WOMEN WERE FEMINO WIKER ROPE BELVING

Miramichi Advance. CHATHAM, N. B., JANUARY 6, 1898.

The opposition press informed us a few days ago that the Ontario members of the Dominion government were opposing the proposition of Hon. Mr. Blair for the further extension of the Intercolonial Railway system by the acquisition of the Canada Eastern. Our people hardly believed the statement at first, but it may be assumed that there is some truth in it since the Ontario Globe—the leading Ontario organ of the government—is out against the taking over of the road.

Looking to the fact that the people of Ontario and Quebec have never taken the trouble to inform themselves of the real position of the maritime provinces in the confederacy, and the contempt too often expressed for them by public men of Ontario—even by one prominent member, at least, of the present ministry—it has become the habit of all Ontario governments to withhold, especially from this section of New Brunswick, what has been justly due in the matter of public works. It is a fact capable of ample proof that New Brunswick contributes more largely per capita to the revenues of the Dominion than the average of the country, and it is also well known that owing to the bulk of Canada's importations being passed through the custom houses of Montreal and Quebec, those ports receive the credit of much of the trade and revenue which should be credited to this province.

For reasons such as this Ontario especially has come to look upon the maritime provinces generally as no account and entitled to but scant consideration. In the treatment of the question of the Canada Eastern Railway the Globe appears to be disposed to enter to the ignorance prevailing amongst the greater number of its readers respecting this province and its claims in the railway matter referred to, but we can hardly believe that they are so ill-informed as not to realize that the Globe is inspired by interests other than those which ought to guide it when it condemns that for New Brunswick which it has always approved for Ontario.

It is in the case of the Canada Eastern Railway, the Globe's attitude is so open to criticism that it is to be regretted that the Globe is endeavoring to get control of it. Our people fear that should it do so they will be required to pay the arbitrary rates on the traffic they have been necessarily supply to it, which have been a cause of just complaint on all portions of that great company's lines where such rates could be applied. They, therefore, desire the Government to acquire the road and make it a part of the Intercolonial system. It is well known that the Canada Eastern is one of the best paying railways in the country, that it will easily pay running expenses and the interest on the price that may be paid for it. Even if this were not so, the government might still be asked to buy it in the interest of the large commercial community whose trade would be promoted thereby, for fair consideration in such matters has, as we have already said, long been withheld from this portion of New Brunswick, and our people are beginning to wonder whether their exigencies are ever to be recognized by those who make up the estimates at Ottawa.

It is reported that the opposition of the Globe to the purchase of the Canada Eastern is an interested one; that it is inspired from Canadian Pacific quarters; that that paper's great circulation and influence are turned against our people's interest in the matter by considerations which render it a dangerous ally of Ontario or other members of the Ottawa clique. We would like to believe that the rumor is unfounded, but its scope in favoring the investment of Canada's millions in building railways for the O. P. E. where other railways already exist and opposing the government's proposed purchase of our little Canada Eastern when the same big corporation desires to get it under its control, is not to be explained on grounds which can be readily understood by the ordinary mind.

The Frederickton Herald says: "The Globe reflects St. John's selfishness when it throws cold water on the proposed government purchase of the Canada Eastern railway. Everything for St. John and let the rest of the country go the dogs is the St. John motto."

We think the Herald is mistaken and does St. John a wrong. It is not St. John's selfishness that the Globe represents, but simply its own policy of thwarting Mr. Blair in any matter he undertakes. The Globe would oppose Mr. Blair in his efforts to fully develop the winter port business at St. John if it thought it could do so with-

out injuring the political fortunes of a certain Mr. P. who is green with envy because he is rated at his real value, instead of that which he places on himself. Mr. Ellis, M. P., knows that it is the Canada Eastern Railway which is acquired by the government and made a part of the Intercolonial system, it will prove a plying investment and increase public confidence in the Minister of Railways. That is the reason why Mr. Ellis would sooner see the government's opportunity to help the country and win additional support from the people more directly benefited, than that Mr. Blair should be instrumental in bringing about so desirable a result. That's the whole matter in a nutshell.

Miramichi people will not fail to remember, in this connection, that the Globe has been almost invariably opposed to their interests. It did its best to have the system continued by the Ontario lumbermen were taxed at a higher rate than those of any other province in the Dominion, and it has steadily shown not only an indifference to our interests, but antipathy towards them. Its latest exhibition of narrow-mindedness, in attempting to injure both Northumberland and York, in order that it may weaken the prestige of Mr. Blair, is only of a piece with its usual tactics.

