PREAMBLE

Since January 1, 1989, the Export and Import Permits Bureau (EIPB) has adopted the use of the Harmonized Commodity Description and Coding System (HS) to classify and identify products as well as, to provide information concerning the import or export control of the product as described on the Import Control List (ICL) and for the export of textiles and apparel goods to the USA pursuant to the Free Trade Agreement. As a result, a concordance was developed between the HS and ICL and goods covered by the FTA. For this purpose a 14-digit coding scheme was perfected to identify these products.

Most products are identified by the first 10 digits of the HS followed by four zeros. However, some products like dairy products other for example, do not utilize the first 10 digits of the HS as the HS does not meet the coverage of goods described on the Import Control List.

SECTION C

Carbon and Specialty Steel

1) Carbon Steel

Carbon steel products including semi-finished products (ingots, blooms, billets, slabs and sheet bars), plate, sheets and strip, wire rods, wire and wire products, railway-type products, bars, structural shapes and units, pipe and tubes, but excluding the specialty steel products referred to in item 81 of the Import Control List and described hereunder.

2) Specialty Steel

Specialty steel products: stainless flat-rolled products (sheet, strip and plate), stainless steel bar, stainless steel pipe and tube, stainless steel wire and wire products, alloy tool steel, mold steel and high-speed steel.

Type of Control:

Surveillance from all sources.

Unit of measure:

Kilogram (KGM)

Note:

The first ten (10) digits of the codes for carbon steel and specialty steel are in agreement with the international HS import classification number of the Customs Tariff.

INTRODUCTION

Beginning January 1, 1993, the Export, Import Permits Bureau (EIPB) will adopt the use of the Harmonized Commodity Description and Coding System (HS) to classify, identify and control imports and exports of textile and apparel products.

The objective of this conversion is to align the restraint system more closely with the HS which is used internationally for trade classification purposes, and which is also used to develop domestic market statistics.

Canadian importers will need to refer to the relevant HS codes when applying for permits for the importation of textiles and clothing in 1993, irrespective of whether the product is to be imported from restrained or non-restrained source.

There are two major modifications imposed by the HS:

- (a) the elimination of unmatched coordinate set, where each component needs to be classified separately; and
- (b) the creation of a category for babies' garments.

In addition, ensembles (matching set) will be separated by gender, with male ensembles grouped with fine suits, jackets and blazers, and female suits, ensembles, jackets, blazers grouped with dresses and skirts. Woven shirts (excluding tailored collar shirts for men's, boy's and male children), blouses and similar articles will be distinguished from knitted items.

Under the HS, worsted fabrics will be defined as woven fabrics of combed wool or fine animal hair, or other woven fabrics mixed mainly or solely with combed wool or fine animal hair. Polyester/cotton fabrics will be defined as woven fabrics of cotton containing less than 85% by weight of cotton mixed mainly or solely with polyester staple fibres, or polyester woven fabrics of polyester staple fibres containing less than 85% by weight of polyester staple fibres mixed mainly or solely with cotton. Polyester filament fabrics will be defined as woven fabrics of polyester, or other woven fabrics mixed mainly or solely with polyester filament.

This Handbook is designed and arranged into sections to assist you in classifying and identifying a textile or apparel product, as well as, to provide information concerning the import or export control of these products.

FREE TRADE AGREEMENT (FTA)

IMPORT

With the implementation of the FTA on January 1, 1989 the import from the USA of apparel goods as defined on page E2-2 are eligible for FTA tariff rate reductions up to specified Tariff Rate Quota (TRQ) levels. TRQ's provide access to the FTA rates of duty for a certain level of goods which do not meet the rules of origin.

Allocation criteria for TRQ

Importers should refer to Notices to Importers Serial No 358 dated December 19, 1988 or contact the Export and Import Permits Bureau at (613) 996-3711.

The paragraphs that follow provide an explanation of the procedures for the permit issuance as they relate to the import of textile and made-up articles and apparel goods pursuant to the FTA.

Import from the United States:

For apparel goods as defined on page E2-2 imported from the USA and eligible for FTA reductions, the import permit will indicate in the "other terms and conditions" block the equivalent square meter quantity eligible for TRQ. Should the TRQ levels be reached, the import permit will indicate "O" for the quantity eligible for TRQ.

The FTA duty rate will be levied when the import permit is presented to Canada Customs officials at the port of entry.

Imports from Countries other than the USA:

Imported yarns (other than wool or silk yarn) and fabrics (other than silk) as defined on page E2-3 produced or obtained from all countries except the USA will require import permits. This enables the EIPB to monitor the fabric and yarn which enters Canada and is transformed into apparel, accessories, fabric and made-up articles. It should be noted that there is no fabric TRQ for US imports to Canada. Therefore imported yarn produced or obtained from countries except the USA will not be eligible for the FTA tariff rate reductions.

FREE TRADE AGREEMENT (FTA)

IMPORT

Apparel Goods

- (1) Apparel goods that
- (a) are cut and sewn in the free-trade area from fabric produced or obtained in a third country¹; and
 - (b) are not included in another item (on the Import Control List)

- (2) In this item,

"apparel goods" means goods provided for in Chapters 61 and 62 of Schedule 1 to the Customs Tariff;

"Canada" has the same meaning as in subsection 2(1) of the Customs Act; (Canada)

"free-trade area" means the area comprising Canada and the United States;

"third country" means any country or territory other than Canada or the United States;

"United States" means

- (a) the customs territory of the United States, including the fifty states of the United States, the District of Columbia and Puerto Rico, and
- (b) the foreign trade zones located in the United States and Puerto Rico.

