now considering the advisability of marking it permanently as of historic interest.

This Baboon a Houdini.

Among an African wild animals consignment landed at London is a baboon able to untie any knot or escape from any cage.

Canada's Forest at Wembley.

The economic value to Canada of her great resources in forests—second only in importance to agriculture—can best be realized by a statement of their vast extent. One-third of the total land area of the Dominion, it is estimated, may be described as forest lands, of which 900,000 square miles are mainly covered by softwoods and the remaining 300,000 square miles bear chiefly hardwoods. In view of this it is not to be wondered that the Canadian Government's forest products display at the British Empire Exhibition at Wembley, England, formed an important part of the Dominion's exhibit, and was the centre of the greatest interest to the thousands of visitors who passed through the Canadian Pavilion each day.

The forestry exhibit occupied a space 100 feet in length and 35 feet in width, which could be entered from the main corridor. It was surrounded on three sides by paneled spaces surrounding glazed wall-cases, and separated by groups of timber and timber products. The panelling was surmounted by decorative scenes or by stage settings of forest scenes. A temple-like structure in wood occupied the middle of one side, and contained a scenic model of a pulp mill. Two inland exhibits stood towards the two ends, one being a group of rolls of paper, and the other a stand for microscopes and photographs. Large timbers and a section of a large wooden pipe occupied the remaining space. The decorative features included paintings illustrating four stages in the journey of the logs from the forest to the lumber mill, and showing the progress of the industry during the last four centuries.

There were eight large spaces covered with panels of Canadian woods, each space containing 25 panels. Forty kinds of wood were shown in this way, and the different kinds of wood were grouped so that allied species might be compared.

The central figure in the paper section of the display was a scenic model of a typical Canadian pulp mill for the manufacture of groundwood pulp. The scale of the model was three-sixteenths to one foot and the capacity of the mill represented was 100 tons per day. The scene showed the river which brought the logs, which were then cut into short lengths and freed from bark. These blocks were stored on a pile until required, when they were conveyed to the mill to be ground. All the operations were carried on by power developed from the river.

The Canadian exhibit also included an electrically-driven compound-lever testing machine, capable of applying a load of 10,000 pounds. This machine was similar in general construction to those employed at the two laboratories of the Forestry Branch, Department of the Interior, at Montreal and Vancouver for testing timbers. The machines at these laboratories are, however, capable of greater loads, and of testing to their breaking point large structural timbers.

Baby or Husband.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario.

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Once in a while our set ideas about efficiency receive something of a shock. In a large industrial plant, one of the chief aids to efficiency is the good health of the workers, and in these days of strenuous health propaganda, one would expect to find every means taken to safeguard the health of the workers. A few days ago I visited one of the largest industrial plants in the world. Here, thought I, would be efficiency reduced to a fine art. Every cog would be oiled and

running smoothly, and every workman would be on the job. This was actually the situation as far as production was concerned. There was no delay in the output of the product. The workings of the various departments was a model of efficiency and co-operation. The thousands of workmen were all busy at their respective jobs and each man knew his own particular work well and was doing it well.

But from the standpoint of health, it was a different matter. As I passed along from department to department, there were many conditions noticeable that could be improved upon from the health standpoint. To begin with, there was the question of varying temperatures. Now it is very difficult to maintain a uniform temperature in different parts of the workshop, especially one where there are furnaces and ovens. The point is that the material for such work should be stored in the room where the furnace or blow-pipe is, so that the workmen do not need to go and transport the unfinished material to the scene of operation. This is exactly what I saw happening. Men working before a hot fire had to get from a distance the iron bars which were to be heated. In several cases they were required, in getting the material, to pass through a cool, even draughty corridor, leaving them liable to catch colds, pneumonia, lumbago and such troubles directly injurious to health, and even to life itself, if serious complications should set in. Not only that, but the expense of having men sick and delaying the output of the factory, was a distinct economic disadvantage apart from the actual danger to health. As for the lighting facilities, they were, to say the least, very inadequate, and the use of various kinds of artificial light was a source of great eye-strain. One of the essentials of good hygiene in a workshop or factory is freedom, as far as possible, from obnoxious gases or odors. The presence of these gases was at once noticeable on entering the plant and must surely prove injurious to the health of the workers. Even the washing facilities were very inadequate and scores of men left the plant grimy and dirty rather than waste the time in waiting their turn to get at the wash basins. The cloak rooms also were far too small and not properly arranged to suit the convenience of those having to make use of them. These superficial observations were made in the course of a brief visit to the plant in question, one of the finest and most up-to-date industrial concerns in the country, from a commercial point of view, the resources behind it being unlimited. It shows, however, that far greater interest will have to be taken by em-

