Final Report of the Patriotic League

The closing meeting of the Women's Patriotic League was held on Tuesday afternoon, March 25th. The work on hand was finished, and after the settling up of the business tea was served and all present spent a pleasant hour together.

During the time of its organization the society has made and sent to Hamilton 3005 bandages, 35 shrouds, 3 kneelets, 191 helpless shirts, 66 vermin combination suits, 575 vermin jackets, 3184 tape sponges, 6 scarfs, 43 pads, 59 quilts, 85 compresses, 911 pneumonia jackets, 1108 pillow slips, 297 towels, 462 dressing gowns, 722 sheets, 2480 personal property bags, 703 pillows, 296 suits of pyjamas, 213 wash cloths, 254 folded gauze, 235 jars of fruit, 500 stretcher caps, 503 day shirts, 1923 pairs of socks, 205 Xmas boxes. The total amount of money collected was \$7940.19. The expenses were \$6334.09, leaving a balance on hand of \$1606.10. It was decided to invest this until the time when a suitable memorial be erected for the fallen soldiers.

Since the above audit, the following amounts have been added to the report. Money received since audit \$314.96. Expenses since audit 92.47. Balance on hand to date \$1,869.93.

A young man from outside the village limits called to spend the evening with his lady love. Before the hour of departure came it began to rain furiously. His prospective mother-in-law took pity on him and invited him to remain all night and so save going home in the wet and perhaps contracting pneumonia or at least the flu. Her kind invitation was gratefully accepted. When the considerate hostess came downstairs in the morning she noticed the young man's overcoat hanging in the hall, and to her surprise it was thoroughly soaked and had evidently seen wet weather very recently. What could it mean? Her curiosity could not be controlled, and at the breakfast table she said to her promising son-in-law, "Willie, I notice that your overcoat is very wet. How did it happen?" "Why," he meekly replied, "before I went to bed I went home to tell mother and to get my night gown."

Mrs. W. R. Drynan, 399 Queen St. S., received the following letter from a naval prisoner whom she had supported. It ran:

Dear Mrs. Drynan—
I have just returned from the north of England. I have been there on a visit. This is the first opportunity I have had to thank you for your kind contributions for my keeping while I was a prisoner of war in Germany. My ship, H. M. Submarine C-34 was sunk in July, 1917. I was the only one saved. In Germany I was treated very badly, and a month after the armistice was signed was sent to England. I have been very busy since then visiting friends all over the country. I am returning to duty next month. I wrote to you just after I got home. I hope you received the letter safely. I am living with my mother's sister. My mother died when I was very young, but my aunt has been a mother to me. I am not married yet—perhaps in a couple of years more. I've been in Canada. In Montreal, Quebec, Halifax and St. John. That was in the early part of the war. I have to complete twelve years in the R. N. I have already served six years. The service is going to be a great deal better now, owing to the alterations and the raise of pay. I don't know whether I shall continue in submarines or not. I will write you a line after I have settled down.

Thanking you again for your great kindness to me, I remain, yours truly,

Wireless telephony between Canada and the Emerald Isle opened.

IN THE AFTERGLOW

Mother o' mine, in the afterglow
Of mothering years I love you so.
For loving me e'er life I knew,
When next your heart a new life grew.
Loving me on into fair childhood,
When I so little understood
The long, hard way we all must go;
Mother o' mine, I love you so.

Loving me, too, when life so sweet
Tempted my wayward girlish feet
Away from paths of truth and right
To paths that lead to sin's dark night.
Winning me back with loving tone
To ways that you had made your own
By struggle and stress and pain and
prayer.
By love's own cords you held me there.

Mother o' mine, 'tis mine to take
The burdensome load, the stress, the
ache

That come in motherhood's fair years
The joy, the pain, the love, the tears.
'Tis mine to give what you gave me.
Mother o' mine, I would faithful be
To the highest note in the song you
taught

My girlish lips; the music fraught
With all the mother's hopes and fears
That fill to the brim the mothering
years.

Mother o' mine, in the afterglow
Of motherhood's years, I thank you so.
For gifts to me from out your heart;
At thoughts that rise my hot tears
start:

God give me ways to make you know
How great is my love before you go.
Away to rest from your mothering
I would remove life's every sting.
And give you rest in the afterglow.
For, mother o' mine, I love you so.
"Jaunita"

MORALS AND MANNERS

In a speech delivered before the North Central Academic association at Chicago Thomas Arkle Clark, dean of men at the University of Illinois, declared that a heavy responsibility rests upon the home and schools in the development of morals and ideals in the student. The duty rests especially upon high schools. He showed that in dealing with young men fresh from the academy and high schools he found that most of the evil habits of college students were formed before they got to college. He urged that far greater attention be given to morals and manners in the development of young men. Honesty is a quality greatly to be desired, for without it the young men cannot be truly successful. He urged that all boys learn the value of truth. He deplored the too general attitude of students toward examinations. The tendency to take the attitude that all is fair in examinations if one is not found out should be corrected. Also, the feeling of some boys that, while it would be wrong to "crib"

themselves, there is nothing wrong about helping someone else. The boy should be taught to see that one is as dishonest as the other. Hard work should be looked upon as a moral obligation. He urged the development of self-discipline in the student, and stated that the boy ought to take certain studies whether they are pleasing to him or not. He laid great stress on morals and manners as a business asset. Good manners depend upon a real, genuine desire to please and help others, and cannot be used as a subterfuge for the accomplishment of selfish purposes.

PEG AWAY!

Peg away, my lad, peg away,
If you the prize would win;
'Tis only poor faint-hearted chaps
Who talk of giving in.

Success may be long in coming,
But come it surely will,
To those who grind on steadily
At Perseverance Mill!

Peg away, my lad, at your games,
Don't think they're not for you;
Consider the deeds of others,
And show what you can do.

Incident of the War of 1812

Dr. Wm. Dunlop, in his pleasant little book, "Recollections of the War of 1812," which is not known as well as it should be, relates the following amusing incident:

"While I was sitting after dinner one day *tete-a-tete* with the Colonel, his servant announced that a gentleman wanted to see him. As the word 'gentleman' on this side of the Atlantic conveys no idea of either high birth or high breeding, nor even of a clean shirt or a whole coat, my friend demanded what kind of a gentleman. His servant said he must be a kind of Yankee gentleman, for he wore his hat in the parlor and spat on the carpet. This evidence seemed conclusive to my commandant, for the stranger was ordered to be admitted, and the Colonel, telling me that he suspected this must be one of his beef customers, requested I would not leave the room, as he wished a witness to the bargain he was about to make.

"Accordingly there entered a tall, middle-aged man, dressed in a blue something that might have been a cross between a short coat and a great-coat. He was invited to sit down and fill his glass, when the following dialogue took place:

"Yankee—I'm Major Jones, of Vermont State, and I would like to speak to the Colonel in private, I guess, on particular business.

"Colonel—Anything you may have to say to me, sir, may be said in perfect safety in presence of this gentleman.

"Major—I'm a little in the smuggling line, I reckon.

"Aye, and pray what have you smuggled?"

"Major—Kettle (cattle), I reckon. I heard that the Colonel wanted some very bad, so I just brought a hundred of 'em across at St. Regis—as fine critters, Colonel, as ever had hair on 'em. So I druv them right up; the Colonel can look at 'em hisself—they are right at the door here.

"Well, what price do you ask for them?"

"Major—Well, Colonel, I expect about the same as other folks gets, I reckon.

"Colonel—That is but reasonable, and you shall have it.

"The Commissary of the post was sent for, and having been previously warned not to be very scrupulous in inspecting the drove, as it was of infinitely more importance to get the army supplied than to obtain them at the very lowest rate per head, he soon returned with a bag of half-eagles, and paid the Major the sum demanded. The latter, after carefully counting the coin, returned it into the canvas bag, and opening his coat, displayed inside the breast of it a pocket about the size of a haversack, into which he dropped his treasure, and then deliberately buttoning it up from the bottom to the throat, he filled and drank a glass of wine to our good healths adding, 'Well, Colonel, I must say you are a leetle the gentlest man to deal with I ever met with, and I'll tell all my friends how handsome you behaved to me; and I'm glad of it for their sakes as well as my own, for just as I was fixed to start from St. Regis, my friend Colonel Slater arrived with three hundred more. The kettle aren't his'n; they belong to his father, who is our Senator. They do say that it is wrong to supply an innimy, and I think so, too; but I don't call that man my innimy who buys what I have to sell and gives a genteel price for it. We have worse innimies than you Britishers. So I hope the Colonel will behave all the same as well to them as he has done to me—but there was no harm in having the first of the market, you know, Colonel.' So, with a duck that was intended for a bow, and a knowing grin that seemed to say, 'It was just as safe to secure my money before giving you this piece of information,' he took his leave and departed, evidently much pleased with the success of his negotiation."

Let Cuticura Save Your Hair

On retiring, comb the hair out straight, then make a parting, gently rubbing in Cuticura Ointment with the end of the finger. Anoint additional partings until the whole scalp has been treated. The next morning shampoo with Cuticura Soap and hot water.

Sample Each Free by Mail. Address post-card: "Cuticura, Dept. N, Boston, U.S.A." Sold by dealers throughout the world.

GERMAN HOSPICE

On the Summit of Mount of Olives, Near Jerusalem.

