ST. CATHARINES, ONTARIO WEDNESDAY, JUNE 4, 1919

PRICE—TWO CENTS.

OVER 200,000 MEN NOW OUT ON STRIKE IN PARIS

PARIS, June 4.—Reports from various centres of the city this morning are to the effect that the industrial situation is rapidly becoming graver. Union men place the number of men on strike at over 200,000, chiefly tube railway workers and employees of the metal trades.

GREAT BRITAIN IS IN FAVOR OF SEVERAL CONCESSIONS TO GERMANY BUT FRANCE IS OBDDURATE AND U. S. ON THE MIDDLE GROUND

But in Any Event the Enemy is Likely to Get Better Peace Terms—Petrograd Alleged to Be in the Hands of the Finns.

There is a probability that Germany may secure as a result of her strong counter proposals some lessening in the severity of the peace terms of the allied and associated powers. Germany's pleas that it will be impossible to fulfill the financial requirements have been heeded and are being discussed by the council of four. Paris reports that in certain quarters of the peace conference the German viewpoint is receiving strong support.

A full discussion of the German counter proposals, especially concerning reparations and other economic features of the peace treaty, has been had by President Wilson and the staff of American experts of the American peace delegation.

Great Britain is said to favor a number of concessions to Germany, but France continues firm in her stand not to waver from the original terms. On the other hand the Americans are declared to be not averse to minor concessions, but are not in favor of going to the extent that the British propose.

The German government is incensed over the formation of a Reinish Republic. It has ordered the arrest of Dr. Dorten, the president of the Republic, and also has protested to the peace conference and the armistice commission at Spa against the behaviour of the French authorities in the occupied Rhineland. French support of the Reinish Republic is characterized by the German government as high treason against the empire.

Strikes by dissatisfied Germans in the American occupied area, called in protest against the republic, ended quickly when the American commander issued a warning against the movement.

The supreme council has been requested by the Lithuanian delegation to the peace conference to have an allied commission investigate alleged pogroms and other illegal acts by the Poles in occupied Lithuania.

An unconfirmed report has reached Copenhagen that Petrograd has been captured by Finnish and Estonian troops.

The head of the Austrian peace delegation has departed from St. Germain, for Innsbruck, carrying with him the allied peace treaty.

Counter revolutions are reported from numerous towns in western Hun. Hundreds of refugees are arriving at the Austrian frontier towns seeking safety.

Sweden and Denmark have come into line with Switzerland and Norway in declining to join a blockade against Germany in case Germany refuses to sign the peace treaty. Like Switzerland and Norway, the plan is made by Sweden and Denmark that such action would be a violation of their neutrality.

Big strikes have begun in Paris, Lille and other towns in France.

The Metagama docked at Quebec, with troops and other passengers, but was detained at quarantine on account of chickenpox.

SIR ADAM BECK
Whose spirit of fairness prevented a strike of the Hydro Power House employees last week. The men are pleased with the new wage schedule submitted by the Chairman of the Commission.

WATCHED MEN MOURN HIM AS A WAR VICTIM

Detroit Man Sees his Own Name on Roll of Honor of City's Fallen. Then he Reported to the Mayor.

Detroit, June 4.—Among the names engraved on Detroit's big Liberty Statue—the monument erected by the city to its heroic sons who died fighting in the recent war—appears that of Charles J. Van Hove, 78th Company (th Regiment of Marines, Van Hove was officially reported killed in action.

The young soldier declares the report to be greatly exaggerated. He reached home in time to stand in civilian clothes on Decoration Day with his left hand on the monument, which bears his name, and to witness his fellow citizens do honor to his memory. Then he visited the Mayor's office and made his own report. He was wounded at Chateau Thierry and at Mount Blanc, when four of his party of five were killed. He was taken to a dressing station of another corps and his identity thereby lost to his own organization.

Today as a result of the conference between the marine and the Mayor, sculptors are at work on the monument removing Van Hove's name from the list of dead heroes.

The Metagama docked at Quebec, with 32 officers, about 400 other ranks, and a number of soldiers' dependents.

Judge Gauld has ruled that the salary Hamilton is to pay Dr. Roberts as Medical Officer of Health shall be \$5,000.

Twelve prominent men at Dawson are dead as a result of ptomaine poisoning at a dinner attended by thirty-six men.

FREE CZECH SCIENCE FROM TEUTON TAIN

Paris, June 4.—Bohemian science must be emancipated completely from the German. Dr. Emanuel Radl, a professor at Prague University declared in an article in The Temps.

First of all, Dr. Radl says, we must provide a solid basis for Czech science, which is now concentrated at Vienna under German direction, and we must replace the erroneous conception of the German scientific system by a more just, more human and more democratic one. I believe that in the coming years the Czech scientists will study British and American science and become acquainted with their most illustrious representatives.

MARSHAL FOCH
Allied Generalissimo who is now making preparation for any means of pressure that will be necessary if Germany refuses to sign the Peace Treaty.

Head of the I. W. W. in Pittsburg Placed Under Arrest Following Bomb Exploits in United States

W. J. Flynn is Appointed to Run Down Band of Anarchists Who Attempt Reign of Terror

Washington, June 3.—William J. Flynn, former chief of the United States secret service, was selected yesterday by Attorney General A. Mitchell Palmer to head the bureau of investigation of the department of justice to run down the anarchists who placed bombs in eight eastern cities Monday night.

Flynn, who has recently been chief of the secret service and police of the railroad administration, arrived in Washington today. For fifteen years all matters relating to anarchists dealt with by the United States secret service have cleared through his hands. His appointment is part of a reorganization of the investigation service of the department of justice recently announced by Attorney General Palmer.

GARVAN NAMED BY PALMER.

In addition to the appointment of Mr. Flynn, Attorney General Palmer's reorganization of the investigation service includes the appointment of New York, as assistant attorney general with general charge of all investigations.

Mr. Garvan, who is alien property custodian, was assistant district attorney of New York under Jerome and Philbin for nine years. He was connected with a number of famous cases including the Molyneux, Patterson, Patrick, Kennedy cases and the fire insurance frauds.

John T. Creighton becomes special assistant attorney general to act as Mr. Garvan's assistant. Mr. Creighton is a member of the firm Brown, Hay and Creighton of Springfield, Illinois, which is the successor to Lincoln's old law firm.

Investigation of the bomb explosions which were intended to kill public men, has convinced secret service chiefs here that the outrages had a common source, and that they probably can be classed as an unsuccessful attempt on the part of and unknown anarchist group to resume a campaign of terrorism begun with the May day attempt to plant his cargo of explosives. Mr. Palmer himself dismissed the incidents to day as "utter failure to terrorize the country and stay the hand of the government," which purpose he ascribed to the authors of the outrages.

Police at New York, Philadelphia, Pittsburgh, Cleveland, Newtonville, Mass., Boston and Paterson, N. J. were engaged in the widespread hunt. Detectives were sent from Washington to the first two named cities in order to connect up operations.

CONGRESS TO TAKE ACTION.

The hat of the Washington bomb planter, purchased in Philadelphia and other details, indicated a possibility that the consignment of explosives had been sent out from there. Another connecting-link in the view of authorities here was the similarity of the anarchistic handbills found near the scene of the explosions in several cities.

Government experts on explosives, after surveying the site of the explosion here, and the partially demolished dwelling, came to the conclusion that two separate bombs exploded, probably when the man carrying them tripped over a stone step at the entrance.

In both houses of Congress, members began the preparation of measures providing new and severe penalties for convicted perpetrators of such crimes. References to the outrages were made during debate in both houses.

DAWSON CITY HIT HARD BY RARE TYPE GERM WHICH KILLS TWELVE CITIZENS IN A FEW DAYS AT A GOLD MINING PLANT

PARIS ACADEMY HONORS BALFOUR AND VENIZELOS

Paris, June 4.—Arthur J. Balfour the British Foreign Secretary, has been elected a foreign member of the Academy of Moral and Political Sciences, to succeed the late Grand Duke Nicholas Michaelovitch of Russia.

Eliptherios Venizelos, Premier of Greece, has been elected to succeed the late Col. Theodore Roosevelt.

FINNISH FORCES TAKE PETROGRAD

Copenhagen June 4.—Estonian and Finnish forces have taken Petrograd according to an unconfirmed telegram from Vardo, received by The National Tidende.

MAYOR T. L. CHURCH
Of Toronto who is working hard to arrange a settlement of the general strike now in progress in the Quebec City.

WIRELESS WAS PICKED UP AT HARBOR GRACE

British Biplane Received Message Sent out by German and Italian Land Stations.

ST. JOHNS, Nfld., June 4.—Wireless messages sent out by German and Italian land stations nearly four thousand miles away, were picked up yesterday by the Handley-Page biplane, which is being assembled at Harbor Grace for a transatlantic flight in competition for the London Daily Mail's \$50,000 prize.

Reports of the test made yesterday of the plane's wireless receiving apparatus while the plane was on the ground, were brought here last night by many citizens of St. Johns, who with the airmen encamped here celebrated King George's birthday by going to Harbor Grace to inspect the Handley-Page.

They said the German and Italian messages could be heard only faintly, but that signals from the station at Clifton, Ireland, were picked up easily.

It is expected fully as satisfactory results will be obtained from the air. Frederick P. Raynham, "skipper" of the Martinside plane, which is being put in shape for the Mail's prize flight, said he hoped to be able to announce some time today the selection of his navigator.

THE WEATHER
Toronto June 4.—A disturbance which was in the southern states on Monday morning has moved northward to the Missouri Valley while the Barometer has risen steadily over the Great Lakes. The weather has been fine throughout the Dominion with extreme heat in Ontario and the west part of Quebec and moderate temperature in the other provinces.

Easterly winds, fine and decidedly warm today and on Thursday.

One hundred and ninety-six thousand five hundred persons died in Paris between October 1 and February 28 from influenza and diseases resulting therefrom.

Health Authorities Have Destroyed the Entire Yukon Company's Camp and All Supplies and Utensils As a Result.

DAWSON, Y.T., June 4.—The past few days witnessed the blackest period in the history of Dawson, with the exception alone of the Princess Sophia disaster, which claimed many Dawson lives, as the result of death occurring from ptomaine poisoning following the dinner at the Yukon Gold Company's plant, No. A 54, below Sinker Creek, May 24, at which thirty-six prominent men of the north sat down in a veritable lottery of death. Twelve drew fatal tickets, as follows:

George Munden, 43, of Montreal, known here as Tios, Munday.

Antoine Zandavitch, better known as Smith, a native of Dalmatia.

Otto Nordling, 40, native of Sweden, leaving wife and five children at Dawson.

Findlay McDonald, 62, New Glasgow, N.S.

Angus Christolm, 40, of Antigonish, N.S., leaves wife and two small children in Vancouver.

Albert Gauderieu, 49, single, St. Thomas, Que.

Wm. Cyrus Lawson, thirty-nine, of Fort Scott, Kansas, formerly a prominent dredge man of Oroville, Cal., assistant superintendent of the Yukon Gold Company, Dawson, leaves wife in Dawson and a son in the American Aviation Corps, France.

Andrian Barratt, forty, Bartholomew, Que., leaves wife and three children, Dawson.

Alphonse Rioux, forty-four, Montreal, leaves daughter.

John Grant, fifty-three, native of Antigonish, N.S., twenty years prominent in silver mining at Aspen, Colo., where he was also sheriff; he leaves wife and eight children in Dawson.

John Thompson, forty-nine, native of Ireland.

Wm. McNeill, Antigonish, N.S. Four other men in the hospital are expected to recover.

