Features of this by which may be bibliographically unique, which may be bibliographically unique, which may alter any of the images in the approduction, or which may significantly change he usual method of filming, are checked below.			qu'il de ce point une i mod	L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.						

The copy filmed here has been reproduced thanks to the generosity of:

Library of Congress
Photoduplication Service

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library of Congress
Photoduplication Service

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires original a dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'Impression ou d'illustration et en terminant par la dernière page qui comporte une teile empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, at de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

AYSIDE

FLOWERS

SERIES I. BEING A DESCRIPTION OF AMERICAN WILD FLOWERS THAT BLOOM IN APRIL, MAY, AND EARLY JUNE & &

TABER-PRANG ART CO-BOSTON & SPRINGFIELD, MASS.

COPYPIGHT 1899-BYTABER PRANGAPT CO. BOSTON, U.S.A.

July 13.99.

WAYSIDE FLOWERS.

PREFACE, SERIES I.

HE division of a popular work on wild flowers into four sections, which are designated by special seasons, is a practical and simple method of sorting out the flowers according to the

way of Nature, without troubling one with the complex system of the botanist. It is a useful sort of classification, because, to one who chafes at the delay necessarily attending the search for a flower's family name among the records in a manual of botany, the advantage of having a picture of the flower directly connected with the time of its appearance, it must be acknowledged, is immeasurably great.

For those, however, who prefer to find a flower properly placed among its family relations, I have provided a classified index, which includes some very important definitions and a nomenclature according to Dr. Asa Gray. Each of the four series is a complete book in itself, that is, of far as it goes; and with "Gray's Manual" in hand is will be found that the series cover a well-trodden path through the garden of Nature, which will materially aid one in pursuing investigations beyond the limitations of the wayside.

Although I have drawn many of the commoner flowers, I have not neglected those interesting ones which are less common; here and there I have introduced an unfamiliar character with the hope of stim-

ulating an interest in a search for those rarer flowers which frequently nestle beside characters thoroughly well known.

It is not possible for anyone to make a choice of one hundred familiar wild flowers, which might correspond with our preconceived ideas of what is most representative. What is common to one person is uncommon to another; and with about four hundred flowers to choose from, it is not likely that the selections of any two persons would bear a close resemblance. My choice, therefore, has been largely directed toward the proper recognition of the most interesting flower families, and the members of these families have posed for their pictures in the most natural attitudes.

Each flower or leaf is drawn just as it grew, without the slightest deference to a standard type, or a general average, or anything else of the kind. A thoroughbred Yankee is not lacking in distinctive qualities; it is not necessary that he should look like "Uncle Sam." An Iris is an Iris, yet there are no two exactly alike; we do not want to be forever furnished with representative Irises; we want a chance to see the differences.

A careful study of the wild flowers brings one to a realization of the fact that Nature's handiwork is infinite; she is not content with senseless duplica-

F. SCHUYLER MATHEWS.

Series 1. Liverwort, Hepatica. Hepática triloba. Mayflower, Trailing Arbu

Liverwort, Hepatica.

Hepática triloba.

RANUNCULACEÆ, Crowfoot. Family

Lilac-white, or pale purple.

Blooms . April, early May.
Environment, Woods, and woody pasture-land.

Height . 3 ins. to 4 ins.
Habitat . Common. Me. to Minn. and Mo., and northward.

Character: Leaves thin, hairy, leathery, almost evergreen, appearing later than the flowers; one of the earliest spring flowers.

Mayflower, Trailing Arbutus.

. Epigàa rèpens.

ERICACEÆ. Heath. Family . .

White, waxy, pink-tinged, lighter or deeper.

April-May. Blooms

Woodland openings, rocky soil, hill-Environment,

sides.

layflower, Trailing Arbu

Height . . 3 ins. to 4 ins.

Habitat . . Me. to Minn., south to Fla. and Ky.

Character: Very fragrant. Thick-leaved, rusty stemmed, trailing over the ground; flowers immediately succeeding snow.

Series 1.

Marsh Marigold (wrongly called Cowslip).

Cáltha palústris.

. . RANUNCULACEÆ, Crowfoot.

Color . . . Golden, shining yellow.

Blooms . . April-May.

Environment, In wet meadows, beside brooks, on

marshy ground.

Height . . 8 ins. to 1 ft., rarely 2 ft. Habitat . . Common northward.

Character: A thick-leaved stocky plant, with a buttercuplike flower.

Dutchman's Breeches.

Dicentra Cucullària.

FUMARIACEÆ. Fumitory. White, cream-yellow tipped.

April-May. Blooms . .

Environment, Rich woods, shaded rocky slopes.

Height . . 7 ins. to 10 ins.
Habitat . . New York westward, common.

Character: Delicate, slender, ornamental leaved; flower with two spurs.