(London Graphic.)
To what extent the Germans had secured a hold on the sacred land of Palestine is evidenced by the numerous palatial buildings they erected, not only in and around Jerusalem, but in other parts of the country as well. As one traveller, who had ascended the Mount of Olives in pre-war days, to view the landscape over somewhat wittingly remarked, all he could see was the spires of German edifices.
It was only a short time before the war that the Germans completed their great hospice, the Kaiserin Augusta Victoria Stiftung, on the summit of the Mount of Olives. Ostensibly it was a hospice and sanatorium, though in design and strength the building was nothing less than a fortress. The walls are very massive, several feet thick in places, while the various buildings contain over eighty large rooms. The site dominates the Holy City itself, and the Jordan beyond. It looked, at the time when these buildings were reared as if the Germans, under the cloak of philanthropy, had deliberately intended on some future occasion, when the partition of Turkey might be on the tapis, to make use of them for the purpose of effectually pegging out German "claims." But before that time came the Germans had, metaphorically speaking, to take Turkey to their bosom, and as happened, having erected at the hospice a powerful wireless installation, they made the place during the war their headquarters. Our airmen bombed it several times, but examination has shown that as the result of these attacks comparatively damage has been done to the actual buildings.
When we took Jerusalem the hospice became the headquarters of General Allenby and his staff, and Tommy nicknamed the edifice the Kaiser's Palace, by which name it is now known throughout Palestine. The buildings certainly bear the German mark. At the entrance there are great stone eagles, while on the exterior walls of the church are statues of the ex-Kaiser and the Empress. Then in the ceiling of the church there is a remarkable painting, an imitation of tapestry, depicting the ex-Kaiser as a Crusader king with the Kaiserin as his queen. The famous Crusaders of history are shown, but such is the colossal vanity of the man, the Kaiser has the place of honor in the centre. He and the Empress are shown holding a model of the hospice, and dominating the whole picture. Adjoining the church is a high tower, where British Tommies joyfully rang the great bells on armistice day. What

would the feelings of the man in buckram who some years ago posed as a Crusader have been had he witnessed the sight!
There is much talk in Jerusalem as to what should be done with the building. The Germans are said to have spent £250,000 upon it, a ridiculous sum if the building were purely intended to serve as a hospice and sanatorium. It will be recalled that the edifice was dedicated by Prince Eitel Friedrich, second son of the Kaiser, with great pomp and ceremony a few years ago. It is the opinion of many people in the Holy City that the structure should be converted into a museum housing the sacred relics and curios of the Holy Land, for which purpose it is admirably suited.

Garbage Utilization.

Hogs can be made to utilize much eatable material which would otherwise be wasted, according to a statement issued by the Connecticut Agricultural College. The report calls attention to the saving accomplished in Minneapolis, where between \$50,000 and \$60,000 is saved annually by using swine to consume the garbage of the city instead of burning it. Whereas Minneapolis formerly operated its garbage disposal at a loss, the city now receives \$1.26 per ton for its garbage as hog feed.

Keep the Bowels Regular and You'll be Healthy

For a Quarter You Can Assist Them Wonderfully With Dr. Hamilton's Pills.

You'll never have health if the bowels are inactive. By keeping them right you insure a clean, wholesome body. Why wait for constipation to clog up and sicken the whole system—use Dr. Hamilton's Pills—they are the finest, mildest laxative known; put strength into the muscles of the stomach and never injure the delicate lining of the bowels. They get you in the habit of performing a certain function at a certain time, and thereby restore normal conditions. Dr. Hamilton's Pills are best because they help Nature help herself and thereby keep the stomach strong, digestion good, blood pure, complexion clean, spirits bright and happy. Price 25c.

Worth Remembering.

The grated rind of an orange and a tablespoon or two of the juice mixed in the batter of sponge cake gives it a delicious flavor and keeps it moist indefinitely. Lemon or vanilla extract may be used as usual.

When greasing a cakapan, use sweet lard rather than butter.
The safest way to clean jewelry at home is to wash it in suds of castile soap, then rinse in diluted alcohol with a few drops of ammonia added.
Chilblains—Three tablespoonfuls of turpentine, one tablespoonful of table salt. Mix together and rub in thoroughly.

Do you want to know how to make baby's shirts and bands from your old union suits and undershirts? Buy a pattern of a little shirt and by using the top and front of a union suit or vest for the front of the shirt you have a neck finished and buttons and buttonholes, and by using the back from the neck down, the neck is finished for the back. Take up the shoulder seams to fit close around the neck, run a narrow ribbon in and hem the bottom.

Exercise of some form should be taken every morning. Also you should care carefully for right in spirit and physical feeling. Whenever you feel that gnawing hunger between meals it is well to nibble a cracker rather than to eat more.

SPANKING DOESN'T CURE!

Don't think children can be cured of bed-wetting by spanking them. The trouble is constitutional. The child cannot help it. I will send FREE to any mother my successful home treatment, with full instructions. If your children trouble you in this way, send no money, but write me to-day. My treatment is highly recommended to adults troubled with urine difficulties by day or night. Address:
Mrs. M. Summers,
Box 28, Windsor, Ontario.

Speed of New Telegraph.

Within the past few weeks a seven-league stride has been made in high-speed telegraphy, says the Popular Mechanics Magazine. An apparatus which in actual tests has proved its ability to transmit over a single grounded wire 6,000 words a minute has been evolved.

The real significance of this escapes one until it is realized that 6,000 words set in type will fill seven and one-half standard magazine pages. Details of what appears to be an epoch-making achievement must be withheld for military reasons. It is a war invention and has for its chief purpose the liberation of hundreds of expert operators from the signal corps without disorganizing our much-needed commercial lines. No secret is divulged, however, when the apparatus is described as a printing telegraph system depending upon a universally used recording instrument that has never before been associated with telegraphy. The system is applicable to wireless, but so far has not been actually used in connection with it.

Minard's Liniment for sale everywhere

BRUCE'S Famous Root Seeds

Bruce's Giant Feeding Beet. In two colors, White and Rose, a cross between sugar beet and Mangels, splendid croppers and unequalled for feeding, easily harvested, and keep well. 1 lb. 50c, 1 lb. 50c, 1 lb. 50c, 1 lb. 50c, postpaid.

SAVE TIME.

Card System in Housework Aids Greatly.

To do your various housewifely tasks—whether that includes working your own vacuum cleaner, making your own war bread and tending your own baby, or simply the more complicated task of directing ten servants—in any way but on a schedule—it is a luxury and an extravagance, declares a student of home economics. You may like to do it without putting the work on a systematic basis. You may be too temperamental or too indolent to feel inclined to follow a schedule; but not to do so means to waste time, your own and other people's and that is just what neither you nor anyone else has any right to do during these war days.
The housewife has her task of conserving food supervised and directed by the food administration, and she entrusts the task of providing her with enough coal to the fuel administration. The department of labor takes it upon itself to conserve infant life and through widespread educational work to cut down infant and child mortality. Trees are conserved and wheat is conserved and tin is conserved. Doesn't it seem as if there ought to be a time conserver? Time this used. Nothing but your hand and the match box. Try it as you read this: When placing the box on the back of your hand have the drawer open just the slightest bit. Push it together with the fingers of the hand that is placing the box. This will cause a bit of the loose skin to catch in. The box will lie perfectly flat until you push your closed-up fingers into your palm. The slightest strain will tighten the skin and the little box full of matches will gradually rise up in the most amusing manner.
To have it lie down merely relax the pressure. As you do this not a muscle or vein will move. Only the slight "pinch feeling" of the skin will keep you from fooling yourself.

Minard's Liniment Cures Dandruff.
THE MARCH BLUEBIRD
The coming and going of the birds is more or less a mystery and a surprise. We go out in the morning, and no thrush of finch is to be heard; we go out again, and every tree and grove is musical; yet again, and all is silent. Who saw them come? Who saw them depart?
This pert little winter-wren, for instance, gartering in and out the fence, diving under the rubbish here and there, coming up yards away—how does he manage with those little circular wings to compass degrees and zones, and arrive always in the nick of time? Last August I saw him in the remotest wilds of the Adirondacks, impatient and inquisitive as usual; a few weeks later, on the Potomac, I was greeted by the same hardy little busy-body. Does he travel by easy stages from bush to bush and from wood to wood? or has that compact little bodyforce and courage to brave the night and the upper air, and so achieve leagues at one pull?
And yonder bluebird with the earth tinge on his breast and the sky tinge on his back—did he come down out of heaven on that bright March morning when he told us so softly and plaintively that, if we pleased, spring had come? Indeed, there is nothing in the return of the birds more curious and suggestive than in the first appearance, or rumors of the appearance, of this little blue-coat.

THE HORSE'S CHAMPION
SPOHN'S DISPEMPER COMPOUND
In all the throats of disease and contagion on the health of your horse, SPOHN'S is the champion of his cause—whether stallion, brood mare, or colt. Its long-standing success as a preventive and remedy for DISTEMPER, PINK EYE, INFLUENZA, COUGH and COLDS has proven it to be absolute protection in the stable.
SPOHN MEDICAL CO., Goshen, Ind. U. S. A.

summer is as precious as those other things we have been conserving. Without making the best use of our time we shall not have time to roll surgical dressings of which the Red Cross is in such dire need. You could not tend your war garden or do any of the dozen other extra duties you have taken upon yourself to do. Really every woman must be a time conservation department unto herself. The best way to make the best of your time is to work on a schedule and to make a wise schedule for all the people who work under your direction.
Such a schedule is easily kept if you write down each day's required tasks on a plain card. The seven cards can be fastened together and hung up in a convenient place, the cards to be turned back to the right place as the days go by as a constant reminder.

