Sir *John A. Macdonald* introduced a Bill No. 1 respecting the Administration of Oaths of Office; which was read the first time.

Mr. Speaker reported His Excellency's Speech, and read a copy thereof to The House; which is as follows :—

Honorable Gentlemen of the Senate :

Gentlemen of the House of Commons :

In opening this, the Third Session of the present Parliament, I have to offer you my sincere congratulations on the bountiful harvest with which Canada has been

blessed, as well as on the undoubted return of her Commercial prosperity, and the substantial development of her various industries.

During the recess my advisers thought the time opportune for making another attempt to carry out the declared preference of Parliament for the construction and operation of the Canadian Pacific Railway by means of an Incorporated Company, aided by grants of money and land, rather than by the direct action of the Government.

Three of my Ministers therefore proceeded to England for the purpose of carrying on negotiations to that end.

I am pleased to be able to inform you that their efforts were so far successful that a contract has been entered into, subject to the approval of Parliament, with men of high financial standing in Europe, the United States and Canada, for the speedy construction and permanent working of this great national enterprise.

The Contract and the papers connected therewith, will be submitted to you without delay, and I invoke for them your early and earnest consideration.

With this view I have summoned you before the usual period, as no action can be taken by the Contractors to prosecute the work, and no permanent arrangement for the organization of a systematic Emigration from Europe to the North West Territories, can be satisfactorily made until the policy of Parliament with respect to the Railway has been decided.

Steady progress has been made in the construction of those portions of the Railway now under contract. Two additional sections have been recently opened for traffic, one from Winnipeg to Portage la Prairie, the other from Cross Lake to Keewatin; so that there are now in all 234 miles in operation.

You will be glad to learn that the measures adopted to promote economy in the working of the Intercolonial and Prince Edward Island Railways have resulted in a large reduction of the difference between Revenue and Expenditure, and that the steadily increasing traffic warrants the expectation that during the current year these Railways will be self-sustaining.

I have the gratification of informing you that Her Majesty's Government has generously presented to Canada, for training school purposes, the steam corvette *Charybdis* lately returned from service in the Chinese Seas. The correspondence on this subject will be laid before you.

I have thought it well, in consideration of the increasing duties thrown by the development of the Country upon the Civil Service, and for the more efficient organization of such service, to issue a Royal Commission to examine and report on the whole question.

The Report of the Commissioners will, I believe, be ready to be laid before you at an early day; and I ask for your consideration of such Report and of the whole subject of Civil Service Reform.

A measure for the enlargement of the boundaries of the Province of *Manitoba* will be submitted to you.

I greatly regret being obliged to state that the entire failure of the usual food supply of the Indians in the North West, to which I called your attention last session, has continued during the present season, and has involved the necessity of a large expenditure in order to save them from absolute starvation. Several of the Bands have, however, already applied themselves to the cultivation of their Reserves and the care of their cattle. No effort will be spared to induce the whole of the aboriginal population to betake themselves to agricultural pursuits.

Gentlemen of the House of Commons :

The Accounts of the last, and the Estimates for the ensuing year, will be laid before you. The Estimates will, I trust, be found to have been prepared with due regard to economy and the efficiency of the Public Service.

It will be satisfactory to you to know that the existing Tariff has not only promoted the Manufactures and other products of the Country, but has so far increased

the Revenues of the Dominion as to place it beyond doubt that the receipts of the current fiscal year will be in excess of the expenditures chargeable to Consolidated Revenue.

Honorable Gentlemen of the Senate :

Gentlemen of the House of Commons :

Several measures of importance will be submitted to you, among them will be Bills for the winding up of Insolvent Banks and Incorporated Companies; for the amendment of the Railway Act of 1879; for the revision and consolidation of the Laws relating to Government Railways; and for the improvement, in several respects, of the Criminal Law.

I am pleased to be able to inform you that there are now good hopes of our being able to place the naturalization of German Settlers on a more satisfactory footing. A measure will be submitted, with all the papers connected with the matter, for your consideration.

Your best attention will, I am sure, be given to the subjects I have mentioned, as well as to everything that affects the well-being and good government of the Dominion.

On motion of Sir *John A. Macdonald*, His Excellency's Speech was ordered to be taken into consideration, *to-morrow*.

Resolved, That Select Standing Committees of this House, for the present Session, be appointed for the following purposes:—1. On Privileges and Elections.—2. On Expiring Laws.—3. On Railways, Canals and Telegraph Lines.—4. On Miscellaneous Private Bills.—5. On Standing Orders.—6. On Printing.—7. On Public Accounts.—8. On Banking and Commerce.—9. On Immigration and Colonization,—which said Committees shall severally be empowered to examine and enquire into all such matters and things as may be referred to them by The House; and to report from time to time their observations and opinions thereon; with power to send for persons, papers and records.

Mr. Speaker also laid before The House, the Report of the Librarian of Parliament, on the state of the Library of Parliament, which is as follows:—

TO THE HONORABLE THE HOUSE OF COMMONS OF CANADA, IN
PARLIAMENT ASSEMBLED.

The Report of the Librarian on the state of the Library of Parliament respectfully sheweth:—

That much of the past recess has been devoted to the work of examining into the condition of the Library, with a view to improve the system of classification and arrangement, to verify the entries in the catalogues with the books upon the shelves, and to ascertain, by this means, what losses may have been incurred, since the previous occasion of "taking stock." This undertaking has occupied considerable time. It would, however, have been completed before the meeting of Parliament, but for the unexpected summoning of Parliament two months before the ordinary period of its assembling. The work will necessarily be suspended during Session, but it is hoped will be finished by an early date.

In compliance with a wish very generally expressed by Members and others who make extensive use of the English division of the Law Library, the books in this section have been re-arranged in alphabetical order.

The classified catalogue of the works on Law, Politics and Political Economy has been reprinted, and is now ready for distribution to Members. A new index of authors on these subjects, which has been brought down to the latest possible date, so as to include works added to the Library, after the classified catalogue had gone through the press, has been appended to this volume.

It is not proposed to incur the expense of reprinting any further portions of the Classified Catalogue, at present. Meanwhile steady progress has been made in the plan referred to in the Report of last Session, of compiling a new Manuscript Catalogue on the basis of the last printed volume, re-writing therein all the manuscript additions to the General Catalogue, since the issue of that volume, now 23 years ago, in a permanent, uniform and convenient method. This laborious task is being executed by a gentleman whose appointment for the purpose was specially approved by the Joint Library Committee last Session. A casual inspection of the manner in which he is performing this duty will suffice to shew that it is being done with remarkable skill and precision; and that this method of perpetuating the record of the contents of the Library is decidedly preferable to the costly plan of reprinting the entire Catalogue.

Owing to the extraordinary outlay in previous years for the purchase of books, an outlay which was chiefly incurred in order to place the Law division of the Library upon a proper footing, to meet the requirements of the Supreme Court,—the expenditure had fallen considerably into arrears. To provide for the payment of all accounts then due, without increasing the average annual amount of the Parliamentary grant on behalf of the Library, it was agreed, upon the advice of the Joint Library Committee, last Session, to appropriate the whole of the grant for 1880-81, to liquidate unpaid Booksellers' Bills, and to anticipate a moiety of the ordinary grant, for the ensuing fiscal year, to defray current and unavoidable expenses. This arrangement, while it has sufficed to clear off all arrears of debt, left only the small sum of \$3,500 available for expenditure during the current year. Out of this we have had to pay our Binding account,—which with so many periodicals received, is always heavy—to purchase some books for the Exchanges,—for example, the expensive series of Upper and Lower Canada Law Reports, with those of the Supreme Court of the Dominion,—to keep up at least a large portion of our serial publications, and to buy copies of all books issued in Canada. Consequently, with the limited means remaining at our disposal, and anxious to avoid, as far as possible, the accumulation of unpaid accounts, we have refrained from sending the customary orders for new books to Europe and to the United States. This enables the Librarian to state, with much satisfaction, that up to the present time, no accounts for books have accrued in excess of the funds still on hand for payment. He must add, however, that in order to procure certain books which he deemed to be indispensable to meet the wants of Members during the ensuing Session, he has ventured to forward small orders to London, Paris, New York and Boston, the cost of which must devolve upon the grant for the next fiscal year. But he confidently anticipates that, before the arrival of another Session of Parliament, the income and expenditure on behalf of the Library will be completely, and, as he hopes, permanently adjusted.

Owing to the few new books bought this year, it has seemed unnecessary to issue any supplementary printed Catalogue, as heretofore.

All the rooms in the basement of the Library premises, temporarily assigned to other public uses, until actually required for Library purposes, have now been restored to this department, which has permitted various large collections of books to be arranged in an improved order, for access and consultation.

The recent abolition of the Government Workshops, and the consequent vacation of the buildings in the precincts of the Houses of Parliament which was used for that service, affords reasonable grounds for anticipating that more convenient accommodation may thus be found for the Supreme Court, and that the Chambers now occupied by that institution will, ere long, be restored to the Library. Some such arrangement, whereby improved accommodation can be afforded to the Library, is rapidly becoming indispensable. If it can be effected, by the restoration of these apartments to their original use, it will undoubtedly admit of a better arrangement of the Library, as well on behalf of Members, as of the public in general, and it will furnish ample space for the necessary augmentation of this valuable national collection for many years to come.

Lists of donations received, and of works deposited under the Copyright Law, since last Session, are appended to this Report.

The number of volumes in the Library last year, was estimated at 96,596. Since then about 1,600 volumes have been added, making a total of 98,196.

All which is respectfully submitted,

ALPHEUS TODD,

Librarian of Parliament.

LIBRARY OF PARLIAMENT,

The House then adjourned.

Speaker.

PRAYERS.

One Petition was brought up, and laid on the Table.

The House proceeded to the consideration of His Excellency's Speech at the opening of the Session.

Mr. *Beaty* moved, seconded by Mr. *Vanasse* : —

1. That an humble Address be presented to His Excellency the Governor General to thank His Excellency for his gracious Speech at the opening of the present Session, and further to assure His Excellency,—that we receive with great pleasure His Excellency's congratulations on the bountiful harvest with which Canada has been blessed, as well as on the undoubted return of her Commercial prosperity, and the substantial development of her various industries.

That we are gratified to be informed by His Excellency that Her Majesty's Government has generously presented to Canada, for training school purposes, the steam corvette *Charybdis* lately returned from service in the Chinese Seas, and that the correspondence on this subject will be laid before us.

8. That we receive with much interest the intimation that His Excellency has thought it well, in consideration of the increasing duties thrown by the development of the Country upon the Civil Service, and for the more efficient organization of such Service, to issue a Royal Commission to examine and report on the whole question, and that His Excellency believes that the Report of the Commissioners will be ready to be laid before us at an early day; and that our earnest consideration shall be given to such Report and to the whole subject of Civil Service Reform.

9. That we shall give our best attention to the measure for the enlargement of the boundaries of the Province of Manitoba, which His Excellency is pleased to say, will be submitted to us.

10. That we share His Excellency's regret that the entire failure of the usual food supply of the Indians in the North-West, to which he called our attention last Session, has continued during the present season, and has involved the necessity of a large expenditure in order to save them from absolute starvation. That we are glad to learn that several of the Bands have, however, already applied themselves to the cultivation of their Reserves and the care of their cattle, and that no effort will be spared to induce the whole of the aboriginal population to betake themselves to agricultural pursuits.

11. That we thank His Excellency for the assurance that the Accounts of the last, and the Estimates for the ensuing year, will be laid before us; and that we trust that the Estimates will be found to have been prepared with due regard to economy and the efficiency of the Public Service.

12. That it will be satisfactory to us to find that the existing Tariff has not only promoted the Manufactures and other products of the Country, but has so far increased the Revenues of the Dominion as to place it beyond doubt that the receipts of the current fiscal year will be in excess of the expenditures chargeable to Consolidated Revenue.

13. That we shall respectfully receive and consider such measures of importance as His Excellency may cause to be submitted to us, including any Bills for the winding up of Insolvent Banks and Incorporated Companies, for the amendment of the Railway Act of 1879, for the revision and consolidation of the Laws relating to Government Railways, and for the improvement, in several respects, of the Criminal Law.

14. That we are pleased to be informed that there are now good hopes of our being able to place the naturalization of German Settlers on a more satisfactory footing; and that any measure on the subject which may be submitted to us, with all the papers connected with the matter, shall receive our willing consideration.

15. That His Excellency may rest assured that our best attention will be given to the subjects he has mentioned, as well as to everything that affects the well-being and good government of the Dominion.

And paragraph 1 to 15, inclusive, of the said proposed Address being severally read a second time, were agreed to *on a division*.

On motion of Sir *John A. Macdonald*, the said Resolution was referred to a Select Committee composed of Sir *John A. Macdonald*, Sir *Leonard Tilley*, Sir *Charles Tupper*, and Messrs. *Langevin*, *Beaty* and *Vanasse*, to draft an Address pursuant thereto.

Sir *John A. Macdonald*, from the said Committee, reported the draft of an Address, and the same being read a second time, was agreed to, and it is as follows:—

To His Excellency the Right Honorable Sir JOHN DOUGLAS SUTHERLAND CAMPBELL, (commonly called the Marquis of Lorne), Knight of the Most Ancient and Most Noble Order of the Thistle, Knight Grand Cross of the Most Distinguished Order of *Saint Michael and St. George*, Governor General of Canada, and Vice-Admiral of the same, etc., etc.

MAY IT PLEASE YOUR EXCELLENCY:—

We, Her Majesty's dutiful and loyal subjects the Commons of Canada in Parliament assembled, humbly thank Your Excellency for your gracious Speech at the opening of the present Session.

We receive with great pleasure Your Excellency's congratulations on the bountiful harvest with which Canada has been blessed, as well as on the undoubted return of her Commercial prosperity, and the substantial development of her various industries.

We learn with much interest that during the recess Your Excellency's advisers thought the time opportune for making another attempt to carry out the declared preference of Parliament for the construction and operation of the Canadian Pacific Railway by means of an Incorporated Company, aided by grants of money and land, rather than by the direct action of the Government; and that three of Your Excellency's Ministers therefore proceeded to England for the purpose of carrying on negotiations to that end.

We are well pleased that Your Excellency is able to inform us that their efforts were so far successful that a contract has been entered into, subject to the approval of Parliament, with men of high financial standing in Europe, the United States and Canada, for the speedy construction and permanent working of this great national enterprise; we thank Your Excellency for informing us that the Contract and papers connected therewith, will be submitted to us without delay, and they shall receive our early and earnest consideration.

We are grateful to Your Excellency for the information that you have summoned us before the usual period, in view of the fact that no action can be taken by the Contractors to prosecute the work, and no permanent arrangement for the organization of a systematic Emigration from Europe to the North-West Territories, can be satisfactorily made, until the policy of Parliament with respect to the Railway has been decided.

We are pleased to know that steady progress has been made in the construction of those portions of the Railway now under contract, and that two additional sections have been recently opened for traffic, one from Winnipeg to Portage la Prairie, the other from Cross Lake to Keewatin; so that there are now in all 264 miles in operation.

We are glad to learn that the measures adopted to promote economy in the working of the Intercolonial and Prince Edward Island Railways have resulted in a large reduction of the difference between Revenue and Expenditure, and that the steadily increasing traffic warrants the expectation that during the current year these Railways will be self-sustaining.

We are gratified to be informed by Your Excellency that Her Majesty's Government has generously presented to Canada, for training school purposes, the steam corvette *Charybdis* lately returned from service in the Chinese Seas, and that the correspondence on this subject will be laid before us.

We receive with much interest the intimation that Your Excellency has thought it well, in consideration of the increasing duties thrown by the development of the Country upon the Civil Service, and for the more efficient organization of such Service, to issue a Royal Commission to examine and report on the whole question, and that Your Excellency believes that the Report of the Commissioners will be ready to be laid before us at an early day; our earnest consideration shall be given to such Report and to the whole subject of Civil Service Reform.

We shall give our best attention to the measure for the enlargement of the boundaries of the Province of *Manitoba*, which Your Excellency is pleased to say, will be submitted to us.

We share Your Excellency's regret that the entire failure of the usual food supply of the Indians in the North West, to which You called our attention last session, has continued during the present season, and has involved the necessity of a large expenditure in order to save them from absolute starvation. We are glad to learn that several of the Bands have, however, already applied themselves to the cultivation of their Reserves and the care of their cattle, and that no effort will be spared to induce the whole of the aboriginal population to betake themselves to agricultural pursuits.

We thank Your Excellency for the assurance that the Accounts of the last, and the Estimates for the ensuing year, will be laid before us; and we trust that the Estimates will be found to have been prepared with due regard to economy and the efficiency of the Public Service.

It will be satisfactory to us to find that the existing Tariff has not only promoted the Manufactures and other products of the Country, but has so far increased the Revenues of the Dominion as to place it beyond doubt that the receipts of the current fiscal year will be in excess of the expenditures chargeable to Consolidated Revenue.

We shall respectfully receive and consider such measures of importance as Your Excellency may cause to be submitted to us, including any Bills for the winding up of Insolvent Banks and Incorporated Companies, for the amendment of the Railway Act of 1879, for the revision and consolidation of the Laws relating to Government Railways, and for the improvement, in several respects, of the Criminal Law.

We are pleased to be informed that there are now good hopes of our being able to place the naturalization of German Settlers on a more satisfactory footing; and any measure on the subject which may be submitted to us, with all the papers connected with the matter, shall receive our willing consideration.

Your Excellency may rest assured that our best attention will be given to the subjects You have mentioned, as well as to everything that affects the well-being and good government of the Dominion.

The said Address was then ordered to be engrossed, and to be presented to His Excellency the Governor General by such Members of this House, as are of the Honorable the Privy Council.

On motion of Sir *Leonard Tilley*, it was

Resolved,—That this House will on *Friday next*, resolve itself into a Committee, to consider of a supply to be granted to *Her Majesty*.

Resolved,—That this House will on *Friday next*, resolve itself into a Committee, to consider of the Ways and Means for raising the Supply to be granted to *Her Majesty*.

Sir *John A. Macdonald* delivered two Messages from His Excellency the Governor General, which were read by Mr. Speaker, as follows :—

Lorne.

The Governor General transmits to the House of Commons, a contract entered into for the construction of the Canadian Pacific Railway, and accompanying Schedule, and recommends the same for the favorable consideration of your Honorable House.

GOVERNMENT HOUSE,
OTAWA, 10th December, 1880.

And the said Schedule is as follows :—

THIS CONTRACT AND AGREEMENT MADE BETWEEN HER MAJESTY THE QUEEN, acting in respect of the Dominion of Canada, and herein represented and acting by the Honorable SIR CHARLES TUPPER, K.C.M.G., Minister of Railways and Canals, and George Stephen and Duncan McIntyre, of Montreal, in Canada; John S. Kennedy of New York, in the State of New York; Richard B. Angus and James J. Hill, of St. Paul, in the State of Minnesota; Morton, Rose & Co., of London, England, and Konh Reinach & Co., of Paris, France.

Witnesses: That the parties hereto have contracted and agreed with each other as follows, namely :—

1. For the better interpretation of this contract, it is hereby declared that the portion of Railway hereinafter called the Eastern section, shall comprise that part of the Canadian Pacific Railway to be constructed, extending from the Western terminus of the Canada Central Railway, near the East end of Lake Nipissing, known as Callander Station, to a point of junction with that portion of the said Canadian Pacific Railway now in course of construction extending from Lake Superior to Selkirk on the East side of Red River; which latter portion is hereinafter called the Lake Superior section. That the portion of said Railway, now partially in course of construction, extending from Selkirk to Kamloops, is hereinafter called the Central section; and the portion of said Railway now in course of construction, extending from Kamloops to Port Moody, is hereinafter called the Western section. And that the words "the Canadian Pacific Railway," are intended to mean the entire Railway, as described in the Act 37th Victoria, cap. 14. The individual parties hereto, are hereinafter described as the Company; and the Government of Canada is hereinafter called the Government.

2. The contractors immediately after the organization of the said Company, shall deposit with the Government \$1,000,000 in cash or approved securities, as a security for the construction of the Railway hereby contracted for. The Government shall pay to the Company interest on the cash

deposited at the rate of four per cent. per annum, half-yearly, and shall pay over to the Company the interest received upon securities deposited, the whole until default in the performance of the conditions hereof, or until the repayment of the deposit, and shall return the deposit to the Company on the completion of the railway, according to the terms hereof, with any interest accrued thereon.

The Company shall lay out, construct and equip the said Eastern section, and the said Central section, of a uniform gauge of 4 feet 8½ inches, and in order to establish an approximate standard whereby the quality and the character of the Railway and of the materials used in the construction thereof, and of the equipment thereof may be regulated, the Union Pacific Railway of the United States as the same was when first constructed, is hereby selected and fixed as such standard. And if the Government and the Company should be unable to agree as to whether or not any work done or materials furnished under this contract are in fair conformity with such standard, or as to any other question of fact, excluding questions of law, the subject of disagreement shall be from time to time referred to the determination of three referees, one of whom shall be chosen by the Government, one by the Company, and one by the two referees so chosen, and such referees shall decide as to the party by whom the expense of such reference shall be defrayed. And if such two referees should be unable to agree upon a third referee, he shall be appointed at the instance of either party hereto, after notice to the other, by the Chief Justice of the Supreme Court of Canada. And the decision of such referees, or of the majority of them, shall be final.

4. The work of construction shall be commenced at the eastern extremity of the Eastern section not later than the first day of July next, and the work upon the Central section shall be commenced by the Company at such point towards the eastern end thereof on the portion of the line now under construction as shall be found convenient and as shall be approved by the Government, at a date not later than the 1st May next. And the work upon the Eastern and Central sections, shall be vigorously and continuously carried on at such rate of annual progress on each section as shall enable the Company to complete and equip the same and each of them, in running order, on or before the first day of May, 1891, by which date the Company hereby agree to complete and equip the said sections in conformity with this contract, unless prevented by the act of God, the Queen's enemies, intestine disturbances, epidemics, floods, or other causes

beyond the control of the Company. And in case of the interruption or obstruction of the work of construction from any of the said causes, the time fixed for the completion of the railway shall be extended for a corresponding period.

5. The Company shall pay to the Government the cost, according to the contract of the portion of railway, 100 miles in length, extending from the city of Winnipeg westward up to the time at which the work was taken out of the hands of the contractor and the expenses since incurred by the Government in the work of construction, but shall have the right to assume the said work at any time and complete the same, paying the cost of construction as aforesaid so far as the same shall then have been incurred by the Government.

6. Unless prevented by the act of God, the Queen's enemies, intestine disturbances, epidemics, floods or other causes beyond the control of the Government, the Government shall cause to be completed the said Lake Superior section, by the dates fixed by the existing contracts for the construction thereof; and shall also cause to be completed the portion of the said Western section now under contract, namely, from Kamloops to Yale, within the period fixed by the contracts therefor, namely, by the thirtieth day of June, 1885; and shall also cause to be completed, on or before the first day of May, 1891, the remaining portion of the said Western section, lying between Yale and Port Moody, which shall be constructed of equally good quality in every respect with the standard hereby created for the portion hereby contracted for. And the said Lake Superior section, and the portions of the said Western section now under contract, shall be completed as nearly as practicable according to the specifications and conditions of the contracts therefor except in so far as the same have been modified by the Government prior to this contract.

7. The Railway constructed under the terms hereof shall be the property of the Company: and pending the completion of the Eastern and Central sections, the Government shall transfer to the Company the possession and right to work and run the several portions of the Canadian Pacific Railway already constructed or as the same shall be completed. And upon the completion of the Eastern and Central sections, the Government shall convey to the Company, with a suitable number of station buildings and with water service (but without equipment), those portions of the Canadian Pacific Railway constructed or to be constructed by the Government which shall then be completed; and upon completion of the remainder of the portion of railway to be constructed by the

Government, that portion shall also be conveyed to the Company, and the Canadian Pacific Railway shall become, and be thereafter the absolute property of the Company. And the Company shall thereafter and forever efficiently maintain, work and run the Canadian Pacific Railway.

8. Upon the reception from the Government of the possession of each of the respective portions of the Canadian Pacific Railway, the Company shall equip the same in conformity with the standard herein established for the equipment of the sections hereby contracted for, and shall thereafter maintain and efficiently operate the same.

9. In consideration of the premises, the Government agree to grant to the Company a subsidy in money of \$25,000,000, and in land of 25,000,000 acres, for which subsidies the construction of the Canadian Pacific Railway shall be completed and the same shall be equipped, maintained and operated, the said subsidies respectively to be paid and granted as the work of construction shall proceed, in manner and upon the conditions following, that is to say:

a. The said subsidy in money is hereby divided and appropriated as follows, namely:—

CENTRAL SECTION.