The entire camp supplies and utensils of this camp have been destroyed. The poisoning is said to be of a rare type of germ known as botulism. Samples of food have been submitted to eminent bacteriologists of America for analysis.

BUFFALO MAN HIGH

ST. THOMAS, June 4.—Frank S. Wright, of Buffalo, the famous amateur shooter who has visited the local traps for almost a generation, in fact, has become a part of it, won high honors yesterday in the annual event. He made a score of 198 out of a possible 200.

In the afternoon event he made 98, and thereby tied with J. Vance of Tillsonburg, and a hooter by the name of Marshall.

In the shoot-off Marshall lost out after 19 birds. Vance shot 38 out of 40, while Wright made the even 40 without a miss. This is considered the best shooting ever witnessed on the local grounds.

The weather was ideal, but there was a tricky wind blowing, which caused the finding of the birds a little difficult.

MORE PRODUCTION NEEDED
 In the disturbances which are occurring all over the country between capital and labor, disturbances that are paralyzing business and discouraging trade, the leaders in the labor movement should not allow one or two important facts to be overlooked. One is that things work pretty much in a circle in this old world of ours, and the other is that if capitalistic interests have become autocratic and bureaucratic in their practices the labor element should not, in an attempt to beat capital, become more autocratic than that which it criticizes.

In other words, a wave seems to be passing over this country, which in sentiment and deed is against all kinds of employers, large and small. They are in a broad sense all classed in with capital, and capital seems to be a target for all kinds of displeasure. The change is made that the latter is selfish, dictatorial, autocratic and against these things the shafts and arms of labor should be raised.

While there may be some truth in this idea, is it not possible, indeed probable, that organized labor, if it allows itself to be the instrument of extremists, as was the case in Winnipeg, may become as dangerous an element to the state as any organization of capital? Both surely cease to have virtues they exceed the limit of good judgment. The capitalist, in general policy, is creative in as much as he is always seeking, sometimes legitimately, sometimes roguishly, to make his capital work, produce and earn. This means circulation of money, employment, production, etc.

Organizations on the other hand, by strikes, walk-outs, etc., may create a destructive condition which leads inevitably to bad times, suspension of industry, non-payment of wages, and various forms of depression.

The best national policy for all interests, employers and employees, capital and labor, is the policy that increases production and keeps men employed.

WHAT EXCHANGES SAY
VIOLENCE
 Ottawa Journal: Canada is a free country, in which every man can talk and vote as he pleases and thus any general change in social conditions which the majority wish or can be persuaded to approve of can be accomplished by use of free speech and the voting power, and any good cause can get a majority of votes when adequately presented. So that attempts to capture things by the violence of general strikes rather than by votes is an admission that the advocates of violence both know that they are in a minority in the country, and that they feel that they are unable to persuade their countrymen by peaceful means of the justice of their cause.

STAMP OUT BOLSHELVISM
 Brockville Recorder: Premier Norris of Manitoba was right when he refused to treat with men who presumed to take charge of food and water supply by force in Winnipeg, and allows babies to be fed only "by our permission." Governments should protect labor and see that it gets a fair show from employers, and governments should with equal determination protect all the people from the ruffianism of the men who have been assigned the task of making Canada a second Russia.

MUST HAVE FAIR PEACE
 St. John Telegraph: The people of Winnipeg have elected a mayor and council to govern their city, to control the police force and provide water, lighting, transportation and other services. No minority should be permitted for a moment to usurp the functions of the constituted authorities. The city government of Winnipeg and the federal authorities will incur the wrath of the extremists on both sides by keeping order and by pressing for a settlement involving concessions from both parties. But in doing these things they will be serving the general interest. A bad piece in Winnipeg would affect the whole country adversely. A proper settlement at Winnipeg, arrived at calmly by representatives of the moderate elements, would tend to allay unrest in the other Canadian cities.

THE PASSING JEST

"Guess we've been putting too many jazz records on the phonograph." "Why so?" "Our canary is beginning to syncopate."—Judge. Caller (at 9.30 a.m.)—Mr. Jones in? Office Boy—No, sir. Caller—Down yet? Office Boy—Sure! But a man may be down and always out. Buffalo Express.
 "He's a golf Bolshavist." "What's a golf Bolshavist?" "One who can't get any fun out of the game because the other fellow plays it better than he."—Detroit Free Press.
 "Senator Fludd makes a good many public speeches." "Yes, but they don't do him no harm. He can say as little in a speech as anybody you ever listened to."—Louisville Courier-Journal.
 "Now, about this League of Nations—" began the loquacious man. "My friend" interrupted the placid citizen, "we are employing the debate that subject, why should you and I indulge in a futile and unscientific wrangle?"—Washington Star.

Drooping a Hint.
 A temperance orator was in the habit of holding forth in a workman's hall and was constantly being interrupted.

The next time he lectured in that hall he engaged a prize fighter to sit in the gallery and keep order. He was contrasting the clean content of home life with the squalor of drunkenness.

"What do we want when we return home from our daily toil?" he asked. "What do we desire to ease our burdens, to gladden our hearts, to bring smiles to our lips, and joy to our eyes?"
 As the orator paused for breath

St. Catharines Branch St. Paul and Queen Streets

CITY OF ST. CATHARINES Taxes Year 1919

Under the authority of By-law No. 3200 passed on the 25th day of March, 1919, notice is hereby given that all taxes for the year 1919 are now due and payable but may be paid in three instalments as follows, subject to the following exceptions and conditions.

Taxes which are not payable by instalments.
 Taxes in Income Assessment, Arrears of Taxes and charges collectable as taxes for any work done or services rendered by the Corporation are due and payable in bulk on or before the 25th day of June, 1919 (and not by instalments.)

Payments by Instalments
 1st Instalment—due and payable on or before the 25th June 1919. One-half of the taxes will be the amount of the 1st Instalment.
 2nd Instalment—due and payable on or before the 25th September 1919. One-quarter of the taxes will be the amount of the 2nd Instalment.
 3rd Instalment—due and payable on or before the 25th November, 1919. One-quarter of the taxes will be the amount of the 3rd Instalment.
 Taxes not paid when due.
 If default is made in the payment of any instalment on the above dates, the privilege of payment by instalment becomes cancelled and the whole of the taxes or the balance unpaid, as the case may be, at once becomes due and payable together with percentages in addition, as follows:

Upon default in payment of taxes on the dates appointed,
 Penalty 1% On amounts paid within ten days of time of such default, a percentage charge of one per cent. will be collected.
 Penalty 2% On amounts paid within twenty days of time of such default, a percentage charge of two per cent. will be collected.
 Penalty 3% On amounts paid within thirty days of time of such default, a percentage charge of three per cent. will be collected.
 Penalty 5% On amounts remaining unpaid after thirty days of time of such default, a percentage charge of five per cent. will be collected.

Failure to pay the above instalments of taxes as they become due not only forfeits the right of settlement by instalments, but brings the parties under the penalty of the Assessment Law, which enacts, that in case any party shall REFUSE OR NEGLECT to pay the taxes imposed upon him for the space of fourteen days after demand, the Collector shall levy the same, with costs, by distress and sale of the goods and chattels of the party who ought to pay the same.

1. Ratepayers who do not receive their tax bills by the 1st day of June should notify Tax Collector's Department of the fact.
 2. Cheques tendered in payment of taxes must be "marked" by bank and made payable at par to the City of St. Catharines.
 3. Taxpayers sending amounts by mail for payment of taxes should also enclose the tax bill and a self-addressed and stamped envelope for the return of receipted Tax-bill.
 4. Taxes are payable at the office of City Tax Collector.
STUART K. WATT,
 City Treasurer.

The young leaves—the tender leaves—those full of flavor and richness—are selected for Red Rose Tea. The strength, flavor and freshness of these choice, delicate leaves, is fully preserved for your enjoyment by the sealed Red Rose package which keeps out odors, dust and moisture.

The Red Rose name guarantees satisfaction.

NIGHT RATES

The hours during which reduced long-distance telephone rates are in effect are as follows:

From 8.30 p. m. to 11.30 p. m., 60 per cent. of day rate.

From 11.30 p. m. to 6 a. m., 40 per cent. of day rate.

Night rates for Long Distance Service are based on Standard Time.

The Bell Telephone Co OF CANADA

To be Your Own Weather Prophet

Adam may or may not have tried his hand at weather prediction but it is written that as far back as the time of Noah that gentlemen prophesied a long, wet spell, and, unlike a lot of other weather prophets he had such faith in his own prognostications that he took measures to meet the situation. Further than that subsequent events proved that Noah was a 100 per cent. prophet. Many of his successors, however showing a lower batting average, it became, increasingly apparent as time went on that in view of the frequency with which the prognostications failed the subject should be placed on a scientific basis in order to obtain accuracy in the results, or at least to spread a sort of halo of learning and philosophy about it, and thus minimize the curse as it were, of possible errors. So the weather bureau was instituted, which same have been in more or less successful operation now for many years with attendants on the government payroll and everything. Entirely apart from scientific weather observations however home made weather forecasting has persisted as a pleasing pastime all these years, and on this very day there is a set of rules governing it more or less recognized by all amateur weather prophets. For the benefit of those who may be unfamiliar with these rules, the New York Sun has obligingly made a compilation of them and they are set forth when standing on high ground and the horizon is unobstructed from all quarters, if the sky is absolutely cloudless look for a storm within forty-eight hours.

Such a Change

in feelings and looks! "After suffering pain, feeling nervous, dizzy, weak and dragged down by weaknesses of my sex—I was sunken, black circles and pale cheeks—I was restored to health by the Favorite Prescription of Dr. Pierce." So write many women. Changed too in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. Druggists sell it in tablets or liquid. It's a woman's best temperance tonic, made from wild roots.

HAMILTON, ONTARIO.—"Dr. Pierce's Favorite Prescription helped me greatly at the turn of life. I commenced to have heat flashes and dizzy spells and became nervous and run-down. These conditions very quickly left me after I commenced with the 'Favorite Prescription.' I took several bottles of it and truly believe that I owe my good health of to-day to the medicine I took and the care exercised at that trying time.—Mrs. ROBERT SMITH, 64 Bay Street, S.

POULTRY-MANAGEMENT

To Make the Farm Flock Pay Best Only One Must Have Charge.

Electric Lighting Is a Great Convenience on the Farm—Wiring Costs About \$100, While a Small Plant Should Not Exceed \$500.

(Contributed by Ontario Department of Agriculture, Toronto.)

SUCCESSFUL poultry-keepers are found much more frequently among those who operate what is termed a "one-man plant" than elsewhere. This simply means that poultry requires some one person's attention, or that personal attention is so important that it is usually not to be found efficient among the ordinary laborers. Poultry know the time of day when it is customary to feed them, and, perhaps, equally as well all other daily tasks. They respond fairly well to the bond of sympathy of the feeder. If the feeder rushes into the pen and throws the feed around the poultry usually rush out of the way or out of the doors if they can get there. Fright reduces egg production. Particularly nervous hens, when suddenly frightened, sometimes cease laying for several days. The person caring for the poultry should be fond of them and take an interest in them. One's interest usually goes up or down with the production of the flock. To maintain keen interest when the production is low, or when the flock is out of condition, is the real test of the hold on and study the flock, generally speaking, you will succeed.

A change of attendants, even when both are good at the work, nearly always means a decrease in production for some days. The careful feeder knows just about what his or that flock requires as to quantity of feed, etc., and further, he or she usually goes about the work on a definite plan so that in time the birds know just what to expect, not only as to time and quantity of feed given, but the movements of the attendants in the pen.

The writer ventures to assert that if the poultry on the farm of Ontario were, on each farm, given over to one person to look after, that there would be a very great increase in the success of the undertaking as well as a very large increase in the production; even as much as twenty-five per cent. in many instances.

