COBALT FIRE LOSS GERMAN MONEY MAY BE \$200,000

Proprietor of Cobalt Hotel is the Hardest Hit, Having no Insurance on \$50,000 Structure. COBALT, June 6.—(Special).—The total loss from the fire which gutted a considerable part of Cobalt Wednesday night has been placed at from \$100,000 to \$200,000. It was in the heart of the business section that the fire started. No destruction of the Cobalt Hotel, which is the largest building destroyed, was reported. Other buildings destroyed were the Lyric theatre, the Milton Car building, the Colosseum building, Harrington's restaurant and other properties.

In the Province of Yunnan, China, where great quantities of poppy have been raised, the ground is now turned over to their purpose owing to the recent restrictive measures taken in view of the suppression of the opium traffic. While this has not resulted in any perceptible decrease in the consumption of opium, it has, on the other hand, been the ruin of the honey crop of that section. The highest grade of honey has been produced in this section, but the bees do not seem to get the same amount of a sweetness out of the flowers of the beans and plants which have replaced the poppy plants.

If he had been a good driver he would have been equal to the emergency which cropped up unexpectedly when the bicycle appeared in front of the machine as it was coming off of John-street and onto Queen-street. He was inexperienced, however, and unequal to the sudden call on his ability and nerve. "I am concerned," was the steering gear. It was not greatly out of gear but was a trifle stiff and needed a little more muscle on the steering wheel if the driver was to keep a straight course. Before the accident the entire machine must have been in perfect working order. The machine has an accelerator which is a danger to anyone but an expert driver. Unless a man understands perfectly the entire mechanism of an automobile and has been either well coached or had the necessary experience in driving a straight course, and of splendid nerve he should not have an accelerator on the machine at all. The ordinary driver should be forbidden by law to carry one.

Engineer Killed In Western C.P. Wreck

VANCOUVER, B.C., June 6.—(Can. Press).—One killed and three injured is the result of a head-on collision between the east-bound Canadian Pacific freight train No. 84 and west-bound stock extra No. 1871, this morning at 2 o'clock at a point one mile east of Tappan, a small station about fifty miles east of Kamloops. Engineer Joliffe of the stock train was killed, and Drakeman Wright and Eskridge were seriously injured. Many head of cattle were killed. The telegraph operator at Notch Hill failed to deliver an order to the east-bound train. It is said that the latter's vague reports of the wreck gave rise to fears that passenger trains had collided with heavy loss of life.

MR. TAFT IN HISTORY

The reign of the American president is a short one, and until recently the world at large paid little attention to the personality of the various men, some of them decidedly mediocre, who from time to time have occupied the White House.

Not unnaturally, Mr. Taft as president addressed himself to international affairs. He negotiated general arbitration treaties with the United Kingdom and France, and these would have been followed by similar treaties with Germany, Japan and other great nations.

Speaking abstractly it would seem to be as necessary to have a superintendent for the schools of a city as it is to have a fire chief or a chief of police.

Why is it then that the president has not strength as a candidate for reelection and will leave the White House with the sense of personal humiliation?

Yet things might have been far different. Had Canada adopted reciprocity or had the inevitable march upon Mexico been inaugurated six months ago; had he stood by Roosevelt—and there is no apparent reason why he should have broken with him—Mr. Taft would have been re-elected, and with have become one of the great presidents.

Most unfortunately for his fame at home and abroad was his publication of the letter to Colonel Roosevelt, wherein he declared that reciprocity would make Canada an adjunct of the United States.

Mr. Roosevelt, in all probability, will succeed Mr. Taft, and as president will bring about the reforms needed in the United States.

PROTECTION SHOULD PROTECT.

The Ontario consumer of anthracite coal pays no duty because it is recognized that the imposition of such a duty would be a mere arbitrary tax upon a necessary life.

When the western coal mines were idle, and therefore not in competition with United States coal in the prairie provinces, the government suspended the coal duties in these provinces, recognizing that their collection would be a mere tax serving no protective purpose.

