ALLIANCE OF FRANCE AND GREAT BRITAIN REGARDED AS AMONG POSSIBILITIES

Looked Upon as Only Means of Keeping the Entente Intact—British Delegates on Eve of Opening of Allied Supreme Council Meeting, Reticent Regarding Such an Alliance—Briand in Favor of Such a Union.

Cannes, Jan. 4.—With the air full of talk of an alliance between France and Great Britain, as the only means of keeping the entente intact, Premier Briand and Prime Minister Lloyd George today resumed their conversations which were begun some days ago in London.

"The conversations are continuing," was the only comment the French premier would make after a two hours' talk with Mr. Lloyd George this afternoon.

British Reticent

General reticence is being observed by the principals of the British delegation on the eve of the opening of the Allied Supreme Council meeting regarding such an alliance. Premier Briand said, before going to the British Prime Minister's villa this afternoon, that it might be putting it rather strongly to talk of a formal alliance. Yet, he said, the policy of France all along has been to strengthen her ties with her war allies, since this seemed essential to a settlement of European problems.

Situation Grave

Members of both the French and British delegations are agreed that the situation is grave, and that the entente powers must come closer together or they will drift more widely apart. The difference of opinion appears to center around the question of who ought to make the concessions necessary to bring about closer accord. The atmosphere throughout the day was generally pessimistic. Premier Bonomi, of Italy, arrived on the scene late this afternoon and he is expected to see Premier Briand and Lloyd George during the evening.

Baldwin Case Echoed in Arrests on Kidnapping Charge

Mother-in-Law, Divorced Wife and Brother Charged With Conspiring to Kidnap Children.

Montreal, Jan. 4.—An echo of the Baldwin case was heard today when Maurice Day Baldwin secured authorization from the Superior Court to have his children produced before a judge tomorrow afternoon. Mr. Baldwin, who is a son of the late Bishop of Huron, Ont., charges the children's grandmother, Mrs. R. B. Stephenson, who is eighty years old, his wife, from whom he is separated, and her brother with conspiracy to kidnap them. They were arrested yesterday on this charge, but were liberated on parole.

Paris Worked Up Over Reference to Castex Article

Paris Temps Criticizes Article Which Defended Action of German Submarine.

Washington, Jan. 4.—Taking note of the statement of the Paris Temps, which said that one of the quotations from the famous Castex article, read by Lord Lee of the British delegation to the Arms Conference Naval Committee, could not be found in the article, the British delegation today cited the quotation. It read:

"Thanks to the submarine, we (France) possess the instrument, the Martingale, which will definitely and forever overturn the naval power of the British Empire."

The Temps said: "Whatever may be the interpretation of this particular passage, it must be obvious to every reader of this article that the whole purpose of the writer, as evidenced by the other passages which Lord Lee quoted and which the Temps does not challenge, is to expound and defend the German methods of submarine warfare on commerce as practiced in the late war."

REDUCTION IN ARMY

Washington, Jan. 4.—A bill proposing to reduce the personnel of the army, commissioned and enlisted included to 75,000, and of the navy to 60,000, was introduced today by Senator King, Democrat, Utah.

CONSTRUCTION CONTRACTS IN CANADA IN YEAR 1921 VALUED AT \$240,000,000

Toronto, Jan. 4.—The value of construction contracts in Canada in 1921, according to MacLean's records, was \$240,000,000, as compared with \$235,000,000 in 1920, \$190,000,000 in 1919, and \$99,000,000 in 1918. However, if prices recessions in material and labor costs are taken into consideration, the volume of new construction undertaken during 1921 was many millions of dollars greater than the 1920 total.

UNMANAGEABLE SCHOONER HITS ON BLANK POINT

Went Ashore in Height of Blizzard Raging Monday Night and Breaks Up.

CREW CLUNG TO BULWARKS

Only Heroic Work of Captain Saved Crew from Watery Graves.

Canso, N. S., Jan. 4.—Stripped of her sails, tied up and unmanageable, the schooner Alexandria, bound from Ingonish, N. S., to Gloucester, Mass., with a cargo of fish, was driven ashore at Blank Point, ten miles from here, midnight Monday in the height of the blizzard then raging over Eastern Nova Scotia. Through the flying snow and frost, the crew made out to be a ragged mass of basaltic cliffs, and realizing that their vessel would soon pound to pieces, they attempted to launch their own small boat. But they had hardly cleared away the ice-coated lashings when a heavy comb breaking over the doomed schooner, smashed the little boat to fragments.

Crew Clinging to Bulwarks

The schooner pounded heavily, shattering her bottom and filling with water, and soon the spars went over-side. The crew clung to the bulwarks, with the sea sweeping over them, and the smothering snow shut out hope of rescue from the shore. The master, Captain Matthew Munro, resolved to take a desperate chance—the only chance. Tying a line about his waist, he jumped into the water of icy water where the broken spars and other wreckage tossed and tumbled, and fought his way through the roaring surf to the shore. For minutes he swam along the face of rocks rising sheer from the sea, in danger of being dashed to death, until at length in a rift of the snow he sighted a low-lying ledge upon which, after a hard struggle, he managed to land.

Heroic Work

Luckily the howling blizzard ceased for a spell, and the master, recovering his wits, was able to drag his crew of five men through the surf to the safety of the shore. This done, the captain collapsed. Soaked, shivering and badly shaken, the shipwrecked sailors set out to look for shelter, and after struggling through the heavy snow drifts, with two men assisting the master, they saw a light and were soon being made snug in a fisherman's cottage.

After Captain Munro had recovered from his experience he started for his port, where he has a wife and eight children. But he found the going hard in the mountainous snow drifts and only arrived today, thoroughly done up.

