PREFACE.

In presenting this the **Fourteenth Edition** of the « **Quebec Directory** », the Compiler has endeavoured to embrace all possible improvements, so as to render it still more worthy of acceptance than its predecessors. The Street Directory, included for the first time in the last Edition, is again continued, and will, from the increased usefulness and patronage accorded, be a permanent feature in all future Editions; and it is hoped that its usefulness may be still further increased by the proper numbering of the Streets, a strong feeling for such having been lately manifested through the local Press and by public opinion; and a more fitting memento of the accession of our present worthy Mayor to the Civic Chair could not be initiated than the numbering of the City. The additional matter added this year is that of a General Classified Business Directory, embracing all Trades and Professions. Formerly it included only Subscribers to the Work: containing all, it will be found of great advantage to all Travellers and Business Agents visiting the City, who can thus find at a glance the names and place of business of all engaged in each branch of Trade.

The Compiler is also glad to state that the Book is *printed and bound* in this City, it having been found hitherto impossible to have it done with sufficient expedition to meet the views of the Compiler; this being overcome, has been the means of ensuring greater correctness, changes and corrections up to the moment of going to press being much easier effected.

The Compiler has also the pleasure to state that he has removed to the City of Quebec for permanent residence, and trusts that his long familiarity with the highways and bye-ways, still to be made more familiar, will be a further guarantee that all improvements found necessary will be incorporated in future Editions, and that any useful amendments or alterations suggested by friends to the Work will be thankfully received and attended to. In conclusion, he would beg to return his sincere thanks to those who have, by kind suggestions and assistance, materially aided him, and for the very liberal patronage accorded.

A. B. CHERRIER,

Editor.

PREFACE

It is presenting this the Fourteenth Edition of the Quebec Directory, the Compiler has endeavored to embrace all possible improvements so as to make it still more worthy of acceptance than its predecessors. The Street Directory, included for the first time in the last Edition, is again continued, and will form the historical foundation and backbone of the work. It is hoped that the neediness may be felt that the neediness of the proper numbering of the streets, a strong feeling for such having been largely manifested through the local Press and by public opinion, and a more fitting recognition of the necessity of our present worthy Mayor, the City Council could not be initiated than the numbering of the City.

BAILLAIRGÉ'S STEREOMETRICAL TABLEAU!

(Patented in Canada, in the United States of America, and in Europe.)

AGENTS WANTED FOR THE SALE OF THE TABLEAU IN CANADA, THE UNITED STATES, &c.

This is a Case 5 feet long, 3 feet wide and 6 inches deep, with a hinged Glass Cover, under Lock and Key, so as to exclude dust while exhibiting, and affording free access to some 200 well-finished Hardwood Models of every conceivable Elementary, Geometrical or other form, each of which being neatly attached to the board, by means of a wire-peg or nail, can be removed and replaced at pleasure, by the Student or Professor.

For the use of Architects, Engineers, Surveyors, Students and Apprentices, Customs and Excise Officers, Professors of Geometry and Mathematics, Universities, Colleges, Seminaries, Convents and other Educational Establishments, Schools of Art and Design, Mechanics, Measurers, Gaugers, Ship-builders, Contractors, Artizans and others in Canada, and elsewhere.

The use of the Tableau and accompanying Treatise, reduces the whole science and art of Mensuration from the study of a year to that of a day or two, and so simplifies the study and teaching of Solid Geometry, the Nomenclature of Geometrical and other forms, the development of surfaces, geometrical projection and perspective, plane and curved areas and Spherical Geometry, and Trigonometry, and mensuration of surfaces and solids, that the several branches hereinbefore mentioned may now be taught even in the most elementary schools, and in convents, where such study could not even have been dreamed of heretofore.

Each Tableau is accompanied by a Treatise explanatory of the mode of measurement by the Prismatical Formula, and an explanation of the solid, its nature, shape, opposite bases, and middle section.

Approved by the Council of Public Instruction of the Province of Quebec, and already adopted and ordered by many Education and other Establishments in Canada and elsewhere.

