THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Rates of Premium quite as LOW as security to the Assured; and safety to the Office,

will admit of.

The following are some of the advantages offered by this Society:—

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One-half of the Premium for the first five years may be paid by the Assured's own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured. Insurers can at all times demand, as a right,

Insurers can at all times demand, as a right, a Loan to the extent of two-thirds the emount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force. This important advantage removes the feur so many entertain of being obliged, through pecuniary emberrasment, to let their Policies lapse, and at a time such a provision is absolutely needed for their families.

No Charge for Stamp Duty, nor for Medical Examination.

No Charge for Stamp Duty, nor for Medical Examination.

The Bonuses divided Annually, either in Cash, Reduction of Premium; or in addition to the sum Assured; whichever of these three ways the Assured may such year desire, after being a Policy holder for Four Years, at which period a Bossas is parable for the Four Years—Annually afterwards.

THIRTY DATS allowed after each Payment of Premium becomes due, without Forfeiture of Policy.

The General Agency for the British North American Colonies being established in Montreal, RISES will be accepted by the General Agent and Temporary Policies at once granted.

The Local Board moet regularly at the Office; and by them the business of the Colonies conducted, thereby affording to the Assured every facility.

conducted thereby another inciding to LOAMS will be Granted and LOSSES PAID, at the General Agency without referring to London.

it is no exaggeration to state, that the members of the "Lisague," consist largely of men of high ence, unsullied patriotism, and a fair than to appleace, which alone would constitute influential members of society. They were moved to organise themselves and adopt certain political axioms for their guidance, less with a view of acquiring electoral influence than from a desire to advance the material interests of Colony, for they proclaimed themselves Con-ectionism as contradictinguishing themselves on those who looked contexts further into from those who leoked conswars farther into futurity. They applied themselves especially to practical questions, and they must have been gra-tified with the voluntary approval of their plans, which flowed in from the least expected quarters. Every village, hamlet, and township in Canada, where educated and reflecting men resided, sent forth its note of hearty accordance with the maxims they inculcated. They felt, as all practical men must do and we lancy we belong to that class that Canada deeply needs, both is politics and commerce, a freer development of the public

and commerce, a freer development of the public mind. The events of April, 1849, had disabused their imaginations from the impressions earlier stamped, that the Upper House possessed the independence or influence, which Englishmen presume to be inherent in the House of Lords. They turned to it as a shield to save them from the surprise of an opponent. They found but a weapon to pierce them in the most vulnerable quarter. It was prostituted to serve a vile pur-goes, and it forfeited that moral force, which, see lost, in impossible to secover. Feeling an thinking thue, it is not strange that the ment; and, in the proposition for an egislative Council, they saw that element embedied. It may appear paradoxical that men, essentially Monarchiate, should express a preference for Elective Institutions in this Province, and labor seriously to substitute an Elec-tive Upper House, in fleu of the one now existing in virtue of nominations by the Crown. It would truly be a paradox if the Crown had the ed exercise of the Royal Prerogative; but since Responsible Government has powers and privileges of the Crown have been usurped by an official oligarchy, without enlarging the liberties of the subject ; and, as result, we see the Governor a puppet in the ada of the Ministry—the Legislative Council hands of the Ministry.

Itable, upon any important vote, to be smoulded to their will—and the representative branch a confederation of office jobbers. We state these facts in all serrow and humiliation, for we confess that it would be impossible, upon any known principle of legislation, for the Imperial Parliament to have against a would be entered into by the Province that would embarrass it in meeting its present its allies.

CANADIAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

A motion of Mr. Notman to refer a petition of certain inhabitants of the Niagara District for a new branch to the Walland Canal from the Lowe new branch to the Welland Canal from the town of Niagata, was opposed by the Government on the ground that the petition involved a great of public money. Mestre, Merritt and Hineke said the Government had no money to spire for such public improvements, and if they had, there were other parts of the country where it might be more advantageously expended. If the desired "lateral eut" were proposed to be made by private means they were willing to charter any company for that purpose.

they were willing to charter any company for that purpose.

