LABOR DAY 9 a.m.—Dog Show opens. 10 a.m.—Butter making in dairy building.

TO LABOR

O ye who toil at forges, Or in the factories stand, Ye are the blood and muscle Of every mighty land.

Upon your vast endeavor The thrones of greatness rest, 'Tis only by your struggles A nation's name is best.

What the your lives be troubled, Anxious the angelic days, The glory of the people Shall be your meed of praise.

Out of the endless working, The shrouded seems the goal, Still on the angelic progress, Advancement of the Whole.

O ye who toll at forges, Whose thunder drowns your moan, Ye yet shall reap the harvest Which rightly is your own.

—Harry R. Blythe.

SPECIAL SERMONS ABOUT PROBLEMS OF LABOR

Rev. Dr. Taylor of Cooke's Church Proffers Some Good Advice to the Man Who Toils.

This is Labor Day, but there will be no parade of the organized toilers. Instead of a street display they will honor the day in the exhibition grounds, with sports and a baby show.

Rev. W. L. Armstrong, pastor of the Metropolitan Methodist Church, last night reviewed the organization of labor interests as against that of capital.

With a most ingenious, but highly practical homily, Rev. Dr. A. T. Taylor, senior pastor of Cooke's Church, held the attention of a large audience, conjuring chiefly of labor in the sermon.

ENGLAND OFFERS GREAT LABOR CONFLICT

Lock-out of English Boiler-makers May Result in Many Strikes—More Power is Needed to Compel Arbitration—Workmen Barred From Political Field.

LONDON, Sept. 4.—The conciliation act has operated so well in bringing employers and trade unions together and preventing strikes that the general lockout in the shipbuilding industry of Saturday is a standing surprise.

As an agreement was made a year ago thru the good offices of the board of trade by which peace was apparently secured between the powerful Employers' Federation and twenty-six trade unions engaged in the shipbuilding industry.

May Paralyze Industry. Certain provisions of the agreement have been disliked by the members of the powerful boiler-makers' union, and the officials have been unable to maintain discipline.

The superficial judgment of newspaper editorial writers runs heavily against the trade union for its lack of discipline and its enforcement of its treaty obligations, but a sounder conclusion is that the employers have a marked advantage over the workers in their own resources of the action.

LABOR DAY IS VOLUNTARY. The labor leaders, since the great lockout of engineers thirteen years ago, have been convinced that they cannot stand up against the collective resources of the employers.

BURNS MUST PAY FOR HIS SEAT. If He Won't Batterse Laborites Will Quit His Service.

CANADA, A NEW HEAVEN ON EARTH FOR THE DISCOURAGED MASSES OF BRITAIN

—BISHOP INGRAM.

The memorial in stone of the bicentenary celebration this week of the Anglican Church in Canada, All Saints' Cathedral, Halifax, which was opened with special services on Saturday and Sunday.

Bishop of London Preaches Inaugural Sermon in Halifax Cathedral Marking Bicentenary Celebration.

DESTINED TO BE GREATEST NATION FOR GOOD OR EVIL.

HALIFAX, Sept. 4.—(Special)—"Canada in excelsis. Canada, the light of the nations," was the keynote of the services held in the new cathedral of All Saints today, which was dedicated yesterday with impressive ceremonies.

Also not completed, the cathedral, as it stands, is a noble piece of masonry, with an impressive solidity of aspect, due to the massive walls and buttresses of the local iron stone, of which it is built, but which, in the glow of sunset, take on a peculiarly delicate rosy tint.

And here this morning Bishop Willington Ingram of London preached the gospel of glad tidings for the poor and the wretched of Great Britain, and the Atlantic. He chose his text from Revelation xxii. 1: "And I saw a new heaven and a new earth."

Canada, said the pastor, is destined to be the greatest nation for good or evil in the world. In the near future there will be a hundred million living here.

Canada's Destiny. Canada, said the pastor, is destined to be the greatest nation for good or evil in the world. In the near future there will be a hundred million living here.

Toronto and Transcontinental Railways

We can make Toronto in quick order a city of a million people. But we have to do some things. Among them: Maintain and develop the policy of cheap municipal power and light, so as to attract more factories and more work people in them.

Urges on parliament the deepening of the Welland Canal to 25 feet, so that we may have Buffalo rates from the head of Lake Superior (Fort Arthur) to Toronto. Toronto could, under such conditions, be a great milling centre for Northwest wheat.

But, above all, develop in every possible way our trade with Northern Ontario and the Canadian West. These two propositions are practically one. The deepening of the Welland Canal is also in this direction.

There is a third Toronto-Winnipeg service that is more vital to this city than the other two, and that is the Canadian Northern. So far there is a gap of about five hundred miles to build between Gowganda Junction (northwest of Sudbury) and Port Arthur, whence the line is open to Winnipeg and Edmonton.

SUICIDES IN WEST. Former Newmarket Man Cuts His Throat at Brandon.

BRANDON, Sept. 4.—(Special)—Jos. Rogers, a pioneer farmer of North Brandon, having been here for twenty-eight years, coming from Newmarket, Ont., committed suicide this morning by cutting his throat from ear to ear with the razor with which he had started shaving. He was crazed by financial troubles, resulting from the unsuccessful operation for several years of a threshing outfit, and was led recently to his mortgaging his farm for \$10,000.

GIRL GOT FRIGHTENED. Imagined She Was Harried of Moving Picture Thriller.

Such was the effect of a "thriller" which she had witnessed in a few days at the Grand Theatre, that a young girl, Gertrude Long, 19 years, 470 Delaware avenue, said she imagined the events as taking place in real life, and collapsed at Carlton and Yonge-streets at 8.24 p.m., shortly after leaving the theatre. The scene had depicted two men pursuing a girl, and she imagined herself to be pursued. She was taken to St. Michael's Hospital and soon recovered.

GRANTED HONORS RESERVED FOR ROYALTY

Government's Reception to Cardinal Vannutelli Had Been Duly Submitted to Rome for Approval—Important Matter of Secret Societies to Be Threshed Out.

MONTREAL, Sept. 4.—(Special)—Cardinal Vincenzo Vannutelli has arrived in Montreal, and here, as at Quebec, Three Rivers and Sorel, has been accorded a reception worthy of the official nature of his mission.

His official title is pontifical delegate to the Eucharistic Congress. The great delegate is evidently as well in health as he looked last year in London. He has the same warm, pleasant smile, and physically is vigorous for a man past three score and ten.

When the pontifical legate left Rome on August 21, so definitely had his program been prepared that it was published in the Catholic newspapers there, and some of the more prominent ones had a special issue devoted to the reception accorded by the Dominion Government.

Important Discussions in Secret. The legate to-day is the central figure in the most Catholic city in the world, and there is no longer a chance that the public side of his mission will be marred in the slightest way.

Public on the other hand, will learn but little of the really important things of the legate's visit, for those will be guarded by secrecy. There have been in the air, however, since the preliminary council of the legate's members of uneasiness which the legate is naturally expected to put to rest.

When his business with the heads of the government of the Dominion and the episcopacy has been finished, Cardinal Vannutelli will repair to Washington, where he will be received by President Taft, according to White House rules of courtesy. The Fairbanks and Roosevelt incidents at Rome are of no official significance. Thence the pontifical legate will proceed to New York, where, with Cardinal Logue, the primate of all Ireland, he will assist at the consecration of St. Patrick's Cathedral, the arrangements for which have been carried on upon a scale of pomp that will quite dim the glory of Montreal's present spectacular splendor.

Feeling the Pulse. Cardinal Logue is already known in New York, and his voice has already been heard in the great cathedral on Fifth-avenue; but it is Cardinal Vannutelli's first appearance in the United States, and the bishops of the republic will leave nothing undone to signalize it.

BIG SHOW FOR VISITORS. The visitors to the big fair should not overlook the fact that there are many displays in the down town stores worth a visit. For instance in the Dineen showrooms at 140 Yonge-street, there is a splendid exhibition of fur garments for women and men. The display so large that a suitable place at the fair could not be secured.

HAMILTON HAPPENINGS

8-YEAR-OLD GIRL ENDS HER LIFE IN THE BAY

Beatrice Stokes a Suicide—Fire at Valley Field Farm Imperils Several Famous Racehorses.

HAMILTON, Sept. 4.—(Special.)—Beatrice Stokes, aged 16, 90 East McCaully-street, disappeared after leaving work about 1 o'clock Saturday night, and this afternoon her body was found in the bay. She apparently committed suicide. She was employed by Stanley Mills & Co. She had been escorted home by a gentleman friend, who left her at the door, and as soon as he left she must have gone direct to the bay, as she was seen walking near the reeve's wall by Morris Mundy, 364 North Hughson-street, and Ambrose Ambo, 413 Mary-street, about 11 o'clock. Later the boys found her hat near the wall and they notified Constable Yaxley. He with several other constables dragged the bay until 2:30 a.m. and not finding any trace of the body, gave it up until to-day. No reason is known why the girl should have taken her life. Coroner Dickson will conduct an inquest.

