System, was just a phase of the same struggle. Britain's attempt to become the workshop of the world was the immediate cause of the tariff walls set up by the nations whose markets it attempted to exploit.

Those who defend the national policy of Canada as it has exised for more than 30 years, simply refuse to shut their ever to the sallent facts contheir eyes to the salient facts con-nected with the Dominion's continental position. They regard the tariff as only one of several vital factors necessary for the country's national independence and self-sufficiency. Canada a nation is a call of universal appeal, and its corollary is Canada for Cana-dians. What does that mean? It means conservation of her natural resources It means the encouragement of the industries the country is properly fitted to sustain; it means the equable development of the nation in all de-partments of its activity; it means the preservation of its free self-determi-nation independent of any external control, whether direct or indirect. The justification of the national policy is its necessity, and the best proof of its necessity is found in the history of trade between the Dominion and the great neighboring republic.

The American Spirit.

The spirit of the United States is intensely national and ambitious. The dream of a United North America las never been absent, nor has it vanished, But whether the continental aspirations of our enterprising neighbor be dead or not, there can be no dublety concerning their determination to capture foreign markets, and the first and readiest readiest and most valuable market, whether to buy raw material or to sell manufactured products, is the Canadian. Both purposes are within the purvied of United States producers,

(By W. B. Thompson). The swank of science may not be an elegant phrase, but somehow it expresses admirably my opinion of the annual meeting of the British Association. For the first time in my life I visited the conference of the British Association held recently in Sheffield, and I feel something of what Gulliver must have felt when he met the strange people of Swift's imagina-

There is a good deal of humbug about the British Association. I say it flatly and with deep conviction. For the most part it provides opportunity fo a set of worthy bores to air their pe theories on subjects that are of no earthly use to any man, woman, child beast, fish or reptile. The members do not speak in English, indeed, they use no real language—they mumble in an unintelligible and mainly inaudible jargon of scientific terms which ob scures any actual meaning that may have crept into their vague periods. I know that science has its own language not understanded of the people. I also know that what is gib-berish to me is easily interpreted by the scientific mind. But what I want to know is where are you going to find the man who can pronounce the fol-lowing sentence without serious re-sults: "When chlorodimethylcyclohexenone is condensed (a) with the sodium derivative of ethyl methylcyanoacetate the product is hydroxydi-methylcyclohexenylidenepropionitrile."
I clipped that gem from a report on the study of hydro-aromatic sub-stances, and all I can say is that if science cannot invent a better way of expressing it self, then it is time we

I wandered into a lecture room and I wandered into a lecture room and listened to a harmless-looking old gentleman read a paper on "The Temporal Bone in the Primates." His audience consisted of eleven people, including himself. I daresay it is a very important subject. I can quite believe that the millions of people who are soln about in importance of the are going about in ignorance effect of the temporal bone in the primates are severely handicapped in the stern battle of life. I am only sorry that I cannot do something to dispel the darkness, but really I did not comprehend what the old gentleman wanted to say. Half the words I did not hear, and the other half I did not understand. It was obvious that he was full of information on the subject; I could see that he was burning to deliver his message to a waiting world, and when he had finished I wanted to go up to him and assure him that I, for one, was convinced that the temporal bone in the primates was safe in his hands.

I went to Sheffield a scientific

I went to Sheffield a scientific agnostic; I left it a scientific atheist. For years I have looked upon the British Association as I have looked

drawled the youth. "There's only old talking. He will stick it for another hour. We always put him up when things are slack.'

I waited for scientific fires to strike I waited for scientific fires to strike the youth down at my feet, but nothing happened, and I approached the stiffling atmosphere of intellect. Once when I was a boy I fell into a swimming bath with my clothes on, and the sensations I then experienced were very similar to those I felt when the door of the room closed behind me. First similar to those I felt when the door of the room closed behind me. First there was a sharp surprise, then a painful shock, succeeded by a rush of chaotic emotions more or less confusing. Had I been thrust blindfolded in the midst of the meeting and asked to guess its character; I should have promptly decided it was a prayer meeting. The men and women were of a type that finds a mild eexcitement in demonstrative religion. Among the demonstrative religion. Among the women were comfortable matrons and prim spinsters, and there were bright young girls seeking solace in science and sandwiches. Some of the men bore absurd resemblance to exaggerated caricatures of Welsh lay preachers. Everybody was trying to look learned, and succeeded only in appearing

Science allied with imagination and expounded in everyday English has in the water as it did on land. The poor gentleman was seriously perturblearned professors gravely discussed the discovery of the clixir of life. They did not call it the clixir of life. They grobe of it the clixir of life. They spoke of it in decimal points— tions in seal to aquatic life," and and in words weighted with superand in words weighted with super-flous letters. But it really was the elixir for all that. The idea was that elixir for all that. The idea was that if a girl of seventeen, say, could absorb a sufficient quantity of helium she would always remain seventeen. She would never grow any older, the years would pass without touching her. Naturally there would be complications in consanguinity-and the dogma "A man may not marry his grandmother" would justify the scientific anticipation of its creator. Lest girls of seventeen should form a queue outside the quarters of the British Association I may point out that helium is the product of radium, and you can put all of the world's supply on the point of a needle, or something like that.

