Offensive is Resumed North of Vimy Ridge and the Entire German Line From Lens to St. Quentin is Menaced, Trembling, Twisted and Bent So Badly That Another Retreat is Expected in 48 Hours---Two More Villages Taken by CANADIANS ENGAGE IN British and All High Ground Between Scarpe and Sensee HOT FIGHTING AT VIMY Rivers is Held by Them---Snowstorm Holds Up Troops.

Britain and France Both Sending Commissions of Notable Men.

This was as far as the announcement made by the state department goes, but was was learned authoritatively that a French commission composed of officials equally as distinguished as the British representatives, also will be in Washington about the same time. This commission will be headed by M. Viviani, at present minister of justice in, the

U.S. to Avoid Alliances. It is not known definitely whether say of the other allied powers will send commissioners to Washington, but it is assumed that owing to the difficulties in passage and the probable delay the interests of these governments will be confided to their resident amphassadors.

sident ambassadors.

Beyond the statement that the object of the commission is to discuss generally questions of policy connected with the war, no information was given at the state department. It was made clear, however, that in no way will the United States Government depart from the traditional policy of synding anything in the nature of avoiding anything in the nature of political alliances, tho, of course, that

FEWER BRITISH SHIPS ARE SUNK

British Admiralty's Weekly Report Shows Total of Nineteen Vessels.

DECREASE IS MARKED

Fourteen Merchant Vessels Are Unsuccessfully Attacked by Submarines.

London, April 11 .- During the week ending April 8 seventeen Britich merchant vessels of more than 1600 tons were sunk.

Two vessels of less than 1600 tons were sent down. This was officially announced ionight.

The statement follows:

"Merchant vessels of over 100 tons of all nationalities arriving and sailing from United Kingdom ports: Arrivals, 2406; sailings, 2367. "British merchant ships sunk by

mines or submarines over 1600 tons, 17, including two sunk during the previous fortnight. British merchant vessels under 1600 tons, two, including one sunk last week. British vessels unsuccessfully attacked 14, including four during the previous fortnight. British fishing previous fortnight. British fishing vessels sunk, six, including one sunk during the previous week."

The current report shows a slight decrease from that of last week in losses of large vessels and a marked falling off in the number of smaller merchant craft destroyed. There were 18 of the former class sunk during the week ended April 1 and 18 of the latter. The highest figure in ships of more than 1600 tons sunk

second week.

The report shows a total of 97 vessels of more than 1800 tons sunk during the past six weeks and 43 vessels
of less than that tonnage. than that tonnage.

there will be another strategic series and the strategy will be flairs, not Hindenburgs.

So rapid has been the British advance and so obviously surprising to the enemy that with all their advance preparations the Germans have been unable to get set even for defence. With bewildering and methodical consistency British artillery has dially become worse. As their guns followed foot by foot with the advance of the infantry and has literally blasted the ehemy out of nawly chosen positions before he sould be for the artillery of the first part in the taking and clean-up of Luiges.

Tanks Do Good Work.

The cavalry, charging in open order, aced across a snow-covered field and into the village, traversing ground so the winder and plowed by shell fire as to be almost impassable for infantry. The action was preceded by an unsually effective action by the "tanks," which waddled across the open spaces and literally blasted out whole maching sim detachments which might be seen the strategy will be flair by British ground the marks become increasing by ineffective and the marks become increasing by the state of the ferman sunners has daily become worse. As their guns and the marks daily become worse. As their guns and the region of St. General guns and the marks and the grant ground so the forman strated that the "battle flow and the grant grant the grant grant the grant grant

HEAVY, BLINDING SNOW

British Forces Are Impeded Storm, But Ready to Go on.

By Ed. L. Keen, United Press Staff Correspondent. London, April 11.—A neavy, blinding snow swept the bloody line of the greatest battle in history today.

The still fresh and eager to continue their smashing attack against the German line, British forces found their specifical impeded, and the forces found their specifical impeded, and the forces impeded.

their operations impeded, and no fur-their advance was reported in the re-gion of Arras by Sir Douglas Haig toderman forces seized upon the tem Garman forces seized upon the temporary respite given them to launch counter-attacks at Monchy-le-Preux. This town was taken by the British yesterday and brought them nearer Cambrai. All of the attacks were repulsed. Gen. Haig reported.

The importance of the capture of Monchy-le-Preux was emphasized by the report of the British commander tonight. German prisoners taken there declared they were ordered to hold

tonight. German prisoners taken there declared they were ordered to hold the position at all costs. They were literally blasted out, however, and those escaping death either driven back, or surrendered and hustled back to British prison camps.

Bitter, Bloody Fighting.
To the north of the scene of the most bitter and bloodiest fighting, near Jampoux and Roeux, stiff clashes occurred today, despite the wintry

weather.
The German official statement tonight reported British infantry and
cavalry in action again, indicating the open nature of the fighting. Along the entire line, sweeping from Lens, there was continued activity, the without the smashing gains the Bri-As the "tank" signaled that its part in the job was completed the infantry "went over the top," and with bayonet and hand grenades put on the finishing touches. The British casualties were ridiculously small. Most inscense positions and their inscense positions and their inscense positions and their inscense positions. insecure positions, and they with-drew, inflicting heavy losses upon the

enemy.

The greatest satisfaction was expressed here tonight with the day's developments.

Haig Has Succeeded in Twisting and Bending Foe

to do, but "it was easy to see what public opinion will be if Canadians do not respond and Canada is left, like China, or worse than China, with no army for home defence."

Of the 600 Q.O.R. men on parade last night, Gen. Logie said 100 or 150 should be physically fit to join the C.D.F. He had been informed that a large proportion of the regiment's members were unfit and had been rejected for active service. These men were showing a magnificent spirit, because, tho unable to go overseas, they were willing to do what they could here in Canada.

Gen. Logie concluded his address by a reference to the late Gen. M. S. Mercer of the Q.O.R., who went overseas in command of the third (Toronto) battalten and fell in action on the western battlefront in France, He said Gen. Mercer was beloved by all ranks, not only in Toronto, but also in Hamilton and the other cities of No. 2 district. He had the respect of all officers and men, was a fine officer and gentleman, and possessed great military ability.

Accompanying Gen. Logie last night were Lt.-Col. H. C. Osborne, A.A.G., and Lieut. Cochrane.

Last night's parade of the Q.O.R. was under command of Lt.-Col. S. W. Band. The regiment has no intention of chanzing from weekly to twice weekly drills. A musketry course for

of changing from weekly to twice weekly drills. A musketry course for the second battalion starts this week with the 255th Q.O.R. Battalion officers as the instructors.

CITY OF BELLEVILLE

Evaporating Plant, Valued at Three Hundred Thousand Dollars, is Consumed.

Special to The Toronto World.

Belleville, April 11.—This city at an early hour today was visited by the most disastrous fire which has occurred in its history, entailing a loss roughly estimated at \$300,000. The large evaporating plant of R. J. Graham, situated in the rear of his fine block on Pinnacle street, is a mass of ruins, nothing remaining but the bare walls and smoking embers. Not only did the evaporator fall a prey to the devouring elements, but a tin shop, cold storage building and the building on Front street termed the building of the building of

Adjoining property was damaged to some extent. Mr. Graham is a heavy loser. There were in the destroyed premises upwards of \$200,000 of dried vegetables in tins and cases ready for shipment to India, being an order from the British Government. totaled some twenty cars. This is a total loss, upon which there was an insurance of \$100,000. The chemical some thousands. The fire is thought to have been incediary in its origin.

has been burned since the commencement of the war. BOYS AND GIRLS.

This is the fourth evaporator owned

and operated by Mr. Graham which

the chemical house were also burned. Brantford Battalion Will Place Colors in Grace Church

Brantford, April 11.-Tomorrow afternoon the colors of the 215th Battalion will be deposited in Grace Church until after the war at a special ceremony to be attended bywarehouse and cold storage adjoining cost when erected a few years ago \$40,000, and the evaporator cost other civil organizations. The colors is were presented by the daughters of Hon. Col. Harry Cockshutt, the first officer commanding, and organizer of the battalion. The Bishop of Huron will have charge of the services.

supplies the meat for the various pro-vincial institutions, but the commisalon may buy from the abattoir on the same terms as these instit province has no desire to make a profit from its dealings with the con sion. This is true also of the dairy province will keep control of the output, but the commission may pur-chase its supplies at the provincial

GOVERNMENT SELLS COWS IN NORTHERN ONTARIO

First of Sales to Encourage Dairying in Timiskaming Takes Place Today.

The first sale of cattle by the government to encourage dairying in New Ontario will take place at New Liskeard today, when three carloads of grade Ayrshires will be auctioned of inder the superintendence of W. G. Nixon, local representative. The catthe were purchased in eastern On-tario. The cattle number 45 cows and

Six more carloads are being pur-chased for sale early in May, in the Thunder Bay, Rainy River and Kenora districts. They will be chiefly grade Shorthorns and Holsteins. These sales are in line with the gov-ernment's policy of encouraging dairy-ing in the northern parts of the pro-vince, and if the farmers are seen to appreciate the government's efforts in lithis direction, other sales on the same this direction, other sales on the same lines will follow. The general idea is to disseminate cattle in these districts at cost. The Ayrshire strain is chosen for the Timiskaming district, because the cows are good foragers and are found to cross well with the

Shorthorns, which are the predominant breed in the district at present. The co-operative dairy fathered by the government at New Liskeard is fast approaching completion. It is ex-

Judge Coatsworth Grants a Stated Case to A. H. Wheeler

Gideon Grant, acting for A. H Wheeler, who was convicted in general sessions recently on a charge of obtaining \$2.000 by false pretences from a woman who expected him to many her, induced Judge Coatsworth to grant a stated case on the followmg objections yesterday: That no evidence of a crime was offered to the fury; that evidence was improperly dimitted; that what the defendant ted the woman to understand was not widence and on the legal point of mis-

WINS SUIT FOR DAMAGES.

John J. Whittaker was awarded \$600 Miss Ivy Whittaker, against the Do-Transport Co., by Justice Sutherland, in the non-jury assize Sutherland. In the hon-jury assize court yesterday. The suit against the Toronto Street Railway Co. as a co-defendant was dismissed. Miss Whither was alleged to have sustained broken collarbons when she was down by a wagon of the transport company at Queen street and Logan avenue, on May 10, 1916,

but as the provincial treasurer explained yesterday, the arrangement is to meet a temporary emergency.

At Guelph some 550 patients will be accommodated. There is every facility there for vocational training. The province will keep the abattoir, which respectively the province of the various province with the province will keep the abattoir, which was willing to co-operate in every way with the city architect's departway with the city architect's department to obtain the fullest protection for the citizens. The city had power, he said, to appoint an inspector.

At the first of March 6924 familie in Toronto were under the supervi-sion of the public health nurses, and ed to 7069. In that period more than 8000 patients were under su-pervision, and more than 11,-000 visits were made. Nurses attended 304 clinics and day nurseries.

Mayor Church is of the opinion that he tax rate could be reduced one mil by reducing the water rates charged the fire department. He proposes that a fair and equitable basis for the new rates should be fixed. He also proposes that the works commissioner should reduce his estimates \$600,000 fixed capital charges on new water-works not proceeded with,

for over a year.

Nephew of American General
Returns From Service Overseas

Pta, A. Murton Bryson, of the Princess, Patrikia's Canadian Light Infantry, who is now in Toronto suffering from wounds sustained during the Somme Sattle of last September, is a nephew of Lieut.—Col. Bates former commander of the 212th Battalion. C. E. F. Col. Bates resigned his command to answer a call from the United States to resume his former position of brigadier general of the forces in the state of Michigan. Pte. Bryson is the son of E. Bryson, 714 Dovercourt road, and served on the western front for over a year.

Thomas Jones, who appeared to protest against the employment of the aliens, stated that he knew of one factions, where 98 per cent. Of the employees were allen enemies.

A strong protest against permitting the Toronto Lacrosse Club to have full use of the Rosedale lacrosse grounds taken over by the city at a cost of \$45,000, was entered by Commissioners Forman, Bradshaw and Chambers, and the board decided to refer a renewed application from the club to the parks committee.

Judge Boyd, of the juvenile court, asked the board for three months leave of absence for J. J. Graham, chief probation officer, but only one month was granted. Controller Shaw introduced a set of regulations governing leave of absence which were sent on to the council.

The mayor denounced the habit of the aliens, stated that he employment of the aliens, stated that he imployment of the a

city hall employes and civic officials appearing at their desks a half an hour and an hour after the appointed time. It would be well if they were as punctual starting work as they were

the major part of the estate of \$4765 left by her husband, George W. Alton, a piano-maker, who died March 9. His sons, Douglas and Stanley, share For having morphine in his posses-sion, Henry W. Carrol was fined \$50 and costs when he appeared in the police court yesterday. Carrol was found guilty of the charge last week, but charged "Phil the Jew" with having secreted the drug in his bed. As no evidence to support his contention Against Canadian Stewart Co Over Renting of Dredges. was forthcoming yesterday, he was

CHARGED WITH ASSAULT.

art Company, in a suit which was opened before Justice Sutherland, in Henry Bloom blamed Morris Mark and Sam Reingold for having assault-ed him and stolen \$20 while he was in no condition to resist. He stated that his assailants first pulled his allegation is made that the detendants agreed to rent from the plaintiff a hydraulic dredge, at \$12 an hour, for two overcoat over his head, then struck him with something heavy. When the men appeared to answer the charge in the police court yesterday they were committed for trial.

ARRESTED IN WINONA.