No line of live stock responds more to careful attention than poultry. The boy or girl on the farm can learn much of how to feed and what to feed. They may learn something of the problems in breeding.

Successful poultry-keepers know that there is a time to hatch and rear, a time to cull, a time to sell, a time to clean and disinfect, as well as a time to feed.

Plenty of farmers are making money from poultry, but they know poultry does well only when given careful and systematic attention.—Prof. W. R. Graham, O. A. College, Guelph.

FARM LOANS for SOLDIERS

Agricultural Training For Soldier Settlers

A SOLDIER is entitled to the benefits of the Soldier Settlement Act if he can satisfy the Agricultural Qualification Committee in his district that—

- He has performed the required military service;
- He is sincere in his intention to make farming his permanent occupation;
- He is physically capable and is fitted in general to make a success of the farming business.

If he is otherwise qualified, but has not had sufficient practical agricultural experience, the Committee may recommend that he be given agricultural training. A generous scale of allowances for soldiers in training, has been adopted.

will not exceed three months, the man is placed with a carefully selected farmer in the district in which he intends to settle, to complete his training. During this period (not exceeding one year), the soldier is visited from time to time by representatives of the Soldier Settlement Board, who check his progress and recommend when he is considered qualified to take up a farm of his own.

It will be evident that by this system of preliminary training the soldier settler will gain a thorough practical knowledge of farming without expense; will learn to appreciate the responsibility involved in the venture, and at the same time gain a clear conception of just what farm life means.

On His Own Farm

When a settler is deemed qualified by the Agricultural Qualification Committee, the Board will assist him to become established on a farm of his own, and will, through its Agricultural Advisers, continue to co-operate with him in his work, thereby ensuring his success and consequent ability to discharge his obligations and become permanently established.

Fair To Both

The procedure outlined not only gives the soldier an opportunity of first becoming familiar with his environment and of acquiring the experience requisite to success, but ensures adding to the nation's fundamental industry only competent and satisfied producers.

Detailed information regarding the provisions of the Soldier Settlement Act and further particulars regarding agricultural training may be obtained from the Provincial Superintendent, 32 Adelaide Street East, Toronto, Ont.

W. J. BLACK, Chairman, Union Bank Building, OTTAWA

The Soldier Settlement Board

You Have No Right To Suffer

Suffering is unnecessary and with CHIROPRACTIC at hand, ready and willing to help you, you are acting very foolishly if you do not consult your Chiropractor at once. Upon the condition of your Spine depends the state of your health and your suffering is without doubt due to a subluxated vertebra which is pressing upon the nerves causing the stop of mental impulse from the brain to the various organs. Your Chiropractor will give you a Spinal Analysis, will locate the place where the subluxation occurs and will proceed to adjust it. Mental impulse will then flow freely and unimpeded and your sufferings will be over.

Consultation and Spinal Analysis Free.

Natural Gas Found in Porous Rock

PROBABILITIES: Fair and decidedly warm; rain at night.

Natural gas is not found in great caverns in the earth, as many people suppose.

The cavities that hold the gas are in actual fact extremely tiny.

The gas sands are very porous rocks containing millions of these minute holes.

The gas fills them under high pressure and is released by a hole drilled from the earth's surface.

ALTHOUGH NATURAL GAS IS CHEAP, DO NOT WASTE IT, THE SUPPLY IS NOT EVERLASTING.

THE UNITED GAS COMPANIES, Limited.

IF BACK HURTS BEGIN ON SALTS

Flush your kidneys occasionally if you eat meat regularly.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally with a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, nervous sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.

The first Standard Cup game of the season was pulled off last evening. A. M. Eccleston's rink defeating the cup holders by 21 shots to 12. Tonight at 8:30 H. W. Hodgins rink will endeavor to take the silverware away from Mr. Eccleston.

The mercury touched the 82 mark in the shade at 11:30 this morning and at noon it was still climbing. The weatherman, however, promises relief to-morrow when thunderstorms are due.

Red in the morning the sailor's warning; Red at night the sailor's delight.

When you see a mackerel sky, 'Twill not be many hour dry.

When the seagulls inland fly Know ye that a storm is nigh.

A ring around the moon Means a storm is coming soon.

When it rains before seven 'Twill clear before eleven.

The Pirate's Hand

LOCAL FARMERS TRIP

Lincoln County Growers Will Visit Erie County Farms for Two Days.

Twenty-five members of the Lincoln county Junior Farmers' Improvement association left this morning on a two day trip through Erie county, New York state. They will visit the Wheatfield Farms on the way to Buffalo, lunch in Buffalo and then motor to East Aurora, stopping at the Cabana farms on the way.

As East Aurora the party will spend a short time on the Shanahan farms, stopping for the night.

On Thursday the party will motor back to Buffalo, visiting the Jacob Doid packing plant in the morning and remaining as guests of the Doid company at luncheon. In the afternoon the Buffalo stockyards are to be visited, the party motoring home at night.

TO BE YOUR OWN WEATHER PROPHET

Continued from page 3. A facility for retaining jingles, the following important formulas are set out in verse:

CANADA AS A BEAR LAND

(1) Grizzly bear at Banff.

CANADA grows bears as well as grains and fruits and other products of the soil. Bears is to be found in every province, but it is in the mountain region of British Columbia that he flourishes. There one will find grizzlies and silver tips, browns and blacks and grays, and all the sub-varieties in between, including Teddy and Johnny cubs, among the children. All of these specimens may be seen in the interesting Zoological gardens at Banff, where they are lined up like soldiers on parade, in front of their cages—especially as dinner time nears!

But it is more interesting and exciting too, to see bruis as he runs wild in the woods. One day, while following a narrow mountain trail in the Rockies, I was surprised to see a few yards ahead, what seemed like a piece of the trail move to one side.

(2) Polar bear in Banff Zoo.

It was a half-grown black bear. Our surprise was mutual, as we unanimously voted to separate. Or, on another occasion in Muskoka, when we almost walked on a big shaggy specimen enjoying a supper of wild berries. Here, too, we apologized for disturbing him at his meal, and gracefully and quickly withdrew. On yet another occasion we came upon bear footprints on a snowfield in the Rockies in the Parmigan Pass, north of Lake Louise. They were freshly made on new fallen snow. "He's a whopper," remarked our guide, as the toe marks were studied, "and somewhere near too—an old grizzly I guess."

That led to some great bear stories that night around the camp-fire by our guide, who is a hunter as well as a prospector and mountaineer. One especially gave us lively nightmares, of a long struggle he had, alone and single-handed, with a monster grizzly, who, when he stood upright towered above his human foe. It was literally a fight to the death, with the grizzly the loser.—E. V.

(3) Black bear cub, Alaska.

CITY AND DISTRICT

We buy everything you want to sell. McGuire & Co.

FOR SALE—Two hot air boilers, three marble grates, one kitchen, one shed, one barn, Gas and Electric fixtures. Apply C. T. McBride Secy-Treas. P.S.E. j3-4

The offices of the City Hall will close at 12 o'clock noon on Saturdays during the months of June, July and August. dj13

The work of laying the sidewalk on Carlton street is being proceeded with by the contractors and when finished will be a big asset to the residents of that section of Gratham Township.

Many guests from out of town will be present at the annual cricket match between the Old Boys and the School eleven at Ridley College on Saturday.

The N. S. and T. commenced the work of putting down the new road on James street this morning and as a result the radial cars are all leaving from the corner of James and Raymond Streets. A ticket office has also been rigged up at that intersection for the convenience of the general public.

Many of the store clerks of the city are today enjoying their first Wednesday half holiday of the season. The majority of the retail stores were closed every Wednesday afternoon during May.

CURES CATARRH, BRONCHITIS WITHOUT ANY DRUGS

If you suffer from a cold, sneezing or catarrh—don't use a snuff—use a sensible treatment like Catarrhzone. It heals and soothes, brings relief at once, cures thoroughly. In bronchitis and throat trouble no doctor can do better than prescribe Catarrhzone. Try it—see what wonders it works—what power it possesses. Different from the old way—you inhale Catarrhzone. Get the dollar outfit which includes the inhaler and is guaranteed. Smaller size 50c, sample size, 25c, at all dealers.

Paderewski, who is back in Paris, denies that any pogroms have occurred in Poland.

DR. ARTHUR B. COBB Dentistry

Of all testes of real merit the test of time is the greatest.

Anything that looks merit cannot survive the test of passing years.

Our Dental Offices have stood the test of time. We have been established in Buffalo for more than twenty years, and with each passing year our business has expanded and our fame for skilled Dentistry has spread.

Patients of twenty years ago are still our patients, and they have remained loyal to us only because we have served them faithfully.

If you teeth require Dental attention and you recognize the great importance of having a skilled Dentist to treat them, it is to this Office that you may safely turn, well knowing that you will receive the best of care promptly and at the lowest cost.

Offices 368-378 Main Street, Corner of Eagle Open until 8; No Sunday work. Phone: Seneca 405. Known formerly as White Dental Office.

Choice cut flowers, potted plants and floral designs, at all times, at Walker's, Florist, 104 St. Paul street Phone 763.

On Friday evening at seven-thirty in the basement hall of the Public Library, all holders of first aid certificates are invited to meet with the members of the division for practical work in advanced first aid, roller bandage work, test questions, with practical examples, under the supervision of Corp. J. Bland, with the assistance of others. Bring your roller and triangular bandages.

PALE-CHEEKED GIRLS TIRE-OUT WOMEN QUICKLY BUILT UP

WONDERFUL RECORD MADE BY NEW BLOOD-FOOD REMEDY.

Certain Results Guaranteed.

Pale people have pale blood.

In other words, the blood is watery and lacks red corpuscles.

The stomach is wrong.

Assimilation is poor and food is not changed into blood. Naturally the system is robbed of vitality, lacks strength and reconstructive power.

Don't slip from vigor into weakness.

Don't allow the appetite to fail, but instead use Ferrozene.

You're bound to feel rejuvenated and strengthened at once.

Appetite is braced up, digestion is stimulated, vigor imparted to the stomach. Eperthing you eat is transformed into nutriment that supplies what your thin, weak system needs.

Vital, life-giving blood that makes rosy cheeks and dancing eyes—that's the kind that Ferrozene makes.

The strength and buoyancy that defies depression and tiredness, that's the sort you get with Ferrozene.

Every pale woman can transform her beached-out appearance with Ferrozene.

Not only will it improve looks and spirits, but by rebuilding all weak, tired organs, Ferrozene establishes a soundness of health that's surprising.

For women and girls who want to feel well, to look well, to be well, and stay well, nothing known in the annals of medicine is so certain as Ferrozene.

Went you try Ferrozene? Concentrated cure in tablet form, that's Ferrozene, 50c per box or six for \$2.50, at all dealers, or direct by mail from The Catarrhzone Co., Kingston, Ont.

FOOTBALL

The G. W. V. A. football team will play the Merriton eleven at Port Dalhousie to-night at seven o'clock and all players are requested to be on hand for the six o'clock car.

His honor Judge Campbell is anxious to have the man who wrote him a letter signed "Return Soldier" call on him at his office as soon as possible.

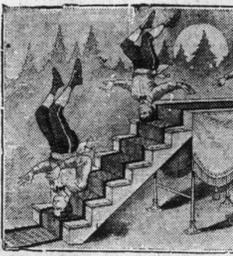

The Collegiate Institute Board will meet in regular session at the City Hall to-night at 8 o'clock.

Tenders are coming in gradually for the construction of the two new schools to be erected by the Public School Board. The members of the board will meet the end of the week to open the tenders.

