THREE YEARS

In the Territorial Jail Is Sentence Imposed On Mrs. Mansen

TRIED AND CONVICTED YESTERDAY

Of The Theft Of Gold Dust And Gold Nuggets

FROM A MAN NAMED CONTIN

Who Was a Patient Like Herself at the Sisters' Hospital During the Month of August.

Yesterday in the territorial court was a busy day. The case of Mrs. Mansen alias Amanda Young, was heard during the morning session, when a large number of witnesses were examined.

Immediately after the noon recess a motion was heard from Attorney Bleeker for the defense in the Boone case. The motion was one praying for the adjournment of that trial till after the return of a witness who had gone outside and who could not get back before spring.

Judge Craig said after hearing the

motion that the question of witnesses was a very serious one in this country, and inasmuch as the showing of the motion did not establish the fact that the witness desired was a very important one, the motion would be denied, and the case must go on.

This matter disposed of, the case already before the court was again taken up with the evidence of Mr. Contin, who, by reason of his lack of knowledge of English, gave his testimony through Sister Mary Prudence, of St. Mary's hospital, who acted as his interpreter.

The witness testified that the nuggets and gold dust displayed in evidence was that which he had lost. He had left them with the Sister at the hospital for safe keeping.

The Sister testified that she had never seen a nugget in the possession of the defendant while in the hospital, but that she, Mrs. Mansen, had given a nugget to the day nurse which she said was all she had left of the lot which had been stolen from her by her husband, Mansen.

Contin's partner Odelurd, was next sworn and identified a large number of the nuggets as having come from Gold Hill and Bonanza creek, from the claims owned jointly by Contin, himself, and a third partner.

Helen Ross, matron at the police prison at the time of her arrest, said that she had found upon her person 40 ounces of gold dust and 7 1/2 ounces of nuggets.

At the close of the case for the Crown, Attorney McKay, for the defense, placed his client in the witness stand in her own defense.

Mrs. Margaret Mansen testified that she had lived here for about a year, that she had earned upwards of a thousand dollars, that a large number of people had seen her with the nuggets in her possession, and that the dust and nuggets in evidence were her personal property.

Mrs. Mansen stated that this dust and nuggets were in part in the cabin of one Billy Hempstead, who was a friend of her's, and where she stored her trunk and other things.

On cross-examination by the crown prosecutor, she stated that the dust and nuggets were not in the cabin but outside on the ground.

She stated that she had worked on a claim where Mr. Wm. Bernard had been in charge and that he knew of her having dust and nuggets.

Mr. Bernard was called to the stand and testified that he had seen her in possession of some five or six ounces of nuggets last May or June; that he had paid her at different times an aggregate of from \$500 to \$600 in dust. He had given her a nugget which he identified. The one identified was the same as that positively identified by one of the former witnesses as belonging to Contin.

Mr. Grant was called and said that he had seen the prisoner with the nuggets he had given her on her birthday, but he could not identify them.

Sergeant William Cornhill was the last witness called and testified that he had known the prisoner to be in possession of sundry nuggets in the past. He also told of how Mrs. Mansen had been sent down by him in February last from Gold Bottom, where he had been in charge of the police station, on a charge of vagrancy. This charge had been preferred against her under rather peculiar circumstances.

Mrs. Mansen had been cooking there in a roadhouse, had quit and gone away, but had afterwards returned to cook for her board while waiting for more profitable employment. During this time she got sick and kept to her bed, refusing to move, and the vagrancy charge was made as an inducement to her to move on.

Attorney McKay undertook the conduct of the case at the last moment owing to the fact that the attorney who had her case in hand was called away quite unexpectedly. Notwithstanding this the young attorney made a good defense for his client.

Crown Prosecutor Wade was, as usual, bitingly sarcastic in his conduct of the case, and created several audible smiles by his questions.

After the case had been placed before the jury by Judge Craig they retired to the chambers above, from where they filed back after an absence of half an hour, the foreman delivering a verdict of guilty with a recommendation to mercy.

Judge Craig said that the offense was a very serious one and at the same time a very mean one, as she was guilty of robbing those who were caring for her in her time of need. She is liable, he said, to a sentence of 16 years, but considering the fact of her sex, he was disposed to give her one more chance to redeem her life. He sentenced her to a term of three years in the territorial jail.

Best Canadian rye at the Regins.

RECEIVED BY WIRE.

ISLAND LIBERALS

Are Not in Love With Premier Laurier's Government.

AND WILL SEEK FOR A CHANGE.

Irish Question Not A Factor In Present Campaign.

BRYAN IS TALKING AGAIN.

South African Volunteers Returning—Roberts Delayed—Machinery En Route.

Nanaimo, B. C., Sept. 29, via Skagway, Oct. 3.—Indignation against the Laurier government has been simmering here for the past two years and is now beginning to make itself felt. The Liberals on Vancouver island are now determined to protect themselves against further blundering and indifference at Ottawa and to that end they are making a united effort to send to parliament a man who will have no strings on him. At the convention just held here the whole delegation, 42 in number, voted for William Sloan, formerly a Dawson magnate, and against Ralph Smith, who is president of the Dominion Trades Labor Council.

Ireland Out of Politics.
London, Sept. 29, via Skagway, Oct. 3.—For the first time in many years all Irish questions are being left out of the parliamentary campaign. Everywhere in Great Britain, except in Ireland, these issues are practically dead or at least suspended. The rights and wrongs of ritualists are now more frequently discussed and are, to a great extent, being made party issues.

