Then you were asked by Commissioner Webster:—

> Mostly forest products?

And your answer was:

> Yes, and not much of that at the present time.

Then again at page 399:

> Commissioner Murray: Would the National Transcontinental line be the best on which to handle tonnage?
>
> Mr. Appleton: Yes, the natural route would be down the Transcontinental. We had a little flurry of wheat one winter—fifteen trainloads of fifty cars each on the Transcontinental in one day, but it was just a day.

Does that refer to the same thing?—A. That would be a peak day, what we might call a peak movement for one day.

Q. But it did not last?—A. We might have had a fairly good movement outside of that.

Q. During the War the traffic did move freely over the C.P.R. across Maine?—A. No, sir, not to my knowledge.

Q. Do you mean you know it didn't, or you don't know of it having been so?—A. Not until the United States went into the War.

Q. You think it did not?—A. No, I don't think it did. I know there was not a soldier moved by the C.P.R. They all moved from Montreal to Halifax via the Intercolonial.

*By Right Hon. Mr. Meighen:*

Q. But why would not freight move that way, the same as at any other time?—A. The United States not being in the War, I understand they could not move munitions and stores that way.

Q. Maybe not munitions, but regular freight?—A. Of course regular freight would move that way, but the bulk of the tonnage—

Q. Why would they not move munitions when they were moving their own munitions?—A. I could not answer that.

Hon. Mr. BLACK: It was before the United States came into the War.

Right Hon. Mr. MEIGHEN: They were moving their own munitions.

The WITNESS: It was generally understood by local operating officers, including myself, that there were no munitions or stores moving by the Canadian Pacific to the seaboard. It is possible that there were, and that we were not aware of it.

120004

Right Hon. Mr. MEIGHEN: I do not say they were; but I do not know that they were not.

The WITNESS: I know we moved a million soldiers.

*By Right Hon. Mr. Meighen:*

Q. Certainly they could not move the soldiers.—A. None of them moved C.P.R.

*By Hon. Mr. Black:*

Q. You could also move through passenger traffic very much more cheaply and expeditiously over the National Transcontinental than over the Intercolonial, could you not?—A. As a straight operating proposition, yes, but the local traffic—

Q. Local conditions.—A. Local conditions prevent that without additional train miles.

Mr. BIGGAR: I think that covers the ground, Mr. Appleton, unless you have something you would like to add.

*By Hon. Mr. Moraud:*

Q. What about the local conditions referred to at Edmundston? How many settlements are there between Edmundston and Diamond?—A. I have here, senator, details in connection with that. I could file that.

Q. Would you file it?—A. Yes, sir.

Q. It has been suggested by Mr. Macnabb that the local traffic could be taken care of by the Temiscouata Railway?—A. I might mention Riviere Bleue, where the revenue, I think, ran up to $240,000. Here is the notation:—

> This station serves also Landry's Siding, where the D'Auteuil Lumber Company carry on a very large pulpwood operation, drawing pulpwood from the State of Maine, the average yearly cut amounting to 25,000 cords, all of which is shipped out by rail, largely to Mechanicville, New York. If the line were abandoned in this district, the only outlet for this wood would be to stream-drive to a point on the Bangor & Aroostook Railway.

Then we would lose a quarter of a million of revenue.

Q. Can the Temiscouata take care of the traffic on that Transcontinental line?—A. No, sir.

Q. What are the distances between the Transcontinental and the Intercolonial?—A. It runs from about 12 to 20 miles. It is a very rough country, and it is almost impossible to operate in that country in the winter time.

Q. Can the Intercolonial take care of the local traffic?—A. It could if you could get it to the Intercolonial, but that traffic, which is largely forest products, is developed to the south of the Transcontinental. They bring it in 8 or 10 miles, and you would have to add 10 or 20 miles over rough country.

Q. You are taking care of traffic on both sides of the line, from the border between Canada and the States?—A. That is what I tried to say.

*By Right Hon. Mr. Meighen:*

Q. I am advised that you are quite mistaken about the munitions; that there was no distinction drawn.—A. That may be possible, senator. I know that we were taxed to capacity, and that there were occasions when we went up as high as 17 troop trains in a day and had to suspend the freight entirely.

Q. That would be to take troops under the colours?—A. Yes, sir.

 120005 

*By Hon. Mr. McRae:*

Q. Would you give us your idea of the farming possibilities along the line if settlement increased, and what we might look to in the next 15 or 20 years?—A. Pioneering is going on there wonderfully. For instance, at New Denmark, in New Brunswick, there is a very prosperous Danish settlement that this serves. There are five potato warehouses. If the line was abandoned it would mean an average haul of 10 miles to the nearest railway facilities.

Q. What percentage of the country is suitable to agriculture?—A. Quite a percentage.

Q. Half of it?—A. I wouldn't say that. It is a pretty rough country.

*By Hon. Mr. Black:*

Q. Probably 30 to 35 per cent?—A. Yes, sir. If you withdraw the movement of through traffic from that line you lose an economy of $750,000. That economy pays for the maintenance of the tracks and structures on that line, and you therefore get a local service without cost at all. You serve the communities there without cost to the country or to the company.

*By Hon. Mr. Moraud:*

Q. What is the distance between the Temiscouata Railway and Diamond Junction?—A. Temiscouata and Diamond Junction? It would be 220 miles, perhaps 230.

Q. There is no question whatever of these communities being served by the Temiscouata Railway?—A. I beg your pardon?

Q. There is no question whatever of serving all these communities along the Transcontinental by the Temiscouata Railway?—A. It cannot be done. A look at the map will show that. It only follows for a certain mileage, and is gone altogether.

*By Hon. Mr. Hugessen:*

Q. It is a very poor line with very heavy grades.—A. The rails are about 60 pounds, and one of our engines if put on there would probably go out of sight.

*By Hon. Mr. Moraud:*

Q. You said you would file that statement as an exhibit. Is it filed already?—A. I will file it right now. I will also file one of the local earnings.

*By Mr. Biggar:*

Q. I just remember that I had a bit of information on a point that I would like you to verify. As a matter of fact, is the capacity of any of these three lines not more than sufficient to carry all the traffic that all three of them carry?—A. That is, are they being operated to their capacity?

Q. Yes.—A. Oh, not 50 per cent.

Q. Is it not something less than 50 per cent? Two out of those three lines would carry all the traffic and as much again, would they not, even on the 1928 basis?—A. No. I would say the Canadian Pacific is pretty nearly up to its capacity during the winter months, but the Transcontinental could easily absorb all the traffic over the Intercolonial

Q. And over the Canadian Pacific too, could it not?—A. No. I do not think one line could handle the combined traffic of the three railroads on peak occasions in the winter time.

Q. The figures I have here are that the National Transcontinental has an estimated capacity eastbound of 800 gross tons per month, and westbound of 700 tons and that the actual peak was 779, eastbound.—A. Tons?

Q. Yes.—A. You would handle as high as 4,000 tons in one train, on the Transcontinental.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120006

Q. These, of course, are in thousands. That is, 800,000 gross tons?—A. Well, it would be taxing the line to its capacity, and we would have to put in additional passing tracks and some block signals.

Q. You would say that that was more than the capacity, would you? It has not now as it stands a capacity of 800,000 gross tons a month, eastbound?—A. I would not like to say that offhand, but I would say that with the passenger trains and freight trains operating at present, or during the winter months over the Intercolonial and the Canadian Pacific alone, with the traffic on the N.T.R., that it would slow the traffic down very much, and I am afraid we would lose a lot of import and export traffic to perhaps Atlantic ports in the United States.

Q. Could either the Intercolonial or the National Transcontinental carry all the traffic of both?—A. There would be delay on the Intercolonial at certain times. But the Transcontinental I think could handle it all.

*By Hon. Mr. Moraud:*

Q. Mr. Appleton, you have given here in that exhibit the names of the stations. You have not given the names of settlements or communities along the Transcontinental?—A. No, I have not that information.

Q. And the population of those?—A. Well, the population is shown there, and it includes the settlements, generally speaking, as near as we could get it.

Q. You have no idea how many settlements there are between Diamond and Edmundston?—A. Well, the stations as given there serve all the settlements, and the population includes the settlements.

Mr. BIGGAR: I have got the second page of that exhibit, of which Senator Moraud has the first page, and I understand it shows the local stations along the line.

The WITNESS: Yes.

*By Hon. Mr. Moraud:*

Q. But besides the stations there are a good many local settlements—A. Yes. We combined the population. Riviere Bleue, for instance, serves three or four settlements.

Q. You have no idea what the increase in the population has been since the Transcontinental was built?—A. It has been considerable. There have been a lot of new settlements started up.

*By Mr. Biggar:*

Q. The third of your exhibits shows population and tons of freight, and gross revenue, and so on, in 1937. That will be Exhibit 88.—A. There is a further statement giving similar information between Diamond and Monk, which is really a part of the other one.

Mr. BIGGAR: It can be made part of Exhibit 88.

*By Hon. Mr. Moraud:*

Q. Most of the settlements along the Transcontinental were for lumbering operations at the time the Transcontinental was built?—A. Yes.

Q. Now most of the settlements are farming settlements?—A. They are a combination of farming and lumbering.

*By Hon. Mr. Côté:*

Q. If I understood you correctly, you said you had a traffic of six or seven trains a day each way from Diamond Junction to Moncton?—A. Yes, on certain days.

Q. And on certain days it went up as high as 13?—A. Yes, but not in each direction; that was in both directions.

120007

Q. Is that enough traffic to carry the line?—A. I have submitted a statement showing $700,000 economy as against independent lines, and I would be quite willing to have any independent expert check those figures.

Q. I am not questioning the figures. I am asking if that is enough traffic to pay for operation of the line?—A. My statement is very definite to that effect.

Q. So that part of the Transcontinental is not a detriment to the Canadian National?—A. No sir. After maintaining the track and structures it produces about $46,000 in net economy plus, if you move that traffic to the I.C.R. or the C.P.R., the additional burden of track maintenance. You could not move that considerable volume of traffic off the Transcontinental onto either the C.P.R. or the I.C.R. without increasing the maintenance cost there. That has not been taken into consideration in the economy I have mentioned.

Q. I just wanted to know whether this part of the Transcontinental fell within the description of lines that I was discussing with your President this afternoon, thin traffic lines which are unprofitable and which have been wished on the Canadian National system by the country and are therefore an encumbrance to the Canadian National.—A. As an operating officer I would be very much disappointed if the Transcontinental line was taken away from us, because it is our real property.

Q. From an operating point of view it is not an encumbrance?—A. No sir, it is an asset.

Q. You would not call it a thin traffic line, would you?—A. I gave the figures there. The tons per mile of road daily are something around 4,000, and the average for the Canadian National system is around 1,600. So it cannot be very thin, on that basis.

*By Hon. Mr. Hugessen:*

Q. There is one question I wanted to ask you in connection with the Saint John River valley line. One of the Canadian Pacific witnesses—I cannot recall just which one—made a statement in reference to the movement of freight from Canadian National points east of Saint John, such as Moncton, for instance, to the United States, through McAdam Junction.—A. I think there was a misunderstanding there on the part of the Canadian Pacific representative who made that statement, because the traffic east of Moncton destined to points in the United States moves up to McGivney, and out that way, out through Fredericton, and the difference is I think about 23 miles. Of course if you route that traffic up the valley line, then it makes a substantial difference. But we do not handle it that way. We handle it by the Transcontinental to McGivney, across to Fredericton and to the United States.

W. A. KINGSLAND, Vice-President, Canadian National Railways, Central Region, appeared as a witness and took the stand.

*By Mr. Biggar:*

Q. Mr. Kingsland, I understand you are Vice-President of the Canadian National Railways, Central region?—A. Yes.

Q. And you are now to tell us particularly about the Beaverton-Capreol and Nakina line?—A. Yes sir. Speaking with reference to Exhibit 50, starting on page 427 of the record, in connection with items 24, 41 and 44, it will be seen that the scheme for abandonment calls for the elimination of the Canadian National main line from just west of Ottawa to Capreol, and from Beaverton, 64 miles north of Toronto, through Capreol to Long Lac, then jumping 30 miles to Nakina and abandoning the main line from Nakina to Paddington, just east of Winnipeg. Further, it is proposed to take up the Canadian National line from Superior Junction, just east of Sioux Lookout, to Conmee, 35 miles west of Port Arthur, a total abandonment of 1,570 miles of Canadian National main line, all of which is the very best in Canada as to grades and curvature. The

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

population served in the area referred to is approximately 55,000; and in 1937 the earnings in the territory amounted to $3,000,000. That is local earnings, in and out from the stations, not counting through business. The property investment, other than railway, is estimated at $24,000,000.

