The copy filmed here has been reproduced thanks
to the generosity of:

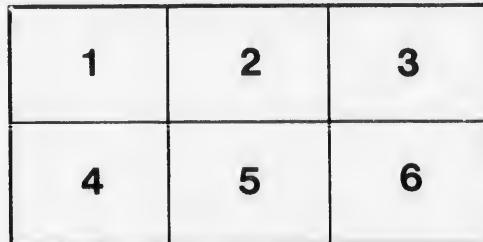

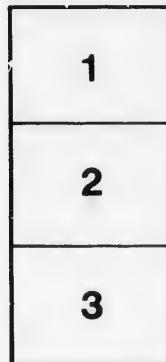

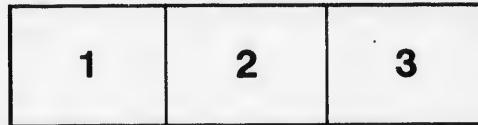

Library of the Public
Archives of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:

L'exemplaire filmé fut reproduit grâce à la
générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le
plus grand soin, compte tenu de la condition et
de la netteté de l'exemplaire filmé, et en
conformité avec les conditions du contrat de
filmage.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plat et en terminant soit par la
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plat, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par la
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
la dernière page qui comporte une telle
empreinte.

Un des symboles suivants apparaîtra sur la
dernière image de chaque microfiche, selon le
cas: le symbole → signifie "A SUIVRE", le
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaire. Les diagrammes suivants
illustrent la méthode.

REPORT
OF
THE SECRETARY OF THE TREASURY,
IN ANSWER TO

A resolution of the Senate calling for information in relation to the trade and commerce of the British American colonies with the United States and other countries since 1829.

FEBRUARY 6, 1851.

Ordered to be printed.

FEBRUARY 8, 1851.

Ordered that 2,000 additional copies be printed for the use of the Senate.

TREASURY DEPARTMENT, February 5, 1851.

SIR: In obedience to the resolution of the Senate of the 6th August last, requiring the Secretary of the Treasury to transmit any information he has or may obtain in relation to the trade and commerce of the British American colonies with the United States and other countries since 1829, I have the honor to transmit herewith tabular statements, compiled with great care from authentic and official sources, exhibiting the trade of the colonies with the United States, with each other, their trade with foreign countries, tonnage, the state of their fisheries, productions, &c.; also, a descriptive list of the light-houses in each colony.

Mr. J. D. Andrews, who thus ably complied with the instructions of this department, has also submitted a report embracing his views of the general commerce of the colonies, with a history of the legislation in relation to them, which is also transmitted.

I am, sir, very respectfully, your obedient servant,

THO. CORWIN,
Secretary of the Treasury.

Hon. WM. R. KING,

President pro tempore of the Senate.

LIST OF DOCUMENTS.

- F. Same for Nova Scotia.
- G. Same for New Brunswick.
- H. Same for Newfoundland.
- I. Same for Prince Edward Island.
- K. Statement of Lake trade, commerce, &c
- L. Miscellaneous returns.

A.

Report on the trade, commerce, and resources of the British North American colonies, made in pursuance of instructions from the Hon. Thomas Corwin, Secretary of the Treasury, by J. D. Andrews, United States consul, St. John, New Brunswick.

ST. JOHN, NEW BRUNSWICK, December 10, 1850.

SIR: I have had the honor, on several occasions, of calling the attention of the government to the extent and importance of the trade of the British North American colonies, and have endeavored to show the expediency of adopting such measures as would secure the most valuable portions of that trade to our citizens.

The proposition informally made by the Canadian government for reciprocal free trade to a certain extent, the recent changes in the navigation laws of Great Britain, and the movements in the Imperial Parliament relative to free trade, together with your instructions directing me to furnish you with some facts in relation to the British North American colonial trade and commerce, have induced me to present this question once more to the consideration of the Department of the Treasury at some length, in the hope that the information now presented may be useful to the country, and therefore satisfactory to the government.

In entering upon the consideration of this matter, it must, in the first place, be understood clearly that the intercourse between the United States and Great Britain, and that between the United States and the British North American colonies, have been conducted under regulations differing very much in their character and operations; and in order to understand the existing differences, it will be necessary to state the provisions of the several treaties, conventions, legislative enactments, proclamations, and orders in council, which have at various periods been made by the respective nations to regulate their commercial intercourse.

The commercial history of the British North American colonies may be said to commence with the peace of 1783. I will therefore proceed to trace down from that period, as concisely as possible, the various public measures which have been from time to time adopted, either to facilitate the intercourse, or, by way of retaliation, to oppose it, for its unjust or unfair restrictions.

The independence of the United States, which was formally acknowledged by the treaty of peace on the 30th November, 1782, still left Great Britain in possession of certain colonies at the northern extremity of America, and of several islands in the West Indies; and it immediately became an interesting question upon what footing the commercial intercourse between the United States and those colonies should be established.

Immediately after the conclusion of the preliminary articles of peace in November, 1782, Mr. Pitt, then Chancellor of the Exchequer, introduced into the House of Commons (March, 1783) a bill for the regulation of trade and intercourse between the people of Great Britain and of the United States, which, had it been adopted, would have laid a broad foundation for a perpetual peace and harmony between the two countries.

This bill, after declaring in the preamble that the thirteen United States of North America had lately been solemnly acknowledged by the King to be free, sovereign, and independent States, proceeded first to repeal all the statutes of regulation or prohibition of intercourse which had been theretofore enacted. It then recited that the ships and vessels of the people of the United States had, while they were British subjects, been admitted into the ports of Great Britain with all the privileges and advantages of British built ships; that, by the then existing regulations of Great Britain, foreigners, as aliens, were liable to various commercial restrictions, duties, and customs, at the ports of Great Britain, which had not been applicable to the inhabitants of the United States.

The following remarkable language is contained in the bill:

"And whereas it is highly expedient that the intercourse between Great Britain and the United States should be established on the most enlarged principles of reciprocal benefit to both countries, but, from the distance between Great Britain and America, it must be a considerable time before any convention or treaty for establishing and regulating the trade and intercourse between Great Britain and the United States of America upon a permanent foundation can be concluded: Now, for the purpose of making a temporary regulation of the commerce and intercourse between Great Britain and the said United States of America, and in order to evince the disposition of Great Britain to be on terms of the most perfect amity with the said United States of America, and in confidence of a like friendly disposition on the part of the said United States towards Great Britain," &c., &c.

The bill then proceeded with a clause to regulate the commercial intercourse between the United States and the island of Great Britain only, and it was precisely the same system of regulations which after a lapse of more than thirty years was established by the convention of 1815, and which is still in force.

With respect to the intercourse with the colonies, *that* was to be settled on principles equally liberal.

The following were the provisions of the proposed bill with respect to the colonies:

"*And be it further enacted,* That during the time aforesaid the ships and vessels of the subjects and citizens of the said United States shall be admitted into the ports of his Majesty's islands, colonies and plantations in America, with any merchandise or goods of the growth, produce and manufacture of the territories of the aforesaid United States, with liberty to export from his Majesty's islands, colonies or plantations in America, to the said territories of the said United States, any merchandise and goods whatsoever; and such merchandise and goods which shall be so imported into, or exported from the said British islands, colonies or plantations in America, shall be liable to the same duties and charges only as the same merchandise and goods should be subject to if they were the property of British natural-born subjects, and imported or exported in British-built ships or vessels, navigated by British seamen.

"*And be it further enacted,* That during all the time hereinbefore limited there shall be the same drawbacks, exemptions, and bounties on merchandise and goods exported from Great Britain into the territories of the said United States of America, as are allowed in the case of exporta-

tion to the islands, plantations or colonies now remaining or belonging to the crown of Great Britain in America."

The Earl of Shelburne was the minister who had concluded the peace; and William Pitt was a prominent member of his administration. 'The fragments of two great parties which had brought the British nation to the brink of ruin united upon this occasion to pull down the administration which had saved the remaining honor and resources of the nation. A vote of censure upon the peace was passed by the House of Commons; Lord Shelburne and Mr. Pitt resigned their offices, and a ministry succeeded, formed by the coalition of Lord North and Charles James Fox, which, short lived as it was, lasted long enough to demolish the whole system of friendly intercourse with America which Mr. Pitt's bill contemplated, and substituted in its place the arbitrary will of the crown.

The act of Parliament 22d George III, cap. 1, submitted the regulation of British commerce with the United States to the King's discretion. Under this act an order in council was made which placed the commerce of the United States with the British possessions in Europe on the ordinary footing of commerce with foreign nations, but restricted the trade between the United States and the British colonies to a very small number of articles, to be carried exclusively in British ships. This order was dated 2d July, 1783, and it was continued by annual acts of Parliament and orders in council till February, 1788, when the prohibition was established by a permanent statute, which took effect from the 2d of April of that year, and left the colonial ports to be opened or closed at the will of the King.

In 1794 Mr. Jay's treaty was concluded. This treaty opened an intercourse between the United States and all the British colonies in America; but with regard to the North American colonies this boon was connected with a condition which gave to the British authorities a control over the Indians within our territories. The boon and condition were unanimously rejected by the Senate of the United States.

In 1797 and '98, countervailing and discriminating duties were imposed by act of Parliament, followed by an export duty of four per cent. levied upon neutral American vessels, under the guise of defraying the expense of convoys.

"In 1801 the peace of Amiens was concluded; and in April, 1803, the war broke out afresh. The commercial articles of Mr. Jay's treaty expired the same year. In 1805 Great Britain renewed the attempt to destroy the commerce between the United States and the colonies of all the other European nations. In 1806 this attempt was disclaimed, and a treaty of commerce was signed by the plenipotentiaries of the two countries at London; but they declared that they could not agree upon any arrangement of commerce relating to the trade between the United States and the colonies, and none was made. In December, 1807, Congress passed the embargo law; and in June, 1808, the British government authorized the governors of all the North American provinces to open their ports to American vessels. 'A curious illustration of the policy of Great Britain, in the regulation of this interest, is the fact that she was compelled to abandon in war the interdict which she had promulgated in peace.' From the 2d July, 1783, till the American embargo of 1807, the vessels of the United States were excluded from the British colonial ports. So necessary to the colonies was this trade, that no sooner was it

interdicted on the part of the United States in British vessels, than they were obliged to open it to those of America."

By the convention of 1815, Great Britain obtained a relinquishment of our discriminating duties, and retained for herself, in the exclusion of the colonies from the arrangement of mutual commerce, all the advantages of the double or circuitous voyage from Great Britain to the colonies, from the colonies to the United States, and from the United States to Great Britain. The disastrous effects of this were speedily felt by the commercial and shipping interests of the United States.

Mr. Madison, in his message of the 31st December, 1816, communicated to Congress the fact that the regulations of Great Britain gave peculiar advantages to British vessels in comparison with ours, and especially the great advantage enjoyed by British vessels in the navigation between our ports and the British ports in Europe, on account of the circuitous voyages enjoyed by the one and not enjoyed by the other, and he insisted on the reasonableness of the rule of reciprocity applied to one branch of the commercial intercourse being made equally applicable to both branches.

In consequence Congress passed two acts, which were virtually, though not expressly, intended for the protection of our commerce with the British colonies; they were preparatory to the adoption of the navigation act of the 18th April, 1818, and the supplementary act of 15th May, 1820.

During the whole period intervening between the conclusion of the commercial convention of 1815, and the issue of the order in council closing the colonial ports, the United States made all proper efforts to arrange the question. "The government of the United States," says Mr. Clay, then Secretary of State, in his letter to Mr. Vaughan of the 11th October, 1826, "has always been anxious that the trade between them and the British colonies should be placed upon a liberal and equitable basis. There has not been a moment since the adoption of the present constitution when they were not willing to apply to it the principles of a fair reciprocity and equal competition; there has not been a time during the same period, when they have understood the British government to be prepared to adopt that principle. The struggle on the side of Great Britain was to maintain her monopoly, and on that of the United States to secure an equal participation in the trade and intercourse between them and the British colonies.

"Though there now existed a virtual non-intercourse between the United States and the British colonies, yet there did not cease to be a mutual exchange of their respective products; or rather the export trade of the United States of commodities destined for the use of the British colonies continued, because it was necessary for the colonies to have these articles. And while the colonies could not receive them directly, they could and did indirectly, through the neutral islands of St. Thomas and St. Bartholomew, each of which became a sort of entrepot for our commerce and that of the British colonies.

"A great portion of the export trade to the lower colonies—New Brunswick, Nova Scotia, Prince Edward Island and Cape Breton—owing to the great extent of seacoast, was carried on in an illegal manner by large numbers of small vessels engaged in that business; there was also a partial exchange of goods between the colonists and the Americans at the lines on the boundary of the St. Croix and Bay of Fundy, for the supply

of gypsum to American vessels, which at that time enjoyed the carrying trade of that article, and of domestic goods, to the southwestern portion of New Brunswick and Nova Scotia.. The import trade from the colonies was not so important to the United States as was the export trade to the colonies. It was apparent to all interested in the trade and commerce of the country that it would be much better, as it is to us at the present time, that this trade should be free, open and reciprocal, and not burdened with unnecessary charges to the consumer. But the impediments and charges to which it was subjected by this indirect, neutral transit, were to us a trifling evil compared with the disastrous effects of a system which subjected the opening of British ports to the ruinous restrictions of colonial and imperial monopolies."

The evils of the system which had thus far prevailed are well expressed in the letter of Mr. Adams to Mr. Rush, dated June 23, 1823: "The system or reciprocity with regard to navigation established by the treaty of Ghent between the United States and the British possessions in Europe, has substantially the acceptance of a proposal made to all nations with which the United States have commercial intercourse by the act of Congress of 3d March, 1815, conditionally repealing our discriminating duties. But it was expressly limited to the British possessions in Europe; and while accepting it, therefore, the British government resorted to the system of interdiction to the admission of our vessels into her American colonial ports. The direct trade between Great Britain was so interwoven with and dependent upon that between the United States and the colonies, that this convention would have been more than nugatory to the United States, if, while the European part of this intercourse was placed upon a footing of entire reciprocity, that between the United States and the colonies was monopolized by British navigators. This was practically felt from the moment that the convention took effect, and in the year 1816 several efforts were made to induce the British government to adjust this collision of interests by amicable negotiations."

"It deserves to be remembered," says the Hon. Caleb Cushing, "that the convention of 1815 was the first notable departure by Great Britain from the exclusiveness of her navigation laws, which Mr. Huskisson stated in Parliament was a matter of necessity." During Mr. Adams's administration unsuccessful attempts were made to secure to American vessels the benefits of the circuitous voyage, and the same privileges to American vessels in colonial ports as were awarded to colonial vessels in American ports.

In 1829 Mr. McLane, then our minister to the court of St. James, was instructed by President Jackson to open negotiations relative to the colonial trade. The proclamation issued by the President in November, 1830, and the order in council, November 6, 1830, give the substance of Mr. McLane's negotiations. Our ports of entry were immediately opened to British and British colonial vessels engaged in the colonial trade; and subsequently, the colonial vessels laden with colonial produce were allowed to discharge their cargoes at ports of delivery also—which proved a great benefit to colonial navigation, considering the craft engaged in the trade. As American vessels were not allowed to load and unload except at free ports, colonial vessels were restricted to ports of entry by a circular issued by Mr. Secretary Meredith in 1849, which is still in force.

You will doubtless remember that the arrangement made by Mr.

McLane in 1830 created much discussion and dissatisfaction in the chief commercial cities, and caused great alarm to the navigation interest. Whatever were the immediate effects of this arrangement on American interests with respect to colonial interests—more especially on the commercial interests of Nova Scotia and New Brunswick—I feel justified in saying it has accomplished as much for those provinces as any law ever passed by Great Britain for their benefit.

Although the North American commerce participated in the immense foreign trade of the empire, which gradually developed the ship building capacities of the colonies, its course was restricted on this continent, for reasons already given, until 1830, when it acquired a wider range, and entered on the enjoyment of great privileges by a joint participation in the foreign carrying trade between the United States and Great Britain and the British possessions in Europe and America.

The immediate practical effects of the convention of 1830 on the shipping interests of the country were soon made manifest by the rapid increase of British colonial ships in the American ports, and their successful competition in the carrying trade between England and the British possessions in Europe and America.

The chief causes of complaint on the part of the Americans were, that the benefits of the circuitous voyage which Mr. Adams and Mr. Madison contended we had a right to enjoy, had not been secured; that American vessels were rigidly confined to a few ports, while British vessels had free ingress and egress at our ports; and that while colonial produce was admitted into American ports on the same terms as that of "the most favored nations," American produce and manufactures were subjected to much higher duties than those of Great Britain.

The whole subject was presented to Congress in several elaborate statements and petitions from Portland, Bangor, Boston, and New Orleans, in 1842, and they received the prompt attention of the Committee on Commerce of the House of Representatives. The committee from the Chamber of Commerce of Boston, in their memorial, say: "The sudden and great increase of British tonnage subsequently to 1830, when the arrangement went into operation, cannot fail to be remarked. In six years from 1824 to 1830, its increase was less than twenty per cent.; in the ensuing six years, from 1830 to 1836, it was six hundred per cent. The whole increase of American tonnage engaged in foreign trade from 1824 to 1839 has been but fifty-two per cent., whilst that of British tonnage in our own ports has been more than four hundred and forty-seven per cent. in the same period."

"If such be the state of our direct trade, we have not much to console us in the comparative increase of British tonnage and our own in the whole of the colonial and provincial trade. The British tonnage cleared from our ports for the colonies and provinces in 1824, 1825, and 1826, was fifty-one thousand eight hundred tons; the American tonnage was four hundred and seventy-seven thousand one hundred tons. In 1837, 1838, and 1839, the clearance of British tonnage was one million two hundred and thirty-five thousand five hundred tons, and of American but one million one hundred and twenty-six thousand tons; the increase of British tonnage in our ports during this whole period being about ten times greater than of our own."

The petitioners state, that while the British vessels are allowed to visit

any port in the United States, American vessels are limited to a few ports, denominated "free ports," on the great extent of coast bordering on the eastern front of Canada; in Nova Scotia, New Brunswick, and Newfoundland; while British vessels are allowed to load at other places than free ports, thereby giving them a great advantage over American vessels. As the exports of the colony are bulky articles, and are not wholly shipped from free ports, the carrying trade is chiefly confined to the colonial vessels.

The following resolution was adopted by the legislature of Maine and forwarded to their representatives in Congress:

"Resolved, That the interests of the State of Maine require that all the ports in the provinces of Nova Scotia and New Brunswick, which are now or may hereafter be ports for the delivery and reception of cargoes for British vessels, be made ports of entry for the delivery and reception of cargoes for American vessels."

The annual returns to Congress prove the active competition in the chief Atlantic ports of the Union, between American and British ships, for a participation in the foreign and colonial trade. The petitions which have at different periods been presented to Congress on this question from the shipping interest, and the extract from the memorial of the Boston Board of Trade, are given to furnish an illustration of the feelings which have been entertained on the merits of that convention.

This brief history of the colonial policy of Great Britain I have hastily compiled from public documents and Mr. Cushing's very able report, in order that the basis of our commercial intercourse with the colonies, up to the recent changes in the navigation laws of Great Britain, might be well understood, and serve as a guide to future negotiations.

Heretofore the great contest between England and the United States, with reference to colonial trade, related chiefly to the trade between our country and the British West Indies, which, prior to 1840, was of great value and importance. During the eight years from 1832 to 1840, the aggregate value of imports into the West Indies was \$194,305,980, being a yearly average of \$24,288,242; while the aggregate value of exports during the same period was \$282,406,800, or an annual average of \$35,300,850. In the six years which followed, from 1840 to 1846, the value of imports fell to an average of \$20,200,000, and the exports diminished to somewhat less than \$25,000,000, annually. This diminution has since gone on from year to year, until the British West India trade has ceased to be regarded as of that importance which was formerly attached to it. On the other hand, the trade of the North American colonies since 1840 has advanced, especially with the United States; and the accompanying returns show clearly that this trade has greatly increased with every relaxation in the commercial policy of either country.

The colonial commercial intercourse between the United States, the West Indies, and the British North American colonies, however, after this diplomatic struggle of the two governments, commenced on a more liberal footing, and was the basis of all our trade and commerce with those colonies until January, 1850, when the United States navigation law of 1817 and the British navigation law of 1849 first took effect.

Although the arrangement made by Mr. McLane had an injurious effect for a short time on our navigation interests, and was obnoxious in

some of its results, as the American government had a right to expect that all the colonial ports would be opened to American vessels on the same liberal terms as American ports were open to colonial and British vessels, yet its influence on the manufacturing and agricultural interests have been of a highly satisfactory character; and the grand results, the contrast in the state of feeling, the difference in the amount of trade between 1830 and 1850, so favorable to the United States, prove the wisdom of Mr. McLane in effecting a settlement of a vexed and troublesome question, and the pressing necessity that existed for a basis, even if it were not as comprehensive as he desired. It was also a step forward in the march of commercial freedom—another tangible proof to the world, like the laws of 1817 and 1828, that “the policy of the United States, in relation to their commercial intercourse with other nations, is founded on principles of perfect equality and reciprocity. By the adoption of these principles, they have endeavored to relieve themselves from the discussions, discontents, and embarrassments inseparable from the imposition of burdensome discriminations.”

The British North American colonies have always yielded obedience to the imperial cabinet, and cheerfully submitted to its control in all fundamental points of their political, commercial, and domestic concerns; and it is reasonable to suppose that persons unacquainted with their local history would expect to find a general uniformity among them in the administration of all matters, especially of a commercial character. Such, however, has not been, nor is it the present condition of their commercial intercourse with the parent country and other parts of the world. During the early period of their history, while they were struggling with and combatting the adverse circumstances which are usually found in the pathway of pioneers, subject to no taxes except those of their own internal government and police, they depended as much upon the imperial treasury for the payment of their civil list, as they did upon its power for protection from an enemy. As their trade and commerce have increased, the receipts from land sales and duties on imports have proportionably increased, and have been latterly applied to the payment of their various local civil lists, under the supervision of officers appointed by the crown. The demands of the colonial on the imperial treasury have therefore gradually declined, until the revenues of Canada, New Brunswick, Nova Scotia, Newfoundland, and Prince Edward Island, are not only sufficient to defray the salaries of the governors and crown officers, but also to meet the ordinary appropriations for roads, bridges, schools, &c., &c. With the increase of their resources, there has also been an extension of their political privileges, and they now enjoy the right to make such disposition of their respective revenues as they may think most conducive to their interests.

As the receipts from the customs are the most valuable and most reliable resource, they have, except in a few instances where protective tariffs were passed, regulated each source of revenue in a manner best fitted to produce the greatest amount to the credit of their respective exchequers.

Until 1843, the colonial tariffs were of a discriminating character. British and colonial produce and manufactures were admitted at a lower rate of duty than foreign. Discriminating duties were abolished, however, in that year, by the following despatch of Lord Stanley, then Colonial Secretary, which is considered in the provinces as a very important state paper:

CIRCULAR.

DOWNING STREET, June 28, 1843.

SIR: I have to desire that you would call the attention of the legislature of the colony under your government to the following statements and suggestions:

The imposition of discriminating duties on goods imported into the British colonies, when discrimination is made for the protection of some branch of British or colonial industry, is an office of great difficulty. To the right discharge of it an intimate acquaintance with the commercial treaties and political relations between this kingdom and foreign States, is indispensable. To legislate on such a subject in ignorance of those treaties and relations, would be to render inevitable much serious practical error.

But from the nature of the case, it is impossible that this knowledge should be possessed in the requisite degree by the various local legislatures of the colonies of this kingdom. They have no means of knowing the state or objects of pending negotiations, nor even of ascertaining with absolute precision the terms of treaties actually concluded. If they legislate at all on these subjects, they must do so in ignorance of some facts which cannot be safely excluded from consideration.

Neither is it possible that forty distinct legislatures, having no means of mutual communication and concert, should act consistently with each other on such subjects. The local opinions or interests of each colony must dictate the laws of each; and the general code of the empire compiled from so many different sources, must be at the utmost variance with itself on a subject on which unanimity and consistency are indispensable. In such a state of the law, her Majesty's government could not negotiate or treat with confidence with any foreign State for commercial purposes; nor could they fulfil such treaties as might be made. Painful and injurious discussions with those States must arise, and perhaps indemnities and compensations have to be paid.

For these reasons, her Majesty's government decidedly object in principle to the assumption by the local legislatures of the office of imposing differential duties on goods imported into the respective colonies. Parliament having already prescribed the rules by which such duties are to be discriminated, with reference to the place of origin or of export, to Parliament alone the power of altering those rules must be reserved. The single exception of this general rule will occur in any cases in which her Majesty's government may have suggested to any local legislature the enactment of any such discriminating duties. If such cases should arise, the minister of the crown would be able to take the necessary measures for obtaining the subsequent sanction of Parliament for any such innovation.

You will therefore exercise all the legitimate influence of your office to prevent the introduction into the legislature of the colony under your government of any law by which duties may be imposed on goods in reference to their place of production, or to the place from which they may be exported. In the same way, you will exert yourself to prevent the introduction of any law imposing on refined sugar imported into the colony higher duties, in the case of sugar refined in this country, in bond, from foreign sugar, than in the case of sugar refined here from British colonial sugar.

If, unfortunately, your efforts should be unsuccessful, and if any such law should be presented for your acceptance, your duty will be to withhold your assent to it. From the discharge of that duty, however unpopular it may be, you will not shrink; for by declining to undertake it, you would only subject her Majesty's government and the colony itself to a still more serious inconvenience.

Her Majesty could not be advised to sanction any colonial law imposing discriminating duties which her Majesty's government had not previously recommended, or which Parliament has not expressly established, or enacting such duties on any terms which Parliament has not prescribed.

The disallowance of any such enactments would therefore be inevitable; and that measure would be attended with far more serious inconveniences than any which could result from your own refusal to accept them. I trust, however, that there is no good reason to anticipate or to provide against such a contingency.

I have the honor, &c.,

STANLEY.

The LIEUTENANT GOVERNOR

Of New Brunswick, &c., &c., &c.

This was confirmed by the following despatch from Earl Grey, present Colonial Secretary:

[No. 3.]

DOWNING STREET,
9th November, 1848.

SIR: Her Majesty's government have had under their consideration the act passed by the legislature of New Brunswick in the month of March last, imposing duties for raising a revenue; and I now transmit to you, for your information, the accompanying copy of a letter from the Board of Treasury to the Lords of the Committee of Privy Council for Trade, explaining the objections entertained to this law.

I have not considered it proper to advise her Majesty to disallow this act, as that step would occasion much inconvenience in New Brunswick; but I must direct you to withhold your assent to any future act continuing the differential duties of the present act, or making discrimination in any other respect between duties on the produce and manufactures of the United Kingdom, or of other British possessions abroad, and those on the produce and manufactures of foreign countries, unless you shall have obtained the express approval and authority of her Majesty's government.

I have, &c.,

GREY.

Lieut. Governor Sir E. HEAD, Bart., &c., &c., &c.

By a recent act of the Imperial Parliament, all the crown duties heretofore levied in the British North American colonies might be abolished by any colony that desired to exercise the power of enacting its own tariff of duties, subject only to the control of the Queen in council. All the North American colonies have already exercised the power thus granted; and the important change above referred to, combined with the abolition of discriminating duties, has altered their commercial position very materially.

American and other foreign manufactures are now admitted into the British North American colonies, and in many of the West India colonies,

on the same terms as British goods; yet the tariff of duties on imports in each colony varies, and is generally regulated according to the wants of the governments and the appropriations required for the internal improvements of the country. A copy of the tariff of each colony for the present year will be found under the appropriate head.

I presume it is scarcely necessary for me to observe that the people of the British North American colonies have hitherto depended as much upon the protective policy of the imperial government, and upon aid from the Imperial Parliament, to develop the resources of their country, as upon their own exertions. They now find themselves deprived of the former mode of support and encouragement; and with respect to the latter, it is questionable if in future that prop can be depended upon to any extent. No permanent injury, however, can result to the colonies from the change in the commercial policy of Great Britain: from the circumstance of their staple exports meeting in competition in the markets of Britain with foreign productions of a similar character, their trade will gradually conform to the change, and it will compel them to greater self-reliance, and to seek new channels for their commerce.

It will now become an interesting matter of inquiry to study the further progress and current of the colonial trade, under the free trade policy of the mother country.

The various statistical tables bearing on the colonial trade, which have been carefully selected and arranged with as much order as the time allowed, will, I hope, receive your attention as presenting many new and interesting commercial facts. Having been principally compiled from official data, they may be relied on as being as correct as can be procured, and as forming an authentic summary of the general trade and commerce of the British North American colonies. Many of the returns and statements were collected by me in pursuance of instructions from your predecessor, the Hon. Mr. Meredith, who was, I believe, the first Secretary of the Treasury who ordered a report on the trade and commerce of the colonies; to which have been added many valuable statements, reports, &c., agreeably to your instructions of October, 1850. It was conceived to be proper that the statements should be given not only in totals, values, and abstracts, but also in some cases in detail, that they may serve to furnish to all who take any interest in this matter, aid in forming a correct opinion of the general character and importance of the trade, and to enable the Department of the Treasury to have a basis for future reference.

Discrepancies will probably be noticed, and in some years a great difference between statements of the United States and those of the colonies. These differences are owing in a great degree to the uncertain and restricted acts of the two governments, the uncertainty in statements derived from returns of ad valorem duties, where values and not quantities are named, the low rates and different values given to similar products at the different custom-houses, and to the circumstance that the colonial fiscal year is closed in January, and that of the United States in June.

Custom-house returns are at the best only approximations of values. In this case it is so in a remarkable degree. They are even much under the real value, owing to the extended inland frontier, and for other causes already referred to. If twenty per cent. were added to the declared total value of the trade with this country, inland and by sea, it would not be too much, and under the circumstances would be only a fair estimate.

The following summary statements of the trade between the United States and the colonies for the years 1827, 1829, 1830, 1840, 1849, 1850, will afford only a general idea of that portion of their trade which will be more fully explained by the returns of each colony annexed.

While the convention of 1830, the abolition of discriminating duties, the great changes in the imperial tariff by the act of 1846, have all had a powerful and favorable influence on colonial trade, it has been prepared, by those changes, to meet the still greater revolutions in the new navigation laws of the imperial government.

The channels of trade cannot be changed in a day, and time has not elapsed to enable us to form a correct opinion as to the results of recent changes in the navigation laws, so opposite to those which have controlled for two centuries the trade and commerce of Great Britain and her colonies.

Many of the leading merchants in the colonies interested in navigation were strongly opposed to the change in the navigation laws; but so far the effect has not been prejudicial to colonial interests.

The leading exports of the colonies are, as has already been observed, of a bulky character, and the produce has usually been subject to high freights, as the competition was only between British and British colonial ships. The ports of St. John, New Brunswick, Quebec, and Halifax, have been visited this year by a comparatively large number of American and other foreign vessels, correct lists of which will be found in the appendix; some with cargoes, some in ballast, for cargoes of lumber, &c., to be freighted from the colonies to ports in Great Britain. The rates of freight, although lower than have usually been paid in former years, have, on the whole, been remunerative, and in consequence of increased competition the price of produce has proportionally advanced.

American vessels are admitted to registry in the British colonial ports, can sail from a colonial port to any other colonial port, or to Great Britain, with colonial or other produce, and can enter all colonial ports in places wherever there is a custom house officer, load and discharge cargo, but are not allowed to sail from one port to another port in the same colony, except in ballast.

It is well known that these colonies, particularly Canada and New Brunswick, possess facilities for ship building not surpassed by those of any other country. This is a consideration of some interest, since ships are beginning to be very properly considered articles of traffic. I have annexed copies of letters giving the particulars of ship building in the colonies. All the colonies, except Newfoundland, build annually a large number of ships for sale in the United Kingdom, returns of which are to be found herewith. These vessels may be considered articles of export, as the prices they produce, and the freights they earn in the voyage, serve to reduce the apparently large excess of the value of imports over the exports in the several colonies. It will be seen from this statement that the sea-going tonnage owned in the several colonies amounted in 1846 to four hundred thousand tons, and at the present time is estimated at four hundred and fifty thousand tons—a tonnage more than equalling that of Holland, and more than the tonnage of Prussia, Belgium, Norway, and Hamburg, united.

Statement of the tonnage of the colonies for several periods.

* Although official, is doctored as being too much.

In addition to the tonnage owned by the British North American colonies, it is worthy of remark, that on the 1st of July, 1847, there were on the registry of the different ports of the United Kingdom 1,717 vessels, of the burden of 548,327 tons, built in those colonies.

The proportion for each colony was as follows:

| | Vessels. | Tons. | Average size—tons. |
|------------------------------|----------|---------|--------------------|
| Canada - - - - | 326 | 154,930 | 476 |
| Nova Scotia - - - - | 439 | 103,319 | 245 |
| New Brunswick - - - - | 608 | 228,368 | 375 |
| Prince Edward Island - - - - | 311 | 56,079 | 180 |
| Newfoundland - - - - | 63 | 5,631 | 89 |

The only portion of the value of this marine supplied by the colonies, is, then, the labor and wood required in the construction.

I have to add, in relation to colonial tonnage, "that in 1846 the British North American colonies owned four sevenths of the vessels and three-fifths of the tonnage of all the colonies. When forty thousand seamen were employed in the colonial trade of the empire, twenty thousand five hundred men were engaged in the trade of these colonies; when 709,846 tons were employed in the British trade with their colonies, only 466,109 tons were employed in the same trade, including India."

The tonnage of all the British colonies in 1849 amounted to 8,188 vessels, measuring 658,157 tons.

In 1849, 2,279 vessels, of 886,696 tons, entered Great Britain from the British colonies, and 1,766 vessels of 668,087 tons cleared for the colonies from British ports.

The valuable and increasing trade by sea between the United States and the Atlantic colonies, Nova Scotia, New Brunswick, Newfoundland, and Prince Edward Island, is chiefly carried on, as the returns prove, in British vessels.* The number and tonnage of vessels engaged in the trade, although this is to be properly valued, is a more important consideration than the mere trade itself. This trade is a most important nursery for seamen. Colonial ships, commanded by colonial ship-masters, and manned by a colonial crew, are now seen in all parts of the world, and are the most active competitors with Americans when they meet in our own or in foreign ports. The character of colonial ships has greatly improved within a few years, and the ships, particularly those of St. John, N. B., and Quebec, are justly considered fine specimens of naval architecture.

The trade between the colonies, called the inter-colonial trade, returns of which are to be found with the statistical tables until 1848 and 1849, had to contend with unwise and unnecessary restrictions. Although the colonies had many interests in common, and such a good basis for a reciprocal trade, it was not estimated nor fostered—a neglect influenced undoubtedly by the external legislation to which they were subjected. Since 1848 there have been reciprocal tariffs between Canada, Nova Scotia, and New Brunswick, in the following articles, viz: animals, beef, pork, biscuit, bread, butter, cocoa paste, corn or grain of all kinds, flour, fish, fresh or salted, or pickled, fish-oil, furs or skins, the produce of fish,

* The trade with Canada chiefly in American vessels.

or creatures living in the sea, gypsum, horns, meat, poultry, plants, shrubs and trees, potatoes and vegetables of all kinds, seeds of all kinds, skins, pelts, furs or tails undressed, wood, tin, planks, boards, staves, timber and firewood.

This branch of the colonial trade is rapidly proving its importance, and will yearly increase under the influence of liberal legislation, as it is the policy and unquestionably the true interest of the colonies to have an interchange of their produce and manufactures on the most unrestricted terms. And in view of the character of colonial produce, their increasing commercial marine, and the great extent of seacoast, there will undoubtedly be, in a very few years, a profitable trade around the Bay of Fundy and Bay of Chaleur, as also by the great lakes, the river and Gulf of St. Lawrence.

The returns of imports into all the colonies in 1848 and 1849 are worthy your consideration, as showing the quantity and value of articles, the growth, produce, and manufacture of the United States actually consumed in the colonies and not re-exported.

In 1845-'6, under the railroad excitement in England and the stimulating prices for lumber, the imports from the United States and Great Britain were about twenty-five millions of dollars, which increased in 1847-'8, caused by the demand for breadstuffs, to twenty six millions of dollars.

These colonies enjoyed, up to 1846, a large import and export trade with Great Britain, and to some extent with the West Indies. Large quantities of wheat were imported into Canada, New Brunswick and Nova Scotia, there ground, and then shipped to England where, being of colonial manufacture, it was also treated as of colonial growth.

The potato blight in Ireland, and the change in the corn law in 1846, destroyed that branch of trade, about which there had been so much legislation.

Canada sent flour to England; Nova Scotia and New Brunswick sent flour to England; provisions, &c., to the West Indies. The imports from the United States into Nova Scotia increased up to 1847; and then fell off to the amount necessary for consumption—in 1840, £248,296; in 1841, £449,683. In 1841 £493,798 was exported to the West Indies; in 1849, £190,275 only, consisting of fish, lumber, &c.—solely the produce of the colony.

In 1840 New Brunswick imported from the United States £254,134; in 1847, £340,098, the largest amount ever imported from the United States in any one year, which fell off to £264,562 in 1849. In 1839 New Brunswick exported to the West Indies £110,003; in 1849, only £11,472; in 1846-'7 the exports to England were £760,646, including flour, &c.; in 1849, £463,814—the produce of the colony.

The direct open trade is now only commencing on a reciprocal basis, and if allowed to increase under the influence of wise laws it will soon prove its importance to the people on both sides of the boundary.