British Associates make jokes casionally, and the jokes of British associates are fearfully and wonderfully made. They dispense jokes as a chemist makes up a prescription. After the loke is administered you have an unpleasant sensation at the pit of the stomach, and you writhe. So far they have not discovered an antidote for a British Association joke. I came away from Sheffield with

feeling that I had lost something. had lost faith in my fellow-men. had learned to look upon scientists as superman, intellectual gods, whose mighty brains lifted the human race to the stars. I pictured scientists as the lamps of the world, lighting up the dark places. Now I am as a blind man afraid of his guide. The British Associates do not solve problems; the make them. Their papers have no value except to other associates. To the lay mind the reports are so much waste paper. Knowledge is jealously guarded in an obscure jargon, and the associates themselves can point to no end to their theories. A spirit scientific agnosticism prevails. As a professor in one of the rare luminous sentences expressed it: "We find that we know very little of things about which we were once so cocksure." The worst of the scientific mind is that it is content to work in a circle; it will build up for the pleasure of pulling down, even as a child plays with bricks.

The averages for the series stiently tell the tale of why Athletics beat the Cubs. As a team the new champions hit at a 322 gait, against .224 for Chicago. Collins led in both batting and fielding. .429 and 1.000, every one of the Elephants having .200 or better with the stick, except Lord. who batted .182. It is a curious fact that pot one of the Chicago seven pitchers or two pinch hitters secured a base hit.

Pop Anson, the acting as a war correspondent at the world's series, consented to be interviewed. He is still of the opinion that the National League made a grievous mistake when it failed to elect him president. As Thomas Lynch is making good and showing marked ability with his old-fashioned but honest methods, Lynch will likely have a walkover for the place next season. Cap Anson always did think that the National League owed him more than they were willing to admit, and now he is interested in the Fletcher move.

Harry Pickering was a spectator, and he thought that, with rules similar to ice hockey, the game could be made very interesting. This would necessitate a different line-up and an offside rule, with no forward passing.

WILL SAVE YOU MONEY

It is said that Columbus determined the earth was round by asking himself the question, "Why do I see the masts of a ship before the hull?" The smoker who reasons saves money:

He argues that the "NOBLEMEN" and the "imported" cigars are both made of the highest grade of Cuban tobacco, by skilled Cuban and Spanish workmen. But-he reasons-the "NOBLEMEN" is made in Canada and escapes the duty levied on imported cigars. He also reasons, "Why should I pay 25c for an imported cigar, when I can get TWO 'NOBLEMEN' for the same money. I should not, and I won't." A little reasoning will save YOU money.

SEVEN OUT IN THE COLD

Wouldn't Agree to Abide by Residence Rules. East Toronto Independent Conservatives So Declare.

All but seven of the Varsity students of the north residence, who have been castigated by the dictum of President factories, have been reinstated and will not have to vacate their sumptuous apartments, but the unfortunate seven, whose passive attitude has placed them under the ban of the faculty, will have to seek accommodation on the outside. All but the seven felt able to subscribe to the president's ultimatum to abide by the rules in fature.

Following the example set by the other residences, a new house committee of six has been appointed, instead of three as heretofore, and in matters not essential these will have control, but the faculty retains control of such matters as might involve any independent action on the part of the students and thus carry the principle of autonomy too far to meet the convenience of the board of governors.

Two handsome sterling silver cups have been generously donated by Mr. James Wood of Toronto as souvenirs for George Goulding and Ernle Webb, the champion walkers, who are matched in a one-mile race. Both athletes had consented to walk before the cups were secured, so this is one case where the honor will be competed for, and the valuable prizes received as mementos. The cups are exactly allke and are now being engraved.

The pole vault will see a pretty contest between Archibald and Cameron. Both are werking at the indoor idea, and making good progress. Archibald was in fine form last night, doing if feet 6 inches, and clearing the bar by a good foot.

GET THE THING GOING.

The World has no fear of the Toronto Electric Light as against the municipal supply of electrical energy by SCHOOL CHILDREN'S TEET sion. What concerns The World is getting the plant started and getting it started quick. There have been too many delays, too many interferences by outsiders, and too many things that look like the result of design of enemies and sometimes of co-operation by professed friends.

Once for all, all this must stop. The better and the sooner it starts the bet- will prove of great assistance to the

Star may succeed in its new mission.

PLANT THE CAUSE. In the tests of the ozone plant at

Lindsay, the report of Dr. Nasmith made last January has been corroborated. The report is not against the ozene process, but against the Lindsay plant. It is stated that if the ozone can be applied to the water in the new station has been let to Contractors Wells and Gray and that work sufficient quantity, the system would be a success, but it cannot be applied by the process adopted at Lind-ent one, and will cost between \$20,000 say. To get perfect results the water would apparently have to be sprayed into an ozone chamber.

SKATOON FOR COMMISSION GOVERNMENT.

skateon is the latest recruit in the ranks-of the government by commission municipalities. Two commissicners are being advertised for to act with the mayor as a third member of the commission. The only adverse criticism made by The Saskatoon Cap-Ital is that the salaries to be paid are inadequate, \$1500 a year each being decided on, while Edmonton pays her commissioner \$10,000 a year, and he has saved \$22,000 already in two contracts.

The two commissioners in Saskatoon are to devote their whole time to the city's business. They will carry out and enforce all orders, resolutions and bylaws of the council; have general supervision and administration of all departments of the city except the police department; collect taxes, license fees and other revenues, and prepare estimates for all proposed expenditures under money bylaws. A two-thirds vote will be required to change their proposals in council.