Perhaps the most important and independent of the opponents of Mr. Blair's proposal for the acquisition of the Canada Eastern Railway by the government is the World, which is published right here in Chatham, a town which would be directly benefited by the transfer. We say "independent" and "impartial" advisedly, because Mr. Blair, only a few days since, stated plainly and publicly in a speech in Chatham that he was earnestly desirous of having the government make the purchase, the World with its accustomed vulgarity and rufianism says: "We do not believe that Mr. Blair has seriously contemplated or proposed the purchase of the railway." The World and the St. John Globe have a common purpose to serve. They both hate Mr. Blair and would go to any lengths to prevent him from carrying out his plans for benefiting the country. Fortunately neither paper wields any appreciable influence upon the public mind, although the people of the Miramichi ought not to easily forget how strenuously the World has worked against Mr. Blair in this most important matter. The few business men of Chatham who show their approval of the World's course by pronouncing it, must have peculiar ideas of the duty they owe to the community upon which they depend for a living and whose interests it attacks in order that a Liberal government may not have the credit of conferring a benefit not only upon the town, but to a large extent also upon every other place from Lunenburg to Fredericton.

The Reticent Telephone has been imposed upon and, as its duty bound, we sympathize with it. Somebody has taken advantage of its juvenile inexperience and, to use an unauthoritative term of expression, pulled its leg. It has been induced to publish an article purporting to give the opinion of the provincial government and opposition, respectively. It evidently thinks the production an important one, for it gives it the most prominent place in its pages and honors it with its largest type. The Telephone appears to be innocent of knowledge respecting the character of its alleged opposition policy. For that reason no one ought to find fault with it for seriously reproducing so hoary a chestnut, and attributing it to its friends as the discovery and the embodiment of the doctrines and principles which will characterize their administration of provincial affairs should they ever get control of them. We are sure also that no enlightened person will have any feeling other than pity for the Telephone over the string of absurdities which it presents as the government's policy. We observe that its favorite opposition plank is one which deprecates advanced education, but notwithstanding the evidence which its columns furnish of its practical belief in scholastic deficiencies, we entertain the hope that as it grows older it will learn to exercise better discrimination as to time and matter in the production of political campaign material, otherwise its friends of the opposition will profit little by its efforts to assist them.

The recent visit of the distinguished leader of the opposition to Campbellton may have had some connection with the article in question, and if so it is an illustration of the learned doctor's provincial bias. In regard to the persons and methods he employs in his opposition propaganda. However good-looking a man he may be, or however suitably such flatterments as his Messrs. Black, Pink or Blue, no well informed voter can be made to believe that if they should be so fortunate as to become the leading lights of a future government they would seriously entertain such a policy as the Telephone attributes to them. True, it is and has been practically the declared policy of every opposition party since confederation and has been varied only to suit localities, but the present leaders would forget it as quickly as they would the Telephone or any other intermeddler undeveloped auxiliary the moment they attained to power.

As to the alleged presentation of the government's policy, we cannot believe that even those in Restigouche who are so unfortunate as to have no other political guide than the Telephone can be so prevented in their view of public affairs as not to know that the production is not the work of a mind demented by disappointed longing for the milk and meat which all callow politicians and newspaper proprietors imagine are within the government's coasts and form the feastings of the envious ones who are cracking it.

The opposition policy presented by the Telephone, like all its predecessors, is garmented with good intentions as a boiled ham with cloves and tins-paper. It is full of the turn-over-a-leaf spirit which one naturally expects from sources suggestive of the need of repentance and the formation of good resolutions, which among the wicked, are inseparable from the thoughts of the present season. But it is not the most reckless extravagance of their friends who seriously object to learning anything correctly, to turn backwards a few leaves in the history of opposition declarations in our beloved country. It will learn that the Conservatives declared in 1878 that nothing but the most reckless extravagance on the part of any Dominion government could make the annual expenditure on account of the consolidated fund amount to more than \$22,000,000. That was the unequivocal declaration of the conservative leader in this province. But when he and his friends attained to power in the election of that year and he became finance minister, he seemed to forget all about his \$22,000,000 limit of expenditure. The gentlemen who, in opposition, were horrified over an annual outlay of \$23,000,000, immediately went into power to begin to pile Pelon on Ossa in the way of expenditure. They went it so fast that, in round numbers, their expenditures were:

Table with 2 columns: Year and Amount. 1879: \$25,000,000; 1881: \$26,000,000; 1882: \$27,000,000; 1883: \$28,000,000; 1884: \$30,000,000; and so on until 1895: \$38,000,000.

