	Fair.	Fair and Frosty.

**OBSERVATIONS.**—The nearer the time of the Moon's changes, first quarter, full and last quarter, are to midnight, the fairer will the weather be during the seven days following.

2. The next space of this calculation occupies from ten at night till two next morning.

3. The nearer to mid-day or noon the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space of this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the Summer, though they affect Spring and Autumn nearly in the same ratio.

5. The Moon's change, first quarter, full and last quarter, happening during six of the afternoon hours (i. e. from four to ten) may be followed by fair weather; but this is mostly dependent on the wind as is noted in the table.