The total exports from the United States to the colonies in 1840 were \$6,100,501; of this amount \$5,895,966 was domestic produce, and \$204,535 was foreign produce. The year ending June, 1850, total exports \$9,549,035—\$7,658,291 domestic; \$1,790,744 foreign.

Total exports from Great Britain to the colonies in 1840, were \$15,385,166; in 1849, \$11,346,334.

The following will show the relative imports from Great Britain and the United States, and the total amount from all countries, in 1849.

Canada.

Canada, from its peculiar geographical position, participates in the advantages of a sea and inland navigation to a great extent. It has only two great ports for sea commerce, Quebec and Montreal; the former situated at the only direct outlet to the ocean for the produce of her immense interior. The sea commerce of Canada has been chiefly sustained by the contributions from the upper St. Lawrence. The sea and inland trade are, therefore, so interwoven that it will be unnecessary for me to make separate memoranda of their nature and extent.

The language of Charlevoix, spoken so far back as 1720, conveys a just idea of the advantageous position of Quebec:

"There is no other city besides this in the known world that can boast of a fresh water harbor one hundred and twenty leagues from the sea, and that is capable of containing one hundred ships of the line. It is certainly situated in the most navigable river in the universe."

Montreal, with a population of fifty thousand, is at the head of ocean navigation on the St. Lawrence, being about nine hundred miles from the Atlantic, one hundred and eighty miles above Quebec, and about ninety miles above tide water at Three Rivers—to which point there is a fall in the current of the river of about twelve or thirteen feet. The trade of the

lakes and upper St. Lawrence destined for shipment by sea is divided between Quebec and Montreal; the natural advantages of the former, and the natural and artificial advantages of the latter, make them fitting entrepôts of an extensive commerce during the most important season of the year.

At Montreal the artificial navigation of the St. Lawrence commences, of which a full statement as to cost, capacity, charges for the transportation of freight, &c., will be found under its appropriate head. A map of the same is annexed to this report.

Between Lake Ontario and Montreal—

| | | | | | |
|-------------------|--------------|-----------------|--------|----------|-----------------|
| The Lachine canal | is in length | $8\frac{1}{2}$ | miles. | 5 locks. | 45 feet. |
| Beauharnois | - | $11\frac{1}{2}$ | | 9 | $82\frac{1}{2}$ |
| Cornwall | - | $11\frac{1}{2}$ | | 7 | 48 |
| Tarrean's Point | - | $\frac{3}{4}$ | | 1 | 4 |
| Rapide Platte | - | 4 | | 2 | $11\frac{1}{2}$ |
| Point Iroquis | - | 3 | | 1 | 6 |
| The Jalops | - | 2 | | 2 | 8 |

Having a total length of 41 miles, 27 locks, and 205 feet ascent from ship navigation at Montreal to Lake Ontario. All these locks are at least two hundred feet long, and forty five feet wide, with nine feet depth of water. The canal one hundred and twenty feet wide on surface, eighty feet on bottom, ten feet deep in the levels.

Lakes Erie and Ontario are connected by the Welland canal, which has two outlets on Lake Erie; the upper being twenty miles above the lower one, and forty miles above Buffalo. It is often open, therefore, about three weeks before the ice has left Buffalo harbor. This canal in the shortest route is twenty eight miles long, and by the longer one about forty miles. It has twenty-nine locks, is at least one hundred and fifty feet long, twenty-six and a half feet wide, with nine and a half feet water on the mire sills, and the total ascent is three hundred and thirty feet. Size of canal forty-five feet wide on bottom, eighty-one feet on the surface, depth of water ten feet. Although there is no difference in the draught of water in the St. Lawrence and Welland canals, the size of the locks is much larger in the former, to enable ordinary steamers with paddle boxes and guards, for the transport of passengers, (or for towing freight vessels,) to pass from Lake Ontario and Montreal; whereas the great amount of lockage upon the Welland canal rendered it improbable that any class of steamers, except propellers, would use it. The locks in the Welland canal are, therefore, adapted to the usual and most profitable class of vessels for the western trade. A large class would not always get full freights; would be more expensive in disbursements; would involve a greater loss when idle in winter, and could not enter all the harbors in the upper lakes, or pass from Lake Erie to Lake Huron over the St. Clair flats, where there is less than nine feet water. A brig to fill the Welland canal locks can carry three thousand barrels of flour under deck, and a thousand barrels on deck; she will be twenty-six feet beam, and one hundred and thirty-eight feet over all. To fill the St. Lawrence canals she will be one hundred and seventy-nine feet long by forty four feet beam, and will cost about twelve thousand dollars. Running expenses two hundred and eighty dollars per month. Cost of fitting out and laying

up, two hundred dollars per annum. Running time from seven to eight months in the year. She can make twelve trips between Cleveland and Kingston per season, and about five trips between Cleveland and Quebec.

The St. Lawrence canal locks can carry greater freights than the Welland, although the extra length and width is chiefly for steamers. No sailing or freight craft with only nine feet draught of water would be built to take up the length or width of these locks.

From Montreal to Kingston, via the Ottawa and Rideau rivers.

The Rideau canal is a military work, connecting Kingston, *via* Bytown on the Ottawa, with Montreal. Kingston is situated at the northeastern extremity of Lake Ontario, and is a city of considerable trade and importance. Lake St. Lewis, on the St. Lawrence, is connected with the Lake of the Two Mountains by a lock of the same size as those upon the St. Lawrence canals, placed at the St. Ann's rapids, overcoming three and a half feet fall. This lock is about 16 miles above Lachine; from this point to Carlton is 28 miles, where the military canals of the imperial government commence. The rapids of the long Sault extend 12 miles from Carlton to Greenville, having in all a fall of about 60 feet, which is overcome by three canals—the Carlton, the Chat à Blondeau, and the Greenville canals—with twelve locks, all of which except three are 134 feet long, 33 feet wide, and 5 feet depth of water. The other three are only 108 feet long and 20 feet wide, with about the same depth of water.

These locks were built before it was determined to increase the size of the remainder. From Greenville there is a steamboat navigation for 60 miles upward to Bytown, where the Rideau canal commences, and follows the course of the river and lakes of that name to Kingston—the canal being 128 miles long, with 46 locks, and a total ascending and descending lockage of about 447 feet. The locks are 134 feet long, 33 feet wide, and with 5 feet depth of water. In consequence of the size of the three small locks of the Greenville canal, boats of more than 100 tons burden cannot pass from Montreal to Kingston by this route, while boats of 200 tons burden can pass through the Rideau canals. Since the St. Lawrence route was opened, there has been but little traffic on the Rideau route, it being chiefly in lumber descending to the Ottawa. Boats from the Champlain canal proceed to Bytown, by the Chambly, Lachine and Greenville routes, for lumber, and being American craft, convey the lumber direct to Troy. These boats carry about 60,000 feet superficial of sawed lumber, or 5,000 cubic feet pine timber. The freight is about \$6 per 1,000 feet from Bytown to Troy, including tolls and duties.

The Chambly canal connects Lake Champlain with the St. Lawrence by a canal from St. John to Chambly basin, 11½ miles long by 24 feet width; depth of water 6 feet; lockage 74 feet. Until the year 1848, when Canadian lumber first found a market upon the Hudson river, this work did not pay expenses. This canal is now being deepened so as to have 8 feet water, which will greatly increase the traffic.

It was proposed to connect Kingston with Lake Huron by the extension of the Rideau canal, by the bay of Quinte and the rivers Trent and Severn, Lake Simcoe, and the inland lakes north of Toronto and Cobourg. About \$310,000 have been spent in this project, but the original proposi-

tion has been abandoned, and the expenditure has been useful only for bringing out the lumber of the river Trent. A survey and estimate have also been made to connect lakes Huron and Superior by canal, and to lock past the Sault Ste. Marie. This canal would be less than a mile in length. The estimated cost \$225,000, including two locks, which would probably be of the largest size.

The Grand river has been improved with locks and dams for a distance of 40 miles, connecting the town of Brantford with the Welland canal at Dauville. There are eight locks, 116 to 146 feet in length, 32 feet in width, with 4 feet water and a rise of 76 feet.

The town of Perth, in the Bathurst district, is also connected with the Ridean canal by the improvement of the river Tay. There is also a canal called "Des Jardin," connecting Hamilton and Dundas, about 4 miles in length, which has lately been enlarged so as to extend lake navigation up to Dundas.

Imports and Exports.

The principal imports into Canada from Great Britain consist of the various manufactures of silk, wool, cotton, hemp, leather, iron, and all other metals; also of sugar, paper, soap, spirits, malt liquors, earthenware, glass, paints, oils, salt, coal, &c., &c. The principal exports from Canada to Great Britain are timber, sawed lumber, ashes, grain, flour, staves, furs and peltries, coarse grains, and new ships for sale. The articles imported from the United States of which Canada does not export a greater quantity back, are tobacco, sugar, molasses, maize, pork, coals, and salt; also American manufactures of cotton sheetings and shirtings, warp yarn, wadding, batting, plain and printed calicoes, sattinets, woolens, cassimeres, kerseys, leather manufactures, doeskins, machinery, paints, oils, edge tools, agricultural implements, and India rubber manufactures; also large quantities of tea, coffee, and other foreign productions, under the drawback law, consisting principally of sugars, cigars, dried fruits, wines, hides, and hardware. The general exports from Canada to the United States consist of lumber, wheat, flour, vegetables, seeds, ashes, wool, eggs, and coarse grains for distilling.

The character of Canadian exports and imports sea-borne has not changed materially for the last twenty years. There is an addition to the agricultural exports chiefly supplied by Upper Canada. The timber and lumber trade has heretofore been, and is at the present time, the source of the staple export. The immense forests are fitted to supply a demand to any extent, and the many years of active traffic in this article alone does not seem to cause any diminution in its production.

The quantity of wood goods furnished to the Quebec market in 1846, under the stimulus of the prices of the preceding years, exceeded thirty-seven millions of cubic feet of squared timber, and about two and one-quarter millions of pieces of standard deals, or upwards of sixty millions (board-measure) of sawed lumber, besides staves and lath-wood; the whole amounting, according to Quebec computation, to at least one million of ship tonnage. To this may be added four millions cubic feet that did not reach the market at Quebec that year, making a total of more than forty million feet in all, exclusive of sawed lumber, and a money value of

about six millions of dollars, for the lumber branch of Canadian commerce. The importance of this trade, viewed commercially, is obvious, from the number of persons employed in the manufacture and transport, and the tonnage required for its transportation.

The arrivals of sea going vessels at Montreal are about two hundred annually, or a little over fifty thousand tons; at Quebec they are about one thousand four hundred, with a tonnage of nearly half a million, which is greater than into any other Atlantic port, except New York.

There is also a growing trade in lumber with the United States, inland, which exceeded one hundred million superficial feet in 1849, (the greater portion of this quantity being supplied from the Canadian shores of Lakes Ontario and Erie;) also, one and a quarter million cubic feet of pine timber, and a large quantity of saw-logs, railroad ties, and ashes. According to the declared value at the custom-houses, the value of the products of the forest in 1849 exceeded seven hundred thousand dollars. This branch of new lake trade with Canada has greatly increased the present year.

The Hudson river is the chief market for the sawed lumber floated through the lakes. Three hundred million feet reached that river alone, through the canals, in 1847. Only fifty-six and a half million feet of the sawed lumber, and four hundred and eighty-nine thousand feet of pine timber, were the produce of other parts than those of the State of New York. It is probable that Canada now supplies one-third of the amount required for the Hudson river markets.

Michigan is the chief lumbering reserve of the western United States, but the domestic demand for lumber in that flourishing and productive section of the Union outstrips, I am informed, the supply of its own district, and will require not only the pine of northwestern Pennsylvania, but also much of that produced on the Canadian shores of Lake Erie, thus leaving the great market of the Hudson to be supplied from the State of New York and eastern Canada. With more capacious water communication between the Ottawa and Hudson rivers, and with improved channels for transportation, Canada pine, at reduced rates, would supplant a great portion of the present supply, substituting a superior for an inferior article, and relieving consumers from the disadvantages of high prices and a poorer commodity.

The communication with the lumber districts of eastern Canada, the chief route of which is the Ottawa, is by canal-boats and rafts running down the Ottawa to the St. Lawrence, from the St. Lawrence into Lake Champlain, by the Chamby canal and the river Richelieu; from thence into the Hudson, by the canal at Whitehall.

It is proposed to construct a canal on a large scale near Montreal, to unite the waters of Lake Champlain and the St. Lawrence: this, if carried out, will unquestionably prove to be of great benefit to the inland commerce generally, and the lumbering districts of eastern Canada. You can, however, judge of its merits and better appreciate its importance by the following extracts from a report of a committee (of which the Hon. R. H. Walworth was chairman) appointed by a meeting held at Troy, in July, 1849, of which meeting Major General Wool was president, to whom was referred the duty of visiting the site of this great undertaking, and an extract from a report made by the Montreal Board of Trade on the same subject, of which board Thomas Ryan, esq., is president:

"One source of revenue from the canal, anticipated by your committee, is the transportation of large quantities of coal from Pennsylvania, and other States situated upon our great western lakes, for the manufacture of iron, and the transportation of such iron for the use of the western States. It is well known that a very considerable region of country in northern New York is filled with the richest and most extensive beds of iron ore in the United States, or perhaps in the world. Many of these beds which have been opened, and are now being worked, are situated upon the very borders of Lake Champlain, or within a short distance from it. The present capabilities of the iron works in the vicinity of these mines, or on the shores of the lake, are about sixty thousand tons of iron annually; the production of which quantity of iron will require about one hundred and twenty thousand tons of coal. The future capability of these extensive mines for the production of ore, and the extent to which iron works may be erected in that region where water power is so abundant, are incalculable, and can only be limited by the wants of the country. The present price of coal at Erie is from one dollar fifty cents to two dollars per ton; and the estimated price of tonnage and tolls, supposing it to be the same in this as in the Welland canal, is about seventy-seven cents. All other expenses of transportation to points upon Lake Champlain would not exceed from seventy five to one hundred cents, making the price of this coal, when delivered on the shores of Lake Champlain, only from three dollars fifty cents to three dollars seventy-five cents per ton. This is much less than the coal can be obtained for from any other quarter, especially when the wood for the manufacture of charcoal shall have been cut off, as it must be in a very few years. And this canal, by opening a direct communication with the great western States and the fertile region of Upper Canada, will furnish a new and constantly increasing market for the iron of northern New York, and will supply return cargoes for the vessels which bring down the coal.

"Again, connected as this canal would be with the Ottawa, as well as other rivers which flow into the St. Lawrence, either above or below Montreal, the shores of which rivers are now lined with immense forests of the most valuable pine timber, it would bring to Lake Champlain, and through the Champlain canal to the Hudson river, the product of these forests, and will thus cheapen that species of lumber, which, from its scarcity, is now commanding exorbitant prices. This, of itself, it is believed, would for many years afford a very handsome revenue to the canal. A large branch of trade would also be opened with Newfoundland, Labrador, and Nova Scotia; for there is but little doubt that their fish, oil, gypsum, coal, &c., could be delivered on Lake Champlain, and even at Troy, at a less expense for transportation than the same articles are now delivered at these points by the way of Boston and New York. But when there is added to this the trade of northern Pennsylvania, from Lake Erie, the trade of Ohio, Michigan, Illinois, Indiana, Wisconsin, Iowa, Minnesota, and the fertile peninsula of Upper Canada; when it is considered that the lands now cultivated in this extensive region of country bear but a small proportion to the wild lands, and that such will be the gradual increase of production then that the Erie and Oswego canals, even when enlarged, will be totally inadequate to such increased commerce; by this single improvement, steamers and vessels from all the upper and western

lakes, as well as from the Gulf of St. Lawrence, can reach Burlington, Whitehall, and all the other ports on Lake Champlain, without breaking bulk. The flour, pork, beef, coal, and all the products of the West, can, by means of the railroads now in course of construction, be distributed in the interior, and also be landed at Boston, at a less expense, with less depreciation in value by transport, and in a shorter period, than by any other route."

To the city of New York, the construction of this work is of the greatest possible importance. With the Champlain canal of sixty-six miles to Troy, or seventy two miles to Albany, enlarged to the same size as the proposed canal, vessels from any western lake port could, without breaking bulk, discharge at the port of New York, and then could there reload with emigrants and merchandise direct for the West.

"From Lake Erie to New York, by the St. Lawrence and Lake Champlain, there would be about one hundred and ninety-four miles of canal navigation, with seven hundred and two feet lockage, against three hundred and sixty-three miles of canal, with six hundred and ninety-eight feet lockage, by way of the Erie canal. In the one case, there would be no transhipment from the lakes to New York, but a continuous water-communication, affording navigation for vessels of three hundred and fifty tons burden. In the other case, there would be two transhipments, and, by the present size of our canals, a water-communication navigable by boats of seventy-five tons only. It must also be borne in mind that vessels, in descending the St. Lawrence, need not be delayed by passing through the locks in that river, as loaded vessels may now descend the rapids in safety, and are only compelled to use the locks in the ascending voyages."

With reference to the eastern lumber trade, a large proportion comes from the St. Lawrence and its tributaries below Montreal, even from the district of Saguenay. From one establishment alone at River du Coup, eleven American craft were at one time this season receiving lumber for Lake Champlain; and during the past season, thirty-six vessels have already received cargoes for Troy from that place. Preparations are making for more extensive transactions in those districts.

The quantity of sawed stuff produced on the Ottawa and its tributaries is estimated at ninety-four millions superficial feet. Over and above this quantity, the deals cut below Montreal and Quebec, down to Matanee, are to be added; and these are, perhaps, one-third more—thus giving about one hundred and twenty five million superficial feet as the produce of mills on the Ottawa and along the St. Lawrence below Montreal.

I am informed that the importations from the upper St. Lawrence into Montreal for the four years ending 1848 exceeded its imports. The excess was as follows: two million barrels flour, four hundred and sixty-five thousand bushels wheat, and fifty-nine thousand three hundred and twenty-five barrels pork—leaving about five hundred thousand barrels flour, one hundred and sixteen thousand bushels wheat, and fifteen thousand barrels pork, for local annual consumption at Montreal and the lumber districts.

During the period that Canadian produce enjoyed a protection in the British markets, the trade of Canada had its outlet by the sea, Quebec and Montreal being the great depots. The changes in the commercial policy of the British empire, in the provincial and United States tariffs,

and the United States drawback law, have materially changed the current of the provincial trade, and have given a great impulse to the lake commerce of the colony. The Upper Canadian merchant now finds his interests advanced by visiting New York and Boston to purchase both foreign and domestic goods, thus diverting no inconsiderable portion of the Upper Canada trade from Montreal and Quebec.

The inland exports of Canada to the United States in 1848 were about three million dollars, of which amount two hundred and fifty thousand dollars was the value of produce shipped to New York for reshipment to Britain under the drawback law.

The inland tonnage of Canada is about 35,000 tons.

A cursory glance at the resources of Canada will impress the most casual observer with a profound sense of the influence she must soon exert over the general commerce of this continent. To her unsurpassed physical capabilities are added majestic internal improvements, reflecting credit on a government and people who projected and completed such admirable auxiliary pathways from the ocean to the interior to facilitate the transport of the products of the industry of her population from that interior to the markets of the world. If the sanguine anticipations of the Canadian Government and people are realized by the St. Lawrence becoming one of the great channels through which the vast supplies of merchandise required for the consumption of the population of the interior and far west will be carried, the revenue derivable from their canals, the tolls upon which it is in contemplation to reduce, will form a large item to the credit of the colonial exchequer. Vessels of three hundred tons burden, drawing nine feet of water, and carrying three thousand barrels of flour, may now take in their cargoes at Chicago, and, without breaking bulk, deliver them at Quebec, and return by the same route, laden with supplies of every description, for the consumption of the districts from which they started. Nearly twenty thousand tons of railroad iron imported into Quebec from Great Britain, at a low freight, in British vessels, on American account, have been forwarded by this route, in bond, in 1849, to Cleveland, Sandusky, and other places, at three to four dollars per ton—less cost of transport than it could have been forwarded by the Erie canal route. The average rate in 1850 between Montreal and Cleveland was thirty cents for flour down, and three dollars per ton of 2,240 pounds up.

I submit for your consideration copies of the two petitions transmitted by the Montreal Board of Trade to the imperial government, dated the one in August, 1846, and the other in December, 1848, as containing the views of the leading merchants, and of Canada generally, on the trade and navigation of the colony. From the elaborate statements contained in these documents you will observe that freights are usually much higher at Quebec and Montreal than at New York, and that this circumstance tends to divert a large proportion of the flour manufactured in Upper Canada, which is now forwarded in bond via Oswego to New York, for reshipment to England. British and colonial ships have enjoyed the carriage of the great exports from Canada for many years; and as wood, the chief export, has been protected in the British markets, the producer has had to pay a high freight outwards, which has been a profitable trade for the British navigation interests.

sea, have declined since 1840, while the inland trade between Canada and the United States has greatly increased. It occupies a prominent position, and is daily and hourly becoming of incalculable importance in the general industrial resources of both countries.

The map annexed to this report has been prepared by the chief commissioner of the Board of Works in Canada, and is an amended and improved copy of the plan prepared for the railway convention, held in Portland in July last, with reference to the European and North American railway. It is substantially correct, and particularly worthy the examination and careful study of those States bordering on the great lakes, which are especially interested in having a proper outlet for their surplus productions. This trade is now the great prize for which the Atlantic cities are contending. At present it has four outlets to the ocean—the river St. Lawrence, the Erie canal, the Champlain canal, the Ogdensburg and Boston and the Buffalo and Boston or New York railroad. To these the Erie and New York and Montreal and Portland railroads will soon be added. The relative positions of these routes and their communication with Europe is here shown, and an active and beneficial rivalry may be expected from these competing routes. But the great West can unquestionably afford a handsome support to them all; and that their relative advantages may be properly understood, I have annexed a statement of the cost of transporting wheat, flour, &c., by each route to the ocean.

In reference to the route by the St. Lawrence, I have to state that the trade between Quebec and Montreal and the ports around the Bay of Chaleur and Gulf of St. Lawrence is increasing, as is also that between those cities and the valley of the lakes and the St. Lawrence. American vessels descending the St. Lawrence are not allowed to pass the port of Montreal except by special permission, which is a serious inconvenience to the navigation interests of those States bordering on the lakes, which require the free use of this river without any restrictions whatever.

In 1849, 30 British vessels cleared for various ports on Lakes Champlain, Erie, and Michigan, of the burden of 3,400 tons; while in 1850 there were 46 vessels, of 5,286 tons:

| Ports. | 1849. | | 1850. | |
|--------------------------|----------|-------|---------|-------|
| | Vessels. | Tons. | Vessels | Tons. |
| To Cleveland, Ohio | 13 | 2,438 | 11 | 1,721 |
| Whitehall, New York.. | 13 | 672 | 15 | 1,167 |
| Chicago, Illinois..... | 1 | 703 | | |
| St. Albans, Vermont.... | 1 | 67 | | |
| Burlington...do... | 2 | 120 | 11 | 692 |
| Monroe, Michigan..... | | | 6 | 1,332 |
| Sandusky, Ohio..... | | | 1 | 112 |
| Vergennes, Vermont..... | | | 1 | 50 |
| | | | 3 | 212 |

It is not believed, if the St. Lawrence should be made free, that there will be any great change in any of the channels of trade now in successful operation. As the Atlantic ports are open at all seasons, and afford a ready market for the interchange of commodities, that branch of trade will still be sustained by liberal contributions from the west, and continue to increase, affording employment to the great artificial routes, whether the depots are at New York, Boston, or Portland. The free navigation of the great outlet for the lakes will develop new branches of commerce, and the trade, partaking in the rapid increase of the fertile portion of the globe drained by this river, will prove highly advantageous to the community at large, and contribute to afford traffic for the artificial routes. The accompanying lithograph shows complete profiles of the leading Canadian improvements, from Lake Erie to Montreal, and displays better than any written description the capacity and character of the mechanical works which characterize this magnificent artificial inland water communication.

The statistical statements in the appendix relating to the trade of Canada are very full; and as that branch of the colonial trade has already been referred to in the remarks on the trade of all the colonies, I do not deem it necessary to give in this part of the report any extended tables of the trade.

It is necessary, however, to a proper understanding and appreciation of the rapid rise and importance of the inland portions of the colonial trade, to state that the inland customs receipts in 1823 were first considered by the Canadian government as a part of the revenue of the colony, and amounted to the small sum of - - - - - \$3,660

| | | |
|---|-----------|---------|
| In 1830 chiefly from Lower Canadian ports | - - - - - | 31,010 |
| In 1840 do do do | - - - - - | 62,280 |
| In 1841 do do do | - - - - - | 751,028 |

The returns very recently received prove the trade of Canada for the year ending January 5, 1851, to be in a very active and prosperous condition:

| | | | |
|-----------------------------------|---|---|---------------|
| Imports by St. Lawrence, (by sea) | - | - | \$8, 540, 800 |
| Exports by St. Lawrence | - | - | 7, 474, 496 |
| Imports from the United States | - | - | \$7, 404, 800 |
| Exports to the United States | - | - | 5, 813, 500 |
| Imports by sea | - | - | \$8, 540, 800 |
| Imports from the United States | - | - | 7, 404, 800 |
| | | | 15, 945, 600 |
| Exports by St. Lawrence | - | - | \$7, 474, 496 |
| Exports to the United States | - | - | 5, 813, 500 |
| | | | 13, 287, 996 |

The total imports and exports of Canada, as also those to and from the United States, are greater than in any former year, and it is within the sum to place the total exports to all the colonies for the year ending January 5, 1851, at \$12,000,000.

The inland trade of Canada has had to contend with the restrictive and unnatural policy of prohibiting laws in common with the navigation and trade of the lower colonies. It has not only been cramped in its developments, but forced into expensive and unprofitable channels. From 1791 to 1842 there were a great number of acts passed by Parliament relating to the inland trade, which, with the colonial and United States tariffs, have checked an important branch of our internal trade, which the above returns prove to be of an important character.

Although several years have elapsed since Lord Stanly's despatch was first published and the United States drawback law was enacted, yet the inland trade is now only fairly opened, but can only go on increasing under these enactments and liberal course of policy on the part of both governments. The restrictive action of one government would curtail and check it, and it is worth the notice of the American and colonial governments that only low duties can be collected. From 12 to 20 per cent. may be considered high. Above these rates, smuggling would be profitable, and legitimate trade would be checked.

Of all the lower colonies, New Brunswick, as bordering on the State of Maine, and now more intimately connected with the lumbering interests of that State, claims a first and particular notice. A species of inland traffic exists between New Brunswick and Maine, on the upper St. John and on the St. Croix river, similar to that carried on between the people of Canada and the district of Niagara, mutually beneficial, and which has existed for many years. Since the ratification of the treaty of Washington, in 1842, which settled the northeastern boundary question, and which in its results has so fully sustained the wisdom of the negotiators, the trade of this country with the United States has greatly increased,

and a more intimate and friendly intercourse has been established between the two countries.

The country bordering on the upper waters of the St. John is covered with immense forests of the finest pine timber, which have been opened since 1842 to the use of the hardy lumberman, American as well as provincialist.

The annual value and quantity of lumber produced on the upper St. John, on territory owned by Maine and Massachusetts, and floated down that river, during the past five years, is estimated by an intelligent gentleman of Bangor, largely engaged in the lumbering business in Maine, to be as follows:

| | |
|---|-----------|
| 100,000 tons square timber, nearly all of which goes to Great Britain | \$600,000 |
| 10,000,000 feet of boards manufactured in the American territory, nearly all of which goes to the United States—value about \$8 | 80,000 |
| 4,000,000 clapboards for the United States market—value | 20,000 |
| | 700,000 |
| 3,000,000 shingles for United States market | 7,500 |

There are also cut, in addition to the above, a large quantity of logs in this territory owned by Massachusetts and Maine, which are manufactured in the vicinity of St. John and shipped to British and American ports as British lumber. In the manufacture and sale of American lumber there would undoubtedly be a great increase if it were admitted free into the United States, whether manufactured on colonial or American soil.

The staple exports of New Brunswick are timber and deals, to which may be added the produce of its fisheries, and of its mines and minerals, viz: bituminous coal, asphaltum, gypsum, grindstones, and manganese. Ship building is also carried on to a very considerable extent, as this province possesses very great facilities for the prosecution of that branch of business. The very full and reliable statements of the trade of this colony appended to this report, and the several details, will carry an approximate idea of its vast capabilities and probable future progress.

The exports of Nova Scotia are similar in character to those of New Brunswick, with the addition of agricultural products; and I need only direct your attention to the full reports on the fisheries, and other documents bearing on the resources of those colonies, to impress you with a sense of their value and importance. These provinces were comparatively unknown a few years ago, although occupying a prominent geographical position on the North American continent, and possessing a sea-coast greater in extent, considering their area, than any other countries in the world—sweeping as it does around the Bay of Fundy, along the Atlantic ocean, and around that great inland sea, the Gulf of St. Lawrence. No stranger can form an adequate conception of their commercial and maritime value. The more their capabilities are examined, the greater will be the appreciation in which their resources will be held.

The staple exports of Newfoundland are furnished by its extensive fisheries, to which there is very little addition except that of furs and skins, the former of which are obtained from Labrador, and the latter from its very important seal fisheries. The commerce of this island, until within

a period of about fifteen years, was principally directed to England, the Mediterranean, and South America. In 1827 its trade with the United States was absolutely nothing. In 1849 the imports from the United States were about one million dollars, whilst the exports thereto only amounted to seventy-eight thousand dollars. The gross amount of exports from this island in 1849 was valued at nearly \$4,000,000.

Prince Edward Island may be called an agricultural colony. Its exports consist principally of farm produce to Nova Scotia, Newfoundland, and New Brunswick, with some timber and deals to Great Britain, and the produce of its fisheries. The shores of this island swarm with fish, but the fisheries are not prosecuted with that vigor which might be anticipated from the admirable geographical position it occupies in the Gulf of St. Lawrence.

The preceding remarks having reference only to the general commercial resources of the colonies, I beg leave to call your attention to a special report on the mines and minerals which was prepared at my request for this report, and also to a brief report on the fisheries of the colonies, which will be found in the appendix.

Having examined the internal resources, and the trade with the United States and Great Britain, of the several provinces in detail, it will be more convenient and proper to consider the shipping and navigation interests and the general trade of all the colonies with all parts of the world at one view. I apprehend that the value and extent of this trade, the amount and large annual increase of their shipping, are not appreciated either in Great Britain or the United States.

The following quinquennial statements, compiled from parliamentary returns, exhibit the general trade and the inward and outward tonnage of all the British North American colonies with all parts of the world from 1827 to 1846 inclusive—a period marked by restricted and contradictory legislation, and within which such remarkable changes in the commercial systems occurred.

In 1826 Mr. Canning said, "to allow a foreign ship to enter colonial ports is a boon." On the 16th of July, 1827, an order in council was issued, declaring the colonial ports to be closed against American vessels. On the 19th of March, 1828, the President, by his proclamation, declared the trade between the United States and the British colonies to be suspended. In 1830 Mr. McLane's arrangement was effected. In 1843 the discriminating duties were abolished. In 1846 the corn laws were repealed.

It is well known that the imports of the colonies into Great Britain have, in former years, excluded those from the United States. The trade is now about equally divided, destined undoubtedly to a yearly increase from this country.

The exports of foreign merchandise are greater to the colonies than to any other country except to France, which only exceed those to the colonies by about one hundred thousand dollars. The total exports of domestic produce and manufactures—the true test of the value of the trade—to all the colonies for the year ending June, 1850, were greater than those to France, to Cuba and Brazil, united, and more than the total amount sent to Holland, Russia, Austria, Hayti, and Mexico.

Lake Commerce.

In pursuing my inquiries into the inland trade of Canada, my attention was imperceptibly drawn to a consideration of our own inland trade, so gradually intertwining with and forming the most extended ramifications with the different trading ports on the Canadian lake frontier—all contributing unitedly to the value and healthiness of our wonderful inland commerce.

The great difficulties of obtaining correct returns of our inland trade have been felt for many years; and as those difficulties multiply with the increase of population and trade, the evil cannot too soon be grappled with and remedied by the action of the general government. The great desideratum is a general system of arrangement for furnishing minute details of the imports and exports of goods, foreign as well as coastwise, exhibiting quality, quantity, and value; the entering and clearing of vessels, their country, tonnage, and crews, specifying the build or employment; periodical returns to the Executive under the specified forms; and of an inspector, whose duty it would be to itinerate the custom districts, and see that the general instructions were correctly carried out. No individual, except one with the same personal experience, can realize, as I have done, the necessity of a thorough remodelling of our lake-ports custom-houses. To one fact I deem it my duty specially to call your attention, viz: the practice in several inland ports for each collector, on retiring from office, to carry away with him the books and accounts, on the plea that, having paid for the stationery from his private funds, they are private property—the government not making any allowance for this item of public expenditure.

The following extracts from Colonel Abert's able report on the lake trade in 1847 will justify me in earnestly pressing this matter on your consideration: "Our revenue system gives us an exact knowledge of that portion of our productive industry which forms our foreign commerce; but the system has not been extended so as to obtain a knowledge of our internal trade and commerce. This immense amount of national resources and the vast measure of national strength has, as yet, been left—that is, a correct knowledge of it—to individual efforts and to accidental investigation; or, in other words, it is yet in want of some established system by which its details can be collected with the same reliable accuracy as those of our foreign commerce. Considering how essential this knowledge is to the forming of sound opinions of the fiscal or military power of a people, we think it will be readily admitted that a system

by which this knowledge shall be obtained cannot be too carefully established or too highly cherished."

If it is necessary to add more on this subject to such high authority, permit me to refer to the practice of European nations, particularly to that of Great Britain, whom neither expense nor labor deters from obtaining in every form correct statistical information of the industrial resources of all countries—a knowledge so necessary under wise legislation for constructing a basis for the advancement, the happiness, and wealth of a people.

The detailed statements herewith of the trade of Ogdensburg, Oswego, Buffalo, and other growing marts of lake commerce, will, I hope, present some new and interesting facts for the consideration of the government; and, while conveying an idea of the importance of those towns as depots of trade, will tend to convince the representatives in Congress of the necessity of liberal appropriations for the improvement and protection of the harbors along this extensive frontier.

In my sketch of the lake ports, I allude to the contraband traffic carried on in some, if not in all the custom-house districts, to and from Canada. At one period this traffic amounted to a large sum annually; of late it is considered to be more limited in its extent. But when the great extent of our frontier is considered, as well as the limited number of officers employed to watch over it, and that high duties are exacted on each side of the boundary line, it is evident to the most casual observer that, taking into consideration the almost multitudinous increase yearly of population, an army of custom-house officers would be insufficient to check its progress or curtail its increase. It therefore becomes a matter for the most serious consideration, whether prompt and effective measures should not be adopted, either by arrangements between the two governments or by other means, to check the demoralizing traffic, and remedy the evils to which it naturally gives rise. I have procured and annexed copies of the forms used in the intercolonial trade of the British colonies, and supplied by the government to the masters of their coasting vessels. It enables the coasters to run in and out of harbor at all hours—a great saving of time to them in the short season of navigation in these northern latitudes. The plan is simple and efficient. In a book the master of each coaster enters his cargo, inwards and outwards, and once a month, as an opportunity enables him to do so, he submits the same under oath to the collector of the port from which he trades. Every facility is thus offered for the transit of merchandise and the attainment of correct statistical details. It occurred to me that a plan somewhat analogous might be devised to meet the requirements of our lake coasting marine, so long a subject of vexation as regards the statistics of that rapidly increasing trade.

This lake commerce, floating along a line of coast of nearly five thousand miles, (including Lake Champlain,) three thousand miles of which are American and two thousand miles Canadian, employing one hundred and seventy thousand tons of American shipping and ten thousand seamen, or an aggregate of American and British Lake tonnage of two hundred and five thousand, and about thirteen thousand men, presents the most remarkable example of the inland resources of this continent; and may be said, as to its rise and progress, to be unparalleled in any era, or in any other quarter of the globe. This wonderful section of our country, unknown in a commercial point of view a few years ago, is now the land

of promise to vast masses of emigrants from many countries, and, by its productive power, creates an amount of wealth alike beyond the calculations of the political economist and the foresight of the statesman; none can form an estimate of the extent to which such commerce may be increased. If we view it, stretching from the Gulf of St. Lawrence to the extreme verge of Lake Superior, uncontrolled, unfettered, and unrestricted, we may anticipate the period when it will rival the commerce of Britain, as Great Britain has rivalled and overleaped the commerce of Venice, of Holland, and of Portugal.

Concluding remarks.

The population of all the North American colonies now exceeds two millions of souls. As a people, they are intelligent, industrious, and enterprising, and if permitted fully to exercise self government, would soon assume an equality in commercial activity with the citizens of the United States and Great Britain. Occupying a most extensive country, of an area of nearly five hundred thousand square miles, stretching from the 42d to the 50th degree of north latitude, abounding in forests of the finest timber and minerals of great value, and with a soil fitted to afford exhaustless supplies of food to man; a country, moreover, blessed with a healthy and invigorating climate, favored with unparalleled facilities for sea, river, and lake navigation, watered throughout by streams which furnish an unlimited amount of water-power, and are stocked with the most valuable descriptions of fish; bordered by a seacoast indented with bays and admirable harbors, which are open to the most valuable sea-fisheries in the world;—possessing such superabundant resources, and sustained and stimulated by an energy of character which they have inherited with us from a common source, these colonists are destined to become a great and flourishing people, and to exercise no mean influence on the interests of our northern continent.