Bryan Again Talking.
Nebraska City, Sept. 29, via Skagway, Oct. 3.—After a short rest Bryan has again taken the stump and is now making a specialty of anti-trust speeches, that being, he says, the main issue of the campaign. In several of his recent speeches he has not mentioned imperialism, while in the outset he asserted was the paramount issue.

African Volunteers Returning.
London, Sept. 29, via Skagway, Oct. 3.—The volunteers in the South African war will be home in time to take part in the Lord Mayor's parade, which will take place on the 9th of November. It will be several weeks later before the return of Lord Roberts, who will be the recipient of many honors at Natal and the Cape previous to his departure for home.

More Machinery Coming.
Skagway, Oct. 3.—One hundred tons of hydraulic machinery arrived here

yesterday for the Yukon Iron Works of Dawson. J. R. McGovern, of Dawson, is also here with 127 tons, principally boilers and thawing machines. Both consignments will be shipped at once. The owners are confident of landing their cargoes safely in Dawson before the close of navigation.

A Successful Venture.
The little steamer Flora, of the Klondike Corporation, Ltd., arrived yesterday evening from Whitehorse with all the freight she could carry, and with a laden barge of 125 tons in tow. The latter was brought down the entire trip by the little steamer and not once did she become hung up on bars, although, to quote from Agent Calderhead, who was aboard, "The bottom of the river in the vicinity of Hellsgate is peeping through the surface of the water in many places." But the infallible Capt. Martineau was at the wheel and the trip down was only one more successful score on the long list of his maritime achievements.

The cargo of the barge consists principally of oats, hams and eggs, and is owned by Messrs. Lancaster & Calderhead. The successful landing of the big cargo at Dawson makes this, from a financial standpoint, the banner trip of the steamer Flora for the present season, although the active little fleet comprising the Flora, Nora and Ora, has not lost a day since the opening of navigation last spring.

COMING AND GOING.

W. C. Squires is in the city after a sojourn of several weeks at Grand Forks.

R. W. Calderhead is back from a hustling business trip to Whitehorse where he was kept too busy to wait for the "barkeep" to shake a lemonade.

Frank Close is daily expecting his wife and two little daughters from Port Townsend, Wash., where they have been visiting for the past two months.

Jack Wiley contemplates a trip to Whitehorse and possibly on to Skagway in a day or two. On his return he will probably chaperone a fleet of freight-laden scows to Dawson.

Arthur Lewin leaves today on an extended trip abroad, visiting gay Paree in his travels. Arthur will be missed by many as he is constantly increasing his circle of friends. He returns in the gentle spring time.

Steamer Kerr Arrives.
The Pacific Cold Storage Co.'s steamer Robert Kerr announced her arrival in Dawson at 9:30 o'clock last night by the blowing of the siren whistle which formerly proclaimed the presence of the steamer Lottie Talbot and which last winter announced to the residents of Dawson the unpleasant information that a fire was in need of attention and Yukon river water.

The officers of the Kerr ate Capt. Gray, Chief Tenant and Purser Davis. Her cargo consists of 200 tons of frozen meat and poultry which will be sold in Dawson. The big floating refrigerator left St. Michael August 25 with 25 passengers. She came along without incident until some distance below Circle City, when her shaft broke and left her helpless. Many old and experienced river men said it was off with the Kerr, her cargo and passengers unless a tow was procured, but Capt. Gray and Chief Tenant thought otherwise. They brought into play their mechanical skill with the result that the shaft was so doctored as to enable the Kerr to complete the trip under her own steam, which she did, arriving here as previously mentioned, last night.

The Kerr, owing to her long drawn out voyage up the river, did not bring any late news from any point. She had two passengers from Koyukuk, but they had left that country in company with others who arrived in Dawson on steamers of some days ago.

It is not yet decided where the Kerr will put in for the winter, but owing to her crippled condition she will probably lay up in the immediate vicinity of Dawson.

WEDNESDAY, OCTOBER 3, 1900

WILL SOON BE CONTROLLED.

The attention of the Nugget has been directed to the fact that numerous attempts, no few of which have been successful, are being made to break the quarantine now established at the Forks. The quarantine was determined upon by the health officials only after thorough consideration. Care for the public health required that the district concerned should be placed in quarantine and it becomes the duty of those people who happen to reside in the affected district to abide by the rules laid down, even though they should be more or less inconvenienced thereby. If the authorities receive the willing co-operation of the people generally there should be no considerable difficulty in stamping out the disease or at least in controlling it to such an extent that the situation will be relieved of its present somewhat serious aspect. Cheerful acquiescence should be given to the regulations which the health officers have found necessary to impose. We are of the opinion that the quarantine will not have to be maintained for any considerable length of time if it is rigidly enforced and the disease thus kept within the limits where most of the cases now on the island below town are known to have originated. It will be much better for all parties concerned to put up with some little inconvenience for a short time rather than run the risk of having smallpox epidemic during the cold weather which is now at hand.

WHO DID IT?