Mrs. Burrard, formrly housekeeper for Stephen O'Dea, 782 Yonge street, was taken into custody yesterday afternoon by the Hamilton police at Winona on a charge of stealing \$27 from her former employer. The theft is alleged to have been committed in February. When the police heard that Mrs. Burrard was in the employ of a fruit farmer named Bartlett, of Winona, they secured the services of the Hamilton authorities to make the arrest. Detective Young brought her heavy sentence imposed upon Private George Findlay, who appeared in the police court yesterday on a charge of desertion. Findlay was originally a member of the 216th Battalion, and the heaviness of his sentence was due arrest Detective Young brought her Isaac Reinberg was sentenced to three months in jail, and Mrs. Bessle Zlotovitz was remanded for a week ack last night.

ECHO OF FUR ROBBERY.

An echo of the McKendrick Bros, fur robbery on West Bloor street last year was sounded in the police court yesterday, when Louis Bdmunds, at whose designing school some of the stolen furs, are alleged to have been found by the police, was committed for whose designing school some of the stolen fure, are alleged to have been found by the police, was committed for trial on a charge of receiving, with Max Katz, accused of shopbreaking, to accompany him. Most of the furs have been recovered.

E. A. HOARR, J. H. BRODIE, Directors. We have examined the above Balance Sheet with the Books in London and the Certified Returns from the Branches, and we report to the Shareholders that we have obtained all the information and explanations we have required and that in our opinion, the transactions of the Bank which have come under our notice have been within the powers of the Bank. As required by Section 56, Clause 19, of the Bank Act of Canada, we visited the Chief Office (Montreal) of the Bank and checked the cash and verified the accurities and found that they agreed with the entries in the books of the Bank with regard thereto. We further report that, in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books and returns.

Markham Fair Board Case Before Official Referee

The second day of the Miller vs. Markham Fair Board case, which has caused a great deal of comment out in the county, and which has now con-tinued over two days before R. S. Ne-ville, official referee, at Osgoode Hall, will be again taken up when the court reassembles this morning. When the court met yesterday morning some time was spent in discussing a suggestion by the referee that an expert be appointed to go out to Markham and submit a report dealing with the actual cost of the fair building, the Pte. H. L. Hollingsworth, whose kin are in England, is reported wounded. He received treatning with a Highland buttain at Exchibition Camp.

Pte C. Saunders, who before enlisting, boarded at 77 Pears avenue, has been wounded for the second time. He enlisted at Ottawa.

Pte. Harry C. Riley, 988 East Gernard street, has been wounded. Pte. Riley's wife has moved from the above address to Orangeville.

Bombardier Ottie George Dobson was considered to the second concluded.

John Finch, 241 Eversfield road, had his skull fractured last night at the John Inglis munition works. Strachan avenue, he was been wounded. He was born in the United States, it rears ago, and enlisted in Toronto at management, and has relatives in Caisary.

HEALTH OF CITY MUST BE GUARDED

Health Officer's Monthly Report Touches on Estimate Slicing.

DEPARTMENT DEFENDED

Controllers Commend Organization and Good Work it Has Done.

In his monthly report, presented to the board of health yesterday afternoon, Medical Officer Dr. Hastings refers indirectly to the action of the board of control in silcing his estimates. He regrets that politics should enter into the safeguarding of human life, and shows that the health of a nation is its greatest asset.

Chairman Ald. Maguire had many words of praise for the work of the health department, and commended Dr. Hastings for his organization. He considered that the most important thing in the report was the reduction of infantile mortality. The work accomplished along that line had been wonderful, and he thought that if there was any department deserving of the whole-heatred support of the council, it was the health department. He felt strongly the action of the board of control in reducing the estimates which, if approved by the council, would mean impaired efficiency and reduced service to the citizens. The welfare of the citizens should be the first consideration of the municipality. It was all very well to cry about the tax rate, but he was certain that there was not a citizen, who would be satisfied with a low rate and human life paying the price of inefficiency. He had been assured by a prominent citizen that if the council approved the health estimates as they now stand, he would be willing to contribute a large sum to start a

approved the health estimates as they now stand, he would be willing to contribute a large sum to start a campaign for funds to carry on the work of the department.

Ald. Risk thought that a section of the report reflected on a member of the board of control, but he was told by Dr. Hastings that there would be no hesitancy to reflect upon, a man who left himself open to reflection. The medical officer considered it insulting for any member of a municipal board to say that the tax rate should be kept down and the health department estimates reduced even at the

tation, and that representation should be, made to the provincial board of health to this end. "There are blocks of houses in this city that would disgrace a country village," declared the doctor. "They should be destroyed and replaced with

modern recidences. But we have not the power to act." On the motion of Ald. Hiltz, the report and the letter were sent on to the board of control with the request that the controllers immediately hold a conference with the Toronto Housing Co., with a view to having conditions improved. Ald. Hiltz said that the situation was such that the housing company must build houses to give relief, and if not the city would have

to take the initiative. BONDING COMPANY WINS

Money Received Under Guarantee Bond Must Be Returned.

In a judgment issued yesterday at Osgoode Hall by Justice Clute, the United States Fidelity and Guaranty Co. won its case to recover \$2010 from the Union Bank of Canada. It was alleged that this amount was paid under a mistake upon a surety bond issued by the United States Fidelity & Guaranty Co. to the Union Bank.

States Fidelity & Guaranty Co. to the Union Bank.

The Union Bank, in addition to denying liability for the amount, claimed the same amount against the third party, the third party, the Canadian Surety Co., under an indemnity bond existing between them. The court in this part upheld the Union Bank's plea and ordered the Canada Surety Co. to pay the \$2010, with interests and costs.

The suit was entered in Hamilton, where on Aug. 1, 1914, the eastern branch of the Union Bank was robbed by their manager, McKinnon, of \$12,500. He was also charged with stealing a package containing \$6570. He was convicted on both charges, altho he pleaded not guilty to the theft of the \$6570. As the Union Bank was insured by two bonds from the United States Fidelity Co. they were fully reimbursed.

the United States Fidelity Co, they were fully reimbursed.
On Sept. 10, 1914, it was found out that the teller of the main branch, Desjardin, was the one who stole the package of \$6570, and not McKinnon. Desjardin stated he was in default \$2010 before the bonds were agreed to, so the loss to the defendant was only \$4560 and not \$6570. Therefore Justice Clute gave the plaintiff judgment to recover, with interest, from date of payment the \$2010.

PRESENT TWO COMEDIES.

Two most enjoyable comedies, pro duced under the auspices of the Heli-conian Club, and under the manage-ment of Mrs. Jessie Alexander Robsociety, when a capacity house welcomed the artists. Those taking part were: Mrs. Jessie Alexander, Mr. William Alexander, Miss Jessie Melville, Mrs. George Barron and Catherine Beverley Robertson. CHARGED WITH THEFT.

John Swift, 9 Camden street, an employe of the C.P.R., was taken into custody last night by a C.P.R. policeman on a charge of stealing a small quantity of seeds from a freight car, and handed over to Court Street Police Station.

BELGIANS UNDER ARREST. Amsterdam, via London, April 11.— The newspaper, Les Nouvelles of Maas-tricht, announces the arrest of the son and two sons-in-law of Baron de Fave-reau, the former Belgian foreign minister and president of the senate. They have been imprisoned at Liege. The reason for their arrest is not known.

SPANISH LANGUAGE FOR CITY SCHOOLS

Board of Education Management Committee Makes Recommendation.

CRIPPLES "UNSIGHTLY"

Dr. Caroline Brown Says They Should Not Attend Public Schools.

other language than German to be taught in our schools." said Trustee Dr. Steele at the meeting of the management committee of the board of education yesterday afternoon. The discussion arose over the consideration of the motion of Dr. Hopkins: "That in view of the probable trade extension between Canada and Spain after the war this board consider the advisability of requesting the minister of education to place Spanish on

who left himself open to reflection. The medical officer considered it insulting for any member of a municipal board to say that the tax rate should be kept down and the health department estimates reduced even at the cost of human life.

The board agreed with the sentiment expressed by Ald. Maguire and Dr. Hastings and adopted the report.

A communication from the Local Council ow Women, and a report from Dr. Hastings on poor housing accommodation in Toronto caused a discussion in which the board was united in the opinion that many of the houses in the city should be destroyed. Dr. Hastings' report stated that there was a demand by the citizens for the better class of house, due to the fact hat there was more money in circulation. Before the war the average savings of a Canadian, citizen in the bank was \$54, but at present it was \$92.50. No other country could, show a better record. He thought the board of health should have power to order the destruction of houses that were unsanitary and unfit for habitation, and that representation should be, made to the provincial board of health to this end.

tion, with a view to getting this seen to. It was unanimously agreed that all should be made to learn the English language. As the board has no power to deal with the matter, no action will be taken. A cadet committee was appointed consisting of Trustees McTaggert, Hunter and Hopkins, with the object of formulating some program.

lating some program.

No Place for Cripples.

The motion of Dr. Caroline Brown,

"that a special class for disabled children be opened at suitably located schools," caused considerable dis-cussion. Dr. Brown maintain-ed that the public schools were no places for these children "as they are an eyesore and the par-ents who come to the school should ACTION AGAINST BANK not be compelled to look upon these who are unsightly." Inspector Cowley reported that there are at the pres-ent time about 20 or 85 children in connection with the city schools who would have to be conveyed to these special classes in motor ambulances. The motion was referred to the in-

spector for report.

The report of the inspectors on the series of resolutions relating to the organization and course of studies of the Toronto public school system was held over until the next meeting. In the recommendations of Superinten-

dent of Supplies Kerr were special items including 75 blackboard sets, at \$2.85 per set, 40 cubic blocks, at \$1.75 per set, 10 sets of gazetteers, which Chief Inspector Cowley explained were "little books to look up people and things," at \$2.70 per set. Atlases, compasses and 25 pairs of scales with weights, which it was stated were to give the children a "concrete idea of scales and weights," the whole to cost in the neighborhood of \$700. As it was explained by Inspector Cowley, these are included in the minimum equipment necessary to get the gov ernment grant, they were passed. Accounts for \$832.49 for the collegiate institutes were also passed. Miss E. Cameron, Miss J. Allen and Miss M. D. Vardon were appointed to the temporary staff, and allotted to various schools. Miss E. M. Chamberlain, now on the staff of Rosedale school. was temporarily appointed principal's assistant, and seven other teachers were appointed to the regular staff.

WILL SEND EXPERTS. United States to Help Russia Solve Rail-way Problem.

Special to The Toronto World.

Washington, April 11.—One of the first big things the United States is planning to do as her part in the great war is to send some of the best railway engineers and experts to Russia.

Next will follow hundreds of thousands of dollars' worth of railway equipment of every conceivable kind—bought with the money which the government is going to lend to the entente allies.

LODGE NEWS

GROUSE HILL L.O.L.

The regular meeting of Grouse Hill L. O. L., No. 191, was held last evening in Oddfellows' Hall, Weston, presided over by J. C. Bull, W. Master. The officers of Mount Denis L.O.L., No. 2527, paid a return fraternal visit, and an address was given by Dr. Sprout, W. Master. Following the business of the evening, the party, numbering about sixty, sat down to a banquet.

EUCHRE AND DANCE.

Mistah Temple, Canadian Blue Shriners, held a successful patriotic euchre and dance last evening in the Oddfellows' Temple, College street. There were about 500 present, including the Hon. W. D. McPherson and the past district deputy of the Grand Lodge of Canada. The rooms were tastefully decorated with ferns, flowers and the flags of the allies. The convenors were Mrs. G. Reynolds and Mrs. J. R. Beamish. Mrs. F. J. Cox had charge of the euchre, and Mrs. J. Manson and Mrs. A. Leak were in charge of the refreshments.

LODGE PRESTON, S.O.E.

At the regular meeting of Lodge Preston, No. 67, S.O.E.B.S., in the S.O.E. Hall last evening, the following officers were elected and installed by E. J. Otten district deputy: Chaplain, R. Rumney; second committeeman, F. Jay; fifth committeeman, A. Fird, jr.

CUSTOMS CONGESTION IS STILL UNBROKEN

Importers Complain That Goods Shipped in February Have Not Been Received.

The congestion at the Toronto customs house is still acute, and importers complain that goods shipped from Philadelphia and New York in February are yet "somewhere" between Buffalo and Toronto. The express departments are in a hopeless tangle, and while advice notes of every conceivable kind—bought with the money which the government is going to lend to the entente allies.

Stockade at Ellis Island
To Guard Interned Sailors

Special to The Toronto World.
New York, April 11.—Construction of a big stockade for the half-thousand German and Austrian sailors from seized ships was begun at Ellis Island tonight.
Heavy wire meshing, eight feet high, will surround the enemy aliens. The sailors welcome the stockade. They haven't been permitted to set foot outside the detention buildings since war was declared. are being sent out by the companies the

Inability to Diagnose Case

PROOF OF HUN STRENGTH.

Cologne Gazette Comments on South America's Attitude.

Amsterdam, via London, April 11.— Commenting on the breaches with South American republics, The Cologne Gazette says that further assaults on German trade may be expected and are unavoid-able. It adds: able. It adds:

"The entente is becoming such a monstrosity that its hollowness must soon
be apparent. Further accretions can only
be regarded as a tribute to Germany's
gigantic strength."

SWEDEN AGREES TO ACT.

London. April 12.—Sweden has accepted charge of Austro-Hungarian interests in the United States, according to a Reuter despatch from Stockholm.

BOYS AND GIRLS.

Why not grow flowers this summer for our military hospitals? Free seeds given.