The Housing Commission will hold another meeting at the City Hall to-night when several applications for loans will be considered.

Kyo Namba, Japanese Wonder. The Man Who Walks Upon His Head

The old saying, "see one circus and you have seen the mall," does not apply to the performance presented by the Sparks Circus this season. A feature that is entirely new in this country and that stands out as a distinct novelty, is the wonderful performance of "the man who walks upon his head."

This wonderful exhibition of skill and daring consists in bounding up and down stairways balanced upon his head, with no support other than the contact of his head with the steps. The fine balance that must be maintained to accomplish this feat can only be appreciated after seeing this wonderful act accomplished. This novelty will positively be seen at each performance of the Sparks Circus here next Monday, June 9.

WEDNESDAY HALF HOLIDAY During the Months of June, July and August We Have Decided to Close the Store for Wednesday Afternoon at 12 O'clock.

SPECIALS

For Wednesday morning shopping will be announced each week, making it profitable to get out early and do your buying in the coolest part of the day during the summer months.

Old Hickory Portch Furniture

How rustic in appearance, but yet how comfortable and durable! Maybe one or two pieces on your porch would give it a very pleasing effect. A useful Rocker can be had for \$3.75, others up to \$6.50

STRAWBERRIES WILL BE WORTH MORE MONEY

With excellent prospects for a bumper crop of strawberries in the Clarkson neighborhood it nevertheless looks as if the berries would cost more than last year. Wholesalers who have been among the fruit farmers the last two days, contracting for the season's output, are offering the highest prices known in the strawberry history of this locality.

With a poor crop last year, the high contract price was 17 cents, while this year 18 or 20 of the largest farmers have already sold their season's output for 20 cents per quart, f. o. b., Clarkson.

Why with such good prospects should the price be higher than usual? The only explanation offered is that the crop outlook in the Niagara and St. Catharines district must be much poorer than last year.

The vines are now in full bloom, and in three weeks the berry picking will be in full swing. If the warm weather does not keep up the long nothing else is so likely to spoil the season's crop.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender" or repairs to breakwaters at Port Colborne, Ont." will be received at this office until 12 o'clock noon, Friday, June 20, 1919, for the construction of repairs at two points on the eastern and two on the western breakwaters at Port Colborne, Welland County, Ont.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the offices of the District Engineers, Equity Building, Toronto, Ont.; Shaughnessy Building, Montreal, Que.; and at the Post Office, Port Colborne, Ont.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 p.c. of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or War Bonds and cheques if required to make up an odd amount.

Note—Blue prints can be obtained at this Department by depositing an accepted bank cheque for the sum of \$20, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order, R. C. DESROCHERS, Secretary, Department of Public Works, Ottawa, May 27, 1919. j4-11-18

Some Facts About Flies

Female flies lay from one to four or even five lots of eggs and about one hundred and twenty eggs at a time. They always lay the eggs in filth of some kind. About ninety five per cent. of all flies are bred in manure. While manure is not readily available, the female fly lays her eggs in garbage, human excrement, decaying vegetable matter, slops, trash, rubbish or almost any other available filth. In early spring or late fall these eggs develop into full grown flies in from twelve to sixteen days, while in warmer weather it takes only about eight to ten days.

Fly eggs are tiny white objects about one sixteenth of an inch long. In warm weather these eggs develop into the larvae or maggot state in about eight hours. The embryo fly remains in the maggot state for about five days, burrowing around in the filth and feasting on it to his heart's content. During these five days he sheds his covering twice and emerges into the pupa or resting stage. From this stage the full grown fly emerges in about four to five days and sets out on his filth and death dealing career. This makes the total period of development of the fly about ten days in warm weather. Under very favorable conditions as regards heat, moisture and filth, they may even develop in eight days. Flies do not grow after passing the pupa stage. Little flies sometimes observed are of a different kind from the ordinary house flies.

How To Prevent Flies

To a large extent a man's flies are they of his own household, but it might be added that in cities and towns certainly a man's flies are they of his own neighborhood. In other words, where flies are found, they are due to filth in the immediate vicinity. It may be your own filth or it may be your neighbor's filth. At any rate it is only a question of filth, and that near by. To solve the fly problem is simply to remove, destroy, or scorch all filth or possible breeding places for flies. But this is not as easy as might appear at first thought. If every household kept his premises clean and free from filth the problem would be solved. But ordinarily a large proportion of householders fail to do this for one or more of the following reasons:

- First, they don't know any better or
- Second, they don't care, or
- Third, they don't think it is worth while unless their neighbors do the same thing.

It is to be regretted that people belonging to the first class continue to be present in all communities. They need educating, either through posters; leaflets, newspapers, lectures, sermons moving pictures, examples or friendly talks. After that they will either clean up or join the second or third class.

For the second class it can only be said that people who know that flies breed in manure, eat faecal matter and discharge excreta reeking with filth and disease germs into their food and elsewhere, and still remain so slothful as to neglect to take reasonable measures to prevent such action, are guilty of criminal negligence. There are not many of this class.

A great many belong to the third class. This class would be willing to abolish flies with a little encouragement and with the co-operation of their neighbors in a neighborhood or community organization for this purpose. And this is one of the best ways to abolish flies.

Special Methods of Fighting Flies

Under special conditions somewhat different methods yield excellent results. For instance, in bakeries, stores or certain rooms where flies do not have access to liquids or moist foods large numbers may sometimes be poisoned by using a solution of one tablespoonful of formaldehyde to a pint of sweetened water or milk. They will not drink a strong solution of formaldehyde. Formaldehyde gas itself has but little effect upon them. More flies may be induced to drink the formaldehyde and water if it is sweetened or if a piece of bread is dropped into a plate of the dilute solution and sprinkled with sugar. Other fly poisons may be used to good advantage but there is frequently a danger of children or pet animals becoming poisoned with the use of these poisons. This danger is considerably less in the case of formaldehyde, although care should be exercised where there are children. Danger of poisoning may be materially lessened if small quantities of the solution are used at a time and if it is placed out of reach of children. Good results are frequently obtained by using this poison just outside a screened window or door or on the porch, particularly just before a rain storm or other times when flies are especially troublesome.

PREVENT POTATO ROT

Spraying With Bordeaux Mixture Proven Very Effective.

Machinery Must Be Kept Well Oiled If It is to Work Efficiently—An Expert Discusses the Question From Every Angle.

(Contributed by Ontario Department of Agriculture, Toronto.)

LATE Blight and Rot of Potatoes can be prevented by spraying with Bordeaux mixture. Commence spraying when the plants are from five to eight inches high and keep the foliage covered with Bordeaux throughout the season. Take special care to see that the spraying is very thoroughly done if the weather is at all damp about the 15th of July, as Blight often begins about this time. Add a poison when necessary for potato beetles—arsenate of lead paste 3 1/2 lbs. to each 40 gals. of the liquid spray, or Paris green 2 lbs. to 40 gals. or a mixture of 2 lbs. arsenate of lead paste and 1 lb. of Paris green to 40 gals. From three to seven applications should be made, depending upon the season—the wetter the weather the larger the number. Do not put off spraying because it looks like rain. If the spray is on the plants half an hour before the rain comes it will be dry and sufficient to prevent infection, which takes place during or soon after rain. Such spraying should prevent not only Late Blight and Rot but also Early Blight and potato beetles.

Thorough spraying only is effective. If thorough spraying is to be done sufficient Bordeaux mixture must be used. From 50 to 150 gals. per acre should be applied at each spraying, and when the plants are large not less than 100 gallons per acre should be used. Thorough spraying means the covering of every portion of the potato plant with Bordeaux mixture in the form of a fine mist. This can only be done when the solution is applied with good pressure, so as to insure covering every portion of the plant. The best results from spraying are obtained when potato sprayers are used which are fitted with a T-joint attachment so as to insure covering both surfaces of the leaves at each spraying. When the plants are large it has been found that it pays to go over each row twice at each spraying. Prof. J. E. Howitt, O. A. College, Guelph.

The Importance of Keeping Machinery Properly Oiled

The importance of keeping machinery properly oiled may be better realized when we try to compute, in dollars and cents, the annual sacrifice in machine efficiency through friction. Carelessness in lubrication may easily reduce the efficiency of a machine fully fifty per cent. At the same time the machine itself is wearing out faster, on account of the needless friction than owing to the real work done.

The microscope reveals the fact that the surface of the most highly polished shaft ever made is as rough and untrue as a rough casting appears to the unaided eye. In practice it is not possible to make metal surfaces that are absolutely smooth, incompressible, or even a true circle, hence inequalities of pressure at the bearings, and the grinding of the metal surfaces causing friction, producing factors of inefficiency and wear and tear. Though these faults of construction cannot be avoided, we can, however, reduce them to a minimum by the effect in machinery, by judicious application of a lubricating agent.

The lubricant consists of minute balls or globules. These readily insulate themselves between the faces in mutual contact forming a cushion, keeping the metals apart. Its use is not only to reduce friction, but also to carry away whatever excess of heat is generated. All liquids have not sufficient sustaining powers to be used as efficient lubricants. Some cannot be retained between the metals, others do not cling together persistently enough. To resist the tendency of the metal to tear the lubricating film apart, these globules must have a good deal of internal strength, and must stick together well. They must also cling well to the metal, or they will be squeezed out of the bearing.

The oils and the fats are the principal lubricants. The mineral oils are thin, and so are lard, olive, and sperm oils. Castor oil, neatfoot, tallow and rape are thick. Nothing is better for high speed bearings and light spindles or shafts than sperm oil, but it is costly; for heavy bearings castor oil is superior to this, but it is also expensive.

But there is relatively little pure lubricant used in machinery, for it is usually more economical to employ a compound oil, compounded for special uses, than to use pure lubricants which, after all, are often heavier. By adulterated—gum, soap lime, alumina soda, and free acids have their own distinct purpose to serve in the composition of cheap oils. The chief advantage, however, pertaining to the use of compound oils is, that the objectionable qualities, of one kind of lubricant can be neutralized by mixing it with a lubricant of another kind. For instance, vegetable and fish oils are drying oils, that is, they oxidize rapidly, and cause gumming or clogging of the bearings to which they are applied, and if allowed to drop and accumulate upon dust, cotton waste, and timber are liable to develop an internal heat that will cause spontaneous combustion. Mineral oil does not oxidize, neither does animal. But mineral oils have what is termed a low flashing point; that is, they fire or ignite at a low temperature, some at 215 degrees Fahrenheit, or under. Animal oils develop fatty acids, and these corrode and pit the surface of the metal which they are used to lubricate.—Prof. John Evans, O. A. College, Guelph.

The Aquitania in backing out from the dock at Halifax partly demolished the coal towers, causing damage estimated at \$20,000 which it will take months to repair.

EMPRESS'S WAR RECORD

(1) Captain Geo. S. Webster, R.N.R., of the "Empress of Britain."
(2) Arthur E. Philip, Chief Engineer of the "Empress of Britain."
(3) Six inch gun crew standing by the gun on the "Empress of Britain," at right Chief Officer P. H. Moore, who gave the gunners the range.

THE "Empress of Britain," which sailed from New York on Sunday afternoon with 150 soldiers of the British War Mission, Y.M.C.A. and Knights of Columbus workers, has already covered 17,130 miles since the outbreak of hostilities when she was taken over by the British Government and has transported 119,000 troops overseas. She took thousands of Australians and Britishers to Gallipoli, and was one of the transports assigned to take them away. The last time she closed, she made a 16 months trip around the Cape of Good Hope with troops for German East Africa and also for Mesopotamia. She made eight trips with Canadian troops and for the first seven months of the war paralleled the South Atlantic as an admiralty cruiser.

