Meetings.

ASSOCIATION OF CANADA.

At a general meeting of the members of the Association, heid for the election of Directors and for such other business as might be brought before it, in London, Ont., on 17th February, 1869, the President, Crowell Willson, Esq., M. P., was called to the chair, when the ninth annual re-port was presented. It is as follows :

To the Members of the Agricultural Mutual Assurance Association of Canada :

In presenting to you the ninth annual report of the Company, the Directors have to treat of a year (1868) in which the losses somewhat exceeded the average rate, partly owing to the dry weather that prevailed through a long period of the summer, when burnings were more than usually frequent from fires running over the country. Every Farmers' Insurance Company country. Every Farmers' Insurance Company suffered in the same way; almost every one, if the information that has been received be correct, in a greater degree than our Company.

Losses. - The number reported for last year was 130; 122 of these were admitted as claims, and paid without unnecessary delay; their amount, \$31,148.78; 8 have not been regarded as valid claims; the Directors require further light in respect to them. If they can only see that these claims ought to be paid it will afford every one of the Board very great pleasure in doing it. Four claims that arose previously were paid last year, amounting to \$1,244.25. A claim was presented a few weeks ago resulting from a fire that occurred in 1867, during the assured's absence in the States. The Directors have as yet come to no decision regarding it, but it will be attended to without (This claim has since been paid in full, the delav. Directors being satisfied it was an honest claim. The claimant, W. H. McDowell, had, however, forfeited every shadow of legal right.)

the cash system, and 2,955 on the premium note one. Of the aggregate 217 did not come into while 164 issued in 1867 did force till this year, not begin to run till last year. During the year 9,345 either lapsed or were cancelled. On the 1st of January, 1868, there were in force 28,764; on the first of the current year, 30,892, showing an increase of 2,128. The average amount of those in force it will be seen is \$758.51.

Continued Preference of Cash System .- It is shewn that the cash system still commands the preference. Whether this will continue in so marked a manner when it becomes more generally known that the pre-payment theretofore required on the premium note system was last year decided to be dispensed with, may be questioned. Members, or those desirous of becoming so, may take their choice. Only farm property, however, is insured on the premium note system. Capital.—Appended will be found a full financial statement. The Directors flatter themselves they may fairly congratulate you on the exhibit It must not be supposed, however, there made. that the cash and stock on hand is all earned premium; it is available, and will be used to Your Board think if suitable persons were meet the current losses that may, and in fact appointed at convenient centres throughout the

must be looked for. At the same time it ought to be borne in mind that the rates of this Company have been as low as those of any well established company, and much lower than of a great many; yet your Directors have so managed matters that no other "Fire Mutual" in the country can present anything like so favorable a financial aspe This is the only one that, having complied with the Dominion Insurance Act, has been licensed by that Government. The Directors last year paid into the Receiver General \$12,000 pursuant paid into the Receiver General \$12,000 pursuant to that Act; and last week—subsequently to the completion of the appended exhibit—\$13,000 more—\$25,000 in all. It bears 6 per cent, in-terest, producing \$1,500 a year. The Directors doubt not you will approve of their course in the premises. The sum of \$65,000 would more than premises. The sum of \$65,000 would more pre-reinsure all outstanding risks at the ratio of your losses hitherto. We have in cash and Dominion stock \$48,652.92, besides other available assets to the extent of \$181,540.90, less by a few hundred dollars as stated—as to which, as well as for de-tails generally, see appendix. Members may rest quite satisfied of the Company's ability to pay, if they unfortunately get burned out. Incendiariam-Proposed Remedy.-It has been

stated that numerous losses occurred during the there dry term last summer. Unfortunately, were other prominent causes of loss in operation. The demon of incendiarism still stalks abroad on his fiendish course. By referring to the table of losses, several such cases will be seen. No less than eleven fires are supposed to have so originated; while of those for which no probable cause has been assigned-43 in number-some may reasonably enough be attributed to the same source. The Directors do all they can to bring such offenders to justice-they offer a standing reward of \$200 for such information as will con-vict. But they are of opinion the Legislature could apply at any rate, a partial remedy for the fearful evil. In the report for 1864 it was stated : "It is to be regretted there does not exist some thorough mode of investigating into the origin and circumstances of suspicious fires throughout the country. A coroner's inquest is a cumbrous affair, and the head of it, for the most part, more qualified to deal with matters of life and death, than with ferretting out the intricacies of evidence so as to convict of incendiarism. A fire inspector so as to convict of meendiarism. A fire inspector in each county, selected for adaptation to the work, and clothed with ample powers, would probably prove a more effective check to those diabolical acts. It is to be hoped, not in the indiabolical acts. It is to be noped, not in the in-terests of insurance companies alone, but for the sake of the country at large, and of public niorality, that the Legislature may before long see fit to apply some correction to the great and growing evil." The Royal Insurance Company of England, one of the most important in the world, the following year took up the same idea. They recommended a similar course to the British Legislature. Towards the close of the last Parliament a committee was appointed to whom the matter was referred. Mr. Thos. B. Horsfall, one of the representatives for Liverpool, was a member; they brought in a report, recommending among other 'things, that "judicial enquiry should be made into fires, with power to examine witnesses on oath.

THOMAS GUNDRY.

country, endued with inquisitorial powers to investigate suspicious fires when duly called on, a griat good would be done. An innocent man would be glad of an opportunity of removing suspicion from himself—and as for the guilty, the intention is not, of course, to study their comfort. The very existence of such an ordeal would tend to deter. There would be fewer burnings-rates would be lower, and not only that, but there would be less litigation in proportion before the Courts. Honest claimants, with somewhat doubtful surroundings (for such things do occur), might off-times be able to secure a prompt payment of their rights, for it would not be profitable for an insurance company to brave the decision, if against it, of an able, competent inquisitor of high standing, pronounced after a full judicial examination Protection would be afforded to companies and individuals alike. Nor would the plan neces-sarily involve any drain on the public exchequer. Ceses of malicious incendiarism are more par-

ticularly referred to above. It seems to Directors, as well as to our efficient inspector, Mr. Niles, that there has been a diminuition in speculative burnings. Other causes of Fire.-Fires have also arisen

from other causes, which might be well avoided. Only the other day notice was received of a loss, in which the claimant states. I can suppose no other cause than soot in the pipes." More than likely such was the case; eleven of the paid for losses in the appended list arese from stove pipes, and nineteen from dirty defective chimneys, set-ting fire to roofs or other parts of the buildings. Another prolific source of fires is children playing prevented most of the losses occurring under those heads. with matches. A very little care might have

Tico-thirds Clause—Is a modification wanted !— It has been a rule of the Company to insure up to two thirds only of buildings and their contents, 1868, Cash System... requiring each member to bear at least one-third the risk of the property insured. This seemed to be approved of by the great bulk of the members. Of late, however, very many have become dissat-isfied with it, desiring that they should no longer be required to risk a third of the "ordinary con- Of these not yet in force. In view of this feeling, the Directors tents. have resolved to submit the question to-day to your decision, to which, whatever it is, effect will be given. It will be put to the vote by and bye.

