**PSSSSSSSSSSSSSS** 

Mother put on her Sunday best,

You see, six olive branches came You see, six olive branches came
To bless our honest love—
Five slumber in the churchyard green
With little stones above;
But one was left in mother's arms—
Stern death was kind to him,
The reverset of our time flock.

Poetry.

He took it in his curly head To want a college course;
I parted with the pasture lot
And sold the sorrel horse;
We sent him every dollar saved,
And nade a seedy pair
In garments that had long outlived
Their days of useful wear.

We did not want to shame our boy And so kept out of sight
Behind a row of waving flage
And fluttering kerchiefs white.
But when the slender sculls swept by
The rival crews abreast
We both forgot our shabby clothes
And shouted with the rest

The surging throng closed up in front,
We could not see our son,
But soon a mighty cheer went up
And told us Jim had won.
The crowd took up the college yell
And sent it to the skies,
And selloge colors everywhere.

He stepped ashore, looked up and saw
His mother's wrinkled face,
And hurried to her through the ranks
Of broadcloth, silk, and lace.
He never gave a single glance
Toward the pretty girls,
But kissed her on the withered lips,
And kissed her silver curls.

His sunburnt race was giorned With proud and happy smiles; He did not mind because her hat Was years behind the style, But led her out before his friends, A figure quaint and prim, In stiff, old fashioned liles silk—
"My sweetheart, boys," said Jim.
"Myna Lyving in Leslie's W -Minna Irving, in Leslie's Weekly.

The Day That Summer Died. The day that summer died we saw a change Creep slowly o'er the sunshine of her face—

A veil of frost that silvered all the dew

The day that summer died a red leaf fell From out the maple's green and stately And all the slender fern leaves in the dell

The day that summer died the forest stream Crept forth to catch the blueness of the

You'll never to occupy themselves with, and there still speak to me again." She caught her breath remains in this old literature a vast residuum consider the great historical fact that for into the life of all that is best and noblest in English history, that it has become the national epic of Britain, and is familiar to noble and simple, from John O'Groat's House te Land's End, as Dante and Tasso were once to Italians; that it is written in the noblest and purest English, and abounds in exquisite beauties of mere literary form; and, finally, that it forbids the veriest hind who never left his village to be ignorant of the existence of other countries and other civilizations, and of a great past, stretching back the world. By the study of what other book made to feel that each figure in that vast historical procession fills, like themselves, but a momentary space in the interval between two eternities, and earns the blessings or the curses of all time, according to its effort to do good and hate evil, even as they also are earning their payment for their

> -The late Phillip D. Armour, of Chicago, was one of the most impulsive, quick-tempered, and sanguine of men. He succeeded because he was of a great virile force; as one friend said, he "was never happy without a big problem on hand, and employing all his powers in its solution." Yet just forceful, he realized his own dangers in a remarkable way. He learned in youth to keep himself under strict control, for he knew that to be uncontrolled, for him, would be take risks; he did not dare to do so. It was from this standpoint of personal ex-

way is negligently permitted to harm or de-stroy a shade or ornamental tree, the owner is liable to a fine of not more than \$100, and in addition he must pay for the damage done." temperance to young men of his temperament, whenever he got hold of them. "No man built as we are," he said, earnestly, to one lad of the same eager, passionate nature ought to take stuff which is sure to put the wild." He would never "put stimulants into the boiler," as he phrased it, and the result was that he always had a clear head and an unspotted reputation.

Many men have not Armour's good sense in this matter. They think that just because they have great abilities and gain many friends they can afford to indulge as other men cannot. They do not under stand their own perils of temperament. Armour's advice is advice to strong men; no man need be ashamed to take it. "I have written unto you, young men, because ye are strong." wrote the apostle when he warned them against sin. It is the strong life that makes the worst wreck when it goes wrong.

You needn't keep on feeling distressed after eating, nor belching, nor experiencing nausea between meals

In other words, you needn't keep on being despeptic, and you certainly shouldn't.

