

**STANZAS.**  
There are three lessons I would write  
Three words—as with a burning pen,  
In tracings of eternal light,  
Upon the hearts of men.

**Have Hope!** Though clouds environ now  
And gladness hides her face with scorn,  
Put thou the shadows from thy brow—  
No night but hath its morn.

**Have Faith!** Where'er thy bark is driven—  
The calm'st desert—the tempest's mirth,  
Know this—God rules the hosts of heaven,  
The inhabitants of earth.

**Have Love!** Not live alone for one,  
But man, as man, thy brother call—  
And scatter like the riv'ring sun,  
Thy charities on all.

Thus grave these lessons on the soul—  
"Hope, Faith and Love," and thou shalt find  
Strength, when life's surges widest roll—  
Light, when thou else wert blind.

**Electric Light.**  
The Electric Light at Hungerford Suspension  
Bridge is, at present, one of the novel  
sights of the metropolis. Two miniature suns  
—for so without hyperbole we may character-  
ize the electric lamps—one in each tower—  
covered their intense rays on the centre of  
the bridge, and effectually illuminated the  
whole of the intervening space, feebly lighted  
in general by about 100 gas lamps. The  
lights remain in continuous operation from  
9 o'clock, p. m., till past midnight. It is said  
that the light is most economically produced,  
and that the electric force is applicable as a  
motive power, as a substitute for steam, and  
as a means of street, &c., illumination. The  
inventions of Dr. Watson, the basis of the in-  
tended operations of the Electric Power and  
Colour Company, have, we are told, now re-  
moved the only obstacle to the universal use  
of electricity, and to its immediate applica-  
tion to locomotion, mechanical arrangements  
of all kinds, navigation, chemical decomposi-  
tion, and illumination. Every shining  
worth of material used in Dr. Watson's bat-  
teries returns, it is said, half-crown in the  
shape of valuable pigments (which can be sold  
pure and unadulterated at a lower price than  
the adulterated articles in the market), bleach-  
ing powder, and other commercial products  
readily saleable. The various other uses to  
which this new power can be made subserv-  
ient, embrace the desulphurization of coke  
(of which about £600,000 worth is consumed  
yearly by railway companies alone), tele-  
graphing, electrotyping, smelting, and the  
manufacture of steel.

**Discovery of Marble.**  
We had the pleasure, this week, of exam-  
ining some specimens of Marble recently dis-  
covered in the vicinity of the Bras D'Or Lake,  
and brought to town by a person from Why-  
cocomah, in the Island of Cape Breton. The  
specimens alluded to, which have been polished  
at the Shop of Messrs. Adams & Drake,  
in the City, present a handsome surface, and  
bear a favourable comparison with American  
Marble, and what is still more gratifying, we  
learn that the article may be obtained in great  
abundance on the Bras D'Or. We trust that  
this newly discovered production of the Island  
will prove an important and valuable article of  
export, as well as of home consumption, to the  
people of Cape Breton.—*Half-penny Presby-  
terian Witness.*