Improvement in paying up. —The Board will-ingly bear testimony to the fact that the members generally are paying up their dues much better than formerly. The Directors will use no doervive means hastily—but at the same time they have a duty to perform, which they will not neglect. They trust to have but little trouble on this SCOPE

Retiring Directors .- Three now go out in rotation-Messrs. Biddulph, Eccles, and Dunlop ; they are eligible for re-election.

CROWELL WILLSON, President. D. C. MACDONALD, Secretary.

The Report being read, it was moved by James Johnson, Esquire, Sunnyside, seconded by John Kearns, Esq., Deputy Reeve of London Township, that the Directors' report be received and adopted. Carried unanimously.

A few remarks were made by the Rev. J. H. Robinson, Geo. G. Magee, W. R. Vining, Esquires, and others, touching the conditions of the policies, the two former gentlemen contending they were too stringent. Explanations were then given, after which it was put to the meeting, whether it is advisable to alter the conditions of insurance so that the full amount of loss on "ordinary contents" of buildings be paid, not exceeding the amount insured ? which was decided in the affirmative.

Captain O'Malley, Andrew Ell's and Alexander McKenzie, Esquires, were appointed scrutineers, when the election for three Directors was proceeded with. After a ballot was taken, the scrutineers reported that Samuel Eccles, Hamilton 1 Dunlop and Richard Biddulph had been re-elected.

A vote of thanks was then passed to the man, and the meeting adjourned.

At a meeting of the Board held subset C. Wilson, Esq., M.P., was re-elected Pro and W. R. Vining, Esq., Vice-President, ensuing year; and the Board passed a giving effect to the vote of the annual meet to the insurance on the "ordinary conte buildings, to take effect as regards all loss the first of this year.

QUEBEC MARINE AND FIRE INSURANCE COM-PANY.-The annual general meeting of the above

Company was held on Monday, at its office, in Quebec, when the report and statements for the year were read and adopted, and the follow-ing gentlemen elected Directors :- Messrs. W. Withall, A. Joseph, Ed. Burstall, Jas. G. Ross, J. Gaudry, J. B. Renaud, M. G. Mountain, D. C. Thomson and Thomas Becket.

At the general meeting of the Directors of the St. Lawrence Navigation Company, held on the 24th instant, the Hon. Louis Renaud, Messrs. C. L. Rødier, L. Haineault, H. Coote, J. Bte. Auger, A. Rimmer, A. Shannon, M. McKenzle, and M. Cuvilier, were elected Directors for the ensuing year. The new Board met the same afternoon, and elected the following officers for the next year :-Hon Louis Renaud, President ; C. L. Rodier, Vice-President ; F. A. Trudel, Secretary ; J. Bte. President ; F. A. Auger, General Manager; and John McMartin, Agent.

-At the general annual meeting of the Saint John Mutual Insurance Company, held at their office in Wiggins building, Princess street, on Monday, Februrry 1, 1869, the following gentlemen were elected for the current year, viz: John Smith, President; C. H. Estabrooks, W. K. Reynolds, James Harris, Robert J. Leonard, Direct ors; A. Ballentine, Barrister and Solicitor, and J. Woodward, Secretary. A dividend of forty-five per cent was declared on the business of 1867.

A meeting has been called at Laurent, Jacques Cartier Co., Province of Quebec, for the 29th Feb., to organize a mutual fire insurance company.

Insurance.

FIRE RECORD. --- Ottawa, Feb. 27 .-- A fire broke out in the rear of a saloon occupied by John Cahill, just opposite the Russell House, caused, it is supposed, by some defect in the chimney. Cahill lost all his furniture and stock of liquors, with the exception of some bar fixtures. His loss is but partially covered by an insurance of \$1,000 in the Imperial. The building adjoining, occupied by Rebertson & Lawrence, merchant tailors, was also destroyed. They had a large stock of cloths and ready-made clothing on hand, princi-pally saved. Insured for \$1,000 in the British America; will more than cover the damage sus-tained. The upper flat of the same building was occupied by Mrs. Greenwood as a boarding-house. A portion of the furniture saved. No insurance. Owing to the exertions of the hook and ladder company, the great quantity of snow on the roofs, and the arrival after a long time of a few barrels of water, the fire was checked at the west building, owned by Messrs. Durie & Son, and occupied by them as a book-store. The roof of the building was partially burned; \$1,200 insurance in the British America on building. The stock saved; the insurance on stock, \$2,000 in Western and The flat above the book-store was occu-Home. pied by Mr. Peckett, dentist; loss not large; insured for \$500 in the Western of Canada. buildings totally destroyed were owned by Alder man James, and insured in the Liverpool and London for \$2,000. They were wooden buildings and old. Total loss estimated at over \$10,000. Mr. Orme is insured in the North British and Mercantile; loss very slight.

February 21.-Mr. Charles Mathews, lot 21, first concession, south of the Egremont road, had his dwelling house and furniture totally destroyed by fire. Loss of house and furniture totally \$1,000; insured in the Agricultural Mutual— building \$300 and furniture \$150. The fire is supposed to have occurred by a defect in the

chimney. Brock Township, Ont., Feb. 22.—The barn, stables, sheds and other buildings of a farmer named Quin, near to Vroomanton, Brock, were consumed, including everything in and around

the barn, grain, hay, straw stacks, etc. We have failed to learn particulars. Fredericton, N. B., Feb. 16.—The billiard room and bowling alley belonging to F. W. Miles, was discovered to be on fire. The new steam fire-engine was on the spot soon after the alarm was given; and speedily extinguished the flames, but not before considerable damage had been done to both building and furtitume which however both building and furniture, which, however, were partly insured.

Normanby Township, Ont., Feb. — — Barn of Robert Hopkins, with contents, comprising a quantity of hay, wheat and other farm produce, was totally consumed by fire on Thursday night last. The origin of the fire is unknown. No insurance.

King Township, Feb. 22.—The dwelling house and woodshed of Abram Carley, on lot No. 7, in-the 6th concession, was burned with contents. The family had barely time to escape with their lives. The house was insured for \$400; loss about \$1,000. The origin of the fire is supposed to be escaledated accidental.

Strathroy, Feb. 30.—The dwelling house of Wm. Matthews, lot 21, 2d concession, Adelaide, was destroyed by fire supposed to have originated in the chimney. Mr. Matthews and his family had barely time to escape, and saved very little of their effects.

Belleville, Feb. — A fire broke out in the building formerly used as a malthouse, adjoining the "Tiger" Brewery, Bridge street, but lately occupied as a storehouse, grinding mill and stables. The building burned contained a large quantity of hous, onto, hav after valued at along the store of hops, oats, hay, etc., valued at about \$900, the greater part of which was destroyed. L. J. Williams, the owner, we understand, is insured in the Western for \$600. The building was owned by F. McAnnany, and was insured in the Provincial. The origin of the fire is a mystery, as no fire had been used in the building for a year past.

Sarnia, Feb. 24 .- The dwelling house of Mrs. Gilbert, situated on the River road, between Corunna and Moore, was destroyed by fire. The fire originated, it is said, from a defective chim-ney. Furniture partly saved. The building is said to be insured for \$200, but this will fall far short of covering the loss. Digby, N. S., Mar. 1.—A telegram says, that

six houses were desthoyed by fire; no insurance. Roxton, Pond, Prov. of Quebee, July 11.-Kimpton's store and contents were totally destroy-ed. The stock was fully insured in the Home, of New Haven.