Matters of mance, the raising of oney, issuing of debentures, recepion of visitors, industries and railvay affairs, and the assessment roll are left to the council. The scheme is not, therefore, an adoption of the prinfull, but the result will be watched with interest, and, if successful, no ubt the principle will be extended.

Mayor Pelletier of Fort William has issed a chance of having his name handed down to posterity as the man who succeeded with Mayor Matthews ier. We need a public movement, oped by it they will elect men who will act with public spirit, and the business of the country will be carried on vithout regard to private interests or personal ambitions.

the assessment of Grand Trunk procourt of revision given out yesterday afternoon by the chairman, P. H. Drayton, K.C. Both the Grand Trunk and essees of its lands were concerned in the appeal, the former regarding its right of way between Simcoe and Bathurst-streets, and the latter with respect to Grand Trunk lands south of the tracks between John-st. and Spadina-ave.

The city assessors put up the valuation of the land from \$3000 an acre, the last quadriennial assessment, to \$15,000 an acre. There are 19¼ acres involved, a portion being occupied by lessees. This is how the assessment works out:

Sand and Supplies, Limited, are to be assessed for the space they occupy at the rate of \$12,500 per acre.

Gall Lumber Co., Wilson Lumber Co., and Warren Bituminous Co., at the rate of \$11,500 per acre.

Imperial Lumber Co. at \$10,500 per acre.

Haney & Miller at \$10,000 per acre. Pintsch Gas Co., Standard Chemical Co., and that part occupied by the rail-

way, or vacant, at \$9500 per acre. The large block of railway land west of Spadina comprising over 59 acres has been reduced by the court from \$11,800 per acre to \$10,800 per acre.
On the terminal property and freight sheds on the south side of Front-street the following reductions were made:

Everyone knows that fruit is wholesome, when eaten judiciously. Physicians generally recognize the fact that fruit juices have a beneficial effect on the various organs of the body.

It remained for a Canadian physician to discover a process whereby the medicinal action of fruit could be so increased as to make the intensified juices a wonderful cure.

increased as to make the intensified juices a wonderful cure.

"Fruit-a-tives" is this combination of fruit juices and tonics. Since its introduction to the public "Fruit-a-tives" has met with a success accorded to no other medicine in the world. The reason is plain. "Fruit-a-tives" is the one remedy that is actually made of fruit, and it is the only remedy that naturally cures Constipation. BIG GRAIN RUSH

Every Vessel at Head of Lakes Em ployed and Men Work Extra Shifts.

FORT WILLTAM, Oct. 25.—(Special.)—To-day at the port of Fort William was the briskest of the year, and one of the busiest in the history of shipping at the Canadian head of the lakes. Every elevator in the harbor has been in operation since last night, and employes this evening were requested to report for extra shifts. Since morning 14 vessels received cargoes of wheat, and cleared with a total of 1,750,000 bushels. In addition to this, the steamer Peavey loaded 5000 tons of screening, which is equivalent to 240,000 bushels of wheat in space.

Discussing the rather unusual rush, with such low rates, grain men said that indications point to a brisk movement uptil the close of navigation. During the

til the close of navigation. During the last few days the grain rate has increased a quarter of a cent for Buffalo cargoes, and one-half cent for Montreal. Many of the steamship companies, rather than take their boat out of the lake service, are taking cargoes of grain now, trusting that the rates will take a boost as the season advances.

B. C. COAST STORM-SWEPT.

VANCOUVER, Oct. 24.—Fierce and destructive storms are sweeping the north coast of British Columbia and Alaska, according to advices to-day from Prince Rupert. Strong winds and heavy rains are causing havoe in the vicinity of the terminus of the Grand Trunk Facific. Bridges are being swept away and telegraph and telephone lines are torn down by wind and landslides. So far as has been heard, no lives have been lost. The telegraph lines of the government along the Skeena River suffered a great deal, a mile of poles and wires being taken away by landslides.

"I don't know anything about it,"
Jardine replied huskily.
Condemning the Innocent.

"Can you suggest any reason for these people lying about you?".
"Not unless they want to try and condemn some innocent person," was the calm reply.

"And you know, of course, the very great necessity of knowing who was the last person with this girl?"

"I'd tell if I knew, but I don't."

"That will do; you may go, but you must not leave the court room," said the counsel, and called for his brother

The Jardines were the only witness excluded from the court room during the examinations to-day, and a watch was put on their house, when it was found to-night that proceedings would have to be extended into another day.

Mrs. Jardine's Evidence.

Mrs. Elizabeth Jardine showed signs of illness when called to the witness tand. Mr. Blackstock first questioned her concerning her non-attendance at the session of the inquest called ten days ago. She admitted that the crown attorney had told her over the telephone while at Hagersville that she must attend but said she couldn't get here. She had also sont wood this get here. She had also sent word this morning that she was unwell and did not wish to attend. Asked if she or like morning?"

Asked if she of her sons had ever talked the case over with a lawyer she replied: "Not that I know of," and answered "no" when asked if she had, since last giving evidence, talked the matter over with her sons. Asked if she wished to change any evidence already given she replied, in effect, that on the night of the murder she and her daughter-in-law. Mrs. der she and her daughter-in-law, Mrs. Geo. Jardine, had been out together about 8 p.m., when they met the Teldmanns, who had sworn to seeing Liz-zie Anderson and Ed. Jardine going to the fair grounds. When she returned home only her son Charlie was there.