Mr. She wood (of Toronto) supported the motion for reference, and entered into a general condemnation of the policy of the Government in regard to public improvements, to which they were altogether opposed. He charged them with being a first of inquiry, least the Report of the Committee the responsibility of refusing to enter upon it. During this discussion, which embraced almost every thing far and wide before it was gut through, Mr. Sherwood stated that he had no desire or expectation of continuing in public life beyond the term of the precent Parliament. A published correspondence relative to the position in which Mr. Boulton stands towards his constituents was also brought up.

those midden expansione, and equally sodies contractions,—of which the present system permits,—would soon be at an end. Paper promises, under the present system, can be multiplied indefinitely, almost at no cost. the proposed system, the Banks must have purchosed, and paid for, Government Stocks, to be deposited as accurity for every dollar they have even before it is issued. If a Bank fails, the Securities are sold, and the only loss the bill holders can sustain will only be whatever depreciation may be realised in the sale from the parfixed value of the Securities. The system is certainly better calculated for a country where the Political Institutions are stable, and where the not very distant, future threatens no extensive mutation of them, than for one where the very opposite conditions exist. In the latter case, want of confidence will infailibly cause depreciation of the public Securities; and where every man's interest is more or less bound up with the maintenance of the existing system of Government, as it is where every man is personally interested in unholding the value of the public Securities, political change becomes a thing almost impossible. The greater the change, the more difficult it will be to effect; and we need not shat our eyes to the fact, that as sure as mun must die, Colonies are destined to become independent. The inevitable difficulties connected with that great event, come when it will, and in what way Providence or the folly or asgacity of man shall determine, would be a thousand fold increased by the existence of a system of Banking based on the public debts, or the supposed ability of the Government to pay them, of the Province. It, therefore, becomes a question, whether a system which may be admirably swited to a normal and permanent condition of political society be equally well or at all adapted to the condition of a Colony, which must, at some future day, rise into the position of an Independent State.

The House again went into Commit see on the Common School Bill of Upper C-made. Col. Prince renewed his objections to the discretionary power proposed to be vested in Municipalities, to establish separate schools for colored children. Mr. J. H. Cameron complained that one denomination should have the right to establish separate schools while others had not. The 19th clause was so amended that the Municipalities are required, on petition of twelve heads of families, to establish separate schools for Profestants, Roman Catholies, or colored persons.

HALIFAX RAILWAY.—We have been favoured by a gentleman of this city with the following extract of a letter received by him from a highly creditable source in Halifax. The Mr. Campbell alluded to is the gentleman who lectured on the subject at Newcastle, in the early part of the last month:—

*I have seen the original letter from Mr.

Campbell.

He writes that Lord John Russell, Earl Grey, etc., who met the deputation of Lords Stanley, Montengie and others, were ready to give a guarantee to the extent of three millions, at the rate of four per cent. "— Quebcc Gazette.

THE WHEAT .- We have seen several fields wheat in this vicinity within a day or two, and in no previous year have we known the promise of a heavy crop to be greater than now. A field sown after wheat, which last harvest yielded somea heavy crop to be greater than now. A new so wn after wheat, which last harvest yielded something over twenty bushels to the acre, will not it is anticipated, under thirty bushels this year. The stalks stand about five feet high, at an average, the heads are well filled and the grain plump. A field adjoining, where the clover was ploughed in the last season, will probably yield forty bushels to the acre. These are truly beautiful fields. In the case of the latter the wasselment of sowing by parts of the field. A warer department of sowing by parts of the field. A warer department of sulfifletent sult. Harvest in this section will not be delayed, it is thought, beyond the 16th or 20th of the month, which is as early as usual. We think that what is said of the two instances spoken of above, may be applied to the crop generally hereabouts.

The Case of Frof. Webster.

Boston, Friday, July 5.

The wife and three daugsters of Frof. Webster appeared before the Council this siternoon, and pleased in aid of the petition of their husband and father for a commutation of punishment. Mrs. Webster said that she had been unwavering in the held of the high had been unwavering in the for Dr. Putnam and stated that they, having grave doubts on certain points in the confusion, had consulted separately three eminent surgeons, and a document had been prepared for him to communicate tay Prof. Webster. Before the document was received the doors were closed, but it was understood that one of the questions propounded was, whether such a stick as that described in the confession would give such a blow as would exuse death in ten minutes. All three considered it would not. The other questions are stated to have been answered adverse to the confession. The opinion is universally expressed that no commutation will be granted.

TESTIMONY FROM HIGH AUTHORITY.