The section Ottawa to Capreol is a lumbering area, but 10 miles east of Capreol there are very important mining possibilities.

From Capreol west to Long Lac there are lumber, pulpwood and mining developments, and being in the mineral belt the area is under active investigation by the mining industry.

From Armstrong until the prairie lands are reached (approximately sixty miles east of Winnipeg) the Canadian National line runs through a territory which has seen probably the greatest mineral development during the past ten or fifteen years. At Collins west of Armstrong, the Chromium Mining and Smelting Company have been actively developing their property and have been shipping ore from this point.

Timber is being cut and marketed from Fees Mills on the N. T. R. about 100 miles east of Sioux Lookout and there are shipments of pulpwood from this area to the head of the Lakes and in the territory east of Sioux Lookout the line to Fort William runs through a heavily timbered country where the paper companies and other holders have large blocks of timber, which produce a heavy tonnage annually. In addition this line serves mining developments east of Sturgeon Lake.

At Savant Lake, 70 miles west of Armstrong, the winter road to the Pickle Crow Mine leaves the main line of the Canadian National Railway. This constitutes the short haul to the Pickle Crow mining area in the winter season, and in 1937 there were approximately 2,000 tons handled through this gateway to the various mines.

Sioux Lookout, which originally was only a railway terminal, has developed into a headquarters for the air service, radio service and the mining industry in this section, and as a result, the town has prospered through these sources and become a substantial community with the usual interests associated with the northern developments. It is the air base for the various air lines.

At Hudson, twelve miles west of Sioux Lookout, located on Lac Seul, is situated the base for the movement of freight into the Red Lake and Patricia areas by the transport companies. The water route from this point is approximately 110 miles and a heavy tonnage is handled by tug and scows during the season of open navigation and by tractor and sleighs during winter. The tonnage during 1937 from Hudson to Red Lake was:—

| | | |
|---|---|---|
| By air | 2,404 | tons |
| By tractor train on the ice during winter | 5,898 | " |
| By tug and barge during navigation | 16,789 | " |
| Total | 25,091 | |

This tonnage comprises mining machinery, mining supplies and tools, electrical equipment and similar commodities from eastern Canada, and meats and other supplies from the West. The tonnage through Hudson has more than doubled during the last two years, and on account of the activity in the Red Lake and Patricia districts, it will, undoubtedly, materially increase. The tonnage handled in 1937 indicates approximately the percentage that it is possible, or economically practicable, to move by air.

The waters tributary to the Canadian National Railway adjacent to this point serve a very large wooded area and the lumber mills located at Hudson and in that vicinity are shippers of forest products.

[Mr. W. A. Kingsland.]

At Minaki there are about two hundred summer cottages representing an investment of $300,000, and a similar number of cottages representing a corresponding investment in various lake resorts between McIntosh and Ophir, a distance of 80 miles, and there is no access other than via the Canadian National Railways in this territory.

The line from Elma, fifty miles east of Winnipeg to Winnipeg, runs through good agricultural territory which is well settled and increasing in agricultural production year by year.

To abandon this potentially rich and productive north country appears to me as an industrial impossibility and from a railroad viewpoint the proposal to abandon or degrade this Canadian National Transcontinental road shows a lack of understanding of the conditions. Here you have on one hand a line with fine gradients and curvatures and on the other hand a line of heavy grade and sharp curvatures. On the Canadian National line it is possible on the first section under consideration, i.e., Ottawa-Capreol, to handle 50 per cent more tonnage in either direction per locomotive than on the corresponding C.P. line Smith Falls-Sudbury, and on the second section, Capreol-Armstrong, a locomotive can handle 80 per cent more tonnage westward and 110 per cent more eastward than can be handled on the C. P. line Sudbury-Fort William. In regard to the C. P. line Fort William-Winnipeg and the corresponding C. N. line Armstrong-Winnipeg, the C. N. line westward can handle 65 per cent more tonnage per locomotive than the C. P. line. Eastward, however, the C. P. can handle approximately 20 per cent more out of Winnipeg per locomotive than can the C. N. on its Winnipeg-Sioux Lookout line. This involves primarily the grain movement to the Lakehead.

In the event the abandonment of the C.N. line is not accomplished, it is indicated in the C.P. Exhibit 70 (page 943) that it is proposed to degrade the line and operate tri-weekly mixed service. This in my judgment should not be contemplated. All these people and industries have gone into this territory, invested capital and labour on the natural assumption that they would continue to receive adequate rail service. However, if the line were to be degraded, in our opinion, a minimum of straight passenger train service six days per week in each direction would be required between Capreol and Winnipeg, in addition to such local freight service as would handle the local freight traffic, which would probably be, in off seasons, three times a week, increasing during the heavy shipping seasons, but such a service would seriously affect the marketing ability of industries in the territory in question.

The abandonments contemplated in the C.P. proposal if made effective, in my opinion would set this whole north country back many years, and would cause a financial loss to Canada of many millions of dollars per annum.

In my judgment the line should neither be abandoned nor degraded, but on the other hand, as we have an ideal situation, the line should gradually be built up to the highest possible standard so as to provide the fastest and best possible route between Eastern and Western Canada, not only for the advantage of Canada, but in the interest of national defence.

That is my story.

*By Right Hon. Mr. Meighen:*

Q. Mr. Kingsland, do you contend that the Transcontinental in your territory just described is no burden to the National Railways at all?—A. I don't say that, Senator. It is a burden, there is no question about that; but it is building up the country, and it runs through a rich territory. It runs through the best mining territory in northern Ontario and Quebec.

Q. It is a burden financially?—A. It is a burden, there is no doubt. It does not pay at the present time, but there is a future to this country that must not be overlooked.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Q. The whole road is paying worse as the years go on. You are making out that this part is gaining. What is the part that is losing?—A. I did not say it is gaining. I just gave the earnings in 1937.

Q. It is not gaining; it is going to gain?—A. It is gaining a little each year.

Q. What is the part that is losing, that keeps going behind?—A. There is no question of doubt about this part of the National Railway, the Transcontinental, is losing money, but it is a prospect.

Q. It is continually improving, but the whole road, taking five years at a time, is certainly not improving in its financial results.—A. You have to take into consideration the business conditions in the country; they are bad.

Q. But then last year we had pretty good conditions, and pretty bad results.—A. Last year on the Central Region we had a net of $11,000,000. In 1928 on the same region we had a net of $32,000,000.

*By Hon. Mr. Robinson:*

Q. A net?—A. Net operating.

*By Hon. Mr. Haig:*

Q. Last year your net was what?—A. On the Central Region $11,000,000.

Q. Profit?—A. Operating over revenue.

Q. And in 1928?—A. And in 1928 we had $32,000,000 net on that region.

Q. What about 1934?—A. I have not the figures. I was in Western Canada in 1928, and their net earnings in Western Canada were $16,800,000. That is the line that is no good!

*By Mr. Biggar:*

Q. It is apparent that we have too much mileage?—A. It looks so if you glance at that map.

Q. After all, what the committee is concerned with is how are we going to relieve the country of the burden. Do I understand that you say we must stand pat?—A. Yes.

Q. And wait for the draw?—A. That is my stand; draw another card.

Q. And if the pot gets too expensive in the meantime we just lose everything; is that it?—A. If those lines are abandoned your income from taxes is going to drop down more than the cost of carrying those lines.

Q. That is very serious?—A. It is.

Q. Do you mean the cost of carrying the line is going to mean more taxes in the future?—A. No. I say the loss you now receive in taxes will be greater than this line is costing you to carry.

*By the Chairman* (Hon. Mr. Beaubien):

Q. That would be the penalty of abandoning this line?—A. Yes.

*By Mr. Biggar:*

Q. Would it be the penalty of abandoning any line?—A. It depends upon the line.

Q. In this piece?—A. There are some lines can be abandoned with profit.

Q. In this case?—A. I would not take the Transcontinental line. You might take a section here or there, but to take up all the Transcontinental line would be a mistake.

Q. Will you give us a constructive suggestion of how we are going to relieve ourselves of this burden?—A. I cannot tell you how to do that.

Q. Are we just to go on and pay $50,000,000 a year?—A. We hope that $50,000,000 will become $40,000,000, then $30,000,000, then $20,000,000, and so on.

*By Hon. Mr. McRae:*

Q. Mr. Kingsland, you spoke about building up the grade of the road. That is a thin section one that does not pay. Would it not be possible to reduce the expenditure there and operate that section a little more economically under these adverse circumstances in the hope of gradually building it up until it will some day be paying?—A. My idea is if there is unification you should carry your tonnage on the line that can take the most per locomotive.

*By Hon. Mr. Haig:*

Q. Is not that your line?—A. Sure.

*By Hon. Mr. McRae:*

Q. I did not have unification in mind. I had your idea of building up the road. In view of the thin traffic, could you not operate those roads a little more economically?—A. That is our main job all the time, to watch the dollars. I heard someone ask a question here if it was possible on the Canadian National to lay off men without being called down. On May 19 1 laid off 1,235 men, and I have not heard anything about it from Parliament or from anywhere else.

*By Mr. Haig:*

Q. If the roads were unified and you were manager of this Central Region, could not your line from Capreol to Winnipeg via Long Lac and Nakina handle all the traffic that goes over that line and the C.P.R.?—A. I would handle all the freight traffic over the low grade line, and some of the passenger traffic.

Q. Could the C.P.R. handle all the passenger traffic?—A. Well, they say they can. Perhaps they can. I should not like to answer that question.

Q. You would handle all the freight traffic?—A. I think we could without any trouble as far as Winnipeg. I do not mean any grain traffic.

Q. I am not asking you that.

*By Mr. Biggar:*

Q. Even apart from abandonment, you have no suggestion of how to save money?—A. No. We are doing that every day of the week. That is our job. That is why I am grey-headed.

*By Hon. Mr. Coté:*

Q. What did you mean about the loss of taxes?—A. If you tear up this line, there are 55,000 people there who will have to get out, and you will get no taxes from that part of the country. They are paying taxes now.

A. E. Warren, Vice-President, C.N.R. Western Lines, was called as a witness and took the stand.

*By Mr. Biggar:*

Q. Mr. Warren, you are the Vice-President for the Western region of the Canadian National?—A. Yes, sir.

Q. And your region extends from where to the Pacific?—A. From the head of the lakes, Duluth and Armstrong, to the Pacific coast.

Q. You were going to speak about the Kamloops-Vancouver section, were you not?—A. Yes, sir, and also the matter of the British Columbia steamships and the tug and barge services.

Q. Have you a memorandum to present to the committee?—A. I will file this memorandum after I read it.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120012

Q. You are going to file the memorandum, or are you going to read it?—A. I am going to read it now. I am first going to deal with the general conditions of degrading, unification, and so on.

Statements made by the Canadian Pacific officers were to the effect that in addition to certain line abandonments, other lines would be degraded, and it would appear that the suggestion is that the Canadian Pacific main line would be used for through traffic between the East and the West, the Canadian National main line to be degraded to secondary line standard where it is not altogether abandoned.

If, as inferred, the line west of Winnipeg were to be degraded, such action would immediately affect the valuation of properties at all points, including such cities as Saskatoon, Prince Albert, North Battleford and Edmonton, as the service would have to be of a lower standard on account of track conditions, etc. The Canadian National main line serves what may be termed the garden of the West and undoubtedly further development in Western Canada will be largely to the north. Should the alternative be considered and the Canadian Pacific main line degraded, other large cities such as Brandon, Regina and Calgary would be similarly affected. It is, therefore, an absolute necessity that both main lines be maintained at a standard permitting of present service being continued.

The Canadian Pacific maintains considerable double track west of the Lakehead, and according to standard engineering formula the second main track costs for maintenance 80 per cent of the cost of the first track. Even if this figure were reduced to 50 per cent, would it not be more advisable to consider the abandonment of large portions of the second main track, thus effecting a greater saving in maintenance than could be obtained by degrading the Canadian National line, and at the same time permitting the large cities on both lines to be given the same service as at present without in any way affecting the valuation of properties? Such a saving is not predicated on any system of co-operation or unification.