The death occurred early this morning of Dennis McKenzie, aged 80, 81 North Cashmere-street. He is survived by a widow and family.

Peter J. Depew, a resident of Brant County for many years, died on Saturday night at the residence of his son, R. S. Depew, 35 St. Matthew-avenue, aged 76.

Miss Hobson Dead.

Miss Dorothy Hobson, who was injured in an automobile accident on the mountain on June 30, died last night at St. Joseph's Hospital. Miss Hobson was the daughter of Robert Hobson, general manager of the Steel Co. of Canada. This is the second fatality as the result of Mr. Hobson's automobile going over the brink of the mountain. The cause of the accident was never clearly explained, but it was thought to have been due to dust getting into the eyes of the chauffeur, Kiehl McRae, who was badly injured.

Fire at Valley Field stable, the home of the Hendrie thoroughbreds, was nearly wiped out by fire on Saturday afternoon. The fire occurred in the midst of a heavy fall of rain, which saved the famous racing stables. There were seven valuable racers in the stable at the time, but they were all saved. The loss is estimated at \$2000.

A thunderstorm broke over the city and surrounding country about 4 o'clock and the lightning seemed particularly heavy in the region of Burlington Plains, where the Valley Farm is located. In the midst of the storm, a flash struck the flag pole on the training stable, and the wind kept the flames away from the rest of the buildings until a detachment of the city fire department reached the scene.

The horses in the stable were: Martine, winner of the Futurity; David Garrick, winner of the Chester Cup; Glimmer, Charlie Gilbert, Harvey and Denham, the valuable stud. The other horse was a driver, Col. Hendrie and Major Hendrie were both at North Bay at the time.

Crowd Saw the Champion prize fighter, who is appearing in Toronto this week, stopped off here this afternoon for dinner, on his way from Buffalo in an automobile.

Several hundred people swarmed around the auto.

It is said that the garment workers who, it is claimed, were brought from New York by Copley, Noyes & Randall, threatened to go on strike on Saturday when the firm undertook to pay them wages on the piece work system. The men demanded that they be paid according to week work or they would strike, and the company told them they would be fixed up on Tuesday. The shop was picketed this morning by some of the union men, as they said they thought the firm might try to work some of its men to-day. The union officers claim to have leases which they intend to New York men, directing them to come to Rochester by train, from there to Olcott Beach by electric car, thence to Toronto and Hamilton by boat.

FOUL PLAY SUSPECTED

Had Altercation With an Italian and Now His Body is Found in River.

SAULT STE. MARIE, Ont., Sept. 4.—(Special.)—The body of Walter Macdonald, the young street car conductor who mysteriously disappeared from the Soo last Saturday, was taken from the river near the boat club at 3 o'clock this afternoon. Saturday morning Macdonald asked Superintendent Summerhayes if he could absent himself for the day, saying that he was not well. Nothing had been seen of him since until the recovery of his body, which will be examined to-morrow and an inquest held on Tuesday.

There is a rumor that Macdonald had an altercation with an Italian named Millant, on a car some days before his disappearance, and strength is also given the rumor by the fact that Millant disappeared Thursday and the police have been unable to locate him. It may transpire that Macdonald met with foul play. The young man was 26 years of age, of good habits and had no private affairs which would point to suicide. He had considerable money saved up, which was found in a trunk, with all his clothes, after his disappearance.

THE DOMINION MOTOR CAR CO., LIMITED.

Of Walkerville, Ont., an Up-to-Date Progressive Concern.

These enterprising manufacturers of automobiles, whose attractive advertisement appears on page 3 of this paper, who have a most attractive exhibit of automobiles at the exhibition, although lately commencing the manufacture of automobiles attracted universal attention on account of the beauty and design of their cars and the high grade quality of their mechanism.

The Plant at Walkerville.

Their plant at Walkerville, Ont., is equipped with all the latest machinery and labor saving methods, and each department is under the charge of a superintendent, and no car is allowed to leave their factory until it is thoroughly inspected and tested, and every care and attention is paid to every detail. It is this care and attention to their work which has met with such hearty approval from the public, who are quick to recognize merit when deserved.

Their intention is at all times to maintain the same high grade work, and they will soon establish an agency in Toronto, where their entire line will be ably represented.

BARRED FROM NATIVE LAND

Claim They Lived in Toronto, But Officials Will Not Let Them In.

NIAGARA FALLS, Ont., Sept. 4.—(Special.)—Because of infirmities, the Canadian immigration officers refused to allow four people to enter Canada, although they claimed to be former residents, only one of the four, little Mary Turner, being sound of body. They want to go to Toronto, claiming that city as their former home, but immigration officials declare they never lived there. George Turner, 66 years old, totally blind; Mary Turner, 13 years old; John Clinton, blind in his left eye; Mrs. Clinton, his wife, evidently in the last stages of consumption, are those unable to enter the country they claim as that native land.

Altho Mary Turner says she was born in Toronto, immigration authorities say, the child was not born in Canada. George Turner pleaded with the immigration officers, showing a roll of bills containing over \$600 as proof that he would not become a burden to Canada.

The Last Great Day.

Labor Day represents the last of the summer holidays, and pleasure seekers should not be slow to take advantage of the lake trips. A schedule embracing extra trips is in force on the Hamilton line to-day, the steamers Modjeska and Macassa leaving Toronto at 8 and 11 a.m., 5:30, 7:30 and 11:15 p.m., and leaving Hamilton at 8 and 11 a.m., 2:15, 4:15 and 10:15 p.m. The 50 cent return fare is good on all trips.

Northern Navigation Company.

Sailings from Sarnia, 3:30 p.m. every Monday, Wednesday and Saturday. From Collingwood, 1:30 p.m., and Owen Sound 11:45 p.m., every Wednesday and Saturday. From Penetang, 2:15 p.m. daily, except Sunday.

CANADA NEW-HEAVEN FOR THE DISCOURAGED

Continued From Page 1.

temperance, sobriety and chastity, and to get their own living.

Live in Brotherly Sympathy. The new Canada must have charity, and no pharisaic exclusiveness, but a true nation in the family of nations. The influence of Canada, said the bishop, on Japan and China would be paramount, and that influence would arise out of Christianity. While forty-one per cent of Canada was Roman Catholic, seventeen per cent Methodist, fifteen per cent Presbyterian, and only twelve Anglican, he was grateful to receive that the members of the truths they preached were preached by all. So they might learn to live in brotherly sympathy and forbearance with all those who named the name of the Lord.

Dr. Ingram enlarged on the priceless value of the book of common prayer. It was composed of the most ancient liturgies of Europe, and voiced the thoughts of Christian saints for more than thousand years. In this connection the presentation prayer book sent by King George to St. Anne's was alluded to. The volume lay in the cathedral all day, for examination by the crowds in attendance.

The Right Rev. Mr. Inglis, in the evening the Bishop of Massachusetts preached in a similar vein, according to Canada a great national destiny. China had 300,000,000 of people, and the Bishop of London had said with truth that Canada would hold at no late date a hundred millions. If there was a yellow peril when China was poor and ignorant working by hand and only scratching the surface of their rich earth, what would it be with western industrial civilization? This was but one feature for Canada to consider, but another feature should also be realized that Christ came to save all men. Greater than an industrial building, or a hospital, or a college even, was the gift of a city of a cathedral, where a centre of spiritual uplift, of spiritual solidarity, patriotism and the brotherhood of mind would stand for all time, to send for the spiritual power to cheer, to purify, to uplift and comfort with the name of Jesus Christ.

The service was largely choral, and the magnificent organ, by Cassavant was played by G. F. Austen. All the city Anglican Churches had special preachers, the Bishops of Glasgow, Tennessee, Washington, D.C., Colorado, Ontario, Niagara, Central New York, Toronto, Rupert's Land, Harboursburg and Algoma taking part, among others.

A Truly National Spirit.

While there are representatives of the English churches present and visitors from the United States, the clear and high note of Canadian nationalism is distinctly sounded by all, and there is no reference back to authorities beyond the sea, but a devout recognition of the incarnation of the Word Incarnate in Canada. Here and here as anywhere, and in the nation sovereign and supreme.

The Credo of the new spirit in its rugged native comeliness, and it is not as in the old lands, to the east, but its worshippers turn their faces to the west, and the land which the sun has gone before. It has been erected at a cost of about \$150,000, and a central tower and other additions are yet in the future.

DREADNOUGHTS OBSOLETE

German Working on Smaller Model Said to Effect This End.