Minard's Liniment Relieves Neuralgia
MATCH BOX IS TRICKY.
Do this trick before a mirror and you will actually surprise yourself. Although exceedingly simple, it is very perplexing to the onlooker. Take an ordinary match box and lay it flat on the back of your hand. At your command it will "sit up" or "lie down." Moreover, it will accomplish the task slowly or rapidly at your own will. No threads, wires, wax or weights are used.

Minard's Liniment Cures Burns, Etc.
That Sick Friend.
Jack—But my wife handed me a big surprise.
Harry—What was it?
Jack—I told her I was going to stay up with a sick friend and she said she hoped I would hold as good hands as he did in the game.—Boston Globe.

Comfort Lye

THE SPRING TONIC FOR PALE, THIN PEOPLE

If You Want to Gain in Weight and Recover Your Appetite, Energy and Ambition, Try This Well Known Remedy.

With the passing of winter many people feel weak, depressed and easily tired. The body lacks that vital force and energy which pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon them, and a blood-building, nerve-restoring tonic is needed to give renewed health and energy. Dr. Williams' Pink Pills are an all-year-round blood builder and nerve tonic, but they are especially useful in the spring. Every dose helps to make new, rich, red blood, and with this new blood returning strength, cheerfulness and good health quickly follows.

If you are pale and sallow, easily tired, or breathless at the least exertion; if your complexion is poor, or if you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you have twinges of rheumatism, are subject to headaches or backaches, if you are irritable or nervous, if your sleep does not refresh you, or your appetite is poor, you need the treatment which Dr. Williams' Pink Pills alone can give—you need the new blood, new health and new energy this medicine always brings.

A COMPLETE WRECK.

Mrs. C. Forsythe, R. R. No. 2, Fisherville, Ont., says: "At the age of fourteen my daughter Viola was feeling very much run down in the spring. Then she was attacked with whooping cough which left her a complete wreck. She had no appetite, could not sleep well nights and was subject to chills which sometimes kept her in bed for the day. She was doctoring steadily, but not apparently getting the least benefit, and I naturally grew very anxious. One of my neighbors suggested giving her Dr. Williams' Pink Pills, and I got a box. When she began using the pills she weighed only 87 pounds. Before the box was all gone I sent and got six more boxes, and under their use she constantly grew stronger. Her appetite improved, the color came back to her cheeks, she could sleep well, and feels and looks like a different person, and with all this while using the pills she gained 20 pounds in weight."

A SALLOW COMPLEXION.

Miss Gladys Marshall, Chatham, Ont., says: "I suffered from nervousness and my blood was in a very poor condition. My face broke out in pimples and my complexion was very sallow. I took doctors' medicine but without beneficial results. I was feeling much discouraged when a friend recommended Dr. Williams' Pink Pills. I used in all six boxes, and was overjoyed to find that my complexion had become quite clear, pimples had disappeared, my nerves were strengthened and my old-time health and ambition returned. I shall always have a good word to say for Dr. Williams' Pink Pills."

Notwithstanding the increased cost of all drugs, there has been no change in the price of our Dr. Williams' Pink Pills. They can be had through any medicine dealer at 50 cents a box, or six boxes for \$2.50, or will be sent on receipt of price by The Dr. Williams' Medicine Co., Brockville, Ont.

BONAR LAW MAKES STATEMENT ON BRITAIN'S FISCAL POLICY

Must Increase Production—Imperial Preference Soon as Possible.

London, Cable.—(Canadian Press despatch, via Reuters.)—Andrew Bonar Law, leader of the Government in the House of Commons, made a statement to-day on the fiscal policy of the Government in reply to a motion by Mr. Newman. He said that the prosperity of the country depended upon increased production. The Government's efforts would be directed to framing a policy on that basis. Imperial preference would be carried out at the earliest possible moment. The Chancellor of the Exchequer was considering how to give effect to it in the budget. There would be no hesitation in announcing the general fiscal policy of the Government whenever it was possible to decide how it could be carried out. The election declarations of Mr. Lloyd George would be fulfilled in the letter and spirit, but the Government must consider the best permanent system for the country. An anti-dumping bill had been drafted, but had not yet been examined by the Government. Mr. Bonar Law promised that the Government would arrive at a decision as soon as possible, and that an announcement would be made promptly thereafter.

The Government leader referred to the discussion in the Canadian Parliament upon Canada's share in the indemnity, and the acting Premier's declarations that they could rely on British treating them generously. He said that spirit was worth more than any fiscal policy to a nation. Mr. Law's statement was greeted with loud cheers.

The Government leader contended in the course of an argument he advanced in favor of tariffs that the most vital vested interest in the country was high wages. He might be asked by labor how it would be possible to

maintain high wages if cotton goods from Japan were put out onto the markets at a lower price than British manufacturers must pay for cotton. It was ridiculous to suppose that the old conditions would continue. For instance, a preference on sugar would enormously affect the empire's prosperity. "It is not too much to say that we would not have gained victory but for the help of the Dominions," said Mr. Law. "Therefore," he continued, "any measure increasing the productive power and man-power of the Dominions is a good thing for Britain as well as for the empire."

Holloway's Corn Cure takes the corn out by the roots. Try it and prove it.

LEMBERG STILL IN POLISH HANDS

Ukrainians Have Not Captured Galician Capital.

Situation Perilous, Allies Could Easily Aid.

Paris, Special Cable.—The city of Lemberg, former capital of Galicia, and recently reported to have been captured by the Ukrainians from the Poles, is still in Polish hands, according to Valda Voevod, Minister for Transylvania in the Rumanian Cabinet, in an interview to the *Matin*. The Rumanian Minister made this statement in the course of a talk regarding what he considered, to be the aim of the Russian-Ukrainian-Hungarian Bolshevik alliance which has developed within the past few days. This aim was, he considered, to storm the remaining centres of Entente resistance to Bolshevism and secure its penetration into Western Europe. It would not require a great effort to frustrate this plan, M. Voevod declared. He pointed out that it had already met with a serious setback in the heroic resistance of the Poles at Lemberg. When the Magyars decided to throw in their lot with the Bolsheviks, he said, they based their hopes on the false news of the fall of Lemberg, which city was still in the hands of the Poles. The Russian and Hungarian forces were still a most precarious one, he pointed out, and the allies should take advantage of the situation thus temporarily favorable to them and adopt energetic measures. The Polish-Rumanian barrier, "which isolates Europe from Oriental Bolshevism," the Minister declared, "must be fortified first of all."

CHURCHILL TELLS OF CONDITIONS IN EUROPE

Recent Events in Ukraine Have Been Extremely Disastrous to the French

Roumania Threatened—Fears for Poland—Hungarian Menace Exaggerated.

London, Cable.—Discussing the situation in Russia, Winston Spencer Churchill, Secretary for War, in the House of Commons last night, said that events during the last two or three months in Ukraine had been extremely disastrous to the French. He said they had entered from the south, and had gone some distance from the coast, when they were confronted by superior forces, and encountered hostility from the people. The Secretary pointed out that this latter feature was something which "must be carefully weighed, as it showed the danger that might result from rash or ill-considered action."

Kheron and Nikolaev have been taken, and Odessa is being defended by French, Greek and Russian forces against Bolshevik attacks, he said. The position of the Bolsheviks near Odessa, he pointed out, had exposed Roumania to a very direct threat of invasion, which, with the Hungarians advancing on the other side, has made the situation very difficult.

In speaking of General Denikine's army, the Secretary said that it was Great Britain's policy to give it support, but not to involve British troops. He said that General Denikine is "fighting desperately for his native land, and for the world's civilization."

There is a British mission with General Denikine, and medical supplies, munitions, instructors and technical advisers. The British retain control of the Caspian, but there is a Bolshevik fleet at Astrakhan, where the harbor is at present icebound. Small detachments of British troops stretching toward the frontiers of India are holding back, without serious fighting, Bolshevik emissaries seeking to advance and spread disturbances there.

Admiral Kolchak's armies in Siberia have done well in the northern sector, although not so successful further south, Mr. Churchill said, adding: "The British have a handful of men there as a symbol and guarantee of the authority of Admiral Kolchak. The Government has supplied Admiral Kolchak's armies with a very large number of rifles, some cannon and other munitions by way of the Siberian railroad. It is intended to continue this support by sending technical instructors and experts to Siberia."

The Secretary said that Hungary had undergone a serious political change, and showed a disposition to resist the will of the Allies, "under the garb of Bolshevism," but that there was no official confirmation of the rumored invasion of Hungary by the Bolsheviks.

Poland, with Germany behind it, he said, was in a very anarchistic condition, and might degenerate under Bolshevik pressure and attack. He pointed out that the position of Roumania was also one of anxiety, that country having suffered terribly in the war, and being short of food and all means of supplying her needs. He expressed the hope that efforts would be made to aid Roumania, which, he added, was "the great buttress against the advancing tide of Bolshevism and anarchy."

Sartorials.

Shoes with low French heels. Separate skirts in basket-weave checks. A frock skirt entirely of tiny ruffles. Ribbons that come quite wide enough to make the new vests.

Cook's Cotton Root Compound.

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, \$1; No. 2, 53; No. 3, \$5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Watson.)

BEFORE OR AFTER INFLUENZA

By Dr. M. Cook

The cool fighter always wins and so there is no need to become panic-stricken. Avoid fear and crowds. Exercise in the fresh air and practise the three C's: a Clean Mouth, a Clean Skin and Clean Bowels. To carry off the poisons that accumulate within the body and to ward off an attack of the influenza bacillus, take a good liver regulator to move the bowels, such as Castor Oil or a pill made up of May-apple, leaves of aloe and root of jalap, to be had at any drug store, and called Dr. Pierce's Pleasant Pellets.