GORDON WALDRON IS BUSY GAINING CHARGES OTHER LAWYERS WITH BEING UNPROFESSIONAL AS DIRECTORS OF TRUST COMPANIES.

Gordon Waldron, the Toronto solicitor, charged before the discipline committee of the benchers of the Law Society of Upper Canada yesterday, that lawyers were guilty of unprofessional conduct if they were directors of trust companies that indulged in a form of advertising with the public that lawyers would not be allowed to do.

The discipline committee, which has jurisdiction over the entire province, the conclusion of the hearing yesterday afternoon, reserved judgment and will report their finding to conviction.

Speaking to The World last night Mr. Waldron was of the opinion that the committee would declare that lawyers must resign from the directorate of trust companies, or that trust companies with lawyers on the board would be forced to desist from following the same course in future.

The following lawyers were cited by Mr. Waldron as being guilty of unprofessional conduct in being directors of such companies: Mr. Aemilius Irving, Sir William Morritt Clark, Hon. Sir John Foy, Hon. Featherstone Ogle, Sir George Gibbons, John Hoskin, K.C., Seymour Corley, Alexander Bruce and Dr. F. B. Johnston, K.C.

# Real Estate and Building--News and Opportunities

## Space In New C.P. Building Renting Fast

It is said that nearly half of the space that the C.P.R. will rent in its new building has been arranged for. H. H. Williams would not say yesterday how much space had been taken but remarked that there would be no trouble experienced in arranging the entire space far ahead of the building's completion. At present they are endeavoring to lease only to firms willing to take large spaces, either entire or half floors. Adjustment with the smaller concerns will be made later, as naturally the agents do not want to have to turn down a company willing to take extensive room because a floor had been broken up with small offices.

At present the work on the building is several days behind, but this will not affect the completion of the building on the day set, January 1, 1913. Some delay was experienced in foundation work on the south side of the structure. The Traders Bank Building does not go down so deep as the C.P.R. Building and care had to be exercised so that the foundations of the big neighbor were not placed in jeopardy.

A further delay was caused by non-arrival of the terra cotta facing after about three storeys were finished. Yesterday the work of covering was in full swing again and eight storeys are now done. The stone facing for the lower three floors is now being laid. In a month the building should be completely closed in and Toronto will be able to judge of what a fine appearing building the C.P.R. has planned.

The rents of the C.P.R. Building are \$110 a square foot on the inside for offices facing on the light well, and \$60 for offices facing Yonge and King streets.

The Standard Bank Building at King and Jordan streets has been fully rented by H. H. Williams at an average of \$2.12 a foot.

## High Prices Are Offered For Land

Fifty dollars a foot for the north-west corner of Eglinton-avenue and Dufferin-street has been offered by a Toronto builder to the Colonial Realty and Securities Company. The offer will likely be refused. It is for the main lot in the Scott farm recently acquired by the company.

Offers totalling \$30,000 for lots in the Hellwell Estate property on Don Mills Road owned by this company have been received. The plans of the subdivision have not been fully approved of. The property was annexed to the city and all improvements have been promised for this year. Considerable building, it is expected, will be done during the summer. The property most in demand is that which will be sold at \$50 to \$55 a foot. The prices range from \$25 to \$30 a foot throughout the subdivision.

**ALEX. FRASER HONORED.**

NEW YORK, June 6.—At the university commencement today, the degree of doctor of laws was conferred on Rev. W. H. Van Allan, D.D., Boston; Augustus A. Wilson, governor of Kentucky; and Alexander Fraser, provincial archivist, Toronto.

## Bell Piano Co. Renew Their Store Lease

The Bell Piano Company have renewed their lease on the premises they occupy at 146 Yonge-street. The new lease is for five years and calls for a rental of \$18,000 annually. The frontage of the building and land is 28 feet, and is on the west side between Yonge and Temperance-streets. The owner of the property is Henry Sheard.

This is the first Yonge-street lease transaction in two months. Real estate men prophesy a large number of deals in the next six months in Yonge-street lease hold. About twenty lower Yonge-street leases run out this year and next, and it is getting to be common practice to renew them or re-lease premises several months in advance of expiry.

