# Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- ☐ Coloured covers/  
Couverture de couleur
- ☐ Covers damaged/  
Couverture endommagée
- ☐ Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée
- ☐ Cover title missing/  
Le titre de couverture manque
- ☐ Coloured maps/  
Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- ☐ Bound with other material/  
Relié avec d'autres documents
- ☐ Tight binding may cause shadows or distortion  
along interior margin/  
La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure
- ☐ Blank leaves added during restoration may  
appear within the text. Whenever possible, these  
have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.
- ☐ Additional comments:/  
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☐ Coloured pages/  
Pages de couleur
- ☐ Pages damaged/  
Pages endommagées
- ☐ Pages restored and/or laminated/  
Pages restaurées et/ou pelliculées
- ☒ Pages discoloured, stained or foxed/  
Pages décolorées, tachetées ou piquées
- ☐ Pages detached/  
Pages détachées
- ☒ Showthrough/  
Transparence
- ☐ Quality of print varies/  
Qualité inégale de l'impression
- ☐ Includes supplementary material/  
Comprend du matériel supplémentaire
- ☐ Only edition available/  
Seule édition disponible
- ☐ Pages wholly or partially obscured by errata  
slips, tissues, etc., have been refilmed to  
ensure the best possible image/  
Les pages totalement ou partiellement  
obscurcies par un feuillet d'errata, une pelure,  
etc., ont été filmées à nouveau de façon à  
obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/

The copy filmed here has been reproduced thanks to the generosity of:

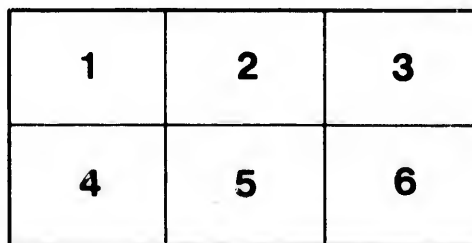

Library Division  
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

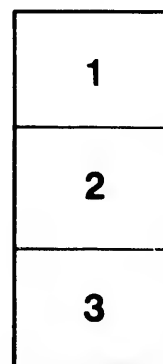

Library Division  
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PROPOSAL  
FOR THE FORMATION OF A COLONY  
IN  
VANCOUVER'S ISLAND,  
ON THE WEST COAST OF NORTH AMERICA.

*(For Private Circulation.)*

---

VANCOUVER'S ISLAND lies on the west coast of North America, between the parallels of  $48^{\circ}$  and  $52^{\circ}$  N. latitude, and is included in that part of the Oregon territory allotted to Great Britain, by the last treaty with the United States. It is about 260 miles long, averaging 50 or 60 in breadth, and contains something less than 15,000 square miles. The climate is similar to that of England, but milder, being in a lower latitude. There is less frost and snow in winter, and perhaps more rain. It is suited to English constitutions. The country is mountainous and rocky, with a great deal of forest; but the intermediate vallies are well suited to agriculture. English plants and fruits thrive admirably. The crops are fine; and cattle multiply, requiring neither provender nor protection in the winter. There is plenty of coal, and it is believed, iron and copper in the vicinity. There is abundance of water, and water power. There is plenty of game, and quantities of fish of all kinds. The geographical position of this island is peculiar, pointing it out as the future home of a great people. It has several good harbours on the west coast, and multitudes on the east coast. But there is no harbour for even the smallest vessels from the entrance of the

straits of Juan de Fuca to San Francisco, that is, as far as from Dover to Gibraltar; hence the people who live about those straits will command a monopoly of all the trade to the west coast of North America, to the end of time. Vancouver's Island forms one side of those straits; the American territories are on the other.

It is very likely that the people who first acquire, will retain, at least for a long time, commercial superiority in the country. It cannot be too strongly impressed on Englishmen, that the political influence of their country, under the arrangements of the late treaty, will be lost for ever on the American shores of the Pacific, unless preserved by a powerful and prosperous colony in the territory we still retain.

It is proposed that a company be formed for the purpose of establishing a colony in this island.

That a grant be obtained, if possible, from her Majesty, of the whole island, to be held by charter under the crown of England, and to be governed by a specified constitution.

The present charter of the Hudson's Bay Company offers no obstacle to such a grant being made by the crown.

It is proposed that all the capital subscribed be vested in the directors in a common fund, to be expended in the outlay contingent on emigration, and the first settlement in the island; in stock, tools, machinery, &c., and food, until the colony produce enough for its own support. No interest will be paid on the capital. It is desired that no capital should be invested except by those who are going to join the colony; hence there will be no public debt.

It is proposed that the colony should include all classes. Those who must necessarily take the lead, and amongst whom

it is anticipated the scheme will find support, are young men of the higher and middle classes in this country, who have some small capital, but not enough to enable them to live independently; who have not such prospects in any profession as shall ensure success, and who are, nevertheless, possessed of ability and enterprize, for which they can find no definite application in this country.

It is proposed to take out as large a number of labourers, farmers, and artisans, as it is possible to export upon the subscribed capital. For example—supposing *one* family could be settled in the island for £100., and the company consisted of *two hundred* gentlemen, with an average of £1000. each; then *two thousand* families could be transported to the colony.

It is proposed that, at first, no division of land or property be made; that the whole community be organized in companies, according to their different species of labor or skill; and that their united exertions be directed to clearing, cultivating, and stocking the land, building houses and mills, making roads, &c.

Some of the greatest difficulties with which settlers in a new country have to contend, arise from their isolated and unassisted position. This accounts partly for the slow progress made by new colonies. It is certain that these difficulties would be obviated, by organizing and directing the labour of the whole community.

When the land is so far cultivated as to place the colony above the possibility of starvation, it will be divided to each member, in proportion to the money he has subscribed, and the quantity and species of work he has done.

Any new settlers coming after will be subjected to a similar

system, so that there will be means of incorporating an unlimited number into the colony.

Opposition from the natives, of any importance, need not be anticipated, as, according to the best authorities, there are not more than five thousand on the whole island. It will be the objects of the colony to conciliate and civilize them; and ultimately incorporate them unto itself as far as possible.

There is reasonable ground for expecting a considerable trade with the Sandwich Islands, and even with China.

It is desired, at present, merely to ascertain the probable number of gentlemen, of the class above referred to, who may be expected to join the company, in case the Government should be induced to look favorably on the scheme, and that, on further development, it seems entitled to confidence, and offers a reasonable promise of success.

The promoters have therefore thought it wise to issue this brief prospectus for private circulation. The details of the plan will be published presently.

Gentlemen who, under the contingencies above mentioned, are likely to engage in the scheme, are requested to communicate with the undersigned, (who will be happy to answer any enquiries) stating their names, addresses, and the probable amount of capital they will invest.
