THE HOUSEWIFE WHO KNOWS. The housekeeper who is wise does not hesitate to serve "Sweet Nut" Margarine to her most fastidious guests in place of dairy butter. First, because it is not a substitute but a table luxury which rests on its own merits. Made from the fresh, crispy white meat of the coconut combined with a new process with pasteurized milk and without a particle of animal fat in its composition; it has the absolute purity which only Nature's purest ingredients can impart. It cannot be distinguished, when served, from delicious butter, and has the identical butter flavor which always pleases. Best of all, it saves about 50 per cent. on your butter expense—only 4c. a pound. For sale by F. E. Williams & Co., Ltd., corner Charlotte and Princess streets; Forestell Bros., corner Millidge and Rockland road; E. Roy Robertson, 11 Douglas avenue.

WHALE'S MILK NOW

Los Angeles, Cal., Jan. 12.—A whale dairy is the latest possibility in this city, if the incipient demand for whale's milk is continued. Although whale meat has been served in prominent hotels on the Pacific coast for more than a year, the milk of the cumbersome mammal has not been in special demand.

According to Captain John B. Loop, a whaler at Long Beach, who has been supplying the most delicate cuts of the mammal fish to hotels and restaurants patronized by connoisseurs, the milk of the whale is richer and more palatable than cow's milk. A test made at a lodge function resulted in a request for a permanent supply of the new drink. Captain Loop has received an order from Omaha, Neb., for a quantity of whale's milk.

Captain Loop has announced that the demand for sea mammal milk appears to be permanent, an effort will be made to bring the cow whales home hereafter, so that they can be herded into a dairy.

A NATIONAL ISSUE

Two lines of railway owned by the government have terminals at St. John. They connect St. John with western Canada and afford an outlet for its trade.

A tremendous task awaits the League of Nations. Some of these are set out by Lord Robert Cecil, who says: "Schemes for the limitation of armaments must be worked out; terms of the mandates must be settled and mandatories appointed, and an International Court of Justice must be established."

This is not a local but a national matter. The government must provide its own railways with terminals, so that freight of all kinds may be handled with dispatch and the steamers also given quick clearance.

Unhappily there is said to be prejudice, in a quarter where the interests of the government railways should give rise to the very opposite feeling. This is the national port nearest the heart of the country in winter, and the record of its trade during the years of the war tells the story of its immense strategic value as a port to Canada and the Empire.

From the purely business standpoint one can conceive of no greater folly than to go on trying to do business without adequate facilities. As already pointed out, therefore, the government must have a clear-cut policy in relation to this port where its trains and its steamers meet.

It does not appear to be generally understood that the recreational evening classes are open to everybody. There is no age limit, except that pupils attending the day schools are not expected to attend the evening classes.

THINKS GOVERNMENT OF ONTARIO IS TO HAVE A SHORT LIFE

Toronto, Jan. 12—George S. Henry, M. P. P. for East York, minister of agriculture in the late Hearst government told the East York Liberal-Conservatives on Saturday that he thought the U. F. O.-Labor administration would not last long.

PEACE TREATY RATIFIED

With the exception of the United States the great nations lately at war have ratified the peace treaty. The next step is to make effective the League of Nations. The head of the German peace delegation, in expressing great satisfaction that peace has become effective, pledges his country to do her utmost to fulfill the terms of the treaty.

republic is content to be last in making peace as it was last in getting into the war there is nothing to do but exercise patience, confident that in the end the people will thrust the politicians aside and make way for the statesman.

A tremendous task awaits the League of Nations. Some of these are set out by Lord Robert Cecil, who says: "Schemes for the limitation of armaments must be worked out; terms of the mandates must be settled and mandatories appointed, and an International Court of Justice must be established."

VOCATIONAL TRAINING

For the successful introduction of vocational training in St. John it would seem necessary to have at once a qualified director. It is never wise to make a bad start, and there is no good reason for it in this case.