## 38 YEARS AT UNIVERSITY

Prof. Ramsay Wright retires on a Pension of \$2750 a Year.

After 38 years of continuous service to the University of Toronto, Prof. Ramsay Wright goes abroad to engage in research work. He will draw a retiring allowance from the university of \$700 a year for the next five years, when he will be sixty-five years of age and eligible to come on the Carnegie pension fund. It has not been usual to retire university professors until the age of 65.

Prof. Wright and Mrs. Wright were the guests of honor at the annual dinner last evening of the United Alumnae Societies of the various colleges in the university, at which a large number were present.

## COLONIAL HEIGHTS (HELLIWELL ESTATE)

The Colonial Realty & Securities Corporation, Limited, expects to have plans registered in a few days of this latest nearest-in subdivision.

Two wide avenues extend from Don Mills Road eastward, and several cross streets extend to Danforth Avenue.

Buildings must be of brick or stone and well set back from the street line. The lots on Don Mills Road are reserved for business.

Sewers, water and walks have been applied for.

This subdivision is convenient to Broadview cars and to the centre of the city.

The Bloor Street viaduct and the Danforth Avenue car line will increase the value of all lots in this locality.

Let us motor you to see it on Saturday, or try the street car. Applications will be received to-day.

# GOING AHEAD

LAST month's building permits in Toronto were three-quarters of a million dollars ahead of May, 1911. The railways are going to spend millions. The big business firms and financial houses are spending millions monthly in keeping up with Toronto's expansion. The city government is waking up, too.

## RAINS IN THE CROP BELT BRING FURTHER DECLINE

### Favorable Growing Conditions in Kansas and Nebraska Leave the Chicago Market in Hands of Bears—Corn and Oats Continue Strong.

CHICAGO, June 6.—Attempts to bolster today's wheat market failed. Talk of dust storm damage in the Dakotas did not long attract buyers as against news of continued showers in both Kansas and Nebraska. The outcome was a decline of 1-2 to 3-8c. Corn finished 1-8 to 1-2c over last night, oats varying from 1-4c off to 1-8c to 1-4c advance and provisions unchanged to 7-15c in case in coat. Most of the time today wheat tended to settle lower and lower, also fair support developed on the extreme dip. An influence that put some pressure on the market was knowledge that the harvest was complete in Texas and from the northern counties and that the yield was running from 20 to 25 bushels to the acre, a decidedly disappointing exhibit.

### Corn Held Firm

In the corn crowd predictions were current that the movement ahead from the farms would be ended in a week or ten days. Some outside buying, too, was based on newspaper mention of the alleged extraordinary amount of corn used for distilling. Although oats advanced, an account of short covering the market reacted later as a result of profit-taking. Speculators who delivered the actual grain from May contracts were the best buyers and chiefly of the July option. Provisions showed firmness from the start. The hog run was moderate, and the week's packing well under that of a year ago. After the pit was cleared, prices stood almost uniformly dearer 1-2 to 7-15c.

### Northwest Receipts

Receipts of wheat at northwest primary points, with usual comment, are as follows:

City	To-day	Week	Year
Chicago	22	13	820
Winnipeg	22	15	47
Edmonton	22	15	47
Minneapolis	65	113	183

### European Markets

The Liverpool market closed today on wheat 1-4 to 1-2c lower, yesterday and on corn unchanged to 1-4c higher. The continental exchanges were closed over the holiday (Corpus Christi).

### Argentine Estimates

The weekly Argentine estimates, with usual comparisons, follow:

Year	Wheat	Corn	Oats
1911	2,600,000	2,200,000	1,612,000
1912	5,100,000	4,700,000	3,100,000

other hand this rain is unfavorable for the conditioning of corn.