PHOENIX OF LONDON .- The following shows the results of the business of the Phœnix Insurance Co. of London, in Canada, for the year ended 50th November, 1868 := Fremiums received \$84, 562.15; number of policies issued, 1,069; amount of same, \$4,159,188,00; amount at risk, \$9,202, 098.00; number of policies that have become claims, 41; amount of same, \$358,375.00; losses, \$37,988,49; losses, 30th November, 1868 -Premiums received \$84, \$37,988.49; losses in suspense and waiting fur-ther proof, \$1,500.00 i losses, the payment of which is resisted, none; premiums earned, \$84, 562.15.

ANOTHER INTERNATIONAL BRIDGE.

A report by a Committee of the Buffalo City Council on the subject of a new International Bridge between Buffalo and Fort Erie has been published. The following letter, from Mr. Brydges, explains what he is prepared to do in the matter :---

"I hold the control of the bridge charters of both sides of the river, and control the majority of the stock held by the corporations existing one chartered by the Legislature of the State of New York, and the other by the Parliament of Canada. The amount of stock subscribed for under both charters is \$1,300,000, viz., \$1,000, 000 upon the American side and \$300,000 upon the Canadian side.

"My object, and that of the Canadian railway companies which I represent, is to get the Bridge constructed at the earliest possible date; so that the American railway companies on the one side, and the Canadian railways, on the other, and the city of Buffalo, may obtain the advantage of the communication which the Bridge will afford.

"The construction of the Bridge being assured, I am prepared, so far as my control of the charters is concerned, to place such control in the hands of those who will bring about the arrangements necessary for the construction of the work.

"I, therefore, as President of the Bridge Company, now state to you that so soon as the City of Buffalo has, in accordance with the powers which it now possesses, undertaken to guarantee interest upon \$1,350,000 of bonds, which sum will be sufficient to secure the completion of the Bridge, I shall be prepared at once to transfer, upon the execution of the necessary deeds, the sum of \$700, 000 of the stock of the Bridge Company, which will be sufficient to give the control of the Bridge Company to the parties holding those shares.

"I will take care that, before making this transfer, a resolution is passed by the Bridge Company which will prevent the creation of any new shares beyond the \$1,300,000 now in existence.

""The right of issuing any further shares will therefore rest, if it is hereafter desired, with those who hold the majority of stock."

The Committee of the Council reply as follows: The Committee feel assured that Mr. Brydges is not only desirous, but has full authority, to carry out the measures which he proposes, and that upon the City agreeing that in case the said stock is transfered, and the other stipulations contained in Mr. Brydge's communication complied with, that the control of the stock will be transferred to citizens of Buffalo, and his propositions will be fully carried out.

And your Committee are equally confident that no difficulty will be encountered in finding citizens of Buffalo of sufficient character and ability to take the transfer of the stock upon the conditions proposed by Mr. Brydges, and pay the advance thereon.

The proposition of the Grand Trunk Railway to pay \$50,000 annually for the use of the Bridge of itself, provides for nearly two-thirds of such interest, and the compensation received from the other great lines of railway, including in fact all the completed lines from the East to the Great West, together with the tolls received from the use of the Bridge by the general public, will not only secure the city from loss, but render the work remunerative to those who shall complete the same

financial.

TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

Business was rather more active during the past week, and prices are in most instances without change.

Bank Stock.—There were sales of Bank of Montreal at 1394; holders now ask 140. Ontario is much firmer this week; there are no sellers under par. Buyers offer 121 for Toronto; very little is offered. Royal Canadian has declined 1 per cent.; the last sales were at 89. There were large transactions in Commerce at 103; holders now ask 1034. Gore is inquired for at 141; nothing doing. Merchants' has advanced, and transactions have occurred at 109. Buyers offer 99 for Quebec, but there are no sellers. Molson's is inquired for at 112. Sales of City occurred at 103 and 1034, but the demand is small. Du Peuple sold at 1066, ex dividend. Nationale is nominal at 1064; there are no sellers. Jacques Cartier is asked for at 1084. Mechanics' is inquired for at 95, and there are buyers of Union at 104; no sales. Other banks nominal.

Debentures.—Canada sterling six per cents sold at 103, and five per cents are offered at 944. No Dominion Stock in market. Toronto are enquired for but not offered. No County offering. There were large sales of Township debentures at rates to pay 64 per cent.

Sundries.—Sales of British America Assurance at 554, at which rate it is still offering. Canada Permanent Building Society sold at 125 to 1254, with little offering; sales of Western Canada occurred at 120 and 1204; sellers now asking 121; no Freehold offering; there are buyers at 110. Montreal Telegraph sold at 1334. There were several transactions in Canada Landed Credit at 734, ex dividend. Several mortgages have been placed during the week at 8 per cent. Money is in rather more demand.

MONTREAL STOCK MARKET.

MONTREAL, March 1, 1869.

In stocks this week there has been little doing. Montreal closes at 140, with prospects of higher prices; City 193; Molson's 112 to 113; Ontario about par; Bank of Toronto 121 to 122; Merchants' Bank 1084 to 109; Royal Canadian 89 and 894; Bank of Commerce 103.

In bonds there have been some transactions at our quotations. There is little doing in exchange which is quoted at about 9 per cent. premium. Gold drafts on New York are worth par and a small premium owing to the decline in sterling. Silver keeps steady at 34 discount notwithstanding the immense export demand. The principal feature in our market has been the decline of gold in New York, through which it is rumoured one of our heaviest capitalists has lost heavily. Several small dabblers also find themselves slightly crippled.

A NEW BANK.—It is proposed to organize, as soon as possible, the Exchange Bank of Yarmouth, of Nova Scotia, for which a charter was obtained two years ago. The proposed capital is \$200,000, divided into 2,000 shares of \$100 each. Stock books are now open, and it is intended to go into operation by 1st August, 1869.

NOVA SCOTIA GOLD FIELDS.

HALIFAX, N. S., Feb. 18, 1869

The present lull in gold mining affairs is more felt by speculators than by the older established companies whose mill returns for January (gren below as far as received at the Chief Commissioner's Office) prove the presence of the sought for metal in quantity sufficient to well repay the intelligent and economical search for it. News from the soveral districts there are none. The returns from Uniacke are not in, but the reputs from the Mount Uniacke Company confirm the existence of two lodes of aggregate width of 5 feet in their cross-cut which yield an average of 5 dwts., and can be mined and reduced for \$3.50. Prospecting parties are to work on the Mayflower lot, and other small properties on the same range. The Prince of Wales Company, the Central Company, the Montreal Association, and the Mount Uniacke Company, however, are the only present producers.

Prospectors are busy, too, at Musquodoboit, Beaver Dam, and Fifteen Mile Stream.

THURSDAY, MARCH 4, 1869.

THE GODERICH SALT MEN AND THEIR BACKERS.