Judge Dugas is the latest claimant for the honor of securing all the reforms which have been granted to the Yukon territory in the past sixty days. It doesn't make much difference to the Nugget or to the people of the territory how many men make a similar claim. The essential thing is the fact that sweeping changes have been made in the laws which will enable this territory henceforth to grow and advance with rapid strides along the highway of prosperity. The conditions in the Yukon today for the success of the miner and prospector are fifty per cent better than they ever were before. Our own opinion about the matter is that the whole thing has come about as the result of the campaign for reform inaugurated by this paper three years ago, long before Judge Dugas had even received an appointment to the Yukon bench. However, if it affords the judge any satisfaction to indulge the little fiction that he has accomplished it all, the Nugget will not raise any objection thereto. As noted above we are content that the changes have been made. We will leave the apportionment of the honor to the people of the territory.

THE BOARD OF TRADE.

What is the matter with the Board of Trade. Little or nothing has been heard from that organization for some time past. Winter is now approaching and there is work for the board to do, which should be begun at an early date if proper attention is given to it.

It will not be forgotten that the intention has been expressed by the Yukon council, or at least by members of

that body, to compel Dawson to become an incorporated municipality provided measures for so doing are not proposed by the citizens of the town themselves.

It occurs to the Nugget that this matter of incorporation which undoubtedly will be taken up by the council as soon as the two members are elected on the 17th inst., should be given thorough consideration by citizens generally in order that the best system of municipal government which it is possible to secure may be determined upon for Dawson. The best method of securing a charter in every way adapted to the circumstances will undoubtedly be through the appointment of a charter commission, representative both of the citizens and the council.

Consideration of such matters is quite within the province of the board, and in fact it is for just such emergencies that it was organized. An awakening on the part of the Board of Trade is distinctly in order.

British Columbia is waking up to the fact that the federal government has not given that province the treatment which it deserves. Remonstrances of a very serious nature are, therefore, being proposed and it has even been determined to send an independent man outside the parliamentary delegation to talk things over with the politicians at the capital. British Columbia ought to take a lesson from the Yukon territory. The grievances under which this country has suffered for three years have nearly all been removed, which fact is due wholly and entirely to the continuous and uninterrupted "kicking" which has been going on since the Klondike was first discovered. British Columbia may well take a lesson from the experience of the Klondike and begin to make her wants known. There is nothing like keeping everlastingly at it to insure results.

It has been almost ten days since any outside mail was received in Dawson. We hope this does not mean a relapse to old conditions. Dawson has had a taste of good mail facilities, and it would certainly be unfortunate should the old conditions be again revived.

Would Trade Them Off.

Thomas S. Nowell, the head of the famous Alaskan gold mining companies bearing his name, in an interview last evening at the Hotel Butler, says the Post-Intelligencer, suggested a somewhat ingenious outcome of the expansion question.

"The real facts leading up to the purchase of Alaska," said Mr. Nowell, "were that during our civil war Russia sent her gunboats to our shores when England threatened to help the South, and told her to keep hands off, thus helping out the North. As a payment for this service America bought Alaska. That is, the money was paid and Alaska was given us as a nominal purchase. Russia did not think the territory of any value."

"If Hamilton Fish had had half the foresight or been half the statesman that Seward was he could have taken British Columbia and the Northwest territory in settlement of the Alabama claims. Instead of that he accepted the paltry sum of \$20,000,000 in cash for something that would have been worth thousands of millions to us. Just think for one moment what could be done with the immense mines of coal and iron alone. We could have the structural material for ships and could build as cheaply as on the Atlantic coast."

"But the time will come when America will trade the Philippines to Great Britain for British Columbia and the Northwest territory. These would be an element of strength to us and are an element of weakness to her. The Philippines would be worth many times more to England than British Columbia and the Northwest territory."

"I claim that I am the originator of this scheme. I suggested it to Senator Carter a year ago while conversing with him in the Waldorf-Astoria hotel. He said it was a grand idea."

When in town, stop at the Regina.

STROLLER'S COLUMN.

"You cannot know what 'tis to be the property of all;
To own no self, to know no rest, obey each heedless call,
To smile in grief, to weep in joy, a thought-machine 'mong men;
To have for staff on life's rough road naught but the fl-gging pen"

The above did not germinate in the think tank of the Stroller, but it fits his case "shut like der paper on der vall." To be compelled by a relentless public to get out regardless of weather and strok when the inclination is to sit quietly in his boudoir with a wet towel entwined around his head is a hardship which none but those whose staff on life's rough road is naught but the flagging pen, ever experience; and yet the sympathy which is extended by the calloused public to such martyrs would go through the eye of a cambric needle without touching top, side or bottom.

The funny paragraph writer for a great paper was dying. Around his miserable pallet which was stuffed with hazle brush were gathered his emaciated wife and yellow jaundiced children. The wooden clock on the wall told him he had but 11 minutes to live. The door burst open and the editor of the great paper which had grown rich on the sick man's productions, for which he had been paid \$7.50 per week, one-half of which was in cord wood, rushed to the bedside of the dying man, tab-book and pencil in hand. "Here," said he, "we have just had a telegram at the office which says that Grover Cleveland, who is up in Maine on a fishing trip, lost his false teeth in the Penobscot river. Give us a funny comment on it! Quick, before you die!"

The man gasped for breath. "Raise me up, will you? Thanks! Now write as I dictate:

"Grover should look for his teeth in the mouth of the river." Gurgle, gurgle.

The funny paragraph writer was dead, but the reputation of the great paper was saved.