Assumed at 1,350 miles—		
1st.—900 miles, at \$10,000 per mile.....	\$ 9,000,000	
2nd.—450 “ “ 13,333 “ “	6,000,000	
		\$15,000,000

EASTERN SECTION.

Assumed at 650 miles, subsidy equal to \$15,384.61 per mile..	10,000,000	
		\$25,000,000

And the said subsidy in land is hereby divided and appropriated as follows, subject to the reserve hereafter provided for.

CENTRAL SECTION.

1st.—900 miles, at 12,500 acres per mile.....	11,250,000	
2nd.—450 “ “ 16,666.66 “ “ “	7,500,000	
		18,750,000

EASTERN SECTION.

Assumed at 650 miles, subsidy equal to 9,615.35 acres per mile.....	6,250,000	
		25,000,000

b. Upon the construction of any portion of the railway hereby contracted for, not less than 20 miles in length and the completion thereof so as to admit of the running of regular trains thereon, together with such equipment thereof as shall be required for the traffic thereon, the Government shall pay and grant to the Company the money, and land subsidies applicable thereto, according to the division and appropriation thereof made, as hereinbefore provided; the

Company having the option of receiving in lieu of cash, terminable bonds of the Government, bearing such rate of interest for such period and nominal amount as may be arranged, and which may be equivalent according to actuarial calculation to the corresponding cash payment, the Government allowing four per cent. interest on monies deposited with them.

c. If at any time the Company shall cause to be delivered on or near the line of the said railway, at a place satisfactory to the Government, steel rails and fastenings to be used in the construction of the railway, but in advance of the requirements for such construction, the Government, on the requisition of the Company, shall, upon such terms and conditions as shall be determined by the Government, advance thereon three-fourths of the value thereof at the place of delivery. And a proportion of the amount so advanced shall be deducted according to such terms and conditions from the subsidy to be thereafter paid, upon the settlement for each section of 20 miles of railway, which proportion shall correspond with the proportion of such rails and fastenings which have been used in the construction of such sections.

d. Until the first day of January, 1882, the Company shall have the option, instead of issuing land grant bonds as hereinafter provided, of substituting the payment by the Government of the interest (or part of the interest) on bonds of the Company, mortgaging the railway and the lands to be granted by the Government, running over such term of years as may be approved by the Governor in Council in lieu of the cash subsidy hereby agreed to be granted to the Company or any part thereof; such payments of interest to be equivalent according to actuarial calculation to the corresponding cash payment, the Government allowing four per cent. interest on monies deposited with them; and the coupons representing the interest on such bonds shall be guaranteed by the Government to the extent of such equivalent. And the proceeds of the sale of such bonds to the extent of not more than \$25,000,000 shall be deposited with the Government, and the balance of such proceeds shall be placed elsewhere by the Company, to the satisfaction, and under the exclusive control of the Government; failing which last condition the bonds in excess of those sold shall remain in the hands of the Government. And from time to time as the work proceeds, the Government shall pay over to the Company: firstly, out of the amount so to be placed by the Company,—and, after the expenditure of that amount, out of the amount deposited with the Government,—sums of money bearing the same proportion to the mileage cash subsidy hereby agreed upon, which the net proceeds of such sale (if the whole of such bonds are sold upon the issue

thereof) or, if such bonds be not all then sold, the net proceeds of the issue, calculated at the rate at which the sale of part of them shall have been made, shall bear to the sum of \$25,000,000. But if only a portion of the bond issue be sold, the amount earned by the Company according to the proportion aforesaid, shall be paid to the Company, partly out of the bonds in the hands of the Government, and partly out of the cash deposited with the Government, in similar proportions to the amount of such bonds sold and remaining unsold respectively; and the Company shall receive the bonds so paid as cash at the rate at which the said partial sale thereof shall have been made. And the Government will receive and hold such sum of money towards the creation of a sinking fund for the redemption of such bonds and upon such terms and conditions; as shall be agreed upon between the Government and the Company.

e. If the Company avail themselves of the option granted by clause *d*, the sum of \$2,000 per mile for the first eight hundred miles of the central section shall be deducted *pro rata* from the amount payable to the Company in respect of the said eight hundred miles, and shall be appropriated to increase the mileage cash subsidy appropriated to the remainder of the said central section.

10. In further consideration of the premises the Government shall also grant to the Company the lands required for the road bed of the railway, and for its stations, station grounds, workshops, dock ground and water frontage at the termini on navigable waters, buildings, yards, and other appurtenances required for the convenient and effectual construction and working of the railway, in so far as such land shall be vested in the Government. And the Government shall also permit the admission free of duty, of all steel rails, fish plates and other fastenings, spikes, bolts and nuts, wire, timber and all material for bridges, to be used in the original construction of the railway, and of a telegraph line in connection therewith, and all telegraphic apparatus required for the first equipment of such telegraph line. And will convey to the Company, at cost price, with interest, all rails and fastenings bought in or since the year 1879, and other materials for construction in the possession of or purchased by the Government at a valuation; such rails, fastenings and materials not being required by it for the construction of the said Lake Superior and western sections.

11. The grant of land hereby agreed to be made to the Company, shall be so made in alternate sections of 640 acres each, extending back 24 miles deep, on each side of the railway, from Winnipeg to Jasper House, in so far as such lands shall be vested in the Government, the Company receiving

the sections bearing uneven numbers. But should any of such sections consist in a material degree of land not fairly fit for settlement, the Company shall not be obliged to receive them as part of such grant, and the deficiency thereby caused and any further deficiency which may arise from the insufficient quantity of land along the said portion of railway, to complete the said 25,000,000 acres, or from the prevalence of lakes and water stretches in the sections granted (which lakes and water stretches shall not be computed in the acreage of such sections), shall be made up from other portions to be selected by the Company in the tract known as the fertile belt, that is to say the land lying between parallells 49 and 57 degrees of north latitude or elsewhere at the option of the Company by the grant therein of similar alternate sections extending back 24 miles deep on each side of any branch line or lines of railway to be located by the Company, and to be shown on a map or plan thereof deposited with the Minister of Railways; or of any common frontline or lines agreed upon between the Government and the Company, the conditions hereinbefore stated as to lands not fairly fit for settlement to be applicable to such additional grants. And the Company may with the consent of the Government, select in the North-West Territories any tract or tracts of land not taken up as a means of supplying or partially supplying such deficiency. But such grants shall be made only from lands remaining vested in the Government.

12. The Government shall extinguish the Indian title affecting the lands herein appropriated, and to be hereafter granted in aid of the railway.

13. The Company shall have the right subject to the approval of the Governor in Council to lay out and locate the line of the railway hereby contracted for, as they may see fit, preserving the following terminal points, namely: from Callander station to the point of junction with the Lake Superior section; and from Selkirk to the junction with the western section at Kamloops by way of the Yellow Head Pass.

14. The Company shall have the right, from time to time, to lay out, construct, equip, maintain and work branch lines of railway from any point or points along their main line of railway, to any point or points within the territory of the Dominion. Provided always that before commencing any branch they shall first deposit a map and plan of such branch in the Department of Railways. And the Government shall grant to the Company the lands required for the road bed of such branches, and for the stations, station

grounds, buildings, workshops, yards and other appurtenances requisite for the efficient construction and working of such branches in so far as such lands are vested in the Government.

15. For 20 years from the date hereof, no line of railway shall be authorised by the Dominion Parliament to be constructed South of the Canadian Pacific Railway, from any point at or near the Canadian Pacific Railway except such line as shall run South West, or to the Westward of South West : nor to within fifteen miles of Latitude 49. And in the establishment of any new Province in the North West Territories, provision shall be made for continuing such prohibition after such establishment until the expiration of the said period.

16. The Canadian Pacific Railway, and all stations and station grounds, work shops, buildings, yards and other property, rolling stock and appurtenances required and used for the construction and working thereof, and the capital stock of the Company shall be forever free from taxation by the Dominion, or by any Province hereafter to be established or by any Municipal Corporation therein, and the lands of the Company, in the North-West Territories, until they are either sold or occupied, shall also be free from such taxation for 20 years after the grant thereof from the Crown.

17. The Company shall be authorized by their Act of incorporation to issue bonds, secured upon the land granted and to be granted to the Company, containing provisions for the use of such bonds in the acquisition of lands, and such other conditions as the Company shall see fit, such issue to be for \$25,000,000. And should the Company make such issue of land grant bonds, then they shall deposit them in the hands of the Government ; and the Government shall retain and hold one-fifth of such bonds as security for the due performance of the present contract in respect of the maintenance and continuous working of the railway by the Company, as herein agreed, for ten years after the completion thereof, and the remaining \$20,000,000 of such bonds shall be dealt with as hereinafter provided. And as to the said one-fifth of the said bonds, so long as no default shall occur in the maintenance and working of the said Canadian Pacific Railway, the Government shall not present or demand payment of the coupons of such bonds, nor require payment of any interest thereon. And if any of such bonds so to be retained by the Government shall be paid off in the manner to be provided for the extinction of the whole issue thereof, the Government shall

hold the amount received in payment thereof as security for the same purposes as the bonds so paid off, paying interest thereon at four per cent. per annum so long as default is not made by the Company in the performance of the conditions hereof. And at the end of the said period of ten years from the completion of the said railway, if no default shall then have occurred in such maintenance and working thereof, the said bonds, or if any of them shall then have been paid off, the remainder of said bonds and the money received for those paid off, with accrued interest shall be delivered back by the Government to the Company with all the coupons attached to such bonds. But if such default should occur, the Government may thereafter require payment of interest on the bonds so held, and shall not be obliged to continue to pay interest on the money representing bonds paid off; and while the Government shall retain the right to hold the said portion of the said land grant bonds, other securities satisfactory to the Government may be substituted for them by the Company by agreement with the Government.

18. If the Company shall find it necessary or expedient to sell the remaining \$20,000,000 of the land grant bonds or a larger portion thereof than in the proportion of one dollar for each acre of land then earned by the Company, they shall be allowed to do so, but the proceeds thereof, over and above the amount to which the Company shall be entitled as herein provided, shall be deposited with the Government. And the Government shall pay interest upon such deposit half-yearly, at the rate of four per cent. per annum, and shall pay over the amount of such deposit to the Company from time to time as the work proceeds, in the same proportions, and at the same times and upon the same conditions as the land grant—that is to say: the Company shall be entitled to receive from the Government out of the proceeds of the said land grant bonds, the same number of dollars as the number of acres of the land subsidy which shall then have been earned by them, less one fifth thereof, that is to say, if the bonds are sold at par, but if they are sold at less than par, then a deduction shall be made therefrom corresponding to the discount at which such bonds are sold. And such land grant shall be conveyed to them by the Government, subject to the charge created as security for the said land grant bonds, and shall remain subject to such charge till relieved thereof in such manner as shall be provided for at the time of the issue of such bonds.

19. The company shall pay any expenses which shall be incurred by the Government in carrying out the provisions of the two last preceding clauses of this contract.

20. If the Company should not issue, such land grant bonds then the Government shall retain from out of each grant to be made from time to time, every fifth section of the lands hereby agreed to be granted, such lands to be so retained as security for the purposes, and for the length of time, mentioned in section eighteen hereof. And such lands may be sold in such manner and at such prices as shall be agreed upon between the Government and the Company, and in that case the price thereof shall be paid to, and held by the Government for the same period, and for the same purposes as the land itself, the Government paying four per cent. per annum interest thereon. And other securities satisfactory to the Government may be substituted for such lands or money by agreement with the Government.

21. The company to be incorporated, with sufficient powers to enable them to carry out the foregoing contract, and this contract shall only be binding in the event of an Act of incorporation being granted to the Company in the form hereby appended as Schedule A.

22. The Railway Act of 1879, in so far as the provisions of the same are applicable to the undertaking referred to in this contract, and in so far as they are not inconsistent herewith or inconsistent with or contrary to the provisions of the Act of incorporation to be granted to the Company, shall apply to the Canadian Pacific Railway.

In witness whereof the parties hereto have executed these presents at the City of Ottawa, this twenty-first day of October, 1880.

3. As soon as five million dollars of the stock of the Company have been subscribed, and thirty per centum thereof paid up, and upon the deposit with the Minister of Finance of the Dominion of one million dollars in money, or in securities approved by the Governor in Council, for the purpose and upon the conditions in the foregoing contract provided, the said contract shall become and be transferred to the Company, without the execution of any deed or instrument in that behalf; and the Company shall, thereupon, become and be vested with all the rights of the contractors named in the said contract, and shall be subject to, and liable for, all their duties and obligations, to the same extent and in the same manner as if the said contract had been executed by the said Company instead of by the said contractors; and thereupon the said contractors, as individuals,

shall cease to have any right or interest in the said contract, and shall not be subject to any liability or responsibility under the terms thereof otherwise than as members of the corporation hereby created. And upon the performance of the said conditions respecting the subscription of stock, the partial payment thereof, and the deposit of one million dollars to the satisfaction of the Governor in Council, the publication by the Secretary of State in the *Canada Gazette*, of a notice that the transfer of the contract to the Company has been effected and completed shall be conclusive proof of the fact. And the Company shall cause to be paid up, on or before the first day of May next, a further instalment of twenty per centum upon the said first subscription of five million dollars, of which call thirty days notice by circular mailed to each shareholder shall be sufficient. And the Company shall call in, and cause to be paid up, on or before the 31st day of December, 1882, the remainder of the said first subscription of five million dollars.

4. All the franchises and powers necessary or useful to the Company to enable them to carry out, perform, enforce, use, and avail themselves of, every condition, stipulation, obligation, duty, right, remedy, privilege, and advantage agreed upon, contained or described in the said contract, are hereby conferred upon the Company. And the enactment of the special provisions hereinafter contained shall not be held to impair or derogate from the generality of the franchises and powers so hereby conferred upon them.

DIRECTORS.

5. The said George Stephen, Duncan McIntyre, John S. Kennedy, Richard B. Angus, James J. Hill, Henry Stafford Northcote, of London, aforesaid, Esquires; Pascoe du P. Grenfell, of London, aforesaid, Merchant, Charles Day Rose, of London, aforesaid, Merchant, and Baron J. de Reinach, of Paris, aforesaid, Banker; are hereby constituted the first directors of the Company, with power to add to their number, but so that the directors shall not in all exceed fifteen in number; and the majority of the directors, of whom the President shall be one, shall be British subjects. And the Board of Directors so constituted shall have all the powers hereby conferred upon the directors of the Company, and they shall hold office until the first annual meeting of the shareholders of the Company.

6. Each of the directors of the Company, hereby appointed, or hereafter appointed or elected, shall hold at least two hundred and fifty shares of the stock of the Company. But

the number of directors to be hereafter elected by the shareholders shall be such, not exceeding fifteen, as shall be fixed by by-law, and subject to the same conditions as the directors appointed by, or under the authority of, the last preceding section; the number thereof may be hereafter altered from time to time in like manner. The votes for their election shall be by ballot.

7. A majority of the directors shall form a quorum of the board, and until otherwise provided by By-law, directors may vote and act by proxy, such proxy to be held by a director only; but no director shall hold more than two proxies, and no meeting of directors shall be competent to transact business unless at least three directors are present thereat in person, the remaining number of directors required to form a quorum being represented by proxies.

8. The board of directors may appoint from out of their number an Executive Committee, composed of at least three directors, for the transaction of the ordinary business of the Company, with such powers and duties as shall be fixed by the by-laws; and the President shall be *ex officio* a member of such committee.

9. The chief place of business of the Company shall be at the City of Montreal, but the Company may from time to time, by by-law, appoint and fix other places within or beyond the limits of Canada at which the business of the Company may be transacted; and at which the directors or shareholders may meet, when called as shall be determined by the by-laws. And the Company shall appoint and fix by By-law, at least one place in each Province or Territory through which the Railway shall pass, where service of process may be made upon the Company, in respect of any cause of action arising within such Province or Territory; and may afterwards, from time to time, change such place by By-law. And a copy of any By-law fixing or changing any such place, duly authenticated as herein provided, shall be deposited by the Company in the office, at the seat of Government of the Province or Territory to which such By-law shall apply, of the Clerk or Prothonotary of the highest, or one of the highest, Courts of civil jurisdiction of such Province or Territory. And if any cause of action shall arise against the Company within any Province or Territory, and any writ or process be issued against the Company thereon out of any Court in such Province or Territory, service of such process may be validly made upon the Company at the place within such Province or Territory so appointed and fixed; but if the Company fail to appoint and fix such place,

or to deposit as hereinbefore provided, the By-law made in that behalf, any such process may be validly served upon the Company, at any of the stations of the said Railway within such Province or Territory.

SHAREHOLDERS.

10. The first annual meeting of the shareholders of the Company, for the appointment of directors, shall be held on the second Wednesday in May, 1882, at the principal office of the Company, in Montreal; and the annual general meeting of shareholders, for the election of directors and the transaction of business generally, shall be held on the same day in each year thereafter at the same place unless otherwise provided by the By-laws. And notice of each of such meetings shall be given by the publication thereof in the *Canada Gazette* for four weeks, and by such further means as shall from time to time be directed by the By-laws.

11. Special general meetings of the shareholders may be convened in such manner as shall be provided by the by-laws. And except as hereinafter provided, notice of such meetings shall be given in the same manner as notices of annual general meetings, the purpose for which such meeting is called being mentioned in the notices thereof; and, except as hereinafter provided, all such meetings shall be held at the chief place of business of the Company.

12. If at any time before the first annual meeting of the shareholders of the Company, it should become expedient that a meeting of the directors of the Company, or a special general meeting of the shareholders of the Company, should be held, before such meeting can conveniently be called, and notice thereof given in the manner provided by this Act, or by the by-laws; or before by-laws in that behalf have been passed; and at a place other than at the chief place of business of the Company in Montreal before the enactment of a by-law authorising the holding of such meeting elsewhere; it shall be lawful for the President or for any three of the directors of the Company to call special meetings either of directors or of shareholders, or of both, to be held at the city of London in England, at times and places respectively, to be stated in the notices to be given of such meetings respectively. And notices of such meetings may be validly given by a circular mailed to the ordinary address of each director or shareholder as the case may be, in time to enable him to attend such meeting, stating in general terms the purpose of the intended meeting. And in the case of a meeting of shareholders, the proceedings of such meeting shall be held to be valid and sufficient, and to be binding

on the Company in all respects, if every shareholder of the Company be present thereat in person or by proxy: notwithstanding that notice of such meeting shall not have been given in the manner required by this Act.

13. No shareholder holding shares upon which any call is overdue and unpaid shall vote at any meeting of shareholders. And unless otherwise provided by the by-laws, the person holding the proxy of a shareholder shall be himself a shareholder.

14. No call upon unpaid shares shall be made for more than twenty per centum upon the amount thereof.

RAILWAY AND TELEGRAPH LINE.

15. The Company may lay out, construct, acquire, equip, maintain and work a continuous line of railway, of the gauge of four feet eight and one-half inches; which railway shall extend from the terminus of the Canada Central Railway near Lake Nipissing, known as Callander Station, to Port Moody in the Province of British Columbia; and also, a branch line of railway from some point on the main line of railway to Fort William on Thunder Bay; and also the existing branch line of railway from Selkirk in the Province of Manitoba to Pembina in the said Province; and also other branches to be located by the Company from time to time as provided by the said contract; the said branches to be of the gauge aforesaid; and the said main line of railway, and the said branch lines of railway, shall be commenced and completed as provided by the said contract; and together with such other branch lines as shall be hereafter constructed by the said Company, and any extension of the said main line of railway that shall hereafter be constructed or acquired by the Company, shall constitute the line of railway hereinafter called THE CANADIAN PACIFIC RAILWAY.

16. The Company may construct, maintain and work a continuous telegraph line and telephone lines throughout and along the whole line of the Canadian Pacific Railway, or any part thereof, and may also construct or acquire by purchase, lease or otherwise, any other line or lines of telegraph connecting with the line so to be constructed along the line of the said railway, and may undertake the transmission of messages for the public by any such line or lines of telegraph or telephone, and collect tolls for so doing; or may lease such line or lines of telegraph or telephone, or any portion thereof; and, if they think proper to undertake the transmission of messages for hire, they shall be subject

to the provisions of the fourteenth, fifteenth and sixteenth sections of chapter sixty-seven of the Consolidated Statutes of Canada. And they may use any improvement that may hereafter be invented (subject to the rights of patentees) for telegraphing or telephoning, and any other means of communication that may be deemed expedient by the Company at any time hereafter.

POWERS.

17. "The Consolidated Railway Act, 1879," in so far as the provisions of the same are applicable to the undertaking authorized by this charter, and in so far as they are not inconsistent with or contrary to the provisions hereof, and save and except as hereinafter provided, is hereby incorporated herewith.

18. As respects the said railway, the seventh section of "*The Consolidated Railway Act, 1879*," relating to *Powers*, and the eighth section thereof relating to *Plans and Surveys*, shall be subject to the following provisions:—

a. The Company shall have the right to take, use and hold the beach and land below high water mark, in any stream, lake, navigable water, gulf or sea, in so far as the same shall be vested in the Crown and shall not be required by the Crown; to such extent as shall be required by the Company for its railway and other works, and as shall be exhibited by a map or plan thereof deposited in the office of the Minister of Railways. But the provisions of this sub-section shall not apply to any beach or land lying East of Lake Nipissing except with the approval of the Governor in Council.

b. It shall be sufficient that the map or plan and book of reference for any portion of the line of the railway, not being within any district or county for which there is a Clerk of the Peace, be deposited in the office of the Minister of Railways of Canada, and any omission, mis-statement or erroneous description of any lands therein may be corrected by the Company, with the consent of the Minister and certified by him; and the Company may then make the railway in accordance with such certified correction.

c. The eleventh sub-section of the said eighth section of the Railway Act shall not apply to any portion of the railway passing over ungranted lands of the Crown, or lands not within any surveyed township in any Province; and in such places, deviations not exceeding five miles from the line shown on the map or plan as aforesaid, deposited by the Company, shall be allowed, without any formal correction or certificate; and any further deviation that may be found

expedient may be authorized by order of the Governor in Council, and the Company may then make their railway in accordance with such authorized deviation.

d. The map or plan and book of reference of any part of the main line of the Canadian Pacific Railway made and deposited in accordance with this section, after approval by the Governor in Council, and of any branch of such railway hereafter to be located by the said Company in respect of which the approval of the Governor in Council shall not be necessary, shall avail as if made and deposited as required by the said "*Consolidated Railway Act, 1879*," for all the purposes of the said Act, and of this Act; and any copy of, or extract therefrom, certified by the said Minister or his deputy, shall be received as evidence in any court of law in Canada.

e. It shall be sufficient that a map or profile of any part of the completed railway, which shall not lie within any county or district having a registry office, be filed in the office of the Minister of Railways.

19. It shall be lawful for the Company to take from any public lands adjacent to or near the line of the said railway, all stone, timber, gravel and other materials which may be necessary or useful for the construction of the railway; and also to lay out and appropriate to the use of the Company, a greater extent of lands, whether public or private, for stations, depots, workshops, buildings, side-tracks, wharves, harbors and roadway, and for establishing screens against snow, than the breadth and quantity mentioned in "*The Consolidated Railway Act, 1879*," such greater extent taken, in any case, being allowed by the Government, and shown on the maps or plans deposited with the Minister of Railways.

20. The limit to the reduction of tolls by the Parliament of Canada provided for by the eleventh sub-section of the 17th section of the *Consolidated Railway Act, 1879*, respecting TOLLS, is hereby extended, so that such reduction may be to such an extent that such tolls when reduced shall not produce less than ten per cent. per annum profit on the capital actually expended in the construction of the Railway, instead of not less than fifteen per cent per annum profit, as provided by the said sub-section; and so also that such reduction shall not be made unless the net income of the Company, ascertained as described in said sub-section, shall have exceeded ten per cent. per annum instead of fifteen per cent. per annum as provided by the said sub-section. And the exercise by the Governor in Council of the power of reducing the tolls of the Company as provided by the tenth sub-section of said section seventeen is hereby limited to

the same extent with relation to the profit of the Company, and to its net revenue, as that to which the power of Parliament to reduce tolls is limited by said sub-section eleven as hereby amended.

21. The first and second sub-sections of section 22, of the *Consolidated Railway Act, 1879*, shall not apply to the Canadian Pacific Railway Company; and it is hereby enacted that the transfer of shares in the undertaking shall be made only upon the books of the Company in person or by attorney, and shall not be valid unless so made; and the form and mode of transfer shall be such as shall be from time to time regulated by the By-laws of the Company. And the funds of the Company shall not be used in any advance upon the security of any of the shares or stock of the Company.