¹ These are products that are designated category 15, other coated garments; category 19, miscellaneous apparel articles; and category 49, miscellaneous textile articles as found in section E3.

FREE TRADE AGREEMENT (FTA)

IMPORT

Fabric or Yarn

- (1) Fabric or yarn that
- (a) is produced or obtained in a third country¹;
 - (b) is not included in another item in this List; and
 - (c) is classified under any of the following heading Nos. of Schedule I to the Customs Tariff, namely, heading Nos. 51.08 to 51.13, 52.05 to 52.12, 53.06 to 53.11, 54.02 to 54.08, 55.09 to 55.16, 56.02 to 56.06, 58.01 to 58.04, 58.06, 58.08 to 58.11, 59.03, 60.01 and 60.02.
- (2) In this item,
- "third country" means any country or territory other than Canada or the United States.

¹ These are products that are designated category 29, other yarns and category 39, other fabrics as found in section E3.

EIPB IMPORT CONTROL SCHEDULE

The EIPB Import Control Schedule contains approximately 3300 EIPB control codes and the category/subcategory designated to textile and apparel commodities imported into Canada.

Unless otherwise indicated, classification to these goods shall be determined according to the terms of the headings and any relative notes to Section VIII and Chapter 42 and to Section XI and Chapters 50 to 63 of the HS, to the General Rules For The Interpretation Of The HS and to the Explanatory Notes to the HS.

Pages in the Schedule are numbered according to the HS Chapter number. The Chapters and the products they represent are listed below.

<u>Chapter</u>	<u>Commodity</u>
42	Handbags
50	Silk woven fabrics
51	Wool yarns and woven fabrics
52	Cotton yarns and woven fabrics
53	Other vegetable fibre yarns and woven fabrics
54	Man-made filament yarns and woven fabrics
55	Man-made staple fibre yarns and woven fabrics
56	Wadding, felt and non-wovens and special yarns
58	Special woven fabrics, pile, terry and tufted
59	Treated textile fabrics
60	Knitted or crocheted fabrics
61	Articles of apparel, knitted or crocheted
62	Articles of apparel, <u>not knitted or crocheted</u>
63	Other made up textiles

The Commodity Code is 14 digits long. The EIPB code is an 8 digit code, where the first 6 digits represent the headings and subheadings of the International HS. The IC code is a 2 digit code used for import control purposes. Digits 7 to 10 are used to identify textile and apparel products that have been described in more detail than at the 6-digit level. Digits 11 to 14 are set to a default of 0000. This 4 digit code is used to identify special products such as handicraft articles, or to identify other products that satisfy other special conditions beyond those that are described at the 10-digit level (see Section E5-Annex Codes).

The Description column is a hierarchial arrangement of Headings, Subheadings and EIPB import control items where textile and apparel products are described.

Classification of textile and apparel goods: are determined first, by satisfying the conditions described at the first level, followed by satisfying conditions at the next level. Each level describes different conditions than the previous level. A level change is indicated by one indentation to the right. A product is properly classified when there are no further levels describing the product. At this point, the Commodity code can be determined by locating the code under the Commodity column.

Revised February 10, 1993

These textile and apparel commodities are designated into appropriate groups and categories. Group I represents apparel products and Group II represents yarns, fabrics household goods and other textile articles. A category is a selection of textile or apparel products classifiable under specific headings of the EIPB Import Control Schedule. A subcategory is a hierarchial division of a category.

The category or subcategory designated for each commodity code is shown in the Cat. Code column.

The Unit Code specifies the unit of measure for textile and apparel commodities. This code may be different for some products imported from some sources. The unit of measure will be indicated in Section E6 if it is different from the one indicated in the Schedule. The abbreviations for unit of measure are explained below:

<u>Unit Code</u>	<u>Explanation</u>
DZN	dozen
KGM	kilogram
NMB	number
PAR	par

Listed below are helpful hints on how to classify textiles and apparel products provided for under the Harmonized System:

1. **Goods of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material that predominates by weight over any other single textile material.**

When a Chapter or a heading refers to products composed of textile materials of different kinds, those materials are aggregated together for the purpose of classifying similar products containing those materials mixed with others; the choice of appropriate heading shall be effected by determining first the Chapter and then the applicable heading within that Chapter, disregarding any materials not classified in that Chapter.

Examples:

- (A) A woven fabric composed of:

40% by weight of synthetic staple fibres,

35% by weight of combed wool, and

25% by weight of combed fine animal hair

is not classified in heading 55.15 (other woven fabrics of synthetic staple fibres) but comes under heading 51.12 (woven fabrics of combed wool or of combed fine animal hair), since the proportion of wool and of fine animal hair must, in this case, be taken in the aggregate.

Revised February 10, 1993

(B) A woven fabric weighing 210 g/m² composed of:

40% by weight of cotton,

30% by weight of artificial staple fibres, and

30% by weight of synthetic staple fibres

is not classified in heading 52.11 (woven fabrics of cotton, containing less than 85% by weight of cotton, mixed mainly or solely with man-made fibres, weighing more than 200 g/m²), or in heading 55.14 (woven fabrics of synthetic staple fibres, containing less than 85% by weight of such fibres, mixed mainly or solely with cotton, of a weight exceeding 170 g/m²), but comes under heading 55.16 (woven fabrics of artificial staple fibres). This classification is reached by determining first the relevant Chapter (in this case Chapter 55 since the proportion of synthetic staple fibres and artificial staple fibres must, in this case be taken in the aggregate) and then the applicable heading within that Chapter, in this example, is heading 55.16, the heading which occurs last in numerical order among those which equally merit consideration.