The Alexandria, 53 tons, was owned by G. A. Cruickshank, of North Sydney, N. S. When Captain Munro visited the scene of the wreck before starting on his journey here, there was nothing left of her except some wreckage in the crevices of the cliffs.

McGill Univ. Makes Good Progress in Collecting Funds

The Sum of \$3,810,000 Collected to Date Out of \$6,440,000 Subscribed.

Montreal, Jan. 4.—The sum of \$3,810,000 has been collected to date by McGill University out of the total of \$6,440,000 subscribed during the centennial endowment campaign of October last. An endowment of \$5,000,000 is now being set aside to meet an increase in the annual budget of \$210,000 called for by additions to the staff, increases in salaries and maintenance of larger departments to accommodate greater registration of students. The balance of \$2,940,000 will be devoted to a programme of development including the erection and equipment of necessary buildings and endowments for their maintenance.

Regular Monthly Meeting of Gov't at Fredericton

Expected Announcement of By-Elections Will be Made at This Meeting.

Special to The Standard. Fredericton, N. B., Jan. 4.—His Honor the Governor and the majority of the members of the Provincial Government arrived here tonight for the regular monthly meeting. Premier Foster stated tonight that the ordinary agenda list occupied the attention of the Government tonight. The session will continue all tomorrow.

Three seats in the Provincial Legislature are vacant, one each in Madawaska, St. John County and Kings. Announcement of by-elections may be made at this meeting.

ALTERNATIVE PROPOSAL OF DE VALERA TO REPLACE THE ANGLO-IRISH TREATY

Far-Reaching Move Taken By Labor's General Staff

British Executive Acts to Prevent Occurrence of Disagreeable Situations Connected With Strikes.

London, Jan. 4.—(Canadian Press Cable)—The general council of the labor forces, known popularly as Labor's General Staff, today considered the situation sometimes created by a strong union starting a strike which seriously affected other unions having no voice in the dispute.

The council decided to submit to all affiliated unions proposals for preventing such situations. It is understood the council are asking the unions to undertake not to call a strike without consulting the council and to give the council powers to co-ordinate in the action of labor.

This is regarded as a preliminary move toward a far-reaching plan for marshalling the trade union forces generally to resist attacks on the hours and wages of the workers. The willingness of individual unions to surrender their individual liberty of action is said to be doubtful.

Telephone Barometer of General Trend of Business

Number of Long Distance Calls in Nova Scotia Figure Out Conditions.

Halifax, Jan. 4.—Taking the telephone as the barometer of general business conditions, and representing the volume of business done in Nova Scotia during 1921 by the production of the province increased to 140 in 1920, and fell back to 120 in 1921, says W. H. Hayes, assistant manager of the Maritime Telephone Company, who holds that the number of long distance and local calls fairly reflect the movement of general business. According to the telephone barometer, the amount of business done in Halifax during the latter half of 1921 increased 12 per cent, as compared with the first half.

Holstein Makes New Record for Milk Production

Produced 32,668 Pounds of Milk in 1921, Which Gave 1,438.98 Pounds of Butter.

Montreal, Jan. 4.—De Kal Plus Segis Diddle, now comfortably housed at Vaudreuil, near here, has broken all world's records in 1921 by the production of 32,668 pounds of milk, which gave 1,438.98 pounds of butter. Dekal is one of an accredited herd of Holsteins sheltered on the Haymondale Farm of Dr. J. H. Raymond at Vaudreuil. Her output for the year is certified by C. S. Wood, chief inspector, and R. S. Hamer, live stock commissioner for the Dominion of Canada. The best previous record for milk production was the 30,637.3 pounds by Raphaela Johanna Aargie 3rd.

Bench Warrant Issued For Well Known Ontario Minister

Charged With the Theft of \$5,000 from Toronto Barber—Result from Land Deal.

Toronto, Jan. 4.—A bench warrant, issued today in the Sessions Court, seeks Donald G. Hossack, well known locally as a minister, lawyer, real estate agent and politician. In a trial, which has extended over several months, he has been charged with the theft of \$5,000 from John Hunter, a well-known local barber, and on Tuesday and today he failed to appear at the court's order to hear Judge Coatsworth's finding upon the allegation against him.

The incident for which Mr. Hossack stood trial arose out of a land deal in Weston, where property belonging to W. G. Treshway was selected as the basis of a syndicate speculation. The allegation is that the accused, while representing the land to be purchased for the syndicate from Mr. Treshway and to be a bargain at \$35 per foot, actually sold the property for Securities Limited, a company in which he was a majority stockholder and which had itself purchased the land from Mr. Treshway for \$30 per foot.

Given to Public Yesterday With Manifesto to the Irish People—Proposal Contemplates Association With States of the British Commonwealth—For Purposes of Association Proposals Declares Ireland Shall Recognize His "Britannic Majesty" as Head of Association.

Dublin, Jan. 4.—The Sinn Fein publicity department, immediately after adjournment of the Dail Eireann late this afternoon, issued a long manifesto to the Irish people in the name of Eamonn De Valera, accompanied by his alternative proposals to replace the Anglo-Irish treaty, now being considered by the Dail. Mr. De Valera, in the manifesto, urges that there is opportunity for general reconciliations between Ireland and Great Britain, and asks the Irish people to save reconciliation from being lost through the shortsighted expediency of politicians.

MANIFESTO OF DE VALERA TAPS THE SYMPATHIES

Claims Irish Press Urges a Stamped Alike Dangerous and Disgraceful.

De Valera's alternative proposals contain seventeen heads, with detailed schedules, and contemplate association with the states of the British Commonwealth.