22. The third and fourth sub-sections of said section 22 of the *Consolidated Railway Act of 1879* shall be subject to the following provisions, namely, that if before the completion of the Railway and works under the said contract, any transfer should purport to be made of any stock or share in the Company, or any transmission of any share should be effected under the provisions of said sub-section four; to a person not already a shareholder in the Company; and if in the opinion of the Board it should not be expedient that the person (not being already a shareholder) to whom such transfer or transmission shall be made or effected should be accepted as a shareholder; the Directors may by resolution veto such transfer or transmission; and thereafter, and until after the completion of the said Railway and works under the said contract, such person shall not be, or be recognized as a shareholder in the Company; and the original shareholder, or his estate, as the case may be, shall remain subject to all the obligations of a shareholder in the Company, with all the rights conferred upon a shareholder under this Act. But any firm holding paid-up shares in the Company may transfer the whole or any of such shares to any partner in such firm having already an interest as such partner in such shares, without being subject to such veto. And in the event of such veto being exercised, a note shall be taken of the transfer or transmission so vetoed in order that it may be recorded in the books of the Company after the completion of the Railway and works as aforesaid: But until such completion, the transfer or transmission so vetoed shall not confer any rights, nor have any effect of any nature or kind whatever as respects the Company.

23. Sub-section sixteen of section nineteen, relating to PRESIDENT AND DIRECTORS, THEIR ELECTION AND DUTIES; sub-section two of section twenty-four, relating to BY-LAWS,

NOTICES, &c., sub-sections five and six of section twenty-eight, relating to GENERAL PROVISIONS, and section ninety-seven, relating to RAILWAY FUND, of the *Consolidated Railway Act, 1879* shall not, nor shall any of them apply to the Canadian Pacific Railway or to the Company hereby incorporated.

24. The said Company shall afford all reasonable facilities to the Ontario Pacific Junction Railway Company when their railway shall be completed to a point of junction with the Canadian Pacific Railway; and to the Canada Central Railway Company, for the receiving, forwarding and delivering of traffic upon and from the railways of the said Companies, respectively; and for the return of carriages, trucks and other vehicles; and no one of the said Companies shall give or continue any preference or advantage to, or in favor of either of the others, or of any particular description of traffic, in any respect whatsoever; nor shall any one of the said Companies subject any other thereof, or any particular description of traffic, to any prejudice or disadvantage in any respect whatsoever; and any one of said Companies which shall have any terminus or station near any terminus or station of either of the others, shall afford all reasonable facilities for receiving and forwarding all the traffic arriving by either of the others, without any unreasonable delay, and without any preference or advantage, or prejudice or disadvantage; and so that no obstruction may be offered in the using of such railway as a continuous line of communication; and so that all reasonable accommodation may at all times, by the means aforesaid, be mutually afforded by and to the said several railway companies; and the said Canadian Pacific Railway Company shall receive and carry all freight and passenger traffic shipped to or from any point on the railway of either of the said above named railway companies passing over the Canadian Pacific Railway or any part thereof, at the same mileage rate and subject to the same charges for similar services; without granting or allowing any preference or advantage to the traffic coming from or going upon one of such railways over such traffic coming from or going upon the other of them, reserving, however, to the said Canadian Pacific Railway Company the right of making special rates for purchasers of land, or for emigrants or intending emigrants, which special rates shall not govern or affect the rates of passenger traffic as between the said Company and the said two above named Companies or either of them. And any agreement made between any two of the said companies contrary to the foregoing provisions, shall be unlawful, null and void.

25. The Company, under the authority of a special general meeting of the shareholders thereof; and as an extension of

the railway hereby authorized to be constructed; may purchase or acquire by lease or otherwise, and hold and operate, the Canada Central Railway, or may amalgamate therewith, and may purchase or acquire by lease or otherwise and hold and operate a line or lines of railway from the city of Ottawa to any point at navigable water on the Atlantic seaboard or to any intermediate point, or may acquire running powers over any railway now constructed between Ottawa and any such point or intermediate point. And the Company may purchase or acquire any such railway subject to such existing mortgages, charges or liens thereon as shall be agreed upon; and shall possess with regard to any lines of railway so purchased, or acquired, and becoming the property of the Company, the same powers as to the issue of bonds thereon, or on any of them, to an amount not exceeding twenty thousand dollars per mile; and as to the security for such bonds, as are conferred upon the Company by the twenty-seventh section hereof, in respect of bonds to be issued upon the Canadian Pacific Railway. But such issue of bonds shall not affect the right of any holder of mortgages or other charges already existing upon any line of railway so purchased or acquired; and the amount of bonds hereby authorized to be issued upon such line of railway shall be diminished by the amount of such existing mortgages or charges thereon.

26. The Company shall have power and authority to erect and maintain docks, dockyards, wharves, slips and piers at any point on or in connection with the said Canadian Pacific Railway, and at all the termini thereof on navigable water, for the convenience and accommodation of vessels and elevators; and also to acquire, and work elevators, and to acquire, own, hold, charter, work, and run, steam and other vessels for cargo and passengers upon any navigable water, which the Canadian Pacific Railway may reach or connect with.

BY-LAWS.

27. The by-laws of the Company may provide for the remuneration of the president and directors of the Company, and of any executive committee of such directors; and for the transfer of stock and shares; the registration and inscription of stock, shares, and bonds, and the transfer of registered bonds; and the payment of dividends and interest; at any place or places within or beyond the limits of Canada; and for all other matters required by the said contract or by this Act to be regulated by by-laws. But the by-laws of the Company made as provided by law shall in no case have any force or effect after the next general meeting of share-

holders, which shall be held after the passage of such by-laws, unless they are approved by such meeting.

BONDS.

28. The Company, under the authority of a special general meeting of the shareholders called for the purpose, may issue mortgage bonds to the extent of ten thousand dollars per mile of the Canadian Pacific Railway for the purposes of the undertaking authorized by the present Act; which issue shall constitute a first mortgage and privilege upon the said railway, constructed or acquired, and to be thereafter constructed, or acquired, and upon its property, real and personal, acquired and to be thereafter acquired including rolling stock, and plant; and upon its tolls and revenues (after deduction from such tolls and revenues of working expenses); and upon the franchises of the Company; the whole as shall be declared and described as so mortgaged in any deed of mortgage as hereinafter provided. Provided always, however, that if the Company shall have issued, or shall intend to issue land grant bonds under the provisions of the thirtieth section hereof, the lands granted and to be granted by the Government to the Company may be excluded from the operation of such mortgage and privilege: and provided also that such mortgage and privilege shall not attach upon any property which the Company are hereby, or by the said contract, authorized to acquire or receive from the Government of Canada until the same shall have been conveyed by the Government to the Company; but shall attach upon such property, if so declared in such deed, as soon as the same shall be conveyed to the Company. And such mortgage and privilege may be evidenced by a deed or deeds of mortgage executed by the Company, with the authority of its shareholders expressed by a resolution passed at such special general meeting; and any such deed may contain such description of the property mortgaged by such deed, and such conditions respecting the payment of the bonds secured thereby and of the interest thereon, and the remedies which shall be enjoyed by the holders of such bonds or by any trustee or trustees for them in default of such payment; and the enforcement of such remedies; and may provide for such forfeitures and penalties, in default of such payment; as may be approved by such meeting; and may also contain, with the approval aforesaid, authority to the trustee or trustees, upon such default, as one of such remedies, to take possession of the railway and property mortgaged, and to hold and run the same for the benefit of the bondholders thereof for a time to be limited by such deed; or to sell the said railway and property, after such delay, and upon such terms

and conditions as may be stated in such deed ; and with like approval any such deed may contain provisions to the effect that upon such default and upon such other conditions as shall be described in such deed, the right of voting possessed by the shareholders of the Company, and by the holders of preferred stock therein, or by either of them, shall cease and determine, and shall thereafter appertain to the Bondholders, or to them and to the holders of the whole or of any part of the preferred stock of the Company, as shall be declared by such deed ; and such deed may also provide for the conditional or absolute cancellation after such sale of any or all of the shares so deprived of voting power ; or of any or all of the preferred stock of the company, or both ; and may also, either directly by its terms, or indirectly by reference to the By-laws of the Company, provide for the mode of enforcing and exercising the powers and authority to be conferred and defined by such deed, under the provisions hereof. And such deed, and the provisions thereof made under the authority hereof ; and such other provisions thereof as shall purport (with like approval) to grant such further and other powers and privileges to such trustee or trustees and to such bondholders, as are not contrary to law or to the provisions of this Act, shall be valid and binding. But if any change in the ownership or possession of the said Railway and property shall at any time take place under the provisions hereof, or of any such deed, or in any other manner, the said Railway and property shall continue to be held and operated under the provisions hereof, and of the Consolidated Railway Act of 1879 as hereby modified. And if the Company does not avail itself of the power of issuing bonds secured upon the land grant alone as hereinafter provided, the issue of bonds hereby authorized may be increased to any amount not exceeding twenty thousand dollars per mile of the said Canadian Pacific Railway.

29. If any bond issue be made by the Company under the last preceding section before the said railway is completed according to the said Contract, a proportion of the proceeds of such bonds, or a proportion of such bonds if they be not sold, corresponding to the proportion of the work contracted for then remaining incomplete, shall be received by the Government, and shall be held, dealt with and, from time to time, paid over by the Government to the Company upon the same conditions, in the same manner and according to the same proportions as the proceeds of the bonds, the issue of which is contemplated by sub-section d. of Clause 9 of the said Contract, and by the thirty-first section hereof.

30. The Company may also issue mortgage bonds to the extent of twenty-five million dollars upon the lands granted

in aid of the said railway and of the undertaking authorized by this Act; such issue to be made only upon similar authority to that required by this Act for the issue of bonds upon the railway; and when so made such bonds shall constitute a first mortgage upon such lands, and shall attach upon them when they shall be granted, if they are not actually granted at the time of the issue of such bonds. And such mortgage may be evidenced by a deed or deeds of mortgage to be executed under like authority to the deed securing the issue of bonds on the railway; and such deed or deeds under like authority may contain similar conditions and may confer upon the trustee or trustees named thereunder and upon the holders of the bonds secured thereby, remedies, authority, power and privileges and may provide for forfeitures and penalties, similar to those which may be inserted and provided for under the provisions of this Act in any deed securing the issue of bonds on the railway, together with such other provisions and conditions not inconsistent with law or with this Act as shall be so authorized. And such bonds may be styled Land Grant Bonds, and they and the proceeds thereof shall be dealt with in the manner provided in the said contract.

31. The Company may in the place and stead of the said land grant bonds, issue bonds under the twenty-eighth section hereof, to such amount as they shall agree with the Government to issue, with the interest guaranteed by the Government as provided for in the said contract; such bonds to constitute a mortgage upon the property of the Company and its franchises acquired and to be thereafter acquired—including the main line of the Canadian Pacific Railway, and the branches thereof hereinbefore described, with the plant and rolling stock thereof acquired and to be thereafter acquired, but exclusive of such other branches thereof and of such personal property as shall be excluded by the deed of mortgage to be executed as security for such issue. And the provisions of the said twenty-eighth section shall apply to such issue of bonds, and to the security which may be given for the payment thereof, and they and the proceeds thereof shall be dealt with as hereby and by the said contract provided.

32. It shall not be necessary to affix the seal of the Company to any mortgage bond issued under the authority of this Act; and every such bond issued without such seal shall have the same force and effect; and be held treated and dealt with by all courts of law and of equity: as if it were sealed with the seal of the company. And if it is provided by the mortgage deed executed to secure the issue of any bonds, that any of the signatures to such bonds or to the coupons

thereto appended; may be engraved, stamped or lithographed thereon; such engraved, stamped or lithographed signatures shall be valid and binding on the Company.

33. The phrase "working expenses" shall mean and include all expenses of maintenance of the railway, and of the stations, buildings, works and conveniencies belonging thereto, and of the rolling and other stock and moveable plant used in the working thereof, and also all such tolls, rents or annual sums as may be paid in respect of the hire of engines, carriages or waggons let to the Company; also, all rent, charges, or interest on the purchase money of lands belonging to the Company, purchased but not paid for, or not fully paid for; and also all expenses of and incidental to, working the railway and the traffic thereon, including stores and consumable articles; also rates, taxes, insurance and compensation for accidents or losses; also all salaries and wages of persons employed in and about the working of the railway and traffic, and all office and management expenses, including directors' fees, agency, legal and other like expenses.

34. The bonds authorized by this Act to be issued upon the railway or upon the lands to be granted to the Company, or both, may be so issued in whole or in part in the denomination of dollars, pounds sterling, or francs, or in any or all of them, and the coupons may be for payment in denominations similar to those of the bond to which they are attached. And the whole or any of such bonds, may be pledged negotiated or sold upon such conditions and at such price as the Board of Directors shall from time to time determine. And provision may be made by the By-laws of the Company, that after the issue of any bond, the same may be surrendered to the Company by the holder thereof, and the Company may, in exchange therefor, issue to such holder inscribed stock of the Company, which inscribed stock may be registered or inscribed at the chief place of business of the Company or elsewhere, in such manner, with such rights, liens, privileges and preferences; at such place; and upon such conditions; as shall be provided by the By-laws of the Company.

35. It shall not be necessary, in order to preserve the priority, lien, charge, mortgage or privilege, purporting to appertain to or be created by any bond issued or mortgage deed executed under the provisions of this Act, that such bond or deed should be enregistered in any manner, or in any place whatever. But every such mortgage deed shall be deposited in the office of the Secretary of State: of

which deposit notice shall be given in the *Canada Gazette*. And in like manner any agreement entered into by the Company, under section thirty-four of this Act, shall also be deposited in the said office. And a copy of any such mortgage deed, or agreement, certified to be a true copy by the Secretary of State or his Deputy, shall be received as *prima facie* evidence of the original in all courts of justice, without proof of the signatures or seal upon such original.

26. If, at any time, any agreement be made by the Company with any persons intending to become bondholders of the Company; or be contained in any mortgage deed executed under the authority of this Act; restricting the issue of bonds by the Company, under the powers conferred by this Act; or defining or limiting the mode of exercising such powers; the Company, after the deposit thereof with the Secretary of State as hereinbefore provided, shall not act upon such powers otherwise than as defined, restricted and limited by such agreement. And no bond thereafter issued by the Company, and no order, resolution or proceeding thereafter made, passed or had by the Company, or by the board of directors, contrary to the terms of such agreement, shall be valid or effectual.

37. The Company may, from time to time, issue guaranteed or preferred stock at such price, to such amount, not exceeding ten thousand dollars per mile, and upon such conditions as to the preferences and privileges appertaining thereto, or to different issues or classes thereof, and otherwise, as shall be authorized by the majority in value of the shareholders present in person or represented by proxy at any annual meeting or at any special general meeting thereof called for the purpose,--notice of the intention to propose such issue at such meeting being given in the notice calling such meeting. But the guarantee or preference accorded to such stock shall not interfere with the lien, mortgage and privilege attaching to bonds issued under the authority of this Act. And the holders of such preferred stock shall have such power of voting at meetings of shareholders, as shall be conferred upon them by the By-laws of the Company.

EXECUTION OF AGREEMENTS.

38. Every contract, agreement, engagement, scrip certificate or bargain made, and every bill of exchange drawn, accepted or endorsed, and every promissory note and cheque made, drawn or endorsed on behalf of the Company, by any agent, officer or servant of the Company, in general accordance with his powers as such under the by-laws of the Company,

shall be binding upon the Company ; and in no case shall it be necessary to have the seal of the Company affixed to any such bill, note, cheque, contract, agreement, engagement, bargain, or scrip certificate, or to prove that the same was made, drawn, accepted or endorsed, as the case may be, in pursuance of any by-law or special vote or order ; nor shall the party so acting as agent, officer or servant of the Company be subjected individually to any liability, whatsoever, to any third party therefor ; Provided always, that nothing in this Act shall be construed to authorize the Company to issue any note payable to the bearer thereof, or any promissory note intended to be circulated as money, or as the note of a bank, or to engage in the business of banking or insurance.

GENERAL PROVISIONS

39. The Company shall, from time to time, furnish such reports of the progress of the work, with such details and plans of the work, as the Government may require.

40. As respects places not within any Province, any notice required by the Consolidated Railway Act, 1879, to be given in the "Official Gazette" of a Province, may be given in the *Canada Gazette*.

41. Deeds and conveyances of lands to the Company for the purposes of this Act, (not being letters patent from the Crown) may, in so far as circumstances will admit, be in the form following, that is to say :--

"Know all men by these presents, that I, A. VOTES AND PROCEEDINGS, HOUSE OF COMMONS.

OTTAWA, WEDNESDAY, 15TH DECEMBER, 1880.

The Petition of Messrs. *Cassils, Stevenson & Co.*, and others, Bankers, Merchants, Manufacturers, and others, was received and read; praying that any Bill presented to Parliament having for its object the equitable distribution of the estates of *Insolvent Debtors*, may become Law.

Mr. Speaker informed The House, that he had received from the Returning Officer for the Electoral District of Joliette, a Certificate that *Louis Arthur McConville*, Esq., had received the majority of votes, and declaring him elected for the said Electoral District.

Louis Arthur McConville, Esq., Member for the Electoral District of Joliette, having previously taken the Oath according to Law, and subscribed the Roll containing the same, took his seat in The House.

On motion of Mr. *Langevin*, it was *Resolved*, That in admitting *Louis Arthur McConville*, Esq., elected to represent the Electoral District of Joliette, to take his seat upon the Certificate of the Returning Officer, this House still recommends a strict adherence to the practice of requiring the production of the usual Certificate of the Clerk of the Crown in Chancery of the Return to the Writ of Election.

On motion of Mr. *Langevin*, Mr. *McConville* was added to the Select Standing Committee on *Privileges and Elections*,—and to that on *Miscellaneous Private Bills*.

Mr. *Vanasse* introduced a Bill No. 2 to regulate the floating of cord-wood on the River *St. Francis*; which was read the first time, and ordered for a second reading, to-morrow.

A Message was received from the Senate, acquainting this House that they have appointed the Hon. On motion of Mr. *Landry*, an Order of The House was issued,—for copies of the Report of the Survey made in 1880, by order of the Government, with a view to the construction of a Branch of the Intercolonial Railway to lead by way of *St. Michel* or *St. Charles* to the terminus at *St. Joseph de Levis* or the neighborhood thereof; and of all plans, maps, petitions and documents in relation thereto.

And also,—an Order of The House,—for a Statement shewing, in separate and distinct columns, the names of the several Dominion Surveyors employed between the year 1873 and the 15th December, 1880, on Surveys of Public Lands elsewhere than in their respective Provinces; their ages, origin, nationality and residence (locality, County and Province); the number of days, months or years they were so employed; the amount of their salaries, or of the sums received by them, or due them up to this date; the names of the Provinces in which such surveys were made, together with a summary shewing, by Provinces and nationalities, the number of Surveyors now working in British Columbia, Manitoba and the North-West.

Mr. *Casgrain* moved, that it be *Resolved*,—That there be printed in the French language 3,250 copies of the Pacific Railway contract now laid before this House ;— and that 50 copies be given to each Member from the Province of Quebec for immediate distribution throughout his Constituency.

And a Debate arising thereon,—the said motion was, with leave of The House, withdrawn.

Mr. *Blake* moved, that an Address be voted to His Excellency the Governor General for a copy of any paper evidencing the Contract or Agreement which was entered into with certain Contractors for the construction and working of the Canadian Pacific Railway last Summer, during the visit to England of the First Minister, the Minister of Railways and the Minister of Agriculture,—which was negatived on the following Division :—

an Act empowering them to extend their operations throughout the Dominion,—and of *C. J. Brydges*, and others; for an amendment to their Act of incorporation, empowering them to construct and operate a Toll Bridge across the Red River, at the City of Winnipeg.

The time for receiving Petitions for Private Bills will expire *to-morrow*. The Committee recommend that the same be further extended to *Tuesday*, the 1st *February*, *next*.

On motion of *Mr. Drew*, the time for receiving Petitions for Private Bills, was further extended to *Tuesday*, the 1st *February*, *next*.

The following Bills were severally introduced, read the first time, and ordered for a second reading, on *Monday next*, *viz* :—

By *Mr. Kirkpatrick* :—Bill No. 24 respecting the Berlin and Galt branch of the Grand Trunk Railway of Canada.

By *Mr. Williams* :—Bill No. 25 respecting the Ontario and Pacific Junction Railway Company.

Sir John A. Macdonald moved, that from this day the motion for concurrence in the Resolutions reported from the Committee of the whole House, relating to the Canadian Pacific Railway, shall have precedence every day, next after Routine Proceedings;—which was agreed to, on a division.

The Resolutions adopted in Committee of the Whole, on the 12th instant, granting certain moneys and lands for the construction of the Canadian Pacific Railway, were reported, and are as follows :—

1. *Resolved*. That it is expedient to grant and appropriate Twenty-five millions of dollars according to the terms of the contract relating to the Canadian Pacific Railway transmitted to this House by His Excellency the Governor General, by his Message dated December 10th, last.

2. *Resolved*. That it is expedient to grant and appropriate Twenty-five millions of acres of land in the North-West Territory, according to the terms of the said Contract, so transmitted as aforesaid.

Sir Charles Tupper moved, that the said Resolutions be now read a second time.

Mr. Robertson (Shelburne) moved in amendment, that it be *Resolved*, — “ That in view of the fact that another offer for the construction and working of the Canadian Pacific Railway has been received by the Government, and in order that the Government may lay the said offer on the Table, the Debate be adjourned.”

And a Debate arising thereon,—and The House having continued to sit after 12 of the clock, midnight;

SATURDAY, 15TH JANUARY, 1881.

And the Debate still continued;—*Mr. Stephenson* moved, that the said Debate be adjourned.

And a point of Order being raised, that the last motion was irregular, inasmuch as it was the same in effect as that previously made by the Hon. Member for Shelburne,

Mr. Speaker decided as follows :—

“ The motion for the adjournment of the Debate should be pure and simple, but the motion made by the Hon. Member for Shelburne is an amendment not coming within the parliamentary meaning of the first mentioned motion, inasmuch as it

“ contains a preamble. I am of opinion that the amendment of the Hon. Member is
“ in reality out of Order, since it contains a recital of reasons for the adjournment of
“ the Debate. As in the motion for the adjournment of the Debate no preamble can
“ be allowed, so to the motion for the adjournment of The House, no amendment can
“ be made, except as to the time of the adjournment. Under these circumstances I
“ feel called upon to decide that the amendment proposed by the Hon. Member for
“ Shelburne is irregular and cannot be put.”

And the question being then put, on Mr. *Stephenson's* motion for the adjournment of the Debate;—it was agreed to.

The House then adjourned at 20 minutes after 2 o'clock A.M., *until Monday next.*

JOSEPH GODÉRIC BLANCHET,

VOTES AND PROCEEDINGS, HOUSE OF COMMONS.

 OTTAWA, TUESDAY, 18TH JANUARY, 1881.

PRAYERS.

Thirty-nine Petitions were brought up, and laid on the Table.

Sir *Charles Tupper* laid before The House,—Annual Report of the Minister of Railways and Canals for the fiscal year 1st July, 1879, to the 30th June, 1880, on the works under his control, submitted in accordance with the provisions of the Act 31 *Victoria*, Chapter 12, Section 19, as amended by the Act 42 *Victoria*, Chapter 7.

He also presented,—Return to Address to His Excellency the Governor General of the 16th ult.; for copies of any correspondence with the Government of British Columbia, or with any persons in that Province, respecting the Island Railway.

Mr. *Drew*, from the Select Standing Committee on *Standing Orders*, presented the Tenth Report of the said Committee, which is as follows:—

The Committee have examined the notices given on the following Petitions, and find them sufficient, *viz* :—of *P. W. Dorion*, and others, of Montreal; for an Act of incorporation under the name of the Silver Plume Mining Company;—of the Canada Consolidated Gold Mining Company; for the passing of an Act, to ratify the powers conferred upon them by the laws of the State of New York, and to give them similar powers in Canada;—of *James G. Ross*, of the City of Quebec, and others; for an Act of incorporation under the name of the Dominion Salvage and Wrecking Company (Limited); and of *M. H. Cochrane*, and others, for an Act of incorporation under the name of the *Crédit Foncier of the Dominion of Canada*;

On the Petition of *Peter Johnson Brown*, of the City of Winnipeg, and others; for an Act of incorporation under the name of the Great North Western Railway Company, the Committee find that, no mention is made for the building and running of Steam and other vessels, they therefore recommend that the notice be deemed sufficient, for a Railway only.

