ATHENS POULTRY FAIRS

Athens has gained an enviable distinction as being the chief poultry centre in Leeds County, and its right to that title was once more conclusively established on Monday last.

Two fairs here preceded that of Monday, but at the first was the offering large. At the first, held on Nov. 25, only Canadian buyers were present, and what turkeys were offered went at 13c. American buyers announced their fair for Dec. 12 and another lot of Canadian buyers advertised a fair for Dec. 9. Of course, the Americans did not want to buy poultry on two days, but they felt that, under the circumstances, they should protect their fair; so without announcement, a deputation filed an appearance here on Friday. What birds were offered brought a good price, as high as 18c being paid for choice offerings. Besides the Americans, the buyers here on Friday were Messrs. H. Moffat, R. Nevins, J. Johnston, Jasper, W. Hewitt, New Boyne; W. A. Olmsted, Chesterville; D. B. Landon, Lyndhurst; W. D. Hay, Toronto; E. F. Deneha, W. Tubbi, Ottawa.

Monday was rather too cold for comfort and the mixture of wagons and sleighs on the road made traveling anything but pleasant. But the royal turkey had been dressed for market and must go; so at an early hour in the morning, from all points of the compass, loads of poultry were headed for Athens, some traveling a distance of twenty miles.

The buyers in attendance were Messrs. King Martin, Ogdensburg; S. S. Rogers, B. G. Flack, H. L. Markle, H. G. Clements, P. A. L. Jones, W. W. Clements, S. Clements, Lisbon, N.Y.; W. D. Hay, Toronto; E. F. Deneha, Ottawa.

The buyers were eager for the birds and as each load arrived it was critically inspected, its value determined, and the top figure promptly offered. One of the first loads to arrive was inspected by a buyer who said, "Those are nice birds; I will give you 17c."

"That's all they are worth, and they are yours," was the prompt reply. Another, who arrived about the same time, received an offer of 16c, but declined it, deciding to "peddle" a little.

No other buyer thought his birds were worth more than that, and at the end of two hours he sold at that figure. Among such an experienced group of buyers there was necessarily little difference of opinion as to the value of an offering, so that, as a rule, a seller could get the best price going in a very short time.

Turkeys sold at 15c to 18c, ranging at 16c and 17c; geese and ducks 9c; chicks (undrawn) about 8c. Though some prime birds were sold, it was considered that on the whole the quality of the offering was considerably below that of last year. And quality fixed the price every time.

The total offering amounted to about sixteen tons, three-fourths of which went to the American buyers. The cash paid out approximated \$5,000.

The good prices of last year secured the success of Monday last, and we may expect a corresponding benefit next year. So far as the American buyers are concerned, it would meet their views to cut out the little fairs and buy at only a few central points where the shipping facilities are good. Of course, Athens would be one of these points. The interests of the farmer, too, would be best served in this way, as he would be sure of exposing his poultry to a large and varied competition.

SEED GRAIN SAMPLES

By instruction of the Hon. Minister of Agriculture another distribution will be made this season of samples of the most productive sorts of grain to Canadian farmers for the improvement of seed. The stock for distribution is of the very best and has been secured mainly from the excellent crops recently had at the branch Experimental Farm at Indian Head in the North-west Territories. The distribution this spring will consist of samples of oats, spring wheat, barley, Indian corn and potatoes. The quantity of oats to be sent this year will be 4 lb., and of wheat or barley 5 lbs., sufficient in each case to sow one-twentieth of an acre. The samples of Indian corn and potatoes will weigh 8 lbs. as heretofore. A quantity of each of the following varieties has been secured for this distribution:—

OATS—Banner, Wide Awake, Improved Ligowo, Waverley, Goldfinder, Abundance and Thousand Dollar.

WHEAT—Freston Red Fife, Percy, Stanley, Huron, Laurel and White Fife.

BARLEY—Six rowed.—Mensury, Odesa, Mansfield, Claude and Royal.

Two rowed.—Sidney, Invincible, Standwell, and Canadian Thorpe.

POTATOES—Carman No. 1, Early White Prize, Canadian Beauty, Uncle Sam, American Wonder, Bovee, Early Andes and Late Paritan.

Every farmer may apply, but only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley or potatoes, and applications for more than one sample for one household cannot be entertained. These samples will be sent free of charge through the mail.

Applications should be addressed to the Director of Experimental Farms Ottawa, and may be sent in any time before the 1st of March, after which the lists will be closed, so that all the samples asked for may be sent out in good time for sowing. Parties writing should mention the sort or variety they would prefer, with a second sort as an alternative, and should the available stock of both these varieties be exhausted, some other good sort will be sent instead. Those applying for Indian corn or potatoes will please bear in mind that the corn is not available for distribution until March or April, and that potatoes cannot be mailed from here until danger from frost in transit is over.

Director Experimental Farms,

Death of William Beach

William Beach, aged 88 years, died at his home in Athens on Sunday last. Deceased had been for many years a resident of this district, an honest, industrious man, and had the respect of all who knew him. To his aged partner in life and to his bereaved family the Reporter extends cordial condolences.

The funeral, which was largely attended, took place on Tuesday to the Presbyterian church, where an impressive service was conducted by the Rev. I. N. Beckett.

INTERNATIONAL LESSON NO. XIII. DECEMBER 25, 1904

The Prince of Peace—Isa. 9: 1-7—Christmas Lesson

Commentary. I. Great darkness (vs. 1, 2, 3). Nevertheless—"A transition word from the dark picture of chapter viii. 5-22, describing the woes from Assyrian predominance to the bright dawn and consummation of the Messianic era."

II. A Great Light. (vs. 2-5). A great light—"The sudden change from dense darkness to the shining light which the prophet saw is quite remarkable."

III. A vision of the Messiah (v. 6). Unto us—"The prophet spoke of the predicted blessings as if already communicated."

IV. The Messianic Kingdom (v. 7). Of the increase, etc.—"The government shall increase in numbers, in power, in the completeness of its realm. It shall increase in the blessings it bestows. It is like the powers of nature, which are exhaustless. There is no limit to their application to the uses of man."

For ever—"Only such a kingdom can endure. Nothing is really settled till it is settled right. The powers of evil will fall before Christ. The prince of darkness in darkest England, darkest Africa, and darkest America shall be torn from his throne, and the light shall scatter the darkness, and the Sun of Righteousness with healing in his wings shall change winter into spring, and night into day."

