§ II. SCHOLARSHIPS AND BURSARIES.

Sixteen Scholarships have been placed by the Governors at the disposal of His Excellency the Governor General. Candidates for such Scholarships must pass the usual Matriculation Examination.

By command of His Excellency, four of these Scholarships will be offered for competition in the Matriculation Examination of the ensuing session. Students of the first and second years are eligible. The Examination will be a special one, in the subjects of the first and second years.

Eight other Scholarships may be granted by the Board of Governors, from time to time, to the most successful Students who may present themselves as candidates. By order of the Board one of these is given annually to the *Dux* of the High School.

In the event of any Academy or High School in the Province of Quebec offering for competition among its pupils an annual Bursary, in the Faculty of Arts, of not less than \$80, the Governors will add a scholarship thereto.

Any Academy, or High School, sending up in one year three or more candidates competent to pass creditably the Matriculation Examination, will be entitled to a scholarship for the most deserving of such candidates.

One Scholarship in Arts may be given annually to any teacher holding the Model School or Academy Diploma of the McGill Normal School, recommended by the Principal and Professors of the School, and passing creditably the Matriculation Examination in Arts.

All of the above Scholarships shall entitle the Students holding them to exemption from the Sessional Fees in the Faculty of Arts.

Two Bursaries of \$50 each, have been granted by the Board of Agriculture for the Province of Quebec, in aid of Students in the Special course of Agriculture. For terms of competition, see notice of Special Course of Agriculture.

In addition to the obligatory, there are other Lectures, attendance on which is optional.

The Lectures in Modern Languages will be so arranged that Students competent and desirous to take in the same year the Lectures in French and in German, may do so.

Students who intend to join any Theological school, on giving written notice to that effect at the beginning of the First Year, may take Hebrew instead of French or German.

The Faculty may permit any Student to take Spanish instead of French or German.

Undergraduates are arranged according to their standing, as Students of the First, Second, Third, and Fourth Years; and, are required to attend all the Courses of Lectures appointed for their several years under the regulations as to attendance and conduct stated in §VII. The only exceptions are those in favour of Honour and Professional Students stated below.

§ IV. EXAMINATIONS.

COLLEGE EXAMINATIONS.

There are two examinations in each year; one at Christmas, and the other at the end of the Session. In both of these, Students will be arranged according to their answering, as 1st Class, 2nd Class and 3rd Class.

Students who fail in any subject in the Christmas Examination are required to pass a Supplemental Examination in that subject before admission to the Sessional Examinations.

Students who fail in one subject in the Sessional Examination, are required to pass a Supplemental examination in that subject. Should they fail in this, they will be required in the following Session to take the Lectures and pass the Examinations in the subject in which they have failed, in addition to those of the ordinary Course, or to pass the Examination alone without attending Lectures, at the discretion of the Faculty.

Failure in two or more subjects at the Sessional Examinations involves the loss of the Session. The Faculty may permit the Student to recover his standing by passing a Supplemental Examination at the beginning of the ensuing Session. For the purposes of this regulation, Classics, and Mathematics with Physics, are each regarded as two subjects.

The time for the Supplemental Examinations will be fixed by the Faculty; and such Examinations will not be granted at any other time, except by special permission of the Faculty, and on payment of a fee of \$5.

§ VII. ATTENDANCE AND CONDUCT.

All Students shall be subject to the following regulations for attendance and conduct:—

1. A Class-book shall be kept by each Professor and Lecturer, in which the presence or absence of Students shall be carefully noted; and the said Class-book shall be submitted to the Faculty at all their ordinary Meetings during the Session.

2. Professors shall note the attendance immediately on the commencement of their Lectures, and shall omit the names of Students entering thereafter, unless satisfactory reasons are assigned. Absence or tardiness, without sufficient excuse, or inattention or disorder in the Class-room, if persisted in after admonition by the Professor, shall be reported to the Dean of Faculty, who may reprimand the student, or refer to the Faculty, as he may think proper.

2. Owen's Lectures on the Invertebrate Animals, and specimens illustrative thereof from the Museum.

3. Dana's Mineralogy, and specimens illustrative thereof from the Museum.

The Lectures in Natural History will be accompanied with demonstrations in the Museum. Students in Natural History are also entitled to tickets of admission to the Museum of the Natural History Society of Montreal.

§ XI. LIBRARY, MUSEUM, APPARATUS AND OBSERVATORY.