An Important Omission. Mr. Blackstock: "Why are you now elling for the first time about having one out with your daughter-in-law, laving had occasion to recall all the rcumstances the next day?"

"I did not think of it," she replied, and went on to say: "I forgot to mention before that Wednesday or Thursday after the disappearance I saw Mrs. Anderson, the mother of the girl, at ther house." That was the day after Ed Jardine had been interrogated by Mrs. Seager Witness said she was golesquers, 2.15 and 8.15.

she had related to him since her last appearance before the coroner.

"Why did you tell me a few minutes ago you had never spoken to any member of your family about this matter since you gave evidence the last time?" pressed Mr. Blackstock. "Only this."

She denied ever mentioning the conversation with Mrs. Anderson to the other boys, altho knowing it would be good news for Edward. "I did not mention it; my mind was at ease," she explained.

Mrs. Jardine said she had no more to

say and stated positively she had not been out at 9 o'clock the night of the 'We'll ask somebody else about that and see what you have 'to say," remarked the counsel, but his call for Mrs. Love brought no reply. Mr. Blackstock then asked whether if Mrs. Love said she had seen her out at 9 p.m., it would be true and was answered "Na"

Witness again hesitated, and the counsel remarked, "I want to ask you to be candid. That is the reason you get into this trouble."

Mrs. Jardine finally answered "Yes."

"Then when Anderson came in the morning you had all this information locked up in your breast?"

Another pause followed.

"These pauses you make, Mrs. Jardine, are very extraordinary," said Mr. Blackstock. "They are not the pauses of a straightforward woman. Now. all that you told Anderson in his distress was that Eddie had seen her the night before."

Mr. Blackstock called Harry Irwin, a boy, without allowing Jardine to leave the box. Irwin said he saw Jardine with a black-handled knife with a blade broken, three weeks before the fair. He was whittling a stick, and he also tried to trade knives with the witness. Turning to Jardine, Mr. Blackstock asked, "Now, then, what have you to say to this?"

"It's a lie."

"It's a He."

Ernest McLean, a young lad in his teens, was then called, Jardine being still left in the box. He, too, swore to having seen Jardine making a small box and whitting with a black-handled knife, with one blade broken. This was three weeks before the fair.

Again turning to Jardine, Mr. Blackstock asked: "Now, what have you to

A Neighbor's Evidence.

George Moss, a cooper, living 200 or 200 yards from the Jardine house, was then asked if he had seen the witness with a knife. He had, he said, during the months of Sept. August and July.

Mr. Moss further swore that on the night of the murder, between midnight and 2 a.m. he was awakened by a sound as of some one knocking loudly on a door for admission. Mayor Evans was chosen as chairman of the local committee, and Ernest Beaufort secretary. It is expected that there will be a very big entry from the west, including Vancouver, Victoria and New Westminster, while it is expected that certain eastern cities will be represented.

PLOT TO RUIN FRANCE By Violence, Anarchy and Civil War, Declares Premier,

PARIS, Oct. 25.—On the reassembling of the chamber of deputies to-day, after the government had been attacked by the Socialists, Premier Briand created something of a sensation by declaring that he had proof, thru confessions of the leaders of the recent railroad strike, that there was a deliberate plot to ruin France by violence, anarchy and civil war.

In concluding his address, the premier said that the government was studying a plan to prevent a repetition of such strikes, while at the same time guarding the legitimate rights of wage-earners.

Moving there across the sky,
What new message do you bring,
Unto mankind as you fly? Swift you cleave the vibrant air, Now you fly and now you float; Life itself you seem to share— Are you bird or are you boat?

What new era do you bring Speeding to us thru the years? Hark! your motor seems to sing With the music of the spheres!

Rather may you skim the seas And go whirring near and far, Fly to yonder Pleiades, Visit Moon and Evening Star.

Go where gods in laughter sit,
Take us where life is but kind,
Seek where elves and fairles flit—
Some new Eden for us to find.

Lifting upward to the sky,
Life a joyous, rising song,
You shall teach our souls to fly!

Gentlemen, I am sure that many of Gentlemen, I am sure that many of you older men, when you consider our present system of governing this country, must come to the conclusion that the battles you fought years ago for responsible government were fought in vain. You no longer seem to have any say as to what the policy of this country should be. You are not consulted. Sir Wilfrid Laurier alone has the say and you have to accept what the say and you have to accept what policy he offers without, according to time honored usage, having

time honored usage, having the privi-lege of passing upon .it.

Now you are told by Sir Wilfrid Laurier that he is going to make a reciprocity treaty with the United States, and you will have nothing to say on that question. Reciprocity! Who said reciprocity? Certainly no one with an ounce of sense, in this country. Will anyone please step for-ward and say that there is a demand from all parts of this country for refrom all parts of this country for reciprocity with the United States? Who wants it? I have not seen or heard of any great popular demonstration for reciprocity with the United States. I not seen any torchlight proces-I have not seen any banners

Gentlemen, we must be all blind, surely we have lost our senses. All the time while we were fancying what a great country we were building up, what a magnificent heritage Canda would be for our children, for fuaga would be for our children, for future Canadians, there was a vast unseen movement going on in favor of reciprocity with the United States. And the great mind reader who rules the destinies of us poor mortals at Ottawa, Sir Wilfrid Laurier, knew all about this great international measurement all this great international movement all he is in his second childhood. Is it not about time the Liberals, whose sentiments and principles he is violating daily, took off their coats and oke him up?