With regard to the lines through the mountain territory. While a statement was made before this committee that over a period of years a great many more Canadian National trains had been detoured over Canadian Pacific tracks than Canadian Pacific trains over the Canadian National west of Kamloops, in discussing this question it is considered that the entire mountain territory should be taken into account. The statement we have had prepared shows that from 1929 to date, 126 C.N.R. trains were detoured over various sections of the Canadian Pacific through the mountains while 82 C.P.R. trains were detoured via the C.N.R. This covers the territory west of Edmonton and Calgary. In 1929, 46 C.P.R. trains were handled Edmonton to Kamloops over the C.N.R., in addition to 1,384 revenue loads turned over to the C.N.R. by the C.P.R. for handling between the same points. These revenue loads, based on a figure of 60 cars to a train—which was the average train handled under the weather conditions prevailing at the time, and which would be high, it was winter—would increase the Canadian Pacific detours by another 23 trains. Mention was also made of the fact that the Canadian Pacific have an alternative route, but during the period mentioned in 1929, after the detour arrangement was first put into effect, it was cancelled by the C.P.R. and they endeavoured to handle their traffic via their alternative route. The success of the route can be judged by the fact that after two or three days arrangements were again made to detour all trains over the C.N.R.

Committees are now making a further study to see whether it would be possible to reduce costs of operation by jointly using any sections of either line west of Kamloops, eliminating or degrading the line on one or the other side of the river. The experiences of 1935, however, when both transcontinental lines were tied up, indicate that the most careful thought would have to be

120013

given to the matter before any section of either line could be abandoned, and further, I believe it is an admitted fact that when we have another big crop in Western Canada and there is a large movement to Pacific coast points, it would be an impossibility to handle the traffic properly with one line unless it were double-tracked. It might be mentioned here that when both systems were blocked by slides and washouts early in 1935 the so-called alternative route was also closed, and as a matter of fact it is usually closed up for some time every winter.

Boston Bar is the Canadian National terminal opposite North Bend on the Canadian Pacific, and the main line of the Canadian National between that point and Vancouver serves the Chilliwack valley. A portion of this line—Hope to Sumas (the latter point approximately 37 miles west of Hope) is covered by an agreement with the V. V. & E. Railway and Navigation Company (the Great Northern Railway) under which they have joint and equal use of all tracks and facilities, for which we receive an annual rental of $42,500, although the Great Northern are not at present using the line. This line between Boston Bar and Port Mann serves a population of approximately 26,000 people. If this line were abandoned to Port Mann, as has been suggested, it would leave several communities without any proper railroad service. Some of the more important points that would be affected would be Chilliwack, Port Mann (the terminus of the car barge service to Vancouver Island), as well, of course, as the city of New Westminster, which would be served by a spur line.

Chilliwack, as an illustration, has a population of about 2,500, with another 6,000 people in the district immediately surrounding it. If the C.N.R. rails were taken up, carload traffic loaded at Chilliwack on the B.C. Electric Railway would require to move from Chilliwack to Abbotsford on the B.C. Electric, thence via the Canadian Pacific to Mission, where connection is made with the C.P.R. main line. The distance from Chilliwack to Hope via the C.N.R. is 31·6 miles and via the suggested route this would be increased to 79 miles. Similarly, from Chilliwack to Vancouver via the C.N.R. is 59·9 miles, while via Abbotsford, Mission and the C.P.R. it would be 72·7 miles; via the B.C. Electric direct to Vancouver it is 76·3 miles. The distance from Chilliwack to Agassiz, on the main line of the C.P.R., via highway from Chilliwack to east of Rosedale, and thence by ferry to Agassiz, is 12 miles. This presumably would be the route for L.C.L. traffic and passengers and express eastbound. Earnings at Chilliwack station for 12 months ending April 30, 1938, were approximately $73,000, which does not include over 1,200 carloads of lumber, fruit, canned goods, etc., received from connections at that point.

Port Mann, as stated, is the terminus of the car barge service to Vancouver Island, which service is dealt with in another memorandum. All C.N.R. freight traffic to and from the Island is handled through this point in a much more efficient and economical manner than possible through Vancouver.

There is also the Fraser River elevator to be served and, as mentioned, the city of New Westminster.

Between New Westminster and Vancouver there is a joint section agreement with the Great Northern Railway, and at Vancouver the Canadian National (Canadian Northern Pacific) is required under its agreement with the city, to maintain its station, etc.

The Canadian Pacific proposal calls for a reduction in supervisory operating forces by two regional offices, ten district offices and twenty-three divisional offices. The present system of operation on the Canadian National and Canadian Pacific as a whole are practically identical. The operating supervisory staffs on the Western region of the Canadian National are much less than on the Canadian Pacific. There are, for instance, on the Canadian

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120014

National Western region 9 line superintendents and 2 terminal superintendents as against 15 line superintendents and 2 terminal superintendents on the C.P.R.; and 17 assistant superintendents on the C.N.R. as against 26 on the C.P.R., with total mileage approximately the same. The average mileage for the Canadian National line superintendents on the Western region is 1,103, and it would be an impossibility to have proper supervision if any scheme of joint operation were put into effect that required an increase in this mileage.

Since 1930 the operating supervisory staff on the Canadian National Western region has been reduced by 11 officers, including 4 divisional superintendents and 4 assistant superintendents, while reductions have also been made in despatching staffs, mechanical and engineering supervisory forces, bringing the total reductions to 71 official and supervisory positions with a saving of $295,600 annually. Coupled with reduction in basic rates of officers remaining, total savings of $391,152 per annum have been effected.

*By Hon. Mr. Coté:*

Q. When was that done?—A. Since 1930. It has been progressive. With these reductions in supervisory forces, there were also reductions in the divisional staffs.

Now, I shall go on with the steamships?

*By Mr. Biggar:*

Q. Can we deal with this one separately?—A. Yes, sir.

Q. I suppose that if the traffic rose to the 1930 level these 71 officers who have been let out since 1930 would have to be re-appointed, and the $391,000 of savings— —A. No, sir. There would have to be some appointed. I mean to say you all learn by experience. You find you can get along without something if you haven't got it.

Q. That is exactly what the Canadian Pacific is suggesting, that you could get along without something when you have to. How much of the $391,000 would you have to spend again if the traffic was restored?—A. As near as I could figure out, there would be about two division superintending offices. That would be the outside. That would be somewhere around a total of $25,000 to $35,00 a year.

Q. Out of the $391,000?—A. That is all I would put on.

Q. Does that mean that in 1930 you were spending $360,000 more than was necessary?—A. No, pardon me. This is with a reduction in the basic rates of officers also included. You know, all the higher officers had a deduction of about 20 to 25 per cent downwards.

Q. I just want to get the facts.—A. That would be $295,000—well, $391,000, together with the deduction.

Q. I was asking you how much you would have to increase the present to get that to the 1930 traffic level, and I gather you said $30,000?—A. Just a minute. It is $30,000 to $35,000 a division office.

Q. Do you mean you were spending $360,000 more than was necessary in 1930?—A. No. A lot of those other officers were officers whose positions we have now abolished and consolidated.

Q. I gathered from what Mr. Hungerford said that the art of railroading has been advancing, but I do not suppose he was intending to suggest that it had advanced so much that $35,000 would cover the ground that some $300,000 would have been required for a few years ago?—A. No. Our organization is such that we would have to reinstate two division offices. Each office would cost us about $35,000.

Q. Or $70,000 all together?—A. Yes.

Q. So that the difference is really about $320,000?—A. Yes.

120015

*By Hon. Mr. Haig:*

Q. But that $320,000 is with the reduction in salaries too?—A. Yes.

*By Hon. Mr. Moraud:*

Q. There was a general revision in 1932?—A. Yes.

*By Mr. Biggar:*

Q. How much difference does that make?—A. There was a reduction of the basic rates of the higher officers, of anywhere from 25 per cent down.

*By Hon. Mr. Moraud:*

Q. You will not need those officers again, those officers whose positions were abolished?—A. No, we do not intend to replace all of them.

Q. You had some very expensive officers in Vancouver, for instance, that you will not need again, no matter what the traffic is?

Hon. Mr. HAIG: Senator Moraud must have been a Director of this road.

Hon. Mr. MORAUD: I was, yes.

*By Mr. Biggar:*

Q. Can you tell us how we can save some money, not how we must spend it?—A. Well, the unfortunate position in that territory is, that we have been poverty stricken for a couple of years. But there seems to be a bright light out there now. If we could get an average crop of, say, 400,000,000 bushels, or if we got a bumper crop of 500,000,000 bushels, of course the picture would change immediately. Our crop movement this year—we always base it from August 1, and this is right up to the end of May—this year we handled 42,167 cars of grain as against 60,899 last year. And last year was a bad year. We have handled up to 124,000 and 125,000. Then, take the grain going to Vancouver. In 1928 we had 31,579 cars. That was pretty nearly as many as we handled to every place this year. And this year to Vancouver we handled 3,301 cars.

Q. You have no suggestion, except to wait and see?—A. Well, we are not waiting and seeing; we are trying to cut out every dollar we can right now, that is consistent with safety.

*By Hon. Mr. Black:*

Q. Is there any duplication of line in your territory that you think could be eliminated?—A. We are making a study of several lines and we made a recommendation for the elimination of some lines, but not as to any big mileage. There are some studies on the way all the time. We have got committees studying that now, and we have some final reports in, with regard to this, between both companies; that is, we have agreed on them.

*By Mr. Biggar:*

Q. Now, will you go on with the steamship operation?—A. This is in connection with the operation of the British Columbia coastal services. Captain McMurray estimates an annual saving of $400,000 by unification of B.C. coastal services—see page 970 of No. 18 of the record—made up as follows:—

| | |
|---|---|
| 1. Elimination of two Alaska vessels | $100,000 |
| 2. Purchase of two new vessels for $3,000,000— | |
| Interest at 4 per cent | 120,000 |
| Depreciation at 3 per cent | 90,000 |
| 3. Consolidation of Car Barge Service | 97,000 |
| | $407,000 |

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120016

In the years 1936 and 1937 the passengers carried, (one-way), in the Alaska summer season service were as follows:—

| Canadian National— | 1936 | 1937 |
|---|---|---|
| Skagway passengers | 3,184 | 3,733 |
| Other Alaska ports | 352 | 272 |
| Local B.C. passengers | 767 | 600 |
| Total | 4,253 | 4,605 |
| **Canadian Pacific—** | **1936** | **1937** |
| Skagway passengers (actual as furnished by C.P.R.) | 2,946 | 3,161 |
| xOther Alaska ports | 350 | 250 |
| xLocal B.C. passengers | 700 | 500 |
| Total | 3,996 | 3,911 |
| xEstimated in same proportion as Canadian National Total C.N. and C.P. | 8,249 | 8,516 |

These figures exceed for 1937 the total first-class carrying capacity of all Alaska ships of both C.N.R. and C.P.R. which is accounted for by local passengers not requiring berthing accommodation.

Q. I am sorry, I did not follow that. Were you merely remarking that the number of passengers that you have put down is in excess of the berth accommodation of the boats?—A. Yes, because we have taken in the deck passengers.

The capacity of the Alaska ships of both Companies is as follows:—

| Canadian National | Alaska trips | Capacity 1st class | Total passengers |
|---|---|---|---|
| *Prince Robert* | 6 | 319 | 1,914 |
| *Prince Rupert* and *Prince George* | 11 | 206 | 2,266 |
| Canadian National capacity for season | | | 4,180 |
| Canadian Pacific (corresponding period) | | | |
| *Princess Louise* | 7 | 210 | 1,470 |
| *Princess Charlotte* | 7 | 228 | 1,596 |
| *Princess Alice* | 5 | 196 | 980 |
| Canadian Pacific capacity for season | | | 4,046 |
| Combined capacity both companies for season | | | 8,226 |

It is obvious that the 1937 or 1936 Alaska passengers could not have been handled by less than the entire six number of ships operated. Captain McMurray's saving of $100,000 is predicated on reducing the Alaska ships from six to four.

In view of the increased efforts of the United States Government to develop the domestic tourist industry—which includes Alaska—through a special Bureau recently organized, and by large advertising expenditures, the growth of tourist business to this section (Alaska) will continue.