In addition, the proposals declare that for purposes of the association Ireland shall recognize His Britannic Majesty as head of the association. The document, while laying down an independent status for Ireland, is similar in detail to the text of the treaty negotiated at London.

Following is the text of the most important provisions of De Valera's alternative proposal:

That the legislature, executive and judicial authority of Ireland shall be derived solely from the people of Ireland.

That, for the purpose of common concern, Ireland shall be associated with the states of the British Commonwealth, namely, the Kingdom of Great Britain, the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa.

That, when acting as an associate, the rights, status, and privileges of Ireland shall, in no respect, be less than those enjoyed by another commonwealth state of the British Commonwealth; that the matters of common concern shall include defense, peace, war, political treaties and all matters now treated as of common concern among the states of the British Commonwealth, and that, in these matters, there shall be between Ireland and the states of the British Commonwealth such concerted action founded on consultation as the several Governments may determine.

That, in virtue of this association of Ireland with the States of the British Commonwealth, the citizens of Ireland in any of these states shall not be subject to any disabilities which a citizen of one of the competent states of the British Commonwealth would not be subject to, and reciprocally for the citizens of these states in Ireland.

That for the purpose of the association, Ireland shall recognize His Britannic Majesty as head of the association.

An annex names Berekavan, Queestown, Belfast and Young Swilly as harbors remaining in British care, with facilities for coastal defense by air. A resolution, adopted to grant the Northeast six counties privileges and safeguards "not less substantial than those provided for" in the document signed at London on December 6.

Weakness of Wheat Market Resulted in Break On Flour

Lowest Prices in Six Years Recorded at Largest Milling Centres in U. S.

Minneapolis, Minn., Jan. 4.—Acute weakness in the wheat market yesterday resulted in a break of 25 to 30 cents a barrel in flour prices today at the largest milling companies here making new low ranges in flour prices in about six years. Family patents today were quoted at \$6.75 to \$6.80 a barrel, when sold in 98-pound cotton sacks in car lots.

INDEPENDENT LIBERALS CONVINCED EARLY ELECTION IS IMPENDING

London, Jan. 4.—(Canadian Press Cable)—While Sir George Younger, chief Unionist organizer, strongly deprecates an election until the reform of the House of Lords has been achieved, the Independent Liberals are convinced that an early election is impending and are taking the necessary measures. Lord Gladstone will take charge of the electoral arrangements at Liberal headquarters, and stress is laid upon the importance of his historic name and previous electioneering experience as chief whip.

SENSATIONS MULTIPLY RAPIDLY AT WASHINGTON CONFERENCE

Far Eastern Republic Spring Few More Documents Showing Japanese Created Their Own Russian Governments and That They Are Only Puppets in Hands of Japanese.

Washington, Jan. 4.—Five additional documents were made public tonight by the delegation of the Far Eastern Republic of China to show that the Japanese created their own Russian Governments that are in reality puppets in the hands of the Japanese. Through these governments, it was added, the Japanese are able to control economically and politically, the Russian Far East.

Important as the submarine discussions are considered to be, they were almost overlooked in the minds of the delegates today by the shanting controversy which attracted increasing attention, not only because it gave promise of a settlement after many months of debate, but also, on account of conflicting reports of the real attitude of the Chinese Government at Peking. The Chinese delegation had no success in its attempt to get the Chinese Government at Peking to agree to the shanting, but the Japanese were instructed to accede to the Japanese terms, than a similar story uncertainty. Both delegations, however, mingled with reports of direct exchanges regarding shanting between Tokyo and Peking, these rumors served to throw the whole situation into uncertainty. Both delegations, however, tomorrow would see the negotiations ended.

Today's meeting of the Chinese tariff sub-committee also marked the breaking of a deadlock which has lasted for several weeks. In the informal exchanges which have taken place during the last, the French and United States are said to have been the principal actors with the representatives of the Washington Government striving to bring France into agreement with the solution proposed by Senator Underwood.

Naval Limitation.

The five power naval limitation treaty which will explicitly define the agreement reached by the Washington Conference, is nearing completion and soon will be ready for presentation.

CAPE BRETON SLOWLY EMERGES FROM SNOW BANK

Railway Lines Opened Up and Wire Connections Become Partially Restored.

Sydney, N. S., Jan. 4.—After an all day battle with the steel, left by the recent storm, the Sydney and Louisburg Railway got its line opened through from Sydney to Glace Bay today and telegraphic communication between the two centres was also restored. There is still no inter-tram service, and the ice may not be all removed from the track for two or three days. All telephone lines are still down and are not expected to be working normally until the end of the week.

Forty passengers, caught by the storm, spent Monday night in a street car at Reserve Junction, and then made their way on foot to Glace Bay, eight miles distant, it was learned today.

During the worst of the blizzard, a transformer house burned at Reserve Junction, causing serious interference with the two collieries, there.

The Canadian National is still tied up by the continued storm in Antigonish County. The Halifax express is still stuck at Antigonish. The last train into Sydney arrived at midnight Monday and another is not expected until Friday night. Nevertheless, there is no shortage of food supplies.

Jobless Men At Police Station

Five Down and Outs Applied for Protection and Were Given the Same in the Cells

No arrests were made by the police last night and a "clean sheet" in consequence will be handed Magistrate Ritchie by the Police Court Sergeant this morning.

Five jobless men, applied for a night's lodging at the central police station and were most hospitably received being assigned to the de luxe quarter of the local hostelry sometimes known as "Boover Row." For some reason or other the inebriates have not been patronizing the palatial suite up, and so the protectionists had ample opportunity to pick and choose, with the option of a bed in the bridal suite, the red-cell, or the ordinary four by twelve, with stone walls and iron door complete.

