SIX FIREMEN KILLED. any Others are Injured-A Horror

Minneapolis June 29.—The most disastrous fire in this city in point of loss of
life since the Tribune fire in 1889, broke
out at eleven o'clock last night in the five
storey building at 240 and 242 First
avenue south, occupied by McDonald
Brothers, wholesale crockery dealers.
Six firemen were killed and many injured.
Six were taken out dead. The dead, as
far as known, are: Joseph How, pipeman;
Christian Sands, truckman; John
Horner, truckman; Walter Richardson,
lleutenant company 6; Ed. Thielan,
pipeman. Minneapolis June 29.-The most dis-

Death of the Eminent English Scientist—
An Outline of His Life.
London, June 30.—Prof. Huxley died at 3,45 pm, yesterday. The death of Prof.
Huxley was very peaceful and quiet, being perfectly in keeping with the retirement which he sought when he took up his residence near Eastbourne. Failing health first became noticeable about March ist. Bronchitis followed an attack of influensa. The lungs and kidneys were then affected, He rallied several times, but two weeks ago sustained a severe relapse, and since that time there was no hope for permanent improvement. His wife and daughter were present at his death-bed, but his son artived too late. During his dying moments Prof. Huxley displayed great fortitude and resignation. th of the Eminent English Scientis

HOUSE OF COMMONS.

Mr. Mills, on motion that the House again go into Committee of Supply, moved in amendment that "This House declares that "since 1880 the public expenditure has increased, is increasing, and ought to be diminished." The expenditure, he contended, was far out of proportion to the wealth and resources of the country. The public debt had grown from \$60,040,000 in 1887 to \$808,248,000 in the present year. The growth of taxastion had been excessive compared with the growth of population.

Mr. Daly likened the hon, gentleman to Rip Van Winkle. Some eixteen years ago the hon, gentleman had presided for a few months over the Department of the Interior, and concluded that the department had not progressed since then. The statements and arguments of the hon, gentleman contradicted the policy of the Government of which he was a member. In Ontario there were now only three Indian superintendents, whereas in the hon, gentleman's term of office there were five. In a like manner the number of other Indian officials in other provinces. on. gentleman's term of office there were five. In a like manner the number

mot soon saw that the fire was beyond control.

Help from Sister Cities.

He wired across the bay to Oakland and Alameda, and each of the sister cities sent two engines.

They were located along the water-front, and used as pumps to supply water from the bay.

The Southern Pacific pumps had lines of hose connected, and did good service in bringing salt water to supply the fast weakening fresh water mains.

A strong wind was blowing from the west, and fanned the flames across the broad streets, sweeping everything in its path.

A wall Stops the Sweep of Flames.

At 9.45 o'clock the fire was under control. The high brick wall of the destred Southern Pacific offices at Fourth and Townsend streets acted as a barrier, over which the flames could not work.

The water furnished from the Bay by the Oakland engines and Southern Pacific pumps soon had the outer edge of the fire subdued.

There hundred families are homeless though some of them managed to save a management.

Mr. Madonald (Huron) desired to continue these policies.

Mr. Macdonald (Huron) desired to con-demn the blundering administration of the Militia Department, which succeeded not only in spending money, but accom-plished no satisfactory result. He con-tended that instruction to the militia was tended that instruction to the initial was being imparted by men who were inpap-able of performing the duty. The ex-penditure on legislation, the mounted police, public works, superannuation, and immigration, and quarantine was in excess of what it was under the Mac-

kenzie regime. The House divided, and the amment was defeated by 87 to 57. Sir Richard Cartwright, on the Sir Richard Cartwright, on the item of \$1,000 for printing the year book of Canada being an increase of \$800, said the year book was a partisan publication and worthless for obtaining reliable information, He moved that the item be struckent.

was due to the great demand that was madelior extra copies of the book by school teachers and others, and the extra amount was largely for printing additional copies. Messrs. Flint, McMillan and Casey supported the motion of the hon. member for South Oxford.

Mr. Keste said that the increased veto.

Inspector of Stores.

Sir Adolphe Caron, in answer to Mr.
Mills (Bothwell), said Lieut. Col. John
Gray was appointed inspector of stores by
the order-in-Council of January 3ist, 1895.
He was appointed superintendent of
stores in August 22nd, 1893. His duties
as superintendent were to take charge of
all military stores at the headquarters of
his military district, being hald responsible for all re-sipts and issue of clothing
and stores, and for the proper discharge
of all duties assigned to the storemen and
laborers under his control, and to make
such returns as were called for from time
to time by the department. His present
salary was \$1,200. He received also lodging
allowance and \$1, per diem.