I. THE LIBRARY.

The Library of the Faculty of Arts contains about 6,000 volumes of standard works, selected with especial reference to the wants of Professors and Students, and open to their use during the Session.

The most important addition recently made to the Library is the "Redpath Historical Collection," consisting of 554 volumes of the more rare and valuable works relating to English History.

(The above statement does not include the Library of the Medical Faculty, which contains upwards of 4,000 volumes.)

II. THE MUSEUM OF NATURAL HISTORY.

1. ZOOLOGY. In this department the Museum contains a general collection of type specimens, illustrating the Orders and characteristic Genera of the Animal Kingdom, the whole arranged and labelled in such a manner as to correspond with the College course on the subject. There are also the following special collections:

1. The Carpenter Collection of Shells, being the general collection of Dr. Philip P. Carpenter, presented by him to the University, and shortly to be arranged in a separate room.

2. The Carpenter Collection of Mazatlan Shells.

3. The Couper Collection of 2,400 Canadian Insects.

4. Collections of Canadian Freshwater and Land Shells.

2. BOTANY.—The Herbarium consists of the Collection of the late Dr. Holmes, of Montreal, presented by him to the University; and with the additions recently made to it, affording a nearly complete representation of the Flora of Canada. There are also collections of European, Arctic and Alpine Plants, and of specimens of Woods, Fungi, &c.

3. GEOLOGY AND MINERALOGY.—The general collection consists of a series of the characteristic Fossils of all the great geological periods, with additional suites of specimens, illustrating in greater detail the formations represented in Canada. There is also an extensive collection of Rock specimens, and collections are being formed representing the principal Mineral Regions of Canada.

The Mineralogical Cabinet consists principally of the "Holmes Collection," containing about 2,000 specimens of Canadian and Foreign Minerals. A large portion of these are displayed in glass cases for the use of students, under the arrangement of Dana's Manual of Mineralogy.

All of the above collections are used to illustrate the lectures, or are open to the inspection of students, who are also entitled to access to the large and valuable collections of the Natural History Society of Montreal.

III. PHILOSOPHICAL APPARATUS.

The value of the apparatus is about \$4000. Of this more than two thousand dollars' worth has been added within the last year, by means of a personal subscription amongst some of the Governors. The collection is now very valu-

able for purposes of illustration in the departments of Mathematical and Experimental Physics. Besides instruments to illustrate Mechanics (Statics and Dynamics) and Optical instruments, such as Microscopes, a Telescope, Sextant, &c., there is a good collection for Hydrostatics and Pneumatics, another for Heat, and a very full collection for Magnetism and Electricity (Statical and Dynamical) including Electro-magnetism, Magneto-electricity, Dia-magnetism, Thermo-electricity the measurement of Electric resistance. The collection for Light (which has been ordered from Duboscq of Paris, but has not yet arrived) includes, besides apparatus illustrative of the common phenomena of optics, the best instruments for exhibiting on a large scale with the aid of the electric light the phenomena of Interference, Diffraction, Polarization and Double Refraction. There is a good collection for Sound (made by Koenig). The apparatus for Dynamical Electricity and Heat has been made by Messrs. Elliot Brothers, of London, makers of the apparatus used by the Committee on Electrical Standards British Association for the Advancement of Science.

IV. CHEMICAL LABORATORY.

The Laboratory is furnished with the Apparatus, Specimens and Chemical Reagents necessary to illustrate the class lectures in Chemistry; and is also fitted up with all the necessary appliances for the work of a class in Practical of the Chemistry and for Chemical Analysis.

V. METEOROLOGICAL AND MAGNETIC OBSERVATORY.

The Basement of the Building is devoted entirely to the observations on Terrestrial Magnetism.

The Ground Story and Leads are the portions of the Building devoted to Meteorological observations.

The Transit tower is for the purpose of furnishing time to the City, and to the Ships in the Harbour, and is connected by Electric Telegraph with a "Time Ball" at the wharf.

The principal Meteorological Instruments are:—

Thermometers for determining the Temperature of the Air.

Barometers for ascertaining the atmospheric pressure.

Psychrometers for the purpose of determining the Elastic force of Aqueous Vapour, the relative Humidity and Dew Point. Instruments for recording the Solar and Terrestrial Radiation.

The direction and velocity of the wind are registered by a modification of Dr. Robinson's Anemometer.