*Item 2:*

With reference to the statement of Captain McMurray that two new ships may be required in the next five years, entailing an annual expense of $210,000, it is our opinion Canadian National are well equipped to handle the Alaska business without the purchase of any new ships in the immediate future.

*Item 3:*

Consolidation of Car Barge Service. This will be dealt with toward the close of this submission.

With reference to Captain McMurray's statement—page 967 of No. 18 of the Record—that until 1930 Canadian National had never operated on that (Alaska) route, but in that year brought out another new vessel to the coast and placed it in the Alaska service and they also extended the operations of their Vancouver-Prince Rupert steamers to Alaska.

[Mr. A. E. Warren.]

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

120017

The Canadian National have continuously operated an Alaska service from Vancouver to Skagway during the summer season since 1925, and previous to that the Grand Trunk Pacific also operated between Vancouver and Skagway during the summer season—years 1916, 1917 and 1918—so that the present service could not in any sense be considered a new service or extra services put on in 1930 by Canadian National as stated by Captain McMurray.

Contrary to the opinion expressed by Captain McMurray—page 969 of No. 18 of the record—that 1929 was the year of peak traffic for Alaska business, we submit from our experience that 1936 and 1937 were in excess of 1929 by 28·4 per cent and 37·8 per cent respectively.

On page 970 of No. 18 of the record the question is asked by the Hon. Mr. Cote, "I would like to ask the witness a question. I am curious to know if you have any figures as to the number of passengers carried by the six ships, three Canadian National and three Canadian Pacific to Alaska." Captain McMurray replies, "No, I haven't the figures of the passengers carried. The calculation is all made on the assumption that the original three ships on the Alaska service would carry all the passengers offering We know that they carried all the passengers offering in 1929 which was the peak year, and still had a margin to spare; therefore we assume they could have carried them all in the years when these other ships were operating."

We would again state that the Canadian National did operate an Alaska service in 1929 (13 trips operating to capacity) and in our opinion this business could not have been handled by the Canadian Pacific in addition to their own business with their three ships operating to Alaska that year.

Captain McMurray's statement on page 966 of No. 18 of the record that the Canadian National inaugurated a new service in 1930 between Vancouver, Victoria and Seattle is rather misleading, as from 1910 to 1923 a twice-weekly service in summer, and a weekly service in winter was operated by the Grand Trunk Pacific Coast Steamship Company (now the Canadian National Steamships) between these ports. This service was resumed on a daily basis in 1930 and withdrawn in September 1931.

*By Right Hon. Mr. Meighen:*

Q. What was the period when it operated first?—A. From 1910.

Q. Until when?—A. Until 1923.

Q. And then it was started again when?—A. What happened was this. We used our own boats out of Seattle. We have a dock there. It was decided that the business between Seattle and Vancouver, by reason of the Jones law coming into effect, whereby we could not do any intercoastal business, would have to be abandoned, and we decided to pull out of Seattle and rent our dock. But when Sir Henry Thornton was on the road he resumed the service between Vancouver, Victoria and Seattle. Then we found in 1931 it was not really justified and we discontinued it, gave it up to the Canadian Pacific.

In justifying our being in the Alaska business, I would point out that Canadian National Railways obtain a very substantial revenue from these Alaska passengers who use our rail line on long haul, one-way and round trip. Likewise they contributed largely to the revenues of our hotels and summer resorts.

This Alaska business cannot be considered as a competitive business, but is primarily a developed tourist business that has particular appeal to Americans from a tourist standpoint. Our experience shows that it has substantially increased our steamsip earnings, rail earnings, and other revenues.

We submit that if service to Alaska were curtailed in any way, and confined to four ships, as suggested by Captain McMurray, a substantial portion of this tourist business, now handled by the two Canadian lines, due to capacity operations, would either not move or would divert to United States steamship lines.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120018

*By Hon. Mr. Gordon:*

Q. What would be your operating profit on those lines?—A. The operating profit on the Alaska business, I might say, is the only thing that keeps the darn thing alive.

Q. What would it be?—A. The net last year was not very much; it amounted to from $45,000 to $50,000; but in the summer we come up to $100,000 or $125,000.

Q. Do you take into account depreciation?—A. I think you will have to ask the Comptroller that. I do not handle the figures except to get the statement.

*By Mr. Biggar:*

Q. Mr. Warren, in regard to that, Captain McMurray tells me that perhaps there is a misunderstanding when you are talking about the ships of both companies running to capacity. You are then referring to how many trips?—A. I am referring to the Alaska season.

Q. But to how many trips?—A. We make 17 trips to Alaska in the summer.

*By Hon. Mr. Horsey:*

Q. In what time?—A. Around ten and a half days and others around eight and a half days.

*By Mr. Biggar:*

Q. Between what dates?—A. It generally starts about the middle of June and extends to September.

Q. What is the layover at each end?—A. They lay over at Skagway to let passengers go up, I think a day and a half. They lay over for passengers to go to White Pass and the Yukon and up to Atlin Lake down to Dawson City. Then when they come to Vancouver they put on short excursion runs.

Q. What is the layover between the arrival in Vancouver southbound and the departure to Alaska northbound?—A. Generally as a matter of fact only sufficient for servicing.

Q. I thought you said there were short excursion runs.—A. I said they go on excursion trips.

Q. I was speaking of the Alaska trip. What is the interval between the arrival southbound and the departure northbound?—A. Sometimes a day and a half, sometimes three days, sometimes maybe a little more.

Q. Is that when they go on excursions?—A. Yes.

Q. On that basis, I suppose, the number of trips could be increased from nineteen to about twenty-five in the interval you speak of?—A. Yes, about seven of those excursions.

Q. Captain McMurray tells me that the result of the operation of the Canadian National ships has been that the Canadian Pacific ships have not been making as many trips as they made in 1928 and 1929.—A. I do not know. I did not take in their side trips. I was taking in the purely Alaska trips.

Q. Captain McMurray tells me his estimate of being able to do without two ships was based upon using the ships now operated by the Canadian National, they being larger, and operating them continuously on that route. In those circumstances there would be more capacity on that route than anything there has ever been before?—A. We did not read it that way.

Q. Is not that the fact?—A. I don't know.

Q. You have not calculated?—A. I don't know what the Canadian Pacific can do.

120019

Q. Is not that a little unfair, Mr. Warren?—A. Which?

Q. You came——A. On that Alaska business we interchanged the information.

Q. You came here to criticize the suggestion that two ships could be relieved, and you tell me now you have not calculated whether the two ships can be relieved or not.—A. You could not relieve two ships on the statement of the Alaska business right here.

Q. No. But on the possibility of the situation have you considered that?—A. No. I was figuring exactly on the Alaska business.

Q. I do not want you to say anything that is not exactly right, but have you considered the possibility on a proper rearrangement of the steamships on the Alaska route doing without two ships that now engage in that traffic?—A. Is this on the Alaska route or on the Alaska tourist business?

Q. I do not know that there is any difference.—A. They run a regular boat to Alaska; we do not. If it is on the tourist business, according to these figures it could not be done during that time of the tourist movement.

Q. You are quite sure it could not be done?—A. I don't think two less boats could do it.

Q. No matter how continuously the ships were on that business?—A. That is only, of course, an opinion.

Q. You have not worked it out?—A. No, I have not worked it out.

Q. There is no use my pressing it then.

Hon. Mr. McRae: I think I can give you some information on that, Colonel Biggar, for I am thoroughly familiar with the position. What Mr. Warren says is true. The Alaska business in growing, and the travel to Alaska in the tourist season is limited entirely to the capacity of the ships. If you want a berth in the tourist season you have to engage it three or four months ahead.

Hon. Mr. Black: Could not the ships make more trips?

Hon. Mr. McRae: I think they are making them as fast as they can. On a trip like that a ship must lay over at Vancouver for servicing. I think the services are just as good as they can get out of the ships.

*By Mr. Biggar:*

Q. Captain McMurray tells me, Mr. Warren, there is an arrangement each year between the two companies as to how many trips they will make.

Hon. Mr. McRae: That is probably the trouble.

Mr. Biggar: They keep them full by cutting down the trips. I do not know that we can get any further on that.

*By Mr. Biggar:*

Q. What happened to those ships on the Alaska route running those excursions?—A. Tied up; that is, the big boat *Robert*. The *George* and the *Rupert* run on the regular trip as far as Stewart. In winter we only operate one boat on that run and one boat once every two weeks on the Charlotte Island run.

Q. Is the big boat tied up altogether?—A. It is tied up.

Q. Have you anything more, Mr. Warren?—A. I have the car barge matter. Captain McMurray, on page 968 of No. 18 of the Record, states,—

> The Canadian National Car Barge Terminal is at Port Mann, up the Fraser River a little above New Westminster. This service starts from there and goes over to Victoria and other points on the Island. The Canadian Pacific Car Barge Terminal is in Vancouver Harbour. It was assumed that under unification these two barge services would be consolidated and the barges routed through Vancouver. This would give an

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120020

annual saving of $104,000 with the elimination of the extra service and the elimination of one barge fleet. A further consolidation of staffs which could have been made under unification would have made a saving of $18,000.

and on page 969:—

The consolidation of the Barge Service would provide another $97,000.

and on page 968:—

It was also estimated that further savings would be effected by the consolidation of Car Barge Services between the mainland and Vancouver Island.

With reference to the proposed elimination of the Canadian National Ferry slip at Port Mann. This slip is located immediately alongside the freight train terminal at Port Mann, through which is handled all Canadian National traffic to and from the coast; cars can, therefore, be moved from car barge to train and vice versa with the minimum of expense.

The proposal contemplates and is based on the delivery of all Canadian National Island traffic at the Canadian Pacific Railway ferry slip in Vancouver Harbour for furtherance by barge.

The rail mileage involved between Port Mann and the C.P.R. ferry slips in Vancouver Harbour is 18·64 miles, necessitating an additional rail haul of 37·28 miles, going and returning, per car moved.

On basis of the 14,755 Vancouver Island cars handled in and out of Port Mann in 1930 this additional rail haul would have meant an additional car mileage of 275,181 miles.

Captain McMurray apparently has not taken this additional rail expense into consideration in his calculations.

On page 969 of No. 18 of the Record, Captain McMurray states, "A further consolidation of staffs which could have been made under unification would have made a saving of $18,000."

The staff employed in this service by the Canadian National Railways consists of one supervisor of barge and ferry service, and one clerk, whose duties also cover and include the barge and ferry service on Okanagan Lake.

The entire staff expense does not exceed one-third of the estimated saving.

On page 968 of No. 18 of the Record, Captain McMurray states:—

This would give an annual saving of $104,000 with the elimination of the extra service, and the elimination of one barge fleet.

The Canadian National tug and barge equipment to handle business to and from Vancouver Island consists of two tugs and two barges, the latter 15-car capacty each. The steamship Canora car ferry (18 car capacity) is a stand-by unit, available for service, and put into service when traffic conditions warrant.

The Canadian Pacific service provides for movement of cars between the mainland and James Island, Nanoose, Comos and Ladysmith, where connection is made with the Esquimalt and Nanaimo Railway (Canadian Pacific). Cars for Victoria and points served by rail are moved from Ladysmith by rail to destination.

The Canadian National service provides for movement of cars between the mainland and James Island, Ogden Point, Point Ellis, Cowichan Bay, Bamberton, Chemanus and Nanaimo. The Canadian National equipment, in addition to transfer of cars between the mainland and the Island is also required to handle cars of export lumber to Ogden Point dock at Victoria from Island points, and other traffic between Island points. Ogden Point has no rail connection and is only served by Canadian National tugs and barges.

[Mr. A. E. Warren.]

 120021 

The carload export lumber handled by the Canadian National Railways at Ogden Point dock since 1930 is as follows:—

| Year | Number of Loaded Cars | Feet B. M. |
|---|---|---|
| 1930 | — | — |
| 1931 | 316 | 8,500,000 |
| 1932 | 420 | 11,000,000 |
| 1933 | 1,406 | 58,500,000 |
| 1934 | 2,892 | 67,500,000 |
| 1935 | 2,165 | 52,500,000 |
| 1936 | 2,128 | 50,000,000 |
| 1937 | 964 | 23,000,000 |

Average for seven years 1,470 cars per year, or 2,940 loads and empties in and out of Ogden Point, and in the peak year of 1934, 3,784 loads and empties in and out of Ogden Point. This traffic is in addition to the movement of cars between Port Mann and Island points. The total cars moved by barge and ferry service in and out of Port Mann were as follows:—

1930—14,755 cars, or an average of 7,377 each way.