BERLIN, Sept. 4.—German naval designers are at work on a small type of battleship, which the Voerwaerts learns, is expected to put the great Dreadnoughts into the obsolete class. The new vessels will be lightly armed and very speedy. In general design they will be similar to the old monitors. Their length will be 280 feet, breadth 34 feet, draught 19 feet, while the hull will extend 59 inches above the water line.

The armament will consist of two 127 inch guns, capable of throwing a projectile of 340 pounds from one great turret amidships. Four explosive gas motors, each of 6000 horse power, will give the vessels a normal speed of 19 knots an hour, and under forced pressure 27 knots. Extraordinarily heavy armor plate will be placed on the decks, turrets and sides of the new vessels. The cost of the new type ships will be considerably less than that of a city class ships. The vessels are spoken of in the navy department as cruiser destroyers.

The Voerwaerts says also that British naval designers are working along the same lines as the Germans.

KILLED BY A HORSE.

LONDON, Ont., Sept. 4.—(Special.)—The 17-months-old son of Geo. May, lot 15, concession 4, London Township, was trampled by a horse on Saturday night, while in the barn, and died soon after. The horse dashed from the stable when the latter was taken off, and the child was directly in its path to the door.

So also is the Ontario Government bound to aid in this work or to modify its land grant already made. The World believes that it is vital for Toronto and Ontario that our representatives urge the immediate construction of this line. A guarantee of bonds and a change in the land grant might be all that is required." "Last of all, it will open up a new section of Northern Ontario. The World was over the Canadian Northern's Toronto-Sellwood service last week. The roadbed is of the best and standard in the way of rails, ballast, stations and rolling stock. The bulk of the Muskoka Lake travel is taking to this system. New sawmills and mines are being opened up, farmers and settlers are flocking in, and the earnings of the road will in another two years pay all the fixed charges, even if the line is not extended." "Let us take one instance, that of the Moose Mountain Iron Mines, which were visited last week. There at Sellwood, 289 miles north of Toronto (23 miles north of Sudbury) is what will soon be one of the great mines of Ontario. It is producing nearly 200,000 tons of iron ore a day, has made a town, is giving work to many men and soon will more. It is giving freight to the railway, and has induced Messrs. Mann and Mackenzie to build a five-mile extension from their main line (50 miles south of Sudbury) to Key Harbor (on Georgian Bay), where they have spent a quarter of a million dollars on ore bins, docks and the latest plant for loading ore. In a year nearly three trainloads a day. This means nearly two millions of dollars a year to be distributed in freights, wages, supplies, buildings and dividends—the great bulk of which will find its way to Toronto. This one mine is more for Toronto than any one mine at Cobalt, and will hardly be touched, as far as its deposits are concerned, a hundred years away. But there is the great Sudbury nickel, miles further up, and M. J. O'Brien and J. R. Booth deposit they propose to develop. Sawmills along the upper portion of this Canadian Northern are also furnishing freight and business for Toronto. But from Gowganda Junction, the present end of steel, the road will go thru the great clay belt, opening up thousands and thousands of new farms, not to mention mining prospects, sawmills, pulp tracts, water powers and the like in the north. Once the 500 miles of gap is built and all this country is fortified to Toronto and Southern Ontario." "When these Pacific lines are built and the new Northern Ontario is linked up with Toronto, Toronto will start to grow into a city of a million people!" "Our policy therefore is to get them built, and to get our local railway services throughout all Ontario extended, completed, standardized, so as to not only accommodate the existing traffic, but be ready for the immensely larger one that is in sight."

Dwyer, undertook the expedition as a rest from professional duties, and as they dispensed with the assistance of guides and Indian porters, the trip was a strenuous altho thoroughly enjoyable." "In the district between the line of the transcontinental railway and James Bay, the party found much big game, including bear and moose, in considerable numbers." "EXPERT FOR OUR MINT Comes From Philadelphia to Establish Gold Refining System." "PHILADELPHIA, Sept. 4.—(Special.)—Leonard P. Morgan, assistant meter and refiner at the Philadelphia Mint, leaves to-morrow for Canada to establish a gold refining system at the mint at Ottawa that will equal the highly perfected process in operation here." "Seven years ago the United States Government purchased from Wobwell, the Holland inventor, the exclusive right to refine gold in this country, according to the process he had discovered, and Mr. Morgan was put in charge of that department. By this process about \$6,000 a year has been saved here by a process of refining by which a large quantity of platinum is taken from the gold and saved, which by former methods, was thrown away as refuse." "Mr. Morgan will receive the same salary he did here, but has a promise of a substantial yearly increase in Canada. He must become a British subject."

## The New Prism Binocular

We have succeeded in perfecting on a Stationary Binocular that is adaptable for use by anyone with a normal eye width, etc., from 2 3/4 inches to 2 3/8 inches, thus obviating the necessity of your requiring to pay a much larger amount for the adjustable binoculars, provided your eyes are in the normal width.

A single and rigid base for the fixing of the four prisms employed, the simplicity of construction being in itself a guarantee of its rigidity. In this way a maximum of solidity with a minimum of weight is obtained, and this without detriment to the optical quality.

The "Mono" is the smallest prism binocular made of those with an equal magnifying power.

Weight—The "Mono," with case complete, weighs 19 ounces; without case, the weight is 12 ounces only.

Field of View — The Field of View of the "Mono" is one of 60 i.e., 105 yards at a distance of 1000 yards. This is greater than any binocular of equal magnifying power that has been made up to the present.

Magnifying Power—Experience has taught that a magnification of 7 diameters is the best for free-hand observation.

Handiness—The special and original form of the "Mono" has been adapted for convenience of handling, usually so awkward with prism glasses. The heavier parts of the instrument have been brought as near as possible to the eye pieces to give a firmness which is especially appreciated when the binocular is used during riding or driving.

We therefore claim for the "Mono" the following advantages:

- Absolute RIGIDITY—Reduction of Weight and Bulk—Increase in the Field of Vision.
- Special price of 7-power Glass, complete, in solid leather carrying case, with shoulder straps. \$11.90
- Five-power Glass, specially priced . . . \$10.90
- Nine-power Glass, specially priced . . . \$12.95

MONDAY MORNING, SEPT. 5, 1910.

TORONTO WILL HAVE THE TUBES

Toronto will have a system of underground tubes notwithstanding the peculiar report of Messrs. Jacobs and Davies, Inc., (including the gentleman with the Scotch name), notwithstanding the peculiar deliverances of Ald. McCarthy, chairman of the special committee appointed to consider the matter; notwithstanding the deliverances of The Toronto Star, which is very hostile to public rights, and especially to the city coming into a system of rapid transit of its own; and notwithstanding, as is only naturally to be expected, the opposition of the Toronto Railway Company.

The World proposes, however, to take some time in discussing this proposition and does not intend to do much with it during the exhibition, otherwise than to say again that Toronto will have a system of tube railways in conjunction with surface railways, and eventually in conjunction with the existing railway system, and that Toronto is easily able to afford such a system, and that contractors from all over the world will compete with one another in building the system at reasonable prices, or in building the system and running it for a stated number of years on a certain percentage of receipts, guaranteeing the city against any loss whatsoever. But, as we said above, we do not propose to discuss it for a few days yet, but in the meantime we would suggest that Ald. McCarthy and the special committee have the report printed with all the maps and diagrams. Put in the Scotch gentleman's picture. Also that of Mr. Jacobs and Mr. Davies.

The city is by no means the loser in having this report. We have gained experience, we have gained some knowledge, and we have something to go on when we submit the proposition to the contractors. Perhaps, the best and most immediate move the city can make is to secure legislation at the forthcoming session of the legislature, empowering the city to take over the Toronto Street Railway as it now exists. But we are going about it deliberately and no one can beat the people in realizing public ownership in this matter.

AMUSING.

According to that amusing capitalistic organ, The Financial Post, The World is writhing under the report of the two United States engineers, who went out of their way to advise against municipal operation of transit facilities. The World has no occasion to suffer anguish from so trivial a cause. In the earlier days of its long campaign against the exploitation of valuable franchises for private profit it met with far more serious opposition than from its own city and country that left its writers unwraving. Now that it is on the winning side it will take much more than the gratuitous opinion of two United States engineers or the interested comment of a high financial advocate to disturb its equanimity. What The World wants is to have the provincial resources and public services of Ontario conserved and administered for the masses of the people. The Financial Post is only a parasite living on the greater parasites, who now find that Ontario and its cities are no longer a happy hunting ground for acquiring franchises of vast potential value and then manipulating them for their own profit and the public detriment.

BENEFITS OF PUBLIC SERVICES.