The woman who has a half dozen sons-in-law is probably as good authority on men, their natures, habits, vagaries and eccentricities as are many professors who have made human nature a life study.

The Stroller chanced to meet one of these women a few days ago and from her he got a number of points concerning men which he had never learned.

"In speaking of men," said the old lady, "I am in here more to get away from them than for any other purpose. I am a widow and have no sons; but I have four married daughters, and such a quartette as their husbands are I hope I may never again see. Not that any of them are particularly bad, for they are not; just queer, that's all."

"My oldest daughter's husband is a farmer who always has dried milk on his boots and talks about 'spring calves,' 'yearlings,' 'shoots,' 'wethers' and other farm products from Monday morning until Saturday night and on Sunday he goes to church and spoils all the music by trying to sing tenor. He is a kind husband to my daughter, and she appears to be about as much interested in 'yearlings' and shoots' as he is."

"My second daughter married an ex-school teacher and an ex-nearly everything else, for I have heard him tell of having practiced law in Arkansas, preached in Texas and done several other things. He fishes all summer long and traps pole cats in winter, and is one of the best natured fellows on earth. I give my daughter enough money to keep them, and they are as happy a pair of turtle doves."

"My third daughter's husband is the one of the four that I can not endure. He is one of those 'mincing' men that thinks he knows all about housekeeping. He is always bragging that he never tasted tobacco or liquor in any form. I often think if he would get drunk it would be an improvement. I am opposed to the filthy use of tobacco and also to the use of intoxicants, but honestly I have no respect for a man who brags that he never touched such things. My experience and observation has taught me that a man who has no manly vices will bear watching."

"Just before I started for Dawson my youngest and last daughter was married, so I don't know much about him, except that he looks like a good-hearted young man. He is captain of a football team and when he greeted me as his new mother he put two of my fingers out of joint and you can see that they are still swollen. His hair looks like a door mat, but I think he will turn out all right."

"What do you intend doing in this country?" meekly inquired the Stroller of the professional mother-in-law.

"What do I intend doing? Well, it is just this way: I am only 52 years old and I never had a rheumatic pain nor a corn; I have some money and as responsive a heart as ever thumped against a whalebone, and, well, to tell the truth, if I get a good chance I'll marry. I prefer that to going back and alternating among my sons-in-law."

VERY LONG BOTTLED WINE

Is Most Popular With Bibbers and Connoisseurs.

Many Manufacturers Give Any Vintage Desired, But Claim There Is Nothing In It.

The average wine drinker feels he is favored above his race when invited to drink from a bottle that has been hidden in a dark cellar for a quarter or half a century, but often it is his imagination and not the age of the wine that makes him happy, so winemakers say. No kind of liquor "ages" in the sense drinkers use the expression after it is put into glass vessels. Occasionally there is a little saccharine matter remaining after the liquid is racked off into bottles, which is converted into alcohol, but in all other respects the wine is the same after standing in bottles for years as it was on the day it was bottled. It is the conversion of the remaining sugar after the wine has been bottled that forms what is called "crusts" to delight the hearts of connoisseurs, but which are chemically known as tartrates.

Bence Jones, an undoubted authority, says the percentage of alcohol in wines ranges from 9 to 25 per cent, according to the variety of the grape. The remaining constituents are volatile oil, acetic ether, grape sugar, glycerine, gum, vegetable albumen, extractive and coloring matter, tannic malic, succinic and calcium tartrate. In some grapes one or more of these ingredients may be absent or present in small quantities. There are volatile oils in all wines and liquors which cannot be separated, and it is these oils which give the "bouquet" and which connoisseurs are so pleased to discourse upon, but which not many of them know anything about.

Every variety of wine and liquor has a different "bouquet," and in wines it is governed by the kind of grape, the soil in which the grape grows and the process of manufacture. In a large degree the flavor as well as the odor is governed by the quantity and quality of the volatile oils mentioned. Another thing that delights the hearts of some connoisseurs is the "must" and about which they know no more than they do about "bouquet." The juice of all grapes when it comes from the press is called "must" and it is colorless. When fermentation sets in, which is the sugar being converted into alcohol, the coloring matter inherent in the grape gives the product the color by which the wine is known. This relates to wine made of grapes, and not wine made in a laboratory. When nearly all the sugar has been converted into alcohol and carbon dioxide the wine is considered "formed" and ready to be racked off into casks or bottles, and it is just as good, as pure and as "old" then as it will ever be, so those who claim to know say. But wine consumers think otherwise and manufacturers are quite willing that they should, for it costs very little to keep accumulations on hand in casks of "vintage" of 10, 20, 30 and 40 years ago, and the prices of such wines are enormously high.

There is plenty of wine in the world that is from one day to 400 years old. There are wine vaults in Warsaw that were established in the 16th century, and the custom has been to put a given number of bottles of each vintage in permanent storage, except on extraordinary occasions a few bottles may be withdrawn for consumption, though nearly a century passed before that custom was adopted, so that no "old" wine would be served that was much less than 100 years of age. When this wine is served one bottle goes a long way. A small quantity is given to each guest, for it is the novelty of drinking wine a century or two or three centuries old rather than the quality of the wine that pleases.