Rain and Snow Guages for indicating the amount and duration of Rain and Snow. Ozonemeter for recording the amount of Ozone.

Transit Instrument.

Observations on Storms, Auroras, Haloes and most of the Natural Phenomena which mark the variation of Climate are duly recorded.

The Instruments in the Basement of the Building are for determining the four Magnetic Elements; and consist of, (1) a Declinometer for measuring the Declination or Variation of the Magnet; (2) an Unifilar Magnetometer consisting of an apparatus for deflection and vibration, for ascertaining the horizontal Magnetic force; (3) an Inclinometer or Dip-Needle (No. 30 used in the Magnetic Survey in Great Britain) for showing the Inclination or Dip. From these observations are reduced the absolute value of the Magnetic Elements.

The whole are under the supervision of Professor Smallwood, M. D., LL.D., D. C. L.

The thirty-sixth Session of the Medical Faculty of the McGill University will be opened on Monday, 2nd November, 1868; with a general introductory Lecture at 11 A.M.; the regular Lectures will commence on Wednesday the 4th Nov. at the hours specified in the time table, and be continued during the six months following.

McGill University having been included among the Universities recognized by the Medical Council of Great Britain and Ireland, its degree has accordingly been registered by that Council, thereby conferring upon graduates of this University the same privileges as Physicians or Surgeons of Great Britain.

The class tickets for the various courses are accepted as qualifying candidates for examination before the Universities and Colleges of Great Britain and Ireland, and also before the Medical Boards of the Army and Navy.

To meet the circumstances of General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master in Surgery." This designation is also appropriate, from agreeing with the general

nature and equable character of the previous curriculum demanded of the candidates for this double rank, as is fully specified hereafter. The degree is received by the College of Physicians and Surgeons of Lower Canada, and by the Council of Medical education and Registration of Upper Canada.

To intending students desirous of information upon the best manner of pursuing their studies, the following suggestions are made by the Faculty .---

(1.) Exclusively of general education, professional reading for some time previously to matriculation is advised as a preparation, whereby familiarity with technical terms will be gained, and an insight obtained into the subjects to be brought under notice during lectures.

(2.) Though three years constitute the shortest time required for College attendance, yet the student is at liberty to extend this as much farther as he pleases; the addition of a year, or even two, is considered to be a great benefit, for it obviates the crowding of branches within too brief a term, and permits of a more extensive attainment of the topics they embrace.

(3.) Attention is recommended to be given during the first Session to the primary branches entirely; during the second Session an increase is proper, and two of the final courses may be profitably conjoined with such of the antecedent as are required; while during the remaining period further advance is to be made by completing the curriculum required of the candidate for graduation. Clinical courses should not be taken out during the first Session.

Matriculation is necessary every Session; it is required upon entrance or as nearly afterwards as possible, and always before any class tickets are procured. The time fixed for closing the Register is annually in the month of December. Class tickets are payable in advance, and if not taken out within the prescribed period of the current session, will not be granted after its expiration.

The ample and varied means which are placed at the disposal of the student by this school, together with the large hospitals in connection with it, are briefly referred to in the following pages.

COURSES OF LECTURES.

The number of Professors in the Faculty is nine; the number of Classes, ten; two of the classes (often conjoined in European Schools) being held by one Professor.

1. ANATOMY.—[Prof. Scott]—The fresh subject is chiefly employed in the illustrations of the Lectures in this branch, aided however, by dried preparations, wax models, plates, full size of life, &c.

The dissecting Room is under the direction of the Professor, aided by the Demonstrator of Anatomy. It is open from 8 a.m. to 10 p.m., being lighted with gas.

2. CHEMISTRY.—[Prof. Craik]—Inorganic Chemistry is fully treated; and a large portion of the course is devoted to Organic Chemistry and its relation to Physiology. The branches of Physics bearing upon or connected with Chemistry, also engage the attention of the class. For experimental illustration, abundant apparatus is possessed by the Professor, among which may be enumerated, a powerful Air Pump—Oxy-Hydrogen Microscope—Polariscope—extensive series of Crystal models—Electrical and Galvanic apparatus, &c., &c.

3. MATERIA MEDICA.—[Prof. Wright]—This Course is illustrated from a cabinet of Pharmacological objects; by plates of Medicinal Plants, [Wagner, Roque, Stevenson and Churchill]—by dried specimens; by carefully prepared Microscopical objects, &c., &c. Analytical experiments with the ordinary re-agents are also shown; and diagrams with other illustrations, are used.

