## Murder on the Veronica; A Tragedy of the Atlantic

Further Thrilling Details Told In the Court.

How the Mutineers Killed the Captain and Mate.

The Leader Shot Two of the Gang Because They Forgot the Story Concocted.

London, April 4.-Further dramatic details of the alleged murder and mutiny on the British ship Veronica were given at the Liverpool police court yesterday by the German seaman Flohr, who has turned King's evi-The prisoners are Otto Monson, Gustav Rau and William Smith, and they are charged with murdering the captain, the first and second mates and four seamen. Flohr's story, which was begun at the last sitting of the court, was thrilling in the extreme. He then described the hatching of the plot and the midnight murder of the first mate, whose body was thrown overboard, and an attack on a seaman named "Paddy" Doran. It was here that he took up the tale yesterday. He described how Rau had said that they would have to "kill them all," and then told how "Paddy," the injured seaman, crept out of his bunk and asked for a drink. Rau said, "All right, I'll give you a good drink. Harry, give me that belaying pin." The pin was handed over, and Rau at once struck "Paddy" on the head, killing him outright. His body was thrown overboard. Then Flohr detailed the attack on

the captain, who at the time was standing against the wheel. Rau and Smith approached him, the former with a revolver in one and hand an iron belaying pin in the other. Rau fired, and the captain fell forward. He was not killed, however, and managed to crawl to his cabin, where the second mate had taken refuge. Rau told Flohr to The Immigrants Are Distributed watch the captain's cabin. Three days afterwards Rau wanted a chart, and, opening the cabin skylight, spoke to the second mate. He had a revolver in his hand, ready to fire. Rau told the second mate he wanted to see the captain, and the mate replied that he was in his bunk, ill, and could not Eventually the captain came, and asked Rau "what for he shoot him." The captain said he thought everything had been going on well, but if there was anything wrong he would put everything right. "Spare my life," sengers wife and children once more. ### THE STRIKE SITUATION

Hamilton Molders Want Increase and Better Hours.

Hamilton, April 4.-It would not be a great surprise if this good town had a big strike pretty soon. The molders demand an increase of 10 per cent all round, and various conferences were held to settle the point. So far as the founders are concerned, it has been settled. They have refused point blank

to entertain the proposition. The civic laborers object strenuously to a ten-hour day, even to accommodate the teamsters. They consider the proposal a retrograde one, and talk of asking for 20 cents an hour. nine hours a day, and Saturday afternoons off, the same as in Toronto.

Walkerville, April 4.-The strikers at the Walkerville Bridge Works show signs of weakening. Three of their number resumed work yesterday morning, despite the pickets posted about the place to prevent them. Twentymen were picketed about works fearing a force of out-of-town men might be brought in. A detachment of police is still keeping surveillance over the picketers. "We don't want to employ out-of-town men if we can help it," said President McNath this morning. "The men show signs of weakening and we hope to bring them back in a few days."

> Madrid, April 4.—The rioting here was continued until a late hour last night. The public joined the mob of students in parading the street, a black flag was raised and there were cries of "Long Live the Republic," and "Death to the Minister of the Interior." The police charged with drawn sabers and fourteen students and six policemen were wounded seriously. Many others were slightly injured. The Republican party is active, hoping to take political advantage of the situation, especially if

the disorders spread. A mass meeting of the students of Madrid was held here yesterday to demand the release of their colleagues who were arrested while making a demonstration against the Minister of the Interior, Senor Maura. This led to further riotous demonstrations and collisions with the police in which several persons were wounded.

Then a Characteristic British Charge Swept the Enemy From the Forts and Streets.

London, April 4 .- The story of the capture of Kano is interestingly toid in a mailed message from Reuter's cor-

lies about midway between Zaria and The mounted infantry went in pursuit, but the fugitive horsemen fled

to the city, the gates of which were then shut and the walls manned. The local king threatened to decapitate anyone who entered his town, whereupon gun-fire was directed against the main gate, and it was partially destroyed. A storming party, under Capt. Mackenzie, forced their way through, and occupied a high rock inside the walls commanding the town. Then it was found that the king and three chiefs with their horses had been killed by a shell which pene-

trated the gates. At 8 o'clock on the morning of Feb. 3 the British force halted within 800 yards of the walls of Kano. The loopholed walls, which had been strengthened, are nearly 40 feet high and strongly held. Banners were flying in every direction, and the arrival of the columns was the signal for the opening of gun and rifle fire. The Maxims were placed in position at 400 yards rangs, and four guns were brought into action

wouldn't do it. Our country was now suffering from a plethora of endeavor to increase our national wealth, and is in danger of becoming intoxicated with national wealth. Bringing up good men and women from boys and girls was what made nations rich.