Adder's Tongue, Dog's-Tooth Violet.

Erythronium Americanum.

Family . LILIACE Æ. Lily.

Color . . . Light and deeper dull yellow.

Blooms . . April-May.

Environment, Rich ground, borders of moist woodlands.

Height . . 5 ins. to 7 ins.

Habitat . . Me. to Fla., west to Minn. and Ark. Character: Leaves often mottled with purple,

or green-white.

Bloodroot.

Sanguinària Canadénsis.

PAPAVERACEÆ. Poppy.

White, yellow anthers. Color .

April-May. Blooms . .

Open, rich woods, borders of meadows, Environment,

roadsides.

Height . . 8 ins. to 10 ins.

Habitat . . Common.

Goldthread. Coptis trifolia. Character: Stems with acrid, orange juice. Flower opens before the leaves reach maturity; the latter early curl over the buds which later

outgrow the leaves.

Goldthread.

Cóptis trifòlia.

Family . . RANUNCULACEÆ, Crowfoot.

Color . . . White.

Blooms . . May.

Environment, Bogs, and moist woodlands.

Height . . 3 ins. to 5 ins.

Habitat . . Common northward, south along the

mts. to Md., west to Iowa.

Character: Bright, shiny, evergreen, dark-green leaf; rootlets bright yellow.

False Solomon's Seal.

Smilacena stellàta.

. LILIACEÆ, Lily. Family .

Color . . . White.

Blooms . . May, early June.

Environment, Moist banks, edges of copses, borders

of damp woods.

Height . . 8 ins. to 1 ft. Habitat . . Me. to N. J., west to East Kan. and Minn., and westward.

Character: Pale, smooth, bluish green leaves; berries blackish.

Star Flower.

Trientàlis Americana.

PRIMULACEÆ, Primrose. Family . .

White. Color . . .

May. Blooms . .

Environment, Damp, cold woods.

Height . .

3 ins. to 5 ins.
Me. to Minn., south to northern Ind.,
and mts. of Va. Habitat . .

Character: Leaf light green, thin; flower starpointed.

Painted Trillium.

Trillium erythrocarpum.

Family . . LILIACEÆ, Lily.
Color . . White, petal angularly marked with crimson.

Blooms . . A pril-May.
Environment, Cold damp woods, and bogs.

Height . . 9 ins. to 1 ft.

Habitat . . Me. to Ga., west to Wisc. and Mo.

Character: Leaves taper-pointed; flower and leaves wavy.

Wake-Robin, Birthroot.

Trillium erectum.

LILIACE Æ, Lily.
Dull brownish red, often pinkish or

whitish.

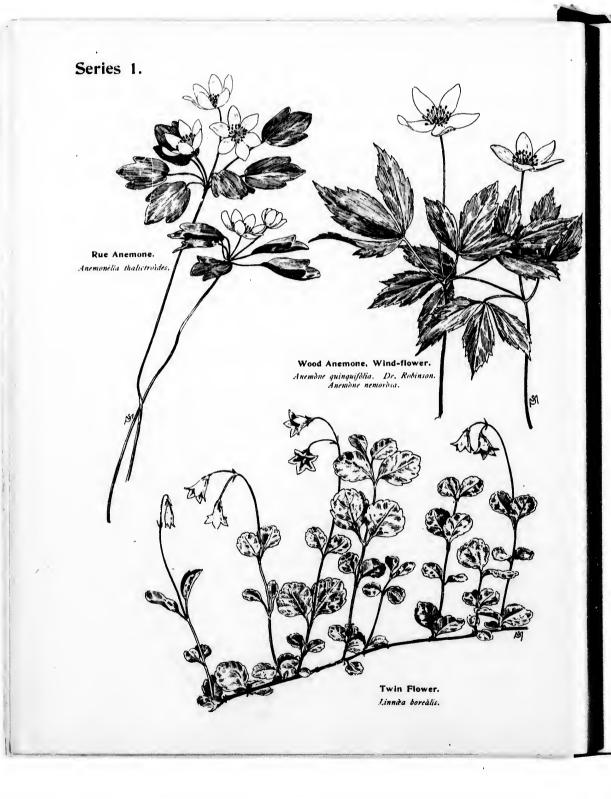

Blooms . . April-May. Environment, Rich woods.

Height . . 7 ins. to 10 ins.

Habitat . . Me. to N. C., west to Minn. and Mo.

Character: Flowers variable in color, ill-scented;

leaves broadly round, pointed.

Rue Anemone.

Anemonella thalictroides.

Family . . RANUNCULACEÆ, Crowfoot.

Color . . . White, rarely pink-tinged. Blooms . . April-May.

Blooms . April-May.

Environment, Woodlands.

Height . . 3 ins. to 5 ins.

Habitat . . Common northward.

Character: 5 to 10 white sepals, several flowers, blooms in company with A. nemerèsa.