1937—9,858 cars, or an average of 4,929 each way.

The capacity of the Canadian National tugs and barges out of Port Mann is 600 cars per month. The average one-way movement for the year 1930 was 615 cars per month—there must have been some overtime—and for the year 1937, 416 cars per month, or 70 per cent of tug and barge capacity.

However, the service arranged cannot be based on yearly or monthly averages, and the daily fluctuations are such as to require the reasonable provision of car capacity to take care of such fluctuations.

The situation of the industries and the communities on Vancouver Island must be considered in the light of the physical conditions as they exist. The industries, due to location, are somewhat handicapped in their realtion to markets as compared with similar industries located on the mainland. The communities must receive and ship those similar products, many of a perishable character, which are produced or required by similar communities located on the mainland.

Owing to the failure of the Canadian Pacific Railway to disclose the details of traffic handled by them, we have had to assume that the Canadian Pacific carload traffic to and from Vancouver Island is at least comparable with that of the Canadian National Railways, possibly greater. The proposal contemplates the elimination of one barge fleet, as stated by Captain McMurray at page 986.

It is apparent that this cannot be done, and that in addition the Canadian National tug and barge service provides the most economical transportation by not requiring the somewhat expensive rail haul between Port Mann and Vancouver waterfront, and on the Esquimalt and Nanaimo Railway from Ladysmith to Victoria.

*By Mr. Biggar:*

Q. Have you made any study of what saving could be effected in connection with these barges by unification?—A. It would all depend, sir, if it was unification of the whole system, or just of the barges. If it is unification of barges, there would be nothing in it. It would cost more than would be saved.

Q. But on the other basis?—A. I do not believe that Captain McMurray can do away wtih two barges, but I believe that at times it might be possible to dispense with one.

Q. Have you made any study on the basis of unification of the two systems?—A. I have come to a conclusion.

Q. Have you made any study?—A. No, I have not.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120022

*By Hon. Mr. McRae:*

Q. You have no harbour dues at Port Mann, have you?—A. No, sir. That is another thing. I forgot that.

Now, I want to add that in March, 1933, the Canadian National and Canadian Pacific Railways appointed a joint committee to consider all economies possible in operations of the several coastal services under either—(1) amalgamation of fleets, or (2) elimination of duplicate services through co-operation. The committee consisted of Thomas Louden, Acting General Superintendent, and G. A. McNicholl, General Passenger Agent, for the Canadian National, and C. D. Neroutsos, Manager of Coastal Services, and N. R. DesBrisay, Assistant Passenger Traffic Manager, for the Canadian Pacific. The findings of this committee were that no further economies would be effected by adopting either of the proposals, and I wish to file with you a copy of this report.

*By Hon. Mr. Hugessen:*

Q. A joint report?—A. Yes, sir.

*By Mr. Biggar:*

Q. That is the report of the joint committee with regard to the savings possible in connection with— —A. Amalgamation or co-operation.

Q. In connection with the water service on the Pacific coast?—A. Yes. It more particularly refers to the steamers.

*By Right Hon. Mr. Meighen:*

Q. Do you say it covers amalgamation as well as co-operation?—A. Yes. sir. The idea was—

*By Mr. Biggar:*

Q. Just co-operation as far as the water services are concerned, but not of the two systems.—A. The idea was that if we could put them all together and form a separate company, and let them go at that.

Hon. Mr. SINCLAIR: Mr. Biggar, you got from the manager of the Atlantic region and the manager of the Central region statements of their net operating revenues or, maybe, losses. I think you should get a similar statement from Mr. Warren in regard to the Western region.

The WITNESS: I can tell you this, that last year, on account of the crop failure, we just managed to get out of the red. We were so close to going into the red that we just escaped it.

*By Hon. Mr. Sinclair:*

Q. Can you give us a comparative statement of the peak year of 1928, and where you stood that year?—A. Yes. In 1928 the business was $96,346,505.95, and the expenses $79,996,062.20, leaving a net of $15,350,453.75. That is just operating.

*By Hon. Mr. Dandurand:*

Q. I did not hear a word of that last statement. Would you mind repeating it?—A. The total operating earnings, sir, were $15,350,453.75 in 1928. Last year the total was $110,000.

*By Hon. Mr. Black:*

Q. That would be receipts over operating costs?—A. Yes, sir.

120023

*By Hon. Mr. Sinclair:*

Q. Can you file a statement to this effect? What would be your net operating revenue for last year with the economies you have put in force during the past number of years, if you had the tonnage on the Prairie Provinces that you had in 1928?—A. I think I could work out something, sir. You see, we had a decrease last year in gross business of over $29,000,000 over 1928.

Q. And your economy of operating costs as compared— —A. Our costs are down. I will work out the statement.

*By Right Hon. Mr. Meighen:*

Q. They would go back if you had a crop?—A. If we had a 400 million crop, it would mean $25,000,000 and more.

The committee adjourned until to-morrow at 11 a.m.

CANADIAN PACIFIC RAILWAY COMPANY,
MONTREAL, JUNE 11, 1938.

**A proportion of the total amount shown on this line is distributable under columns marked "**". Such proportion, however, is not determinable because in compiling the estimate the Canadian Pacific determined the expenses for maintaining and operating the unified property and not the reduction for the individual factors of economies which were foreseen.

EXHIBIT No. 84

Copy of lease from Montreal Telegraph Company to Great North Western Telegraph Company.

THESE ARTICLES OF AGREEMENT, made this seventeenth day of August, A.D. 1881, by and between the MONTREAL TELEGRAPH COMPANY, hereinafter called the Company, a body corporate and politic, duly incorporated under the law of the Dominion of Canada having its chief place of business at the City of Montreal, represented for the purpose hereof by the President and Secretary thereof; And the GREAT NORTH WESTERN TELEGRAPH COMPANY, hereinafter called the Contractors, a body politic and corporate, duly incorporated by Statute of the Dominion of Canada, represented for the purposes hereof by the President and Secretary thereof; and the WESTERN UNION TELEGRAPH COMPANY, a body corporate, duly incorporated under the Laws of the State of New York, hereinafter called the Guarantors, parties of the third part, herein represented and acting by the President and Secretary thereof, duly authorized by the said company according to the Constitutions and By-Laws thereof, and according to the Laws of the said State of New York, Witness,

Whereas, the Company owns and operates lines of telegraph in the Dominion of Canada, and in the United States, and the Contractors own and operate a line of telegraph in the Province of Manitoba, and the Guarantors hold and operate the line of telegraph within the said Dominion of Canada, heretofore known as the line of the Dominion Telegraph Company.

And Whereas, for the purpose of terminating unnecessary expenditure, and of combining the advantages of the said several systems of telegraph, the said Contractors are willing, and have agreed, to undertake the working of the line of the Company, at a fixed rate of remuneration, upon the terms and conditions hereinafter provided, which offer the Company has accepted, and has approved the terms and conditions thereof, as contained in the present articles of agreement, by a resolution of the shareholders of the said Company, at a special general meeting thereof, duly called and held at Montreal on the 17th day of August, 1881, for the purpose of considering a proposal for the working of the lines of the Company, for an annual guaranteed dividend of Eight per cent, upon the capital stock of the Company of two millions of dollars and upon other conditions, a copy of which resolution is hereunto annexed.

Now, therefore, these presents witness that the parties hereto have covenanted and agreed as follows:

1. The Contractors undertake, for a period of ninety-seven years from and after the first day of July, 1881, to work, manage and operate the system of Telegraph, owned and heretofore operated by the Company by means of its own employees, and operators, and conduct the business thereof in all respects as efficiently as the Company has hitherto operated the same, collecting in the name of the Company such rates and charges for messages as the said Company shall establish from time to time, with all other the earnings of the said Telegraph system and lines, and all and every part thereof in such manner as to perform to the fullest extent all the obligations of the said Company towards the public.

2. From and after the said last mentioned day, the Contractors will, during the continuance of this agreement, maintain the said Telegraph lines in as good

condition and with equal efficiency for business, as the same now are. And to assist in the management and maintenance of the said line of Telegraph, it is hereby agreed that the Company shall deliver over to the Contractors, forthwith, all such materials and stock in hand as shall then be in its possession for the purpose of its ordinary current business; in which, however, shall not be included any stock of wire or other material which it has acquired for the purpose of building new lines, and which now remains in store and has not been issued for current use, which latter class of material the Contractors shall take over and pay for to the Company in cash at the cost price thereof. And it is hereby agreed that the Contractors shall assume and pay all expenditures on new lines incurred subsequently to July 1st, 1881.

3. The said Contractors shall have the right to use and occupy during the continuance of the present agreement, all the offices, stations, buildings and property of the Company, save and except the Board Room of the Company at Montreal, with the adjacent Secretary's Room, and except also a sufficient portion of the vaults of the Company for the purpose of preserving and keeping in safe custody the books and muniments of the Company, all of which, with free access thereto, are herby reserved for the use of the Company, and the Contractors may sub-let such parts of the building of the Company as are not required to carry on the business of the Company. But the Company may sell or otherwise dispose of for its own benefit, the buildings in Montreal and Ottawa not now used or required for the use of the Company in its business.

4. It is hereby further convenanted and agreed by the parties hereto that upon the requisition of the Contractors, the Company shall from time to time change their tariff of fees and rates in such manner as shall be stated in such requisition, provided always that the Company shall not be required or bound to make such alteration in the said rates as shall make the transmission of a message of ten words over the present extent of the lines of the Company in Canada or any part thereof, cost more than twenty-five cents, but subject to be adequately increased generally or locally in the event of any charge or tax being at any time imposed by any Parliamentary or local enactment or authority beyond the amount now payable by the Company or in the event of the Contractors being legally compelled to substitute or provide other means than those now in use by poles for carrying their wires through cities and towns.

5. The Contractors hereby bind and oblige themselves to pay to the Company, quarterly, during the continuance of this agreement, the sum of forty-one thousand two hundred and fifty dollars on the first days of October, January, April and July in each year from out of the proceeds of the operation and use of the said Company's lines and property which proceeds, the contractors hereby warrant shall amount to the said sum of forty-one thousand two hundred and fifty dollars per quarter, or one hundred and sixty-five thousand dollars per annum.

6. The said Contractors also bind and oblige themselves to pay all costs and expenses of operation of every description, including Municipal taxes, and assessments on property owned by the Company and occupied by the Contractors, and shall keep the property of the Company free and clear from all liens and incumbrances arising from taxes and assessments, or from any act of the said Contractors during the continuance of the present agreement.

7. The Contractors hereby further agree and bind themselves at all times during the continuance hereof, faithfully to execute and perform all the contracts, covenants and agreements of the said Company, agreed to be executed and performed by the Company, in the several contracts and agreements between the said Company and all Railway Companies and other parties, that are now in force and effect, and to save and hold harmless and indemnified the said Company from all such covenants, contracts, and agreements. And the Contractors hereby acknowledge to have received communication of such contracts and agreements, a list of which, signed by the parties hereto, is hereto annexed.

120031

8. It is further covenanted and agreed by and between the parties hereto, that if, at any time, the Contractors should fail to make any one of the quarterly payments hereinbefore stipulated, and the default to pay the same should continue for thirty days after the same shall have become due, and notice in writing of such default shall have been given to the Guarantors by serving the same on one of their principal officers in the City of New York at the expiration of the said period of thirty days, and if the said Guarantors shall not pay the sum so in default within thirty days after the service of such notice in writing, the Company shall have the option in its own discretion to resume possession of its lines and property, without any legal proceedings being necessary for that purpose, further than a notice, in writing, to the Contractors and Guarantors, of the intention so to resume possession thereof. And by so resuming possession of the said line, (if the Company should make its option so to do), it shall not impair or obstruct its remedies for the recovery of any arrears of the said payments due at the time of such resumption, against the said Contractors or against the sureties for such payment hereinafter provided for. And upon resuming possession as aforesaid, upon such default, the present agreement in so far as it shall entitle the Contractors to work and operate the said line of telegraph, or to receive any remuneration rate or charge for any message over the said line, or any revenue of any kind or description in respect of the property of the said Company, shall ipso facto cease and be determined, remaining in force, however, in respect of any stipulations therein contained for the protection of the Company from taxes or assessments and from other liens or indebtedness, and in respect of the maintenance of the line of the Company in good order and condition as hereinbefore agreed.