It is a question of serious consideration to our own statesmen what relation these colonies shall hereafter have with this country; whether their prosperity shall become identified with our own by the reciprocal exchange of mutual benefits, or whether the barriers between the two countries, now partially removed, shall be rebuilt and strengthened.

The Canadian government has proposed to our own to establish a reciprocal free trade with us in certain articles, the natural products of both countries. It remains with the American government to determine whether the leading principle of Mr. Pitt's celebrated bill of "equal and honest reciprocity," after having been buried for nearly three quarters of a century under the accumulated rubbish of narrow and selfish enactments, shall become resuscitated, and form the basis of a more liberal legislation. I cannot refrain from expressing my convictions that this measure recommends itself strongly to American interests and magnanimity. It is true that objections against reciprocity with Canada have been urged from sources which entitle them to high consideration; but it is believed, that while the advantages to Canada will be immediate, the disadvantage to us, if any, will be local and temporary, and will be wholly counterbalanced by ultimate benefits. It is a measure, moreover, which has once received the sanction of the popular branch of our na-

tional legislature, and has been advocated in past years by our most distinguished statesmen of both political parties.

The North American colonies are the most natural foreign outlets for American manufactures and the products of other countries, purchased by American merchants with the produce of our own labor. These colonies are geographically united with the United States, and geographically separated from all other countries. Whoever examines the position of these countries, with respect to each other, must be convinced that there is a physical adaptation of the surface of the northern continent to a commercial union of the people inhabiting it. It is impossible to erect sufficient barriers to illegal traffic where nature has created not only open roads and by-paths, but has plainly marked out great leading highways for an unrestricted commerce.

It cannot be denied that a prominent source of the prosperity of the United States has been the existence of an unrestricted commerce between the people of the separate sovereignties. What State would now endure the least restriction upon commercial intercourse with a neighboring State? With the conclusive example before us of the benefits of reciprocity with our sister States, why should we deny ourselves equal advantages from a freer intercourse with our colonial neighbors?

It is acknowledged by political economists that the home trade of a country, as it is to a considerable extent freed from the taxes for transportation and commissions to merchants, is vastly more important to a country than the foreign trade.

The American domestic trade has been estimated, upon good authority, as high as \$92 50 for each individual of our population, while the foreign trade is in the ratio of only \$7 50 for each individual. The trade with the colonies, if unrestricted, would partake of the character and advantages of a home trade. There is a peculiar adaptedness in American manufactures and products for colonial consumption, as they are suited for a people having the same necessities and personal and domestic habits as our own. Our mechanical and farming tools, our cotton and woollen fabrics, our stoves and castings for machinery, supply the wants of the colonists better than those from any other country could do.

While the colonies, having a sparse population and a want of surplus capital, have made comparatively little progress in manufactures—especially those of textile fabrics—we have our establishments already erected, and have the skill and capital to direct and employ them. The returns submitted show that of our exports of domestic manufactures, a larger amount and greater variety is sent to the colonies than to any other country. The exports to Canada alone, in 1850, were equal to the whole amount exported to Sweden, Prussia, Holland, Portugal, and Mexico, united.

It will be seen that the trade of the United States with the colonies has increased to a surprising extent since 1830, and particularly since 1846, while that of the colonies with Great Britain has proportionally declined since discriminating duties in favor of British manufactures have been abolished.

The colonial merchants have advantages in the trade with our great Atlantic cities, which, if proper facilities are afforded, will enlarge the trade to the whole extent of their means of purchasing and paying for goods. It is well known that, thirty or forty years ago, the merchants in

all our small cities on the seaboard imported their goods, by orders, directly from England, the West Indies, and other foreign countries. They have ceased to import their goods directly from England, and now buy in the great cities New York, Philadelphia, Boston, &c. Thus the great marts have increased while the smaller cities have proportionally declined. The same causes which have changed the course of trade in our smaller cities, lead the colonial merchants to the great American markets. Instead of obtaining large stocks, by orders, from England, as they have formerly done, waiting several months for the completion of their orders, and being exposed at the same time to the risk of buying unsaleable stocks, they find it greatly to their advantage to go to the great American cities, where there are large assortments of goods. They can select goods by personal inspection, which are certain to sell. They buy no larger stocks than they can readily dispose of, and in a few days after purchase have the goods upon their own shelves. Thus they have quick sales and certain profits. But the power of the colonist to consume our manufactures and merchandise depends upon his power to sell or export his own products. He must find it for his advantage to sell as well as to buy. If he has to contend against high American duties, he not only has his capacity to purchase of us diminished by the whole amount he pays for duties, but is driven by our restrictive policy to a more favorable market. If we would retain that portion of the trade of the colonies which we now possess, we must give them facilities for selling as well as buying in our markets. We must encourage the most advantageous trade to all parties—that which approaches nearest to a simple barter.

The following extract from a petition of merchants and traders, of the State and city of New York, numerously and most respectfully signed, praying for the free admission into the United States of Canadian products, illustrates some of the evil effects which have followed from the present restrictions :

"It is found that the present duty of twenty per cent. amounts to a prohibition. The debenture and warehousing systems applied to imports from Canada are likewise found too cumbrous and expensive to be effective; and the trade is thrown into a state of much embarrassment and difficulty from the fact that the merchants of Canada have no other medium for their purchases here than their bank drafts, specie, or their equivalents, which has already, even under their severe restrictions to the trade, caused such a drain of specie from their banks as to compel them to close their doors against all further accommodation, to the serious injury of those of our merchants who have been induced to cultivate this otherwise promising connexion."

The system of reciprocity proposed, although a free trade measure, is deprived of the most obnoxious features of a transatlantic free trade. The American protective policy is defended mainly upon the ground that we should be protected against the advantages which the European manufacturer has, in abundant and cheap capital, and in labor employed at half the price of our own; and that we should be relieved from the fluctuations of foreign trade. None of these reasons will apply for protection against colonial producers or manufacturers. The advantage of abundant capital is with us. The prices of labor in the colonies are very nearly, if not quite as high, as in districts similarly situated in this country. The protection which many of our manufactures want, and particularly those of

the coarser cotton fabrics, is precisely that which this measure would effect, and which the free trade policy of England is designed to accomplish for that country—free outlets for our surplus products.

A free trade with the colonies would be subject to none of the fluctuations of a foreign trade. As Mr. Colwell remarks in his able pamphlet on the relative importance of foreign and domestic trade, "Those people who supply their neighbors by a varied industry with all they want, know very precisely what quantity will supply these wants, and also the special qualities required. The competition which springs up in these circumstances is fully known and understood, so that it operates, in the increase of quantities and reduction of prices, not by jerks and great fluctuations, but gradually. Those who are forced to yield to this competition are enabled to withdraw without being wholly ruined, as frequently happens, from foreign competition. Between those engaged in those varied employments mutual exchanges may take place to the full extent of their power of production; there need be no limit but the limit of human effort, and they are in circumstances to study their mutual wants and comforts."

It is urged, as an objection to the proposed reciprocal free trade, that the American wheat-grower who is taxed heavily to pay the expenses of our government, will have to contend on unequal terms with the Canadian, who has comparatively light taxes to pay; in other words, that for this reason the American needs protection against the Canadian farmer.

But when we produce more than we consume, there is no need of protection. The surplus of production thrown upon the markets of the world establishes the price of all consumed. Canada and the United States export a surplus of wheat to the same foreign market. The prices at Mark-lane, to a great extent, fix the prices of the American market.

The wheat-growers of the United States can suffer but little, if any, by Canadian competition in our own market. We have already given the Canadians the privilege of competing with us in the markets of the world, by opening the American canals, railroads, and ports for their exports, under the drawback law of 1846.

The advantages which the Canadian derives from exemption from high American taxes are comparatively slight. The average of Canadian duties is $12\frac{1}{2}$ per cent. The average of American duties is $23\frac{1}{2}$ per cent. If the foreign trade of this country is only \$7 50 to each individual of our population, supposing the foreign trade of Canada is the same, the advantage which the Canadians have in their low duties is less than a dollar for each individual of their population.

In considering large commercial questions, it is unworthy of a great nation to enter into petty calculations of the advantages which it gives and takes. The broad views which should govern nations in their mutual arrangements are well expressed by Hon. Rufus King, in his celebrated speech on the navigation act in 1818: "As all nations have equal rights, and each may claim equal advantages in its intercourse with others, the true theory of international commerce is one of equality and of reciprocal benefits. This theory gives to enterprise, to skill and to capital, their great and natural advantages. Any other scheme is artificial; and so far as it aims at advantages over those who adhere to the open system, it aims at profit at the expense of natural justice."

The loss of revenue to the United States is adduced as another objec-

tion to reciprocal free trade. The revenue derived from articles imported from Canada similar to those which it is proposed to admit free, in the year ending June 30, 1850, was less than \$500,000. If a retaliatory course is pursued by Canada, and the old system of discriminating duties is restored, which would be the probable consequence of our refusal to grant reciprocity, our importing as well as exporting trade with Canada will be materially diminished and the revenue cut off without our receiving any equivalent. If the establishment of a more liberal system adds to the prosperity of our own people, and gives better markets to our manufactures, it will increase our production, and enlarge our power to import from foreign countries, and to pay high duties on imports, which duties at the same time encourage our own infant manufactures. It may therefore be doubted whether any loss of revenue will ultimately ensue from reciprocity. When we reflect that the proposed arrangement will induce the Canadians to purchase largely in our Atlantic cities the foreign luxuries which pay the highest rates of duty, it seems more probable that for \$500,000 in revenue lost at the custom-houses on the lines, we shall receive a million at New York and Boston.

It is said that the proposed measure of reciprocity is too limited in its application, and is particularly objectionable from not embracing manufactures. It must be considered that the colonies take as many of our manufactures now as they can consume and pay for, and if we give them facilities for selling their own products without heavy duties and cumbersome restrictions, they will improve these facilities by buying more largely. As the colonies pay for the expenses of their governments principally by duties on imports, they are compelled to continue the already moderate duties on those articles which give them their principal revenue. American manufactures being admitted into their ports on the same terms as those of any other country, including England, we have the same advantages as our principal competitor; although if American manufactures were included in the reciprocity bill, there might be some increase in their colonial consumption, it would be inexpedient to urge such a modification of the bill as would seriously impair the colonial revenues. Although the establishment of reciprocity with Canada alone has been most prominently urged, there seems to be no reason why the arrangement should not be extended to the lower colonies, particularly New Brunswick and Nova Scotia. On the contrary, it is believed that a reciprocal free trade with these provinces will be of great value to this country. It will be seen by the statement given below that the lower colonies furnish a market for our breadstuffs next in importance and nearly equal to Brazil, and that the value of the exports of breadstuffs to these colonies for the last year was nearly equal to the whole value of breadstuffs imported from Canada. In the lower provinces there are revenue duties on flour varying from 25 to 50 cents per barrel. Within the last year arrangements have been made by Canada with three of the lower provinces for a free interchange of their natural productions. The experience of the last season has induced persons fully competent to judge in commercial matters to express the opinion, that a very large trade will be diverted to those provinces from New York unless the present restrictions are removed; for the vessels which can advantageously take flour from Canada to the lower provinces under the present free trade arrangement, will carry back sugar, molasses, and

the heavy foreign commodities, which they have for the last few years purchased in New York and Boston.

It would not be unreasonable on the part of our government to demand, as the conditions of reciprocity with the lower provinces, that we should have the free navigation of the river St. John and other large rivers in New Brunswick; that the export duty upon lumber cut on lands owned by Maine and Massachusetts on the head-waters of the St. John, and floated down that river to the sea, should be abolished; and that our citizens should have the right to enjoy freely, in common with British subjects, the sea and coast fisheries of Nova Scotia and New Brunswick. As a consideration for the advantages which we may give to the Canadians by yielding reciprocal free trade, it is proposed by their own government to grant to us the free navigation of the St. Lawrence. That this is considered by the great wheat producing population of the Northwest an equivalent for the disadvantages of Canadian competition, may be inferred from the petitions, numerously signed, which have been presented from Michigan, Wisconsin, Indiana, northern Ohio, and New York, praying Congress to devise some measures to open the navigation of the St. Lawrence to the shipping of the lakes. The importance of this navigation has been acknowledged by our government in the negotiations which have taken place for the purpose of securing it.

The great lakes are, for commercial purposes, but an expansion of this

mighty river. It is the main artery to the heart of the North American continent. As Guyot remarks in his Physical Geography: "While the winding course of the Mississippi is 3,000 miles, its basin covers only 8 to 900,000 square miles. At the side of the Mississippi, the St. Lawrence has a course of 1,800 miles, and a basin of nearly 1,000,000 square miles." This river is the natural outlet of Michigan, a portion of Wisconsin, Illinois, and Indiana, of northern Ohio, of northern Pennsylvania, of northern and western New York, and of the westerly part of Vermont—a district comprising the principal portion of the wheat-growing region of the United States. The present population of this valley, including Canada, is at least 4,000,000. It appears from the able report of Mr. Buel, of Michigan, on the free navigation of the St. Lawrence, that the commerce in wheat in this valley rose from 2,780,000 bushels in 1841, to 10,688,564 bushels in 1847: at the rate of increase of 17 per cent. per annum, which is thus shown, the net value of this commerce in 1857 would be over \$170,000,000.

We must not overlook the extraordinary fact that this wonderful river runs almost upon a line of the great circle of the globe upon which is placed the largest population of the whole world, that of Asia and Europe, and the great food-producing region of America, and that upon this line is the shortest possible distance between the great centres of Asiatic and European population. Notwithstanding the false impressions as to distances which are given by the flat charts on Mercator's projection, the navigation from the heart of America to Europe is shorter by this river than by any other route. I quote from Mr. Keefer's able essay on the canals of Canada the following statement as to the approximative sailing distances to Liverpool from the great rivals in the western trade, Quebec, New York, and New Orleans:

| | | | | |
|--|---|---|---|--------------|
| To Liverpool from New Orleans | - | - | - | 5,300 miles. |
| Do do New York | - | - | - | 3,475 " |
| Do do Quebec by St. Paul's | - | - | - | 3,300 " |
| Do do Quebec by the straits of Bellisle and north of Ireland | - | - | - | 3,000 " |

The position of this route with respect to climate and latitude, although at first view a serious objection, has important advantages. Pork, bacon, lard, tobacco, and flour, are injured by passing through warm climates. It is therefore predicted that many of the products of the Mississippi valley would seek this route for shipment to Europe.

Those interested in the commerce of the lakes desire the free navigation of the St. Lawrence, to provide constant employment for their shipping throughout the year. During the long winter, when the navigable waters of the interior are bound up with the frosts and snows of a northern winter, the vast capital employed in lake tonnage is idle. If the St. Lawrence were made free, many of the ships, with their crews, engaged during the summer in inland commerce, would seek the ocean and gulf navigation, and the West India trade, for which they are well fitted.

With regard to the general importance to us of this navigation, I cannot better express my views than by again quoting the language of Mr. Buel in the report before mentioned: "We cannot overlook the important fact that the free navigation of the St. Lawrence would in effect, for commercial purposes, add three thousand miles to our ocean coast. It

would convert the lakes into great ocean inlets and bays, and their ports into ocean harbors. Whitehall, Burlington, Oswego, Buffalo, Cleveland, Detroit, Milwaukee, Chicago, and all our lake towns and cities, would be substantially upon the ocean. They could thus carry on a direct export and import trade with Liverpool, with China, or any remote country of the globe which may be accessible from the ocean. It would open their valuable timber forests and enable them to send ships, as well as cargoes, for sale, to the English marts, or those of any other country by whose navigation laws it might be permitted. Such a change in geographical position could hardly fail to produce a great revolution in the commerce of the Northwest, not by way of diverting it seriously from its accustomed channels, but by opening new fields of enterprise, stimulating new industry, and giving new employment to labor. No apprehension need be entertained that existing artificial channels would not continue to be taxed for transportation, as now, to the extent of their capacity for public use and advantage. We have already shown the probable future increase of our lake commerce; and all apprehension like that suggested should be dispelled, when it is also considered that the population of the Northwest alone, estimating by approved principles of increase as applicable to that particular and growing region, will, in the lapse of half a century, be not far from thirty millions, or several millions greater than the present population of the entire Union."

From the considerations above suggested, it is believed that the peaceful acquisition of this important navigation will more than compensate for all the partial evils which might follow from reciprocal free trade with Canada.

We must bear in mind that the incitements of public sentiment in Canada render it probable that the consequence of our refusal to reciprocate the liberal policy of the Canadian government, would be the immediate adoption of retaliatory measures. The reimposition of differential duties against American manufacturers already advocated by the merchants of Montreal and Quebec, and strongly desired by the manufacturers of England, would be one act of retaliation; another one probably would be the closing up of all the Canadian canals to American vessels, which the returns submitted show are now extensively and profitably used by our lake commerce. The amount of tolls forms so insignificant a portion of the Canadian revenue, that the loss would not be felt.

On the other hand the Northwest will be demanding the enforcement of their "*natural right*" to the navigation of the St. Lawrence. Thus the bonds of peace and good feeling cemented within the last few years will be sundered. The relations between border nations cannot be those of indifference. They must be either friends or foes; and if a spirit of mutual vindictiveness is aroused, the opportunities for actual aggressions will be only too easy and frequent.

A liberal policy on the part of our government will avert these evils, and perpetuate an alliance suggested by nature and favored by our common origin and language. This policy is recommended upon higher grounds than those of immediate or selfish interest. It is in harmony with the enlarged commercial ideas of the present age, and with that catholic spirit which modern mechanical science is extending by annihilating space, time, and prejudice, in the intercourse of distant and once hostile nations. Whatever may be its local and temporary effects, it will enlarge

the circle of human happiness. Under its influence, the noble rivalry of industrial activity will take the place of mutual aggressions and the possible strife of arms. The prosperity of one country will overflow and intermingle with that of the other. Though under different governments, we shall be one people, laboring hand in hand to accomplish the high destiny of the North American continent.

I have the honor to be, your obedient servant,

I. D. ANDREWS.

U. S. Consul,

The Hon. THOMAS CORWIN,
Secretary of the Treasury, Washington.

APPENDIX.

B.

The British North American Fisheries.

The extent and value of the fisheries on the Grand Bank of Newfoundland, on the shores of Newfoundland, Nova Scotia and Cape Breton, New Brunswick, and within the Gulf of St. Lawrence, have long been known and highly appreciated.

These fisheries are now prosecuted exclusively by citizens of the United States, by citizens of France, and by subjects of Great Britain, under various treaties and conventions, a brief sketch of which will be necessary to elucidate clearly the relative rights of the several parties mentioned.

The codfishery on the banks of Newfoundland and along the coasts of North America commenced a few years after its discovery. In 1517 mention is made of the first British ship which had been at Newfoundland; where, at the same time, fifty Spanish, French, and Portuguese ships were fishing. The French in 1536 were extensively engaged in this fishery; and in 1558 there were employed in it by Spain, 100 ships; by Portugal, 50 ships; and by England, only 15 ships. The Biscayans had, about the same time, from 20 to 30 vessels in the whale fishery of Newfoundland; and some English ships, in 1593, made a voyage in quest of whales and morses (walrus) to Cape Breton, where they found the wreck of a Biscay ship, and 800 whale fins. England had in 1615, at Newfoundland 250 ships, and the French, Biscayans and Portuguese, 400 ships.

From this period, the fisheries carried on by England became of great national consideration. De Witt observes, "that the English navy became formidable by the discovery of the inexpressibly rich fishing bank of Newfoundland." In 1626 the French possessed themselves of, and settled at Placentia; and that nation always viewed the English fishery with the greatest jealousy. But the value of those fisheries to England was fully appreciated, as appears by various acts of Parliament, as well as by the different regulations adopted for their protection.

By the treaty of Utrecht, the value and importance of the fisheries of Newfoundland, Nova Scotia, and New England, were particularly regarded. The French, however, continued afterwards, and until they were deprived of all their possessions in North America, to carry on more extensively than the English did the fisheries on the banks and coasts of America; and in 1734, heavy complaints were made by the English (who had established a very extensive and profitable fishery at Canso, Nova Scotia) against the French at Lewisburg, and at other places in the neighborhood.

About this period, the inhabitants of New England had about twelve hundred tons of shipping employed in the whale fishery; and with their vessels engaged in the codfishery, they caught upwards of 23,000 quin-

tals of fish, valued at 12 shillings per quintal, which they exported to Spain and different parts within the Mediterranean, and remitted the proceeds in payment for English manufactures, £172,000.

The value of this fishery, and the important ship fishery carried on by the English at Newfoundland, were, however, of less magnitude than the French fisheries before the conquest of Cape Breton. By these alone, the navy of France became formidable to all Europe. In 1745, when Lewisburg was taken by the forces sent from New England, under Sir William Pepperell and a British squadron, the value of one year's fishery in the North American seas, and which depended on France possessing Cape Breton, was stated at £928,000.

It was a maxim with the French government, that their American fisheries were of more national value in regard to navigation and power, than the gold mines of Mexico could have been, if the latter had been possessed by France.

In 1748, however, at the treaty of peace, England restored Cape Breton in return for Madras, which the forces of France had conquered two years before; and that nation again enjoyed the full advantages of the fisheries until 1759, when the surrender of Cape Breton, Newfoundland, and Canada, destroyed French power in North America.

By the fifth and sixth articles of the treaty of Paris, signed in 1763, it was agreed as follows:

"That the French shall have the liberty of fishing and drying on a part of the coasts of the island of Newfoundland, as specified in the 13th article of the treaty of Utrecht, and that the French may also fish in the Gulf of St. Lawrence; so that they do not exercise the same but at the distance of three leagues from all the coasts belonging to Great Britain, as well those of the continent as those of the islands in the said gulf. And as to what relates to the fishery out of the said gulf, the French shall exercise the same, but at the distance of fifteen leagues from the coast of Cape Breton. Great Britain cedes to France, to serve as a shelter for the French fishermen, the islands of St. Pierre and Miquelon; and his most Christian Majesty obliges himself, on his royal word, not to fortify the said islands, nor to erect any other buildings thereon but merely for the convenience of the fishery, and to keep no more than fifty men for their police."

By the treaty of Versailles in 1783, the French consented to renounce the fishery secured to them by the treaty of Utrecht, between Cape Bona Vista and Cape St. John, on the east coast of Newfoundland. The limits of the fishery on the coast of Newfoundland then assigned to the subjects of France were described as follows:

"Beginning at the said Cape St. John, passing to the north and descending by the western coast of the island of Newfoundland, shall extend to the place called Cape Ray, situated in $47^{\circ} 50'$ north latitude."

With regard to the fishery on the Gulf of St. Lawrence, it was agreed that the French should continue to exercise it conformably to the fifth article of the treaty of Paris.

At the time of signing the treaty of Versailles (3d of September, 1783,) a declaration of the King of England was delivered to the King of France, which recited that the King, having entirely agreed with his most Christian Majesty upon the articles of the definitive treaty, would seek every means to insure its execution, and would besides, on his part, give all

possible efficacy to the principle of preventing even the least foundation of dispute for the future. To that end, the King of England agreed to take the most positive measures for preventing his subjects from interrupting the French fishery upon the coasts of the island of Newfoundland; and for that purpose, would cause the fixed settlements found there to be removed. The French fishermen were not to be incommoded in cutting the wood necessary for repairing the scaffolds, huts, and fishing vessels. It was declared that the mode of carrying on the fishery should be in conformity with the thirteenth article of the treaty of Utrecht, which should not be deviated from by either party; that the French fishermen should only build scaffolds, confine themselves to the repair of their fishing vessels, and should not winter there.

A counter declaration was, on the same day, also signed and delivered by the King of France in conformity with the declaration of the King of England, and agreeing that the fisheries between the island of Newfoundland and the islands of St. Pierre and Miquelon should be carried on by either party only to the middle of the channel; that the King of France should give the most positive orders to the French fishermen not to go beyond this line, being firmly persuaded that the King of England would give like orders to the English fishermen.

This treaty, with the accompanying declaration and counter-declaration, are state papers of very considerable importance, as up to this hour the French fisheries of North America are conducted upon the terms and conditions, and within the limits, therein specified.

The 13th article of the treaty of Paris, in 1814, replaced the French fisheries upon the same footing as prior to 1792, and this agreement was confirmed by the 11th article of the treaty of Paris in 1815.

Having thus traced down and defined the French rights of fishing in North America, those of the United States will now be pointed out.

The inhabitants of Massachusetts, and of the other New England States, began to carry on the fisheries, first along the adjacent shores, and afterwards on the banks and coasts of Newfoundland and Nova Scotia. According to Mr. Pitkin's statements, before the revolutionary war, about four thousand of the inhabitants were employed, chiefly in schooners and small craft, measuring about twenty thousand tons. The average quantity of fish caught was about three hundred and fifty thousand quintals, value about two hundred thousand pounds.

By the 3d article of the treaty of peace between the United States and Great Britain in 1783, it was provided as follows: "That the people of the United States shall continue to enjoy, unmolested, the right to take fish of every kind on the Grand Bank, and on all other banks of Newfoundland; also in the gulf of St. Lawrence, and at all other places in the sea where the inhabitants of both countries used at any time to fish; that the inhabitants of the United States shall have liberty to take fish of any kind on such part of the coast of Newfoundland as the British shall use, (but not to cure or dry them on the island;) and also on the coasts, bays, and creeks of all other of his Britannic Majesty's dominions in America; and that the American fishermen shall have liberty to dry and cure fish in any of the unsettled bays, harbors, and creeks of Nova Scotia, Magdalen islands and Labrador, so long as the same shall remain unsettled; but so soon as the same, or either of them, shall be settled, it shall not be lawful for the said fishermen to dry or cure fish at such settlement without a previous agree-

ment for that purpose, with the inhabitants, proprietors or possessors of the ground."

The New England codfishery was nearly extinguished during the war of the Revolution. It recommenced at the peace of 1783, but does not seem to have prospered; for in 1790 the legislature of Massachusetts represented to Congress the embarrassed state of this fishery. In consequence of a report made by the Secretary of State, a bounty was granted by the general government on the exportation of salted fish, by way of drawback of the duty on imported salt; and afterwards, an allowance in money was made to vessels employed for a certain number of months in this fishery. From this encouragement, and the happy effects upon trade and commerce produced by the establishment of the general government, the codfishery increased until the commencement of the embargo and commercial restrictions in 1808, and the war between Great Britain and the United States which followed. The British government considered the shore fishery, as it was called, as a *privilege* granted at the peace of 1783, and which was forfeited, or due away, in consequence of this war, and therefore refused to re-grant it without an equivalent. In the negotiations for peace, some of the American commissioners were disposed to concede to the British the right of navigating the Mississippi, as an equivalent for the shore-fishery, but a majority of them were opposed to it. The treaty of Ghent, and the commercial convention which immediately followed it, were both silent on the subject of the fisheries. Our citizens nevertheless proceeded, as formerly, to fish off the British coasts, and to use the unsettled shores for curing and drying fish, according to the stipulations of the former treaty. They were immediately ordered off by the British naval forces, and some were captured. The ground alleged was, that the treaty was no longer in existence. Our government obtained a suspension of these apparently hostile orders and proceedings, until the two governments could make efforts for adjusting a question of so much moment.

The negotiations which followed resulted in a convention, which was signed at London on the 20th October, 1818. By this convention it was agreed that American citizens should have *forever*, in common with British subjects, the liberty to fish on the southern coast of Newfoundland, from Cape Ray to the Ramean islands; and from that cape to the Quirpon islands, on the western and northern coasts, and on the shores of the Magdalen islands; and on the coasts, bays, harbors, and creeks from Mount Joly, on the southern coast of Labrador, through the straits of Bellisle, and thence indefinitely along the coast northwardly, but without prejudice to any exclusive rights of the Hudson's Bay Company. Also the liberty, *forever*, to cure and dry fish in any of the unsettled bays, harbors, and creeks of the southern coast of Newfoundland, as above described, and of the coast of Labrador, subject, after settlement, to agreement with the proprietors of the soil. The United States then renounced *forever* the liberty of fishing within three miles of any other part of the British coasts in America, or of curing or drying fish on them. But American fishermen were to be permitted to enter bays or harbors on the prohibited coasts for shelter, repairing damages, and obtaining wood and water, subject to restrictions necessary to prevent abuse.

"Such was the article," says Mr. Rush, "finally agreed upon. The most difficult part of our task was the question of permanence. Britain would not consent to an express clause, that, in future, war was not to

abrogate the rights thus secured to us. We inserted the word *forever!* and drew up a paper, to be of record in the negotiation, purporting that if the convention should, from any cause, be vacated, all anterior rights were to be revived."

Under this convention, American citizens prosecuted the fisheries, as they had been accustomed, within the Gulf of St. Lawrence and on the coast of Nova Scotia, at three marine miles from the land. But a new cause of contention soon sprung up, the people of Nova Scotia insisting that the three miles were to be measured from the headlands, or extreme points of land on the coast, or of the entrance of the bays, and not from the interior of such bays or indents of the coast. The government of Nova Scotia proceeded to seize and condemn a number of American vessels which were fishing within headlands, but yet at a greater distance than three miles from the land.

In 1841 Mr. Stevenson, our minister at the court of St. James, addressed a note to the Secretary of State for Foreign Affairs, complaining of these proceedings of the authorities of Nova Scotia; and this complaint was referred to the governor of Nova Scotia for explanation. The House of Assembly of that colony prepared a case for the opinion of the law officers of England, which was forwarded to the imperial government by Lord Falkland, then lieutenant governor of Nova Scotia. In reply, the law officers of England expressed their opinion that the treaty of 1783 was annulled by the war of 1812; that the rights of fishery by American citizens must now be considered as defined by the convention of 1818, and by that only; that the prescribed distance of three miles is to be measured from the headlands, or extreme points of land, or of the entrance of the bays, and not from the interior of such bays, or the indents of the coast; that, independently of treaty, no foreign country has the right to use or navigate the passage or strait of Canso; that the convention did not expressly, or by implication, concede any right of using or navigating the passage in question; and that American citizens have no right to land or conduct the fisheries from the shores of the Magdalen islands.

In consequence of the attempts of the government of Nova Scotia to carry out the opinion thus given with great strictness, American fishermen have been frequently driven off their fishing grounds; and, in several instances, their vessels have been seized and confiscated. The complaints of our minister in London were constantly reiterated until 1845, when her Majesty's government considered it advisable, for the interests of both countries, to relax the strict rule of exclusion exercised by Great Britain against American vessels entering the bays of the sea on the British North American coasts.

Lord Stanley communicated this resolution of her Majesty's government to Viscount Falkland by a despatch, dated 19th May, 1845. Lord Falkland, on the 17th June following, requested that negotiations might be suspended until he should have an opportunity of addressing Lord Stanley on the subject. On the 2d July, 1845, Lord Falkland communicated his objections to the proposed arrangement, and, at the same time, forwarded an elaborate opinion on the subject, prepared by the attorney general of Nova Scotia. These representations, which were couched in very strong terms, appear to have had the desired effect of preventing the action of the British government as proposed; for Lord Stanley subse-

quently forwarded a despatch to Lord Falkland, stating that her Majesty's government had abandoned the intention it had entertained upon the subject, and should adhere to the strict letter of the existing treaties, except so far as related to the Bay of Fundy, which had been thrown open to American citizens, under certain restrictions.

It is greatly to be regretted that the wise and politic intentions of the British government had not been carried out, as much annoyance and ill feeling during the last few years would thereby have been prevented.

From the foregoing brief statement, the existing arrangements with reference to the fisheries on the coasts of Newfoundland and Nova Scotia, and within the Gulf of St. Lawrence, will be clearly seen; as also the manner in which they are sought to be carried out by the colonists.

Annexed is the copy of a report from Captain Granville Loch, of her Majesty's ship "Alarm," with reference to the fisheries of Newfoundland and the Labrador coast in 1848, which furnishes the latest and most authentic information as to those fisheries.

It has been found impossible to obtain from the officer commanding at the French islands of St. Pierre and Miquelon a copy of his reports on the French fisheries of Newfoundland; but as containing the best and most recent information relative to those fisheries, reference is made to the annexed copy of a report from Captain Oke, captain of the Newfoundland revenue cruiser for the protection of the fisheries.

The legislature of Newfoundland has occupied itself of late years with complaints of the falling off of their fisheries, and at its last session the legislature addressed a petition to the Queen, representing that not a single British vessel now prosecuted the deep-sea fishing on the Grand Bank; that such fishing was exclusively prosecuted by citizens of France and of the United States, the governments of which countries gave great encouragement to their fishermen by large bounties, and by such treaty arrangements with foreign countries as secured good markets for the produce of the fisheries. It was therefore prayed that similar bounties and arrangements might be made by the British government to encourage the Newfoundland fishermen, and maintain a branch of business so important, both in a commercial and political point of view.

The colony of Prince Edward's Island is peculiarly well situated for the prosecution of the fisheries in the Gulf of St. Lawrence; yet those fisheries are but little followed by the people of that colony. It possesses many fine harbors, and its shores are well adapted for drying and curing fish. The vicinity of its coast is much resorted to by American fishing vessels every season, as affording some of the best fishing grounds in the gulf; and it is especially the resort of the American mackerel fishers, who frequently obtain full fares of that description of fish in a very short space of time. The legislature of Prince Edward's Island, at its session in March, 1849, taking into consideration that the people of the island did not prosecute the fisheries near the shores so fully or effectually as they might and ought to do—that American fishermen during the season were continually to be seen from the land following their occupation with great diligence and success, and that such fishing afforded no profit to the island, agreed almost unanimously to a petition to the Queen, praying that her Majesty would be pleased to relax so much of the convention of 1818 as related to Prince Edward's Island, and permit the legislature of that colony to enter into arrangements for permitting American fishermen

to land on the shores of the island, set up fishing stations, and conduct the fisheries from the land, instead of from their vessels in the open sea, as heretofore. It was stated in the course of the debates on this petition, that if a relaxation of the convention could be obtained, the legislature would be willing to permit American fishermen to set up their fishing establishments on the shores of the island, and carry on their fisheries precisely as if they were permanent residents of the colony, upon condition of their paying a small tonnage duty on the vessels they actually employed in the fisheries. The petition, which was concurred in by both branches of the legislature, was forwarded to her Majesty by the governor of the colony; but the reply, if any, has not yet been made known.

Appended to this report are a number of statements and returns obtained from official sources in the several colonies, which on reference will be found to contain much valuable and interesting information as to the extent, character, and value of the fisheries in each of the North American colonies; and it only remains to be observed, that a careful examination and inspection of these returns will amply repay all who are desirous of obtaining accurate information on the important subject to which they relate.

CONSULATE OF THE UNITED STATES,
St. John, New Brunswick, December, 1850.

REMARKS.—From March, 1847, to March, 1848, there were exported from Halifax alone, to the United States, 124,500 barrels of mackerel, besides salmon, herring, alewives, and codfish.
 From January 1 to December 31, 1843, the exports of pickled fish to the United States were 100,800 barrels, of which 96,500 were mackerel.
 The quantity of salt imported into Nova Scotia from January 1 to December 1, 1849, (the present year,) has been 18,063*1* tons, equal to 579,000 bushels.

Comparative statement of the value (in pounds sterling) of the exports of fish from Nova Scotia, including Cape Breton, to the United States and other countries, in the years 1830, 1832, 1838, 1843, and 1848.

HENRY TREW,
Controller of Customs and Navigation Laws.

Comparative statement of the quantities of the various products of the fisheries of Newfoundland exported from that colony in the years 1763, 1785, 1790, 1795, 1800, 1805, 1810, 1815, 1820, 1825, and from 1830 to 1837, inclusive, with the value of exports from Newfoundland in the year 1814.

| Years. | Dried fish. | Oil. | Seal skins. | Salmon. | Herrings. |

Of the earliest fishery in Newfoundland the following averages are given :

| Years. | Number of vessels. | Tonnage. | Men. | Boats. |
|-----------------------|--------------------|----------|-------|--------|
| 1699, 1700, 1701..... | 192 | 7,991 | 4,026 | 1,314 |
| 1714, 1715, 1716..... | 161 | 9,193 | 2,119 | 982 |
| 1749, 1750, 1751..... | 283 | 33,512 | 4,103 | 1,370 |

NOTE.—A combination of events occurred in 1814 which raised the fisheries of Newfoundland to a great height of prosperity. The exports of the products of Newfoundland in that year were as follows :

| Articles and price. | Value, sterling. |
|--|------------------|
| 1,200,000 quintals dried fish, at £2 per quintal | £2,400,000 |
| 20,000 quintals pickled codfish, at 12s. per quintal | 12,000 |
| 6,000 tuns cod oil, at £32 per tun | 192,000 |
| 156,000 seal skins, at 5s. per skin | 39,000 |
| 4,666 tuns of seal oil, at £36 per tun | 167,976 |
| 2,000 tierces of salmon, at 25 per tierce | 10,000 |
| 1,685 barrels of mackerel, at £1 10s. per barrel | 2,527 |
| 4,000 casks of capelan sounds and tongues, at 10s. | 2,000 |
| 2,100 barrels herrings, at 25s. | 2,625 |
| Beaver and other furs. | 600 |
| Pine timber and planks. | 800 |
| 400 puncheons of berries. | 2,000 |
| Total sterling..... | 2,831,528 |
| Total United States currency..... | \$13,591,334 |

Comparative statement of the quantity and value, in pounds sterling, of the staple articles of produce of the island of Newfoundland exported in the years 1838 to 1845, inclusive, and in the years 1847 and 1848, with the total value, in pounds sterling and in United States currency.