(C) A woven fabric composed of:

35% by weight of flax,

25% by weight of jute, and

40% by weight of cotton

is not classified in heading 52.12 (other woven fabrics of cotton) but in heading 53.09 (woven fabrics of flax). This classification is reached by determining first the relevant Chapter (in this case Chapter 53 since the proportions of flax and jute must be taken in the aggregate) and then the applicable heading within that Chapter which, in this example, is heading 53.09 since flax predominates over jute, the cotton content being disregarded.

2. **When both Chapter 54 (man-made filament) and 55 (man-made staple fibre) are involved with any other Chapter (50, 51, 52, 53), Chapter 54 and 55 are to be treated as a single Chapter.**

Example:

A woven fabric composed of:

35% by weight of synthetic filaments,

25% by weight of synthetic staple fibres, and

40% by weight of combed wool

is not classified in heading 51.12 (woven fabrics of combed wool) but comes under heading 54.07 (woven fabrics of synthetic filament yarn), since the proportions of synthetic filaments and synthetic staple fibres must, in this case, be taken in the aggregate.

Revised February 10, 1993

3. **When deciding if an admixture is mainly a particular textile material, regard is to be taken to the textile material which predominates by weight over any other single textile material in the admixture.**

Example:

A woven fabric weighing not more than 200 g/m² and consisting of :

55% by weight of cotton,

22% by weight of man-made fibres,

21% by weight of wool, and

2% by weight of silk

does not fall in heading 52.12 (other woven fabrics of cotton), but in heading 52.10 (woven fabrics of cotton containing less than 85% by weight of cotton, mixed mainly or solely with man-made fibres, weighing not more than 200 g/m²).

4. **Goods that contain material of equal amounts and which merit equal consideration in determining a classification are classified in the heading which occurs last in numerical order.**

Example:

A woven fabric composed of:

50% by weight of polyester staple fibres,

50% by weight of artificial staple fibres, dyed

is not classified in heading 5515.19 (other woven fabrics of polyester fibres), but comes under heading 5516.92 (other woven fabrics of artificial fibres, dyed), since the number for heading 5516.92 is a larger value than heading 5515.19 and so occurs last in numeric order.

5. **The following example will assist the user in classifying an apparel product, and in determining the corresponding EIPB import control code and product category:**

A men's shirt, 100% cotton fabric, woven construction and with a tailored collar

is classified under EIPB import control code 6205.20.00.11- Men's or boys' shirts, of cotton, woven, with tailored collar. This classification process begins by determining the relevant Chapter (Chapter 62- apparel made from woven fabric) and appropriate heading within that Chapter which describes men's or boys' shirts, i.e., heading 62.05. The next step is to classify the shirt fabric, in this case Chapter 52, woven fabrics that predominate by weight of cotton. Once this has been determined, the next step is to locate the subheading that specifies cotton under heading 62.05. The classification is then completed by determining the appropriate import control code for tailored collar shirts for men, in this case EIPB code 6205.20.00.11. The category corresponding to this import control code is 6 (or 6.0).

SUMMARY OF APPAREL & TEXTILE CATEGORIES

The Export and Import Permits Bureau has devised a category/subcategory numbering system that identifies each EIPB code uniquely. These categories and subcategories will apply uniformly across restraint agreements. A summary of the clothing categories and subcategories of Group I and a summary of the textile categories and subcategories of Group II are outlined in this section.

The Short Description column contains a brief reference to the commodities and categories they represent. The Category/Subcategory column lists the category and subcategory code assigned to the various commodities. The Long Description column lists the headings and subheadings, and describes, in general, the commodities that are subject to import control.

The short and long descriptions should not be used for the purpose of classifying textile and apparel products, this is the function of the EIPB Import Control Schedule.

IMPORT CONTROL INFORMATION

The following countries have restraints or export authorization in effect for most clothing and textile products. The products covered and the agreement items that refer to these products are listed for each country. For quick reference, the import control information for each source is sorted alphabetically by country. The product coverage is based on the category/subcategory structure and short description as outlined in Section E4. Users should pay particular attention to the footnotes for each agreement.

Note: For some countries, product coverage was not agreed upon at the time of publication. Import control information for these sources are indicated as proposed agreements. The user will be notified of any changes as soon as possible.

Import control information for quota sources, such as Cambodia, Laos, North Korea, Oman, Qatar, Swaziland and the United Arab Emirates was not available at the time of publication. Canadian importers will be notified when this information becomes available.

To determine if a product category or subcategory is under restraint from a particular source, search for the category code under the product coverage, column (B). If the category does not appear in column (B), then the product is not under restraint. If it does appear, the product is restrained and the corresponding Agreement Item can be found under column (A).

Note: Tailored collar shirts for children, sizes 2-3x, are exempt from restraint.

TEXTILE AND APPAREL GUIDELINES

These guidelines have been developed to ensure uniformity in classification of textile and apparel products that are included in the Import Control List, and to assist in the determination of the appropriate textile and apparel categories established for the administration of Canada's textile agreements.