What Reciprocity Means.

Now we have talked about a reciprocity treaty and perhaps it will be as well for us to ascertain what a reciprocity treaty really means in the sense of a strict definition. At one time Canada had a reciprocity treaty vith the United States, and somebody is always telling us how prosperous the country was then. Let us see why. We have been doing things. We have begun to attract the attention of the whole world. We have the centre of the stage, the spot light, and the tide of emigration and foreign investment has set in strongly in our direction. At the time we had a reciprocity treaty with the United States we were different. We had only a very small, poorly populated country. At the time the United States made the treaty of reciprocity with this country in 1854. and the result was the reciprocity treaty was in a measure a fair and just one. The chief business of our people was to produce raw material, such as wheat, lumber, fish, cattle and article which articles which were exported in a raw state. Our standard of living was much lower then than it is now. For instance, one of the chief articles important from the United States under ported from the United States under the treaty was molasses, called "black-strap," which was then a familiar arstrap, which was then title of diet in every Canadian household. I will warrant that you will look over a great many Canadian breakfast tables to-day before you will find a jug "black-strap."
The Black Strap Treaty.

Now gentlemen, I propose discussing with you for few moments this famoue "black-strap" treaty of 1854. Those of you who are old shough will rememwho are not, have read about it. Let me assure you, that the trouble was not with Great Britain, but the quarrel was between the people and the Canadian officials of the British Government ment, known as the family compact. You know there was a tremendous discussion preceding the rebellion of 1827. There was a large party in this country desirous of separating Canada from the British crown. The party did not have any clear definite object except

annexation.

Advantage. In all negotiations they had always had a "little joker." They knew that Canada wanted a reciprocity treaty very badly and in exhange for reciprocity they desired the right to participate in the British fisheries in America on the same footing, as British citizens. Anticipated Annexation.
But over and beyond all these advantages of trade was the feeling, especially in the United States, that in a few years free trade between the two countries would ultimately lead to the annexation of Canada. Annexation was the dominant note to some extent on both sides of the line, and it was the prospect of the annexation of Canada more than anything else that induce dthe Americans to give us access to their markets on any kind of Canada more than anything else that tony? That is what reciprocity will induce dthe Americans to give us access to their markets on any kind of reasonable terms. There was, as you remember, also a Fenian agitation through the tring the above the same terms to other countries, with whom we have a stiff, that is do say with the south the the abrogation of the reciprocity treaty. One of the reasons given was that Canada had increased the duties on American manufactures. They also claimed that the Canadian Government had adopted a system of preferential duties for the purpose of bringing trade thru the St. Lawrence Canal. They also claimed that American grain was shipped into Canada, ground there into flour, and shipped back into the United States, thus building up the Canadian milling industry. Mr. Potter, the consul for the United States at Montreal, spoke at Detroit on July II, 1865, to a delegation representing the boards of trade and commercial organizations of Canada and the United States: "Now we are ready to give you in Canada the most perfect reciprocity. We will give you complete free trade, but we ask you to come and share with us the responsibilities of our own government.

I believe I express the general feeling of those who are the most friendly to the United States in Canada, when I say it is not the policy of our government.

To continue this treaty, and I believe that in two years from the abrogation of the reciprocity treaty the people of Canada themselves will apply for admission to the United States."

Coincident with this, in the following year, The Chicago Tribune, the leading newspaper in the west, dealt with this question pretty frankly, and stated. Our tariff to-day is not favorable to the farmer. The high tariff on farm implements, especially hinders and mowers, is an anomaly and contrary to Conservative principles, and the spirit of the National Policy of Sir John A. Macdonaid. The Beef Trust already has its hooks in our largest markets, and in the big hotels of Toronto, Montreal and the larger cities of Canada it is Chicago beef which is served for dinner. A letter was received yesterday morning by the secretary of the Y. M. C. A. International Convention, from Arthur N. Cotton, Buffalo. saying that he is bringing over a big party of scoutmasters and men interested in the scout movement in Buffalo. The boy scouts will have a prominent part.

All trains carrying delegates will be met at the Union Station by Scout-master McKechnie and a troop of 50-boy scouts, who will act as guides, tak-ing the delegates to their hotels and a billets.

On Saturday night the greatest demonstration of boy scouts that has ever been held in America, will take ever been held in America, will take place in connection with the athletic meet at the armories. Over 1000 scouts will be in uniform, and the 45 troo; will each put on some unique display. Some of the features will be: Fire lighting without matches; fire building and cooking; tent pitching; wireless telegraphy; building of bivouac; first aid to the injured; life saving; cyclestretcher corps, Indian fire; bridge building; mat making; signaling; lassooing; knot tying competition; fire rescuing drill. There are more boy scouts in Toronto than in any other

city in America.

On Monday night the program in Massey Hall will consist of talks from four of the leading boys' workers in America. Mr. Graham Taylor of Chicago, the editor of The Survey, will give a talk on "Safeguarding the Boys of the Continent." Col. W. B. Wakefield of London. OTTAWA. Oct. 25.—(Special.)—The feature of the sitting of the railway commission to-day, when two applications affecting the Lord's Day Act were considered, was the browbeating of W. P. The Owen Sound application is a sequel to a law suit entered against the C.P.R. by the Lord's Day Alliance. The case for the company was put by J. A. Simpson, agent at Owen Sound, who declared positively that it was impossible to so arrange the work as to do away with Sunday labor. It was his policy to have 'the Sunday vessels loaded as much as possible with grain rather than package freight, because it took ten times as many men to handle the latter as it did to handle the grain.