We once heard a person, experienced in the ways of the world, propose to wager that he could practically demonstrate the thoughtless alacrity with which large numbers of persons will sign any petition presented to them, by getting a formidable array of signatures to a petition to hang the Governor General, without trial or benefit of clergy. And it must be confessed that even this exaggerated way of stating the fact was not without its germ of truth. Nor are the excusably or inexcusably ignorant the only offenders in this respect. A noteable example is before us. During the last session. sixty-four members of the Legislature of Ontario petitioned the Ottawa Parliament to impose a duty on salt, in the interest of the Goderich salt men. The prominence given to the question in this and other ways forces its consideration upon us.

A duty on salt has always been an odious duty, because the article is a prime necessary of life, with which civilized men find it impossible to dispense: It would almost be easier to do without bread than salt. The Scottish peasant finds no difficulty in subsisting mainly on oatmeal. Sugar and tea may be dispensed with in extreme cases; but salt is required to season or preserve an endless variety of articles of food. It is not too

uch to say that among the chief articles o ood consumed by the majority of the popution of this Dominion, a prominent place just be assigned to fish and pork, both of hich owe their preservation to salt.

It may safely be laid down as a maxim hat the prime necessaries of existence-that hich forms the indispensible aliment, or any djunct to that aliment, of the poorest portion f the great mass of the population-should e free from taxation. It was in obedience o this principle that the corn duty, which as justly stigmatized as an odious bread-tax, as repealed by Sir Robert Peel. In levying axes, it is the duty of the Government to void striking at the great sources of the eople's existence. Very recently the Par. ament at Ottawa committed the error of utting a duty on foreign flour. This tax as in effect, though not in form, a discrimiation against American flour. The object as to compel the Nova Scotians to eat Canaian flour, at an enhanced cost, which they ould not afford to pay. The circumstance f the fishermen of that Province passing hrough a cruel famine; almost immediately fter this unwise and unjust duty was put on, showed in a striking manner the inhumanity of that piece of protectionist legislation which attainted the people in the very source of their existence. We need not add that this temporary bread-tax, after bringing discredit on all concerned, was repealed on the first opportunity.

Are we now to shift the burthen which we removed from one shoulder of the Nova Scotia fishermen to the other? Having repealed the duty on their flour, are we to lay it on the salt that preserves their fish? Both articles of food are equally necessary to their existence; and we might just as well have left the tax on their bread as turn round. after taking it off, and put it on their fish.

The proposed tax on imported salt is advocated on grounds which are altogether indefensible. We are told that the new salt interest has some sort of a claim to be defended against the competition of American salt. The advocates of the duty tell us that they do not desire to go beyond this. They do not even wish to tax English salt. They ask simply and solely that a duty be placed on American salt; and we are not sure but they would agree to confine it to the dreaded Syracuse product. This demand shows an extraordinary unacquaintance with the fundamental laws by which the action of the Ottawa Parliament is limited and controlled. It is not within the competence of that Parliament to levy a discriminating duty, even in favor of English productions. The Governor General's instructions always contain a special have been carefully studied, with a view to

duty. Thus the way to a realization of the object of the salt duty agitators is effectually barred.

There are other parts of the subject which these petitioners do not appear to have studied to better advantage. They mistake what might be the natural effects of competition for remote, unusual and abnormal causes. They tell us, as if it were something extraordinary, that Syracuse salt is sold cheaper in Canada when it comes into competition with the Goderich product than when that competition is withdrawn. What mon natural / It is the result of an ordinary law But even if there is something more, that does not alter the case, in favor of the petitioners. It is quite possible that the Symcuse salt interest may make a special effort to retain a footing in this market. There are, we believe, two separate companies ; one engaged in the manufacture and the other in the distribution of the Syracuse salt. The mercantile company agrees to take all the salt the manufacturing company produces at a price agreed upon. In case of excess of production, which may easily occur, there would be great difficulty in disposing of the surplus; and it requires no stretch of the imagination to conceive that Canada might enjoy its full share of the benefit of the cheapened article. Salt is a thing of which the consumption has fixed limits, which do not admit of artificial extension. . The natural limit once overstepped in production, the price inevitably comes down. But that is always an advantage to the consumer. The Goderich men may or may not have jeopardized their capital. We hope not; their attempts to develop and utilize a latent source of wealth to the country are deserving of every legitimate aid.

But is aid of any kind required in order to the successful development of the Goderich salt territory ? The following is an estimate of the cost of manufacturing 100 barrels of salt at Goderich, obtained from a manufacturer there : 16 cords wood at \$2.....\$32 00

Oil and sundries.... 100

Or 88 cents per barrel. American salt is sold in Goderich at \$1.30, so that there is a margin for interest on investment and profit of 42 cents per barrel, or nearly 50 per cent. Such a margin ought to be satisfactory.

The arguments adduced in favor of a re taliatory tariff come half a century too late to find favor where economical questions prohibition against the enactment of such a the honest application of correct principles.

These arguments, if they mean anything, mean a return to that never ending war of tariffs which, leading to the marshaling of hostile armies, has so often drenched the earth with blood and blighted the best hopes of human progress. Sir Robert Peel deterplined to apply the true principle, long taught by the economists, that it was the duty and the interest of England to do right, and leave other nations to their own choice. The question raised by this salt interest may be reduced to a very simple form : Are all the salt consumers to be taxed for the special benefit of the Goderich salt raisers? Is the country to pay so much the more for its salt that these few individuals may put dividends in their pockets ! Why cannot we, in this Dominion, produce salt that will successfully compete with Syracuse salt ? We have the great advantage of untaxed labor and cheaper means of subsistence; of proximity to market and consequent reduced cost of carriage; of a first-rate if not an altogether superior article. Everything is in our favor. Why, then, can we not compete ? It is too much to expect any one to believe that the Syracuse salt men will always continue to favor us with their salt at a price that does not cover the cost of production, and if they did all the profit would be on our side. There is no reason to despair. If our salt works be skilfully, prudently and economically managed, there is no reason to fear for their ultimate success; and that success will be all the more certain and enduring that it rests on a sound foundation.

THE AGRICULTURAL MUTUAL.

The Agricultural Mutual Assurance Association is, we believe, the leading Company of its class in the Province of Ontario. It has cash assets amounting to \$48,652 92, and premium notes liable to assessment \$138,831 17; its cash income, (less commissions) for the last year was \$61,395.38, and its expenditure \$44,221. Policies to the number of 11,526 ware issued, 8,571 on the cash and 2,955 on the premium note system. The Directors refer with evident pride to their \$25,000 investment in Dominion Stock, under the Insurance Act, and we see for the first time in a report of a Canadian Insurance Company, an estimate of the amount required to reinsure outstanding risks. Although we are inclined to think the sum mentioned, \$65,000, as a low estimate, we hope other Companies will follow the example of the Agricultural Mutual and, at least, recognize the existence of a liability which they have hitherto attempted to ignore. There are other matters in this excellent report which suggest comment, such as the need of official investiga- never again occupy the position she once

tion, in cases of fire and the abrogation of the two-thirds rule, but the crowded state of our columns compels us to defer further remarks. The financial condition of the Company, and its success in business, exhibit great care in underwriting and general good management.