Those acquainted with the results of municipal ownership and operation of public franchises in the United Kingdom know that its benefits are both direct and indirect. It has not only provided cheap and efficient services, but has been an effective curb on the methods peculiar to private companies in their conduct of franchise grants. In other words to-day publicly controlled services set the standard for those still under private operation. The Ontario municipalities that are connected with the hydro-electric commission or are within the sphere of its influence have already discovered how powerfully it has modified the policy of the private electric companies. Rates which before the initiation of the Whitney-Beck power policy were declared to be absolutely the lowest possible are being cut in other directions, and every effort is being made to retain customers by inducements which would never have been offered, but for the competition of the public power scheme. On that ground alone the hydro-electric commission is well worth the constant and loyal support of the public of Ontario.

Nor should it be forgotten that the Niagara power scheme is only the first stage in a policy of application to the whole province. With its successful

completion will come the warrant to extend its principle to all the free water powers of Ontario. No public body has done better work than the provincial hydro-electric commission, established as it was on a sound business basis and entrusted to able and honest management. Not the least of the incidental advantages which will come from it is the encouragement it has given to business men of proven capacity to undertake public service. No citizens of Ontario stand higher in popular estimation to-day than the Hon. Adam Beck and his colleagues, and to them will always belong the credit of carrying an experiment of great and permanent value to a triumphant conclusion. The experience that has been gained ensures that subsequent developments of the hydro-electric policy will be even more easily and profitably launched. It is also matter of satisfaction that the capital invested in the government loans necessary to finance the Niagara undertaking has been largely of provincial subscription. Better far assist in this way provincial expansion than send the money out of the country for the benefit of company promoters in other lands.

SOMETHING FOR NOTHING.

Railway companies have a convenient method of adapting their arguments to their immediate objects. When they want concessions from city councils and other representative bodies, the public interest and the public convenience find no more zealous advocates than your company official. But when that same public interest and convenience require better service, necessary extensions and the provision of additional facilities, that same company official ceases to recognize their appeal. In fact the public interest and convenience to a railway company is simply a phrase useful when something for nothing is wanted, but absolutely negligible when urged as a reality. Appreciation of the stand made by the works committee of the city council against the C.P.R. request for siding accommodation on Lake-street cannot be withheld. The aldermanic protest was justified if only as a clear notification of the general dissatisfaction with the treatment accorded Ontario and Toronto by the company.

ROOSEVELT AND REFORM.

Wall-street is panicky over the re-entrance of ex-President Roosevelt into active politics. In its parlance he has again upset everything which burned into the plain man's talk means that he has renewed with all his accustomed energy his defence of the people against the tyranny of monopoly. Wall-street is the boss of the United States, and J. Pierpont Morgan is the boss of Wall-street. So, as Lincoln Steffens says in Everybody's Magazine, the United States has at least a personal sovereign. Certainly he wields more power over the United States, its banking institutions, its commercial and industrial affairs, and its financial system, than does the most autocratic of potentates within the bounds of the civilized world. The situation is a serious one and cannot last. A movement has begun for a restoration of sounder and more stable conditions, for the elimination of crooks and grafters of all kinds from politics, from federal and state legislatures from civic government. Colonel Roosevelt will be the central figure on the people's side, and will have the support of President Taft in his struggle for the purification of public life. Special privilege is doomed. The defenders of the old and rotten regime will fight to the last, but theirs is a hopeless cause. Reform will not come without storm and stress, without crises and upheavals. But out of the chaos a new and better spirit will enter into political and business life. Democracy will come into its own and profiting by past errors will lay broad and deep the foundation of a saner and truer social order.

FOURTH WARD'S GROWTH

ZEPPELIN'S DIRIGIBLE VINDICATED.

BERLIN, Sept. 4.—Count Zeppelin yesterday vindicated the worth of his type of dirigible, when, in the Zeppelin IV, he flew from Baden to Heidelberg, 53 miles, in 65 minutes, carrying a crew of 7 and 12 passengers. The average speed of the immense balloon was 49 miles an hour, which is believed to establish a record for dirigibles.

Former Torontonians' Success.

An old Toronto boy who was playing in the city last week was Wm. E. Slaght, M.A., B.D. For the last ten years Mr. Slaght has been a member of the New York East Methodist Conference. He has just been appointed professor of philosophy in Baker University, Baldwin, Kansas. Prof. Slaght graduated from Toronto University in 1888, carrying off the supreme prize, the governor-general's gold medal. Proceeding to Yale University he entered the theological department there, and after a distinguished course obtained the degree of B.D. in 1892. In 1893 he took up special work in the graduate school in philosophy, and won his M.A. degree. It is an interesting coincidence that Prof. Slaght's intimate friend and college chum, Dr. Russell, was formerly of Toronto, has also been called to a professorship in English in the Wesleyan College, Winnipeg.

Pastor Russell's Sermon

Messiah's Coming Kingdom Spiritual

"Behold, a King shall reign in righteousness, and princes shall rule in judgment."—(Isaiah: xxxii, 1).

BROOKLYN, Sept. 4.—Pastor Russell preached to-day in the Academy of Music, our largest auditorium, the "Tabernacle" being of insufficient capacity. He held a very attentive hearing. There were many Hebrews in the large audience. He said in part: "Coming events cast their shadows before." Startling shadows are all about us. A great change in the affairs of men is indicated and acknowledged by all thoughtful, intelligent people. The world's pace during the past fifty years astonishes everybody. New conditions meet us on every hand. The majority of books written half a century ago are worthless in a scientific sense to-day. Rules and customs and theories of the past, supposed to be immovable and absolutely unchangeable, are being swept away in a whirlwind of scientific, industrial, and commercial change. All these changes necessitate a new view of social conditions and a re-examination of the relationship of religion and the Bible to man and his conditions, as seen from the present viewpoint. The business and social world has been supplanted to keep pace with the steps of progress, some of them gladly and some of them reluctantly. But religionists have been placed in a most awkward position. Religion and moral sense constitute the backbone and fibre of the best progress in civilization. The perplexity of religious thought, and its manifest inability to adjust itself to the changed conditions, is working a serious disadvantage to all disposed to look to the Almighty for guidance in life's affairs.

The theories of science, the improved human conditions, the advancement along scientific lines in material prosperity have turned many of the world's brightest intellects away from God and from the Bible. Many of these, still professing Christianity in an outward, formal manner have really abandoned it. They have capitulated to the "civilization" they have wandered from the divine relation, the Bible, into paths of speculation—their own and other people's. They have been misled by the "progressive" theories of the reverse of the Bible statements. The truth—that instead of man falling from the image of God into sin and death, he is rising from a brute or monkey plane upward, gradually, to divine heights. Instead of looking for a great deliverer, Messiah, Saviour, Life-Giver, they are hoping to be liberated by any outside influence, that certain fancied laws of evolution might help them upward and onward to glory, honor and immortality.

The result is that religious thought to-day everywhere and in all denominations is chaotic. The whole of Christianity is being practically abandoned—admitting that they do not know the truth nor how to adjust their reasoning faculties to present conditions. They are looking for a savior, a light-seeking light. Nevertheless many fear the light lest it shall make manifest their errors or selfish hopes and ambitions which they are unwilling to give up. But they are still pretending to know many things which we and they know that they do not know. But really the struggle becomes more intense. There is a great crisis afoot every line—that the people are awakening and thinking and will no longer receive their errors. Fifty years ago Christian people, full of faith in the Bible which they seriously misinterpreted and read with prejudice, expected to see a savior, were fully agreed that God had given His church the commission to convert the whole world and to establish Messiah's Kingdom, when the nations would learn war no more, but beat their swords into plowshares and their spears into pruning-hooks. Zealous Christians urged that the heathen were going down to a hell of eternal torment at the rate of ninety thousand every twenty-four hours. And noble men and women sacrificed their lives for the good of the heathen, to prevent that awful catastrophe, to help thwart the very program of God, which some of the people of that time had declared was predestinated and foreordained as unalterable. God was certainly attempted. We trust that some good was accomplished. We know that some harm was done, in that fallacious conceptions of the character and plan of the Creator were promulgated amongst the heathen, which have hardened and embittered some of them.

But by and by practical people sought for statistics, and now know that there are twice as many heathens in the world as there were a century ago. Of course, there are unthinking and unattractive people who refuse knowledge and who are to-day claiming with a commendable zeal, but a reprehensible ignorance, that large contributions of money would enable them to capture the whole world for God. Nevertheless, the masses no longer see the matter as they did, and can no longer be swayed to the same extent. Thinking people refuse to believe that God for centuries has so calmly viewing the situation, allowing millions to go to eternal torment. They refuse to believe that their hearts and sympathies are more tender than those of their Creator.