The following Bills were severally introduced, read the first time, and ordered for a second reading, *to-morrow, viz* :—

By Mr. *Girouard* (*Jacques Cartier*):—Bill No. 31 to enlarge and extend the powers of the *Crédit Foncier Franco Canadien*.

By Mr. Ives :—Bill No. 32 to incorporate the *Crédit Foncier* of the Dominion of Canada.

The House resumed the adjourned Debate on Sir *Charles Tupper's* proposed motion, that the Resolutions adopted in Committee of the Whole on the 12th instant, granting certain moneys and lands for the construction of the Canadian Pacific Railway, be now read a second time.

Mr. *Blake* moved in amendment thereto, that the said Resolutions be not now read a second time, but that it be *Resolved*,—

That the late Government invited tenders for the construction and working of the Canadian Pacific Railway, under the Act of 1874.

That no tenders were received in answer to those invitations.

That the policy of the present Government approved by this House in the Session of 1879 was to obtain Imperial aid towards the work.

That the policy of the present Government approved by this House in the Session of 1880 was to construct the Railway as a Government work.

That it appears that during the recess the Government determined to attempt to make a Contract for the construction and working of the Railway on wholly new conditions.

That the Canadian Pacific Railway Act provides that the works on any section or sub-section of the Railway shall not be given out to any Contractor except after tenders shall have been obtained therefor.

That the Government did not invite tenders on the basis of the said new conditions or at all.

That such new conditions were not made known by the Government at any time prior to the making of the Contract nor until the night of the 10th of December last, when the Contract was laid on the Table.

That the said new conditions not authorized or contemplated by the Canadian Pacific Railway Act are of the most vital importance and amongst the same are the following:—

1. By the Act no power is given to the Government to agree with the Contractors to construct for the benefit of the Contractors sections of the work to be handed over to the Contractors.

By the Contract the Government binds itself to complete the unfinished sections, to begin and finish the heaviest section now unlet and to hand over to the Contractors for their own benefit the works, including those now in operation, and comprising over 700 miles of Railway, of which the Pembina Branch alone is yielding nearly \$70,000 a year net revenue.

2. By the Act the cash expenditure of the Government, as principal money to be paid to the Contractors, is to be \$10,000 a mile, or about \$27,000,000 for the whole line; apart from the cost of surveys which might or might not form part thereof.

By the Contract the cash expenditure of the Government, as principal money of which the Contractors receive the benefit, is to be in cash and works to be handed over to the Contractors, at least \$53,000,000, apart from the cost of surveys which do not form part thereof.

3. By the Act the land grant is to be taken so far as obtainable along or in the immediate vicinity of the whole line of Railway to the Pacific Ocean, and is to be of fair average quality, thus embracing a large proportion of land not fit for settlement.

By the Contract the land is all to be taken in the North-West Territories, between Selkirk and Jasper, and is not to include any land not fairly fit for settlement.

4. By the Act the land not to be found near the Railway is to be appropriated at other places, to be determined by the Government.

By the Contract the Contractors are given large powers of selection of the land.

5. By the Act the Government is to have control of the sales of two-thirds of the land grant.

By the Contract this power is taken away.

By the Act the subsidy and land grant are to be payable in proportion to the value of the work done as compared with the estimated value of the whole work contracted for.

By the Contract the subsidy and land grant are to be payable in amounts wholly disproportionate on the prairie section, which is the easiest and most profitable and is intended to be earliest completed.

7. Under the Act the property and Capital Stock of the Company remain liable to Dominion, Provincial and Municipal taxation.

By the Contract such property and Capital Stock are perpetually exempted from taxation by the Dominion, new Provinces or Municipalities therein.

8. Under the Act the land grant of the Company remains subject to taxation.

By the Contract the land grant is exempted from the Dominion, Provincial, and Municipal taxation before mentioned until sold or occupied for twenty years from the date of the grant.

9. Under the Act all the materials required by the Contractors remain subject to import duties.

By the Contract a large part of such materials is exempted from import duties.

10. Under the Act Parliament and any new Provinces are in no wise hindered from authorizing the construction of other Railways as the public interest may require.

By the Contract it is agreed that Parliament and any new Provinces shall not for twenty years authorize the construction of any Railways running in certain directions which might interfere with the Canadian Pacific Railway.

11. By the Act, the Government has unrestricted power to regulate from time to time the tariff of tolls.

By the Contract, the power of the Government to reduce an established tariff is limited to the case in which the Company is making a net revenue exceeding 10 per cent. on the capital invested in the construction of the Railway.

12. Under the Act the Government would have power to prescribe from time to time the accommodation and the trains to be provided by the Company.

By the Contract such power is not given to the Government.

13. Under the Act the Government would have power to acquire the Railway at any time the public interest might demand.

By the Contract the Government has no such power.

14. By the Act the grades of the Railway and the materials and manner of construction and the mode of working, including the description and capacity of the rolling stock are to be such as may be determined by the Governor in Council; and it was formerly the declared policy of Governments and Parliament that the grades should be very low.

By the Contract the Union Pacific Railway as first constructed is fixed as the approximate standard; and its grades are very high.

15. By the Act no power is given to the Company to build branch railways, save one to Georgian Bay and one to Pembina.

By the Contract power is given to the Company forever to build branch lines in various parts of the Dominion.

16. By the Contract divers other important privileges and powers are given to the Company not authorized or contemplated by the Act.

That such new conditions wholly alter the basis for tendering.

That no opportunity was given to Canadian capitalists or to the public to tender for the work on the basis of any of such new conditions.

That by the Canadian Pacific Railway Act it is provided that no Contract made under the authority of that Act for the construction of any portion of the main line of the Railway shall be binding until it shall have been laid before the House of Commons

for one month without being disapproved, unless sooner approved by a resolution of the House.

That the Contract now on the Table does not come within the provisions of the said Act; and is of no force unless legalized by Parliament.

That the said Contract expressly provides that the same shall be binding only in the event of an Act of incorporation being granted to the projected Company as set out in Schedule A to the Contract.

That Parliament is free to reject such a Bill.

That it is now proposed that Parliament shall legalize the Contract.

That this House is under no obligation to do so, and it is its duty to refuse to do so, unless satisfied that the public interest requires such a step.

That the conditions of the Contract are extremely onerous and disadvantageous to the country.

That it now appears that terms much more favorable to the country can be obtained.

That on the 14th day of January instant, only five weeks after the said new conditions were made public, an offer, which is now on the Table, was made to the Government by Canadian capitalists of high standing and ample means, credit, and business ability, comprising, Sir *W. P. Howland*, *H. H. Cook*, *A. R. McMaster*, *Wm. Hendrie*, *John Stuart*, *John Proctor*, *P. S. Stephenson*, *John Walker*, *D. Macfie*, *Peleg Howland*, *A. T. Wood*, *Allan Gilmour*, *J. Carruthers*, *K. Chisholm*, *A. W. Ross*, *Geo. A. Cox*, *P. Larkin*, *W. D. Lovitt*, *Barnett & McKay*, *James McLaren*, and *Alexander Gibson*, to complete those parts of the Railway to be built by the Contractors, and to equip and maintain and work the whole Railway from Lake Nipissing to the Pacific Ocean, and to perform all the obligations undertaken by the Contractors on terms far less onerous to the country, in the following respects:—

1. The Contract provides for a cash subsidy of \$25,000,000, and a land grant of 25,000,000 acres.

The offer proposes to accept \$22,000,000 and 22,000,000 acres, making a saving of \$3,000,000 in cash, and 3,000,000 acres, equal, at the Government estimate of \$3.18 per acre to \$9,540,000, or a total saving of \$12,540,000 on this head.

2. The Contract provides as a Standard the Union Pacific Railway as first constructed.

The offer proposes that Railway as in 1873.

3. The Contract provides for the giving of \$9,000,000 and 11,250,000 acres for the prairie 900 miles.

The offer proposes to accept \$6,600,000 cash and 9,000,000 acres for the same work, making a saving on that part of \$2,400,000 and 2,250,000 acres, or a total saving on that part, at the Government estimate, of \$9,555,000.

4. The Contract provides for the giving of \$6,000,000 cash and 7,500,000 acres for the Western four hundred and fifty miles to Kamloops.

The offer proposes to accept \$5,400,000 cash and 6,750,000 acres for the same work, making a saving on that part, of \$600,000 cash and 750,000 acres, on a total saving on that part, at the Government estimate, of \$2,985,000.

5. The Contract provides that the Government shall permit the admission free of duty of all steel rails, fish-plates and other fastenings, spikes, bolts and nails, wire, timber, and all material for bridges to be used in the original construction of the railway, and of a telegraph line in connection therewith and all the telegraphic apparatus required for the first equipment of such telegraph line.

The offer proposes to undertake the obligations without any exemptions from duty thus affecting a further large gain to the country.

6. The Contract provides that for twenty years from the date thereof, no line of Railway shall be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway from any point, at or near the Canadian Pacific Railway,

except such line as shall run south-west or to the westward of south-west; nor to within fifteen miles of latitude 49; and that in the establishment of any new Province in the North-West Territories provision shall be made for continuing such prohibition after such establishment until the expiration of the said period.

The offer proposes to undertake the obligations without any such restrictions, thus preventing the creation of the Legislative monopoly in favor of the Company, provided by the Contract and preserving to Parliament and the new Provinces unfettered by the Contract their freedom to charter Railways and to create competitive routes as the public interest may require, and by this means blotting out one of the most objectionable features of the Contract.

7. The Contract provides that the Canadian Pacific Railway and all stations and station grounds, workshops, buildings, yards, and other property, rolling stock and appurtenances, required and used for the construction and working thereof, and the capital stock of the Company, shall be forever free from taxation by the Dominion or by any Province hereafter to be established or by any municipal corporation therein.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain.

8. The contract provides, that the lands of the Company in the North-West Territories until they are either sold or occupied, shall also be free from such taxation for twenty years after the grant from the Crown.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain, and removing a most serious hindrance to the development of the North-West.

9. The Contract contains no provision giving to the Government power to acquire the Railway.

The offer proposes that the Government shall be entitled at any time after completion to acquire the Railway on terms to be settled by agreement or arbitration, thus enabling the Government, in case the public interest shall be found at any time to demand that step, to acquire the Railway with a view to its being dealt with as those interests may then require.

10. The Contract provides for the passing of an Act which would limit the power of the Governor-in-Council to reduce tolls once established to the case in which the Company's net profit shall exceed 10 per cent. on the capital invested in the construction of the Railway.

The offer proposes that there shall be no such limitation, and that the provisions of the General Railway Act shall apply, giving the Governor-in-Council unrestricted power to regulate established tolls from time to time as the public interests may require.

11. The Contract makes no provision for the allotment of stock in the Company in the several Provinces.

The offer proposes that the Act to be passed shall provide for the opening of stock books in the principal cities of each Province with a view to such allotment.

That the said offer besides its proposal for the whole line, contains certain alternative proposals in case the Government should desire to withdraw from or postpone the construction of certain parts of the line by the Contractors. That the conditions of those alternative proposals are not such as should be accepted, but the refusal to accept the same leaves untouched the offer for the whole line which stands independent of the said alternatives.

That it appears that the said tenderers have deposited in chartered Banks of Canada over \$1,400,000, which is held by such banks as security that if the tender is accepted and the charter granted, the million of dollars to be deposited with the Government as security for construction will be deposited as proposed by the tender.

That it is not in the public interest that the Contract according to the terms of which the \$25,000,000 and 25,000,000 acres are proposed to be granted should be legalized.

And a Debate arising thereon,—and The House having continued to sit after 12 of the clock, midnight ;

WEDNESDAY, 19TH JANUARY, 1881.

And the Debate continuing,—the said Debate was, on motion of Mr. *Kirkpatrick*, adjourned.

The House then adjourned at 20 minutes to 2 o'clock A.M.

Speaker.

A Message was received from the Senate with the following Bill No. 33 of their own, intitled: "An Act to amend the law respecting Documentary Evidence in certain cases," to which the concurrence of this House was desired.

On motion of *Mr. McDonald* (Pictou), the said Bill was read the first time, and ordered for a second reading, *to-morrow*.

Mr. Bowell presented,—Return to an Address to His Excellency the Governor General of the 22nd ult.; praying him to cause to be laid before this House copies of all correspondence between *Sir Edward Thornton*, British Ambassador at Washington and the Secretary of State for the United States, relative to wrecking and towing in Inland waters which has been forwarded to the Dominion Government, and copies of all other official correspondence, and of all Orders in Council of the Dominion Government relating to the same subject.

The House resumed the adjourned Debate on *Sir Charles Tupper's* proposed motion, that the Resolutions adopted in Committee of the Whole on the 12th instant, granting certain moneys and lands for the construction of the Canadian Pacific Railway, be now read the second time,—and of *Mr. Blake's* motion in amendment thereto,—and which motion was:—That the said Resolutions be not now read a second time, but that it be *Resolved*,—That the late Government invited tenders for the construction and working of the Canadian Pacific Railway, under the Act of 1874.

That no tenders were received in answer to those invitations.

That the policy of the present Government approved by this House in the Session of 1879 was to obtain Imperial aid towards the work.

That the policy of the present Government approved by this House in the Session of 1880 was to construct the Railway as a Government work.

That it appears that during the recess the Government determined to attempt to make a Contract for the construction and working of the Railway on wholly new conditions.

That the Canadian Pacific Railway Act provides that the works on any section or sub-section of the Railway shall not be given out to any Contractor except after tenders shall have been obtained therefor.

That the Government did not invite tenders on the basis of the said new conditions or at all.

That such new conditions were not made known by the Government at any time prior to the making of the Contract nor until the night of the 10th of December last, when the Contract was laid on the Table.

That the said new conditions not authorized or contemplated by the Canadian Pacific Railway Act are of the most vital importance and amongst the same are the following:—

1. By the Act no power is given to the Government to agree with the Contractors to construct for the benefit of the Contractors sections of the work to be handed over to the Contractors.

By the Contract the Government binds itself to complete the unfinished sections, to begin and finish the heaviest section now unlet and to hand over to the Contractors for their own benefit the works, including those now in operation, and comprising over 700 miles of Railway, of which the Pembina Branch alone is yielding nearly \$70,000 a year net revenue.

2. By the Act the cash expenditure of the Government, as principal money to be paid to the Contractors, is to be \$10,000 a mile, or about \$27,000,000 for the whole line; apart from the cost of surveys which might or might not form part thereof.

By the Contract the cash expenditure of the Government, as principal money of which the Contractors receive the benefit, is to be in cash and works to be handed over to the Contractors, at least \$53,000,000, apart from the cost of surveys which do not form part thereof.

3. By the Act the land grant is to be taken so far as obtainable along or in the immediate vicinity of the whole line of Railway to the Pacific Ocean, and is to be of fair average quality, thus embracing a large proportion of land not fit for settlement.

By the Contract the land is all to be taken in the North-West Territories, between Selkirk and Jasper, and is not to include any land not fairly fit for settlement.

4. By the Act the land not to be found near the Railway is to be appropriated at other places, to be determined by the Government.

By the Contract the Contractors are given large powers of selection of the land.

5. By the Act the Government is to have control of the sales of two-thirds of the land grant.

By the Contract this power is taken away.

6. By the Act the subsidy and land grant are to be payable in proportion to the value of the work done as compared with the estimated value of the whole work contracted for.

By the Contract the subsidy and land grant are to be payable in amounts wholly disproportionate on the prairie section, which is the easiest and most profitable and is intended to be earliest completed.

7. Under the Act the property and Capital Stock of the Company remain liable to Dominion, Provincial and Municipal taxation.

By the Contract such property and Capital Stock are perpetually exempted from taxation by the Dominion, new Provinces or Municipalities therein.

8. Under the Act the land grant of the Company remains subject to taxation.

By the Contract the land grant is exempted from the Dominion, Provincial, and Municipal taxation before mentioned until sold or occupied for twenty years from the date of the grant.

9. Under the Act all the materials required by the Contractors remain subject to import duties.

By the Contract a large part of such materials is exempted from import duties.

10. Under the Act Parliament and any new Provinces are in no wise hindered from authorizing the construction of other Railways as the public interest may require.

By the Contract it is agreed that Parliament and any new Provinces shall not for twenty years authorize the construction of any Railways running in certain directions which might interfere with the Canadian Pacific Railway.

11. By the Act, the Government has unrestricted power to regulate from time to time the tariff of tolls.

By the Contract, the power of the Government to reduce an established tariff is limited to the case in which the Company is making a net revenue exceeding 10 per cent. on the capital invested in the construction of the Railway.

12. Under the Act the Government would have power to prescribe from time to time the accommodation and the trains to be provided by the Company.

By the Contract such power is not given to the Government.

13. Under the Act the Government would have power to acquire the Railway at any time the public interest might demand.

By the Contract the Government has no such power.

14. By the Act the grades of the Railway and the materials and manner of construction and the mode of working, including the description and capacity of the rolling stock are to be such as may be determined by the Governor in Council; and

it was formerly the declared policy of Governments and Parliament that the grades should be very low.

By the Contract the Union Pacific Railway as first constructed is fixed as the approximate standard; and its grades are very high.

15. By the Act no power is given to the Company to build branch railways, save one to Georgian Bay and one to Pembina.

By the Contract power is given to the Company forever to build branch lines in various parts of the Dominion.

16. By the Contract divers other important privileges and powers are given to the Company not authorized or contemplated by the Act.

That such new conditions wholly alter the basis for tendering.

That no opportunity was given to Canadian capitalists or to the public to tender for the work on the basis of any of such new conditions.

That by the Canadian Pacific Railway Act it is provided that no Contract made under the authority of that Act for the construction of any portion of the main line of the Railway shall be binding until it shall have been laid before the House of Commons for one month without being disapproved, unless sooner approved by a resolution of the House.

That the Contract now on the Table does not come within the provisions of the said Act; and is of no force unless legalized by Parliament.

That the said Contract expressly provides that the same shall be binding only in the event of an Act of incorporation being granted to the projected Company as set out in Schedule A to the Contract.

That Parliament is free to reject such a Bill.

That it is now proposed that Parliament shall legalize the Contract.

That this House is under no obligation to do so, and it is its duty to refuse to do so, unless satisfied that the public interest requires such a step.

That the conditions of the Contract are extremely onerous and disadvantageous to the country.

That it now appears that terms much more favorable to the country can be obtained.

That on the 14th day of January instant, only five weeks after the said wren conditions were made public, an offer, which is now on the Table, was made to the Government by Canadian capitalists of high standing and ample means, credit, and business ability, comprising, Sir *W. P. Howland*, *H. H. Cook*, *A. R. McMaster*, *Wm. Hendrie*, *John Stuart*, *John Proctor*, *P. S. Stephenson*, *John Walker*, *D. Macfie*, *Peleg Howland*, *A. T. Wood*, *Allan Gilmour*, *J. Carruthers*, *K. Chisholm*, *A. W. Ross*, *Geo. A. Cox*, *P. Larkin*, *W. D. Lovitt*, *Barnett & McKay*, *James McLaren*, and *Alexander Gibson*, to complete those parts of the Railway to be built by the Contractors, and to equip and maintain and work the whole Railway from Lake Nipissing to the Pacific Ocean, and to perform all the obligations undertaken by the Contractors on terms far less onerous to the country, in the following respects:—

1. The Contract provides for a cash subsidy of \$25,000,000, and a land grant of 25,000,000 acres.

The offer proposes to accept \$22,000,000 and 22,000,000 acres, making a saving of \$3,000,000 in cash, and 3,000,000 acres, equal, at the Government estimate of \$3.18 per acre to \$9,540,000, or a total saving of \$12,540,000 on this head.

2. The Contract provides as a Standard the Union Pacific Railway as first constructed.

The offer proposes that Railway as in 1873.

3. The Contract provides for the giving of \$9,000,000 and 11,250,000 acres for the prairie 900 miles.

The offer proposes to accept \$6,600,000 cash and 9,000,000 acres for the same work, making a saving on that part of \$2,400,000 and 2,250,000 acres, or a total saving on that part, at the Government estimate, of \$9,555,000.

4. The Contract provides for the giving of \$6,000,000 cash and 7,500,000 acres for the Western four hundred and fifty miles to Kamloops.

The offer proposes to accept \$5,400,000 cash and 6,750,000 acres for the same work, making a saving on that part, of \$600,000 cash and 750,000 acres, or a total saving on that part, at the Government estimate, of \$2,985,000.

5. The Contract provides that the Government shall permit the admission free of duty of all steel rails, fish-plates and other fastenings, spikes, bolts and nuts, wire, timber, and all material for bridges to be used in the original construction of the railway, and of a telegraph line in connection therewith and all telegraphic apparatus required for the first equipment of such telegraph line.

The offer proposes to undertake the obligations without any exemptions from duty thus effecting a further large gain to the country.

6. The Contract provides that for twenty years from the date thereof, no line of Railway shall be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway from any point, at or near the Canadian Pacific Railway, except such line as shall run south-west or to the westward of south-west; nor to within fifteen miles of latitude 49; and that in the establishment of any new Province in the North-West Territories provision shall be made for continuing such prohibition after such establishment until the expiration of the said period.

The offer proposes to undertake the obligations without any such restrictions, thus preventing the creation of the Legislative monopoly in favor of the Company, provided by the Contract, and preserving to Parliament and the new Provinces unfettered by the Contract, their freedom to charter Railways and to create competitive routes as the public interest may require, and by this means blotting out one of the most objectionable features of the Contract.

7. The Contract provides that the Canadian Pacific Railway and all stations and station grounds, workshops, buildings, yards, and other property, rolling stock and appurtenances, required and used for the construction and working thereof, and the capital stock of the Company, shall be forever free from taxation by the Dominion or by any Province hereafter to be established or by any municipal corporation therein.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain.

8. The Contract provides, that the lands of the Company in the North-West Territories until they are either sold or occupied, shall also be free from such taxation for twenty years after the grant from the Crown.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain, and removing a most serious hindrance to the development of the North-West.

9. The Contract contains no provision giving to the Government power to acquire the Railway.

The offer proposes that the Government shall be entitled at any time after completion to acquire the Railway on terms to be settled by agreement or arbitration, thus enabling the Government, in case the public interest shall be found at any time to demand that step, to acquire the Railway with a view to its being dealt with as those interests may then require.

10. The Contract provides for the passing of an Act which would limit the power of the Governor-in-Council to reduce tolls once established to the case in which the Company's net profit shall exceed 10 per cent. on the capital invested in the construction of the Railway.

The offer proposes that there shall be no such limitation, and that the provisions of the General Railway Act shall apply, giving the Governor-in-Council unrestricted power to regulate established tolls from time to time as the public interests may require.

11. The Contract makes no provision for the allotment of stock in the Company in the several Provinces.

The offer proposes that the Act to be passed shall provide for the opening of stock books in the principal cities of each Province with a view to such allotment.

That the said offer besides its proposal for the whole line, contains certain alternative proposals in case the Government should desire to withdraw from or

postpone the construction of certain parts of the line by the Contractors. That the conditions of those alternative proposals are not such as should be accepted, but the refusal to accept the same leaves untouched the offer for the whole line which stands independent of the said alternatives.

That it appears that the said tenderers have deposited in chartered Banks of Canada over \$1,400,000, which is held by such banks as security that if the tender is accepted and the charter granted, the million of dollars to be deposited with the Government as security for construction will be deposited as proposed by the tender.

That it is not in the public interest that the Contract according to the terms of which the \$25,000,000 and 25,000,000 acres are proposed to be granted should be legalized.

And a further Debate arising,—and The House having continued to sit after 12 of the clock, midnight ;

THURSDAY, 20TH JANUARY, 1881.

And the Debate continuing,—the said Debate was, on motion of Mr. *White* (Cardwell), adjourned.

The House then adjourned at half past 1 o'clock, A.M.

JOSEPH GODÉRIC BLANCHET,

That no tenders were received in answer to those invitations.

That the policy of the present Government approved by this House in the Session of 1879 was to obtain Imperial aid towards the work.

That the policy of the present Government approved by this House in the Session of 1880 was to construct the Railway as a Government work.

That it appears that during the recess the Government determined to attempt to make a Contract for the construction and working of the Railway on wholly new conditions.

That the Canadian Pacific Railway Act provides that the works on any section or sub-section of the Railway shall not be given out to any Contractor except after tenders shall have been obtained therefor.

That the Government did not invite tenders on the basis of the said new conditions or at all.

That such new conditions were not made known by the Government at any time prior to the making of the Contract nor until the night of the 10th of December last, when the Contract was laid on the Table.

