EXHIBITION RESULTS.

Now that the District Exhibition is over, the question naturally arises, What are the results? First we confess to a feeling of disappointment and regret. We regret the course pursued by Kings county. The managers of the Exhibition expected generous support from that quarter, and from all the records of the past had a right to expect it. This support was not forthcoming to the extent that was anticipated. The success of the whole enterprise. For the most part exhibits were confined to our own county. As to the Exhibition itself, in no class were the entries as numerous as they should have been. The samples shown were good, but the competition was confined within narrow limits. In farm stock, for example, such as horses, cattle, etc., the display—so far as numbers were concerned—was a comparative failure. If the limited display in this respect contained any lesson at all, it was that our farmers have yet to begin their profitable branch of farm work—stock raising. The animals shown were fine, but every one there ought to have been a dozen. In this, as in other respects, the resources of our country remain undeveloped. The show of fruits and vegetables was excellent in quality, but of small supply. With such a fine agricultural country around us every available space in the building should have been filled. The same remarks apply to the exhibition. "Stroller Around" in furniture, organs, etc., the display, for the most part, was confined to Bridgetown. The articles shown were superior in quality and attracted much attention. Singularly enough, Annapolis, where manufacturers should abound, sent nothing in the way of furniture and organs, and but few articles in any other line. To say the least, this does not speak well for the enterprise of the ancient capital. We would be glad to believe that this open display of products were finely completed for prizes would excite a spirit of emulation in all our farmers. But, as is generally the case with human beings, we need to have our lessons often repeated, and applied with great force. This one fact has been demonstrated, that in every line of agriculture our country can do as well as the best. Another fact now waiting to be proved is that all our farms can do alike well. One feature of the late Exhibition worthy of special notice was the Art Gallery and Museum. To this department contributions were freely made, among which were really fine collections of oil paintings, water-colors, chromo, etc. Of native talent, the most notable productions were from Miss Berrie Brown, of Hantsport. An oil painting by this young artist, "Cape Split,"—a scene on the Bay of Fundy, received the first prize. Another,—"The Annapolis River,"—a scene near Lawrenceton, received honorable mention. Miss Potter, of Clementport, exhibited a very pretty "Coast Scene," which deserved honorable mention, if not a prize. Mr. F. W. Hathaway's collection of paintings—his own work—was very fine, especially his "Happy Family," giving evidence that this gentleman possesses talent as an artist worthy of development. Mrs. Leavitt contributed two small paintings by Professor Grey. A landscape,—"Dutch Valley,"—in New Brunswick, and a "Cattle Scene,"—a study. These gems of art deservedly received much attention. Small portraits, in oil, by Mr. R. Harris, of Charlottetown, were exhibited by Rev. E. B. Moore. These portraits are finely executed, and are known to be correct likenesses. Mr. T. S. Whitman showed a painting of great excellence,—"The Wreckers,"—which was much admired. In water-colors were exhibited some ten or twelve pictures of ships built at Annapolis and Annapolis by the late Lawrence Delap, Esq. Two chromo (fringed) landscapes, from Rev. E. B. Moore, are really beautiful pictures. J. B. Mills, Esq., showed several fine engravings of Statury. These, together with other engravings, chromos, etc., with the Museum combined, made the Art Gallery a decided success. Perhaps the best feature of the Exhibition was the impromptu meeting held in Whitman's Hall on Wednesday evening. A number of farmers and orchardists met together to compare notes and discuss modes of procedure in their different lines of work. The President, J. B. Mills, Esq., occupied the chair, and the conversation was of that free and easy style which never fails to convey practical information. We were struck with the remarks of one gentleman to the effect that the farming guild was the only one which, having no secrets to conceal, imparts freely to the public the best method to secure success. Manufacturers carefully guard their improvements by patent rights, or secretly conceal the best and cheapest methods of producing results from their rivals. No doubt the exigencies of trade made this a necessary measure. Farmers, on the other hand, cultivate no such jealousy. The improved methods in all lines of agriculture are generally proclaimed. Certainly the meeting on Wednesday evening gave abundant proof of this statement, and the best and most improved methods of grape-culture, berries, apples, etc. Stock and sheep-raising were fully and intelligently discussed from a practical point of view. On the whole, all things considered, the Exhibition was a success, and will, we trust, stimulate every branch of industry represented to more intelligent and practical efforts for the future.

—J. M. Longley, principal of the Academy, has resigned on account of ill health. Mr. McLean, now in charge of the Dighy Academy, has been engaged. Services to begin the first of November.