**The Thrifless Farmer.**  
The thrifless farmer, then, provides no  
shelter for his cattle during the inclemency  
of winter; but permits them to stand, shiver-  
ing by the side of a fence, or to lie in the snow,  
as best suits them.  
He throws their fodder on the ground, or  
in the mud, and not uniformly in the high  
way; by which a large portion of it, and all  
the manure are wasted.  
He grazes his meadows in the fall and  
spring, by which they are gradually exhausted  
and finally ruined.  
His fences are old and poor—just such as  
to let his neighbour's cattle break into his  
fields, and teach his own to be unruly.  
He neglects to keep the manure from  
around the silos of his barn—if he has one—  
by which they are prematurely rotted, and his  
barn destroyed.  
He tills, or skims over the surface of his  
land, till it is exhausted; but never thinks of  
the worth while to manure or clover it. For the  
first, he has no time; for the last, he "is not  
able."  
He has more stock than he has the means to  
keep well.  
He has a place for nothing, and nothing in  
his place. He, consequently, wants a hoe or  
rake, a hammer or an auger, but knows not  
where to find it. He and his whole house-  
hold are in search of it, and much time is  
lost.  
He loiters away stormy days and evenings,  
when he should be repairing his utensils, or  
improving his mind by reading the news-  
papers.  
He spends much time in town, at the cor-  
ners of the street, or in the "snake holes,"  
complaining of "hard times," and goes home  
in the evening, "pretty well tore."  
He plants a few fruit-trees, and his cattle  
forthwith destroy them. He "has no luck in  
raising fruit."  
One-half of the little he raises is destroyed  
by his own, or his neighbour's cattle.  
He has no shed for his firewood—consequ-  
ently, his wife is out of humour, and his  
meals out of season.  
His plow, drag, and other implements lie  
all winter in the field where last used, and,  
just as he is getting in a hurry, the next sea-  
son, his plow breaks, because it was not  
housed, nor properly cared for.  
Somebody's hogs break in and destroy his  
garden, because he had not stopped a hole in  
the fence, that he had been intending to stop  
for a week.  
He is often in a great hurry, but will stop  
and talk as long as he can find any one to  
talk with.  
He has, of course, little money; and when  
he must raise some to pay his taxes, &c., he  
raises it at a great sacrifice, in some way or  
other; either by paying an enormous share,  
or by selling his scanty crop when prices are  
low.  
He is a year behind, instead of being a  
year ahead of his business—always will be  
in debt.  
When he pays a debt, it is at the end of an  
excursion; consequently, his credit is at a  
low ebb.  
He buys entirely on credit, and merchants,  
and all others with whom he deals, charge  
him twice or thrice the profit they charge  
prompt paymasters, and are unwilling to sell  
him goods at that. He has to beg and pro-  
mise, and promise and beg, to get them out

any terms. The merchants dread to see his  
wife come into their stores, and the poor wo-  
man feels depressed and degraded.  
The snake begins to come out of his chimney  
late in the morning, while his cattle  
are suffering for their morning's feed.

Manure lies in heaps in his stable, his  
horses are rough and uncurried, and his har-  
nesses trod under their feet.  
His bars and gates are broken, his building  
unpainted, and the boards and shingles falling  
off—he has no time to replace them—the glass  
is out of the windows, and the hole stuffed  
with rags and old hats.

He is a great borrower of his thrifty neigh-  
bour's implements, but never returns the bor-  
rowed article; and when it is sent for, it can't  
be found.

His children are late at school—that is, if  
they go to school—their clothes ragged, their  
faces unwashed, their heads uncombed, and  
their books torn and dirty.

He is, in person, a great slaver, and never  
attempts public worship—if he does occa-  
sionally do so, he comes sneaking in when  
the service is half over.

If the printer wants a quarter of beef, or a  
few bushels of oats, corn, or potatoes, on his  
bill, our farmer "has none to spare."  
Take him, all and in all, he is a poor farm-  
er, a poor husband, a poor father, a poor  
neighbour, a poor citizen, a poor Christian,  
and a poor man any way you can take him.—  
*Fort Wayne Times.*

**To Farmer's Boys—A Hint.**  
The writer of these remarks was once a  
farmer's boy, and speaks from experience  
when he recommends all farmers' sons to keep  
a daily register of every thing interesting  
coming under their observation, relative to  
their business. The time of planting or sowing  
crops, with the results of late or early  
planting appended; the effects of any pecu-  
liar mode of manuring; the benefit or detri-  
ment from thick or thin sowing; the kind of  
seed; the time or manner of harvesting; the  
results of draining, of deep or shallow plow-  
ing, and of numerous other matters, and es-  
pecially including the cost and profits of each  
crop, if accurately recorded, would not fail to  
yield a great deal of interest as well as use-  
fulness. The time of the appearance of birds,  
insects, the flowering and fruiting of trees, or  
anything else in relation to nature and its  
productions, would assist very much in the ac-  
quirement of knowledge on these subjects, and  
be a matter of record. I am sure it would  
be a delightful employment, both at the time,  
and by its examination afterwards.