General Motors To Omit Dividend On Common Stock

Regular Quarterly Dividend on Preferred Stock Authorized by Directors.

New York, Jan. 4.—Directors of the General Motors Corporation late today voted to omit the quarterly dividend of 25 cents a share on common stock, due at this time.

The directors authorized the regular quarterly dividends of \$1.50 on preferred stock, \$1.50 on six per cent. debenture bonds, and \$1.75 on seven per cent. debenture bonds payable Feb. 1 to stockholders of record Jan. 14.

Of the corporation's 50,000,000 shares of common stock carrying no par value, only 30,648,297 are outstanding. On these today's dividend omission saved the company more than \$5,000,000, and if the omission were continued for a year, more than \$20,000,000 would accrue.

Defends The Past Athletes

Princeton, Dec. 30.—Dr. Joseph E. Flaycroft, Princeton's director of physical education, has come to a defence of the athletes of the past in an article in the Daily Princetonian. Asked to compare the present day athletes with those of the "golden 90's," the Princeton director had this to say: "I do not think that in any sport such as football, the average man of

STEED SEES BIG DANGER IN FRENCH STAND

Says Delegation Went to Washington Parley in Bargaining Spirit—May Arouse America.

By WICKHAM STEED, Editor the London Times.

(This is Mr. Steed's last article written in America on the arms conference, he having left for home Saturday on the Olympic.)

My absence from Washington, in my visits to other parts of the United States and Canada during the last few days, has enabled me to look upon the conference from the outside and see how it is regarded by important sections of American and Canadian opinion.

Broadly speaking, the French position on questions of submarines and auxiliary craft is regarded with wilderment not devoid of wrath. Unless this is corrected these feelings may not indeed destroy transatlantic sympathies for France, but it may mitigate them to an extent that would be deplorable in French and British interests alike.

Should the lively hopes that America has placed in the conference be disappointed, no matter by whose immediate fault, any tendency in the United States toward association with European nations in the work of economic reconstruction would infallibly be thwarted, if not transmuted into a tendency toward dissociation of America from Europe.

France, it is clear, would not be satisfied unless by the main responsibility for an eventual peace as total or partial failure of the conference. But this would offer scant solace to the peoples distressed or to many millions in many countries who have been hoping that in Washington a new era of good will and good faith among nations might be inaugurated.

Bad Effect Upon America.

Even were Franco to press upon the conference her candidates as an international scapegoat, she could scarcely carry into the wilderness of a disorderly world the positive ill of the nations along with her own sins of incomprehension and perversity. In the United States it would be said—may, it already is being said—that France is unwilling to pay for the debt of the world she has incurred since the war.

Good and great though the work of the British delegation at Washington has been, and deep and beneficent though its influence upon public opinion, neither the work itself nor its influences would avail to remove from a majority of American minds the conviction that it would be in the best part of the United States to attempt to cooperate with European nations which are determined to quarrel between themselves, even when their own supreme interests are involved in the heavy co-operation with each other.

It is true that from the first the French Government mistook the situation at Washington. Despite friendly counsel, the French delegation came to Washington with a bargaining spirit which it had hitherto been unable to shake off. It is true, also, that some omissions or irregularities of method on the part of the other delegations induced a feeling among the French that they had been slighted. But I have been unable to discover any sign in the French delegates of heretofore and the more the conference proceeded the more they were likely to be so, they and their Government are running the risk of ruining it for the sake of ships France does not mean to build.

Drive a Bargain At Conference.

The shrewdest judges of the present French situation are of the opinion that France is not prepared to drive a bargain—not without reference to the League of Nations, and desire to preserve the League as the important factor in the world situation of the United States, the British Empire or Japan. Otherwise there could be no sense in an attitude which, if maintained, would lead to a harm to Europe and to France herself.

Deplorable though the bearing of France as a result, it is necessary to remember that France is an angry nor man, political or financial, in consequence it will be hard to change it. On the contrary, threats may easily cause France for a season to harden her heart, and during that season to make irreparable the damage already done.

The fierce wrath of the American people would feel at the wrecking of the conference and comparisons highly favored to British statesmanship they might draw between the French and British conduct, should not blind our statesmen to the truth, that while our interests and our standing will also suffer should the position at Washington not prove susceptible of adjustment.

The American press, with splendid impartiality, has given the fullest hearing to all sides. But in the ultimate apportioning of blame, if blame should unfortunately have to be apportioned, the shortcomings and mistakes of the British policy in regard to France during recent years and months would infallibly be remembered again as to our hurt.

Americans still have a strong regard for France. Rightly considered, that regard is an asset for Europe and the world and therefore for the British Empire. Nothing could more enhance British statesmanship in American eyes than proof at this juncture, or at the latest when the Cannes conference meets, that England is able to bestir itself and high bridge over the obstacles of Anglo-French concord and co-operation.

Such proof would earn American admiration both of a great political achievement and as a solid contribution to the enduring success of the Washington conference.

France is in a difficult mood. Her

Siberians Disavow Attack On France; After Japanese

Declare Their Plot Charges Are Aimed, Primarily, Against Japan Gov't.

Washington, D. C., Jan. 4.—Representatives of the Chita Government said tonight that the documents they have issued purporting to prove a Franco-Japanese agreement covering the Washington conference are directed primarily against Japan and are not intended to stir up feeling against France.

They say that if these documents show that Japan and France agreed to support each other at the conference this will be evident when the question of Siberia is brought up for discussion.

One of the chief topics of conversation in delegation circles today is the authenticity or otherwise of the Franco-Japanese revelations. Persons in touch with the British delegation are inclined to take an anti-French view, appear to hold the belief that the documents are genuine. The Japanese deny the Franco-Japanese story, and the Italians remain neutral.