The system should be built up by the use of a good iron tonic, such as "Irronic" tablets, to be obtained at some drug stores, or that well known blood-maker and herbal tonic made from roots and barks of forest trees—sold everywhere as Dr. Pierce's Golden Medical Discovery.

For a tonic that will freshen up the blood, clean the digestive tract and put new force and vim into you, I know of nothing better than Dr. Pierce's Golden Medical Discovery—and it contains no alcohol or narcotic so is perfectly safe to take.

WINDSOR, ONT.—Dr. Pierce's Golden Medical Discovery and his Pleasant Pellets are wonderful medicines for home use. I used to suffer with weak lungs, smothering spells and sick-headaches, but since I have taken the above mentioned medicines these conditions have left me. "Such medicines as Dr. Pierce's are worthy of praise and I am very glad to add my testimonial to the thousands of others."—MRS. ELLEN HARDING, 11 Erie Street, West.

BLIND MAN FLEW.

Appreciated Manoeuvres Performed by Experienced Pilot.

Thomas D. Schall, the blind congressman from the Tenth Minnesota district, made flights with Col. Charles Lee of the British royal flying corps in Washington recently. It was the first time he had been up in an airplane.

Congressman Schall was not satisfied with the plain "joy ride" Colonel Lee had given him. When they returned to earth after circling over the city at an altitude of about two thousand feet, the blind representative asked for more thrills. "Fine! Fine!" he exclaimed, as the machine came to a halt. "But, Colonel Lee, if you wouldn't think me a nuisance, I would like to go back up and turn over."

The biplane was wheeled into position again, and off it shot on a trip of real sensations. Climbing rapidly to about two thousand feet, Colonel Lee started the machine into a series of dips and dives, spirals and other aerial antics calculated to make one's hair stand on edge. To complete the thrills, the airplane was made to roll over sideways and then drop into a beautiful nose spin.

The passenger's sightless eyes were blinking with delight when his wife ran onto the field to assist him from the machine.

Makes Breathing Easy.

The constriction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is a untried experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Aversions of the Great.

- Hannibal did not use tobacco in any form.
- Goliath absolutely declined to don B. V. D's.
- Genghis Khan preferred the steps to the elevator.
- Moses had an unconquerable aversion to motorcycles.
- Doctor Johnson would not put his foot in an automobile.
- Old Colonel Eve positively refused to wear corset-covers.
- Peter the Hermit never spent a cent for phonograph records.
- Gustavus Adolphus would not patronize the parcel post.
- Nero couldn't be persuaded to buy an electric fan.—Columbia State.

SAVES NEPHEW—BACK TO JAIL.

London, Ont., report Like the long-lost uncles of fiction fame, George Gray, who is at present serving a term in the local jail, came to the rescue of his nephew, Sam Gray, charged in the police court to-day with a breach of the Ontario Temperance Act. The uncle convinced the Magistrate Graydon that he was the owner of twenty-six bottles of intoxicating liquor seized in the Gray home several weeks ago, and won his nephew's freedom, then returned the jail to serve his sentence for helping to remove whiskey from a Grand Trunk dining car.

"Take that ink away from the baby." "Aw, let him write a novel if he wants to. Gotta begin some time."—Louisville Courier-Journal.

Timely Topics for the Sons of the Soil

PLAN TO PLANT TREES

SELECTION OF CHEAP STOCK IS
POOR ECONOMY.

**Plants Should Be Watered—Cuttings
May Be Successfully Used for
Willows and Cottonwoods—Bury
In Cool, Moist, Well-drained Sand
Until Spring to Get Satisfactory
Results.**

A tree plantation established with poor stock always is handicapped. The purchase of cheap stock, simply because it is cheap, is poor economy, for often it results in failure.

Fortunately, most of the hardwoods may be grown easily from seed, and the possibility of buying stock which is not true to name or of having it injured in transit avoided. If the farm maintains a garden plot, the hardwood seedlings may be grown there and planted out in the field when one year old. The seed of the desired species may be purchased or collected locally, sown in rows, and handled much the same as vegetable seed. The plants should be watered and cultivated, so that they will become as large as possible during the season. After September 1 water should be applied only to keep the ground from drying out completely. This is necessary in order to harden the tender wood to withstand frost.

Cuttings may be used successfully for growing the planting stock for such trees as willows and cottonwoods. These cuttings, which are best made in the fall or early winter after the leaves have fallen, should be about ten inches in length and taken from one-year-old or two-year-old twigs of vigorous, healthy trees. Cuttings should be made always with slanting strokes of a very sharp knife, so as to avoid bruising the bark. If trees free from seed, or "bloom," as it is sometimes called,

Well-Planted and Cared for Wind-break.

are desired, cuttings should be taken from trees which observation has shown do not produce seed. As soon as the cuttings are made they should be tied in bundles of about fifty and buried in cool, moist, well-drained sand until spring. As soon as possible in the spring, and always before the soil dries out, the cuttings should be set out, with the buds pointing upward, leaving two or three inches above ground. The soil should be pressed firmly about the stems, and if it is not soft it is better to make holes for the cuttings with a round bar or dibble.

Trees grown from large nuts, such as walnut and oak, are best propagated by planting the nut where the mature tree is desired. Unless this is done, the long, heavy taproot, even at the end of the first year, makes transplanting difficult and the loss heavy. Black walnut is best planted in the fall.

Conifers are much more difficult to raise than hardwoods, and unless a large project is undertaken it is inadvisable to attempt to raise them. Thrifty stock may be purchased from reliable nurseries and in some cases at cost from nurseries maintained by the state. Stock grown as near as possible to the region of planting is always preferable.

If hardwoods are used, one-year seedlings give best results under normal conditions. Large stock should be avoided. It is more expensive and requires more time and attention to plant. If conifers are used, nothing smaller than three-year-old transplants should be tried. Transplants are preferable to seedlings because of the larger mass of fibrous roots.

Planting methods are dependent largely upon the size of the stock and the condition of the site. When stock is received for planting, the first precaution is to see that it has not dried out. The roots never should be exposed to the sun or drying air. The roots of stock that is packed in crates should be moistened thoroughly before the trees are removed. If the trees are extra-large conifers and the roots of each tree are protected with earth bound with a cloth covering, the whole should be planted without removing the wrapper. In

any case, all small stock, if it cannot be planted at once, should be heeled in in a cool, moist situation. The tops should not be covered.

All grassy, weedy, or heavy land should, if it is practicable, be ploughed and harrowed at least 12 months before the trees are planted. Fall ploughing is preferable. If manure is to be used, it should be applied at the time of ploughing to enable it to decay. If it is placed fresh next to the roots at the time of planting, there is danger of "burning" them. Although ploughing is not absolutely necessary, it is productive of good results, and the benefits are several times as great as those secured by cutting for the ground after the stock is set out. It is still better to use ground which has been under cultivation for two or three years. Young plants need just as much care as a garden, and their growth will be proportionate to the amount of care they receive.

Planting may be done in either of two ways: by the slit method or by the individual-hole method.

Either of these methods may be worked out in a shallow furrow. It is a very desirable on sod ground to plough a furrow if complete cultivation of the planting area cannot be carried out. This will remove the grass cover and will make the work much cheaper. All sod or grass cover should be removed from a space at least 15 inches square before a tree is planted, provided it is not set in a furrow.

The slit method is the cheapest and in light, sandy soils the best. A spade is used to open a wedge-shaped hole in the ground by moving it forward and backward. Into this opening the tree roots are suspended full length, and the earth is pressed firmly around them by a thrust of the foot which closes the hole.

A hole is dug wide enough and deep enough to accommodate the tree roots without crowding. Care should be exercised in putting the soil back on the roots to see that no large rocks or sods are allowed to fall in, because of the possibility of leaving air spaces, which will cause the plant roots to dry out. Holes never should be dug a long time in advance of planting, unless it be in the fall, on account of the danger of drying out. If there is a hardpan or stratum of soil impervious to water at the bottom, this should be broken up thoroughly with tools or a light charge of dynamite. Unless this is done the tree will not thrive.

Crop Rotation.

During the war, owing to labor scarcity and the high prices ruling for grain, there has been a tendency to get away from the short rotation in crop production. The necessity is, therefore, all the greater for getting back to it now.

A three-year rotation recommended by the Dominion Experimental Farm is:

First year.—Hoed crop. For corn apply manure in winter or spring, at rate of 15 tons per acre and shallow plough shortly before planting time turning under both clover and timothy. For roots plough land previous autumn.

Second year.—Grain. Seed down with 10 pounds of red clover, two pounds alsike, six pounds alfalfa and six pounds timothy per acre.

Third year.—Clover hay or pasture. Second crop of hay may be used for seed.

This rotation is well suited for intensive dairy farming where soiling crops are used. It would be a most excellent rotation to put into practice where sufficient rough land was available to serve as pasture. It is the rotation that would supply the greatest amount of forage of the best description for dairying or beef production.

For a four-year's rotation this is recommended:

First year.—Hoed crop. Apply manure at rate of 20 tons per acre previous autumn, winter or spring.

Second year.—Grain. Seed down with 10 pounds of red clover and eight or 10 pounds timothy per acre.

Third year.—Timothy hay or pasture. Plough field shallow in August, top work at intervals and ridge up in autumn in preparation for hoed crop.

This rotation is most satisfactory from all standpoints, except that it supplies a rather smaller proportion of grain than is often desired. Where live stock is the mainstay of the farm this is, however, a very minor fault.

Britain Imports Hams from China.