Now, all that is necessary is to get a small  
blank book, with a flexible cover, which may  
be had for a dime at any book or stationery  
store—and rule each page into two columns  
—the first for the record of planting, sowing,  
and all other operations during their earlier  
stages; and the second column for the regis-  
try of the results, directly opposite, on the  
same page. By comparing these results with  
the operations which produced them, a great  
deal of valuable practical knowledge would  
soon be obtained.  
Another advantage might result from this  
practice. When any operation was deferred  
too late, and loss was occasioned thereby,  
make a memorandum of this fact at the pro-  
per place in the second column, by the ex-  
amination of which, the second year, this dis-  
culty might be avoided. Many failures occur  
from a want of seasonable attention; such a  
journal would therefore leave an excellent  
memorandum book to refer to daily the second  
year, or any other year afterwards, to remind  
one of what must be done at the time.  
Would not this be worth a thousand times  
its cost, by way of making accurate, intelli-  
gent, practical, and successful farmers, of  
lads and young men in the country, besides  
improving their knowledge of writing?

**Action and reaction in Farming.**  
Never keep animals on short allowance—  
if you starve them they will surely starve  
you.  
Although in draining land thoroughly, your  
purpose may be drained, yet the full crops that  
follow, will soon fill it up again.  
Trying to farm without capital, is like try-  
ing to run a locomotive without fuel: Money  
and wood must both be consumed, if they are  
to move the machine of the farm or of the  
rail.  
Always give the soil the first meal. If this  
is well fed with manure, it will feed all else,  
plants, animals and man.  
If you wish to give an energetic movement  
to all your farm machinery, and keep its houn-  
dred wheels in rotation, be sure and not to be  
without a good rotation of crops.  
If you allow your animals to shiver, your  
fortune will be shivered in consequence; that  
is, the farmer who gives his cattle to the winds,  
will find his profits also given to the winds.  
Heavy carrot crops for cattle, will soon re-  
turn carrots of gold.  
Did you ever hear the musical notes of a  
starving herd of hogs? Extinguish by food  
those annoying notes after day has passed.  
Learn as much as possible the experience  
of the skilful; the man who depends on teach-  
ing himself, will be likely to receive very poor  
lessons—or, as Dr. Franklin has it, he will  
find "he has a fool for a master."  
Fences operate in two ways—if good, they are  
a defence, if poor, an offence.

**MORRISON & CO.,**  
Prince William-street,  
ART NOW RECEIVING A PART OF THEIR  
EXTENSIVE AND VALUABLE  
STOCK OF  
**DRY GOODS,**  
CONSISTING OF  
91 Packages per Liberia,  
85 do. per St. John,  
50 do. per Royal Mail  
Steamers Nagara & America,  
To which they would call the attention  
of both  
Wholesale and Retail Buyers,  
April 26, MORRISON & CO

**Per "Cuba," from Boston:**  
100 BOXES Bunch Raisins;  
50 bags Java COFFEE.  
March 22. FLEWELLING & READING

**Flour, Sugars, Teas, Cigars, &c.**  
Not received by the Subscriber—  
A FEW Hhds very bright Porto RICO SUGAR,  
A lot of Havana CIGARS, very superior;

**HOLLOWAY'S OINTMENT.**

A MOST MIRACULOUS CURE OF BAD LEGS,  
AFTER 43 YEARS SUFFERING.

Extract of a Letter from Mr. William Galpin, of 70, St.  
Mary's Street, Birmingham, dated May 26th, 1851.  
To Professor Holloway:  
SIR,—At the age of 18 my wife (who is now 61) caught  
a violent cold, which settled in her legs, and ever since  
that time they have been more or less sore, and greatly in-  
flamed. Her gait was very awkward, and for months to-  
gether she was deprived entirely of rest and sleep. Every  
remedy that medical men advised, without effect. Her  
legs were terrible, had often roared, and were so inflamed  
that