Comparative statement of the quantity and value, in pounds sterling, of the staple articles of produce of the island of Newfoundland exported in the years 1838 to 1845, inclusive, and in the years 1847 and 1848, with the total value, in pounds sterling and in United States currency.

*Report on the French fisheries established at St. Pierre, in Newfoundland,
prepared by direction of the honorable the collector of her Majesty's
customs, 1846.*

It will be seen by the following statement that notwithstanding the premiums and bounties granted by the French government have been diminished, their fishery has increased.

The five years' average of fish taken, say 1831 to 1835 inclusive, at the *French shore*, on the banks and in the neighborhood of St. Pierre and Miquelon, did not exceed 300,000 quintals, which in 1835 was thus disposed of:

- 27,000 was sent to Spain, Portugal, and Italy.
 - 40,000 nearly was sent to the French colonies in the West Indies.
 - 170,000 consumed in France; and
 - 63,000 sent to France in a green state and re-exported.
-
- 300,000 quintals.
-

The amount of premiums, drawbacks, and bounties granted in support of the French fisheries in 1835 was £883,000 sterling, or nearly 20,000,000 francs. Premiums from 100 to 500, and in many instances so high as 1,000 francs a man, were granted. The number of fishermen employed was 6,200.

The bounty on fish re-exported from France to the French colonies in the West Indies was 40 francs (33s. 4d.) a quintal. It was shortly after that period reduced, and now remains at 24 francs. On fish sent direct to foreign ports in the Mediterranean a bounty of 12 francs (10s.) is paid; and on re-exportation from France to foreign ports, or in crossing the frontier by land into Spain, 10 francs, (8s. 4d.) The largest premium granted a French fisherman does not at present, in any instance, exceed 150 francs.

| | Vessels. | Tons. |
|---|----------|---------|
| In the year 1845 the number of French vessels which arrived at St. Pierre was | 197 | 28,750 |
| Foreign vessels arriving at St. Pierre, 1845 | 119 | <hr/> |
| Total arriving at St. Pierre | 316 | <hr/> |
| Value of cargoes | | £49,538 |

The number of French vessels engaged fishing on the banks, and baited at St. Pierre, in 1845, 1,675 tons; 2,601 men.

The quantity of fish taken by French vessels on the banks *alone*, and baited at St. Pierre, in 1845, was 208,900 quintals. Caught in the neighborhood of St. Pierre and Miquelon 48,000 "

| | | | | | |
|-------|---|---|---|---------|---|
| Total | - | - | - | 256,900 | " |
|-------|---|---|---|---------|---|

The fish taken on the French shore is not included in the above quan-

ity of 256,900 quintals; but it will be seen that the fishery at St. Pierre in 1845 was only 43,100 quintals short of the whole catch, including the French shore, in 1835.

Of the last mentioned quantity (48,000 quintals) taken in the neighborhood of St. Pierre and Miquelon, nearly one-half was taken on the British fishing-ground. The catch, as regards the fishery at St. Pierre, in 1845, was thus disposed of:

48,000 was sent to the French colonies in the West Indies.

119,000 consumed in France.

68,000 sent to France in a green state and re-exported; and

31,900 to Spain, Portugal, and Italy.

256,900 quintals.

The quantity of herring supplied the French in 1845, and used as bait on the banks—say:

| | | |
|---|---|-------|
| 25 vessels, taking each on an average 110 barrels | - | 2,730 |
| 25 vessels, taking each on an average 100 barrels | - | 2,500 |
| 25 vessels, taking each on an average 80 barrels | - | 2,040 |
| 29 vessels, taking each on an average 69 barrels | - | 2,000 |

104 vessels.

9,270 barrels.

The quantity of capelan taken to the banks and used as bait is, as compared with herrings, in the proportion of a hogshead to a barrel—one hogshead of capelan being equivalent to one barrel of herrings; thus, the quantity of capelan consumed by the French on the banks in 1845 was 9,270 hogsheads, or 20,858 barrels; to which must be added 4,000 barrels used on the shore fishery, making in the whole 24,858 barrels.

For many seasons past, until 1846, the quantity of capelan annually supplied to the French islands by our fishermen was not less than 20,000 barrels. Up to the first of July last, capelan was in abundance at St. Pierre and Miquelon—a very unusual circumstance, which is attributed to a prevalence of southerly and easterly winds. It was not, therefore, in demand at St. Pierre up to that date; and subsequently, from our being in the neighborhood of Lamaline, not more than 300 hogsheads were conveyed to St. Pierre from our shore. The consequence was, four or five of their first class bankers were entirely deprived of bait, and I am informed that they were only enabled to proceed to the banks late in July on obtaining a supply of squids from our people.

The sums paid for bait at St. Pierre in 1845, was for herrings £6,950, and for capelan nearly £5,000. The former cost on an average 15s., the latter 5s. per barrel; and not less than £2,800 was paid for firewood—the quantity sold was 3,200 cords, at 17s. 6d. per cord. These amounts, making in the whole £13,750, were mostly paid in cash, and the greater part of them eventually expended at St. Pierre in the purchase of dutiable articles. I may here observe, that along the line of coast extending from Burin to Harbor Britain, a distance of one hundred miles and upwards, there is not at present a single mercantile establishment. This is easily accounted for. The planters and settlers residing on that line, instead of taking their supplies from the merchants as heretofore, have opened a new source of supply for themselves. They trade directly to

St. Pierre, and find a tempting and profitable remuneration for their industry. They supply the French with bait and firewood, and are enabled in return to provide themselves not only with money, but with every article necessary for their household consumption, at a much cheaper rate than the established merchants, who had paid the import duty, could afford. In this manner, the French have in a few years secured to themselves almost the entire trade of that part of the coast, to the serious injury of the revenue and demoralization of the people.

As you are aware that this trade is mostly carried on in open boats, not registered, you will at once perceive what facilities this affords for an illicit intercourse. These boats not being registered, are not named, neither are their owners known at the custom-house: so that, when questioned by a preventive officer, they have only to give a false name—say they are from St. Pierre, with so and so on board, and that they are bound to such a place. Thus they escape detection; for, on inquiry at the harbor to which they stated they were proceeding, you find that no such craft has been there, and that the parties are unknown. This is an evil to which it is desirable that our local legislature should, if possible, apply a remedy. This illicit trade is conducted on a cautious principle. Two boats, the property of different owners, and two crews, join in a speculation; one boat and crew is kept trading to St. Pierre with such bait as the other boat and crew can procure in their absence. The boat selected as the trader is in most instances of little worth. Both boats are valued, and in the event of loss or capture of the trader, her value is placed to the debit of the undertaking.

During the past season, there is not one instance where the export duty on herring or capelan was paid voluntarily, and in no instance was duty received on the cargo of any boat that had not been previously visited by a preventive officer. Even when herrings at St. Pierre commanded forty and forty five francs per barrel, every stratagem was resorted to in order to evade payment of the duty.

Were I not aware that the duty of three shillings per hundred weight on capelan was imposed not so much for the purpose of the revenue, as a means of relieving our fishery from the injury consequent on our fishermen selling to their rivals so large a quantity of that description of bait, I would have ventured to propose its reduction. Of the injurious consequences attending this practice I think no doubt can be entertained, when it is known that for many seasons, until the last, the quantity of capelan supplied the French from Lameline was from 2,500 to 3,000 hogsheads, and that this season not more than 103 hogsheads was so disposed of from that place. The result to our fishery has been the best voyage in that neighborhood for many years past.

The merchants residing at St. Pierre are, I believe, favorably disposed to a moderate duty on herring and capelan, and that the duty should be secured by a British officer to reside at that place. I am given to understand that an offer to that effect will be made. It appears to me that such an offer should be received with extreme caution, for I am fully persuaded that the traffic would then centre at Miquelon. The bait would be taken to that place in English craft, and from thence to St. Pierre in French boats. Miquelon, it may be well to observe, is a town of increasing importance, situated from St. Pierre about twenty miles.

In protecting the coast from Lameline to Fortune, a distance of about twenty-five miles, which comprises nearly the whole of the coves and harbors from whence capelan is taken and carried to St. Pierre, we received no assistance from the officer and party of seamen detached from her Majesty's ship "Alarm," and stationed at Lameline. I annex a copy of Captain Frankland's instructions to the officer in charge, which he (Captain Frankland) explained to the commandant at St. Pierre in my presence.

Admitting that two-thirds of the quantity of herrings supplied the French islands paid duty, one-fourth the capelan, and a moiety of the goods imported from St. Pierre, the revenue would derive a benefit of at least £3,000, not taking into account the light duties, which, to a large amount, are now evaded.

Report upon the Mines, Minerals, and Quarries, of the British North American colonies.

It is not deemed necessary to enter upon a full description of the mineral resources of the British North American colonies, many of which are only in course of development, but simply to give in this report a statement of the mines, quarries, and ores which are now worked, such only being important in a business point of view.

As there are no products of mines or quarries exported either from Newfoundland or Prince Edward island, those colonies will not be noticed in this report.

CANADA.

As yet this colony has not exported any mineral products, but a cargo of native copper has recently reached Montreal from Lake Superior, to be sent to England. This copper is from the Bruce mines on the northern shore of Lake Huron, and is of the like quality with that found on the southern side of Lake Superior, within American territory, which has already been reported upon to Congress.

There is much iron of fair quality in Canada. The principal furnaces are on the St. Maurice river in Lower Canada, and at Marmora in Upper Canada. At these furnaces stoves and other articles are cast for domestic use, but nothing whatever has been exported. At St. Maurice some bar iron has been manufactured.

No coal whatsoever has yet been discovered in any part of Canada, and that extensive country must therefore be dependent on some other land for the necessary supply of this description of fuel.

Small quantities of gypsum from the Grand river, on Lake Erie, have been sent by inland navigation to some of the States bordering on the great lakes, where it is used for architectural and agricultural purposes.

THE MAGDALEN ISLANDS.

These islands occupy a central position in the great sheet of water known as the Gulf of St. Lawrence. The Magdalen islands, with the Bird and Brion islands, were granted by the British government, for distinguished services, to the late Admiral Sir Isaac Collin, by whom they were bequeathed in strict entail to Captain John Townsend Collin, R.N. (the present proprietor) and his heirs male forever.

It has been stated that coal exists at these islands, but this is not well established. They are mentioned here because a small export of gypsum takes place from them annually to the United States. The quantity exported during the year 1848 was six hundred and thirty-three tons.

The Magdalen, Bird, and Brion islands were formerly attached to the government of Newfoundland, but they are at present under the jurisdiction of the Canadian government.

NEW BRUNSWICK.

This province produces bituminous coal, asphaltum, iron, gypsum, limestone, manganese, grindstones, granite, and excellent flags and freestones, both gray and red, well suited for building purposes.

Coal.—Although outcroppings of the bituminous coal have been found at various places in New Brunswick, the only seam which has yet been worked to any extent is in the vicinity of Grand lake, about sixty miles by water from the harbor of St. John. The seam here is twenty-one inches thick, and on the average about twenty feet beneath the surface of the ground. It has been worked at several points in an irregular manner, and not on an extensive scale. This coal possesses all the fat, caking qualities of the best Newcastle coal, but it is soft; and, although raised in good sized lumps, yet, after exposure to the atmosphere for a short time it breaks up into very small pieces, and is apt to become too fine for domestic purposes. It is greatly esteemed by blacksmiths for their ordinary work, as it readily produces a very intense heat of a lasting character.

No official returns have as yet been made of the quantity of coals raised at the Grand Lake coal mines; it has, however, seldom exceeded one thousand chaldrons *per annum*, and very often has fallen much below that quantity.

These mines would probably be worked more extensively, but there is a large import of coal into New Brunswick, from Great Britain, as ballast for the timber-ships, which is sold at a rate very little beyond the cost of its production at the mines in England. The extensive and cheap supply thus furnished prevents the coal mines of New Brunswick from being worked so largely or so profitably as they would be under other circumstances.

Very recently a seam of bituminous coal, stated to be five feet in thickness, has been discovered near cape Maranguin, on the Bay of Fundy, at the mouth of the Peticodiac river. A wharf has been erected for loading vessels, and a level has been driven into the seam, which bids fair to produce a valuable coal in considerable quantity.

Asphaltum.—This substance, of very fine quality, is found about four miles from the western bank of the Peticodiac river, which flows into the Bay of Fundy. The seam is six feet in thickness, and the asphaltum is now being worked to a very considerable extent, being in much demand for the manufacture of gas for illuminating purposes, which it produces in great abundance and purity. Dr. C. T. Jackson, of Boston, has analyzed this asphaltum, and pronounced it very valuable, as well for the production of gas for illumination as for fuel for steam engines, it being particularly well adapted for the use of locomotive steam engines on railroads. The exportation has already commenced, and several companies are now at work endeavoring to strike the seam of asphaltum, at points nearer the river Peticodiac than where it is now being worked.

Iron.—An extensive deposit of iron ore (hematite) is found at Woodstock, not far from Houlton, in the State of Maine, and in close proximity to the northeastern boundary of the United States. It was first examined and described by Dr. C. T. Jackson, of Boston, in his report on the geology of Maine. In 1847 a company was incorporated in New Brunswick to work this ore, which has been found to yield 52½ per cent. of iron. The company has expended about eighty thousand dollars in erecting

a furnace and other works at Woodstock, and they have already smelted, with charcoal, about two thousand tons of iron, which has proved of very superior quality, and has been sold in England at thirty-five dollars per ton, and upwards. The furnace at Woodstock now produces nine tons of charcoal iron daily.

As yet, iron and coal have not been found in New Brunswick in close proximity to each other; nor within such easy distance as would enable them to be brought together for practical purposes. The iron of Woodstock is found northwest of a broad belt of primary rocks which crosses New Brunswick nearly at its centre, from southwest to northeast, and within a large tract of country geologically described as being composed of argillaceous, calcareous, and siliceous rocks, belonging to the silurian system, but to which the term "transition" was formerly applied.

To the southeastward of the broad belt of primary rocks just mentioned, are found the sandstones and shales of the coal measures—associated with which are extensive deposits of red marl, and sandstone, limestone, and gypsum.

Limestone.—Although limestone is found in very many places in New Brunswick, the most extensive and valuable deposits are those near the city of St. John; at L'Etang, in the Bay of Fundy; and at Petit Rocher, on the Bay of Chaleur. From the harbor of L'Etang, which is but a short distance from Eastport, in Maine, the principal export of lime has been made. The following quantities have been exported during the last few years from L'Etang—the whole of which went to the United States:

| | | | | | | |
|---------------------|---|---|---|---|---|---------------|
| In 1844 | - | - | - | - | - | 6,320 casks. |
| 1845 | - | - | - | - | - | 7,626 " |
| 1846 | - | - | - | - | - | 12,899 " |
| 1847 | - | - | - | - | - | 7,446 " |
| 1848 | - | - | - | - | - | 11,560 " |
| Total in five years | | | | | - | 46,051 casks. |

Lime has also been exported from St. John, but not to any very great extent.

Manganese.—This mineral is found at Quaco, on the Bay of Fundy, east of the harbor of St. John, and also near Bathurst, in the Bay of Chaleur. Occasionally small quantities have been exported from each of the localities mentioned; and, whenever the state of the market will warrant, larger quantities will be immediately sent to market either in a crude or prepared state. The gray oxide of manganese, highly crystallized, found near Bathurst, is said to be a very superior article.

Gypsum.—The principal deposits of gypsum in New Brunswick, which have been worked for exportation, are on the northern shores of the Bay of Fundy, near its head. It is difficult to state with precision the exact quantity exported from these quarries, as small vessels carry it directly from each quarry, generally to Eastport, in Maine, and no regular returns are made. The whole quantity does not probably exceed one thousand tons per annum, even if it reaches that amount. The gypsum found near the Peticodiac river is quite as pure as any alabaster, and turns easily in the lathe.

Grindstones.—The quarries in New Brunswick which are worked for

grindstones as an article of export, are at Mary's Point and Cape Maranguin, at the mouth of the Peticodiac river, near the head of the Bay of Fundy; at the Scadonc river, near the Shediac; at Napan, on the Miramichi river; and at New Bandon and Caraquette, in the Bay of Chaleun—all within the Gulf of St. Lawrence. The grindstones at all the places mentioned are of excellent quality, and they may be furnished to an almost unlimited extent.

There are forty-five men employed annually at Cape Maranguin in making grindstones, who produce about nine hundred tons in each year, which they sell at the quarry for eight dollars per ton. The largest stone made at this quarry the past season, was six and a half feet in diameter and twelve inches thick, but they are sometimes made of even larger size.

In the Bay of Chaleur the principal quarry is at New Bandon, exactly eighteen miles easterly from the town and harbor of Bathurst, on the southern side of the bay. The cliffs here rise perpendicularly 80 feet above the tide; the stone is found at twenty feet from the top of the cliffs, on a sort of shelf. At this place about sixty men are employed, who produce about eight hundred tons of stone each season, for which they are paid at the rate of seven and a half dollars per ton. Some grindstones are also made at Caraquette, lower down the Bay of Chaleur than New Bandon, by persons who work occasionally at the business.

The quantity of grindstones made at Napan, on the Miramichi, is yet very small, the business having been tried within the last few years as a matter of experiment merely.

At Shediac, grindstones are manufactured in lathes, driven by water-power, at mills erected for the purpose.

Granite.—This stone, of good color and excellent quality, has been quarried extensively at the head of Long Reach, on the river St. John, about thirty miles from the harbor of St. John. It has been used in the province for building purposes, but none has as yet been exported, nor is it likely that any will be, to the United States, where it is produced so abundantly and so cheaply.

Flagstones and freestones.—During the last few years some excellent flagstones of the kind called "gray flag," and freestones, both red and gray, have been exported to Boston and New York from Grindstone Island, Mary's Point, and other localities in the Bay of Fundy, near the entrance of the Peticodiac river, where they are found in close proximity to the gypsum and grindstones also exported from that neighborhood.

The red and chocolate-colored sandstones from this locality are of very superior quality, and may be furnished to almost any extent, but as yet the quantity exported has been too small to make their superiority and usefulness generally known.

Crown title to mines and minerals.

In all grants of land which issue in New Brunswick, the Crown reserves to itself "all coals, and also all gold and silver, and other mines and minerals." The title, therefore, to all mines and minerals still rests in the government, and leases of mining grounds not yet leased may be obtained upon application, after public sale, on the following terms and conditions.

"Mining regulations.

"1. That the right of mining within a tract of one square mile, for the term of twenty-five years, be put up at a fixed rent of one shilling per chal-dron on coal, and five per centum on the value of all other minerals raised, to be paid quarterly, on the first days of January, April, July, and October, in each year, to the receiver general, or an agent for that purpose to be appointed by the government.

"2. That the upset price on each lot be five pounds.

"3. That the preference money be paid and the ground selected within one hour after the time of sale; after which other lots will be offered, if required, in like manner.

"4. That if the lessee shall not actually raise coal or other minerals to the value of one hundred pounds from his ground, within any one year after the first, during the continuance of his lease, the same shall become forfeited.

"5. That the lease contain a clause of renewal, or that the government may resume and take the improvements at a valuation, to be made by arbitrators mutually chosen by the surveyor general for the time being, and by the lessee or his assigns.—*Crown Lands Office, Fredericton, May 4, 1849.*"

It may be observed that very few mining grounds have yet been leased in New Brunswick, and that no objection is made to American citizens becoming lessees, under the Crown, of mining privileges in the same manner as British subjects.

NOVA SCOTIA.

This colony possesses a great abundance of mineral wealth, and, in that respect, may fairly vie with any other country of the same extent in the whole world.

To this report returns are appended, showing the quantity and value of coals, grindstones, freestones, and gypsum, exported from Nova Scotia and Cape Breton up to the beginning of the year 1850; and to these returns reference is made.

The General Mining Association, as tenants of the Crown, under an assignment of lease from his late royal highness the Duke of York, are lessees of all the mines and minerals of every description in the province of Nova Scotia and in the island of Cape Breton.

The association commenced their operations in the year 1827, which have hitherto been confined to the working of coal mines and the discovery of iron ore.

Coal.—The coal mines opened and now worked are four in number—the Albion mines near Pictou, the Sydney and Bridgeport mines at Cape Breton, and the Cumberland mines near Chignecto basin, at the head of the Bay of Fundy.

The Pictou or Albion mines are about one hundred miles from Halifax, and about eighty miles by water from the western extremity of the strait of Canso, which separates Cape Breton from Nova Scotia. At these mines, ten strata of coal have been penetrated. The main coal band is thirty-three feet in thickness, with twenty-four feet of good coal; out of

this, only twelve and a half feet is suitable for exportation—the remaining part is valuable for furnaces and forges.

The inclination of the strata is north 41° , east 17° ; and the strike is at right angles. Seven shafts have been opened, but only four are in use. The coal is entered by long parallel level "boards," eighteen feet wide; the pits are along the line of the main board-gates.

From the bottom of each pit there is a horse road running in opposite directions along the strike of the principal coal bed. Each road conveys the coal of its own and of the next five "boards" above it, which also have roads cut obliquely upwards, through the walls of coal that remain between the "boards." The lowest part of these mines is 451 feet below the surface, and 427 feet below the tide level of the river, which is a mile and a half distant. The extent of the workings does not exceed three-quarters of a square mile.

A railway has been laid from the mines to the loading ground, at the mouth of East river, three miles above the town of Pictou, at the cost of \$280,000, including locomotives. The locomotives make five trips each daily, and convey about ninety tons of coal in each train of thirty cars.

A steam-tug is kept to bring vessels up to the loading ground: the cost of this service, with the pilotage and other port charges, falls upon the freight, and ultimately upon the price of the coal.

The "boards," which afford the chief part of the coal, are eighteen feet wide, and twelve feet high. The coal is mined by the cubic yard, the miner finding his own light and powder. In the "boards," the price is about twenty cents, and in the "headings" from thirty-one to forty cents per cubic yard. Two cubic yards, on an average, yield one chaldron of merchantable coal, and one fifth of a chaldron of slack or fine coal. The average cost of mining coal, of all qualities, is thirty cents per ton.

The various expenses of the mines, engines, &c., render the actual cost of each chaldron of coals at the pit's mouth sixty two and a half cents per ton. The cost of screening, transporting to the loading ground, and other charges, amount to seventy-five cents per ton.

The miners cut four and a half cubic yards each, daily; which, at the above rates, yields them one dollar and twenty cents per day; lights and powder cost ten cents per day. One ninety-sixth part of their earnings is reserved for the education of their children, and they make a small contribution to the resident physician. After making every deduction, the annual wages of the miner is three hundred and twenty dollars; and to this is added, by the company, a house free of rent and a supply of fuel, which makes his receipts equal to three hundred and sixty dollars per annum. The miners are principally from Scotland.

The shipping season commences at Pictou about the first of May, and continues until the middle of November, after which the northern harbors of Nova Scotia are frozen up.

The price of coal at Pictou, for a single cargo, is three dollars and thirty cents per chaldron; a deduction of thirty cents per chaldron is made to purchasers of all quantities exceeding one thousand chaldrons. The slack or fine coal is delivered on board vessels at one dollar and a half per chaldron, with a discount of three per cent. for cash payment.

The average weight of the Pictou chaldron is 3,456 pounds. The average required in the United States is 2,940 pounds the chaldron.

Pictou coal measure exceeds the measure at Boston, so that 100 chaldrons at Pictou, measure 120 at Boston. The usual freight from Pictou to Boston is \$2 75 per chaldron, Boston measure. In 1847 it was \$2 50 per chaldron.

The Sydney mines are situated at the northwest entrance of Spanish river, or Sydney harbor—a harbor described as equal if not superior to any in British America, and which is accessible in all winds. The Sydney coal field occupies the northeast portion of the island of Cape Breton. It extends along the coast, and is seen in the cliffs from the north of Sydney river to Miré bay, and thence, inland, to the great entrance of the Brasd'or. This field is estimated to contain two hundred and fifty square miles of workable coal.

The coal of Cape Breton was known to the early French settlers, and was worked by them for the supply of their magnificent fortress at Louisburg. It was first described by the Abbé Raynal, in his work on the settlement and commerce of the West Indies.

The greatest depth of the Sydney mines is 315 feet, and 225 feet below the tide-level. The thickness of the coal bed worked at Sydney is six feet. The dip at the northern end is 7° towards the north, 65° east; at the southern end it is north 80° east. The coal is worked by driving oblique headways from the main horse-gate, or on a level, rising about three degrees. The "rooms" are sixteen and a half feet wide, and the pillars are left of the same breadth. The underlying shale abounds in fossils of the carboniferous group, especially ferns.

Three miles of railway have been built to convey the Sydney coal to the loading ground at North Sydney, on which three locomotives are employed. The coal is delivered on board the vessels by allowing it to fall directly from the railway cars into their holds. The coarse coal only is shipped at Sydney, and the price per chaldron, put on board, is three dollars sixty cents, with the same deduction to large purchasers as at Pictou.

The Sydney coal, as a domestic fuel, is asserted to be equal to the best Newcastle; and it is classed among the soft, close burning, bituminous kinds. It is highly bituminous, ignites readily, gives a strong lasting heat, and leaves but little ash.

The Bridgeport mines are fifteen miles from Sydney; they are situate on the northern shore of Indian bay, one mile and three quarters from the harbor, where vessels load, which is perfectly secure for shipping in the most boisterous weather. The southern head of Indian bay, which is called Cape Table, bears, by compass, from Flint island NW. by W., distance eight miles and a half; the northern head of the bay bears from the light house on Flat point, at the entrance of Sydney harbor, SE, distance four miles. Vessels may run safely into four fathoms water between the northern and southern heads.

The coal from these mines is of excellent quality, of the same description as the Sydney, and not at all inferior to it. A railroad has been built from the pits to the shipping place at Bridgeport basin. The coal seam at these mines is nine feet thick, and contains two thin partings of shale. The wages of the miners are the same, both at Sydney and Bridgeport, as at the Pictou mines.

The Cape Breton coals command a higher price at all times than the Pictou coals. Sydney coals overrun the Boston measure, from eighteen to twenty per cent.

The Cumberland coal mines are on the coast of Chignecto basin, which forms the northeastern termination of the Bay of Fundy. The cliffs bordering the basin present a beautiful section of the coal field, which extends for many miles along the shores. Some of the coal beds are only a few inches in thickness, while others are from two to four and a half feet thick.

The Mining Association have commenced operations at a locality called the South Joggins, and have already expended \$80,000 in opening the mines; the exportation of coal has commenced, and many cargoes, during the past season, have been sent to Portland, in Maine. The coal is bituminous, but is alleged to contain more sulphur than any other description in Nova Scotia.

The coal trade of Nova Scotia and Cape Breton.—The principal exportation of bituminous coal from Nova Scotia and Cape Breton is to the ports of Boston and New York. The American vessels in this trade are generally chartered to proceed to Pictou or Sydney, and back to Boston or New York. In such case they frequently go in ballast; but some vessels are occasionally loaded with American produce for Newfoundland, St. Peters, Prince Edward's island, or Miramichi: after discharging their freight, they proceed to the mines and obtain return cargoes of coal.

The mean price of Sydney and Pictou coal, for the chaldron of 48 bushels, weighing 3,750 pounds, (nominally 1 $\frac{1}{4}$ ton) is from \$3 to \$3 20—say \$3 10, which is equal to \$2 32 per chaldron of 36 bushels. The freight to Boston is \$2 75 per chaldron, and the duty (under the tariff of 1846, thirty per cent. ad valorem) is seventy cents per chaldron, amounting in all to \$5 77 per chaldron. To this must be added, insurance two per cent., and commission 2 $\frac{1}{2}$ per cent. The retail price in Boston for the same coal is about eight dollars per chaldron.

During the discussion of the tariff of 1846, much anxiety was felt and expressed, especially in Pennsylvania, as to the effect which the remission of so large an amount of duty on foreign coals might have upon the home trade. With reference to this, the following remarks appear in a recent work on the "Statistics of Coal," by R. C. Taylor, esq.:

"It was shown, and may be confirmed by our own tables, that while, with the 1842 tariff duty of \$1 75 per ton, the increase of bituminous coal from the colonies into Boston, its principal market, was in 1845 sixty-five per cent over the supply of 1844, the increase of Pennsylvania anthracite in the same market was only eighteen and a half per cent. It might with good reason, therefore, be inferred, that on reducing the duty to about one third of the sum theretofore paid, the consequence would be a diminished demand for anthracite, and the almost total exclusion of American bituminous coal from the eastern States.

"But such has not proved to be the result; for while the foreign coal trade of Boston has remained nearly stationary under a low tariff, the home trade in anthracite has trebled.

"It seems to us that there is one view, in relation to a reciprocal trade in coal, which has heretofore been overlooked. Thus Canada, although just now not a very important customer, is a purchaser of American coal to a certain extent. Thus again, while the provinces of Nova Scotia and

New Brunswick obtain a limited number of customers at one or two American ports in their vicinity, the coal proprietors of Pennsylvania and Ohio, and ultimately Michigan, will, in their turn, supply the adjacent provinces of Canada with the fuel of which they are in need. The colonial government imposes no duty on this importation, although the American duty is thirty per cent. on what is received in the United States, equal to sixty five cents per ton. As there exists no coal formation in all Canada, along a frontier of more than one thousand miles—as the wants of the people increase—as manufactures occasion new demands with an increasing population—as the recent requirements for smelting within the mining region call for an adequate supply of mineral fuel, it does appear to us that the Canadian provinces are destined to become extensive recipients of American coal, and to an amount, ultimately, that will immeasurably exceed the amount of Nova Scotia coal which may reach the American Atlantic ports.

"In consequence of the reduced duty on coal imported into the United States, an additional impulse was given, towards the close of 1846, to the trade in coal from the British North American colonies. Several barques, from 300 to 400 tons each, were at once chartered in London for this trade. The deep waters of the northeastern coast allow the largest class of vessels to take in and deliver cargoes of Nova Scotia and Sydney coal, and hence they could bring it at a lower rate than the small vessels which convey the Pennsylvania and Virginia coals, independently of avoiding the heavy charges on American coal by railroads and inland navigation.

"For four years prior to 1846 the admission of Nova Scotia coal had been increasing in the eastern ports, for the supply of the iron and the other manufactures, for the supply of the Cunard steamers, and for various other uses, in the face of a protective duty of \$2 25 per chaldron. With a diminished duty, therefore, it is probable a considerable demand for this description of coal will take place in those ports."

"1848.—The expectation mentioned in the last paragraph has not been exactly realized. That there has been no larger demand for the provincial coal, we ascribe only to the simple fact that no bituminous coal will hereafter be able to supplant the use of the anthracite for general purposes, and especially for domestic uses."

It may here be mentioned that anthracite does not exist in any of the colonies, and that New Brunswick also bids fair to become a customer for Pennsylvania anthracite, the importation of which has already commenced, and as it becomes known it will doubtless rise in favor. It is now used exclusively in at least one extensive foundry at St. John for smelting iron, being found more economical for that purpose than coke from the bituminous coal; and it is used also in two British steamers which ply from St. John to Portland, Maine.

The elaborate report to the Navy Department of the United States on American coals, by Prof. W. R. Johnson, in 1844, enters so fully into the description and analysis of the Nova Scotia and Cape Breton coals, that it is only necessary here to refer to that report for the most full and accurate information. On examination of the tables of results attached to that report, of the evaporative powers of American bituminous coals, it will be found that their value for steam purposes is in the following order:

1. Pennsylvania coals of Queen's Run.

2. Virginia coals.
3. Pictou coals of the Mining Association.
4. Pictou coals—Cunard's sample.
5. Sydney coals.
6. Liverpool coals, (England.)

While on the subject of fuel, it may be observed that about thirty thousand cords of wood are shipped annually from Nova Scotia to the United States, principally to Boston.

This export is chiefly made from the shores of the basin of Annapolis, in the Bay of Fundy.

Gypsum.—The lower parts of the great coal formation of Nova Scotia include thick beds of red sandstone and marls, associated with vast deposits of gypsum and fossiliferous limestone. The gypsum abounds on both sides of the river Avon, which flows into the Bay of Fundy at Windsor. The thickest deposite in Nova Scotia is on the eastern bank of the Avon, on the property and near the residence of the Hon. Judge Halliburton, better known as "Sam Slick," who has constructed a short railway from the quarries to the loading place in the town of Windsor. The gypsiferous region extends from Windsor eastward, and crossing the Shubenacadie river, it runs with the coal measures to the northeastern shores of the peninsula of Nova Scotia. It occurs at Parrsboro', Londonderry, Truro, and at numerous places in the county of Pictou, and along the eastern shore of the province. In the county of Cumberland it appears at several localities, on a line parallel with the Cobiquid mountains, from Macon, at the head of Chignecto basin, to river Philip, on the Gulf of St. Lawrence; and at Napan, also in Chignecto, whence it extends eastwardly to Pugwash, on the Baie Verte. It also occupies the central portion of Cape Breton.

The gypsum is universally accompanied by limestone, and, like it, crops out beneath the upper coal measures. Tracts of country containing gypsum are readily distinguished. Where the mineral is not seen at the surface, the earth is indented by deep pits, called by the quarrymen "kettle holes," and narrow ravines, having smooth borders of green sward. The gypsum is constantly undergoing decomposition wherever water is present; the earth becomes cavernous, and the surface being undermined, naturally falls in. From some of these "kettle holes," the bones of native Indians and of wild animals have been exhumed.

The gypsum is of two kinds—the hydrous and anhydrous; they only differ, as the terms imply, in the quantity of water they present. The anhydrous, in a pure state, is not combined with water. The hydrous gypsum is best suited for architectural purposes, and is generally preferred in the United States for use in agriculture. Besides these, there are seLENite, and fibrous gypsum, both of which are beautifully crystallized. Dr. Gesner states, that on the banks of the Shubenacadie and at Gay's river he found masses of bright red and jet black gypsum, the colors being derived from carbon, iron, and manganese.

The principal places of shipment are at Windsor, the Shubenacadie, and the south shore of the Basin of Mines. The quantity shipped from this district in 1848 was 20,472 tons, all to the United States. At many places vessels lie aground at the quarries; in other situations, the rock is transported some distance on carts and wagons; at Windsor, the railway is employed.

On the banks of the Shubenacadie, the "plaster diggers" have bur-

rowed into the perpendicular cliffs 100 feet above their bases, whence they throw the gypsum down to high-water mark.

The quantity of gypsum exported from Cape Breton in 1848 was only 584 tons; the length of voyage, and high freights, probably render it unable to compete with shipments from the Bay of Fundy. The whole quantity exported from Nova Scotia in 1848 was 46,900 tons.

By the returns to a circular letter of inquiry from the Treasury Department, in 1845, it appears that 200,600 tons of plaster were imported into the United States during that year.

Some of the compact gypsums afford good alabaster, which may be turned in a lathe, or cut into ornaments.

Limestone.—As already noticed, thick beds of limestone accompany the gypsum. They are seen in compact strata, and abound in the shells peculiar to their group. The usual colors are white, brown, yellow, and black. At a few situations good marble may be quarried, and some polished specimens display the fossils in great beauty.

The compact limestone yields a strong lime, suitable for building purposes, but it is less white than that obtained from primary limestone. There is abundance of wood and coal for its calcination; but only a few small and very imperfect kilns are in operation, and the chief part of the lime employed in masonry in Nova Scotia is imported from New Brunswick. It would, therefore, seem that the lime of Nova Scotia, besides its bad color, is not otherwise so good for building purposes as that of New Brunswick. It does not appear, by the official returns, that either lime or limestone has been exported from Nova Scotia, nor do they seem likely to become valuable exports.

Barytes.—Sulphate of barytes sometimes occurs in the older sandstones. The largest vein in Nova Scotia is in the valley of the river Stewiacke, (a branch of the Shubenacadie,) and it exceeds ten feet in thickness. A mill has recently been erected there by Mr. Ross, of Truro, and in it the heavy spar is converted into baryto-sulphate pigment, quite equal in purity to that manufactured in Scotland. The export of this article has but just commenced, and it is expected to increase.

Barytes is now being worked on a large scale near Parrsboro', and when manufactured at mills in the vicinity, is shipped to the United States.

Ores of manganese.—Several ores of manganese are found in Nova Scotia, some of which are beautifully crystallized. The most common of these is the anhydrous binoxide, or *pyrolusite*. It occurs in irregular masses, and has been found in the largest quantities at Petite river, on the southern side of the Basin of Mines, and at Parrsboro', on the northern shore of the same basin. It is also found at Rawdon, Douglas, the banks of the Shubenacadie, and other places in that vicinity. A few tons have been occasionally shipped from Petite to the United States, where it has commanded a fair price.

As the inhabitants of Nova Scotia have no control over the minerals of the province, they seldom attempt any discovery, and such discoveries as are made are generally kept secret. It is owing to this state of things that manganese does not form a regular export from Nova Scotia, as it probably will do at some future day.

Freestones.—The sandstones of Nova Scotia are of good quality; those known as gray sandstones of the coal measures are very durable and elegant, and may be shipped to an unlimited extent, especially from the

shores of the Bay of Fundy. As yet, however, these freestones do not figure largely among the exports of Nova Scotia, although they may do so hereafter.

