An old physician, retired from prac- tice, having had placed in his hafds by an East India missionary the formula of simple vegetable remedy for the speedy and permanent cure of Consumption Bronchitis, Catarrh, Asthma and al, throat and Lung Affections, also posli tive and radical cure for Nervous Da- bility and all Nervons Complaints, afte- having tested its wonderful curativer powers in thousands of cases, has fer it his duty to make it known to his suf-	 deep pails, and are of opinion that the heat of the air preceeding the thunder storms is more directly the agent in the souring of the milk than ozone that may exist in the air after the storm is passed. Carefulness to maintain a proper temperature, by closing dairy houses and cellars against the outer atmosphere, will be a means of safety. RAISE AND NOT RACE HORSES. An anonymous writer, who evidently possessed good sense, observes that it is the custom with many farmers whose horses show any degree of speed in t-otting or pacing to take them around to all the country fairs as racers, instead of putting them on the market as roadsters and getting a fancy price for them. In doing this they spend time and money on them, generally get little or no return for it. and often ruing the barses. 	buggy was completely covered with what looked like rust, but which was simply the remains of the decayed varnish. The oil had been consum- ed, leaving only a gum crombled up in burnt, crisp flakes. Some people do not take pains to wash the mud from the carriage scon enough after, using, but permit it to dry, when the mud acts like a sponge and absorbs the oil from the varnish. Som y people wash eff the carriage with soap, and we have even known hot water used. For such acts of sta- pidity there are no words to express disgust. Some people seem to rc- gard varnish as a high polish, put on by hard rubbing, and the more rubbing it ge's the brighter it ought to look. The number of people who are absolutely ignorant about varnish is comething astonish- ing. CONCENTRATED FOOD FOR PIGS. The stomach of a hog is not large	which you feel ought to be done. Let the greater advantage have precedence over the lesser. RIPE VS. GREEN CREAM. Among those who have most success- fully investigated the changes that work the ripening of cream and the develop- ment of flavor arona in butter, it is com- ing to be pretty well agreed that these processes are the work of certain or- ganisms called bacteria. It is held by some of these investigators that each distinct flavor developed in milk, butter and cheese, from ripening to decay, is the product of a distinct species of bacteria. Apl. 23 1 y.eow	 deep pails, and are of opinion that the heat of the air preceeding the thunder storms is more directly the agent in the souring of the milk than ozone that may exist in the air after the storm is passed. Carefulness to maintain a proper temperature, by closing dairy houses and cellars against the outer atmosphere, will be a means of safety. RAISE AND NOT RACE HORSES. An anonymous writer, who evidently possessed good sense, observes that it is the custom with many farmers whose horses show any degree of speed in trotting or pacing to take them around to all the country fairs as racers, instead of putting them on the market as roadsters and getting a fancy price for them. In doing this they spend time and money on them, generally get little or no return for it. and often ruins the horses. A farmer should stick to his business and let others do the racing. His business is to raise and not race horses, and whenever he gets out of his sphere he is almost certain to lo:e money. PLUCKING AND SHEARING GEESE. A curious case came befor an Eng- 	buggy was completely covered with what looked like rust, but which was simply the remains of the decayed varnish. The oil had been consum- ed, leaving only a gum crombled up in burnt, crisp flakes. Some people do not take pains to wash the mud from the carriage scon enough after using, but permit it to dry, when the mud acts like a sponge and absorbs the oil from the varnish. Som people wash off the carriage with soap, and we have even known hot water used. For such acts of stu- pidity there are no words to express disgust. Some people seem to rc- gard varnish as a high polish, put on by hard rubbing, and the more rubbing it ge's the brighter it ought to look. The number of people who are absolutely ignorant about varnish is comething astonish- ing.	which you feel ought to be done. Let the greater advantage have precedence over the lesser. RIPE VS.