The most elementary thing the parent could do in connection with the Sunday school was to know the teacher of the boy or girl. Next parents ought to show some interest in the teacher. They should visit the school at times. They ought to invite the teacher to their homes. They should at least help the teachers by assisting the children in getting up their lessons. If the parent could, he should teach in the school.

United States Sailors in a Unique Contest.

New York, April 4.-The great tobacco chewing bee which Uncle Sam's sailors on the receiving ship Columbia, stationed at the Brooklyn navy yard, have been indulging in the last week to determine which kind of plug tobacco is best suited to the needs of a man-of-war's man, came to an end yesterday. Capt. Miller, head of the board which will place the Government's order for tobacco for the next year, is comparing the numerous ex- agents for tickets and all information, pert opinions of the jackies on the samples submitted to them. Just 523 pounds of plug were chewed and

The value of the opinions that will influence Capt. Miller and his associates in ordering the year's supply will be understood when it is stated that the aggregate order will be 225,000 to 250,000 pounds. Tobacco men always are keen to get the order of the Brook. lyn navy yard, and so when samples were called for the response was prompt and generous and consisted of 44 different brands of plug, each sample weighing 12 pounds. The en-tire assignment was dumped aboard the Columbia, and each sample was marked by a number, on which jack was to mention any criticism.

One sailor on the Columbia, who is so old that his chief vocation is telling blood curdling lies to the youngster who haven't smelt anything but salute powder, writes as follows:

"Most of this tobacco is - bad No. 17 is particularly bad; too much molasses for tobacco and not enough for griddle cakes. No. 8 has too much licorice; it is fair smoking but bad No. 1 is the best, in my udgment, and I smoked plug on the Monocacy and ought to know."

An Every-day Bulletin of Interesting Bargains in this Space from Now on.

We started business in one small store, and you see how we have grown.

We started to advertise in a small way, too, and you see how we have grown.

No standing still in such a great business as this. We have interesting news to talk about, and we must talk about it as often as possible.

For some time we have not been doing justice to our customers nor to ourselves.

Many good bargains were never mentioned in our announcements, because we hadn't room and because they appeared only every other day.

And these grand bargains were bought up so quickly without advertising that by the time the next announcement appeared the goods were gone, and only those who secured them knew anything about the sale. Disappointment, of course, to those who heard of the sale after it was over.

That was scarcely justice to the great public who patronize this satisfactory store; The audience at the evening session yet we couldn't help it, or rather we thought we couldn't help it.

> But we have arrived at a solution of the difficulty, and we believe every woman in London will clap her hands when we state that this space will be occupied every day with our bulletin of interesting bargains. It will pay you to read it every day.

Bright, fresh, interesting information about bright, fresh, interesting goods-no announcement appearing twice the same. The truth will be told about our wares, and the same old habit of avoiding even exaggeration will be strictly adhered to. What you read in this space will be strictly true.

The bulk of it comes from Southern and Eastern Europe, and the majority from Italy. The immigrants remain in the large cities, over 40 per cent of the Italians in the United States being in New York city alone. The emigration to the United States from Great Britain and Germany has fallen to insignificant proportions. In Germany it is discouraged by state policy, and the exodus from Great Britain is now directed to Canada. In the United States a few million aliens can be easily absorbed by the mass. In Canada, with her relatively small population, a great infusion of foreign blood would disturb the current of national life. Besides, the land of the United States is becoming filled up, while only the fringe of Canada's arable domain has been touched. We want first of all men who will go on the land and we are getting ideal settlers. The peopling of the Northwest is the only foundation upon which Canada can be reared to greatness.

Mr. Clergue's retirement from the managing directorship of the Soo enterprises does not mean that he has been deposed. He remains a director, and will continue to act in an advisory capacity, but will be relieved of a great deal of executive work. Company, of Berlin, were the plaintiffs, and Berlin Union, 112, Amalgamated Wodworkers' International Union of America, the defendants. The woodworkers, who were out on a "sympathetic strike," were accused of boycotting by intimidating persons who bought and sold the company's goods, and of interfering with other workmen to prevent them taking the strikers' places, or to induce them to leave the company's employment. Judge Meredith found both charges proved. The conduct of those who watched and beset the factory to intercept workmen, he describes as offensive and highly reprehensible. It was too late for the defendants to contend they were not incorporated, as they had, without objection, appeared, pleaded and consented to the interlocutory order against before authorizing the Grand Trunk to them, under the union's name. A PATHETIC LETTER.

