London, Friday, June 27.

It may be chiefly interesting to liquor
dealers and toppers, still it is a fact that
there is a distillers' combine in Canada.
Its members have just held a meeting and
advanced the price of whisky 15 cents a
gallon.

HON. MR. MERCIER is a personal friend
of the Governor-General. His Excellency,
who is now fishing on the Metapedia, has
sent the Quebec Premier a magnificent
salmon, 46 pounds in weight. And Lord
Stanley did not buy it on purpose. He
caught it with his little rod.

NOW THAT General Middleton is about
to give up the command of the Canadian
militia, let it be understood that a Cana-
dian military expert shall have the post
of honor, Canada for the Canadians in all
positions which they have ability to fill
should be the rule of our public men. Be-
gin now.

At recent church picnic at Dorchester
Station, Middlesex county, the clergyman
introduced politics in his speech, and there
were Conservatives who would "vote for a
wheelbarrow if put up to run." Without going
this far, the world is willing to wager that if
a man runs with a wheelbarrow the barrow
will come in ahead—Toronto World.

Not necessarily. Did you never see a
navy making good time ahead of a wheel-
barrow?

AN OTTAWA correspondent says that Gen-
eral Sir Fred Middleton will relinquish his
post as head of the militia force in Canada
in October next. Very good; but that is of
small moment compared with the question
whether or not the Dominion Government
will "do" from the General's pay the
\$4,000 odd for the half-breed furs he
"looted" in the Northwest.

OTTAWA FREE PRESS: Here is how the
Conservatives have fulfilled their promises
to increase the prices of farm products
throughout the dominion:

October 1, 1875—
Wheat, Barley, Rye, Peas, Oats,
\$1.10 to \$1.25, 60c to 65c, 60c to 70c, 30c to 35c,

It has already been reported from Ottawa
that the authorities are alive to the situa-
tion. It is to be hoped that their pre-
cautions are such as to leave no loopholes.
Meanwhile, let every person be clean and
keep his surroundings clean. If cholera ever
gains a foothold in Canada its breeding
spots will be in filthy neighborhoods.

The Winnipeg and Hudson Bay Com-
pany have at length reached the car of
the Ottawa Government. It is announced
that the company has been informed that
upon their producing satisfactory evidence
of ability to construct and operate 200
miles of railway from Winnipeg to the
Saskatchewan River, at or near High
Falls, the Government will be disposed to
grant the company the same aid as that
given to the Calgary and Edmonton Rail-
way during the last session of Parliament.
The grant embraces a big land subsidy.
By-and-bye corporations will control all the
good land in the Northwest.

The Louisiana Legislature strains at a
gnat and swallows a camel. Its idea of
morality may be gathered from its action in
regard to two public questions. A new law
just passed prohibits prize-fighting under
heavy penalties. But the lottery, which
brings a revenue of over \$1,000,000 a year
to the State has passed the Legislature by a
large majority. The only stipulation which
the sapient legislators make is that the
owner of the lottery shall not have a
monopoly! In contrast with this in-
dorsement of wholesale gambling by
dict of President Diaz of Mexico, who has
just vetoed a scheme for the creation
within the republic of a resort after the
pattern of the European disgrace, Monte
Carlo.

This Hamilton Herald thinks it betokened
that the London aldermen were backwoods
villagers because, when they went on a
pilgrimage to the city by the side of the
Dundas marsh some one suggested that
they should take their supply of drinking
water with them. That is a Hamilton
opinion, and may be taken for what it is.
It is, nevertheless, necessary to
caution visitors to Hamilton against the
water supply for drinking. The Times is
our witness. It says:

In drawing a glass of water from a tap at his
residence in the West End yesterday, a gentle-
man was surprised to find a dozen or so of
lively little wigglers swimming around in the
glass. It would be as well for the citizens to
examine the city water before using it in
drinking. Of course it is better to take water

generally is, but at this season filters should be
used.
Wigglers by the dozen does not seem to be
a very inviting proposition.