9. And from and after such resumption, the Company shall hold, and enjoy, use and operate the said line of telegraph, and the property referred to in the present agreement, in the same manner and to the same extent as if this agreement had not been executed. And in such case the Contractors shall forfeit and surrender to the Company for its use and benefit all additions and improvements they may have made to or upon the lines and property of the Company herein referred to, and all telegraph lines, with their appurtenances, which the Contractors may have constructed during the continuance hereof. And the Contractors will also pay to the Company all sums which may be due to it under the provisions hereof to be computed down to the time of such resumption of possession.

10. The Contractors hereby further expressly covenant and agree that upon the termination of the period herein limited, or upon the earlier termination of this agreement for any cause, they will deliver the line of telegraph and property herein described or referred to, to the Company in as good a condition for business as that in which they were when received from the Company by the Contractors under the terms hereof, together with all improvements and additions which the said second party shall have made upon or to the said line of telegraph and property during the continuance hereof, and also together with all supplies for the ordinary current maintenance of the said telegraph line, which shall then be in the possession of the Contractors, for the purpose of repairing, maintaining and operating the lines so to be returned to the Company.

11. It is hereby further understood and agreed that all contracts heretofore made by the Company for future deliveries of supplies and material are hereby assigned to and accepted by the Contractors, who hereby undertake and agree to carry out the conditions of such contracts to the entire exoneration and discharge of the Company.

12. In consideration of the premises, it is hereby further agreed by and between the parties hereto, that the Contractors shall retain as their remuneration for the working and operation of the said telegraph lines and for the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

120032

performance by them of all the obligations and duties hereby imposed upon them, the balance of the earnings and income of the said telegraph line and property which shall remain in their hands after the payment to the Company of the said sum of one hundred and sixty-five thousand dollars per annum. The said Contractors hereby agreeing to accept such balance as such remuneration, to whatever sum the same may amount. And they hereby assume all risk of there not being any such balance, hereby undertaking and agreeing to make no claim or demand upon the Company for remuneration upon any ground, or for any cause whatsoever, the true intent and meaning of these presents being that the Company shall, during the continuance of this agreement, continue to receive the quarterly sum of forty-one thousand two hundred and fifty dollars at the dates hereinbefore mentioned, whether the earnings and revenue of the said lines and property shall amount to that sum, or more, or less.

And the said Guarantors, the Western Union Telegraph Company, parties hereto of the third part in order to perfect and extend the connection of Telegraph Companies and to promote a union with the Telegraph systems of other states and countries, do hereby declare that they have taken communication of the foregoing articles of agreement, and at the request of the Contractors, and for and in consideration of the sum of one dollar to them in hand paid by the Contractors, the receipt of which is hereby acknowledged, they, the said Guarantors, do hereby bind and oblige themselves, as the sureties of the said Contractors, jointly and severally with them, for the payment of all the sums of money and the performance of all the obligations and duties, which the said Contractors have in and by the said articles of agreement bound and obliged themselves to pay and perform respectively.

The said Guarantors hereby undertaking to make such payments and to perform such obligations and duties respectively, upon receiving notice as aforesaid from the Company of the default of the Contractors so to do, and without any obligation on the part of the Company to attempt to enforce the making of such payment in default or the performance of such obligation or duty in default by the Contractors, before seeking its recourse against the said Guarantors, the latter hereby expressly waiving any right or claim which they might have, to the discussion by the Company, of the Contractors, before proceeding against the said sureties.

In Witness Whereof, the parties hereto have executed these presents, at the places and dates set opposite their names respectively, in triplicate.

Signed and executed by the Montreal Telegraph Company and the Great North Western Telegraph Company of Canada, at Montreal, this Seventeenth day of August, A.D. One Thousand Eight Hundred and Eighty One.

(Sgd) HUGH ALLAN, *President, Montreal Telegraph Co.*

(Sgd) JAMES DAKERS, *Secretary.*

## EXHIBIT No. 85

RESTATEMENT BY C.P.RY. OF EXHIBIT No. 56, *re* PRESENT STATUS OF PROPOSALS FOR LINE ABANDONMENT

*Canadian Pacific Criticism of Canadian National Exhibit No. 56:*

Exhibit No. 56 presents the Canadian National view of the present status of the various line abandonment suggestions included in its statement of 2,098 miles common to the Canadian Pacific and Canadian National submissions to the Duff Royal Commission. The Canadian Pacific does not agree with this view.

The Canadian Pacific believes that in tabulating the status of the several items included in the 2,098 miles as listed by the Canadian National, the 2,179 miles of railway actually dealt with must be considered. The Canadian Pacific presents in the following statement its understanding of the present status of these 2,179 miles.

It will be noted from this Canadian Pacific statement that more mileage has been actually abandoned, that more mileage has been approved by the Joint Executive Committee for preparation of abandonment agreements, that more mileage is at present under study for abandonment, and that less mileage has been rejected for abandonment than the Canadian National indicates in Exhibit No. 56.

The Canadian National exhibit implies that the rejected mileage has been finally rejected. The Canadian Pacific statement divides this mileage between that rejected under co-operation by the Joint Co-operative Committee and that rejected by the Canadian National without consultation with the Canadian Pacific. The Canadian Pacific believes that under unification all of this rejected mileage must be restudied and that under such restudy it will be found possible to abandon a very substantial portion of it.

EXHIBIT No. 85—*Continued*

*Memorandum:*

The Canadian Pacific desires to draw attention to the fact that a summary of the information appearing in the Proceedings indicates that:—

| | Miles |
|---|---|
| The mileage abandoned under Joint Co-operative Committee Reports No. 25 and No. 31 is | 39 |
| The exclusive Canadian Pacific abandonment in conjunction with Report No. 61 is | 41 |
| The exclusive Canadian National abandonments within the limits of the Canadian National statement of 2,098 miles is | 64 |
| Making a total of actual abandonments to date within the limits of the Canadian National statement of 2,098 miles of | 144 |
| The exclusive Canadian Pacific abandonments beyond the limits of the Canadian National statement of 2,098 miles but within the limits of the Canadian Pacific submission to the Duff Royal Commission, being parts of Items No. 2 and No. 11 and all of Item No. 30 in that submission is | 64 |
| Making a total of actual abandonments to date within limits of co-operation or of the Canadian Pacific submission to the Duff Royal Commission of | 208 |
| In addition, beyond the limits of the Canadian Pacific submission to the Duff Royal Commission, the Canadian National has received approval of the Board of Railway Commissioners for exclusive line abandonments totalling | 220 |
| And the Canadian Pacific has received similar approval of, and has made, exclusive line abandonments of | 37 |
| So that the total of line abandonments already made since the submissions to the Duff Royal Commission amount to | 465 |
| Under Joint Co-operative Committee Reports Nos. 30, 33, 34, 35, 36, 38-A, 39, 40, 41, 47, 55, 60, 61 and 62, the Joint Executive Committee has approved preparation of agreements covering additional abandonments of | 584 |
| And in conjunction with Joint Co-operative Committee Report No. 34, the Canadian National has undertaken to abandon | 9 |
| So that the total of line abandonments already made and in prospect amounts to | 1,058 |

## EXHIBIT No. 86

### Statement by C. N. Rys. Respecting the Diversion of Freight Traffic From N.T.R. to I.C.R. Between Rivière du Loup and Moncton

The physical characteristics of the alternative routes between Joffee and Moncton are such that heavier trains can be handled over the N.T.R. The density of passenger traffic also being lighter on the N.T.R., with better facilities for the yarding of trains at Monk, Edmundston and Napadogan than at Rivière du Loup, Mont Joli and Campbellton it is possible to give quicker despatch via the N.T.R.

The utility of the N.T.R. route as compared with the I.C.R. for freight operation is demonstrated in the following table which shows the number of trains it would be necessary to run over the various portions of the two routes using 53 per cent Mikado type locomotives with full rating to handle eastward one hundred thousand gross tons in 2,500 cars (equals 40 gross tons per car, the average for 1937).

| | | No. of trains | Trains miles | |
|---|---|---|---|---|
| N.T.R. Route— | | | | |
| Joffre-Monk | 103 miles | 38 | 3,914 | |
| Monk-Edmundston | 124 " | 33 | 4,092 | |
| Edmundston-Napadogan | 113 " | 36 | 4,068 | |
| Napadogan-Moncton | 119 " | 35 | 4,165 | 2,827 actual gross |
| | 459 " | | 16,239 | Total |
| I.C.R. Route— | | | | |
| Joffe-Riv. du Loup | 117 miles | 48 | 5,616 | |
| Riv. du Loup-Mont Joli | 83 " | 58 | 4,814 | |
| Mont Joli-Campbellton | 105 " | 35 | 3,675 | |
| Campbellton-Moncton | 187 " | 59 | 11,033 | 1,957 actual gross |
| | 492 " | | 25,138 | Total |

This shows that 55 per cent more train miles are required on I.C.R. than on the N.T.R. to handle the same amount of traffic, without regard to the more adverse weather conditions on the I.C.R. It may also be remarked that an increased grain movement, for instance, resulting in greater average gross tons per car, would raise this percentage, the increase in train miles via the I.C.R. amounting to 61 per cent where cars average 60 gross tons.

The data shown above relates to eastward movements only, but as the operating conditions affecting westward movements are very similar it would seem unnecessary to treat them separately except to point out that on the I.C.R. full tonnage trains must be assisted in each direction over the Sayabec grade, a distance of 29 miles, whereas, on the N.T.R. there are 13 miles of pusher grade eastward to Summit and 13 miles of pusher grade westward to Pelletier.

120039

## EXHIBIT No. 87

### Memo by C. N. Rys. Concerning Activities Conducted at Various Stations Between Monk and Pacific Junction

*Lafontaine, Que.*—This station serves a growing farming and lumbering community extending to the State of Maine boundary to the south (St. Pamphile). The distance by highway from Lafontaine to St. Jean Port Joli on the Montmagny Subdivision, nearest rail facilities if line abandoned, is 20 miles. Or distance by highway from St. Pamphile to St. Jean Port Joli would be 30 miles.

*Holliday, Que.*—This station serves also Bretagne, 4½ miles east, from which point there is a highway to St. Philippe, Montmagny Subdivision, a distance of 12 miles. This will be the only available outlet if the line is abandoned.

*River Manie, Que.*—This station serves a district which has produced large volumes of forest products for many years. If the line is abandoned, the only other outlet would be through Crown Lake to St. Pascal, on the Montmagny Subdivision, a distance of 14 miles from Crown Lake; or from the River Manie Station 16 miles to St. Pascal. The district served by this station includes such mills as East Lake, Powersville, LaPointe, all large producers of lumber, pulpwood and other forest products.

*Pelletier, Que.*—Serves St. Athanase and other communities to the south towards State of Maine boundary. Chabot, 9 miles distant, has five saw mills—no other outlet except highway to Ste. Helene, 25 miles. Distance by highway Pelletier to St. Alexandre, 15 miles.

*St. Eleuthere, Que.*—Only outlet if line abandoned would be to Pelletier, thence to St. Alexandre, distance 24 miles—or to Notre Dame, on Temiscouata Ry., via Riviere Bleue, distance of 36 miles over very hilly country.

*Estcourt, Que.*—Serves large saw mills—Beaupre Durette & Co. Only outlet if line abandoned would be highway to St. Alexandre, through Pelletier, distance of 28 miles, or through Riviere Bleue to Notre Dame on Temiscouata Ry., distance of 31 miles, over very hilly country .

*Sully, Que.*—Serves an Agricultural College and a growing agricultural community. Only outlet if line abandoned would be to St. Alexandre, via Pelletier, distance of 26 miles, or through Riviere Bleue to Notre Dame on Temiscouata Ry., distance of 26 miles, over very hilly country.

*Riviere Bleue, Que.*—This station serves also Landry's Siding, where the D'Auteuil Lumber Co. carry on a very large pulpwood operation, drawing pulpwood from the State of Maine, the average yearly cut amounting to 25,000 cords, all of which is shipped out by rail, largely to Mechanicville, N.Y. If line were abandoned in this district, the only other outlet for this wood would be to Stream Drive to a point on the Bangor & Aroostook Ry.