In Chicago there are cellars said to hold wine that was bottled a quarter and some a half a century ago. And the fact that it is kept to "point to with pride" rather than consumption it is likely the next and succeeding generations will have the same bottles to discuss as a whole, but never their contents. It is as natural for a wine connoisseur to have "musty old wine" in his cellar as it is for him to have a cellar. The knowledge that it is there is a source of supreme satisfaction, but a very much later vintage answers all purposes for every day use. While there is plenty of genuine "old and musty," there is plenty on the market and in some cellars which was made 25 years old in one day by a chemist, who

also chemically discolored the labels to correspond with the age of the wine.

Sometimes makers of "25-year old" wine in a day make the ridiculous mistake of using recently invented machinery to drive corks. In the language of the street, it is a "dead give away." So also is a style of bottle that was made 10, much less 25, years ago. A dealer in wines said: "Yes, I have wines in stock that are very old—exactly as old as your imagination, your credulity and your ignorance of wines would like them to be."—EX.

Programme de MM. Noel et O'Brien

Le programme suivant a été adopté par MM. Auguste Noel et Thomas O'Brien pour les prochaines élections et a été approuvé par une assemblée de leurs amis; Ce programme est maintenant soumis à la considération et à l'approbation des électeurs.

REFORMES LOCALES

Le programme dans cette élection ci concerne naturellement les questions locales. MM. Noel et O'Brien et leurs amis s'engagent à faire prévaloir les réformes suivantes.

UNE BONNE POLITIQUE

1. Nous sommes en faveur d'une large politique quant à l'ouverture, à l'établissement et à l'avancement de ce pays. Tous les efforts devraient être concertés de manière à mettre, dans le plus court délai la propriété publique entre les mains du mineur et du "prospecteur." Tous les travaux publics, à l'avenir, devraient être faits d'une manière permanente.

CHEMINS ET PONTS.

2. La construction des chemins devrait précéder le prospecteur. De bons chemins et ponts devraient être construits immédiatement là où le besoin s'en fait sentir. Les ponts et les chemins suivants entre autres, devraient être construits avec toute la célérité possible.

1. Chemin de Whitehorse à Dawson, passant par Selkirk, Black Hill, Eureka and Gold Run, 270 miles.
2. Chemin de Gold Run à Clear Creek, 30 miles.
3. Chemin de Dawson à Fortymile et branche à Sixtymile 52 miles.
4. Chemin le long du "Dominion" 20 miles.
5. Chemin le long du Hunker, 52 miles.
6. Chemin le long du Last Chance, 6 miles.
7. Chemin de Whitehorse aux mines de cuivre, 10 miles.
8. Tout chemin commence devra être complète d'une manière permanente.

PROTECTION DES MINEURS.

3. Les mineurs constituent la masse des travailleurs dans l'Yukon. Comme tous les autres ouvriers la loi devrait les protéger pour leurs gages. Tous les mineurs (de placer, de quartz ou de charbon) devraient être protégés de toute injure provenant de la négligence ou de l'absence de précautions suffisantes à leur égard. Une loi protégeant le mineur devrait être passée.

TAXES.

4. Un bon système pour prélever les taxes est nécessaire. Celui établi par le Conseil de l'Yukon, est impropre sous plusieurs rapports. Prélever des taxes sur la somme des affaires faites par un individu, est contraire à tous les principes reconnus sur cette question. C'est illogique et injuste. Nous protestons vigoureusement contre toute tentative de mettre ce système en force avant l'entrée dans le conseil des représentants de peuple.

ECOLES.

5. Nous sommes arrivés à un nouveau stade dans le développement de ce pays. Tous nos efforts devraient tendre à encourager le mineur à s'établir ici avec une famille. Pas un coin de Canada, quelque petit qu'il soit, qui n'ait ses écoles. Pour que ce coin-ci devienne permanent, il est nécessaire qu'une politique vigoureuse soit suivie, afin que la loi elle-même requise, suivant la loi, des écoles soient construites. Ces écoles devront être modernes, bien équipées et être munies de bons instituteurs.

UNE COUR D'APPEL.

6. Le système d'en appeler à une Cour d'Appel siégeant dans une province éloignée devrait être immédiatement changé, à cause des frais énormes et des délais sans fin qui en résultent. Un autre juge devrait être ajouté à ceux que nous avons déjà afin de constituer une Cour d'Appel.

SUCCESSIONS.

7. La présente loi pour l'administration des successions des personnes qui meurent dans ce pays est mauvaise. Elle met trop de pouvoirs entre les mains de l'administrateur public. Les frais qu'elle fait encourir sont considérables et elle met en danger les biens des défunts.

POLITIQUE GENERALE.

8. Le Conseil de l'Yukon devrait consacrer son temps au développement des industries minières, or, cuivre, charbon et autres minières. Le développement rapide des très riches régions minières du haut de l'Yukon, Whitehorse, Pelly, Hootalingua et de la rivière de Saumon, rend nécessaire l'adoption de cette politique.

QUESTIONS FEDERALES.

Bien que les questions fédérales ne soient pas directement concernées dans cette élection, MM. Noel et O'Brien et leurs amis, s'engagent à faire tout en leur pouvoir pour faire prévaloir les réformes suivantes:

LOIS MINIERES.

1. Les lois minières devraient être faites par le conseil de l'Yukon et être basées sur l'expérience des mineurs résidant dans ce territoire, sujet à l'approbation du Gouverneur Général en Conseil.