Nearly 3,000,000 pounds of hams, valued at \$550,000, were exported from China during 1917. Great Britain was the principal importer. The Chinese consume vast quantities of hams and pork. Pigs are raised everywhere in China.

Paper Spoons.

Among sanitary appliances for public eating places is a spoon pressed from paper that can be thrown away after using.

Clogged Nostrils Open Breathing Made Easy, Catarrh Cured!

New Method Very Successful

It is a new method of treatment, that of medicated air, and cannot fail to be beneficial. It goes wherever air can go, thus reaching all the affected parts. It purifies as by fire, simply burning up the disease germs. Catarrh is a non-poisonous and healing agent; it therefore acts upon the mucous tissues of the throat, nasal passages, and bronchial tubes, destroying all microbe life, and at the same time heals up all the inflamed parts.

As a cure for Catarrh, Bronchitis, Asthma, La Grippe, as a strengthener for the throat, Catarrh cannot be equaled.

It is a guaranteed cure, and is highly endorsed by prominent physicians who use Catarrh in their practice.

Sufficient Catarrh for two months' use, price \$1.00; smaller size 50c; at all dealers.

SUNDAY SCHOOL LESSON

Lesson 3, April 6, 1919.
God Our Heavenly Father, Gen. 1:1, 27; Psalm 103:1-14, Matt. 6: 24-34.

Commentary.—1. God Our Creator (Gen. 1:1, 27). God has given us a clear statement as to how man came into being. He made him from the dust of the ground in his own likeness. It was the breath of the Almighty that he breathed into the inanimate form that made him a living soul. He was the final work of creation. After God had made the world and had fitted the earth for his abode, having made the atmosphere, vegetation and animal life, all adapted to man's needs and comfort, he formed man and gave him dominion. For Adam he made Eve to be his companion and they were to be the parents of the race. This act of creation presents to us a view of our Father's wisdom and power. Man did not create himself. He did not come into existence by chance. He did not become what he is by a process of evolution from a life-cell or a lower order of life.

II. Praising Our Heavenly Father for His mercies (Psa. 103: 1-14). The psalmist David presents to us in most expressive language the subject of praise to God. One cannot read these verses without being impressed with the thought that he felt in his heart all he said. He called upon the entirety of his being to praise the Lord. He would not be forgetful of any of the benefits he was receiving from God. He considered Jehovah as his Father and as the Giver of all good. He praised him for the forgiveness of sins and for healing his diseases. He acknowledged that it was the Lord who had preserved his life amid many dangers, and that He had made his life rich with mercies. The Lord had withheld from him nothing that was good for him. His tender care had been so fully bestowed upon him that his strength was "renewed like the eagle's." As a further reason why he should praise the Lord, he presented his justice and righteousness. He would not only execute judgment, however, but he would also exercise mercy to his creatures. The Lord shows mercy where man might be inclined to be severe in judgment. He sees as man can not see. He spares men that they may think upon their ways and submit to his will. David used an expressive comparison to show God's mercy toward man. "As the heaven is high above the earth, so great is his mercy toward them that fear him." The Lord not only pardons our sins, but he removes them from us "as far as the east is from the west," and his pity for those that fear him is compared to that of a father for his son.

III. Our Father's care (Matt. 6: 24-35). 24. No man can serve two masters—No one can be the bond-slave of two masters at the same time. He can not render full obedience and service to each. The two masters have each a will and a disposition, which may be widely different, and their demands will be so different and conflicting that the servant cannot meet them. Hate love.—When the demands of the two masters conflict, the servant must fulfil those of one and neglect the other, and this course is certain to displease one of the masters. There

Please Mention This Paper.

will, in the very nature of the case, spring up a greater desire to please one than the other, which will result in a condition in which one master will be esteemed and the other despised. There will naturally be a greater attraction in the one master than in the other. Ye cannot serve God and mammon—The application is pointed. Mammon may have been a god of the Syrians, but it was used to denote gain or wealth. It denotes in this place an object that takes the place of God. 25. Take no thought.—The word "thought" has undergone an important change in meaning since the time of King James. Then it meant anxiety or worry. The idea is well expressed in the R. V., "Be not anxious." Anxiety and worry are opposed to faith and trust. We are not forbidden to provide for temporal needs by industry and prudence, but we are forbidden to allow our minds to be distracted regarding the future. Life—Physical life. Eat drink put on—These include the things ordinarily considered essential to sustain and protect life. Those who are principally concerned with treasures upon earth and with serving mammon are persistently anxious about the needs of the body. The life more than meat, and the body than raiment—The life as a gift from God, as well as the body, came to us without our being anxious, and these are superior to meat, the old English word for food, and raiment. If God provides the life and the body, certainly he will provide those things which are essential to their welfare. 26. Behold—Take as an example. Fowls—This word formerly included all birds. Sow not, neither reap—Sowing, reaping and gathering into barns for safe keeping are not forbidden. These acts are right and needful for men. Jesus is telling his hearers that if the Father provides for the birds without their sowing and reaping, much more will he provide for men, especially when they use ordinary care to provide for themselves.

27. One cubit unto his stature—A cubit is the length of the forearm from the point of the elbow to the tip of the middle finger and is variously estimated from eighteen to twenty-one inches. No amount of anxious thought will make us a cubit taller, yet through God's providential care, without our anxious thought, we have attained the stature of three or four cubits. 28. Raiment—Clothing. Much anxious thought is given by many to this question of clothing. How shall I procure it? What shall it be? Consider the lilies—Without doubt flowers and birds also were abundant and in full view where Jesus was speaking. The illustrations here employed were very impressive. They must have appealed strongly to the minds of his hearers. Tell not—They had no part in providing the conditions of growth. They simply grew. God furnished all that was necessary of air, moisture, sunshine, soil. 29. Solomon—The third king of Israel, remarkable for his wealth and wisdom. 30. Grass of the field—including the lilies and other flowers cast down with the grass. To-day—Showing that its life is brief. Cast into the oven—Dried grass twigs and other vegetation were used for fuel as firewood was scarce. The ovens were of different kinds. They were usually of clay, shaped like an egg. The fire was placed within and the dough spread on the outside to bake. In some cases the fire was withdrawn when the oven was sufficiently heated and the dough placed inside to bake. Ye of little faith—If God would cause the beauty of vegetation to exist when it was so short-lived, what would he not do for those who were made in his own likeness? 31. Take no thought—Be not anxious about the things of this life. 32. Gentiles—The nations not Jewish. Seek—They have not a knowledge of the true God and seek earthly things as their chief good. Your heavenly Father knoweth—He knows your needs and loves you, therefore trust him. 33. But seek ye first—The Gentiles and mammon-servers seek world good, but I place before you. Seek it first, both in point of time and of importance. Kingdom of God—The reign of Christ in the heart. All these things—All that is needed to sustain the physical life. 34. No thought for the morrow—A great part of the distress of this life would be removed if all would obey this injunction of the Savior.

Questions.—Where and by whom were the words of this lesson spoken? What is the great subject here treated? What is mammon? Tell why one can not serve two masters. Explain the expression "take no thought." What illustrations are used in this lesson? What should be the prime object of our search? What promise is added? Why it is wrong to worry? What reasons have we for trusting God?

PRACTICAL SURVEY

Topic.—God the Father Almighty.
I. Divine fatherhood.
II. Final obligation.

I. Divine Fatherhood. There are two theories as to the origin of man. One traces him upward from the ape; the other, downward from the Almighty. He is the appropriate crown of terrestrial creation, and forms the connecting link between the material and spiritual realms, united in himself the elements of both. He is the lowest order of being possessing moral capacity or capable of fellowship with the Creator, or of which divine Fatherhood can be predicated. The apostle declares, "We are the offspring of God," which means that which originates from one's own life. A machine is the product of the brain; a son is

250,000 MUSKRATS Wanted

GOODMAN & ROSENTHAL
Raw Fur and Wool Merchants
168 KING ST. E. TORONTO, CAN.

begotten. Divine Fatherhood was originally universal for an unfallen race, to be perpetuated in the natural order of generation. The relation, forfeited by transgression and lost through death in the day of disobedience in Eden, can only be restored through the provisions of grace and by individual determination. Men are the children of God, not by racial descent, to be perpetuated in the natural order but by the birth of the Spirit (John 3: 5, 6). Fatherhood is not merely through Christ, but in Christ. He restores the term to human phraseology by restoring the experience to human hearts (Gal. 4: 6). Divine Fatherhood embraces compassionate love and provides for its welfare. His resources afford complete assurance.

II. Filial obligation. As creatorship involves responsibilities of which even Deity cannot divest himself, so responsibilities are inseparable from creaturehood. Sonship is the highest possibility of privilege for the creature and with its immense privileges it imposes commensurate obligations. Manifestly the first is the cultivation of a right disposition toward the Creator. Filial affection is the first right of fatherhood, as it is the first obligation of sonship. When the law asserts as it first and greatest claim, "Thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might," it is soul, and with all that declaratorily creating the duty, but declaratorily in this affection lie the true element and inspiration of conformity to all the other duties. Obedience consists in intention more than in act, hence "love is the fulfilling of the law," inseparable from filial affection will be the reverent adoration and contemplation of divine excellences which is called worship, which is a universal demand and the supreme act of which created spirits are capable. "Worship God," is a requirement equally binding on men and seraphims (Isa. 6: 2, 3; Rev. 22: 9), and the former is the lowest order of being capable of response. Worship is a purely spiritual act, assisted by, but distinct from, any outward act or attitude of devotion. Obligation to service is inseparable from, and measured by, endorsement. The apostolic injunction, "Do all to the glory of God," states not only a Christian duty, but a universal law. Trust is inculcated both by scripture and by creature circumstances. The dependence of the creature is absolute. Nature, in perfect accord with scripture, proclaims, "Have faith in God."—W. H. C.