Unless otherwise indicated, classification of textile and apparel products shall be determined according to the terms of the headings and any relative notes to Section VIII and Chapter 42 and to Section XI and Chapters 50 to 63 of the Harmonized Commodity Description and Coding System (HS), to the General Rules For The Interpretation Of The Harmonized System, and to the Explanatory Notes to the Harmonized System.

The following pages are sorted by category for easy reference. An alphabetical list of common apparel products together with the category/subcategory to which they are designated can be found in Index A at the end of this section.

These contents of these guidelines are subject to review and may undergo periodic revision.

GROUP I APPAREL PRODUCTS

Apparel goods covered by these guidelines are classifiable under headings in Chapters 61 and 62 of the HS and constitute Group I.

A partially manufactured apparel article shall be taken to include an article unfinished or incomplete (including cut or shaped fabric for making such articles), provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include the article presented unassembled or disassembled.

The classification of goods of Group I is not affected by the presence of parts or accessories. Where, however, the presence of these materials constitute more than mere trimming, the articles are classified according to the General Interpretive Rules to the HS.

Garments of Chapters 61 and 62 are for men's, boys' (sizes 8 to 18), women's, girls' (sizes 7 to 16) and children's (sizes 2 to 6X). Babies' garments, as provided for in headings 61.11 and 62.09, are of a body height not exceeding 86 cm (or the equivalent of 0 to 24 months).

Indeterminate or "unisex" garments, those which cannot be identified by gender (excluding babies' garments), are to be classified in the headings covering women's or girls' garments. Sizing, construction and styling (i.e., front opening overlaps left over right) are some factors which should be taken into consideration while determining whether a garment is identifiable as men, boys, women or girls.

Garments made up of different components will be classified according to the component which gives the article its essential character.

Garments are classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

Unless otherwise specified (i.e., suits, ensembles, ski suits, etc.) textile garments of different headings, packed and shipped as a set, are to be classified in their own headings even if put up for retail sale. For

example, a poly/cotton tailored collar shirt and a pair of wool pants packaged, shipped and sold as a set would be classified under separate headings and would be considered as two articles of clothing rather than one set.

GROUP II HOUSEHOLD AND TEXTILE PRODUCTS

Yarns, woven fabrics, household articles and other textile products covered by these guidelines are classifiable under headings in Chapter 42 and Chapter 50 to 63 of the HS and constitute Group II.

Group II is divided into three basic series- Series 20 for yarns, Series 30 for woven fabrics, and Series 40 for household and other textile articles. Each series is divided into several categories.

A partially manufactured household or other textile article shall be taken to include an article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include the article presented unassembled or disassembled.

The classification of goods of Group II is not affected by the presence of parts or accessories. Where, however, the presence of these materials constitute more than mere trimming, the articles are classified according to the General Interpretive Rules to the HS.

Household and textile articles are classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

Woven fabrics or woven fabrics made from yarns which have been impregnated, coated, covered or sheathed with gum, plastic, rubber or other substances, where such substances account for more than 50% by weight of the material, are not part of any category.

To assist in determining the proper classification of textile yarns and fabrics the following information would be helpful:

- a) fibre composition, and in the case of man-made fibres whether the fibre is filament or staple;
- b) kilogram weight of fabric per square meter;
- c) weave pattern; and
- d) the type of finish, i.e., unbleached, bleached, dyed, of coloured yarns or printed.

CATEGORY 1

GROUP I

COATS, JACKETS & RAINWEAR

Coats, jackets and rainwear, for men, boys, women, girls, and children, are garments generally worn over all other clothing for protection against the weather.

Garments of this category that can be divided into separate garments by means of undoing buttons, zippers or other convenient means of fastening, and can be worn independently of each other, will be treated as separate articles of clothing.

The phrase "thermal characteristics" means a textile product that is designed to protect the wearer against the cold.

Subcategories:

1.1 Coats

Garments of this subcategory include overcoats and similar articles extending to the knee or below (e.g. topcoats, greatcoats). Other garments include car-coats, capes, ponchos, cloaks and other similar articles (e.g. duffel coats, three-quarter coats). These products are made from knitted, crocheted or woven fabrics.

Garments of this type which provide protection only from the rain will be treated as rainwear of category 1.3.

Separately presented linings that are suited for garments of this subcategory or raincoats and other similar coats of subcategory 1.3, and possess thermal characteristics, will be treated as partially manufactured garments of subcategory 1.1.

1.2 Jackets

Garments of this subcategory include wind-cheaters, wind-jackets, anoraks and similar articles, that do not extend to the knee, and possess none of the thermal characteristics described in category 2. These products are made from knitted, crocheted or woven fabrics.

Garments of this subcategory manufactured from woven and knitted components rendering the garment reversible, will be treated as woven garments. Garments of this nature that provide protection against the cold, will be treated as garments of category 2.

Separately presented linings that are suited for jackets, anoraks and other similar coats of this subcategory, and possess thermal characteristics, will be treated as partially manufactured garments of subcategory 2.0.

Excluded are sportscoats, jackets or blazers of subcategories 3.3 and 4.2.

1.3 Rainwear

Garments of this subcategory include raincoats and similar garments of category 1.1. These products are made from knitted, crocheted or woven fabrics (Chapters 50 to 55, 58 or 60), treated to protect the wearer from the rain (water resistant or water repellent). If these garments provide protection from the cold as well as from the rain, they will be treated as products of category 1.1.

