FORTY WERE KILLED.

RESULTS OF RAILWAY COLLISION IN LOUISIANA.

Many People Were Badly Injured—All the Dead Are Negroes—A Gruesome Spectacle.

New Orleans, La., Nov. 15.—The latest advices from the scene of last night's collision, in which the "cannonball" express on the Illinois Central crashed into the McComb accommodation, show that forty persons were killed and forty-three injured. All the dead except one, an unknown woman, are negroes, and twenty of the injured are also negroes. Most of the dead and injured were on the accommodation. Many of the bodies were burned beyond recognition. The coaches on the accommodation having caught fire soon after the wreck. The express crashed into the rear end of the McComb city train, demolishing a passenger car. A number of the dead were wedged between the express engine and the wreckage of the train ahead, a gruesome spectacle being presented to the rescuers, who here and there saw an arm or arm protruding from the twisted iron and splintered timber.

AGAINST TURKEY.

Conspiracy Between Bulgarians and Servians.

New Orleans, La., Nov. 16.—The a conspiracy of Bulgarian and Servian officers to provoke war with Turkey have been officially confirmed. According to these reports, Turkey was to be attacked by the combined armies of the two countries.

Boris Sarafoff, leader of the Macedonian revolutionists, arrived here last night and was received at the railway station by thousands of persons, who brought laurel wreaths and flowers, and acclaimed Sarafoff as a national hero. Sarafoff declared that the revolutionists were not only unconquered, but that their work was just beginning. The desperate condition of the refugees is adding new fuel to the insurgent movement, which is expected to be revived on a larger scale in the coming spring.

WORK TRAIN WRECKED.

Two Men Killed on C.P.R. Kirkella Branch.

Sofia, Nov. 16.—Previous reports of a collision occurred at Newford, a construction point on the new Kirkella branch of the C. P. R., on Friday afternoon. A work train, with a caboose in front, crashed into a number of cars on the switch, which had been left open. There were 160 laborers on board, and the train was bringing the men down the line to their boarding cars after the day's work was done. The caboose of the work train was telescoped by a flat car and five of the occupants killed or injured. One man was instantly killed, another lost both legs at the moment of the impact, and lived until he reached Brandon hospital. A third is in a very low condition. The four killed and most seriously injured are Bulgarians. Geo. Elliott, an Englishman, sustained a broken knee cap and internal injuries. He will probably recover. Doctors were hurried to the scene, and all the victims were brought to Brandon. Several of the other men sustained slight injuries. There will probably be an inquiry as to the culpability of the party or parties who left the switch open.

MARINES WERE COWARDS.

Unpleasant Official Report Regarding Guards on Iona Island, N.Y.

New York, Nov. 16.—The Herald says:—First reports, which told of the heroism of the marine guard at the time of the explosion of the naval magazine on Iona Island, November 4th, must have been considerably exaggerated, as it is now stated officially that most of the guard, except those who were killed, fled from the scene when the first shell was exploded, and did not return until all danger had passed. It is understood that Corporal Wallace, one of the guard who fled, has not yet returned, and is regarded as a deserter. Secretary of the Navy Moody has appointed a court of inquiry to make a searching investigation.

MAY BE MURDERED.

Catholic Priest Missing—Mafia Had Threatened Him With Death.

New York, Nov. 14.—Since Rev. Father Joseph Cirrione, pastor of a Catholic church in Williamsbridge, left his home Thursday night, not a trace of him has been found, and his friends and relatives fear he has been kidnapped or murdered by members of the Mafia, who had threatened him with death. The police are seeking two mysterious men, who by pretending to be city detectives enticed the priest away from his home.

Announcement was made before the Egyptian Exploration Fund of remarkable discoveries of ancient papyri dealing with the sayings of Christ.

The inquest on the body of the Lodger infant, at Brockville, showed that the child had been given a tablet containing bichloride of mercury.

RADIAL ROAD

A meeting in regard to the new electric railroad was held in the office of N. H. Stevens Friday. Messrs. Dunn and McKendrick, of Toronto, were present, also the following members of the councils of Dover and Chatham townships:—Reeve Cornelius Purser, Jos. Lewis, Mr. Boyer and Peter Crawford, of Dover Tp., and Reeve Cummings, R. A. Tompkins, and Mr. Abram, of Chatham Tp. George Stephens, M. P., was at the meeting. The interview proved very satisfactory.

At the next municipal elections the Tp. of Dover will be asked to vote a bonus of \$75,000, and the section of Chatham Tp. along the line of the electric road will be asked to vote a bonus of \$25,000. The road will run from Wallaceburg to Chatham along the town line. Dover Tp. gets the best of the road, as two branch lines will be run one to Dover and the other to Mitchell's Bay. Dover gets 10 miles of road extra that will cost \$200,000. If the by-law carries, the road will be built, much to the advantage of both the townships and the city.

FREE FOODERS AROUSED.

A Postcard Regarding Chamberlain Which Causes Enthusiasm.

London, Nov. 16.—A special meeting of the General Committee of the National Liberal Federation will be held at Liverpool on Wednesday. President Birrell will move a resolution condemning the reversal of the fiscal policy and calling upon Britain to resist by every means her power proposals which will raise the price of food and manufactured goods, reduce trade by increasing the cost of production, and endanger relations with the colonies. A postcard, which has been received with enthusiasm, and is being spread over the country, contains a picture of Mr. Chamberlain and the inscription, "What saith the Scriptures, Genesis, 41st chapter, 57th verse?"

The verse referred to reads:—"And when all the land of Egypt was famished, the people cried to Pharaoh for bread: and Pharaoh said unto all the Egyptians, Go unto Joseph: what he saith unto you, do."

Sir Michael Hicks-Beach's speech at Bristol has given rise to the most contradictory rumors. It is said on the one hand that he and the free-food party have captured Premier Balfour, and will check his tendency to go over to Mr. Chamberlain, and on the other hand, it is said that Mr. Balfour has done the capturing, and the Free Food League, losing a leader, will disappear. The latter is definitely decided on the 24th, when the league holds a public meeting, with the Duke of Devonshire as Chairman and Sir Michael Hicks-Beach and Lord Goschen as the speakers.

Chamberlain addresses a great meeting at Cardiff on Friday. He is inundated with invitations to speak at every great centre of population, but announces that after a London speech early in the year he will devote his time to mature consideration of the intricate problems that have arisen in connection with his policy.

The London News, referring to Sir Michael Hicks-Beach's speech at Bristol, says his surrender should act as a tonic to the Liberal party.

The Agent-General of New Brunswick, in transmitting to Mr. Chamberlain the resolution passed by the St. John Board of Trade, favoring his plans, received a reply, acknowledging the receipt with great pleasure, and saying that the support of the colonies is absolutely necessary to the success of his plan.

Earl Percy, speaking at Oxford on Saturday, said one would imagine the name of the Free Food League was the advertisement of a soup kitchen.

Liverpool is aroused by cargoes of door matting, which are sold as carpets, and sold in England because they are not allowed in the home market.

Mr. Bryan, the famous ex-Democratic candidate for the Presidency of the United States, who arrives in England on Wednesday, will be re-elected a temporary member of the National Liberal Club of London.

The report of the Local Government board, covering one thousand pages, shows that pauperism in London is distinctly on the increase. The causes given are the declining demand for skilled labor at the end of the war, improvidence and the great attractiveness of the modern workhouse.

A DANGEROUS ANARCHIST.

Arrested at Cherbourg by Special Officers From Paris.

Cherbourg, France, Nov. 14.—An Anarchist named Lambin was arrested this morning. The arrest created intense excitement, in view of the approaching arrival here of the King and Queen of Italy, on their way to England. The prisoner, who had been an employee of an analytical laboratory, is twenty years old. He arrived at Cherbourg two days ago and was recognized by the Paris police, sent to watch over the safety of the Italian Sovereigns, as a dangerous Anarchist, who had at one time been imprisoned at Troyes in connection with an Anarchist outrage.

It is only the married man who is familiar with the strenuous life.

SHOE FACTORIES CLOSED.

FIVE THOUSAND MEN OUT OF EMPLOYMENT.

Macinists' Trouble—Orders to Return to Work Disregarded—Hope of a Settlement This Week.

Quebec, Nov. 16.—All the boot and shoe factories here have been closed as a result of a difference between the shoe machinists and their employers. The machinists are the least skilled of the operatives, and they have been creating a lot of trouble for their employers for several months past.

The difficulty was precipitated by five edge trimmers identified with the Macinists' Union, who quit work at Marsh's factory a fortnight ago and refused to return except on their own terms. These men also refused to submit their grievances to the Boards of Conciliation and Arbitration, which boards were proposed by Archbishop Beaudry, and were accepted by the Macinists' Union for the adjustment of all disputes. It was alleged that the union was not responsible for the breach of faith, and that the men acted independently of that organization, but there is evidence of the union's activity in promoting the breach in every way possible. These five men, according to their agreement with the manufacturers, should have submitted their grievance to the Claims Committee, which is composed of three union men, who are supposed to confer with a conciliation committee constituted of three manufacturers, or as an alternative either interest was permitted to submit the matter in question to an arbitration committee of three, one appointed by the manufacturers, another by the union, and a third by the Provincial Chief Justice. Hitherto these provisions met all difficulties, but in the present instance there has been a stubborn resistance of mediation of any kind. The committee ordered the men back to work, but as they refused to comply the result has been a general closing down of the works. Some five thousand men are out of employment. Several of the leading manufacturers are, however, hopeful of a settlement of the difficulty and resumption of all work during the present week.

MORGAN GOES DOWN.

Rockefeller and Gould Control U.S. Steel.

Pittsburg, Pa., Nov. 16.—The Post publishes a story to the effect that a combination formed by John D. Rockefeller, Geo. J. Gould, J. P. Hill and other capitalists has practically secured control of the United States Steel Corporation; that the acquiring of the New York Central and its feeders by the Rockefeller-Gould interests is in furtherance of a plan to secure control of all railroads from the west to the seaboard, including the B. & O., and eventually the Pennsylvania Railroad. The scheme, it is claimed, is a plain business proposition, in which the syndicate has undertaken to secure control of the greatest tonnage producer in the world (the United States Steel Corporation), and provide means for the transportation, as well as for the export of the products of the plant. The article claims that the time is not far distant when, in its fight against the Pennsylvania, the Rockefeller-Gould syndicate will have at its disposal the enormous tonnage of the United States Steel Corporation and of the Pittsburg Coal Company.