To have the children sound and healthy is the first duty of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

NITRO-CULTURES FOR LEGUMES.

(Experimental Farms Note.) Among the forage, cover and soil-planting crops in Canada, one family of plants is of special interest to farmers. These are the legumes or Leguminosae, which include clover and vetches, beans and peas. Botanically they are remarkable for their high nitrogen-yielding qualities, as being constantly associated with bacteria in the soil.

These bacteria—minute living organisms only visible under high microscopic power—form colonies living on the smaller rootlets of the legumes and produce thereon small lumps or nodules varying in size from a pin head to a small pea. Each kind of crop, whether clover, alfalfa, pea, etc., is greatly benefited by its own particular strain of bacteria culture.

When these bacteria are present in the soil, experience shows that growth is more vigorous, and earlier development takes place. These factors are important in Canada. With alfalfa, robust and early stands have a better chance of resisting winter killing; and in the case of field peas, reports from the Western Provinces show increased yields per acre from the use of nitro-cultures.

Where a crop has once been successfully raised with nodules on the roots, the bacteria survive in the soil for some time, and a subsequent crop is more easily obtained. To give a crop the best chance of succeeding, the appropriate strain of bacteria should be introduced into the ground.

This can be done by transferring soil from ground where that crop has succeeded, and scattering it broadcast over the new field. This method is laborious and expensive, and besides often introduces undesirable weeds and the germs of diseases. Equally good results have been obtained by using pure bacterial cultures. The method of procedure is to mix the culture material, on which are millions of bacteria, with some fluid, generally skim milk. Then empty the seed on to a clean floor or cloth, and treat it with the fluid, thoroughly stirring the seeds, so that a film of moisture with its bacteria may stick to each seed. The seeds are then spread to dry, out of direct sunlight, which would kill the bacteria. When dry, and on the same day as treated, the seed should be sown and covered up. A cloudy day is the best for this purpose.

Cultures may be obtained commercially from seedsmen or Agricultural Colleges, at charges ranging from twenty-five cents upwards. The Experimental Farms system, at the Central Farm, Ottawa, prepares cultures for alfalfa, red clover, alfalfa, peas and beans. Each bottle put up contains sufficient material for the treatment of about sixty pounds of seed. Bona fide farmers and settlers who wish to raise one of the above crops, will be supplied free with a small quantity to assist in establishing that crop in new districts. The recipient is requested at the same time to report results on a form sent with the culture.

Applications should be addressed to the Dominion Botanist, Central Experimental Farm, Ottawa, stating the kind and quantity of seed to be treated. Letters should be mailed as early in the season as possible, to avoid delay.

Electric Light at Home \$2

The latest electric light discovery. No batteries to buy or electric bills to pay. Thousands of homes and farms have installed this electric light years ago and are still using it daily. Guaranteed to be safe, simple and inexpensive; any one can install it. This midday electric light complete with wiring instructions and high grade material, such as fine copper wire, fibre covered wire holders, single pole knife switch, drop light fixture, battery protector, socket, friction tape, mason finished shade and globe; also our famous battery compound which will supply the current for the electric lights; also re-charging cables and instructions for re-charging your batteries without expense. These instructions and material will enable you to have electric light anywhere. Express prepaid, \$2.00.

METHOD OF TEACHING.

Wherein Our Educators Often Put the Cart Before the Horse.

This simple principle (spirit before discipline) we sometimes seem to lose sight of in our education, consistently putting the cart before the horse. In the days of the renaissance, when people had caught a vision of a new world, and studied Greek with avidity because they believed it was a path into that world. We reverse the process. We set our students to grinding Greek verbs in order that in an indefinite future they may come in contact with the Hellenic spirit, when what they wanted was a touch of the Hellenic spirit to transform the Greek grammar into a book of magic.

We set them to cutting up earth-worms when what they wanted first was to have their thoughts turned toward the mystery of physical life. We put them to studying Italian, trusting that in due time a knowledge of that language may prove an incentive to read Dante, never perceiving that a craving for Dante might be made the strongest incentive for studying Italian.

We red ink and blue pencil their compositions, believing, with a touching faith, that there is some intrinsic beauty in correct spelling and perfect punctuation that will appeal to the undercurrent of the mind, and all the while what was needed was a sense, however slight, of the wonder of literary creation.—Harold C. Goddard in Century.

A Pleasant Purgative.—Palmale's Vegetable Pills are so compounded as to operate on both the stomach and the bowels, so that they act along the whole alimentary and excretory passage. They are not drastic in their work, but mildly purgative, and the pleasure of taking them is only equalled by the gratifying effect they produce. Compounded only of vegetable substances the curative qualities of which were fully tested, they afford relief without chance of injury.

Home.
Sometimes, in dreams, I see a room
With massive walls and fair,
Rose-shaded lights shut out the gloom.
The air is sweet with flowers in bloom.
And you are there!

Sometimes the room I see in dreams
Is homely, small and bare;
The table waits, the kettles steam,
O'er all the cheery firelight streams,
And you are there!

What matter, dear, which dream comes true—
The mansion rich and rare,
The little cottage hid from view
In God's own sunshine, wind and dew,
If you are there?

NO CURE NO PAY

Can I do more than this to prove to you, at last after years of study I have a preparation that will cure Bronchitis, Coughs, Colds, Hoarseness, Bronchial Asthma. It is a wonderful remedy and I can prove it by the best people of Canada. Mr. Clarke, 776 Indian Road, Toronto, suffered thirty years with Bronchitis; it cured him. Mrs. Holmes, No. 1 Yorkville Avenue, Toronto, coughed for thirteen years; one bottle cured her, and thousands of others too numerous to mention, have benefited by this marvelous remedy. If you doubt me, write any of the above parties, they are right at your own door, and will be pleased to answer any inquiries. Ten times more powerful than any known mixture, one dose gives instant relief. Sold under an iron-bound, money back guarantee to cure any of the above ailments.
Only by **BUCKLEY THE DRUGGIST,**
97 Dundas St. East, Toronto.
Price 50 cents bottle, 15c extra for mailing, 2 bottles mailed free for \$1.50.

Sores Flee Before It—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil, which acts like magic. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

A Necktie for Fish Bait.

Cigarette papers trailed in the manner of a "spinner" seem a queer bait for mackerel, but many men have used cigarette papers with deadly effect in Dover bay. You can, in fact, catch mackerel with anything bright when they are on the run. Perhaps the best of all baits for them is a strip of skin cut from one of their captured brethren.

A piece of tin or lead foil is effective, and I once knew a man who came back from mackerel fishing without a vividly colored necktie that he rather fancied. It had made an excellent lure for the fish. Is it that the mackerel is conscious of his own brilliant coloring and therefore will take any bait with a gleam about it? —London Standard

Platinum in Spain.

Platinum deposits in the south of Spain, in a mountainous region known as the Serrania de Ronda, are reported to be extensive. The 12 or 14 rivers of the district may profitably be dredged for platinum gravel for some years to come.

PARTED BY GOLD

"Do you know the name of the place, aunt?" asked Maud, quietly.

"No, my dear, but I must speak to Jack. I don't understand it. I think Lady Fopston said he had been there more than once."

Lady Maud turned sharply with an actual spasm of pain.

"More than once?"

"Oh, if wishes were firebrands, the Royal Signet, with its distinguished company in it, would have been consumed to ashes that night."

CHAPTER V.

It would be very pleasant just here to commence and carry through an elaborate analysis of Jack Hamilton's feelings, and pen a disquisition upon love in general and the peculiar form of the disease that attacked him in particular.

But if not deterred by the reflections that five hundred thousand authors have already indulged in the same unprofitable employment, the knowledge that an analysis, though "easy writing, is rare hard reading," holds back our pen.

In plain language, Jack Hamilton was deeply in love, and very much in trouble about it. Men of his class are generally very proud of heart, proud more of and for their womankind than of and for themselves.

A man hates to take the woman, to whom he has surrendered his heart and hand, lead her to his other womankind, and with a proud glance of love, and oftentimes defiance, say:

"There, my ladylike mamma, there, my majestic aunt, there, my maternal and influential grandmother, is the lady of my choice, and, for beauty, queenliness and grace, she can match you all."

Now Jack Hamilton certainly could not take Annabelle Montague by the hand and go through this haughty performance, even mentally. He knew that if he ever dared hint that he had fallen in love with an actress of the Royal Signet, his exquisite aunt, Lady Paceywell, would faint and scream for salts, and Lady Maud—well, perhaps she would die right away of the shock and the shame. So poor Jack was in a dilemma—a dilemma not lessened by the fact that he believed the beautiful, modged from the box of the Signet, whenever he could get a chance, was a lady whose present position had been assigned to her by adversity.

He had been told, and Jack Hamilton, incapable of a falsehood himself, always received the word of a gentleman as gospel truth, that Annabelle— or Mary, as he preferred to think of her—Montague was by birth a lady, and only by misfortune's chance a fairy in an impossible extravaganza and an associate of the Signet green-room.

"Yes," said he to himself, as he watched her downcast reception of thunders of applause, her modest way of singing the soft, nonsensical songs, and her pretty, deprecating, yet sometimes spirited, addresses to the demons

Every Wage Earner
Should Answer Question
Himself or Herself

WHAT DOES THE FUTURE HOLD FOR YOU IF HEALTH GIVES WAY?

In dollars and cents, what is the worth of the brawn of your arm; what is the value of the staying power that permits continuous labor—what are they worth to you?