Kidney Disease. Pain, Irritation, Retention, Incontinence, Dropsical, Gravel, &c., cured by "Beckwith's." \$1.

The hundreds who have had samples of J. W. Beckwith's Tea have all sent to his establishment for Oils, for \$1.00. They consider it as good as that which they have been paying 30c, and 35c per pound for elsewhere.

We have received from a same one unknown a copy of the Charlottetown Daily Examiner, containing "A Tourist's account of our exhibition; as it contains very little but what we have already given, we will not reproduce it.

—Governor Archibald lately visited the O. G. & F. Co. at Truro, expressing himself much pleased to see the Boot and Shoe Factory premises again occupied, and promising to more fully inspect the works at a future day.

The annual competition of the Annapolis County Rifle Association will be held at Paradise, on the Old Rifle Range, (near Capt. E. M. Morse's), on Tuesday next, 24th inst., commencing at 8 o'clock a. m.

The regular prayer-meeting in the Methodist basement, has been postponed until Tuesday evening, on account of the Episcopal Tea Meeting and Fancy Sale being held on the usual evening, (Wednesday).

SHIL LOWE—J. W. Beckwith has been selling such quantities of ladies' Ulsters that he has been obliged to re-order at this early date; and is now selling them from \$1.75 and upwards. He also has a large stock of Ladies' Shawls from 30c. and upwards.

On Saturday afternoon last the foundation stone of the new English church in Windsor was laid, with appropriate Anglican ceremonies, by the Venerable Canon Gilpin, D. D., Archbishop of the Diocese of Nova Scotia.

We refer our readers to the communication on our outside pages from "Stroller Around," in reference to the exhibition. "Stroller Around" is a thorough farmer, and his opinions may be relied on.

WINDSORFUL STRALS.—Mr. Avery Bain, of Inglefield, recently found growing from one root, eighteen stalks of oats, the height of some being five feet and a half, while the length of one was two feet one inch. This extraordinary growth occurred on new mountain land.

The largest stock of clocks, watches, jewelry and plated ware ever before offered for prizes would excite a spirit of emulation in all our farmers. But, as is generally the case with human beings, we need to have our lessons often repeated, and applied with great force. This one fact has been demonstrated, that in every line of agriculture our country can do as well as the best. Another fact now waiting to be proved is that all our farms can do alike well.

Among the late appointments made by the Provincial Parliament, we notice that Herbert Crosskill, Esq., native of this town, has received the appointment of Deputy Provincial Secretary and Chief Clerk in the Provincial Secretary's office, vice John Costley, Esq., resigned.

J. G. H. Parker, Esq., Barrister, left here on Friday last to attend the sitting of the Supreme Court now being held at Shelburne. The cause in which Mr. Parker is engaged is one brought by the Overseers of the Poor, of Shelburne, vs. Overseers of Poor, of Granville. As yet we have not heard the result.

The brig, Annie Lyons, of and from Annapolis for Sydney, called at Canno, on the 6th inst., to land Captain Phillips and crew of the schooner J. M. S., which was dismantled 60 miles off Cape Sable, and taken off the wreck the following day by the Annie. The J. M. S. was a top-sail schooner of 170 tons, owned in part by Hantsport, and was on a voyage from Glouce Bay to Salem, Mass., coal laden. She was uninsured.

The Gates Organ and Piano Co. accepted the \$1,000 tender for the old boat and shoe machinery not needed by them or their music works. There will probably be over \$4,000 worth at cost, besides the duty, etc., yet it was offered at an \$8,000 sale for the Co., especially when they purchased the entire property so extremely low. Bridgetown might have secured this and started a boot and shoe factory so much needed.

The Spectator is right, he believes, when it says it did not receive the communication from Mr. Munro published in our columns two weeks ago, it occurred through a misunderstanding between Mr. Munro and a gentleman who laid the correspondence on our table, accompanied with a note, asking us to publish, as the Spectator had refused to do so. We would have replied to this charge last week, but have been confined to the house with a severe bilious attack, and therefore could not attend to any editorial labors whatever.

The Tea Meeting and Fancy Sale which is to day being held in Victoria Hall, by the ladies of the Episcopal Church, promises to be a success. The tables are loaded with all the delicacies necessary to satisfy the most fastidious epicure; while the many handsome, useful and fancy articles offered at different stands, will be sure to meet with a ready sale. The price of admission to hall is only five cents, or admission to hall and tea 35c. This low figure comes within the reach of all. Another inducement, we understand that Professor Bristow will favor those present during the evening with some of his best selections on the piano.