Twenty-eight steamers in port with only thirteen deep water berths to accommodate them is the best possible evidence of government neglect of a national duty. The commerce of the world knocks at the main door of Canada in winter, and the facilities to handle it are not here.

The Standard has discovered that there is no room for Liberal principles in Canada. Of course that journal would prefer Tory principles and the rule of the machine, with hold-ups and rackets and such doings as royal commissions in this province have exposed. These are gray and gloomy days for the Standard and its friends.

It does not appear to be generally understood that the recreational evening classes are open to everybody. There is no age limit, except that pupils attending the day schools are not expected to attend the evening classes.

St. John is deprived once more of the Boston steamer service. This is a great inconvenience to many shippers and importers, and it may be hoped a remedy will soon be applied.

THRIFT

The sanest thing on earth is thrift; it is the slogan of the wise; without it human beings drift to joints where paupers sweat the flies. All workers now are in demand, there's no excuse for idle lads; employers in the market stand and offer forty kinds of Soads.

THE FIRST LIBRARY

With magnificent public and institutional libraries everywhere in Canada as they are now it is quite difficult to imagine a day when books were few and reading matter difficult to obtain. But the early settlers suffered a great privation from loss of books in their little cabins while even the officers in the cities found it almost equally hard to secure pleasant reading.

LOCKED COOK IN REFRIGERATOR

Seaman of Steamship Lake Wilson in Irons — Man Nearly Frozen.

New York, Jan. 12—A feud of the sea was reported yesterday by the steamship Lake Wilson, arrived from Cristobal with S. Gufoin, one of the crew, in irons, charged with having attempted to murder the chief cook by locking him in his own refrigerator. The cook was trying to chop his way out with a cleaver when his cries for help were heard. He was nearly frozen. The quarrel between the two men began when they were on shore leave at Cristobal.

A DANGER SIGNAL—TENDER AND BLEEDING GUMS

Healthy teeth cannot live in diseased tissue. Gums tainted with Pyorrhea are dangerously diseased. For not only the teeth are affected, but Pyorrhea germs seep into the body, lower its vitality and cause many ills. Pyorrhea begins with tender and bleeding gums. Then the gums recede, the teeth decay, loosen and fall out, or must be extracted to rid the system of the poisonous germs that breed in pockets about them.

Four out of five people over forty have this disease. But you need not have it. Visit your dentist often for tooth and gum inspection. And keep Pyorrhea away by using Forhan's For the Gums.

Forhan's For the Gums will prevent Pyorrhea—or check its progress—if used in time and used consistently. Ordinary dentifrices cannot do this. Forhan's keeps the gums hard and healthy, the teeth white and clean. If you have tender or bleeding gums, start using it today. If gum-shrinkage has already set in, use Forhan's according to directions, and consult a dentist immediately for special treatment.

MARINE NOTES

The new four masted schooner Cutt, built by Grant & Home, sailed on Saturday on her maiden voyage to the Canary Islands.

The steamer Georgin, which arrived yesterday from Havre, is a new steamer of the Elder-Dempster line and will sail from here for South Africa ports about January 15.

The steamer Jekri, formerly the Wa Pilot, is the next steamer on this route and is due to arrive here about January 20.

The schooner J. Frank Seaver, from Preston, Eng., arrived at Pencoak (Fla.) on January 9, and she will leave there for Cuba. R. C. Eldin, Ltd., are the local agents.

The steamer Northland, sailing to-night, will make the last trip of the Eastern Steamship boats from this port this season. The reason given for the withdrawal of the service again is said to be the demand of the Nova Scotia people for a restoration of the bi-weekly service.

The steamship Virginia, familiar to old Allan line travelers, has been sold and is now under the Swedish flag. The deal was put through recently by the C. P. O. S. line.

ONTARIO BOND ISSUE

Toronto, Jan. 12.—Another bond issue of \$3,000,000 has been disposed of by Ontario, the purchaser being Aemilius Jarvis & Co. of this city. The bonds are for ten years and bear 5 1/2 per cent. The bid of Jarvis & Co. was \$9.41, New York funds. This is supposed to mean that the bonds will be disposed of in the United States, where it is understood the money is required to pay off a loan to mature soon.