ONTARIO VS. QUEBEC.
The Montreal Star (Independent Tory)
strongly urges the Quebec Government to
improve the educational system of the
Province, and, as a big aid in that direction,
suggests that Premier Mercier should follow
the example of the Ontario Department of
Education. We have a few detractors of
our school system in Ontario, but they are
chiefly disgruntled politicians. The
Quebecers may well strive to have a
system as efficient, even though it is not
yet perfect. It is, as Hon. G. W. Ross
said in the late campaign, a progressive
system, and will be improved as the public
needs dictate.

THE CABINET VACANCIES.
The Toronto Empire, Sir John Macdon-
ald's personal organ, raises a wall because
Hon. Mr. Mowat has not rushed on the ap-
pointment of Ministers to fill the vacancies
in the Ontario Cabinet. These are the dog
days, fellow laborer in the vineyard, and
the heat is very oppressive. Try to keep
cool and avoid snafus. What public
interest is suffering because Mr. Mowat
does not at once reorganize his Cabinet and
set the political ball rolling in several con-
stituencies? Don't bother the Premier.
He will make his selections in due time,
and ask the constituencies affected to ratify
them.

By the way, it is not yet settled whether
the two Ministers defeated were legally
defeated by the electorate. On the con-
trary, in the case of at least one of them,
there is good reason for the belief that
illegal methods were resorted to for the
purpose of securing his defeat. It seems to
us reasonable that the Premier should take
no active steps to fill a Cabinet vacancy in
such a case until such time as the expiry of
the period during which a protest can be
lodged. Such must be the opinion of all
reasonable men.

WET WEATHER LESSON.
In consequence of insufficient or no drain-
age it would be safe to put down the loss in
crops this season at thousands of dollars in
almost every county in the Province of On-
tario. In many quarters just as the crops
were beginning to make a vigorous growth,
came a succession of heavy rains. On
clayey soils not drained whole fields or
portions of them were drowned out. A few
belated farmers who had not finished seed-
ing found themselves thrown a week or
more further behind. A great deal of corn
was put in too late, some not at all, the
fields being too water-soaked to work.
Thus the whole season's operations are de-
layed, involving loss in many ways and
wrecks get an unprecedented start. In the
whole range of the farming industry there
is perhaps no more hopeless case than the
short-sighted man who begrudges a few
dollars and a little labor to put down tile
drains. No invested money brings a more
certain or speedier return. It not only in-
creases crops but reduces the difficulties of
working the land and facilitates the year's
operations all round. It saves wear and
tear on man, beast and implements, and in-
cidentally prevents a lot of worry to the
farmer, which is a point worthy of more
consideration than it often gets.

ASKING FOR FREE WOOL IN THE
UNITED STATES.
If any persons in the United States can
speak with authority as to the effect of the
wool duties upon the manufacture of
woolen goods, it is surely the manufac-
turers themselves. They have had ex-
perience of the operation of high duties
upon their industry extending over a
series of years, and the gentlemen com-
posing the Wool Consumers' Association
have facts and figures in their possession
for the study of the tariff problem such
as no one else can hope to have in full pos-
session. There was a time, too, when they
favored a high tariff policy as essential to
the building up of a great industry in the
production and manufacture of wools, and
they have had opportunities for study-
ing every aspect of the industry and
every related interest of it. For
well nigh 30 years the system of high tariffs
has been in operation, and whatever of
good or evil there is in it must by this time
be well known to growers and especially to
the consumers of wool. The farmers may
possibly think that higher duties might be
an advantage to them, but it is certain that
up to the present time the tariff has not
served the purpose of keeping out foreign
wools or very largely increasing the native
flocks, whereas the high duties upon woolen
goods has more than offset any compensa-
tion offered by the duties. As to the opin-
ion of the manufacturers, it is very em-
phatically set forth in the petition pre-
sented a few days ago to the Senate of the
United States from the Executive Commit-
tee of the Wool Consumers' Association.

AN OTTAWA correspondent telegraphs:
In view of threatened danger from cholera, it
is rather ominous to read in Dr. Montan-
sary's last official report that the necessary appli-
cations for disinfection at Grenville, Que., have
yet several vessels will arrive this summer
from the Philippine Islands, where last year
over 60,000 died of Asiatic cholera. A deep
water wharf is demanded, where appliances
for disinfecting vessels could be placed.