Also in the Riviere Bleue district are large lumber and shingle mills; namely, at Landry, Riviere Bleue and Beau Lake, the output of which mills would have no outlet to market, except by highway to Notre Dame on the Temiscouata Railway, a distance of approximately 30 miles, over hilly country.

*Clendyne, Que.*—Serves also Belanger Siding, where A. J. Morin operates a saw mill, producing lumber and other forest products; also a charcoal plant. The only outlet for this traffic, if the line is abandoned, would be to Edmundston by highway, a distance of 32 miles.

*Lac Baker, N.B.*—This station serves a growing farming district. If our line is abandoned in this territory, the district would be served only by highway to Edmundston, a distance of approximately 23 miles, or by the Temiscouata

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120040

Ry.—Connor's Branch—reached by highway over a hilly country, a distance of 15 miles.

*Edmundston, N.B.*—Here is located the pulpmill of Fraser Companies Limited, with a capital investment of $6,000,000, manufacturing pulp for the Madawaska, Me., paper mills and pulpwood board for shipment direct from Edmundston by rail. Fraser Companies' investment in their Madawaska mills represents another $9,000,000.

The abandonment of this line would leave this important industry at the mercy of branch line services, the present Canadian National route being the direct short line to Montreal and points west in Canada and the United States.

The abandonment of this line would also prove to be a very serious matter to Nova Scotia Coal producers. During the year 1937, the Canadian National handled into Edmundston, for these mills, 1,819 carloads Nova Scotia coal, equal to 85,000 tons, which quantity of coal would be supplied by United States producers through Searsport, Me., and the Bangor & Aroostook Railway, with Canadian Railways not participating in the movement at all.

*Grand Falls, N.B.*—This station serves one of the best potato growing districts in the Province of New Brunswick, there being thirteen potato warehouses located on the C.N.R. tracks under the jurisdiction of this station; namely, Grand Falls 3, Caldwell 1, Cote 4, Poitras 1, Drummond 4. If line abandoned these potato warehouses would also have to be abandoned and potatoes shipped from C.P.R. tracks, an extra haul of five to ten miles.

Grand Falls also serves large saw mill at Davis No. 2, located on Salmon River. If line abandoned, they would have to haul their product a distance of 10 or 15 miles to nearest Railway facilities.

*New Denmark, N.B.*—Serves very prosperous Danish Settlement—five potato warehouses. If line abandoned, it would mean an average haul by highway of ten miles to nearest Railway facilities.

*Plaster Rock, N.B.*—Serves two potato warehouses at Sisson and Wapske Siding, serving large saw mill—Beaupre Durette & Co.

*Summit, N.B.*—Serves also Longley Siding, producing spoolwood shipped by W. S. Anderson for export overseas.

*Juniper, N.B.*—Principal industry—Lumber Mill, Flemming & Gibson Ltd., located about 2 miles from C.N.R. station, distance to nearest C.P.R. station (Bristol), by highway, 23 miles. The capital investment in this industry is $200,000.

*Napadogan, N.B.*—R. W. Baird—Last Block Mill—ships products for overseas, also manufactures lumber for domestic market. Nearest rail facilities if line abandoned would be by highway to Stanley, a distance of 20 miles.

*McGivney Jct., N.B.*—This station is the Junction of the Nashwaak Subdivision and serves important lumber mills at Phoenix Mills, Mavis, North Cains, Mullen, Landers, Miramichi Lumber Co., Maple Grove, most of which are without any other means of disposing of their product.

*Hardwood Ridge, N.B.*—In addition to commercial coal traffic shown, there were shipped, from Hardwood Ridge in 1936, 1,125 cars of Railway Coal, and, in 1937, 865 cars. Decrease due to strike.

## EXHIBIT No. 89

### Joint Report of C.N. and C.P. Rys. on British Columbia Coastal Steamship Service

Pursuant to instructions the undersigned have investigated the operations of the National and Pacific Companies' B.C. Coastal Fleets and would respectfully submit the following:—

The National Company operate three all-year routes and one summer route.
Consist of fleet: 6 ships. (See Exhibit A.)
The Pacific Company operates seven all-year routes, augmenting the Nanaimo and Alaska services in summer season; a motor car ferry service in summer months is also operated between Sidney and Steveston.
Consist of fleet: 17 ships; 5 barges; 3 tugs.
Maps showing all these routes are attached.

*Other attachments*

Exhibit (*a*)—With details of ships for the National Fleet.
Exhibit (*b*)—With details of ships for the Pacific Fleet.
Exhibit (*c*)—Indicating routes operated by the National Company and total receipts and operating costs of each route in 1932.
Exhibit (*d*)—Indicating routes operated by the Pacific Company and total receipts and operating costs of each route in 1932.
Exhibit (*e*)—Indicating number of days of operation of each vessel of National Company in 1932.
Exhibit (*f*)—Indicating number of days of operation of each vessel of Pacific Company in 1932.
Exhibit (*g*)—Memorandum on terminals at various ports.

*Earnings and Expenditures*—in 1932 as presented in Comptroller's reports were:

| | Earnings | Expenditures |
|---|---|---|
| National | $ 821,906 68 | $1,319,258 78 |
| Pacific | 2,524,949 13 | 2,648,863 61 |

(National Expenditures include $294,112.23 for charges on *Prince Henry* and *Prince David* Eastern operation.)

*Objective*—

To effect all economies possible in operations of the several Coastal services under either of the following proposals:—

(1) Amalgamation of the present fleets thereby enabling the formation of an independent steamship company.
(2) The elimination of duplicate service through co-operative measures.

*Findings*—

Both companies have, most apparently, effected substantial reductions during the past year and their programs for 1933 will show continued reductions by the laying up of ships and other economies in operation.

The all-year and summer routes operated in 1932 are considered necessary and should be continued. Curtailments of periods of operation of summer services are already provided for. Results in 1932 show that "out of pocket" expenses on practically all routes were exceeded by receipts.

The feeding values to rail and other services by the ships of both companies on the Northern British Columbia route substantially helped out in the gross earnings.

120043

*Proposal No. 1*—

Yearly savings estimated at $27,200 could be made on the following items of expense:—

| | |
|---|---|
| Terminals—(See Exhibit "DA") | $20,700.00 |
| In administration through amalgamation and reduction of staffs | 6,500.00 |
| Total | $27,200.00 |

It could not be found that any savings by withdrawal of ships from routes could be made as none of these routes should be closed.

To offset this saving there would be additional expense to provide the independent company with auditing and accounting department, staff to handle traffic requirements, as the solicitation, advertising, tariff, printing and ticket work is now done by each company's respective rail department. Estimate of such expense to the proposed company would be $40,000.00 made up as follows:—

| | |
|---|---|
| Cost of Traffic Department for salaries, advertising, printing, tickets and tariffs | $30,000.00 |
| Office accommodations and maintenance for traffic and auditing staffs | 10,000.00 |
| Total | $40,000.00 |

At present the National Company is assessed $21,000 and Pacific costs would be about $19,000 making total of $40,000.

Barge service is operated by the Pacific Company at a profit, but such service is not operated by the National Steamships as this comes under the rail operating branch of that Company. The cost and earnings for same not at present available.

*Proposal No. 2*

It cannot be found that any further economies can be effected through mutual co-operation than what has already been accomplished.

*General*

The total year's expenses of the National Company exceed the operating costs as given in Exhibit (*c*) by $760,220.13.

The total year's expenses of the Pacific Company exceed the operating costs as given in Exhibit (*d*) by $620,660.31.

These differences are due to charges covering lay-up of ships not operated in off seasons, administration expenses, floating equipment retirements and other expenses assessed against each company.

A review of statement (*e*) will show that heavy expense due to ships laying idle is incurred annually, and the disposal of some of these ships would materially reduce the annual charges.

Both companies experience considerable competition from other steamship lines up and down the coast: to Alaska, the Pacific Steamship and Alaska companies operate all year services in addition to special summer services. The Northland Steamship Company carry on coastal trade between Alaska ports and Seattle and are quite a factor in the freight traffic.

The Union Steamship Company of British Columbia, serving all ports north of Vancouver in Canadian waters, are very active in freight and passenger traffic.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

12044

In addition there are numerous smaller lines operating to the West Coast of Vancouver Island as well as to other ports up and down the coast.

As a result of this competition the Traffic Departments of both the Pacific and National companies have to be very active in their efforts to secure traffic for their respective ships.

# The Debates of the Senate

OFFICIAL REPORT—UNREVISED EDITION

Vol. LXXIV Wednesday, March 9, 1938 No. 9

CONTENTS

Canada's Railway Problem — Motion — Debate Continued.

## THE SENATE

Speaker: Hon. WALTER EDWARD FOSTER

Wednesday, March 9, 1938.

The Senate met at 3 p.m., the Speaker in the Chair.

Prayers and routine proceedings.

## CANADA'S RAILWAY PROBLEM

MOTION—DEBATE CONTINUED

The Senate resumed from yesterday the adjourned debate on the motion by Hon. Mr. Beaubien:

That, in the opinion of the Senate, the Government should be urged to settle the railway problem of Canada at an early date in order to stop the ruinous loss made each year by the Dominion through the Canadian National Railways, and which already amounts to several billion dollars.

Hon. RAOUL DANDURAND: Honourable senators, it is unnecessary to state that the address delivered by the mover of this motion, the honourable senator from Montarville (Hon. Mr. Beaubien), was very interesting indeed. That is true of the address as a whole, but I have in mind at the moment particularly his references to our federal, provincial and municipal obligations, which are, in the main, incontrovertible. I must confess, however, that his conclusions on this subject were somewhat depressing and perhaps a little pessimistic. We all should realize that we are just moving out of a period of depression that has staggered the world. But for our unemployment problem and our Western drought calamity, I think we should be able to congratulate ourselves on the good condition of federal finances, at all events. We should not forget that throughout that economic crisis our people displayed their native stamina and withstood the strain courageously and well. I suggest with hope that we shall have a return to the brighter days of normal conditions. But, without going into financial details, I may say that in the meantime the world envies our lot. They see, as we ourselves have seen, that our people are at work, doing wonderfully well. Our exports are an evidence of our production. Yet our railway problem is still with us.

I will not discuss the liabilities of the Canadian National Railways at length. I will only deal with that part of the honourable gentleman's address in which he spoke of the Canadian National debt as having passed the three billion dollars mark and being added to at the rate of $100,000,000 a year. I should like to remark that this represents the funded debt to the public, which is for the most part guaranteed by either the federal or the provincial governments of Canada, and also what is known as Dominion of Canada account, which includes loans to railways $686,000,000, interest on these loans accrued and unpaid $530,832,000, deficit on interest charges $284,416,000, and cost of construction of the original Government railways, built as a public work, $405,000,000. My honourable friend sets up an interest charge of $75,000,000 on this immense sum, and then adds $40,000,000 as deficit, forgetful of the fact that this deficit item is already included in his total of three billion dollars.

As to the original Government railways, there is no more reason for calculating interest on that investment than on the investment in our canals, harbours or public buildings. It should be borne in mind that the deficits referred to are deficits consisting of interest charges and that there are no deficits on operation of the Canadian National, which provides a net operating revenue of about $15,000,000 a year. The Ottawa Journal of yesterday supports this view in an editorial headed, "A Fictitious Five Hundred Millions."

This does not get over the conviction that we all have, that the situation is a very

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120046

serious one. That situation became acute and was revealed when the War was on. The Drayton-Acworth Royal Commission of 1917 surveyed the whole field at that time and went deeply into the various problems which were engrossing the mind of the public. After examining suggestions for private and public ownership it rejected both, in the following terms:

We do not think that a railway monopoly is desirable either in the hands of a company or in the hands of the State. We are convinced that the people of Canada who have spent or guaranteed—whether wisely or not is not now the question—hundreds of millions of dollars, largely with the object of breaking a private monopoly, would never consent to the re-establishment of a still greater monopoly, even if the Government were a partner in the concern.

In 1925 a committee of the Senate made a lengthy inquiry and also rejected any idea of merger. The Duff Royal Commission of 1931 came to the same conclusion. It said:

To establish a monopoly of such a magnitude would place in the hands of those responsible for the administration of the system powers that would, if not properly exercised, prejudice the interests of the Dominion as a whole.