What They Think of it. There is no federal politics as yet in the Charlotte district, notwithstanding the kind advice of some very old friends who reside beyond the boundaries of the constituency.—St. Stephen Courier.

The Sun says it did not venture to make a prophecy in connection with the recent seat in Charlotte. It would be quite safe for it to prophesy that no opposition candidate will be elected.—St. Andrews Beacon.

Dr. Stockton has now to witness the strange spectacle of Conservatives and Liberals meeting in joint caucus in Charlotte, and Conservative candidates like J. D. Giffman and Hazen Grimper going with each other for nomination as best government supporters. This is certainly not very encouraging for the Opposition leader.—Richibucto Review; THE SUN'S IMPERTINENCE.

Strong and consistent a Conservative as the late Hon. James Mitchell was, he was not less bitter an opponent of the Sun. The friends who stood by Mr. Mitchell during his fifteen years of public life are not now seeking advice from the Sun as to the choice of his successor, and is a piece of impertinence in the Tory organ to presume to offer its advice.—[Tion Herald]

THE DIFFERENCE.—The Record pretends to believe that there is no member of the local government with the courage of conviction to stand up for the people. If the genial old gentleman who sits the Record would drop into the legislature some day he would speedily be undeceived. Why, it was only last session that the Doctor cried quits before the Provincial Secretary was half through with him. The Doctor is a brave talker when his opponent's are hundreds of miles away; he is a distinctly different individual when they face him on the floor of the legislature.—[Herald]

Chatham Town Council. The Town Council met in regular monthly session on Monday evening, 1st inst. Mayor Watson presiding. Clerk Benson read the minutes of last meeting, which were confirmed, after some corrections had been made.

The Mayor read an application from Hon. J. B. Snowball stating that he had an insufficient supply of fresh water for his mill boilers and asking permission to take the waste water from the Armstrong tank. The Mayor said he had no doubt that the council would be disposed to meet Mr. Snowball's views if it could be done without giving him any vested right over what was a public privilege.

The Mayor said he understood that the pulp mill company had built the tank in question and were entitled to the waste water. Referred to the committee for report. The Mayor referred to an application from a building concern which he was willing to let for ten years said it was \$1,000 a year for a big factory in Chatham. Enalid, Misspoch had been written to on the subject and might be ready to present to the committee concerning it.

Ald. Neale read a communication from the secretary of the school trustees—Mr. Geo. Stothart—informing council that the sum of P. K. Coleman as school trustee had expired. Mr. Coleman was, on motion of Ald. Neale, reappointed. The Mayor said he had a number of applications for the office of town clerk, which the clerk read as follows:—T. M. Gaylor, at \$100 a year; J. P. Connor, " 120 " P. C. Johnson, " 100 " G. R. Bond, " 100 " These applications were allowed to stand over for the present.

apartments, for the rental of \$25 a year, the town to have full use of same for that figure. The offer of the Electric Light Company for placing the fixtures, etc., for lighting the building, which was referred to the committee to deal with, has been accepted, subject to reduction for any lights not placed as called for in the offer.

A force pump has been bought for the building at a cost of \$15, for forcing water into the basement to take on top floor. The ceiling in the council chamber, which it was found necessary to paint, has been done by tender, the lowest tender being accepted.

Twelve tons of furnace coal have been ordered for St. John at \$5.25 per ton—no coal being procurable here. Five tons of soft coal have also been bought from Mr. E. J. Snowball at a cost of \$4 per ton. Tenders for 75 M. of 2 in. hemlock deals and 250 M. of 1 in. hemlock deals for same will be laid before you to-night.

The planning and heating of the public building has been completed this week, and the painting will be proceeded with and we expect to be able to take over the building in two weeks.

Ald. Neale read report of the street commissioner respecting landings and the procuring of new paving stones. The report was read and adopted. Ald. Neale read tender of Hon. J. B. Snowball for hemlock deals at \$5.00 per M. delivered at his mill wharf on or after 1st May. Ald. Neale said this was the lowest tender for the same and was higher than that of last year.

On motion of Ald. Neale it was laid on the table. Ald. Flanagan, from the Bye Law committee, read report by E. Law, regarding the cost of the new building, and also to prepare bill books and do all work connected with the elections of mayor and aldermen as part of his regular duties. Adopted.