Woodstock Annual Spring Fair Is Well Attended

Woodstock, April 11.—That tuberculosis often cannot be diagnosed and that deciors sometimes certify specific diseases as causes of death when they are not certain on the point, were statements made during the hearing in the police court today on a charge of failure to report a case of tuberculosis to the medical health officer. Dr. Cornish of Ingersoll, defended himself against this charge on the ground that he did not know his patient had tuberculosis. When it was pointed out that he had certified that this was the cause of the man's death subsequently, he stated that he had certified that because all the indications pointed to tuberculosis, altho even after death he could not be certain on the point.

The explanation will be submitted to the provincial health authorities, and if considered satisfactory by them will be accepted by the court.

Special to The Toronto World.

Woodstock, April 11.—There was a very fine display of both bulls and stallions woodstock, April 12.—There was a very fine display of both bulls and stallions at the annual spring fair of the local agricultural society. Dr. Reid of Georgetown judged the horses.

Germany Owns Our Nickel

of the American names used in con-ton with it were there as trustees for an ownership, including the Krupp le and the Metal Trust of Germany, by the by, a rather strange cord, by the by, a rather strange corcoration of this view of the situation
to given out by Sir Robert Borden yesday in a speech at Edinburgh. The
cort says "that there was reason to betree Germany had before the war more
tree knowledge of the resources and detree knowledge of the modicate that nickel was one of the posed to the introduction of su press of Cunada to be included in his ment, yet The World has no doubt what he says is true, and that it adopted conscription long ago as the conscription long ago equitable, the cheapest and method of raising troops."

We should be glad to hear problems that raise such obstate the organization of an American disguise called the International Nickel Co., associated with the American Metal Co., n close alliance with the great big Geran Metal Trust.

We are printing on another than the conscription long ago equitable, the cheapest and method of raising troops."

We should be glad to hear problems that raise such obstate the adoption of the most equitable cheapest and the best way of a troops.

If it is such additional forms are printing on another than a conscription long ago equitable, the cheapest and method of raising troops."

We should be glad to hear problems that raise such obstate the adoption of the most equitable cheapest and the best way of a troops.

of the world before the war and since the war, and that the notorious concern the only one that had the handling of International Nickel Company's products, was bound up body and soul with the German Metal Trust. We ask everyone to

nvinced that the nickel mines of Onnvinced that the nickel mines of On-rio, held by the International Nickel L., are at bottom the property of Ger-ans, and are held for the German Metal try west of Lake Superior, but neither ario, held by the International Nickel Co., are at bottom the property of Ger-Trust; and, therefore, if the Government will there be more than half a doz of Canada will make a thoro and search- out and out supporters of Sir mation that they can get in England, and then get all the information which the American Government, as one of the allies, will be only too glad to give them now, we are sure that the German Metal Trust will be uncovered as the owners of the nickel mines at Sudbury!

If this is so, it will be an easy matter for Canada or Ontario to take these party as a federal organization has nickel mines over, and if there are innothe United States and there may be a lot of them-to pay them off and to give them fair treatment; but at the same to tell our neighbors in eastern Cantime to conflecate every share really ada the truth about the west. From all owned in Germanyi That's what Aus-

goes shipped by the Deutschland from the United States were, as a matter of fact, the product of Canadian mines, the most searching investigation should be made by our government, in co-operation with the United States and Great Bri-

It may be that Hon, Frank Cochrane was imposed on by the agents of Germany, and that he thought he was really doing business with Americans; if so, he ought to be only too glad to have the truth made known and German ownership confiscated. That should also be the attitude of the Borden government that if Germans control these mines they ought to be taken from them; and also that if Sir William Hearst has been imposed on, the deceit should be punished by confiscation.

The mines here can go on working and the ore be sent on to the States; the refining can now go on in the States under direction, under compulsion, of the United States Government, and no harm done to any interest in the meantime; and if the investigation should show, as we be-Heve It will show, the rankest kind of duplicity, we will be able to administe adequate punishment. The fact that the United States is in the war makes this easy: nay, that country will be only too giad to join with us in exposing this German duplicity. We think we know a high-class lawyer in New York who under instructions of Canada and the

Ottawa government undertake it?

Attention Required.

Several incidents have occurred in Tosonto recently the mention of which, some people think, might discourage recruiting, but the knowledge of which and milence about them, and absence of effort to correct them, will do far more to disourage recruiting than anything else. The fact is that very little that happens make much difference to recruiting t present. Military men, practical men are disgusted with the attitude of the Ottawa Journal-Press, and are satisfied

that recruiting can be at no lower ebb. The case of Mrs. Harden is one of these. She died from injuries received from falling off a car on her way from a munition factory, where she was working to support her husband and six children, he having been discharged with a miser- and bracing air, splendid accom sent home in charge of a draft of insane Horning, Union Station, Toronto,

nen, and paid nothing since Dec. 27, dis-harged on March 5, and his wife asked

The Ottawa Journal-Press dissentation the view that practical men want conscription. We gather from this that The Ottawa Journal-Press' acquaintance lies among the people who do not go to the front, and who do not want to go.

Journal that the government is depen ing on in Ottawa, we can understand some of the problems, and the failure of the government to recognize that vigorous action is a vital necessity.

Hon. George P. Graham told the cerrified Liberals who assembled at Ha ilton the other day that the Conservative party was practically non-existent as an organization west of Lake Superior. The Hon. George, having just returned from a survey of the west, may be credited with knowing what he is talking about. But he has not told the whole story.

anada will make the infor- Laurier from that part of the country

Speaking politically, what was once a great Tory party west of the great lakes is now practically non-existent. But why does he come to a full stop? truth? Why not admit that the Liberal ceased to exist in the prairie provinces The World has paid a good deal of atnot hesitate, as the campaign develops, likely that 45 of the 57 members to be elected from the western provinces at the next Dominion election will be Independents. They will no more kow-tow to Sir Robert Borden or Sir Wilfrid of Russia or the ex-King of Portugal. Our party cries in Ontario and Quebec do not interest the people on the prairies or on the Pacific coast. They are going into the next election determined accomplishing certain reforms, and the men they send to parliament will have to stand for those reforms. If the Libdifference to the west. No doubt some Conservative and some Liberal candidates will stand in various ridings, but in many neither of the old parties will put up a candidate.

Mr. Graham will probably admit, or cross-examination, that more Independents are likely to be returned from the prairie provinces to the next house than Liberals and Conservatives combined. He therefore cheered up his Hamilton audience with false hopes when he told them that the Conservative party had lost its hold on the west. The statement is only a half-truth. To the western mind the shot in a bag, and they look upon Sir Robert Borden and Sir Wilfrid Laurier as Siamese twins. We may admit, however, that the gov-

ernment is at a peculiar disadvantage, because a government candidate cannot would be only too glad to take the case very well pledge himself to oppose the government. An opposition candidate Washington government. We think Lord can promise almost anything. Hence it Robert Cecil would also like to take a may be easier for a Liberal to slip in as an Independent than it will be for a But something must be done. Will the Conservative. Certainly no candidate is likely to be returned from any riding in Manitoba, Saskatchewan or Alberta who does not declare himself to be in favor of free wheat and free agricultural implements. The free wheat issue is peculiarly acute, and there is talk of the overnment turning a complete somersault on that issue between now and election. If it stands pat we doubt if a single out-and-out Conservative can be elected in the west.

But as we have already said, the Liberal party is not in a much better position in the west than the Conservative government and such advisers as The They are two of a kind to the western observer. He does not even think they are a good pair to draw to,

A MESSAGE FROM VIMY RIDGE

BORDEN DEFENDS **AVIATION SERVICE**

Conditions for Flying Have Greatly Improved Over Year Ago.

OUTCLASS GERMANS

British Airmen

of the city of Edinburgh today, Sir

Robert Borden made an important re-ference to the British as lal service. In this connection he said: "In no part of the vast and complex organization requisite to modern warfare was there greater need for foresight and increased effort of mechanical genius and industrial achiev -ment of the highest order than in the ment of the highest order then in the organization and equipment of the air service. Canadians joined that service in large numbers, and I am proud to know that they have been found daring, resourceful and efficient Anscriticism of its organization and management, therefore, arouses my deepest interest. Thruout the empire there is, naturally, in respect to the prosecution of the war, much criticism of effort, method and result. Criticism founded upon reliable information as to conditions is healthy in stimulating the energies of those responsible for administration. If based on defective information it may give confort to the enemy and bring unnecessary discourenemy and bring unnecessary discouragement at home.

Service Improves.

"In the imperial war cabinet we recently had a full statement of conditions in the flying service, as they were a year ago, and as they are today. The information thus afforded was very reassuring. The greater ex-tent of work carried out by our air service as compared with that of the enemy, the higher artitlery efficiency thus attained, the resultant diminution of our casualties in the trenches and the increased loss inflicted upon the Germans thru information ostain

equal if not superior to any the Germans have hitherto produced, and are being produced at a rapidly increasing rate, the details of which it would be unwise to give. The average efficiency of our machines now in use is equal to the average of the German machines. The average of the casualties on the machine which has been most severely criticized is less than the general averages on all our machines. But the most important fact to realize and remember is this: That the British air service is undertaking extensive duties of vital iming rate, the details of which it would be unwise to give. The averbeen most severely criticized is less than the general averages on all our machines. But the most important fact to realize and remember is this: That the British air service is undertaking extensive duties of vital importance to the competitions in the portance to the operations in the field—duties which are not being carried on and never attempted at least to anything like the same ex-tent by the German air service. The fore extensive service in the air thus

tertain no doubt. The casualties Guelph Commission Increases among officers are necessarily great because the proportion of officers in Cost of Gas to All Con

because the proportion of officers in the air service is very much larger than in the other services.

"I take seave to put forward these conconsiderations because false rumor or criticism tending to discourage the spirit of British airmen is detrimental and should not be continued. If doubt arises as to the facts it would be well, thru information to a gathering of members, or by means of a secret session, to disclose to parliament the information already allorded to the imperial war cabinet."

British Airmen Perform

Duties Not Carried

on by Foe.

London, April 11.—Sir Robert Borden in Edinburgh today had conferred on him the freedom of the city, and received from the university the degree of doctor of laws. The freedom ceremony, making Sir Robert, a burgess and guild brother, took place in the Usher Hall before about four thoutawa agency.—During the course of sand distinguished citizens. Lord Provost Lorne Macleod, presenting the his speech in accepting the freedom Provost Lorne Macleod, presenting the of the city of Edinburgh today. Sir burgess ticket, alluded to the Canaburgess ticket, alluded to the Canadian forces in France, saying the news which had come of their latest achievements had redoubled their pride in their prowess. Sir Robert Borden was a great statesman who had played a powerful and prominent part in the making of a mighty nation.

Luncheon in the council chambers followed the freedom ceremony.

followed the freedom ceremony.

A university function took place in
McEwan Hall in the presence of a dis-McEwan Hall in the presence of a distinguished gathering. The principal of the university conferred the degree, after which Sir Robert said he would give them a message from the Canadians at the front as well as the great Dominion he represented: "Great as have been the sacrifices, tremendous as may be the future sacrifices, we are resolved and determined to stay in this war until the end and to assure the allied nations and the world of that victory we are striving now to attain," he said.

Sir Robert afterwards visited hospitals where Canadian wounded were being treated, and was entertained to dinner by the principal of the university, leaving for London late the same evening.

Blinders on Horses

The secretary of the Toronto Human Society has written to L. Saunders, 6 Dundonald street, as follows: The secretary of the Social Service Commiss has forwarded your letter of April 3. tion of our casualties in the trenches, and the increased loss inflicted upon the Germans thru information ostained by air observation and reconnaissance all these considerations must be taken into account. Given a machine of equal efficiency, our men may be relied on to do their full part. There has never been any question that in personnel our flying service, is superlor to the enemy's and stands second to none.

Make Good Machines

"The position disclosed to the imperial war cabinet may be briefly stated as follows: The machines which we are turning out today are equal if not superior to any the Germans have hitherto produced, and are What you say in regard to blinders on

THRICE EXCEEDS GERMANS' REPLY

Canadian Bombardment Thoroly Outclasses Answer of Enemy at Vimy.

London, April 11.—The cheeriest in-mates of a big London hospital are the wounded from the big battle. A Canadian, describing his experiences said: "I was at a bombing post on the Vimy Ridge. We were holding the line, and the Germans put up a 24 hours bombardment over us, but we gave them three times as much stuff as they sent us. Our casualties are few. At my post seven of our boys were bowled over. It was fine and yet terrible to watch our shells bursting, and I figured to myself the fright of the Germans. We knew there was going to be big fighting We knew, too, that they would have to get off that ridge. Some of us thought our fire was never going to slacken. I received my wound just as the Canadians were moving to see

OTHER CAREY'S CHICKENS"

in the opinion of many leading critics, Mother Carey's Chickens," the latest newl from the pen of Kate Douglas Wigns, is her greatest book. Thru the permation of John Cort, Mrs. Wiggin consulted to dramatize her work in collaboration with Rachel Crothers, and the little comedy of the home is to be the attraction at the Alexandra for the week commencing Monday, April 16. "Mother Carry's Chickens" is an ideal story of an ideal family.

"A LITTLE BIT OF PLUFF."

The attraction at the Grand Opera-four for the week of April 28 will be the brilliant comedian, Albert Brown, in the celebrated London success, "A Liftle filt of Fluft" Mr. Brown's production is a replica of that made for the Criterion Theatre, and is complete in every detail.