### LIVERPOOL GRAIN EXCHANGE

LIVERPOOL, June 6.—The market at the opening was affected by the weakness in America yesterday, and the opening values were lower. Following the opening the market further declined, with the principal weakness in October. Selling pressure was the result of a less southern enquiry, more favorable weather conditions in the United Kingdom, together with reduced speculative trading reports of increased shipments from Argentine this week. Corn opened steady, 1-4 to 1-2c higher on the firmness of Plata offerings and less favorable crop advice from Russia and the Danube following.

### CHICAGO GOSSIP

Wheat—July wheat price rose 1/2 for the day, and Sept. closed at \$1.04, showing a fraction weaker. The early decline in the market, considering the fact that the trade had the most bearish weather since the recent damage reports based on dry weather began. That the market did not have more bread was due to two important considerations, first, the location of the Chicago river, and second, the fact that the rain or more rain, a certain amount of damage has been done, a certain amount of damage has been done, a certain amount of damage has been done.

### Toronto Sugar Market

Sugars are quoted in Toronto, in bags, per cwt., as follows:

Item	Price
Extra granulated, St. Lawrence	\$5.25 to \$5.35
Imperial granulated	5.20 to 5.30
Refined granulated	5.10 to 5.20
White granulated	5.00 to 5.10
Yellow granulated	4.90 to 5.00
In barrels, 50 cwt. more; car lots, 50 cwt. less.	

### MONTREAL JUNE 6—Business in Manitoba spring wheat over the able continues dull, and bids for oats were out of line. There was a good demand from local buyers for oats and a large business was done, including sales of 45,000 bushel sample grades at 41c c.l.f. Oats—Canadian western, No. 2, 55c to 56c; No. 3, 49c to 50c; extra No. 1, 57c to 58c; No. 1, 57c to 58c; No. 2, 55c to 56c; No. 3, 49c to 50c; extra No. 1, 57c to 58c.

### MINNEAPOLIS GRAIN MARKET

Mining Market Proves Vulnerable Again--Commercial News Head

SAVE OUR STORY AGAIN-- ANOTHER DIP IN MARKET

Porcupine Stocks Record Further Decline When Liquidation is Resumed--Prices Down to New Low Levels--Cobalts Hold Steady.

World Office, Thursday Evening, June 6. Speculation in mining stocks has been maintained at so low a level of late in the local exchanges that there has been afforded no practical opportunity for favorable comment on such price changes as have occurred. In fact, so restricted has been the day-to-day trading that there has been no feature of any consequence evolved in many weeks. Nor does there seem to be much likelihood of any change in this regard in the immediate future.

Dividend Coming On Motherlode?

The Motherlode Sheep Creek Mining Co., located in the West Kootenays mining district, British Columbia, has been in development more than two years. It has extended and earning at the rate of about \$38,000 a month. A dividend of 3 per cent quarterly will be declared some time in the third quarter of this year. Between \$700,000 and \$800,000 worth of ore has been developed. The mine is owned by John McMartin, L. H. Timmins and others.

EXTENSION OF LIBRARY PRIVILEGES.

The Public Library Board, in accordance with its policy which worked out so successfully last year, has extended library privileges to those who are going out of the city on vacations. Six books (other than seven-day books) and others in great demand may be drawn at one time, and may be retained without renewal for six weeks. The library reserves the right, however, to recall any book after the expiration of two weeks if postal requests for it have been made by other readers.

Will Cut Vein Soon At 200 Foot Level

(By Staff Reporter.) PORCUPINE, June 6--According to the engineers' figures the shear at the 200-foot level at the Crown Chartered mine will be cut in the next few days. The crosscut is now driven in 80 feet, much farther distance than at the first level before the shear was encountered.

Work on the first level proceeds as usual, with nearly 1000 feet of drifting done. (By Staff Reporter.) Reading in bed is not as injurious to the eyes as it has been led to believe. A well-known oculist here, in his private practice, has been led to believe that there is no valid reason to be urged against using the eyes in a proper manner in a recumbent position--such use is the least of a danger and can be persisted in for long periods without damage than any other position.

WRITING ON GLASS.