Ald. Neale gave notice that at next meeting of council he would move to amend Sec. 8 of Bye Laws respecting duties of town clerk. Ald. Robinson said a set each of double and single harness was required for five horses. He had made enquiries in St. John as to price etc.

Ald. Loggie said the Gutter Percha Rubber Co. of Toronto had, last year, given an estimate on such harness, and it was filed with the clerk. The matter was referred to the committee. Ald. Robinson said they should also have a good fire alarm bell. He referred to bell in St. John. The Carleton bells available weighed only 250 lbs. and were too small. They had put in a 2,000 lb. bell in Carleton. Nothing less than a 1,000 lb. bell would do for Chatham. No. 2 bell was practically useless as an alarm.

The Mayor agreed that the bell of No. 2 was too small. Ald. Neale said No. 2 bell might be put in the tower of the new building and meantime enquiries as to cost of a better one could be made. Ald. Robinson favored getting a new bell at once.

Make a Pie. Shorten it with Cottole instead of lard and see what a crisp crust it will have. Pie made with Cottole will do a dyspeptic good. Do everything good because it is good. There is only one secret in cooking with Cottole—use but two-thirds as much as you would naturally use of lard. Follow this rule and Cottole will do the rest.

If you Know what you Want it is your own fault if you don't get it. In days gone by dealers were able to sell people just what they pleased, but the public of to-day are inclined to find out for themselves the best article in every line and they insist upon getting it.

Granby Rubbers AND OVERSHOES are known throughout the whole country to be the best in fit, finish, quality and durability and that is why people will have Granby's and no other. The extra thickness at ball and heel makes them last twice as long. GRANBY RUBBERS WEAR LIKE IRON.

WE GIVE LIFE TO OUR ENDURED FIBREWARE BY ENDOWING IT WITH A RUBBER CONSTITUTION. WE ADD HANDSOME APPEARANCE TO ITS DURABLENESS BY COVERING IT WITH A RUBBER GLOSS. THE B. EDDY CO. LIMITED, HULL CANADA.

police magistrates be received and adopted, and that the finance committee be instructed to find out whether the report includes the policemen's fees for December. Ald. Neale presented architect G. E. Fairweather's bill for services in connection with the public building, amounting to \$443.70 and also \$7.00 for an extra visit to Chatham.

Ald. Robinson said he was under the impression that Mr. Fairweather was to make two visits to Chatham in connection with the work. He might, however, be mistaken. Ald. Robinson said the number of visitors should have been stated in the memorandum of agreement with the architect. The bill was referred to the public works committee to be paid if found correct.

Report of collector of dog tax was also submitted by Ald. Loggie. Ordered that the accounts read by the chairman of the finance committee be published in the ADVANCE. A ballot was taken for the selection of a town clerk. The names of the four applicants, as read, were written on eight ballots, and the mayor directed that each alderman place a cross opposite the name of the candidate for whom he wished to vote. The result was the choice of Mr. Jas. P. Connor, who received seven votes, Mr. P. C. Johnson receiving one vote.

Mr. Jas. P. Connor was, on motion of Ald. Loggie, seconded by Ald. Neale, declared elected. Ald. Loggie gave notice of motion to repeal the bye-law relating to the construction of buildings within certain limits of the Town of Chatham. This is understood to refer to the requirement concerning brick or stone buildings.

It was ordered that the finance committee take the necessary steps for giving notice and preparing a bill for the legislature for an act to authorize a further issue of \$200,000 town debentures, as sanctioned by the recent public meeting called for the purpose. The public works committee was authorized to take steps to get, if practicable, a cargo or more of gravel suitable for the streets by some vessel to arrive at the port early next season, it being understood that the arrangement contemplated the securing of quantities of gravel ballast at nominal cost and not the ordering of any special shipment. Adjourned.

POULTRY FARMS. Chicken Raising by Women Near Cities and Small Towns. The raising of poultry is one of the most profitable occupations for women who live in small towns or in the country, and when properly and practically managed money can always be made. Children usually like to help about chickens, and the mother can nearly always count on her boys and girls taking an interest in the poultry farm, especially if they are allowed to have a few chickens of their own. The statistical bureau reveals an interesting and significant fact. The cash value of the cotton products of the United States for a certain year was given at \$410,000,000, the dairy products \$284,000,000, while the poultry products showed the robust sum of \$800,000,000. Surely this tells the value of the poultry farm.