VI. The people of Judah. (vs. 11-12). The people of Judah. There were at this time under a two-fold darkness: 1. The darkness of outward trouble. See II. Kings xv. 37, xvi. 4-8, 17; II. Chron. xxviii. 5-8. 2. They were in moral darkness. Ahaz had led the people into the most abominable practices in honor of the heathen divinities whose worship he had established in his kingdom. Finally, towards the close of the reign, he shut up the great doors of the temple (II. Chron. xxviii. 24), discontinued the offering of incense and the morning and evening sacrifice, and left the whole interior to decay, neglect and ruin.

III. A vision of the Messiah (v. 6). Unto us—"The prophet spoke of the predicted blessings as if already communicated."

IV. The Messianic Kingdom (v. 7). Of the increase, etc.—"The government shall increase in numbers, in power, in the completeness of its realm. It shall increase in the blessings it bestows. In an answer to this prayer I was again told to seek my Bible. Again I opened it, and read: "And thou shalt speak my words unto them, whether they will hear or whether they will forbear, for they are rebellious."

This was the seventh verse of the second chapter of Ezekiel. I have no explanation to make, except as stated. I do not believe in clairvoyance, am not a religious fanatic or spiritualist. I am a member of the Congregational Church, and attempt to live a Christian life and do what I think is right.

AUSTRIAN ULTIMATUM.

BROUGHT THE PORTE TO TIME AND THE CRISIS IS OVER.

Constantinople, Dec. 12.—The Porte yielded to the Austrian demands regarding detention of Austrian mails, and the incident may be regarded as closed. Threatened complications have, therefore, been averted.

The Austrian ultimatum demanded the dismissal of the director of customs, the Secretary-General of the Vilayet, and the chief of police of Scutari, with-

Must Remove Customs Officials at Scutari.

Vienna, Dec. 12.—Unless the Ottoman Government dismisses and punishes by noon Thursday the gendarmerie commander and the Customs officials at Scutari, who recently forcibly detained the Austrian-Hungarian mails, Austria will order a naval squadron that is now lying ready at Pola to carry out a demonstration at some Turkish port. The Austrian Ambassador's prompt

To be a successful wife, to retain the love and admiration of her husband should be a woman's constant study. Mrs. Brown and Mrs. Potts tell their stories for the benefit of all wives and mothers.

"DEAR MRS. PINKHAM:—Lydia E. Pinkham's Vegetable Compound will make every mother well, strong, healthy and happy. I dragged through nine years of miserable existence, worn out with pain and weariness. I then noticed a statement of a woman troubled as I was, and the wonderful results she had had from your Vegetable Compound, and decided to try what it would do for me, and used it for three months. At the end of that time I was a different woman, the neighbors remarked it, and my husband fell in love with me all over again. It seemed like a new existence. I had been suffering with inflammation and falling of the womb, but your medicine cured it and built up my entire system, till I was indeed like a new woman. Sincerely yours, Mrs. OZAS. E. BROWN, 21 Cedar Terrace, Hot Springs, Ark., Vice President Mothers' Club."

Suffering women should not fail to profit by Mrs. Brown's experiences; just as surely as she was cured of the troubles enumerated in her letter, just so surely will Lydia E. Pinkham's Vegetable Compound cure other women who suffer from womb troubles, inflammation of the ovaries, kidney troubles, nervous excitability, and nervous prostration. Read the story of Mrs. Potts to all mothers:—

"DEAR MRS. PINKHAM:—During the early part of my married life I was very delicate in health. I had two miscarriages, and both my husband and I felt very badly as we were anxious to have children. A neighbor who had been using Lydia E. Pinkham's Vegetable Compound advised me to try it, and I decided to do so. I used it for three months, and my appetite increased, the headaches gradually decreased and finally disappeared, and my general health improved. I felt as if new blood coursed through my veins, the sluggish tired feeling disappeared, and I became strong and well."

"Within a year after I became the mother of a strong healthy child, the joy of our home. You certainly have an splendid remedy, and I wish every mother knew of it.—Sincerely yours, Mrs. ANNA PORTER, 510 Park Ave., Hot Springs, Ark."

If you feel that there is anything at all unusual or puzzling about your case, or if you wish confidential advice of the most experienced, write to Mrs. Pinkham, Lynn, Mass., and you will be advised free of charge. Lydia E. Pinkham's Vegetable Compound has cured and is curing thousands of cases of female troubles—curing them inexpensively and absolutely. Remember this when you go to your druggist. Insist upon getting Lydia E. Pinkham's Vegetable Compound.

In three days, failing which Austria would make a naval demonstration at Salonica, and would demand the settlement of all pending questions, including official recognition of the schools under Austrian protection. The energetic attitude of Austria in ordering a squadron of warships to be made ready indicated the desired action on the part of the Porte.

The Unknown Bridegroom.

What a fool I was to tell him they had gone to Paris, Leighton mumbled, as he glared fiercely after his rival; but just as soon as the carnival is over, I will follow them. Blast the fellow. I never dreamed he would play me such a shabby trick.

He was not so overcome by the interview, however, as to permit it to interfere in the least with his amusement. He proceeded directly to make a call upon Inez King, with whom he spent the afternoon, driving out to the Campagna, and afterward dining with her at a fashionable cafe.

Merrill, on the contrary, and literally, "in dead earnest," as he had said, went straight to his hotel, raked his trunk and took the next express en route for Paris.

He traveled night and day, and arrived at his destination some three days previous to the arrival of the Seaver party, much to his disappointment.

He kept a sharp lookout for them, however, but could get no trace of them until they had been in the city several days, and then he lost no time in calling upon them.

Florence was not very well pleased by his appearance, for she could not forget their last interview, and she dreaded a renewal of his attentions and importunities, she secretly despised him for the threat he had made, hoping thereby to coerce her consent to his proposal.

as suddenly as he had come, and Florence was heartily glad to be rid of his presence.

Thus time passed very pleasantly, and rapidly to our four friends until four weeks slipped by, when they were rejoined by Sir Walter Leighton.