Suppose you did something so foolish as to reduce your strength, vitality or judgment one half, and it were impossible to get them back—how much would you pay to regain the lost portion?

When you let yourself run down, you reduce your chances for success in life. If sleeplessness comes you score lower still—snoud appetite or digestion fail, you are stered in the face by physical bankruptcy.

Don't let it go so far, take Ferrozone, it has cured thousands and it will cure you; it builds up bodily strength, makes muscles like steel, replaces spring tiredness by energy and new life. Ferrozone rebuilds sick folks because it contains the strengthening elements that every run-down system requires.

Especially before the hot weather comes, everyone needs a purifying tonic—Ferrozone fills the bill exactly—nothing known that juvenates and uplifts so fast.

At once the appetite improves. You rest well and arise next morning feeling fit and fine.

Headaches disappear, weakness gives way to the vigor that only Ferrozone can supply. Try it, results are guaranteed, 50¢ per box or six for \$2.50 at all dealers or by mail to any address if price is remitted to the Catawba Co., Kingston, Ont.

of the deep. "Yes, poor thing, she is a lady, any one can see that; but what am I to do?"

The first thing was to go down to the theatre with the dainty pocket handkerchief and wait at the stage entrance for Miss Montague. There he met with a repulse that was not to be mistaken. Jack Hamilton read in the glance which the pirate bestowed on him, as he drew his daughter out of his bath, mistrust and suspicion. Jack colored, sighed, put the handkerchief in his pocket, and took a private box.

"He thinks I'm a blackguard," he mused, as he watched the stage for the appearance of the Fairy Queen. "Well, I am not surprised. Poor fellow, he is quite right to take proper care of her, and I like him the better for it. Ah, here she is!" and his heart beat with a telltale rapidity as the Fairy Queen came on and received an uproarious welcome, to which he lent all his aid with a pair of white but very strong and capable hands.

As he watched her from behind his closely-drawn curtain and deprecating than usual, that her eyes were more downcast and more persistent in their avoidance of his box.

This pained Jack, and he arose with a sudden inspiration. The extravaganza had only just begun, he should have time to reach a flower shop. With long strides he traversed the highly decorate entrance hall, and halted a cab.

"Drive to the nearest flower shop," he said, "and if you are quick I will give you half a sovereign."

The poor horse suffered for his liberality, and soon pulled up, panting, at a small fruiterer's.

He jumped out, hastily selected some flowers—the best and most expensive the man had—superintended their ar-

rangeement as a bouquet, and, giving the man a sovereign, took to the cab again.

The second act had only just been finished as he re-entered the theatre, and seeing that the curtain was down, he seized the favorable opportunity for carrying out his small plot, and escaping himself behind his sheltering curtain, took a look at the opposite boxes.

In the middle box, directly opposite, was a party that would suit him admirably; a tall, highly-dressed lady, with a nervous, bashful spouse, and two little girls on the order of mamma.

"They'll do," he murmured, "the very thing," and with his bouquet shielded by his light overcoat, he passed around at the back of the boxes and tapped at the door of the one he had marked out.

The nervous pater familias opened the door, and looked considerably astonished, not to say, alarmed, at the apparition of such a swell, and stared at the evening dress, the diamond-adorned shirt front, and the grand, aristocratic face with as much admiring curiosity as he had bestowed upon the fairies and demons on the stage.

"I beg your pardon," said Jack, who, being a rather bad hand at intrigue, felt that he should make a mess of it if "were not done" quickly. "I beg your pardon, sir, but I want to intrude a moment."

"Come in, sir; step in," said pater familias, and Jack, taking care to keep well out of sight, of any one peeping from the corner of the stage curtain, stepped in and bowed to the lady, who, with a brilliant blush, immediately dropped a courtesy.

Then Jack, with greater artfulness than his dear friends would have given him credit for, turned to the little girls.

"I have been watching your little girls' delight from my box opposite, madam, and was so pleased with their pleasure that I could not refrain from coming around and asking to shake hands with them."

Here the intriguer held out his hand and shook the little fat ones of the young ladies, with his smile, which as usual, won their hearts.

"Really, sir," said the man, "it's—'t's what I may call friendly, very handsome, indeed, and, ahem—"

"Oh, don't mention it," said Jack.

"I am very fond of children," and in truth he was, "little girls especially. And, turning to the little ones again, 'how do you like the play?'"

They expressed admiration and delight by emphatic exclamations and gestures.

A FREE BOX

Here's a chance to prove to your own satisfaction, and at our expense, that Zam-Buk does end pain and heal sores and skin diseases.

Maid this advertisement and 1c stamp (for return postage) to Zam-Buk Co., Dupont St., Toronto, and we will send you free box.

"They are delighted, sir?" said the mother. "Poor dears, they almost think it's real, and that Miss Montague lives in a shell like a large cockle, and dresses in white muslin and spangles every day."

"They are happy in being able to do so, madam," said Jack, with great respect and another smile.

"And so you like the beautiful fairy, do you?" he asked.

"Oh, yes, she is lovely! I wish I could be a fairy!" sighed the young-est.

"Don't be so silly, Polly, dear," giggled the elder with ineffable wisdom. "Mamma just told you it wasn't a real fairy, didn't you, ma? I wish she'd look up, ma, don't you? She always looks straight before her, and I do want to see her eyes."

"Come," said Jack, edging in here. "I think we can get her to look up. Look here," he said, producing the bouquet, which elicited decided marks of admiring approval from mamma and chorus. "Here's a nosegay of flowers, I bought it for you to give the fairy; you shall take it in your hands, Polly, and when the blue fire burns—mamma will tell you when to throw it on to the stage to the fairy. She will look up then, I'll be bound, and perhaps kiss her hand in the bargain."

Polly nearly screamed with delight, mamma shook her plumage and smiled, and papa chuckled and tried in vain to express his appreciation of the really handsome—ahem, he might say friendly—ahem, goodness of the—gentleman.

Amidst this overwhelming delight and gratitude, Jack bowed his adieu and hastened to his own box, whence he could see the huge bouquet resting upon the ledge beside Polly's fat hands in the intervals between the oft-repeated sniffings.

The last act came quickly, and Jack, as he watched, saw a flutter of excitement in the box opposite; then, as the blue fire commenced to burn—and smell unpleasantly—little Polly arose like a dwarf, armed with the bouquet, sword fashion, and, with a crow of delight, buried it at the stage.

It fell fairly at the queen's feet. Jack saw her start, blush and smile, then, as the Spirit of the Deep picked it up and handed it to her, she raised her eyes with such a look of gentle, loving gratitude to the box, that Jack felt he had swindled some one in getting so much happiness at so low a cost.

Down came the curtain, and up went the cheers.

"Miss Montague! Montague! Montague!" screamed the house, and the Fairy Queen came before the curtain.

And, oh, what delight there was in the box opposite when it was seen that she was carrying the bouquet in her hand, and actually, as she moved off again, raised it with a smile to her lips.

But what made the smile on her face die away and become replaced by a look of hesitating and troubled timidity?

Simply because Polly, in a spirit of

This Young Farmer Is Enthusiastic

IN THE GOOD HEALTH BROUGHT BY DODD'S KIDNEY PILLS.

Frank Corrigan Suffered From Sore Back for Two Years, But One Box of Dodd's Kidney Pills Chased Away All His Troubles.

Island Brook, Que., March 31.—(Special)—Mr. Frank Corrigan, a well-known young farmer living near here, is spreading the good news that his sore back, from which he suffered for two years, has vanished, almost miraculously, before a short treatment of Dodd's Kidney Pills.

"Yes, I am completely cured," Mr. Corrigan says with enthusiasm, "and Dodd's Kidney Pills did it."

"My troubles started from a strain and I suffered for two years. My back ached, my sleep was broken and unrefreshing, and I felt heavy and sleepy after meals. I perspired freely with the least exertion, I was depressed and low spirited, and I was troubled with pressure and a sharp pain on the top of my head."

"I tried the doctor without getting lasting relief, but one box of Dodd's Kidney Pills cured me completely."

Dodd's Kidney Pills gave such prompt and sure relief because all of Mr. Corrigan's troubles came from his kidneys. They are a kidney remedy pure and simple. They have a long record of kidney cures. Ask your neighbors about Dodd's Kidney Pills.

justice greatly to her credit, had arisen, and, with a smiling but emphatic face, was shaking her head, and pointing with a tiny finger to the box where Jack by an unlucky made himself visible.

"Confound it!" he muttered. "The little one has spotted it, after all; she knows now where the thing came from!"

"Poor Jack was conveyed home in a bansom and a fit of jealousy. Why should the smile die away when her eyes rested upon him, and who the deuce was the commonwomon, stagey, idiotic-looking man whose arm he had seen her leaning so trustfully when she entered the theatre?"

Jack tried to feel disgusted, and mused to himself:

"What an idiot I am, to be sure; that stupid, goggle-eyed monotony was her lover, her sweetheart as he'll term it, and they are to be married this day week, and I'm an idiot for losing my heart in a wood that has no opening."

"And yet," he mused, "I can't believe she'd throw herself away like that. She's a lady, Beaumont says, and she's beautiful. No, that fellow must be a dependent, a hanger-on. But what business has she to be hanging on to him? It's quite enough to talk by his side, I think, without taking his arm. Hang it, what an idiot I am. Wouldn't Pop, and Walton, and Beau enjoy this! It's almost a pity they are not here to do so," and he smiled rather weefully.

Tramping upstairs with his hands in his pockets, he found a dainty note upon his table, which, upon opening, turned out to be a reminder from Lady Paceywell of his promise to dine at the Park Villa on the following day.