NOVA SCOTIA GOLD MINING.

Our readers will not fail to observe the valuable information respecting gold mining in Nova Scotia furnished by our Halifax correspondent. The official returns of the various mining districts, compiled specially for this journal, by A. Heatherington, Esq., late editor of the Mining Gazette, will be found useful by those interested in that region. -These returns, by the way, we publish in advance of every other journal in the Dominion. The Nova Scotia mining interest has become so large that we deemed it advisable to secure the services of a competent correspondent to chronicle operations in Nova Scotia, and we think that our readers will agree that success has crowned our efforts. A great deal of money here sought investment in that gold region. At the last Session of the Legislature of that Province about thirty companies were incorporated. Various localities have furnished money for these enterprizes. There are Montreal, Kingston, Coburg, Toronto, Hamilton, Chicago, Hartford, Boston and New York Companies, all engaged in gold mining. Toronto, alone, is the head-quarters of five or six chartered, or about to be, chartered, companies. So that a considerable number of persons had a direct interest in being fully informed as to what is going on down there. We hope to number all these companies, and their stockholders, among our list of subscribers.

REPORT OF THE SECRETARY OF THE BOSTON BOARD OF TRADE FOR 1868.

We are indebted to a friend for a copy of the very interesting report of the Secretary of the Boston Board of Trade, Hamilton H. Hill, Esq. He discusses very fully [₩] the various subjects affecting the trade and prosperity of Boston ;-railway communication, harbour improvements, finance, the shipping interest, &c. The repeal of the Reciprocity Treaty was initiated by a Boston man, and under the influence of temporary hostility to Britain and British Colonists. The feeling has passed away, but the measures adopted and their consequences remain; and it will take many years of agitation and of intelligent enterprise before Boston will be able to regain the customers against whom she closed her warehouses. It is possible that she may

held as the emporium for the trade of the Maritime Provinces of the Dominion ; for New York, like Aaron's rod, seems to have the faculty of swallowing up its lesser rivals, and in trade, as well as in every-day life, the scriptural aphorism is singularly true-"To him that hath shall be given." The Boston Board of Trade is fortunate in having so able Mr. Hill refers to the Naa Secretary. tional Board of Trade, whose first report is before us. Our neighbors have set us a good example by conabining the various Chambers of Commerce into a National Board. Mr. Hill, under the head of "Steam Communication with Europe," says :---

"We believe that the rule holds good, that vessels will always go wherever there is likely to be an accumulation of freight. New York has been made the port of destination for ten or twelve foreign steamship lines, because it is known that there will always be more or less business there for them. Portland and Baltimore have been able to draw similar lines to themselves, because the policy of the Grand Trunk and Baltimore and Ohio Railroads has been able to make it possible for their merchants to engage in the export trade. The Cunard Company despatches a steamer once a week (which will hereafter carry a mail), from Liverpool to Boston, sending it to New York for its return cargo; and there can be little doubt that this line will return from here to Liverpool direct, is soon as the freight shall be fortheoming

IS IT TRUE?

Rumour has been whispering for some time that Vanderbilt has become the purchaser of the old plans of the Southern Railway at \$120,000 or \$130,000. Is this true | It has been further stated, that he has made an offer-some \$15,000 more-for the new charter for this line granted by the Legislature of Ontario, but that he did not succeed in this particular, the holders believing there was more pioney in it. There seems to be little doubt that Mr. Vanderbilt has attempted to obtain control over this project. What is the object | Is it to build the road, or to kill it off ?

There is still some doubt about the precise extent of the loss recently sustained by the Baak of Montreal in New York. It is certain, however, that in one instance the loss was \$60,000, and it arose in this way. The bank makes advances on Government securities, and one person with whom it had done business for a great number of years, stepped in one day and gave a cheque for \$60,000 and took up his securities. The cheque was not marked good, and next morning when the cash was taked for it, the drawer was found to be bankrupt. Whether there were any other losses than this is still a matter of doubt and conjecture which ought to be re-

moved by an authorized statement, for the uncertainty gives a wide latitude to the imagination, and probably causes exaggerated reports to obtain some credence.

The Ottawa Government promises a Bank-

ing Bill that will be satisfactory both to the banks and Parliament. We doubt it, and still more that it will be satisfactory to the people ; if, as generally believed, its main feature should make Government notes the unique currency of the country-thus threatening the future advent of an irredeemable currency, of which the value would constantly fluctuate from day to day.

THE Municipal Council of Hastings has granted a sum of money to establish a chair of mineralogy and agricultural chemistry in Albert College, at Bellville, and we are glad to learn that Mr. James T. Bell has been appointed its first occupant.

The Globe states that the tenders for Canada Landed Credit forfeited stock came up to the market sate. The actual rate was about 43 on the amount paid up on each share, instead of 73, the market rate.

PROVINCIAL INSURANCE COMPANY. - The Manager and Assistant Manager of this Company are at loggerheads. The latter having preferred charges of mismanagement and incompetency against the former, the Board of Directors appointed a committee to inquire into the matter. sion arrived at was to advise the belligerents to settle their little differences and attend to their work. It is stated that the Board, or some of its members, have expressed a willingness to give the Manager a pension of \$1,200 a year if he will retire. This proposition has not, however, been accepted. However advantageous it might prove, legality is very questionable. The salary is \$2,400, and a bonus of 24 per cent. on profits, making the position of Manager of the Provincial Insurance Company worth at least \$3,200 a year. This Company is certainly liberal to its Manager.

Communications.

LIFE INSURANCE.

To the Editor of the Monetary Times.

Sin,-In your issue of the 11th February is an article upon "The Crime of False Pretence in Life Insurance," taken from a Western journal, and immediately following it another, which fur nishes a striking illustration of the first. statement of figures is there given, attributed to Mr. Ramsay, of the Canada Life Insurance Company, to the effect that eight American life companies doing business here possess assets ave-raging only \$8.44 for each \$100 assured, while the Canada has \$18.70 for every \$100 assured.

I had previously seen a circular to the above effect, over the name of a newly-appointed agent of the Canada, and had attributed its publication and use in canvassing to his ignorance of the business ; but when it appears in your journal as coming from Mr. Ramsay, it assumes quite a different character. That gentleman cannot but know that the statement, correct enough in its proper lace, is to the last degree deceptive and false hen placed before the public as a means of inncing business.

The general public do not know, but every well-informed insurance agent must, that the soundness and strength of an insurance company cannot be determined by any comparison of its assets with the face of its policies, irrespective of the age and terms of those policies. A company having \$10,000,000 assured on the ten-year endowment plan, and only \$5,000,000 on the whole life plan, must show an amount of assets for each \$100 very different from another company having the same amount insured, but on the whole life plan exclusively. Suppose each policy to have paid two premiums : the first company would to possess \$12 of assets for each \$100 then have assured, but the second company would be a much stronger one if it had only \$3' for each \$100 assured.