Wood Anemone, Wind-flower.

Anemone quinquifolia. Dr. Robinson. Anemone nemorosa.

Family . . RANUNCULACEÆ, Crowfoot. Color . . . White, rarely outer surface of sepals

Color . . . White, rarely outer surface of sep purplish.

Blooms . . April-May.

Environment, Woodlands, margins of woods.

Height : . 4 ins. to 10 ins.
Habitat . . Common northward.

Character: 4 to 7 white sepals, bearing a single short-stemmed flower; plant-stem perfectly simple.

Twin Flower.

Linnàa boreàlis.

Family . . CAPRIFOLIACEÆ, Honeysuckle.

Color . . . Pink of a crimson tone delicately

graded to white.

Blooms . . Late May-early June.

Environment, Moist, mossy woodlands.

Height . . 3 ins. to 4 ins.

Habitat . . Me. to N. J. and mts. of Md., west

to Minn., and extreme north.

Character: Delicately fragrant nodding flower; a vine.

Bellwort.

Oakesia sessilifòlia.

LILIACEÆ, Lily.

Yellowish, or cream color, sometimes slightly greenish.

April-May.

Environment, Low woods, margins of woodlands. Height . . 8 ins. to 1 ft.

Habitat . . Me. to Fla., west to Minn., Neb. and Ark.

Character: Inconspicuous flower hanging beneath the leaves.

Yellow Wood-Sorrel.

Oxalis corniculata var. stricta.

GERANIACEÆ, Geranium. Family

Yellow, of a golden tone; not bright,

but light.

May, continues sparingly until Sep-

tember.

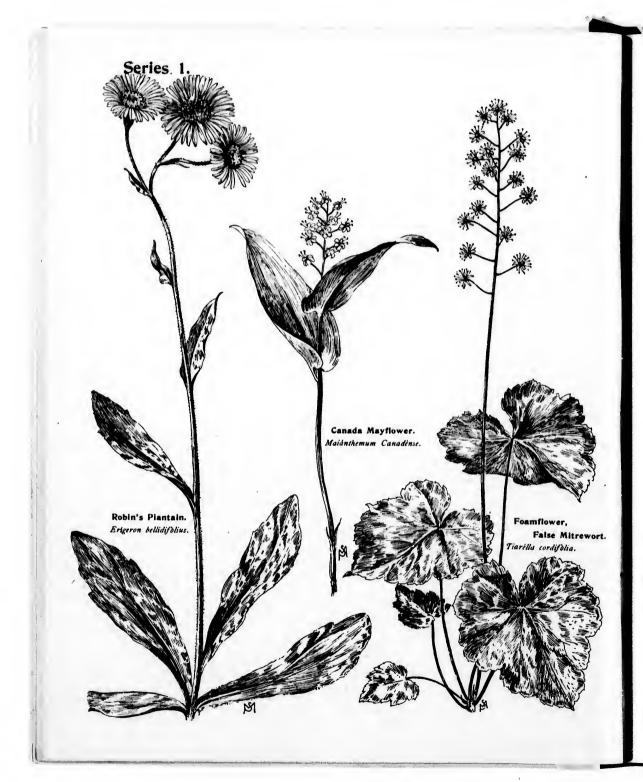

Environment, Roadsides, borders of fields, and wood-

lands.

3 ins. to 5 ins.

Habitat . . Common.

Character: Variable, low, drooping trifoliate

Canada Mayflower.

Maidnthemum Canadense.

LILIACEÆ, Lily. Family

White. Color . .

Blooms . . May and early June.

Environment, Moist woods. Height . .

3 ins. to 5 ins. Me. to N. C., west to Minn. and Habitat . .

Iowa.

Character: Fine flowers; inconspicuous, shiny leafage.

Robin's Plantain.

Erigeron bellidifolius.

COMPOSITÆ, Composite.

Lighter or deeper pale violet, yellow Color . .

center.

Blooms . . . May, early June. Environment, Copses, moist banks, roadsides, bor-

ders of fields.

Height . . 10 ins. to 18 ins.

Habitat . . Common.

nflower,

False Mitrewort.

Character: Asterlike, stout-stemmed.

Foamflower, False Mitrewort.

Tiarella cordifòlia.

SAXIFRAGACEÆ, Saxifrage. Family

White. Color .

Blooms . . April-May, sometimes early June. Environment, Rich woods, and moist, shady dells.

6 ins. to 8 ins.

Habitat . . Me. to Minn. and Ind., and south

through the mts.

Character: A hairy surfaced, maplelike, mottled green leaf.

Solomon's Seal.

Polygonatum biflorum.

LILIACEÆ, Lily. Greenish-white. Color . . .

May, early June. Blooms . .

Environment, Wooded hillsides, shady roadsides.

Height . . 10 ins. to 18 ins., rarely 3 ft.