Even the heathen are getting awake to the inconsistency of what has been given them under the gospel label. They are finding out that the word "eternal" signifies "eternity" and that what has been preached to them

is the most awful message conceivable—that all of the heathen and the majority of their civilized neighbors and friends and relatives have been decreed, sentenced, foreordained to eternal torture because of ignorance, because they are misbelievers in respect to which they are the most honest perplexed, the missionaries ask, What shall we preach? The message of damnation does not sound good to the heathen, they do not run after it nor feast their souls upon it. The question comes to the ministers and professors of college through Christendom and they are perplexed what answer to give. The majority of them have become "higher critics" and no longer accept the Bible as the Word of God; they are evolutionists, and no longer believe the Scriptures which the missionary societies were organized to proclaim. They are in perplexity. And many of them are prepared to abandon the former theory of missions and to continue their work henceforth merely along humanitarian lines. Indeed, within the last twenty-five years the missionary work has turned gradually to secular education and medical practice in the interests of the heathen, with little religious doctrine—and so much the better.

Everybody is agreed that the Kingdom of Messiah cannot be brought about by the wholesale conversion of the world. And logical people see that Christianity in its present form is not a Christian who has lost all faith in the Bible—in the law, the prophets and the teachings of Jesus and His apostles. The great cloud of bewilderment which encompasses Christendom is realized by all earnest people—churchmen and others. And no wonder here is a certain dread associated with the dark clouds which are gathering. What kind of a storm will result? And what will be the effect upon the great religious systems of civilization? It is to join hands and to unite these ominous conditions that the clergy of all denominations are arousing themselves in favor of church union or federation of some sort. But the people—the people feel comparatively little interest in the proposition, which they will not oppose, however.

The difficulty with the present situation is that we have stupidly and blunderingly misread the Bible. We have twisted what we did read and picked out certain portions which pleased best our fancies and supported best our various creeds. We have neglected the honest, truthful study which we should have given to our heavenly Father's message. The confusion of Christendom is the result. That confusion and perplexity the Scriptures portray, assuring us that we are being led away from God and away from faith in God and in His relation. We see fulfilled all about us the wonderful prophetic and symbolic words of Isaiah xl. A thousand fall at our side and ten thousand at our right hand—only the "Israelites indeed," in whom there is no guile, will be kept from stumbling in this evil day. The day which we already see everywhere in evidence is only beginning.

our study instead of the Talmud and the creeds of the dark ages have been our undoing. Under all this wrong influence we have failed to cultivate the fruits of the holy spirit—meekness, gentleness, patience, long-suffering, brotherly kindness, love. Instead we cultivated pride, ambition, selfishness. We have done those things which we ought not to have done, and we have left undone those things which we ought to have done. Our help must come from God. According to our understanding of the Scriptures help is near, but coming in an unexpected way. Pride and selfishness blossomed and brought forth a fruitage of strife. The bad example set by Christian people has extended to the world and been thereby appropriated. It has become the spirit of the world of all classes. Now, as faith in the Bible is waning and respect for God and the word is proportionately waning, what could we expect but that which the Scriptures declare is at hand, namely, the "time of trouble such as never was since there was a nation." The selfishness which both rich and poor, learned and ignorant, have cultivated will in that time of trouble, be represented in conflicts between labor unions and capitalistic trusts. The Bible declares that then "every man's hand will be against his neighbor"—all confidence will be lost—the bond of human sympathy and brotherhood will be utterly snapped in riotous selfishness.

The Scriptures identify this trouble with Messiah's taking to Himself His kingdom power and beginning His reign (Daniel xii, 1; Revelation xi, 15). Thank God, the intimations of the Scriptures are that the conflict of that time will be short. It must, however, last long enough to teach humanity a lesson never to be forgotten—that God and His arrangements must stand first and must be obeyed, if blessing is sought.

When it is remembered that Messiah's kingdom is not only to bless those living at the time of its establishment, but gradually to advance the dead from the slumber of the tomb and to give all of Adam's race a full opportunity for obtaining life eternal or death eternal, then it will be seen that the kingdom must be a spiritual one. Then, too, Messiah's kingdom of light is represented as superseding Satan's kingdom of darkness—both spiritual and material. Our text is in full accord—"A King shall reign in righteousness" (Messiah will be that Great King, His bride being associated with Him.) And "princes shall execute judgment

FOWLER'S EXTRACT OF WILD STRAWBERRY. The medicine with a record of cures extending over 65 years. You don't experiment when you buy it. Mr. J. CHAPPELLE, Glenboro, Alta., writes: "While living in England I suffered with acute stomach trouble, colic, diarrhoea, etc. I took various medicines and had a doctor attend me for several weeks, but found no relief. I suffered terrible pain and was gradually getting weaker. In 1905 I came to Canada and suffered with Summer Complaint. I was recommended to take Dr. Fowler's Extract of Wild Strawberry so I bought a bottle (but had no faith in it) and it completely cured me. I now have it constantly in the house and one spoonful always cures me."

PAPAL LEGATE PRAISES LAWS OF GREAT BRITAIN

Declares in an Interview That They Foster Unity and Harmony—Lauds Sir Wilfrid.

MONTREAL, Sept. 4.—(Special).—His eminence the legate to-day in the palace of Archbishop Bruchesi gave your correspondent the first interview on Canadian soil.

Cardinal Vincenzo Vanutelli, pontifical legate, and fourth in rank as to age in the sacred college of cardinals, said: "I take this opportunity of expressing my thanks to the people of the City of Montreal and the province for all the honor they have done me, as well as to thank the federal and local governments, and likewise to express my appreciation of the wisdom of the laws of Great Britain, which foster unity and harmony, and which permit the Roman Catholic subjects of the empire to practice their religion with all possible freedom."

As for the scenery up the St. Lawrence, his eminence had never seen it equalled in the old world. The cardinal, speaking in French, as he does not speak English, added: "As for the government of Canada, I had the pleasure of meeting Sir Wilfrid Laurier in Rome some years ago, and we all learned to appreciate his high qualities as a statesman. Of course," continued the legate, "I do not lose sight of the fact that he is a leader of a political party, and that his acts are not viewed alike by all, but he is certainly a distinguished man."

He said also that the Canadian clergy were an excellent clergy and did honor to their church, and as for the Archbishop of Montreal he could say nothing but good. His eminence was not only attached to his grace as archbishop, but to his person as Mgr. Bruchesi.

Cardinal Vanutelli also told your correspondent that he would read a message to the congress from the Holy Father on Tuesday evening, and would also speak at length the reply to be given by the Archbishop of Montreal.

Finest Display of Grain Ever Shown in Canada—Magnificent Exhibit of Fruit.

Five provincial exhibitions annexed to each other are to be found in the Ontario Government's display in the horticultural building at the Canadian National. So comprehensive and scientifically arranged is each section that the visitor has only one complaint to make. It is that there is so much to interest in the Ontario exhibit that time flies with double swiftness, the display is so absorbing. This is not to be wondered at, when the fact is recognized that the Ontario Government's department of agriculture and minerals is this year making by far the finest show of grain, fruit and minerals ever set up in Canada. The five departments completely fill the western portion of the spacious horticultural building, and are rather cramped for sufficient space at that.

The appearance of the Ontario exhibit is so artistic and picturesque that a veritable golden grain laden fairy-land is presented. This is especially the case at night, when the beauty of the scene transcends description, as the hundreds of incandescent lamps flash and twinkle, radiating all the hues of the rainbow upon the sheaves and garlands.

**Field Crop Competitions.** Mr. J. Locke Wilson has assembled the grain exhibits under a new system this year, with a view to giving prominence to the field crop competitions. As the superintendent of agricultural societies explains to visitors to the Ontario exhibit, the provincial government gives a grant of \$7000 for the field crop competitions, and the different societies advance some of the prize money. The societies meet and select the kind of grain which is to be grown for competition. There are at present more than 2000 farmers in the competitions, when Mr. Wilson first started the field crop competitions there were ten competitors, next year there were 47, last year 77 farmers competed, and this year the number had increased to 110. Mr. Wilson hopes that in the near future each of the 375 societies in the province will take this up. When the grain in the fields is ripe and ready for judging, fifty grain experts are sent out by the department, who go and judge the standing fields of grain. The winners of the first three prizes in each district—and the districts extend from Gienarry to Kenora—are eligible to compete in the competition at the Toronto Exhibition, and the Winter Fair at Guelph of Ottawa. Mr. Wilson arranged this year for large prizes in the wheat and grain competitions, and \$240 is being distributed. This grain and the sheaves, of course, must be from the winning fields in the field crop competitions.

**Winning Grain.** One important point in connection with the field crop competitions is the fact that the prize-winning grain at the exhibition is retained by the department of agriculture, and distributed among the fourteen agricultural specialists in the province, to give to the farmers in their localities. Under the supervision of these specialists, the farmers sow the seed grain, the only requirement being that in the fall they must hand back to the supervisors the same amount of grain as was given to them for seed, for experimental purposes. In this way the best grain is disseminated.