It was during one of the trips across the Atlantic with 5,000 troops

board, that a German submarine launched two torpedoes, one of which due to a lucky zig-zag, missed the ship by three feet, and the other passed a dozen feet astern. At least a dozen attacks were made upon the "Empress of Britain" during the war, when she was taken over by the British Government and has transported 119,000 troops overseas. She took thousands of Australians and Britishers to Gallipoli, and was one of the transports assigned to take them away. The last time she closed, she made a 16 months trip around the Cape of Good Hope with troops for German East Africa and also for Mesopotamia. She made eight trips with Canadian troops and for the first seven months of the war paralleled the South Atlantic as an admiralty cruiser.

WORK AND SAVE

The greatest service YOU can render to your country in these critical days of Reconstruction; is to work conscientiously, economize sensibly, and invest regularly in War-Savings Stamps, and YOU will gain even more than will the country by doing these three things!

\$5.00 for \$4.00
AND EACH DOLLAR WORTH MORE.

In 1924, when the Dominion of Canada repays you \$5.00 for every War-Saving Stamp you own, a dollar will buy more than it will today!

A Wonderful Fishing Region

The rivers and lakes in the vicinity of Cranbrook, British Columbia, on the Crow's Nest line of the Canadian Pacific Railway, are happy and prolific haunts for lovers of fishing. All these waters are well stocked with mountain or cut throat trout, rainbow trout, Dolly Varden trout, bull trout, landlocked salmon or Kamloops trout. Excellent catches are made in the fishing season. Foremost amongst the fishing waters of this region are: St. Mary's Lake and river, Kootenay River, Moyie Lake and river, Cold Creek, Cherry Creek, Perry Creek Lake, Doyle's Lake, and Premier Lake. Perhaps the favorite rendezvous is Premier Lake. This lake is situated about thirty-eight miles from Cranbrook. It is three and a half miles long and one mile wide. Mountains surround it on every side, and it is very deep. There is no visible outlet for the waters. Springs that rise adjacent to the lake and streams from the mountain sides gush to rest in its placid bed.

On August 12th, 1913, the Game Conservation Board of the Eastern District of British Columbia furnished Premier Lake, along the Kootenay Central Railway, a branch of the C. P. R., with 10,000 Kamloops trout fry, each one inch long, about three-quarters of an inch long. A prophecy was made that the fry within four years would develop into fish weighing between twelve and thirty pounds. The accompanying illustration shows some of the fish caught when three years old.

Realizing the sporting possibilities of the Cranbrook region some of the residents met in Cranbrook on November 7th, 1917, and formed the Cranbrook District Rod and Gun Club. A hatchery was started in Cranbrook; 200,000 eggs were brought in and incubated. The enterprise was a huge success, and fry were distributed: 75,000 in St. Mary's Lake, 12,000 in Rock Lake, 25,000 in Premier Lake, 50,000 in Moyie Lake, 2,000 in Doyle's Lake, about 4,000 in Perry Creek Lake. These fish will spawn at the age of four years, and

Landlocked salmon caught in Premier Lake, British Columbia, on May 15th, 1913.

when they begin to multiply in the natural way it is certain that Cranbrook will be one of the finest fishing districts in the world. The best season for fishing these waters is from May 1st to June 15th and from August 1st to September 30th. The fly is used generally with success. Trolling will bring good results in St. Mary's, Moyie and Premier lakes.

Autos are Most Common in New-est Countries

In the United States there is one automobile to every 18 persons. In Canada there is one for every 25; in Australia, one for every 100; in England, one for every 268; in France, one in 402; in Italy, one in 1,002. Mexico one in 2,385; and in China, one in 267,207.

Here are such figures as Malthus might have seized upon. The automobile is an emblem and barometer of wealth. It is most ubiquitous in the newly settled regions of the earth and rarest where civilization is oldest. But the phenomenon cannot be wholly explained on the theory of Malthus. Chinese may shy from automobiles because of Chinese conservatism. The lands where automobiles are thickest—America, Canada, Australia—are lands populated by colonists, and colonists are people who have initiative, otherwise they would not leave their homes and countries to colonize. They have energy and ambition, betokened by the same act. Their descendants inherit their qualities. And they are not distinguished for thrift. Thrift is the outstanding characteristic of those people who struggle to keep their expenditures within their incomes. The American's struggle is to bring his income up to his expenditures.—New York Tribune.

Japanese Black Mint Yields Menthol Supply

Japanese black mint, a plant from which menthol is obtained, is cultivated in two widely different climates. Some 92 per cent of the total production is grown in the northern island (Hokkaido), which has an average yearly rainfall of about 38 inches and mean Summer and Winter temperatures of about 60 deg. F. and 22 deg. F. respectively. The remaining 8 per cent is grown on the main island (Okayama and Hiroshima), where the rainfall is 42.5 inches and the average temperatures 75 deg. F. and 38 deg. F.

The mint according to a United States commercial report, requires a light, well-drained soil. The roots are planted (in Hiroshima and Okayama) at the end of November and the beginning of December. The plant attains its full growth during the Summer months, and is cut in the latter part of July during August and in the early part of September, three cuttings being made during the season. The third cutting yields the greatest percentage of oil and menthol crystals. The leaves are steamed and pressed in barrels by the planters, who then ship them to the menthol factories, of which there are 34 in various parts of Japan. There the oil is extracted from the leaves by a process of freezing and pressing.

Mere Man Manages Women's Golf Tour

New York, June 4.—Susan B. Anthony! What of the suffragette sisters think of a man asking for a man-managed tournament? This was the case at the Los Angeles Country Club, where the Southern California women's golf championship was held recently. Mrs. H. D. Requa, the women's captain, asked for help, and Edward Tufts went to the bat.

Despite that, it is said that the women's national championship tournament at Shawnee early in October will be practically managed by members of the fair sex, although an official of the United States Golf Association will be on hand for the first day at least.

Toronto to New York City.

A through train service from Toronto to New York City leaving Toronto 5.45 p. m. St. Catharines 7.50 p. m. daily was inaugurated by the Grand Trunk Railway on May 4th. This train carries through coaches and sleeping cars and arrives at New York at the Pennsylvania Terminal 33rd St. and 7th Avenue.

Also train leaving St. Catharines 6.03 p. m. daily runs through to Buffalo, making direct connections at Buffalo for New York, coaches and parlor-library-buffet car Toronto to Buffalo, sleeping cars Buffalo to New York and Philadelphia. The Pennsylvania Station is so centrally located that it is a great convenience to the visitor to New York and is in easy reach of some of the latest hotels, also the shopping and theatre districts. There is also direct tube service to and from Brooklyn. j4-6

NOT SETTLED YET

Niagara Falls, Ont., June 4.—Indications are that the wage question on the Hydro canal will go to arbitration, as the unions will not accept the scale offered by Sir Adam Beck. Following the decision of the chairman to adopt the eight hour day, a scale of wages for the different branches of labor was arranged and dealt with separately by each union.

Decision on the part of the federation organizations is to reject the schedule as proposed by the commission, which will then go to a board of conciliation under the provisions of the Industrial Disputes and Investigation act.

Frank H. Healey has been re-elected president of the federation for the ensuing year and his salary substantially increased.

REGISTRATION OF W-S.S.

(War-Savings Stamps)

The Dominion of Canada offers you every safeguard for your investment in War-Savings Stamps.

Affix your W-S.S. (costing \$4.01 each this month) to the Certificate provided, and ask the Postmaster at any Money-Order Post Office to register the stamp or stamps for you.

The stamps are then absolutely useless to anyone but yourself. If your registered W-S.S. are lost by theft, fire, or other cause, the interest continues to accumulate and you can obtain your money at the office where the stamps were registered.

Remember, that at the rate of interest allowed on W-S.S. four dollars would grow to \$361.39 in 100 years.

EVERY time you are tempted to spend money needlessly, buy Thrift Stamps instead, at 25 cents each. Sixteen of these on a Thrift Card represent \$4.00 in the purchase of a W-S.S.

ENGLISH DERBY WILL BE RUN NEXT WEDNESDAY

Epsom racing on the famous old Downs is the most important of the twenty seven gatherings authorized by the governing body of the turf in England and Ireland for the coming month. The Derby will be run on the second day at Epsom and the Oaks on the fourth. King George's stable is not a strong one this year, and there is no representative of the Royal colors for the Derby, though it is possible that they may be carried by Vain Airs in the filly race. The race gatherings cover the country pretty well.

MANY CASES OF CHICKEN POX HERE

The following letter was received by The Journal from Dr. Currey today:

The Editor,
The Evening Journal
Dear Sir: Kindly inform your readers that there are many cases of Chicken Pox in the City at present although few have been reported to the Local Board of Health. In some cases parents are sending their children to school when there is infectious disease in the house. This is contrary to the regulations of this Board of Health.

The penalty for not reporting com-

municable diseases is a fine not less than \$25 and the Provincial Board of Health is determined to enforce this regulation.

In some cases the City physicians are to blame and the Local Board of Health will have to deal with them in this regard.

Yours very truly
(Sgd.) D. V. CURREY,
Medical Officer of Health

ROADS THAT ARE STREWN WITH FLOWERS

There are many who believe that all big corporations and industrial concerns only look to the material side of things and work machine-like for the production of wealth, regardless of the winter's snow and unheeding of the summer's bloom. This is often an erroneous idea, for it is generally realized that man does not altogether live by offices and pens and papers and engines and other accoutrements of labor—he requires trees and shrubs and flowers and the loveliness of nature.

The Canadian Pacific Railway has always paid considerable attention to the development of garden plots along its lines. It is just thirty years ago since a C.P.R. employee raised a few varieties of flower seeds in his own garden, and distributed them amongst his friends in the service of the company, with the object of promoting flower gardening at the various station plots of the railway. A vast advance has been made since then, and now the company possesses a Floral Department with headquarters at Windsor street, Station, Montreal, and a Floral Committee, which embraces members from the Eastern and Western lines. It is under the guidance of this department that the various station plots and other properties of the company are cleared up and beautified. Thousands of packages of flower seeds, bulbs, trees, and shrubs and large quantities of grass seeds and fertilizers have been distributed during the last few years to station agents, section foremen, caretakers of round houses, and all employees living on the property of the com-

(1) Cranbrook Station, B.C. (2) Flowers Beautify the C.P.R. at Calgary. (3) Guelph Junction, Ont.

pany. Travellers on the line observe the happy results achieved. The cultivation work is done in all cases supervised by Mr. E. M. Winnegar, forester of the company. The encouraging influence of flowers growing on the C.P.R. during the last thirty years has in a large measure assisted in the inauguration of floral societies all over the country. There are hundreds of C.P.R. officials connected with these societies, and most of them received their first lesson in flower culture at the C.P.R. flower beds. Flowers have improved the railway stations, and inspired by the beauty of the stations, residents of the towns have planted flowers and improved the appearances of their homes. In every division of the C.P.R. prizes are given every year for the best displays, and many of these amateur railway gardeners have tried their products with success against all comers at the big Canadian and American flower exhibitions.

NIAGARA-HAMILTON BAPTISTS MEETING

Beamsville, June 4.—The one hundredth annual convention of the Niagara-Hamilton Baptist Association is being held here this week. Yesterday's sessions were given over entirely to conferences of Women's Missionary Societies of the Church. Rev. J. W. Young of St. Catharines, the Moderator, will preside over the general sessions.

At the opening of the session an address of welcome was delivered by Mrs. T. E. Meldrum of Beamsville. This was followed by an address by Mrs. J. L. Sloat of Niagara Falls on "Home Missions' Objective for 1919." An address on home mission work was delivered by Mrs. Lillie of Toronto.