The celebrated Hebrew comedians, Chas, Hoey and Harry Lee will make their first appearance in Toronto at popu-lar prices, when they top the bill at lar prices, when they top the bill at Low Theatre next week. Also on this bill will be "Officer 444," celebrated the country. The third feature will be Slayman All's Arabs. What Four are charming young girls, with wonderful voices. Jack and Anna Bowen and other acts, together with the latest release of Charlie Chaplin in the comedy, "The Cure," and a five-act photo production, "A Child of the Wifd." (esturing June Caprice, complete a well-balanced bill for the coming week.

THE HIPPODROME.

White's Comedy Circus, a mammoth production, featuring all kinds of animals, heads the bill at the Hippodrome next week. Bessie Love, Triangle star, will be starred in the new release, "A Daughter of the Poor," a five-part photoplay. Minerva Courtney, in "The Heart of the Canyon," will present an attractive playlet, and, with Darn, Good and Funny, original comedy artists; Keane and Deane, novelty dancers; the Cartwights and Keystone film comedies, complete a well-balanced bill.

SHEA'S.

The Question," a novel comedy playist, with a unique ending, headlines the bill at Shea's next week. Joe Boganny and his troupe of lunatic bakers, are great laugh-producers, while Franklyn Ardell, in "The Wife Saver," presents a comedy sketch. The Misses Lightner and Newton Alexander are a jolly trio, while the fifth episode of "Patria." with lim. Vernon Castle, is particularly thrilling. George and Dick Rath, in "A Test of Endurance," and the Morgans, aerialists, complete, the bill.

GAYETY.

The "Burlesque Review," the attraction at the Gayety Theatre next week, is said to be out of the ordinary for a burlesque production. It burlesques a number of the best Broadway attractions and at the same time offers a special line of musical numbers. An excellent cast, headed by that Irish wit, Harry K. Morton, will be seen.

REGENT.

The bill at the Regent for today, to-morrow and Saturday will be entirely changed. The feature attraction will be Gall Kane, starring in "On Dangerous Ground," dealing with the secret service of the French and German Governments at the beginning of the great war. Bruce lestalfe, the exceedingly clever planist, will be heard in solos.

THURSTON, THE MAGICIAN.

Speaking of ghosts in a recent interriew. Thurston, the magician, who will
appear at the Grand next week, says:
"Like the magicians of the past, I. too,
outsed the assertions of the spiritualist, that spirits or ghosts would manilest themselves to mortals. My knowledge
of trickery easily detected the deception of many mediums whom I met.
Since meeting Madame Eusupla Palsdina, the famous Italian medium, I have
lest no opportunity in earnest investigation of psychic forces and have repeatelly been brought fake to face with
spirits under conditions which admitted
as opportunity of deception."

MME. GALLI-CURCI COMING.

As was expected, the announcement of mearly appearance in Toronto of Mme. Gall-Curel, who is acclaimed as "greatment among the musical public of this city. While this wonderful artist has had six years of unfalling successes alroad, notably in Spain and South America, where her triumphs were chronicled in flowery superlatives in the years of these lands, she was comparatively unknown in the United States wife to her deput in Chicago last Now with the sum of the deput in Chicago last Now with the sum of the deput in Chicago last Now with the sum of the deput in Chicago last Now with the sum of the s

FACES SERIOUS CHARGE.

Henry Fischer, manager of the United Film Company, 37 Yonge street, was arrested yesterday afternoon by Morality Officers Kerr and Lawler on a serious charge, preferred by a girl employed as stenographer in his office.

Simple Way To End Dandruff

There is one sure way that has never failed to remove dandruff at once and that is to dissolve it, then you destroy it entirely. To do this, just get about four ounces of plain, common liquid arvon from any drug store (this is all you will need), apply it at night when retiring; use enough to moisten the scalp and rub By morning, most if not all your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you

You will find all itching and digging of the scalp will stop instantly, and your hair will be fluffy, lustrous, teature of exceptional strength, "Out of the Wreck," a superb Morosco producGoethals Asked to Direct Building of "Sea Jitneys"

Washington, April 11.—Major-Gen. George Goethals, builder of the Pan-ama Canal, was formally requested by President Wilson today to take charge of the building of 1,000 wooden ships

of the building of 1,000 wooden ships for foreign commerce.

Increase of overseas tonnage is regarded as an imperative need to defeat the German submarine campaign, and keep up the flow of supplies to the entente allies, consequently the greatest importance is attacked to the plans of the shipping board for building wooden ships, which have been approved by the president and the council of national defence. The entire resources of the available shipbuilding yards are to be used for the purpose. oes not exclude full and intimate illitary and naval co-operation in the military and naval co-operation in the prosecution of the war.

Plan Concerted Action.

While it is by no means certain that there will be a joint meeting of the visiting commissions, if the state department should desire to avoid the appearance of an alliance there is certain to be concert of action in some

tain to be concert of action in some way.

The conference is stated to have been sought by the allied leaders themselves in order to discuss every phase of the war. No attempt will be made to go into details or tedhnical considerations, as the general policies involved are too stupendous to permit of it. The calibre of the men sent, particularly Foreign Secretary Balfeur, who is remembered here most warmly for his earnest endorsement of President Wilson's plan for world federation to ensure peace, and Minister of Justice Viviani, one of the first half dozen statesmen of France, is very gratifying to officials. Both men, it is recalled, have held the post of premier in their respective governments.

Dietsibution of Loan. rency.

Of the \$2,642,080,000 of reserves held by the National Banks on March 5, the banks of the central reserve cities held \$647,000,000, \$100,000,000 more than the amount required by law. Other reserve cities held \$750,000,000, or \$290,000,000 more than the amount required. The country banks held \$1,245,000,000, being \$718,000,000 more than necessary.

of premier in their respective governments.

Distribution of Lean.

One of the first questions to be taken up will be the distribution of the \$3,000,000,000 loan to the allies, for which President Wilson has asked congress to provide. Great Britain has been rendering financial aid on the most extensive scale to several of her allies, and possibly when relieved of the necessity for continuing such allowances she may be able to get along with much less assistance from America than she would otherwise require.

The greatest problem before the conference is stated to be the maintenance of the flow of American munitions and food supplies to Europe. This will be sought first by naval co-operation to fight the German submarine, second, by construction of a huge fleet of wooden merchantmen to negative its destructiveness, and third, by a ways and means to increase American manufacture and the allies ability to pay for the products.

Naval Co-operation.

Special to The Torento World.

Washington. April 11.—Representative Fred A. Britton, Chicago, today launched a campaign to banish veal from the American dinner table. Conservation of calves, Britton said, will bring porter house steak within the reach of any pocketbook and cut price of shoes thirty to sixty per cent. Naval co-operation is understood to contemplate the policing of all North and South American waters by the

TO RELIEVE WAR ORPHANS.

and South American waters by the American navy, allowing the return of the British and French vessels engaged in that work, and the safeguarding by American ships of at least part of the sea lane to Europe. Whether the latter will necessitate the actual sending of American war craft to the other side has not been announced, but if it does, arrangements already have been made to offer the port of Brest, in France, as an American naval base.

Special to The Toronto Wôrld.

New York, April 11.—Five hundred thousand francs was cabled to Paris to day by members of the American Society for the relief of French war orphans, to be distributed in cash among children in the devastated districts.

Europe for the present. The military situation of this country is well under-

TAYLOR—On Wednesday, April 11th, at the residence of his son-in-jaw, 156 Cottingham street, Joseph Taylor, in his \$7th year.

Funeral (private) from above address Friday, at 2 p.m. Please do not send flowers. (Motors.)

In France, as an American naval base.

The military participation of the United States also probably will be discussed in broad terms, tho it is realized on all sides that this country of the general public in the entente countries to see a small division of American troops at the front.

THE DAY'S EVENTS REVIEWED

lery. By all accounts the Germans suffered a severe blow when they lost

Monchy down to La Bergeree and across the main Arras-Cambrai road to

what appears to be practically all of the original German defensive lines

constructed in the autumn of 1914, and improved ever since with assiduous

iorated sharply since the opening of the engagements on the Somme.

The fighting has given the British army on the whole the possession of

The remarkable manner in which the German defensive system is fall-

ing under the British attack, with apparently no answering punch from the Germans, suggests that the enemy has gravely blundered. It suggests to

some military men the theory that the kaiser and Von Hindenburg had

planned a big offensive against the Russian front and a defensive on the

Anglo-French front, for this spring. They believed that the Von Hinden-

burg line would delay the allied advance in the west until they could strike a decisive blow in the east. The ease and rapidity of the British advance

ruins the German plan, for, to save the situation, Von Hindenburg will

It must, however, be said that Von Hindenburg belongs to the con-

with the utmost minimum elsewhere. If he can gain an important success by striking somewhere, he will yield ground at some less important point. This was seen in the Rumanian operations last year. He proceeded with that campaign, altho he had to weaken his lines in Macedonia, on the Carso and before Verdun, and he took chances with the weather

spondent counted 24 heavy pieces knocked out alone in a small valley back of Arras. The effect of this disaster to his guns and material will

sunken roads, which were full of snipand this operation was executed without the Germans observing the extent or direction of the turning movement. The attack was pushed in artillery

formation along the north bank of the Scarpe, which river was crossed in the neighborhood of Roeux. Then as the neighborhood of Roeux. Then as the advance deployed southwards the Monchy garrison began a stubborn resistance. Fighting was continued until after dark Tuesday, but during the night the main body of the Germans evacuated Monchy, and when in the morning the attack was renewed it was continued successfully down to La Bergeree and across the main Arras-Cambrai road to Guemappe, which it is reported has also been occupied.

which it is reported has also been occupied.

This success is considered of great importance, as it gives the British domination of the high ground.

The correspondent says that Wednesday was devoted largely to consolidating the gains and moving the artillery forward, altho there was considerable fighting between Croisilles and St. Quentin. Prisoners, he adds, are continually arriving, and apparently hunger induced many to surrender. It is believed that the severe wintry weather has affected the German morale. They are reported as still fighting hard, but as lacking the spirit displayed in the Somme battle.

COUNTER-ATTACKS FAIL. British Official Statement Says German Position Was

Penetrated.

London, April 11.—The 'operations along the Arras-Lens line were greatly impeded by snowstorms today. According to the official report from British headquarters tonight the Germans delivered two counter-attacks against the British positions in the neighborhood of Monchy le Preux, but these failed.

The text of the statement reads:

"Snow has fallen heavily and continuously thruout the day, rendering observation impossible and impeding the operations of our troops.

This morning two German counter-attacks on our new positions in the neighborhood of Monchy le Preux were successfully beaten off. Prisoners taken in Monchy le Preux state that they had orders to hold the village at all costs.

"Further south bodies of our troops succeeded in penetrating a German position in the neghborhood of Bulle-

position in the neghborhood of Bullecourt and secured ai number of prisomers. At midday they were counterattacked by large forces of the enemy
and forced back to their own lines.
The enemy attacking troops were effectively engaged by our artillery, and
suffered heavy losses.

"Our aeroplanes were active again
yesterday, and in spite of a strong
westerly gale and frequent snowstorms
performed valuable work in co-operation with our infantry. Few hostile
machines were seen. All our aeroplanes returned safely."

GERMAN STATEMENT,

N the British front yesterday the bad weather did what the Germans prevailed all day; it made observation of the enemy's positions impossible, and it impeded the British operations. Nevertheless the British carried Monchy-le-Preux, five miles east of Arras, a village which the German garrison had orders to hold at all costs. They are also advancing thru the wooded belt on the lower eastern slopes of the Vimy ridge, and in general meeting with pretty smooth progress except for the storm. Towards the southern rim of the sharp new salient created on the right flank of the Von Hindenburg line, the Germans rushed reinforcements yesterday and British advanced groups encountered these about Bullecourt, south of Arras-cambrai road, where in advance of their main line, they penetrated a German position and took some prisoners. The approach of large forces of Germans caused these groups to fall back on their prepared positions, while, opening up, the British artillery severely punished the pursuing foe. It have not done; it slowed up the British advance. A heavy snows orm Berlin, via London, April 11.—Cap-

opening up, the British artillery severely punished the pursuing foe. It ed with heavy losses." opening up, the British arunery severely pullished the Monchy-le-Preux. Foe Torpedoes Spanish Ship. Reuter's correspondent at the front says that the British spent yester-day chiefly in consolidating their gains and in moving forward their artil-For First Time Without Warning

Paris, April 11.—The Branish steamer San Fulgencio has been tor-podoed without warning, according to a Madrid despatch to the Havas Monchy-le-Preux, for it was the key position between the Scarpe and the Sensee Rivers. This success enabled the British to extend their lines from Agency. This is the first Spanis ship sunk by the Germans without Guemappe. This advance has the great importance of giving the British

labor. It has curved and twisted the German front into a sharp and dangerous salient; it has rendered precarious the enemy hold on Lens, and it brings the British within easy gun range of Douai, with excellent observa-**ENEMY ABANDONS** tion facilities from the Vimy ridge. It has made the new pivot of the Von Hindenburg line quite insecure and it has exploded the bubble reputation of Von Hindenburg himself. It has shown that the fighting qualities of **MUCH MATERIAL** the Germans have not improved during the winter, but have rather deter-

Forsake Many Germans Heavy Guns When Cana-

dians Charge.

Canadian Army Headquarters, April 11.—The victory of the Canadians in the battle for Vimy Ridge is much more complete than the first reports indicated. The only point which remains obscure this (Tuesday) morning is the position on Hill 145, for the retention of which the enemy fought with the utmost determination on Monday afternoon. The hill is an earthen fortress of the first importance, with many galleries far underground and concrete machine gun emplacements. The hill is isonated on three sides from the German lines and is being assailed by the concentrated fire of the artillery as well as our eager infantry. The surrender is not in doubt.

