A SKIN GRADE

is a mild way of characterizing the old method of selling filing cabinets.

in which the cost of the cabinet is concealed in the generous figure charged for installing a system.

Most live business men know what they require now-a-days, and it is to these that the "Macey" way of selling filing cabinets on a strictly commercial basis would appeal.

Dollar for dollar, you offer in the "Macey" fine means a cabinet of better construction and better and more durable finish than any line on the market—Get our figures before you buy—Our catalogue No. 435 tells more about them—

CORNWALL LACROSSE CLUB. TO BE PUT ON SUBSTITUTED BASIS—OLD PLAYERS AVAILABLE.

Cornwall, March 7.—(Special).—The advent of the lacrosse season of 1906 is being marked by a strong movement to put the Cornwall Lacrosse Club on a businesslike basis, and the number of solid citizens who are taking an interest in the welfare of the club is greater than at any time in its history.

Some of the old-timers are taking a hand in the quiet revival now in progress, and it would not be surprising to see several of them on the board of directors for 1906, for their factory owners the shareholders here last summer, a victory that was secured by securing the Cornwall Lacrosse Club.

MEANS MUCH FOR AUSTRIA.

Franchise Bill Taken Up For First Reading in the House.

Vienna, March 7.—The government's franchise bill, which provides for general, equal and direct suffrage for Austria, and which was introduced on Feb. 23, by Premier Gauch Frankenburg, was taken up on the first reading in the lower house of parliament today.

The bill is regarded as the most important measure for Austria in the past generation. It has won almost universal support, and there is every reason to suppose that it will be passed. One of the main reasons for the support of the bill is the fact that the political clubs representing the various nationalities of Austria have recognized the project as imperative for the country.

The landed aristocracy who lost power and prestige thru the project, naturally are opposed to it, but they will not be able to materially influence the proposed law, which will be discussed energetically and at great length.

YORKVILLE OLD BOYS WILL HOLD A PICNIC.

The Yorkville Old Boys' Association met last night in Kitchener Hall. The president, W. E. Dobson, occupied the chair, and about 100 were present.

The main business of the evening was to make a decision as to whether the first picnic would be held. It was decided that if practicable the association would go to Jackson's Point via the first train of the Radial Railway on the opening of the road.

Falling in this they would either go to Brock's monument or to Midway on June 2, which is the 40th anniversary of the battle of that name.

The estate of Mrs. Agnes Clarke, who died Feb. 12, amounting to \$218,644, has just been received for exhibition purposes.

Willing to Pay Ten Per Cent. If Superannuation at End of 20 Years is Possible.

The status of the benefit fund is the big topic of conversation among the firemen nowadays. Just how matters stand is rather uncertain and even the aldermen on the fire committee don't seem to know where they are at.

"That remark that we should stick to our agreement and pay 10 per cent. toward the fund first founded on fact," said C. J. Graydon of Howe 2, appeared before the committee some months ago, and to whom is attributed the "promise" spoken of. "In answer to a question from Ald. Graydon as to whether we would be willing to pay 10 per cent., I replied that we would 'conditionally,' and that was all that was said. In any event, I would not have been speaking for the fire department as a whole, as I was representing 18 men only, and I would not have signed the petition urging the committee to defer the consideration of the percentage to be required, until the actuarial had reported on the fund. Subsequent events have shown us to be justified in making that request.

"The firemen are pleased with the efforts the committee are making in the matter, and we heartily endorse the suggestion of Chairman Fleming to have the \$50,000 citizen's fund with the benefit fund. But first of all, there are 17 men, engineers, stokers and electricians who do not pay into the benefit fund, but whose families are eligible for the widows and orphans fund, who would be taken into the benefit fund. It is only a matter of time when the fire department would pay into the fund, and it would be no more unfair to bring them in without medical examination than it is when the fund was organized in 1891.

"That there has never been proper attention given to the fund is certain, when you consider its record. It has been in order, there is only \$40,000 to care for the men. It has been claimed that this fact has retarded the retiring of older men, unfit for service.

"An argument for the merging of the citizens' and benefit funds, that the interest of the citizens' fund, which was subscribed after the Montreal Irish disaster, was for the benefit of half a dozen beneficiaries now, the largest amount paid being \$18 a month, is \$400 a year left over for the benefit of future claimants. The men not now paying into the benefit fund are in good luck, their cuts are not as large as those of the men who are in the dangerous positions of the active firemen.

"Every 10 per cent. that there would perhaps be no disinclination to accept if the payment is made to run for a certain time, if, at the end of 20 years a man can retire at half pay, is not the unfair proposition it is now when, during an active career, he is at 21, paying in for five years for two spring lambs, the other lambs sold at about \$5 each.

"I see the chief is willing to accept \$10 per cent. under the circumstances, but on the other hand, it would be hardship to the men on the graded scale, to take them out of the benefit fund, and to put them into the citizens' fund.

"Ald. McBride, the other day said it would be impossible for a retiring fireman to live on \$25 a year; yet he would have had the young fireman pay 10 per cent. on the \$400 a year he is receiving.

"At present the benefit fund is in a state of interest to the fire department in general, that at the last election of officers, there was a complaint by the representative of the officers, that the benefit fund was being run as a whole, and that the firemen were being asked to contribute to it, while the aldermen on matters pertaining to the benefit fund. One of the things that could be done, would be to have a separate fund for the officers, seven in number, have two representatives, including the chief, for the firemen, one for 25, and the rest of the department only three, for close on to 175 men."

MURDER INDICTMENT FAULTY.

"Did Kill" Not Explicit Enough to Satisfy the Judge.

Montreal, March 7.—(Special.)—The evidence heard so far in the trial at Valleyfield of D. Chagny, accused of the murder of George Archambault, on Aug. 11, 1905, has been so far so good, that the coroner's inquest, which was held in the courtroom when Coroner Dr. Lefebvre produced the bloodstained shirt worn by the prisoner, has been in good spirits. On the production of this piece of evidence, the trial almost came to an unexpected adjournment this morning when the trial was taken to the indictment. It read as follows:

"In the City of Valleyfield, district of Beauharnois, on the night of Aug. 11 and 12, 1905, Donat Chagny did kill a man by name of Geo. Archambault. It should have read "murdered or killed with premeditation." Judge St. Pierre decided that the document was worthless. The criminal code, which states that it is a crime, is remarked Judge St. Pierre, "there is a great difference between killing a man and murdering him. A man may be killed accidentally or maliciously. In the latter case he is guilty of murder."

Counsel finally waived objection.

WATERWAYS COMMISSIONERS.

Advisors to Meet Next Time in Washington on April 6.

The international waterways commission adjourned last night, to meet on April 6 at Washington.

"No definite conclusion has been reached in the various items which engaged the attention of the commission," said George Gibbons. "We have practically left all the matters over until next month, when definite arrangements will be made concerning the regulation of Niagara water power, the Michigan monument or to Midway on the Detroit River and the Soo proposition. The engineers' reports have usually been agreed upon by all the members."

LUMBER TRADE IN WEST.

Winnipeg, March 7.—The lumber trade in the West is rapidly assuming giant proportions. In the Province of Manitoba and Saskatchewan for the last fiscal year 578,000,000 feet were consumed in building operations, an increase of nearly 38,000,000 feet over 1904.

The great bulk is produced in Canada.

Labor's Recommendations.

The special committee appointed by the district labor council will go before the board of education to-night and recommend better equipment, more teachers and a large range of studies for the technical school.