The French issued indignant denials yesterday and repeated them today through M. Sarraut, head of the delegation. It is understood that a request has been sent to Paris for a statement direct from the French Government.

Sarraut writes to Hughes.

America Essential To World Renewal, Says British Sec'y

Their Co-operation at Cannes Greatly Desired—United States Considers Decision.

Cannes, Jan. 4.—The plan of David Lloyd George, the British Prime Minister, for an economic rejuvenation of Europe, and the results of the meetings in Paris by bankers and business men of the allied countries were outlined to George Harvey, the American Ambassador, today, by Sir Laming Worthington-Evans, the British Secretary for War.

The Associated Press is informed from a reliable source that Sir Laming regarded the participation by the United States as one of the essentials. If the consortium proposed in Paris is to succeed, Mr. Harvey is understood to have replied that the United States will not make known its position until the plan is formally brought up before the Supreme Council.

In British circles the expectation is that Mr. Harvey will actively participate in the economic discussion at the Supreme Council. Mr. Harvey and Myron T. Herrick, the American Ambassador to France, had a long conference today at which the economic conference and other questions coming up before the conference were considered. Mr. Herrick put Mr. Harvey in touch with the problem which has been before the Council of Ambassadors.

Anxious for France to join.

Sir Laming had previously reported the results of the Paris economic meeting to Mr. Lloyd George, who is reported to be eager to whip the consortium plan into shape, and this probably will be one of the first things to be discussed at the preliminary meeting between him and Mr. Briand.

Mr. Lloyd George hopes to convince M. Briand of the necessity for making the scheme operative as soon as possible, and if Mr. Briand and Mr. Lloyd George agree on definite proposals it is probable the United States will be asked to participate in the plan, making possible Mr. Harvey being included in the discussions at the council.

It was learned from an authoritative source that the entire submarine question may be thrashed out between Premier Lloyd George and Premier Briand at their initial talk when the French Premier arrives here, and that the discussion of this subject at Washington will take place while the two Premiers try to iron out the difficulties. Mr. Lloyd George is said to be anxious for the complete success of the Washington conference, because of the economic conference.

The coming here of Marquis Curzon, the British Foreign Secretary, makes it increasingly clear, according to the British, that the meeting of the allied Foreign Ministers on the question of the near Eastern settlement will be held at Cannes, instead of Paris, immediately after the Supreme Council, which is expected to sit for ten days.

Heavy Meat Eaters Have Slow Kidneys

Eat Less Meat If You Feel Backache or Have Bladder Trouble.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which excites the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervous disorders, sleeplessness and urinary ailments come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.

ST. JOHN, N. B., THURSDAY, JANUARY 5, 1922.
THE EVILS OF COLD STORAGE

When the system of Cold Storage was first brought into use, the idea was that it could be made to cheapen commodities, by buying them in large quantities at the season of the year when they were most plentiful, and according to their cheapest, and holding them until the natural supply had fallen off. But as a matter of fact Cold Storage instead of bringing down prices, has had the very opposite effect.

The case of turkeys has been mentioned in this regard. This year was an early one in local markets this year at prices ranging from 70 to 80 cents per pound. There could be no justifiable reason for asking such a price, because the last season was one of the most favorable ones for raising turkeys that have been experienced for many years. In a cold, wet season, turkey raising is a heart-breaking business; but with the warm, dry summer we had, conditions were at their best. As a consequence, turkeys were really quite plentiful in all parts of Eastern Canada, and there was not the slightest justification for holding them at such exorbitant prices as were asked. The real cause of the exorbitant prices may be found in an official document issued by the Dominion Bureau of Statistics, and bearing the title "Cold Storage Report."

This report shows that on December 1, 348,901 pounds of turkey were in Cold Storage, or the equivalent of about 29,000 individual birds. At the same time, 1,451,889 pounds of chicken and 734,335 pounds of fowl were laid aside in that way. Altogether, 3,735,931 pounds of poultry of all classes were in storage. Thus, the kind of training school for future Ministers, and an occupant of one of these positions might have some claim to the headship of the Department, should it for any reason become vacant. Outside of these considerations, the proposed innovation has nothing to recommend it.

THE UNREST IN INDIA.
What makes the present discontent of India so formidable is the driving force, under the influence of Ghandi, of the Mohammedans and Hindus whose antagonism has been a strong support to British rule. While this antagonism still persists the leaders on both sides have been preparing for joint action, and at their recent congress drew up a scheme for "parallel" governments for Mohammedans and Hindus. These two great groups, moreover, have a common grievance in that the All India Congress, more or less, have been sent to prison. The legal act of ratification must evidently be done by another body composed of all the members elected to the House of Commons from Southern Ireland. But this House of Commons has as yet no existence; it has never been called together nor organized for business. Until this has been done, no ratification can take place.

These complications, however, are not likely to destroy the hope of an Irish settlement, in view of the fact that the Cork County Council favors the treaty. Cork is to Ireland today almost what Boston was to the American colonies in 1776. The outlook is so bright for peace in the Emerald Isle that we may now recall the conversation between Mr. Dooley and Mr. Hennessey:
"i wonder will England ever free Ireland?" asked Mr. Hennessey.
"Never," said Mr. Dooley.

What talk have yet? No man wants it that way. Ireland will never be free Ireland, but some day, if we make it interesting enough for her, she'll have to free England in Ireland. An' that'll be all right."

There was a prophesy of singular interest. Things are working out much as Mr. Dooley foresees. England is freeing herself of Ireland and there will be freedom for all.