Sugar Island.

Sugar Island.

Mr. Daly, in answer to Mr. Grieve, said Sugar Island, in the Thousand Islands, about six miles east of Gananoque, was sold on July 2th, 1894, to Alexander Ferugson for \$900.

Bishop Gravel's Letter, Mr. Foster, in answer to Mr. Hughes, said the attention of the Government had not been drawn to the recently published communication of Bishop Gravel, of Nicolet. It was not the intention of the Nicolet. It was not the intention of the Canadian Government to direct the attention of the Government of Great Britain and Ireland to the communicatio, neither did the Government propose to ascertain how far Bishop Gravel, the Sacred Congregation for the Papagation of the Faith, and Cardinal Vaughan were successful in their endeavor to improperly influence the Judicial Committee of the Privy Council of Great Britain and Ireland.

Mr. Foster, in answer to Mr. Landerkin, said the amount guaranteed by Mr. Ogilvie on account of the Exchange Bank was \$100,000. No portion of that amount had been paid. The sum remaining unpaid was \$33,25, exclusive of interest. The correspondence had been placed in the hands of the Department of Justice, but it was only fair to state on Mr. Ogilvie's behalf that he entered an objection to the payment by ilmself on account of some question connected with the general distribution of receipts.

RUN INTO BY A TRAIN.

The Occupants of an Electric Car Have a Narrow Escape—One Man May Die.

The lives of thirty people were miraculously saved at Pittsburg, Pa., on Friday last only by the remarkable stop of a fast freight train on the West Penn rails, way, near the Sharpsburg bridge. Five persons were injured and one may die.

The accident was caused by the freight train striking a trolley car of the Sharpsburg and Citzens' line on a crossing. The trollay pole dropped from the wire just as the car got fairly on the West Penn rails, leaving the ear in darkness and helpless. While Conductor Lindsay was endeavoring to replace the trolley pole the train approached at full speed. There was ascamble among the passengers, and meart, ly all got out. Engineer Black, of the freight, saw the car reversed his engine, making a remarkable stop, not, however, in the first of the processing the motorman, Daniel Nolan, and four passengers were injured.

St. Louis Case.

Mr. M'Mullen called attention to the postponement of the St. Louis case in the Exchequer Court, and asked whether this had been done at the instance of the Government.

Sir Charles H. Tup — said the case had probably been adjourned to enable the judge to keep other appointments on his circuit. The counsel tor the Crown had neither requested nor obtained special fratructions in the case.

Public Buildings.

On the item of \$5,000 for the Marysville public building,
Sir Richard Cartwright enquired what he amount was intended to make provision for.

Mr Oulmet said it was towards a building that would cost about \$7,000.

Sir Richard Cartwright said there was no more useless waste of money than to stud these little "two-penny villages with public buildings." Many Others are Injured—A Morror as Minneapolis.

Minneapolis June 29.—The most disastrous fire in this city in point of loss of life since the Tribune fire in 1889, broke out at eleven o'clock last night in the five storey building, at 240 and 249 First avenue bouth, occupied by McDonald Brothers, wholesale crockery dealers. Six firemen were killed and many injured. Six were taken out dead. The dead, as far as known, are: Joseph How, pipeman; Christian Sands, truckman; John Horner, truckman; Walter Richardson, lieutenant company 6; Ed. Thielan, pipeman.

The injured: Frank Grau, Frank Egan, Capt. Caldwell, Fred Thomas. The total loss will be about \$100,000, with insurance of \$50,000.

Nothing could prevent the McDona d milding from being gutted, and the lames were bursting from the side and flames were bursting trom the sade and rear in a threatening manner.

At 11.80 just when it seemed as if the fire had been subdued, for the flames had died down, one of the side walls of the McDonald building gave way, almost without warning, and fell outward, just where there was a long line of firemen at

work.

The crowd shrieked with horror, and the other fremen turned their attention from the burning building to the ruins which covered so many of their comrades. FIRE AT TWEED.

An Outline of His Life.