Our farmers have great reason to be thankful for the lovely weather they have enjoyed during the past fortnight, as it has enabled them to gather the entire crop of apples without any injury whatever. With the exception of two Saturdays, the days have been bright, warm and sunshiny; and although we were visited last week with three heavy night-frosts, causing some marrings among our orchardists, we are pleased to learn that the fruit was in no way touched. The yield, this season, is quite up to, if not above that of last, and speculators are now gliding through our beautiful valley offering fair and liberal prices. The lessons taught our farmers in time gone by, some of them in particular, will certainly imbibe them with the desire to put up for the English or any other market none but first-class stock, an honest and fair dealing in the essential part necessary to the commanding of remunerative returns for all the products of the soil.

The Signal Service, formerly under the Department of Public Works, has been transferred to the Department of Marine by Order-in-Council.

The English Apple Trade. A cable just received from Liverpool reports the apple market lower, owing to the bad condition of arrivals from this side. This invariably occurs in the shipment of fall apples, many of which cannot stand ocean transportation by the ordinary method of packing in barrels, and have therefore to be forced on the market for what they will fetch. As soon as the winter fruit comes forward however, this drawback will be to a great measure obviated.

Now who will doubt that J. W. Beckwith is not the cause of goods being sold at low prices? Whoever heard of \$1.00 for a barrel of Tea being sold for \$1.00? There is no need of our farmers sending to St. John for their winter supplies, when they can save money by purchasing their goods of him. He is now selling for the Fall Trade, for spot cash only, 5 gal. best American Water White Kerosene Oil for \$1.25; 5 gal. best Barba-doese and Monsoon refined sugar for \$1.00; Howard's A. Flour for \$6.25; Buda and Ocean Flour for \$1.50. Every thing else in proportion. Remember the above prices are for spot cash only.

Mr. Wallace Young, of this town made seventeen entrants in fruit and was awarded thirteen prizes. Mrs. M. B. Spain, of Wilmot, took twelve first prizes in cattle, sheep and hogs. Mrs. Spain's prize money, together with that of A. A. Toogood and Hobie Morton, amounted to \$122. They all live within two miles of each other and all took prizes in stock.

Mr. Hiram North, of Farmington, showed a number of fine Essex Figs, imported from Massachusetts. No prizes were offered for this breed. It was therefore commendable in him in placing them on the grounds.

Mr. Byron Chealey, who is generally one of our best exhibitors in fruit, imported from Massachusetts, some apples we understand was very fine this year, owing to the sudden death of his father.

Death of the Rev. Hezekiah McKeeven. Several of our many friends of the Rev. Hezekiah McKeeven will learn with regret that he died at his residence, the Mashe to community, about four o'clock this morning, of heart disease. He was 65 years of age. He was about the street in his usual health yesterday. Mr. McKeeven assumed the duties of his office on the 1st of July last and during his short residence here had won for himself the esteem of all classes. His remains will leave here by the Sables accommodation train on Tuesday morning, for interment in the cemetery at St. John.

Rev. Mr. McKeeven was born at Niagara, Annapolis County, N. S., and was educated at the Wesleyan University of Middletown, Connecticut, entering the Ministry about thirty years ago. Two of his brothers are Methodist clergymen—Rev. S. McKeeven of Portland, Me. He married Miss Harrison, sister of Prof. Harrison of New Brunswick University, who survives him, as do his two sons and three daughters; the eldest wife of Rev. J. M. Campbell, a member of the N. B. and P. E. I. Conference. Mr. McKeeven filled some of the most important offices of the Conference, including Woodstock, St. Stephen, Chatham, Fredericton, Carleton, St. John and Sussex, having removed to the latter charge last summer, at the close of a three years' incumbency of the Exmouth street Church in this city. He served as President of the New Brunswick and Prince Edward Island Conference in 1879-80, and occupied several of the most responsible positions in the conference during his long and successful ministry. A faithful pastor, of pure and honest heart, of large affections and benevolent impulses, his ministry was full of good deeds and high purposes. Of such men it is said, "their works do follow them."—St. John Sun.

A LITTLE GAIN WHICH DIDN'T WORK AND WHICH THEY LOST \$2000.