"I had for a long time been thinking of trying the Tasteless Samaria Prescription treatment on my husband for his drinking habits, but I was afraid he would discover that I was giving him medicine, and the thought unnerved me. The dreams of love and truth;

I hesitated for nearly a week, but one day when he came home very much intoxicated and his week's salary nearly all spent, I threw off all fear and determined to make an effort to save our home from the ruin I saw coming, at all hazards. I sent for your Tasteless Samaria Prescription, and put it in his coffee as directed next morning, and watched and prayed for the result. At noon I gave him more, and also at supper. He gave him more, and also at supper. He never suspected a thing, and I then boldly kept right on giving it regularly, as I had discovered something that set every nurve in my body tingling with hope and hapiness, and I could see a bright future spread out before me a pageful happy hapiness, and I could see a bright future spread out before me—a peaceful, happy home, a share in the good things of life, an attentive, loving husband, comforts and everything else dear to a woman's heart; for my husband had told me that whisky was vile stuff, and he was taking a dislike to it. It was only too true, for before I had given him the full course he had stopped drinking altogether, but I kept on giving him the medicine till it was gone, and then sent for another lot, to have on hand if he should relapse, as he has done from promises before. He never has, and I am writing you this letter to tell you how thankful I am. I honestly believe it will cure the worst cases."

On this strange night of a strange day, nothing in the least unexpected was to be regarded as insignificant. With a quick thought of this, I did not let the crisp thing fall to the floor, but with my left hand separated it from the folds of my handkerchief, and having secured it, examined into its nature as well as I could with the unaided sense of touch. As my fingers still tested the rough edge of the paper, I became aware that the excited murmur of voices had ceased in the room. I even fancied that I had heard the opening of a door.

For a moment I waited; and as the silence remained unbroken, I told myself that Maxime de Ribaumont had gone and my chance had come at last. Then followed a few seconds of indecision, while I debated the wisdom of lingering in the hope of a further explanation with Juliette; by the time one could have counted twelve, however, I had made up my mind to run no more risks of delay, but to get out

A most wonderful discovery for the cure of Varicocele and Stricture, without pain, the use of the knife or loss of time has been made by Dr. Goldberg, of Detroit, Mich. For years the doctor has given patient study to the treatment of these diseases, and he guarantees his Latest Method Treatment a positive cure. The treatment consists of a combination of drugs, which removes all traces of the Stricture, while in Varicocele it equalizes circulation, thereby restoring the parts to their natural condition and at the same time strengthens the organs, stops in nervousness, backache, smarting sensations and unnatural dicharges.

It is also a guaranteed cure for weak men, and if he accepts your case for treatment you can pay when cured; this is certainly a fair proposition, as you need pay nothing until a complete cure has been made. Unless the doctor was certain that his Latest Method Treatment was a positive cure he could not make this offer.

SOFT COAL RATES TO ADVANCE.

The Illinois and Indiana coal roads will advance soft coal rates to Chicago 10 cents a ton on April 1, the contention being that this is merely a restoration of the old tariff. It is said that the higher rate is made necessary by the general advance in wages and the increased cost of operation. While an advance of 10 cents a ton does not look large, yet it means an increase in the revenues of the roads of many thousands of dollars. The Chicago and Eastern Illinois, during the months of November, December and January, carried 1,565,056 tons of coal, which at 10 cents a ton means \$156,565. ment was a positive cure he could not make this offer.

#### Matrimonial Happiness.

Lately I have heard a great deal of discussion on the money question in regard to matrimony. Young people and men almost invariably say: "Marry when you are young and poor, and you will be much happier than if you wait for age and riches." A very distinguished man of my acquaintance who has gained fame and wealth, but is still a bachelor, said to me the other day, "In studying biography, which, as you know, is a hobby of mine, I have been struck by the fact that almost all really great men have married while they were very young, and very poor and have worked their way up together. I am too selfish and "set" now to marry, but I often wish I had done likewise. provided, of course, I had been able to reserve fund, but the most important months. The question now is to save get the right kind of a girl."

Married women of years, on the contrary, almost invariably say, "Marry for money, for position. Love is all parlor with its little frills, and the others it will be a source of constant right. I married for love myself, but -money is indispensable," and so it goes. Just today I heard a man say, "I With this I include a grop-leaf table have often considered the question of fitted with drawers, apple parer, rotary starting life, with another, on a meager meat chopper, patent flour and sifting income, but I am not brave enough; an arrangement for broiling chops on yet so many people do it and are fair- a griddle connected with a gas cock. ly happy. helps. It almost always cures.