Separately presented linings that are suited for raincoats and other similar coats of this subcategory, and possess thermal characteristics, will be treated as partially manufactured garments of subcategory 1.1.

This subcategory also includes knitted, crocheted or woven garments manufactured from coated, impregnated, covered or laminated textile fabrics (headings 59.03, 59.06 or 59.07), where the textile component is 50% or more by weight of the material.

CATEGORY 2

GROUP I

WINTER OUTERWEAR

Winter outerwear, for men, boys, women, girls and children, are garments which have an outer shell manufactured substantially by surface area of woven textile fabrics, that are lined or filled (e.g. down or fibre filling, quilted lining), and are generally worn over all other clothing for protection against the cold. Brushed, tufted fleeced or napped linings weighing not more than 140 g/m² are considered not to possess thermal characteristics and, therefore, not to provide protection against the cold.

The weight of all textile components, including the lining, will be considered in determining the classification of products of this category.

Garments of this category that can be divided into separate garments by means of undoing buttons, zippers or other convenient means of fastening, and can be worn independently of each other, will be treated as separate articles of clothing.

This category includes ski suits, snow suits, snowmobile suits, anoraks, ski jackets, wind-cheaters and wind-jackets, bib and brace ski overalls, and ski pants and other similar articles (e.g. parkas, padded sleeveless vests, brushed and fleeced jackets and quilted shirt like garments with tailored collar), provided the criteria described above are met.

Ski suits are woven garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing. They consist either of:

(a) a ski overall, that is, a one piece garment designed to cover the upper and lower parts of the body, can have sleeves and a collar as well as pockets and footstraps; or

(b) a ski ensemble, that is, a set of garments composed of two or three pieces, comprising one garment for the upper part of the body (e.g. anorak, jacket or similar article), a waistcoat/vest, and trousers whether or not extending above the waist, one pair of breeches or one bib and brace overall; the "ski ensemble" may also include an overall and a type of padded, sleeveless jacket worn over the overall; all components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour, and must be of corresponding or compatible size.

This category also includes reversible garments that are manufactured from woven and knitted components, provided that these types of garments are worn for protection against the cold.

Separately presented linings that are suited for jackets, anoraks and other similar garments of subcategory 1.2, and possess thermal characteristics, will be treated as partially manufactured garments of category 2.0.

This category excludes: garments which are unlined; coats three-quarter length or longer (i.e. to the knee or below the knee, whether or not lined or filled, see category 1); garments that are lined but having no thermal characteristics; and garments whose outershell is constructed substantially by surface area from knitted or crocheted fabrics (e.g. knitted ski suits of category 8.4).

2.1 Winter outerwear, MBWG

2.2 Winter outerwear, C

CATEGORY 3

GROUP I

MALE CASUAL & FINE WEAR

Male casual and fine wear includes knitted, crocheted or woven fine suits, ensembles, jackets and blazers (i.e. sportscoats) for men, boys and children.

Subcategories:

3.1 Suits, MBC

The term "suit" means a set of garments composed of two or three pieces made up in same fabric and comprising:

-one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear, category 12) having neither braces nor bibs, and

-one suit coat or suit jacket the outer shell of which, (exclusive of sleeves, and facings or collar, if any) consists of at least four panels (two in the front and two at the back) sewn together lengthwise, designed to cover the upper part of the body, with a full front opening without a closure or with a closure other than a slide fastener (zipper). It does not extend below the mid-thigh area and is not for wear over another coat, jacket or blazer. A tailored waistcoat may also be included (the material of the back panel need not be the same as the front panels).

All of the components of a suit must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. If several separate components to cover the lower part of the body are presented together (e.g. trousers and shorts), the constituent lower part shall be the trousers, the other garments being considered separately.

A woven tailored waistcoat presented separately is considered an other garment of Category 17.0.

Also included are the following sets of garments, whether or not they fulfil all of the above conditions:

-morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

-evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

-dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

CATEGORY 3

GROUP I

MALE CASUAL & FINE WEAR

Subcategories (cont'd):

3.2 Ensembles, MBC

The term "ensemble" means a set of garments (other than garments specified below), composed of several pieces made up in same fabric, put up for retail sale, and comprising:

-one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the context of twin sets, and of waistcoats which may also form a second upper garment, (the material of the back panel need not be the same as the front panels), and

-one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches or shorts (other than swimwear).

The term "twin sets" means that one garment covering the upper part of the body may be accompanied by a pullover to form a set so long as they both satisfy the classification criteria for ensembles, e.g., a cardigan (sweater) packaged with a matching pullover. Note, however, an ensemble may have no more than 2 upper garments.

All components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size.

Sets of garments like beachwear or cabana sets would be included in this subcategory.

The term "ensemble" does not include ski suits of category 2 or subcategory 8.4, suits of subcategory 3.1, T-shirts, singlets and vests of categories 7.0, 8.1, 8.2 and 9.0, track suits of subcategory 8.4, underwear of category 9, sleepwear of category 10, swimwear of category 12, nor other sets of apparel specified elsewhere (e.g., snowsuits/snowmobile suits).