"Well, I don't remember the promise, my dear aunt," muttered Jack, "but if you say so I must have said I would, and I will; and now to bed, and

I do hope I shan't dream of my goggle-eyed friend with the India rubber mouth, confound him, and bless her."

A fine gentleman is very busy in the morning; first he has to dress, or rather submit to the operation under the hands of his valet. Then there is breakfast—chocolate, devilled kidneys, and other digestion-destroying abominations. Then, if he be a handsome man, there is a nice little pile of letters awaiting opening and answering.

Invitations to dinners, balls and concerts, prettily expressed thanks for bouquets, tickets to various shows and booths in Vanity Fair, and the loan of that beautiful volume of poems; reminders from the lawyer of that little business which the fine gentleman has systematically neglected and turned a deaf ear to for the last three months; modest application for a loan (not small) from your dearest friend—your borrower is always your dearest friend in both senses of the word; and a host of tradesmen's bills, blue and bleated.

Then comes a constitutional in the park, for the benefit of the new coat and vest which the tailor has sent home as a gentle reminder.

Then a look in at the club, and a languid chat with Fitzbob of the Blues, and Toodleby of the Red Tape office.

Then luncheon—rather more indigestible than the breakfast—and a trot in the row as a preparation for the event of the day—the dinner.

All this, and more, Jack did with his usual good-humored grace, and turned up at his aunt's villa with a tolerable appetite, and a little flower in his buttonhole for Lady Maud.

In the little drawing-room, warning his hark at the fire, Jack found Mr. Shallop.

"Ah, Mr. Hamilton," said he, coming forward, with outstretched hand, and a smile that made his face very pleasant. "I am before you, but I suppose I shall not get any more of the feast for that."

"No," said Jack, laughing, and taking up his place beside the fire. "Didn't know I should have the pleasure of meeting you!"

"No?" said Mr. Shallop. "Her ladyship did not mention it, perhaps. You see I was rather a necessary guest, eh?" and he laughed again very pleasantly and easily.

Mr. Shallop was an exceedingly well-bred man, a favorite with the ladies, and a good fellow with the gentlemen. Many persons before introduction had taken him for a lord, or at least a hunting parson. He was very like the Marquis of Cariboo, and quite as amusing; always had plenty of small talk, a ready laugh, and a supply of wit that, if not superb in quality, never failed in quantity.

"And yet Mr. Shallop was a lawyer, a very keen one."

"Necessary," said Jack, interrogatively.

"Yes," replied Mr. Shallop; "her ladyship will never get through any business with me at my office—will not even sign a cheque. I must dine at the villa, or run down for a day or two at the Bums. Over the cup of tea we get the business done pleasantly—very pleasantly for me!"

And he laughed again.

"Yes," said Jack, rather absently, but rousing with something of a start, as his aunt's voice floated toward the open door, and her ladyship entered. "My dear Jack," exclaimed Lady Paceywell, kissing him fondly, "how good of you to come."

"Mr. Shallop," passing on to him and extending her hand graciously, "I fear we are late, but Lady Maud kept me so long—the dinner, Porter? Very good."

"How much are we indebted to you?" murmured Maud, giving her white soft hand to Jack, with a smile that many men, Mr. Beaumont in particular, would have purchased with half their lives. "how good of you; it will be so dull, and you will be bored to death."

"Smothered in a bed of roses," misquoted Jack, in retort. "You know I always enjoy a dinner at the villa; you and aunt are better company than a club full. I can get all the scandal, and better port than even Vinson's."

This gallant volley he fired, or rather dropped, in his slow, good-humored way, on the road to the bi-focal dining-room to which Porter, with due solemnity, had summoned them.

Lady Maud faced her aunt at the bottom of the table, Jack and Mr. Shallop occupied the sides.

Jack was hungry, and never feeling ashamed of his appetite, disposed of the soup and a nice piece of brill without seasoning it with a remark, which Mr. Shallop, professing less appetite a greater gallantry, had opened a budget of news and chat, and had won three laughs from Lady Paceywell already.

Lady Maud knew her man too well to starve him and sit quite contented to play with her slight repast, while Jack demolished a slice of beef, and stood hesitating between curried pate and a boiled capon.

(To be continued.)

HAS A CORN ANY ROOTS?

Yes, and branches and stems as well. Can it be cured? Yes, by applying Putnam's Corn Extractor; it's painless, safe and invariably satisfactory. Insist on only Putnam's Extractor, 25¢ at all dealers.

ENDS ONE CITY NOISE.

Stops Racket of Cars at Intersection.

The problem of suppressing the noise and shock of the street car in passing over an intersection has been attacked in a novel manner by a Philadelphia inventor, Samuel B. Meeker, who accomplishes the object without the use of any of the moving and interlocking parts which characterize most of the inventions for this purpose, and without making any great changes in the design of the crossing itself. The latter is constructed in one piece or unit, at a point slightly in advance of the intersection of the rail sections.

Each rail section is formed with the face of the rail cut away in an incline which allows the weight of the vehicle to pass from the base of the wheel to the flange on which it continues for a few feet, until the wheels have passed entirely over the intersection, when the weight of the car again passes to the base of the wheel. This change is so gradually accomplished that it is not noticeable to the passenger and the car passes over the crossing without jolt or noise. The latter is a matter of great importance to persons living in the vicinity of such intersections, for the pounding of the cars over them at night comprises a serious annoyance.

SPRING WEATHER HARD ON BABY

The Canadian spring weather—one day mild and bright; the next raw and blustery is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house which is often over-heated and badly ventilated. He catches cold; his little stomach and bowels become disordered and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or curing colds, simple fevers, colic or any other of the many minor ailments of childhood. The Tablets are sold by medicine-dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Favorite Hymns.

A pastor in a large western city church took a vote upon the ten favorite hymns of his young people. Beginning with the one receiving the highest number of votes, the list was as follows: "Abide With Me," "Nearer, My God, to Thee," "Rock of Ages," "Lead, Kindly Light," "Jesus, Saviour, Pilot Me," "Jesus, Lover of My Soul," "How Firm a Foundation," "O Love That Will Not Let Me Go," "All Hail the Power of Jesus' Name," "My Faith Looks Up to Thee."

Canadian Red Cross in London.

Canadian women, whether in the Dominion or overseas, must feel honored by the appointment of Lady Drummond as Assistant Commissioner in England of the Canadian Red Cross Society. The post is one big with importance for Canadian soldiers and their friends and anyone who knows anything of Lady Drummond's splendid work, knows also that a woman big of heart and ability now fills the post.

Join the Ordnance Corps.

Glendora—Did you know I was an ammunition girl?
Alphone—Do you mean you make a lot of noise?
Glendora—No, I like to have arms around me.

National Flower Wanted.

Selection of a national flower for Canada will be urged upon Government and people during the coming year with great insistence, if plans approved at the convention of the Ontario Horticultural Association are carried out with anything like the enthusiasm which greeted the motions looking to plans for action in this regard.

Horticulturists do not consider that the animal emblem, the beaver, and the more recent tree emblem, the maple leaf, provide sufficient or the right sort of emblem for a country which boasts such an array of beautiful flowers. A floral emblem for Ontario is also to be sought, having regard for the pre-eminence of this province in wild flowers.

The basic requirement of each emblem to be chosen is that it must be a native wild flower. This leaves a wide field, and a lively controversy is expected.

Labor Approves Bureaus.

The establishment of bureaus of labor proposed by the Ottawa Government meets with the approval of the labor organizations there.

United Mineworkers.

Membership in the United Mineworkers now totals 428,781, of whom 8,443 are Canadians.

Fifteen Planes for Canada.

At the Hendon Airdrome Sir Edward Kemp received from Lord Londonderry, representing the air ministry, fifteen airplanes, subscribed by Canadian and overseas British residents through the Overseas Club. Seven of these were presented by friends of the club living in Canada. The club during the war has given the Government a total of 172 machines.

Sir Edward Kemp, in accepting the machines, assured the donors that Canada could be depended upon to develop the air service, both commercially and in a military sense, to as great an extent as any other part of the Empire. He mentioned that the Imperial Air Service had received over 8,000 officers from Canada, 1,200 being selected from the Canadian forces, 4,280 recruited directly in Canada, and 3,000 privates transferred from the Canadian to the Imperial Air Force.

The speech making was occasionally drowned by the noise of planes overhead doing exhibition stunts. Several officers of the two Canadian squadrons now awaiting despatch to Canada as complete units flew from Oxford to Hendon for the ceremony.

Women as Fire-rangers.

To the creditable list of occupations in which the war showed women to be efficient and faithful, may be added that of serving as observers in lookout posts on the peaks of western mountains and hills. From these lonely points of vantage watch is constantly kept for forest fires in the region roundabout. Because of the scarcity of available men during the war, this work was performed largely by women and girls, many of the latter being of High School age, who were glad of an opportunity to spend a summer vacation in the open. Usually the girls "manned" the posts in pairs, but in one instance a lone girl and her faithful dog were on duty. Whenever smoke was seen rising among the trees it was the task of the watcher to calculate the location of the fire by means of special apparatus provided for the purpose, and then communicate at once by telephone to the forest-rangers, who would hurry out prepared to fight the flames.

Reaches Front Benches.

Sir Hamar Greenwood, an expatriated Canadian, has been a member of the British House of Commons for 12 years, and by his assiduity and ability has won the Under-Secretaryship that now comes to him. As a progressively successful lawyer he should find congenial work at the Home Office, and men of all parties will welcome him to the front bench in the House of Commons.