For information and testimonials, apply to

C. BAILLAIRGÉ,

Laval University.

13½ St. George, U. T.

In 1643 was founded the Quebec Seminary, which afterwards became a regular College, and it had, by successive addition, acquired a high degree of importance, when it was erected, by Her Majesty's Royal Charter, into a University, under the style and name of *The Laval University*. By this charter, which bears date December 8th, 1852, no change was effected in the constitution of the Seminary itself; but a council composed of the directors of the institution, and the three senior professors of the several faculties was empowered to possess and enjoy all the privileges granted to the Universities of the United Kingdom, and especially that of conferring degrees in the Faculties of Divinity, Law, Medicine and Arts. His Grace the Roman Catholic Archbishop of Quebec is, by virtue of his office, Visitor of the University. The Superior of the Seminary, for the time being, holds the office of Rector.

WEIGHTS AND MEASURES.

Previous to 1828, there were used in Great Britain as legal standards, the Ale Gallon, Wine Gallon and Corn Gallon, all of different capacities; also the Winchester Bushel for dry measure, besides Heaped Measure; all of these are now abolished, and but one standard Bushel and Gallon for all measures, both dry and liquid, is used, called the Imperial Bushel, one eighth of which is the Imperial Gallon.

The Imperial Bushel is an upright cylinder, whose internal diameter is 18,789 inches and depth 8 inches. The Imperial Gallon is one-eighth of this, and cubical contents equal to 10 lbs. water. We may quote from this, as Imperial Measure, "a pint of water a pound and a quarter;" and from the weight of water given below corresponding to the different measures, it follows, that if measures were lost, we could find their equivalents by weight of water, and if weights were lost we could find their equivalents by cubical contents of water.

The standard for Canada and the United States is the same both for liquid and dry measure, and consists of two measures, namely the Winchester Bushel for dry measure and the old English Wine Gallon for liquid mea-

sure. The Winchester Bushel, so called because the standard measure was formerly kept at Winchester, England, is an upright cylinder, whose internal diameter is 18½ inches, and its contents equal to 2150 2-5 cubic inches and equal to 77,627 lb. of pure or distilled water at a temperature of 62 and barometer at 30.

The proportion between the Imperial Liquid Measure and ours is very simple and convenient for reduction, being nearly 5 to 6. Thus 5 Imperial Gallons are equal to 6 Gallons Canada or United States Standard. The Imperial Bushel is about 1.32 part more than the Winchester, 31 Bushels Imperial being equal to 32 Winchester.

There are still used in the United States, the old Beer or Ale Gallon of 282 cubic inches, equal to 10. 18lbs. of water and a New York State Bushel of 2211-84 cubic inches, and gallon of 221-184 cubic inches, or 8lbs. water. All transactions involving the measuring or purchasing of liquids, &c., should state the measures understood. By Act of Canadian Parliament, the following are the legal weights per bushel of the different kinds of grain :

and if tied with a withe, one pound additional.	

The new Copper Coinage of Great Britain, 1860, is composed of 95 parts Copper, 4 of Tin and 1 of Zinc. A pound of this is coined into 48 pence of 80 half-pence or 160 farthings, and the half-penny measures one inch in diameter. The Canadian Cent is the same diameter, and 100 of them weigh one pound.

In the absence of Apothecaries weights and measures, the following items are worth remembering :

About 25 drops of any tin liquid will fill a common sized teaspoon,—three table spoons will fill an ordinary sized wine glass,—four wine glasses will fill a common sized tumbler.

INTEREST.

General rule for calculating interest for days. Multiply 1 year's interest on the amount by the number of days, and divide the result by 365.

SPECIAL RULE FOR 7 PER CENT. Multiply the amount, days, and the decimal .019178 together; the result will be the answer in cents; or multiply the principal, days and .19178 together, and from the result cut off 6 figures from the right, the remainder is cents for the answer; if there be cents to multiply in the principal, cut off 8 figures.

TO CONVERT PENCE INTO CENTS.—Add a cypher to any number of pence and divide by 6. Example: To 44 pence add a cypher, 440; which divided by 6, gives 73 2-6ths, say 73 cents.