3.3 Jackets & blazers, MBC

Garments of this subcategory include sportscoats, jackets and blazers. They have the same characteristics as the suit coats and suit jackets described in subcategory 3.1, except that the outer shell (exclusive of sleeves, and facings or collars, if any) may consist of three or more panels (of which two are at the front) sewn together lengthwise. These garments should not be confused with anoraks and wind-cheaters described in subcategory 1.2, nor with winter outerwear garments described in category 2.

CATEGORY 4

GROUP I

FEMALE CASUAL & FINE WEAR

Female casual and fine wear includes knitted, crocheted or woven fine suits, ensembles, jackets and blazers (i.e. sportscoats), dresses, skirts including divided skirts (culottes) and woven saris for women, girls and children.

Subcategories:

4.1 Suits & Ensembles, WGC

The term "suit" means a set of garments composed of two or three pieces made up in same fabric and comprising:

-one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear, category 12), a skirt or a divided skirt, having neither braces or bibs, and

-one suit coat or suit jacket the outer shell of which, (exclusive of sleeves, and facings or collar, if any) consists of at least four panels (two in the front and two at the back) sewn together lengthwise, designed to cover the upper part of the body, with a full front opening without a closure or with a closure other than a slide fastener (zipper). It does not extend below the mid-thigh area and is not for wear over another coat, jacket or blazer. A tailored waistcoat may also be included (the material of the back panel need not be the same as the front panels).

All of the components of a suit must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. If several separate components to cover the lower part of the body are presented together (e.g., a skirt or divided skirt or trousers), the constituent lower part shall be the skirt or divided skirt, the other garments being considered separately.

A woven tailored waistcoat presented separately is considered an other garment of Category 17.0.

The term "ensemble" means a set of garments (other than garments specified below), composed of several pieces made up in same fabric, put up for retail sale, and comprising:

-one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the context of twin sets, and of waistcoats which may also form a second upper garment (the material of the back panel need not be the same as the front panels), and

-one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches or shorts (other than swimwear), a skirt or divided skirt, with or without braces or bibs.

The term "twin sets" means that one garment covering the upper part of the body may be accompanied by a pullover to form a set so long as they both satisfy the classification criteria for ensembles, e.g., a cardigan (sweater) packaged with a matching pullover. Note, however, an ensemble may have no more than 2 upper garments.

All components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size.

Sets of garments such as beachwear and cabana sets would be included in this subcategory.

The term "ensemble" does not include ski suits of category 2 or subcategory 8.4, suits of subcategory 4.1, T-shirts, singlets and vests of categories 7.0, 8.1, 8.2 and 9.0, track suits of subcategory 8.4, underwear of category 9, sleepwear of category 10, swimwear of category 12, nor other sets of apparel specified elsewhere (e.g., snowsuits/snowmobile suits).

CATEGORY 4

GROUP I

FEMALE CASUAL & FINE WEAR

Subcategories (cont'd):

4.2 Jackets & blazers, WGC

Garments of this subcategory include those which have the same characteristics as the suit coats and suit jackets described in subcategory 4.1, except that the outer shell (exclusive of sleeves, and facings or collars, if any) may consist of three or more panels (of which two are at the front) sewn together lengthwise. These garments should not be confused with anoraks and wind-cheaters described in subcategory 1.2, nor with winter outerwear garments described in category 2.

4.3 Dresses

A dress is a one piece garment extending above the waist. Included are jumpers, evening gowns, wedding gowns, dusters, house dresses (other than sleepwear of category 10).

A sari, a woven, draped garment in which the costume is constructed entirely by draping, without cutting, is included in this subcategory.

Complementary components to dresses such as matching or coordinated jackets, vests, boleros or other similar components are classified separately in other categories.

4.4 Skirts

Skirts or divided skirts (e.g., culottes) are one-piece garments not extending above the waist. Included are kilts for women, girls, men, boys and children, golf skirts and wrap skirts.

The leg separation of culottes or divided skirts, when worn, is not apparent when viewed from the front, they retain a frontal appearance of a skirt, and as such are regarded as skirts. Garments which resemble culottes but do not have a fullness about the leg and that cling close to the leg shall be regarded as shorts of subcategory 5.4.

CATEGORY 5

GROUP I

TROUSERS, OVERALLS & SHORTS

Garments of this category include knitted, crocheted or woven trousers, bib and brace overalls, coveralls, breeches, shorts, and similar articles (e.g. jodhpurs, knickers, leggings, i.e., footless tights, gauchos, etc.) for men, boys women, girls and children.

The term "leggings" means garments similar to trousers or pants but are designed to be worn tightly against the skin (footless tights).

Garments excluded from this category are ski pants, bib and brace ski overalls, snowmobile suits or snowsuits of category 2, track suits of subcategory 8.4 and swimwear of category 12.

Subcategories:

5.1 Trousers, MB

5.2 Trousers, WG

5.3 Trousers, C

Garments of these subcategories include trousers, pants, slacks, jeans and breeches and other similar articles which envelop each leg separately, cover the knees and usually extend to or below the ankles, and usually do not extend beyond the waist. The presence of braces do not cause these garments to lose their essential character of trousers. Other garments include leggings (other than those used for ballet) jodhpurs, knickers, gauchos, pants with foot straps and trousers with back bibs.

5.4 Overalls & Coveralls

Garments of this subcategory are one-piece garments, whether or not they cover the knee, extending above the waist in the form of a bib and brace or other structure which partially or fully covers the upper part of the body. Garments of this subcategory include bib and brace overalls, coveralls and jumpsuits.