That the said new conditions not authorized or contemplated by the Canadian Pacific Railway Act are of the most vital importance and amongst the same are the following:—

1. By the Act no power is given to the Government to agree with the Contractors to construct for the benefit of the Contractors sections of the work to be handed over to the Contractors.

By the Contract the Government binds itself to complete the unfinished sections, to begin and finish the heaviest section now unlet and to hand over to the Contractors for their own benefit the works, including those now in operation, and comprising over 700 miles of Railway, of which the Pembina Branch alone is yielding nearly \$70,000 a year net revenue.

2. By the Act the cash expenditure of the Government, as principal money to be paid to the Contractors, is to be \$10,000 a mile, or about \$27,000,000 for the whole line; apart from the cost of surveys which might or might not form part thereof.

By the Contract the cash expenditure of the Government, as principal money of which the Contractors receive the benefit, is to be in cash and works to be handed over to the Contractors, at least \$53,000,000, apart from the cost of surveys which do not form part thereof.

3. By the Act the land grant is to be taken so far as obtainable along or in the immediate vicinity of the whole line of Railway to the Pacific Ocean, and is to be of fair average quality, thus embracing a large proportion of land not fit for settlement.

By the Contract the land is all to be taken in the North-West Territories, between Selkirk and Jasper, and is not to include any land not fairly fit for settlement.

4. By the Act the land not to be found near the Railway is to be appropriated at other places, to be determined by the Government.

By the Contract the Contractors are given large powers of selection of the land.

5. By the Act the Government is to have control of the sales of two-thirds of the land grant.

By the Contract this power is taken away.

6. By the Act the subsidy and land grant are to be payable in proportion to the value of the work done as compared with the estimated value of the whole work contracted for.

By the Contract the subsidy and land grant are to be payable in amounts wholly disproportionate on the prairie section, which is the easiest and most profitable and is intended to be earliest completed.

7. Under the Act the property and Capital Stock of the Company remain liable to Dominion, Provincial and Municipal taxation.

By the Contract such property and Capital Stock are perpetually exempted from taxation by the Dominion, new Provinces or Municipalities therein.

8. Under the Act the land grant of the Company remains subject to taxation.

By the Contract the land grant is exempted from the Dominion, Provincial, and Municipal taxation before mentioned until sold or occupied for twenty years from the date of the grant.

9. Under the Act all the materials required by the Contractors remain subject to import duties.

By the Contract a large part of such materials is exempted from import duties.

10. Under the Act Parliament and any new Provinces are in no wise hindered from authorizing the construction of other Railways as the public interest may require.

By the Contract it is agreed that Parliament and any new Provinces shall not for twenty years authorize the construction of any Railways running in certain directions which might interfere with the Canadian Pacific Railway.

11. By the Act, the Government has unrestricted power to regulate from time to time the tariff of tolls.

By the Contract, the power of the Government to reduce an established tariff is limited to the case in which the Company is making a net revenue exceeding 10 per cent. on the capital invested in the construction of the Railway.

12. Under the Act the Government would have power to prescribe from time to time the accommodation and the trains to be provided by the Company.

By the Contract such power is not given to the Government.

13. Under the Act the Government would have power to acquire the Railway at any time the public interest might demand.

By the Contract the Government has no such power.

14. By the Act the grades of the Railway and the materials and manner of construction and the mode of working, including the description and capacity of the rolling stock are to be such as may be determined by the Governor in Council; and it was formerly the declared policy of Governments and Parliament that the grades should be very low.

By the Contract the Union Pacific Railway as first constructed is fixed as the approximate standard; and its grades are very high.

15. By the Act no power is given to the Company to build branch railways, save one to Georgian Bay and one to Pembina.

By the Contract power is given to the Company forever to build branch lines in various parts of the Dominion.

16. By the Contract divers other important privileges and powers are given to the Company not authorized or contemplated by the Act.

That such new conditions wholly alter the basis for tendering.

That no opportunity was given to Canadian capitalists or to the public to tender for the work on the basis of any of such new conditions.

That by the Canadian Pacific Railway Act it is provided that no Contract made under the authority of that Act for the construction of any portion of the main line of the Railway shall be binding until it shall have been laid before the House of Commons for one month without being disapproved, unless sooner approved by a resolution of the House.

That the Contract now on the Table does not come within the provisions of the said Act; and is of no force unless legalized by Parliament.

That the said Contract expressly provides that the same shall be binding only in the event of an Act of incorporation being granted to the projected Company as set out in Schedule A to the Contract.

That Parliament is free to reject such a Bill.

That it is now proposed that Parliament shall legalize the Contract.

That this House is under no obligation to do so, and it is its duty to refuse to do so, unless satisfied that the public interest requires such a step.

That the conditions of the Contract are extremely onerous and disadvantageous to the country.

That it now appears that terms much more favorable to the country can be obtained.

That on the 14th day of January instant, only five weeks after the said wren conditions were made public, an offer, which is now on the Table, was made to the Government by Canadian capitalists of high standing and ample means, credit, and business ability, comprising, Sir *W. P. Howland*, *H. H. Cook*, *A. B. McMaster*, *Wm. Hendrie*, *John Stuart*, *John Proctor*, *P. S. Stephenson*, *John Walker*, *D. Macfie*, *Peleg Howland*, *A. T. Wood*, *Allan Gilmour*, *J. Carruthers*, *K. Chisholm*, *A. W. Ross*, *Geo. A. Cox*, *P. Larkin*, *W. D. Lovitt*, *Barnett & McKay*, *James McLaren*, and *Alexander Gibson*, to complete those parts of the Railway to be built by the Contractors, and to equip and maintain and work the whole Railway from Lake Nipissing to the Pacific Ocean, and to perform all the obligations undertaken by the Contractors on terms far less onerous to the country, in the following respects:—

1. The Contract provides for a cash subsidy of \$25,000,000, and a land grant of 25,000,000 acres.

The offer proposes to accept \$22,000,000 and 22,000,000 acres, making a saving of \$3,000,000 in cash, and 3,000,000 acres, equal, at the Government estimate of \$3.18 per acre to \$9,540,000, or a total saving of \$12,540,000 on this head.

2. The Contract provides as a Standard the Union Pacific Railway as first constructed.

The offer proposes that Railway as in 1873.

3. The Contract provides for the giving of \$9,000,000 and 11,250,000 acres for the prairie 900 miles.

The offer proposes to accept \$6,600,000 cash and 9,000,000 acres for the same work, making a saving on that part of \$2,400,000 and 2,250,000 acres, or a total saving on that part, at the Government estimate, of \$9,555,000.

4. The Contract provides for the giving of \$6,000,000 cash and 7,500,000 acres for the Western four hundred and fifty miles to Kamloops.

The offer proposes to accept \$5,400,000 cash and 6,750,000 acres for the same work, making a saving on that part, of \$600,000 cash and 750,000 acres, or a total saving on that part, at the Government estimate, of \$2,985,000.

5. The Contract provides that the Government shall permit the admission free of duty of all steel rails, fish-plates and other fastenings, spikes, bolts and nuts, wire, timber, and all material for bridges to be used in the original construction of the railway, and of a telegraph line in connection therewith and all telegraphic apparatus required for the first equipment of such telegraph line.

The offer proposes to undertake the obligations without any exemptions from duty thus effecting a further large gain to the country.

6. The Contract provides that for twenty years from the date thereof, no line of Railway shall be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway from any point, at or near the Canadian Pacific Railway, except such line as shall run south-west or to the westward of south-west; nor to within fifteen miles of latitude 49; and that in the establishment of any new Province in the North-West Territories provision shall be made for continuing such prohibition after such establishment until the expiration of the said period.

The offer proposes to undertake the obligations without any such restrictions, thus preventing the creation of the Legislative monopoly in favor of the Company, provided by the Contract, and preserving to Parliament and the new Provinces unfettered by the Contract, their freedom to charter Railways and to create competitive routes as the public interest may require, and by this means blotting out one of the most objectionable features of the Contract.

7. The Contract provides that the Canadian Pacific Railway and all stations and station grounds, workshops, buildings, yards, and other property, rolling stock and appurtenances, required and used for the construction and working thereof, and the capital stock of the Company, shall be forever free from taxation by the Dominion or by any Province hereafter to be established or by any municipal corporation therein.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain.

8. The Contract provides, that the lands of the Company in the North-West Territories until they are either sold or occupied, shall also be free from such taxation for twenty years after the grant from the Crown.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain, and removing a most serious hindrance to the development of the North-West.

9. The Contract contains no provision giving to the Government power to acquire the Railway.

The offer proposes that the Government shall be entitled at any time after completion to acquire the Railway on terms to be settled by agreement or arbitration, thus enabling the Government, in case the public interest shall be found at any time to demand that step, to acquire the Railway with a view to its being dealt with as those interests may then require.

10. The Contract provides for the passing of an Act which would limit the power of the Governor-in-Council to reduce tolls once established to the case in which the Company's net profit shall exceed 10 per cent. on the capital invested in the construction of the Railway.

The offer proposes that there shall be no such limitation, and that the provisions of the General Railway Act shall apply, giving the Governor-in-Council unrestricted power to regulate established tolls from time to time as the public interests may require.

11. The Contract makes no provision for the allotment of stock in the Company in the several Provinces.

The offer proposes that the Act to be passed shall provide for the opening of stock books in the principal cities of each Province with a view to such allotment.

That the said offer besides its proposal for the whole line, contains certain alternative proposals in case the Government should desire to withdraw from or postpone the construction of certain parts of the line by the Contractors. That the conditions of those alternative proposals are not such as should be accepted, but the refusal to accept the same leaves untouched the offer for the whole line which stands independent of the said alternatives.

That it appears that the said tenderers have deposited in chartered Banks of Canada over \$1,400,000, which is held by such banks as security that if the tender is accepted and the charter granted, the million of dollars to be deposited with the Government as security for construction will be deposited as proposed by the tender.

That it is not in the public interest that the Contract according to the terms of which the \$25,000,000 and 25,000,000 acres are proposed to be granted should be legalized.

And The House having continued to sit after 12 of the clock, midnight;

FRIDAY, 21ST JANUARY, 1881.

And the Debate continuing,— the said Debate was, on motion of Mr. *Fleming*, adjourned.

The House then adjourned at 5 minutes to 2 o'clock, A.M.

PRAYERS.

Thirteen Petitions were brought up, and laid on the Table.

Mr. *McDonald* (Pictou) presented,—Return to an Address to His Excellency the Governor General of the 16th December, last;—for copies of all Statements, or representations or correspondence on the subject of the distribution of the judicial work of the Province of Quebec.

And also,—Return to an Address to His Excellency the Governor General of the 16th December, last;—for a Statement of the number of Judgeships in each Province, at the time of the Union of such Province with Canada, the incumbents of which were under the law entitled in certain events to retiring allowances; and the number of Judges in each such Province actually receiving such retiring allowances at such time; and a like statement for each year since Confederation, as to each Province during such year in the Union down to, and inclusive of, the year 1880.

Mr. *Caron* presented,—Return to an Address to His Excellency the Governor General, of the 20th December, last;—for copies of correspondence with the Imperial Government in relation to the appointment of Major General *Luard*, as the officer in command of the Militia of Canada.

Sir *Charles Tupper* presented,—Return to an Order of The House of the 16th December, last;—for Copies of all Statements, evidence or information on which the Government based their judgment in accepting the Union Pacific Railway, as the same was when first constructed, as the standard regulating the quality and character of the proposed Canadian Pacific Railway, its materials and equipment, and of any detailed estimate which has been made by any Officer of the Government as to the cost of the works under progress and to be constructed by the Government, and of those to be constructed by the projected Company, according to such standard.

Mr. *Drew*, from the Select Standing Committee on *Standing Orders*, presented the Twelfth Report of the said Committee, which is as follows:—

The Committee have considered the Petition of *Henry Benjamin*, of the City of Montreal; praying that an Act may be passed, authorizing him to construct a line of Railway from near the Grand Ligne Station; of the Montreal and Champlain Railway, to the Village of *Napierville*, in the County of Napierville, and find that no notice has been given; but evidence has been adduced to their satisfaction, that all

parties whom it will most affect are consenting to the construction of the projected Railway, the Committee therefore beg to recommend a suspension of the 51st Rule in this case.

The Committee beg leave also to recommend that the Petition of "The Montreal, Portland and Boston Railway Company" for the passing of an Act, empowering them to construct a branch Railway from a point on their main line near the Village of Marieville, to connect with the International Railway; and also to extend the time for the completion of their Railway, reported on the twenty-first instant, be referred back to them, for further consideration.

The time for receiving Reports on Private Bills, having expired, the Committee recommend, that the same be extended to Tuesday, the fifteenth day of February next.

On motion of Mr. *Drew*, the Petition of the "Montreal, Portland and Boston Railway Company," praying for the passing of an Act, empowering them to construct a branch Railway from a point on their main line near the Village of Marieville, to connect with the International Railway; and also to extend the time for the completion of their Railway, was referred back to the Select Standing Committee on *Standing Orders*.

Mr. *Gault* introduced a Bill No. 36 further to amend the Act incorporating the Canada Guarantee Company; and to change the name of the said Company to "The International Guarantee Association;" which was read the first time, and ordered for a second reading, *to-morrow*.

The House resumed the adjourned Debate on Sir *Charles Tupper's* proposed motion, that the Resolutions reported from the Committee of the Whole on the 14th instant, granting certain moneys and lands for the construction of the Canadian Pacific Railway, be now read the second time,—and of Mr. *Blake's* motion in amendment thereto,—and which motion was:—That the said Resolutions be not now read a second time, but that it be *Resolved*.—That the late Government invited tenders for the construction and working of the Canadian Pacific Railway, under the Act of 1874.

That no tenders were received in answer to those invitations.

That the policy of the present Government approved by this House in the Session of 1879 was to obtain Imperial aid towards the work.

That the policy of the present Government approved by this House in the Session of 1880 was to construct the Railway as a Government work.

That it appears that during the recess the Government determined to attempt to make a Contract for the construction and working of the Railway on wholly new conditions.

That the Canadian Pacific Railway Act provides that the works on any section or sub-section of the Railway shall not be given out to any Contractor except after tenders shall have been obtained therefor.

That the Government did not invite tenders on the basis of the said new conditions or at all.

That such new conditions were not made known by the Government at any time prior to the making of the Contract nor until the night of the 10th of December last, when the Contract was laid on the Table.

That the said new conditions not authorized or contemplated by the Canadian Pacific Railway Act are of the most vital importance and amongst the same are the following:—

1. By the Act no power is given to the Government to agree with the Contractors to construct for the benefit of the Contractors sections of the work to be handed over to the Contractors.

By the Contract the Government binds itself to complete the unfinished sections, to begin and finish the heaviest section now unlet and to hand over to the Contractors

for their own benefit the works, including those now in operation, and comprising over 700 miles of Railway, of which the Pembina Branch alone is yielding nearly \$70,000 a year net revenue.

2. By the Act the cash expenditure of the Government, as principal money to be paid to the Contractors, is to be \$10,000 a mile, or about \$27,000,000 for the whole line; apart from the cost of surveys which might or might not form part thereof.

By the Contract the cash expenditure of the Government, as principal money of which the Contractors receive the benefit, is to be in cash and works to be handed over to the Contractors, at least \$53,000,000, apart from the cost of surveys which do not form part thereof.

3. By the Act the land grant is to be taken so far as obtainable along or in the immediate vicinity of the whole line of Railway to the Pacific Ocean, and is to be of fair average quality, thus embracing a large proportion of land not fit for settlement.

By the Contract the land is all to be taken in the North-West Territories, between Selkirk and Jasper, and is not to include any land not fairly fit for settlement.

4. By the Act the land not to be found near the Railway is to be appropriated at other places, to be determined by the Government.

By the Contract the Contractors are given large powers of selection of the land.

5. By the Act the Government is to have control of the sales of two-thirds of the land grant.

By the Contract this power is taken away.

6. By the Act the subsidy and land grant are to be payable in proportion to the value of the work done as compared with the estimated value of the whole work contracted for.

By the Contract the subsidy and land grant are to be payable in amounts wholly disproportionate on the prairie section, which is the easiest and most profitable and is intended to be earliest completed.

7. Under the Act the property and Capital Stock of the Company remain liable to Dominion, Provincial and Municipal taxation.

By the Contract such property and Capital Stock are perpetually exempted from taxation by the Dominion, new Provinces or Municipalities therein.

8. Under the Act the land grant of the Company remains subject to taxation.

By the Contract the land grant is exempted from the Dominion, Provincial, and Municipal taxation before mentioned until sold or occupied for twenty years from the date of the grant.

9. Under the Act all the materials required by the Contractors remain subject to import duties.

By the Contract a large part of such materials is exempted from import duties.

10. Under the Act Parliament and any new Provinces are in no wise hindered from authorizing the construction of other Railways as the public interest may require.

By the Contract it is agreed that Parliament and any new Provinces shall not for twenty years authorize the construction of any Railways running in certain directions which might interfere with the Canadian Pacific Railway.

11. By the Act, the Government has unrestricted power to regulate from time to time the tariff of tolls.

By the Contract, the power of the Government to reduce an established tariff is limited to the case in which the Company is making a net revenue exceeding 10 per cent. on the capital invested in the construction of the Railway.

12. Under the Act the Government would have power to prescribe from time to time the accommodation and the trains to be provided by the Company.

By the Contract such power is not given to the Government.

13. Under the Act the Government would have power to acquire the Railway at any time the public interest might demand.

By the Contract the Government has no such power.

14. By the Act the grades of the Railway and the materials and manner of construction and the mode of working, including the description and capacity of the rolling stock are to be such as may be determined by the Governor in Council; and it was formerly the declared policy of Governments and Parliament that the grades should be very low.

By the Contract the Union Pacific Railway as first constructed is fixed as the approximate standard; and its grades are very high.

15. By the Act no power is given to the Company to build branch railways, save one to Georgian Bay and one to Pembina.

By the Contract power is given to the Company forever to build branch lines in various parts of the Dominion.

16. By the Contract divers other important privileges and powers are given to the Company not authorized or contemplated by the Act.

That such new conditions wholly alter the basis for tendering.

That no opportunity was given to Canadian capitalists or to the public to tender for the work on the basis of any of such new conditions.

That by the Canadian Pacific Railway Act it is provided that no Contract made under the authority of that Act for the construction of any portion of the main line of the Railway shall be binding until it shall have been laid before the House of Commons for one month without being disapproved, unless sooner approved by a Resolution of The House.

That the Contract now on the Table does not come within the provisions of the said Act; and is of no force unless legalized by Parliament.

That the said Contract expressly provides that the same shall be binding only in the event of an Act of incorporation being granted to the projected Company as set out in Schedule A to the Contract.

That Parliament is free to reject such a Bill.

That it is now proposed that Parliament shall legalize the Contract.

That this House is under no obligation to do so, and it is its duty to refuse to do so, unless satisfied that the public interest requires such a step.

That the conditions of the Contract are extremely onerous and disadvantageous to the country.

That it now appears that terms much more favorable to the country can be obtained.

That on the 14th day of January instant, only five weeks after the said wren conditions were made public, an offer, which is now on the Table, was made to the Government by Canadian capitalists of high standing and ample means, credit, and business ability, comprising, Sir *W. P. Howland*, *H. H. Cook*, *A. R. McMaster*, *Wm. Hendrie*, *John Stuart*, *John Proctor*, *P. S. Stephenson*, *John Walker*, *D. Macfie*, *Peleg Howland*, *A. T. Wood*, *Allan Gilmour*, *J. Carruthers*, *K. Chisholm*, *A. W. Ross*, *Geo. A. Cox*, *P. Larkin*, *W. D. Lovitt*, *Barnett & McKay*, *James McLaren*, and *Alexander Gibson*, to complete those parts of the Railway to be built by the Contractors, and to equip and maintain and work the whole Railway from Lake Nipissing to the Pacific Ocean, and to perform all the obligations undertaken by the Contractors on terms far less onerous to the country, in the following respects:—

1. The Contract provides for a cash subsidy of \$25,000,000, and a land grant of 25,000,000 acres.

The offer proposes to accept \$22,000,000 and 22,000,000 acres, making a saving of \$3,000,000 in cash, and 3,000,000 acres, equal, at the Government estimate of \$3.18 per acre to \$9,540,000, or a total saving of \$12,540,000 on this head.

2. The Contract provides as a Standard the Union Pacific Railway as first constructed.

The offer proposes that Railway as in 1873.

3. The Contract provides for the giving of \$9,000,000 and 11,250,000 acres for the prairie 900 miles.

The offer proposes to accept \$6,600,000 cash and 9,000,000 acres for the same work, making a saving on that part of \$2,400,000 and 2,250,000 acres, or a total saving on that part, at the Government estimate, of \$9,555,000.

4. The Contract provides for the giving of \$6,000,000 cash and 7,500,000 acres for the Western four hundred and fifty miles to Kamloops.

The offer proposes to accept \$5,400,000 cash and 6,750,000 acres for the same work, making a saving on that part, of \$600,000 cash and 750,000 acres, or a total saving on that part, at the Government estimate, of \$2,985,000.

5. The Contract provides that the Government shall permit the admission free of duty of all steel rails, fish-plates and other fastenings, spikes, bolts and nuts, wire, timber, and all material for bridges to be used in the original construction of the railway, and of a telegraph line in connection therewith and all telegraphic apparatus required for the first equipment of such telegraph line.

The offer proposes to undertake the obligations without any exemptions from duty thus effecting a further large gain to the country.

6. The Contract provides that for twenty years from the date thereof, no line of Railway shall be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway from any point, at or near the Canadian Pacific Railway, except such line as shall run south west or to the westward of south-west; nor to within fifteen miles of latitude 49; and that in the establishment of any new Province in the North-West Territories provision shall be made for continuing such prohibition after such establishment until the expiration of the said period.

The offer proposes to undertake the obligations without any such restrictions, thus preventing the creation of the Legislative monopoly in favor of the Company, provided by the Contract, and preserving to Parliament and the new Provinces unfettered by the Contract, their freedom to charter Railways and to create competitive routes as the public interest may require, and by this means blotting out one of the most objectionable features of the Contract.

7. The Contract provides that the Canadian Pacific Railway and all stations and station grounds, workshops, buildings, yards, and other property, rolling stock and appurtenances, required and used for the construction and working thereof, and the capital stock of the Company, shall be forever free from taxation by the Dominion or by any Province hereafter to be established or by any municipal corporation therein.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain.

8. The Contract provides, that the lands of the Company in the North-West Territories until they are either sold or occupied, shall also be free from such taxation for twenty years after the grant from the Crown.

The offer proposes to undertake the obligations without any such exemption, thereby effecting a great further public gain, and removing a most serious hindrance to the development of the North-West.

9. The Contract contains no provision giving to the Government power to acquire the Railway.

The offer proposes that the Government shall be entitled at any time after completion to acquire the Railway on terms to be settled by agreement or arbitration, thus enabling the Government, in case the public interest shall be found at any time to demand that step, to acquire the Railway with a view to its being dealt with as those interests may then require.

10. The Contract provides for the passing of an Act which would limit the power of the Governor-in-Council to reduce tolls once established to the case in which the Company's net profit shall exceed 10 per cent. on the capital invested in the construction of the Railway.

The offer proposes that there shall be no such limitation, and that the provisions of the General Railway Act shall apply, giving the Governor-in-Council unrestricted power to regulate established tolls from time to time as the public interests may require.

11. The Contract makes no provision for the allotment of stock in the Company in the several Provinces.

The offer proposes that the Act to be passed shall provide for the opening of stock books in the principal cities of each Province with a view to such allotment.

That the said offer besides its proposal for the whole line, contains certain alternative proposals in case the Government should desire to withdraw from or postpone the construction of certain parts of the line by the Contractors. That the conditions of those alternative proposals are not such as should be accepted, but the refusal to accept the same leaves untouched the offer for the whole line which stands independent of the said alternatives.

That it appears that the said tenderers have deposited in chartered Banks of Canada over \$1,400,000, which is held by such banks as security that if the tender is accepted and the charter granted, the million of dollars to be deposited with the Government as security for construction will be deposited as proposed by the tender.

That it is not in the public interest that the Contract according to the terms of which the \$25,000,000 and 25,000,000 acres are proposed to be granted should be legalized.

And The House having continued to sit after 12 of the clock, midnight ;

WEDNESDAY, 26th January, 1881.