Much war material was left behind by the fleeing foe, including an as yet unstated number of heavy guns. The yield of prisoners is much larger than the first reports indicated. Already 3230 men, including 60 officers, have been recorded and many more are to come. The final total may reach 4000 prisoners to the Canadian troops allone.

Agency.—Appalling revelations of the systematic brutality of German women of the Red Cross towards British wounded have been made to the Berne correspondent of The Times by scores of Eritish wounded thru Germany, it was the cemmon amusement of the sew women to tempt our men, who were in the last extremity of hunger and then were in the last extremity of hunger and then withdrawing it. Many of the wounded begging for water had coffee, water and soup tendered to them, and then at land soup tendered to them, and then at land soup tendered to them, and then at soup tendered to them, and then at land soup tendered to them, and then at soundered to the wounded by the wounded had to drink the deflied stuff while the women looked on and laughed.

An equally common entertainment with the women was to offer a wounded man a glass of water and then pour it slowly on the ground. Cases of physical mail treatment of British wounded, but regularly insulted and spat on them. Freduction of humanity."

The Jerical Cross is merely a branch of Ge have to rush back rapidly his best forces to the western theatre to avoid complete disaster. Besides the Von Hindenburg line itself is proving itself centration school of strategists, like Col. Repington, and he believes in striking at a selected point with his maximum force and in holding on The Canadians resumed their advance on the northern section of their front towards Lens yesterday, and they sent in more prisoners. On their front they captured a great many heavy guns. On the whole front the enemy had heavy losses of guns from the British bombardment. A corre-

the campaign in the past few days. The French are awaiting the passing of the bad weather and the success of the British operations. Then they the sending of a vast amount of railway material and a great many railway experts, so as to provide adequate facilities of communication for the Russian armies. On the Russian front siege warfare continues, while the

Reds, Cubs, Phillies Win National Games

At Cincinnati (National).—Schneider pitched in mid-season form and the locals annexed the opening game of the season by defeating St. Louis 3 to 1. It was not until the final innings that the visitors proved any way dangerous, and then only for a moment. On the other hand, Mathewson's men connected with Meadows' delivery with regularity, and it was only exceptionally fine fielding on the part of the Huggins team that kept the local score down. Summerlike weather prevailed and a tremendous throng of people attended. Score:

R.H.E.

At Brooklyn.—The National League champions lost the opening same to Philadelphia by a score of 6 to 5. Brooklyn outbatted the visitors, but long hits by Luderus, Cravath and Dugey gave Alexander a victory. Dell was ineffective, Luderus and Cravath hitting successive home runs over the right field wall. Leon Cadore, pitching the last four innings, held the visitors to one bit. Pabrique, Brooklyn's new shortstop, ide a good impression, reaching first se four times in five chances, twice hits. Cutshaw's timely hitting stured Brooklyn's offensive. Score:

New York at Boston-Snow,

TORONTO CURLING CLUB

The report submitted to the management committee of the Toronto Curling Club for the past season, which is the 77th of the club's existence, shows this to have been one of the best and most enjoyable in all that time. The club devoked more than ordinary efforts to having friendly games with other clubs, hisving played 44 during the season. The membership increased in spite of the large number serving overseas, whose fees are remitted. Already new members are joining in anticipation of next year's good times.

LAKEFIELD CURLING CLUB.

Lakefield, April 11.—A well-attended meeting of the Lakefield curiers was held in the fire hall here to wind up the business of the year. The secretary presented the financial statement, which showed a balance on the right side and to the credit of the club. It was decided to hold an at-home in the town hall, the proceeds of which will be used for the Soldiers' Comfort Club. Officers for the coming season were elected as follows: Honorary president, Mr. R. Graham; president, Mr. Thompson Braden; vice-president, Mr. J. W. Ridpath; secretary-treasurer, Mr. W. W. Leonard; committee, Messrs, J. G. Galvin, Dr. Gibson, J. C. Strickland and R. Oliver.

The Leafs Will Watch Richmond Play Today

Petersburg, Va., April 10.-This is ax class up to the International League standard will have to go. It will take just about a couplett more exhibition games to get a real-line on the ability of the men on hand, and then for the fireworks. The pitching staff is not satisfactory the way it stands now, and it is here that the first pink slips will be handed out. Manager Lajole got a look at three of his recruit flingers on Saturday and he was not any too tickled over the work of two of them. He will give the rest the once over before the end of the week. They will have to show the real stuff to catch on. Larry realizes that there is no time to waste and the man that cannot come thru with the right stuff is the man that is going to work for some other manager.

The other departments of the team will also get careful attention. Catcher Williams is expected in camp by Wednesday and an insight can then be had on the ability of the receiving end. The infield will stand pat as it is. It could not be improved upon. Changes are due in the outer works if improvement is not shown.

Then the baserumining will come in for some brushing up. Manager Larry is strong for clear-cut work on the paths and he has already let it be known that anybody that wishes to hold a job on his club must be on his toes every minute of the time that he is rounding the paths.

The Leafs will get a chance to look

paths.

The Leafs will get a chance to look over the Richmond club on Thursday. The Virginians will play the Petersburg club on that day, and Rochester will be here for an exhibition game on April 16.

PLAYGROUNDS ACTIVITIES

The winter work for the Elizabeth street and the Lessie Grove Playground beys has been under Supervisors J. Hilley and B. C. Mackinley. This is the first year for inside work for the Lessie Grove boys, and they have been enjoying it very much. Great interest has been taken in the point competition at both centres. The following are the pennant and crest winners in the sections:

—Silzabeth Street Playground.—

Midget—1, Harry Nitovitch, 485 points; 2, Norman Herscovitz, 360; 3, Nathan Month, 325.

Juvenile—1, Sam Davis, 330; 2, W. Gold. 320; 3, Sam Sittsomer, 310.

Junior—1. B. Moss, 230 points; 2, Edward Benson, 220; 3, Lestie Jackson, 175.

—Lestie Grove Playground.—

Midget—1, Dick Wolgar, 195 points; 2, R. Elliott, 180; 3, Thomas Cummings, 175.

Juvenile—1, Nelson Nash, 205 points; 2, Clarence Sedwick, 190; 3, Fred Heintzman, 185.

The boys of the St. Andrew's Playground have had some hard contests and good times at their St. John's gymnasium during the past winter. The points competition has been close, as is shown by the following standing:

1, Geo. Dingwal, 700 points; 2, E. Samuel, 698; 3, B. Okum, 683; 4, William Weinstock, 673; 5, C. Jeffries, 665; 6, John Stephens, 665; 7, Fred Balmer, 664; 6, John Stephens, 665; 9, Harry Sniderman, 660; 10, Harry Frankel, 639; 11, Fred Jefries, 639; 12, William Cheesenjan, 619; 13, William Model, 617; 14, Ben Frankel, 602.

MANY BUYERS AT IS ROYALLY BRED ANNUAL SPEED SALE

Presentation to Canadian Roadsters and Carriage and Saddle Horses Also Disposed of, Some at Bargains.

The presentation of Spey Pearl, the m-year-old stallion, by King George of speed sale was held at the Repository of Messrs. Burns & Sheppard, Simcoe street, yesterday. The attendance wa means volumes of tribute to the salinas. Besides being a remarkably assume colt, Spey Pearl is royally-libeing the son of Spearmint—the to Derby winner—and the grandson persimmon—another which has been nounced one of the greatest horses land sver claimed.

The attendance was exceptionally large; in fact, each year this annual sale seems to be the drawing card for a great many people from out-of-town, who gather to buy some speed, as well as carriage, roadster or saddle horses. Mr. Burns was in his best form, and the sale went along with that swing characteristic of the Repository.

About one hundred and fifty horses were sold, and, as is often the case, many that in race horse breeding his own that is annual sale seems to be the drawing card for a great many people from out-of-town, who gather to buy some speed, as well as carriage, roadster or saddle horses. Mr. Burns was in his best form, and the sale went along with that swing characteristic of the Repository.

About one hundred and fifty horses were sold, and, as is often the case, many the sale went along with that swing characteristic of the Repository.

WASHINGTON'S WAR WHEELS WHIRRING Proposal Made That German

Committee Supports Plan to Raise Seven Billions by Issues.

HUGE CONTRACT LET

Thirty-Eight Monster Submarines to Be Rushed to

Completion.

By J. P. Yoder, United Press Staff Correspondent.

Washington, April 11.—While an American flag, carried by a Yankee member of Canada's forces, was waving over blood-scaked Vimy Ridge in France the great war was brought "nearer home" in America today than at any time since President Wilson and the congress cast lot with the entente allies. It was a noteworthy coincidence, too, that on the day when the government's war wheels whirred faster and with more specific results than at any time since congress voted aye to the president's request for war, it was announced from France that the Lafayette Flying Corps, composed almost exclusively of Americans, will wear the United States uniform and have the Stars and Stripes painted on their machines.

Cover.

Here's a typical letter received by an Ohio congressman:

"The best way for the United States word, and farmers wno might make word, and farmers wno might make word, and farmers who huge profits by growing cotton are to be urged to grow corn instead, that the forces fighting Germany may be flee president will we get the farm workers needed, while the president is drafting the young men into the army or they are going sent the army or they are going into factories making munitions?

Now my idea is that the allier factories making munitions?

Now my idea is that the allier factories making munitions?

Now my idea is that the allier factories making munitions?

The production of food is so vital to victory in this war that its importance that the Lafayette Flying Corps, composed almost exclusively of Americans, will wear the United States uniform and have the Stares and Stripes painted on their machines.

STRONG IN BRAZIL

"Sacrifice profits by growing cotton are to word, and farmers wno might make the young the reposition states the grow foodstuffs," is to be the watch-word, and farmers wno might make the voing the profits by growing cotton are to word, and farmers wno might make the Julian states the forces fighting fermany profits to b

Kitchin in Line.

Following are some of the biggest steps taken by the government today, and which bring the country nearer the realization that the nation indeed

rich which bring the country nearer the realization that the nation indeed is at war:

The house ways and means committee favorably reported the administration plan to raise \$5,000,000,000 by bond issues, and \$2,000,000,000 thru issuance of treasury notes. Representative Kitchin, chairman, who voted against war, showed he has swung squarely behind the voice of the majority by assuring Fresident Wilson personally that the measure will pass the house before it adjourns Friday. Kitchin, as foor leader, can make good his promise.

The house naval committee reported favorably the bill authorizing the president to commandeer all ships. This measure undoubtedly will pass before Sunday. The two steps noted in the house were made in less than 20 minutes, that body adjourning immediately after until Friday at eleven o'clock.

Senate Speeds Up.

In the senate all records for speed were smashed to get everything routine out of the way, so the upper body can go to work immediately on legislation passed up to it from the house. The senate took no time to pass the \$22,000,000 regular army bill, and the bill appropriating a million or more for upkeep of the West Point military academy. The sundry civil bill, carrying \$155,000,000, that always has taken at least a week of mulling, because of the innumerable details in it, was got out of the way after a few hours' discussion. The bill carries heavy increases for arsenals and armories, and provides \$1,380,000 for the coast guard.

To Exempt Farm Hands.

While this work continued in the light on instructions from Berlin, had previously insisted that no Understood have sunk the Parana.

And, despite apparently growing op-position to the administration's selective universal military service measure, Speaker Clark, Majority Leader Kitchin and administration senate leaders promised President Wilson, who went to the capitol today to urge quickest action on all war measures, that congress would vote on the questhat congress would vote on the question of raising an army next week. Altho they would not say that they believed the selective conscription plan would be carried, it is said the president was "very well satisfied" with the situation at the capitol.

Big Submarine Centract.

At "the other end of town," where the executive branches of the department are located, even greater pro-

nent are located, even greater pro-ress was accomplished. The navy department let the largest

38 monster 800-ton submarines, at an average cost of \$1,375,000 each. These undersea boats are to be of a surface speed of 16 and a submerged speed of

Another step taken at the navy department was its tightening of the censorship—a forecast of what is to come later. The department merely let it be stated that America and her alless are in personal touch and its configuration. allies are in personal touch, and it was taken for granted that wherever the counsellors for war are foregathered that the biggest men are representing their respective governments at these momentous meetings. Any mention of Advise on War Organizaship movements was absolutely pro-hibited, which announcement in itself

is of deepest significance.
Still another step taken was the announcement of the place where the government will erect its \$11,000,000 armor plate plant. Charleston W. Va. Construction is to start as soon as material can be rushed there.

Balfour Coming.

At the state department Secretary
Lansing admitted in a short sentence
that Hon. A. J. Balfour is coming from
England, to confer with officials her He dismissed any further comment with a curtness foreign to the otherw se suave Lansing, which, incidentally emphasized to a big audience of cor-respondents, with whom he is always on "near confidential" terms, that he war has really reached our shores.

Jitney Food Carriers.

At the commerce department plans were finally completed for Immediate neys," which will be used a most exclusively for transportation of food. The boats are to be built faster than German submarines could destroy them, working at the maximum of German destructiveness."

meantime, the council of n;total defence was in executive session nearly all day, with the attion's leading railroad men. The matter of troop, food and munitions transportawith the maximum of efficiency were the biggest propositions consid-Government operation of all a suggestion that is said to have received much favorable comment. If this is done, it would add 75 great freight boats to the government's water carrying capacity.