MORE THAN 55,000 FARMERS

have bought their farms in Western Canada from the Canadian Pacific. A remarkable fact. Think! There is a reason. The large area of our holdings affording choice of location and of land to suit every farming need. Fair price, fair contract, and fair dealing combined with abundant fertility of soil, good climate and social conditions make farm life there desirable and attractive. Thousands more will select their farm from our virgin lands, from our improved farms, and with some capital and determination to work, can make a home and pay for it. Write for our booklet, "The Prairie Provinces of Canada," and leaflet, "Western Canada Forges Ahead." C. L. Norwood, Land Agent, Canadian Pacific Railway, Desk W., Windsor Station, Montreal, Que.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

players and employees alike, if the health of the workers is to be adequately safeguarded.

Why He Knew.

Samuel Partridge once published an almanac in London, which had a great circulation in England. It was especially popular among the farmers, because it predicted the weather a year in advance.

One day, while Partridge was making a trip in the country, he took dinner at an inn, and when about to resume his journey, the hostler warned him that it was about to rain. Partridge paid no attention and set out, but soon returned, having been drenched by a heavy shower.

He was so impressed by the hostler's weather wisdom that he offered the man a crown to tell how he could predict with so much certainty.

"Easy enough," was the reply. "We have Partridge's Almanac here."

"Ah, yes, to be sure," said Partridge, smiling. "I had not thought of that."

"And that man," went on the hostler, "is such a liar that when I saw the almanac set down to-day as fair, I knew it would rain."

Partridge paid the crown in silence.

PALE ANAEMIC GIRLS

Find New Health Through the Use of Dr. Williams' Pink Pills.

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. Delay may even result in consumption, that most hopeless of diseases. When the blood is poor and watery give Dr. Williams' Pink Pills coupled with nourishing food and gentle out-of-doors exercise. The new, life-giving blood which follows a fair use of Dr. Williams' Pink Pills stimulates the nerves, increases the appetite and brings the glow of health to pale cheeks. Mrs. W. E. Armour, Havelock, Ont., says:—"My little girl got into a very poor state of health. She was weak, very much run down and as the doctor did not seem to do her any good, I thought I would try Dr. Williams' Pink Pills. After taking six boxes of the pills she got nice and rosy and strong again. I would recommend Dr. Williams' Pink Pills to anyone weak and rundown."

You can get these pills through any dealer in medicine or by mail postpaid at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Composers and Old Instruments.

The marvel of the classic sonatas for the piano is increased for us when we remember the defective instruments for which they were written, and on which they were first played. In Beethoven's day, for example, the piano had a compass of only five and a half octaves and but little tone. Mozart's piano was an octave shorter than that. It is surprising what these two great men did with the piano which was all they had. Similarly it cannot be doubted that the extraordinary development of piano-music beauty made by Chopin was due in some measure to those improvements in the instrument during the nineteenth century, of which he was able to take advantage.

Slightly Muddled.

After the usual Saturday-night romp, the children gathered in the drawing-room for some music. They sung several songs, but at last it was eight o'clock. Then mother said:

"Now, children, choose a hymn to finish up with, and then you must all say good-night."

"Let's have 'Ere Again Our Sabbath Close,'" said little Elsie, as she turned over the pages of the big hymn-book.

"Well, I think that would be more suitable for to-morrow night," replied mother, with a frown.

The child looked puzzled.

"But you always do air our Sabbath clothes on Saturday night, don't you, mother?" she asked.

Pay your out-of-town accounts by Dominion Express Money Orders.

Mixed His Calling.

Client: "Didn't you make a mistake in going into law instead of the Army?"

Lawyer: "Why?"

"By the way you charge, there would be little left of the enemy."

Minard's Liniment Relieves Pain.

Dry for Nine Years.

In the Montreuil district of Cape Colony no rain has fallen for nine years.

ISSUE No. 48—24.

THE CANADA STARCH CO. LIMITED—MONTREAL

To Beat the United States.

Rome is to be modernized. The slums of the Italian capital are to be cleared away, a large programme of new building is to be undertaken, and there is even to be an underground railway system. But perhaps the most striking of all the plans for bringing the Eternal City up to date is the scheme for a mammoth skyscraper, which is to have eighty-five stories as against America's highest of fifty.

The height of the Woolworth Building in New York is 750 feet, while the Eiffel Tower goes 234 feet higher. But the Italian project, if it materialises, will beat both these. Its tower, which will rise in telescopic perpendiculars from a base of twenty stories high, is designed to top 1,135 feet.

Five thousand offices, a great amphitheatre, a concert hall, a theatre, and extensive galleries are all to be housed in this world-beating skyscraper.