TO CONVERT CENTS INTO PENCE.—Multiply any number of cents by 6, and put off the last figure, which is tenths. Example: 73 cents multiplied by 6, gives 438, or 43 pence and 8-10ths, say 44d.

TO CONVERT STERLING INTO CURRENCY.—To the given sum, add one-fifth of itself and one twelfth of that one-fifth.

CURRENCY INTO STERLING.—Multiply by 60 and divide by 73.

EXCHANGE CALCULATIONS.

In the absence of tables, the following calculations will be found useful; and as there are various modes of calculating Exchange, we choose the following as being the most easily understood. As before stated, such are made upon the old base or par, rendering it necessary to convert all sums to that standard, to enable us to find the required result. Four shillings and six pence sterling and one dollar at old par are equivalents; and as that relative value has been altered, but still retained as a

base of calculation, it follows that 9, 9½ or 10 cent, premium quoted, means 9, 9½ or 10 cents on the dollar, or dollars, on the hundred, or pounds, &c., in addition to the old par value; and as in these calculations we shall use the dollar as basis, quotations as above will read as \$1.09, \$1.095, or \$1.09½ and \$1.10; and the sums are to be multiplied or divided by the required premiums, written in a similar manner.

STERLING INTO DOLLARS AND CENTS, at any premium. Multiply the pounds by 40, and divide by 9; this result gives the sum in dollars at old par; then multiply this result by the quoted premium, expressed as before stated.

Example.—What must I pay for a Bill of Exchange for £300 sterling, the quoted rate being 8 per cent., or \$1.08?

Solution.—£300 multiplied by 40 and divided by 9, gives \$1,333 33 at old par; then 8 per cent. added to this, or multiplied by \$1.08 gives the answer, \$1440.00.

DOLLARS AND CENTS INTO STERLING at any premium; (this operation is the reverse of the preceding). Multiply the dollars by 9, and divide by 40; this sum will be dollars into sterling at old par, which divided by the quoted premium, gives the required result.

Example.—What amount of Exchange on Bondon can I buy for \$1440.00, the quoted rate being 8 per cent, or \$1.08.?

Solution.—\$1440, multiplied by 9, and divided by 40, produce pounds at old par, this sum, being divided by \$1.08, gives the answer, £300 sterling. Note.—When shillings and pence are in the sterling amounts to be operated on, it will be necessary to reduce them to the decimals of pound. A very little practice will soon familiarize one to the easiest method: say for 17 shillings and six-pence, then 10 is £5, then say 5s. half of that or £.125; these added, give £.875, the required decimal. This mode will expedite all calculations in other denominations, especially where there are fractional quantities.

EXCHANGE WITH FRANCE.

London and Paris par of Exchange, one pound sterling equal to 25 francs 57 centimes. United States and Paris.—20 francs Louis Napoleon equal to \$3.84 or one dollar in gold= 5 francs 21 centimes. The real value of the francs is about 9½d sterling and the real value of the pound sterling is 25 francs and 26 centimes in gold, and 25 francs and 26 centimes in silver.

CANADA AND FRANCE.

One franc=18½ cents. Five francs=93½ cents or 4s. 8d. Canadian. One dollar.=5 35-100 francs. French invoice are reduced to dollars and cents for Canadian Custom Entry at the rate of 18½ cents per franc, or decimally expressed, 186.

Francs, into Dollars at Par.

Multiply the amount by the decimal, 1866. Dollars into Francs at Par.

Divide the amount by the decimal, 1866.

Bank Exchange here with Paris assumes a par of 25 francs to £1 sterling governed by quotations of sterling Exchange, with $\frac{1}{2}$ per cent. additional for difference between Paris and London; thus, if sterling Exchange be $10\frac{1}{2}$ our Bill must be based on 11.

Question.—I have a Bill from Paris to pay, amounting to 216, 05, sterling Exchange being $10\frac{1}{2}$ per cent; what must I pay here in dollars and cents?