Angus McMurchy, K.C., for the applicants, argued that the Mututal Transit Company does a large lake business which at this season is particularly urgent. If Sunday work in tranship-ment to rail were not allowed at Windsor, the traffic would go thru American ports at Cleveland and Buffalo.

R. N. McPherson for the Lord's Day Alliance, urged, first, that the board had no jurisdiction in the case, and secondly that if this privilege were granted, it would open the door to unstate the case.

CATHEDRAL CHOIR BANQUETED

A pleasant social function occurred last evening when Albert Nordheimer, as chairman of the musical commttee of St. James' Cathedral, gave a "supper" to the members of the choir. The occasion was graced by the presence of His Lordship Bishop Du Moulin. Other guests were Canon Plumptra, rector of St. James' Cathedral, his assistants, Revs. G. M. Barron and C. D. Pilcher; C. A. B. Brown of the board of education; T. Rawson, vestry clerk; Arthur Grasett, W. T. Boyd and Dr. Albert Ham, choirmaster and organist of St. James' Cathedral. The assembly numbered about 100.

Mr. Nordheimer explained the purpose of the gathering, which was purely social, and remarked the very high quality of the musical services of St. James' Cathedral, and emphasized the fact that their superior excellence was due to the choirmaster and organist. Dr. Ham, "who," said Mr. Nordheimer, "has shown himself not only a master in his art, but also a gentleman of

During the evening a program was rendered by members of the choir.

L. M. Rathbun, baritone, sang Sargent's beautiful setting to "Blow, Blow, Thou Winter Wind": Percy Ham (baritone) and Mr. Ross (tenor) were heard in Balft's melodious setting to Longfellow's "Excelsior." The choir sang with delightful effect Dr. Chas. Vincent's carol, "'Tis the Birthday of Odr Saviour." day of Our Saviour.

Leave Stage at the Stage Door

"I have at least one strong conviction," remarked Miss Blanche Ring between acts of "The Yankee Girl" at the Royal Alexandra Theatre. "It is that theatrical people should leave the stage at the stage door. The great curse of players and singers in this country is that they are actors on and off, the stage, and look the part, not only in their dressing rooms, but walking along the streets.

ing along the streets.
"As a matter of fact, actors should not walk along the streets. Familiarity breeds contempt. When a citizen sees a performer outside of the theatre, it diminishes the citizen's desire to buy a seat, for the stage should always be a realm of mystery. No one recognized this fact more readily than did the late Augustin Daly. In his contracts with his principal players, such as the late James Lewis, the late Mrs. Gilbert, Ada Rehan and John Drew, he inserted a clause that they must not walk on Broadway. Many that knew about this clause used to deride Mr. Daly; but it was a wise clause and Mr. Daly

The construction of these Russell Models will show you the importance we attach to the quality of a motor car.

There isn't one standard for the parts which show and another for the parts which do not show.

You can see the quality of finish and fittings, but the Russell thoroughness goes to every working part—to every gear—yes, to every bolt and its very manner of fastening. No matter which of these cars pleases you most bear in mind that highgrade quality possesses it in every detail.

Russell "38" Limousine (the De Luxe Car) is the leading car in this exhibit. It has the Knight motor. Its easy riding qualities are helped by its long wheel base, 127 ins., and its large wheels, 36x 4 1-2 inches front and rear. It accommodates six inside with comfort. All the luxury of finish and appointments known to the business are expended upon it.

... OF SPECIAL interest to Physicians.

Russell "30" Coupe is particularly designed for physicians. . All the steering and driving mechanism is enclosed. . No more practical or comfortable vehicle could be imagined

You are cordially invited to inspect all these cars at our branch, where their merits will be carefully explained.

We are also at this time showing a number of desirable used cars which have been taken in exchange for Knight engine models and priced very low.

There is a whole lot of dissatisfaction in the Annette-st. neighborhood over the apparently ill-advised action of the board of education in beginning the erection of a 23-room building at the rear end of the site, and in the destruction of the present 12-room building. The Annette-st. school and surroundings have always been regarded as especially pleasing by the westenders and the trees and shrubbery facing Annette-st. and along Clendenan-ave were about the only beauty spots accessible to the general public, but the contractors doing the work, have changed allethis, slashing and cutting the trees and shrubbery right and left. The old school cost \$40,000 and was all right, while the new building will cost \$75,000, besides all the damage already occasioned. When it comes down to common sense, the West Toronto school board could give is a whole lot of dissatisfac the city men a lot of pointers yet.

At the afternoon session addresses were given by Rev. C. A. Seager, M.A., St. Cyprian's Church, Toronto; Rev. C. R. Gunne, M.A., Clinton, and Rev. T. B. Howard of Brantford.