"Three years ago," writes Mrs. John Graham, of 2018 Plumb Street, (Frankford) Philadelphia, Pa., "I had a very bad attack of dropsy which left me with heart trouble, and also a very weak back. At times I was so bad that I did not know what to do with myself. My children advised me to take your 'Favorite Prescription,' but I had been taking so much medicine from the doctor that I was discouraged with everything. I came to Philadelphia two years ago, and picking up one of your little books one day began to read what your medicine had done for others, I determined to try it myself. I took seven bottles, and to-day I am a strong, well woman, weighing 162 pounds. Have gained 29 pounds since I started to use 'Favorite Prescription.'

I stood in the doorway and looked about me. Instantly I espied Miss Pyle, waltzing with a fellow who obviously could never make any woman Toronto, Sept. 10, 1902. happy. The stewards marked me down, nodded, and were fairly humble.

The waltz came to an end. Miss Pyle promenaded the room with her partner. I carefully avoided her gaze. "Here you are then!" said Mrs. Beechwood's voice in my ear. "Agatha -Miss Pyle-here?" "Yes," said I. "I haven't spoken to her yet."

"Has she seen you, do you think?"
"I'm sure she hasn't," said I. "You've been watching her pretty closely, then."

I denied this. I explained that I had purposely evaded meeting Miss Pyle's eyes. But women do not seem to understand that a man of the world can keep whom he will under close observation without betraying the fact to his quarry. Mrs. Beechwood laughed, and left me to join Miss Pyle. I turned to moot the question of a whisky and soda with Beechwood, but, he, too, had disappeared. It was a bit dull. An hour passed and still Miss Pyle had not seen me, though once or twice we were almost face to face. Or was it that she fought against fostering a hopeless passion by intercourse with its object? I would gladly have bestowed myself on another partner for the evening and kindly killed poor Miss Pyle that way; but the absurd preponderance of men

continued. At last I could stand it no longer Obeying a signal from Mrs. Beechwood, who was sitting out, I marched across the room and joined her. As I reached her side Miss Pyle appeared, emerging from the shelter of some hangings close by. She blushed at sight of me. For a brief space the very soul of the wo-man semed to look out of her eyes. Then she recovered herself.

"I'll leave you two together, if you don't mind," said Mrs. Beechwood, rising. "I can see Archie making to-wards the bar again." She turned to me. "You won't seem so dreadfully out of it now, Mr. Gill, with the prettiest girl in the room to amuse,' she said.

She tripped away with a smile and a backward glance. It seemed to me she was not acting wisely. "Please," said Miss Pyle, "don't let me keep you." She was in a flutter. Her breathing was spasmodic. Her

Her cheek had a velvety downiness that was alluring. I had ample opportunity to study it for she showed me only her "Do you often come to these dances?"

I inquired. "I shall never come to another," she said passionately. I understood.
"The people are rather nice, though.

An Anti-Bellum Wedding Feast. A Virginia preacher who had the good fortune to be born in the good old days in the family. You are at liberty to writes to a local paper of the old-time writes to a local paper of the old-time wedding. He begins with the observation that "to get married, jump on the train and start to Kalamazoo or somewhere else, and not a mouthful to eat, is a rather dry affair to a boy, and is not very moist for anybody." He then describes an old-fashioned wedding supper in this fashion:

fashion:
"Let me tell you about it—that supper when Miss Nancy got married! The table was about twenty-five feet long; it stood in the hall of the big house,' which was about 40x60 feet. About the center of that about 40x60 feet. About the center of that table, in a large game dish, was a pig, cooked whole, with an apple in his mouth. Near each end of the table was a large turkey. You see the meat. don't you Midway between the pig and the turkey were two large pound cakes, gaudily mbossed with the name 'Nancy' on one of them and 'Ell' on the other.

bossed with the name 'Nancy' on one of them and 'Eli' on the other.