CAN COMMANDEER AIRCRAFT IN WAR

No Person Can Now Fly in Canada Without Certificate—Aircraft Regulations.

Ottawa, Jan. 12.—Regulations to which all persons operating aircraft in Canada, whether for private or commercial purposes, will in future be required to conform, have been approved by the governor-in-council, and will soon be distributed. They provide for the registration, by the Canadian Air Board, of all aircraft, and the issuance of certificates to pilots, without which certificate no person can fly in Canada. These certificates are available only after applicants have satisfied the board by certain stipulated tests, that they are qualified to operate a machine, and have also passed a medical examination. In the case of pilots operating machines for commercial purposes, medical examinations must be passed every six months, and in the case of private fliers, every twelve months.

LEND-A-HAND CIRCLE

The monthly gospel meeting of the
King's Daughters' Guild was held yes-
terday afternoon in the rooms of the
"Lend-a-Hand" circle. A very im-
pressive and interesting address was
given by Mrs. H. Colby Smith, leader of
the circle. Her subject was the motto
of the circle "Lend-a-Hand." Miss
Alicia Heales was pianist and Miss
Jessie McKay sang a solo "Hold Thou
My Hand," which was beautifully
given. The devotional exercises were
conducted by Mrs. Corbett of Douglas
avenue.

COLONEL GUTHRIE IN TALK ON WAR IN NEEDHAM HALL

In Needham, Mass., on last Thursday,
at the first forum meeting held under the
auspices of Needham Post, American
Legion, Colonel Percy Guthrie, organizer
and commander of the MacLean Kilites,
gave a talk on the part taken in the great
war by his organization. The Boston
Globe says he spoke of the cause of the
war, stating that it, like all other wars,
was due to selfishness on the part of dif-
ferent nations. He spoke of the part
which the American women had played
in the great conflict, both at home and
abroad, and how they had proved them-
selves worthy of a full share in the fu-
ture problems of life.

Colonel Guthrie spoke of the different
claims made by various countries as to
which nation won the war, and said
that all the nations' combined acts
brought the conflict to a close. He spoke
of the part that Belgium played in hold-
ing back the Huns of the large num-
bers lost by France and Italy, of how
England was the watchdog of the seas,
and of the great part taken by America.
He told a glowing tribute to the re-
turned soldier and how he had come
back free from any religious or class
strife and said they would be found al-

Halifax, N. S., Jan. 12—President

has just returned from New York, says
he had a very satisfactory interview with
the president of the Rockefeller founda-

would be part of a survey of the condi-

of Canada. Not until it was completed
would a final disposition of the Rocke-

QUIT MEAT THE KIDNEYS BOTHER

Take a glass of Salts before breakfast if your Back hurts or Bladder is troubling you.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally with a well known authority. Meat forms uric acid which excites the kidneys, they become overworked from the strain, get sluggish and fall to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders come from sluggish kidneys.

At the moment you feel a dull ache in the kidneys, your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of swelling, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with bicarbonate of soda, and is recommended to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.

It is officially stated that all the American troops have been ordered to evacuate Manchuria by March 1.

A FREE BREAKFAST
A large dog and a milk can joined the get-together movement this morning. The can of milk was in front of the door, and the cover was upside down. The dog made a brief inspection—noised the cover off the can and proceeded to get his breakfast. The milk was cold, of course, but so was the dog. It was also a cold day for the regulation regarding the cleanliness of the milk supply of the people.

TRAFFIC BLOCKED
The need of improved facilities at the Union Depot is presented almost daily to people whose business takes them in that vicinity, because of the inconvenience caused by the tracks being blocked by shunting cars. This is especially the case at present with such a remarkable congestion of cars as exists. About 115 today the street on either side of the crossing was blocked with people, cars, motors and wagons, extending almost to Paradise row on that side of the tracks.