LA ROYAUTE.

2. La royauté devrait être abolie. S'il est nécessaire de prélever des revenus, nous favoriserons une légère taxe d'exportation à laquelle le citoyen contribuera aussi bien que le mineur.

PROCES ENTRE MINEURS.

3. Afin d'éviter des délais et des frais dans les procès entre mineurs, les appels devraient être entendus par les juges de la Cour de l'Yukon et non par le ministre de l'Intérieur.

LICENCE DE MINEUR.

4. Seuls les propriétaires de mines et les "laymen" devraient être obligés de se munir d'une licence de mineur.

AFFIDAVITS DE REPRESENTATION.

5. Afin de sauver du temps et de l'argent au mineur, l'inspecteur des mines devrait être obligé de se rendre sur les "claims" afin d'y recevoir la preuve de représentation offerte par le mineur.

LE DECOUVREUR.

6. Pour encourager le "prospecteur" à découvrir de nouvelles régions minières, le découvreur devrait être exempté du paiement de toute charge et des obligations de la représentation vis-à-vis de la Couronne.

TRAFFIC DES LIQUEURS.

7. Le trafic des liqueurs devrait être réglé suivant les principes en force dans les autres parties du Canada.

ELECTION DE CONSEILLERS ET DE DEPUTES.

8. Un Conseil Electif pour l'Yukon et au moins deux représentants du Territoire dans le Parlement du Canada.

AUGUSTE NOEL,
THOMAS W. O'BRIEN.

Dawson, ce 22 Septembre, 1900.

The O'Brien and Noel Platform.

THE following platform has been adopted by Mr. Thomas W. O'Brien and Mr. Auguste Noel for the approaching election of members for the Yukon council, and has been approved of by their supporters in meeting assembled. It is now submitted to the electors for their consideration and approval.

TERRITORIAL REFORMS.

The issues in an election of members of the territorial council naturally cover matters within the powers of the council. Mr. O'Brien and Mr. Noel and their supporters favor and are pledged to the following reforms:

A PROPER POLICY.

Generally we favor a broad policy looking to the opening of the country, to settlement and advancement, and to an organized effort with the object of converting public property as rapidly as possible to the uses of the miner and prospector. All public improvements hereafter should be made with a view to permanency.

ROADS AND BRIDGES.

Roads should be opened up in advance of the prospector. Suitable roads and bridges should be constructed at once wherever the requirements of the country demand them. The following roads and bridges amongst others should be constructed with all possible speed:

1. A road from Whitehorse to Dawson passing by Selkirk, Black Hills, Eureka and Gold Run, 270 miles.
2. A road from Gold Run to Clear Creek, 30 miles.
3. A road from Dawson to Fortymile with a branch to Sixtymile, 52 miles.
4. Road running along Dominion Creek, 20 miles.
5. Road running along Hunker, 52 miles.
6. Road running along Last Chance, 6 miles.
7. A road from Whitehorse to the copper mines, 10 miles.
8. All other roads now made to be completed with a view of permanency.

PROTECTION OF THE MINER.

The miners are the great army of labor in the Yukon. Like all other laborers they should be protected by a proper law for their wages. The placer miner, like the quartz miner and the coal miner, should be protected in his work from injury arising from carelessness and the absence of proper safeguards. A miner's protective law should be passed.

TAXATION.

A proper system of taxation is necessary, but the system devised by the Yukon council is in many respects, unsuitable. Taxation on the turnover is against all the canons of taxation as well as illogical and irregular. We protest vigorously against any attempt to enforce the proposed system until it has been considered and passed upon by the elective representative on the council.

SCHOOLS.

We have reached a new era in the development of the territory. Every inducement should be given to the settlement of miners' families in our midst, no settlement in Canada, however small or insignificant, is without its schools. The permanency of the camp requires a vigorous policy looking to the construction of schools wherever needed, according to law. Modern schools, well equipped, with suitable teachers, are indispensable.

A COURT OF APPEAL.

The system of appealing to a court of appeal in a distant province with its attendant expense and delays should be changed at once. The addition of another judge to the territorial court is absolutely necessary and would furnish the needed court of appeal.

ESTATES AND DECEASED INTESTATES.

The present law for the administration of estates is unsatisfactory as it places too much power in the hands of the administrator, is expensive and fraught with danger to the estates of deceased persons.

GENERAL.

So far as possible the deliberations and executive actions of the Yukon council should be devoted to the development of the mining industries in gold, copper, coal and other minerals. The rapid opening up of valuable mining regions along the Upper Yukon, Whitehorse, Pelly, Hootalingua and Salmon rivers makes this necessary and advisable.

FEDERAL MATTERS.

Although federal matters are not directly an issue in this election, Mr. O'Brien and Mr. Noel and their supporters are pledged to use their influence in effecting the following reforms:

MINING REGULATIONS.

1. The initiative in making mining regulations should lie with the Yukon council, and be based on the experience of residents of the territory, subject to approval by the governor general of Canada in council.

ROYALTY.

2. The royalty should be abolished, but if it is necessary for revenue purposes we would favor instead a small export tax which will fall on everybody in the territory as well as the miner.

MINING DISPUTES.

3. To avoid delay and expense, appeals in mining contests should be heard by the judges of the territorial court instead of in the city of Ottawa.

MINERS LICENSES.