The prize-winning sheaves of grain also are held by the department, and will be shipped to Great Britain for exhibition purposes. The department pays for judging the grain, and for the express charges, as well as supplying all competitors with neatly stenciled sacks in which to place their grain.

**Millions of Dollars.** An impressive object lesson on the overwhelming importance of agriculture in Ontario is furnished in a motto over the entire exhibit, setting forth the fact that last year Ontario's field crops produced \$170,000,000, while this year the production amounted to \$205,000,000, an increase of \$35,000,000. Ontario produces a greater crop than is produced by the combined provinces of Manitoba, Saskatchewan and Alberta. The increase of \$35,000,000 should be sufficient answer to those critics who have been announcing that fewer men worked on the farms than ten years ago, for notwithstanding the fact that there are fewer men working on farms, the increase in production has been phenomenal.

The grain and sheaves shown this year are the best that have ever been exhibited by the province.

An important contributor to the Ontario grain exhibit comes from that important portion of it which is designated as New Ontario. From New Ontario there have been sent this year some surprising samples of grain and vegetables grown in that far northern section of the province. That the land there is even better suited for agricultural purposes than in the older sections of the province is proven by the tremendous size of the grain and the luscious appetizing vegetables grown there. So recently as six years ago, here were but 2000 people in Temiskaming while there are now between 50,000 and 60,000.

**Prof. Zavitz in Personal Attendance** at the Ontario exhibit ably representing the interests of the Ontario Agricultural College, which is doing such a magnificent service for the cause of scientific agriculture in Canada. The exhibit of the Ontario Agricultural College is topped by the bronze bull won in Chicago three times in succession by the O. A. C. student judging class. Some of the work done in the college is shown in the display, which contains examples of good and poor tiles, samples of grain produced on drained, and undrained land, how to dig drains with the proper outlets and other information of interest to farmers. There are also shown some samples of economic entomology, with plant and fungus diseases, and economic botany, showing the different kinds of weeds encountered by farmers. The remedies for plant diseases, with instructions as to spraying, are shown, and some fruit is displayed showing the results of spraying. The best varieties of farm crops are displayed, showing the results of experiments. To illustrate this, tubes of grain show the comparative yield for the last five years. Special attention is given to alfalfa, which has been instrumental in increasing the hay crops and green fodder of the last few years.

**Fruit Growing Progress.** Mr. P. W. Hodgetts is the recipient of hearty congratulations from visitors for the surprisingly good quality of the Ontario fruit shown in the fruit department, of which he has charge.

Ontario is making great strides in the fruit-growing industry, largely on account of the establishment of cooperative shipping associations, and the care taken in the packing of the fruit. In Ontario there are 12,000,000 apple trees, producing 45,000,000 bushels of apples every year. There are also 1,500,000 peach trees, 800,000 pear trees, 1,750,000 plum trees, and 3,000,000 grape vines. Thus it will be seen that many thousands of dollars worth of fruit are grown in this province every year. Some very fine samples of pears, peaches and apples are being shown, which were packed for regular shipment by the St. Catharines Association for the western market. The Ontario and Western Association, which is also in the Niagara district, is showing some fine samples. More than 600 carloads of fruit will be sent to the west from the Niagara district this year. Thirty thousand barrels of apples

**Your Faithful Servant for Years to Come**

Several years ago, no automobile manufacturer could promise more than a season's service from his car. But the rapid advance of this industry within the past few years has enabled the makers of the better class of cars to give assurance of many years of active, efficient service.

The Dominion "Limited" is strictly within this better class of cars.

Materials have been chosen for strength and long life, and the element of cheapness has not been allowed to enter into their choice.

The mechanical design of the Dominion "Limited" is the work of Mr. E. W. Winans,

who is known as one of the foremost designers on the western continent. Successful cars which he has designed run up into the thousands. His aim in designing the Dominion "Limited" has been strength, simplicity, and economy of operation.

This result which he has so satisfactorily accomplished was obtained by the working out of accepted ideas, brought up to date by the careful study of every modern discovery in automobile construction. No new or untried ideas, however, have been allowed to enter into the design.

**Dominion Limited**

Read these details of construction. Take them to some friend who has a car and go over them with him. Make the most unsparring scrutiny. You will then understand why so many experienced motorists are recommending the Dominion "Limited" to their friends, and why the Dominion "Limited" is selling so rapidly that the first season's output will soon be exhausted.

The entire motor is simple, compact and well finished, and runs almost as silent and smooth as an electric car.

**THE CLUTCH:** Large cone clutch, internally lubricated, adjustable springs under leather, insuring grade engagement.

**DRIVE:** Straight line shaft drive through nickel steel gears of ample strength.

**TRANSMISSION:** Sliding selective type, three speeds forward and one reverse. Imported stainless roller bearings. Gears and shaft of highest grade nickel steel, heat treated.

**FRONT AXLE:** Drop-forged, I-beam section, heat treated.

the republic concerning some Catholic movements that have been aggressively advancing their new-born heads for the papal benediction. These movements are ambitious of exerting lay influence along lines hitherto unheard of in the polity of the Catholic Church.

As one noted ecclesiastic expressed it to me, "they would dictate not merely the advancement of their members to place in the civil government; but they would take a hand in the appointment of bishops, which is the function of the Holy Father himself."

So far as Canada is concerned in this problem, the French-Canadian bishops at least have set their faces against the new lay combinations and are prepared to attack not only their platform but their leaders. But a good deal of ground has been won already and emissaries who have gone to Rome from America within the past year have made not a little headway in certain quarters.

The Church and Freemasonry. It is a result of this temporary triumph that Father Dowling, an English Vincentian priest, has proclaimed the idea of an international Catholic Union or defence league based to begin with upon the Knights of Columbus in America, the Catholics in Ireland, and the Catholic unions in European countries. The call to action is to be directed, Father Dowling says, against Free Masons in all lands, in retaliation for the reputed great political influence of the craft in France, Italy and Spain. This is where some of the Irish bishops and all the French-Canadian bishops are at odds with the proposed propaganda.

Cardinal Logue, who is here with the ablegate, is an opponent of the Hibernian organization, and some of the French-Canadian bishops have repeatedly represented to Rome that the Knights of Columbus in America are not only, as far as could be done, modelled upon Free Masonry, but are withdrawing the widespread sanction which the society has received from American bishops, and in Canada from the now absent delegate, Archbishop Sharrett, the order of the Knights of Columbus is destined, as all things are to come by its own, ultimately and being, as they describe it, a more plastic of the Masonic temple, will in the long run attract disciples to the original fount of its inspiration.

**Divided Over Method.** The issue has distracting features. The advocates of international defence believe in fighting Free Masonry, with Catholic Free Masonry, whilst the opposition holds that the imitation practised of the prototype secret society of the world will have the proverbial lesson and will not be salutary for faithful Catholics, who have hitherto been invited to enter only the society of St. Vincent de Paul.

the greatest layman's organization of charitable activity ever known, and which has spread itself to all lands.

Cardinal Vannutelli will make careful enquiry as to the effect which a change of lay activity from the pure charity of St. Vincent de Paul to the aggressive international campaign of the new Vincentian propagandist would be likely to have. This burning question received a free handling at the plenary council last year, and so outspoken was the clash of opinion that it is forbidden the spokesmen of the Eucharistic Congress. The legate will have all the better opportunity for sounding representative opinion inside the church and sizing up the personal equation, which is involved in the Canadian aspect of the case. Ontario is very much interested in the outcome.

**As to Bourassa.** The old trouble of the indifference of clerical Quebec to the political achievements of Liberal rule at Ottawa had broken out also. Mr. Bourassa is said to be the rising star on this side of the Ottawa River. It is the young students in the seminary who are told to turn their eyes, and it is on the cards to pay him a notable compliment during the present congress, Archbishop Bruchesi being willing to endorse the voucher of Mr. Bourassa's popular influence.

The reception to the legate at the Windsor Hotel on Wednesday evening was not on the ceremonial program of the week, and may be intended to qualify the complexion which the program as arranged would wear. That complexion would not be Rouge by any means, and it is considered necessary for the occasion to show some independence of the clerical arrangements.

Grateful to Bruchesi. Whilst these and other rifts within the lute are more or less apparent, and will not be hidden, they in no way affect the universal gratitude of Montreal to Archbishop Bruchesi, who brought the Eucharistic Congress to his see and thereby turned the eyes of the world to its ancient and modern monuments of Catholic glory. All Quebec would rejoice to see the Archbishop of Montreal with a red cap on his intellectual head. He is a lover of the democracy and has worked well with all men of his faith who stand for moral reform, for temperance and the sanctity of the Sabbath.