Solution.—216, 05 francs divided by 25 produce £8 12s, 10d. sterling and this amount into dollars and cents at 11 per cent. ($\frac{1}{2}$ per more than the quoted rate), produces \$42.63, which I have to pay, to settle my account with Paris.

These rates must in all cases be prepaid except on letters to be forwarded to the United Kingdom, France, the Dominion of Canada and the United States. Letters addressed to the United Kingdom, if not prepaid or if insufficiently prepaid, will be charged with the balance of postage due thereon, and subject to a fine of three pence sterling (six cents). Letters for the United States not prepaid or insufficiently so, will be charged 10 cents per ½ oz.—Letters for the Dominion of Canada not prepaid or insufficiently so, will be charged 5 cents per ½ oz.

REGULATIONS AND RATES.

Letter Rates.—Letters posted in Canada, addressed to any place within the Dominion, pass, if pre-paid, for 3 cents per half-ounce; but if posted unpaid they are charged 5 cents per half-ounce.

On letters to Prince Edward Island, the rate is 3 cents per half-ounce, if pre-paid; 5 cents, if unpaid.

The rates on letters to the United Kingdom will be:

By Canadian Packet, 6 cents per half-ounce.

By Cunard Packet, 8 cents per half-ounce, advancing by one rate for each half-ounce.

Letters for the United Kingdom must be prepaid, or they will be charged a fine of 3d. sterling in addition to the deficient postage on delivery in England.

Money Orders on Canada.—All the Money Order Post Offices in Ontario, Quebec, New Brunswick and Nova Scotia, are authorized to draw Money Orders on each other for any sum up to \$100, and for as many Orders of \$100 each, as the applicant may require, upon the following terms, viz:

- On Orders up to \$10 5 cents.
- On Orders over \$10 and up to \$ 20.10 . . .
- On Orders over \$20 and up to \$ 40.20 . . .
- On Orders over \$40 and up to \$ 60.30 . . .
- On Orders over \$60 and up to \$ 80.40 . . .
- On Orders over \$80 and up to \$100.50 . . .

Letters for British Colonies and Possessions beyond sea and for Foreign Countries, except France *vid* England, must be pre-paid.

The rate on letters for the United States is 6 cents, if pre-paid; 10 cents, if unpaid.

Registration Charges.—For the registration of a letter addressed to any place in British North America, the charge is 2 cents.

For the registration of a letter to the United Kingdom, 8 cents.

For the registration of a letter to the United States, 5 cents.

Miscellaneous Charges.—The charge on parcels, which can only be sent by post *within the Dominion*, by Parcel post, to any place in Canada, is 12½ cents per half-pounds, (with 5 cents additional, if registered). No parcel must exceed four pounds in weight.

One cent per ounce, payable in advance by postage stamp, is the rate on printed circulars, prices current, hand bills, and other printed matter of a like character, and on books bound or unbound, when posted at a Canadian Post Office, addressed to any place in Canada, British North America generally, or the United States.

The charges upon prices current, sent singly, when addressed to the United Kingdom, is 2 cents each, and must be pre-paid by postage stamp.

"THE MERCURY" FILES—We have had the satisfaction of receiving, by this day's English mail, intimation that the file of the *Quebec Mercury*, bound in yearly volumes from its foundation by T. Cary, senior, barrister, first editor and proprietor, in January, 1805, (and grandfather of the present editor and proprietor,) has been received complete and in good order at the library of the British Museum in London, where it will be preserved with all the other historical works open to the British public in that valued and venerable institution. Canadians can thus at any time refer their friends or correspondants in England to the *Mercury*, for reliable records of local events during recent or remote years; and it shall be our endeavor always to make it as full and authentic a diary in the future as it is admitted to have been during the past. Complete files of this paper are also among the archives of the Parliament of the Dominion of Canada at Ottawa, and that of the Provincial Legislature in this city.

LEVIS.