Hood's Sarsaparilla cures dyspepsia—it strengthens and tones the stomach, perfects digestion, creates a normal appetite, and builds up the whole system. You Needn't.

circle of his supporters by declaring his inef republican state organizations and go The new President is everywhere credited with a sincerity of expression and conduct that gives a truer ring to his policy than the people usually catch from the utterances of party leaders. An independence of this sort will find a support among the people that will give a proper value to the honesty that uirements. There is room for honest independence at the head of every governmen nd every increase in the men who stand fo this quality in their legislative duties will office in the gift of his country, President Roosevelt has a golden opportunity to stan popularize the independent consideration of

-The population of Sydney is increasing general desirability that it continues to a the province and business men who are supposed to have such an abundant circula work for a fair wage in a rough town have are meeting with disheartening reverses operation of such industries; as are centred in the Sydney district is not written in th books of the town tradesmen. Business is apparently overdone. The commercial world does not give the town very satisfactory rating. The presence of a considerable rough element in the population, whose act of rowdyism and violence are subjects of daily comment, has also marred the residen-tial desirability of the town, and after all there may be better all-round places in Nova Scotia than Sydney.

Tammany's Fight.

St. John Sun.

The contest for the New York mayoralty The contest for the New York mayoralty is really a remarkable struggle. It must not be supposed that all the honesty and decency in this second city of the world is arrayed against Tammany. On the contrary, the Tammany candidate is a man who has made a record as an opponent of Croker, as one of the leaders in the work of exposure, and as a former supporter and ally of President Low, whom he now opposes. With this Mr. Shepard, and on his ticket are several other democrats who in times past have won the admiration of the civic reformers for their pursuit of the spoilsmen. It is several other democrats who in times past have won the admiration of the civic reformers for their pursuit of the spoilsmen. It is one sign of the cleverness of Tammany that tights moralists with moralists, though it does not withdraw the machine from active service. Mr. Low was no sconer nominated as the foe of Tammany, than Tammany found another ancient foe to run against him, and this candidate is careful not to take back a single word of his former denunciation of the vices usually attributed to Mr. Croker's friends. Mr. Croker comes home from England, or rather he comes to New York from his English castle and manor, but he does not come to place himself in the visible line of battle. Let him manage the strategy, the underground restricts of the campaign, and he care self in the visible line of battle. Let him manage the strategy, the underground methods of the campaign, and he cares not who makes the speeches. So while Mr. Low denounces Tammany and civic plunder, and while Mr. Shepard denounces civic plunder, declaring that he holds to every word that he ever spoke against Tammany, the Tammany chief plane, organizes and finances the Shepard campaign, knowing that Shepard as mayor will like Van Wyck as mayor, contribute his name and his acquiescence to the administration which has decised to the definition of the decision of the cause for unusual good nature, and for greater expectations too, undoubtedly.

—Dash and Romp both competed in the 2.23 trot at Saugus, Mass., last Thursday. Dash, driven by W. F. Gibbons formerly of Bridgetown, finished 8 3 7 5 6 and Romp 7 5 6 7 4. The five heats were won in 2 204. Wyck as hayor, containistration which his acquiescence to the administration which makes Croker and his friends rich out of the 2.194, 2.204, 2.204, 2.204. rake off in civic contracts and the price which profitable vice pays for the liberty to flourish. Mr. Croker was a poor man a few years ago, He never made a dollar out of legitimate business, never had a recognized occupation that gave him alivelihood. Yet he has been able to buy an estate in England, on which he lives like those who inherit great fortunes. He is even now adding to his acres, and is in New York to provide himself with another four years career as a non-resident ruler with an income from his subjects probably larger than that paid by any nation in the world to its sovereign. Is there another city in the world which would have endured this so long?

is a subjects probably larger than that paid by any nation in the world to its sovereign. Is there another city in the world which would have endured this so long?

Canadian Militia.

(Ottawa Journal.)