There has never been an ecclesiastical in Canada more esteemed by the Protestant population, and even while Mr. Sbarretti sat in Ottawa, Mr. Bruchesi dominated Canadian Catholic opinion.

**SOCIALISTS TO MEET IN VIENNA.**

COPENHAGEN, Sept. 4.—The international Socialist congress adjourned yesterday after a week of turbulent sessions, during which little was accomplished. The next congress will meet at Vienna in 1911. Resolutions were passed urging more intimate relations between Socialists, trade unions and co-operative societies throughout the world, and declaring for an eight hour day and the prohibition of night work, except where necessary for the public welfare.

# The Famous Unexplained Painting SHADOW OF THE

For the Benefit of the Toronto Newsboys' Building Fund

Now on Exhibition At Petersen's Art Room 382 Yonge Street FROM 10 a.m. to 10 p.m. Admission 15c, children 10c.

## TORONTONIANS WILL SEE UNIQUE PAINTING

"The Shadow of the Cross," Which is Being Shown for Newsboys Home, is a Mystery.

For the first time Torontonians will on Monday be privileged to view a picture which has been more talked of than any other work of art in the many histories of America, in which it has been exhibited.

"The Shadow of the Cross" is, however, more than a painting, it is a mystery, and one which, at that, has baffled explanation by the leading scientists of Europe and America. The unique feature of the picture is that it is different, according to the circumstances under which it is viewed.

But when the studio lights are extinguished, see the transformation that comes over the painting. It is still visible, but now it is by the light which emanates from the canvas itself. As a silhouette figure the masterpiece of the artist stands out with startling distinctness against the sky, which now glows with an almost supernatural radiance, and, strange of all, there now appears, diagonal behind the figure of the Saviour, the shadow of a cross, stretching across the background of the canvas.

This wonderful painting, which will be on exhibition at Petersen's Art Gallery, 382 Yonge-street, is being shown for the benefit of the building fund of the Newsboys' Home, and the worthiness of the work of art, should attract thousands, both of clergy and laity, to the gallery.

## SURPRISED THAT RIGHT TO FORTIFY QUESTIONED

Britain Acknowledged It by Implication, Say American State and Army Officers.

WASHINGTON, Sept. 3.—Officials, both of the state department and of the army, express surprise that any question should be raised at this time as to the right of the United States to erect fortifications along the Panama Canal. They regard the unfavorable comment in the English press on Mr. Roosevelt's remarks about the necessity for fortifying the canal as evidence of a misunderstanding, both of the action of the American Government and of the attitude of the British foreign office itself.

In this connection, according to the understanding of the state department, was expressed in a memorandum by Lord Lansdowne, on August 31, 1901, communicated to Secretary Hay thru Lord Pauncefote. "I understand that by the omission of all reference to the matter of defence," said he, "the United States Government desires to reserve the power of taking measures to protect the canal, at any rate when the United States may be at war, from destruction or damage at the hands of an enemy or enemies. I am not prepared to deny that contingencies may arise when, not only from a national point of view, but on behalf of the commercial interests of the whole world, it might be of supreme importance to the United States that they should be free to adopt measures for the defence of the canal at a moment when they were themselves engaged in hostilities." The United States Government, it is

declared here, has been openly acting on the theory that it had the right to fortify the canal. Both President Roosevelt and President Taft asked congress for appropriations to fortify the canal, the latter presenting the question in a special message. As early as 1907, the so-called Taft-board, appointed by Secretary of War Taft, recommended the erection of forts along the canal. At present a joint board of army and navy officers is preparing plans for fortification. By specific provision of the Hay-Pauncefote treaty with Panama in 1904, the right of the United States to fortify the canal was recognized. No protest was entered by Great Britain to that treaty when it was proclaimed, nor since, it is said.

Rev. H. A. Macpherson's Reference to Eucharistic Congress.  
"We ought to keep rigidly before us the fact that the British nation is absolutely Protestant," said the Rev. H. A. Macpherson, in Chalmers Presbyterian Church, last evening, in referring to the Eucharistic Congress at Montreal. "I do not consider that any church should receive government recognition in a conference of this kind." The words around which Mr. Macpherson gathered his thoughts were taken from I. Samuel, xl, 14, "Let us go to Gilegal, and renew the kingdom there." Gilegal was a place of very sacred memory to the Jew, and we as Canadians also in our brief history had many places which should continually remind us of the blood that had been shed in defence of a Protestant government.

THRIFT is rightly described as "Economic Management." A shrewd business man is spoken of as thrifty, because he saves. Perhaps only a dollar at a time—perhaps more—but the real secret of his success lies in the principle of saving. One dollar will start an account with the Bank of Hamilton.

## SENSATIONAL DROP OF AVIATOR OVER 8000 FEET

The Attacked With Nausea and Hammering of Ear Drums Managed to Glide to Safety.

DEAUVILLE, France, Sept. 4.—Leon Morane, the French aviator, yesterday made a sensational monoplane flight, eclipsing his own world's record for altitude, by flying to a height of 8471 feet. The previous altitude record was 7054 feet, made by himself last Monday, at the Havre aviation meeting.

Just when the aviator reached his highest point, the motor of the machine suddenly stopped, and the monoplane began a long and remarkable glide toward the earth. The bird-man plunged downward at a tremendous rate and reached the ground 1.24 miles from the aerodrome.

## SHIP ON FIRE

After Battling With Flames for a Week Had to Take to Boats.

BOSTON, Sept. 4.—Sixteen survivors of the thirty-six men who composed the crew of the British steamer Westpoint, which took fire when four days out from Glasgow, to Charleston, S.C., are aboard the Leyland line steamer Devonian, which is steaming toward Boston. The other twenty men were in the captain's boat, which is believed to have been lost at sea, all efforts to find their boat having been futile.

## RECEPTION TO TAY PAY

Committee of Thirty Representative Citizens to Arrange Welcome.

A committee of leading citizens of Irish blood has been appointed by the United Irish League to receive the envoy of the Irish people, who will deliver an address on the Imperial Parliament and home rule at Massey Hall on the 30th instant, when the citizens of Toronto will have an opportunity of hearing one of the most brilliant parliamentary orators of the period and getting a vivid picture of the present position of the political parties in the mother country as they stand to-day in relation to the great public issues and chiefly on the question of home rule for Ireland.

## CAUGHT IN THE ACT

Jessie Thompson, a Three-Term Arrested.

Jessie Thompson, who has already served three terms in Kingston Penitentiary for picking pockets, was caught Saturday night by Sergeant of Detectives Alex Mackie with her hand in another woman's pocket.

Sergt. Mackie saw Jessie in a crowd at Queen and Yonge streets. He followed her into Knox's store, and as she was coming out, he grasped her hand. It was in the coat pocket of Mrs. Armstrong, who lives in the rear of 136 Baldwin street, from which she had only a moment before removed her purse.

## FROM OLD WORLD ROME TO HOME OF THE NEW

Cardinal Vannutelli Lands at Montreal in the Rain and Replies to Mayor Guerin's Welcome.

MONTREAL, Sept. 3.—(Special.)—"I accept the hospitality of your city, your province, and of the whole country, irrespective of religious belief and nationality, for in the crowd around me I see a whole people," were the words spoken to the citizens this afternoon by Cardinal Legate, the representative of the Pope, at the first Eucharistic Congress ever held on this continent.

The popular demonstration which awaited Cardinal Vannutelli on the wharf at the foot of McGill-street was absolutely spoiled by the tremendous downpour of rain, which set in shortly after noon, and kept up without ceasing till 6 o'clock this evening. The official word was there, however, with the entirety of the Canadian episcopacy, and all waited patiently for the Legate to appear. At 7 o'clock, Long Point, till almost 5 o'clock. She soon came up, however, bringing Cardinal Vannutelli, Archbishop Brochu, and other officials of church and state.

The civic address was to have been read as soon as the distinguished party arrived, but when the rain began to drive the Legate to the city hall, and there present the Pope's representative with the city's greetings. As soon as the Legate stepped from the archbishop and minister, loud cheers went up from the multitude, and the towering form of the mayor to the state carriage, bowed low, and smiled to those who had braved the very inclement weather to greet him.

Among other things, his worship said: "With joy we hail you, Welcome, and while I, who am signally honored, speak these words, they are waited from lip to lip through our beloved Canada, and the words are being repeated and re-echoed again thru all the vast expanse of this great continent, wherever a Catholic heart beats, or a worshiper kneels before the Adorable Sacrament of our altars."

"From the Rome of the old world you come to the Rome of the new, for such has been the object of my mission, and I am happy to designate. The same inviolable arm which holds on high the torch of Faith upon the hill of the Vatican church, is upheld in Montreal by the flames of the Holy Spirit and the light of the infallible church."