Another illustration, more applicable to the Suppose two life companies, each about case. twenty years in business. One of them may have assured pretty much the same amount from year to year from the first, thus making comparatively slow progress in increasing its business. From assuring an average of say \$200,000 per annum during the first five years, it may have grown to an average of \$400,000 during the last five years. The other company, from an annual average of \$500,000, now averages say \$40,000,000. It is manifest that the new and the old business on the books of the two companies respectively bear a very different relation to each other. No. 1 company will probably have received, and be required to account for, an average of ten premiums on each policy, while No. 2 will probably have on the average, only four or five. received. The policy-holders of No. 1 would be insecure with anything short of from \$20 to \$25 for each \$100 assured, while those of No. 2 would be quite safe with from \$6 to \$8.

As an instance of slow growth, and nece sarily large assets (\$17) for each \$100 insured, take the "State," of Worcester, Mass., which has spent twenty-two years in getting \$5,138,711 on its books ; and as an instance of more energetic management, take the "Knickerbocker," of New York, which has consumed but fourteen years in assuring \$44,270,805, and whose assets for each \$100 assured are only about \$6.50. And yet, unless the Massachusetts Commissioner greatly misleads the public, the "Knickerbocker's" assets are, proportionately to its liability, far greater than the "State's," being \$114.22, while the than the "State's," being \$114. "State's" assets figure at \$107.75.

If I correctly understand the design of Mr. Ramsay's figures, he would have his agents and the public believe that in all the above cases each company dught to possess about the same amount of assets for each \$100 assured; that the companies possessing the largest ratios are the best and safest, and that others should be avoided

A word as to notes. Every one will admit that a note is a better scenrity than a book account. How particularly Mr. Ramsay informs the public that "more than one-tenth" of a certain company's assets are in notes; and how blank is the pace opposite his own company's name, though it has a large amount loaned in the same manner, but devoid of the security and accuracy afforded by a premium note. It is singular how people with beams in their eyes can so clearly discover motes in the eyes of their neighbors.

No figures can be presented to the public giving single view of the respective companies, that a single view of the respective companies, that will afford a perfectly accurate test of their good standing. The table presented on page 88 of the last Massachusetts Report, however, furnishes the best index procurable. All of the eight com-panics whose names Mr. Ramsay uses so freely, submit their affairs annually to an official valuation by the Massachusetts Insurance Commissioner, and the result is obtainable at a trifling The table above alluded to shows the nett assets and the nett liabilities, and gives the ratios of the one to the other for each company during 1865, 1866, and 1867. If the Canada Life would

annual valuation, the public could get a better idea of its standing than by the ridiculous exti-bition it makes of "assets for each \$100 insured." What is the proportion of its present assets to its present liabilities? The last report of the Canada only showed its liabilities, as valued by some private individual employed by the company, as they stood four years ago !

The following table is from page 88 of the Massachusetts Report, and shows the standing, ex-clusive of capital stock, of the eight American companies referred to, on the 1st of January, 1868 :---. Patio of Acat +

	reatio of	Assets 10	r each \$100	
4	of 1	resent lin	billing .	
Companies.	1865.	1866	1007	
Etna	5118 86	\$120.97	\$100 70	
Atlantic	÷	129 64	13 69	
connecticut	144 30	145 03	141 96	
Equitable	100 98	114 22	105 63	
New York	125 28	129 65	115 00	
Phœnix	117 38	120 27	122 80	
Fravellers'		149 86	123 76	
Union	124 44	121 67	121 01	

The Atlantic, being a new company, appears a title below par in the above comparison; but it little below par in the above comparison; but it possesses a large guarantee capital, making its ratio, with capital, \$169.58. The ratios of some of the other companies would be affected slightly by including their capital stock, but a really sol vent company can always retire its capital unim The Connecticut, the Phenix, and the paired. Union appear to better advantage than they would had they made dividends earlier than four years from the date of their policies, as all the others have done. The main point, however, is, that by an independent governmental investigation, all are shown to have large balances on the right side of the ledger. Can Mr. Ramsay furnish any figures corresponding to the above for these or any other years ?

As to low rates, of which a special point is made, all insurance men know that when a com pany lowers its rates, it correspondingly lowers its security, and renders its ultimate solvency more or less doubtful. To adopt rates about 2 per gent lower than either the oldest and strongest, or the youngest and most reckless of English of American companies presume to venture upon, is left to the Canada alone ! It would be fairly en-titled to the glory were its capital adequate to the risk ; but where institutions with millions of urplus funds and wide experience stand back, it s to be regretted that any ordinary set of cap alists should make Canada the exclusive field in which to try so hazardous an experiment.

1 enclose my card, Mr. Editor, and remain Truly yours, Montreal, Feb. 27, 1869.

REDUCED RATES AND OVER INSURANCE.

Editor of the Canadian Monetary Times.

DEAR SIR .- An "Agent" in one of your recent numbers complains that some Companies are cutting down fire rates and that the tariff is a dead letter. I am glad to say it is, for it was full of errors, and was only valuable as to giving the construction and locality of buildings. Now, as to rates; I am convinced that it is not always the highest rate that pays a company the best, but the care displayed by an Agent in the selection of risks, is much more important ; first, by ascertaining the character and standing of the party owning or occupying the property; next, that of those by whom the property is endangered, and by carefully explaining to the person that he can only insure two-thirds of the actual value; he being his own insurer for the other one-third. I am aware that this is often not done, as I have frequently been told "such a company will teke any amount I will give them." The reply is a very simple one, "they may take your premium, but would not new your more than your loss of submit its accounts, in like manner, to an official two-thirds of the value." For instance, if the

cash value of a property is \$4,000, no company will pay more than \$2,667. I am satisfied that if these precautions were taken, many fires might be avoided. I could mention several fires in this eity within the last twelve months, where the property was largely over insured. ess, like every other mercantile transaction. must be based upon careful and prudential prinaples, and I am sure my commercial friends will hear me out in saying that it is not by the apparent high rate of profits upon any business transaction, but the uniform care with which the existomers are selected that success depends, and that the most successful business men are those who, content with a moderate profit, will only have dealings with reliable parties, and not with those who do not care whether they fail or not, or what price they may for goods; so with insurance, a man doing an unprofitable trade will often let the property burn if he sees it to his advantage; and cares little for the rate he pays. A serious drawback to placing insurance upon a legitimate footing is the anxiety of some companies to obtain risks upon any terms and the employment of persons not connected with the office to canvass. Many of those men never expect to get more than their first commission, and consequently care little as to the character of risk taken.

I remain, dear sir, yours truly, INSURANCE. TOBONTO, Feb. 27, 1869.

Commercial.

Montreal Correspondence.

(From our own Correspondent).

Montreal, March 1, 1869.

I write to you a day in advance of my usual time as the mails are so uncertain, the train from your city which left on Saturday morning not having arrived, and the English mail from Port and which arrived there on Friday is not expected till some time to-morrow. From this you can imagine the state of blockade we are in; the country roads are impassable. This state of isolation has caused a dullness in every branch of trade, and as there seems no prospect of an improvement for some days to come, we must look forward to continued dullness. There is some talk in town of getting up a new branch of Commerce, viz., shipping ice to the East and West Indies. The idea is very feasible. At Longeuil large ice warehouses could be crected at slight cost, the site of the old Grand Trunk sheds could be had cheap, and the wharf could be put in repair at a moderate rate; the water is deep enough to load vessels of moderate tonnage, such as would be required for the trade, and the ice is on the spot only requiring cutting and warehousing. The uestion then arises why should not Canada be able to compete in this business with Boston, which has to draw her supplies from inland lakes some of which are over 70 miles distant.