London, June 30.—Prof. Huxley died at 3.45 p. m. yesterday. The death of Prof. Huxley was very peaceful and quiet, being perfectly in keeping with the retirement which he sought when he took up his residence near Eastbourne. Falling health first became noticeable about March ist. Bronchitis followed an attack of influenza. The lungs and kidneys were then affected. He railied several times, but two weeks ago sustained a severe relapse, and since that time there was no hope for permanent improvement. His wife and daughter were present at his death-bed, but his son artived too late. During his dying moments Prof. Huxley displayed great fortitude and resignation. An Outline of His Life.

Mr. Davies directed the attention of the Government to the solzures of Canadian scaling vessels in Behring Sea by the Russian authorities in 1822. He had been informed that the loss to the convers reached at least \$50,000.

Sir Charles H. Tupper said the circumstances were familiar to him and very distressing. The solzure bore heavily on the scalers, who had contravened no law. An investigation by a commission, appropriated by the Russian Government, had cleared four of the vessels, there not being sufficient evidence in their opinion to warrant the retoution of the vessels. He called the hon, gentleman's attention to the fact that whereas the expenditure upon Indians in British Columbia in 1878 was \$47,467, or \$8.74 per head, it was now only \$4.00 per head. In conclusion he liftuaryed that the cost to-day for managing the Indians in the North West and British Columbia was less than in 1878. In furnishing the Indians with implements farm instructors, and oxen the department was only carrying out the policy enunciated by the hon, gentleman himself in 1878, and the expenditure upon the Indian schools was but pursuing the suggestion of Mr. Van Koughnet, embodied in a report in 1878, and laid on the table by the hon, gentleman himself. The Occupatis of an Electric Car Have a Narrow Escape—One Man May Die.

The lives of thirty people were miraculously saved at Pittsburg, Pa., on Friday last only by the remarkable stop of a fast freight train on the West Penn railway, near the Sharpsburg bridge. Five persons were injured and one may die.

The accident was caused by the freight train striking a trolley car of the Sharpsburg and Citizens' line on a crossing. The trollay pole dropped from the wire just as the car got fairly on the West Penn rails, leaving the car in darkness and helpless. While Conductor Lindsay was endeavoring to replace the trolley pole the train approached at full speed. There was a scramble among the passengers, and nearly all got out. Engineer Black, of the freight, saw the car reversed his engine, making a remarkable stop, not, however, until the trolley car was wrecked and the motorman, Daniel Nolan, and four passengers were injured.

Rolan was terribly bruised and may pie. The four passengers were all badly bruised.

Mr. M'Mullen called attention to the postponement of the St. Louis case in the Exchequer Court, and asked whether this had been done at the instance of the Government.

Sir Charles H. Tup result the case had probably been adjourned to enable the judge to keep other appointments on his circuit. The counsel for the Crown had neither requested nor obtained special fustructions in the case.

The most grewsome place in London is not some dark cellar where thugs and murderers plan the crimes they are to do; it is a light airy chamber where are preserved the relies of the crimes that have been done—the Black Museum, stowed away at the end of many whiding passages beyond many doors hedged about by many regulations and restrictions in a little corner of the great Scotland Yard Police Headquarters. which the London police possess of the most daring and amazing murderer this century has produced. They are a letter and a post card witten to the police by "Jack the Ripper," announcing the dates of two crimes, butcheries which he had in mind. Both are written in red, and the stains on the card indicate that when he wrote it his hand was still wet with the blood of one of his miserable sacrifices. The stains are not red ink spilled—they are blood.

As one turns from contemplation of this strange leaf out of the history of crime, he is confronted by a shelf which changes the current of his thought; which quite reverses its direction. There, against a side wall, is a row of plaster heads—ghastly counterfeit presentments of criminals who have not escaped, but who, having wickedly done murder, were, in turn, themselves justly done to death. That row of heads is not a pretty sight. Spotlessly white is the plaster from which they were east, but they are horribly fit subjects for exhibition in the Black Museum.

Seven Ceath heads there are in the gristy gurden of this pine shelf—seven death heads, each tipped slightly to the right, as if they had been listening intently to the striking of some clock when petrified—an attitude in reality attributed to Jack Ketch's fashion of knotting his neckties under the left ears of the gentlemen to whom he acts as valet on one occasion only. A closer glance reveals on each cast a little dent just where il at

It is only fair to state that if there has been an improvement in the care and treatment of the insane the name of Winslow has been, perhaps, more closely associated with it than any other. Dr. Winslow's father before him was the leader in the work until his son forged his way into prominence, and there have been few reforms in the asylums of Gr. at Britain, or few advances in the science of treatment in which either the father or son has not had his influence. The father, also, was the first to force criminal law to take the mental condition of a man accused of a crime into consideration."