Five papers were read on the general subject of "committee work" during the morning session. R. E. Charles of Huron College, London, Ont., spoke on "The Value of Committee Work." He thought full newspaper reports would be of great assistance to the association. "The Ideal Program" was read by W. A. Peacy. "The Ideal Visiting Committee," read by Miss Notter, deaconess at the Church of the Epiphany, scored the spiate of standing aside shown by some Anglicans. D. H. Bissell, vice-chairman of the Toronto Association, gave an exposition of the work of a social and refreshment committee. The discussion concluded with a talk on "The Ideal Men's Commita talk on "The Ideal Men's Con

How About the Children's Health?

They Would Thrive in Pine Beach.

"Children three inches taller and thirty pounds heavier in weight. This is the difference which has been proved to exist between the children of a garden city in England and the children of a poor district in one of the big cities."-Extract from The Weekly Star, "The Need of a Garden Suburb in Toronto."

Pine Beach is a garden suburb, and infinitely more. There is plenty of room for children to play here and get acquainted with nature. The tang of the pines and the invigorating lake breezes will bring the bloom to their cheeks. Pine Beach is not only a health insurance for the present generation, but for the coming generation as well.

Lots in Pine Beach are going fast. If you want to make sure of a lot you had better get in touch with the Head Office at once.

Bradstreet's estimates the visible supply of wheat east of Rockies, increase, 507,000 bushels; Canada, decrease, 599,000 bushels; U. S. and Canada, decrease, 92,000 bushels; afloat and in Europe, unchanged; total decrease, 92,000 bushels. Corn, decrease, 736,000 bushels. Oats, decrease, 834,000 bushels.

Corn Crop Possibilities.

Figures furnished by Mr. Snow of the prospective amount of corn in sight for the coming year, show an amount of grain to be disposed of such as the trade has never before seen. There seems, therefore, only one solution to the question of what shall become of our surplus, namely, that prices must decline to a point where they will become attractive to European buyers.

Manitoba wheat-No. 1 northern, No. 2 northern, 96c, track, lake ports. European visible: Wheat this week, 101,228,000, against 101,236,000 last week; decrease, 63,000 bushels. Last week there was a decrease of 244,000, and last year an increase of 6,300,000.

increase of 6,300,000.

Russia.—An official report places the yield of winter wheat at 248,000,000 bushels. The final figures for last year placed the yield of wheat at 208,400,000, and rye at 522,000,000 bushels.

Broomhall says it is called a preliminary report, and is about the same figures as given early. Traders here do not believe these figures of a crop over last year, because the quality of much of the offerings is very poor.

Corn—No. 2 yellow, 51½c: No. 3, 51c. c.i.f., Midland or Collingwood, prompt shipment from Chicago; No. 2 yellow. 56c; No. 3 yellow, 55½c, all rail, Toronto.

Ontario flour—Winter wheat flour, \$3.60, seaboard.

Manitoba flour—Quotations at Toronto are: First patents, \$5.70; second patents, patents, \$5.20; strong bakers, \$5.

Foreign Crop Summary.

Broomhall's weekly summary of foreign crop conditions is supplied by J. P. Bickell & Co., as follows:

United Kingdom.—Threshing results indicate a crop generally below that of last year. Seeding is progressing slowly. The weather is rainy.

France.—Seeding is being done under favorable weather conditions, and an infereased acreage over last year is expected. Recent arrivals of foreign wheat have been very big, but it is claimed that requirements will be large. The weather is rainy.

quirements will be large. The weather is rainy.

Germany.—Seeding is progressing slowly, and there are many complaints of vermin. Supplies of native wheat are rather light. Rain is needed.

Hungary.—Showers have fallen, which are beneficial to the wheat seeded, but more rain is wanted.

Italy.—The outlook is mostly favorable. North Africa.—Weather is very dry.

Russia—Have been good rains, and outlook for the seeding is favorable.

Argentine.—Our agent says that he believes the outlook in the south is excellent, and that the combined increased acreage over last year will offset the damage in the north. In the north the plant has commenced earing.

India.—There have been sufficient rains to enable seeding to be carried on, and the outlook is favorable.

J. P. Bickell & Co. say at the close of the market:

Wheat—Lower cables, speculative duiness and light cash demand were the features in a dull session, values closing about unchanged. As long as cash demand contisues light, we are of the opinion that sales on bulges are still advisable. Accept moderate profits, as market appears a trading affair.

Erickson Perkins & Co. had the follow-

able. Accept moderate profits, as market appears a trading affair.

Erickson Perkins & Co. had the following at the close:
Wheat—There was nothing in the way of news to warrant this little advance and around noon, when some selling pressure developed, prices receded to opening figures, railying again toward the close. The Cornwall police station was the scene of a rather unique proceeding figures, railying again toward the close. The foreign demand for Manitobas was reported the poorest of the season, with Liverpool a re-seller, owing to the better outlook in the Argentine. Temporary railles, such as occurred to-day, may result from time to time, but we do not believe that any sustained advance can take place until the dash position changes. Corn—Market opened lower on continued good weather. There seemed to be a little change of sensiment among some of the local professionals, who, taking the long side of the market, caused a raily to above last night's prices, but most of this advance was lost. We continue our advices to stay on the short side of corn, helieving that a materially lower range of values must eventually prevail.

Outs—Prices moved in sympathy with other grains. Shorts were free buyers again, and the selling pressure was moderate, but the offerings were from the commission houses. We can see nothing on which to advise purchases.

Indiana, Commends Appointment of Joseph Downey.

The Ontario Government didn't err in principle when it appointed Joseph

terday afternoon, but he did declare, from his own experience of such institutions in the United States, that what was needed was a superintendent who possessed executive ability, and not a doctor. He was emphatic on the

point.