And the question being put on the amendment,—it was negatived on the following division :—

Mr. Béchard then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That prior to, and during the last General Election, it was the policy of all parties, that the arrangements for the construction of the Canadian Pacific Railway should be such as the resources of the country would permit, without increasing the former rates of taxation, and that the work, if to be constructed by a Company, should be let only after tenders had been obtained therefor, and should be subjected to purchase by the Government at 10 per cent over cost, after deducting the public expenditure; and that the property and stock, and land grant of the Company should be subject to taxation, and that the Governor in Council should have the unrestricted right, from time to time, to regulate the tolls to be taken, and to prescribe the accommodation to be given, and that Parliament should be free to charter such other Railways, as the public interest might require.

That the Contract respecting the Canadian Pacific Railway, laid on the Table, involves violations, in the above and other particulars of the settled policy, in re-

ference to the Canadian Pacific Railway, and should not be ratified, till after the people have had the opportunity of expressing their opinion through the medium of a General Election; which was negatived on the following division:—

Sir *Richard Cartwright* then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway involves a total expenditure by the country in connexion with that work of about 60 millions of dollars, exclusive of interest, and the cession of 25 millions of acres of choice lands, worth at the estimate of the Government last year, at least \$79,500,000, making a total consideration of about \$140,000,000, while the Railroad itself is estimated by Government to cost not more than \$84,000,000, and that the consideration proposed to be given, is excessive, and that the Contract is in the highest respect objectionable;—which was negatived on the following division :—

Mr. *Burpee* (*Sunbury*) then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the present construction of the Canadian Pacific Railway in British Columbia is premature and will involve the country in an expense beyond its reasonable capacity, and will result in the maintenance of too high a rate of taxation, while the postponement of that part of the undertaking, till after the completion of the Prairie Section, will enable it to be constructed at much less cost, and within a reasonable time;—which was negatived on the following division:—

Fortin,		

Mr. *Laurier* then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the contract respecting the Canadian

Pacific Railway provides for the construction of between 6 and 700 miles of Railway to the North of Lake Superior between Lake Nipissing and the junction with the road from Thunder Bay, through a difficult and uninhabited country and at a vast expense, that a mere fraction of the cost of this road would, if applied as a basis of credit, secure the construction of those 63 miles common to the through line and to the Sault Ste. Marie Railway, and also of the remainder of the line to Sault Ste. Marie within 3 years; that the line by Sault Ste. Marie would give Ontario, Quebec and the East, Railway connection with the North West of nearly the same length, and of better quality, than the proposed North Shore line; that it would also give to Canada a great trade from an enormous area of the Western States, extending from the boundary to a point South of St. Paul, and even now inhabited by about 1,200,000 souls; that it would secure a way traffic; that it would thus give within 3 years and at a fraction of the cost of the other line, greater benefit than can be secured by that line in 10 years, which is the period stipulated for its construction; that it would bring both the Western States and the Canadian North West into connection by rail with the Ocean Steamers at Montreal and Quebec on a route shorter by about 300 miles, than the existing route to New York; that this advantage together with the further gain of about 250 miles in the Ocean voyage to Liverpool, would give this route a commanding position, and secure great benefit to the country at large; that the construction of the line to the Sault or Goulais Bay would also give a first class rail and water route *via* Sault Ste. Marie and Thunder Bay, within our own limits by the shortest possible line for the transport of emigrants, goods and produce; that the construction of the line from Sturgeon River to or beyond Thunder Bay to the North of Lake Superior, is under the circumstances premature, and should not be now undertaken;—which was negated on the following division:—

Six Petitions were brought up, and laid on the Table.

The following Petitions were read and received :—

Of *Peter Windatt* and others, of the Township of Thorah, County of Ontario; of *Benjamin Watterworth* and others, of the Township of Mosa; of *Alexander Graham*, M.D., and others; of *H. T. Scudamore* and others; of *James Lawrence* and others, of the Village of Newbury and Township of Mosa, County of Middlesex; of *W. Maguire* and others, of the Township of Manvers, County of Durham; of *William Lemon* and others, of the Township of Sydenham, County of Grey; of *J. A. McDougald*, J.P., and others, of the County of Glengarry; of *Samuel Morrington* and others, of South Cayuga and Rainham; of *George C. Derby* and others, of Walpole and Rainham; of *Whitfield Teasdale* and others, of Cayuga; and of *V. Honsberger* and others, of South Cayuga and vicinity, County of Haldimand; severally praying that the agreement entered into with the Syndicate for the construction of the Canadian Pacific Railway, may not be ratified by Parliament.

Of the *Whitby, Port Perry and Lindsay Railway Company*; praying for the passing of an Act to prevent the purchasing of passenger tickets which have been sold and used but not marked, and fraudulently re-selling them to intending passengers at rates less than the proper fare.

Of *John Winslow Jones*, and others; praying for an Act of Incorporation under the name of the *J. Winslow Jones Packing Company*.

Of the Reverend *Duncan Henry Hind*, Rector, and others, Members of the Church of England in the Parish of Georgetown, P.E.I., Diocese of Nova Scotia; praying that any Bill to be introduced having for its object the legalization of marriage with the sister of a deceased wife, may not become law.

A Message was received from the Senate, requesting this House to transmit for the information of the Senate,—*First*, a copy of the Report of the Sanitary Committee appointed by the House of Commons in 1876,—and *Second*, a copy of the Report of a similar Committee appointed upon Vital Statistics and public health in 1877.

On motion of Sir *Charles Tupper* it was *Resolved*, That a copy of the Report of the Sanitary Committee, appointed by this House in the Session of 1876,—and also a copy of the Report of a Select Committee appointed on the subject of Vital Statistics and public health in the Session of 1877, be transmitted to the Senate for the information of their Honors, as desired by them in their Message received this day; and that the said Resolution and a copy of the said Reports be communicated to the Senate by The Clerk.

The House resumed the adjourned Debate on Sir *Charles Tupper's* proposed motion, that the Resolutions reported from the Committee of the Whole on the 14th instant, granting certain moneys and lands for the construction of the Canadian Pacific Railway, be now read a second time.

Mr. *Mills* moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract for the construction of the Canadian Pacific Railway, while it gives to the Company the absolute and perpetual right to build branch lines of Railway from any point or points along their line, to any point or points within the Territories of the Dominion, and cedes to the Company free all Government lands required in connection with such branches, provides that for 20 years no line of Railway shall be authorized by the Dominion Parliament or by any new Province to be constructed South of the Canadian Pacific Railway from any point at or near that Railway, except such as shall run South-West, or to the Westward of South-West, nor to within 15 miles of the boundary between the United States and Canada; the same Contract cedes to the Company the only existing outlets to the North-West, namely the Pembina branch, being the outlet Southward, and the Thunder Bay line, being the outlet Eastward; the Company embraces the chief proprietors of the St. Paul and Manitoba Railway, the only present means of Railway communication with the North-West; and thus, not only is there no provision for securing competition, but there is provision securing the Company against competition, and they are secured in a monopoly of the trade and traffic of the North-West, for at least 20 years, and that the said Contract is, in this respect, objectionable; which was negatived on the following division:—

Mr. Borden then moved in amendment, that the said Resolutions be not now read the second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway provides, that the Company shall not be obliged to receive any section of land, consisting in any material degree of land not fairly fit for settlement, and that Lakes and water stretches shall not be computed in the acreage of the Company's sections, and gives to the Company the right of selecting in alternate blocks anywhere in the fertile belt or elsewhere the amount of the large deficiency in the acreage to be found in alternate blocks within 24 miles of the main line, thus including coal, mineral, timber, stone-quarry, petroleum and salt producing lands in their choice, and gives to the Company, with the consent of the Government the right to select in the North-West Territories any tracts of land not taken up in order to supply the deficiency, and provides no proper means of deciding whether the alternate sections on the main line and branches should be accepted by the Company; and that the said Contract is, in these particulars, unjust and impolitic;—which was negatived on the following division:—

Mr. *Anglin* then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway provides for a distribution of the money and land to be given for the work, wholly arbitrary and disproportionate; that land and money, far in excess of the proportionate cost, is assigned to the Prairie part, the easiest and most productive portion of the Railway, which it is alleged will be constructed within 3 years, by which time the Company will be entitled in Cash and lands to a surplus amounting, according to the Government estimate of the lands at \$3.18 an acre, to over 34 millions, which surplus should have been reserved and applied towards the construction and working of the Eastern and Western ends, and that the said Contract is, in this respect, objectionable;—which was negatived on the following division:—

Mr. Trow then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway exempts 25 millions of acres of choice lands of the Company from Dominion, Provincial and Municipal taxation, until such lands are either sold or occupied for 20 years after the grant thereof from the Crown; that such exemption is unjust and will impose undue burdens on the settlers on the alternate sections, who will be obliged to make improvements and incur expenses, enhancing the value of the Company's lands without receiving their fair share of the cost of such improvements and expenses; that such exemption by freeing the Company from the burdens of taxation, will reduce the inducements to the Company to sell their lands early, and will enable the Company free of expense to hold their lands, till their value has been greatly enhanced by the labors of the adjoining settlers, and that the said Contract is, in this respect, objectionable;—which was negatived on the following division:—

Mr. *Paterson* (*Brant*) then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway, laid on the Table, does not insure finality as to the public obligations in that regard, but imposes on Canada, besides the grant of large sums of money and acres of land, the construction by the Government for the benefit of the Syndicate of the most expensive parts of the Railway, which are to be built by Government during the next 10 years, and that the said Contract is, in this respect, objectionable;—which was negatived on the following division:—

Mr. *Charlton* then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway exempts perpetually the Railway and all Stations, and Station grounds, workshops, buildings, yards and other property, rolling stock and appurtenances, required for the construction and working thereof, and the Capital stock of the Company from taxation by the Dominion, or by any Province to be hereafter established, or by any Municipal Corporation therein.

That the property of the Corporation will be in substance a gift from the public; and its exemption from taxes is unjust, creates an unfair incidence of taxation, and gives an undue advantage to the Company over other Railway Companies, calculated to prevent the construction of competing lines, and the Contract is, in this respect, objectionable;—which was negatived on the following division:—

Mr. *Scriver* then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway permits the Company to lay out the line of the Railway as they may see fit, subject to the approval of the Governor in Council, preserving only the following terminal points—Calander Station to a point of junction with the Lake Superior section, and Selkirk to the junction with the Western section by way of the Yellow Head Pass; that the latitude thus allowed would enable the Company to deflect the line through the Prairie country in such a manner as largely to defeat the main object of establishing a great central road through the North-West, as is

proposed by the route now adopted ; that no substantial change should be made in the route without the sanction of Parliament, and that the Contract is, in this respect, objectionable ;—which was negatived on the following division:—

Fortin,	Massue,	

Mr. Guthrie then moved in amendment, that the said Resolutions be not now read the second time, but that it be

Resolved, That by the Consolidated Railway Act, 1879, it is provided that every Bylaw fixing and regulating the tolls to be taken by a Railway Company, shall be subject to revision by the Governor in Council from time to time, after approval thereof.

That the exercise by the Governor in Council of the power of reducing tolls under the said Act, is by the Contract respecting the Canadian Pacific Railway limited as regards the said Company to such extent, that the tolls when reduced shall not produce less than 10 *per cent per annum* profit on the Capital actually expended in the construction of the Railway, and that the net income of the Company from all sources shall not be less than 10 *per cent* on the Capital so expended.

That the said Contract thus limits in favor of the Canadian Pacific Railway Company the powers given to the Governor in Council in the case of other Railway Companies, and gives to the Company whose road is to be build so largely at the public cost an extraordinary privilege, and withdraws from the public the protection provided for them in the case of other Railways, which may be built solely out of private resources.

That the Governor in Council should have in the case of the Canadian Pacific Railway Company the same unrestricted power which is possessed in the case of such other Railways of revising from time to time, as the public interest may require any tariff of tolls, and that the Contract is, in this particular objectionable;—which was negatived on the following division:—

Mr. *Cameron* (*Huron*) then moved in amendment, that the said Resolutions be not now read a second time, but that it be

Resolved, That the Contract respecting the Canadian Pacific Railway, laid on the Table, does not, as it should, provide for running powers for the Quebec, Montreal, Ottawa and Occidental Railway, and for the Ontario and Pacific Junction Railway, over the 63 miles from Nipissing to Sturgeon River, which form the line common to the through line, and the Sault Ste. Marie line.

And that the Contract does not make satisfactory provision for securing the traffic to and from Montreal and the East by the Quebec, Montreal, Ottawa and Occidental Railway against preferential charges which the Canadian Pacific Railway may establish in favor of the Canada Central Railway, the St. Lawrence and Ottawa Railway, the Côteau Railway, or other lines of Railway to the South and East, nor against the preferential charges which it may be the interest of the Canadian Pacific Railway to establish, in case of the authorized and contemplated acquisition of, or amalgamation with, or of the use of running powers over the Canada Central Railway, nor in case the Canadian Pacific Railway amalgamates with, or obtains running powers over the St. Lawrence and Ottawa Railway, the Côteau Railway, or any other Railway running South or East.

Nor does the said Contract make satisfactory provision for securing the traffic to and from Ontario, by the Ontario and Pacific Junction Railway, against the preferential charges which it may be the interest of the Canadian Pacific Railway to establish in the event of the authorized and contemplated acquisition of, or amalgamation with, or use of running powers over, the Canada Central Railway and other Railways South and East of Ottawa; and the said Contract is, in these respects, objectionable;—which was negatived on the following division:—

Mr. Killam then moved in amendment, that the said Resolutions be not now read the second time, but that it be

Resolved, That the Contract respecting the Canadian Pacific Railway provides for the admission duty free of all steel rails, fish-plates and other fastenings, spikes, bolts and nuts, wire, timber, and all materials for bridges to be used in the original construction of the Railway, and of a Telegraph line in connection therewith, and all telegraphic apparatus required for the first equipment of such Telegraph line; that such exemption from duty is unjust, and the Contract is, in this respect, objectionable;—which was negatived on the following division:—

Mr. King then moved in amendment, that the said Resolutions be not new read a second time, but that it be

Resolved, That the Contract respecting the Canadian Pacific Railway provides as a standard whereby the quality and character of the Railway and of the material used in the construction thereof, and in the equipment thereof may be regulated, the Union Pacific Railway of the United States as the same was when first constructed.

That by a letter, since laid on the Table, some members of the Syndicate have expressed their intention to abide by the standard of the Union Pacific Railway, as it was in February, 1873,—that this letter is not binding on the projected Company,—that neither of the said proposed standards is satisfactory,—that there are objectionable details in the construction of the Union Pacific Railway,—that the conformation of the ground on the route of the Canadian Pacific Railway admits of much better alignments and grades than those of the Union Pacific Railway,—that this was recognized in the Contract made by the Government with Sir Hugh Allan and others in 1873, which provided in this respect, that the Union Pacific Railway should not be the standard with respect to any minor details in its construction and working, which may be found objectionable, and with respect to its alignments and grades which should be as favorable as the nature of the country will admit without undue expenditure,—that the Contract and letter on the Table contain no such provision, and provide a standard lower than that of the Allan Contract, unsuitable to the country, and calculated to secure an inferior Railway,—that the condition of the

Union Pacific Railway was very different when first constructed from its condition in February, 1873, and its present condition is also very different from its condition in February, 1873,—that in order to apply its former condition as a standard for the Canadian Pacific Railway, it would be necessary to engage in an enquiry as to what its condition actually was many years ago. And this renders the proposed standard unsatisfactory, and that the Contract is, in these respects, objectionable:—which was negatived on the following division:—

Mr. Macdonnell (Inverness) then moved in amendment, that the said Resolutions be not now read a second time, but that it be *Resolved*, That the Contract respecting the Canadian Pacific Railway does not preserve to the Government the right to give to other Corporations running powers over the Thunder Bay line and the Pembina branch; but improperly cedes to the Company the absolute and exclusive right to these avenues to the North West, and the said Contract is, in this respect, objectionable;—which was negatived on the following division:—

The following Bills were severally read the second time, and referred to their respective Committee, as follows :—

To the Select Standing Committee on Banking and Commerce :—

Bill No. 15 to incorporate the Metropolitan Fire Insurance Company of Canada.

Bill No. 26 to incorporate the Ontario Investment Association.

Bill No. 36 further to amend the Act incorporating the Canada Guarantee Company, and to change the name of the said Company to "The International Guarantee Association."

To the Select Standing Committee on Railways, Canals and Telegraph Lines:—

Bill No. 17 to incorporate the Saskatchewan and North-Western Railway Company.

Bill No. 18 to amend the Act incorporating the Souris and Rocky Mountain Railway Company.

Bill No. 21 respecting the Grand Trunk Railway Company of Canada.

Bill No. 23 to incorporate the Ontario and Quebec Railway Company.

Bill No. 24 respecting the Berlin and Galt branch of the Grand Trunk Railway Company of Canada.

Bill No. 25 respecting the Ontario and Pacific Junction Railway Company.

Bill No. 28 to incorporate the South Saskatchewan and Hudson Bay Railway Company.

Bill No. 14 to incorporate the Westbourne and North-Western Railway Company.

To the Select Standing Committee on Miscellaneous and Private Bills:—

Bill No. 22 to incorporate "The St. Lawrence Wrecking and Salvage Company of Canada."

Bill No. 27 to amend the Act 43 *Victoria*, Chapter 61, intituled: "An Act to incorporate the Assiniboine Bridge Company."

Bill No. 35 to incorporate "The Silver Plume Mining Company."

Sir *Charles Tupper* moved, that the Bill No. 39 respecting the Canadian Pacific Railway, be now read the second time.

And the point of Order being raised by the Hon. Member for Gloucester, that the Bill contained certain provisions for aid in land and works entirely beyond the scope of the two Resolutions adopted by The House, and that it was consequently necessary to withdraw the Bill, and introduce it in regular form.

Mr. Speaker decided, as follows:—"The point raised by the Hon. Member for Gloucester is to the effect, that the Bill goes beyond the Resolutions adopted in Committee of the Whole, and on which the Bill is founded. He quotes Section 54 of the British North America Act, 1867, which is as follows:—

"The House shall not adopt or pass any Vote, Resolution, Address, or Bill for the appropriation of any part of the Public Revenue, or of any Tax or Impost, to any purpose that has not been first recommended by a Message of the Governor in Council, etc."

No objection can be properly raised on this ground, for The House is aware that the whole Contract came down with a Message in due form. Now in reference to another point, Rule 88 of The House says:—

"If any motion be made in The House for any public aid or charge upon the people, the consideration and Debate thereof may not be presently entered upon, but shall be adjourned till such further day, as The House shall think fit to appoint, and then it shall be referred to a Committee of the Whole before any Resolution or Vote of The House do pass thereon."

In this case the question is, whether we must consider the two Resolutions and the Contract as a whole. In my opinion there can be no doubt on this point, for the Resolutions in question expressly declare that the money and land therein set forth are to be appropriated, "according to the terms of the Contract, transmitted by His Excellency by his Message."

The Resolutions and Contract clearly go together, and I think it was so fully understood by The House, because the whole subject was discussed at great length for several weeks by Honorable gentlemen on both sides, and the Honorable Member for Gloucester himself moved an amendment beyond the Resolutions. If the two Resolutions had alone been before The House, it would not have been in the power of any Member to move an amendment to any article of the Contract, but he would have been confined to the Resolutions in question. The Rule which prevents any public aid or money being voted, or any impost being put on the people, unless it originates in Committee of the Whole, is a wise one. It is intended to prevent surprise and give fullest scope to the freedom of Debate on matters of such importance to the people. But in the present case I am of opinion that such conditions have been fully observed, and that both the spirit and letter of Clause 54 of the *Union Act*,—and Rule 88 of the House have been carried out."

And the question being put on the motion for the second reading; it was agreed to on the following division:—

OTTAWA, TUESDAY, 1ST FEBRUARY, 1881.

PRAYERS.

Thirty-three Petitions were brought up, and laid on the Table.

Mr. *Drew*, from the Select Standing Committee on *Standing Orders*, presented the Thirteenth Report of the said Committee, which is as follows:—

The Committee have examined the notices given on the following Petitions, and find them sufficient, *viz*: of *James MacLaren*, and others, for the passing of an Act incorporating them as a Company, for the purpose of constructing a Railway, from certain Iron Mines, in the Township of *Hull*, to the City of *Ottawa*; and also to the *Gatineau* River;—of the International Railway Company; for the passing of an Act empowering them to extend their line of Railway from the City of *Sherbrooke*, across the State of Maine, to some point on the Atlantic Coast, in the Province of New Brunswick; and further to amend their Act of incorporation;—of the Montreal Board of Trade, and of the Montreal Corn Exchange Association; for the passing of an Act empowering them to unite under one Corporation, to be known as the Montreal Board of Trade and Exchange;—of the New Brunswick Railway Company; for the passing of an Act empowering them to extend their line of Railway from *Edmundston*, in the Province of New Brunswick, to some point on the River *St. Lawrence*, in the Province of *Quebec*; and for other purposes;—and of *John Winslow Jones*, and others; for an Act of incorporation, under the name of the *J. Winslow Jones* Packing Company.

The time for receiving Petitions for Private Bills will expire to-day, the Committee recommend that the same be further extended to *Thursday*, the tenth instant.

On motion of Mr. *Drew*, the time for receiving Petitions for Private Bills was extended to *Thursday*, the 10th instant..

The following Bills were severally introduced, read the first time, and ordered for a second reading, *to-morrow*, *viz*:—

By Mr. *White* (Hastings):—Bill No. 40 to incorporate “The Bay of Quinté Railway and Navigation Company.”

By Mr. *Cameron* (Huron):—Bill No. 41 to incorporate the Hull Mines Railway Company.

By Mr. *Brooks*:—Bill No. 42 further to amend the Act incorporating “The International Railway Company.”

The Order of the Day, for the third reading of the Bill No. 37 respecting the Canadian Pacific Railway, being read;

Mr. *Blake* moved, that the Bill be not now read a third time, but that it be re-committed to a Committee of the Whole, with instructions that they have power

to amend Clause 3 of the Bill, by inserting after the words "may convert the same and any interest accruing thereon into a fund"—the words following:—"equal" according to actuarial calculation to the value of the said money subsidy, having regard to the terms at which the same would be payable to the Company under Sub-section *b* of Section 9 of the said Contract;—which was negatived on a division.

Mr. *Bunster* then moved, that the Bill be not now read a third time, but that it be *Resolved*,—That this House, while agreeing with the general terms of the proposed Contract with a Syndicate for the construction of the Canadian Pacific Railway, is nevertheless of the opinion that provision should have been made for the building of that Section of the Canadian Pacific Railway known as the Nanaimo and Esquimalt portion thereof, on Vancouver Island, as stipulated for in the terms agreed upon between the Dominion Government and Lord Carnarvon, Colonial Secretary, as follows:—

"1. That the Railway from Esquimalt to Nanaimo shall be commenced as soon as possible and completed with all practicable despatch."

"4. That \$2,000,000 a year, and not \$1,500,000, shall be the minimum expenditure on Railway works within the Province from the date at which the surveys are sufficiently completed to enable that amount to be expended on construction. In naming this amount, I understand, that, it being alike the interest and the wish of the Dominion Government to urge on with all speed the completion of the works now to be undertaken, the annual expenditure will be as much in excess of the minimum of \$2,000,000, as in any year may be found practicable;—which was negatived on the following division:—

The Report of the Sub-Committee appointed to audit the Printing Accounts, and for other purposes, together with the "Report of the Clerk of the Committee on the Printing Services of the past year," and the "Parliamentary Printing Account, Annual Statement, from the 1st July, 1879 to 30th June, 1880," all hereto annexed, which, having adopted, they respectfully recommend for the consideration of both Houses.

 REPORT OF THE SUB-COMMITTEE.

COMMITTEE ROOM,
8th February, 1881.

The Sub-Committee of the Joint Committee on the Printing of Parliament to whom was referred the auditing of the accounts for the past year, as also to arrange for the payment or adjustment of the amount due to the service under your control, by the Queen's Printer; beg leave to report as follows :—

That they have carefully compared the balance sheet with the vouchers connected therewith, and found all the entries correct, and being thus satisfied with the correctness of the accounts, have certified accordingly.

The Auditor General had also examined these accounts in detail and had certified to their correctness.

The work of auditing the accounts caused your Committee some labour, but this work is greatly lightened by the correct and systematic manner in which all the books and accounts connected with this important service are kept by your clerk.

In reference to the amount due by the Queen's Printer, say \$7,612.61, we recommend that the sum of \$2,070.94 be deducted from the amount and written off the books, this amount having been placed to your credit on the certificate of the Queen's Printer, but not drawn, and for the balance \$5,541.67 we recommend that the Queen's Printer should ask for a supplementary vote, which we understand the Auditor General thinks is the best mode of settling the matter.