About two years ago one Oliver Hurd was arrested in Boston, with a Nova Scotia man Robert Fraser, on a charge of passing counterfeit money. A noteworthy feature of the case was that Hurd gave the counsel defending him a bill of sale of an organ as security for his costs, and his organ turned out to have been stolen in Nova Scotia, and with his brother Heenan Hurd, had been practicing upon the Bluenoses in Colchester Co., but managed to keep beyond the reach of the law. A short time ago two street young Colchester men named Morrison returned from the Western States, the possessor of quite a considerable sum of money. Their good fortune was the theme of general comment, and came to the ears of the Hurd brothers, who desired to relieve the new-comers of a portion of their little fortune. The trick was one which they had more than once successfully played, but the victims had already been selected to make any exposure. Oliver and his brother went to the Morrises, and the former produced a bundle of \$2 Dominion notes, which he said were counterfeit, and offered to sell them for \$200 (the package contained \$2000). The sides of the Morrises examined the notes, compared them with some genuine notes he had, and saw the alleged counterfeit detected. He agreed to purchase them, but pretended to think the price was too high, and it was finally agreed that the package should be sold for \$150. Morrison produced that sum, but Oliver Hurd said the business was a ticklish one, and he didn't wish to have any evidence to fasten the leasing of the notes on him; so he would take the \$150 and drop the package of counterfeits outside of the house door as he was leaving. Morrison would not agree to this, and Hurd found he could not unless he handed over the package on receiving the money; so he agreed to do this, and the exchange took place. Hurd handed the \$150 to his pocket, and drawing a revolver, presented it at the head of the elder Morrison and demanded the package of alleged counterfeits. The Nova Scotians proved game, however, and a struggle ensued, which resulted in the two Hurds being wounded and ejected from the house. The \$2000 proved to be genuine bills, which the counterfeiter's servant used as deceptions, as they had several times before. The fraud applied to a magistrate for a warrant and had the Morrises arrested on a charge of stealing \$2000 from them, and the latter had the Hurds arrested.

For assault and an attempt on the older brother's life by shooting at him with a revolver. All the parties have been held to bail to appear before a magistrate. In June next week, previous to being committed for trial in the supreme court which opens in November.—Samaritanian Journal.

The English Apple Trade. A cable just received from Liverpool reports the apple market lower, owing to the bad condition of arrivals from this side. This invariably occurs in the shipment of fall apples, many of which cannot stand ocean transportation by the ordinary method of packing in barrels, and have therefore to be forced on the market for what they will fetch. Persons wishing clothing made up at short notice can be accommodated at my establishment, as I can complete a suit in twenty-four hours after receipt of order. I am pleased to show my goods at all times and to all persons. Call and see them.

JOHN H. FISHER. NOTICE. The personal property belonging to the estate of the late Grand Parker, will be sold at auction, on the premises in Niatax, on THURSDAY, OCTOBER 26TH. AT ONE O'CLOCK, P. M. Farms for sale at any time, by JOHN H. FISHER, Auctioneer, Niatax, Oct. 16th, '82.

There has been quite an improvement in the condition of arrivals this week, except from Canada, and we are enabled to report a better demand and an improvement in prices, red apples being much sought after. The Cophalons brought the highest price, and the quantity from Boston, which were mostly red, and condition being good, they sold readily from 25c to 27c per barrel. The green varieties, such as sweet pickles, were not in such good condition, and made 12c to 15c. Green apples are coming very wet, and sales are being made from 12c to 16c, anything sound and attractive making 23c to 27c.—Montreal Gazette.

It is proposed to establish a station of the Canadian Signal Service at some commanding point on the shores of the St. Lawrence, where such towers could be placed as to be signalled, the date of her arrival, if an ocean going vessel, to be cabled immediately to Great Britain. To this end the Dominion Government recently made a proposal to Lieut. Atkinson to forward such reports, providing Lloyds defrayed one-half the cost of transmission. The proposition was favorably received, but before entering permanently into an arrangement, Lieut. Atkinson asks that some vessel be forwarded for three months on trial, when, if satisfactory, they will accept the offer made by the Dominion Government. It is also suggested that in event of making such an arrangement, the Dominion Government should further information about the Atlantic, the same to be signalled from the ship to the signal station will be transmitted at the expense of the owner of such vessel. Concerning the time that must intervene between this and the closing of navigation of the St. Lawrence, it is not probable that any further steps will be taken before next spring, when it is probable the experiment will be tried.