The meeting then broke up into conferences on mission band work under the leadership of Mrs. Mills of London. Miss Trotter led a discussion on young women's work, and a discussion on women's missionary circles was led by Mrs. Beck of Burlington.

In the afternoon, session the report of the Nominating Committee was received, and a retrospective address was given on the work of the association by Mrs. J. E. Bennett of Beamsville, a member of the Beamsville Baptist Church, which this year completes its 112th year.

"The Foreign Mission Objective" was the subject of an address by Miss M. Reed of Port Colborne. Mrs. John McLaurin of Toronto spoke on foreign mission work. The concluding addresses of the afternoon session were by Mrs. Hendrie of Hamilton and Mrs. Doherty of St. Catharines, the subjects being "The New Era" and "Our Budget."

Bishop Bidwell, in his address to the synod of Ontario at Kingston, favored sale of light beers and wine under strict Government regulation.

GIFT TO LIBRARY

Valuable Scrap Book Presented by Mrs. Orlando Dunn—Library Board Holds Short Session.

The Public Library Board held a brief meeting last night. Those present were: W. Erskine, chairman; A. M. Watt, C. A. Hesson, D. C. Hettlington and Secretary Bruden.

The finance committee presented their report recommending payment of salaries and account amounting to \$492.29.

The report of the Librarian showed 3,488 books issued for the month. Receipts from cash and fines amounted to \$35.06 and 49 new members were added.

Mr. Hesson reported that Mrs. Orlando Dunn, Queenston Street, had presented to the Library a scrap book containing a valuable collection of maps, plans, slippings from papers and other interesting documents relating to the early history of St. Catharines. This will make a valuable addition to the Canadiana Room. The Board would like to receive further collections that may be in the possession of citizens and that should be kept in some public building for safety and convenience of access to all interested in the early records of the city or county.

with you. We are telling you" French painters will bring it all out with intensified effect. The irony of the attempted affront will be turned against those who fancy that impudence can be a help in defeat.

Even prize-fighters are formally civil to each other. To be otherwise would be silly.—St. Louis Globe-Democrat.

Mrs. David Henry of Mornington met with an accident which resulted in her death, the cause being the breaking of a line snap off the horse's bit.

Glen Ridge

The Ideal Residence Area of St. Catharines

Glen Ridge is by far the most desirable residential subsection in St. Catharines now on the market, and possesses the following enormous advantages:

1. It is close to the heart of the city, all lots being within one mile radius of the Post Office and City Buildings.
2. There are building restrictions ensuring the erection of only the most desirable dwellings.
3. Beautiful surroundings and park areas.
4. Prices moderate and reasonable terms.

We expect a big movement in this property in the next two months. So act quickly and own a home in the most beautiful sub-division in the Niagara Peninsula.

YOU CAN'T FIND ANY DANDRUFF, AND HAIR STOPS COMING OUT Save your hair! Make it thick, wavy, glossy and beautiful at once. Try as you will, after an application of Danderine, you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yet—but really new hair—growing all over the scalp. A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and ragged, just moisten a coin with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxur-

CAPTURED MAN MAY BE MUCH WANTED THIEF

Frank Clements Said to Have Been Retaken by Authorities at Hamilton, Ont.

Niagara Falls, Ont., June 4.—A man believed to be Frank Clements, alias Frank Cassidy, who escaped from the chief of police of Nashua, N.Y., by leaping from a moving train while en route to stand trial some time ago has been arrested in Hamilton. He was working as an attendant in the asylum in Hamilton and was identified by Mrs. Stevens, wife of the manager of the Bank of Hamilton, whom he is alleged to have robbed at Clemens.

Clemens was arrested in Toronto last winter on a charge of stealing a motor car. He was said to be the companion of two men who were shot in a running gun fight over the border. On going back to Toronto he was arrested and handed over to the chief of police of Nashua for extradition. Lett to himself for a moment as the train was steaming out of Kingston, Ont., Clements jumped

CHILD SAVED FROM DEATH BY MRS. M. KNIGHT

Waded Into Niagara River at Bridgeburg and Pulls out Drowning Boy.

BRIDGEBURG, June 4.—A heroic act, deserving a Carnegie medal, was that performed by Mrs. Mary Knight of Highland avenue when at three o'clock yesterday afternoon, she rescued five-year-old Roy Renshaw from drowning in the Niagara river.

Mrs. Knight observed the little boy playing about a boathouse on the river bank, and even as she started to warn him of his danger she saw him topple from the landing platform into water twenty feet deep.

Carried by the current, the child was carried into the shallower water. Mrs. Knight rushed to the rescue and waded out into the swift stream until the water came to her waist before she succeeded in seizing the boy's clothing as he went down for the third time and was being carried rapidly by.

By this time other persons had been attracted to the scene and willing hands were extended to aid the nearly exhausted woman as she neared the bank with her senseless burden. The boy had been carried twenty rods down the river from the boathouse when caught by the woman.

Dr. J. R. Mencke, with what aid others could render, worked for a full hour over the boy before he was restored to consciousness.

Mrs. Knight was formerly a nurse. Her prompt and heroic action was warmly praised by those who witnessed the rescue, for a minute's indecision on her part would have meant the boy's death.

POLICE COURT

Leonard Montonio and his daughter Mary Ruthley, both faced a charge of neglecting to send their children to school and after hearing the evidence the Cadi tacked on a fine of five and costs or seven days.

They were given until Saturday to pay.

The charge of assault preferred by Elizabeth Ducois against Alex. Hutton was dismissed.

The course of true love may not run smooth, but nevertheless Miss Mildred Knowlton of Kingston insisted on being allowed to say good bye to her sweetheart as she will return home with her two brothers while Louis Schurtelife with whom she made a hasty exit from the Limestone City will be a guest at Castle Bush until Friday.

The pair who are about seventeen

COURT ANNULS MARRIAGE OF ST. KITTS MAN

"Spirit" Wedding Was Very Strange Event Said Judge Marcus of Buffalo Yesterday.

BUFFALO, N. Y., June 4.—Anna Marie O'Donoghue of Niagara Falls, N. Y., was granted an annulment of her marriage to Thomas O'Donoghue of St. Catharines, Ont., by Justice Marcus in special term of supreme court yesterday.

Mrs. O'Donoghue testified that while she was engaged to a man named Archibald Campbell, her aunt, Lena Riley, of Toronto, Canada, telephoned her to come at once as she was ill. When she arrived at her aunt's home the plaintiff said that she grew skeptical of the gravity of her aunt's illness. The next day, Mrs. O'Donoghue said, she met her present husband, the defendant, whom she knew as a child. They were married the same day, the defendant said, but she did not remember anything that took place.

"I must have been drugged," Mrs. O'Donoghue said. Justice Marcus, in granting the annulment said it was the most peculiar case of its kind he had ever run across.

SOUNDS LIKE A PIPE DREAM FROM THE EAST

Alexander Potrusch Convicted in New York of Selling the City Hall and Other Buildings to "Green Horns."

New York, June 4.—Alexander Potrusch, who is alleged to have sold the city hall, the criminal courts building, Graut's tomb and the dual subway system to various unsuspecting purchasers, was sentenced to 2 1/2 to six years in Sing Sing today for selling a news stand, which unfortunately belonged to some one else, to Joseph Weiss for \$2,000.

According to the testimony Potrusch brought in adding purchasers of the various properties offered for sale to the twentieth floor of the municipal building where they were introduced to a man who Potrusch said was Mayor Ryan. He supposed Mayor Ryan, who supposed no more, witness said conducted all his conferences in Yiddish but they took this as a compliment to Potrusch.

and sixteen years of age respectively were arrested by the Police at a Niagara Street house last night at the request of the Children's Aid Society at Kingston.

CANADA'S RAILWAY GIANT

A handsome tribute to Lord Shaughnessy was paid by the shareholders at the meeting today. Mr. Huntly R. Drummond moved the following resolutions:

Resolved:—That there be inscribed in the record of this meeting an expression of the appreciation of the shareholders of the great service rendered to the Company and to the Dominion of Canada by the Rt. Hon. Lord Shaughnessy who has recently retired from the Presidency and assumed the Chairmanship of the Company.

The outstanding position held by the Canadian Pacific Railway not only in the markets of the world but also in the respect and affection of the Canadian people provides the greatest of all tributes to the gentleman with which Lord Shaughnessy has directed the affairs of the Company, but the shareholders cannot let this occasion pass without the further tribute of their thanks for the services he has rendered during the thirty-six years with which he has been associated with this enterprise.

Through Lord Shaughnessy's financial skill and executive ability, an immense transportation system has been built up and consolidated with such efficiency and economy that the Canadian people have enjoyed efficient service at moderate rates, have seen their resources developed beyond all expectation and have been encouraged during normal years by a steady flow of immigration, while the financial returns of the Company itself have amply justified the confidence placed by investors in Canadian industry and management.

It is particularly gratifying to the shareholders that under Lord Shaughnessy's Presidency the Canadian Pacific Railway Company should not only have rendered such signal services to the cause of the Allies during the recent Great War, but should also have maintained its efficiency and financial standing in the face of the difficult conditions created by that war. The shareholders consider it due largely to his far-sighted policy that under such circumstances the Canadian Pacific Railway Company should not only have required no assistance from the Canadian Government but should

actually from its reserves have been able to provide substantial aid to the Government in maintaining the high standard of Canadian credit.

The shareholders deeply appreciate and honour the spirit of self-sacrifice with which Lord Shaughnessy maintained the arduous duties of the Presidency during the anxious years of the war in spite of physical disabilities. They rejoice that these disabilities have been ameliorated and that with renewed vision he can once more enjoy the beauties of that Canadian landscape which the Canadian Pacific Railway has made accessible to the world.

When the prospect of peace enabled him to hand over the more active duties of the Presidency with clear conscience to a younger man, it was with genuine pleasure that the shareholders heard of Lord Shaughnessy's decision to remain as Chairman of the Company, not only because they realized that the Company would thereby continue to have the benefit of his counsel and advice, but also because they are proud to retain as their titular head one who is held in such universal honour.

The shareholders trust that the indomitable spirit which has been so characteristic of Lord Shaughnessy's whole splendid career will be rewarded with many years yet to come of health, prosperity and happiness.

Moved by: Huntly R. Drummond. Seconded by: Colin Campbell.

Lord Shaughnessy replied: I appreciate most heartily and thank you, Mr. President and fellow shareholders, for the complimentary remarks referring to myself in the President's address, and in the Resolution adopted by the meeting. I would be lacking in candour if I failed to admit great pride in the progress of the Company during my Presidency and in its present splendid position, physically and financially, and equal pride in the faith and confidence of the shareholders who, with marvelous unanimity responded to calls for new capital by subscribing for additional issues of stock, even on occasions when in deference to popular clamour the issue price was less favourable to the subscribers

than it might properly have been. My predecessors, Lord Mount Stephen and Sir William Van Horne, who carried the responsibilities of the Chief Executive through the periods of construction and the first few years of operation, had a more difficult task as is well-known to our senior colleagues on the Board of Directors, Mr. Angus, Sir Edmund Osler and Mr. Matthews, but it was my good fortune to become President just when the tide was turning and when Canada was coming into her own.

The expansion in the country's business and the consequent increase of traffic compelled capital expenditure on a large scale to furnish improved transportation facilities presently required and to anticipate the future, and the money for these purposes was provided year by year from 1900 to the outbreak of war.

The policy of your Directors was bold and forward. There was never any hesitation, and looking back over that period they are justified in the conviction that few, if any mistakes were made, and that conviction is, I am sure, shared by the great body of the Canadian people and of the Company's shareholders.