It must be very gratifying to your Committee to perceive that the cost of the Printing Service for the past year as managed by you shows the large reduction of \$11,242.86 as compared with the expenditure of the previous year.

All which is respectfully submitted.

REPORT OF THE CLERK OF THE COMMITTEE.

COMMITTEE ROOM,
17th December, 1880.

To the Chairman and Members of the Joint Committee on Printing.

GENTLEMEN,—I beg to submit the Annual Statement of the Parliamentary Printing Accounts for the fiscal year ending the 30th June, 1880, as examined and signed by the Auditor General, who offered the following observations thereon.

OFFICE OF THE AUDITOR GENERAL OF CANADA,
OTTAWA, 7th December, 1880.

SIR,—I have the honor to send herewith the statement of your expenditure during the fiscal year ended 30th June, 1880, on account of Parliamentary Printing, which I have signed, and I beg to offer the following observations.

The expenditure shewn by your statement is \$57,727.65, and the actual disbursements of cash during the year, as shewn by my report, is \$60,177.29. The difference is explained by the following statement :—

Total cost of Parliamentary Printing as per Auditor's Report.....		\$60,177 29
Paper in stock at commencement of year...	\$5,250 40	
Less in stock at close of year.....	2,158 37	
		<u>3,092 03</u>
		\$63,269 32
Balance due by Queen's Printer		<u>5,541 67</u>
Expenditure, as shewn by your statement.		\$57,727 65

QUEEN'S PRINTER'S ACCOUNT.

On the 4th March, 1880, at the request of the Queen's Printer, \$2,070.94 was charged to the appropriation for Miscellaneous Printing, and credited to that for Parliamentary Printing, consequently that sum should be deducted from the account of that branch, and the balance remaining at the debit would be \$5,541.67 instead of \$7,612.61, as shown by your statement.

I have the honor to be, Sir,
Your obedient servant,

(Signed) J. L. McDougall,
Auditor General.

Henry Hartney, Esq.,
Clerk,
Dept. Printing of Parliament.

With regard to the observation that \$2,070.94 was credited to the appropriation for Parliamentary Printing, thus reducing the balance due by the Queen's Printer, I was not notified that such was the case, consequently that sum still remains on my books as a charge against the Queen's Printer.

At the commencement of the present year, the Queen's Printer granted a certificate for the balance due, but a Letter of Credit was not issued, for the reasons as explained in the following letter from the Auditor General :—

OTTAWA, 15th December, 1880.

SIR,—Referring to the expenditure on account of Parliamentary Printing for the fiscal year ended 30th June, 1880, I would beg to state that an application was made in July last, asking for the transfer of \$10,878.31, the cost of sundry official reports supplied to various Departments, from this account to the debit of Miscellaneous Printing, but as the balance available of the appropriation for the latter account was only \$7,351.19 only that amount was so transferred. Subsequently, application was made to have the then balance \$5,541.67 due by the Queen's Printer on account of these reports furnished for 1879-80, charged to the appropriation for Miscellaneous Printing for the current year, but I deemed this objectionable, as it would increase the available appropriation for Parliamentary Printing for this year by that amount.

It would now seem to me to be proper that this balance of \$5,541.67 should be written off your books.

I have the honor to be, Sir,

Your obedient servant,
(Signed), J. L. McDOUGALL,
Auditor General.

H. Hartney, Esq.,
Acct. House of Commons,
Ottawa.

The cost of the Printing Service of Parliament for the past year, as shewn by the Statement now submitted, is \$57,727.65, being a decrease in the year's expenditure of \$11,242.86 as compared with the previous year.

On the 19th May last, Mr. James Barber, the Contractor for supplying the Printing Paper, died. I was furnished with an Extract from his last Will and Testament as follows :—

"I give, devise and bequeath to my son, John R. Barber, my Paper Mills, &c., together with the goodwill of my business and "Firm Name," and the benefits of "all contracts now entered into in connection with said business, the benefit and "proceeds of any securities deposited by me for the carrying out of such contracts, &c."

The service of Printing and the supply of Printing Paper have been well performed during the Recess, but I had to notify the Binder that certain portions of his work was not in accordance with the specification. He has promised that the defects shall be remedied.

All which is respectfully submitted.

HENRY HARTNEY,
Clerk, Joint Committee on Printing.

J. Lynskey*, Superintendent of the Canadian Pacific Railway, at Winnipeg, with the object of assisting the working classes of Winnipeg and St. Boniface, by providing as many cars as possible, for the use of those desirous of bringing in cordwood from the East of the Province, have been interpreted by the said *T. J. Lynskey*, in such a way as practically to give to the Honorable *Gilbert McMicken*, Speaker of the Legislative Assembly of Manitoba, a monopoly of the entire carriage of cordwood, and that instead of lowering the price of cordwood, that monopoly has been the source of considerable profit to the said Honorable *Gilbert McMicken*, and against the instructions mentioned in the letter of the Honorable the Minister, dated the 31st ult., addressed to Captain *Thomas Scott*, Member for Winnipeg ?

OTTAWA, TUESDAY, 15TH FEBRUARY, 1881.

PRAYERS.

Four Petitions were brought up, and laid on the Table.

Mr. Speaker informed The House, that he had received from the Governor General's Secretary, the following letter:—

GOVERNMENT HOUSE,
OTTAWA, the 15th February, 1881.

SIR,

I am directed by the Governor General to inform you, that it is His Excellency's intention to proceed to the Senate Chamber to day at 3.30 P.M., for the purpose of assenting in Her Majesty's name to a certain Bill passed by the Senate and House of Commons.

I have the honor to be, Sir,
Your most obedient, humble servant

F. DE WINTON, Lt. Col. R.A.,
Governor General's Secretary.

The Honorable

The Speaker of the House of Commons.

Mr. Speaker gave his decision on the *Richelieu Election Petition*, which is as follows:—

“After having given a most careful consideration to the Petition of *Edmund Ritter*, and others, of Sorel, representing that there has been a failure of justice in the matter of the trial of the Election Petition complaining of an undue Return for the Electoral Division of *Richelieu*, and praying to be allowed to make proof before this House of the allegations therein made, I am of opinion that, the same cannot be properly received, for reasons which I now propose to state.

The Petition sets forth, that on the 4th November, 1878, a Petition was fyled in pursuance of the Statute in the Superior Court at Sorel, by two duly qualified Electors, contesting the Election of the Member elect for *Richelieu* for corrupt practices by himself and agents. Later in the same month a counter Petition was fyled by the Member elect against Mr. *Barthe*, his opponent at the said Election. On the day appointed for the trial, Mr. Justice *Gill* dismissed the two Petitions for want of proof. His judgment, declaring the sitting Member duly elected, was forwarded to this House, in accordance with the law governing such matters, and was recorded in the Journals.

The present Petitioners now allege that the trial was not brought to issue in good faith, but that it was conducted collusively with the view of presenting any full investigation into the corrupt practices charged against the sitting Member. They declare that had they been substituted for the original Petitioners and permitted to come into Court, they would have been able to prove that the Member elect had been returned to Parliament by means of corrupt practices committed by his agents and himself personally. They declare that he has no right to the seat he has occupied up to the present time, and pray The House to allow them to come forward and lay before it all the evidence, necessary to prove their various allegations. In other words, they wish this House to re-open the whole case, and review not only facts previous to the judgment of the Court, but such evidence as they may desire to adduce with respect to the serious allegations set forth in their Petition.

Now the only question that this House has to consider is, whether this Petition is not in effect a Petition, questioning the Return of a Member, which, as it has been admitted on both sides, cannot be properly received by The House, in view of the fact that it has divested itself of its right of trying such matters by referring them to the jurisdiction of an independent judicial tribunal. In handing over this power to the Courts, The House still reserved to itself the right of taking notice of any legal disabilities affecting its Members, and issuing writs in the room of Members judged to be incapable of sitting—but the Petition now under consideration, both in its terms and scope, is a Petition questioning the Return of a Member, and not within the purview of this House.

By the Act 37 *Victoria*, Chapter 10, the House of Commons divested itself of its original jurisdiction for the trial of all matters growing out of the Election and Return of Members having the right to sit therein, including the withdrawal and abatement of any Election Petition in consequence of alleged corrupt agreement between the parties concerned. That power now belongs to the Courts of justice, which try all election cases in conformity with the Statutes in that behalf provided.

The 63rd Section of the Dominion Controverted Elections Act, 1874, expressly provides that all Elections held after the passing of the said Act shall be subject to the provisions thereof, and shall not be questioned otherwise, than in accordance therewith, showing clearly that the determination of the judicial body to whom that power has been delegated is final to all intents and purposes.

Now the Petition in question declares in express terms that the sitting Member, "has no right to the seat he occupies;" and were the prayer of the Petitioners granted, the logical result would be the virtual resumption by The House of the jurisdiction which it has in its wisdom handed over to the Courts. It asks The House to sit as a Court of Appeal upon a judgment rendered by a Court of Justice, though such judgment ought to be final according to the law.

If the Petition should be received it would then be competent for any Member to move that it be referred to a Committee; and if such a motion were agreed to, the various allegations in the Petition would constitute the order of reference by which the Committee would be governed in its proceedings. In this way, a door would be opened to the indiscriminate reception of Petitions attacking generally the Return of Members, though not governed by any of those formalities necessary even in those times when The House possessed full jurisdiction over Controverted Elections. To grant the prayer of the Petition, would be to violate the general principle which lies at the basis of all the Legislation adopted by the English Parliament since 1868, and by the Canadian Parliament since 1873, that the Courts should alone adjudicate on matters of Controverted Elections. When the law has been proved to be inadequate to provide a sufficient remedy in any case, then Parliament has always come forward, as the various Statutes in amendment of the Act of 1874 prove, and passed the Legislation necessary in the premises.

The principle which guides Parliament in such cases can be understood by reference to a Statute passed in 1876. When no Petition charging the existence of corrupt practices has been presented under the Act for the trial of Controverted Elections, then 25, or more Electors of a district can sign and present a Petition in

which they state that corrupt practices have prevailed, or that they have reason to believe that such practices have extensively prevailed at an Election; but that Petition must be accompanied by a solemn declaration under the Statute in that behalf, signed by the said Electors stating that their allegations are true to the best of their knowledge and belief. They must also deposit with the Accountant of the House of Commons a sum of One Thousand Dollars. That Petition must be presented within 60 days after the publication in the *Canada Gazette* of the Return of the Election if The House is sitting, or if Parliament is not sitting, within 14 days after the next meeting of Parliament. Even in this case The House does not take cognizance itself of the allegations set forth in the Petition. It may only present an Address to the Governor General praying him to cause an enquiry to be made in such matters, and accordingly a Commission of inquiry is issued with such powers as determined by Statute.

It will therefore be seen that this Petition is irregular:

1st. Because it asks The House to sit in appeal of a judgment rendered in conformity with the provisions of the Dominion Controverted Elections Act, 1874;

2ndly. Because it is not in compliance with the requirements of 39 *Victoria*, Chapter 10, "An Act to provide for more effectual enquiry into the existence of corrupt practices at Elections of Members of the House of Commons," nor with those of 42 *Victoria*, Chapter 6, "An Act to amend an Act to provide for more effectual inquiry into the existence of corrupt practices at Elections."

In view then of the fact that the Petition is in conflict with the letter and spirit of the law which governs The House in such cases, and does in effect question the right of an Honorable Member to his seat,

I have to decide that the objection raised by the Honorable Member for Bagot is well taken, That the Petition cannot be received."

A Message was received from the Senate, agreeing to the Bill No. 37 respecting the Canadian Pacific Railway, *without amendment*.

Sir *Leonard Tilley* delivered two Messages from His Excellency the Governor General, which were read by Mr. Speaker, as follows:—

GOVERNMENT HOUSE,
OTTAWA, 15th February, 1881.

On motion of Sir *Leonard Tilley*, the said Messages and Estimates were referred to the Committee of *Supply*.

A Message was received from His Excellency the Governor General, desiring the immediate attendance of The House in the Senate Chamber.

Accordingly Mr. Speaker with The House went to the Senate Chamber;—and being returned;

Mr. Speaker reported, that His Excellency had been pleased to give, in Her Majesty's name, the Royal Assent to the Bill:—

An Act respecting the Canadian Pacific Railway.

Mr. *Domville*, from the Select Standing Committee on *Banking and Commerce*, presented the First Report of the said Committee, reporting the following Bills *with amendments, viz*:—

No. 8. To reduce the Capital Stock of the Exchange Bank of Canada, and otherwise to amend the Act respecting said Bank.

No. 35. Further to amend the Act incorporating the Canada Guarantee Company, and to change the name of the said Company to "The International Guarantee Association."

The Committee also beg leave to report the following Resolution, as a recommendation:

Resolved, That as the time for the reception of Reports on Private Bills will expire *to day*, The House be requested to extend the same for a period of two weeks.

Mr. *Drew*, from the Select Standing Committee on *Standing Orders*, presented the Sixteenth Report of the said Committee, which is as follows:—

The Committee have examined the notices given on the Petition of *Edward McSweeney*, and others, of the County of Westmoreland, New Brunswick; praying that any Bill to be introduced having for its object the incorporation of the Moncton Harbour Improvement Company, may become law, and find them sufficient.

On the Petition of the Citizens Insurance Company of Montreal; praying The House to dispense with the notice usually required for the introduction of Private Bills; also for the passing of an Act to reduce their Capital Stock, and for other purposes; the Committee find that notice was published in the *Canada Gazette*, and in two local papers for one week only—but as the proposed amendments were submitted at a general meeting of the Shareholders for their consent and unanimously passed, therefore recommend a suspension of Rule 51.

The Committee have also examined the notices given on the Petition of the Hon. *G. W. Allan*, and others, of the City of Toronto, for an Act of incorporation under the name of the British and Colonial Insurance Company, and find that no notice was given in the *Canada Gazette* and for the full time in a local paper, but as no private rights can be affected, they recommend a suspension of Rule 51.

The following Bills were severally introduced, read the first time, [and ordered for a second reading, *to-morrow, viz*.:—

By Sir *Albert Smith*:—Bill No. 59 to incorporate "The Moncton Harbor Improvement Company."

By Mr. *Platt*:—Bill No. 60 to incorporate the Don River Improvement Company.

Mr. *Langevin* presented,—Return to Address to His Excellency the Governor General of the 7th instant; for a Return of all correspondence which has taken place within the past year between the Government of the Dominion and the Imperial Government, on matters relating to the Boundaries of the Provinces of Ontario and Quebec.

And also,—Return to an Order of The House of the 28th ult.; for a Return of the Report of the Engineer who, in 1880, conducted the Exploratory surveys of the River St. Francis, in the County of Yamaska.

Mr. *Pope* (Compton) presented, — Return to an Order of The House of the 31st March, 1880; for Returns shewing the names, date of appointment of all persons appointed by the Dominion Government as Commissioners, Secretaries, or otherwise, in connection with the Canadian exhibit at the Paris Exposition, held in the year 1878; together with a detailed Statement of all moneys paid for salary of each; also, a Statement, in detail, of moneys paid for expenses of living, travelling, printing, advertising, or otherwise; to whom paid, and the time of service of each.

And also, — Return to an Order of The House of the 28th ult.; for copy of a Report of the Canadian Commissioners appointed in connection with the Paris Exhibition.

On motion of Mr. *Domville*, the time for the reception of Reports on Private Bills, was, in accordance with the recommendation of the Select Standing Committee on *Banking and Commerce*, extended to a period of two weeks, from to-day.

Mr. *Mousseau* moved, that the Bill No. 49 to amend the "General Inspection Act of 1874," and the Act amending it, be now read a third time.

Mr. *Gillmor* moved in amendment, that the Bill be re-committed to a Committee of the Whole, with instructions that they have power so to amend the Bill, as to make the Inspection to be in no case compulsory; which was negatived on the following division:—

PRAYERS.

Two Petitions were brought up, and laid on the Table.

The following Petitions were read and received :—

Of *T. Archambault* and others; praying to be allowed to withdraw their names from the Petition requesting that the affairs of the Banque Ville Marie be wound up, and further that the Bill to reduce the capital stock of the said Bank, may become law.

The Committee have also had under consideration the Bill No. 26 to incorporate the Ontario Investment Association, and beg leave to report that the Preamble of the said Bill has not been proved to their satisfaction, because it is their opinion that the

provisions of "The Canada Joint Stock Companies Act, 1877," gives large facilities for the incorporation of Loan Companies on conditions approved by Parliament, and it is unnecessary and objectionable to grant a special Act of incorporation for that purpose without special reason, and no such reason has been shewn in this case.

The Committee would recommend that the fees and charges paid on the last mentioned Bill, be re-funded, less the charges for printing and translation.

NOTICES OF MOTIONS.

Mr. *Casgrain*—On Friday next—BILL intituled: “An Act to amend the Consolidated Railway Act, 1879.”

Mr. *MacDonnell* (Inverness)—On Friday next—The following Resolutions:—

1st. That it appears by the Public Accounts that the cost to the Country of the Sessions of Parliament is yearly increasing.

2nd. That such increase of cost is largely due to the increasing length of the said Sessions.

3rd. That it is the duty of Parliament to adopt every means consistent with ample and wise Legislation, and the due discharge of Public Business, to curtail as much as possible the duration of its Sessions, and thus in this respect to retrench Public Expenditure.

4th. That it is the sense of this House, after several years of experience, that the publication of the *Hansard* offers irresistible inducement to many of its Members to make unnecessarily lengthy and frequent speeches to the great prolongation of said Sessions.

5th. That the discontinuance of the *Hansard* would save to the Dominion the sum of \$18,562.50 now paid for its publication, and the additional sum which would be saved by the consequent shortening of the Sessions, and would besides enable the Members of both branches of Parliament to return at a much earlier date to their homes and private business.

Resolved, Therefore, that the official reporting and publication of the Speeches and Debates of this House be discontinued after the expiration of the present Session of Parliament.

The Bill No. 80 to incorporate "The Acadia Steamship Company (Limited)," was read the second time, and referred to the Select Standing Committee on *Banking and Commerce*.

The following Addresses to His Excellency the Governor General were voted,— and Orders of The House issued to the proper officers, *viz* :—

By Mr. *Landry*:—Address to His Excellency the Governor General, for Copies of all Correspondence between the Government and any person or persons, in relation to the establishment, between Quebec and Lévis, of a system of Ferry-boats to connect the Intercolonial with the Quebec, Montreal, Ottawa and Occidental Railway, immediately after the construction of the proposed Branch of the Intercolonial from St. Charles to Lévis.

By Mr. *Tassé*:—Order of The House, for a Statement shewing the Revenue and Expenditure in connection with the Union Suspension Bridge, on the Ottawa River, from 1867, up to 1st January, 1881.

Mr. *MacDonnell* (Inverness) moved, that it be Resolved,—

1st. That it appears by the Public Accounts that the cost to the Country of the Sessions of Parliament is yearly increasing.

2nd. That such increase of cost is largely due to the increasing length of the said Sessions.

3rd. That it is the duty of Parliament to adopt every means consistent with ample and wise Legislation, and the due discharge of Public Business, to curtail as much as possible the duration of its Sessions, and thus in this respect to retrench Public Expenditure.

4th. That it is the sense of this House, after several years of experience, that the publication of the *Hansard* offers irresistible inducement to many of its Members to make unnecessarily lengthy and frequent speeches to the great prolongation of said Sessions.

5th. That the discontinuance of the *Hansard* would save to the Dominion the sum of \$18,562.50 now paid for its publication, and the additional sum which would be saved by the consequent shortening of the Sessions, and would besides enable the Members of both branches of Parliament to return at a much earlier date to their homes and private business.

6th. That, therefore, the official reporting and publication of the Speeches and Debates of this House be discontinued after the expiration of the present Session of Parliament.

Mr. *Landry* moved in amendment, that all the words after "said Sessions" at the end of paragraph 4 be expunged, and the following inserted instead thereof:—"That it be resolved consequently, after the present Session of Parliament there be only published in the *Hansard* a synopsis of the speeches delivered in this House, thereby saving a considerable sum of money."

Mr. *Jones* moved an amendment to the said proposed amendment, that the words after "thereof" be expunged, and the following substituted therefor:—"That the speeches of Members of this House be reported by the *Hansard* Reporters *verbatim et literatim*—and that no time be given for alterations and corrections—and that no Member of this House shall be allowed to speak more than *one hour*, without the consent of The House."

And a Debate arising thereon;—the said motion of amendment in amendment was, with leave of The House, withdrawn.

The question being then put on the amendment;—it was negatived on a division. And the question being then put on the main motion;—it was negatived.

By Mr. *Farrow*:—Address to His Excellency the Governor General, for Copies of all Correspondence between the Government and any of its officers and all others, respecting certain irregularities which occurred in the business of one Mr. *Wells*, a brewer of Goderich, pertaining to the Inland Revenue Department, in the year 1875.

By Mr. *Orton* :—Bill No. 88 to prevent agents of foreign Railways and others, from holding out inducements to persons to emigrate from Canada.

By Mr. *McCuaig* :—Bill No. 89 to relieve borrowers from the payment of extortionate rates of interest.

By Mr. *McDonald* (Picton) :—Bill No. 90 to remove doubts as to the power to imprison with hard labor, under the Act 32 and 33 *Victoria*, Chapter 28, and the Act 37 *Victoria*, Chapter 43, respecting vagrants.

Also :—Bill No. 91 to prescribe an oath to be taken by employés on Telegraph lines, under the control of the Government.

And also :—Bill No. 92 for winding up Insolvent Banks and other incorporated Companies.

The Bill No. 78 to amend the Act 40 *Victoria*, Chapter 10, intituled: "An Act to amend and consolidate the Acts respecting the Customs," was read the second time, considered in Committee of the Whole, amended, reported, the amendment agreed to, and the Bill read a third time, and passed.

The Bill No. 83 further to amend an Act respecting Savings Banks in the Provinces of Ontario and Quebec, and to continue for a limited time the Charters of certain Banks to which the said Act applies, was read the second time, considered in Committee of the Whole, reported, read a third time, and passed.

A Message was received from the Senate, agreeing to the Bill No. 64 to continue in force for a limited time the Act 43 *Victoria*, Chapter 36, *without amendment*.

Also,—with the following Bill No. 93 of their own, intituled: "An Act to amend the Inland Revenue Act, 1880," to which they desire the concurrence of this House. (On motion of Mr. *Mousseau*, the said Bill was read the first time, and ordered for a second reading, *to-morrow*.)

Sir *Leonard Tilley* moved, that Mr. Speaker do now leave the Chair, for The House to go again into Committee of *Supply*.

Mr. *Blake* moved in amendment thereto, that all the words after "that" be left out, and the following inserted instead thereof:—

"the leaders of the present Government during the General Election of 1878, declared, that if restored to power, they would re-adjust, but not increase the Tariff.

That in 1879 they so increased the Tariff, that the average rate of taxation has been raised, according to the Trade and Navigation Returns from 14.03 per cent in 1877-78, to 19.70 per cent in 1879-80, or by over 40 per cent.

That the reason given for this departure from their Election-pledges, was that the increase was required, in order to balance the public revenue and expenditure.

That the Government estimates the expenditure for the current fiscal year at \$25,573,000, being \$2,070,000 in excess of that for 1877-78, and the revenue for the current year at \$27,586,000, being \$2,013,000 in excess of the expenditure for the year, and \$4,297,000 in excess of the expenditure for 1877-78.

That the Government estimates the expenditure for 1881-82 at \$26,389,000, being \$816,000 in excess of that for the current year, and \$2,886,000 in excess of that for 1877-78; and the revenue at \$27,800,000, being \$1,411,000 in excess of the expenditure for the year, and \$4,297,000 in excess of the expenditure for 1877-78.

That it is thus proposed to raise for the current and the next fiscal years a revenue of \$55,386,000, being \$3,424,000 in excess of the expenditure for those years, and \$11,800,000 in excess of the expenditure, according to the scale of 1877-78.

That the rate of taxation is excessive and should be reduced; and in effecting such reduction regard should be had to those taxes, which press most severely on large masses of the population, which bear most unequally on different parts of the Dominion, and which, while most oppressive to the consumer, are least productive of revenue;"—which was negatived on the following division:—

And provided further that the company or companies exercising the running powers as herein provided shall have the right to interchange through traffic with any other railway company or companies whose line or lines of railway shall reach to and connect with the lines of the Company.