Reciprocity. The old question of reciprocal free trade between the Canadian Dominion and the Dominion of Uncle Sam is discussed once more in the Ministry about the 12th inst., notably the Ode of Toronto and the First Free of London, the latter being against it and the former in its favor. Nobody in the United States appears to care much about reciprocity with our Canadian friends at present. Yet we have no doubt that every citizen of this country would be willing to have free trade with the Canada on the same condition that the States of the Union have free trade with each other. If the various provinces should wish it, the thing could very soon be arranged with but a small change from their present general condition.—N. Y. Sun.

It is astonishing the way the \$3.50 Reapers, \$4.50 Overcoats and \$2.50 Underclothes have free trade with each other. If the various provinces should wish it, the thing could very soon be arranged with but a small change from their present general condition.—N. Y. Sun.

ANNAPOLIS, NS. SUPREME COURT, In Equity, 1882.

On the petition and application of John Morgan, of Lawrenceton, in the County of Annapolis, Esquire, praying for foreclosure and sale under Chap. 95, Revised Statutes, 4th Series.

OLD THEORIES TURNED TOPSY TURVY. Pluck against Luck; Cash against Credit. My Business Principles Illustrated by five Cardinal Points.

FIRST. My prices marked on each article guarantee low prices and equal treatment to all classes.

SECOND. Quick sales are the life blood of a successful business. I prefer to wear out rather than rust out. Speedy sales insure advance styles.

THIRD. Small profits are sufficient when the business is conducted on live business principles.

FOURTH. I Buy my Goods of Manufacturers and through Importers.

FIFTH. Truthful representations, my word of honor, goes with every article I sell. No misrepresentations allowed. Goods are sold for just what they are.

Polite attention shown towards all—lookers or buyers, rich or poor, one and all, receive the same unwearied attention.

Turn the above facts over in your mind. I mean every word of it. Examination carries conviction to the most skeptical mind. My expenses are comparatively small, and the magnitude of my business is such that a trivial profit suffices.

Decline of Man. Nervous Weakness, Dyspepsia,

General News.

Detective Hatt died at Halifax lately. A big find of coal, with about twelve feet thick, is reported at Delbert River, N. S. The Provincial Grand Jury at Port Williams, N. S., on Tuesday, 20th September. The total number of immigrants who have settled in Canada this year is estimated at 85,000. This day, two weeks, a little child of Sydney Gould, Kentville, set down in a pit of hot water, and was so badly scalded that he died on Friday.