Habitat . Me. to Fla., west to Minn., Eastern
Kan. and Tex.

Character: Root pitted like a seal print, hence the name: Solomon's Seal. Mostly two flowers at base of each leaflet; berries in autumn, first green, then blue-black like grapes.

Fringed Polygala, Flowering Wintergreen.

Polygala paucifòlia.

POLYGALACEÆ, Milkwort. Family

Magenta, rarely white, often a crim-

son-pink, near magenta. May, early June.

Environment, Woods, woody roadsides.

3 ins. to 4 ins. Height . .

g Wintergreen.

Me. to Minn. and Ill., and southward Habitat . .

along Alleghany Mts.

Character: Trailing, vinelike; the subterranean shoots bear concealed fertile flowers.

Arisàma triphyllum.

Family. . . ARACEÆ, Arum.

Color . . . Pale green, heavily striped with shiny

madder brown.

Blooms . . April, early June. Environment, Rich woods, beside brooks.

Height . . I ft. to 18 ins.

Habitat . . Me. to Fla., west to Minn. and Eastern Kan.

Character: Leaves taller than flower, hiding it; fruit at first green, finally scarlet.

Wood Sorrel.

Óxalis Acetosélla.

Family . . GERANIACEÆ, Geranium.

Color . . . White, crimson-pink veins.
Blooms . . Late May, early June, sometimes

early July.

Environment, Deep, cold woods.

Wood Sorrel. Oxalis Acetosella. Height . . 2 ins. to 5 ins.

Habitat . . Me. to Penn., Lake Superior and northward; southward in the Alleghany Mts.

Series 1.

Blue Flag, Larger.

Ìris verstcolor.

Blue Flag, Larger.

Ìris verstcolor.

Family . IRIDACEÆ, Iris.

Color . . Lighter or deeper violet, striped purple, white and yellow.

Blooms . May, early June, sometimes throughout June.

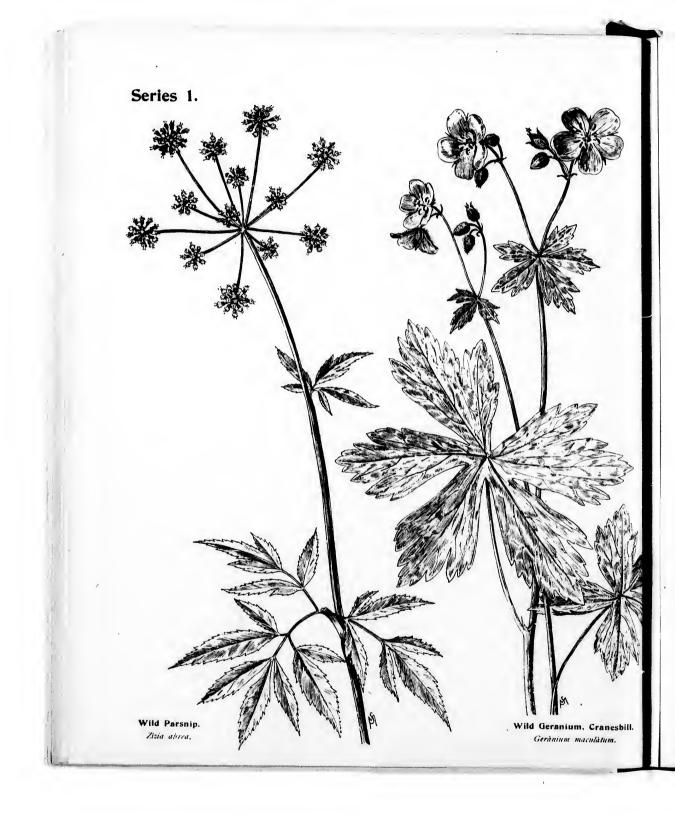

Environment, Beside streams, ponds, and in swamps.

Height . I ft. to 2 ft.

Habitat . Me. to Fla., west to Minn. and Ark.

Character: Stem angled on one side: leaves.

Character: Stem angled on one side; leaves sword-shaped.

Wild Parsnip.

Zizia aurea.

UMBELLIFERÆ, Parsley. Family . A not very bright golden yellow. Color . .

May-June. Blooms . .

Environment, Roadsides, meadows, and meadow copses.

Height . 18 ins. to 2 ft., rarely 3 ft.

Habitat . Atlantic states, west to Minn., and
Tex.

Character: Smooth, lined stem; aromatic odor when bruised.

Wild Geranium, Cranesbill.

Geranium maculatum.

GERANIACEÆ, Geranium. Family . .

Pale magenta-purple. Color . . .

Blooms . . May-June, sometimes early July. Environment, Open woods, roadsides, fields.

Height . . I ft. to 2 ft. Habitat . . Common.

Character: Stem erect and hairy.