STARTS MINING AT MINTO ON OWN ACCOUNT

John Henderson Buys Smith and Merrithew Area

Stripping and Shaft Mining Both — C. J. Coll Succeeds Him as Manager of the Minto Coal Company.

(Special to The Times.)
Fredericton, N. B., Jan. 12.—John Henderson, of Minto, late manager for the Minto Coal Company at that place, this morning began mining there as an independent operator. Mr. Henderson purchased the area recently held by Smith & Merrithew, Ltd. This consists of 100 acres on a twenty year lease. Neither Mr. Henderson nor the members of the firm which some would make any statement with regard to the price, but it is understood that it is about the top of prices paid for transfers of that nature in the Minto coal district.

On this area methods of mining are both stripping and shaft. The latter, however, has been more generally followed, although it is possible that the new owner may extend the stripping method.

E. Lorne Merrithew, of Fredericton, said this morning that the transfer included not only the mining lease and the area, but also twelve houses and all railway trackage laid. The rolling stock of Smith & Merrithew, however, is not included in the sale, and will be removed later by that firm.

Charles J. Coll, formerly of Stellarton, N. S., has succeeded Mr. Henderson as manager at Minto for the Minto Coal Company. He has been in Minto for about a fortnight. Mr. Henderson had experience in the Nova Scotia coal district before coming to Minto, having been at Inverness. The firm of Smith & Merrithew, Ltd., originally was organized to take contracts on the construction of the St. John & Quebec Railway. Later it built bridges and other structures, including the buildings of the Dominion Experimental Station, Fredericton. In recent years the firm operated mines at Minto. The chief members of the firm are L. B. Smith, of St. John, and E. L. Merrithew, of Fredericton.

TWO DEATHS IN ONE HOME; BUT FEW HOURS APART

The death of Miss Anne Cusick occurred this morning at her home in Silver Falls in the same house as that in which the death of her brother-in-law, Patrick Myles, occurred yesterday. She was the daughter of the late Thomas and Bridget Cusick and was a native of Hibernia Settlement. One sister survives, Mrs. Myles, whose husband passed away yesterday and who is thus bereaved a second time within a few hours. Much sympathy will be extended in the sorrow which has come upon the home. A double funeral will take place tomorrow afternoon at 2.30 o'clock at St. Joachim's church, Silver Falls.

BIT OF FRICTION AT D. S. C. R. OFFICE

Place Not Big Enough for Waiting Returned Soldiers Seeking Unemployment Grant.

Some forty or fifty men were lined up almost as soon as the offices of the D. S. C. R. at 49 Canterbury street were opened this morning—returned men out of work looking for the unemployment grant given by the government. They were orderly and quiet in their demeanor but were occupying space in the hallway next door to those of the federal employment department.

The queue formed was a lengthy one and emphasized what has been felt by those in touch with the situation for some time, namely, that other and larger offices are greatly needed to carry on with this work of re-establishment in St. John. What is wanted is a place where the waiting large waiting line can be housed, although greater office space is also required to accommodate the staff of the D. S. C. R., which is at present working in the smaller office inside.

Some of the returned men this morning took objection to the action of the agent in charge of the building, and also to some words of the janitor. An argument ensued, and Sergeant Baxter was called in. He broke the queue in halves and let each man inside in his turn, keeping the rest out in the street. This allowed the other tenants of the building a freer use of their privileges. It was contended by those in charge of the building that while most of the men seeking the employment grant, or asking for positions through the offices, were orderly, there were others who defaced the walls with lead pencil drawings and who expectorated about the floor and threw cigarette ends upon it. In the interests of the other tenants such action as taken this morning resulted. Had the waiting been calm or stormy the agent said he would not have cared to do as he did.

Those who are familiar with the work being done through these offices say that the case merely emphasized the need of newer and larger quarters both in their interests and the interests of the returned men who are their chief patrons.