HON. J. A. DAVIDSON DEAD.

He Was Provincial Treasurer of Manitoba.

Winnipeg, Nov. 16.—Hon. John A. Davidson, Provincial Treasurer of Manitoba, passed away at his home at Neepawa, shortly after 9 o'clock Saturday, after a lingering illness. A little over a year ago the late Mr. Davidson, on the advice of his physicians, took a trip to Germany, where he remained for some time under treatment, and returned home apparently much improved in health. Some months ago he was stricken with apoplexy in his office at the Government buildings, and it was then realized that he was only a matter of months when he would succumb.

ROBBERY AND ARSON.

Attempt to Burn Mr. Hannahan's Residence at Webbwood.

Webbwood, Nov. 16.—The residence of Mr. John Hannahan of this place was entered Saturday afternoon while Mr. Hannahan and family were absent, and several articles stolen. The thief, after ransacking the house from cellar to garret, attempted to burn the place by setting fire to a quantity of bedding and furniture piled up in the dining-room. A neighbor, seeing a stranger fleeing from the place, and knowing Mr. Hannahan and family were absent, rushed to the house, and after an exciting time succeeded in extinguishing the flames. Late in the evening Provincial Constables Irving and Spelman arrested a stranger answering the description of the man seen running from the house, and found some of the stolen articles on him. The man, who he said his name was Henry McCotter of Watertown, N.Y., McCotter is a stranger here, having only arrived on Friday. He will be brought before District Police Magistrate Brodie on Monday.

DRAINAGE COURT

Referee J. B. Rankin was in Amherstburg Wednesday last pursuant to an appointment given by him to inspect two drainage works each affecting three townships. The upper Township was Colchester South, middle Township Malden, lowest, Anderton. At Amherstburg a conference was held at the town hall between the Reeves, clerks, solicitors, two engineers, and some ratepayers interested in the work. The engineer of Colchester South had prepared a report of the drainage work extending through the middle and into lowest townships. The engineer of Malden had prepared a report for the drainage of Malden and this drainage work also extended into Anderton and lands in Colchester South were assessed for work. There were two appeals from each report, four in all.

At the conference, after much discussion, it was arranged a new report should be made by the referee and embodied in an order in which the two reports should be combined with such variations as were agreeable to all parties, and these variations were taken up one by one, and where a matter of law was involved the ruling of the referee was accepted. The result was that all four appeals which would have taken eight or ten days to try out were amicably and satisfactorily adjusted to the satisfaction of all parties and to the interest of the persons assessed. A. H. Clark, K. O. for Colchester South, W. E. Gundy for Malden and Delos R. Davis for Anderton.

HENRY VIII.

Macaulay Club to Dramatize Three Scenes from Shakespeare's Splendid Work

At the meeting of the Macaulay Club on Saturday evening it was decided, on recommendation of the Dramatic committee, to present to Maple City patrons of the dramatic art another of Shakespeare's standard productions, during the present season.

The Dramatic committee, which consists of J. S. Lane, B. A., C. E. Beeston, J. M. Pike, Dr. T. Holmes and President H. Collins, after a careful examination and discussion reported in favor of presenting the Third Act of Henry VIII. This act, it will be remembered, consists of three scenes that include the historical tragedies of the banishment of Queen Katherine and the fall of Wolsey.

The committee reported the following as the suggested draft of the cast:

King Henry—J. M. Pike.
Cromwell—S. B. Arnold.
Lord of Chamberlain—R. W. Angus.
Duke of Norfolk—Fred. Stone.
Duke of Suffolk—J. S. Black.
Earl of Surrey—F. D. Laurie.
Wolsey—H. W. Anderson.
Cromwell—C. B. Sissons.
Lovell—Dr. Geo. Musson.
The choice of Queen and her lady companions was left over till next meeting.—In order to enlist the co-operation of Maple City young ladies for these important feminine parts.

Messrs. Lane and Beeston will act as directors to the production.

The meeting was well attended and one of the best programs of the season resulted.

There were present, Pres. H. Collins and Messrs. Wilson Taylor, Fred. Stone, J. S. Lane, Dr. Geo. Musson, J. M. Pike, F. D. Laurie, C. E. Beeston, Thos. Scullard, Edwin Bell, H. J. Stevens, C. B. Sissons, S. B. Arnold, A. J. Dunn and the secretary.

Three applicants, A. B. Galbraith, Jas. Gaudreault and J. W. Powers, were elected to membership in the Club.

Ex-Ald. Fred. Stone contributed an excellent reading. The debate was one of the best in the history of the Club. The subject was:—"Resolved that it is not in the best interests of the Empire for England to continue her present free trade policy."

The speakers were:—
For the affirmative—Dr. Musson and Messrs. Stone, Taylor, Laurie, Stevens and Anderson.
For the negative—Messrs. Arnold, Pike, Lane, Beeston, Bell and Sissons.

After a careful summing up the chairman awarded the decision to the negative.

THREATENS LIBEL SUIT

"Rumor has it that the town, already bonused into poverty, is seizing the opportunity of improving the town's financial status, going the length of an apparent breach of faith with Mr. Davidson."

The above six lines is the closing sentence of an article published in last Saturday and Monday's Chatham News, headed "Sugar Factory may Leave Dresden." The whole article showed a bitter uncalculated feeling. It was written by a citizen of Dresden, he should feel ashamed, and if written by the editor of the News all we can say is that "people in glass houses should not throw stones," for if we are as deep in the mire as Chatham we should like to know it. We understand the council has instructed their solicitor to enter action for libel.—Dresden Times.

The Planet's new serial story, "Abner Daniel," will commence next Saturday's issue. Watch for it.

'PHONE ACROSS ATLANTIC.

ALSO A REVOLUTION IN SYSTEM OF TELEGRAPHING.

New and Signal Triumph of Modern Science Belongs to Britain—A Remarkable Prophecy.

New York, Nov. 16.—The Sun has the following special from London: Prophecy is dangerous, but, with a full realization of its pitfalls, the correspondent of The Sun ventures the following prediction: Within three months, probably before New Year's, direct telegraphic communication, without intermediate repeating stations, will be established for the first time between New York and London, and telegrams will be exchanged at a speed of more than four times the previous capacity of any cable. I am tempted to go a step further, and express the strong expectation that within a year it will be as feasible to converse by telephone between The Sun building in New York and The Sun's London office as it is across Manhattan.

Perhaps it is as well to confess that it is easy to prophesy when you know. The feat of rapid communication between London and New York, as a matter of fact, has been greatly surpassed recently in actual practice; in other words, the problem of cheap and rapid long-distance communication has been solved, and the credit for this signal triumph of modern science belongs to England.

I am compelled to await the permission of the inventors before making more than this general announcement.

MANY PERSONS IDLE.

Wages of Thousands of Others Are Reduced.

Chicago, Nov. 16.—The men employed in the bar mill of the Inland Steel Co. at Indiana Harbor have refused to accept a reduction of 12 1/2 per cent. in their wages, and the entire plant was shut down. About 1,600 men are thrown out of work.

Pittsburg, Pa., Nov. 16.—The threatened lock-out by the Builders' Exchange League against all crafts affiliated with the Building Trades Council became effective, throwing 8,000 men out of employment. With the 2,000 men on sympathetic strikes, 10,000 are now idle. The officers of the league say there can be no settlement until the sympathetic strikes are called off, and if this is not done before the close of next week the number of men in the lock-out will be increased to 20,000.

Birmingham, Ala., Nov. 16.—The Great Mills of the Tennessee Iron, Coal & Railway Company at Emley shut down Saturday for lack of orders, throwing 900 men out of work.

Pueblo, Colo., Nov. 16.—The anticipated partial closing of the Minnequa Steel Works, the plant of the Colorado Fuel & Iron Company in this city, took place Saturday, throwing 3,000 men out of work. Similar action is expected in various other towns in the Blackstone Valley.

Providence, R.I., Nov. 16.—The cotton manufacturers of Rhode Island, following the recent action of Fall River mill owners in deciding on a reduction of 10 per cent. in wages on November 23, have ordered a general cut-down affecting practically every mill in the State and several in Massachusetts and Connecticut. The reduction will become operative in some plants on November 23 and in others a week later. In all about 25,000 hands will have their pay reduced.

SIR T. SHAUGHNESSY'S FATHER

Died at His Home, Milwaukee, Wis., Aged Eighty-five.

Milwaukee, Wis., Nov. 16.—Thomas Shaughnessy, for sixty-two years a resident of Milwaukee and father of Sir Thomas Shaughnessy, President of the Canadian Pacific Railway, died Saturday, aged 85.

Wrong may try a man but cannot imprint upon him a false stamp.

THE NEW

DOROTHY DODDS ARE HERE

Are here in all their brightness.

Many new lasts and styles have been added to our stock.

We can fit any ladies' foot with a Dorothy Dodd Shoe.

Prices \$3.75. \$4.00

Peace & Co.

SOLE AGENTS

Store closes at 6.15,
except on Saturdays.

Early Closing

Has made great strides in public favor. About a year ago when we commenced closing at 6.15 there seemed to be an impression with some that we were trying to get out of our proper share of work. We thought then, and we feel certain of it now, that with proper hours our employees would work better and faster.

We have been told, and we believe it true, that our store service has improved. Fewer mistakes in our orders, more promptness, and certainly more cheerfulness about the work.

We hope you will give the early closing movement all the assistance you can.

We can assure you the clerks work faithfully and hard, and deserve it.

We promise that any orders entrusted to us will have most careful and prompt attention.

We hope to have your orders.

H. Malcolmson

Chamois Vests That Fit.

There's no question about the value of chamois vests as lung protection, but most of them are so ill shaped and poorly constructed as to produce irritation instead of comfort. We have a line of vests that it is a pleasure to wear and a comfort as well. They are perfectly form fitting and so put together that no weight comes on the seams. Our prices on these chamois vests are so reasonable that you really have no excuse for exposing yourself to danger by not wearing one. Prices range from

\$1.25 to \$2.00.

Red Cross Drug Store

W. W. Turner.

THE LOCAL BUDGET

Earl Davis, of Dreden, spent Saturday in the city.

Some good horses at various prices. Geo. Stephens & Co. tf

The Victor Oil Co., of Cleveland, want a salesman.