The entire coasts bordering on Northumberland straits, on the Gulf of St. Lawrence, and on Chignecto basin, in the Bay of Fundy, present strata of gray, red, and chocolate-colored sandstones. From the latter locality freestones are exported occasionally to the United States. Flag stones of every thickness may be obtained from the cliffs fronting the sea on Chignecto. At Apple river, where the waves undermine the strata, smooth flags of hard sandstones, from one inch to four inches in thickness, and frequently containing 150 superficial feet, fall to the beach. Similar flagstones are also found at Diligence river, near Parrsboro'.

When first quarried the freestones are readily cut and sculptured; but they become hardened by being exposed to the sun. Much care and experience are requisite in selecting for building purposes from the freestones of Nova Scotia; for although there are several descriptions of excellent quality, yet there are others wholly incapable of resisting the vicissitudes of the weather.

Grindstones.—Besides the flagstones and freestones found in the carboniferous series of Nova Scotia, that series also furnishes grindstones of superior quality. The "grindstone grits," as they are termed, are found quite common, but they are most extensively cut at the South Joggins, in Chignecto basin, near the Cumberland coal mines. During the summer season, the manufacture of grindstones at this locality employs about 500 men, who reside in temporary huts, scattered along the borders of the cliffs. During the recess of the tide, which here ebbs and flows upwards of fifty feet, the strata are broken near low-water mark, and large masses of rock are secured between boats, which at high water are thus lifted and floated to the shore. There the stone is cut into grindstones from four to six feet in diameter, and from ten to eighteen inches in thickness. These are called "water stone," and they are much used in the manufactories of the United States.

A smaller kind of grindstone is made from sandstones situated above high-water mark. The principal site of these operations is at a place called the "Bank quarry," owned by Amos Sea ⁱⁿ, esq., of Minudie. A peculiar stratum at this place, called the "blue grit," is covered by thirty feet of gravel: this drift has been removed at much cost, and the stratum has been followed two hundred yards by a level, and a railway running in to the bank. After the rock has been blasted, it is removed to the cutting-house, where it is speedily fashioned into grindstones by the workmen; but the labor might be advantageously executed by machinery. The grindstones from this quarry are deemed superior to any other in Nova Scotia, and they meet a ready sale in the United States and in England.

Grindstones are also made in the interior, and at "Ragged Reef," five miles south of the "Bank quarry;" between these two localities are the Cumberland coal mines.

The price per stone of grindstones (24 inches diameter by 4 inches in thickness) is from forty to sixty cents at the quarries; the larger kinds are in proportion to their dimensions.

The number of grindstones exported from this part of Nova Scotia during the year ending 5th January, 1848, was 33,075, valued at the average at fifty cents each, equal to \$16,537 50.

Iron.—Some years since two furnaces for smelting iron were erected at Moose river, in Annapolis basin, and a very large sum was expended upon the necessary works. A considerable quantity of iron was made, but from some cause the undertaking was abandoned, and the works have been allowed to go to decay. There is not now in Nova Scotia a single furnace, although iron ore abounds.

An effort has recently been made to work an extensive and valuable deposite of iron ore at the Folly mountain, in Londonderry, to the northward of the Basin of Mines, but whether this effort will be successful remains to be seen. A few small furnaces, of the description known as the Catalan furnace, have recently been set up, but are not yet in operation.

A tract of land at the Folly mountain, which contains a part of the rich deposite of iron ore, does not fall within the lease of the General Mining Association, having been granted by the Crown long prior to their lease, without the usual reservation of mines and minerals; but the ore is also abundant on the property of the association.

The ore itself is the specular iron of several authors, and the specular oxyde of iron of Cleveland. It is a fine peroxyde of the metal, consisting of 69 of iron and 31 oxygen in 100 parts of the ore, which will yield from 60 to 70 per cent. of cast metal; but its productiveness cannot be fairly tested except by reduction on a large scale, which has not yet been fairly tried. The iron produced from this ore is said to be admirably fitted for the production of steel.

CONSULATE OF THE UNITED STATES,
St. John, New Brunswick, December 10, 1850.

Return of the quantities of coal, in chaldrons, Newcastle measure, raised at the Albion mine, Pictou, Nova Scotia, and at the Sydney mines, Sydney, Cape Breton, in each year from 1840 to 1848, both inclusive.

| 1834 | 71,626 | 1848† | 196,251 |

* 1846: From England, 58,484 tons; British North American colonies, 95,230 tons. Value, \$372,048.

† 1848: From England, 42,358 tons; British North American colonies, 153,122 tons. Value, \$459,080.

The importation of foreign coal into the United States has been considerable. The duty within the last two years has been one dollar and seventy five cents a ton; and it has been customary, quite lately, since the trade in breadstuffs between our own country and Europe has been increased, to substitute coal as ballast upon the route home. The above table of import of foreign coal into the United States, for the years stated, has been obtained from public documents in the city of Washington.

In July, 1789, a law was passed laying a duty of two cents per bushel on imported coal. In 1790, the duty was increased to three cents; in 1792, the duty was increased to four and a half cents; and in 1794, to five cents per bushel. This duty was continued until 1816, when it was changed to five cents per heaped bushel. In 1824 the duty was increased to \$1 50 per ton. In 1832 the duty was raised to \$1 75 per ton, which was continued until the present tariff, in 1846, reduced it to from 30 to 45 cents per ton.

LIGHTS AND LIGHT-HOUSEES.

I have the honor to present the annexed list of lights and light houses in the British North American colonies, compiled with care from official returns in as condensed a form as possible.

I respectfully request your attention to the description of the lights in Canada, especially those on the river and gulf of St. Lawrence, which at this time will possess some interest in connexion with the proposed free navigation of that river by our vessels. I have only to remark that those lights are very well kept and regulated, and are generally considered as most efficient for the purposes of navigation.

Each of the colonies named is making exertion for an additional number of lights upon its coasts in every locality where needed, being fully impressed with the principle so well understood in our country, that the extent to which the shores of a country are girdled with lights may be considered a fair index of the extent to which intelligence, industry, and prosperity pervade its inhabitants.

—

List of lights and light-houses in the British North American colonies in 1850.

CANADA.

GULF AND RIVER OF ST. LAWRENCE.

St. Paul's island.—Rock twenty-six feet from island. A fixed light; erected in 1839. An octagonal building of wood, painted white; forty feet in height; the lantern one hundred and forty feet above high water. The light is shown all night, and is seen twenty miles in clear weather. Latitude $47^{\circ} 14'$ north; longitude $60^{\circ} 8' 47''$ west.

St. Paul's island.—Southwest point. A revolving light; interval one minute; erected in 1839. An octagonal building of wood, painted white; forty feet in height; the lantern one hundred and forty feet above high water. The light is shown all night, and is seen twenty miles in clear weather. Latitude $47^{\circ} 11' 15''$ north; longitude $60^{\circ} 9' 47''$ west. A bell is sounded during a fog every four hours, viz: at 4, 8, and 12.

Anticosti island.—East point. A fixed light; erected in 1835. A conical building of grayish white stone, seventy-five feet in height; the lantern one hundred feet above high water. The light is shown all night, and is seen fifteen miles in clear weather. Latitude $49^{\circ} 5' 20''$ north; longitude $61^{\circ} 41' 47''$ west.

Anticosti island.—Southwest point. A revolving light; interval one minute; erected in 1831. A conical building of grayish white stone, seventy-five feet in height; one hundred feet above high water. The light is shown all night, and is seen from NNW. to SE. by E., at the distance of fifteen miles. Latitude $49^{\circ} 23' 46''$ north; longitude $63^{\circ} 35' 57''$ west.

Point de Morts.—A fixed light; erected in 1830. A conical building of grayish white stone, seventy-five feet in height; one hundred feet above high water. The light is shown all night, and is seen fifteen miles in clear weather. Latitude $49^{\circ} 19' 40''$ north; longitude $67^{\circ} 22' 30''$ west.

Bicquette island—West point. A revolving light; interval two minutes; erected in 1844. A conical building of grayish white stone, sixty-five feet in height; one hundred and twelve feet above high water. The light is shown all night, and is seen seventeen miles in clear weather. Latitude $48^{\circ} 25' 20''$ north; longitude $68^{\circ} 54'$ west. A gun is fired every hour during fogs and snow storms.

Red Island bank.—A fixed light; erected in 1848. The building is red, fifty-one feet in height; the lantern is seventy-six feet above high water. The light is shown all night; it is red. Latitude $48^{\circ} 4' 30''$ north; longitude $69^{\circ} 33' 40''$ west.

Green island—Northwest part. A fixed light; erected in 1809. A square building of white stone, forty feet in height; the lantern is sixty feet above high water. The light is shown all night, and is seen thirteen miles.

South Traverse.—A light-vessel, moored on the northeast part of St. Roque shoals; placed in 1830. The light is fixed; is shown all night, and seen nine miles in clear weather. Latitude $47^{\circ} 22' 20''$ north; longitude $70^{\circ} 22' 20''$ west.

Stone Pillar island—South point. A revolving light; interval one and a half minute. A white conical stone building, thirty-eight feet in height; the lantern is sixty-eight feet above high water. The light is shown all night, and is seen thirteen miles in clear weather. Latitude $47^{\circ} 12' 30''$ north; longitude $70^{\circ} 22' 20''$ west.

[Above Quebec.]

St. Croix.—A fixed light; erected in 1842. The building is of wood, painted white; it is twenty feet in height; the lantern thirty feet above high water. The light is shown all night, and is seen six miles in clear weather. Latitude $46^{\circ} 37' 52''$ north; longitude $71^{\circ} 52' 42''$ west. This is a small light, to assist in keeping the channel for some distance up and down the river.

Port Neuf.—Two fixed lights, nearly SW. $\frac{1}{2}$ W. of each other; erected in 1842. The upper is of stone, the lower of wood, both white. They are seen six miles in clear weather. Latitude $46^{\circ} 41' 37''$ north; longitude $71^{\circ} 52' 42''$ west. These lights, in one, lead up Richelieu channel to the light on Richelieu island.

Platon Point.—Two fixed lights; nearly S. 72° W. of each other, at a distance of five hundred and seven feet; erected in 1824. White square buildings of wood; one 24 feet in height, with lantern one hundred and fifty-two feet above high water; the other seven feet in height, with the lantern one hundred and thirty feet above high water. They are seen twelve miles in clear weather. Latitude $46^{\circ} 39' 25''$ north; longitude $71^{\circ} 53' 52''$ west. These lights lead up the Richelieu.

Richelieu island—Northwest end. A fixed light; erected in 1820. A white square wooden building, twenty feet in height; the lantern twenty-seven feet above high water. The light is seen six miles in clear weather. Latitude $46^{\circ} 38' 37''$ north; longitude $71^{\circ} 55' 37''$ west. This light and

the lights on Platon point are nearly in the same line of bearing, viz: N. 73 E.

Langlois Point.—A fixed light; erected in 1812; a square white wooden building 8 feet in height; the lantern 36 feet above high water; the light is shown all night, and is seen 5 miles in clear weather. Latitude $46^{\circ} 35' 1''$ north; longitude $72^{\circ} 0' 50''$ west.

St. Pierre de Becquets.—A fixed light; erected in 1842; a white square building of wood 12 feet in height; the lantern 55 feet above high water; the light is shown all night, and is seen 5 miles. Latitude $46^{\circ} 30' 40''$ north; longitude $72^{\circ} 13' 24''$ west.

Batisean.—Two fixed lights, 738 feet asunder, in a S. 74 W. direction; erected in 1842; white square wooden buildings—one 23 feet in height, with the lantern 30 feet above high water; the other 7 feet in height, with the lantern 16 feet above high water. The light is shown all night, and is seen 3 miles in clear weather. Latitude $46^{\circ} 30' 22''$ north; longitude $72^{\circ} 15' 17''$ west.

Champlain.—A fixed light; erected in 1844; a square white wooden building 7 feet in height; the lantern 28 feet above high water; the light is seen 4 miles in clear weather. Latitude $46^{\circ} 26' 41''$ north; longitude $72^{\circ} 21' 38''$ west.

Cape Magdalen—lower lights.—Two fixed lights, $375\frac{1}{2}$ feet asunder, in a N. 60 E. direction; erected in 1842; white square buildings of wood—one 13 feet in height, and the lantern 44 feet above high water; the other 10 feet in height, and the lantern 31 feet above high water. The light is seen 4 miles in clear weather. Latitude $46^{\circ} 23' 56''$ north; longitude $72^{\circ} 28' 14''$ west.

Cape Magdalen—upper lights.—Two fixed lights, 706 feet asunder, in a S. 85 W. direction; erected in 1842; square white wooden buildings—one 24 feet in height, with the lantern $49\frac{1}{2}$ feet above high water; the other 10 feet in height, with the lantern 36 feet above high water. The light is seen 6 miles in clear weather. Latitude $46^{\circ} 23' 26''$ north; longitude $72^{\circ} 29' 22''$ west.

Port St. Francis.—Two fixed lights, 268 feet asunder, in a S. 76 W. direction; erected in 1839; square white wooden buildings—one 21 feet in height, with the lantern 31 feet above high water; the other 4 feet in height, with the lantern 12 feet above high water. Latitude $46^{\circ} 16' 30''$ north; longitude $72^{\circ} 38' 5''$ west. These erections are very small, only 4 feet square; they are removed in the fall and replaced in spring to avoid ice.

Point du Lac.—A fixed light; erected in 1842; a square white wooden building 24 feet in height; the lantern 71 feet above high water. The light is seen 12 miles in clear weather. Latitude $46^{\circ} 16' 54''$ north; longitude $72^{\circ} 41' 15''$ west.

Lake St. Peter.—Light vessel; moored $2\frac{1}{4}$ miles SSE. $\frac{1}{2}$ E. from Rivière du Lép; placed in 1827; the lantern is $15\frac{1}{2}$ feet above high water; the vessel is painted red; the light is seen 6 miles. Latitude $46^{\circ} 11' 41''$ north; longitude $72^{\circ} 54' 15''$ west. Removed in winter on account of ice.

Lake St. Peter.—Light vessel; moored on north side of channel, 3 miles below Flat island; placed in 1827; the lantern $15\frac{1}{2}$ feet above high water; the vessel is painted red; the light is seen 6 miles in clear weather.

proach of winter on account of ice.

Raisin Poin'.—A fixed light, erected in 1842. A square white wooden building, sixteen feet in height; the lantern is twenty-six feet above high water; the light is seen six miles in clear weather. Latitude $46^{\circ} 6' 24''$ north; longitude $72^{\circ} 58' 49''$ west. Removed at the approach of winter on account of ice.

Valtrie island, south side.—Two fixed lights, in a N. 38 E. direc-
tion; erected in 1842. Square red wooden buildings—one twenty feet in
height, with lantern twenty-five feet above high water: the other ten feet
in height, with lantern fifteen feet above high water; the light is seen
seven miles in clear weather. Latitude $45^{\circ} 53' 12''$ north; longitude 73°
 $16' 58''$ west. Removed at the approach of winter on account of ice.

Arpentigny.—Two fixed lights, seven hundred and seventy feet asun-
der, in a N. 12 E. direction; erected in 1842. Square white wooden
buildings—one ten and a half feet in height, with lantern thirty and
a half feet above high water: the other twenty and a half feet in height,
with the lantern fourteen and a half feet above high water; the light is
seen four miles in clear weather. Latitude $45^{\circ} 45' 12''$ north; longitude
 $73^{\circ} 27' 12''$ west.

Bague is'et.—Centre of islet. A fixed light; square red wooden build-
ing, fourteen feet in height; the lantern fourteen feet above high water;
the light seen four miles in clear weather. Latitude $45^{\circ} 44' 24''$ north;
longitude $73^{\circ} 27' 20''$ west. Removed at the approach of winter on ac-
count of ice.

Montreal.—Two fixed lights, two hundred and nineteen feet asunder,
in a N. 41 E. direction; erected in 1832. Red wooden buildings—
one twenty-one feet in height, with lantern twenty-nine feet above high
water: the other thirty-one feet in height, with lantern thirty eight and
a half feet above high water; the light is seen four miles in clear weather.
Latitude $45^{\circ} 30' 34''$ north; longitude $74^{\circ} 34' 14''$ west.

Grosse Point—Upper entrance of Beauharnois canal. A fixed light;
erected in 1845. Square wooden building, twenty feet in height, the
lantern twenty feet above high-water mark; the light seen eight miles in
clear weather. Latitude $45^{\circ} 14'$ north; longitude $74^{\circ} 10'$ west.

Lake St. Francis—Cheney island. A fixed light; erected in 1847.
A square wooden building, thirty feet in height, the lantern forty feet
above high water; the light seen ten miles in clear weather. Latitude
 $45^{\circ} 3'$ north; longitude $74^{\circ} 49'$ west.

Lake St. Francis—Lancaster bar. A fixed light; erected in 1844. A
square wooden building, twenty feet in height, the lantern twenty feet
above high water; the light is seen eight miles in clear weather. Latitude
 $45^{\circ} 6'$ north; longitude $74^{\circ} 53'$ west.

NOTE—The lights above mentioned, from St. Paul's island to Stone
Pillar island, are within the gulf and river St. Lawrence, below Quebec.
The rest are within the river St. Lawrence, above Quebec, and below
lake Ontario.

LAKE ONTARIO.

Gage island.—A fixed light; erected in 1833. A round stone building,
forty feet in height, the lantern forty-five feet above high water; the light

is seen fifteen miles in clear weather. Latitude $44^{\circ} 9'$ north; longitude $76^{\circ} 39'$ west.

Outer Drake island.—A fixed light; erected in 1828. The building is sixty-two feet in height, the lantern sixty-eight feet above high water; the light is seen twenty-two miles in clear weather. Latitude $43^{\circ} 57'$ north; longitude $76^{\circ} 54'$ west.

Peter Point.—A revolving light, interval 1 minute and 40 seconds; erected in 1833. The building is sixty feet in height, the lantern sixty-two feet above high water; the light is seen twenty-five miles in clear weather. Latitude $43^{\circ} 51'$ north; longitude $77^{\circ} 13' 45''$ west.

Presque Isle.—Northeast point. A fixed light; erected in 1840. An octagon stone building sixty-three feet in height, the lantern sixty-seven feet above high water; the light seen eighteen miles in clear weather. Latitude $44^{\circ} 1'$ north; longitude $77^{\circ} 46'$ west.

Coburg harbor.—A fixed light; erected in 1844. A square wooden building sixteen feet in height, the lantern twenty feet above high water; the light seen eight miles in clear weather. Latitude $43^{\circ} 58'$ north; longitude $78^{\circ} 13'$ west.

Peter Rock, or Gull island.—A fixed light; erected in 1840. A round stone building forty-eight feet in height, the lantern forty-five feet above high water; the light shown all night, and seen ten miles in clear weather. Latitude $43^{\circ} 56'$ north; longitude $78^{\circ} 17'$ west.

Windsor.—A fixed light; erected in 1844. A square building eight feet in height, the lantern twelve feet above high water; the light is seen five miles in clear weather. Latitude $43^{\circ} 52'$ north; longitude $78^{\circ} 53'$ west.

Toronto.—Gibraltar point. A fixed light; erected in 1820. A hexagonal stone building sixty-two feet high, the lantern sixty-six feet above high water; the light is seen eighteen miles. Latitude $43^{\circ} 32'$ north; longitude $79^{\circ} 27'$ west.

Toronto.—Queen's wharf. A fixed light; erected in 1838. A hexagonal stone building sixteen feet in height, the lantern twenty-two feet above high water; the light is seen six miles in clear weather. Latitude $43^{\circ} 39'$ north; longitude $79^{\circ} 28'$ west.

Oakville.—A fixed light; erected in 1836. An octagonal wooden building thirty-six feet in height, the lantern forty-two feet above high water; the light is seen twelve miles in clear weather. Latitude $43^{\circ} 27'$ north; longitude $79^{\circ} 46'$ west.

Burlington bay.—Two fixed lights; erected in 1845 and 1838. The former fourteen feet in height, with the lantern eighteen feet above high water; the latter fifty-four feet in height, with the lantern sixty feet above high water. The lights are red; that of the former is seen four miles, of the latter fifteen miles, in clear weather. Latitude $43^{\circ} 19'$ north; longitude $79^{\circ} 54'$ west.

Dalhousie harbor.—A fixed light. The building is twenty feet in height; the lantern is twenty feet above high water; the light is seen six miles in clear weather. Latitude $43^{\circ} 13'$ north; longitude $79^{\circ} 12'$ west.

LAKE ERIE.

Port Colburn.—A fixed light; is only being built. Latitude $42^{\circ} 53'$ north; longitude $79^{\circ} 15'$ west.

Mohawk island.—A revolving light; is only being built. Latitude $42^{\circ} 47'$ north; longitude $79^{\circ} 29'$ west.

Welland canal.—Port Maitland. A fixed light; square building. Latitude $42^{\circ} 52'$ north; longitude $79^{\circ} 40'$ west.

Port Dover.—A fixed light; erected in 1846. Square building, twenty-four feet in height; the lantern eighteen feet above high water. The light is seen eight miles in clear weather. Latitude $42^{\circ} 45'$ north; longitude $80^{\circ} 16'$ west.

Long Point.—East extreme. A fixed light; erected in 1843. An octagonal wooden building, sixty feet in height; the lantern sixty-five feet above high water. The light is shown all night, and is seen twenty-five miles in clear weather. Latitude $42^{\circ} 33'$ north; longitude $80^{\circ} 9'$ west.

Long Point city.—Light vessel; placed in 1844. Two lights placed vertically, eight feet apart; seen eight miles in clear weather. Latitude $42^{\circ} 35'$ north; longitude $80^{\circ} 25'$ west.

Big Otter creek.—A fixed light. Latitude (about) $42^{\circ} 39'$ north; longitude (about) $80^{\circ} 54'$ west.

Port Burwell.—A fixed light; erected in 1840. An octagonal wooden building, one hundred and sixteen feet in height; the lantern ninety-six feet above high water. The light is seen ten miles in clear weather. Latitude $42^{\circ} 38'$ north; longitude $81^{\circ} 1'$ west.

Catfish creek.—A floating light. Latitude (about) $42^{\circ} 39'$ north; longitude (about) $81^{\circ} 5'$ west.

Port Stanly.—A fixed light; erected in 1844. The building is twenty feet in height; the lantern is twenty feet above high water. The light is seen four miles in clear weather. Latitude $43^{\circ} 41'$ north; longitude $81^{\circ} 17'$ west.

Rondeau.—A fixed light; erected in 1845. The building is twenty feet in height; the lantern is twenty feet above high water. The light is seen four miles in clear weather. Latitude $42^{\circ} 16'$ north; longitude $82^{\circ} 1'$ west. This position is uncertain.

Pelé island.—A fixed light; erected in 1833. A round stone building, forty feet in height; the lantern forty feet above high water. The light is shown all night, and is seen nine miles in clear weather. Latitude $41^{\circ} 50'$ north; longitude $82^{\circ} 46'$ west.

RIVER DETROIT.

Bois Blanc island.—South end. A fixed light; erected in 1837. Round stone building, forty feet in height; the lantern fifty-six feet above high water. The light is shown all night, and is seen eighteen miles in clear weather. Latitude $42^{\circ} 5'$ north; longitude $83^{\circ} 13'$ west.

LAKE ST. CLAIR.

Mouth of river Thames.—Two fixed lights—one a square wooden building, 15 feet in height, with lantern 15 feet above high water; light seen six miles in clear weather. The other a round stone tower, 30 feet in height; the lantern 34 feet above high water, and the light seen 12 miles in clear weather. The former was erected in 1845, the latter in 1847. Latitude $42^{\circ} 18'$ north; longitude $82^{\circ} 36'$ west.

LAKE HURON.

Goderich.—A fixed light, erected in 1847; a square tower 20 feet in height. The lantern 125 feet above high water; the light seen 25 miles in clear weather. Latitude $43^{\circ} 35'$ north; longitude $81^{\circ} 52'$ west.

NEW BRUNSWICK.

WITHIN THE GULF OF ST. LAWRENCE.

Miramichi bay.—Escuminac point. A fixed light, erected in 1841; a white wooden building, 58 feet in height. The lantern 78 feet above high water; the light shown all night, and seen 14 miles in clear weather. Latitude $47^{\circ} 4' 36''$ north; longitude $64^{\circ} 47' 46''$ west.

WITHIN THE BAY OF FUNDY.

Cape Enrage.—A fixed light, erected in 1840; a square tower 39 feet in height. The lantern 161 feet above high water; the light is shown all night, and is visible from NW. to NE. by E., and is seen 15 miles in clear weather. Latitude $45^{\circ} 36'$ north; longitude $64^{\circ} 46' 40''$ west.

Quaco.—A revolving light, interval 20 seconds; erected in 1835. An octagonal building, white and red, horizontally; 56 feet in height. The lantern 70 feet above high water. The light is shown all night, and is seen 15 miles in clear weather. Latitude $45^{\circ} 19' 33''$ north; longitude $65^{\circ} 31' 54''$ west.

St. John harbor—Partridge island. A fixed light; erected in 1802. An octagonal building, striped red and white vertically; 40 feet in height. The lantern 119 feet above high water; the light is shown all night, and is seen 20 miles in clear weather. Latitude $45^{\circ} 14' 3''$ north; longitude $66^{\circ} 35'$ west. A bell is sounded in foggy weather.

St. John harbor—Beacon tower. A fixed light; erected in 1828. Octagonal building, striped white and black vertically; 24 feet in height. The lantern forty-one feet above high water; the light is seen ten miles in clear weather. Latitude $45^{\circ} 15'$ north; longitude $66^{\circ} 3' 36''$ west.

Point Lepreau—Two fixed lights, vertical, twenty-eight feet apart; erected in 1831. The building is octagonal, striped red and white horizontally; it is 24 feet in height. The lanterns are eighty one and fifty-three feet above high water; the light is shown all night, and is seen fifteen miles in clear weather. Latitude $45^{\circ} 3' 50''$ north; longitude $66^{\circ} 27' 30''$ west.

Campo Bello island.—A fixed light; erected in 1829. An octagonal white building with a red cross; forty-five feet in height. The lantern sixty-four feet above high water; the light is shown all night, and is seen fifteen miles in clear weather. Latitude $44^{\circ} 57' 40''$ north; longitude $66^{\circ} 53' 55''$ west.

St. Andrew's point.—A fixed light; erected in 1833. An octagonal white building, thirty four feet in height. The lantern forty two feet above high water. Latitude $45^{\circ} 4' 13''$ north; longitude $67^{\circ} 3' 48''$ west.

Machias Seal islands.—East island. Two fixed lights, ESE. and WNW., 200 feet asunder; erected in 1832. An octagonal white building, thirty six feet in height. The lantern forty eight feet above high water;

the light is shown all night, and is seen fifteen miles in clear weather. Latitude $44^{\circ} 30' 3''$ north; longitude $67^{\circ} 6' 10''$ west.

Gannet Rock.—A revolving light, interval twenty second; erected in 1836. An octagonal building, striped black and white vertically; fifty-three feet in height. The lantern sixty-six feet above high water; the light is shown all night. Latitude $44^{\circ} 30' 40''$ north; longitude $66^{\circ} 52'$ west. Gun in answer to signals at sea.

NOVA SCOTIA.

Pictou harbor.—A fixed light; erected in 1834. A wooden building, colored white and red vertically; fifty-five feet in height. The lantern sixty-five feet above high water; the light is shown all night, and is seen thirteen miles in clear weather. Latitude $45^{\circ} 41' 30''$ north; longitude $61^{\circ} 29' 20''$ west.

Canso Gut.—North entrance. A fixed light; erected in 1842. A square white wooden building, thirty-five feet in height. The lantern 110 feet above high water; the light is shown all night, and is seen eighteen miles in clear weather. Latitude $45^{\circ} 41' 49''$ north; longitude $61^{\circ} 29' 20''$ west.

Guysboro' harbor.—A fixed light; erected in 1846. A square white beacon, twenty feet in height. The lantern is 30 feet above high water; the light is shown all night, and is seen eight miles in clear weather. Latitude $45^{\circ} 22'$ north; longitude $61^{\circ} 31'$ west.

Canseau.—Two fixed lights in one tower, vertical, thirty-five feet apart; erected in 1822. The building is alternately white and red horizontally; it is sixty feet in height; the lantern is eighty-eight feet above high water; the light is shown all night; the upper light is seen fifteen, the lower nine miles, in clear weather. Latitude $45^{\circ} 20'$ north; longitude $60^{\circ} 51' 46''$ west.

Sydney.—A fixed light; erected in 1832. The building is an octagon, painted red and white vertically; it is fifty-one feet in height; the lantern is seventy feet above high water; the light is shown all night; it is seen fourteen miles in clear weather. Latitude $46^{\circ} 16' 16''$ north; longitude $60^{\circ} 10'$ west.

Scatarie island.—A revolving light; erected in 1839. The building is octagonal and white; sixty feet in height; the lantern ninety feet above high water; the light is shown all night, and is seen fifteen miles in clear weather. Latitude $46^{\circ} 2' 17''$ north; longitude $59^{\circ} 41'$ west.

Louisburg harbor.—A fixed light; erected in 1842; a square building, white with black stripes; thirty-five feet in height; the lantern eighty-five feet above high water; the light is shown all night, and is seen sixteen miles in clear weather. Latitude $45^{\circ} 53'$ north; longitude $59^{\circ} 50'$ west.

Beaver islands.—East island. A revolving light, interval two minutes; erected in 1846. A white building, with two black balls seaward; thirty-five feet in height; the lantern seventy feet above high water; the light is shown all night, and is seen twelve miles in clear weather. Latitude $44^{\circ} 49'$ north; longitude $62^{\circ} 61'$ west.

Halifax harbor.—A fixed light; erected in 1831; a circular white building forty-eight feet in height; the lantern fifty-eight feet above high water; the light is red; it is shown all night, and is seen ten miles in clear weather. Latitude $44^{\circ} 36' 5''$ north; longitude $63^{\circ} 35' 40''$ west.

Sambro island.—A fixed light; erected in 1783; the building is white, octagonal, sixty feet in height; the lantern 132 feet above high water; the light is shown all night, and is seen twenty miles in clear weather. Latitude $44^{\circ} 26' 17''$ north; longitude $63^{\circ} 35' 16''$ west. If a gun is fired during a fog, it will be answered from the island.

Lunenburg bay.—Two lights—the upper revolving, with one minute interval; the lower fixed; erected in 1832. The building is red, fifty feet in height; the revolving lantern is ninety feet above high water—the fixed sixty; they are shown all night; the upper is seen fourteen and the lower eight miles in clear weather. Latitude $44^{\circ} 22'$ north; longitude $64^{\circ} 6'$ west.

Liverpool bay.—A revolving light; interval two minutes; erected in 1812; an octagonal building, red and white horizontally, fifty-eight feet in height; the lantern ninety feet above high water; the light is shown all night; it is seen sixteen miles in clear weather. Latitude $44^{\circ} 1' 50''$ north; longitude $64^{\circ} 40' 49''$ west.

Shelburne harbor.—Two fixed lights in one tower, vertical, thirty feet apart; erected in 1759. The building is black and white vertically, seventy feet in height; the upper lantern ninety feet—the lower sixty feet above high water. The lights are shown all night; the upper is seen eighteen miles, the lower ten miles, in clear weather. Latitude $43^{\circ} 37' 31''$ north; longitude $65^{\circ} 16' 30''$ west.

Stal island.—A fixed light, erected in 1831. The building is sixty feet in height; the lantern is one hundred and twenty feet above high water; the light is shown all night, and is seen eighteen miles in clear weather. Latitude $43^{\circ} 23' 50''$ north; longitude $66^{\circ} 0' 20''$ west.

Yarmouth.—A revolving light; interval one minute fifteen seconds; erected in 1839. The building is red and white vertically; height fifty-eight feet. The lantern is one hundred and thirty-six feet above high water. The light is shown all night, and is seen twenty miles in clear weather.

WITHIN THE BAY OF FUNDY.

Bryer island, west part.—A fixed light, erected in 1800; rebuilt in 1842. A white octagonal building, fifty-five feet in height; the lantern ninety-two feet above high water; the light shown all night, and seen fifteen miles in clear weather. Latitude $44^{\circ} 15' 51''$ north; longitude $66^{\circ} 23' 2''$ west.

Annapolis Gut.—A fixed light, erected in 1816. A square building, red and white; twenty feet in height; the lantern seventy-six feet above high water; the light is seen thirteen miles in clear weather. Latitude $44^{\circ} 40' 50''$ north; longitude $65^{\circ} 47' 20''$ west.

Bryer Island Light beacon.—Erected in 1850, at the south entrance of Westport, on the east side of the Bay of Fundy. Two white lights horizontally placed, to distinguish it from Bryer island light, at an elevation of forty feet above high-water mark.

Barrington light.—The commissioners of light-houses give notice that the light house erected last year on Point Baccaro, or Cape Latour, which forms the east side of Barrington bay, about midway between Cape Sabie and Cape Negro, is now in operation, and exhibits a bright flash light of fifteen seconds duration, with alternate eclipses of twenty-four or

twenty-four or

twenty-five seconds. As you approach, a dull light will gradually appear during the eclipses, and continue visible all the time. Its elevation is fifty feet above the sea level, (rise and fall.) The building is square, painted white, with a black ball on the seaward side.

This light will be very useful entering Barrington harbor and Port La-tour, as well as a good coast and leading light to clear the Half-moon ledges, Brazil and Bantam Rocks, and Cape Sable. It may be seen from the offing before losing sight of Seal island light westwardly, or Shelburne light eastwardly of it. The keeper resides in the light house, and is well acquainted with the coast and tides. It has often been observed when Cape Sable is obscured by fog. Point Bacaro will be free from it. Latitude of light $43^{\circ} 26' 9''$ north; longitude $65^{\circ} 28' 7''$ west; variation $15^{\circ} 40'$ west. Magnetic bearing:—Cape Sable, southern extreme, south 77° west—distant $7\frac{1}{4}$ miles; southern extreme, Blaek ledge, south 84° east—distant $1\frac{1}{4}$ mile; Salvages or Half-moons, south 88° east; Brazil rock, south $4^{\circ} 16'$ west—distant $5\frac{1}{2}$ miles; Bantam rock, south 45° west—distant $1\frac{1}{4}$ mile.

NEWFOUNDLAND.

Cape Bonavista.—A revolving light, interval 2 minutes; erected in 1843. The building is red and white, alternately; the height of the lantern is one hundred and fifty feet above high water; the light is shown all night. Latitude $48^{\circ} 42'$ north; longitude $52^{\circ} 8'$ west.

Harbor Grace.—A fixed light; erected in 1837. The light is shown all night, and is seen twenty-one miles in clear weather. Latitude $47^{\circ} 42' 20''$ north; longitude $49^{\circ} 58' 23''$ west. (There is some uncertainty as to the position.)

St. John harbor.—A fixed light; erected in 1834. The light is shown all night. Latitude $47^{\circ} 33' 50''$ north; longitude $52^{\circ} 40' 50''$ west.

Cape Spear.—A revolving light, interval 1 minute; erected in 1836. The building is of timber, colored white, or stone; the lantern is two hundred and seventy-five feet above high water; it is shown all night, and has been seen thirty-six miles. Latitude $47^{\circ} 30' 20''$ north; longitude $52^{\circ} 37' 5''$ west.

Cape Pine.—This light-house just built; it is to be a revolving light. The building is seventy-four feet in height; the lantern three hundred and twenty feet above high water. It will be lighted 1st January, 1851. Latitude $46^{\circ} 37' 12''$ north; longitude $53^{\circ} 32' 12''$ west.

FRENCH LIGHT AT NEWFOUNDLAND.

St. Pierre.—A light-house has been erected by the French government on Gallantry Head, near Cape river. The light is a fixed one; it burns at an elevation of about two hundred and fifty feet above the level of the sea; it may be seen (in passing by the south) from west-northwest to north-northeast at the distance of eighteen or twenty miles, in clear weather. In passing by the north, it is shut in by high land from north-northeast to west northwest.

PRINCE EDWARD ISLAND.

Hillsboro' bay.—A fixed light; erected in 1845. A white brick building, fifty feet in height; the lantern sixty-eight feet; the light is shown all night, seen thirteen miles in clear weather. Latitude $46^{\circ} 3' 15''$ north; longitude $63^{\circ} 2' 35''$ west.

Returns relative to the sea and inland trade and commerce of Canada.

- No. 1. Quantities and values of imports at Quebec in 1845.
 2. Quantities and values of exports at Quebec in 1845.
 3. Imports from Great Britain and Ireland in 1849.
 4. Exports in 1849.
 5. Exports of the produce of Canada in 1849.
 6. Imports into Quebec paying specific or *ad valorem* duties in the year 1849.
 7. Exports from the port of Quebec in the year 1849.
 7a. Exports from the port of Quebec in the year 1850.
 8. Number of foreign ships, &c., arriving at Quebec in the year 1850.
 9. Value of exports to all parts of the world from Quebec from 1841 to 1849, inclusive.
 10. Value of imports from all parts of the world at Quebec from 1841 to 1849, inclusive.
 11. Number of vessels, with their tonnage, &c., entered at Quebec, and cleared at same port, in the years ending 5th January, 1844, 1845, and 1849.
 12. Comparative statement of the quantity of the principal articles of export from the port of New Carlisle (district of Gaspi) in the years 1840, 1842, 1844, 1846, and 1849, with the value of imports and exports, as also the shipping owned and registered in those years.
 13. Comparative statement of the number of vessels, &c., which cleared outwards from the port of New Carlisle (district of Gaspi) to different countries, other than Canada, in the years 1840, 1842, 1844, 1846, and 1849.
 14. Comparative statement of the number of vessels, &c., &c., which entered and cleared at the port of Gaspi, in the years 1847 and 1848, for countries other than Canada.
 15. Quantity of the principal articles exported from the port of Gaspi during the year 1848, by sea and coastwise, with the total value of exports, &c., &c.
 16. Imports at Montreal in 1845.
 17. Exports at Montreal in 1845.
 18. Account of foreign goods imported at Montreal during the year ending 5th January, 1850.
 19. Account of goods exported from Montreal during the season ending 5th January, 1850.
 19a. Staple articles exported by sea in the year 1850.
 20. Value of imports from all parts of the world at the port of Montreal in each year from 1841 to 1849, inclusive.
 21. Value of exports to all parts of the world from the port of Montreal in each year from 1841 to 1849, inclusive.