2. In order to afford reasonable facilities to all companies whose lines of railway may at any point or points be connected with and form a continuous line of railway or part of the continuous line of railway with the railway of the Company, for the receiving, forwarding, delivering, interchange and working of traffic upon and by way of the several railways belonging to or worked by such companies respectively, the Company shall, for the purposes of all traffic whatsoever whether passengers and their baggage, including the usual accommodation for express matter, or freight of any description, including live stock and minerals, and whether such traffic shall originate or terminate upon the railway systems of such companies or either of them, or come from or be destined to some other railway or railways or other carriers connecting mediately or immediately with them, at all times receive, ticket, bill, invoice and forward the traffic upon and over its railway from such connecting point to or towards its destination, and deliver any and all such traffic as consigned, either in final delivery upon or from its own railway, or to some other carrier for further transmission to its destination according to the ticket, bill, or invoice; and in like manner shall receive, ticket, bill, invoice and forward the traffic destined to or by way of such connecting railway and duly deliver the same at such connecting point to such connecting railway; and the Company shall afford to all such companies having connecting railways as aforesaid, all needful accommodation, facility and convenience at their stations and by their trains and otherwise and by through rating, billing, and ticketing for the promotion of their business and the interchange of such traffic.

4. And the Company shall carry all such traffic interchanged with any such connecting railway at the lowest mileage rate for the time being charged or received by it for the carriage of like or similar classes of traffic over the same part of its railway, which lowest mileage rate shall in no case exceed the *pro rata* mileage rate charged or received for the haulage of the like or similar classes of traffic over any part of the whole line of railway worked by or in interest with the Company.

5. Provided that nothing herein shall oblige the Company to accept for the carriage of any such traffic less than its *pro rata* share, according to mileage, of the entire through charge, rate or fare at which the same shall be carried by railway.

6. And provided further, that the Company shall be obliged to furnish the facilities and to work through traffic with any other connecting company, only so long as the said other company shall afford to the Company the like facilities in return.

7. In case the said companies shall fail to agree upon the extent or manner of working or carrying into effect the provisions contained in sections two and three of this Act, such matters and difference shall be settled by three arbitrators, appointed from time to time, one to be appointed by each of the said railway companies, parties to such difference, and the third by one of the Judges of the Supreme Court of Canada, and in the event of either of the said companies refusing or neglecting to appoint such arbitrator for the space of ten days after being requested or notified so to do by the other company, then the said Judge shall appoint such arbitrator for the company so neglecting or refusing; and the decision and award of the said arbitrators, or a majority of them, shall be final and binding on the said companies, and may be enforced in any court of law or equity having jurisdiction in the premises.

Sir *Leonard Tilley* moved, that Mr. Speaker do now leave the Chair, for The House to go again into Committee of *Supply*.

Sir *Richard Cartwright* moved in amendment, that Mr. Speaker do not now leave the Chair, but that it be *Resolved*, That the expenditure for the year 1878 was \$23,503,158,—That the expenditure for the year 1880 was \$24,850,634,—That the Estimates for the year 1882 amount to \$26,475,650,—That a very large proportion of this expenditure consists of fixed charges, or of charges of a permanent character, which when once created are either incapable or very difficult of reduction,—That recent legislation and the completion of existing engagements will result in a steady increase of the fixed charges within the next few years,—That experience has shown, that the consequence of rapidly increasing the fixed charges is to produce great embarrassment in the public finances,—That The House views with regret the proposal of the Government to expend for the year 1882, \$1,615,016 more than the expenditure for 1880, and \$2,962,492 more than the expenditure for all purposes in 1878; which was negatived on the following division:—

OTTAWA, THURSDAY, 17TH MARCH, 1881.

PRAYERS.

Four Petitions were brought up, and laid on the Table.

The Petition of the Toronto District Lodge of the Independent Order of Good Templars, was read and received ; praying that the Bill now before Parliament, to amend the Canada Temperance Act, and to permit the sale, under the said Act, of liquors containing less than *ten per cent* of Alcohol, may not become law.

Mr. Colby, from the Select Committee appointed, to assist Mr. Speaker in the direction of the Library of Parliament, so far as the interests of this House are concerned, and to act as Members of a Joint Committee on the Library, presented a Report of the said Committee, which is as follows :—

That the accounts of the Librarian of the expenditure of the Parliamentary Grant for the augmentation of the Library during the past year, have been examined and approved : the Report of the Sub-Committee of audit is herewith submitted.

Amongst the payments heretofore made out of this Grant, the Committee observe accounts for the purchase of a limited number of Law Reports, of the Supreme Court, and of the Superior Courts in Lower and Upper Canada, for presentation to foreign Libraries, by way of exchange. The Committee are of opinion that these payments ought not to be charged to the Library Grant, but that they should be liquidated by the Government, from the fund available for similar purchases of Books, for the purpose of distribution to the Library Exchanges.

Several Petitions have been made to the Committee, by Canadian authors, for pecuniary encouragement to their respective publications ; but the Committee have agreed that they have no jurisdiction to consider such applications. They have resolved to adhere to the decision already made, on two or three occasions since Confederation, that it is the province of the Executive Government to determine, by Order in Council, what Books may be deserving of special encouragement, by the purchase, out of the public funds, of copies to be distributed to Institutions at home or abroad. In arriving at this conclusion, the Committee desire to repeat the hope, expressed in a former Report, which was presented on the 12th April, 1871, that the Government would place in the hands of the Librarian, for distribution to Public Libraries abroad, in return for valuable donations received from them, "a sufficient number of copies of all Canadian works of general utility or special value.

The Committee have approved of the purchase by Parliament of the choice and unique collection of Coins and Medals illustrating the history of Canada, from the earliest date in our annals, of which special mention was made in the Report which they presented to both Houses last Session. In the event of their recommendation being sanctioned, and this collection deposited in the Library, it will be necessary that adequate arrangements should be made for its suitable care and preservation, from loss or injury.

The attention of the Committee has been called to the tariff of prices established by themselves,—so far back as in the Session of 1864, in the Parliament of Canada, previous to Confederation,—as the proper amount to be allowed to Artists employed in painting Portraits of Speakers of either House of the Canadian Parliament;—and they have agreed to revise the same. In view of the higher appreciation of Art in Canada, at the present time, and the ordinary prices chargeable by all portrait painters of established reputation in the Dominion, the Committee consider that four hundred dollars is a suitable and reasonable price to be allowed for each Portrait to be painted for the Portrait Gallery of Parliament; and they recommend that this sum be allowed to the Artist who has been employed in painting the likenesses of the Honorable Messieurs Anglin, Botsford and Blanchet.

REPORT OF THE SUB-COMMITTEE OF AUDIT.

The Sub-Committee appointed by the Joint Library Committee of Parliament for the Session of 1880-81 to Audit and Report upon the Account of Receipts and Expenditure connected with the Library of Parliament for the past year, present the following Report:—

That they have inspected the accounts and vouchers submitted to them by the accountant—numbered 696 to 808, both inclusive, from March 10th, 1880, to January 17th 1881—amounting to \$9,659.70, and have also examined the several cheques drawn in payment thereof, which they find to correspond therewith, and submit herewith an abstract of the account as indicated by the Books for the information of the Committee.

It will be perceived that a marked improvement in the financial condition of the Library has been effected, the outstanding debt having been reduced from \$6,972.63 in 1879-80 to \$752.47 at the time of the Audit.

The amount available therefore, after deducting the existing indebtedness from the reduced sum placed in the Estimates (viz: \$3,500, one half of the usual grant having been retained to repay the advance made last year) will leave only a balance of \$2,747.53 for the service of the current year, requiring the strictest economy to be rigidly enforced, in regard to the expenditure, to bring the accounts into a satisfactory state.

The Sub-Committee in the course of their Audit and enquiries into the state of the Library, finding that the endeavours of the Librarian to secure the return of books to the Library, prior to the opening of the Session, in accordance with the rules, have proved ineffectual, would draw the attention of the Joint Committee to a list prepared by the Librarian of a very large number of unreturned books in the hands of Members and others at the opening of the present Session—with a view of devising some means for remedying the evil in future.

Items 1 to 7, inclusive, of Resolution 1, were severally concurred in.

And the question of concurrence being put on Item 8, of Resolution 1 ;

Mr. *Paterson* (Brant) moved in amendment thereto, that the said Item be amended, by exempting Lapwelded Tubing from the proposed increase of duty ; which was negatived on the following division :—

Mr. Blake moved again in amendment, that the Bill be re-committed to a Committee of the Whole, with instructions that they have power to amend the same, so as to provide that the existing conditions under the conventional Boundary agreed upon by the Governments of Canada and Ontario in 1874 shall not, pending the settlement of the true Boundary, be affected prejudicially to the interests of either of the contracting parties, or to those of the inhabitants of Prince Arthur's Landing, Thunder Bay, and other parts of the territory which have been under the control of and treated as part of Ontario, and are represented in this House as part of that Province; which was negatived on the same division.

The main motion was then agreed to, and the Bill accordingly read a third time on a division, and passed.

On motion of Mr. *Stephenson*, the Second Report of the Select Committee appointed to superintend the Official Report of the Debates of this House during the present Session, was concurred in.

A Message was received from the Senate, agreeing to the following Bills, *without amendment, viz* :—

and

Also,—agreeing to Bill No 80 to incorporate “The Acadia Steamship Company (Limited),” *with one amendment*. (On motion of Sir *Leonard Tilley*, the said amendment was taken into consideration, and concurred in.)

Also,—agreeing to the Bill No 77 to amend the Dominion Lands Acts, *with one amendment*. (On motion of Sir *John A. Macdonald*, the said amendment was taken into consideration, and concurred in.)

Mr. *Stephenson*, from the Select Committee appointed to superintend the Official Report of the Debates of this House during the present Session, presented the Third Report of the said Committee, which is as follows :—

The Committee would respectfully recommend that each Reporter of the Official Staff be allowed to employ an *Amanuensis*, at a remuneration, not exceeding \$12 a week, each, the said payment to be made by the Accountant of The House.

Appended to this Report will be found a communication from the Official Reporters of The House, submitted for the information of the Committee, but which was not taken into consideration at this late period of the Session.

To the Members of the Sub-Committee of the Select Committee appointed to superintend the Official Debates of The House during the present Session.

Gentlemen,

The members of the Debates Reporting Staff beg respectfully to avail themselves of the opportunity afforded them of laying before the Committee a detailed statement of the practical working of the present system of reporting and publishing the Debates, and of offering some suggestions which we trust may prove of assistance to the Committee in perfecting the scheme which was adopted last Session.

SUCCESS OF THE NEW SYSTEM.

Notwithstanding the difficulties incident to the inauguration of a new system, by a staff whose members had not previously worked together on an official report, we venture to believe that the Committee will concede the general success of the scheme. In addition to the favor with which the reports have been received by members of

the House, we can confidently claim that a comparison of our work, not only with all previous official reports of the Debates of this House, but with the reports published either in the United States, Europe, or the Australian Colonies, will still more clearly demonstrate the success of the experiment.

The "Debates" will, we believe, compare very favorably with the "Congressional Record" whose reporters are experienced and thoroughly trained, and in the publication of which no expense is spared in securing a thoroughly satisfactory report.

Mr. *Edwards*, of the Congressional staff, for many years a well known Canadian reporter, upon receiving from Mr. *George Holland*, of the Senate Official Staff, copies of the "Debates" in its new form, wrote that the work "seems to be very creditably got out, though I like the type of our 'Congressional Record' better."

CHIEF OBSTACLES OVERCOME.

The present system which was adopted as an experiment has, we hope, so far fulfilled the intention of the House in establishing an official report, that it may now be regarded as a permanent institution.

Not only were the staff called upon this Session to overcome the difficulties inseparable from an experimental system, but at the very outset they were put to a severe test in being called upon to issue promptly each day a report of the Pacific Railway Debate during which the House sat nightly to an unusually late hour for a period of six weeks.

The failure of all systems previously tried by this House has been due to the great delay which has taken place in issuing the report in that form, a delay so great as to render that issue practically valueless. Instead of the Report, as in past years, drifting further behind every week until at the close of the Session it was frequently six weeks in arrear, the issue this Session has been promptly made each day, even after an all night's sitting. This being the case we submit that all that is necessary to the complete success of the system which the House has established is to adopt such measures as may tend to improve the character of the Report.

WORK OF THE STAFF.

In order that the Committee may have some idea of the difficulties under which the Report has thus far been issued, and may gather the reasons why it has not been of as high a character as the staff believe to be attainable, we beg to submit some facts and comparison bearing upon the daily work of the staff.

From the opening of the Session to the First of February the total number of pages of the "Debates" is about 825—an amount of matter exceeding the average sessional issue of the Official Report of previous years. This gives an average length daily of about 30 pages. The daily issue has reached as many as 48 pages.

The reports after publication are carefully read for book form; members corrections received and inserted; revises obtained after corrections have been made, and these again carefully examined. The preparation of an Index is also part of the daily work, and there are necessarily many other duties connected with the publication of the Report.

The Committee can probably arrive at a tolerably correct opinion as to the work performed by the staff by a consideration of the following comparisons:—

The *Toronto Globe* has, for years, supplied three short-hand Reporters for an average daily report of 5 to 6 columns; equal to 8 pages of "Debates."

The *London Times* has fifteen (15) men in the Gallery each Session. They turn out an average of about 17 columns of that journal; equal to 35 pages of "Debates."

These figures give the following average of daily work per man:—

<i>Globe</i> Reporters.....	2½	pages	" Debates."
London <i>Times</i> Reporters (who produce the highest average of English Parliamentary Reporters).....	2½	"	"
" Debates " Reporters.....	5	"	"

The following is a comparison of the number of men respectively engaged on other official and leading newspaper reports:—

The official staff of the House of Representatives, U.S., numbers 5 note-takers with 10 amanuenses	15	men
The London <i>Times</i> ' staff comprises 15 men and one superintendent.....	16	"
The London <i>Standard</i>	17	"
The <i>Morning Advertiser</i>	15	"
In the French Chamber of Deputies 10 note-takers are employed, with 10 amanuenses.....	20	"

Mr. Hansard, in his evidence before a Committee of the English House of Commons, said, that for the preparation and issue of a daily official report of the Debates of that body there would be required a total staff of 30 men.

Mr. Hansard, in reply to a private inquiry, estimated that for the publication of a Canadian report, such as that now issued, there would be required a staff of from 17 to 18 men.

In regard to the difficulties attendant upon the issue of a daily official report of the English House, Mr. Hansard said in his evidence above referred to:—"I conceive that it is possible, if desirable, that a debate up to 12 o'clock might be laid upon the table at the meeting of the House the next day, but it would be a *very tremendous task*."

We submit that the above facts and figures prove that the Debates staff should be strengthened.

Although the "Debates" Reports have been issued promptly this Session, yet the work has been accomplished under very great strain which has been undergone for the purpose of demonstrating the practicability of the scheme—a strain which the experience of this Session convinces us could not be maintained except at the risk of permanent injury to health.

The Reporters' duties begun with the opening of the House and are kept up without cessation until from one to three hours after the adjournment, and they have generally to utilize one hour out of the two hours of the six o'clock recess. Under this constant pressure it is alike impossible to secure accuracy in note taking, or literary excellence of transcript.

HOW MAY THE STAFF BE STRENGTHENED?

It being obvious, as we conceive, that the staff should be strengthened, the question arises as to how that object can best be attained.

Two methods present themselves:—

1. Increasing the number of Reporters.

2. Providing amanuenses. Of these two methods we believe the advantages lie altogether with the second. It is the system which has been in successful operation for many years in the United States and in France in preparing official reports of their Legislative bodies. American and English Law Reporters also largely employ amanuenses to lighten their labors and secure the rapid transcription of notes.

From our own experience, we are satisfied that the system would work well if applied to "Debates" reporting. Owing to pressure upon the staff this Session, it was found necessary to adopt it in a modified form, and the results were found to be eminently satisfactory.

Mr. Edwards in the letter already referred to, says :

" I am sorry to learn from your letter that the Reporters are not better paid ; without the amanuensis system the work at times must be very severe. Might they not suggest to the House the propriety of an additional grant to provide a couple of amanuenses for each Reporter."

ADVANTAGES OF THE AMANUENSIS SYSTEM.

Among the advantages of this system are the following :—

(1.) The Reporter being relieved to some extent from the drudgery of long-hand writing could be in a better condition, both mentally and physically, to take full and accurate notes in the House.

(2.) With the assistance of an amanuensis the note-taker would be able to devote more time, and consequently more attention to the literary character of the report, and also be less liable to misinterpret the utterances of speakers.

Should the Committee concur in these suggestions we would respectfully urge the adoption of the method in force in the United States Congress, namely, that the Reporters be paid salaries sufficient to enable them to employ amanuenses. The reasons we urge for having the engagement of the assistants in the hands of the staff are, among others :

(1.) That the Reporters being responsible for the character of their work would feel it to be in their interest to engage only competent men.

(2.) That owing to their professional connection throughout the country, they would have the best possible opportunities for obtaining men whose training and qualifications would fit them for the work.

EXTRA COST TRIFLING.

The net expense involved in the employment of amanuenses, under the above proposition, would be comparatively trifling. The charge for proof-corrections has always been one of the heavy items in connection with the cost of publication. By strengthening the staff in the manner suggested this particular charge would be reduced to a minimum, both as regards proofs for the daily issue and those which embody corrections made by members for the issue in book form.

Further, we feel assured that members would be spared the trouble and annoyance of making more than the most trifling typographical corrections, for it has been a matter of daily observation by members of the staff that the great bulk of the alterations are to be attributed (1) to inefficient proof reading and (2) to the haste with which the manuscript has necessarily been turned out, and to the difficulty experienced by the Reporters in taking accurate notes after midnight, owing to their being engaged unremittingly during many hours in the drudgery of long-hand writing from which they would be considerably relieved by the employment of amanuenses.

REMUNERATION OF THE STAFF.

The idea entertained by members of the staff when they accepted their present positions, was, that if they could demonstrate the practicability of issuing a daily report of the Debates, which should be satisfactory in other respects, their salaries would be made commensurate with the onerous and responsible duties they are called upon to perform.

The salaries now paid are such as cannot afford any guarantee of the permanency of the Staff, a feature which the Committee last year regarded as an essential element of the system.

The acceptance of a position on the Debates Staff precludes shorthand reporters from obtaining employment in that capacity during recess. For such men the only sources of employment are the newspapers and the Law Courts. The Staffs of those

journals that employ shorthand reporters, are filled almost exclusively with a view to Sessional work, and during the summer months their staffs are usually reduced rather than increased. As regards Law Reporting there is no field for employment in Ontario during the Recess, as the work is now done by permanent official stenographers.

The remuneration allowed to members of the Debates Staff can therefore only be regarded as an annual salary, as there is no certainty of obtaining additional employment, and when it is obtained the scale of payment is so low that it cannot be taken into account in estimating the incomes of members of the staff.

Law Reporters in Ontario, who are permanent officials of the Courts, paid by the Provincial Government, who enjoy as much leisure as the Reporters of the House of Commons and whose positions required much less general experience and professional training realize net incomes of from \$1,700 to \$1,800. In Quebec the incomes of first class law stenographers range from \$1,200 to \$2,000.

Under the present system members of the staff are officers of the House and they venture to submit that their salaries should bear some relation to the responsible and difficult positions they occupy. We are stating what is capable of abundant proof when we say that we are the worst paid officials of the House. The Auditor General's Report shows this most clearly. A sessional doorkeeper receives \$800, messengers as high as \$900, while the salaries of translators, assistant-translators, Clerks of Committees, Journal Clerks and others officers of that class vary from \$1,200 to \$1,800. Upon this point we would respectfully suggest the examination by the Committee of the Clerk of the House, himself an experienced Parliamentary Reporter.

We trust that the facts and figures above presented will be deemed by the Committee as affording sufficient grounds for recommending the strengthening of the staff, and the more adequate remuneration of the members.

WORKING OF THE STAFF.

In order to secure the efficient and harmonious working of the staff, we venture to submit the following suggestions for the consideration of the Committee.

In case disputes should arise among members of the staff in regard to matters connected with the performance of their official duties, the decision of the Chief Reporter shall be binding, and in case of serious offence he shall have power to prevent any member who may refuse to abide by his decision, from taking his share of the work until the matter in dispute shall have been settled by the Chairman and the Committee.

Should any member of the staff desire to absent himself during working hours, he shall communicate with the Chief Reporter stating the reason for, and the length of such desired absence, and if a substitute acceptable to the Chief Reporter be provided the latter may grant leave of absence for the period specified.

OFFICE ACCOMMODATION.

We desire to call the special attention of the Committee to the wholly inadequate and unsuitable character of the office accommodation provided for the Debates Staff. The room presently occupied is altogether too small; it cannot be ventilated without creating dangerous draughts, while the fact that it is open to the reception of all the noises from the corridors and post office, seriously inconvenience the staff in the performance of their duties. We venture to suggest that a room at least as large as the present press room is absolutely necessary to enable the Reporters to perform their duties with any degree of comfort.

In conclusion we take the liberty of saying that from the experience of the Session thus far, we are convinced that if the modifications suggested in this report are adopted, the present system of reporting and publishing the Debates can be

rendered as nearly perfect as possible, both for the purposes of a daily Report to be placed in the hands of members, and of a permanent record of the Debates of the House.

Then the Honorable the Speaker of the House of Commons addressed His Excellency the Governor General as follows :

“MAY IT PLEASE YOUR EXCELLENCY,

“The Commons of Canada have voted the Supplies required to enable the Government to defray the expenses of the Public Service.

“In the name of the Commons, I present to Your Excellency a Bill intituled :—
‘An Act for granting to Her Majesty certain sums of money required for defraying certain expenses of the Public Service, for the financial years ending respectively the 30th June, 1881, and the 30th June, 1882, and for other purposes relating to the Public Service,’
to which I humbly request your Excellency’s assent.”

To this Bill the Royal assent was signified in the following words :

“In Her Majesty’s name, His Excellency the Governor General thanks Her Loyal subjects, accepts their benevolence, and assents to this Bill.”

After which His Excellency the Governor General, was pleased to close the THIRD SESSION of the FOURTH PARLIAMENT of the DOMINION with the following:—

Honorable Gentlemen of the Senate :

Gentlemen of the House of Commons :

In relieving you from your Parliamentary duties after a long and laborious Session, I desire to convey to you my best thanks for the assiduity you have shewn in their performance.

The measure for transferring to a Company of Capitalists the responsibility of constructing and operating the Canadian Pacific Railway will, I am assured, be followed by most favorable results, and ensure the rapid completion of this great national enterprise.

It will be the duty and the interest of the Company to use every exertion to dispose, without delay, of the lands granted in aid of their undertaking, and for that purpose to promote immigration from abroad on an extensive scale.

My Ministers will, however, not relax their efforts in the same direction, and it is believed that by the united action of the Government and the Company, a large influx of valuable settlers may be confidently anticipated. Such an immigration must tend to enhance the value of the public domain in the North-West.

While the system of making free grants to actual settlers will be maintained in its integrity, the lands reserved for sale by the Crown will, it is believed, be disposed of at prices sufficient eventually, to repay the whole of the expenditure of money by the Dominion on the construction of the Railway.

The extension of the Boundaries of Manitoba will confer the privilege of Local self Government on the people already resident in, or who may hereafter occupy, the area now added to the Province, and by enabling the Legislature to establish Municipal Institutions in its enlarged limits, tend greatly to add to the welfare of that interesting region.

The amendment of the Naturalization Laws will, I trust, have the effect of removing the disadvantages under which emigrants from Europe have hitherto laboured, and of attracting a large influx of population from the Old World.

The consolidation and amendment of the General Railway Acts, and of the Laws relating to Government Railways has improved and systematized our Railway Legislation.

I am pleased to observe that you have not been forgetful of the interests of the Indian population of the North-West. It is greatly to be hoped that the efforts to induce them to forsake their nomadic habits and betake themselves to pastoral and

agricultural pursuits will be successful. By no other means can their civilization be promoted, the Indians themselves rendered self-reliant and self-supporting, and the Dominion Treasury relieved of the burden of rescuing them from their apparently chronic state of destitution.

The extension of our Telegraphic system by Cable in the River and Gulf of St. Lawrence, will aid the fisheries and the commerce of Canada and increase the safety of its waters.

Gentlemen of the House of Commons :

In Her Majesty's name, I thank you for the supplies you have so readily granted, and heartily congratulate you on the improved condition of the Revenue.

Honorable Gentlemen of the Senate :

Gentlemen of the House of Commons :

I bid you now farewell, and trust that when Parliament re-assembles we shall be able to congratulate ourselves on Canada, having meanwhile, enjoyed a season of peace and prosperity.

The Parliament of the Dominion of Canada was then prorogued to Monday, the 2nd of eMay, *next*.

JOSEPH GODERIC BLANCHET,

Speaker.