He had intended to leave Rome immediately after the carnival, but Miss King had made so many plans ahead of which he had found it next to impossible to tear himself away; while, too, in spite of his boasted affection for Florence, he found the gay actress a companion after his own heart.

When the men who had acted as her pages at the ball appeared to claim her promised reward for their services, they related what had befallen them, just as they were on the point of abducting their victim.

They could give no description of their assailant, however, owing to the darkness and the suddenness of the attack, and thus the identity of Florence's champion remained a mystery, greatly to the perplexity of the young couple.

She artfully asked Sir Walter, and it was through him that she learned the Seavers had left Rome.

got upon the last car—the young man waving his hat to Mr. Seaver, who was looking back for them, to show that they were all right—when it began to pull out of the station.

"I beg your pardon, madam," he exclaimed, as courteously as if he had been addressing a grand dame from Upper Grosvenor street; "I did not see you in time to avoid a collision."

"I hope you are not hurt," he added, by way of apologizing, and with the hope of perhaps being able to carry out a long-cherished plan.

"No, sir," he briefly replied the woman, as she regarded him with a half-puzzled, half-vacant stare.

"Your name is Mary, isn't it, and you used to live in the Hahnemann hospital, did you not?"

"Do you remember a gentleman who came to see you there last fall?" The woman shook her head doubtfully, but she had a look on her face which told her questions that she had a vague remembrance of his visit.

"I don't live there now," she stolidly remarked, while her eyes wandered with a wistful look to a family who was standing quietly beside his friend.

"Where is your home now?" Mr. Carrol inquired.

(To be continued.)

from one of these visits, as they were turning the corner of a street, they suddenly upon a woman bearing a large bundle.

Before Mr. Carrol could avert his eyes he had knocked the package to the ground, and then, with a quickity and dexterity that barely saved its bearer a fall, he snatched it.

"I beg your pardon, madam," he exclaimed, as courteously as if he had been addressing a grand dame from Upper Grosvenor street; "I did not see you in time to avoid a collision."

THE DISSEMINATION OF WEED SEEDS.

All weeds are disseminated by means of their seeds, while a considerable number also multiply through the medium of underground root stems. Among the latter we have couch grass, Canada thistle, perennial sow-thistle, bindweed, sheep sorrel, and some others.

Weeds that depend for reproduction upon their seed alone produce them in large numbers. A single plant of false flax will mature from twenty-five to thirty thousand seeds, and although we sometimes have reason to doubt the vitality of the seed of corn or mangels, that we buy, we need have no misgivings as to the vitality of these weed seeds. The seed of these weeds that mature in our grain crops, even though it shells out on the field, is with difficulty induced to germinate at a time when it can be destroyed.

In the seed laboratory at Ottawa, one hundred fresh seeds of wild mustard were planted in good soil in a box, and under the most favorable conditions only thirty-five of them could be induced to grow. The box was then placed in the open air for a week with the thermometer below zero. When again put in the germinator, seventy-five of the seeds produced plants. The soil was then allowed to become thoroughly dry and again put out to freeze, after which twelve more of the hundred seeds germinated.

As a rule seeds of the more noxious weeds that grow from the seed alone retain their vitality for several years when embedded in the soil. It is highly important, then, to prevent the formation of seed. It is quite evident that many fields throughout Canada have now sufficient stock of seeds to produce luxuriant crops of weeds for several years, but by adopting a suitable rotation it is possible to prevent most of the plants from these seeds coming to maturity.

All will agree that most districts have their full share of weeds. Like the poor they are always with us. How do we get them? Many farmers can doubtless remember when the Canada Thistle was a new weed. Perennial sow-thistle, ribwort, ragweed, bindweed and some

others are of more recent introduction. There are many more to come, and soe of them are even more noxious than those that are now common. For instance, there is the Devil's Paint, Bay or orange hawkweed, that is already well distributed over the eastern townships of Quebec and part of New Brunswick. Where this weed has become well established, land that was worth forty dollars an acre five years ago, could not be sold for five dollars an acre to-day.

There is also a number of weeds that have been recently introduced into western Canada, and which have proved to be exceedingly dangerous. Most of them were brought in by immigrants. Among these are the muskard and field pennycress or stinkweed. A few plants of each of these have been found in different parts of Ontario during the past season, and the east will know more about them later. One thing seems clear and that is that the weed pests are now gaining headway to a much more rapid rate than they did twenty-five years ago. How can we account for this?

The investigations of the seed division have shown that the seedmen are to blame to a considerable extent, but there are many other means by which weeds become disseminated, and which are worthy of consideration. Any farmer who has land that is annually flooded by freshets knows the difficulty of keeping such land free from weeds. Transportation companies, particularly the railway companies, have much to do with the introduction of new weeds. Most of our noxious weeds are introduced from Europe. Their seeds are often brought in with material that is used for packing articles of commerce.

The wind and animals of various kinds do much to spread weed seeds in a local way. Seeds of many weeds are blown about by the wind, and some are like small parachutes as in the case of the Canada thistle, and the aid of which the seeds are carried long distances by the wind. Nature provided seeds of other weeds, such as burrs, with means of clinging to the wool of sheep or to other animals, in order to insure their distribution. In some cases, it is the seed that comes first; the weed course follows.

Yours very truly, W. A. Clemons, Publication Clerk.

TELEPHONES IN THE FOREST. Stations in the Dense Timber Keep Loggers in Close Touch With Home. Up in the dense timber along the Big Blackfoot, Montana, where the logs are cut that keep the big mills at Bonner in motion, the traveller is often surprised as he journeys through the logging district to see small telephone stations located at intervals in the forest. There are several of these stations, and they enable the loggers to keep in touch with the mills, and when the drive is in progress, with the rivermen as they chase the logs down the stream.

These timber telephones are of the greatest service in the conducting of the business of the country. They save a vast amount of time, and in case of an accident or any other trouble they are of indescribable value. During the last two or three years, such telephone lines have come into use in most of the big logging regions.

Throughout the forests, from the St. John to Vancouver, lumber camps belonging to the same interests are connected by telephone, the lines running through the saw mills or wood pulp works at the frontier towns, from which communication can be had even to the metropolis.

It was formerly the custom of each lumber interest to maintain a force of couriers, like the voyageurs of the Hudson Bay Company, and these hardy men, with knapsack, would travel twenty-five miles a day through the wilderness, over rough forest paths.