It was fortunate indeed that when the time arrived to transfer the responsibilities of Chief Executive to younger and more vigorous shoulders your Directors had available for the post a man so capable, so energetic, so conscientious and so well versed in matters relating to the Company's policy as the new President, Mr. Beatty. I shall not hurt back at him such compliments as he paid me in great profusion, but I may be permitted to say that he enjoys the complete confidence and respect of the Directors and of the Canadian people. The shareholders' interests could not be in safer hands.

After so many years of business and personal association it was somewhat of a wrench to my fellow-Directors as it was to me to alter our relations by permitting me to retire from the Presidency, but they felt as I did, and as I hope you feel, that it was best for the future of the Company.

Toronto, April 30th, 1919.

AUDITOR'S REPORT

This statement has been duly vouched by comparing all entries with the books at the Chief Office and certified Returns from the Branches, and in my opinion is properly drawn up so as to exhibit a correct view of the condition of the Bank.

Cash and Securities have been checked at the Chief Office at 30th April, 1919, as well as at another time during the year, as required by section 56 of the Bank Act.

I have obtained all the information and explanations required, and am of the opinion that the transactions of the Bank, which have come under my notice, have been within the powers of the Bank.

SHERMAN E. TOWNSEND, C.A. Auditor.

BRIDGEBURG TRUSTEES NO ASK FOR M

School Board Wants \$30,000 Addition to One School

The Bridgeburg school board might make application for the \$30,000, which it is proposing in connection with the construction of an addition to the Phipp Street school and also covering the cost of an up-to-date heating system. The council postponed action on the matter until June 10.

Last year the council received application from the school for \$10,000, covering the installation of an up-to-date heating system. Phipp school, but, loath to add more additional school room, the council built last year a school, built last year cost \$35,000, brought the matter to the attention of the rate-payers. The result that it was defeated by a narrow margin.

The council also, at its increased the salaries of its members working for the town by one-half per cent. It was also decided to see to it that the town should have permanent highways in the town and to construct new highways.

The contract for a large new sidewalk was let to A. D. Nie Company. J. Gibbon, who was recently re-elected engineer, brought forward a plan for the construction of a take walk through which the town pumps can be secured. The council accepted the plan, but no action in connection with its construction.

SIX CIVIL ACTIONS
Docket for General Sessions day is Heavier Than Two Criminal Cases to be Tried.

Robert C. Rubel of Meekins damages from Arthur as to the amount of \$250 as a result of a motor car on the Thorold road on Nov. Defendant has entered a counter claim for a like amount.

Joseph Stanokovitch of Falls is suing Adam Glover for Township to recover \$100. Plaintiff claims the value of various sums of defendant's board.

Defendant in his statement the majority of the amount of the item.

Abraham H. Adrich is suing for \$546.66 from the Casualty Company over a policy defendant issued him insuring against disability and was \$40 per month. Defendants counter claim the injuries were result of carelessness and are not liable under the policy.

A. G. Russ has entered against Andrew W. Erchme cover \$587.40 as a balance for goods supplied to defendant. Geo. C. Jones for the executor of the estate is seeking \$100 from Mr. Mode over a deposit on the sale of a stock.

John Fielding seeks \$23.20 from Howard Mandan as a half share of the net articles grown on the farm.

The two criminal cases of Mrs. Margaret Robertson with concerning the birth of and James Clark of Grantham with stealing wheat from Mr. Proudfoot to S.

Mr. Wm. Proudfoot, K.C., the leader of the Opposition Ontario legislature, will address an annual meeting of the Ontario's Liberal Association in St. Catharines Hall, Toronto, on Monday, June 10, at 2:30 p.m. Major Tomlin, of Windsor, has also promised

BRIDGEBURG TRUSTEES NOW ASK FOR MONEY

School Board Wants \$30,000 for an Addition to One School

The Bridgeburg school board Tuesday night made application to the Bridgeburg council for the sum of \$30,000, which it is proposed to use in connection with the construction of an addition to the Phipp Street school and also covering the installation of an up-to-date heating system. The council postponed action until its next meeting, on June 19.

Last year the council received an application from the school board for \$10,000, covering the installation of an up-to-date heating system in the big Phipp school, but, loath to spend so much additional school money, in view of the fact that the new Lewis school, built last year, cost about \$35,000, brought the matter to the attention of the rate-payers, with the result that it was defeated in a special by-law.

The council also, at its meeting increased the salaries of day laborers working for the town twelve and one-half per cent. It was necessary to do this in order to secure help. It was also decided to asphalt all permanent highways in the town and to construct new highways.

The contract for a large number of new sidewalks was let to the firm of A. D. Nic Company. J. D. Fitzgibbon, who was recently retained as town engineer, brought forward a plan for the construction of an intake well through which water for the town pumps can be secured. The council accepted the plan, but took no action in connection with ordering its construction.

SIX CIVIL ACTIONS

Docket for General Sessions on Tuesday is Heavier Than Usual. Two Criminal Cases Also to be Tried.

Robert C. Rubel of Merriton is seeking damages from Arthur Watson to the amount of \$250 and costs as a result of a motor collision on the Thorold road on Nov. 7th last. Defendant has entered a counter claim for a like amount.

Joseph Stanokovich of Niagara Falls is suing Adam Glova of Stamford Township to recover \$179.50 and costs. Plaintiff claims that he advanced various sums to defendant and also boarded him.

Defendant in his statement admits the majority of the amounts but disputes one item.

Abraham H. Adrich is seeking to obtain \$546.66 from the Merchant Casualty Company over a policy which defendant issued him insuring him against disability and were to pay \$40 per month. Defendants claim that plaintiff's injuries were received as a result of carelessness and that they are not liable under the terms set forth in the policy.

A. G. Russ has entered action against Andrew W. Erchmeier to recover \$587.40 as a balance due him for goods supplied to defendant.

Geo. C. Jones for the executors of the Jones estate is seeking to recover \$100 from a Mr. Moe which was paid to him by the late Mr. Jones as a deposit on the sale of a block of stock.

John Fielding seeks to recover \$23.20 from Howard Manuel of Jordan as a half share of the receipts on articles grown on the Fielding farm.

The two criminal cases are those of Mrs. Margaret Robertson charged with concealing the birth of her child, and James Clark of Grantham, charged with stealing wheat from a neighbor.

MR. PROUDFOOT TO SPEAK

Mr. Wm. Proudfoot, K.C., M.P.P., the leader of the Opposition in the Ontario legislature, will address the annual meeting of the Ontario Women's Liberal Association in the Foresters' Hall, Toronto, on Friday at 2:30 p.m. Major Tolmie, M.P.P. for Windsor, has also promised to speak.

FINE PROGRAMME FOR FIRST BAND CONCERT

By kind permission of Lt.-Col. McCordick and officers the 19th. Lincoln Regt. the band will play the following programme in Montebello Park tonight:

Frank Weis, bandmaster.
March—"and of Moa" Lithgow

Intermission
Characteristic—"Mill in the Forest" Eilenberg
A—Intermezzo—Chacone
B—"Till we Meet Again" Whiting
C—Selection—"Chau Chin Chow" Norton
Hymn—"King of Kings" Sullivan
God Save the King

WINNIPEG WAS QUIET LAST NIGHT AGAIN

But Many Parades Were Held During the Day by Both Sides.

WINNIPEG, June 5.—Winnipeg last night was quiet, after a day of parades and demonstrations that on several occasions threatened to end the tranquility that has marked the general strike of union workers in force for twenty days. Fifty additional policemen were sworn in during the day by municipal officials.

Soldier veterans of the European war, who did not sanction the general strike, marched with banners in front of the Provincial House of Parliament, where speakers told Premier T. O. Norris that they stood for law and order and for recognition of the constitutional government. The anti-strike marchers then paraded to the city hall, where Mayor Charles F. Gray announced that the Central Strike Committee had taken steps to curtail the milk and bread supply.

"They'll resist those orders or we will tear the Trades and Labor temple to pieces," shouted a marcher. A roar of approval followed.

Another parade of strikers, strike sympathizers and a few returned soldiers also paraded the streets, but the two factions did not meet. Leaders of both the pro and anti-strike marchers announced that they would repeat the demonstrations today.

The city council arranged to open bread and milk depots throughout the city after the bakers and dairymen declared they would attempt to operate their plants, despite the strike orders.

Railway Brotherhood executives attempting to mediate the differences between the metal trades workers and the industrial employers, said they had no announcement to make. The strike of the metal trades several weeks ago was followed by the sympathetic walkout.

BODY OF SUICIDE BURIED BY CITY OF NIAGARA FALLS

NIAGARA FALLS, Ont., June 5.—The body of Constanta Germanara, the twenty-nine-year-old murderer, who committed suicide in Welland jail two days before the date set for his execution, was buried yesterday by the city. It was thought his compatriots would bear the expenses, but no one appeared.

The body of the man taken from the Niagara river has also been eburied. It was unidentified.

The funeral of the late Jacob P. Servos who passed away at Edmonton, Alberta, on Wednesday, May 28th, last, was privately held on Wednesday afternoon from the residence of his brother, A. T. Servos, Grantham Township, McNab. A brief service of prayer was held at the house and then the remains were taken to Christ Church, where Rev. R. L. Weaver read the beautiful Church of England service. At the close of the service the remains were laid to rest in the burying ground at the rear of the church. The following gentlemen acted as bearers: G. P. Bernard, Thomas Miller, A. Onslow, Thomas Butler, A. D. K. Servos and Walter James.

LOCAL G.W.V.A. VOTE GRATUITY SCHEME DOWN

Resolution Passed Favoring Government Control of all Cold Storage Plants.

The members of the St. Catharines branch of the G.W.V.A. last night voted against the proposed \$2,000 gratuity as framed by the Calgary branch, not one member speaking in support of the idea.

The resolution passed by the Port Arthur and Fort William branches asking the Government to investigate the high cost of living was endorsed by the members, but the resolution from the same branches re the protection of returned men employed as strike breakers was turned down and the secretary was instructed to notify Port Arthur to that effect.

A resolution was unanimously passed to the effect that in the opinion of this branch it would be to the best interests of the people of Canada if the Government took over the control of all cold storage plants in the Dominion. A copy of the resolution will be sent to Premier Borden and to the Dominion Comma.

The social committee reported that arrangements are being completed for the big demonstration on July 1st.

Secretary Cunningham reported that the members had subscribed \$500 already to the building fund with many more to hear from. The civilian advisory board will look after the assessment question.

Another resolution passed at the meeting was to the effect that the Government be requested to pay a war service gratuity to men who served in England.

Twenty-five new members were initiated.

GROWING DEMAND FOR HYDRO POWER

OTTAWA, June 5.—In his report on the export of electricity from Canada Sir Henry Drayton expresses the view that, even with the great undertaking of the Hydro electric Power Commission at Chippawa, the ever increasing demand in Ontario for electricity may well require the continued operation of the Ontario Power Company's plant at Niagara, though it had been thought that the latter would become largely a stand by plant.

The situation relating to the increasing demand for power was the same on both sides of the river in Ontario and in the United States. There were shortages on both sides, and great works were in progress on both sides for the purpose of utilizing with greater efficiency the water taken from the river.

The situation was accentuated on the American side in that a great deal of electricity is now being produced by steam in the very efficient plant of the Buffalo General Electric Company. The ever increasing cost of coal and its transportation would, however, inevitably tell in favor of modern hydraulic plants. Both countries were equally concerned in a large use of the waters of the river for electric development, and the Power Board was now considering the policy as to the export of electricity, the use of water for power purposes, and the treaty limitations which confine the Canadian use to 36,000 feet.