4. INSTITUTES OF MEDICINE.—[Prof. Fraser]—Under which are comprised *Histology, General Pathology, and General Therapeutics*. The minute Structure and Composition of the various Organs, and the Fluids and Tissues of the body in health and disease are explained and illustrated by Microscopic Preparations, Plates and Preparations from the Museum.

5. PRACTICE OF MEDICINE.—[Prof. Howard]—The extensive series of plates contained in the Library, (Libert, Cruveilhier, Carswell, Hope, Alibert, Willan, Bateman, &c., &c.) will be employed; also Morbid Preparations and models of diseased parts.

6. **SURGERY.**—[Prof. Campbell]—Divided into Principles and Practice, including Surgical Anatomy and Operative Surgery, exhibited on the subject. Quain's large plates, Maclise, Dalrymple &c. The various surgical instruments and apparatus exhibited, and their uses and applications explained and practically illustrated.

7. **MIDWIFERY.**—[Prof. McCallum]—Including diseases of females and infants, illustrated by a series of drawings on a large scale; by humid Preparations; by models in wax; and by the use of the artificial Pelvis.

8. **MEDICAL JURISPRUDENCE.**—Prof. Fenwick]—Includes Toxicology—the modes of testing for poisons are exhibited, and post-mortem appearances illustrated by plates—Insanity, Public Hygiene, and Medical Police are touched upon.

9. **CLINICAL MEDICINE.**—[Prof. Drake]—Taught by lectures and at the bed side—Physical Diagnosis taught practically, and each pupil invited to take part in it. Examinations of the urine, chemically and microscopically explained and illustrated.

10. **CLINICAL SURGERY.**—[Prof. Fenwick]—Taught in similar manner. For both these Classes ample material is afforded by the cases at the Montreal General Hospital.

11. **BOTANY AND ZOOLOGY.**—[Prof. Dawson]—In addition to the above classes, Students are required to attend one course of Botany on which subject separate Lectures are delivered to Medical Students. Medical Students will also have access to the Lectures in Zoology in the Faculty of Arts. For details see announcement of the Faculty of Arts.

Prizes will be awarded at the end of each Session, to students in Botany and Zoology, of the class of the previous Session, for the best *Named Collections* illustrative of the Flora of Canada or of Fossil Invertebrata, Insects or Marine Invertebrata. The collections, or duplicates of them, to remain in the College Museum.

LIBRARY AND MUSEUM.

The Library contains upwards of 4,000 volumes, including the most useful books for reference, as well as the most elementary ones: the works of the older authors as well as the most recent. It is open

to the Students without charge, under necessary regulations for the care of the books. The Museum contains a large number of preparations, chiefly Pathological; also, wax and papier maché models.

HOSPITALS.

The Montreal General Hospital is visited every day by the Medical officers in attendance. After the visit, a large number of out-door patients are examined and prescribed for. The fee for a six month's ticket is Six Dollars; for perpetual, Sixteen Dollars.

The Operating Room (used also for a lecture room) is so constructed as to suit the convenience of the students in obtaining a good view of the operations going on.

The University Lying-in-Hospital is under the direction of the Professor of Midwifery. Students who have already attended one course of his lectures, are furnished with cases in rotation. The Fee for a Six month's ticket is Five Dollars.

Dean of the Faculty,---HON. J. J. C. ABBOTT, Q.C., D.C.L.

The several courses of Lectures in the Faculty of Law comprise every branch of Legal Study.

The Educational Officers of the Faculty have felt that the Law of this Province, though in many of its details purely local, retains as its leading characteristics, the noble and imposing features of the civil law, and that the principles established in the Roman jurisprudence, still form the groundwork of many of its departments. The Lectures, therefore, though prepared with especial reference to the Law of Quebec, have been as far as consistent with their primary object, divested of any purely sectional character, and are made to inculcate such comprehensive principles, as form, to a great extent, the basis of every system of jurisprudence.

It is considered that this system will afford to students of the Laws of Quebec, a better foundation for their subsequent studies, and tend to give them a more extended and comprehensive grasp of legal subjects, than a course of instruction conducted solely with reference to local law ; while it is hoped, in view of the increased importance which the study of Roman law is everywhere assuming, that the advantages offered, and the mode of education adopted by this Faculty, will open to it an extensive field of usefulness.