"Near the center and near each end of the table were stacks of butter eighteen inches high, curled and frizzled in the most approved style. Do you get your eyes on that butter? There were smaller cakes, fruits and confections in abundance. We do not know about boiled and eyes on that butter? There were smaller cakes, fruits and confections in abundance. We do not know about boiled custard in our settlement, and over on a side table was about three gallons of syllabub. Do you see that syllabub? They said that it would keep the cake from making us sick. Perhaps it did; at least, I do not remember that any of us were sick when Miss Nancy got married." Alas for the modern Eli and Nancy! The golden event of their lives is not celebrated in this old-fashioned way. The pride and pomp and circumstances of pride and pomp and circumstances of wedding is marked by music and flowers and fine clothes and a journey among and fine clothes and a journey among strangers, or a sojourn in unsympathetic hotels, where the cold cash voice is the only one needed. The old-time wedding supper in the fine old southern home has passed into the golden and unreturning yesterday, along with the warmth and heartiness and hospitality and fraternity and fine courtesy which characterized the old south, the memory of which lingers like a dream, and which is to those who knew it a lost Eden.—Nashville American.

### THE NEW CHILD'S MISFORTUNE

Fed on Sterilized Facts from the Day of Its Birth.

Poor, Bankrupt Babyhood Robbed of Fond Fancies and Pleasing Illusions - A Pathetic Spectacle.

The general public is in the way of expending a great deal of sympathy on the children of the society woman and the new woman. People picture the society woman as gayly automobiling forth in search of pleasure, away from the touch of sticky little fingers and out of hearing of the baby's colic, while in their prophetic souls they see the new woman hurrying through dinner with her bonnet on, making a grab at her pocket to see that her latch key is safe, and going serenely out to spend an evening at her club, lecturing before an admiring audience of similar women on "A Mother's Highest Duty."

Never was pity more wasted. The child that really calls for a rising vote of sympathy is the unfortunate little prig whose conscientious mother has felt it her duty to rob him of his childhood. The society woman's and the new woman's children may be occafield that it allowed to lie fallow awhile and the one that is overcultivated the advantage is always with the one that has not known the plowshare when the reckoning of the final harvest is in. and the worst part of it all is that it illusions left. Every day you hear mothers boast that their children never spoke a word of baby talk. Good gracious! They had just as well been born grown up and voting. Was there ever any poetry sweeter than Aldrich's "Baby who said a "few sweet words whose meaning lay beyond our reach?" Alas, now Baby Bell would have addressed us in faultless English, and we should reply in the same manner, and we had just as well be at a dinner party as hanging over the cradle. When you want to hear anybody sing "Ootchy, kootchy, gooly-goo, bless him little heart ems" now you go to the vaudeville show and not to the nursery.

No conscientious mother who attends "mothers' classes," where old maids teach mothers how to raise their children, would dare to be guilty of such a thing. She would be afraid she was imparting inaccurate information or corrupting the child's grammar, or giving it erroneous ideas of natural history. It is really immoral, you know, to tell a child that the cow jumped over the moon. Isn't it, in all seriousness, a strange

idea that it is a desirable thing to do away with childhood? Is the burden of life so light that we should be in haste to lay it upon young shoulders not yet strong enough to bear it? Why

The door was open and Olmstead could see straight down the path to a little summer house at the end. Several times he thought he saw the flutter of a dress behind the lattice, and this thought was confirmed as a girl came out with a basket on her arm, heaped with late roses.

It was Miss Salne: But how did she get there? He had heard her go up.

"But why not tell father—and Sallie on his cheeks.

"I was mad, I think," he said, "to ask her. But I want—her—. Perhaps when I come again you'll let me have her." His last words, low in their humility, were addressed to Miss Sallie.

"Indeed we will, Don, dear," she said, and then with a look at Olmstead she slipped out through the big door to the porch.

He followed her and they walked back and forth in the darkness.

"What do you think of us" said Miss Sallie. The pale moon shone on her uplifted face.

It was Miss Salue! But how did she get there? He had heard her go upstairs, her high heels tapping the polished steps, and she could not have come down without his knowledge. She had changed her dress, too, and wore a faded blue cotton, simple and

Surely she had worn blue! Surely-his head whirled. "You can come and see father," she said. Then she looked at him curious-

ly as he stood and stared. "What's the matter?" she asked, her blushes pinker than her dress.

"No, Don, no," she said.

"Sallie, Sallie!" the wall came from across the gallery where the tairway led to the floor below. On the top step stood the other twin, a candle held high above her head. Over her white gown wandered down the rose-bordered walk, drifted long, pink ribbons; one tremand saw across the sky the first line of bling hand grasped the railing. Then she went swiftly down the steps.

Aerial Smallpox Infection.