Minard's Liniment for Rheumatism.

No Such Place.

"Where did the car hit him?" asked the coroner.

At the junction of the dorsal and cervical vertebrae," replied the medical witness.

And the burly foreman rose from his seat.

"Man and boy, I've lived in these parts for fifty years," he protested, ponderously, "an' I never heard of the place."

In Australia they will travel a hundred miles to go to the theatre.—Lady Forbes-Robertson.

HER NERVES BETTER NOW

Received Much Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ontario.—"I started to get weak after my second child was born, and kept on getting worse until I could not do my own housework and was so bad with my nerves that I was afraid to stay alone at any time. I had a girl working for me a whole year before I was able to do my washing again. Through a friend I learned of Lydia E. Pinkham's Vegetable Compound and took four bottles of it. I gave birth to a baby boy the 4th day of September, 1922. I am still doing my own work and washing. Of course, I don't feel well every day because I don't get my rest as the baby is so cross. But when I get my rest I feel fine. I am still taking the Vegetable Compound and am going to keep on with it until cured. My nerves are a lot better since taking it. I can stay alone day or night and not be the least frightened. You can use this letter as a testimonial and I will answer letters from women asking about the Vegetable Compound."
—Mrs. CHARLES CARSON, 27 Forsyth Street, Chatham, Ontario.

Mrs. Carson is willing to write to any girl or woman suffering from female troubles.

Watch your Skin!

It's up to you to look your best

Young girls, old girls, plain girls, pretty girls—don't we all know those days before the mirror when, with a sigh, we turn away and say,

"Gosh—I do look plain!"

On those days when our skin looks bad and won't get right—our noses won't powder—our eyes are dull! We all know them. But wise women watch their skin and at the first sign of something take the best remedy—a dose of

Beecham's Pills

They purify the blood, clear the skin—make you happy, bright and attractive. Sold Everywhere in Canada.

According to Canadian Pacific officials, immigrants from Europe who spend a few hours in Montreal on their way west are re-discovering America—or rather Canada—at a great rate. Some days ago there were eighty Scandinavians drumming their heels in the big waiting-rooms at Windsor Station, bored to tears. Then one of them suddenly discovered that the Province of Quebec, unlike Sweden, is not "dry." The rush of the Danes on Alfred's England was as nothing compared to that with which the delighted Scandinavian gentlemen emptied that waiting-room. So excellent did they find the beer that they did not show up again till train-time, when they announced unanimously, though with slight difficulty, that "Canada bane one fine country."

To be stranded in a strange city with no worldly assets but a suit of dress-clothes and yet to come out of the adventure victorious is to achieve something. Joe and Bill arrived in Montreal a few nights ago, their baggage consisting of the clothes they wore, two dress suits, an adequate quantity of the needful and an enthusiastic determination to see Life with a capital L. When they woke on the morning after, they found that someone had relieved them of everything they possessed except the dress suits they had slept in, and which they had worn for the previous night's affray.

In this predicament they appealed to the authorities at the Canadian Pacific Windsor Station, for work whereby to earn enough to take them out of the wicked city. Sympathetic officials put them on the snow-shovelling gang. And here these two stout fellows, in their dress suits, Joe with his feet wrapped in sacking to keep them warm, labored heartily for four days, earning the price of their tickets back to the little old home town. So once more fiction and the movies are beaten.

"You don't need his Telephone Number

for Station-to-Station calls"

"If I could remember his number I would make my call Station-to-Station and save money."

This subscriber had the wrong idea. He didn't need to know the number of the distant telephone.

All he needed to say to the Long Distance operator was: "I will speak to anyone at _____" (then give her the name of the person who has the telephone—and the address too, if he knew it).

Perhaps this information will enable YOU to use the lower Station-to-Station rate more frequently.

Every Bell Telephone is a Long Distance Station

WHICH RADIOLA?

RADIOLA III-A
Range up to 1,000 Miles
Improved Selectivity
Minimum Radiation

You will buy a Radio set if you have not already bought. It is inevitable, if you would keep up with the times.

You may not be interested in music but there are sports, politics, religion, agriculture, child education, welfare work and a thousand and one things to choose from.

Which Set? Here are Eight Points of Radiola Superiority

1. Simplicity of operation.
2. Accuracy of reproduction.
3. Wave length range.
4. Amplification.
5. Selectivity or ability to choose between stations.
6. Sensitivity or ability to pick up distant stations.
7. Fine workmanship.
8. Good appearance.

Which Radiola? There is one for every purse. The Radiola III-A is the most popular. Its price is moderate, its range wide, its performance dependable and its results absolutely satisfactory.