M. Jean de Bloch, a Russian, who went through the South African war, in an article in the Contemporary Review, among other things claims that contrary to general idea the Boers were not good marksmen. It says the Boers only proved themselves good marksmen when shooting from distances assual to huntsmen. In this connection it is interesting to remember that when the Canadian rifle team were at Sea Girt recombite the Militian that when resourceful farmers, added by early a long distances. M. de Bloch foresses in the lessons of the South African war in the substance of the country the less than the seasons of the South African warding armies and obligatory service. It chops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and long the companion of the system of scanding armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both wire, has broops the ear of standing armies and both with the season of the youth Canada till the present system is changed and the Dominion Rife Association and there meets become less the properly of youth the canada till the present system is changed and the Dominion Rife Association and other meets become less the properly of youth the canada till the present system is changed and the Dominion Rife Association and other meets become less the properly of youth the canada till the present system is changed and the Dominion Rife Association and other meets become less the properly of youth the contract of the properly of your department o

Martial Law at the Cape.

Capetown, Oct. 11.—The Cape Times yesterday morning praised the enforcement of martial law in the newly proclaimed districts, the more was the newly proclaimed districts, the more dead and Habib Ullah Khan has been officially proclaimed Ameer. The brothers of Habib Ullah Khan left Cabul secretly with timpose the minimum of inconvenience upon all who are zealous for the maintenance of the King's authority and the speedy termination of war. At the recent conference of Sir Gordon Sprigg, the Cape Premier, with Lord Kitchener, it was demonstrated that there was a dire necessity for the extension of martial law to the Cape peninsula. This should have no terrors for the extension of martial law to the Cape peninsula. This should have no terrors for the extension of their brother. The Ameer of Afghanistan has long been a valued friend of England, his country being a buffer stace between Russia, on the northwest, and India on the southeast.

The Will lecture here the 21st in the church: Silver collection.

## Practical Talks and Plain Precepts in the size of fruit picked early. My experience has been that early picked fruit keeps for Farmers.

Edited for the Farmer readers of the MONITOR by an Annapolis Valley Agriculturist

When to Plow Sod. J. A. MACDONALD, Prince Edward Island.

I have learned not to plow sod land late in the fall or early in the spring, unless to orchard with few marketable varieties is court failure in nine cases out of ten. If you considerably more valuable than one with a must plow ground at those seasons, plow grain, potato or root stubble. After Nov. let sod land should not be plowed. If not plowed before then, wait till the ground ada Red are other good stand-bys that are warms in the spring. There are exceptions, no doubt, as there are in all things, but in more than some unknown kinds, though the this case good results are the exceptions. I want to get my sod plowed as early in the 'I assure you if all the want to get my sou provide the set matters in a praccare to plow much before this, or if plowed before then too much weed growth appears and the land is apt to become so foul that it may have to be plowed again, notwithstand.

would only consider these matters it tical way a great benefit would r growers."—Maritime Farmer.

Canadian Fruit versus the Wor ing the fact that a good cultivator and harrow has been used. If one expects to plow row has been used. If one expects to plow the ground again late in the fall, as for example in working up land for a root crop, the first plowing of the sod may begin before Sept. let, but so far as my experience goes this second plowing is an unnecessary labor example to head ground. If oarried too far north it dwindles to a crab; if to example to the world can excel an the southern part of Ontario, portions of Quebec and a considerable portion of Nova Sootia for the world can excel an the southern part of Ontario, portions of Quebec and a considerable portion of Nova Sootia for the world can excel an the southern part of Ontario, portions of Quebec and a considerable portion of Nova Sootia for the world can excel an the southern part of Ontario, portions of Quebec and a considerable portion of Nova Sootia for the successful production of the apple, which must always, among the fruits, hold foremost place in the estimation of mankind. If oarried too far north it dwindles to a crab; if to row has been used. If one expects to plow

even for heed crops.

I believe it would pay to sow, on sod land

It is no fault of our Australian cous plowed in Sept. intended for hoed crops next spring, some rye or any other crop that would make a good fall growth. But where would make a good fall growth be under the world of Melbourne, where there were no less than land is intended for spring grains, this would not be practicable. Sod land intended for ont be practicable. Sod land intended for hoed crops, as corn, potatoes, roots, rape, etc., is best plowed in September, but for grain crops October is probably the best month. When plowed in September, but for again some weeks later, to keep down weed growth and close up!the furrows and help decomposition of the sod. When plowed in October and intended for spring grains it need not be harrowed at all, if the plowing has been done well, but if there are spaces between the furrows, a scratch of a spring tooth harrow had better be given to seal up the surface and accelerate the rotting of the sod.

