Exporting to England. Some short time ago Canadian cotton manufacturers sent an agent to England to make inquiry as to what the chances might be for making sale there of some of their over-production of goods. On his return he reported that there was really no chance at all, and that any such attempt must result in a large percentage of loss. Such was the statement that found its way into the papers; but since then we are hearing

monomainacs seriatim, but will confine myself to the stupid and ridiculous in-Last week fifteen cases of bleached cotton were shipped from Montreal for England; and since then a shipment was made of ten cases of Canadian knitted woollen goods-shirts and drawers. Still later we learn that Messrs. D. Morrice & Co. are shipping to England a large lot of Canadian grey cottons. The Globe's Montreal despatch puts the quantity at 7500 bales, and says the goods are sold by sample at 17½ cents per pound, or somewhat better than the lowest price ever received here. It is not stated whether the cost of manusays 500 bales shipped on order, adding that "the price obtained is adding that the price obtained is adding to any woman who is deserving of that honored name; but I obtained to add the price of the pri facture will be covered. The Mail's despatch that "the price obtained is said to be higher than similar goods ever sold here; (in Montreal), which is on the face of it a mistake. The statement is, of course, a mistake. children, managed to get landed from the steamer, and a judge decided that being once landed the jurisdiction of the commissioners over him had ceased. But this apparent victory is likely to prove a real defeat for the steamship companies. For the commissioners seeing that every exhibition of lenity and accommodation on their part is taken advantage of, have determined to exercise their legal powers to the full extent, and after this not a single steerage passenger will be allowed to land, on any pretext whatever until it has been shown, to the satisfaction of the proper authority, that he is not likely to be a charge upon the community. Heretofore it has been customary to allow all passengers to land immediately, the examination as to their means taking place by the commissioners just to oblige the steamship people, and as a favor to the immigrants themselves. But in quite a number of cases the companies have repudiated this implied obligation, and have chosen to plant themselves on the strict letter of the law. The commissioners will now take them at their word, and hereafter there will be no favors shown them, but passengers will be rigorously held on board until their status has been determined. This will not hap pleasant for the steamship companies, but public sympathy will not much be exercised on their behalf. Favors shown to them have been badly abused, and now they will have to conform to the strict letter of the law. With regard to the pauper immigration business, both here and in the States, all the facts as far as known point to this conclusion—that the steamship companies are the chief offenders, and the purties that most require to be well watched.

To the Editor of The World. SIR: In The World I read that in the pinion of a correspondent of your smart ittle journal the sight of semi-clad lads bathing from points on the borders of the Toronto bay is "disgusting" to right minded people, and the law and public opinion are invoked to put down the

Now your correspondent's intolerance n this matter is akin to the fanatic zeal of the prohibitionist, or the bigoted mono nania of a cruelty to-animals apostle, or to the ye - manna - abistle - on - the sawbath silliness of a rabid Sabbatarian. Wanton expesure of the person is an indecency deservedly punishable by law; drunken ness displayed in public places is a nuisance to others and therefore punished; cruelty to animals is unmanly and revolting; and a day of rest is essential to the material welfare of the human race, to say nothing of it from a religious peint of view. I should expect to find your correspondent a narrow-minded, illiberal, literal and cast-iron advocate of all the literal and cast-iron advocate of all the restraints imposed on the sins against society involved in the above-named category of offences. And believe me, Sir, it is from this class of uncompromising bigots that harm is done, rather than good, to the causes which they advocate. I wish I had leisure to deal with all these

Nurseries must for an hour or so every day be turned into schools of living anatomy wherever cleanliness is held to be next to godliness. That is to say, the children are first taught to kneel down and say their prayers, and then to kneel down and tub. Per se the sight of a naked boy cannot be so "disgusting" to any woman who is de-

It would not surprise us to see the cotton trade take an upward turn now that Messrs. Morries & Co. have paid upon a satisfactory settlement. Some large lots of goods have gone off at rock bottom prices, these big sales will clear the air considerably; and as we recently suggested, it may be doubted whether any intending buyer could after this secure another such bargain as that which was captured at an opportune moment by the Toronto house above referred to. The cotton trade has been on the down grade long enough; let us hope that now a change for the better is near.

The Pauper Immigrant Fight in New York.

In New York the pauper immigrant was still rages between the steamship companies and the government commissioners. A few days ago a certain new comer, afterwards clearly enough shown to be a pauper, with his wife and seven children, managed to get landed from the control of the private parts of the exponent rather than of the spects. The control that a famous commentator has said that the "Verus of Correggio is the nakedest, the "Verus of Correggio is the makedest, the "Verus of Correggio is the makedest, the "Verus of Correggio is the makedest, the "Verus of Correggio is the nakedest, the "Verus of Co see a naked boy without "disgust." They are not women, but prurient, sensitive plants who will do nothing to build up a robust and vigorous race in Canada. There is no need for every woman to see all that Haidee saw when she found the half-drowned Don Juan beside the sea cave, for Don Juan was a man of leisure and pleasure, and was always obtruding himself upon the fair sex, but I counsel men and women of sense to put up with the casual sight of a man as naked as God made him, and only seeking to cool or to clean himself in this sweltering weather at a convenient spot; otherwise we shall soon come to putting our horses into breeches and our cows into petticoats. Byron says;—

"Both were so young and one so innocent
That bathing passed for nothing."
The indelicacy is all on the side of those
who pretend to be shocked by what they
need not see, and who cannot allow a temporary glimpse of nature to pass for no-thing. Yours, etc.,

The success of the New Model Thresher has been without precedent in the history of threshing machines. The Hall company received this week the following letter from Mr. Jonathan Yorke, who resides near St. Thomas, one of the oldest threshermen in Ontario. Mr. Yorke bought a New Model on trial, and this letter expresses his opinion after having tested the machine to his entire satisfaction.