It is possible to write upon glass with an ink which will etch the surface, so as to leave a permanent record. The ink is one which is very corrosive, so that it must be used with care. A little saucer of lead foil or tin is used to hold the ink, and a small brush is used to apply it to the surface of the glass. The ink is made up of a mixture of sulphuric acid and potassium dichromate, and is used with a brush. Porcupine Sourdough Believes New Gold Field Was Condemned Too Soon.

(By Staff Reporter.) PORCUPINE, June 4--Not all the members of the Porcupine "old guard" who went into the Whiter Lake region to prospect are kicking the Massey district round. Indeed, the country south of the C.P.R. tracks has one staunch friend in George Christian Banerman, the original discoverer of the Scotchman Ontario lots in Whitney, who returned to-day after making a close inspection of the country rock and the leads there.

THE PRIVATE AND STATE SEALS USED IN CHINA.

In China, seals are made of wood and stone, as well as metal. They are used, in addition to a signature, to represent an individual, a legal person or a corporate body. The seals used in China are of two kinds, the private seal and the state seal. The private seal is used by individuals and the state seal is used by the government.

OPENING UP THE WESTERN BELT

Kamascotia District Across the Mattagami Scene of Much Activity--Thoro Prospecting Under Way.

(By Staff Reporter.) PORCUPINE, June 4--Final steps in the opening up of the Kamascotia district, at the boundary of Turbott and Robb townships, to the west of Porcupine, have already been taken, and a townsite is now being surveyed and lodging camps built by a syndicate of which W. F. Clearidge is the head.

ONLY A FEW DAYS TILL CIRCUS.

Next Monday, June 17, is Ringling Day and the circus is thumping the calendar with much impetuosity. Ringling Brothers come to town, it is already a well-known fact. The circus is expected to arrive in town on Monday, June 17, and to stay for a few days.

RUMORS ON "RAILS."

Montreal has a full-fledged rumor on Toronto Railway to the effect that a 10 per cent dividend will be declared in the near future. The Montreal Star says: "Heart disease is liable to attack Torontoians if they take the following course in medicine requires only four years, but to become a first-class constable requires five years."

Glass That Has Unusual Powers of Resistance.

Titanium or proutium glass has been found to be very resistant to attack by chemical agents at high temperatures, and is much more easily worked than pure quartz glass. The glass of this kind covered by a recent French patent is known as silico-oxide. The strongest of the zirconium glasses, titanium dioxide, contains one per cent of zirconium oxide, and the most resistant to heat has five per cent.

WINNIPEG RY. CAN MAINTAIN 12 P. C. RATE

Appropos of the advance in Winnipeg Electric from 218 to 226 in the Toronto Stock Market, a Winnipeg contemporary says that prior to the bulge the shares were ruling too low. They carry a 12 per cent dividend and there are a good many issues paying a good deal less than are selling for an approximate figure. Perhaps the low price was due to some fears as to whether the dividend rate of 12 per cent would be maintained in the event of municipal competition and a new issue of capital stock of \$2,000,000. It now seems quite certain that the earnings of the company justify the maintenance of the rate and with competitor brought to its most acute point, but little effect is shown upon them.

London, England, stock brokers are considerably agitated over the new legislation passed in Germany to check German speculation in the London market. The German is no longer allowed to buy or sell in the London market, and it is now a penal offence to ask anybody to speculate in London mining shares unless approved by a German official.

YOU CAN'T GET A SOLOMON FOR \$2 A DAY, SAYS T. C. ROBINETTE, K.C.

"You cannot expect the wisdom of a Solomon for \$2 a day," said T. C. Robinette, K.C., in county judge's court yesterday afternoon, in criticizing the action of a policeman for arresting a man in a row following the breach of the bylaw against spitting on the street. Mr. Robinette told the court that the policeman was ridiculous to expect that the force could continue to enlist and hold efficient men at the present salaries. He declared that the plan advanced in the World that the pay of a first-class constable should be advanced to \$1200 a year and that the time required for a man to become a first-class man should be reduced to three years, was the best solution of the police proposition.