Sod plowed in Sept. for a hoed crop might be sown immediately to rye and vetch in the proportions of two bushels rye and one bushel might be used and 10 lbs. orimson seed. When thus sown the second harrowing and cultivating is not necessary, and the cost of the seed may be amply repaid in the amount of winter pasture that will be afforded. Such a pasture will be found indispensable to the grower of bacon hogs, and also for herd sows and shotes of any class of hogs. It will, too, afford a fine pasture for dairy

for herd sows and shotes of any class of hogs.

It will, too, afford a fine pasture for dairy not surpassed as an apple producing region not surpassed as an apple producing region

injury done from plowing at this time is very serious. With fallow land the injury is by no means so great, but, on the other hand, it is often an advantage to plow fallow land late in the fall, to expose it to the winter frosts. For spring grain collivate thoroughly with disk early in spring before sowing, and sow the spring grain moderately early. If no cover and pasture crop is sown on the Sept. plowed sod, cultivate early in spring and again every ten days till the crop is sown or planted. This is important even if the crop is not This is important even if the crop is not

sown till June. Have Faith in the Orchard.

The man that waits to see if his orchard of which may be of long duration. Reference is had principally to the neglect of the nutritious and beautiful fruit, they must, as foot of the bluff. orchard in the way of spraying, pruning and a matter of course, favor the successful cultivating, but principally in the way of growth of all northern fruits—strawberries, close to the ground that they interfered only spraying. This is work that needs to be red and black raspberries, blackberries, curwhen the snow was light—barking and somespraying. This is work in the feet of a special principles, to develop a strong healthy foliage that will in turn strengthen the tree for future useful. The feet of the latter a large would clean off a moderately heavy snow, and when the stumps showed too bumptions. destroyed each year of its growth by blights some of the Rogers purple grapes, can be pro- work, and wait for a fresh snowfall.

When Do Apples Cease Growing?

Are prepared from Nature's mild laxatives, and

while gentle are reliable and efficient. They

Cure Sick Headache, Bil-

Rouse the Liver

After a visit to the apple growing sections of California, in which he speaks of the ad- ment and settle the question at once for myonto apple exporter, goes on to say:

States home demand, there is no reason to three or four days could see that the wire and forth as blows were aimed at them.

fruit trade, and from now on it will be very long as they remained upon the tree. hard to market the inferior apples. Even the local markets, which formerly were comparatively indifferent to quality, now insist well colored, since I know the danger of paratively indicated to an action on having No. 1 apples or nothing, and the leaving them upon the tree subject to wind.

'Liph and Perry's father then sprang upon storms, which are liable to occur during the the logs, and climbed to the top of the pile chard cannot produce good fruit without proper care any more than a cow can produce milk without food; the trees must be man- Hood's Pills ured and pruned and looked after in the bepossible manner. Results will certainly show in the second or third year, and nothing will pay a grower better. A good crop, even at 50c. a barrel for the fruit, will pay as well as anything a farmer can grow, and this lov price is exceptional, as in many years apples will average double. Why, then, neglect the orchard? We want to help our own in the competition of export apples, and the tivate; therefore let us not be be

fall season, but there is certainly some loss | the log-heap on all sides with snapping jaws longer than that which is picked later, but if the fruit is placed in barrels immediately on picking from the tree and placed in cold there is but little danger about its keeping.

I consider it a great mistake to pick apples and allow them to remain in piles under the rolled down to the heap after dinner. Exof varieties of apples in many orchards.

These should be grafted or planted out in rees for weeks before barreling, as is the custom with many fruit growers. Apples thus exposed ripen rapidly, and will not keep nearly so well as those apples large quantities of few varieties. In Maine placed in barrels immediately after being micked. - Green's Fruit Grower

> Protecting Overloaded Fruit Trees. CHRISTOPHER CLARK, Massachusetts.