The promulgation of the Civil Code of Lower Canada as law, to take effect from the 1st August, 1866, marks an important epoch in

the History of the Laws of the now Province of Quebec.*

It is the intention of the Professors, so far as is practicable, to explain to the Students, the more important articles of this Code (2615 in number) in the complete course of study as indicated below.

The promulgation of the Code of Civil Procedure, as law to have force from the 28th June, 1867, marks another important epoch in the history of our laws. Attention will be specially drawn to its provisions in this course.

The enactments of these Codes as law, it is believed, will lighten much the labours of professors and students, who need no longer view the study of the profession as a vast and ill-digested whole, wanting coherency and certainty. On the contrary, the study of the texts will afford a good stand-point from which the subtle questions of jurisprudence will be the most easily and satisfactorily discussed and finally settled.

The Faculty congratulate the students that their entry into a noble but arduous profession will be much facilitated by the conspicuous land-marks planted by the new Codes, and while intense study and application will still be demanded from the true lover of his vocation, the future of the young juriconsult of the Province of Quebec, may be regarded as opening under the happiest auspices.

The complete course of study in this Faculty extends over three years; but may be shortened to two years, when the student matriculates in the third year of his indentures.

This School offers the higher kind of instruction and the mental training which together constitute the foundation of what is called a *Liberal Education*. As a Department of the University, it offers a thorough preparation for the College Course.

The Course of Instruction includes the *Latin, Greek, English, French and German Languages; Geography and History; Arithme-*

A *Volunteer Rifle Association* under Military Drill has been formed of the elder Boys and is recognised by the Military Authorities. The *Religious Instruction* is not sectarian, and attendance upon it is required only from Pupils who are Protestants. Details of the above Course are subjoined in a Programme for the year. An examination of it will shew that, whilst the Latin and Greek Languages have that prominence which necessarily belongs to them in Higher Education, provision is made to impart at the same time a thorough English and Commercial Education, and that French, as being one of the colloquial languages of the country, is much cultivated.

The complete course extends over a period of six or seven years; but Pupils are admitted for any portion of that time into any Form for which, upon examination, they are found qualified.

The Session, which is divided into four equal Terms, commences on the 1st of September, and with the exception of a fortnight at Christmas and a few days at Easter, continues to the 1st of July.

The full School hours are from 9 to 12½ o'clock, a. m., and to 4 p. m., every day in the week except Saturday, but the time for the Preparatory and the First Forms is shorter by an hour each day.

The School is divided into seven Forms. The Preparatory Form is a Lower School, in which young boys receive the training necessary to fit them for the commencement of the regular Curriculum.

For admission into this Form, it is required that the Pupil shall have attained the age of seven years, and be able to read moderately well. Regular early training is of so great importance that the entrance of a pupil should not be delayed beyond the age of nine. The best time for entrance is at the commencement of the Session, when owing to the promotions that take place, the classes are remodelled for the year.

The pupils of the First, Second, Third and Fourth Forms next above the Preparatory are not allowed any option in their studies, but must take the whole course of instruction prescribed for them. The Pupils of the Fifth and Sixth Forms are divided into two "Sides." The "Classical Side" is intended for those boys who desire

a more extended and accurate knowledge of the ancient Languages. The "Commercial Side" is adapted for those who are to enter upon mercantile pursuits. When a pupil has reached the Fifth Form his Parent or Guardian may select either of these sides for him; but the choice having been made, the Pupil must pursue all the course of instruction appointed for the side to which he belongs.

Special Reports are sent, whenever it seems necessary, to the Parent or Guardian of any pupil who has been absent, negligent of any study, or incorrect in his conduct. A Quarterly Report is made of the progress, attendance, and conduct of every Pupil, shewing his rank in his Form for each study.

At the end of each term, Class Examinations are held, both Written and Oral, and at the close of the Session, a public Examination takes place, followed by a Distribution of Prizes and Award of Honours, the lists being published. The Highest Honour is the Davidson Gold Medal, which is awarded to the Head Boy of the School for the year, provided that the Examiners are satisfied that his attainments reach a certain standard.

A special Examination is annually held of Candidates for the School Certificate issued by the University. The Conditions regarding this may be seen by reference to the Calendar of the University.