PRODUCE. - I have to report an exceedingly quiet market and prices purely nominal. Not of flour is fully ample for our own local wants, and as the European markets are dull, and it is a well known fact that should a favorable turn take place in them, there is plenty of stuff ready for shipment at the leading exporting ports, the tendency naturally is to a feeling of quietness. The rapidity of telegraphic reports between this continent and the Old World has had the effect of placing the markets of America and Europe on one basis, and operators know their chances almost as positively as between this and your city.

In provisions there has been a falling off in the of pork, and dressed hogs would not bring Drice over \$10.25 for heavy weights. I cannot account for this decline as the stocks in the country are not heavy and prices in the West are firm. Cattle ronto to have not sold briskly as the butchers are fairly per bbl.

supplied. For butter a fair inquiry has recently sprung up, for the States and extra qualities have been picked up at full rates, the stock here is Lard is very active and scarce. light.

GROCERIES .- The only movement of consequence in the market is in Sugars and Molasses. a steady advance has occurred in raw and refined Sugars and also in Molasses. Cuba Sugar is held at 10 c, Barbadoes 10 c., Porto Rico 10 to 11c., and holders are not anxious sellers, at these rates. For Molasses, Centrifugal have reached 324 to 35c. Claved 35 to 37 4c. The market closes firm at ex-treme rates. Tobacco, Montreal manufactured, is in good demand, and our manufactories are fully employed. Teas and other staples are very quiet.

IRON AND HARDWARE. -Business is dull, owing chiefly to the blocking up of the country roads There is no change in prices, with the exception of Tin Plates, which have advanced fully 50c. per box; this is owing to the rise in England.

Toronto Market

There is little change in the state of the market since last week. A fair business is being done in Groceries at steady prices. In Dry Goods Boots and Shoes, etc., preparations are being made for the spring trade.

PETROLEUM, -- We are glad to learn that there is some inquiry from Germany for Canadian oil. It is expected that a considerable export trade with Europe will ensue.

GRAIN.-Wheat - Receipts by cars, 14,940 bush., and 26,000 bush. last week. The market continues dull. Spring is strady, holders asking 96c to 97c; very little offering, and no late sales. Fall is dull, and offering at 98c to \$1.00, but there is little demand; a few cars sold during the week at \$98c to \$1.00. Barley-Receipts, 624 bush., and 2,000 bush. last week. There are a number of small lots offering at \$1.31 to \$1.33, and on the street the latter p ice was paid. Pease—Receipts light; on the street, 80c to 83c is paid, and these figures are asked for car-loads, but the demant is slack, and the general quality inferior; no sales. *Oats*—Receipts 2,600 bush., and 600 bush. last week. The market is dull; car-loads are offering at 50e to 51c, with little enquiry' Seeds-Timothy is quiet at \$2.25 to \$2.50; Clover is selling in small lots at \$6.85 to \$7.10 for good to prime seed ; Flax \$2. White Beans-A considerable business has been done in car-loads within a recent period ; they are now worth \$1.75 to \$2.15 per bushel.

FLOUR. - Receipts, 2,200 barrels, and 2,389 last week. Some business was done in No. 1 Superfine at \$4.00 to \$4:10, the market closing with sellers at \$4.10, and buyers of round lots at \$4.00. Sales : 100 barrels at \$4.10 in store ; 100 barrels at same price, free of winter storage ; 200 barrels at \$4.05 in store ; 200 barrels at \$4.00 at a point west ; and 100 barrels at \$4.00 free in cars. Extra—Very little doing ; a lot of 500 barrels reported sold on p.t., supposed to be about 84.50. Nothing doing in other grades. Oat-meal—There are buyers of 100 barrel lots at \$5.60; no sellers.

FREIGHTS .- Rates by Grand Trunk Railway withstanding the stoppage of trains the supply Flour to all stations from Belleville to Lynn, inclusive, 35c., grain per 100 lbs. 18c. ; flour to Brockville and Cornwall, inclusive, 43c. grain 22c. flour to Montreal 50c. grain 25c. ; flour to all stations between Island Pond and Portland, inclusive, 85c. grain 43c. ; flour to Boston 90c., gold, grain 45c. ; flour to Halifax \$1.10, grain 55c; flour to St. John \$1 02. Boxed Meats to Liverpool per gross ton 80s. ; lard or butter in tinnets 85s. ; Pork 11s. per tierce ; flour 5s. 6d. per barrel ; grain 12s. per 480 pounds. Rates by Great Western Railway—Flour, Toronto to Suspension Bridge 25c, gold ; thence to New York, 92c. U. S. durrency per bbl. ; to Boston \$1.02. Grain to Bridge 13e., gold: thence to New York 47c, U. S. currency; to Boston 51c. Grain, To-ronto to Detroit, 18c. ber 100 lbs; flour 35c

1	Trade of Montreal.
	The following is a summary of the import and export trade of Montreal in 1868:
	Total value of imports to Dec. \$1,
	1868
	Total value of imports to Dec. 31, 1867
	Decrease
	This decrease is caused more by the falling off
	in the value than any decrease in the 'quantities. The same holds good of the customs' duties, which were:
	1864
	1865
	Showing a falling off of nearly one million dollars as compared with 1867.
	In the export trade the Custom House returns in the face of these shew a considerable increase,
	being :
	Exports 1st Jan, to 31st Dec., 1868\$16,898,554 Exports 1st Jan, to 31st Dec., 1867 15,444,745
l	 A second sec second second sec
	Increase
	great increase in the amount of silver exported, which was in
	1868
l	1867
l	Increase
	Deducting this specie from the whole exporta- tion of 1868, we have a falling off in merchandise
	of \$793,684. The chief falling off is in wheat,
	which is \$650,000. There is also a falling off in the exportation of barley, oats and peas, and a
	further cause is to be found in the depreciated
	value of flour and catmenl, to the extent of nearly \$1,500,000. Ou the other hand there has
	been a considerable increase in minerals, live
	stock and manufactures :

The Titusville *Herald*, in its review of the oil business for the month of January, says, touching

The Production .- "The mild weather that prevailed during nearly the whole of the period under review, allowing the whole to be worked almost as in the summer season, and the finding of seveas in the summer season, and the many of seve-ral moderately productive wells, have had the effect of slightly enlarging the production. The average daily, yield for the month was 10,192 barrels of 43 gallons each, an increase of about 450 barrels per day from the average for December. But very little addition was made to the product by the starting up of old or ahandoned wells of small producing calacities, and from torredoing and other means of resuscitating wells, the increase was on the whole comparatively inconsider-able. Near the confluence of Lower Cherry Run able. with Oil Creek, on Charley run, near Oil City. on Bull Run and in the Pleasantville district, eight wells were struck, the yields of which ranged from 50 to 125 barrels per day. Other wells, with less in portant producing capacities, were found in different parts of the region. From the

merican anuary, ch \$100 IV. 1867. \$122 73 99 64 141 96 105 63 115 09 122 80 123 76 121 01 ppears a but it ; but it king its of some slightly ally soland th ey would ur years ie others is, that tigation, the right nish any these or point is D a comy lowers solvency about 20 trongest, nglish or upon, is airly ente to the llions of back, it of capi-field in nain W. ing, ex-

last named district the shipments to Titusville, Pithole and Miller by two pipe transportation lines and to Titusville by teams during the month, reached an aggregate of 76,000 barrels, but as the stock at the wells was reduced 9,000 barrels, the total product for the month was 67,000 barrelsan average for 31 days of 2,161 barrels. The pro-duction of Church Run and the wells in the immediate vicinity by the receipts by pipe line and teams at Titusville, and the difference in stocks, reached an average of 500 barrels per day for the month.