"Fellowship and good will and a respect for the rights of others are the characteristics of our people. I, who have the honor of standing before you as Mayor of Montreal, and as a representative of the Canadian people, and as a member of the same, I beg of you to enter our city, with the assurance that in your streets are waiting for you, and of the love and loyalty of your own, which will surround you during your distinguished visit."

The Cardinal's Reply. His eminence, who speaks beautiful French, replied in that tongue, by referring to the words of the pope, and by an expression that he had come from the Rome of the old world to the Rome of the new, and stated that the holy father would be only too pleased to know that his representative had been so well received by all sections of the people in this great Canadian metropolis. The legate then, in a few words, outlined his industrial position, and was delighted to be able to take home the news that all of her citizens live in peace and harmony, and that the people are united to the same faith. He said how proud he was to see the crowds of respectful people who evidently respected the sanctities of the streets, and were imbued with sentiments of great goodwill.

After the address his eminence was introduced to the surrounding bishops and all those who expressed a desire to meet the papal representative. In fact, Cardinal Vannutelli is evidently a very Democratic make-up, and the certainty now the hearts of all at the start. In private conversation he possesses the charm of manner so characteristic of the Italian churchman or diplomat, making everyone at home, and evidently taking the greatest possible pleasure in meeting so many people of different races and creeds. His father, Bernard Vaughan, a clergyman, was captured by the town. After the handshaking was over the legate and archbishops were driven to the episcopal palace.

# 7% BETTER THAN 4%

Four per cent. represents the highest rate of interest paid by banks and trust companies to their depositors. There is not a Mortgage Loan Company in Canada that is not paying at least 6 per cent. annual dividend; some are paying double that rate. As the most of these companies operate largely or entirely in Eastern Canada, where money is much cheaper than in Western Canada, and as the Pioneers' Loan Company will operate entirely in Western Canada, it is safe to predict that they will pay at least 7 per cent. dividends from the start, and also be enabled to lay aside a handsome surplus.

## THE PIONEERS' LOAN CO.

HEAD OFFICE: BRANDON, MAN. Authorized Capital \$5,000,000 in 50,000 Shares of \$100.00 Each

- PROVISIONAL DIRECTORS:
- The following Provisional Directors are among the most successful and widely-known business and professional men of Manitoba:
- HON. G. R. COLDWELL, K.C., Minister of Education of Manitoba, Brandon.
  - A. C. FRASER, President Brandon Trust Company, President Pioneers' Fire Insurance Company, Brandon.
  - B. D. WALLACE, Manager, Brandon.
  - JOHN E. SMITH, Farmer, Brandon.
  - H. L. ADOLPH, Barrister, Mayor of Brandon, Brandon.
  - HUGH R. CAMERON, Managing Director Pioneers' Fire Insurance Company, Brandon.
  - W. G. WEATHERSTONE, Manager Bank of Hamilton, Brandon.
  - E. L. CHRISTIE, Merchant, Brandon.

The Pioneers' Loan Company has been formed to meet and take advantage of the demand for loaning capital that is a necessary incident of the phenomenal development and increase of population now in progress in Canada, and particularly in Western Canada. The idea that the Twentieth Century belongs to Canada has passed from the prophetic stage, and has already become fact. It is to the Canadian Prairies that the world's last great land "trek" has been made.

The Provisional Directors of the Pioneers' Loan Company offer this opportunity to the small or large investor to participate in the prosperity of the great, rich and growing Northwest Canada. The Pioneers' Loan Company is an institution that will not have to be fostered to make it pay dividends to its Shareholders. Business is waiting in all parts of the Great Canadian West, in the shape of First Mortgage Loans on Farm and City Property. One-quarter million people are settling here annually. Thousands of these are homesteading and require financial aid, not the first year alone do these people require aid, but later, too. The Western farmer is ambitious and progressive, and as soon as he obtains the necessary machinery and stock and has it paid for, he immediately begins to build and furnish an up-to-date home. This requires capital, and he is willing to pay for it. The high rate of interest charged in the West—7 to 9 per cent.—insures a handsome profit when you consider that this is earned, not only on the paid-up capital, but also on debentures, of which the Pioneers' Loan Company are authorized to issue to four times the amount of their paid-up capital.

There is not a Loan Company operating in Canada that is not earning big dividends for its shareholders. The most of these companies have loaned their funds at a much lesser rate of interest than that which the prevailing rate in Western Canada, and which is now about 7 1/2 per cent. standard rate for many years to come, and when we predict a 7 per cent. dividend from the start we are basing our calculations upon the successful experience of all other Loan Companies, and we are convinced that we will soon reach a 10 to 12 per cent. basis, and in addition to this lay aside a handsome surplus.

SAFE INVESTMENT. Savings invested in the stock of a Mortgage Loan Company are as safe as those deposited in any Savings Bank. The dividend is just as certain and will be from two to four times as much, and in addition to which the Shareholders will participate in the magnificent profits to be earned by the Pioneers' Loan Company. The Pioneers' Loan Company's charter was granted under a special act of the Parliament of Canada. The interest of the Shareholder is safeguarded by every necessary condition, and at the same time the charter grants all those privileges which are the great source of profit to the company.

# Market Taking Needed Rest Cure And Will Later Recover Its Nerve

### Broker Clews Reviews American Conditions and Thinks Stocks Have Discounted Most of the Unfavorable Conditions.

NEW YORK, Sept. 3.—Henry Clews & Co. in their weekly letter, say: "In August the number of shares dealt in on the New York Stock Exchange was only about 10,000,000, compared with 20,000,000 in the same period of the year 1909, and the sales of bonds during the same period were \$1,000,000,000, as against \$1,500,000,000 in each case the transactions were the smallest in any August for about ten years. This was not a coincidence. Such inactivity, however, cannot be expected to be permanent, and now as the vacation season is drawing to a close, and many of the uncertainties which previously checked business are disappearing, it is reasonable to look for increasing activity during the remainder of the year. Since Jan. 1 the number of shares of stock sold on the New York Exchange has amounted to \$1,000,000,000, compared with \$1,500,000,000 in 1909, which was the banner year. It is certain that the market has been conducted upon a strictly conservative basis. The political campaign which has crowded so little concern, is now fairly under way, and the issues are clear. During the next two months we may look for a great deal of heated discussion, and thru this smoke the market will not always be easy to discern the final outcome. Nevertheless, the recent declarations of President Roosevelt have clarified the political horizon, and served to make the issues plain. The tariff, the regulation of corporations, and the important question of railroad rates are now the ruling issues, and their agitation must leave a certain measure of uncertainty still to be reckoned with. Nevertheless, there is nothing alarming connected with any of these problems. It should be forgotten that action always runs on more conservative lines than agitation. We are now in the period of disturbing agitation, which is apt to excite and mislead those who lose their heads. When it comes to positive action, conservatism will unquestionably prevail, and those who in a spirit of vengeance seek to destroy the tariff, or the trusts, or the railroads, will not prevail. It is easy to take an over-sensitive attitude regarding these problems. Politics may overshadow the outlook for some time to come, but the probabilities are that justice, order and good sense will rule in the long run.

Referring to President Taft's recent tariff letter urging downward revision thru schedules considered separately, the idea is not a new one, since it was first advocated by him over two years ago in a speech made before the annual convention of the American Highways Association, R. I., July 24, 1908, in which he said: "I am one of those who believe that the tariff should be made to gradually lower, say one schedule at a time, with six months' notice of any important change in the tariff, and that importers to protect themselves sufficiently to avoid loss on their previous importations. The reduction of duties on commodities and articles of general consumption would obviously reduce the living expenses of the people, and the living expenses of the people are to be the chief source of the discount of labor."

One of the most important uncertainties which lately threatened the security markets has become a matter of history. There is now little or no fear of a serious monetary contraction. Owing to the warlike issues months ago, and the precautions taken in consequence, the money situation is rather better than

valuing values of the various issues are much below the intrinsic merit of the stocks concerned. Heavy purchasing orders are also reported to be in New York interests, and from present indications it looks as if American buying would become a factor of no mean import in the market in the near future.

The week closes with a good all-round firm undertone to prices for the mining stocks. The advance in values has certainly been a rapid one, and on this account a natural reaction should be experienced on technical grounds alone. After such an extending upward movement there is certain to be a profit-taking disposition in evidence, but as yet it cannot be said that this has shown signs of holding prices in abeyance. Cobalts were so long on the down grade that there seems to be no holding them in check on a sharp upturn, such as is now being witnessed, and for this reason the outlook for the immediate future is somewhat uncertain. Sentiment, however, is almost uniformly cheerful, and if the public continue to come in on the advance, the market will show how far the movement may extend.
