

The Observer.

SAIN JOHN, NOVEMBER 26, 1850.

FRIDAY.—The steam ship Angora, with the English Mail of the 19th inst., arrived on Friday last, but a brief telegraphic dispatch to the News Room is all that has yet been received of the news brought by her.

The principal item of intelligence is a report that the venerable Old Hero, the Duke of Wellington, Commander-in-Chief of the Army, was killed at San Carlos, by being thrown from his horse.

Much public excitement is stated to continue in Paris, arising out of the disagreements between the President and General Changarnier, Military Commander at Paris.

The Manchester markets were quiet, with cotton a shade lower.

The new American steamer Arctic is reported to have arrived at Liverpool, in ten days and sixteen hours from New York.

LATE FROM CALIFORNIA.—The steamer Crescent City, Capt. Stoddard, arrived at New York on Thursday last, from San Francisco, bringing 380 passengers, a large portion of them being from San Francisco, and \$1,500,000 in gold dust.

The Crescent City did not stop at Kingston, Jamaica, on her return trip, in consequence of the ravages of the cholera. Over 1500 deaths are stated to have occurred in that City in three weeks, and 600 in the interior. Capt. Stoddard consequently considered it imprudent to stop there, having a large number of passengers on board.

Extract of a letter from Kingston, Jamaica, dated Nov. 8th, received at Havana per British steamer of 19th:

I regret to state that our Island, especially our city, has been and is still suffering from the cholera. We have had over sixteen hundred deaths from Oct. 10th to 7th inst., within the city alone, and other parts of the island, but not about 600 more. I have quite suspended, and all parties at work relieving the wants of the poor and sick."

So difficult is it to procure persons to bury the dead in Jamaica, that the corpses in prison have been ordered to be dug out—receiving for reward a commutation of their sentences.

The new Captain-General of Cuba, General Don Jose De La Concha, arrived at Havana in the Spanish steamer Santa Rosa, on the 21st inst., and immediately assumed the government of the island. On Saturday he reviewed 7000 regular troops on the Passo de Tacón.

Loss of Life and Treasure.—Five persons were drowned in Chagres Bay in endeavouring to reach the steamer Pacific in an Indian canoe. Another boat captured passengers, losing baggage and eleven thousand eight hundred dollars in gold dust.

The news of the admission of California into the Union was received at San Francisco Oct. 12th, at 11 o'clock, A. M., by the steamer Oregon, through Lieut. Patterson, U. S. A., and caused a universal outbreak of enthusiasm. Joyous congratulations and expressions of affection, hurrahs and illuminations throughout the night, and had scarcely slackened when the Columbus left at 4 P. M. of the 19th.

The corporation were already making preparations to celebrate the great event by becoming honours.

MARKETS.—San Francisco, Oct. 15.—A decided improvement has taken place in trade. Sales have been heavy, and the prices of such commodities as the market is not overstocked with, improving. Money for the usual commercial transactions, can be had at about five per cent. per month.

Lumber, timber, and other articles, are abundant for freight. Coals are very dull.

PREVIOUS.—A good demand, and market better suited for all kinds.

Building Materials.—Holders of bricks not disposed to crowd them on the market. Many are holding at much better rates, believing them to be a safe article. Lime, Plaster and Cement—stock enough for nine months. These articles are abundant for freight. Coals are very dull.

Mechanics' Institute.—Last evening, Dr. Robert Baird, M. D., delivered an excellent lecture on "Scientific Agriculture." He took up some of those points which every man, whether Agricultural or not, ought to be acquainted with, and in a simple, intelligible, and satisfactory manner. The Hall was well filled. It gives us pleasure to know that the Doctor will resume the subject on an early occasion.

FREDERICK.—Although the people generally have borne the calamity with fortitude amounting almost to cheerfulness, yet without prompt and efficient aid, the suffering during the winter must be greater than we wish to dwell upon.

The Ladies' Benevolent Society are busy making up articles of clothing for the poor. For the laudable purpose, groups of friends in the City, many of whom are the first families in the City, have been assembling of a morning at the Infant School House, in which building they carry on their interesting employment.

The Hon. the Attorney General has received a requisition most numerous and respectfully signed has been addressed to the High Sheriff of the County, requesting him to call a public meeting of the Justices of the Peace for the City and vicinity, to take into consideration the best means which can be adopted to secure as far as possible the restoration of the City by buildings of brick or stone, and that the Hon. the Attorney General be requested to preside at the said meeting.

The High Sheriff has responded, complying with the requisition, and calling a public meeting of the Justices of the Peace to be held in the Court House in the City on Thursday morning, 22d inst.—Head Quarters.

The Hon. the Attorney General is of opinion that the entire loss by the fire is not short of £100,000.—It is resolved, at the Meeting on Thursday last, to petition the Legislature for loans to the amount of £100,000, to be repaid by a sinking fund of £10,000 per annum, to be raised by a tax on the property of the City, to be levied on the 1st of January next, and to be paid in three equal instalments, to wit, on the 1st of January, 1851, 1852, and 1853.

FREDERICK FIRE LOSSES.—Last week, we stated in effect that so far as the business part of the town was concerned, the late disastrous fire, of a range of better buildings than those destroyed. This assumption we consider to be substantially correct on a particular examination of the respective properties.

Commencing at Flewelling's corner, and taking the estimates of the committee who stood on Queen St., the House occupied by Mr. Flewelling was insured for £500. The next house, owned by Christ Church Corporation, is valued at £275, and was insured for £275. The next house was that of Mr. Nicholas Myles, valued at £200, and was insured for £200. The next house was that of Mr. Patrick Kilien, occupied by himself and Mrs. Kilien, valued at £100, and insured for £100. The next house was that of Mr. Nicholas Myles, valued at £200, and was insured for £200.

The next house was that of Mr. Patrick Kilien, occupied by himself and Mrs. Kilien, valued at £100, and insured for £100. The next house was that of Mr. Nicholas Myles, valued at £200, and was insured for £200. The next house was that of Mr. Patrick Kilien, occupied by himself and Mrs. Kilien, valued at £100, and insured for £100.

FRIDAY.—The New York papers give the following description of a new fabric, which has lately been patented in England:—We have examined the fabric of Messrs. Seaman & May, No. 321 Broadway, some specimens of a new fabric for winter garments, which appears to us likely to supersede the materials now in use for keeping the body warm, and protecting it from the piercing cold winds and chilling damps of our variable climate.

The fabric is composed of the fibres of animals, and is lighter, softer, finer and warmer than the material generally worn as covering to the human body. It is a perfect ideal of cloth; in beauty and comfort quite equal to the finest fabric of the East. For the use of men, it is a perfect ideal of cloth; in beauty and comfort quite equal to the finest fabric of the East.

As this material is the product of an invention which has just been patented in England, by the unusual process of an act of Parliament, the manufacture of it is still in its incipient stage, and it is not probable that it will be made in any quantity until next year, and it is not probable that it will be made in any quantity until next year, and it is not probable that it will be made in any quantity until next year.