It has already been reported from Ottawa
that the authorities are alive to the situa-
tion. It is to be hoped that their pre-
cautions are such as to leave no loopholes.
Meanwhile, let every person be clean and
keep his surroundings clean. If cholera ever
gains a foothold in Canada its breeding
spots will be in filthy neighborhoods.

The Winnipeg and Hudson Bay Com-
pany have at length reached the car of
the Ottawa Government. It is announced
that the company has been informed that
upon their producing satisfactory evidence
of ability to construct and operate 200
miles of railway from Winnipeg to the
Saskatchewan River, at or near High
Falls, the Government will be disposed to
grant the company the same aid as that
given to the Calgary and Edmonton Rail-
way during the last session of Parliament.
The grant embraces a big land subsidy.
By-and-bye corporations will control all the
good land in the Northwest.

The Louisiana Legislature strains at a
gnat and swallows a camel. Its idea of
morality may be gathered from its action in
regard to two public questions. A new law
just passed prohibits prize-fighting under
heavy penalties. But the lottery, which
brings a revenue of over \$1,000,000 a year
to the State has passed the Legislature by a
large majority. The only stipulation which
the sapient legislators make is that the
owner of the lottery shall not have a
monopoly! In contrast with this in-
dorsement of wholesale gambling by
dict of President Diaz of Mexico, who has
just vetoed a scheme for the creation
within the republic of a resort after the
pattern of the European disgrace, Monte
Carlo.

This Hamilton Herald thinks it betokened
that the London aldermen were backwoods
villagers because, when they went on a
pilgrimage to the city by the side of the
Dundas marsh some one suggested that
they should take their supply of drinking
water with them. That is a Hamilton
opinion, and may be taken for what it is.
It is, nevertheless, necessary to
caution visitors to Hamilton against the
water supply for drinking. The Times is
our witness. It says:

In drawing a glass of water from a tap at his
residence in the West End yesterday, a gentle-
man was surprised to find a dozen or so of
lively little wigglers swimming around in the
glass. It would be as well for the citizens to
examine the city water before using it in
drinking. Of course it is better to take water

generally is, but at this season filters should be
used.
Wigglers by the dozen does not seem to be
a very inviting proposition.

top-heavy and is doomed to come down
with a crash. And so we find the Wool
Consumers' Association of the United States
declaring in their petition to the Senate
that:

"The system of excluding wool by
more or less prohibitory duties, involving
still higher duties on woollens and worsteds
has been tried at great cost to the con-
sumer, with destructive restriction to the
wool manufacturer, and without any com-
pensating advantages to the wool grower.
Under this system the wool grower has
utterly failed to supply the raw wool in
adequate quantities or quantities, the high
cost of foreign wools has forced the manu-
facturer to resort to shoddy, hair and cotton
to make so-called woollens of, and the im-
portation of goods made by foreign manu-
facturers, who have the overwhelming ad-
vantage of free selection of free material,
has been enormous."

Again, the manufacturers assert that the
high duties on wool hamper the manu-
facturer and drive him to the use, not so much
of American wool as of shoddy and cotton,
and increase the cost of all woollen and
worked cloths, and thereby diminish con-
sumption. So the system works all around,
and neither the wool grower nor the wool
manufacturer receives in the end any
benefit from it. The best qualities of manu-
factures, the woollens and worsteds for
men's and women's wear, are handicapped
by the dearth of the raw material, so that
a large proportion of these goods con-
sumed in the United States is the pro-
duct of foreign looms. And then as re-
gards carpets, wools they are almost entirely
imported from the United States at all.
"In spite of a heavy duty on these wools
for nearly 25 years," the Consumers'
Association declare, "there are none raised
here, and there is no native industry to
protect even in an infant state." A few more
knocks like this and the protection system
of the United States will get its deathblow.
The farmers from the West assailing it from
one quarter, the manufacturers of the East
from another and the working classes from
all round will not take long to bring in the
rule of continental free trade.