4. Only mine owners and laymen should be required to hold free miners licenses.

PROVING REPRESENTATION.

5. To save the great expense and delay often experienced by the miner in proving up representation, the mining inspectors should be required to visit the mines and accept proof of representation on the spot.

THE ORIGINAL DISCOVERER.

6. To encourage the prospector to continue opening new territory, the original discoverer should be exempted from the payment of fees and representation duties.

THE LIQUOR TRAFFIC.

7. The regulation of the liquor trade on the same principles as in other parts Canada.

ELECTION TO COUNCIL AND REPRESENTATION.

8. An elective legislative council and at least two representatives of the territory in the parliament of Canada.

THOMAS W. O'BRIEN,
AUGUSTE NOEL,
Dawson, September 22d, 1900.

JUNEAU JOE IS ON TRIAL.

Charged With Misappropriating \$2400 of Bonnifield's Cash.

He Also Played High Stacks, Amounting to \$3000, Which Was Also Unpaid.

The case of Charles Hense, alias Juneau Joe, charged with having stolen from Sam Bonnifield \$2400, was called this morning in the territorial court.

Attorney McCall, after hearing the statement of the crown prosecutor of the case, moved a non-suit on the ground that no cause for a criminal action had been shown.

On the 21st day of August last, the prisoner had gone to Sam Bonnifield's faro table and asked Mr. Bonnifield to let him have some large bills in exchange for dust. This was done, Bonnifield allowing him to take \$2400 with the promise that he would go out and bring the equivalent in gold dust. He had never brought the dust but had gone up the river instead.

Judge Craig could not see his way to sustaining the motion for non-suit, and Sam Bonnifield was called as the first witness.

Mr. Bonnifield testified that after he let Hense have the money, he came back to the game and lost \$3000 in checks, for which he did not pay. After losing this money he came back and asked how he stood, and, on being shown the tab, on which he was charged with \$2400 cash and \$3000 in faro chips, he said, "Yes, that's right."

Hense had stated at the time that he was going up to the mine and would be back and settle in four or five days.

He had not seen Hense after that time till the time of the preliminary hearing of the present case.

Stephen Barrett, a stenographer, testified that he had been present at the time Hense lost the \$3000 for which he did not pay, and that the player had cashed in \$300 worth of the unpaid chips, and received cash for them. He had also heard Hense acknowledge the debt of \$5400.

Chas. Warner was next called and testified that he had seen Mr. Bonnifield hand Hense a package of bills on the date named.

Jeff Gear, a dealer, was called to the witness stand, and said he had seen Hense playing faro in the Juneau saloon. He remembered the incident referred to and said that the amount lost by Hense at that time was \$3000, and that the amount of his indebtedness to Bonnifield at that time had been acknowledged by him to be \$3000.

Dealer Gouche, who had dealt the cards at the time in question, testified that Hense had lost \$3000 less \$300 which he had cashed in. He had played \$500 bets, and at that rate stood to win or lose \$20,000 in as many minutes.

Constable Pedarson had received Hense as a prisoner from the corporal in charge at Whitehorse, and had brought him from there to Dawson as such.

Leroy Gates had set his alarm for 9:30 a. m., but had not heard it go off. He was told that if, on being subpoenaed again to appear at a certain time and did not come he would probably hear something else go off. He testified to having seen Bonnifield count out a large sum of money from the drawer in the faro table and go towards Juneau Joe with it, but did not see him hand it over.

At this stage of the trial the court adjourned for lunch and the case is still being heard this afternoon.

Water Pipes Freeze.

The noticeable condition of the water pipes the other morning when the first slight freeze was felt, was such as to convince a majority of those who saw and noted, that the public was in a fair way to begin carrying water from the river again in the not too remote future.

The pipes froze and men were busy on Second avenue thawing them out.

D. A. Matheson, of the Water Co., was seen and asked what steps if any the company proposed taking to secure the continuance of the water service during the winter.

"We are going to commence at once," he said, "to incase the iron pipes in wooden ones and sink them. We are also going to house in some of the hydrants—those to be kept open—and, in short do everything we can to keep the service up."

"How many hydrants in a block do you propose to keep open?" was asked.

"That I cannot say just now, but probably one at each corner, and in most blocks, one in the middle."

"Do you have any idea that by the

means you have mentioned you can keep the water from freezing in the pipes?"

"If we did not believe we could do so we certainly should not try, as freezing will cause a very great and expensive breakage of pipes."

Notwithstanding Mr. Matheson's assurance that the company believes it can keep the pipes open, there is a growing conviction in the minds of people generally that water hauling from the river this year will be in order as it was last.

Mr. Matheson states that all the difficulty arises from the failure to arrive of certain machinery, particularly certain electrical apparatus by means of which the pipes were to have been kept clear of ice.

"We have an arrangement," he said, "by which electricity keeps the water from freezing. We connect a very large cable with the ends of the mains, and turn a powerful current on. Iron being a conductor of electricity, the current operates over the whole system and the water does not freeze."

Whether this scheme is practical or visionary; whether such a powerful current of electricity operating over the whole system of pipes would not be dangerous in their exposed condition, are all matters having no bearing whatever upon the actual standing of the matter now. The fact remains that the appliances did not get here (why is no concern of the consumer), and that no one, save possibly Mr. Matheson, believes that the pipes can be kept open during the winter.

Another Assay Office.