The other day a Massachusetts judge decided that a woman had a right to go through her pockets and take money therefrom. As a result of the proceedings this decision called forth the now undertakes to qualify his dictum by stating that a man isn't obliged to carry his money in his pockets. Little lame, it seems to me.

Two chaps were arguing yesterday about the beauty of Mackenzie King spells his middle name. One said it was Lynn, and the other spelled it Lyon. They asked me, and I said I thought they were both wrong, that it should be spelled Lyen. Who's right?

The mirrors of Downing St. which some genius recently published must have been convex, for they make some of the folks referred to look uncommon small.

The Earth is slowing down according to a Yale astronomer. It is about time I would say. Things have been in altogether too much of a whirl of late.

The girl across the way says a friend of hers is boasting that she has made a new man of the chap who married her. Evidently she could not have been very well satisfied with him to begin with.

This is the time of year when many people decide to turn over a new leaf. In many cases though, it proves to be of the "loose" variety.

The candidates in Mr. Mackenzie King's recent contest as depicted on the front page of yesterday's Times, did not evoke much enthusiasm among the young ladies in the office. In fact they said—well, perhaps I'd better not repeat what they said!

An item states that an Idaho woman has been convicted of poisoning her husband, but it omits to say how she managed to get rid of the other three.

WHAT OTHERS SAY
Mr. King and Mr. Melghean. (Ottawa Journal.)

The issue of a writ for a parliamentary election in Grenville has drawn the denunciation of Mr. Melghean. To Mr. King it is a shocking new illustration of the unjust usurpation of arbitrary power, of which he has long accused Mr. King.

Another view of the case is this: Mr. Casselman, the member-elected for Grenville, had of course no right; right to vacate his office if he wished; but it was reasonable in the Melghean administration to facilitate the withdrawal in the only way possible, namely, by appointing Mr. Casselman to a nominal office; and as the issue of a writ for a new election in Grenville was the only means by which the constituency could be represented, it was reasonable that so able, so able, so able a man should be given a writ should issue without delay.

One would have imagined that Mr. King would not object to this latter view, even if no suggestion existed that Mr. Melghean was a candidate in Grenville; and one would still more have imagined that so able, so able, so able a man should be given a writ should issue without delay. He does not want capable public men in Parliament unless they are, in fact, able to show up Mr. King's weak spots. Mr. King thought he was rid of Mr. Melghean so far as the House of Commons was concerned, and he is touched on the raw to find that he may be mistaken.

PLAN DRAFTED TO EUROPE'S ECONOMY

British and French Financial Corporation—Kind of to be Subscribed Undecided States.

Paris, Jan. 3.—At the Quai d'Orsay this morning the finishing touches were put to the plan for the economic restoration of Europe, drawn up by a mixed British and French committee of financiers and business men, and which will be submitted to the Supreme Council at Cannes as a basis for discussion between the Governments and the financial and industrial groups concerned. In a semi-official statement made afterwards it was announced that the actual resolution of the agreement was in outline as follows:

That it should be recommended to the Supreme Council that an international industrial corporation should be formed and that Great Britain, France, Germany and the United States (if the United States so desire) should take equal shares in the capital of the corporation, and that other allied nations and such neutral as may be arranged should also participate, in amounts to be agreed on by the Franco-British organizing committee.

During today's discussion the question of the kind of money in which the capital of the corporation should be subscribed was again discussed, but the decision had to be postponed and a small committee was appointed to consider in what money or monies subscriptions should be made. The British naturally wished the subscriptions to be made in sterling, but some other countries represented today declared that in view of the possibility of the early improvement in their currencies, the subscription should be made in hard currency. It was decided that the corporation would undertake to advise private enterprises as to conditions in various countries in which it is proposed to undertake operations and if necessary assist them.

The basis of all these suggested operations is the clause in the joint memorandum which will be presented to the Supreme Council. The text of the clause reads: "The plan for the reconstruction of Europe is to be conducted only in countries which guarantee the rights of private property and will enforce justice." The next step is then for the governments to obtain from Russia the promise and fulfilment of such condition.

Without this promise and the guarantee of its fulfilment it is admitted to be impossible for the corporation to set to work and the whole present proposal will naturally fall to the ground.

Russian Problem.
In the French press and in French official circles the suggestion has been made that rather than with Russia, the beginning should be made with Austria, Hungary, for example, or even Poland, Germany, or even Japan, as the reply of the promoters of the present scheme is that it is not any beginning with any one spot on the surface of Europe. The problem has to be looked at as a whole and treated as a whole. Russia is as essential to the economic life of Europe as any other one place, and unless it is, or anything else is just tinkering at the problem.

In a cable dispatch yesterday it was suggested that through the establishment of an international currency in the countries whose monies have depreciated to nearly nothing, the currencies might be stabilized by changing to a gold standard. This suggestion, it is however stated, is only of the most tentative kind and is far beyond the power or scope of the proposed corporation. Only Germany could, for instance, so decide with regard to a gold standard of the mark, and yesterday's suggestion was more in the nature of an indication of what might be done than a direct proposal.

It has been suggested that the consortium's own capital may be most effectively employed in stabilizing exchange through temporary credits to countries immediately requiring foreign money, which is obtainable in interior Europe without the provoking of violent fluctuations.
Dr. Walter Rathenau, former German Minister of Reconstruction, although he was not present at the meeting of the conference, was at the French foreign office yesterday, and has been in consultation with leading delegates to the gathering since his arrival, presumably with regard to the participation of Germany, the most important question involved that the conference at Cannes will have to settle.
The conferees indicate they consider American participation essential, although not primarily essential to the north of the enterprise. The idea prevailing among the delegates is that the United States can scarcely be made indifferent to such a movement, the interest of her own European trade, but that Europe must, in any case, begin to plan for her own recovery. The setting up of the consortium, therefore, is not contingent upon American co-operation, it is said.