"The fellowing table shows the total production for January, and the average per day :

Total shipment of crude for January of barrels, of 45 gallons each.....bris. Add to reduce to bris. of 43 gals. each........... 292,965

brls. 315,953 Total production during Januarybrls. Average per day for 31 daysbrls. 10,192

" The Development and the Territory. -The development has not been attended by the finding of new deposits of petroleum, nor have any large producing wells been struck, but yet it is considered satisfactory, as a large proportion of the wells completed produce in paying quantities, and very valuable additions have been made to the territory on the outskirts of the districts that were producing at and previous to the publication of our last report. The total number of wells completed during the month was about 53, of which 35 were located in Pleasantyille District, one at Tidioute, and of the remaining 17 most were Iccated along Oil Creek, at Shamburg and near Oil City-only three having been completed along the River of Reno. Of the 53 wells completed, fully 42 and possibly more, from all appearances, proved pecuniarily successful. The most import-ant feature connected with the development, is the large decrease in the number of wells being drilled. The total number on February 1st was \$41, against 373 on the 1st of the previous month decrease of 32. This decrease was caused principally by a large number of wells being completed. as 21 new wells were commenced during the month. The territory in the vicinity of Church Run, which was scarcely thought of for a year previous to January 1st, is again attracting attention, and several farms in its vicinity have been secured and leases have been given on them. In all other productive parts of the region the demand for territory is good, but this is particularly the case in regard to certain tracts at the northern and southern termini of the Pleasantville District, on Lower Cherry Run, on Charley Run, and at Parker's Landing on the Allegheny River. At the latter place we learn that operations have been commenced on ten leases, and six or seven wells are being drilled. The largest yield from one well is 25 barrels per day. This district is about fifty miles south of Titusville."

Hallfax Market.

BREADSTUFFS. --- Feb. 16--- We have to report a continued dullness in Flours for the past week .-The demand which is entirely for the better des cription of supers is a small local one and quotations are purely nominal, lower prices having been We quote white wheat extra (fall) \$7. accepted. 25 ; fancy \$6.50 to \$6.60 ; bakers' strong \$6.30 to \$6.40; super. \$5.90 to \$6.00; No. 2 \$5.00 to \$5.50; middlings \$4.25 to \$4.50; Pollard's \$4. 25 to \$4.35. Rye \$5.00. Oatmeal \$7.50 to \$7.60. Cornmeal K. D. \$4.25 to \$4.40 ; F. G. \$4.10 to \$4.25.

PROVISIONS .- Pork is held at higher figure without enquiry.' At auction yesterday P. E. I. realized \$21.00 to \$18.00 cash, for mess and prime respectively ; the lots were rather indifferent.

WEST INDIA PRODUCE .- Sugars are in request at higher rates with small receipts. Molasses inactive at former quotations. Run tends down-wards, 55c. has been accepted for round lots of

Demerara. Coffee continues dull. Sugar V. P. 9åc. ; Porto Rico 8å to 8åc ; Cuba 8åc ; Barba-does 8ås ; Coffee-Jamaica 13 to 15c ; St. Domingo 10 to 12c.

FISH AND OIL .- Are still active and improved. We quote :--Codfish (large shore) \$4.50 to \$5.00 small \$3.60 to \$3.70; Mackarel No. 1 (L.) \$18.00; No. 2 (L.) \$15.00; No. 3 \$11.00. Herring, shore (split) \$4.50; round \$3.25 to \$3.50.

Driving Away Commerce.

How excessive taxation results in the reverse of that contemplated is being realized in England. The establishment of lines of steamers between Havre and the United States has had the effect of depriving sailing vessels, which carry American products to France, of return cargoes; and the custom has been to cross the Channel to a British port, chiefly Newport and Cardiff, for return cargoes, generally of railroad iron and coal. It has been found, however, that the expense of shipping these cargoes owing to the heavy British port charges, pilotage, light dues, brokerage, &c., is so onerous as, added to the expense at the French port of discharge, to eat up the profit on the return freight. To remedy this, one or two British companies at Havre are procuring from England argoes of iron for transhipment to vessels wanting freight to the States. Two steamers lately arrived at Havre with cargoes of rails for the American ships "Halcyon" and "Lady Blessington," both bound to New Orleans, and others were expected to follow shortly. If the undertaking succeeds—and there is a good prospect for it— Havre will become the depot for British goods destined for American and other ports, and ves sels that hitherto resorted to the United Kingdom for return freights will procure them at Havre instead. This new phase in the British carrying trade is not at all relished by the business people at the places so seriously affected, and they loudly denounce a suicidal policy, which induces British subjects to assist in extending the trade of foreign ports at the expense of their own-a policy which British shipowners have so long and loudly complained of. If produce can be taken from England to Havre, and then transhipped to a foreign port on better terms for the ship than when shipped in England, it shows that the maritime laws of the latter country are behind the age, and the fact contains a warning which British lawmakers will do well not to neglect, if they desire the prosperity of such an important industry.

THE Commission is appointed to construct the Interco Ionial Railway five notice that they are now prepared to receive TENDERS for THREE FURTHER SECTIONS of the line

Section No. 5 will be in the Province of Quebec and will extend from fortymiles East of Riviere du Loup, at the end of Contract No. 2, to the Sixty-sixth Mile Post, near Rimouski, a distance of about Twenty-six miles.

Rimouski, a distance of about Twenty-six inlies. Section No. 6 will be in the Province of New Bruns-wick, and will extend from the Easterly end of Contract No. 3, opposite Dalhousie to the West side of the Main Post Road near the 45th Mile Post, Easterly from Jacquet River, about Twenty-one miles. Section No. 7 will be in the Province of Nova Scotia and will extend from the Southerly end of Contract No. 4, near River Phillip, to Station Fifty at Folly Lake, about Twenty-nor miles.

Plans and profiles with specifications and plans of con-tract will be exhibited at the office of the Board of Works, Toronto, and at the offices of the Commissioners at Ottawa, Rimouski, Dalhousie, St. John, and Halifax, on and after the FIFTH day of March, 1869, and SEALED TENDERS. the FIFTH day of March, 1869, and SEALED TEXDERS, addressed to the Commissioners of the Intercolonial Rail-way, and marked "Tender," will be received at their office in Ottawa up to SEVEN o'clock, p. m., on the TWENTY-NINTH day of MARCH, 1869.