The N. A. T. & T. Co. is arranging for the establishment of an assay office for the benefit of its customers and the general public, and has sent to Salt Lake City for Mr. Chas. W. Bechtal, a practical assayer, who will have charge of the work. Mr. Bechtal is a son of John Bechtal, the popular Regina hotel and bar man, and although but 21 years of age, is reputed to be one of the most accurate assayers in the west, having spent most of his life in assay offices. Young Bechtal has but lately returned from Manila to which place he went as a member of the Utah volunteers.

Already Improved.

Already the cold weather has had a good effect on the streets, as in their semi-frozen condition the passing vehicles are smoothing them down and the thin mud which was so plentiful a few days ago has become congealed. A few days of cold weather before snow falls will leave the streets in excellent condition for snow when it does come.

It is said that there are all of roo tons of machinery now in Dawson awaiting good roads to be hauled out to the various creeks, and there is probably an equal or greater tonnage of provisions destined to the same points. In view of all this, the freighters and packers contemplate a busy and profitable winter season.

Missing Persons.

The following persons are inquired for by friends. Any information regarding any of them should be left at the town station: Leo Jaccard, Victor Jaccard, Oakland, Cal.; T. T. M. Mammell, The Dalles, Oregon; Louis Reiterberger, Winona, Minn.; Joseph J. Mayer, San Francisco, Cal.; Frank Van Atter, Toronto, Ont.; Ajuna Hill, Hualup, Wash.; Martin Murray, Seattle, Wash.; B. P. Leanan, St. Louis, Mo.; John McLaren, Alva; Toney Ross, Victoria, B. C.; Frank Ryan, Chelsea, Iowa; Patrick McGee, San Francisco, Cal.; Wm. Hamne, Pueblo, Col.

Arizona Kicks.

The mail carrier on the Grass Valley route got in 40 minutes ahead of time Wednesday afternoon. He says that a panamon bear picked him up at Silver creek and chased him four miles, and to beat the bear he had to beat his record. As postmaster we wish that bears were more numerous on all the other routes.

Dr. John Wheelan departed for the east three or four days ago and will not return to Giveadam Gulch. He was not driven out, but he had the sense to see that the field was not a good one for a doctor who couldn't tell the difference between measles and smallpox.

Tuesday afternoon his honor the mayor (who is ourself) was obliged to throw old Jim Hewson down stairs in the city hall, and old Jim picked himself up and fired four bullets to kill. No harm was done, however, and the rumors of tragedy flying around town need excite nobody.

In a little discussion as to whether a mule draws a long breath when he kicks Maj. Wharton and Capt. Campbell pulled their guns on each other at the bootleg saloon the other evening. Friends interferred to prevent an affray, and later on the two men took a drink together. M. QUAD.

Short orders served right. The Holborn.

Same old price, 25 cents, for drink, at the Regina.

Table de hote dinners. The Holborn.

POLICE COURT NEWS.

The troubles of A. F. George, or at least a few of them, growing out of the recent charge against one McKeown for threatening great bodily harm, such as punching the George head from its natural position, altering the physiognomy of the George countenance, etc., etc., were further aired in the police court yesterday afternoon, when Mr. McKeown told how he had heard of a rumor to the effect that he and others had been accused of having bought up sundry votes in the interest of Mr. O'Brien at the coming election, and how he became aware that Mr. George, who was engaged in writing political matter for the Daily News, was in possession of the facts surrounding the starting of the rumor, which he said was wholly untrue. He called upon Mr. George and told him that if he were a gentleman he would tell him the name of his informant. Mr. George demurred, and asked for time in which to consider the advisability of imparting the desired information.

Mr. McKeown's virtuous indignation arose to such a pitch during the interview that he had told Mr. George that if he published the article which he had previously referred to as being a "hot one," he (McKeown) would punch his head. Dick Brown had been with McKeown and was also sensitive about having his name published in connection with the alleged libelous rumor, and testified that he had also made the same conditional threat concerning the George dome of thought. Capt. Scarth said that inasmuch as the threats had been conditional he would dismiss the case.

Scows Yet Available.

Agent Rogers, of the W. P. & Y. R., is today in receipt of a wire from General Manager Elliott, of C. D. Co., who is at Whitehorse, which states that consignees of freight may yet have the same forwarded by scows if they will at once wire instructions to Agent Mellott, the W. P. & Y. R. representative at Whitehorse, the report circulated two days ago to the effect that no more scows are available being erroneous. The C. D. Co. will dispatch but three more steamers this year from Whitehorse for Dawson, the Bailey, Sybil and Zealandian, and these have all available space engaged. There is no doubt but that scows can be brought through yet for possibly three weeks, but those having freight at Whitehorse not yet arranged for will do well to wire Agent Mellott regarding the same at once.

Ball at the Fairview.

Tomorrow night Mr. and Mrs. Blaker are going to entertain a limited number of friends by giving a ball in the spacious dining room of that popular hostelry. The affair will be select and those fortunate in receiving an invitation will without doubt have a most enjoyable time.

"Oh, vat a headache." Swollen heads reduced and throbbing temples eased at the Bon Ton Shaving Parlors. Try the scheme. c3

WANTED.

WANTED—Two young ladies want position in private family or hotel. Address "Help," this office. p 6.

PROFESSIONAL CARDS

PHYSICIANS.