**PLAN DRAFTED TO RESTORE
EUROPE'S ECONOMIC BALANCE**

British and French Financial Experts Suggest International Corporation—Kind of Money in Which Capital Should be Subscribed Undecided—Door Open for United States.

Paris, Jan. 2.—At the Quai d'Orsay this morning the finishing touches were put to the plan for the economic restoration of Europe, drawn up by a mixed British and French committee of financiers and business men, which will be submitted to the Supreme Council at Cannes as a basis for discussion between the governments and the financial and industrial groups concerned. In a semi-official statement made afterward it was announced that the actual resolution of the agreement was in outline as follows:

That it should be recommended to the Supreme Council that an international industrial corporation should be formed and that Great Britain, France, Germany, United States (if the United States so desire) should take equal shares in the capital of the corporation, and that other allied nations and such neutrals as may be arranged should also participate, in amounts to be agreed on by the Franco-British organizing committee.

During today's discussion the question of the kind of money in which the capital of the corporation should be subscribed was again discussed, but the decision had to be postponed and a small committee was appointed to consider in what money or moneys subscriptions should be made. The British naturally wished the subscriptions to be made in sterling, but some other countries represented today declared that in view of the possibility of the early improvement in their respective currencies, subscription in gold would entail certain hardships. To meet this objection the British delegates suggested a modified plan which would enable subscribers to use either sterling or francs for subscription. In the end the matter was, as stated, referred to a sub-committee for consideration and decision before the date of the meeting at Cannes.

£200,000,000 Capital.

Except for this difficulty the plan is now ready to be submitted to the governments, but it will not be published until it is in their hands. In addition to the details given yesterday it can be added that the capital which the promoters believe will be required will be £200,000,000. With this they will be prepared to set to work on the reorganization of the railroads and harbors of eastern Europe, a private enterprise to follow them with the assurance that, at least, the essential conditions of economic and commercial life will be provided. Further, the corporation will undertake to advise private enterprises as to conditions in various countries in which it is proposed to undertake operations and if necessary assist them.

The basis of all these suggested operations is the clause in the joint memorandum which will be presented at Cannes that these operations can be conducted only in countries "which guarantee the rights of private property and will enforce justice." The next step is for the governments to draw up the charter for the corporation, which from Russia the promise and fulfillment of such condition.

Without that promise and the guarantee of it, the governments will be impossible for the corporation to set to work, and the whole present proposal will naturally fall to the ground.

Russian Problem.

In the French press and in French official circles the suggestion has been made that rather than with Russia, the beginning should be made with Austria, Hungary, or some such, non-Bolshevik country. To this, however, the reply of the promoters of the present scheme is that it is not any spot on the surface of Europe. The problem has to be looked at as a whole and treated as a whole. Russia is as essential to the economic life of Europe as any other place, and, for the time being, anything else is just tinkering at the problem.

In a cable dispatch yesterday it was suggested that through the establishment of an international currency of the countries whose moneys have depreciated to nearly nothing, the currencies might be stabilized by changing to a gold standard. This suggestion, it is however stated, is only of the most tentative kind and is far beyond the power or scope of the proposed corporation. Only Germany could, for instance, so decide with regard to a gold standard of the mark, and yesterday's suggestion was more in the nature of an indication of what might be done than a direct proposal.

It has been suggested that the consortium's own capital may be most effectively employed in stabilizing exchange through temporary credits to countries immediately requiring foreign money, which is obtainable in interior Europe without the provoking of violent fluctuations.

Dr. Walter Rathenau, former German Minister of Reconstruction, although he was not present at the meeting of the conference, was at the French Foreign Office yesterday, and has been in consultation with leading delegates to the gathering since his arrival, presumably with regard to the participation of Germany, the most important question involved that the conference at Cannes will have to settle.

The conferees indicate they consider American participation in the consortium as important essentially, although not primarily essential to the breathing of the enterprise. The idea prevailing among the delegates is that the United States can scarcely remain indifferent to such a movement, and the interest of her own European trade, but that Europe must, in any case, begin doing something on her own account. The setting up of the consortium, therefore, is not contingent upon American co-operation, it is clear.

Diamond Records Made During 1921

Old Erickson of Washington turned in the best pitching feat of season by shutting out Chicago 1-0 at Chicago, Aug. 26, allowing but three hits in 12 innings.

Shurtistey Parkinon of Philadelphia (N.A.L.) made 10 assists, only four short of record, Aug. 24, at Philadelphia.

Platter of St. Louis (N.A.L.) made three sacrifices at Boston, Aug. 24, one less than major league record.

St. Louis (N.A.L.) used 13 players in their 7-3 win at Boston, Aug. 27, all batting around in eighth inning, scoring six runs.

St. Louis (N.A.L.) made 13 hits at Philadelphia, Aug. 20, but only scored once, by being left on base.

None of Brooklyn's four pitchers went to the box in their 8-5 defeat by Boston, Aug. 21.

UPPER CANADIAN HOCKEY LEAGUE MATCHES YESTERDAY

Hamilton Won from Canadiens by Score of Four to Three - St. Patricks Tied the World Champion Senators by Score of Three to Two.

Hamilton, Ont., Jan. 4.—Hamilton won from Canadiens tonight by a 4 to 3 count, Reize scoring the winning goal on a pass from Roach with only five minutes to go. Canadiens led for the first two periods, the first ending in their favor and the second 2-1, but the third period was only a minutes' ride when Hamilton scored twice in succession and then fell back to play a three-men defense.