TELEGRAPH NOTES FOR THE WEEK

Cape Race, Nfld., Oct. 10.—Steamer Neptune passed here at 3 P.M. for St. John's, with passengers and crew of the wrecked steamer Heron. She will arrive at St. John's about midnight. The ship has been given to salvors, who have already removed a considerable part of the cargo. Dublin, Oct. 10.—Owing to the alarming increase of pauperism in the South of Ireland the Dublin Union has taken the lead in a proposal to send one thousand able-bodied men and women to Canada at a cost of £2,700. Montreal, Oct. 11.—Venezor predicts as follows:—Very severe storms are probable for the Gulf and lower parts and Newfoundland coast on the 15th, 16th and 17th, accompanied by sleet, snow and strong north-easterly gales. New York, Oct. 11.—Henry Ward Beecher formally withdrew from all connection with the New York and Brooklyn Association of Congregational Churches yesterday. London, Oct. 11.—The Times, in expressing satisfaction at the completion of the telegraphic communication between Paris and the Hawaiian Islands, refers to the question of defending the cables, and says the United States cannot too soon acknowledge the necessity for shielding submarine telegraphs by international treaties and must find means for applying them. Panama, Oct. 11.—The Indiana, from San Blas district of this State on the Atlantic, brings in a report that on Sept. 7, the day on which the earthquake occurred here, there were four tidal waves, which overwhelmed and destroyed or badly damaged six or seven little villages on the islands and mainland and drowned about 70 persons. New York, Oct. 12.—A Glasgow despatch says the new steamer Balsalm, of 4,000 tons burthen, built at Aberdeen for the American trade, was totally wrecked on her trial trip. London, Oct. 12.—Leonard H. Courtney, M. P., Joint Secretary to the Treasury, at the opening of the Liberal Club at Toronto denied that the Government avowed to themselves credit for victories in Egypt. That country, he said, must eventually become independent of foreign control. The cost of the war should be defrayed by Egypt. No doubt but holders would have to forego something. It was not for them England undertook the war. It would be necessary to consult the powers in regard to re-occupation. The policy of the Government was to detach Egypt from the Sultan, to look after the Sudan canal and to allow the Egyptians to wear the Khedive that his future position depended upon his management of affairs. London, Oct. 12.—The Daily News Paris despatch says that in negotiating with the Madagascar Embassy France will claim the restitution of her sovereignty over nine-tenths of the island which belonged to her.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents. Mr. Editor,— Selecting your columns are open for all who wish to air their opinions through the medium of the press, I think it only fair and right that the statement should be represented there. But let me tell you in the start that I am not an advocate of women's rights, nor yet actively engaged in the vindication of women's wrongs. On the contrary, it is my opinion, that at the present time it is the opposite sex who need to be vigilant. Now, they do not appear to be making any effort towards it themselves, but rather drifting in the opposite course, how or in what this much needed revolution to take place unless we ladies put our shoulders to the wheel. I am not a fanatical adherent of the Suffrage for women, but I am an earnest advocate of the right to assist them in getting right. Now I am not vain enough to imagine that my little effort will effect the desired reform, but an unpretentious person with a very modest confidence in my own abilities, I am hoping to arouse the slumbering energies of some of my sister friends to their part in assisting to set matters right, though I must confess to some misgivings as to the result of attempting to do this. The error of their ways, knowing that there are none so blind as those who will not see. And now you will ask what is this cause of grievance upon which you are venturing? I will tell you what it is. It is a question of education, civility, and better strifes in this otherwise peaceful, quiet country. And why all this commotion, this bitter warfare amongst us? Simply because of political parties, spirit, which threatens, like the wheels of judgment, to crush all which come in its path. It has swept over our peaceful valley like the wind of the desert, raising and blasting all that touches it. For course; severing friends long tried and faithful; alienating father from son and brother from brother; entering our churches; sowing discord among its members; raising in many instances insuperable barriers between pastor and people; thus lessening the ministers power for good among his flock. But we forbear attempting to enumerate the long list of evils of which it is the origin, but simply add "their name is legion." I suppose elections are a necessary evil, in order that we may be represented in the legislature of our province. Now our country being divided into factions, each with its own candidates or nominees, and as but one half can be elected, it remains a self-evident fact that the other half must suffer defeat. They do not gracefully submit to the inevitable, as has been the custom in times past, and "let us have peace, not war." But there are some belligerent spirits who believe in nothing but war—war of extermination to those who dare differ from them in political opinion. Do they not know that war brings famine and pestilence and plague? Though in this case the evil seems removed, of the plague continuing for some time, but it will still be with us. Next the air is filled with the breath of the noxious pestilence, more contagious than the deadly malaria; and soon again famine will be stalking through our midst. I will not check the cholera, but let us have the plague, which will never come back when we meet at the social circle, the Lodge, the club, the dance, the theatre, or other public gathering, where friendships are renewed and friends are the predominant feature, and let politics stir up no set men at variance. But, they tell us, it is necessary that we should make a stir this time, and set on foot the machinery of government, or else the winning party have no fair play; there has been bribery used by their party, and our righteous indignation is inflamed against them. Well, I will say confidently, that I have no doubt but you are right about the bribery. We think there are a few who would prefer to do it. But do you not know, my dear sister, that you have not about the matter wrong and right. Taking the scripture for your guide, you should have first pulled the beams from your own eyes, then you would have seen clearly to pluck the mote from your brother's eye, and according to the measure you meted out, you would have meted to them. As matters are at present, it appears to me in this light, that your indignation is raised, not so much on account of the sins of your opponents, but because the same sins are not brought forth in your own case. Even now, if it were not for the late war which has broken out in newspaperdom, time might have been spared and peace might once more prevail among us, but the three journals which are each week being hurled through the columns of political papers, are causing fresh wounds which time and skillful surgery may not be able to heal. As yet there is no stain, but the three journals which are each week being hurled through the columns of political papers, are causing fresh wounds which time and skillful surgery may not be able to heal. As yet there is no stain, but the three journals which are each week being hurled through the columns of political papers, are causing fresh wounds which time and skillful surgery may not be able to heal.

Marriages.

Joker's Corner.

There is a boy in the Seventh Ward who is so full of fun that it makes himself sick. He is a name boy who not long since wrote a note to his father and signed his name "Daisy" to it, and got the old man to stand on the corner for two hours waiting for the girl. After that scrape the old man told the boy that he had no objection to innocent jokes, such as would not bring reproach on him, and as long as the boy confined himself to jokes that would cause pleasant laughter, and not cause the finger of scorn to be pointed at a parent, he would be the last one to kick.