Despite Dr. Winslow's confident statements of belief in improvement, it is not true, however, that he thinks science has at all approached the mastery of insanity. In the first place he has little confidence in brain surgery—that new (eve opinent

In some countries the young, growing fowl are housed in a small, lightly constructed building on wheels, of a weight not too heavy for a horse to draw, and of a size to accommodate from fifty to goventy chickens. The birds are quartered in it and drawn to the field, where

they are fed once or twice in the house to accustom them to it. Then they are supplied with plenty of water and turned upon the stuble, charging them about to fresh forago as often as they seem to require new ground, to find sufficient of the fallen grain. If the house be built of half-inch matched boards, it will be found light enough to be moved easily, and will prove quite a saving in feed from year to year. During the winter months, when other important work is not pressing, time may be put to good advantage by constructing such a movable poultry house.

DOMINION DAY.

Early in the morning Main street was draped with flags and bunting and private decorations here and there added to the general gala appearance. The first event of the morning was the arrival of the trains from Westport and Brockville, The former brought anumber of visitors to Athens and the latter was crowded with excursionists, containing, besides those ticketed for this place, a large number from Brockville and the L. O. L. of Addison and their friends, bound for Westport. As the Brockville train approached the station it was noticed that an unusual ornament embossed approached the station it was now that an unusual ornament embossed the cow-catcher of the engine, and a nearer view being obtained, the or-nament was found to consist of the Mooney. As the engine swept by the crowded platform, the Superintendent's face was wreathed in smiles as he acknowledged the cheers and saluta

tions with which he was greeted. The train contained the Island City Band of Brockville and that high-class musical organization favored the Athenians with a tune while the passengers were getting off and on. The Athens band welcomed the visitors by train with a About 10.30 the Athens ba

About 10.30 the Athens baseball team and that of the Glove Works, Brockville, repaired to the ball grounds and opened their match before a fair-sized audience. The Athens team had been led to expect by Brockville representations that they were to meet a first-cla's nine, and they squared themselves for sharp work. But after the first innings they found that the visitors were althey found that the visitors were al they found that the visitors were altogether innocent of the charge of being highly skilled players, so they settled down to a go-as-you please gait, and the result was that when each had gone to bat five times Athens had a score of 14 and Brockville a lone 1. These figures discouraged the visitors and they very wisely decided not to and they very wisely decided not to continue the game. Athens team consisted of the regular battery, including Ackland, and McCaffery, Addison, Rhodes, Fisher, Lockwood, Thomas, and Leehy. Time and again it has been proven that Dr. Williams' Pink Pills cure when physicians and other medicines fail. No other medicine has such a wonderful record and no other medicine gives such undoubted proofs of the genuineness of every cure published, and this accounts for the fact that go where you will you will hear nothing but words of praise for Dr. Williams' Pink Pills. This great reputation also accounts for the fact that unscrupulous dealers here and there try to impose a bulk pill upon their customers with the claim that it "is just as good," while a host of imitators are putting up pills in packages somewhat similar in style in the hope that they will reap the reward earned by the merits of the genuine Pink Pills. Catarrh in the Head Is a dangerous disease because it is liable to result in loss of hearing or

liable to result in loss of hearing or smell, or develop into consumption. Read the following;

"My wife has been a sufferer from eatersh for the past four years and the disease had gone so far that her eyesight was affected so that for nearly a year she was unable to read for more than five minutes at a time. She suffered severe pains in the head and at times was almost distracted. About Christmas, she comdistracted. About Christmas, she commenced taking Hood's Sarsaparilla, and since that time has steadily improved. She has taken six bottles of Hood's Sarsaparilla and is on the road to a complet are. I cannot speak too highly of Hood's saparilla, and I cheerfully recommend W. H. FURSIEB, Newmarket, Ontario

The Post boasts that all but \$114 of the last year's tax rate in Sarnia has been collected. The showing is, as the Post says, a creditable one to the collector. But it is even more creditable to the town. There is both prosperity and honesty in the community which comes so near meeting the full demands of the tax gatherer as Sarnia has done. To Let.