Simply wire the lower branches to the pper and those to the central portion of the runk, thus sustaining the overweighting of "I assure you if all the growers in Canada he branches and making it almost impos sible even in a high wind or ice storm for the branches to be torn off, and the trees thus ruined or damaged beyond repair. First drive into the branch at the points

you are to fasten the wire, on large trees, a three or four-inch round nail, to which you are to fasten the wire, letting the nail proect an inch or an inch and one-half. Next take some pieces of lath or thin boards, sawed into pieces three or four inches long and an inch or more wide and nail into the limb with small nails on each side of large nail to protect the limb from being girdled by the wire, this being the best way to prevent it. Then loop the lower end of the wire around the lower limb and twist wire together above the limb to make fast, and omplete the loop. Finally draw the other end of the wire to the upper limb, and nail loop and make fast again in the same way, these loops being made open for several inches larger than the limb in order to allow for the growth of tree. For large apple trees use No. 10 telephone wire, and fo small trees small round nails and No. 12 telephone or copper wire, neither of which wires will corrode. This method does away with almost all need of using timber props, and does not disfigure the trees, and if telephone wire is used, need not be removed for several years. Large trees whose trunks are liable to split apart where the main

bolts can be used, which do not injure the Peach trees, whose wood is specially brittle, should be looked after at once and the limbs wired or corded up, to prevent the winds from tearing them apart, and the fruit being lost. The tools needed for this work are a hand-saw, hammer and a heavy pair of pliers to cut the wire.

branches join the trunk, can also be wired

together with heavy wire until permanent

The Wolves of the Baraboos.

(FRANKLIN WELLS CALKINS, in Youth's It will, too, afford a fine pasture for dary cowe and sheep. What is most important, such a crop will conserve the fertility and protect the land from washing.

When sod land is plowed late in fall and early spring, the land is soggy and the forces of nature are in a state of inertia, so that the thingry done from plowing at this time is very the state of the Nisgara Peninsula extrement of the Nisgara Peninsula extending the strength of the Nisgara Peninsula extending the strength of the South-western extremity of Lake Erie, are good peach country, but the part of the Nisgara Peninsula extending the strength of the bours had a cabin in the woods a

"Quite an evolution is taking place in the long as they remained upon the tree."

top of the pyramid. where the boy now stood. One hardy wolf immediately followed with a jump, alighting on the lower logs, but a downward sweep of 'Liph's handspike knocked him heels over head, and sent him limping and howling away down the bluff, probably with a broken leg. This had the effect of intimidating the pack from making any immediate attempt

to rush upon the loggers.

The wolves-'Liph counted thirty-eight of them-squatted about, licked their jaws anxiously, or shifted back and forth as tempted to make a leap upon the logs.

The besieged stamped about upon the top iousness, Sour Stomach, and Constipation. Sold everywhere, 25c. per box.

Prepared by C.L. Reed & Co., Lewell, Mass.

The besieged stamped about upon the logs.

The besieged stamped about upon the top of their pyramid, shouted, and waved their clubs to scare the beasts. But the gaunt horde, desperate with fasting, pressed about

and eyes that, even in the deepening twilight, gleamed ferociously.

Aside from imminent danger at the jaws

of the brutes, the situation of the men soon was coming on with a cutting wind from the study and whose strength does not posed as they were on the brow of a bluff facing the north, the cold wind pierced t their bones the more quickly because, in tugging at the logs, they had been sweating. "Something's got to be done!" shouted Mr. Barbour to 'Liph, who was still making demonstrations at the wolves. "Something's got to be done or I'll freeze plumb to death,

at alone being eat up by these vermin !"

'Liph turned about. "Tell ye what," said

and while they're chewing it up we'll run for Even Perry, who had been so foolhardily anxious to save his game, saw the wisdom of this plan, and seized the hind legs of the fawn to assist 'Liph. Together they swung the original and best Emulsion. the deer to and fro, once, twice, three times and as it weighed not more than sixty or seventy pounds, they flung it several yards down over the brink before it struck the smooth, steep surface, where it slid rapidly

The whole surrounding pack of wolves had been jumping back and forth with expectancy as they watched 'Liph and Perry heaving the swaying body of the deer; and now the bluff in the wake of the carcass, overhauling it, pouncing upon it, and piling upon and over each other in their despe a confused and scrambling mass of jaws, legs and tails.

