A Dirge.

BY REV. GEORGE CROLY. Earth to earth, and dust to dust ! Here the evil and the just, Here the youthful and the old Here the fearful and the bold. Here the matron and the man In one silent bed are laid : Here the vassal and the king Side by side lie withering; Here the sword and scepter rust, "Earth to earth, and dust to dust!"

O'er this pale and mighty throng Those that wept them, those that weep All shall with these sleepers sleep. Brothers, sisters, of the worm— Summer's sun, or Winter's storm, Song of peace, or battle's roar, Ne'er shall break their slumbers more Death shall keep his sullen trust. " Earth to earth, and dust to dust !"

But a day is coming fast, Earth, thy mightiest and thy last; It shall come in fear and wonder, Heralded by trump and thunder It shall come in strife and toil, It shall come in blood and spoil It shall come in empires' groans, Burning temples, trampled thrones; Then, Ambition, rue thy lust!

In the east the King shall shine: Flashing from Heaven's golden gate, Thousand thousands round his state, Spirits with the crown and plume: Tremble then, thou sullen tomb! Heaven shall open on our sight, Earth be turned to living light, Kingdoms of the ransomed justy "Earth to earth, and dust to dust!"

Mr. McKeagney made brief remarks in answer to Mr. est forth arguments, energetically, in its fevor Pile concluded with reading an amendment which He concluded with reading an amendment which compied about twenty-five pages of letter paper. Some discussion arose as to closing the debate at that time. Eventually the House agreed to adjourn for an hour, and the Att. General withdraw his amendment. The debate was resumed at about twenty-five minutes past eight o'clock. Hon Mr. Young addressed the House for about two hours against the bill; his speech was argumentative, and impassioned to a high degree.

A call of the House took place in reference to the appointment of the proposed railway cons mentative, and impassioned to a high degree.

Mr. Wade spoke for about twenty minutes, giving very warm reply to some of Mr. Young's remarks. A call of the House was made. The

The question was taken soon after 11 o'clock.
The bill is of much interest and consequence.
The Mining Company obtained a grant of the minerals of the Province, for 60 years, commencing with 1825. Their title was a transfer from he creditors of the Duke of York, who became possessed of the same by a most extraordinary and unprecedented exercise of the prerogative, in granting the Duke most of the minerals of the Province, as a means of relief from his exigenthem; and are relieved from payments to the 25 to 16.

Hon. Provincial Secretary submitted a communication from Sir Gaspard LeMarchant, rela-tive to a letter sent to Sir Gaspard by Mr. Sel-Hon. Mr. Tobin, by command of His Excellancy, laid on the table of the House the report, dated 5th Feb. 1858, of James Laurie, E-q. Civil Engineer, on the Nova Scotis Railway, its present condition, and probable cost.

Mr. Laurie was appointed to this service by the Government last autumn.

Nearly two hours were occupied in the reading of this report by the clerk, which, of course, is entirely too voluminous to admit of a satisfactory abstract within our limits.

Mr. Laurie observes that "the unfavorable features of the country traversed on the first part.

Mr. Young, another of cours on many other roads designed as general thoroughfares for trade and travel."

He also stated that the average cost of the superstructure of the Nova Scotia Railway per mile, including iron, has been £2,689 8s. 5d.

Mr. Laurie remarks that the bridges, viaduetts, &c., have been constructed in a superior manner, but recommends that those on the position of the line not yet opened abould be tested before.

The T. rail, or American pattern, he considers preferable to that adopted by the Railway Board, being much less costly.

Mr. Laurie condemns the system of keeping accounts practised by the Railway Board, ber of the proposed members of the Committee, a so designed serving; giving as a reason, the aspect which the subject had assumed, in reference to a supposed disagreement between the Government and the Railway Board, being much less costly.

Mr. Laurie estimates the cost of the whole road (that is, the main line to Truro and the Windsor branch, with equipments complete, including a Railway Telegraph) at £1,074,866 7;
23d. Of this amount £666,657 19s. 11d. were expended prior to September 30, 1857.