MEETING COUNTY COUNCIL.

PIGEON BREEDING.

From the Pigeon Breeding, the pairing of pigeons is over. Now look out for the breeding pairs. Each pair should be provided with a large and airy nest.

The pairing of pigeons is over. Now look out for the breeding pairs. Each pair should be provided with a large and airy nest. It is possible to get it; pine, if the nest is made of straw, is better than any other material.

The next building is alternated with cleaning, killing and cooling. The first egg is laid in a nest made of straw, and the second egg is laid in a nest made of straw.

The Blue Langhans are not popular in this country, but in England they are highly favored. The subject of the illustration is a pair owned by a well known English fancier.

From Langhans, Blue Spanish, Minorcas and Highlegs—birds that are omnivorous and most persistent layers—may toward the latter part of the season be seen, and sometimes pale and weary. This is due, however, to the fact that they have exhausted themselves by excessive laying or have not had sufficiently nutritious food or enough of it.

Their early eggs are as rich as any brown eggs. All there is in it is this—their shells are brown, and the contents are white and sticky. They are not so prolific and do not lay enough to exhaust themselves or when they have insufficient material to produce a good egg.

You must not select stock that does not produce chickens having yellow skin and legs. The pinfeathers of the dark plumaged birds are also objectionable. Some dark breeds, when mated with white ones, produce white or very light chickens. White and buff fowls are to be preferred.

If you are to raise brown eggs, you must not keep pure breeds of the nonflying varieties. You may cross them with the breeds that lay brown eggs and get excellent stock that produce brown eggs.

If you are to keep your stock pure, you have from which to choose White and Buff Wyandottes and White Plymouth Rocks, which have no feathers on their legs, and Light Brahmans and Buff Cochins, which do have feathers on their legs. They also make most excellent yellow poultry.

If you cross for brown eggs, mate large White Langhans or Buff Leghorns with a Light Brahman or Buff Cochins rather than with Wyandottes or Plymouth Rocks, as the results will be better.

If you cross for flesh production, mate compact yellow legged games, white or light colored birds preferred, with any of the foregoing, or stock the Wyandottes or Plymouth Rocks with the Light Brahmans or Buff Cochins. Both Cornish and Indian games, which are also growers, have full flesh development, but dark plumage, and may be mated with Light Brahmans or Buff Cochins and Wyandottes with good results.

The best pure breeds for white eggs, where yellow poultry is a consideration, are White Langhans (large strain) and White Plymouth Rocks (white egg strain). If you cross for white eggs, try the White Minorcas, White Langhans or White Plymouth Rocks.

Where dark legs and white skin are not objected to, keep Black Minorcas for large white eggs and Black Langshans, which are hardy, for deep brown eggs. A Black Minorca-Langshan cross is probably the best cross for egg production, if size and number of eggs and hardiness only are considered.

For eggs nothing will equal a Leghorn. It would be best to select a White Leghorn cockerel for the yearlings and a White Leghorn hen for the pullets. When the chicks are 3 days old, take a few of the best and set of their wings on one side at the first joint, so as to remove all flight feathers, and they will never fly.

which serve as a handle. Smooth it against the feathers of the birds. Good clear laths nailed along the sides and to the end pieces make a sufficient side guard to the trough, projecting three-quarters of an inch to an inch above it, which is ample protection for the feet and legs. When this trough is intended for outdoor use, a galvanized iron hole is bored in each corner to allow the water to run off during a rain.

To Beginners In Poultry. Select carefully your breeder from whom you wish to purchase, inquire into his reputation and standing, and when you decide to send him your money do not expect too much.

How Much Water Can Be Converted Into A Profit. Professor Myers of the West Virginia experiment station would combine the dairy and poultry and so insure success on the farm. He writes as follows: "The poultry business requires no large amount of capital."

As to Quality. We shall never be induced a first class article until the consumer demands it and refuses to accept anything else. So long as there is no radical kick against the line or cold storage eggs being delivered as the fresh article, so long will dealers palm off the poorer and cheaper and charge for the richer and better.

What an Entertaining Man With Small Capital May Do. A correspondent of The Country Gentleman describes a poultry farm he visited some time ago to show what an enterprising farmer who is looking for larger profits can accomplish.

Light Brahmans. The Light Brahmans always been a justly popular breed of fowl. Today it has more friends than ever before. For the man with a small yard in the city there is no better breed than a little care can be made a fine farmer's bird.