As the loggers, immensely relieved at the sight, craned their necks to look down at the turmoil, an inspiration came to 'Liph. "They're square below us!" he cried. 'Let's give 'em a log. It'll smash the whole

With the backwoodsman's quick instinc for action, the three spring together back of the top log, a 20-foot cut nearly three feet in diameter. The elder Barbour and 'Liph thrust their handspikes into the crevice and got a "bite" against the lower log, and Perry in his eagerness heaved with his shoulder for want of a spike. A steady pressure upon the ends of their levers raised the big log above the level of its opposite and lower neighbor, and an extra heave tilted

it over.

From the top of the log-pile the great trunk plunged, going over the brink of the bluff, straight down upon the struggling pack, as if discharged from a catapult. The clamor and struggle of the piled up mob of wolves prevented them from seeing or hearing until by far the finest and fastest steamer plying out of Boston, leave Yarmouth, N.S., Monday the huge missile bounced directly among them. Then the destruction, the howls, the ounds of the survivors. 'Liph said it was "like striking your fist into a tin plate full of parched corn." Those animals which had scaped crushing leaped and scrambled in every direction, frightened out of their wits, debris into the woods on either hand, and others plunging with tremendous springs ST. JOHN and DICBY, noise and rush that might well have scared | Leaves St. John....

tered about the carcass of the deer, and that an eighth, severely hurt, was dragging itself toward a brush-pile. Then they set to and heaved over log after log, until six had gone booming and crashing down the bluff. Then fearing that the pack, which was still very numerous, might return when their logs were exhausted, they picked up their coats and the gun and hurried across the bluff, making a slight circuit to keep high, clear ground in getting to their camp. They saw no more wolves that night, however. They did not return to the scene of their exploit until the next morning, when they ound the pack had returned some time in the night, and cleaned the bones of the fawn Seven dead bodies of big, gray wolves lay

clese by untouched, and the wounded one was also found dead under a brush-pile.

To Gen Baden Powell. London, Oct. 3-The Australia is bringing rom the Antipodes a gift from the people o Australia to Gen Baden Powell. The gif consists of a sword of honor, with a hilt o Australian gold, and its intrinsic value may be judged from the fact that it is insured for £:00. The Sydney Times and The Refere received one shilling subscriptions to the amount of £900 for a present to the defender of Mafeking, and the balance of this amount has already been expended on two valuab horses, which were presented to Gen. Baden Powell in South Africa. Hon. H. Copeland, Agent General of New South Wales, is make ing arrangements for presenting the sword

How One Million is Spent. Not less than one million dollars are annually spent by people seeking an absolute cure for Catarrh, Bronchitis and Consump. cure for Catarrh, Bronchitis and Consumption. Numerous are the remedies, but the one standing pre-eminently above all others is Catarrhozone. It cures these diseases because it is sure to reach them. Catarrhozone is inhaled into the lungs, throat and nasal passages, and bathes every part of the diseased membrane with its germ-killing, healing vapour. You simply breathe Catarrhozone and it cures. Easily applied Quick Shine

The Household.

The Influence of a Few Girls. I know of a Y in a distant western state that had only five members, and they had begun to think that they were so few that it would be just as well for them to give up. One girl said, "Well, let us try once again and see what can be done." Another remarked that if they were going to keep together there was one thing they should has been curing these cases | would not go with a young man in the town

> they could do. In a few hours time the news went out that the best girls in town had met and decided that they would not go with the boys, for that they would not go with the boys, for alas, all of the young men used either liquor or tobacco. The young men decided that they would teach the girls a thing or two, and said they would very soon get tired of not having the boys to take them out driving or to entertainments. But time went on and there seemed to be something wrong, for the young men found themselvos very lonethe young men found themselvos very lone-some, and first one and then the other said Er I shall have a settlement with you, as he was going to see some one of these girls, and before very long most of the young men had signed the pledge against liquor and to-

a Christian, and the desire came to him to be used of the Father to carry the message to An' Johnny, in perticular, ain't likely to be found.

Ah, dear girls, it pays to have convictions have we'in this nation as brave as these mentioned! I have heard preachers say three times in the last three months that the young man had a higher standard of morals than the young woman. Is it true? They went on to prove what they said by stating that there was not a young man in the state who there was not a young man in the state who is the same of have we'in this nation as brave as these menwould go with a girl who used tobacco or An' Bridget she gives warnin' then—an drank, and still our brightest and best young women made no such objection to the habits of a young man. Of course our Y girls will not do this, but it only proves how anxious we should be to enlist all the young wome and to bring them within our circle of influence. It is true that the future of this na-

tion depends on good girls. Curing the Blues.