ACHING KIDNEYS

Can Only be Cured by Enriching the Blood by the Use of Dr. Williams' Pink Pills. The kidneys filter every drop of your blood. The purity of the blood depends upon the kidneys. If the kidneys are weak the blood is impure and the strength for their work and leave the blood unfiltered and foul. If your blood is bad the kidneys get clogged with pain, full, poisonous impurities. That is what causes your headache, the dull pains or sharp stabs of sick kidneys. And kidney disease is one of the most deadly and hopeless things that can attack you.

Mr. George Johnson, of the village of Ohio, N. S., gives strong proof of the truth of the above statements. He says: "My son, now nineteen years old, suffers greatly with kidney trouble. He was constantly troubled with severe pains in the back, and often passed sleepless nights. His appetite failed, he grew weak and could hardly do the usual work that falls to the lot of a boy on a farm. We tried several kidney medicines, but they did not help him any. Then a friend recommended Dr. Williams' Pink Pills, and this was the first medicine that reached the cause of the trouble. He used the pills for a couple of months and I am thankful to say is now as strong and healthy as any boy of his age."

There is no disease due to bad blood that Dr. Williams' Pink Pills will not cure, simply because they make new, rich red blood that expels disease from every part of the body. That is why they cure the worst cases of anemia, indigestion, neuralgia, rheumatism, headache, and backaches, and the special ailments from which women alone suffer. Not only the genuine pills can do this, but you should see that the full name, "Dr. Williams' Pink Pills for Pale People," is printed on the wrapper around each box. Sold by all medicine dealers, or direct by mail from the Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six boxes for \$2.50.

LIFE ON THE PLANET MARS.

Geographical Map of Our Celestial Neighbor Very Accurate. We can draw all the geographical configurations, mountains, rivers, islands, peninsulas, mouths of rivers, and canals of Mars with accuracy, says Camille Flammarion in Harper's Magazine, and we can anticipate what district will appear in the lens of the telescope, for the length of the rotation of the planet is known to the hundredth part of a second. As the planet turns upon its axis more slowly than ours, the calendar of two consecutive years of 608 days and 18 minutes is necessary since Mars entered into the sphere of our observation. And one can say also that there is here a small number of the inhabitants of this world who have observed it in all its details, and of these the most experienced is Signor Schiaparelli, director of the observatory at Milan.

The geographical map of the planet Mars has been made with infinite care by the above-mentioned astronomer. One might really consider it a terrestrial sphere of continents, rivers, peninsulas, gulfs, waters. Moreover, clouds, rains, inundations, snows, sea storms, winters and summers, springs and autumns, prevail as they do here; and the intensity of the seasons is absolutely the same as with us, the inclination of the axis being the same as ours.

Our problem of the habitability of the stars is limited to observing the celestial bodies upon which the conditions are such that organized matter can exist in a durable form. In the planet Mars, the density of a cubic meter of water, earth, or any other body is only the seventeenth of what it is here, and the weight is only 38-100ths. A kilogram transported to Mars would therefore only weigh 376 grams there, and a man or woman weighing 70 kilos would only weigh 26 there. The years are nearly twice as long as upon our planet, and the climatological conditions seem much more favorable than they are here.

NUTS ON THE MENU.

Well Prepared, They Are the Best of Tissue Builders. Nuts may well play an important part in the menu, as they may during the entire cold weather. They must be carefully prepared, however, as few people, even though their teeth be good enough (which few are) will take the time to grind them up into digestible meal, as they may during the entire cold weather. They must be carefully prepared, however, as few people, even though their teeth be good enough (which few are) will take the time to grind them up into digestible meal, as they may during the entire cold weather.

Almonds—Almonds stand in the first group of nitrogenous or tissue-building foods. These members of the rose family, which are now grown in our own country, are among the most nutritious of nuts. They are sweet and delicious, though the housewife should remember "not to place butter or oil in them, as they will become rancid, and the fat and oils defeat their digestive function. There is oil enough in them naturally to hold them together."

Chestnuts—Undoubtedly the chestnut is the nut of the future. The chestnut must be cooked to be digestible, since it contains so much starch. It stands first with many as a turkey stuffing. The English Walnut—Many prefer the English walnut above all dessert nuts. Though very tasty, they are among the most digestible, and stand second in value. The Filbert—The filbert and the hazel nut are favorites, the English filbert, or cob nut, being the most delicious.

PHONES IN THE FOREST.

Stations in the Dense Timber Keep Loggers in Close Touch With Home. Up in the dense timber along the Big Blackfoot, Montana, where the logs are cut that keep the big mills at Bonner in motion, the traveller is often surprised as he journeys through the logging district to see small telephone stations located at intervals in the forest. There are several of these stations, and they enable the loggers to keep in touch with the mills, and when the drive is in progress, with the rivermen as they chase the logs down the stream.

These timber telephones are of the greatest service in the conducting of the business of the country. They save a vast amount of time, and in case of an accident or any other trouble they are of indescribable value. During the last two or three years, such telephone lines have come into use in most of the big logging regions.

Throughout the forests, from the St. John to Vancouver, lumber camps belonging to the same interests are connected by telephone, the lines running through the saw mills or wood pulp works at the frontier towns, from which communication can be had even to the metropolis.

It was formerly the custom of each lumber interest to maintain a force of couriers, like the voyageurs of the Hudson Bay Company, and these hardy men, with knapsack, would travel twenty-five miles a day through the wilderness, over rough forest paths.

Now the mill calls each camp in turn at stated hours, and receives reports and gives instructions to the foremen and it is not necessary to dwell on the commercial advantages of maintaining such close touch between headquarters and outposts in any enterprise. Letters are read to men snowed in the forest fifty or one hundred miles away, and answers are dictated by the lumbermen or stenographer, who transcribes them in the office and then mails them to their homes.

The relative contentment among the men which is established by this frequent communication is highly advantageous to the working force, and therefore to the employers.—Detroit Tribune.

SLEEPLESS BABIES.