There were 80 such institutions in the United States, he said, and the two that were conducted most scientifically, economically and with the best all-round results, were not in the hands of medical men. These institutions were in Vineland, New Jersey and Ft. Wayne, Ind., Mr. Johnson having been superintendent of the latter for more than ten years, adding the modest explanation that he had not been connected with it for seven years.

planation that he had not been connected with it for seven years.

Not a Dector's Job.

"It isn't a doctor's job," he declared.

"When you appoint a medical man, he finds he has no time in attending to the details of management to act in the capacity of a doctor. It is all very well to have a doctor under him, but practical ability is the first requisite."

Mr. Johnson is the guest of J. J. Kelso, superintendent of neglected children for the province. He arrived in Toronto yesterday from Orillia, where he was much impressed with the size of the undertaking which Mr. Lowney has tackled.

World Office, Tuesday Evening, Oct. 25. Another day of speculative realizing 5,300 was witnessed on This was assisted 1,700 Exchange to-day. This was assisted by heaviness on Wall-street, and the by heaviness on Wall-street, and the belief that tighter money would temperarily influence values.

The usually active and therefore more speculative stocks were chiefly dealt in. Rio earnings for the month, which came to hand to-day, were accepted as highly satisfactory, but the market, and not statistics, is immedia-

ately framing sentiment.

Rio and Mackay were under offer at lower prices, mainly because of weaker prices on outside exchanges.

Mackay common sold at New York at 31 3-4, while bids of 92 3-4 were in the market here. The extraordinary at 91 3-4, while bids of 92 3-4 were in the market here. The extraordinary desire to dispose of the shares on Wall-street has upset local calculations and changed opinons on the issue. From now on arbitrage houses will keep close tab on New York, and the Toronto quotations will be in closer accord with the bigger market.

In a general way there were more selling orders in the market than there were buyers, and for several weeks this was the first time this had been witnessed.

witnessed.

In some issues which have been unduly bulled the selling came from inside interests, who had made a market to sell on.

This was the accepted condition as far as traders were concerned, and these in some instances were inclined to put out short lines in order to undercut the large holders.

Less investment buying was report-

dercut the large nolders.

Less investment buying was reported and as usual on a declining market there was the usual diappointment expressed.

Among the more stable financial interests no concern was felt otherwise than that overspeculation had been indulged in, the this would remedy itself in a short period.

MARKET AGAIN IN THE DOLDRUMS.

World Office,

The Toronto market is again in the doldrums, having reached a stage in most instances in which buyers or sellers are afraid to operate. Prices in a few cases were lower to-day, but the changes, with the exception of Dominion Steel Corporation shares, were restricted to fractions. Sentiment on the market is mixed, but the consensus of opinion favors a quiet period to admit of the assimilation of some of the blocks of Rio, Mackay and Twin City, which were brought on from outside exchanges during the active times of two weeks ago. Investment as well as speculative demand has quieted down, and some

Socialist Activity.

The Socialists announce their determination to make the second war a thoroly Socialist ward in 1912. At meeting in the Finnish Hall, the cam paign committee of local No. 1 block-ed out the streets which are to be canvassed regularly by Socialist color-teurs. Besides pushing the sale of their literature in carefully chosen working-class districts, they expect to distribute half a million leaflets in that portion of the city lying between Jarvis and Sumach-streets. Arrange ments have also been completed for holding a concert and dance in the Labor Temple on Thanksgiving Night, to raise funds to carry on this year's municipal campaign. Justices Exceeded Authority.

Charles Freyd, serving a year's imprisonment in the Central for passing a worthless cheque in Gowganda, yesterday applied to Justice Clute for an order of habeas corpus on the point that he was convicted by justices of the peace, who have no authority in cases where more than \$10 is involved. Freyd was brought down to Osgoode Hall in conspicuous garb and handcuffed in a crowded street car. He is held in custody for the justices to pass upon the point as to whether he should be committed for trial.

There was a fairly good call for most of the generally active stocks, but this was offset by the realizing which came into the market and which resulted in some price recessions before the selling was fully taken care of. A good demand was in evidence on the lower figures, however, and this resulted in one or two further advances in certain of the cheaper securities.

La Rose sold between \$4.92 and par, the shares being offered down when holders began to take profits which had accumulated on the recent advance. Nipissing was another mark for realizing sales, the stock selling back to \$11.37, against yesterday's high figures of \$11.50.

Gould has long been known to be a valuable property. But the company lacked money. It now has the money. Need I say more? Nor shall I say anything further than that A. J. Barr & Co., who are not stock jobbers (the price is an indication that no tob is on) After our recent visit to Cobalt we are satisfied that two of the best purchases on the Cobalt market are TIMISKAMING and CHAMBERS-FERLAND.

TIMISKAMING will turn out 2,000,000 ozs of silver this year and is daily earning over \$1000 net. The ore at the 500-ft, level is equal to any yet struck in the camp. Another distribution of profits will likely be made to shareholders at the first of the year. CHAMBERS-FERLAND has larger cash assets on the present value of its capitalization than any mine in the camp. The company has big quantities of second-grade ore to ship, and the prospects are that the rich Meyer and Fourth of July veins on Nipissing will be found on the Chambers-Ferland property. Both stocks should be bought at once, either through us or your own broker. Send for further information.