Art Kipp is spending a week with his Blenheim friends.

"The Real Widow Brown" at the Grand to-morrow night.

M. Wilson, K. C., left Saturday for Brantford and Hamilton.

The little child of Dick Lowe is slightly improved to-day.

Found, a child's ring. The owner can have it by applying at this office.

An effervescent fountain of joy fully describes "The Real Widow Brown."

Mr. and Mrs. J. Eastman are visiting Mr. and Mrs. Drader, Dufferin avenue.

The King's Daughters will meet at 3.30 on Tuesday at Mrs. McKend's Stanley avenue.

The Planet's new serial story, "Abner Daniel," will commence in next Saturday's issue. Watch for it.

Dr. and Mrs. Fraser, of Thamesville, were the guests of Mrs. W. M. Drader Saturday.

Miss Beulah Knapp left Friday for Vancouver on a visit to her aunt, Mrs. (Capt.) McKenzie.

The Northwood Co. have sent carloads of good potatoes.

When you want an artistic design call up or visit Victoria avenue green houses. Phone 181.

Probate of the will of the late Robert Sloan, of Tilbury, has been granted to Mary Cameron.

The Planet's new serial story, "Abner Daniel," will commence in next Saturday's issue. Watch for it.

Found, on Saturday, a black shawl. Owner may have same by proving property and paying for this advertisement.

Miss Tena McDougall, Lorne avenue, has returned from a pleasant visit in St. Catharines and other eastern cities.

Although it was raining, the rush for seats at Brisco's this morning for "The Real Widow Brown" nearly equalled the school concerts.

N. H. Stevens returned Saturday from St. Luke's Club. He got 16 black ducks, which is a good bag considering their scarcity this year.

Do not give up in despair, you who suffer from obstinate disfigurements of the skin. Anoint the sore spots with Weaver's Cerate and purify the blood with Weaver's Syrup.

The executive of the City Football Club will meet at this office this evening at seven o'clock. All the members are requested to be present as business of importance will be dealt with.

Souvenir Ranges are the most popular stove in Chatham; unequalled in Canada. Heavy, durable, economical in fuel; best cookers. Look at them. Geo. Stephens & Co. tf

The H. Brown who owned the team that ran away on the River Road last week, a month ago and collided with a buggy driven by Mrs. McKorrick and owned by Alex. Jamieson, has settled with the livery man for damages to the buggy. He paid \$17.50. A law suit was threatened.

The Young Men's Club of Park street Methodist church held a very enjoyable meeting Friday evening. C. B. Sisson, C. Austin, H. Westman, W. Taylor, Dr. A. W. Thornton and Rev. G. Cobblehead made short addresses. S. Noble Gardiner sang a solo. Games and light refreshments closed the evening.

Kenny's

—FOR—

Bibles, Prayer Books, Hymn Books, Devotional Books, in great variety. Fine Stationery in papereries, pads or otherwise. . . .

We are offering the greatest range of Books ever brought in to Chatham. Call and see this line; it will please you.

W. J. KENNY,

Phone 225. King St. East.

Paroxysms of laughter invariably greet the advent of "The Real Widow Brown."

If you want a stylish suit attend Thibodeau & Jacques dress goods sale. See "ad."

George Wanless left to-day on a business trip to Cedar Springs, Buxton and Fletchier.

Man wanted to take care of the furnace and to make himself generally useful. Apply at this office.

Mrs. Peter MacLean and son left Friday for their home in Vancouver, B. C., after a two months visit here.

The pedro party and refreshment social in aid of St. Joseph's church will be held in the hall this evening at eight o'clock. Admission 15 cents. All are invited.

Lost, on Saturday afternoon, on Tecumseh Park, King, Third or Wellington streets, a gold open face watch, blue enamel back with small gold wreath on enamel. Please leave at Planet Office and receive reward.

Rev. Mr. McCormick, of Jeannette's Creek, gave a splendid address at Victoria avenue Methodist League evening. Messrs. Harry Horstead and Kenneth Coatsworth sang a duet and Miss Jackson rendered very acceptably a solo.

Lost—Tuesday, a purse containing a sum of money and a number of papers. Finder will be rewarded by leaving at this office.

At the North Essex Teachers' Convention in Windsor last Friday, Mr. J. Herbert Dempster, B. A., editor of the Windsor Record, read a very able paper upon the Relation of the Press to Education. Mr. Dempster is a good thinker and an able scholar, and his paper was very highly appreciated by every one present. Mr. Dempster gives promise of being, in the near future, one of the brightest of Canadian writers.

Wm. Healey, of Merlin, was tried Friday last before his honor Judge Bell and found guilty of non-support of his wife. He was remanded a week for sentence. In doing so, His Honor condemned an unmeasured terms the heartless neglect and cruel treatment the man had shown his sick wife and an able scholar, and his paper was very highly appreciated by every one present. Mr. Dempster gives promise of being, in the near future, one of the brightest of Canadian writers.

The Rev. Mr. Chadwick, M. A., the newly appointed rector of All Saints Parish, Windsor, arrived there on Thursday last and took the duties in All Saints church yesterday. Mr. Chadwick is a young man of excellent appearance and has a most winning manner, and he has already made a most favorable impression upon his people. His rendering of the services and his discourses to his congregations yesterday were very much appreciated. Mr. Chadwick and the parish of All Saints appear to have a bright future ahead of them.

William Lloyd, who has been missing for some time, was found dead near Curtis Sliding, Man., and foul play is suspected.

Over 100 indictments were returned in the "hoodling" inquiry involving members of the Missouri Legislature and State officials.

The Dominion commercial travellers of Montreal nominated Messrs. J. S. N. Dougall and George A. Mann for the Presidency.

Valuable nickel deposits have been discovered in the Temiskaming district. Land along the railway has been reserved by the Government.

Thibodeau & Jacques are having a great dress goods sale; see their "ad" on page five.

A screaming farce-comedy with a real plot; pure fun all the way through, "The Real Widow Brown."

One of the best serial stories ever published will commence in The Big Saturday Planet this week. It will be well worth reading.

WIFE BEATER FINED

Wife beating is not likely to be popular in this County while H. D. Smith is Crown Attorney. F. E. Urquhart was to-day fined \$50.00 and costs, \$56.42 in all, for breaking his wife's nose during a little domestic difference.

The Crown Attorney said that in view of the fact that the parties were going to live apart and the representations that had been made as to the good character of Urquhart, he did not want to press for a severe sentence, but would ask for such a severe sentence that husbands would realize that wife beating was a luxury that could not be indulged in.

O. L. Lewis, counsel for the prisoner, came in with a lengthy petition which he presented to Judge Houston. "What's that?" queried the Crown prosecutor.

"No, indeed," retorted Mr. Lewis indignantly. "The petition from neighbors to the effect that if the assault was committed there was aggravation."

The Crown Attorney—"That's no excuse for striking a woman. Representations have been made to me outside as to the good character of the man but his offense is not to be condoned."

Judge Houston—"I have been tempted to death with people coming to me in behalf of this man. I don't want people to come to me in regard to cases. If they have anything to say let them put it in writing so that it will become public property."

The Crown Attorney said that the wife was still in a highly agreeable frame of mind and she had said that her mind was now made up to have her husband sentenced to 20 years.

The Crown Attorney warned Urquhart: "He said he had done what he would not do under ordinary circumstances in a case of wife beating. There was no excuse for a man striking a woman."

TELEGRAPH BRIEVITIES.

A heavy fall of snow is reported at Winnipeg.

The King and Queen of Italy will arrive in England to-day.

Several business establishments at Roseland were burned.

Rumscot elevator and contents were totally destroyed by fire.

Lanier & Co.'s shoe factory at Montreal was burned. Loss \$50,000.

J. H. Wallace won the Ramsay scholarship at the University of Toronto.

Sir Percy Glouard was presented with the freedom of the London Ironmongers' Guild.

An appeal has been made to Toronto Methodists on behalf of tornado-stricken Jamaica.

North Grey and North Ontario Dominion election petitions were dismissed on Saturday.

The Senate of the University of Toronto has decided to extend the work to west end Canada.

Laurier students waited on Sir Wilfrid Laurier at Quebec and received a very friendly greeting.

Lady Minto and daughters passed through Winnipeg on Saturday on their way home from Japan to Ottawa.

Lorenzo Loveless of Combermere was shot by his brother in mistake for a deer and very seriously wounded.

The Farmers' Alliance of Lacombe nominated Col. Gregory for the Dominion Parliament for Strathcona constituency.

Thomas McKay, M.P.P. for Prince Albert, has been selected as Conservative candidate for Saskatchewan district.

William Lloyd, who has been missing for some time, was found dead near Curtis Sliding, Man., and foul play is suspected.

Over 100 indictments were returned in the "hoodling" inquiry involving members of the Missouri Legislature and State officials.

PRETTY PRESENTATION

A very pleasant evening was spent at the residence of Mrs. Peter Emerson, Foster St., on Friday, Nov. 13. The following address was read:—

To Misses M. and I. Bryant.

We, the members of the First Baptist Church and Sunday School, feel that we cannot let you leave our midst without giving you a few words of our appreciation of your willing and successful efforts in helping us in our church work. You have assisted us nobly.

We regret deeply your departure from our city, but hope that in your new home you may find many friends.

It is said "Good books are like good friends," therefore we present to you these books as a tangible expression of our love and esteem, hoping as you labor for God's cause you may be constrained to become his disciples.

Signed in behalf of the First Baptist Church and Sunday School—H. Olbey, C. M. Cooper, M. Hammond, B. Hammond, Charlotte Jackson.

HOW IT SPREADS.

The first package of Hemi-Roid, the infallible Pile cure, that was put out went to a small town in the State of Nebraska.

It made the cure of a case of Piles that was considered hopeless.

The news spread and although this was only two years ago the demand prompted Dr. J. S. Leonard, of Lincoln, Neb., the discoverer, to prepare it for general use. Now it is being sent to all parts of the world.

It will cure any case of Piles. There is a month's treatment in each box.

Sold for \$1.00, with absolute guarantee.

Sold by C. H. Gunn & Co., Central Drug Store, Chatham.

The Use of Gas Coke for Fuel

A great many people do not know the advantage of using gas coke as fuel in furnaces, ranges, coal stoves, or, in fact, in any apparatus that will use coal as fuel.