A large and flourishing town on the south shore of the River St Lawrence, opposite Quebec, Seigniory of Lauzon, parish of Notre Dame de la Victoire, county of Levis. It is divided into three different wards, namely: the wards of St Laurent, Notre Dame and Lauzon. The head post office is in Lauzon ward, and branches of it in St Laurent and Notre Dame wards. An extensive trade of timber and fire wood is carried on here, which is surpassed in the province only in the cities of Montreal, Ottawa and Quebec. Several manufactures are in operation. Montreal Telegraph Co. has two offices here, one at the railway depot, and another in Hadlow Cove. The station of the Grand Trunk railway is situated in the St Laurent ward. Two steamboats ply every quarter of an hour between Levis and Quebec. Distant from Quebec, one mile, fare 3c.; from Richmond 96 miles, and from Montreal 174 miles. Mail daily. Population about 6700.

MOUNT PLEASANT.

The proper name of the place is *Mount Pleasant*, but sometimes it is called Guenet's village. The name was given to it because a member of the Guenet family was one of the first to settle there.

STADACONA.

Is situated on the River St. Charles, and connected with the City by "Bickel Bridge," very recently constructed by the gentleman whose name it bears. Although this village is outside the limits of the City, it may be considered a suburb of Quebec, possessing most of its advantages without being subject to its burdens. The population consists of about 90 families, containing some 540 souls, mostly of the working class, who gain their livelihood in the adjoining ship yards, of which there are five on that side of the river: three only however, are in operation, viz.: those of Messrs. Julien & Labbé, J. & J. Samson, and McKay & Warner: there is likewise a steam saw mill which is not now in operation. The Cast Steel Co. of Canada is also in operation, and will, no doubt, add greatly to the prosperity of the place. Hare Point, on the City side, has three ship yards, viz.: Messrs. W. H. Baldwin, Narcisse Rosa, and Louis Rosa, besides the lumber establishment of Mr T. E. Gauvreau. It is to be hoped that in the good time that is now coming, when manufactures of all sorts will take the place of the now languishing industry of ship building, Stadacona will rank as one of the most populous of our suburbs. It is in every way suitable for the establishment of manufactories. On the heights above the River St. Charles is a fine level plateau, exceedingly well adapted for Villas, and overlooking the extensive valley of the St. Charles, with a fine view of the Parishes of St. Foye's, Lorette and St. Ambroise, on one side, and on the other bounded by the pretty river "Lairé" having a splendid view of the City and Port of Quebec. Distant from Quebec about one mile.

P A T E N T TUBULAR FURNACE

OF
BENJAMIN HUOT,

at Lawrence Foundry, of Montreal,

TO WARM
CHURCHES,

FOR
OR PRIVATE HOUSES,

CERTIFICATES.

MONTREAL, March 1874.
We, the undersigned, certify that the Patented Tubular Furnace of BENJAMIN HUOT at ST. LAURENT has given the most satisfactory results, since the *Dominion Theatre*, in the City of Montreal. It has been till then impossible to warm a vast building in a sufficient manner and all the systems were defective, but since then, last fall, in the *Theatre*, of the Patented Tubular Furnace of Mr. HUOT, the change has been taken place, and the temperature in the building is always constant, whatever the outside temperature may be.

We have tested, it after twenty minutes of fire in it, the Thermometer showed two hundred and twenty (220) degrees of heat.

(Signed) J. P. V.
E. H. S.
Proprietors of the *Dominion Theatre*.

MONTREAL, March 1874.
In answer to yours of the 17th April, I beg to say that I do not act unfairly towards you in not paying you the tribute which you so justly demand in not acknowledging the importance and value of your new furnace called *Four tubulaire*. It has been experimented in my presence and the success of the experiment has proved all my hopes. The little quantity of fuel we have used and the great quantity of heat given by the furnace have clearly shown to me that this heating apparatus is the best in use to-day to heat large buildings, such as churches, colleges, theatres, &c.

— Allow me, dear sir, to congratulate you upon such a splendid achievement, and please believe how happy I would be in learning that this furnace is expected by proprietors of large buildings, for the benefit of the public and also because it is a reward paid to your merit.

I remain with consideration,
Yours, etc.,

O. ROUILLON
Inspector of the Education, the City of Montreal.