Infection and contagion by air currents, wind and breeze, in the case of smallpox and other infectious diseases, are not ordinarily deemed likely; but a report just made by the English Government Board goes far to justify the popular impression on the subject. The London metropolitan asylum board, which has charge of hospitals, put its smallpox cases on three ships moored in the "Long Reach" of the Thames, close to the Kent shore. On one side were only marshes, on the other was the river, one-half a mile wide, and a half mile beyond Purfleet, a village of 600 inhabitants, with a rural region around, the "Orsett Union," with some 30,000

population.

In the ten months, Sept. 1, 1901, to June, 1902, while the hulks with their smallpox patients were moored a mile and more away, in the track of prevailing winds, away, in the track of prevailing winds, there were 533 persons attacked with the disease, or 18.5 per 1,000. The worst district in London, Holborn, had but 7.2 to the 1,000. In Purfleet, nearest the ships, 53 out of 600 had smallpox. Pretty much everyone had this malady who was not protected by vaccination. As Dr. G. S. Buchanan, the physician in the case, points out in his report, this agrees exactly with the report made by Mr. Power, the chief officer of the metropolitan board, twenty years ago. He showed that the presence of smallpox patients in a hospital was followed by a steady and invariable increase of cases within a circle of a mile and a half mile, the greater the nearer, in the neighborhood. These cases were he claimed, due to "aerial convection." When the hospitals with their cases with their cases were removed from a built-up region, the cases ceased in the neighborhood.—Philadelphia Press.

Mr. H. M. E. Evans, of the Winnipeg Telegram, has kindly consented to judge the advertisements and award prizes.

All advertisements that fail to win a prize, but which are good enough to be accepted for publication will be paid for at the rate of \$1.00 each.

Unless expressly requested to the contrary, we will consider ourselves at liberty to publish the names of prize winners.

A good advertisement should be truthful and contain an idea brightly and forcibly expressed. A bona fide signed letter with address and date from one who has tested the tea, is a good form. An advertisement for an article of food should not associate with it, even by contrast, any unpleasant idea. The best advertisement is the one that will induce the most people to try the article advertised.

According to Bulletin No. 84, issued by the Department of Inland Revenue, at Ottawa, it has been proven that oatmeal co\_tains more energy, more fat, more heat, more nourishment, less waste, greater digestibility than any other food.

The report proves a large difference between, for instance, Tillson's Pan-Dried Oats, ready-tocook-served hot, and coldserved fads, supposed to be "predigested" and called by name in the report.

Tillson's Oats, Pan-Dried, is therein scientifically proven a food, not a fac.

J. B. Dignam was born at London, Ont. From infancy, until he reached his sixteenth year, his nurses and school teachers must have been the objects of his sharp raillery, just as are the advertising men of the country today. Though but a mere youth, at the age of 16, he acquired a half interest in the Canadian Wheelman, acting in the capacity of its business manager. This was the first cycle paper published in Canada. It is possible that Mr. Dignam may have been its first "wheel crank" also. From the Canadian Wheelman he drifted to the advertising department of the Toronto Globe, and later became sporting editor of the London (Ont.) Advertiser. It was in 1896 that Chicago and J. B. Dignam became acquainted with each other. Chicago was then forging ahead as a great advertising center, and Mr. Dignam, finding advertising to be his forte, naturally came to Chicago in a puller. Then the Nelson Chesman Advertising Agency secured his services, and he remained with this firm for two years. During his connection with the agency, he started and edited Tips on Advertising, his first attempt at trade journalism. That he was the blood and brains of this journal is shown by its disappearance, after he had ceased his connection with the agency. Beginning with the new year of 1901, Mr. Dignam entered upon his work as manager of Home Life, Chicago. There he still remains. During the short fifteen months of his connection with this paper, he has made its advertising columns so popular that but few mail-order advertisers are not represented therein. Mr. Dignam not only manages this valuable property, but looks after the advertising, and in addition, edits the paper. His exceptional ability and discrimi-

nating judgment, as to what will appeal to the readers of Home Life in the way of reading matter, have raised sonality. "I have had the best of results from the use of Peruna for a case of indigestion of long standing. My stomach had been weak ever since I was a child and the trouble soon developed into indigestion. I had to be careful of everything I ate and soon I could eat nothing which did not distress my stomach. My friends advised Peruna and I purchased a bottle and commenced to use it, little thinking at the time that I was soon to be in perfect health and rid of my stomach trouble, but this actually occurred in three months' treatment. Peruna. Of course they are. Why should they not? Peruna is the remedy that cured them. If they have a cold, Peruna cures them. They found that out by experience. If they are hoarse or have a cough, they find Peruna an unfailing remedy. Weak lungs and even the first stages of consumption, Peruna promptly restores, and then there are a host of women who have a slight derangement of the stomach and digestive organs. All these derangements are of a catarrhal nature. Peruna comes to the rescue at once. A very short course of Peruna is sufficient to put the stomach right and to make the assimilation of the food

MISS ELIZABETH BROWN.