The following letter will give the experience of one of Chatham's prominent business men, who has made a test of the value of Coke as compared with Coal. This letter will explain itself and will be

Minard's Liniment—Lumberman's Friend.

Followed by others of a similar nature from other customers. Coke will be delivered by the Gas Company in any quantity, promptly. Let us have your order for a trial load.

Chatham, Oct. 31, 1903. The Chatham Gas Company, Limited, City.

Gentlemen,—I have much pleasure in testifying to the advantages of using Gas Coke as a heating fuel. I have used it for the past two seasons in my hot water furnace at my house, and find it very economical, and at the same time easy to regulate.

I may say that last winter I made a test of one ton of coal at \$1.00 per ton and the same money's worth of coke, and found that the \$1 worth of coke lasted fully one-third longer. May say that the weather conditions were fully as severe, if not more so, during the time I used the coke.

Yours sincerely, C. AUSTIN.

LIFTING THE BURDEN

With a Gentle Hand—ANTI-PILL.

Woman's life is a battle with nerves that sap strength and energy. Shattered nerves aggravate and promote chronic troubles. There is no time in a woman's life Anti-Pill fails to do good.

When the sleep is restless, food causes distress, headache or dizziness, pains in the side or back, indigestion, palpitation, appetite poor, constipated, all tired out, depressed—just one trial of Dr. Leonard's Anti-Pill will "lighten the burden" that is dragging you down. It begins its work in the stomach from which the blood is fed and the nerves controlled. ANTI-PILL embraces a new principle. Its effects are different from anything else, and there is no mistaking its wonderful influence. Dr. Leonard has prepared the formula entirely free from the injurious ingredients common to present day Pills, etc. It is the ideal system treatment. Price, 50 cents per box of dealers, or by addressing W. L. O'NEILL, Co., Niagara Falls, Ontario, who will also mail free sample to any address.

BALFOUR AT BRISTOL.

SIR MICHAEL HICKS-BEACH IS WITH THE PREMIER.

Speaks in Favor of the Policy of Retaliation Though Still a Free Trader.

London, Nov. 14.—Premier Balfour received a great ovation on his arrival at Bristol to take part in the ceremonies connected with the anniversary of Colston Charities to-day. On the crowded platform Sir Charles Cave, President of the West Bristol Conservative Association, read an address assuring the Premier of the loyal support of the party for his statesmanlike attitude in regard to fiscal reform. The Premier, replying, said that he was not bound by any worn-out formulas which had a meaning and reality sixty years ago, but had been changed with the changing circumstances of time.

The Premier's carriage was unhorsed and a long line of men pulled him two miles up the hills to Clifton House. He was escorted by a bodyguard of medical students and a mile-long procession. The streets were lavishly decorated with flags through the generosity of a Bristol millionaire. At the hall the galleries and the balcony were filled by 300 ladies in evening dress, while everyone waved Union Jack. The Premier reiterated his views on retaliation and fiscal reform. The country, he said, had arrived at the opinion that a certain change was needed in their fiscal system to enable them to deal with the situation. "Our opponents," he said, "have spent a great deal of time in abusing Mr. Chamberlain, to whom they have attributed a sinister motive, far-reaching schemes and avowed ambitions, and they have failed to see that this man, who occupied such a great space in the eyes of his countrymen, gave up all for what he believed to be good for Britain and the empire." It had been said that they would offend the great powers if they adopted a change, but did the nation exist on sufferance? Tariffs, like the navy, might be misused and used provocatively, but because that was so were they to be deterred from trying to use them wisely?

It seemed to him little short of lunacy if they did not prepare to meet the foreshadowed dangers. Sir Michael Hicks-Beach, who was received with tremendous enthusiasm, said:—"Free trader as I am, and free trader as I have been, I am prepared to support the policy Premier Balfour has laid down at Sheffield, and also in his speech to-night. That position I understand to be that foreign countries through their protective tariffs have seriously injured our home industries, and both our export and home trade. The matter has been made more serious by those unholly modern institutions, trusts and combinations. He thought the Government should be armed with weapons by which they could say to protectionist countries: 'Unless you treat us in a fair way we will penalize you in a way which will be disagreeable to yourselves.' The Prime Minister knew that on this or on any other subject, if he cared to seek his opinion, that opinion was always at his command."

Sir Henry Fowler, who also attended the ceremonies, was escorted to the Anchor by the Liberal Club of Bristol, where he was entertained at luncheon. He said the winter of the Liberal party was now past, and they could look forward to a united, vigorous and advancing party.

Sir Henry also said that a vote for Premier Balfour meant a vote for Mr. Chamberlain, and a vote for Mr. Chamberlain meant a vote for Premier Balfour.

The London Daily Mail refers to Sir Michael Hicks-Beach as "following at a distance." As if to reinforce Premier Balfour's speech, the news comes that the reciprocity treaty with Cuba has been approved by the Ways and Means Committee of the United States House of Representatives. If the treaty is carried it means a loss to British trade of £2,000,000 a year, at the very moment when free traders are murmuring, "We have free fiscal systems, and the wisest course is to do nothing."

HUMBERT AFFAIR AGAIN.

Serious Allegations are to be Investigated.

Paris, Nov. 14.—After an animated debate, the Chamber of Deputies adopted a resolution of M. Berry (Conservative) creating a committee to investigate the alleged political complicity in connection with the Humbert affair. M. Berry asserted that corruption existed in high and low circles, the Magistracy being specially affected. The President of the Chamber, M. Bourgeois, severely rebuked M. Berry's statement. M. Vallé, Minister of Justice, opposed the proposed investigation, but the resolution was adopted by 360 to 203.

Lifeway Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases.

TRAGEDY OF ANIMAL LIFE.

Something Pathetic in the Career of the Passenger Pigeon.

To him who knows the story of the passenger pigeon this group of beautiful, grayish brown birds with the iridescent golden sheen upon their throats is the last word of a tragedy of animal life. America was once the land of the wild pigeon. Early American writers are full of references to it. Alexander Wilson, the father of American ornithology, estimated that a flock seen by him in 1808 contained over 2,000,000 individuals. It stretched from the horizon to the horizon, as far as the eye could see, and was over four hours in passing a given point. He saw a nest colony forty miles long and several miles in width.

In 1805 Audubon saw schooners at the wharves in New York loaded not in packages, but in bulk, with wild pigeons caught up the Hudson river and sold for a cent apiece. Up to 1860 the bird continued fairly abundant. Then a frightful slaughter began to supply an increased food demand. Gun, pole, club, net and sulphur pot were employed. Thirty dozen birds were captured at one spring of the net. One man netted 500 dozen in one day. In the nesting season trees were shaken or telled and wagon loads of equal taken nightly, droves of hogs being turned in to utilize what the "hunters" had left. Wherever the distracted flocks appeared the slaughter began. At the last known large pigeon "nesting," in 1878, a billion birds were killed during the season. Like the bison, it was effectually exterminated, showing the terrible efficiency of man when he sets out systematically in pursuit of a lower species.

THE PROMISED LAND

BRITISH EAST AFRICA, WHERE A NEW JEWISH NATION MAY ARISE.

Zionist Hope, However, Is That Some Day Palestine May Be Restored to the Jews—Action of British Government in Preferring Tract of Land in Uganda for Jewish Settlement Has Given Renewed Impulse.

The Zionist Congress recently held in Basel, Switzerland, will long be remembered as notable because of the establishment of an autonomous Jewish settlement in that part of the British East African protectorate which lies on the high plateau of the Victoria Nyanza, between the Naroobi and the Man escarpment, and thus to direct the exodus of the Jews from Europe to the Source of the Nile, at whose

MAJI WARRIOR OF THE "PROMISED LAND"

delta Israel dwelt more than 3,000 years ago.

The Zionist society is composed very largely of Russian and Polish Jews, with a sprinkling of English, German and other members of the faith, and their desire and hope is that some day Palestine shall be restored to the Jews.

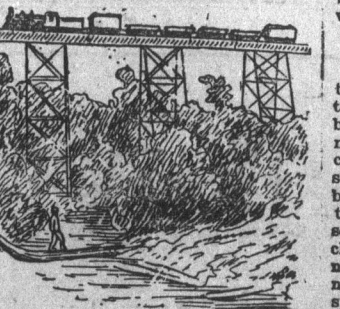

The action of the British Government in proffering the tract of land in Uganda for Jewish settlement has given a renewed impulse to the Zionist movement, which had been checked by the failure of Dr. Theodore Herzl to come to an agreement with the Sultan of Turkey for the Jewish occupation of Palestine, the Sultan's terms being incompatible with the program of the Zionists. The proposal of England was received with favor by a majority of the delegates to the Zionist Congress, and although some raised the cry that East Africa was not Zion the Congress, decided to send a commission to Uganda to investigate conditions.

No matter how alluring the offer of an autonomous state among the rolling downs of Uganda may be, it cannot and will not replace the promised land in the estimation of the Jewish masses. The attitude of the overwhelming majority of the Russian delegates made this clear.

The first word of rebellion against Dr. Herzl was heard—he was the loved leader because he was leading to Zion, not to East Africa. The protest came strongest from those who could least afford to wait for the realization of the Zionist ideal from the Kishineff delegates. When the roll call proved an overwhelming majority of the Congress in favor of the British proposal, over 160 delegates rose in wildest excitement, left the hall and repaired to a smaller hall, where they pledged their lives to Zion.

The territory offered to the Jews is a great plateau nearly 4,000 feet above sea level and is fertile, well watered, abundantly timbered and is blessed with a salubrious climate. It is in this part of Africa that the river Nile rises, and the region is said to be one of the low sections of Africa where white men may thrive. Dr. Herzl of Vienna, who has devoted much time and money to furthering the Zionist movement, is pleased with the offer of Great Britain and has expressed the belief that eventually the Jews of Russia and Poland will occupy the territory as an autonomous nation.

After the failure of his negotiations with the Turk Dr. Herzl proposed to the Egyptian Government that the Sinai peninsula, adjoining Palestine, be opened to the Jews for the purpose of founding a new land.

A RAILWAY TRESTLE IN THE "PROMISED LAND."

of Zion. Egypt regarded the proposition favorably, and a commission of Zionists investigated the matter. The lack of water in this territory, however, necessitated the abandonment of the project.