It appears from the report that the average cost of the railway per mile has been £11,084, 16s. 4d. This includes the cost of stations, roll-like week and the position of such affair at the present time, stating amount of extra work when the change in the Railway Beard to changes now apparent. The Financial Secretary complained of the conduct of the opposition on this question, and explained. The Atty General again spoke, stating the requirement of a Committee of investigation; be moved that the 16-port of the gentlemen who had been engaged to inspect the Railways, and revise the railway accounts, be read. The intelligence from India is, without being particularly the most satisfactory in several respects. When Wellington, after having chased the French eagles over the Pyrenees, was able to purchase provisions from the pessantry of Bearn and Gascony, it be came evident that the English, though invaders, were no longer regarded with deadly animosity by the population of the south and west of France. If there is any dependence on what men of every station certify it has done for them; if we can trust our own senses when we see the dangerous affections of the lungs yield to it; if we can depend on the assurance of intelligent physicians, whose business is to know; in short, if there is any reliance upon any thing, then is it irrefutably proven that this medicine does cure the class of discusses it is designed for, beyond any and all other remedies known to mankind. Nothing but its intrinsic virtues, and the unmistanble benefit conferred on thousands of sufferers, could originate and maintain the reputation it enjoys. While many inferior remedies have been thrust, upon the community, have failed, and been thrust, upon the consumption by every trial, conferred ourse too numerous and remarkable to be largetten. as universal as the name and fame of the grant lawyer himself. Laments were made by the editors over the grasping advantage thus taken of a client in his extremity, and even friends expressed their regrets to him for this betrayal of avarice. But he simply shrugged his shoulders; and as everything is soon forgotten at Paris, it passed out of the public mind.

Ten years went by; and, a few days since, at a celebration of which the diguitaries of the courts of law formed a part, the procession was interrupted by a woman, who suddenly sprang from the crowd and seized the hands of Mons. Dupin, the Procureur General.

"It is he!" the serious description of the public mind, as excluding the procession of the procession of the procession was interrupted by a woman, who suddenly sprang from the crowd and seized the hands of Mons. Dupin, the Procureur General.

PAIN BANISHED.

"Not only are your Fills admirably adapted to their purpose as an aperious, but I find their beneficial effects upon the Liver very marked indeed. They have in my practice proved more effectual for the cure of bifour conficients than any one remedy I can mention. I sincerely rejoice that we have at length a purpative which is worthy the confidence of the probasion and the people." Prom. Dr. Henry J. Ruen, of R. Levia.

"The PRILE you were kind enough to soud use have been all used in my practice, and have suitained me that they are truly an extraordinary medicine. So peculiarly are they adapted to the diseases of the human system, that they seem to work upon them alone. I have cured some cases of dyspersics and indigestion with them, which had resisted the other remedies we commonly use. Indeed I have experimentally found them to be effectived in almost all the complaints for which you recommend them."

DYSENTERY — DIARRHEA — RELAX.

Prom Dr. J. G. Green, of Chicago.

"Your PILLS have had a long trial in my practice, and I hold them in esteem as one of the best aperiants I have ever found. Their alterative effect upon the liver makes them an excellent remely, when given in small does, for billious dyseniery and distribute. Their sugar-coating makes them very acceptable and convenient for the use of women and children."

To suffer the pains and penalties of sickness when the retain means of cure are accessible to all, is positive nadness. This vegetable remedy, acting powerfully upon the causes of disease in all the fluids, nerves and tissue of the body, expel the morbid and poisonous matter than the price prices in the system cleanse and namif Millions Rely on Them!

INTERNAL OBSTRUCTION—WORMS—SUPPRESSION.
From Mr. E. Stuari, who practice of a Physician and Midwyle

"I find one or two large does of your Fills, taken at the
proper time, are excellent premotives of the natural secretion when wholly or partially suppressed, and also very offectual to cleanance the stemant and expel worms. They are
so much the best physic on he've that I recommend no other
to my patients.

"Too much cannot be said of your Fills for the cure of
continence. If others of our fraternity have found them
as efficacious as I have, they should join me in preclaiming
it for the benefit of the multitudes who suffer from that
complaint, which, although but edough in itself, is the progenitor of others that are worse. I believe conference to