Farmers Asked to Sacrifice Profits for Good of

Special to The Toronto World.
Washington, April 11.—This is to be
a war of bread instead of bullets. And

"Sacrifice profits and raise neces sary foodstuffs," is to be the watch

"Men and women, yes, even children in the cities, can help by planting vacant lots and back yards. Every bit of food counts.

"Congress doubtless will do its share. I have urged upon the president that he issue a proclamation outlining the food needs. I have also suggested a food control board, to be under the president's direct supervision, which would give valuable aid in proper distribution of food and in preventing the charging of exorbitant prices.

"If we wait as Europe did until ditions grow serious, we will find our nation seriously hampered, to say the least, in its fight. Our job is to grapple with this situation today. It is easy of solution if we all do our show."

German Submarines Reported To Be Operating in Pacific

San Francisco, April 11.-Warnings that German submarines are believed to be operating in the Pacific were sent to all steamship captains at sea late today by wireless by order of Lieut.-Commander E. C. Wood, of the twelfth naval district here.

twelfth naval district here.

The warning said:

"Information has this day been received that German submarines are operating in the Pacific. Please notify all ships under your control and ask that they spread the warning broadcast."

The location of the submarines was not made public.

THINKS ARRAS BATTLE WILL PROVE DECISIVE graphic chart goes on to say:

steamship lines kept the people back from the boarded windows, while on the waterfront navy vessels patrolled the waters around the interned German ships, adding heavy detachments of military forces ashore in preventing damage being done.

Black as Dirt **About the Eyes**

Liver Was All Upset and There Was Pain Under the Shoulder-blade —Two Interesting Letters.

Toronto, April 11 .- So many people suffer from derangements of the liver that we feel sure these two reports, just recently received, will prove in-teresting reading and valuable infornation to many readers of this

Mrs. F. L. Harris, Keatley P.O. Sask., writes: "I was suffering from liver trouble—had a heavy pain under one shoulder blade all the time, and was nearly as black as dirt around the eyes, so I concluded to try some of Dr. Chase's Kidney-Liver Pills. I did so, and before I had taken one 25c box the pain had left me and I commenced to gain in flesh, and by the time I had taken two boxes I was completely cured and felt like a new person. My trouble was caused by heavy work out-of-doors, and, of heavy work out-of-doors, and, of course, heavy eating and constipation. I would advise anyone suffering from kidney or liver trouble to give Dr. Chase's Pills a trial."

Mrs. Charles Terry, Tweed, Ont., writes: "Before I was married I was troubled with enlargement of the liver. My liver became so enlarged that you could detect the swellings on either side, and it was only with difficulty that I could get my clothes on. A friend advised me to get Dr. Chase's Kidney-Liver Pills and take them. I commenced this treatment and used nine boxes, which cured me at that time. Then, about two or three years afterward, I was troubled again with the swelling, but only on my right side. I secured some more Kidney-Liver Pills and took them, which finally cured me. I have not been troubled in this way since. I can cheerfully recommend Dr. Chase's Kidney-Liver Pills to

"We have also found Dr. Chase's Linseed and Turpentine excellent for coughs and colds. In fact, any of Dr. Chase's medicines which we have

BRIGHT IDEAS TO DISCOMFIT HUNS "GROW FOODSTUFFS" How the German Metal Trust Control their colonies. International Nickel and Therefore Canadian Nickel

A Graphic Revelation Made by the United States Government.

The graphic chart on the adjoining page is reproduced from a recent report to congress by the United States Federal Trade Comssion endeavored in this striking way to show the people of the United States how completely Germany controlled the metal trade of the world. It was published in no hostile spirit to Germany, but rather sought to show the financiers of the United States how it was possible for the control of the world's natural resources to be centralized in one country.

The Mining and Engineering Review (Melbourne), and other periodicals. The preliminary chart was then submitted for criticism to a number of Americans who are well informed in regard to the international metal situation, and are acquainted with the organization. tional metal situation, and are acquainted with the organization, oper-

ation and control of the companies shown on the chart. A final chart was then prepared, embodying the changes that were found to be desirable, in the light of the information gathered thru such co-operation. The commission believes that the chart herewith presented shows the principal companies and their interrelationships, as they existed at the time of the outbreak of the present

more are likely to take place.
"It should be noted that the relationships shown on the chart indicate either stock control, stock interownership, interlocking directorates, or syndicate connections. These relationships, the commission is informed, are of such a nature that they lead to a centralized price control and to a harmony between the policies followed by the different companies in their purchases of metals. Connections also exist with other companies, but these have not been put on the chart because the commission does not understand that they are effective

The graphic chart shows unmistakably how the metal trade of the world is controlled by a vast syndicate with headquarters at Frankfurt-on-the-Main. It clearly shows how this German octopus is linked up with the American Metal Trust. It also shows that the big linked up with the American Metal Trust. It also shows that the big linked up with the English market in its grip thru its control of H. R. Merton & Co., Ltd., This H. R. Merton & Co., Ltd., it will be remembered, has always been, and still is, the sole agent for export sales of the International Nickel Co. Thus this chart, which was made without reference to Canada or affairs Canadian, throws a searchlight upon the nickel question in Canada.

The International Nickel Co. is undoubtedly controlled by the Merton groups or alliances. The partial report of stockholders shows that 54.409 preferred and 307,486 common shares are held in trust for undisclosed principals. The stock is voted by Messrs. Converse, De Lamar, Monell, Thompson and Wood.

Comparatively few of the stockholders, whose names are disclosed, admit living in Germany or Austria, but we find a number of stockholders admit living in Germany or Austria, but we find a number of stockholders admit living in the United States owning fifty shares or more who have rather Teutonic names. Among these we might mention: Messrs. Charles Y. Audenried, F. Albschul, J. S. Bache, Blumenthal & Co., A. Friedman, G. A. Gunther, Hallgarten & Co., G. Hahn, Heidelbach tekelheimer & Co., Scheferma Schramm & Vogel, R. F. Staabs, N. H. Stein, W. V. Strauss, C. Scheferma Schramm & Vogel, R. F. Staabs, N. H. Stein, W. V. Strauss, C. Scheferma Schramm & Vogel, R. F. Staabs, N. H. Stein, W. V. Strauss, C. Scheferma Schramm & Vogel, R. E. Wachenheim, I. S. Well and F. Wolf.

We advise our readers to charefully preserve for future reference that the height of the stockholders and strategies of the stockholders and stockholder

"In the group of companies which are largely the outgrowth of the 'Merton concern' (see page 365) the dominating place has been held by the Metallgesellschaft, the Metallbank und Metallurgische Gesellschaft, and the H. R. Merton & Co., Ltd. The affiliations of the States to be a sked him he would tell them what he knows; and he knows a lot. The should the Canadian Government hesitate to find out the is so close that it is difficult to determine which company is the domi-

group thru the Amerian Metal Co., and a like number related thru the Merton Metallurgical Co., attention should be called to the fact that many of these 28 companies are, at the same time, connected directly with one or more of the central group and with other Col. Roosevelt is Expected companies directly connected with it."

People of Canada were told that the Merton companies were not pro-German, but the United States Federal Trade Commission Rooseveit has been invited by the Vefinds that the Metallgesellschaft, or big German metal trust, with terahs' Association to speak at the headquarters at Frankfurt-on-the-Main, was founded by the late Wil- Langemarck banquet here on April helm Merton, who, until his death a few months ago, was the most 23, and it is understood he will actrusted adviser of the German Emperor. His sons represented him in cept. Mayor Breen and prominent England, and also were the sole foreign representatives of the Inter- residents of Watertown, N.Y., will national Nickel Co. Our Ontario nickel refined in the United States attend the Spanish-American war went thru the hands of the Mertons, and therefore was subject to veterans and G.A.R. posts in New went thru the hands of the Mertons, and therefore was subject to the control of the Metallgesellschaft. This will be somewhat interesting the startling news to a good many people.

At the outbreak of the war the Mertons domiciled in England took such chances that the Right Honorable F. E. Smith, attorney-general of England, was unable to understand how the Mertons es-caped penal servitude!

During the nickel discussion publicity was given to the correspondence between G. G. S. Lindsey, K.C., of this city, and the International Nickel Co. That correspondence demonstrated that no one could buy direct from the International Nickel Co., but that all export trade was handled by the Henry R. Merton Co. of London, England. Mr. Lindsey's charge that the Merton firm was a German concern in close affiliation with the Metallgesellschaft of Frankfurton-the-Main was ridiculed and denounced by Solicitor-General Meighen, Hon. G. Howard Ferguson and others. These gentlemen only repeated, of course, what was told them by Hon. Wallace Nesbitt, and may have been quite honest in what they said.

The above chart, however, tears down the veil of deception and shows with startling clearness how matters really stand. Canadian apologists for the Merton family present indeed a pitiable sight. The chart, published on the authority of the United States Government, shows in what a vise-like grip the German Metal Trust holds the metal supplies of the world, including our own storehouse of Canadian nickel. At the outbreak of the war it controlled the zinc concentrates of Australia. Premier Hughes broke its strangle hold, but was unable to secure punishment for the Mertons in England, who were smuggling Australian zinc into German ports. claimed that for a year after the outbreak of the war England bought all her lead supplied from German sources. You will see by the chart that the German Metal Trust owns the American Metal Trust. The International Nickel Co. is one of the group which make up the American Metal Trust. You will recollect that by the admission made to Mr. Lindsey by the International Nickel Co. the Merton firm in London is the sole selling agent for their nickel and our nickel program is cleaned up, and upon repril a dose, See a box, Sec for \$1.00, at all dealers, or Edmanson, Bates & world. While its sympathies are with the central powers. and at the same time is acting for and on behalf of the British Govworld. While its sympathies are with the central powers it does not

States Trade Commission's report:

"Before the war," the commission says, "the control of the world's metal market was in the hands of a group of German metal traders who are primarily engaged in buying metal, or in acting as selling agents for producers, and in selling it to European and Asiatic

"By means of the Metallurgische Gesellschaft the Merton interests, WHICH ARE THE CHIEF FACTOR IN THE METAL BUY-ING COMBINATION, acquired large holdings in the German potash industry through the Gewerkschaft Rastenberg.

"Through banks, holding companies, affiliations with syndicates and cartels, interlocking directorates, joint-share holdings, and other means of interrelation, a world-wide ramification has taken place in the metal trade.

the metal trade of the world. It was published in no hostile spirit to Germany, but rather sought to show the financiers of the United States how it was possible for the control of the world's natural resources to be centralized in one country.

In its report on "Co-operation in American export trade" the Federal Trade Commission, referring to the chart The World is reproducing on the adjoining page today, said:

"A chart showing the principal interrelationships of the various "A chart showing the principal interrelationships of the warlous the Metallbank and Metallurgische Gesellschaft and the Metallbank and Metallurgische Gesellschaft has been prepared by the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the commission, and is inserted in this volume (opposite page 366), the Carden of the Metallurgical Co., London, a large number of published sources, chief among which were the article by Prof. Robert Liefmann in The Weltwirtschaftliches Archiv for January, 1913; various articles in The National Review (London),

"The Metallgesellschaft, of Frankfurt-on-the-Main," the report of the commission continues, "was founded in 1881 by Wilhelm Merton. It took over the metal business of his grandfather, Phillipp thru such co-operation. The commission believes that the chart herewith presented shows the principal companies and their interrelationships, as they existed at the time of the outbreak of the present tionships, as they existed at the time of the outbreak of the present war. It is generally understood that as a result of the war there have already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships, and that already been a number of changes in such relationships. prietory interest in the Cohen concern. When the two concerns were formed into limited companies these interests were capitalized in the form of shares in H. R. Merton & Co., Ltd., and in the Metallgesellschaft A. G., Frankfurt-on-the-Main. In 1878 the London and the Frankfurt interests had already joined in the foundation of the American Metal Co. As a result of the predominance of the influence of the Merton family in these three companies, they have been generally known as the "Merton concern."

The Federal Trade Commission in further explanation of the this tell-tale chart of German duplicity and monopoly. Let them refer to it when they hear people defending the Merton firm, and let them remember that the Mertons are the sole selling agents of the In member that the Mertons are the sole selling agents of the Internation Nickel Co. Nobody in the United States, and especially those in the me trade, but believes that the Germans own and control the Internation Nickel Co., and therefore Canada's nickel sent to the States to be refine Nor does President Wilson think anything else. If the British Cabin

Why should the Canadian Government hesitate to find out the facts?

GENERAL SESSIONS END

War Speech From N. W Rowell Marks the Close IS KILLED IN ACTION of Meeting.

> Ontario Educational Association last night in Convocation Hall centred around the appointment of the two members from the educational body to serve on the Ontario Superannuation

Commission.

At the meeting of the previous evening, R. A. Gray, Oakwood collegiate institute, Toronto, Chas. G. Fraser. Toronto, and T. A. Reid, of Owen Sound, were nominated and yesterday the name of J. H. Putnam, inspector, of Ottawa, was handed to the secretary. After some discussion regarding the method of voting, a ballot was taken, which resulted in the election of Messrs. Gray and Putnam for the two commissionerships. Chas. G. Fraser, of Toronto, was defeated by Inspector. Putnam by a very few votes, while R. A. Gray, who has devoted close attention to the matter for many years,

men at the front. Germany was not yet defeated; and Canada, which was not half awake at the present time, must not permit the work of these men to fail. He urged increased production and thrift.

A New Canada.