Then came the proffer from Great Britain of the East African region. The country which has been tendered as a gift to the Zionists was opened up and made accessible by the completion of the Uganda railway last year. This railway was constructed at a cost of over \$90,000,000 and has been an immense value to the region. It is said that England's offer to give the land to the Zionists has not met with the approval of the few British people who

live in East Africa. They hold that the Government should take other steps to colonize the Uganda country, and the proposal to turn the region over to the Jews has come as a shock to some of the colonists.

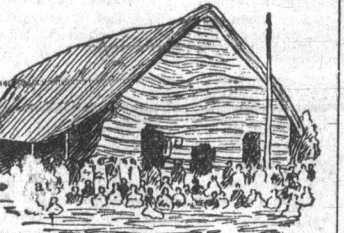

Except on the coast and on the shore of Lake Victoria Nyanza the climate is admirable, and the whole country is fertile. From Makindu, 200 miles inland, and for about 400 miles further the country is described as beautiful. The fertility of the soil is marvellous, and settlers from Australia and South Africa say that the Uganda country is the finest they have ever seen. It offers splendid opportunities, say these men, to the farmer and the cattle raiser.

During the visit of former Colonial Secretary Chamberlain to Uganda last December he expressed the opinion that as a grain and cotton growing country British East Africa would stand unrivaled. The harbor at Port Reitz, which is in direct touch with the Uganda railway, is large enough to accommodate the entire British Fleet and is said to be one of the finest in the world.

The fear of this country to the Jews was the exasperation of the Zionist Congress. The prevailing sentiment was that it would be impolitic to reject so generous an offer by a mighty Government. It was argued that it was not a deviation from the Zionist program to settle a million Jews in East Africa during the next quarter of a century (if the offer should finally result in such a settlement) and would in no way interfere with the striving of the people for their historic home in Palestine. In the meantime the pressure on the Congress resulting from the present cry of the homeless would be relieved and a million Jews would have a lesson in self government.

One of the foremost leaders of the Zionist movement is Dr. Theodore Herzl of Vienna, litterateur and dramatist, and he is ably seconded by Dr. Max Nordau of Paris. Dr. Nordau says his people are intellectually and morally superior to all Aryan races. Israel Zangwill, author and dramatist, of London is another noted Zionist. These three men are representative of the movement in Germany, France and England. Many thoughtful Hebrews, however, oppose the movement, fearing that if the new Zion ever becomes a reality the powers may ultimately combine to force the Jews of Europe to seek a refuge there.

In Canada the movement has some strength. Not that the Jews of this country have any wish to emigrate to Palestine or any other country, should a new Zion be established, but those who favor the movement do so from a desire to provide a haven for their co-religionists who are oppressed in other lands. Dr. Herzl's plan, first outlined in the Congress held at Basel in 1897 and which will probably be adopted if the British offer of land in East Africa is accepted, is to draw the Jews from the sections of Europe where they are oppressed and where the struggle for life is made almost

HOSPITAL IN UGANDA.

hopeless because of the severity with which they are treated.

At the recent Zionist Congress Dr. Herzl announced that he had assurances from the Russian Government that if the Zionist movement kept on its present orderly way in that Empire the Czar would aid in negotiations with the Sultan of Turkey looking toward the occupation of Palestine by the Jews.

In the meantime it is not improbable that the new Zion may grow up in the Uganda country. It is estimated that if the offer of England be accepted in less than twenty-five years a flourishing nation will have arisen in the region from which the Nile makes its way.

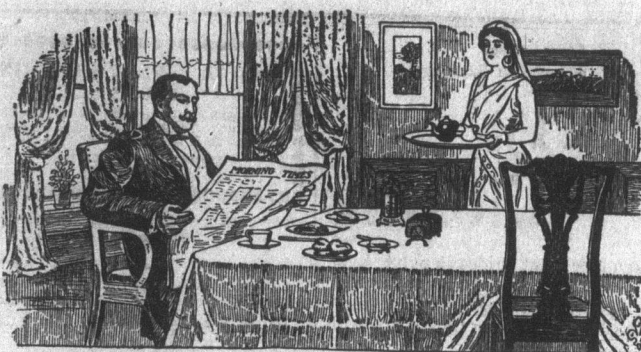

So it is not improbable that the children of Israel will make another journey in the wilderness and found a new nation. But, unlike their entrance to the land of Canaan, they will not be forced to make weary marches on foot. English railway engineers have proceeded them to British East Africa, and if they enter that country they will do so in modern railway carriages, crossing rivers and rivers that have been bridged by the skilled workmen of the world.

The Stars.

There are about 200,000 stars between the first and ninth magnitude, the number at each lesser magnitude being about three times that of the next higher. Now, if this rate of increase were continued down to the seventeenth magnitude there would be about 1,400,000,000 visible. In the best modern telescopes, telescopic observation and photographic charts show nothing approaching this number. The latest estimate does not exceed 100,000,000. As the instruments reach farther and farther into space they find a continuous diminution in the number of stars thus indicating an approach to the outer limits of the stellar universe.

The Home of Musical Fish. Lake Batticaloa, Ceylon, has the probably unique distinction of being the home of musical fish. The sounds emitted by these are said to be sweet and melodious as those which would be produced by a series of Aeolian harps. Crossing the lake in a boat one can plainly distinguish the pleasant sounds. If an ear is dipped in the water the melody becomes louder and more distinct.

Heaven hasn't time to help the man who is a victim of that tired feeling.

The Englishman's idea of breakfast is a healthy one. Toast, jam and tea—a chop mebbe—just enough food for the stomach to assimilate properly—the warmth of the tea to draw the blood to the stomach and assist digestion. Blue Ribbon Tea is the daintiest and crispiest leaves of the tea plant.

It is pure tea—free of tannin—appetizing and nutritious. Try the Red Label Brand for your breakfast.

Boils were so painful could not sleep at night.

APPEARED ON NECK, LEGS
AND ARMS.

Burdock Blood Bitters CURED THEM.

It is well-known to all that bad blood is the direct cause of all skin diseases and it is necessary for the blood to be cleansed before the eruptions will disappear. For this purpose there is nothing so equal as Burdock Blood Bitters as the thousands of testimonials we have on hand will testify.

Mr. Willard Thompson, McNeill's Mills, P.E.I., writes us as follows: "I wish to state to you what Burdock Blood Bitters has done for me. Some time ago my blood got out of order and many boils appeared on my neck, legs and arms. They were so painful that I could not sleep at night. After having tried many different remedies without any success, I finally decided, on the advice of a friend, to use Burdock Blood Bitters. Before I had quite used two bottles the boils had completely disappeared, and I wish to emphasize the fact that I think Burdock Blood Bitters the best blood purifier on the market to-day."

EXCUTORS' SALE Of Valuable Farm Property

Under and by virtue of the powers contained in the last will and testament and Codiell thereto of John Joseph Walrath, late of the Township of Harwich, in the County of Kent, in the Province of Ontario, Farmer, deceased, there will be sold by public auction at the Rankin House, in the city of Chatham, in the County of Kent, on Saturday, the 21st day of November, 1903, at the hour of 12 o'clock noon, the following lands:

All and singular that certain parcel or tract of land and premises situate, lying and being in the Township of Harwich, in the County of Kent, and being composed of the northeast half of lot number sixteen in the front or first concession from the River Thames, in the said Township of Harwich, containing 180 acres more or less.

This is one of the best farms in the County of Kent, lying on the south side of the River Thames in the Township of Harwich, about seven miles from the city of Chatham and five miles from Kent Bridge. On the premises there are two good frame houses, two barns, a granary, implement shed and other small buildings. The land is all cleared except about one and a half acres on which there is some valuable timber. The farm is well fenced and the buildings are all in first class repair. The soil is a clay loam of the best quality, there being no waste land on the whole farm. A church and school house lie within one mile of the premises.

Terms of sale—Ten per cent. of the money will be required at the time of the sale and the balance within 14 days thereafter. Arrangements may be made by which a portion of the purchase money may be secured by mortgage on the land.

Further particulars and conditions may be learned from Mrs. Maria Walrath, on the premises, or on application to

BANNOCKBURN FIELD

SCENE OF BATTLE THAT GAVE SCOT-
LAND HER INDEPENDENCE.

A Black (Coal) Country on a Small Scale
—An Annual Event of Importance—
Field itself is Distinguished From
Other Fields by a Huge Flagstaff—
Famous Bored Stone, the One Solitary
Relic of 1814—Brook's Brae.

Bannockburn, the scene of the battle that gave Scotland her independence nearly five centuries ago, is still an indirect association with the profession of arms. It is a busy, thriving little place, where tweeds and carpets are made, but its most notable industry is the weaving of tartans for the Highland regiments. It is a black country on a small scale, and there is plenty of coal to supply Stirling and all the factories round. An annual event of importance is the horse and cattle fair, held on the third Tuesday in June, when dealers and drovers and farmers assemble, not far from the spot where Bruce broke his battleaxe in cleaving the skull of De Bohun. Visitors to Bannockburn spend little time in the town, and push on to the battlefield, on which the one conspicuous object that distinguishes it from other fields is a huge flagstaff. It is 120 feet high, and was erected in 1870 by the Dumbarton and Stirling Oddfellows. Near it is the famous Bored Stone, the one solitary relic of 1814, enclosed in an iron grating. This large block of granite is sunk in the earth, and there is a hole in it which, according to tradition, the Bruce's standard was fixed on the day of battle. The hill or rising ground here is known as Brook's Brae, and on it the Royal pavilion was erected.

Near at hand is the hamlet of St. Ninians, and at a second village, Newhouse, two large stones are pointed out as marking the scene of the fight between the forces of Bruce's nephew and Sir Robert Clifford. The Bannock, from which the historic field is named, is a small

A VIEW OF BANNOCKBURN.

burn or streamlet running down to the Forth. Originally the field was known as the New-park; and Barbour, writing 50 years after the battle, mentions a park with trees through which the English had to pass before they could attack. Vestiges of the trees beneath which Edward's men advanced exist to this day. An adjacent farmhouse is called the Park, and a mill on the south side of the burn. Park mill, in about opposite the spot where the centre of the Scottish army was drawn up. On the left was the morass, now known as Milton Bog, part of it a mill pond, where the fatal pits were dug. The morass was covered with green sedge, a mile away, at the Bloody Fold, a body of the English foot are said to have made a desperate stand before finally quitting the "stricken field."

A rumor that Bannockburn might be sold to a builder gave rise to a report that Mr. Andrew Carnegie had been asked to buy the ground and present it to the Scottish people.