Well babies sleep soundly and wake up brightly. When babies are restless and sleepless it is the surest possible sign of illness—in all probability due to some derangement of the stomach and bowels, or teething troubles. Baby's Own Tablets are the only proper remedy. They remove the trouble and in this way give the little one sound, refreshing sleep, and it wakes up healthy and happy. Guaranteed to contain no harmful drug or opiate. Mrs. Thos. Cain, Loring, Ala., says: "My baby suffered from stomach trouble and teething, and was unable to cross. I got Baby's Own Tablets and they seemed to work almost like a charm. I think nothing can equal the Tablets for children's ailments." You can find them at drug stores or get them post paid at 25 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Random Notes by the Way

BIDEAU FERRY

One part of Britain's policy has ever been to imitate that of the ancient Roman Empire—to have one good military road to and through all her colonies—and military service was in view when this great waterway was built, connecting the Ottawa with the east end of Lake Ontario, practically bringing the Atlantic coast to Niagara Falls.

I know that our great country—British America—from the Arctic regions to the great lakes, from the Atlantic to the Pacific, abounds in picturesque scenery. Its lofty, eternal snow-crowned, cloud piercing Rocky Mountain peaks, their base lost in gorges, vast and black bottomless ravines, are unsurpassed in awe-inspiring grandeur and sublimity.

To illustrate—a long stretch of narrows, not 100 feet wide, occurs soon after leaving Smith's Falls; cedar boughs on both sides form a heavy fringe and dipping in the water, conceal the shores; then suddenly the water expands into a lake, including 5 or 6 square miles, abounding with fish.

Many years ago, one Oliver ferried people over this water. He finally shot himself—his father was shot and his son was shot—three generations.

The Courts House near the bridge, at the junction of North and South lakes has overflowed with first class guests for fifteen years, under the popular management of Mr. Peter Coultas, who is also proprietor. This is a strictly temperance locality.

Mr. James Wood is a large farmer (800 acres), and for years was a contract builder, a man emphatically irreplaceable. Before quitting, he built a model cheese factory. He consulted Mr. Pablo, strictly followed his plan and advice, and erected a fine brick building with cement floor, wainscotted throughout, oil finish, gang press, up-to-date in details—no trouble in making at any time. It is located near the bridge—a model.

Mr. F. R. Pratt had one apiary here and two others at a distance. He overcame almost insurmountable difficulties. The three apiaries were moved long distances three times from tall tall spring location, entailing very hard labor on him. In all this he evinced great patience and more than usual good judgment in details. He is clever in any line he starts in. Mr. Wood occasionally called on me at this apiary. On one of these visits he enquired if I knew Dr. Hart of Athens.

I replied, "yes, I know the Dr. very well—he is a strong-minded man, of excellent common sense, and enjoys a valuable practice." Mr. Wood said, "I have heard that he has in a few years treated 26 or 30 cases of appendicitis successfully, without employing chloroform or the lance."

It Beats Them All

It has always been admitted that the Family Herald and Weekly Star of Montreal clearly out-classes and distinguishes all the other weeklies, and is looked upon as the one great family and farm paper of this continent. This year the publishers have surely reached the limit as to what one dollar can purchase in the new paper line, for never before have we seen such a handsome picture as "The Princess at Work," and such a grand paper as the Family Herald and Weekly Star offered together for one dollar. Other city weeklies and dollar a year daily papers may attempt to follow the Family Herald, but it is only an attempt. There is only one best, and that is without doubt the Family Herald and Weekly Star of Montreal.

Look at the date on your address label, and if it doesn't read up-to-date, we will be pleased to change the figures.

Leading Business Man of Welland Gives His Experience With the Great Canadian Kidney Remedy.

Welland, Ont., Dec. 5.—(Special).—There is no better known or more highly respected man in Welland than Mr. J. M. Yokom. Born and brought up in the neighboring township of Crowland, by his own industry and sterling honesty he has grown to be one of Welland's leading merchants.

For a year or more I had kidney trouble in all its worst symptoms," says Mr. Yokom. "My head was bad, I had no appetite and I lost weight fast. At times I was entirely incapacitated. I doctored with a physician of vast experience but got no good results.

It became despondent of ever being well again, when by good luck I chanced to try Dodd's Kidney Pills and from the first they seemed to suit my case. Five boxes cured me completely."

DANGER IN SHOOTING BIG GAME.

Hunter's Bullets May Not Stop the Brute's Advance.

The disturbing element in hunting elephant or rhinoceros has been always, to me at least, the feeling of uncertainty as to whether or not I could stop the animal if I wounded it and it charged me.

Based on my experience, therefore, I should place the elephant first and the rhino third after the sealopard, which is fully as formidable as the elephant.

I know of no sensation more awesome than standing ankle deep in clinging mud in dense cover, with the brute's nostrils around you as though the entire forest was toppling, and the vulnerable joints are crashing against the trunk.

The danger of the rhino and of the lion is in their lightning action and ferocious strength, but you have the shoulder, if it is not broken, to rely on.

AKASKA HILL OCCUPIED BY JAPS AT PORT ARTHUR.

Japanese Naval Guns Battering Russian War Vessels in the Harbor.

The Poltava Sunk, the Bayan Aground and the Retvizan Disabled.

Heavy Cannonading Heard Around Poutiloff, in Vicinity of Mukden.

London cable: It was reported unofficially the other day that Russia had resolved to send a third squadron to the Far East. This has been semi-officially denied, but the Daily Mail's St. Petersburg correspondent reiterates the story, adding that the czar, at a special conference of the Supreme Naval Council, signed a decree giving effect to the decision. It was decided to complete the battleships Paul I. and Slava with all speed, and, adding to them five older battleships, five cruisers, and forty torpedo boats, provide a new fleet within two months. Three thousand engineers were engaged immediately, and Russian agents abroad were instructed to arrange for coal for the fleet, the supplying of which will be entrusted to the German firm, owing to the difficulties raised by the British Government against British merchants furnishing supplies for Russian warships. No commander has been selected, but probably Admiral Dubassoff or Admiral Tchukin will be appointed to the post. The correspondent asserts that the conference did not reach a decision to utilize the Black Sea fleet.

The czar was emphatically opposed to this, but Grand Duke Alexis, Naval Commander-in-Chief, favored it. The reports received in London concerning the probability of the Black Sea fleet being employed are contradictory. A section of the Russian press, notably the Novoye Vremya, which is known to have close connection with exalted and influential personages, has been agitating for days for the forcible abrogation of the treaties closing the Dardanelles. A conspicuous contribution to the movement is a signed article by Capt. Kiado, of the Russian navy, in the Novoye Vremya, urging that it is imperative that the Black Sea fleet should be used. He and others argue that none of the signatories of the treaties will attempt to prevent

at Swakopmund having been denied, it is a matter of conjecture whether it is proceeding by way of the Cape of Good Hope or the Straits of Magellan.