INSISTED ON THREE CHEERS FOR UNION JACK

BRANTFORD, June 5.—Mayor MacBride took hold here last night of a mass meeting under the auspices of the Metal Trades Council and demanded cheers for the Union Jack. This incident was the culmination of the introduction of the red flag into the meeting. Organizer McDonald, Vice President of the Metal Trades Council, Toronto, stating that he was a red flagger and was proud of it, although he did not espouse red flag principles when he talked on the trade union movement.

DOMINIONS TO HAVE FULL REPRESENTATION

LONDON, June 5.—Replying in the House of Commons to Mr. Norton Griffiths, Right Hon. Bonar Law, Government Leader in the House, stated that the Government intended that representation of the Dominions in the League of Nations should be as full as that of the smaller sovereign nations. Representatives of the Dominions would be eligible for appointment to the Executive Council on exactly the same terms as other members of the League who were not permanently represented thereon.

Mr. L. Lyle asked: "Has provision been made against settlement within the Empire of four thousand Austro-German prisoners now in Japan?"

Mr. Law replied: "They would come under the regulations regarding admission of aliens, which vary in different parts of the Empire."

MANY HORSES DIE

Some Valuable Animals Killed by the Intense Heat and Farmers Lose Heavily.

INGERSOLL, June 5.—Victims of the intense heat, many horses in the district, some of them very valuable animals, have died during the past few days. Cases are comparatively common where the animals suddenly overcome have dropped in their traces and died in the course of a few minutes. In other instances they have lingered for a short time suffering from symptoms as persons suffering from sun stroke. There have been numerous cases where veterinary treatment in an automobile, could reach them.

Somewhat accurate information as to the total number of deaths in this immediate district was gleaned. At the local fertilizer factory it was stated that probably forty horses had been brought in during the past ten days. A week ago today there were ten, and today it was stated five calls had been received. There is naturally much a farm amongst the farmers and other owners of horses, and some are afraid to work the animals throughout the day.

A valuable heavy horse dropped in the traces yesterday afternoon and died in a few minutes. It had not been taken to the field until 4 o'clock in the afternoon and it died one hour later. If the present death rate is continued for a few more days the loss to the farmers will be very heavy.

Mrs. Margaret Robertson appeared before His Honor Judge Campbell in the County Judges Criminal Court this morning and through her counsel A. C. Kingston elected to be tried by a jury at the General Sessions on June 10th. Mrs. Robertson is charged with concealing the birth of her child.

THE WORLD FROWNS ON THIS MAN

SYDNEY, N.S.W. June 5.—The United States has now twice refused to permit Paul Freeman an American, deported from Australia, to enter America. When the Sonoma returned to Australia with Freeman for the second time he decided on a hunger strike. This lasted a week when his condition became so serious that a public outcry was raised, with the result that the lumpers refused to work and the crew threatened to leave the ship. An attempt was made last night to rush the ship. The position was becoming serious when news was received that Acting Prime Minister Watt has decided to allow Freeman to disembark so that his case might be inquired into. Freeman denies that he belongs to the International Workers of the World and that his parents are German.

SMALLPOX IS REPORTED TO BE BREAKING OUT

Canada Threatened With an Epidemic of the Dreaded Disease—Germs Brought in by Soldiers.

QUEBEC, June 5.—That Canada is threatened with a virulent outbreak of smallpox was the admission of Dr. J. D. Page, Immigration Health Inspector for the harbor of Quebec, yesterday afternoon, on the occasion of the detention at the Grosse Ile Quarantine Station of the White Star Dominion Liner Megantic, bringing in some fifteen hundred soldiers, mainly from the Canadian West.

There were a number of chickenpox cases on board the vessel when she passed the Quarantine Station Monday night, and she docked at Quebec only at 3:30 yesterday afternoon, after being thoroughly fumigated at the Quarantine, and after all her passengers had been inspected and mostly all vaccinated.

The number of cases on board could not be ascertained officially, but it seems there were a goodly number, for Dr. P. Morineau, Superintendent of the Quarantine at Grosse Ile (40 miles below Quebec) yesterday morning ordered the ship detained longer than expected and sent a special boat to Quebec to get a large quantity of vaccine.

MINERS OF THE NORTH TO TAKE STRIKE VOTE

COBALT, June 4.—The forty-eight hours which the Cobalt Miners' Union allowed for a satisfactory reply to their demand expired this evening, without any action being taken by the managers of the mines, and therefore, according to the ultimatum served by the union, that organization will now proceed with preparations to take a strike vote on Sunday.

The feeling is growing that even should the majority vote be in favor of a strike, which now seems very questionable, some steps might be taken to ask the government for a board of arbitration rather than call a strike that would not be supported by a large part of the mine workers and not backed by public sympathy. The meeting of the mine managers and the union officials at Kirkland Lake, held last night, was confined to the discussion of what recognition of the union would mean, the question being asked by the managers, and the union officials failing to commit themselves to what the managers could consider a satisfactory reply.

The union demand at Cobalt having received no response, and the demand at Kirkland Lake destined to a similar fate on Friday, the next development of interest will be next Sunday's voting.

It is a peculiar fact that the average mine worker appears to be quite well satisfied, and but for the activity of some of the agitators the northern mining camps never before appeared to enjoy the present measure of industrial peace.

PROVINCIAL ELECTION WITHIN A YEAR

TORONTO, June 5.—Claiming that he was misreported in an address which he delivered at Meaford in which he was criticized with saying that there would be an election this fall or next spring, Hon. I. B. Lucas has advised the Prime Minister that the correct version of his speech was that the referendum will be held this fall as soon as practicable after the return of the soldiers. It might be in October or November, but no consideration has been given by the Government as to the date, and he was not in a position to say anything definitely.

MOSS DRUNK ON MEDICINE

WOODSTOCK, June 5.—A man named Moss, who comes from Detroit was fined here ten dollars and cost for getting drunk on beef, iron and wine.

DIES FROM FLU IN FRANCE AFTER LONG WAR SERVICE

NIAGARA FALLS, ONT., June 5.—Last evening a handsome 67-year-old tablet in memory of the men of All Saints church, who were killed in action, was unveiled by the presence of a large congregation. The dedicatory sermon was preached by the Rev. Dr. Renshaw, Hamilton.

The name of Lieut. Cyril Bevan, son of the Rev. Canon Bevan, rector of All Saints is among the list who died as the result of flu in France, a few days after the signing of the armistice. He had been on the firing line since the early days of the war.

BABY FELL 40 FEET AND DID NOT GET HURT

Amazing Adventure of New York Child Who Landed on Cement Pavement Yesterday.

NEW YORK, June 5.—An amazing adventure befell baby Virginia, fifteen months old daughter of Mr. and Mrs. Joseph Diack, No. 2229 Southern boulevard, this afternoon.

Mrs. Diack placed the infant on a couch near the rear window of her apartment on the second floor and went to the bathroom to prepare a bath for the little one. The baby, left alone, climbed to the window ledge, washed open the shutters, and fell to the rear court pavement, a distance of over forty feet. There was no obstruction to break the fall, and the infant landed on the stone pavement.

The little one was not rendered unconscious, and did not even suffer any abrasions. When the distracted mother and several passers-by reached the spot they were amazed to find the fallen baby cooing and gurgling with apparent delight over her adventure.

Dr. Lillian Armbale, a surgeon at Fordham Hospital, made a thorough examination of the infant, and said no bones were broken and that the child had apparently escaped without a bruise. She regarded the case as a miracle.

Little Miss Virginia cooed and smiled throughout the examination. Dr. Armbale was realizing that she had seen a child born into the age of air conquest, wherein humanity defies the laws of gravitation.

OVER NINE MILLIONS

Late Mrs. Hetty Green Kept That Much in the Bank for Business in New York.

NEW YORK, June 5.—The amount of Mrs. Hetty H. R. Green's bank deposits in this city at the time of her death was \$9,401,778. Besides these she had interest-bearing certificates aggregating \$4,230,504. These figures became known for the first time yesterday when State Controller Travis asked the Surrogate to hold that these sums were used in her business in this city, and consequently are subject to a tax. The aggregate amount which the Controller contends is taxable is \$36,610,369.

In addition to items standing in Mrs. Green's name, there were large funds to the credit of the Westminster Company, which was formed by her as a holding concern for her investments. The books of the company, with credit entries in favor of Mrs. Green, showed:

Deposits, Seaboard National Bank, \$3,145,694; special deposits in same bank, \$1,386,927; Colonial Bank \$359,753, and National Park Bank \$350,374; certificates of deposit \$5,141,649; loans on collateral \$6, 81,690; mortgages on real estate, \$5,812,000. The Controller contends that all these items should be taxed. The estate has admitted liability to a tax aggregate of about \$6,000,000.

WOODSTOCK, June 5.—A man named Moss, who comes from Detroit was fined here ten dollars and cost for getting drunk on beef, iron and wine.

NURSES RECEIVE THEIR DIPLOMAS

Annual Graduating Exercises in Connection With Mack Training School Proves Enjoyable Affair.

Though the heat was excessive requiring the constant use of handkerchiefs and fans, the annual graduating exercises of the 1919 class of the General and Marine Hospital proved to be a most attractive event. It was held last night in the Empire Oddfellow's Hall, Queen Street and was well attended by citizens and by relatives and friends of the graduates. One of the pleasing features of the exercises was that the speeches were brief and the programme was expedited.

Mayor Elson occupied the chair and on his right sat Miss Uren, superintendent of the hospital and Mrs. J. G. Moore, president of the Ladies' Aid. On his left the graduates in uniform, were seated in a row. Two Noble Women

The programme began with a piano section, by Mr. Clarence Colton followed by prayer by Rev. H. L. Almond of Merriton. The Mayor, in his opening remarks, congratulated the graduates on achieving their ambition. He said they had entered a noble profession and in the English language no two names had been written in better characters on the pages of history than those of Florence Nightingale, who had distinguished herself during the Crimean War and Edith Cavell, who fell a martyr while nursing the wounded during the recent war.

Requirements of Future Speaking on the work of the G. and M. Hospital, the Mayor said that the board was fully conscious of the need of increased accommodation at an early date and particularly at the nurses home. The proposals which are now being considered would no doubt be laid before the public at a future time when they are matured.

During the past year the hospital had been particularly valuable as a civic institution because of the influenza epidemic. For the eight months from October first last to June first of this year there had been 1106 patients treated and of these 277 were cases of influenza. The Mack Training School for Nurses had a long and worthy record and the graduates in going out into their profession could well be proud of their associations while in training. Regret was expressed by his Worship on behalf of his fellow members of the Hospital Board who were unable to be present.

Nurses at the Front Col. W. H. Merritt, M.D. gave a short but very interesting address on the splendid work the nurses had done behind the lines along the battle front during the war. He paid a high tribute to their courage under dangerous and trying conditions and pointed out how the work of nurses at the front had brought honor to the profession.

"It used to be thought" said the Colonel, "that courage in times of danger was largely a characteristic of men. Let me say that there were ample evidences during the bombardments and shelling at the front when the nurses exhibited just as much of this quality as our men."

One of Highest Callings Rev. A. H. Howitt who also spoke remarked in a most engaging way on the splendid opportunities which nurses had for humanitarian service and for carrying out the precepts of the Master. He said that an example had been set by Florence Nightingale and Edith Cavell which would never be forgotten, but which would always be an inspiration to those who went into the nursing profession. It was one of the highest of callings with its relation to the sick room, to suffering and relief. He trusted that the graduates would not only be successful in their work but that they would always remember the supreme attribute of kindness.

The Nightingale Pledge was then taken by the nurses before the Mayor following which the presentation of diplomas was made by Mr. J. G.

(Continued on page four)