Stirling County is rich in battle grounds. South-east of Bannockburn lies Sauchieburn, a sinister name in Caledonian history. There, in 1483 King James III. was defeated by the rebellious subjects. The wounded monarch managed to make his way to a mill, and there he was afterwards found to have been stabbed to death by the hand of a mysterious assassin, who was never discovered. Beaton's mill, the scene of this royal tragedy, lies in a hollow by the Edinburgh road beyond St. Ninians.

Olive Oil as a Medicine.

Olive oil is the choicest and most palatable of all foods. It contains the largest amount of nutriment of any other food, the total amount being nearly 100 per cent., while the best grains and legumes contain less than 90 per cent., animal meat from 22 to 29 per cent., fruits and vegetables contain less still. One ounce of olive oil per diem facilitates intestinal digestion, encourages the action of the bowels and aids digestion in a remarkable way. The vegetarian diet is generally too poor in fats. A teaspoonful of olive oil given three times a day to an anemic child is a wonderful help toward health. For the scrofulous child it builds up tissues. Pure olive oil improves with age and may be kept for any length of time without deterioration and in an even temperature (the ice box), to retain that very fruity flavor, but if it is exposed it is very easily contaminated. It quickly takes up all foreign odors. Its manufacture must be under the best sanitary conditions.

Thoughts Have Life.
There is much of truth in this ex-
quisite verse of Ella Wheeler Wilcox,
who is a disciple of telepathy:
"Thoughts do not need the wings of words
To fly to any goal;
Like subtle lightnings, not like birds,
They speed from goal to goal."

Hide in your heart a bitter thought;
Still it has power to light
Think love, and though you speak it not
It gives the world more light.

The Average Man.
The factor which is overlooked by those who fear the ascendancy of any quixotic notion is the existence of the average man. This individual is not a striking personality, but he holds the balance of power. Before any extravagant idea can establish itself it must convert the average man. He is very susceptible and takes a suggestion so readily that it seems to prophesy the complete overthrow of the existing order of things. But was ever a conversion absolute? The best theologians say no. A great deal of the old Adam is always left over. When the average man takes up with a quixotic notion, only so much of it is practically wrought out as he is able to comprehend. The old Adam of common sense continually asserts itself. The natural corrective of quixotism is Sancho Panza. The solemn knight, with his head full of visionary plans followed by a naïf who is as faithful as his nature will permit. Sancho has no theories and makes no demands on the world. He leaves that sort of thing to his master. He has the fatalism which belongs to ignorant good nature and the tolerance which is found in easy going persons who have neither ideals nor nerves. He has no illusions, though he has all the credulity of ignorance.—S. M. Crothers in Atlantic.

One of Bill Nye's Jokes.
When Bill Nye one day happened on the modest sign of Major Pond, the lecturer manager, in a window of the Everett Hotel, in New York, he said to a friend who accompanied him: "Here's the man that incites the lecturers. Let's go in and see if we can't induce him to lead a better life." Entering, Nye removed his hat and ran his hand over the hairless expanse of his head and after staring about for a moment said, "This is Major Pond, I believe." "Yes, sir. What can I do for you?" answered the major. "I want to get a job on the platform," returned Nye. "Ah, yes," said the major slowly. "Have you had experience?" "Well, I've been before the public for a couple of years." "Yes? May I ask in what capacity?" "I've been with Barnum. Sat concealed in the bottom of a cabinet and exhibited my head as the largest ostrich egg in captivity."

The Boyhood Friend.
Before he was elected to be the chief executive of the Old Dominion Governor Montague of Virginia met an old classmate on the train. They had not met for years. Mr. Montague was a candidate for governor and the other a plain country lawyer with a small income.

"What can I do for you when I'm governor?" said the candidate, as he put his arm around his friend. "What can I do for you, old boy?" "Just what you have done now," quietly replied the lawyer. "Why, what's that?" said the other. "Simply put your arm around all and call me 'old boy.' That's all I want," was the reply of the true friend of boyhood days.

Saved by a Ring.
Lady Catherine Wyndham, daughter of the Duke of Somerset, wife of Mr. William Wyndham and mother of the first Earl of Egremont, died, as was supposed, at Orchard Wyndham, the family seat in Somersetshire, and was buried in a vault beneath the Church of St. Decuman's, near Watchet. The sexton went down to the vault at night, opened the coffin and endeavored to force a ring off her finger. Lady Catherine awoke from her trance, got up and lighted herself some with a lantern which the sexton had left behind in the vault when he fled in terror. A few months afterward she presented her husband with twins, one of whom became Sir Charles Wyndham and Earl of Egremont.

A Justifiable Eviction.
One time when Sir Walter Scott was asked if he wrote the Waverley novels, the authorship of which was a great secret, he said, "No, I am not the author, and if I were I should say the same." Mr. Gladstone thought this a justifiable evasion.

Sydney Smith once said of some of his anonymous efforts, "I have always denied it; but, finding that I deny it in vain, I have thought it might be as well to include the letters in this collection."

A Family Name.
The teacher of a country school asked his pupils one day if any of them could tell him who Joan of Arc was.

The question was followed by profound silence. Some of the pupils started at the teacher, and some turned and stared at one another, as if seeking the information in the faces around them. Finally a boy burst out with:

"Oh, yes I know. She was Noah's wife."

What Else Were They For?
Stranger! I notice that this part of the country seems fairly teeming with horses.

Anne Arundellite—Yessir. And when it comes to teamin' they ain't nothin' much better 'n team with than horses.

The Lay of the Bird.
"Oh, Mr. Jones, what of the song birds are you most fond of?" "I prefer the hen, Miss Dorothy."

"But the hen isn't a singing bird."

"Well, it's the only bird whose lay I care for."

Cutting.
Young Wife—How fortunate I am in possessing a husband who always stays at home in the evening!

Bosom Friend—Yes; your husband never was most addicted to pleasure.

His Financial Interest.
"I understand Jigson has a financial interest in the concern he is with."

"Yes, they owe him six months' salary."

Sunlight Soap makes homes bright.

SUNLIGHT SOAP

should be used to clean your house as well as wash your clothes. It does twice the work of a common soap in half the time and with less labor. Don't take our word for it, but try it for yourself.

The best nourishment for the Weak and Sickly is D.L. Emulsion.

Some men carry religious convictions so lightly that their existence is a question.

C. C. RICHARDS & CO.
Dear Sirs—A few days ago I was taken with a severe pain and contraction of the cords of my leg, and had to be taken home in a rig. I could not sleep for pain, and was unable to put my foot to the floor. A friend told me of your McNARD'S EMULSION, and one hour from the first application, I was able to walk, and the pain entirely disappeared. You can use my name as freely as I like, as I consider it the best remedy I have ever used.

CHRISTOPHER GERRY.
Ingersoll, Ont.

Cleverness is a sort of genius for instrumentality. It is the brain of the heart.

"Have by some surgeon, Shylock, on thy charge, to stop his wounds, lest he do bleed to death." "People can bleed to death," the loss of blood weakens the body. It must follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is the part due to its action on the blood-making glands and the increased supply of pure, rich blood it creates. It is only when the blood is impoverished and impure that disease finds a soil in which to root. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is emaciated, the lungs are weak, and there is obstinate lingering cough, "Golden Medical Discovery" puts the body on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health perfectly and permanently restored. It has cured thousands who were helpless and helpless, and who had tried all other means to cure without avail. Thirty-one one-cent stamps to cover expense of mailing and customs obtain a copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, in paper cover. Send 50 stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

Men often say things which sound bright but have little in the way of meaning.

If your stomach is weak it should have help. Hood's Sarsaparilla gives strength to the stomach and cures dyspepsia and indigestion.

Negligence is the rust of the soul that corrodes through all our best resolves.

BAKING

Give your wife a chance and she'll bake bread like that mother used to make.

For rolls and biscuits—that require to be baked quickly there's nothing like Gas

THE CHATHAM GAS CO
Limited.
King St. Phone 81

Churches as Places of Refuge in War

Our ancestors transacted a good deal of business of one kind or another in and about their churches. To begin with, the churches of old England in turbulent times were regarded as places of safe custody for public and private property. In the border land of England and Scotland the idea was carried out still more completely, and churches, or at least their towers, became regular fortresses and not infrequently were objects of offense and defense. We may note in rural England that in the case of ancient churches the towers are often not merely disproportionate in size to the rest of the church, but are carefully and strongly built, evidently with an object.

Even in peaceful Surrey and Sussex the belltowers are veritable strong rooms with barred windows and massive doors and often contain a massive treasure chest. Hither, at the first alarm, money and valuables were hurried, for beyond the security of thick walls and bars and bolts there was an age of security which in a superstitious age protected the building from the most ruthless of foes. The fortress-like construction of many of the border land churches is an interesting study of antiquarians.—London Standard.

The Dahlia in England.

The dahlia has become popular among English gardeners. In the wild plant the flowers are single, with a dull ray and yellow disk. The varieties of the cultivated forms are almost endless.

The original was discovered in Mexico by Vincent Cervantes about 1784 and was first brought to the botanic gardens of Madrid, and the same year it was introduced into England by the then Marchioness of Bute. The plant became extinct in Britain. It was again brought there in 1804, and in that year is found the earliest mention of the dahlia, named from Andrew Dahl, a Swedish botanist and pupil of Linnaeus.

In Mexico the tubers are cultivated as food on account of the quantity of inulin they contain, but in Europe, though many times tried, they never became popular.

The Evolution of Names.

The evolution of names from foreign tongues into English is in many cases easy. From the German came the names of the Bowers and from the French Boulanger to the English Bullinger is but a step, as it were. But there are no people who are often more humorously accused of altering their names than the Irish. Thus Crehan has become Rehan; Carroll, Karl; Dillon, Dyllin; Divver, Devere and Devry; McCarty, Macartee and Makart; Slattery, Slater and Satterlee; O'Brien, O'brien and Breen; McGuinness, Guinness and Innes; Kelly, Relyea; Duffy, Dufay; McGuffin, Magoffin; Quinn, Queen; Fogarty, Fougert; Haggerty, Haggart; Sully, Soule. The English singer, Brahms, merely dropped a letter when he went on the stage. He was a Hebrew, and his real name was Abraham.

Old Custom Handed Down.

