Mr. and Mrs. I. Mr. Kearley was glad to meet many old friends and to note improvements in the town since his last visit some fifteen years ago. We appreciate Mr. Kearley's words, "No visitor is more welcome to us in Vancouver, than the old Cochrane St., Opp. St. Paul's home paper, the "Guardian." Turn the steam off, and allow all to settle, not exceeding five minutes, according to capacity of liver boiler.

7th. Then you dip all the oil you can get, which is the fines white oil. Put this oil in a cooling tank made of galvanized from and let the oil remain there till next morning. Don't forget to put a straining cloth over the cooling tank before you put any oil in, so that it will catch any bits of blubber; allow to remain 12 or 14 hou t or longer if possible, then dip from cooling tank and strain through double ealico bag, inside bag to be one inch smaller all around; then strain into a tin shute under the bags, the eask to be at the end of he shute with a fannel, to lead oil into casks, which funnel to be covered with onees; sloth.

REGULATION For Salting Scotch Pack Herring

Filling Fish may be branded as Scotch Cure without the Crown

No drowned, stale, or scaleless herring can be used as Scotch

Pack, nor herring in half frozen state. The root cause of light salting is to come as near as possible to the pleasing of the palate of the consumer; and if we bear in mind that over three-fourths of all Scotch-Pack Herring are consumed as a tonic before the mid-day meal, just as they come out of the barrel, without any fire cooking, we can see the reason at a glance for the right salting. The herring is dressed by the head and the tail being cut off, the main bone taken out. It is then cut into squares of about one inch, and is served with vinegar and other condiments. This

gives power to the stomach to digest the following meal and keeps the consumer in the best of health. People with bad stomachs please note that the art of cooking and eating right is just as essential as the art of curing; and based on the best medical directions, and with the chemical analysis of the constituent parts of herring as a food ever kept before the consumer, we need not be surprised that the people who eat most herring are

the most healthy and efficient. DEPARTMENT OF MARINE AND FISHERIES