The game was fast and the best exhibition of the season, and the two defenses were outstanding. St. Patricks showed more combination. Benedict, the Ottawa goalie, gave a splendid exhibition and his work in the net saved Senators from a defeat of much larger proportions.

Camron, the St. Patricks' defence man was a thorn in the side of the Ottawa team and, was in the thick of the fight at all times. Dye scored two of Toronto's goals while Broadbent and C. Denenny tallied for the Eastern sextette.

Uncertain Trend Prevalled On The Stock Exchange

Sentiment Swayed Largely by Chicago Banking Episode and Unfavorable Industrial Situation.

New York, Jan. 4.—Uncertain tendencies prevailed in the stock market today, although prices strengthened in the afternoon in response to easy money and the support accorded selected issues, such as sugars, textiles, tobacco and chain stores and mail order specialties.

Dealings were extensive, approximating 300,000 shares, but a very large proportion of the business centered around less than a score of leaders comprising the oil, motor, rubber, steel and equipment divisions.

Sentiment continued to be swayed by the Chicago banking episode and the less favorable aspects of the industrial situation, especially as affecting the automobile and allied trades.

General Motors was offered in single lots ranging up to 10,000 shares at the low record of 8 1/2, but rallied with the general list in the short covering of the final hour. Directors of General Motors were in session long after the close of the market to consider action on the several divisions.

Accessories Under Pressure In consequence of yesterday's omission of the Kelly-Springfield stock dividend, shippings, chemicals, and number miscellaneous shares denoted little more than casual support and rallies, others excepted, were relegated to obscurity.

The money market again was the greatest source of encouragement to bullish initiative. Call loans dropped from 3 1/2 per cent to 3 per cent and overnight loans were liberally supplied at four per cent in the last half of the session.

Dealings in foreign exchange were light, the London rate easing only slightly. All other continental bills except Belgian francs were lower by two to twenty points.

Irregular conditions featured the moderately large dealings in bonds. Liberty issues showed trifling gains and losses and a similar tone marked the trading in rails. Forecasts pointed to the successful flotation of the new \$40,000,000 Dutch East Indies loan. Total sales, par value, aggregated \$16,250,000.

Montreal Market Experienced Dull Day In Trading

Detroit United Declined Three Points—Steel of Canada Led Market, 620 Shares Changing Hands.

Montreal, Jan. 4.—In one of the duller days for some time past on the local stock market today, the only features were a three point decline in Detroit United, and some small business in Steel of Canada and Hrompton. Price changes throughout the list were almost entirely fractional.

A board lot sale of Detroit brought the price three points down to 70. Steel of Canada led the market with 620 shares changing hands. Falling in the earlier trading to 57 1/4 it recovered later and closed at 68 1/4, a quarter point below yesterday. British Empire Bacon preferred also eased a quarter to 23 1/2.

Drompton was next most active and the publication of the annual report had little effect, the stock closing 1/4 down at 45 1/2. In the bank stocks Nova Scotia sold a point up at 93 1/2 and Montreal gained another half point to 21 1/2.

The small list of gains were led by Illinois which sold point up at 25. Dominion Bridge and Lyrall each firmed half a point. Breweries moved up 1/4 to 55 1/4 and Stenham's preferred lost 1/4 to 45 1/4. In the bank stocks Nova Scotia sold a point up at 93 1/2 and Montreal gained another half point to 21 1/2.

Business in bonds was light but the list was noticeably firmer. Ogilvie advanced four points to 98 and Victory loan 1937 made a 50 gain to 104. Total sales, listed, 3,208; bonds, \$238,850.

Little Business On Winnipeg Wheat Market

Tuesday's Drastic Break Left Its Effect on Patrons of Pit.

Winnipeg, Jan. 4.—Following the drastic break of yesterday there seemed to be little inclination to trade on the wheat market here today and the trade volume for the day was extremely light. Prices, however, after opening about one cent stronger, maintained firm and steady, closing from 2 3/4 to 2 5/8 higher.

The cash wheat demand was steady with good enquiries for No. 1 and No. 3 northern at 2 cents over and 3 1/2 cents under. The demand for other grades is slow. The demand for the top grades is said to be for rail business.

There was little doing in coarse grains, but prices reacted in sympathy with wheat. Oats closed 1 cent higher and flax at an advance of three cents.

Closing Quotations: Wheat—May 1.08 1/2 bid; July 1.06 3/4 bid; Oats—May 44 1/4; July 44 1/4 bid; Barley—May 57 1/4; Flax—May 1.82 bid; Rye—May 84 5/8.

Eleven Other Paper Companies Now Involved With Unions Over Wage Reduction Fight.

New York, Jan. 4.—Final decision on the proposed wage reduction of 25 per cent for men employed by eleven large paper manufacturing companies, was expected by arbitrators appointed to investigate the merits of the proposal, unveiled here today. More than 12,000 men would be affected by the wage cut. The International Paper Company was not found involved in the effort to reach an agreement, having decided to operate its 32 mills in Canada and the United States on the open shop plan.

Society Shoplifters In Berlin Get Away With Valuable Loot

Make Successful Hauls and Source of Annoyance to Police.

Berlin, Jan. 4.—A gang of gifted shoplifters, one of whom is the wife of the director of the Federal trustees association, which acts as agent for the reparations commission and the German government in the disposal of confiscated German armaments, was arrested after operating more than a year and stealing values valued at between eight and ten million marks from leading Berlin and provincial stores, according to figures already established, with probably many millions to be discovered. The band managed to lift a dinner set of 178 pieces of Dresden china from one shop, and a 35 piece porcelain tea service from another. In testimony to the audacity and resourcefulness of the society thieves who returned again and again until the robbers were complete.