Yarmouth Centre, Sept. 23rd, 1883. oseph Hall Manufacturing Co., Oshawa

To the Editor of the Pickering News:

Dear Sir,—Last harvest we purchased of the Jos. Hall Manufacturing Company one of their "New Model" Vibrator Threshing Machines, and worked it all the season. As a thresher, separator and cleaner it has no equal. It threshed and waste of grain is insignificant. We believe there is no machine that will so completely separate the grain from the straw as the "New Model." We had all the work we could do from the beginning to the close of the season, and gave our customers the very best satisfaction. The machine is light in dranght, runs very steadily, is well made, highly finished, and, in all respects, a most desirable machine for the thresherman as well as for the farmer. As far as a perfect Thresher, Separator and Cleaner is concerned, it is as near perfection as we believe a machine can be made. It threshes very rapidly, does not clog in any kind of grain, and feeds very easy. Please give this letter an insertion in your valuable paper, and accept our best thanks.

Yours very truly,

WM. Peak, WM. Morrish.

Yours truly, JONATHAN YORKE.

Our New Model" Vibrating Threshing Machine has now been in use in the United States four seasons, and in Canada three seasons. LABATTS

AND BROWN STOUT Received the Highest Awards of Merit for Purity and Excellence.

I hereby certify that I have examined samples of JOHN LABATT'S INDIA PALE ALE, submitted to me for analysis by James Good & Co., agents for this city, and find it to be perfectly sound, containing no ascetic acids, impurities or adulterations, and can strongly recommend it as perfectly pure and a very superior malt liquor.

HENRY H. CROFT. I hereby certify that I have analysed several samples of INDIA PALE ALE and XXX STOUT from the brewery of JOHN LABATT, London, Ont. I find them to be remarkably sound. Ales, brewed from pure malt and hops. I have examined both the March and October brewings, and find them of uniform quality. They may be recommended to invalids or convalescents where malt beverages are required as a tonic. Signed JOHN BAKER EDWARDS, Phy., Professor of Chemistry and Public Analyst. All first-class grocers keep it. Every Ale drinker should try it.

To-day's Threshing.
(Whitby Chronicle.)

When we learn that the capacity of threshing machines has been increased to 1200 bushels in ten hours, and that, too, with no loss, but even again in the sample of grain turned out, we think that a great of grain turned out, we think that a great step has been taken in a good direction.

The communication following, which, for reasons mentioned above, the Chronicle gladly publishes, explains itself, except in the matter of the sample of grain which we received and showed to such well-known old experienced grain dealers as Messrs. Lewis Houck, Yeoman Gibson, J. Long and D. C. Downey of this town, who all pronounced it to be as perfectly as possible bearded without broken kernels, the sample fit for market and altogether beautifully done.

Pickering, Aug. 18, 1884.

Editor of the Whitby Chronicle.

DEAR SIR,—We purchased a "New Model" Vibrating Threshing Machine of the Joseph Hall Manufacturing Co. of Oshawa, this season. On Saturday last we threshed for Garrett Power, on the "Post' farm. 1200 bushels of barley in ten hours, and have finished his job this morning at half-past ten—making 1700 bushels. from 36 acres of barley, in 133

morning at half-past ten—making 1700 bushels, from 36 acres of barley, in 133 hours. We send you sample by post just as it came from the machine, which will prove to you that we have bearded the barley and cleaned it fit for market.

We challenge the owner of any other

We challenge the owner of any other machine in the township of Pickering to equal our performance. We have abunmachine in the township of retections equal our performance. We have abundance of power in our engine. The machine works to our entire satisfaction and is a perfect thresher, cleaner and separator. We don't believe its superior has ever yet been offered to the farmer. Yours truly, WILLIAM J. HALLETT. PATRICK O'RRILLY.

For further particulars apply to JAMES BRANDON. Estate and Insurance Agent, 1 Victoria street, Toronto. The New York market on the whole showed a weaker tendency, which will likely develop a few days. One exception was Union Pa lifle, which sold at 57 towards the close, being an advance of 2 over yesterday. Mr. Gould has expressed the belief that this company will earn over 7 per cent on its stock within twelve months from July 1. The other excep-Western Union, which touched 692

tion was Western Union, which touched 692 compared to 672 to 672 yesterday. Canada Southern 392 against 382 yesterday. Canada Pacific railway 46 to 462. Pullman Car advanced 14 to 1162.

The Evening Post says: "It is pretty well understood that the advance in stocks in the last ten days, which has ranged from 3 to 11 per cent., has been mainly the result of clique manipulation. A great many speculators, who do not believe that the general business and railroad situation warrants an advance, have recently bought some stock increly because they realize the power of cliques to advance prices, notwithstanding adverse circumstances. There is, however, constant apprehension that the clique may at any time try to get rid of part of their load, though it is believed they will be compelled to sustain prices for a long time."