Ven, Archdeacon Cody, addressing the public school and physical training sections in the afternoon on "Will There Be a New Canada?" said that in the new country there must be supremacy of persons over things, more rights of persons and less rights of property. Service must be supreme over self-seeking, and there must be supremacy of principles over expediencies and mere low policies and still lower partizanships. Conservation must be supreme over the wastefulness that has blighted this tich continent and preventation over cure ness that has blighted this tich con-tinent and preventation over cure from the training of the child up.

"The new Canada," said the arch-deacon, "should be a great field for the reconciliation between races, creeds, classes, sects, and wider still, between nations." He closed with a

between nations." He closed with a strong appeal that those in Canadian public life should be more worthy of the great responsibility left, them as a legacy by those who were today dying on the Vimy Ridge. The future he hoped would see "a Canada turned to God, temperate, pure and unselfish."

Speaking earlier in the day before the League of Empire, the archdeacon deels with "Nationality and the dealt with "Nationality and the War," in which he pointed out that neither the boundaries of the various states in Europe nor the internal constitutions harmonized with their constitutions harmonized with their constitutions are a record to them. stitutions harmonized with their constituent races or served to them just and equal rights. These he held, were some of the conditions that made war possible. The war was bringing within range of practical politics the fuller realization that states should be organized on the basis of nationality. Austria-Hungary, he

GENUINE MENACE

Special to The Toronto World.

New York, April 11.—"Let the government nationalize public meat markets.

"That's the only way to keep the packers from goughng the people during the war."

"Such was today's proposal of State Food Commissioner John J. Dillon, the nationally recognized market and food expert, who is calling on Uncle Sam to appoint a food dictator at once.

"The meat situation now is hopeless," he continued. "The big packers have control of the entire output and make their own prices.

"Consumers would stand some chance if the gavernment established meat markets in every community where farmers could get reasonable prices for their stock and consumers could buy steak for less than a fortune.

"It something isn't done, unheard of prices are in store in all food products.

They're going up now.

Milkers and apringers—Best, \$9.50 to \$8.25; grass cows, \$6.75 to \$8.25; grass cows, \$6.75 to \$8.25; grass cows, \$6.75 to \$8.25.

Lambs—Spring lambs, \$7 to \$14 each; yearling lambs, \$7 to \$14 each; yearling lambs, \$7 to \$14 to 16c lb.; (culis, \$6.50 to \$9.50; lb.

Calves—Choice, \$10.25 to \$10.50; \$1.50 to \$8.25; common, \$7.75 to \$8.25; grass cows, \$6.75 to \$8.25; common, \$7.75 to \$8.25; grass cows, \$6.75 to \$8.25.

Earlier Light hops and \$2.00 thin feeder pigs and half of one per cent. \$11.25; 20, 980 lbs., at \$11; 4, 1050 lbs., at \$11.25; 16, 1100 lbs., at \$11.25; 16, 1100 lbs., at \$1.25; 16, 1100 lbs., at \$1.25; 16, 1100 lbs., at \$1.25; 15, 110 stock and consumers could buy steak for less than a fortune.

"It somethink Isn't done, unheard of prices are in store in all food products. They're going up now.

"The situation is certainly up to the government. If it won't have a dictator, let it establish public produce and vegetable markets with the meat markets.

"If the government doesn't act quickly and definitely, there are going to be millions of hungry people in the United States before this war goes very far."

Speculators who learned the government would buy five million bushels of potatoes, it is said, have manipulated the market to \$1 to \$1.50 more than it was a week ago. This will make \$1.500.000 the speculators will clean up on the government's first batch of war potatoes. The wholesale price of onions, such as the government will need at the same time, has advanced \$2 to \$3 per cwt.

REFUSES TO ANSWER.

Special to The Toronto World.

Chicago, April 11.—"He doesn't know what he is talking about. We won't answer him. We never answer fellows like that."

This was the statement today of F. E. White, vice-president of the Armour Packing Co., in reply to Food Commissioner Dillon of New York, who declared that packers controlled meat prices, making the situation hopeless.

FIFTY PER CENT. MORE WHEAT FOR ALBERTA

Calgary, Alta., April 11.—Several officials of both the United Farmers of Alberta and the Alberta Farmers' Co-operative Elevator Company in-terviewed with reference to the prospective acreage of wheat in Alherta this year gave estimates of more than 50 per cent. increase in the total wheat acreage as compared with last v(ar.

In addition to the 50 per cent increase already manifested in the area of ground already prenared, there will be a large area of ground prerared this swring for flax and oats
This ground already is being worked.
many tractors working both day and
night shifts in the southern part of
the province for the big planting which is coming.

70 COLBORNE ST., TORONTO

"There was marked activity on the part of the two artilleries in the region of Berry-au-Bac and La Pompelle, as well as various points along the Champague front. In Le Prete Wood we effectively shelled the enemy organizations.

"Belgian communication: 'North of Dixmude and in the neighborhood of Steenstraete, the field and trench artillery on both sides engaged in light firing.'"

"Active artillery fighting continues over the front between the Somme and the Oise," says this afternoon's official communication. "Patrol encounters occurred at various points, in the course of which we took prisoners.

"South of the Oise a German attack on one of our posts east of Coucy was broken up by our fire. Near Maisons de Champague there was severe grenade fighting during the might. In 14 I retre forest the artillery firing was rether violent. North of Arracourt our patrols brought back prisoners. In the region of Ban-de-Sapt we inflicted losses on the enemy in the course of an incursion into this lines north of LIVE STOCK QUOTATIONS.

IMPROVED TONE IN AFTERNOON TRADING

Newray Continued Upward Trend to New High Record.

slight comfort was afforded the bulls in the mining market yesterday when a slightly improved tone was detectable towards the close after further recessions in some of active traders had occurred carrier in the day, which established new low levels. The liquidation which developed this week seems to have pretty nearly run its course, according to well informed brokers, and the improvement was interpreted as a turn for the better. It was a noticeable feature that when buying came in there was little real stock offering. A feature of strength in the market was Newray. This stock continued its upward trend independent of the rest of the market, establishing a new high record at 143.

Big Dome opened at the previous day's low at \$16.50 and receded to \$16. This is a new low record since 1915. Dome Extension was heavily liquidated in the morning session, and in sympathy with Dome moved down to a new low record also for a couple of years at 18. The afternoon rally caused a recovery in price to 20, which was the high for the day. Apex encountered some heavy selling pressure, which brought about a further recession to 8, a new low for some months. Good support was forthcoming around this figure, however, some ten thousand shares being taken up- Hollinger was supported the bulls in the mining market yes-

ever, some ten thousand shares being taken up. Hollinger was supported at \$5.25.

At \$5.25.

McIntyre opened a little higher at \$1.84, sold off on liquidation to \$1.81, but closed stronger again at \$1.82.

Porcupine Crown closed a little better at 64. Vipond was heavily traded in, but withstood the general downward trend, yielding only one-half point from the opening at 45.

Thompson-Krist took a further slump to 16, closing at 15 bid. This is a new low for this issue also. West Dome Consolidated came in for further selling, but a firmer feeling developed in the late afternoon.

sloped in the late afternoon.

There was not much change in the Beaver firmed a little from the open-ing to 40 and Timiskaming closed at the high for the day at 50 1-2. Hargraves after sinking to 16 1-2, ral-dled to 17 1-4. Peterson Lake held at 11 1-4. Shamrock was steady at 22 and Chambers-Ferland changed hands at 12 1-4 to 12 1-2.

SPECTACULAR SAMPLES **DOWN FROM HARGRAVES**

Manager Shaw in Town-Good Progress Reported.

Manager Shaw of the Hargrave it the mine of Cobalt spent two days in Toronto this week, bringing with him some of the prettiest specimens of ore ever brought out of Cobalt. This ore of the is estimated to run from 8000 to 12,-000 ounces to the ton. The news Mr. oon counces to the ton. The news Mr. Shaw brings from the mine is of the most satisfactory nature. On April 2 the management sacked enough ore to pay all expenses during the month of April, a day's work which could hardly be duplicated outside of a high-grade precious or rare metals mine. It will be remembered that Hargrave resumed operations and started shipping ore from the dump about the middle of November last. However, the real activity of the mine did not start until January. Today the company has \$15,000 in cash in the treasury and \$20,000 worth of ore sacked up ready for shipment, more tory of the mine. The properties are \$10,000 better off than they were when operations started. Ore bagged up averages 3500 ounces to the ton.

Mr. Shaw states that by May 1

winze sinking at No. 3 shaft should be down from the 375-foot level to
425 feet. There is ore showing in the bottom of the winze now down 18 feet, and there is also ore showing at the 375-foot level in several differ

WORKING AHEAD AT LOWER CONTACT

Beaver Workings a Year Ahead of Timiskaming.

According to President F. L. Culve of the Beaver and the Timiskaming of Cobalt, the development of the Beaver at the lower contact is just a year on the east side, and the Connel on the ahead of that at the same level on the Timiskaming. The shaft on the latter property has been sunk to 1600 feet and the cages dropped to this level for the first time last Saturday. In the meantime a crosscut has been run from the Beaver to the Timiskaming and crosscut also pushed out in bot directions from the Beaver shaft, and a few drifts run on the veins encoun-tered. Altogether some twelve hundred feet of lateral work has been done by the Beaver at the lower level since the shaft was sunk. In addition a winze has been started on the initial high grade vein which was picked up couple of months ago, and a raise s also being made on the same vein system with very satisfactory results to date,

DRIFTING ON VEIN AT LORRAIN CON.

Cobalt, April 11.-The drift on the vein recently picked up on the 263-foot level of the Lorrain Consolidated in South Lorrain is being continued rapidly, and the vein bears every appearance of developing silver values in the near future. It is composed of calcite and smaltite and averages five inches in width, so that if silver should be encountered

would be made rapidly. The contact on the keewatin and diabase at the Lorrain Consolidated came in at a depth of approximately 250 feet in the shaft. Crosscutting was started toward the east to pick up the vein located on the surface, which it was anticipated would be found to be silver bearing in the diabase rock. About 80 feet in from the shart, however, the diabase dipped sharply and keewatin again appeared. Crosscutting was then started in the direction in order to explore the ground below the contact, in this working that the wein now being drifted on was enTHE RIGHT OF WAY MINE AND PLANT AT COBALT

INADEQUATE DEVELOPMENT RETARDED GROWTH OF NEWRAY

Efficient Management Would Have Made the Property a Producer Long Ago.

From World Special Commissioner.

Newray Mines, Schumacher, Ont.,
April 11, 1917.—Your correspondent
made a special visit to the Newray, today. The spring thaw has exposed the
higher and harder rocks, while the
frost at night forms a solid crust which
can be easily traveled in the early
hours of the morning. It is therefore
not difficult for one who examined this
great property before the snow of last
fall to understand the prominent geological conditions. The serious mistakes made by the old Rea Cons., and
later by the Mines Leasing and Developing Company, can be readily seen,
and these mistakes were entirely due
to the fact that during the operations
of these two companies there was no of these two companies there was no scientific prospecting of the property, or, in fact, anything which by any outrage on the English language might be called prospecting of any kind. Work was begun and carried on largely at random. The entire property was not was begun and carried on largely at random. The entire property was not examined, even in the most general way, and when the Connel or No. 1 vein was discovered, the owners appear to have rested from their labors, for a length of three hundred feet. No. 1 contained much visible gold, and on it the Kingsmill shaft went down 425 feet.

Gross Ignorance.

But a very cursory examination of the surroundings would have shown that the Connel was in the vicinity of some father massive rocks; also, that between 600 and 1000 feet to the east there was a series of large well-defined veins striking northeasterly and parallel with the Connel; that these veins now known as the Helena, Hanson and others not vet named lay total length is about 3000 feet. And, if the investigation had been further pur-sued it would have been found that on the great Hollinger mine there was a belt of similar rocks on either side of which occurred their great veins and vein-systems. Then a reference to the official report of the Ontario Bureau of Mines would have also shown that a similar grouping of auriferous veins extending continuously from the Hol-linger to the Newray.

The Anchor Vein.
The Anchor vein is about 800 feet east of, and parallel with the Connel.
The Helena and the Hanson are still further east, but only 200 feet apart. If a shaft had been sunk between these latter veins it is probable that the Newray would now be one of the big producers of Porcupine. The Anchor and the Connel veins are in a measure controlled by the massive rocks in their vicinity, and therefore have not the uninterrupted length, nor the strong definition and mineralization of the

Helena and Hanson. South of the Kingsmill shaft there west side of this central outcrop, and as already stated the shaft went down on the Connel. It was placed near the unsheared rocks when it should have been located in the great shear zone already mentioned. This shaft is doubt valuable in exploiting Anchor and the Connel veins, and when another shaft is put down near the Helena and Hanson, the Kingsmill shaft will also be useful for ventilation But it is very important in the development of any mine to get results as soon as possible in order to augment the capital of the owners, and secure continuous and adequate development. And we have no doubt that if all the money expended by the former owners of Newray had been spent to the best advantage they would still be in control, and the property still be in control, and the property would have easily maintained its early reputation as one of the greatest in the whole camp. Inadequate development

whole camp. Inadequate development alone has kept it back.

A Rich Vein.