Rumors from the United States and elsewhere that Russia has purchased, or will purchase, warships from South American republics continue to be believed. It is reported that Russia is now willing to pay any price for vessels that are suitable for war purposes. A Paris correspondent hints that Mr. Smet, who is said to have bought the Caroline from Yarrow & Co., is largely engaged in making such purchases. There has never before been such a demand in Paris for vessels of all descriptions. Applications, coupled with assurances of cash payments, are constantly received by ship agents from individuals previously unknown to them. Exorbitant commissions are sometimes asked.

JAP NAVAL GUNS

Playing Havoc Among the Russian War Vessels in Port Arthur Harbor.

A Tokio cable says: The commander of the Japanese naval guns in front of Port Arthur, telegraphing on December 6, says:

"An observation taken from 203-Metre Hill shows that the turret ship Poltava is sunk and that the battleship Retvizan is lying heavily to port.

"Observations taken Dec. 6 covered the results of the bombardment of Dec. 5. Are now taking observations from a hill near Shushaiying.

"Since Dec. 2 we have daily bombarded the enemy's fleet lying south of Pai Yu mountain. From that point only the masts and funnel tops of the battleships Pobieda, Retvizan or the cruiser Pallada could be seen, but it was impossible to count the number of our shells taking effect.

"On other ships explosions resulting from our shells could be seen, but owing to their positions behind hills it was difficult exactly to identify them.

"The total of our shells taking effect on the enemy's ships was as follows: On a vessel of the Pobieda type, thirty-four; on the battleship Retvizan or the cruiser Pallada, thirty-four; on the turret ship Poltava, eleven. Besides these fifty other shells struck, from which explosions followed.

"On Dec. 5, seven shells struck the battleship Pobieda and about 3.30 p.m. a big explosion was observed south of Paiyu mountain, resulting from the effects of our shells evidently on a powder magazine.

"The successful result of the bombardment on December 5, is inspiring our men to still greater efforts."

The headquarters of the Japanese army in front of Port Arthur has reported confirming the disabling of the Russian battleships Retvizan and the Poltava, and stating that the cruiser Bayan is aground. The report goes on to say as follows: "Owing to the plunging fire from 203-Metre Hill, the enemy has withdrawn to Akaska Hill.

"On Dec. 6 our forces occupied an entire fort at 1 p. m. Subsequently our forces, after dislodging the enemy occupied an eminence north of Suerh Kou and two eminences north of Sanlichiam, at 3 p. m.

"On Dec. 6, at 4 p. m., in response to the bearer of the enemy's flag of truce, an armistice of five hours was granted for the removal of the dead."

The Poltava was an armored turret ship of 10,900 tons displacement, and 11,255 indicated horse power. She was built in St. Petersburg in 1894 and went into commission in 1898. Her cost of construction was nearly \$6,000,000. Her armament consisted of four 12-inch, 12 5.9 inch and 34 smaller calibre breech-loading rifle guns of the Russian Krupp pattern. She had a crew of 700 men. She had a speed of 16.2 knots.

The Retvizan is a battleship of 12,700 tons displacement and 16,000 indicated horse power. She was built in Philadelphia in 1902. Her armament consisted of four 12 inch, twelve 6 inch, twenty 3 inch, twenty 3 pounder and six 1 pounder guns of Russian Krupp pattern. Her speed was 18 knots an hour.

FOREIGN ENLISTMENT ACT.

Charge Upon Which Roche Has Been Summoned.

A Paris cable: Mr. Burke Roche, against whom, it is said, a warrant was issued by a London police court for his arrest for taking a boat from England to Russia for conversion into a torpedo boat, he therefore violating the British Foreign Enlistment Act, is in this city. He refuses to discuss the charge against him. He hopes the matter will blow over quietly, because he wants to re-enter Parliament. He professes to be amazed at the fuss that is being made over an unimportant incident. Mr. Sinnett, who is said to have purchased the boat from its English builders, and against whom a warrant is also believed to have been issued, treats the matter lightly. He talks of going back to England if his counsel secures bail for him, but he does not intend to be imprisoned.

The Charge Against Roche.

London cable: Some of the Paris correspondents say that Mr. Roche's appearance in London when the case against him is called is conditional upon his obtaining bail.

The Standard says it learns that the Government has thus far not succeeded in serving a summons on Burke Roche, an English turbine boat Caroline from an English yard in Lebu, where she was delivered to Russia, owing to the fact that he is abroad. Consequently, when the case against him is called on Dec. 12th, it probably will be adjourned. Mr. Roche is charged with violating the Foreign Enlistment Act.

BLOCKADE RUNNING.

A Shanghai Merchant Tells of Recent Successes.

San Francisco report: H. Frankell, the first man to arrive in Chemulpo, Corea, after the battle of Feb. 9, and the blockade of the port, says that the Japanese took possession of that port, was a passenger on the Siberia, which arrived from the Orient to-day. Frankell, who is a business man of Shanghai, has taken a prominent part in blockade running since the war started, and has shared in the enormous profits of the business.

"You see, business has all gone to the deuce in Shanghai," said Frankell, "so everybody has gone in for blockade running, with profitable results. I ran a cargo of petroleum into New-Chwang in the latter part of February, and made big profits."

"The title of King of the Blockade Runners, belongs to Louis Spitzel, of Shanghai, who is known all over the Far East. Spitzel has made a mint of money running cargoes into Port Arthur. One of his ships, the steamer Shishan, was seized recently by the Japanese, and some people gained the impression that the incident ate up most of the profits of his summer's business. On the contrary, Spitzel wanted the ship seized. The Shishan took a cargo of ammunition and cattle for the Russians. She appeared for New-Chwang and landed the cargo at Port Arthur. Then Spitzel took the vessel over to New-Chwang. The Japanese were aching to capture the Shishan, but after they had seized her they were forced to release her, because she had no contraband aboard."

JAP BIG GUNS.