But this is not all. This does not exactly explain why the women especially are talking about Peruna. Men, the same as women, have found Peruna useful in the above mentioned ailments. The reason that Peruna is such a special favorite with women is something more than all this.

Women are subject to pelvic catarrh. This condition has been called all sorts of names and is often referred to under the general phase, female diseases. Peruna cures these cases. Peruna cures them because it cures catarrh wherever located. The nature of most of these ailments is catarrhal.

Catarrh is liable to attack any organ of the body. It is especially liable to attack one or more organs of the female pelvis. No wonder women talk about Peruna. No wonder they think it is the greatest medicine in the world.

Mrs. M. F. Jones, of Burning Springs, Ky., writes as follows:

"We have been using Peruna for some time and have no hesitancy in recommending it for the 'one thousand and one' ailments of humanity. No family should ever be without it for it is an unfailing cure for colds, and it is an excellent remedy to prevent and relieve

"And to speak from a standpoint of experience I can candidly say that it is the remedy for female weakness (as I am one of the many unfortunates in this respect). From a personal test and from the testimony of many others I shall not hesitate to recommend it, especially to all suffering women.

Local professionals picked up some wheat around the low point. The general tone was draggy, with a downward tendency. We believe the deferred futures are a sale on any hard spots

hard spots.

Corn—There was a slow and draggy market in corn, the May and July fractionally off, while the September held well to yesterday's figures. The large shipments from Argentina were despairing factors, and all the probabilities that corn shipments from that country will grow larger, and that with the increase the European shipments from this country will show a corresponding falling off.

## THE TWO EXTREMES

About the time children begin to go to school they are liable to be confronted with one of two extremes -they may either grow too fast or not grow fast enough. In the former case nature makes unusual demands upon bone and blood; vital organs are overtaxed and growth continues out of proportion to their age. Here is where Scott's Emulsion finds scope for its best workings.

It nourishes the bones—the hypophosphites of lime and soda does this; it feeds and enriches the blood this through the pure cod liver oil; it strengthens the whole system, providing firm, healthy flesh and fortifying the tissues so that they are better able to stand the extra strain upon them.

When a child is not growing as it should undersize, underweight, there will be found in Scott's Emulsion the very elements needed to aid in proper development.

Bone food for the bones, blood food for the blood, tissue food for the tissues—that is how Scott's Emulsion provides for each demand of the body.

We'll send you a sample free upon request.

Chartered Under the Laws of Ontario, and Operating Western Ont. Oil This company has acquired since February 1,085 acres additional of proven oil lands, including 500 at Thamesville, 360 in the Wheatley district and 225 more in the Raleigh oil field, and is now drilling on the Thamesville and Raleigh properties, adjoining three new good wells just brought in. These additions to the company's helding gives it a total.

Increase of 70 Per Cent in Assets. It has now three drilling rigs running on its properties, and recently purchased and installed the finest drilling equipment in Western Ontario, which is now running day and night on the Thamesville property. This company has paid dividends at the rate of 12 per cent per annum on par continuously since its inception, thus netting the investor 24 per cent return; and in view of its rapid properties.

gress and substantial increase in assets, it has been decided to advance the price of stock to 60 cents per share, a very conservative advance, being an Increase of Only 20 Per Cent in Price.

Mr. D. C. Woodward, son of the president, recently discovered some new petroleum deposits of large extent in Albert, and the president starts to acquire these properties for the Dominion Oil Company in the course of a few days. He has recently been solicited to return to Borneo and manage the \$2,500,000 refinery that he erected there five years ago for the Shell Transportation Company of England, but so highly does he esteem the possibilities of these new deposits that he has declined the Shell Company's offer.

has declined the Shell Company's offer.

As ordinary coal oil retails at 38c a gallon in that country, owing to the heavy import duties and freight tariffs, and as there is a great demand for illuminating oil in the Northwest, through the newness of the country, there being practically no electric light or gasworks, this company will find a ready market for its product at large profits by the installation of a refinery which the company purposes erecting after it has developed the production. From the analysis made of this product by President Woodward, this oil is proved to be of great value also as a lubricant, to such an extent that the farmers have been using it for lubricating

their harvesting machinery and wagons.