But it brought about good re sults, and then came the inspiration to try the same cure on others. The doctor has not patented his remedy, and it is free to all who choose to take advantage of it. - Minneapolis Journal.

The Quiet Girl. The quiet girl pever wears high colors in he streets, you do not see her flaunting in rilliant cheques when they happen to be in the style. When high hats are "in" she loes not pile hers so high that it sweeps the obwebs from the sky. She does not wear the largest train to her tea-gowns, nor the lon? No, sir; I do not want anything to

greatest number of bangles when bangles But because she does not chatter and giggle, and make herself conspicuous at matin ees, does not announce her convictions on all occasions or on all subjects, and profess her

admiration at every hand's turn, it must not be supposed that she has no ideas or convictions or enthusiasm. She is quiet because she has no power to make herself heard, to change her condition, or because she is ma

turing that power.

In the meantime it is the quiet girl who "Oh, mamma," cried Tommy, "Willie's narries earliest, who makes the best match who fills the niches which her more brilliant sisters leave vacant; who manages the sen vants, runs the sewing machine, remembers the birthdays, listen to the reminiscences of the old, and often keeps the wolf from the

Papering the Wall.

Often the housekeeper desires to paper eiled partition or wall, and it is very yexaious to have the paper crack off, as it is al st certain to do. Various expedients have been tried, including papering over the wood with newspapers, pasting strips of cloth over the cracks, etc., all of which have been found unsatisfactory. The best way, the only really successful way, is to cover the entire wall with cloth, the cheap three cent muslin being as good as any, and put it on not with paste, but with upholstery tacks which are small and flat-headed and do not show under the paper. Put the muslin or in strips as you do the paper. If you wish to paper a ceiling, seam the breadths of muslin together, tack it at one end and stretch it tightly to the other. Tack that end and then drive tacks a foot apart all over the surface. Then it is ready to paper.

Coffee Caramels. Take one pound of brown sugar, one c

Recipe for Floor Oil. One pint of linseed oil, one pint turpen-tine, and one pint of kerosene; mix. Apply with soft cloth and wipe with another. This will be liked by all who have an oiled floor. Joker's Corner.

that's the way it goes—
A plenty noise an' plenty fuss,
When Johnny spends the day with us!

Christian Science vs. Medicine "Mr. Dooley" the other day discussed the relative merits of Christian Science and the wiser and wittier than any oracle regarding both, especially regarding the specialist who has made a specialty of nervous diseases, has found a new remedy for 'the blues.' As no below the chin an' I'd be fired by the Union drugs are administered, he has felt safe in experimenting with at least a half hundred In summing up, he quotes "Father Kelly," nelancholy patients, and now declares him- who says of the regular practitioners that self thoroughly satisfied with the good results of his treatment. His prescription reads something like this: 'If you keep the ''If they know less about pizen an' more about gruel, an' opened fewer patients an' more windows, they'd not be so many Christorners of your mouth turned up you can't | yan Scientists. He says th' diffrence befeel blue.' The directions for taking are, tween Christyan Scientists an' doctors is Smile, keep on smiling, don't stop smiling.' | that Christyan Scientists thinks, they'se no sounds ridiculous, doesn't it? Well, just such thing as disease, an' doctors thinks My assortment of Boots, Shoes try turning up the corners of your mouth, there ain't anything else. An' there ye

"What d'ye think about it," asked Mr. "I think," said Mr. Dooley, "that if the

Christyan Scientists had some science an' th' doctors more Christyanity, it wuddent make

An Awkward Blaze.

"It was this way," said the clerk. "A young lady came in and stood over by the production. A call at my store and, of course the greater number of patients were rushing for the door and the girl who are women, for when a man is blue he is was on fire was shricking like an Indian. bound to be blue in spite of everything, but a woman is more easily persuaded to try to bottle and let go at the hat just as big Mar-The doctor declares that if persons will wrench the hat from the girl's head.