- No. 22. Imports from the United States, inland, into the port of Montreal, for 1849 and 1850.
23. Tonnage, inwards and outwards, by sea, at the port of Montreal, in 1849.
24. Imports from sea into the port of Montreal for 1849.
25. Exports from Montreal by sea in 1849.
26. Comparative statement of the value of exports and imports at the ports of Quebec and Montreal from 1841 to 1849, both years inclusive, with the totals of such exports and imports, in Canadian and United States currency.
27. Exports from Canada by sea (exclusive of timber) from 1838 to 1849, both years inclusive—Montreal and Quebec.
28. Return of ships and tonnage inwards in Canada, (ports of Quebec and Montreal,) *from sea*, in the years 1829, 1832, 1838, 1843, and 1848.
29. Return of ships and tonnage cleared outwards from Canada, *by sea*, (ports of Quebec and Montreal,) in the years 1829, 1832, 1838, 1843, and 1848.
30. Quantities of goods paying specific duties imported into Canada by sea from 1838 to 1849, (both years inclusive,) with the value of goods paying *ad valorem* duties and those duty free.
31. Abstract statement of goods paying *ad valorem* duties, imported inland into Canada in 1847, with the amount of duty levied thereon.
32. Abstract statement of imports into Canada inland in 1847 paying specific duties, with the amount of duty.
33. Abstract of the value of goods, &c., subject to specific duties, imported into Canada in 1847 and 1848, with the amount of the duties.
34. Quantities of imports from Canada by inland ports for the years 1840, 1845, and 1849, and up to the 30th September, 1850—distinguishing the articles.
35. Exports from the United States to Canada by inland ports in 1840, 1845, and 1849, and three-quarters of 1850—distinguishing the articles, and showing their value.
36. Imports and exports to Canada of similar articles, showing the values of the annual exchange at different points of the same products for the year 1849.
37. Values of imports from Canada by inland ports for the years 1840, 1845, 1849, and up to 30th September, 1850—distinguishing the articles.
38. Statement showing the principal articles of imports from the United States into Canada by inland ports in the years 1844, 1847, 1848, and 1849.
39. Imports and exports, lake frontier, 1849—showing Canadian trade only.
40. Statement showing the duties paid on imports from Canada by inland ports for the years 1840, 1845, and 1849, and up to 30th September, 1850—distinguishing the articles.
41. Statement of the exports of timber and lumber from Canada by sea from 1845 to 1849, both years inclusive.

- No. 42. Comparative statement of the timber deals, &c., exported from Canada by sea in the years 1847, 1848, and 1849—exhibiting the increase or decrease of each article.
43. Statement showing the values of goods imported in Canada by inland ports for several years.
44. Canadian customs receipts for a series of years, showing the receipts at sea and inland ports, &c., &c.
45. Return of the number and tonnage of new vessels built and registered in the different ports of Canada in each of the years from 1832 to 1849, inclusive.
46. Imports into Canada, quantities and values of the articles which paid duty for consumption, (and also the free goods,) for the year 1849—showing the country whence they were imported.
47. Statement of the principal articles of foreign and British merchandise which paid duty for consumption during the year ending 5th January, 1850, compared with the imports and receipts of the preceding year.
48. Goods in warehouse, under bond, in the province of Canada, on the 1st January, 1850; also, the amount of duty to which they are subject.
49. Goods in warehouse, under bond, in the province of Canada, on 1st January, 1849, showing also the amount of duty to which they are subject, exclusive of wheat and other grain for grinding, in bond.
50. Value of goods (liable to duty and free) imported into the several ports of Canada during the years ending 5th January, 1849 and 1850, with duties.
51. Exports of the produce of Canada during the year 1849, and the country to which they were exported.
52. Exports at the port of St. John, L. C., for the years 1849 and 1850, of goods in bond and under debenture—year ending December 31.
53. Imports at the port of St. John, L. C., for the years ending 31st December, 1849 and 1850.
54. Exports at the port of St. John, L. C., for the years ending 31st December, 1848, 1849, and 1850.
55. An account of goods entered for warehousing at the ports of Montreal and Quebec, &c., in the year ending 5th January, 1850.
56. Goods exported to the United States, under transit and debenture, at the port of St. John, from the river St. Lawrence to Lake Champlain, for the year ending 5th January, 1850.
57. Value of merchandise exported from Canada inland to the United States during the years 1844 and 1845.
58. Quantity of United States produce imported into Canada *by sea and inland navigation* on which duty was paid in the years 1847 and 1848.
59. Description and quantities of the several articles imported into the United States by inland ports in the year 1848, with their value, as declared at the several custom-houses.

- No. 60. Account of the principal exports from Canada in the year ending 5th January, 1849, compared with the exports of the preceding year.
61. Return of goods entered for consumption at the port of Brockville, with the values thereof, showing the countries whence imported during the year 1849.
 62. Return of goods entered for consumption at the port of Kingston, with the values thereof, and the countries whence imported, during the year 1849.
 63. Return of goods entered for consumption at the port of Hamilton, with the values thereof, and the countries whence imported, during the year 1849.
 64. Return of goods entered for consumption at the port of Sault Ste. Marie, with the values thereof, and the countries whence imported, during the year 1849.
 65. Return of goods entered for consumption at the port of Stanley, with the values thereof, and the countries whence imported, during the year 1849.
 66. Return of goods entered for consumption, with the values thereof, at the port of Samia, foot of Lake Huron, and the countries whence imported, during the year 1849—from Michigan, U. S.
 67. Return of goods entered for consumption at the port of Cobourg, with the values thereof, and the countries whence imported, during the year 1849.
 68. Return of goods entered for consumption at the port of Queenston, with the values thereof, and the countries whence imported, in the year 1849.
 69. Return of goods entered for consumption at the port of Belleville, with the values thereof, and the countries whence imported, in the year 1849.
 70. Return of goods entered for consumption at the port of Toronto, with the values thereof, and the countries whence imported, in the year 1849.

The following statement of arrivals from the lower ports at the port of Montreal may prove interesting.

| | Number of craft. |
|---|------------------|
| 1842 | 11 |
| 1843 | 8 |
| 1844 | 26 |
| 1845 | 44 |
| 1846 | 60 |
| 1847 | 53 |
| 1848 | 61 |
| 1849 | 63 |
| 1850 | 90 |
| | |
| The total tonnage at our port last year was..... | 46,867 |
| In 1849 | 37,703 |
| | |
| Leaving an increase in favor of 1850 of..... | 9,164 |
| | |
| Total number of vessels, including those from the lower ports, at this port in 1850..... | 222 |
| In 1849 | 150 |
| | |
| Increase in favor of 1850..... | 71 |

No. 19 A—Continued.

Subjoined is a statement of the tonnage of the shipping at the port of Montreal since 1842.

| Years. | Tons. |
|------------|--------|
| 1842 | 41,369 |
| 1843 | 33,136 |
| 1844 | 48,186 |
| 1845 | 51,295 |
| 1846 | 55,868 |
| 1847 | 63,038 |
| 1848 | 42,157 |
| 1849 | 37,703 |
| 1850 | 46,867 |

Arrivals at the port of Montreal from Liverpool, Glasgow, and London, for 1849 and 1850.

No. 23.

Tonnage inwards and outwards, by sea, at the port of Montreal, in 1849.

| Inwards. | | | Outwards. | | |
|----------|----------|-------|-----------|----------|-------|
| Vessels. | Tonnage. | | Vessels. | Tonnage. | |
| 144 | 37,425 | 1,547 | 149 | 37,835 | 1,578 |

Six foreign vessels arrived at this port under license from the collector of customs, Quebec, which were entered outwards at this port for Quebec, and will be included in the Quebec return.

All railroad iron entered at this port in 1849 and 1850 had been previously entered at Quebec, and will be included in collector's return from that port.

Cargoes inwards and outwards in American vessels, by sea, in 1849, nil.

No. 24.

N. B.—The year 1847 was as remarkable for its imports as exports, as much more than one year's demand was imported in that year. Those for 1848 may rather be considered the balance required for that year. Eighteen hundred and forty-nine was an average year, and may be considered a fair measure of the annual imports.

*This includes £3 10s.—Cordials from the West Indies.

† The unenumerated class embraces a large quantity of several articles which should have been enumerated; but many collectors merely entered under one general head all goods paying 12½ per cent.—particularly papers, furs, oils, and glass.

‡ This sum includes corn, £109,953 2s. 11d.; wheat, £10,919 3s. 4d.; settlers, £27,473 6s. 5d.; travellers, £12,074. 17s. 7d.; making a total of

£165,443 10s. 2d.

No. 47.

Statement of the principal articles of foreign and British merchandise which paid duty for consumption during the year ending January 5, 1850, compared with the imports and receipts of the preceding year.

Notes— 1. As the act 12 Victoria, cap. 1, abrogated specific duties on very many articles, and substituted an *ad valorem*, the quantities were not correctly ascertained—the comparison is therefore made as to the values.

2. The duties are computed at the rates established by Mr. Hinck's tariff; but, as the law went into operation in the middle of a quarter, the amount does not correspond with the actual sums collected, which will account for the difference between this return and No. 5.

Total estimated duties in bond

62,100 13 5

NOTE.—The full amount of duty, as shown by the above statement, will not ultimately be paid into the treasury; it will be diminished, to a considerable extent, by loss on re-weight and re-gauge, and also by exportation.

No. 50.

Return of the value of goods (liable to duty and free) imported into the several ports of Canada during the years ending January 5, 1849 and 1850, with duties.

The number of British vessels have increased considerably this year, owing to the lumber trade, and flour and oats, and wheat, passing upwards through the Chambly canal. American canal boats navigating the Whitehall canal to Troy and Albany have also greatly increased, in consequence of a relaxation of the British navigation laws, permitting American vessels to pass through our waters and canals laden or unladen. A great deal of Canadian lumber is transported in them, which no doubt would greatly augment were the same freedom granted to British vessels in American waters and canals.

No. 56.

Account of goods exported to the United States under transit and debenture, at the port of St. John, from the river St. Lawrence to Lake Champlain, in the year ending January 5, 1850.

| In the year ending January 5, 1849..... | £57,937 5 5 |
| In the year ending January 5, 1850..... | 71,731 7 3 |
| *In the year 1850, to December 10, close of the navigation..... | 81,754 4 7 |

* A modification in the laws relating to inland navigation having been made, permitting British and American vessels to pass the port of St. John, through the Chambly canal, to the ports of Quebec and Montreal, &c., by merely reporting, without making an entry of their cargoes, as in former years, it is not in my power to give a value of all the goods imported. Reference must be made to the ports where the goods were entered to ascertain their value, (the value of those only entered at this port are given,) whether for duty or for warehousing at an inland port.

NOTE—The following articles, when imported directly into Canada from the United Kingdom, or from any British North American province, and being the growth, produce, or manufacture of the said United Kingdom, or of such province, respectively, shall be free from duty, except that, as regards the British North American province, the articles mentioned shall, respectively, be exempt from duty so long only as similar articles, being the growth, produce, or manufacture of the province of Canada, and exported from it directly to such other province, shall be there admitted free from duty; otherwise they shall be subject to the same duty as if imported from any other country. In New Brunswick and Nova Scotia the above conditions have been complied with, and the reciprocal arrangement is therefore in force. The following are the articles, viz: animals, beef, pork, biscuit, bread, butter, cocoa paste, corn or grain of all kinds, flour, fish, fresh or salted, dried or pickled, fish oil, furs or skins the produce of fish or creatures living in the sea, gypsum, horns, meat, poultry, plants, shrubs and trees, potatoes and vegetables of all kinds, seeds of all kinds, skins, pelts, furs or tails undressed, wood, viz: boards, planks, staves, timber, and firewood.

Principle of Canadian tariff.

- No. 1. Statement of the number of vessels, with their tonnage, and the quantity of the several articles, which paid tolls at the Montreal terminus and other sections of the St. Lawrence canals, and also the amount of tolls, for the year 1850.
2. Abstract of the number of vessels, with their tonnage, and the quantity of produce upwards and downwards, which paid tolls on the St. Lawrence canals at Montreal, for the year 1850.
3. Statement showing the number of vessels and quantity of produce ascending and descending the St. Lawrence canals upon which tolls have been collected at the Montreal terminus, for the year 1844, and to the year 1850, (both years inclusive) with the periods the canals opened and closed, &c., &c.
4. Aggregate statement shewing the quantity of each article transported on the Welland canal during the year 1850, and the amount of revenue collected thereon.
5. Statements showing the monthly receipts of tolls at the different offices on the Welland canal during the year 1850.
6. Statement showing the number of vessels, their country and tonnage, which have passed through the Welland canal during the year 1850, and the amount of revenue collected thereon.
7. Six tables showing the articles which passed through the Welland canal during the seasons of 1846, 1847, 1848, and 1849, and describing the articles, and their destination, of such as passed up and down through the same canal, in the year 1840, and one table showing the vessels and tonnage passing through said canal for the year 1849, distinguishing foreign from British.
8. Table showing the tons of merchandise, salt and furniture, which reached Lake Erie by the Erie and Welland canals in the year 1848.
9. Statement showing the property which passed through the Welland canal in the years 1847, 1848, and 1849.
10. Tables showing the tons of principal articles of western produce exported eastward through the Erie and Welland canals in 1848, &c., &c.
11. Rates of tolls charged on the Provincial canals, &c., &c.
12. Rates of tolls established on the Welland, St. Lawrence, and Chamby canals by proclamation of the Governor General.
13. Compendious statement showing the dimensions, extent, and other details of the Provincial canals constructed under the board of works of Canada.
14. Tabular statement of harbors on the lakes of Canada, 1850.
15. Comparative statement of the receipts by the St. Lawrence canals and river at the port of Montreal, and of exports from the same port, in the years 1845, 1846, 1847, and 1848.
16. Comparative statement of the rates of freight, in sterling and United States currency, for flour, wheat, and ashes, from Montreal to Liverpool, from 1843 to 1848, both years inclusive.

- No. 17. Letter from J. W. Dunscombe, surveyor of customs in Canada, stating the cost of building vessels at Quebec.
18. Copy of a letter from Mr. Thomas H. Oliver, of Quebec, to Henry Jessop, esq., collector of customs at that port, dated February 6, 1849, stating the cost of building ships there ready for sea, &c., &c.
19. Rates of portage on the river St. Lawrence to and from the port of Quebec, and also the amount of light dues and poundage, payable at the Trinity House, Quebec.

No. 1.—Statement showing the number of vessels, with their tonnage, and the quantity of the several articles, which paid tolls at the Montreal terminus and other sections of the St. Lawrence canals, for the year 1850, and the amount of tolls collected upon the same.

ALFRED GOUGH,
Collector of canal tolls, Montreal.

Tabular statement showing the number of vessels and quantity of produce ascending and descending the St. Lawrence canals, upon which tolls have been collected at the Montreal terminus, from the year 1844 to the year 1850, both years inclusive, with the periods the canal opened and closed to navigation each year, and time when closed during certain periods of the year for purposes of repair and enlargement.

UPWARD.

| Years. | Number of vessels. | Total tonnage of vessels. | Fish. | Tons | Pearlroad and Pig iron. | Baithenware. | Flinttutre. | Liquors. | Oil. | Sugar and molasses. | Castings, bar and wrought iron. | Mechandise. |
|------------------------------|--------------------|---------------------------|-------|--------|-------------------------|--------------|-------------|----------|-------|---------------------|---------------------------------|---------------------|
| 1844 | 2,156 | 131,543 | | 2,303 | | 947 | 339 | 50 | | | | 26,563 |

No. 3—Continued.

The following standard per ton weight of 2,240 pounds has been established for staple articles:

| | |
|-------------------------------------|----------------------------|
| Flour or oat meal..... | 10 barrels equal to 1 ton. |
| Beef or pork..... | 8 do do |
| Ashes..... | 4 do do |
| Butter or lard..... | 25 kegs do |
| Wheat or peas..... | 37 bushels do |
| Barley | 45 do do |
| Oats..... | 56 do do |
| Rye, Indian corn, and potatoes..... | 40 do do |
| Fish..... | 8 barrels do |
| Liquors | 240 gallons do |
| Salt..... | 30 bushels do |
| Gypsum..... | 7 barrels do |

N. B.—The quantity of produce that passed direct to Quebec via the Rapids upon which toll was not levied during the years 1844, 1845, and 1846, not having been ascertained, is omitted in the totals of those years; but the quantity which descended by this route toll-free in 1847 and 1848 is included in the total of their respective years, and also specified at foot. No use was made of this route since 1848, except casually:

| | Wheat. | Ashes. | Flour. |
|-------------------|--------|--------|--------|
| 1847.....tons.... | 222 | 7,126 | |
| 1848.....do..... | 2,864 | ... | 1,000 |

DECEMBER 3, 1850.

ALFRED GOUGH,
Collector of Canal Tolls, Montreal.

No. 4.
Aggregate statement showing the quantity of each article transported on the Welland canal during the year 1850, and the amount of revenue collected thereon.

| Articles. | From British to British ports. | | From British to American ports. | | From American to American ports. | | Totals. | | Amount of tonnage. |

The following table shows the present rate of all tolls charged on the provincial canals in 1850.

Canal rates of toll are divided into eight classes, as follows:

| | | | | | | | | |
|--------------------------|-----|-----|--------------------|-----|--------------------|-----|-----------------|----------------|
| Articles of produce..... | 1 6 | 1 6 | 1 6 | 0 6 | 3 6 | 0 3 | St. Catharines. | Dalhousie. |
| Class No. 5. | | | | | | | | One-eighth. |
| Articles of produce..... | 2 3 | 2 3 | 1 19 $\frac{1}{2}$ | 0 9 | 4 10 $\frac{1}{2}$ | 0 3 | Dunville. | Port Maitland. |
| Class No. 6. | | | | | | | | do. do. |
| Articles of produce..... | 3 0 | 3 0 | 1 10 $\frac{1}{2}$ | 0 9 | 5 7 $\frac{1}{2}$ | 0 3 | Dunville. | Port Colborne. |
| | | | | | | | | 3-eighths. |

| Class No. 7. | Class No. 8. | Class No. 8. | Class No. 8. | Class No. 8. | Class No. 8. | Class No. 8. | Class No. 8. | Class No. 8. |
|--|-------------------|--------------|--------------------|--------------|--------------------|--------------|----------------|---------------------------------|
| Articles of produce..... | 5 0 | 5 0 | 1 10 $\frac{1}{2}$ | 1 0 | 7 10 $\frac{1}{2}$ | 0 3 | Port Robinson. | Through lock & cut at Chippewa. |
| Lumber, viz: | | | | | | | | One-eighth. |
| Square timber per M. cubic feet, in boats..... | 20 0 | 5 0 | 5 0 | 5 0 | 5 0 | 5 0 | | |
| Do " do " do " in rafts..... | 30 0 | 10 0 | 10 0 | 10 0 | 10 0 | 10 0 | | |
| Round or flattened, under 12 x 12, per M. l. feet, in boats..... | 15 0 | 3 9 | 3 9 | 3 9 | 3 9 | 3 9 | | |
| Round or flattened, under 12 x 12, per M. l. feet, in rafts..... | 15 0 | 3 9 | 3 9 | 3 9 | 3 9 | 3 9 | | |
| Boards, planks, scantling, and sawed lumber, per M. feet inch measurement, in boats..... | 20 0 | 7 6 | 7 6 | 7 6 | 7 6 | 7 6 | | |
| Boards, planks, scantling, and sawed lumber, per M. feet inch measurement, in rafts..... | 0 9 | 0 9 | 0 9 | 0 9 | 0 9 | 0 9 | | |
| Pipe staves and headings, per M. feet..... | 1 0 | 1 0 | 1 0 | 1 0 | 1 0 | 1 0 | | |
| West India staves and headings, per M. feet..... | 10 0 | 8 9 | 8 9 | 8 9 | 8 9 | 8 9 | | |
| Barrel..... | 3 6 | 3 9 | 3 9 | 3 9 | 3 9 | 3 9 | | |
| Shingles..... | 2 0 | 2 0 | 2 0 | 2 0 | 2 0 | 2 0 | | |
| Firewood, per cord..... | 0 3 | 0 3 | 0 3 | 0 3 | 0 3 | 0 3 | | |
| Saw-logs, at 12 feet each..... | 0 7 $\frac{1}{2}$ | 1 3 | 1 3 | 1 3 | 1 3 | 1 3 | | |
| Mahogany, (except veneering,) per M. feet..... | 0 2 | 0 2 | 0 2 | 0 2 | 0 2 | 0 2 | | |
| Sawed lath, &c., &c..... | 3 9 | 3 9 | 3 9 | 3 9 | 3 9 | 3 9 | | |
| Empty barrels, each..... | 0 1 | 0 1 | 0 1 | 0 1 | 0 1 | 0 1 | | |

Freight and vessels paying half rate from Dunville, Port Maitland, and Port Colborne to pay no additional rate if going out through the Chippewa.

St. Lawrence canal—Section rates.—Navigation is divided into four sections, viz: Edwardsburg, Cornwall, Beauharnois, and Lachine. Vessels passing one section are charged quarter rate; two sections half rate; and so on. Portions of any one section passed will be deemed and calculated as a whole section. N. B.—Tolls on these canals, upwards or downwards, are payable, whether the canal or river be used, except rafts, which, descending the river, are free.

Chambly canal.—Vessels passing from Soeul to Chambly to pay one-third rate; from Chambly to St. John two-thirds rate.

No. 11—Continued.

The following standard per ton weight of 2,240 pounds has been established for staple articles:

| | 10 barrels equal to 1 ton. |
|-------------------------------------|----------------------------|
| Flour or oat meal..... | 8 do do |
| Beef or pork..... | 4 do do |
| Ashes..... | 25 kegs do |
| Butter or lard..... | 37 bushels do |

*Letter from J. W. Dunscombe, surveyor of customs in Canada, stating
the cost of building vessels at Quebec.*

INSPECTOR GENERAL OF CUSTOMS DEPARTMENT,

Toronto, December 11, 1849.

SIR: I have the honor to acknowledge the receipt of your letter of the 25th October last, addressed to the honorable inspector general, relative to the commercial intercourse between the United States and the British North American colonies.

And I have to acquaint you, in reply, that the cost of building hull and spars of vessels of six to ten hundred tons, warranted to class six years, if built of best materials, good workmanship, and properly fastened, would be about £6 10 (\$26) per ton currency. But vessels of that tonnage may be, and have been built, to class six years also, for about £5 (\$20) per ton, or even less; but the material used has been of inferior quality, although of the kinds required by Lloyds.

Vessels of less tonnage cost about ten shillings (\$2) per ton more in building.

The cost per ton, for rigging, sails, anchors, and cables, so as to fit a vessel ready to take in a cargo, would be about £3 (\$12) per ton more.

The cost of sailing colonial ships is the same as British built, and is about £42 10 (\$170) per month per 100 tons, inclusive of port charges, which of course varies according to the trade the vessel is employed in. In this sum is included captain and crew's wages, victualling, one per cent. per month for insurance, and a reasonable allowance for wear and tear.

I have the honor to be, sir, your most obedient servant,

JOHN W. DUNSCOMBE.

J. D. ANDREWS, Esq.,
St. John, New Brunswick.

No. 18.

*Copy of a letter from Mr. Thomas H. Oliver, of Quebec, to Henry Jessopp, esq., collector of customs at that port, dated February 6, 1849,
stating the cost of building ships there ready for sea, with a memorandum,
by the Hon. Geo. Pemberton, annexed.*

QUEBEC, February 6, 1849.

SIR: The following prices are as near as I can state for ships built and delivered at the port of Quebec, ready to receive cargo, and complete for sea, except provisions:

In 1844, £9 0 currency, or \$36 per ton, for old, or carpenter's measurement.

In 1845, 9 5 currency, or 37 per ton.

In 1846, 9 10 currency, or 38 per ton.

In 1847, £9 10 currency, or \$38 per ton.
 In 1848, 10 0 currency, or 40 per ton.

THOMAS H. OLIVER.

HENRY JESSOPP, Esq.,
Collector of her Majesty's customs, Quebec.

Memorandum attached to the foregoing letter by the Hon. George Pemerton, of Quebec.

"Small vessels, say from 200 to 400 tons, would cost about two dollars per ton more than the within prices.

"The difference between old and new measurement is sometimes as much as ten per cent.—that is, old is so much less than new.

"The navigation of the river St. Lawrence opens, on an average of years, at Quebec, on the first day of May, and closes about the 28th of November. Vessels have arrived at Quebec, from sea, on the 17th of April, but generally the first vessel from sea does not arrive at Quebec before the end of April—say from 25th April to 1st May."

[23]

Letter from the president of the Montreal Board of Trade, in answer to certain inquiries relative to the trade of Canada, with various valuable tables annexed.

MONTREAL, November 17, 1849.

SIR: I have the honor to acknowledge the receipt of your letter of the 25th October, which I have laid before the council of the Board of Trade of this city. It will afford the council and myself much gratification if any information at our command can assist you in preparing the report you are engaged on, or tend towards the completion of arrangements between the governments of Great Britain and the United States for the better regulation of the rapidly increasing trade between the latter country and these provinces.

In compliance with your wishes, I now transmit the following statements, viz:

1st. Statement of wood and lumber shipped inland to the United States in 1848.

2d. Statement of Canadian produce shipped inland to the United States in 1848.

3d. Statement of Canadian breadstuffs, &c., exported to Great Britain in the years 1845, 1847, and 1848.

4th. Rates of freight from Lake Erie, &c., to Quebec.

Statements Nos. 1 and 2 have been compiled with considerable care, from information obtained through the inspector general of the province, and were laid before the legislature at its last session, and printed by order of the lower house. I may observe that statement No. 2 was, I believe, compiled from returns obtained from officers of the United States customs at the ports of entry along the frontier—the statistics here, of the customs department, not being sufficiently accurate as regards exports inland to the United States to supply the required information; and although the returns of flour and wheat certainly appear large, you will have means within your reach of effectually detecting inaccuracy, should there be any, in this part of the statement.

The returns given in No. 3 are from the customs department of this province, and may be confidently relied upon. With regard to the article of flour, it must be observed that a large portion of what was exported was probably manufactured from United States wheat, as, during the existence of protection to the colonies, all flour made in Canada was admitted into Great Britain as Canadian produce, at a low rate of duty; and thus it would appear that, under the old colonial system, the great wheat-growing States of the west, Ohio, Michigan, &c., must have participated to no inconsiderable extent in the benefits of protection; whereas since its removal they have to compete at a disadvantage in the English markets with the grain-growing countries of Europe, whence the cost of transport is cheaper, and where labor is less expensive.

Statement No. 4 gives the rates of freight, as nearly as ascertainable, from ports on Lake Erie to Quebec, as well as the average rate of freight to Great Britain in the years 1846, 1847, and 1848.

Produce seldom comes this way from Buffalo, but Port Maitland, at the Erie entrance of the Welland canal, of which you have the rates, is about the same distance.

Regarding the navigation of the St. Lawrence, from 25th April to 25th

November may be taken as a fair average of the duration of time that the river, from Montreal seaward, is free from ice, and navigable. Vessels, however, have reached Quebec earlier in April, and departed even as late as December. Insurances from Quebec to London, and *vice versa*, vary according to the periods of departure; the following rates will be found pretty accurate:

| | | | |
|---|--------------------------------|---------------------------------|-----------|
| From London to Quebec, sailing before 15th April | - | $2\frac{1}{2}$ | per cent. |
| Do do from 15th April to the end of Au- | gust, after which vessels sel- | $1\frac{1}{4}$ a $1\frac{1}{2}$ | " |
| From Quebec to London, from 1st May to 1st September, | doin leave for Canada | $1\frac{1}{4}$ | " |
| Do do from 1st to 15th September | - | $1\frac{1}{4}$ | " |
| Do do from 15th Sept'r to 1st October, | - | $2\frac{1}{4}$ | " |
| Do do from 1st to 15th October | - | $2\frac{1}{4}$ a $3\frac{1}{2}$ | " |
| Do do from 15th Oct. to 1st November, 4 $\frac{1}{2}$ a 5 | " | " | " |

After the 1st November the rates become arbitrary.

It may be remarked that these are the rates charged by the English underwriters; and, as much depends upon the state of the season, it is generally found that the New York offices, being better able to form a correct opinion on this point, take the fall risks of the St. Lawrence at much more moderate rates than the English underwriters.

It appears from the custom-house returns at Quebec, that no United States vessels visited that port during the years 1829, 1832, 1838, 1843, and 1849. In 1835 two schooners, of about seventy tons each, entered that port; in 1847 one vessel, the "Pomona" of New York, three hundred and nineteen tons, from Bremen, arrived there, and cleared for New York.

The foregoing statements furnish replies to your several inquiries; and with these I have the honor, also, to transmit a report from the commissioners of public works on the internal communications of the province, which you may find useful. With regard to the advantages which the commerce and agriculture of the United States are likely to derive from the free navigation of the St. Lawrence, it seems obvious that the throwing open this great channel for the products of the West cannot but have a most beneficial influence on both. Hitherto American vessels entering the St. Lawrence from the sea were not permitted to pass upwards beyond Quebec; or descending from the lakes, were debarred from proceeding seaward further than Montreal. Under the new navigation act the vessels of the United States may pass from the most western American ports on the lakes, freighted with the grain and flour of their country, down to the entire extent of the river and gulf of the St. Lawrence, to their destination in any quarter of the globe, whence they can return laden with the manufactures and productions of the most distant regions. The change to be thus produced cannot but give an impulse to trade and agriculture along the vast extent of the valley of the St. Lawrence.

It is to be hoped that the government of the United States will meet the liberal policy of England in an equally liberal spirit, more particularly with reference to a reciprocal free admission of products between this province and the States: the more so, as the action of our legislature will be much influenced thereby, in reference to the coasting trade of the province, which Great Britain has, in a great measure, placed under the control of our local governments.

As to ship-building, Quebec possesses many advantages. Vessels of over six hundred tons, to stand six years on the first letter at Lloyds, may be built—say, hull, masts, and spars, for £7 currency or \$28 per ton; or ready for sea, £9 a £10—say \$36 a \$40 per ton. This, I believe, is much below the cost of similar ships at New York; and I have no doubt that vessels to equal your best ships could be furnished in Canada, were capital largely invested in the trade, and proper attention given to the selection and seasoning of the timber requisite. Canada possesses elm and tamarack, most valuable in ship-building, as well as oak and the finest red and white pine.

It must depend upon the regulations and laws of the United States whether vessels built in Canada can be registered there as American property. No restrictions, however, will exist, upon the new navigation act coming into force in January next, to prevent American citizens building ships in the colonies for any destination they may think fit.

I have the honor to be, sir, your most obedient servant,

THOMAS RYAN,
President of the Montreal Board of Trade.

J. D. ANDREWS, Esq.,
U. S. Consul, St. John, N. B.

LINDSAY,
al Board of Trade.

The average rate of freight of flour, during last season, from the ports on Lake Ontario to Montreal, was about 25 cents per barrel: a considerable quantity was carried for 1s. per barrel.

To Quebec the average was 35 cents, with a good deal carried at 30 cents per barrel.

To ports on Lake Champlain 40 cents per barrel will have been the average rates, with some in midsummer at 1s. 9d. per barrel.

The rate from Burlington to New York was about 25 cents per barrel.

The rate from ports on Lake Erie would exceed that from Lake Ontario by about 15 cents per barrel.

We do not believe that in the present state of the trade and the public communications, any reduction on the rates of last year can be looked for; an increase thereon is rather to be apprehended, unless a larger and more upward freight can be obtained.

The average time occupied in performing the voyage cannot be stated; a large share of the business of the past season was done by steamers, but the chief proportion is still, and we think will continue to be, done by sailing-vessels. Freight steamers, laden with 2,500 or 3,000 barrels of flour, occupied about three days in running from Hamilton to this port; of which time about one-third was passed in the St. Lawrence canals. If the rapids could be descended, steamers of this class could come with ease from Hamilton in 48 hours, and with efficient tugging arrangements (and which would quickly follow) sailing-vessels should not average more than twice as long.

Suppose these works completed, and the Champlain (Whitehall) canal enlarged—a freight steamer with 2,500 or 3,000 barrels of flour could proceed from Hamilton to New York city, without breaking bulk, within four days, and within a week from any port on Lake Erie.

MACPHERSON & CRANE.

Freights in 1850.

Cleveland to Burlington via Montreal and Champlain canal—

On flour, per barrel - - - - - 40 to 55 cents.

[40 cents is an extreme rate; the average for 1850 may be called 50 cents.]

Cleveland to Burlington via Ogdensburg - - - - - 45 to 60 cents.

Montreal to Cleveland—

Railroad iron has been carried for 12s. 6d. per ton of 2,240 lbs. in September, and in October and November the rate rose to 17s. 6d. a 20s. per ton of 2,240 lbs.

St. John to Burlington - - - - - 5 cents.

Montreal to St. John - - - - - 10 cents.

15 cents to Burlington.

TREASURY DEPARTMENT,
Register's Office, February 10, 1851.

TOWNSEND HAINES, Register.

Statement of the imports from Canada of flour, wheat, and sawed lumber at the American ports named below during the year 1850: unofficial except Oswego.

| | Barrels of flour. | Bushels of wheat. | Feet of lumber. |
|---------------------|----------------------|----------------------|--------------------|
| Oswego | 253,632 | 1,019,492 | 50,685,682 |
| Buffalo | 19,244 | 66,001 | 12,206,168 |
| Ogdensburg | 32,999 | | |
| Rochester..... | | 27,805 | |
| Lake Champlain..... | | | 41,785,741 |
| Total..... | 305,875 | 1,113,298 | 104,677,591 |

Of the amount at Oswego, the following was bonded and warehoused: Flour, 244,524 barrels; wheat, 777,326 bushels.

F.

Returns relative to the trade and commerce of Nova Scotia.

| Bushels of wheat. | Feet of lumber. |
|-------------------|-----------------|
| 1,019,492 | 50,685,682 |
| 66,001 | 12,206,168 |
| | |
| 27,805 | |
| | 41,785,741 |
| ,113,298 | 104,677,591 |

: Flour, 244,524 barrels;

- No. 1. Detailed statements of imports and exports in Nova Scotia in 1845.
2. Detailed statement of the value in pounds sterling of all imports and exports into Nova Scotia and Cape Breton for the year 1848, distinguishing the several countries from which the same were imported, or to which exported, with the numbers and tonnage of all ships and vessels employed in the trade to and from all countries.
3. Return of the estimated value in pounds sterling of all articles exported from the province of Nova Scotia, distinguishing the several countries to which the same were exported, from the year 1836 to the year 1849, both inclusive.
4. Return of the estimated value in pounds sterling of all articles imported into the province of Nova Scotia, distinguishing the several countries from whence imported, from the year 1836 to the year 1849, inclusive.
5. Comparative statement of British and American tonnage entered inwards and cleared outwards at the several ports of Nova Scotia in the years 1838, 1843, and 1848.
6. Comparative statement of the British and American vessels which entered and cleared at the several ports of Nova Scotia in 1847 and 1849, with their number and tonnage.
7. Quinquennial average of imports and exports, and shipping inwards and outwards, in Nova Scotia, for the years 1845, 1846, 1847, 1848, and 1849.
8. Value of imports at the several ports of Nova Scotia in 1849.
9. Value of exports from the several ports of Nova Scotia in 1849.
10. Return of the numbers and tonnage of ships cleared outwards from Nova Scotia (and Cape Breton) from the year 1836 to the year 1849, both inclusive, distinguishing the countries to which they sailed.
11. Return of the numbers and tonnage of ships entered inwards in Nova Scotia (and Cape Breton) from the year 1836 to the year 1849, both inclusive, distinguishing the countries from whence they came.
12. Return of the numbers and tonnage of vessels entered inwards and cleared outwards at the several ports of Nova Scotia, to and from other British colonies in North America, during the year 1849.
13. Return of the numbers and tonnage of American and other foreign vessels which cleared at the port of Halifax, Nova Scotia, between January 5 and October 10, 1850.
- 13a. Return of the quantities of fish and oil exported from Halifax in 1850.
14. A statement of the number and tonnage of new vessels built and registered in Nova Scotia and Cape Breton from the year 1832 to the year 1849, inclusive.
15. List of free ports in the province of Nova Scotia in Dec., 1850.
16. Table of colonial impost duties in 1849.

No. 1.

Detailed statement of imports and exports in Nova Scotia in 1845.