President Woodward's experience of 35 years as one of the foremost oil operators and refined of Western Ontario, erecting and operating some of the leading refineries, and subsequently the management of large operations for English companies in Borneo and Russia, particularly quality him for this new exploration and construction of a refinery in the great Northwest. In consequence of the tion and construction of a refinery in the great Northwest. In consequence of the great value of President Woodward's active services to the company, it was deemed advisable at a meeting of the board of directors, held March 25, to insure Mr. Woodward's life for \$20,000 in favor of the company, in the Mutual Life Insurance Company of New York, which has now been done. Company of New York which has now been done. THE INTERNATIONAL MATCH. New York, April 3. - The eighth annual international class match between America and Great Britain for possession of the Newnes challenge trophy, ten players on each side, was begun today and will be finished tomorrow. America has won the trophy four times, Great Britain twice, and one match ended in a tie. With the exception of the first match in 1896, when eight players were engaged on each side, the contests have been fought on ten boards. Sixty-eight games in all have been played so far, of which the Americans won 36 and the British players 32. The American end of the match is played at the Academy of Music, Brooklyn, under the auspices of the Brooklyn Chess Club, and the London end under the auspices of the City of London

THE LONDON END OF IT. London, April 3. - A fair-sized crowd was present today at the opening, in the Cannon Street, Hotel, of the eighth annual international chess match, between America and Great Britain, for the Newnes challenge trophy, George Newnes, who superintended the arrangements, said: "We have a good, representative team. The alterations from last year strengthen us, though Burns' inability to play in America is a considerable loss. We look forward to a close contest."

THE BENNINGS MEET.

Washington, D. C., April 3 .- Charming weather and a good card attracted the banner crowd of the meeting thus far to the races at Bennings today. The track was in fine condition, although a trifle lumpy. Not a single favorite won, and five out of the six favorites were unplaced. The last race was the contest of the day. For nearly a mile Sir Florian, with T. Burns up, and H. L. Coleman, ridden by Redfern, ran side by side. As they neared the wire Burns stalled off Redfern's final effort on the favorite, and sented by a trio of 3-year-olds, Thessacarried Sir Florian over the winner by a scant half length.

First race, for 3-year-olds and up. 6 furlongs-Mrs. Frank Foster, 101 (Redfern), 4 to 1, 1; Dr. Saylor, 101 Burns), 2 to 1 and 4 to 5, 2; Pageant, 101 (Hicks), 8 to 1, 3. Time, 1:14 2-5. MR. DYMENT'S HORSES. Mr. N. Dyment, the well-known horse owner of Barrie, will not move his horses to Toronto until the first week in May. He has a mile track at Barrie, which is the equal of any private training course in America.

Mr. Dyment is not any too sanguine about his stable's chances for the King's plate, in which race he is reprelon, Nesto, and Florenza. Thessalon, who is held at 8 to 1, second choice, in the future books, showed a fine turn of speed at Woodbine last spring, when he was beaten a head by Ayrshire Lad in a province-bred race, but since then he has been very ill with blood-poisoning, which developed at Hamilton. Nesto broke down last year, but both he and Thessalon are now taking slow gallops.

Florenza has never been tried. The other horses in the string are dowell. They include Bellcourt, a.: Lady Berkeley, 5; Easy Street, 4; Amahaga, 4; Lorne, 3; Will Shields, 3; George Perry, 3; The Globe, 2; Sapper 2, and The World. 2.

JOCKEY LENDRUM'S STABLE. Jockey "Bob" Lendrum, who rode the favorite Fly-in-Amber last year into second place in the King's plate race, and who is now a full-fledged trainer, corps of assistants on his staff, has, by the irony of fate, two 1,000 to 1 King's platers in his stable, viz., Pete Sixth race, selling, 1 mile and 100 yards—Sir Florian, 107 (T. GOES TO BUFFALO. Toronto, April 3.—Manager Stallings' claim that Infielder McCloskey, who reported here on Tuesday, belongs to the Buffalo club, was evidently considered correct by the magnates at the Eastern League meeting in New York, as yes-terday the player received the follow-ing telegram from President P. T. Pow-

"You have been awarded to the Buffalo club. Report at once." McCloskey was greatly surprised, and considerably chagrined over the mat-ter, as he had expected that he would allowed to stay with Toronto, and had made his plans accordingly. Last night he said that, despite the league mandate, he would not go to Buffalo. "If I play in the Eastern League at all it will be here.