MR. LAURIER'S celebrated expression
"Reciprocity is in the air," is recalled from
time to time by current events, writes an
Ottawa correspondent. The latest is
President Harrison's message to the United
States Senate on reciprocity with the
South American republics. Mr. Blaine, in
his letter accompanying the President's
message, says: "Fifteen of the seventeen
republics represented in conference have in-
dicated their desire to enter upon recipro-
cal commercial relations with the United
States. The remaining two express equal
willingness could they be assured that their
advances would be favorably considered."
It is significant that the representatives of
seventeen Governments should be in unani-
mous agreement as to the principle of recip-
rocity, and the attitude of another Gov-
ernment, the Government of Canada, should
be the same as the two remaining republics
mentioned by Mr. Blaine. It is also signifi-
cant that the American hemisphere upon
Bella's none other than the United States,
present to declare the ports of the
United States free to all the products of
any nation of the American hemisphere
upon their desire to enter upon reciprocity,
whenever and so long as such nations ad-
mit United States products free of all
duties.

Constipation,

If not remedied in season, is liable to
become habitual and chronic. Dr. J. C. Ayer's
Pills, by weakening the bowels,
confirm, rather than cure, the evil.
Ayer's Pills, being mild, effective, and
strengthening in their action, are gener-
ally recommended by the faculty as the
best of aperients.

"Having been subject, for years, to
constipation, without being able to find
much relief, I at last tried Ayer's Pills.
I deem it both arduous and a pleasure
to testify that I have derived great bene-
fit from their use. For over two years
past I have taken one of these pills
every night before retiring. I would not
willingly be without them."—G. W.
Bowman, 20 East Main st., Carlisle, Pa.

"I have been taking Ayer's Pills and
using them in my family since 1857, and
cheerfully recommend them to all in
need of a safe and effective cathartic."
—John M. Rogers, Louisville, Ky.

"For eight years I was afflicted with
constipation, which at last became so
bad that the doctors could do no more for
me. Then I began to take Ayer's
Pills, and soon my bowels recovered
their natural regular action, so that
now I am in excellent health."—S. L.
Loughbridge, Bryan, Texas.

"Having used Ayer's Pills, with good
results, I fully endorse them for the pur-
poses for which they are recommended."
—T. Conners, M. D., Centre Bridge, Pa.

ADVERTISE IN THE ADVERTISER

HYMEN'S
LOTTERY!

A Prize! For Every Maid or Widow!

There is a MATRIMONIAL PRIZE, ranging
in value from ONE THOUSAND to TEN
MILLION DOLLARS, for every maid or widow
using Dr. Campbell's Safe Arsenic Complexion
Wafers. No mere MAN since the fall can
stand the pressure of BRIGHT eyes, IVORY
skin and ROSEY lips. He makes a bee-line for
a MARRIAGE LICENSE, and receives the
congratulations of his friends (many of whom,
however, are envious over the "happy event,"
begun, vigorously presented and happily con-
summated, all within a few weeks. Why need
we say more?

Let others land the Mares nine.
And praise the triple Graces.
This theme of mine is more divine
I sing—fair ladies faces!

But NOT the ones with blooms and paints,
Laid on with puffs and brushes.
But those who melt the hearts of SAINTS,
With "NATURE'S" glowing BLUSHES.

BEAUTY of this superlative order, when not
conferred by Nature, can be devolved ONLY
by the use of Dr. Campbell's "Life-Renewing"
Safe Arsenic Complexion Wafers. Dr. Camp-
bell leaves no stone unturned in his prepara-
tion. He uses the finest chemicals, and pro-
cesses them in his "skin-combining" process,
not even for cells. All bleaches, balms, bloom-
ers, powders, etc., are "OUT OF THE QUESTION."
Beauty from WITHOUT! CAMPBELL'S Safe
Arsenic Complexion Wafers develop "NATURAL"
BEAUTY from WITHIN.

A WORD TO LOVERS MASQUIN!
You'll never meet a joy so sweet
As your soon-to-be-famous
as your heart's best gift with her moral com-
plexion and all the inherent sweetness acquired
from a steady use of