Russian Warships Poltava and Retvizan Sunk, and Others Badly Damaged.

A Tokio cable despatch: The commander of the Japanese naval land battery in front of Port Arthur reporting on Dec. 7th, says:

"An observation taken to-day, Dec. 7, from 203 Metre Hill, shows that the turret ship Poltava lies sunk, as reported on Dec. 6th. The battleship Retvizan was found to have sunk, her stern being under water."

"The bombardment to-day, Dec. 7th, has heavily damaged the battleship Pobieda, which is listing to starboard and showing the westward portion of her hull which is painted red."

RAMPANT MILITARISM.

Outrageous Idea of Soldier's Duty in Germany.

Berlin, Dec. 12.—An unusually scandalous case of military justice fills public attention here. Some days ago at Dessau two private soldiers, named Guenther and Voigt, were convicted of insubordination to a sergeant named Heine, and sentenced to five years' penal servitude and expulsion from the army.

Heine met the soldiers in a dancing saloon. He was drunk and insulted some girl friends of Guenther's. He was asked to apologize. Instead of apologizing he unsheathed his sword and wildly struck out on all sides. Voigt and Guenther disarmed him, and in the struggle he fell, and while on the floor he injured a girl. These are the facts.

At the legal counsel engaged for the prisoners pleaded that his clients acted only in self-defence. He was sharply reminded by the prosecution that no such defence could be considered; that it was the duty of the two soldiers to allow themselves to be killed by Heine rather than raise a hand against him; that Heine was sentenced to three months' imprisonment only puts the crown on the entire scandalous proceeding. Feeling here runs high at this travesty of justice.

METALLIC FERMENTS CURE FOR PNEUMONIA CASES.

Discovery Made by Electrical Dissolution in Water of Gold and Silver.

New York, Dec. 12.—A Paris despatch says that a sensational communication was made to the Academie De Medicine, on Sept. 6, by Dr. Albert Robin, who reported the discovery of the fact that certain metals, such as gold and silver, very finely subdivided and employed in infinitesimal doses, exercised a considerable effect on the vital phenomena.

Reduction of the metals to the desired state is obtained by their electrical dissolution in water. The metal so treated acquires the property of developing a force similar to that of a ferment.

TROUBLE-MAKERS IN CHINA.

Anti-Dynastic Movement Which Threatens the Throne.

New York, Dec. 12.—A Herald correspondent cables from Tientsin, China, under date of Dec. 5: "I have just completed a journey of a thousand miles through the south of Chi Li and the north of Honan and Shantung Provinces.

"These sections of North China I find are in a state of evident anti-dynastic unrest, which will probably culminate in an uprising against the Manchus. This uprising will not be confined to the sections of China mentioned, but will include a majority of eighteen Provinces. This movement is not ignorant Boxer fanaticism. It is widespread, well organized and well armed. Prominent and wealthy men are members of all the northern societies, controlled by a strong central authority, with headquarters in South China.

They are in close touch with the Kolahead of the present rebellion in Kaminchi. The Kolahead was organized by leaders of the Tai-Ping rebellion as a patriotic society. It now leads the anti-dynastic movement and includes

among its members many soldiers from south of the Yangtze.

The anti-dynastic movement is necessary anti-foreign. Premature overt acts are more probable in Honan Province. Strong government influence is evident in Chi-Li and Shantung. There is no evidence of Japanese influence, but the situation is serious, for the Chinese government under existing conditions.

The Herald appends to this news the following: Joseph M. Singleton, president of the Chinese Empire Reform Association, when seen last night at his home in Brooklyn, said that the above-mentioned movement is evidently the work of a new reform organization known as Doek Ming, the object of which is to overthrow the present government. The object of the reform association, Mr. Singleton said, is to endeavor to establish schools for the education of all throughout the empire, and is wholly opposed to this Chinese organization.

one shot and that a struggle ensued in which the revolver fell from his hand. While the men were grappling and rolling over the floor, Bender, according to Boggiano, got his hand on the revolver. Seeing this, Boggiano says he reached for a broken table knife and plunged again and again at Bender's throat. That was all he claimed to have done, other than drag the body of Bender to the sink in an attempt to revive his victim.

But the criminal authorities did not take any stock in Boggiano's story. Their theory was that Boggiano lay in wait for Bender, presumably behind the door, and when Bender entered Boggiano hit him over the head with the billy. They also said he fired the revolver at Bender. Not satisfied with his work, Boggiano then got at Bender with the knife and cut his throat. It was no gentle slash he gave Bender, but a deep, heavy, strong cut across the throat. Bender's head was almost severed from the trunk. The body was found in the sink.

After that Boggiano ran down stairs, and Mrs. Bender met him at the foot with the cry, "My God, Nelson, what have you done?" Boggiano went to his parents' home, sat down in the kitchen, and told them what he had done. The police were notified and Boggiano was soon in No. 6 Police Station, charged with the murder of Harry P. Bender. Bloody clothes, a bloody metal pipe, a revolver, and a nasty-looking broken table knife were taken care of by the police as evidence. The knife had been sharpened. It was as keen as a razor.

Boggiano's trial soon followed. On the witness stand Boggiano was not very nervous. He told a story that was considered marvelous in the manner in which he related his crime. Every day as he entered the court room he had smiles and pleasant looks for his lawyer and his relatives and friends. Even when he was sentenced to die Nelson Boggiano did not quail. It is true he did pale a trifle but after Nelson kissed his little sister and brother and petted both. That smiling visage remained with Boggiano at Auburn until the day the guards told him, as he sat in his lonely cell in Murderers Row, that there was no hope for him and to prepare himself for death. Then the realization of the enormity of his crime overtook Boggiano and he became grave, and sad and serious.

If Nelson Boggiano had stayed away from Mrs. Bender he would not now be in a cell at Auburn prison with the mark of Cain upon his brow. If he had listened to the words of Harry Bender he would not now be a murderer. He might have been still working for the Bell Telephone Company earning a good salary. He might have been an honest, upright young man. And Whittier's two lines are applicable in this case:

"Of all sad words of tongue or pen The saddest are these: It might have been."

But it will not be for Nelson Boggiano. It is too late now. He need not ask the question the prophet asked, "And let me know the number of my days." Nelson Boggiano already knows.

Russians Repulsed.