2. Statement of the quantities of exports from the port of St. John, New Brunswick, and its out-bays, for the year ending 5th January, 1849, with their value in pounds sterling and in United States currency.
3. Table showing the total value in pounds sterling of the imports and exports, distinguishing vessels and countries, with the total tonnage owned, value of fish and coals imported and exported, the total tonnage inwards and outwards, at the ports of St. John and St. Andrew's, (which with their out bays include all the ports of New Brunswick,) in the years 1829, 1832, 1838, 1843, and 1848.
4. Comparative statement of the value in pounds sterling of goods imported into and exported from the port of St. John, New Brunswick, to and from the United States, in British and United States vessels respectively, from the year 1835 to the year 1849, both years inclusive.
5. Return of the principal articles exported from the port of St. John and its out bays, (including Miramichi, Bathurst, Dalhousie, Richibucto, Shediac, and Dorchester,) from the year 1819 to the year 1849, both inclusive.
6. Statement of vessels entered inwards and cleared outwards in the province of New Brunswick during the year 1847—showing the number of vessels, tonnage, and men employed; also whether British or foreign.
7. Statement of vessels entered inwards and cleared outwards in the province of New Brunswick during the year 1848, showing the number of vessels, tonnage, and men employed.
8. Table of the estimated value, in pounds sterling and in United States currency, of the imports of the province of New Brunswick from all parts of the world, from the year 1828 to the year 1849, both inclusive.
9. Table of the estimated value, in pounds sterling and in United States currency, of the exports to all parts of the world from the province of New Brunswick, from the year 1828 to the year 1849, both inclusive.
10. Return showing the quantity and value of American timber and other lumber shipped in American vessels from the port of St. John, New Brunswick, to the United States, from November, 1848, to November, 1849.
11. Imports and exports of New Brunswick for the year 1840.
12. Detailed statement of all articles imported into and exported from the province of New Brunswick, with the values of the same in pounds sterling, during the year 1845.
13. Imports and exports of New Brunswick for the year 1845.

- No. 14. Return of all ships, and their tonnage, which have entered inwards in the several ports of New Brunswick during the ten years from 1840 to 1849, inclusive.
15. Return of all ships, and their tonnage, which have cleared outwards from the several ports of New Brunswick during the ten years from 1840 to 1849, inclusive.
16. Return of the number and tonnage of American and other foreign vessels which have cleared outwards from the port of St. John, New Brunswick, to Great Britain, between 5th January and 5th October, 1850, specifying their several destinations and cargoes.
17. Return of new vessels built and registered in the province of New Brunswick (distinguishing the several ports where built) in each year from 1833 to 1849, both inclusive, with their number and tonnage.
18. A return of the total number of vessels and their tonnage, owned in New Brunswick, which existed on the registry of the several ports in that province on the 31st day of December in each year from 1836 to 1849, inclusive.
19. An account showing the quantities of timber and lumber exported from New Brunswick to the United States in the years 1840, 1845, 1848, 1849, and the first two quarters of 1850, in British and American vessels respectively.
20. Extract of a letter from John H. Robilliard, ship broker at St. John, New Brunswick, dated 11th November, 1850.
21. Letter from Mr. James Robertson, of St. John, New Brunswick, stating the cost of building ships and the facilities for doing so in New Brunswick, dated 10th December, 1850.
22. List of free ports in the province of New Brunswick.
23. Tariff of duties in the province of New Brunswick, 1849 and 1850.

No. 20.

*Extract of a letter from John H. Robilliard, ship-broker at St. John,
New Brunswick, dated November 11, 1850.*

"The operations under the new navigation act, during the past year, have been carried only to a limited extent as regards foreign tonnage, British shipping having enjoyed, as heretofore, by far the larger share of the carrying trade.

"The act has worked favorably for British shipping in several instances—more particularly as regards vessels from the Mediterranean, Russia, South America, &c., delivering cargoes at ports in the United States, and then loading return cargoes from this to England. It has also, as far as my observation has extended, worked favorably for American tonnage—several ships under the United States flag having loaded here during the season.

"Norwegian, Prussian, and other Baltic ships have also taken some few cargoes from this port; but, without a single exception, each cargo, whether under the American or any other foreign flag, has been for 'British account.'

"The rates of freight have been about the same, whether for British or foreign vessels, and have rules as follows: Deals, per St. Petersburg standard of 1,980 superficial feet, at sixty shillings sterling for Liverpool; seventy-five to eighty shillings for London and east coast of England; sixty-five to seventy five shillings for ports in Ireland and Bristol channel, according to size of ship, and whether sent direct to a desirable port, or running the chance of calling at Cork for orders. For the Clyde, sixty and sixty five shillings have been the ruling rates.

"The number of foreign vessels loaded at this port during the present season is as follows:

| | | | | | | | |
|-----------------|--------------|--------------|---|---|---|---|-----------|
| American 22, | Prussian 10, | Norwegian 13 | - | - | - | - | 45 |
| Hamburg 2, | Danish 1, | Swedish 1 | - | - | - | - | 4 |
| Mecklenburgh 1, | Bremen 2 | - | - | - | - | - | 3 |
| Austrian 1, | Neapolitan 1 | - | - | - | - | - | 2 |
| Total | | | | | | | 54 |
| | | | | | | | = |

"I consider the general effect of the new navigation laws as favorable to this province.

"JOHN HOBART ROBILLIARD."

No. 21.

Letter from Mr. James Robertson, of St. John, New Brunswick, stating the cost of building ships, and the facilities for doing so, in New Brunswick.

ST. JOHN, December 10, 1850.

SIR: In reply to your inquiries respecting the capabilities of the province of New Brunswick for ship-building purposes, I have much pleasure in furnishing the following general information relative to that branch of business, and the facilities which exist for carrying it on to an unlimited extent.

No colony of British North America is better supplied with the necessary quantity and description of wood of the most durable quality for constructing ships of all sizes, and it is now conceded by the surveyors of Lloyds, at London and Liverpool, that our hackmatac timber is but little, if at all, inferior to old English oak. This opinion, I am persuaded, is quite correct, from the fact that one vessel (at least) built of that material has already existed thirty years, and may last for an indefinite period should no accident occur.

It is also a fact that many vessels built in this province, principally of hackmatac, have been, after survey in England, classed A 1 for six years.

A great improvement has taken place of late years, both in regard to model and workmanship of the ships built in this city, and in the province generally. It only requires an increased demand to stimulate our ship-builders to outrival any of the neighboring republican ports in the excellence of the vessels produced, and still further reduce the cost of construction.

The experience of past years enables me to say that vessels of any size, from one hundred to one thousand tons burden, can be built and fitted out in the port of St. John in a style quite equal to any American packet ship, and at a cost not exceeding two-thirds of that of those splendid specimens of naval architecture.

Ship building may now be considered the staple manufacture of this province; and this is not at all surprising when we look at the variety of woods it produces, which, I am disposed to think, gives us a decided advantage over the New England States, as also over our fellow-colonists, the people of Canada, in the successful prosecution of this business.

The following memoranda may be relied upon as affording a pretty accurate idea of the materials best adapted for ship building purposes, as also of the cost of the various descriptions of vessels mentioned.

I take for example a ship built in the same manner as the "John R. Skiddy," the "Isaac Wright," or the "Yorkshire," all of New York, well-known vessels. For a ship of one thousand tons burden:

Stem, stern-post, &c.—oak; (in many cases pitch pine or hackmatac is substituted.)

Birch bottom—both timbers and plank outside and inside.

Hackmatac top timbers.

Hackmatac, or red pine, or pitch pine planking, from the wales up both outside and inside, and also the wales.

Pitch pine ceiling between decks is preferred.

Knees—all hackmatac.

Upper deck frame—hackmatac, or Bay of Fundy spruce.

Decks—white pine.

African, oak bitts, &c.

The vessel to be thoroughly copper-fastened; also to have the necessary quantity of iron fastening.

To be fitted with the best of Liverpool cordage, and with sails, chains, anchors, &c., complete, ready to receive cargo. Such a vessel can be furnished on contract at forty four dollars per ton, carpenter's measurement.

A vessel built of the same materials and partially copper-fastened will cost about one dollar per ton less.

A vessel built of the same materials and iron-fastened will cost about two dollars per ton less.

A decrease in size will naturally tend to a reduction in price, as the materials and outfits are not so costly. Thus, a ship of five hundred tons burden, built as above described, thoroughly copper fastened, may be completed at a cost not exceeding thirty-eight dollars per ton.

In the foregoing I have had reference to the regulations which Lloyds' surveyors have published, relative to the size and description of timber used in building, the thickness of plank, and the size and quantity of fastening, whether of iron or copper, for a vessel to stand six years in the first letter. Inferior ships have been and can be built at a much cheaper rate; but I have taken the above standard, in order that parties conversant with shipping may the more readily understand the data on which my statements are predicated.

With regard to vessels built at the out-ports in this province, the builders have the advantage of greater proximity to where the larger description of timber grows. They are thereby enabled to select, with little trouble, that which suits their purposes; but, on the other hand, they are subject to increased expenses for freights on their fastenings and other materials, which form no small item in the cost of construction, and often cause considerable delay and loss of time.

The finishing of vessels at the out-ports is generally inferior, although a material improvement is observable of late, chiefly owing to the employment of mechanics from the city of St. John.

Vessels from 400 to 600 tons, constructed of Bay of Fundy spruce, birch, and hackmatac, iron fastened, substantially put together, of good model, and well fitted for all general carrying purposes, with rigging, sails, chains, &c., &c., may be constructed for, and built at a rate varying from twenty-eight to thirty two dollars per ton, carpenter's measurement. This class of vessels forms no inconsiderable portion of the tonnage owned in the province.

With regard to the building of coaster vessels, this branch can be prosecuted to much advantage with us. Our facilities for doing so are even superior to those for constructing large ships. Comparing the difference of the cost of a vessel in this province with the cost of one in any port of the New England States, the cause is obvious. The fastenings and outfit can be procured cheaper here than in the United States; the workmanship is cheaper; and as to the finish, it can be executed in a style equal to any part of the world if required.

It is much more difficult to arrive at anything like a matter-of-fact state-

ment, in speaking of a smaller class of vessels than a thousand-ton ship. Every distinct trade requires a different class of vessels. Small vessels vary both in built and rigging, and consequently in the cost of building and outfit. Thus, for the purposes of one trade, a coaster would be built of great length and breadth, with a shallow hold and a fore and-aft rig; while another will be built with square sails, yards, &c., considerably enhancing the cost and expenses.

In conveying to you my ideas in these particulars, you will perceive the difficulties I labor under in submitting trustworthy details. What I have here said will, I hope, meet your expectations, and fully answer the end you have in view.

I am, sir, your obedient servant,

JAMES ROBERTSON.

J. D. ANDREWS, Esq.,
United States Consul.

On the following articles, for every one hundred pounds of the true and real value thereof, viz: boots, shoes, and other leather manufactures; carriages, wagons, sleighs, and other vehicles; chairs, and prepared parts of and for chairs; clock wheels; machinery and materials for clocks; household furniture, (except baggage, apparel, household effects, working tools and implements used and in use of persons or families arriving in this province, if used abroad by them, and not intended for any other person or persons, or for sale;) looking-glasses; oranges and lemons; whale oil, (except the return cargoes of vessels fitted out for fishing voyages from ports in this province;) wooden wares of all kinds; matches; corn brooms and brushes; hats, and hat bodies; piano fortés; snuff and cigars

£20 0 0

And all other goods, wares, and merchandise, not otherwise charged with duty, and not hereafter declared to be free of duty, for every one hundred pounds of the true and real value thereof

7 10 0

ARTICLES EXEMPTED FROM DUTY.

Baggage, apparel, household effects, working tools, and implements used and in use of persons or families arriving in this province, if used abroad by them, and not intended for any other person or persons, or for sale; books, printed; carriages of travellers not intended for sale; coins, and bullion; corn broom brush; corn, wheat, rye, Indian corn, barley, oats, rice, ground and unground, and buckwheat; barley meal, rye flour, and meal, oat meal, Indian meal, buckwheat meal; eggs; lines and twines for the fisheries; manures of all kinds; oil, rubber, fins, and skins, the produce of creatures living in the sea; the return of vessels fitted out in this province for fishing voyages; oil—seal, cod, hake, porpoise, palm, and rape; plants, shrubs, and trees; printing paper, types, printing presses, and printers' ink; rags, old rope and junk; rock salt; sails and rigging saved from vessels wrecked; salt; soap grease; wood and lumber, of all kinds, (except cedar, spruce, pine, and hemlock shingles.)

 Salted meats and biscuit are allowed to be shipped from bond, for ships' stores, duty free.

NOTE —The one per cent. duty upon all British and foreign manufactured articles, under the Loan Act, is in addition to the rates above specified.

By "An act to regulate the trade between the British North American possessions," passed 8th March, 1849, all articles the growth, production, or manufacture of Nova Scotia, (excepting spirituous liquors) are admitted into this province free of duty. The provisions of this act are intended to apply to the other British North American provinces, whenever similar importations are permitted by them from New Brunswick.

H.

Returns and tables relative to the trade and commerce of Newfoundland.

- No. 1. A return of the quantities and value of goods imported at the port of St. John, Newfoundland, in the year ending 5th January, 1847, showing the aggregate quantities of each article, and the value in sterling and United States currency.
2. A consolidated account of the goods imported into the colony of Newfoundland in the year ending 5th day of January, 1849, showing the aggregate quantities and value of the various articles imported.
3. A consolidated account of certain goods, showing their quantities and value, imported at the port of St. John, Newfoundland, during the year ending 5th January, 1850.
4. Abstract of the trade of Newfoundland for the year ending 5th January, 1845, showing the number of British and foreign vessels entered inwards, and their tonnage, and the value of the imports by such vessels, distinguishing foreign goods from British produce or manufactures, with the total value in pounds sterling and in United States currency.
5. Abstract of the trade of Newfoundland for the year ending 5th January, 1845, showing the number of British and foreign vessels cleared outwards, and their tonnage, and the value of the exports by such vessels, distinguishing British produce from foreign, with the total value in pounds sterling and United States currency.
6. Return of the value of imports from Great Britain, the North American colonies, and the United States, into the colony of Newfoundland, in the years 1829, 1832, 1838, 1843, and 1848, with the total value of *all* imports in those years, in pounds sterling and in United States currency.
7. Return of the value of exports to Great Britain, the North American colonies, and the United States, from the colony of Newfoundland, in the years 1829, 1832, 1838, 1843, and 1848, with the total value of *all* exports in pounds sterling and in United States currency.
8. Return showing the value (in pounds sterling and United States currency) of the various products of the fisheries exported from Newfoundland to the United States, the North American colonies, and other countries, in the years 1829, 1832, 1838, 1843, and 1848, with the total quantities of codfish exported in each of those years.
9. Return of ships, and their tonnage, which cleared outwards at the several ports of Newfoundland from 1832 to 1839, and in 1844, distinguishing the several countries for which they cleared.
10. Return of the tonnage of ships and vessels entered inwards and cleared outwards at the colony of Newfoundland, to and from Great Britain, the North American colonies, and the United States, in the years 1829, 1832, 1838, 1843, and 1848.

- No 11. Return of ships, and their tonnage, which entered inwards at the several ports of Newfoundland from 1832 to 1839, and in the year 1844, distinguishing the several countries from which they arrived.
12. An account of the number of vessels, their tonnage and men, which entered inwards and cleared outwards at the island of Newfoundland, during the year ending 5th January, 1850, distinguishing countries and vessels.
13. Statement of the number and tonnage of foreign vessels which entered and cleared at the port of St. John, Newfoundland, from 5th January, 1850, to 5th January, 1851, with an account of the staple articles exported in such vessels.
14. Account of imports, port of St. John, Newfoundland, in 1848, 1849, and 1850.
15. Total value of imports and exports in Newfoundland in 1847, 1848, and 1849; quantity and value of staple articles exported in 1848 and 1849; ships and vessels built in the years 1842 to 1849, inclusive; and ships owned and registered on 31st December, 1844 to 1849, inclusive.
16. Estimated value, in sterling, of articles imported in 1840.
17. Estimated value, in sterling, of articles exported in the year 1840.
18. Articles imported, 1845: estimated value in sterling.
19. Articles exported, 1845: estimated value in sterling.
20. Articles imported, 1849: estimated value in sterling.
21. Articles exported, 1849: estimated value in sterling.
22. Ships inwards for the year 1845, and ships outwards for the year ending the 5th January, 1850, together with value of exports for the year ending 5th January, 1850: estimated in value sterling.
23. Ships inwards for the year ending 5th January, 1850, together with value of imports for the year ending 5th January, 1850: estimated value in sterling.
24. Return of the number and tonnage of ships and vessels built in the colony of Newfoundland from 1838 to 1848, inclusive.
25. Return showing the quantity of coals imported into the colony of Newfoundland from Great Britain and the North American colonies, with their value in sterling and United States currency, in the years 1829, 1832, 1838, 1843, and 1848, as also the quantity of coals exported in those years.
26. Newfoundland tariff of duties, payable under the consolidated act passed by the local legislature in the session of 1849.
27. Tables of rates of pilotage in and out of the port of St. John, Newfoundland.

Return showing the quantity of coals imported into the colony of Newfoundland from Great Britain and the North American colonies, with their value in sterling and in United States currency, in the years 1829, 1832, 1838, 1843, and 1848, as also the quantity of coals exported in those years.

| Years. | Coals imported, in tons. | Value from Great Britain. | | Value from North Ameri- can colonies. | | Coals exported, in tons. |
|------------|--------------------------|---------------------------|-------------------------|---------------------------------------|-------------------------|--------------------------|
| | | Pounds sterl- ing. | United States currency. | Pounds sterl- ing. | United States currency. | |
| 1829 | 12,832 | £4,425 | \$21,240 | £1,904 | \$9,139 | |
| 1832 | 10,164 | 5,399 | 25,915 | 1,016 | 4,876 | 40 |
| 1838 | 11,984 | 2,370 | 11,376 | 5,560 | 26,688 | 82 |
| 1843 | 17,252 | 2,309 | 11,083 | 10,910 | 51,363 | 85 |
| 1848 | 19,945 | 3,595 | 17,256 | 14,273 | 68,534 | 60 |

NOTE.—The coals imported from the North American colonies are all from Sydney, Cape Breton, with the exception of a few cargoes from Pictou, Nova Scotia.

Newfoundland tariff of duties payable under the consolidated act passed in the local legislature during the session of 1849.

Note.—There are no returns of the tonnage, number of boats, or number of men employed in the fisheries, there being no regular fisheries established. The coasting vessels are employed in fishing when freights are not to be had; and most of the farmers on the seacoast pursue fishing, to a certain extent, as well as farming.

Account of the vessels, tonnage, and number of men employed in the foreign trade of the colony in 1840 and 1845.

K.

LAKE TRADE, COMMERCE, &c.

The following detailed report of the lake commerce was prepared for the Treasury Department in 1849-'50; and as no detailed report of the inland trade has ever been published, it was deemed proper by the officer in the Treasury Department having this matter in charge, to publish the whole report.

The abstracts of the trade of Buffalo and Oswego were prepared by J. S. Barton, who has on many occasions rendered important services to the inland commerce by his valuable statistics. The abstracts of the total inland trade annexed were prepared under the direction of Jacob Richardson, esq., collector of Oswego.

The aggregate value of the lake commerce in 1848 was estimated by Colonel Abert, of the topographical engineers, to be \$186,485,260—\$40,000,000 more than the foreign export trade of the country. The increase since 1848 is estimated at ten per cent.

Custom-house districts on the lake frontier.

The custom-house districts situated on our lake frontier are fourteen in number, as follows:

1. Oswegatchie; 2. Cape Vincent; 3. Sackett's Harbor; 4. Oswego; 5. Genesee; 6. Niagara; 7. Buffalo; 8. Presque Isle; 9. Cuyahoga; 10. Sandusky; 11. Miami; 12. Detroit; 13. Michilimackinac; 14. Chicago.

Nos. 1, 2, 3, 4, 5, 6, and 7, are in the State of New York; 8, in the State of Pennsylvania; 9, 10, and 11, in the State of Ohio; 12 and 13, in the State of Michigan, except the Green Bay portion, in the State of Wisconsin. No. 14 includes Indiana, Illinois, and part of the State of Wisconsin.

In these custom-house districts are enrolled and licensed a grand aggregate of 914 vessels of 161,305 tons, valued at \$6,624,854, and 7,601 men.

It may be as well here to note, that in many instances a vessel is owned by several parties residing in different States, and that such vessels are generally enrolled in the district where the majority of the owners are resident, or where the controlling interest is held.

The length of coast on which the above tonnage is employed is estimated at 2,673 miles.

The district of *Oswegatchie* is eighty miles in extent. It comprises the shipping ports of Massena, Louisville, Waddington, Ogdensburgh, Morristown, and Hammond.

Ogdensburgh, the principal port of entry, is situated near to the point where the river St. Lawrence intersects the 45th degree of north latitude, and 120 miles above Montreal. It is the centre of an extensive coasting trade. A railroad carried across the lower end of Lake Champlain, and passing through the States of Vermont and Massachusetts to Boston, is in course of construction. When completed, this route will be an immense artery of the trade from the western States and Canada, centering in Boston. Preparations are making for the erection of stations and wharves on a scale commensurate with the expectations so formed. A daily line of steamers run from Lewiston, on the Niagara river, through Lake

ated near to the point ree of north latitude, n extensive coasting lake Champlain, and sets to Boston, is in will be an immense Canada, centering in stations and wharves formed. A daily line river, through Lake

Ontario, along the American shore, touching at Genesee river, Oswego, and Sackett's Harbor. From the latter port they cross the lake to Kingston, in Canada. They then enter the St. Lawrence river; touch at French creek, or Clayton, on the American side; recross the river for Brockville, in Canada; thence shape their course for Morristown, and terminate their trip at Ogdensburgh.

These boats carry to Canada large quantities of goods brought to Oswego by the New York canals, under the transit and debenture laws. The direct trade of Ogdensburgh with Canada is small. The custom-house books show it to have been in 1848—

| | | | | |
|--|---|---|---|----------|
| Foreign goods imported | - | - | - | \$49,831 |
| Do do exported | - | - | - | 9,729 |
| Domestic products exported | - | - | - | 72,115 |
| And foreign goods imported up to October 1, 1849 | - | - | - | 48,395 |
| Foreign goods exported | - | - | - | 4,325 |
| Domestic products exported | - | - | - | 28,360 |

A line of British steamers which descend the river daily to Montreal, carrying passengers alone, here intercommunicate with the American steamboats. An exhibit of the coasting trade of Ogdensburgh for 1847, 1848, and up to 1st October, 1849, so far as the same can be correctly ascertained, is as follows:

| Imports coastwise. | 1847. | 1848. | 1849. |

| Wool, lbs. | - | 18,000 | 20,510 | 10,000 |
| Hops, bales | - | 187 | 200 | 150 |
| Sheep skins, No. | - | 20,000 | 20,000 | 15,000 |
| Apples, saleraus, paper, iron-castings, furniture, &c., estimated value | - | \$29,500 | \$33,434 | \$22,234 |
| The whole forming an estimated value of | - | 389,325 | 341,933 | 311,084 |

The discrepancy between the value of imports and exports is accounted for by the fact of a large illicit traffic with Canada being in existence. Tea, tobacco, whiskey, sugar, coffee, &c., imported coastwise into Ogdensburg, find their way into Canada—a moiety of which is only cleared at the custom house; and, notwithstanding every precaution, horses, cattle, and a variety of articles, are smuggled into our territory in return.

The number of vessels enrolled and licensed in the district of Oswegatchie were as follows:

| No. and class. | Tonnage and 95ths. | Men. | Value. |
|----------------|--------------------|------|-----------|
| 3 steamboats | 1,985 34 | 84 | \$170,170 |
| 1 brig | 252 | 9 | 8,000 |
| 3 schooners | 415 84 | 20 | 12,500 |
| 1 barge | 44 7 | 3 | 200 |
| <hr/> | | | |
| 8 | 2,697 30 | 116 | 190,570 |
| <hr/> | | | |

The tonnage engaged in the lake trade and owned in the district of Oswegatchie, in the following periods, amounted in

| | | | |
|------|---|---|--------------|
| 1829 | - | - | to 320 tons. |
| 1832 | - | - | to 630 " |
| 1838 | - | - | to 900 " |
| 1843 | - | - | to 954 " |
| 1848 | - | - | to 2,443 " |

Thus showing that, up to the present date, a gradual and steady increase in this branch of national industry has taken place.

The following abstracts, condensed from the custom-house returns furnished me, will show the extent of the trade of this district with Canada, in the years 1829, 1832, 1838, 1843, and 1848.

| 1848. | 1849. |

* No values stated.

The district of *Cape Vincent* comprehends the shipping ports of Alexandria bay, French Creek, or Clayton, and Cape Vincent, all situated on the river St. Lawrence; the district extends a distance of thirty-eight miles. Cape Vincent is the port of entry, distant about three miles from Lake Ontario. A lumbering business of some extent is here carried on, as likewise an active intercourse with Kingston, in Canada.

The district of *Sackett's Harbor* follows the shore of Lake Ontario from Tibbitt's Point, in a southeasterly course, to Chaument bay; thence around the bay, Black river, and Henderson's bay, terminating at Stony Point. Following the sinuosities of the shore, the length is estimated at one hundred miles. Shipments are made at Three-mile bay, Chaument, Point peninsula, Dexter, Sackett's Harbor, and Henderson. Sackett's Harbor is the port of entry.

The vessels enrolled and licensed in the district are—

| | Tons. 95ths. |
|----------------------|----------------|
| 1 steamer - | 56 22 |
| 2 propellers - | 398 41 |
| 44 sailing-vessels - | 7,978 37 |
| | <hr/> 8,433 05 |

and 311 men, and valued at \$307,310.

The value of imports from Canada in 1848 in American vessels was \$5,788, and the exports, also in American vessels, \$46,938. The former consisting of lumber, wheat, horses, cattle, &c.; and the latter, cotton shirtings, wicks and yarns, wagons, machinery, tea, tobacco, shoes, &c., &c.

The arrivals of vessels, American and foreign, were, in 1848—

| | No. | Tonnage. | Men. |
|---|-----|----------|-------|
| Arrivals coastwise - | 544 | 133,042 | 7,226 |
| Cleared do - | 582 | 143,882 | 7,810 |
| Arrivals from foreign ports, (American) - | 213 | 108,267 | 5,499 |

r 1843.

The district of Oswego, commencing at Stony Point, on Lake Ontario, and extending to the western shore of Sodus bay, a distance of eighty miles. The shipping places are Texas, Port Ontario, Sandy Creek, Oswego, Little Sodus, and Sodus Point. Oswego is the port of entry. Oswego city, with a population of 8,000 souls, is situated on both sides of the Oswego river, at its embouchure with Lake Ontario, where it forms a good harbor of easy access. The Oswego canal connects the city with the Erie canal at Syracuse, and the latter with Albany; thus opening up to it an inland navigation of upwards of 200 miles. The Syracuse railroad connects it also with the Buffalo and Albany railroad, yielding double facilities of communication with tide-water for all commercial purposes, and at all seasons. The Oswego canal also passes through the great salt districts of Salina and Liverpool, and in its course furnishes a large supply of water for milling purposes, advantage of which is taken in carrying on the manufacture of flour to a great extent. Wheat, for the supply of the mills, is principally procured from the shores of Lake Erie and the western coast of Lake Michigan; also from the upper lakes, being brought into Lake Ontario through the Welland canal. Larger supplies are also procured from Canada. Oswego, from its eligible situation, close upon the densely settled portions of Canada west, must ever command an extensive foreign trade, and there is every indication of that trade rapidly increasing. Its coasting trade fully keeps pace with the development of its many advantages for the receipt and despatch of all descriptions of crude and manufactured goods.

The number of vessels enrolled and licensed in the district are—

- 5 steamboats,
- 7 propellers,
- 7 brigs,
- 1 barque,
- 84 schooners,
- 1 sloop.

105 vessels; 17,391 tons; 806 men; valued at \$710,825.

The number of vessels arriving at Oswego from foreign ports, and coastwise, for the years ending 30th September, 1848, and 30th September, 1849, and clearing outwards, were:

The district of *Genesee* is about eighty miles in extent. It commences at the western point of Big Sods bay, and extends to the eastern side of Oak Orchard creek. The shipping ports are Charlotte, at the mouth of the Genesee river, and the landing place of the city (five miles up the river) of Rochester. The foreign trade of Rochester is considerable, but it partakes of a retail character. Two small-sized Canadian steamers ply between it and Toronto, in Canada. The coasting trade of the district is limited. The transportation business is chiefly on the Erie canal. Rochester is the port of entry.

The number of vessels enrolled and licensed in this district are:

1 propeller,

9 schooners.

1 sloop,

11 vessels; 1,036 tons; 77 men; and valued at \$47,000.

Abstract of certain goods, wares, and merchandise, with the duties thereon, imported into the district of Genesee during the third and fourth quarters of 1845, during the year 1848, and from the 1st of January to the 1st of November, 1849, inclusive.

The district of *Niagara* has for shipping ports Oak Orchard Creek, Oleott, Wilson, (on the lake shore,) Youngstown, and Lewiston, (on the Niagara river.) Its extent is sixty miles. Lewiston is the port of entry.

In early times the latter port was considered at the head of lake navigation. All property to and from the western country had to be transported by land around the falls of Niagara; but the Erie canal on the one side, and the Welland canal on the other, now render that tedious and expensive route unnecessary. The vessels enrolled and licensed are—

1 steamboat, and
6 schooners.

7 vessels; 732 tons; 40 men in all; and valued at \$35,400.

The number of vessels arriving at Lewiston from foreign ports, and coastwise, for the year 1848, and up to 30th June, 1849, and clearing outwards, were:

The district of *Buffalo* commences at the Niagara falls, extends up the Niagara river to Lake Erie, thence up the lake to the line between the States of New York and Pennsylvania, a distance of one hundred miles.

The shipping places of this district are Schlosser, Tonawanta, Black Rock, on the Niagara river; Buffalo, Cattaraugus Creek, Silver Creek, Dunkirk, Van Buren Harbor, and Barcelona, on the lake. Buffalo, the port of entry, is situated at the lower end of Lake Erie, and is connected with the tide-waters of the Atlantic by the Erie canal, 364 miles in length; also by a railroad to Albany, on which three trains of cars run daily. It contains a population of forty thousand. From the advantages possessed by this port for prosecuting a coasting trade—at present unrivalled on the lakes—it has become the rendezvous for steamers, propellers, and sailing vessels of every class and tonnage, and facilities are thus afforded for the transit of merchandise every day in the year to and from any point on the shores of the great western waters. Emigrants from the far west, and passengers to and from those regions, arrive and depart daily in great numbers. The largest proportion of the produce of the west on its route to Albany by canal enters this port, and quantities of goods from the seaboard for the supply of the lake population also pass through it. J. L. Barton, esq., of this city, to whom I am indebted for much information, states to me: "All coasting manifests are quite deficient in not having everything placed upon them. This arises from the shortness of the trips, particularly across Lake Erie. The omission does not injure the revenue, but trade is greatly facilitated. A vessel can frequently make her run with a fair wind during the time it would require to make a specific manifest of every package of property on board, with the names of shippers and consignees; hence all the accounts that can be made up from the defective manifests only approach to, but do not give all the coastwise imports and exports. As I was one of a committee from the Board of Trade which prepared the statement of the commercial transactions of this port for 1848, for the use of the Department of the Interior at Washington, I will give you some extracts from that report, viz:

"The kind and description of the foreign imports are pine lumber and shingles, saw-logs, railroad ties, sheep pelts, grass seed, plaster, horses, furs, some wheat and flour, Liverpool salt, wool, and numerous small articles which enter into our retail trade. The value of the imports as made up at the custom house was \$129,004, viz:

| | | |
|---|---|----------|
| "Foreign goods imported in American vessels | - | \$28,910 |
| "Foreign goods imported in foreign vessels | - | 100,094 |
| <hr/> | | |
| 129,004 | | |

"The committee are unable to specify in detail the articles which make up our foreign export trade, and can only refer to them by name. They consist of merchandise received by the Erie canal originally destined for Canada, various articles of merchandise purchased in this city, as well as some wheat, flour, pork, and whiskey, used on the public works in

Canada. The amount of exports as given at the custom-house is \$254,254, as follows:

| | | | |
|--|---|---|---------|
| " Exports of foreign goods in American vessels | - | - | \$6,089 |
| " Exports of foreign goods in foreign vessels | - | - | 52,906 |
| " Exports of domestic products in American vessels | - | - | 51,938 |
| " Exports of domestic products in foreign vessels | - | - | 143,321 |
| | | | <hr/> |
| | | | 254,254 |

" From the custom-house books, the number of arrivals and departures reported of steamboats and vessels, (which do not include all,) and the gross amount of tonnage, was," for the year ending December 31, 1848:

| Arrivals. | No. | Tons. | Crew. |
|--|--------|-----------|---------|
| American vessels from foreign ports | 3,150 | 198,157 | 6,391 |
| Foreign do do do | 607 | 136,445 | 7,829 |
| Coasting vessels | 3,092 | 852,507 | 41,596 |
| Total arrivals | 6,849 | 1,187,109 | 55,816 |
| <hr/> | | | |
| Cleared. | | | |
| American vessels to foreign ports | 3,198 | 203,843 | 6,642 |
| Foreign do do do | 711 | 130,776 | 7,721 |
| Coasting vessels | 3,066 | 879,547 | 42,069 |
| Total cleared | 6,975 | 1,214,166 | 56,432 |
| <hr/> | | | |
| Gross arrivals and clearances of vessels | 13,824 | 2,401,275 | 112,248 |
| <hr/> | | | |

The arrivals and clearances of American vessels from and to foreign ports, in this statement appear very large; the reason of this is, a steam ferry boat runs regularly across the Niagara river from Black Rock, which is included in the other arrivals and departures. The imports coastwise, as detailed in the statement which follows, are of the estimated value of \$22,143,404, and the growth and product of the States of Pennsylvania, Kentucky, Ohio, Indiana, Illinois, Iowa, Wisconsin, Michigan, Tennessee, Louisiana, Missouri, and Canada, and that portion of New York bordering on the lakes. It is utterly impossible to specify the articles exported coastwise—they include almost everything that can be enumerated. The property landed here from the Erie canal, the Albany and Buffalo railroad, and the manufactures and productions of this city, constitute the principal portion of the trade. The following condensed table, taken from the official statements in the canal office, will give some idea of the kind of property, its various quantities, and valuation, as well as destination, of the canal imports into Buffalo. The States using the lake route in 1848, for transporting their merchandise and other supplies, were Ohio, Pennsylvania, Michigan, Illinois, Indiana, Wisconsin, Iowa, Missouri, Kentucky, Tennessee, New York bordering on Lake Erie, and Canada West.

Imports coastwise of the port of Buffalo for the year 1848.

a indebted for much im-

These statements show that the importations from the eastward into Buffalo in 1848 were equal to the sum of \$40,817,952—of which amount, \$37,996,658 entered into and formed the export commerce of the port to the western States that year. The value of the imports from the lakes, so far as they can be arrived at, is \$22,143,404—making the total of the lake commerce, of imports and exports, of this port, in 1848, \$60,140,062.

The number of vessels enrolled and licensed in the district of Buffalo are—

| | | | | | | | Tons and 95ths. |
|--------------------|----------|----------|----------|----------|----------|----------|------------------|
| 28 steamers | - | - | - | - | - | - | 16,741 31 |
| 14 propellers | - | - | - | - | - | - | 4,925 40 |
| 32 brigs | - | - | - | - | - | - | 7,439 75 |
| 86 schooners | - | - | - | - | - | - | 13,531 39 |
| 4 sloops | - | - | - | - | - | - | 106 54 |
| 164 vessels | - | - | - | - | - | - | 42,744 49 |

navigated by 2,136 men, and valued at \$1,722,400.

The district of *Presq'isle* is forty-five miles in length, commencing on the eastern line of Pennsylvania and extending westward to the State line of Ohio. The shipping-places are Northeast, Erie, and Elk Creek.

Erie, the port of entry, possesses one of the finest harbors on the lake. It is in extent about six square miles, with an average depth of water of twenty feet, and is of easy access. First class lake steamers enter it at all hours. It is the principal point of outfit on the lake for national vessels, and where they resort for winter quarters. Several canals connect with this harbor, uniting the waters of Lake Erie with those of the Ohio and Mississippi rivers, and aiding materially in the commercial prosperity of the port.

My memoranda of the trade and navigation of this district are meagre in the extreme. No pains have been spared in making inquiries; but replies have not always been furnished, or, when furnished, have not proved at all satisfactory.

The number of vessels enrolled and licensed in the district are stated as—

| | | | | | | | Tons and 55ths. |
|------------------|----------|----------|----------|----------|----------|----------|-----------------|
| 6 steamers | - | - | - | - | - | - | 4,779 18 |
| 3 brigs | - | - | - | - | - | - | 652 05 |
| 13 schooners | - | - | - | - | - | - | 1,988 04 |
| 22 in all | - | - | - | - | - | - | 7,419 27 |

navigated by 300 men, and valued at \$328,800.

The following statement of imports is the only return I have obtained from the collector of the port:

Ex.—37

The district of *Cuyahoga* commences at the eastern line of the State of Ohio and extends to Black River—a length of one hundred miles. The shipping-places are Conneaut, Ashtabula, Cunningham's Harbor, Fairport, Cleveland, and Black River. A very considerable business is carried on at each of those localities. Cleveland, the port of entry, seated on the Cuyahoga river, where it discharges into Lake Erie, is a very thriving city, and possessed of very great facilities for the transit of goods and passengers. The Ohio and Erie canal connects it with the Ohio river at Portsmouth. Another canal, branching off at Akron, connects it with Pittsburgh; and a railroad is now constructing to connect it with Cincinnati. Three or four lines of steamers leave it daily, to pass up and down the lake. The vessels enrolled and licensed in the district are—

Abstract of quantities and amount of duties of the undemutuated articles of merchandise imported into the district of Ciyahoga during the years 1847, 1848, and to November 15, 1849.