From the Editor of the N. Y. Micros, Aug. 9, 1846,
PERPECT CURE AND NO MISTAKE—We are aloust to write a voluntary statement of a cure recently effected by Dr. Wistar's Balsam of Wild Cherry, which the Editor of this paper is willing to give under his own signature. We make it pro bono publice, as we have never sent the propietor of this invaluable medicine, and know nothing at all about him. About four weeks since int of the compositors in this office was suffering so hadly from a cough, that he was unable to steep nights, and two weak to stand at his case. He became very pale and this, and gave avernptons of failing a victim to quick consumption. We recommended to him various medicine which had on effect. Finally we gave him one bottle of WISTAR 8 HALSAM OF WILD CHERRY; it inforded him inner-distingually the standard of the composition of a cough. These are facts, and further particulars may be learned at this office. We should add that the cough was accompanied by profuse splitting of blood.

Look out for imitations and counterfeits. Remember the original and only genuine article always bears the written signature of I. BUTTS upon the outside wrapper. Originally prepared by Williams & Co. Philadelphia, now prepared and sold, wholesake and retait, only by SETH W. FOWLE, Boston, Mass, to whom all orders should be addressed, and for sale by the agents everywhere.

ANALYSIS OF THE ST. LEON WATER ANALYSIS OF THE ST. LEON WALEN.

I HAVE submitted to analysis the Water from the
Source of St. Leon, and find it to be strongly saline.
It contains chloride of acdium in large quantity, with
magnesia and lime, partly as carbonates, dissolved by the
excess of carbonic acid, and partly as chlorids. Like
most of the other saline waters of the country, it contains
bromine and iodine; in addition to which I have detectet, in small quantities, salie of barytes and strontia, which
had hitherto been met with only in the waters of Vareniner. In its general characters, it is alied to the Sources
of Castags, Plantageuct, and the Intermitten of Calcage. Old Scotch Whiskey, in puns, "Campbellion; and "Jura" Upper Canada Whiskey, in barrels

Analysis of Mineral Water of Point du Jour

Analysis of Mimeral Water of Point du Jour.
From Mr. Hunt's Analysis of the Water of the Mineral Spring at Point du Jour, near L'Assomption, I inter that it will prove a valuable addition to those already discovered in Canada.

It appears to be well adapted to cases of scrofula, diseases of the skin, gout, rheumatism, and dyspeptic complaints generally.
Mineral Water to be useful should be taken for some time, and when it seems to lose its effect, that from another apring should be substituted; and one not agreeing with an individual, another may act kindly and effectually. Weak and delicate persons should seek the advice of a physician with regard to the employment of these waters.—It would be a great blessing to the society if these productions from the laboratory of nature were to supersede the vile and heterogenous compounds, with which the world is cursed, under the name of "Patent Medicines."

Wh. Nalson, M. D.

Wn. NELSON, M, D. Iontreal, 11th March, 1850. I certify that I have used the Point du Jour Spring Water in my practice and have found it to act as a mild purgative and alterative. From the quantity of Iodias it contains/it will, I doubt not, be found useful in scriptions diseases and in some form of syphilis, in addition to other remedies.

Sin.—Since you are desirous to ascertain the effect which the Waters of the Point du Jour Springs have produced on myself. I must inform you, that I have used them medicinally at their Source, and have found them highly salubrious. I was at the time so affected by the consequences of a severe disease of the Digrestive Organs that my Physician judged it right to suspend for a time all active remedies, even for the repression of Dyspessia and an absolute Retention of the Bowels, under both of which I was suffering severely. He prescribed for my relief the Mineral Waters, and I made use of those of the Point du Jour, as being the nearest. I was at the time so weak, that it was wutu anti-uity I kept my feet. However, at the expiration of three weeks, I was restored by using the Waters. These Waters are of gasecous nature, commaning a large quantity of salise particles, and agree-

using the Waters. These Waters are of a gaseous nature, containing a large quantity of saliuse particles, and agreeable in the taste—taken in a large dose they are strongly axative, but their purgative properties are unattended with gripungs,—those even who have been using them have not been weakened or enervated in their constitution in consequence; upon the contrary, by using them they find their appetite increasing, and their digestion readered more regular. After a dose of 3 or 4 four glasses, I found that they had the effect of increasing the unimary