5.5 Shorts

Shorts mean trousers which do not cover the knee.

Culottes, which more closely resemble skirts, are excluded from this subcategory.

CATEGORY 6

GROUP I

TAILORED COLLAR SHIRTS, MBC

Tailored collar shirts, for men, boys and children, are knitted, crocheted or woven garments designed to cover the upper part of the body, worn next to the skin or directly over underwear, with a full or partial front opening which may include a zipper, and may be designed to be worn either inside or outside of pants.

A tailored collar consists of one or more pieces of material which are cut and sewn or cut and fused and designed with two pointed or rounded ends. The construction may include stays, lining, and stiffening by any means.

Included in this category are shirts with detachable collars, dress shirts, sports shirts and leisure shirts, all of which are fitted with a tailored collar.

Shirts having a front opening on the neckline which fastens or overlaps left over right are considered to be garments for men and boys.

Tailored collar shirts for children are classified according to sizes 2 to 3x and 4 to 6x. Tailored collar shirts for children of sizes 2 to 3x are exempt from restraint.

This category does not cover garments having pockets below the waist, those with a ribbed waistband or other means of tightening at the bottom of the garment, or knitted or crocheted shirts having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Sleeveless garments are excluded.

Quilted shirt like garments, with tailored collar, shall be treated as products of category 2.0.

CATEGORY 7

GROUP I

WOVEN SHIRTS, BLOUSES & SIMILAR ARTICLES

Garments of this category include woven shirts, blouses and shirt-blouses, singlets and vests (other than underwear) and other similar articles for men, boys, women, girls and children.

Shirts, blouses and shirt-blouses of headings 62.05 and 62.06 possess various attributes:

- a) Shirts, blouses and shirt-blouses are garments designed to cover the upper part of the body, normally worn next to the skin or directly over underwear, with a full or partial front opening which may include a zipper, and may be designed to be worn either inside or outside of pants;
- b) Shirts having a front opening on the neckline which fastens or overlaps left over right are considered to be garments for men and boys;

Garments with pockets below the waist, or with a ribbed waistband or other means of tightening at the bottom of the garment, or sleeveless garments (men's or boys') are not considered shirts, blouses or shirt blouses.

Other garments of this category include singlets, vests (heading 62.07 or 62.08) and other similar articles (heading 6211.3 or 6211.4) which do not meet the requirements of headings 62.05 and 62.06. They include garments which might otherwise qualify as shirts or blouses, i.e., garments which may have a ribbed waistband or other means of tightening at the bottom of the garment, or garments which cover only the chest, that do not reach the shoulders, or that have a full-front or back opening. Garments of this type include, inter alia, crop or halter tops, or sleeveless garments (men's or boys').

This category excludes shirts with tailored collars for men, boys and children of category 6, jackets of subcategory 1.2, quilted shirt like garments with tailored collar of category 2.0, underwear type singlets and vests of category 9, sleepwear of category 10, and sweaters of category 11.

Subcategories:

- 7.1 Woven shirts, MB
- 7.2 Woven blouses, WG
- 7.3 Woven shirts & blouses, C

CATEGORY 8

ATHLETIC WEAR, KNITTED/CROCHETED SHIRTS, BLOUSES & SIMILAR ARTICLES, T-SHIRTS & SWEATSHIRTS

GROUP I

Category 8 comprises: knitted or crocheted shirts, blouses, shirt-blouses, singlets and vests, T-shirts, sweatshirts and track suits and other athletic wear, whether knitted, crocheted or woven, and knitted or crocheted ski suits. These are garments for men, boys, women, girls and children.

Garments excluded from this category are shirts with tailored collars for men, boys and children of category 6, jackets of subcategory 1.2, quilted shirt like garments with tailored collar of category 2.0, underwear of category 9, sleepwear of category 10, and sweaters of category 11.

Subcategories:

8.1 Knitted/crocheted shirts, blouses & similar articles

Garments of this subcategory include knitted or crocheted shirts, blouses and shirt-blouses, singlets and vests (other than underwear) and other similar articles.

Shirts, blouses and shirt-blouses of headings 61.05 and 61.06 possess various attributes:

- a) Shirts, blouses and shirt-blouses are garments designed to cover the upper part of the body, are normally worn next to the skin or directly over underwear, with a full or partial front opening which may include a zipper, and may be designed to be worn either inside or outside of pants;
- b) Garments must have an average of 10 or more stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm;
- c) Shirts having a front opening on the neckline which fastens or overlaps left over right are considered to be garments for men and boys;

Garments with pockets below the waist, or with a ribbed waistband or other means of tightening at the bottom of the garment, or sleeveless garments (men's or boys') are not considered shirts, blouses or shirt-blouses.

Other garments of this category include singlets, vests (heading 61.09) and other similar articles (heading 61.14) which do not meet the requirements of headings 61.05 and 61.06. They include garments which might otherwise qualify as a shirt or blouse, i.e., garments which may have a ribbed waistband or other means of tightening at the bottom of the garment, or garments which cover only the chest, that do not reach the shoulders, or that have a full-front or back opening. Garments of this type include, inter alia, turtleneck shirts, tank tops, midriffs, tube tops, crop or halter tops or sleeveless garments (men's or boys').

T-shirts of subcategory 8.2, sweatshirts of subcategory 8.3, underwear-type singlets and vests of category 9 and athletic wear of subcategory 8.4 are excluded from this subcategory.