585

[23]

The *Sandusky district* extends from Black River to Port Clinton, westward of Sandusky bay, and is in extent fifty miles. The shipping places are Vermilion, Huron, and Port Clinton, on the lake; the city of Sandusky and Venice, within Sandusky bay; and Lower Sandusky, situated thirty-six miles from the lake, and up the river of that name.

The city of Sandusky, situated three miles from the lake, is the port of entry. The coasting trade centring at this port is considerable; and as it is connected with Cincinnati by railroad in one direction, and with the most fruitful districts of Ohio by a railroad in another direction, an active and extensive business is the result of the possession of such advantages of situation.

The opening of the Sandusky railroad in 1846 nearly doubled its import and export trade; but I am unable, from the causes already alluded to in preceding notes, to furnish a detailed statement of the trade. The imports coastwise in 1848 are estimated at \$7,010,304, and the exports at \$3,099,739.

The vessels enrolled and licensed are—

The *Miami district* commences at Port Clinton and ends at the western side of the Miami river, extent fifty miles. The shipping places are Manhattan, Toledo, Perrysburgh, and Miami. Toledo is the port of entry, situated on the west bank of the Miami river, about ten miles from the lake. This city is connected by canal with the Ohio river at Cincinnati, and a branch canal connects it also with the Wabash river in Indiana, and a railroad connects it with the southern tier of counties of the State of Michigan. These lines of communication, intersecting rich agricultural districts, already develop an extensive trade, and must annually increase the importance of Toledo as a commercial emporium.

| |
|---------------|
| 3 steamers, |
| 1 propeller, |
| 11 schooners, |
| 2 sloops, |

17, of 2,921 27-95 tons, 148 men, and valued at \$181,435.
=

The *Detroit district* commences on the western side of the Miami river, thence along the shore of Lake Erie to Detroit river, thence up that river through Lake St. Clair to Lake Huron, thence along its western shore (including the bay of Saginaw,) to the island of Michilimackinac—being four hundred and twenty miles in extent. The district embraces also all the eastern shore of Lake Michigan, a stretch of three hundred miles, making, in all, a total length of seven hundred and twenty miles—and all within the State of Michigan. The shipping places are—Monroe, on Lake Erie; Gibraltar, Trenton, Detroit, on the Detroit river; Mount Clemens, on Clinton river, falling into Lake St. Clair; Algomaek, Newport, China, St. Clair, Port Huron, on the river St. Clair; Saginaw, on the bay of that name; Thunder Bay islands, in Lake Huron; Grand Haven, St. Joseph, and New Buffalo, on the eastern shore of Lake Michigan. Detroit city is the port of entry, and is seated on the western bank of the river of the same name. It is one of the oldest towns along the great lakes, and at one time the only place of business known at the west. It is the centre of the commerce of the State of Michigan, and is the termini of several lines of railroad; a number of steamers arrive and depart daily in all directions. The greater proportion of the agricultural products of Michigan are shipped from this port; its trade is gradually increasing with the settlement of the country.

The vessels enrolled and licensed in the district are—

| | | | | | | | Tons and 95ths. |

The Michilimackinac district commences at the western point of the island of Michilimackinac, encircles the extremity of Lake Michigan and Green Bay, thence along the western shore of Lake Michigan to Sheboygan, in the State of Wisconsin, thence from the eastern point of the island of Michilimackinac to St. Mary's river; up that river to Lake Superior, thence along the southern shore of that lake to its head at Fon-du-Lac, thence along the north shore of said lake to the British territory. The extent of this district is about one thousand miles. The shipping places are—Mackinac, St. Mary's, Copper and Eagle harbors, Isle Royal, Lapoint and Fon-du-Lac, all within the State of Michigan; and Menomee and Navarino in Green Bay, in the State of Wisconsin. It is difficult to describe the correct bounds of this district, or to ascertain correctly, the names of the various shipping places; the country is new and embryo; ports are springing into existence every season. Mackinac is the port of entry.

The vessels enrolled and licensed in the district are—

| | | |
|---------------------------|---|-------------------------------|
| 3 steamers and propellers | { | 1,919 $\frac{7}{8}$ tons; and |
| 23 schooners | | |

156 men, valued at \$75,000.

The district of Chicago commences at the dividing line of the States of Indiana and Michigan; it includes all the lake-coast of Indiana and Illinois, and extends along the western shore of Lake Michigan to Sheboygan, in the State of Wisconsin, when it joins the Michilimackinac district. Its extent is about 170 miles. The shipping places are—Michigan City, in Indiana; Chicago and Waukeegan, in Illinois; Southport, Racine, Milwaukie, Port Washington and Sheboygan, in Wisconsin. Chicago is the port of entry. This city is situated close to the southern end of the district, at the southwest point of Lake Michigan, in the State of Illinois; in 1832 it contained about 100 inhabitants, and at the present time (1849) upwards of 23,000. A canal, one hundred miles in length, connects it with the Illinois and Mississippi rivers, opening up to her busy population a large proportion of the trade of Illinois, Missouri, and Iowa. A railroad is in course of construction to Galena, the lead mining district of the Mississippi; it will pass through a very fertile agricultural country, and no doubt will contribute its quota to the rapidly advancing business of the city when completed. Chicago is the terminus of the steam navigation on the upper lakes; steamers arrive and depart daily, passing through the straits of Michilimackinac on to Buffalo, and to New Buffalo on the opposite side of the lake; thus connecting it with the Central Railway of Michigan, terminating at Detroit.

Statement showing the quantity imported into the district of Chicago, from Canada, and the amount of duties received on each of the following named articles, for the years 1847, 1848, and to November 1, 1849.

The tonnage enrolled and licensed in the district of Chicago are—

2 Propellers,
2 Barques,
13 Brigs,
99 Schooners,
2 Sloops,

118 vessels, 15,980 $\frac{1}{2}$ tons; 550 men, and valued at \$564,435.

As connected with the lake trade, it may not be uninteresting to state the cost of forwarding merchandise on the different routes from the lake ports to New York and Montreal.

1st. By way of Buffalo, the Erie canal and Hudson river to New York:

From Chicago and ports on Lake Michigan.

| | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|---|-------------------|-------------------|---------------------|
| Lake freight - - - | 25 cents. | 8 cents. | \$2 50 |
| Storage and reshipment at Buffalo - - - | 3 " " | 1 " " | 50 |
| Canal to Albany - - - | 54 " " | 14 " " | 5 00 |
| Hudson river - - - | 8 " " | 2 " " | 1 00 |
| | — | — | — |
| | 90 | 25 | 9 00 |
| | — | — | — |

From Toledo and Detroit.

| | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|---|-------------------|-------------------|---------------------|
| Lake freight - - - | 12 cents. | 3 cents. | \$1 00 |
| Storage and reshipment at Buffalo - - - | 3 " " | 1 " " | 50 |
| Canal to Albany - - - | 54 " " | 14 " " | 5 00 |
| Hudson river - - - | 8 " " | 2 " " | 1 00 |
| | — | — | — |
| | 77 | 20 | 7 50 |
| | — | — | — |

(Lumber with measure, \$7 50 to \$8 per M. feet)

From Cleveland and Sandusky.

| | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|---|-------------------|-------------------|---------------------|
| Lake freight - - - | 10 cents. | 3 cents. | \$1 00 |
| Storage and reshipment at Buffalo - - - | 3 " " | 1 " " | 50 |

| — | — |

On this route the Erie canal is 155 miles longer than by the Oswego route; the additional toll and distance of transport render the canal charges higher—the lake freight is less.

2d. Through the Welland canal, by Oswego, to New York:

From Chicago and ports on Lake Michigan.

| | | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|--------------------|---|-------------------|-------------------|---------------------|
| Lake freight | - | 35 cents. | 12 cents. | \$4 00 |
| Storage at Oswego | - | 3 " | 1 " | 60 |
| Canal freight | - | 32 " | 9 " | 2 50 |
| Hudson river | - | 8 " | 2 " | 1 00 |
| | | — | — | — |
| Welland canal toll | - | 78 | 24 | 8 10 |
| | - | 4 | 2 | 80 |
| | | — | — | — |

From Toledo and Detroit.

| | | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|---------------|---|-------------------|-------------------|---------------------|
| Lake freight | - | 25 cents. | 7 cents. | \$3 00 |
| Other charges | - | 43 " | 12 " | 4 10 |
| | | 68 | 19 | 7 10 |
| | | — | — | — |

(Lumber \$8 per M. feet.)

From Cleveland and Sandusky, the same as from Detroit.

3d. From Canadian ports on Lake Erie to New York, via Oswego:

| | | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|---------------|---|-------------------|-------------------|---------------------|
| Lake freight | - | 30 cents. | 7 cents. | \$3 00 |
| Other charges | - | 43 " | 12 " | 4 10 |
| | | 73 | 19 | 7 10 |
| | | — | — | — |

From Canadian ports on Lake Ontario to New York, via Oswego.

| | | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|-------------|---|-------------------|-------------------|---------------------|
| All charges | - | 55 cents. | 16 cents | \$6 00 |

Including custom-house charges at Oswego.

4th. From Canadian ports on Lake Erie to Montreal:

| | | Flour per barrel. | Wheat per bushel. | Provisions per ton. |
|----------------------|-------|----------------------|----------------------|------------------------|
| Lake to Kingston | - - - | - 20 cents. | 6 cents. | \$3 00 |
| Kingston to Montreal | - - - | - 15 " 4 " | | 1 50 |

No. 1.

BUFFALO.

Lake commerce of 1850, and trade of the Erie canal for 1849 and 1850.

The statement here given of the imports at Buffalo in 1850, from the lakes, has been most carefully made up from the manifests exhibited at the custom-house. With the view of showing the variety of articles which enter into and form the trade from the West, I have taken the pains to enumerate very many. The valuation has been calculated from actual sales and prices given by our heavy dealers. Great care has been taken in arriving at the quantity and value as near as possible, that a just and true exhibit might be made of the present magnitude of this commerce as the certain and carefully ascertained facts would warrant.

The rapid and constant increase of the trade from the western country can be best realized by comparing periods of time only a few years past with the present.

In the year 1835 the following articles were received from Ohio, the then only exporting western State, and shipped towards tide-water on the Erie canal:

| | |
|---|------------------|
| Barrels of flour..... | 86,233 |
| Bushels of wheat..... | 98,071 |
| Bushels of corn..... | 14,579 |
| Barrels of provisions..... | 6,562 |
| Barrels of ashes..... | 4,419 |
| Pounds of staves..... | 2,565,272 |
| Pounds of wool..... | 140,911 |
| Pounds of butter, cheese, and lard..... | <u>1,030,632</u> |

In 1840 other States commenced exporting, as follows :

| | |
|---|------------------|
| Barrels of flour..... | 633,790 |
| Bushels of wheat..... | 881,192 |
| Bushels of corn..... | 47,885 |
| Barrels of provisions..... | 25,070 |
| Barrels of ashes..... | 7,008 |
| Pounds of staves..... | 22,410,660 |
| Pounds of wool..... | 107,494 |
| Pounds of butter, cheese, and lard..... | <u>3,422,687</u> |

In 1845 all the western States became exporters, as follows :

| | |
|---|------------------|
| Barrels of flour..... | 717,466 |
| Bushels of wheat..... | 1,354,990 |
| Bushels of corn..... | 33,069 |
| Barrels of provisions..... | 68,000 |
| Barrels of ashes..... | 34,602 |
| Pounds of staves..... | 88,296,431 |
| Pounds of wool..... | 2,957,761 |
| Pounds of butter, cheese, and lard..... | <u>6,597,007</u> |

In 1850 the same sources furnished as follows :

| | |
|---|-------------------|
| Barrels of flour..... | 984,430 |
| Bushels of wheat..... | 3,304,647 |
| Bushels of corn..... | 2,608,967 |
| Barrels of provisions..... | 146,836 |
| Barrels of ashes..... | 17,504 |
| Pounds of staves..... | 159,479,504 |
| Pounds of wool..... | 8,805,817 |
| Pounds of butter, cheese, and lard..... | <u>17,534,981</u> |

In the five northwestern States the wheat crop of 1850 is fully fifty millions of bushels, and that of corn much greater than in 1849; but a small portion of the former and scarcely any of the latter has gone to market this fall, leaving an immense quantity on hand to come forward next spring.

No. 1—Continued.

The following statement shows the kind and quantity of property imported into Buffalo from the western States (with very little from Canada included) during the year 1850, so far as it can be obtained from the manifests of vessels reported at the custom house.

Exports.

The only way to obtain any accurate account of the export commerce from Buffalo to the western States, is to depend upon the statements of property received here by the Erie canal, the Albany and Buffalo railroad, and estimating the sales and manufactures of our city—they being the chief sources of supply. This will not be perfectly exact, but it will come so near being so that all useful purposes will be answered.

Statement of property landed at Buffalo, from the Erie canal during the season of navigation (seven months) in the years 1849 and 1850, and its destination.

From the foregoing tables a knowledge of the commerce entering and leaving the port of Buffalo in 1850 is pretty correctly arrived at. They sum up thus:

| | |
|---|--------------|
| Table No. 1 shows that the value of the imports from the lakes was..... | \$22,525,781 |
| Table No. 2 shows that the Erie canal delivered here, originally destined to go to the western States and Canada..... | 33,970,645 |
| And for delivery in this city and that portion of New York on and near Lake Erie..... | \$7,888,525 |
| Table No. 3 gives the amount received by the railroad from March 15 to December 20..... | 6,152,931 |
| | <hr/> |
| | 14,041,456 |

It is quite difficult to determine what portion of this \$14,041,456 enters into the exports; but it will not be far out of the way to estimate that, by adding to it the value of the manufactured articles of ironmongry, cabinet ware, leather, white lead, upholstery, and the productions of numerous other manufactures in this city; a large portion of dry goods of light weight, but valuable, brought by the railroad, originally started for the western States; the export of the largest portion of the salt brought up the canal; the large amount of merchandise sold wholesale and retail to western traders; the retail trade with Canada; and the amount originally destined for that portion of New York bordering on Lake Erie, to place the amount at three-fourths of the canal and railroad importations: which will give the sum of.....

| | |
|--------------------|------------|
| Total exports..... | <hr/> |
| | 10,531,092 |

These statements show that the import commerce of Buffalo in 1850 amounted to The exports to.....

| | |
|--|-----------|
| Forming a valuation of..... | <hr/> |
| To which it is proper to add the commerce of Black Rock and Tonawanda, ports at the lower end of Lake Erie visited by vessels, in order to show the total of the commerce of the upper lakes which concentrates at Buffalo and the lower end of Lake Erie. At Black Rock the value of western and Canada property received and shipped down the Erie canal in 1850 is..... | <hr/> |
| Property received by the canal and shipped to western States and Canada..... | 587,823 |
| The business of Tonawanda to western States and Canada..... | 86,812 |
| From the western States and Canada..... | 1,118,682 |
| | <hr/> |

| | |
|--|------------|
| The whole forming an aggregate of..... | <hr/> |
| | 70,180,705 |

Without taking into consideration the immense passenger trade, the large sums of money carried across the lakes by purchasers of produce, emigrants, government funds, and bank operations, which amount to many millions of dollars.

The States and countries to which the property went to and came from are, Pennsylvania, Ohio, Michigan, Wisconsin, Illinois, Indiana, Iowa, Minnesota, Missouri, Kentucky, Tennessee, Arkansas, Alabama, Mississippi, Louisiana, New Mexico, Canada, and that portion of New York bordering on Lake Erie.

| | |
|--|------------|
| The lake commerce with the same States in 1848, with the port of Buffalo alone, made up in the same manner as this statement is filed in the Topographical Bureau at Washington, was | <hr/> |
| In 1850 it was..... | 60,140,063 |

\$60,140,063

67,027,518

| | |

and aggregate

The following description of vessels are now wintering in the port of Buffalo:

| Cleared. | | Tons. |
|---------------------|---------------|--------------|
| Tonnage. | Men and boys. | |
| 18 steamboats | | 13,170.14 |
| 17 propellers | | 6,362.69 |
| 20 brigs..... | | 4,705.30 |
| 46 schooners..... | | 8,815.35 |
| 2 sailboats..... | | 18.70 |
| | 103 | 33,072.28-95 |

The whole forming an exhibit worthy to be compared with almost any of our Atlantic seaport towns.

Forming this commerce, we find the sugar of Louisiana, the cotton of Tennessee and Mississippi, the hemp of Kentucky, the furs of Missouri and distant west, the copper of Lake Superior, the lead of Wisconsin, the agricultural and forest products of all the States bordering on the lakes, the manufactures of New England and New York, and a small amount (\$438,026) in bond and otherwise of Canadian products.

TREASURY DEPARTMENT,
Register's Office, February 14, 1851.

TOWNSEND HAINES, Register.

Regulations and forms used in the transit system of the British North American Colonies.

PORT OF SAINT JOHN, NEW BRUNSWICK.

Cargo book of the schooner —, of —; burthen, — tons; (owned and navigated according to law;) kept in pursuance of an order of the honorable the commissioner of her Majesty's customs, No. 65, dated July 5, 1837, issued under the authority vested in them by the 20th section of the act 3d and 4th William IV, chapter 59, of which the following is an extract:

"Provided always, That it shall be lawful for the commissioners of his Majesty's customs to make and appoint such other regulations for the carrying, coastwise, of any goods, or for the removing of any goods for shipment, as to them shall appear expedient. And that all goods laden, water-borne, or unladen contrary to the regulations of this act, or contrary to the regulations so made and appointed, shall be forfeited."

REGULATIONS.

All goods taken on board any vessel going coastwise are to be inserted in this cargo-book, noting the respective days on which the same may have been laden, the marks and numbers of the several packages, and the quantities and descriptions of the goods therein; also the quantities and descriptions of any goods stowed loose, and the names of the respective shippers and consignees; and also noting the respective days upon which any such goods shall be delivered during each voyage; and this cargo-book is to be produced to any officer of the customs, whenever the same shall be demanded, who shall be at liberty to make any remark therein which he may deem proper. If at any time any goods not the produce of the province, or of the British fisheries, shall be found on board any vessel navigated under these regulations, which shall not be inserted in the cargo-book, the same will be forfeited under the 18th section of the 3d and 4th William IV, chapter 59, of which the above is an extract; and if this cargo-book (required to be kept by the master of every vessel carrying goods coastwise) shall not be duly kept on board, or the same shall not be produced to any officer of the customs, as hereinbefore required, then, in either of such cases, the whole of the goods found on board such vessel will be forfeited, under the before-mentioned act.

NOTA BENE.—The above regulations do not extend to vessels carrying goods beyond the shores of this province.

_____, Collector.

CUSTOM-HOUSE, SAINT JOHN, N. B., — day of —, 18—.

Cargo-books exempting the masters of vessels from entering and clearing at the custom house are granted to vessels trading within the limits of the province, on condition that everything laden or unladen is entered in the

British North

RUNSWICK.

cargo-book according to this form. Should the master wish to clear for a port not in the province, he must deposite his cargo-book at the custom-house and obtain a clearance in the usual manner; his cargo-book is then returned to him on his arrival at this port, should he intend to resume the coasting trade again.

A copy of the regulations is herewith annexed, with the form used in issuing cargo-books at this port.

SAINT JOHN, N. B.

Miscellaneous statements relative to the trade and commerce of the British North American colonies, &c., &c., &c.

- No. 1. Comparative statement of the value of imports into the several colonies of British North America (by sea) in the years 1829, 1832, 1838, 1843, and 1848.
2. Comparative statement of the value of exports from the several colonies of British North America (by sea) in the years 1829, 1832, 1838, 1843, and 1848.
3. Comparative statement of the value of imports into the several colonies of British North America (by sea) in the years 1840, 1845, and 1849.
4. Comparative statement of the value of exports from the several colonies of British North America (by sea) in the years 1840, 1845, and 1849.
5. Comparative statement of the number and tonnage of the vessels which cleared from the several colonies of British North America in 1840, 1845, and 1849, distinguishing countries to which they sailed.
6. Comparative statement of the number and tonnage of the vessels which arrived in the several colonies of British North America in 1840, 1845, and 1849, distinguishing countries from whence they arrived.
7. Return of the quantity and value of the several articles imported into each of the British North American colonies in the year 1844, specifying the countries whence imported.
8. Return of the value in pounds sterling of all articles imported into the several British colonies of North America in the year 1844, distinguishing the various countries from which imported, and of all articles exported from several North American colonies in 1844, distinguishing countries to which exported.
9. British and Irish produce and manufactures exported from the United Kingdom to the British North American colonies in the year 1848, and of articles imported from North American colonies into United Kingdom for home consumption in 1848.
10. Return of the quantities and value of British and Irish produce and manufactures exported from the United Kingdom to the several British North American colonies in 1849.
11. An account of the number of vessels, with their tonnage employed in carrying cargoes of timber, deals, &c., from British North America to Liverpool, from 1839 to 1848 inclusive, ending on the 1st of February in each year.
12. Return showing the numbers, tonnage, and selling-prices of vessels built in the British North American colonies, and sold at Liverpool, in the year 1848.
13. Return of vessels built in the North American colonies which were registered at various ports in the United Kingdom as British ships on the 1st day of January, 1847, with their total and average tonnage.

- No. 14. A statement exhibiting the value of exports to and imports from Canada annually from 1840 to 1850 inclusive.
15. A statement exhibiting the value of exports to and imports from the British North American colonies (*other than Canada*) annually from 1840 to 1850.
16. A statement exhibiting the tonnage employed in the commercial intercourse between the United States and the British North American colonies (other than Canada) from 1840 to 1850, inclusive.
17. A statement exhibiting the tonnage employed in the commercial intercourse between the United States and Canada, from 1840 to 1850 inclusive.
18. A statement exhibiting the number of vessels and their tonnage employed in the foreign trade of the United States, in the ports mentioned, during 1848.
19. Abstract of imports, exports, tonnage entered and cleared, &c., from the "North American colonies," at the port of Portland, for the years 1840, 1842, 1845, and 1849.
20. Exports for 1850, from Baltimore to the British North American colonies, in British vessels.
21. Exports for 1850, from Baltimore to the British North American colonies, in American vessels.
22. Imports into Baltimore in 1850, from British North American colonies, in American vessels.
23. Statement of American and British vessels entered in the district of Baltimore from the British North American colonies for the year ending December 31, 1850.
24. Statement of American and British vessels cleared in the district of Baltimore to the British North American colonies for the year ending December 31, 1850.
25. Statement of flour, wheat, and corn, exported from the district of Alexandria to the British North American colonies, in 1848, 1849, and 1850.
26. Statement of American and British tonnage, inward and outward, from and to the British North American colonies, entered and cleared in the district and port of Philadelphia during the year 1850.
27. Imports from British American colonies into the district of Philadelphia during year ending December 31, 1850.
28. Exports to British North American colonies from district of Philadelphia (by sea) during year 1850.
29. Imports in foreign vessels into the port of New York from "British North American colonies," during the years 1835, 1840, 1845, and 1848.
30. Imports in American vessels into the port of New York from "British North American colonies," during the years 1835, 1840, 1845, and 1848.
31. Exports to British North American colonies in 1840 from port of New York.
32. Exports to British North American colonies in 1848 from port of New York.

- No. 33. Exports to British North American colonies in 1845 from port of New York.
34. Return of the quantity and value of foreign goods exported from New York to each British North American colony in 1847 and 1849, under drawback and transit law.
35. Imports in foreign and American vessels into the port of New York from British North American colonies, during the year 1849.
36. Exports to British North American colonies in 1849 from port of New York.
37. Imports in British and American vessels into the port of New York, commencing January 1st, and ending September 30, 1850, comprising 1st, 2d, and 3d quarters, from British North American colonies.
38. Exports of foreign merchandise in vessels of the United States to British North American colonies during year ending December 31, 1850.
39. Exports of domestic merchandise to British North American colonies in British and American vessels during the year ending December 31, 1850.
40. Canadian wheat and flour exported to Great Britain in the year ending December 31, 1850.
41. Quantity of wheat and flour received in bond from Canada at the port of New York, and the quantity on which duty was paid, and the amount of duty, being for the year 1850.
42. Exports of Canadian wheat and breadstuffs in 1849 from port of New York.
43. Wheat and flour remaining in warehouse at New York January 18, 1850.
44. Total wheat and flour exported from New York to British North American colonies (by sea) during year ending December 31, 1850.
45. Statement of tonnage, coastwise and foreign, entered and cleared from New York, 3d and 4th quarters 1850.
46. Abstract of tonnage of United States and Great Britain to and from British North American colonies for 1st, 2d, and 3d quarters of 1850.
47. Abstract of tonnage, coastwise and foreign, entered and cleared from New York for year ending 30th June, 1850.
48. Return, showing the value and quantities of foreign merchandise exported from New York to each North American colony for the years 1847 and 1849, under the drawback and warehouse laws.
49. Abstract of imports, exports, tonnage entered and cleared, &c., to and from the North American colonies, at the port of Boston, for the years 1829, 1832, 1835, 1840, 1845, 1848, and 1849, and from January 1st to September 30th, 1850.
50. Value of merchandise imported from British North American colonies, &c.
51. Return of the quantity and value of foreign merchandise exported from the port of Boston to the British North American colonies in 1846, 1847, 1848, and the first three quarters of 1849.

- No. 52. Statement of exports of domestic merchandise to British North American colonies from Boston, for year ending 30th September, 1850.
53. Abstract of value of foreign merchandise exported from Boston to British North American colonies in the years 1816, 1847, 1848, 1849, and to September 30, 1850.
54. Statement exhibiting number of vessels, and their tonnage, employed in the foreign trade of the United States from Boston, New York, Philadelphia, Baltimore, and New Orleans, during the year 1849.
55. Statement exhibiting number of vessels, and their tonnage, employed in foreign trade of the United States in 1850 from Boston, New York, Philadelphia, Baltimore, and New Orleans.
56. Comparative statement of declared value of British and Irish produce and manufactures exported from the United Kingdom to the British colonies in 1840, 1845, and 1849, specifying the different colonies in each of those years.
57. Statement showing the number of American and foreign vessels, with their tonnage and crews, which entered the ports of the United States from foreign countries during the years ending 30th June, 1846 and 1848.
58. Statement of the number of American and foreign vessels, with their tonnage and crews, which cleared from the ports of the United States for foreign countries during years ending 30th June, 1846 and 1848.
59. Abstract of commerce of ports of Boston, New York, and Philadelphia with British North American colonies, showing the tonnage of vessels, American and British, entering inwards and clearing outwards, and the value of the merchandise imported and exported, respectively, for years 1829, 1833, 1835, 1840, 1845, and 1848.
60. Statement of amount of tonnage of ships registered, and belonging to the United Kingdom and its colonies, in each year from 1821 to 1846, inclusive.
61. Statement of the declared value of British and Irish produce and manufactures exported from the United Kingdom in the year 1849, specifying the countries to which the same were exported.
62. Statement of domestic exports from the United States in the year ending June, 1850.
63. Statement of the quantity of foreign produce and articles of foreign manufacture shipped from New York to British North American colonies, in bond and for debenture, in 1846, 1847, 1848, and the 1st and 2d quarters of 1849.
- 63a. Return of the number of ships and tonnage which cleared out from the ports of the United Kingdom for ports in Canada and British North America, distinguishing each colony, in each year from 1830 to 1846, both years inclusive.
64. Statement of the tonnage of British ships that entered the ports of the United Kingdom from different foreign countries and British possessions in each of the years 1821 and 1846, distinguishing the tonnage employed in the trade with British

possessions, and which is protected by the navigation laws, from the tonnage employed in the trade with foreign countries, and which is unprotected from competition with foreign ships.

- No. 65. Statement of the tonnage of vessels, distinguishing British from foreign, and showing the proportions of each that entered and cleared from ports in the United Kingdom in each year from 1820 to 1846.
- 66. Statement of the shipping employed in the trade (inwards) of the United Kingdom with the different countries of northern Europe and the United States of America in each of the years 1844, 1845, and 1846, separating British from foreign vessels, and showing, with respect to each, the tonnage and the numbers of the crews employed in navigating the ships, with the proportionate number of such crews to each 100 tons of burden.
- 67. British sailing tonnage, including colonial, 1816 and 1846.
- 68. Table showing the rate of hire for British ships in the North American, Baltic, and coal trade, together with that of their wages, cost of provisions, ropes, and sails, in periods of four years, from 1817 to 1846.
- 69. Population of each colony.

No. 11.

An account of the number of vessels, with their tonnage, employed in carrying cargoes of timber, deals, &c., from British North America to Liverpool, from 1839 to 1848, inclusive, ending February 1 in each year.

| Years. | No. of vessels. | Tonnage. |
|------------|-----------------|-----------------------------------|
| 1839 | 299 | 158,194 |
| 1840 | 336 | 169,700 |
| 1841 | 230 | 133,400 |
| 1842 | 318 | 174,948 |
| 1843 | 165 | 91,179 |
| 1844 | 311 | 154,518 |
| 1845 | 369 | 189,414 |
| 1846 | 453 | 239,854 |
| 1847 | 460 | 244,958 |
| 1848 | 314 | 172,427 |
| | | 622 2,634 297,349 41,421 |

No. 12.

Return showing the number, tonnage, and selling prices of vessels built in the British North American colonies, and sold at Liverpool, in the year 1848.

| Description of vessels. | No. of vessels. | Tonnage. | Per ton, sterling. | Per ton, in dollars. |
|---|-----------------|----------|--------------------|----------------------|
| New Quebec ships, not iron-kneed, or classed..... | 19 | 11,171 | £5 5s. to £6 5s. | \$25 20 to \$30 00 |
| New St. John (N. B.) ships, not iron-kneed, or classed..... | 32 | 12,064 | 5 5 to 6 5 | 25 20 to 30 00 |
| Prince Edward island ships, not iron-kneed, or classed..... | 33 | 5,397 | 4 10 to 5 10 | 21 60 to 26 40 |
| Miramichi ships, not iron-kneed, or classed..... | 12 | 5,464 | 5 5 to 6 5 | 25 20 to 30 00 |

NOTE.—Among the ships built in British North America, those from St. John and Miramichi were in increasing favor. The vessels from Prince Edward island were from 80 to 220 tons each, and were slow of sale, owing to their having, for the most part, a great rise of floor, which rendered them unsuitable for the coasting trade of the United Kingdom.

| | | | | | | | | | | 11,614 |

Note.—The excess of tonnage of British vessels clearing for the colonies over the arrivals from colonial ports arises from the circumstance of numbers of large class vessels sailing from British ports with passengers and heavy freight for Boston, &c., and thence clearing for Quebec or ports in the lower provinces, to take in return cargoes of timber, &c., for Great Britain.

* The duty on colonial timber was reduced to one shilling per load the 10th October, 1842. In that year the tonnage entered from the British North American colonies was 541,451 tons; in 1843, 771,905 tons; in 1844, 789,410 tons; in 1845, 1,090,924 tons. If the tonnage entered from those colonies had remained as it was in 1842, the increase in the protected trade would have amounted, in 1846, as compared with 1824, to \$908,116 tons, or 31½ per cent.

No. 65.—Statement of the tonnage of vessels, distinguishing British from foreign, and showing the proportions of each, that entered and cleared from ports in the United Kingdom, in each year, from 1824 to 1831.

20

Statement of the shipping employed in the trade (inwards) of the United Kingdom with the different countries of northern Europe and the United States of America in each of the years 1844, 1845, and 1846; separating British from foreign vessels, and showing with respect to each the tonnage and the number of the crews employed in navigating the ships, with the proportionate number of such crews to each one hundred tons of burthen.

Note.—Previous to the year 1770, the only white settlers in Upper Canada were a few French immigrants. At the date of the Canada constitutional act, (1791,) the white population of Upper Canada was calculated at less than 50,000. In 1811—a period of 20 years—the population was found to be 77,000, being an increase of 27,000 only in that long period.

No. 69—Continued.

Table of the population of Nova Scotia at various periods, from 1806 to 1848, showing the increase at each of the periods stated.

| Colony. | 1806. | 1817. | 1827. | 1833. | 1848. |

| Increase in 1817..... | | 24,398 | 50,665 | 65,659 | 71,561 |
| 1827..... | | | 75,063 | 116,324 | 134,222 |
| 1833..... | | | | 141,732 | 187,887 |
| 1848..... | | | | | 212,285 |

NOTE.—There are no accurate early details of the progress of population in this colony. In 1749, about 140 years after the settlement by France, the Acadians amounted to 18,000 in number. After the removal of these people from Nova Scotia, in 1755, the British settlers were computed at only 5,000; and, in 1764, the number of souls was reckoned at 13,000, including 2,600 Acadians. In 1772, the reported numbers were 19,120; but, in 1781, in consequence of a number of persons having quitted the colony, the number was reduced to 12,000. Two years after, 20,000 loyalists arrived, so that the numbers were increased to 32,000. But, by the subsequent separation of New Brunswick, Prince Edward Island, and Cape Breton, into distinct governments, Nova Scotia had, of course, a diminished population.

Table of the population of New Brunswick in the years 1783, 1803, 1824, 1834, 1840, and 1848, showing the increase between each period.

| Years. | 1783. | 1803. | 182 . | 1834. | 1840. | 1848. |
|-----------------------|--------|--------|--------|---------|---------|---------|
| Total..... | 12,000 | 27,000 | 74,176 | 119,457 | 156,152 | 210,000 |
| Increase in 1803..... | | 15,000 | 47,176 | 45,281 | 36,695 | 53,848 |
| 1824..... | | | 62,176 | 92,457 | 81,976 | 90,543 |
| 1834..... | | | | 107,457 | 129,152 | 133,824 |
| 1840..... | | | | | 144,152 | 183,000 |
| 1848..... | | | | | | 198,000 |

NOTE.—The population of New Brunswick in 1783 and 1803 is stated from official estimates made at those periods. A census was taken, by authority, in each of the years 1824, 1834, and 1840, and the numbers above stated are from the enumerations then made.

The population in 1848 is stated from a calculation made with great care for official purposes in that year, and is believed to be very near the mark.

No. 69—Continued.

Table showing the population of Newfoundland at various periods, from 1806 to 1845, with the increase and decrease of each of the periods stated.

| 1833..... | | | | 22,616 | 31,033 |
| 1841..... | | | | | 37,357 |

NOTE.—I am indebted to several official gentlemen in the colonies for much important commercial information, and for many valuable statistical tables, which I have incorporated in this report. The paper marked C, page 83, on the mines and minerals of the colonies, was prepared by a gentleman of St. John, New Brunswick, for the single purpose of showing their importance in a commercial point of view, and not as a scientific report.

The years 1829, 1832, 1838, 1843, and 1848, were named by Mr. Secretary Meredith as representing important periods in the colonial trade with the United States.

ERRATA.

Pages 17 and 18.—Read *to other British North American colonies*, for “North American colonies.”

Page 20.—Read *British North American colonies*, for “British American colonies.”

The first sentence on page 41 should read thus:

“It is well known that the imports of the colonies from Great Britain in former years exceeded those from the United States. The trade is now about equally divided—destined, undoubtedly to a yearly increase between the United States and the colonies.”

Page 111, &c.—Read *Gaspé* for “Gaspi.”

Page 113, No. 66.—Read *Sarnia* for “Samia.”

Page 327, fifteenth line from the bottom, read, “Under the new navigation act, *with the consent of the Canadian government*, vessels of the United States may pass,” &c.

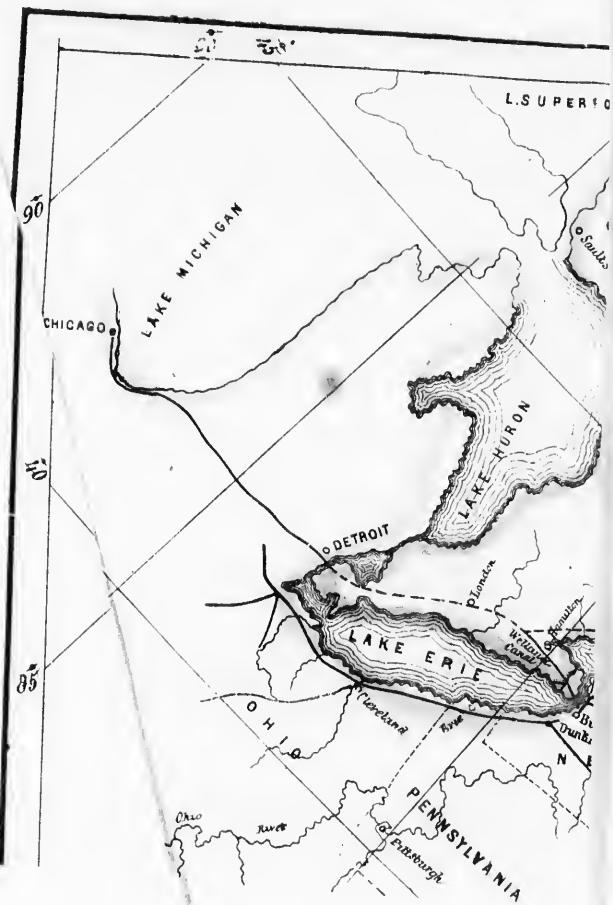

Page 533.—Population of Oswego about 12,000, instead of “8,000.”