While inquiring into the history of the Newray we were able thru the courtesy of the present management to examine the certificates of bullion shipments by the Mines Leasing and Developing Co., to the Royal Mint at Ottawa. They speak volumes for the richness of the Connel vein, but they speak even more emphatically of the speak even more emphatically of the singular neglect of the lessees to grasp their great opportunities. We found a certificate dated 17th Sept., 1914, for \$16,695.55 in gold for the preceding month; also one dated 10th Aug., 1914, for \$15,942.39, while the certificate for July 6th, 1914, shows \$28,924.31. And remember that this was the product of a ten-stamp mill crushing only 40 tons per day, but not using cyanide, and recovering only 87 per cent of the gold contents of the ore From this it will be seen that the outlook is very promis-ing for the present owners, and they are showing their faith in the property oing with the utmost vigor; while the complete renovation of the mill is proceeding apace. New plates and new shoes and dies have been provided, and every other part in the shear zones. But it was only

least the worse for wear is being re-placed. The management are confident that the ten stamps will drop again not view of its past performances we may expect at the very lowest a production of \$10,000.00 per month.

vein. This plan will be repeated with every vein encountered in the cross-cut and thus as room is made for men and drills the working force can be greatly increased and drifting and raising will proceed without in-terruption on the various veins tributary to this cross-cut. And an electric tramway will move the ore to the a record, surpassing that of Kingsmill shaft. The mine will then by approximately \$4000. be able to supply a very much larger mill. In fact, it is estimated that without any stoping the mere de-velopment work will provide enough ode to keep the present mill running steadily about two years.

Strange Behavior.
In view of all these favorable conditions it is passing strange that the in reference to the whole property and even a very small part of the

Then, there is mystery in connection with the dumps of rich ore left over Tons milled .. 14,377 13,500 and the very valuable ore still in the Value per ton \$10.82 \$10.65 mine. Were the lessees really on the job, and how can we explain the absolute neglect to adequately pros-pect any part of such a large property? And, in this connection bear in mind that even while owned by the Rea Cons, the officials of the Ontario Bureau of Mines had again and again distinctly identified the vein-systems here with those of the transporting the machinery from the station to the mine is below methods. In the sale of control of the Newray there was opportunity ignored on one side and grasped on the other. The

there was opportunity, side and grasped on the other. The former owners should have called in an expert familiar with the ore deposits of Porcupine but they were guided entirely by the opinion of an employe, new to this camp. One in employe, new to this camp. One in timate capacity of the mill will be 45 timate capacity of the mill will be 45 timate capacity of the mill will be 45 timate capacity.

the ore deposits of Porcupine were not understood in the early days. Some of the engineers were mere novices in this camp. Very few of them knew that the great shear zones or lines of fissuring have transformed the original barren rock to one very the original barren rock to one very highly productive. And it is plain that had the smaller mines awaited the results of development on the larger properties before spending their own money we would today have a much greater number of producing mines. Insufficient knowledge has involved heavy losses and has also retarded the progress of the camp. Now, however, so far as this Hollinger-Newray section is concerned, the action of the McIntyre Cons. in securing the Jupiter and Plenaurum has called attention to the importance of these great chase zones. But it was only lately so far as this Hollinger-Newray sec-

that the Pienaurum received its full mead of appreciation, tho it is prospectively a great property and a worthy neighbor of the Newray.

The success of the present owners of the Newray may be seen from the fact that the stock has risan from 30 cents to over \$1.20 per share in less than one year and the whole history of the property proves that the temporary closing down of a mine means little or nothing as to its real value. Financial conditions, aggrevated, if not wholly induced, more management, brought the mines Leasing and Developing Company into being as successors of the Reat Cons. They made good money and were satisfied in the absence of actual which whole the property proves that they had millions within their grap. But seldom indeed has a change of ownership honestly and fairly brought sbout involved so much loss on one side and gain on the other.

In Spite of Breakdown in Power -Average Grade Higher.

McIntyre for the month of March was a record, surpassing that of February production for March is reported as \$147,792. The average grade of ore showed an increase, running at \$10.82 per ton, as against \$10.65 in February and \$10.60 in January. The tons milled came to 14,377, as against 13,500 in Pebruary and 14,817 in January. During the month great difficulty

former owners of this big property, extending a mile from east to west by half a mile from north to south, should have come to the conclusion that all its gold lav within the narrow confines of the Connel vein, as then opened up, a space 300 feet long by was experienced in the matter of obopened up, a space 300 feet long by six feet wide and quite infinitesimal that the mill is now running to its capacity of 600 tons.

Comparative figures follow: March. Gross prod'n.\$147,792 \$148,801 \$145,297

NEW BALL MILL FOR MILLER INDEPENDENCE

The new ball mill for the Miller Independence arrived at Boston Creek station on Saturday, and the work of station to the mine is being rushed

Underground developments at the Miller Independence have been very satisfactory, the vein at the bottom of the 45-foot incline shaft being about five feet in width and containing good gold values.

NIPISSING PRODUCTION.

Cobalt, April 11 .- At the Nipissing mine during March ore valued at approximately \$256,958 was mined. During the same period bullion from Niplesing and customs ore contained an estimated net value of \$401,038.

PRICE OF SILVER

London, April 11.—Bar silver, 38%d. New York, April 11.—Bar silver, 73%c.

PREPARING TO MILL WEST DOME ORE 1

Effort Being Made to Come to Some Arrangement With Dome Lake.

There is a probability that inside of a month the West Dome Consolilated will have been placed on a producing basis, according to an official of the company. With a dump of approximately 10,000 to 12,000 tons of ore, averaging from \$9 to \$10 per ton the management is endeavoirng to come to some arrangement with the Dome Lake company, by which West Dome ore can be treated in the mill Dome ore can be treated in the mill of the former concern. It is understood that the plan is to divide the mill in two parts, one of which will freat West Dome ore and the other Dome Lake ore. Whether this plan is agreeable to the Dome Lake company remains to be seen, but in case no agreement is reached it is the intention, of the West Dome company to commence work on the erection of a mill of its own, and the concrete foundation will, in this event, be started as soon as the frost is out of the ground.

the market for the white metal. In to buy stock?"

created a world-wide demand for the white metal for coinage purposes and has established beyond dispute that if people cannot get gold, they vastly prefer silver coined by their respective governments rather than paper money. For this reason, it is held that European nations will not object to taking silver out of its present place as an article of merchandise and putting it hack in its erstwhile class as a medium ack in its erstwhile class as a medium

of exchange.

An instance of the inconvenien created by silver's fluctuations as a commodity is afforded in Mexico. With the tremendous rise in the price of the metal, the silver contained in the Mexi-can peso has a market value of fiftysix cents in American money, whereas the value of the coin has been fixed at fifty cents. Thus the peso is placed in the anomalous position of being worth more as merchandise than as a circu-

Another factor which it is considered will work toward the remonetization of silver is the fact that China will be a silver is the fact that China will be a logical field for the commercial expansion of European nations and the United States in the trade struggle after the close of the physical conflict. Business conditions are so peculiar in China that to do business with Chinese merchants is to speculate in the changes in the price of silver. In purchasing goods from China, many dealers buy a large quantity of silver at the

caste as a monetary standard and as this handicap still remains, as is evidenced by the radical changes in price that have occurred in the last few months, it may serve as the deterrent which will restrain the remonetization

MINES and MINING

The other day a gentleman whom I meet occasionally accosted me in the hotel lobby with the question:

"Mr. Harris, what is the best class of stocks, everything con-sidered—investment, semi-investment and speculation—to buy? have been reading your articles in the press and your paper, but I would like you to tell me personally, if you will."

"The best class of stocks to buy, in my opinion, considered from every standpoint, are mining shares," I answered. "There are a few essential things to be looked into regarding mines, but when these essentials are assured, it is generally safe to go ahead and buy.

"Buying the right kind of mining shares is as safe as buying real estate in a small country town, with the added statement that there is a live, open market for the shares upon some recor Stock Exchange, you always have the opportunity to close out you holdings if you want to liquidate them and raise ready cash.

"Mining and farming are the two great basic industries of the world. They are the pillars of our civilization. So, if they are fundamental industries—as they are—they furnish fundamental investments to those who are in the investment market. I would advise you to buy slices of mining real estate, so to speak, under proper conditions above all other classes of stocks.

'Of course, you have to watch your step in this as in every other line of business in which you engage. But the risk of mining ha been reduced enormously within the past five years.

"Diamond drills and churn drills have helped managements to find out years ahead of actual development whether there are com-mercial ore bodies at depth in ground under consideration. This alone has eliminated nine-tenths of the hazard of the business.

"There are porphyry copper deposits in the Southwest, the ton-nage and values of which are known for 25 years ahead of actual development. This, you see, simplifies mining and makes it just as safe as country real estate and a great deal more attractive.

"The advance of metallurgy has made mineral deposits profitable, which a few years ago were thrown into the rejects. Cyaniding, oil flotation, better methods of concentration and smelting, have brough the mining business up to a state of approximate perfection, using the word 'perfection' always in its human sense.

"Now that it is possible with the use of drills to tell the character of a formation and the distribution of values years ahead of workings, we have brought the mining business within the scope of reliable industries and taken it out of the domain of hazard and hit or miss.

"Wildcat mining has really been relegated to the rear. The good old days when a flashy Wallingford with a pavement block shirt-stud would appear on the scene with a few samples of ore—picked up, heaven knows where!—and would talk the sale of mining shares on the basis of a few fancy assays, are past.

"Nowadays, to talk to an intelligent man—and most people wi are interested in mining today are intelligent—about a few picki assays is just as sensible as to show the hairs of a horse's tail and that way tell how fast the horse can trot. Nobody today who any experience in selecting mining share investments will pay a attention to assays unless they have been made under condition which are known to be thoroughly representative of the mine."

"Well, Mr. Harris, I have never heard a man talk about m ing the cessation of the European war, investments just the way you have. It pleases me and satisfies i says Financial America. The world conflict has had a profound effect on when is the best time in the development of a mining proposit

to a record level for the past quarter century, and while rapid decline from tematic drilling you can tell ahead the character and value of a mine that figure quickly followed this feat, deposit, the time to buy mining shares is in the early stages—jus many authorities are still free in their soon as you are satisfied that the mine, the management and the firm predictions that silver will advance to cial provision and plant are ample to meet the requirements of the at least one dollar an ounce after the situation situation.

"The development stage is the line of least resistance in picki stocks for profits. When a company has reached its producing earning and dividend-paying stage, there is an arrested market de velopment. The stock starts on a seasoning process, and unless there should be some very surprising developments, you cannot expect the appreciation in price that you can look for with a stock which is a development, rather than a producing, issue.

"Take Newray in Porcupine. About a year ago that stock was selling under 40c a share. It is now selling \$1 a share better t its price of a year ago. Calculated in percentages, the apprec is better than 300 per cent. This would pay uncompounded savings bank interest for 100 years. I am not saying anything against 3 per cent., which is well enough in its way, but I am calling attention to what can be produced under development conditions.

"Now, Newray is still under development. The fact that the mine has in the past produced not far from \$250,000 in gold throu its small experimental mill, does not affect the idea that it is still under development. Because it is a development—a juniorrather than a matured producer and dividend-payer, I look for it to advance at least another dollar or two in price.

"It would not do this as a producing issue unless it should make a tremendously big strike or increase its earning power. But every development at the mine now—whether by the drills or the cross-cutor the drifting at depth in adjoining properties in the same formation—is a factor in influencing the market value of the stock. As there changes in the price of silver. In purchasing goods from China, many dealers buy a large quantity of silver at the same time as they draw a bill of payment, so that if Chinese exchange rises before the bill falls due, they will be proportion to advance in the price of the stock. It can advance from \$2.50 to

before the bill falls due, they will be protected by the proportionate advance in the price of silver, which rises or talls with Chinese exchange.

Since it would be practically impossible to place China on a gold basis, this metallic hedging can only be eliminated by changing silver's status. However, it was on account of its lack of stability that the white metal lost caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a monetary standard and a count to take the caste as a count to ta

WHEAT OUTLOOK **GROWS BRIGHTER**

Beneficial Rains in Drought District Have Effect on Quotations.

Chicago, April 11.—Good rains in the drought district southwest favored the wheat bears today as to new crop months, but had little effect on the May delivery, which was in brisk demand by millers and at the seaboard. Quotations closed unsettled at \$2.03% to \$2.08% for May and \$1.80% for July, with the market as a whole ranging from 2%c decline to 20 setance, as compared with yesterday's finish. Corn lost %c to %c and old %c in for July and September wheat was in evidence from the outset. News of welcome moisture in Kansas and Okahoma, with prospects that rain would spread into Nebraska. Missouriand other parts of the winter crop region, tended to produce optimism as to the chances of a material improvement in fleid conditions. Most of the trade was inclined to believe that the loss in winter wheat would not be as heavy as recently indicated. Buils were further handicapped regarding the new crop months by reports that spring seeding was under way on both sides of the Canadian boundary, and was making rapid progress.

Corn reflected the heaviness of July and September wheat. Trading lacked volume except for cash corn. Despite heavy selling, oats were relatively steady on account of a fair demand from export interests. On the other hand, bears were prophesying the largest acreage ever known.

Packers buying rallied provisions. At first the market was depressed on account of a material decline in the value of hogs.

Opportunity Knocks— Will You Answer?

Porcupine dividends in 1916 were \$4,160,000, or 45 per cent. of the total production of the camp. Porcupine production for 1917 is estimated at \$13,-000,000, and dividends at \$4,958,000.

Porcupine is showing up as the world's feature gold camp—Porcupine stocks as America's most attractive mining investments.

NEWRAY is the Cheapest Stock in Porcupine

You can buy a great many securities for less money. but nowhere can you find such value for your

NEWRAY is one of the largest properties in Porcupine, comprising 321 acres in the famous Hollinger-McIntyre-Newray area. Development work proves it to be a mine with tremendous possibilities.

NEWRAY'S future is all ahead of it! The property will go on a producing basis in May, and has every indication of being one of the big mines of the camp.

We Advise the Purchase of NEWRAY Now