How many can tell the origin of the habit of closing the eyes in prayer? Far back in the past the sun was the universal object of worship. As it rose above the horizon the devotees thanked it for its return to bless the world. As it set in the west he implored its early return. His face was always toward the sun in prayer, and his eyes were closed to prevent blindness. The habit has passed down from father to son for thousands of years. Though the object of worship has been changed, the custom survives.

Dentists Use Much Gold.

If there is a scarcity of gold during the twenty-first and twenty-second centuries dentists, according to a German statistician, will probably be more to blame than any one else. He asserts that they use every year in filling teeth and other work about 800 kilograms of gold, the value of which is \$500,000, and that at this rate the graveyards of the various countries will contain in 800 years from now \$150,000,000 worth of gold.

Minard's Liniment Cures Burns, etc.

Studying on the Cars.
"We have something of a reputation out west for hustling," said a business man from Kansas City, "but I never saw such persons as New Yorkers, both men and women, for working on the trolley cars, the elevated and the ferryboats. I wonder the companies don't find some plan for renting desks in public conveyances. It is customary to see men reading on the cars everywhere, but you have to come to New York to find half that passengers on a car correcting typewritten manuscripts, humming over music scores, casting up accounts in little memorandum books or on the back of an envelope and poring over shorthand lessons. Persons studying foreign languages read them aloud on the cars, and nobody appears to pay any attention to them except visitors from other cities, who are not accustomed to see such ostentatious industry at home. They don't do that even in studios Boston. I have noticed that advertisements for lost manuscripts and notebooks constantly appear in the newspapers."

Distance Lends Enchantment.

In one of Mr. Chase's classes in painting was a young chap who could not paint pictures much better than he could save money, and the allowance given to him by his father was very often gone before he knew it. One day Mr. Chase was talking to the class on the subject of perspective, and this particular student did not appear to get the idea very clearly. To make it plain Mr. Chase went back to the rudiments to get a good start.

"You understand," he said, "that the farther you get away from any object the smaller it appears?" The young fellow shook his head.

"No," he replied doubtfully, "I'm not so sure about that."

Mr. Chase was provoked and not a little surprised at such ignorance and said so.

"It's all right as to some things," responded the student, "but not all. Now, there's a ten dollar bill. The farther I get away from that the bigger it appears."

Old Clothes Ornaments.

The rich are not unthrifty. That probably explains why they are rich. You have been told of the wealthy wives in our New York Faubourg St. Germain who after wearing a gown twice or three times at most sell it to a certain Sixth avenue dealer in second-hand clothes for about one-sixth of its original cost. Women in moderate circumstances who know this dealer keep themselves in finest regalia at a reasonable outlay. Rich men are more particular and less thrifty than rich women. They despise the "ole clo's" man and prefer to hand down their cast-offs to servants to do with as seemeth good to them. But many a parlor ornament in swell houses is bought with old clothes many a new pot or kettle in my lady's kitchen is the result of barter with the peddler.

Animals and Second Sight.

It is a common belief that many animals see ghosts and future events. Kerner declares that they are endowed with second sight. This faculty is thought to be especially strong in dogs and horses. Storks are known to have foreseen the burning of houses on which they have been wont to build their nests and to have abandoned them, taking up their abode on other buildings or on trees in the vicinity. No sooner had the anticipated conflagration taken place and a new house been erected on the same site than they returned and built their nests as before.

Oldest Clock in the World.

The great clock of Wells cathedral, in Somersetshire, England, is very nearly the oldest and certainly the most interesting of clocks in existence. It was built in 1322 by Peter Lightfoot, one of the monks of Glastonbury abbey, six miles from Wells, where it ran for 250 years until the abbey was dissolved by Henry VIII. and its last abbot hanged over the town gateway. The clock was then removed to Wells, where it has been running ever since.—St. Nicholas.

A Valuable Asset.

It was after her husband's failure. "She acts as if she expected to retrieve her fortune," was the comment. "Have they any assets left?" "Oh, yes!" was the reply.

"A daughter who is pretty enough to be quoted high in the matrimonial market."

Extremely Small.

Tom—You called on Miss Millyn last night, didn't you?
Dick—Yes.
Tom—Spent the evening indulging in "small talk," eh?
Dick—Well, her talk was entirely too small. She said, "No."

Saddening.

Professor (discussing organic and inorganic kingdoms)—Now, if I should shut my eyes—so—and drop my head—so—and remain perfectly still, you would say I was dead. But I'm not, I leap. Then what do you call me?
Voice From the Rear—A clodhopper.

Thoughtful.

Misses—Kate, I found the gas, escaping in the kitchen last night. You must never blow it out.
Kate—I didn't, mum. I turned it out, then turned it on again to have it ready to light in the morning.

Just Like a Goose.

"I say, do you believe that story of the goose laying a golden egg?" "Well, it would be just like a goose to do such a foolish thing."—Chums.

ADVERTISE IN THE PLANET

THE UNREST IN RUSSIA.

Revolutionary Pamphlets Distributed Among the Troops.

London, Nov. 16.—The Russian correspondents of The Times furnish the text of a secret document issued by the Ministry of War, declaring that the revolutionary groups are endeavoring to carry on an anti-Government propaganda among the troops by means of illegal pamphlets and proclamations. "No person guilty of this act," they say, "has ever been discovered. This is due to the fact that the officers hope to be able themselves to find out the culprit, and, therefore, they only inform the gendarmes when it is too late. The soldiers do not always promptly surrender the proclamations they have found, while the officers destroy them so as not to compromise their regiments." After suggesting the placing of agents at the doors of the barracks, the document says it is desirable to establish surveillance over the homes of Jewish soldiers and all their connections. "It has been practically demonstrated," the document says, "that these soldiers entertain relations to the Jews in the towns where they are quartered, among whom are many revolutionaries."

From Kiev it is reported that the soldiers of the garrison announced their readiness to rebel if the officers would lead them, protesting that they were the friends, and not the enemies, of the working classes.

SUCCESSFUL TORPEDOES.

Completely Victorious Against Swift Gunboat.

New York, Nov. 16.—The Tribune has the following from its Paris correspondent:—The submarine torpedo experiments near Cherbourg on Wednesday and Thursday are considered by naval experts the most important evidence yet adduced of the efficiency of this branch of naval warfare, in which the French naval officers put absolute confidence. The very swift, quick maneuvering, armor-plated gunboat Grenade had every opportunity to defend herself against the attack of the submarine torpedo flotilla, the projectiles of which were torpedoes loaded with sufficient explosive charges to clearly indicate whenever the target gunboat was hit. The Grenade maneuvered and gyrated at a speed of nineteen knots, discharging her rapid firing guns at the submarines whenever they emerged. The torpedo boats, however, succeeded in eluding all projectiles aimed at them, and in their turn scored a clear victory by hitting the Grenade eleven times under the waterline, near her magazines. Finally one of the torpedoes hit the Grenade and exploded with the experimental charge between the keel and the propeller tube, thereby making the Grenade absolutely helpless. The Grenade had to be towed back into Cherbourg and put into drydock. These experiments took place during average Atlantic weather, with a heavy ground swell and a strong westerly wind. The results are regarded at the Ministry of Marine as a convincing argument for still further increasing the submarine torpedo flotilla.

HUNTERS RETURNING.

Bountiful Spoils of the Chase Coming In.
Toronto, Nov. 16.—The hunting season for big game is over, and to-day the last contingent of hunters will arrive from the north. Although the weather has been too warm for the preservation of the results of the hunt, the Canadian Express Company on Saturday handed an enormous number of deer. Nearly four hundred hunters returned from the sport, and a special train from Calendar was necessary to bring in the hunters and their trophies. The principal shooting districts this year were along the line of the C. P. R. west of North Bay, in Muskoka, and the northern parts of Victoria, Haliburton and Hastings counties.

RAILWAY CASUALTIES.

Year's Terrible Record in the United States.
Washington, Nov. 16.—The Interstate Commerce Commission has issued a bulletin showing a large increase in the number of railroad casualties in the fiscal year ended June 30 as compared with the previous year. There were 4,553 persons killed and 45,097 injured in the year, against 2,819 killed and 39,800 injured the year before. The large increase is partially attributed to the gain in railroad traffic and the increase of twelve per cent. in the number of men employed in train service. It is also pointed out that accidents are now being much more fully reported.

ATLAS LOAN INSPECTORS.

St. Thomas People Who Will Advise the Liquidator.
Toronto, Nov. 16.—The Master in Ordinary has confirmed the appointment of a committee of inspectors of the Atlas Loan Company's affairs. The committee will advise with the liquidator, by whom it was nominated. The members are:—Dr. A. L. Lutton, ex-Mayor of St. Thomas; Mr. J. A. Kilpatrick, Mr. T. Hickey, Mr. Jesse Wallis, Mr. John A. Cook and Mr. W. L. Wickett. The provisional committee which has been acting consisted of Messrs. Chant and Kilpatrick. This committee, at the request of the liquidator, nominated three employees of the Michigan Central Railway to represent the English and some local creditors. These are Messrs. Hickey, Wallis and Cook. Mr. W. L. Wickett is a barrister of St. Thomas, who was appointed to the committee to represent the English and some local creditors. The committee will meet in St. Thomas this week, and will review all of the evidence that has been given in connection with the liquidation. The members will consider the offer made by A. Ames & Company, and will endeavor to reach a basis of settlement. Their decision will be reported by the liquidator to the court.

Mr. Edison's Ideas on Radium.

Thomas A. Edison has evolved and announced a theory which he believes solves the problem that has been puzzling scientists ever since the discovery made by Madame Curie of the peculiar properties of radium and thorium. The phenomenon presented by these substances, as is generally known, is their apparent property of giving off actinic rays of peculiar chemical properties, somewhat similar to the Roentgen rays, without any apparent loss of energy or bulk. Based on these observed phenomena several new theories of matter have been put forward, all of which accept as a fact the apparent origin of the energy within the substances themselves.

Mr. Edison's theory eliminates this contradiction of accepted natural laws, and indicates the possibility that the energy emitted by radium is merely reflected, as it were, from some unknown source.