The Pupils are required to prepare themselves every evening in their work for the ensuing day, as exhibited in a Time-table. *As their progress will depend very much upon the diligent performance of this duty, Parents are particularly requested to allow no arrangements to interfere with it.* Parents having sons at the School are earnestly invited to frequent intercourse with the Masters, so as to aid them in securing that regularity and industry so necessary to success in Education. The classes are visited periodically by a committee of the Board.

The School Building is in a healthy and airy situation, and has convenient interior arrangements, with those modern improvements which secure proper warmth and ventilation. A very good Gymnasium has been erected in the play-ground adjoining the School.

The Rector, who resides a short distance from the City, has made arrangements to receive a limited number of Pupils of the High School to board with him. Mr. Rodger and Prof. Darey, Masters of the School, have also accommodation for Boarders.

This Institution is intended to give a thorough training to teachers, especially for the Protestant population of Lower Canada. This end is attained by instruction and training in the Normal School itself, and by practice in the Model Schools; and the arrangements, are of such a character as to afford the greatest possible facilities to Students from all parts of the Province.

The McGill Normal School has now been in operation for eleven years, and more than two hundred of those who have taken its Diplomas are usefully employed in various parts of Canada, while the demand for teachers trained in the School continues to increase, as Commissioners and Trustees become more fully aware of the difference between trained and untrained Teachers. More especially, those who have taken the Model School and Academy Diplomas are much sought after, and the demand for male teachers trained in the School

is much greater than can be supplied. The attention of young men is invited to these facts, as well as to the advantages which the School offers in opening the way to higher literary and professional education.

The authorities of the School feel that its usefulness might be increased, could the great facilities and ample means of training which it affords, be more generally made known to young persons desirous of becoming teachers, and to their parents and guardians. It is most desirable that those who purpose to devote themselves to the important profession of teaching should be as perfectly trained as possible; and that to this end they should avail themselves of the advantages so liberally provided by Government in the Provincial Normal School.

The Twelfth session of the school will commence on the second of September, 1868, and will extend to the first of July, 1869.

The complete course of Study extends over three years, and the Students are graded as follows :—

1. *Elementary School Class*.—Studying for the Elementary School Diploma.
2. *Model School Class*.—Studying for the Model School Diploma.
3. *Academy Class*.—Studying for the Academy Diploma.

1. *Conditions of Admission.*

Candidates for admission into the Junior Class will be required to pass an examination in Reading, Writing, the Elements of Grammar, Arithmetic and Geography. Admission into each of the higher classes requires a knowledge of the subjects of the previous one.

All Students must produce certificates of good moral character from the clergyman or minister of religion under whose charge they have last been, and also testimony that they have attained the age of sixteen years. They will also be required to sign a pledge that they purpose to teach for three years in some public school in Lower Canada.

2. *Privileges of Students.*

On complying with the above conditions, all students will be recognized as *Teachers in Training*; and as such will be entitled to free tuition with the use of text books, and to bursaries in aid of their board, not exceeding \$36.00 per annum in the case of those in

the two first Classes, or \$80.00 in the case of those in the Academy Class, should they be successful in obtaining the diploma at the final examination. A portion of this allowance will be advanced to such students as are not resident in Montreal, on their passing the semi-annual examination at Christmas.

Under the regulations subjoined, and with the view of extending the benefits of the school to all parts of the country, those who reside at a distance of more than ninety miles from the city of Montreal, will also be entitled to a small allowance for travelling expenses proportionate to the distance.

Students resident in Montreal may share in the bursary fund, on producing certificates from their minister or clergyman that such aid is absolutely necessary to their continuing in attendance at the school.

In addition to religious instruction of a general Protestant character by the Professors, arrangements will be made for special religious instruction by ministers representing the several denominations with which the students may be connected.

No boarding-house is attached to the institution, but every care will be taken to insure the comfort and good conduct of the students, in private boarding-houses approved by the Principal. Board can be obtained at from \$9 to \$12 per month.

At the close of the first year of study, students may apply for examination for diplomas giving the right to teach in Elementary Schools; and after two years' study, or if found qualified at the close of the first year, they will, on examination, be entitled to diplomas as teachers of Model Schools.

Students having passed the examination in the Model School Class, or having advanced to the requisite knowledge, may go on to the Academy Class, and, on examination, may obtain the Academy Diploma.

The Prince of Wales Medal and Prize will be given to the Student taking the highest place in the Model School Class, provided that such Student shall attain to the standard fixed by the Regulations of the Council of Public Instruction for this Medal.

All the preceding regulations and privileges apply to female as well as to male students.