Tokio cable: The following despatch has been received from Manchurian headquarters under yesterday's date: "At 2 o'clock in the morning of Dec. 6, the enemy posted at Tsuchenyang, advanced toward Paotsuyen, which is near Sianchan. Our watchers had temporarily been withdrawn but with reinforcements we immediately recovered the position.

"At 2 and at 4 in the morning of Dec. 7 the enemy attacked our position east of Fanshan and at Heilintun, which is near the Shakhe river. The attacks were entirely repulsed by sunrise."

A. A. Arthur, aged 71, who made his home in Hiltwaite, Kan., since last September, representing himself as a retired preacher and evangelist, was arrested by a St. Louis detective on the charge of forging a check for \$10,000, at Paris, Texas.

An Incubator Without Cash Until October, 1905

There is big money to be made in raising chickens with an Incubator. Canada exports annually millions of chickens to the United States and Great Britain.

The consumption of poultry in Canada is increasing rapidly and the poultry dealers complain that they cannot get enough poultry to fill their orders.

One woman bought a No. 2 Chatham Incubator the first of March—she had five hatches by July first and had four hundred plump, sturdy chicks. In six months her incubator had paid her \$100.00, several times its cost. A Chatham Incubator should pay for itself each hatch.

We have perfected an incubator and brooder. We believe it is now absolutely the best in the world. We have sufficient capital behind us, and we are out for the entire business in incubators. We know that there is no other incubator that can approach the

Chatham Incubator

This is our proposition: To demonstrate our absolute confidence in the Chatham Incubator we will send one to you, freight prepaid, and you make your first payment in October, 1905.

The fact that we sell our incubators in this manner guarantees them to the fullest extent. Thirty days' trial is a delusion and a snare. If you have good luck you may get off one hatch in that time, and even then you are uncertain, and if you reject the machine you will have to pay the freight both ways. But with us you send in your order and we ship the machine prepaid. When it arrives, if it seems all right, start your hatch, and we will give you until October, 1905, before you have to pay a cent in cash. We positively guarantee that the machine is a good hatcher. Every machine should sell a dozen, and we will, on no account, allow a machine that is defective to remain in any neighborhood.

WHAT SIX CHATHAM INCUBATOR USERS HAVE TO SAY:

The incubator sent me is working exceedingly well. It is very easy operated, and so far has required attention for only a few minutes per day. The first lot of eggs, 110, on examination I found that 53 were not fertile, two others were broken and 1 had 31 chicks or about 90 per cent. of the fertile eggs. The second trial of 110 gave me 83 living chickens. The brooder gives equally good satisfaction. The young broods are doing well. Yours truly, J. E. JOHNSTON, Editor Leamington Post, Leamington, Ont.

I have used your No. 2 Incubator for three hatches, and am so well pleased with it that I ordered a No. 3 which your agent, Mr. Turnbull, brought to-day. My third hatch came off yesterday with 112 chicks out of 119 eggs. We have also a Chatham Fanning Mill which gives good satisfaction. I will not lose an opportunity of recommending the Chatham machines to my friends. Yours respectfully, MRS. SIDNEY SMITH, Scotland, Ont.

The No. 3 incubator you sent me is all right, you hatched out of 109 fertile eggs 102 good strong chicks, and the brooder saved them all. We had in the incubator at the same time in the other tray, 44 duck eggs and 34 goose eggs, from which we got 59 ducks and 35 geese; total, 71 and I have not lost a chick as yet, and they are almost feathered. Yours truly, JOHN H. McLENNAN, Collingwood, Ont.

Your No. 2 Chatham Incubator has given very good returns to me. Out of 69 eggs, I had 42 chicks. I was rather afraid of wasting the eggs, and so did not fill the machine, but when the chicks came, I was sorry I had not filled it. I would recommend your incubator to my neighbors. Yours sincerely, MRS. MARGARET McINTOSH, Whitehead, Assa.

The No. 2 incubator I bought from you is all you recommended it to be. I put in 101 eggs, and after testing out the infertile ones, I had 72 chicks. I find the machine first class in every particular and easy to run, if directions are followed carefully. Yours respectfully, MRS. HENRY CHASE, Warren, Ont.

Chatham Incubators and Brooders have every new improvement worth while in an incubator or brooder. The incubators are made with two walls case within case, of dry material that has been thoroughly seasoned in our lumber yards. They are finished in antique oak, are built solid as a rock and will stand any amount of usage for years. They are fitted with a perfect steel and brass regulator that insures a successful hatch. There has never before been such an offer as this made in the whole world. The sooner you take advantage of this offer, the more time you will have before October, 1905, to make first payment. Cut off the coupon and send it in to-day for our booklet on the way to raise chickens, what it costs and your profit. You will obtain all information regarding the Chatham Incubator.

Messrs. Chas. Arnold and N. Hagdman will manage the rink this season. It is expected that the ice will be ready on Monday next. Tickets will be the same price at last year.

The Christmas Dinner

In suite of the fact that the word dyspepsia means literally bad cook, it will not be fair for many to lay the blame on the cook if they begin the Christmas Dinner with little appetite and end it with distress or nausea. It may not be fair for any to do that—let us hope so for the sake of the cook! The disease dyspepsia indicates a bad stomach, that is a weak stomach rather than a bad cook, and for a weak stomach there is nothing else equal to Hood's Sarsaparilla. It gives the stomach vigor and tone, cures dyspepsia creates appetite, and makes eating the pleasure it should be.

Samuel Laughlin—Deceased

On Monday last telegrams received by friends here announced the death at his home in Toronto of Mr. Samuel Laughlin. Deceased was a native of Brockville, a son of the late Joseph Laughlin, but had been a resident of Toronto for twenty years. As a book-keeper and advertising superintendent for the T. Eaton Co. he was highly esteemed by the firm. Of his life in Toronto the Globe says: "He was an office bearer in Knox Church, and was of exemplary Christian character, having been Assistant Superintendent of the Sabbath school." He had been an invalid for several years, and during his summer trips to Charlestown Lake made many warm friends among the people of Athens. He leaves to mourn his loss his mother and two sisters, who have the deep sympathy of all in their bereavement.

The funeral takes place in Brockville today, and Messrs. G. E. Judson and Joseph Thompson went to town to pay the last tribute of respect to their departed friend.