"I have made extensive experiments with the Roentgen ray and with radium," said Mr. Edison to a representative of "Harper's Weekly," "and have come to the conclusion that these new substances are not the sources of energy, but are rendered fluorescent by the action of some hitherto undetected ether vibration or ray. Just as the Roentgen ray and the Herzian wave remained undetected for centuries after the phenomena of sound, light, and heat were well understood, so it is not possible but extremely probable that there are other rays in the immense gamut of sound to ultra-violet which we have not yet discovered. In my own experiments I have found that the ordinary electric arc when raised to an extremely high temperature gives off a ray which renders oxalate of lithium highly fluorescent. In the same way the Roentgen ray renders platinum-cyanide—that is, the X-ray sets up in these substances a condition of activity which results in the emission from them of actinic rays and a small amount of heat."

"My theory of radio-activity is that the rays which the new elements emit are set up in the same way, the substances being rendered fluorescent by some form of ether vibration which is undoubtedly all-pervading, but has not yet been isolated or measured, and which may have some extra-planetary origin. To accept any other theory is to declare one's belief in perpetual motion, in getting something for nothing."

"It is not at all strange that only two or three substances have yet been found which exhibit this phenomenon, as there are only three substances known which are rendered fluorescent by the Roentgen ray. It is a peculiar coincidence, moreover, that the only one of the known fluorescent substances that is ever found in its natural state, tungstate of calcium, is always more or less closely associated with pitchblende, from which all the radium so far made has been extracted."

"I believe this theory is capable of proof, but I shall be content to let someone else prove it. I am through for all time with experimenting."

Two of my assistants have been making for life by their close association with the Roentgen rays, and I myself have one eye badly out of focus and am suffering from a severe stomach disturbance from the same cause. The new laboratory which I have just completed for such experiments will remain unused or be converted to some other use."

Something New in Hotels.

To whom it may concern: We beg leave to call your attention to the following novel features of the unvalued, up-to-date society hotel, which the undersigned propose to build, if sufficient encouragement is forthcoming: The architecture will be a combination of Queen Anne, Gothic, Moorish, and several extinct styles, the purpose being to secure adequate corners for convenient exclusive gossip; also, as far as possible, giving a private entrance to each guest. The rooms will face front. This arrangement will bring the convenience to young people in the evening, particularly as the management guarantees that the electric light connections will be out of order at least twice a week. Each room will be furnished with our especially patented "vitalometer," supplying sea air or mountain air of any altitude on demand. If desired, the rooms will be fitted with movable scenery painted to order by two Royal Academicians to be especially inspired for the purpose.

The dividing walls of the rooms will be of paper-mache, and sounding-boards will be introduced when requested by hard-hearing neighbors. Electric calls in every room will connect with clerks of all denominations, and guests will press the button should they require their services day or night. Discreet witnesses supplied on application.

Chinese, French, Italian and German chefs will have charge of the cuisine on alternate days, thus ensuring a genuine international dyspepsia. Our bell-boys will be mutes, our chambermaids will be blind, our coachmen will be deaf, telephone operators will be discharged twice daily, and every other effort will be made to secure privacy.

Our mosquitoes will be hand-fed with Aganomeris Culicis. These and other undesirable insects will not be permitted on the premises.

A special chamber will be fitted with Gatling guns, electric chairs, and other suicide conveniences. Arrangements will be made for a satisfactory time-table, and affidavits that trains left ahead of schedule time will be issued to married men on payment of the notary fee.

Rooms may be reserved now. Address all communications to the Up-to-Date Hotel Company—"Town Topics."

For Love's Sake.

A Budapest paper reports another romance of the Austrian Imperial family. The Archduke Eugene, brother of the Queen Regent of Spain, it says, has fallen in love with the pretty daughter of a petty tradesman, and has resolved to renounce his title and birthright and marry her. Archduke Eugene is thirty-nine, has the rank of a general, and commands an army corps in the Tyrol. He is of gigantic stature, is extremely handsome, and is frequently seen in the streets of Vienna, where his free and easy manners have made him a popular favorite.

CHICAGO STREET CAR STRIKE.

Cars Were Run Yesterday on One Line—No Settlement.

Chicago, Nov. 16.—A victory, temporary at least, was scored by the Chicago City Railway against its striking employees. From early morning until dark the company maintained a regular service on its Westworth avenue line from Seventy-ninth street to the downtown district. The first car, manned by a non-union crew, left the car barns, guarded by a dozen policemen, and was followed four minutes later by another car. The schedule was kept up all day, and with the exception of two incipient riots at Thirty-first street, in which several arrests were made, no opposition was offered by strikers or sympathizers. The route was patrolled by two-thirds of Chicago's police force.

According to the officials of the company an attempt will be made tomorrow to operate some of the other lines of the system if the police department can supply protection all the way as far as known no further attempt was made to-day by either the officials of the company, the striking employees or the State Board of Arbitration to bring about a settlement of the trouble, and the indications to-night are for a protracted struggle.

NEXT TO BANK OF ENGLAND.

Great German Banks Combine—Second Largest Capital in World.

Berlin, Nov. 16.—The Dresdener Bank and the Schaffhausen Bankverein have arranged a community of interests, the agreement to continue for three years, beginning January next. According to a published statement, the combination amounts approximately to fusion and the securing of all the advantages thereof, while avoiding its disadvantages. The capital of the Dresdener Bank is \$32,000,000, while that of the Schaffhausen Bankverein is \$25,000,000. The reserve funds of the two banks amount to \$13,500,000, and their joint capital is \$71,000,000, thus making their union the strongest aggregation of banking capital in the world, with the exception of the Bank of England.

UNIONS MUST AFFILIATE.

Strong Resolution Passed by the American Federation of Labor.

Boston, Nov. 16.—The American Federation of Labor adopted a resolution instructing the Executive Council of the federation to take the necessary steps to have all international unions affiliated with the American Federation of Labor, and to insist upon local unions in Canada affiliating with the Trades and Labor Congress of Canada with the least possible delay.

THE MARKET REPORTS.

Wheat is Firmer—The Cheese Trade Latest Quotations.

Saturday Eve., Nov. 14.

Toronto St. Lawrence Market.

Receipts in all lines were fairly large, and trade generally was good. There was a fair demand for country produce at the stalls, but the quantity of chickens offered was somewhat larger than the inquiry warranted, but nearly everything was sold at prices about steady with those of last day. About 2,200 bushels of grain were sold on the street. Two hundred bushels of wheat sold at \$1.00 to \$1.02 per bushel, 400 bushels of corn at the same figure, and 200 bushels of barley at \$1.00. Quotations for oats—Two hundred bushels sold at \$1.00 to \$1.02 per bushel. Dressing—The market continues quiet and unchanged at \$1 to \$1.50 per cwt. Butter—There was a fair lot of stuff offered, and it sold at steady prices. Eggs—There were not many offered, and with a brisk demand, prices were ten higher than they have been lately. Ideas as to price were varied, and quotations run at 30c to 40c per dozen. Poultry—There was a fairly good supply, the receipts of chickens being especially heavy. Quotations are about steady at 10c to 12c per lb. Turkey quotations are unchanged at 10c to 12c for turkeys, and 6c to 8c for old fowl. Hay—About 20 loads were offered. No. 1 timothy at \$10 to \$11.50 per ton, and mixed or clover at \$7 to \$8. Straw—One load sold at \$10.50 per ton.

Cheese Markets.

London, Ont., Nov. 14.—Four thousand and after boxes offered at cheese market to-day. No sales. Bidding from 10c to 10 1/2c. Canton, N.Y., Nov. 15.—Twelve cheese, 10c; butter, 21c. Watertown, N.Y., Nov. 14.—Cheese sales, 3,000 at 10c to 10 1/2c for large and small. Belleville, Nov. 14.—At the meeting of the Cheese Board, held here to-day, there were offered 2,500 white, 1,000 colored, Oct. and Nov. make. Sales were quiet. Under 100, Hodgson 62 1/2, at 10 1/2c, and Hodgson 120 at 10 1/2c to 10 3/4c.

Leading Wheat Markets.

Closing previous day, 7c-day, Nov. May, Nov. May, Chicago 84 1/2 85 1/2 85 1/2 85 1/2 New York 84 1/2 85 1/2 85 1/2 85 1/2 Toledo 84 1/2 85 1/2 85 1/2 85 1/2 St. Louis 84 1/2 85 1/2 85 1/2 85 1/2 Milwaukee 84 1/2 85 1/2 85 1/2 85 1/2 Minneapolis 84 1/2 85 1/2 85 1/2 85 1/2 Duluth 84 1/2 85 1/2 85 1/2 85 1/2

British Markets.

Liverpool, Nov. 14.—Cassia—Wheat—Spot, all standard California, no stock; Walla, No. 1 northern Manitoba, 65 1/2 to 66 1/2; future quiet; Dec. 65 1/2 to 66 1/2; March 65 1/2 to 66 1/2; May 65 1/2 to 66 1/2; Corn—steady; mixed American, old, per bushel, 35 1/2 to 36 1/2; future quiet; Dec. 35 1/2 to 36 1/2; March 35 1/2 to 36 1/2; May 35 1/2 to 36 1/2; Flour—steady; mixed American, old, per barrel, 12 1/2 to 13 1/2; future quiet; Dec. 12 1/2 to 13 1/2; March 12 1/2 to 13 1/2; May 12 1/2 to 13 1/2; Sugar—steady; mixed American, old, per cwt., 11 1/2 to 12 1/2; future quiet; Dec. 11 1/2 to 12 1/2; March 11 1/2 to 12 1/2; May 11 1/2 to 12 1/2; Coffee—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Tea—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Rubber—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Gold—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Silver—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Copper—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Iron—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Steel—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Tin—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Lead—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Zinc—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Nickel—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Platinum—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Palladium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Iridium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Rhodium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Rhenium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Ruthenium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Selenium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Tellurium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Vanadium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Yttrium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Zirconium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Niobium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Manganese—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Silicon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Boron—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Fluorine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Chlorine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Bromine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Iodine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Barium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Strontium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Calcium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Magnesium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Sodium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Potassium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Ammonium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Nitrogen—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Oxygen—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Hydrogen—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Helium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Neon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Argon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Krypton—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Xenon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Radon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Actinium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Thorium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Protactinium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Radium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Polonium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Astatine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Tellurium—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Iodine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Bromine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Chlorine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Fluorine—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Boron—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Silicon—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Manganese—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Nickel—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2; May 15 1/2 to 16 1/2; Cobalt—steady; mixed American, old, per lb., 15 1/2 to 16 1/2; future quiet; Dec. 15 1/2 to 16 1/2; March 15 1/2 to 16 1/2;