GROUP I

Subcategories (cont'd):

8.2 T-shirts

These garments are generally worn against the skin and are not intended to be used for the purpose of underwear (see category 9).

T-shirts are knitted or crocheted garments of the vest type, not napped, nor of pile or terry fabric, in one or more colours, with or without pockets, with long or short close-fitting sleeves, without buttons or other fastenings, without collar, without opening in the neckline, having close-fitting or lower neckline (round, square, boat-shaped or V-shaped). These garments may have decoration, other than lace, in the form of advertising, pictures or an inscription in words, obtained by printing, knitting or other process. The bottom of these garments, usually hemmed, is never made with a ribbed waistband, drawstring or other means of tightening.

Excluded from this subcategory are T-shirts used as underwear and thermal T-shirts of category 9.

8.3 Sweatshirts

Sweatshirts are knitted or crocheted garments that cover the upper part of the body and where at least one side is brushed or fleeced (napped).

Excluded are sweaters, pullovers, cardigans, waistcoats and other similar articles of category 11.

T-SHIRTS & SWEATSHIRTS

GROUP I

Subcategories (cont'd):

8.4 Athletic Wear

Athletic wear for men, boys, women, girls and children means track suits, judo sets, jogging suits, knitted or crocheted ski suits and other special articles of apparel used exclusively for certain sports or for dancing or gymnastics (e.g., fencing clothing, jockey silks, ballet skirts, leotards covering the trunk of the body).

Woven ski suits of category 2 and swimwear of category 12 are excluded from this subcategory.

Track suits are woven or knitted/crocheted articles consisting of two pieces, lined or unlined but sometimes with a raised inner surface (nap) which, because of their general appearance and the nature of the fabric, are clearly meant to be worn exclusively or mainly in the pursuit of sporting activities.

Track suits consist of two garments, namely:

(a) a garment meant to cover the upper part of the body down to or slightly below the waist. It has long sleeves, with ribbed or elasticated bands, zip fasteners or other tightening elements at the cuffs. Similar tightening elements, including drawstrings, are generally to be found at the bottom of this garment. When it has a partial or complete opening at the front, it is generally fastened by means of a slide fastener (zipper). It may or may not be fitted with a hood, a collar and pockets.

(b) a second garment (a pair of trousers) which may be either close or loose fitting, with or without pockets, with an elasticated waistband, drawstring or other means of tightening at the waist, with no opening at the waist and therefore no buttons or other fastening system. However, such trousers may be fitted with ribbed or elasticated bands, slide fasteners (zippers) or other tightening elements at the bottom of the trouser-legs which generally go down to ankle level. They may or may not have footstraps.

Knitted or crocheted ski suits are garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing. They consist either of:

(a) a ski overall, that is, a one piece garment designed to cover the upper and lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

(b) a ski ensemble, that is, a set of garments composed of two or three pieces, comprising one garment for the upper part of the body (e.g. anorak, jacket or similar article), a waistcoat/vest, and trousers whether or not extending above the waist, one pair of breeches or one bib and brace overall.

Knitted or crocheted "ski ensemble" may also include an overall and a type of padded, sleeveless jacket worn over the overall; all components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour, and must be of corresponding or compatible size.

Athletic sets described herein will be counted as one unit if packaged and shipped as a set.

CATEGORY 9

GROUP I

UNDERWEAR

Woven or knitted or crocheted undergarments for men, boys, women, girls and children are garments worn under other garments. They include underpants, briefs, boxer shorts, panties, bloomers, slips, petticoats, camisoles, singlets and vests of the underwear type, t-shirts of the underwear type and similar articles of underclothing (e.g. thermals, union or combination suits, etc).

T-shirts of the underwear type means, but not necessarily restricted to, lightweight T-shirts, commonly in plain white with no pockets and are commonly made of cotton or man-made fibres. T-shirts, singlets and vests packaged together with slips, briefs, panties and similar articles (i.e., underwear) will be considered garments of the underwear type.

In the case of underwear sets, each piece is to be counted separately.

SECTION F
FREE TRADE AGREEMENT (FTA)

EXPORT

With the implementation of the FTA on January 1, 1989 the export to the USA of apparel and textile products as described on page F-2 are eligible for FTA tariff rate reductions up to specified Tariff Rate Quota (TRQ) levels provided the exporter obtains a Certificate of Eligibility for these shipments. Without a Certificate, shipments will not receive the FTA rate of duty. This Certificate must be transmitted to the US importer for presentation to US Customs officials at the border.

Allocation criteria for TRQ:

Exporters should refer to Notice to Exporters Serial No. 39 dated October 3, 1989 or contact the Export and Import Permits Bureau at (613) 996-3711.

Application for Certificate of Eligibility:

It should be noted that the export of the commodities described on page F-2 do not require an export permit for shipments to the U.S.A. Exported goods which do not meet the rules of origin may have access to the FTA through the TRQ. Exporters must apply to the Export and Import Permits Bureau for a Certificate of Eligibility at the time of export if they require access to the TRQ.

When making application for a Certificate of Eligibility, exporters should use the HS coding and the unit of measure listed in this section.

This listing is divided in three categories as follows to correspond to the three (3) TRQ in place:

The 3 categories are:

- 1) Wool apparel
- 2) Non-wool apparel
- 3) Non-wool fabric and made-up articles