The Duff Commission also rejected the idea of leasing the Canadian National to the Canadian Pacific, in perpetuity or for a definite time, and said it did so because the lease would tend to a merger. It recommended separate maintenance of the two entities.

What the Senate favoured in 1925 was a middle-way proposal for continuing the separate entities, but under unified management as to administration and operation. The Senate committee's report asserted that unified management would remove or dispense with duplication in railway tracks and rolling stock, in passenger and freight services, in railway stations from the Atlantic to the Pacific, in telegraph, express and other services, in offices, in accounting and bookkeeping, in numerous other special offices and in administrative boards, staffs, and so on. This report came before us in the last days of the session of 1925. During the election campaign which followed closely upon prorogation that year this matter was not discussed before the people; nor was it discussed in the campaign of the following year. Perhaps a special reason for silence on the subject during the election of 1926 was the recovery which manifested itself in the latter part of 1925 and in the next year.

The recovery at that time was so marked that Mr. Beatty became optimistic and was then in favour of competition. Speaking before the Canadian Club at Montreal, on March 15, 1926, he referred to a statement which he had made before the Senate committee. The Montreal Gazette report of his address was given under the following heading:

Says competition in transportation spurs efficiency.

Referring to his appearance before the Senate committee, he said:

I was asked if I believed in a railway monopoly for this country, and I answered that while no one should attempt to forecast the conditions in this country for the next few years with that certainty which would justify a definite and unchangeable view, that I did not believe in a monopoly, and I did not believe in it for a reason that was perhaps in a peculiar way the result of my own experiences. I said that I thought a merger of these two principal properties would involve difficulties in administration which were scarcely contemplated and which would in time affect the character of the service given to the public; that I did not know how it could be possible, with the best executives, the most loyal and efficient officers and most patriotic board of directors, for an enterprise with one hundred and fifty thousand employees to be maintained in the highest state of efficiency without the spur of competition. We must admit that consolidations, properly conceived and carried out, are capable of effecting great economies. There is no way in which the same amount of money can be saved in a short space of time, and it may be that the people of Canada will have to determine at some stage whether the obvious disadvantages of consolidation are outweighed by the financial interests or necessities of the country.

I may be wrong in my point of view, but it is extremely difficult to maintain a high morale and that "on his toes" attitude of railway employees when they have nothing to measure their efforts against, and that, so far as they are concerned, the struggle for results is taken away because there is no one else in the ring.

And he adds this obvious remark, which he has repeated since:

Railway rearrangements can save money but they cannot create new traffic, and in the last analysis traffic volume, which means the country's development and commercial prosperity, will determine the extent of the transportation burdens of this country.

Right Hon. Mr. MEIGHEN: When did he give that address?

Hon. Mr. DANDURAND: March 15, 1926. We did not hear of the Senate resolution during 1927 and 1928, for they were prosperous years and railway revenues were increasing. The slump, which set in towards the end of 1928 and gathered momentum throughout 1929 and 1930, began to cause alarm among the railway fraternity, and the railway companies asked for an inquiry.

Hence the Duff Commission came into being. It made an exhaustive study of railways and transportation, as my honourable friend from Montarville (Hon. Mr. Beaubien) has said, and absolutely rejected the principle of a merger of the two railway systems either under private or public ownership. The Commission also examined the possibilities of unified management. The Senate resolution was brought to its attention, with the statement that unification would effect an annual saving of about $75,000,000 through abandonment of rails to the tune of some five thousand miles or more, and consolidation of stations, yards and terminal facilities, of locomotive and car shops, and of supervisory and managerial organizations.

Mr. Beatty—as he was when he appeared before the Duff Commission in 1932—declared himself against competition, although in 1926 he had urged its advantages. He proposed consolidation of the two railways by a lease of the Government lines to the Canadian Pacific on a profit-sharing basis. Here are his words:

I suggest to you, with deference, that the object to be sought is the securing of an incentive to efficiency, coupled with a sense of responsibility which secures economical operations, and that this result can only be achieved under private operation of the railways of Canada. This belief leads me to the conclusion that under existing conditions in Canada the only solution which will stand the test of the country's necessities is a consolidation through a lease on a profit-sharing basis of the Government railways to the Canadian Pacific.

He estimated that on the basis of the 1931 operating figures this would result in a saving of $60,000,000. A month later he filed a statement with the Commission showing possible annual savings of $6,340,000 through co-operative arrangements and $75,000,000 by unification of the two systems under private management.

Mr. Beatty was asked whether there was any method by which the lines merged under his proposal might be "unscrambled" later. He replied:

I do not think they are "unscramblable" if your effort is to secure maximum economy. My view of that has always been that if you approach this with the idea that you are going to have maximum economies, you cannot at the same time restore those in a few years in the condition in which you got them. I do not think that is possible. If you are going to abandon a piece of track because you don't need it, you won't save much if you say in five or six years, "I have to give it back in the condition in which I got it."

Sir Henry Thornton estimated a saving of $60,000,000. His opinion on amalgamation under some unified form of administration or private ownership will be found at page 668 of the proceedings of the Commission, as follows:

Amalgamation under some unified form of administration will, in theory, produce the maximum of economies, of which a material proportion will doubtless fructify. It has been estimated that these economies would yield a return of something like $60,000,000 per annum, increasing progressively from the first year and reaching the figure named perhaps at the expiration of a five-year period. Whether all of this sum can be salvaged by amalgamation is arguable, but whatever it may be should not be ignored in the discussion, and it would represent after its full attainment a continuous and annual return.

Speaking of the influence of politics on the management of railways, he said, as reported at pages 668 and 669 of the proceedings:

This difficulty would of course be removed if the two railways were amalgamated under private ownership; but at once there is aroused in the minds of the citizens of our Dominion that fear which is quite justifiably displayed whenever a great and formidable monopoly appears—a fear which the activities of many monopolies in the past have justified. There will also be the criticism that with the removal of competition there is bound to be a deterioration in service and efficiency, irrespective of the desire and effort of the management to avoid such results.

In short, for a variety of reasons the amalgamation of the Canadian National and the Canadian Pacific would be definitely repugnant to the people of the Dominion in my judgment; and, apart from anything else, it becomes politically impracticable. I believe it must therefore be discarded as a solution.

It will be seen from the foregoing that while Sir Henry Thornton had theoretical views on amalgamation and unification, yet he definitely discarded the idea that either was a solution of Canada's railway problem.

Later on Mr. Beatty was again examined before the Commission, when he spoke on the necessity of complete unification. His views will be found at page 2410 of the proceedings of the Commission. I cite them:

I would point out the self-evident fact that maximum economies are only possible through complete unification. The more favourably situated lines, the better facilities and equipment of the two companies would be available to carry out the combined operation in the most efficient manner and at the least expense.

It is evident that complete unification bespeaks permanency. There would be but one railway system. The Duff Commission saw in unified management a permanent fusion, an unscramblable proposition, and as it had rejected merger and monopoly under private or public ownership, quite logically it also rejected unified management, which in its opinion meant a permanent merger. As the two railway systems could not in that event be separated subsequently and restored to their former condition as individual systems, the Commission, after examining the whole field and considering the various proposals submitted, reported in favour of co-operation.

Sir Edward Beatty's unification plan would doubtless ensure economies if it remained in

120047

serious one. That situation became acute and was revealed when the War was on. The Drayton-Acworth Royal Commission of 1917 surveyed the whole field at that time and went deeply into the various problems which were engrossing the mind of the public. After examining suggestions for private and public ownership it rejected both, in the following terms:

We do not think that a railway monopoly is desirable either in the hands of a company or in the hands of the State. We are convinced that the people of Canada who have spent or guaranteed—whether wisely or not is not now the question—hundreds of millions of dollars, largely with the object of breaking a private monopoly, would never consent to the re-establishment of a still greater monopoly, even if the Government were a partner in the concern.

In 1925 a committee of the Senate made a lengthy inquiry and also rejected any idea of merger. The Duff Royal Commission of 1931 came to the same conclusion. It said:

To establish a monopoly of such a magnitude would place in the hands of those responsible for the administration of the system powers that would, if not properly exercised, prejudice the interests of the Dominion as a whole.

The Duff Commission also rejected the idea of leasing the Canadian National to the Canadian Pacific, in perpetuity or for a definite time, and said it did so because the lease would tend to a merger. It recommended separate maintenance of the two entities.

What the Senate favoured in 1925 was a middle-way proposal for continuing the separate entities, but under unified management as to administration and operation. The Senate committee's report asserted that unified management would remove or dispense with duplication in railway tracks and rolling stock, in passenger and freight services, in railway stations from the Atlantic to the Pacific, in telegraph, express and other services, in offices, in accounting and bookkeeping, in numerous other special offices and in administrative boards, staffs, and so on. This report came before us in the last days of the session of 1925. During the election campaign which followed closely upon prorogation that year this matter was not discussed before the people; nor was it discussed in the campaign of the following year. Perhaps a special reason for silence on the subject during the election of 1926 was the recovery which manifested itself in the latter part of 1925 and in the next year.

The recovery at that time was so marked that Mr. Beatty became optimistic and was then in favour of competition. Speaking before the Canadian Club at Montreal, on March 15, 1926, he referred to a statement which he had made before the Senate committee. The Montreal Gazette report of his address was given under the following heading:

Says competition in transportation spurs efficiency.

Referring to his appearance before the Senate committee, he said:

I was asked if I believed in a railway monopoly for this country, and I answered that while no one should attempt to forecast the conditions in this country for the next few years with that certainty which would justify a definite and unchangeable view, that I did not believe in a monopoly, and I did not believe in it for a reason that was perhaps in a peculiar way the result of my own experiences. I said that I thought a merger of these two principal properties would involve difficulties in administration which were scarcely contemplated and which would in time affect the character of the service given to the public; that I did not know how it could be possible, with the best executives, the most loyal and efficient officers and most patriotic board of directors, for an enterprise with one hundred and fifty thousand employees to be maintained in the highest state of efficiency without the spur of competition. We must admit that consolidations, properly conceived and carried out, are capable of effecting great economies. There is no way in which the same amount of money can be saved in a short space of time, and it may be that the people of Canada will have to determine at some stage whether the obvious disadvantages of consolidation are outweighed by the financial interests or necessities of the country.

I may be wrong in my point of view, but it is extremely difficult to maintain a high morale and that "on his toes" attitude of railway employees when they have nothing to measure their efforts against, and that, so far as they are concerned, the struggle for results is taken away because there is no one else in the ring.

And he adds this obvious remark, which he has repeated since:

Railway rearrangements can save money but they cannot create new traffic, and in the last analysis traffic volume, which means the country's development and commercial prosperity, will determine the extent of the transportation burdens of this country.

Right Hon. Mr. MEIGHEN: When did he give that address?

Hon. Mr. DANDURAND: March 15, 1926. We did not hear of the Senate resolution during 1927 and 1928, for they were prosperous years and railway revenues were increasing. The slump, which set in towards the end of 1928 and gathered momentum throughout 1929 and 1930, began to cause alarm among the railway fraternity, and the railway companies asked for an inquiry.

Hence the Duff Commission came into being. It made an exhaustive study of railways and transportation, as my honourable friend from Montarville (Hon. Mr. Beaubien)

120047

has said, and absolutely rejected the principle of a merger of the two railway systems either under private or public ownership. The Commission also examined the possibilities of unified management. The Senate resolution was brought to its attention, with the statement that unification would effect an annual saving of about $75,000,000 through abandonment of rails to the tune of some five thousand miles or more, and consolidation of stations, yards and terminal facilities, of locomotive and car shops, and of supervisory and managerial organizations.

Mr. Beatty—as he was when he appeared before the Duff Commission in 1932—declared himself against competition, although in 1926 he had urged its advantages. He proposed consolidation of the two railways by a lease of the Government lines to the Canadian Pacific on a profit-sharing basis. Here are his words:

I suggest to you, with deference, that the object to be sought is the securing of an incentive to efficiency, coupled with a sense of responsibility which secures economical operations, and that this result can only be achieved under private operation of the railways of Canada. This belief leads me to the conclusion that under existing conditions in Canada the only solution which will stand the test of the country's necessities is a consolidation through a lease on a profit-sharing basis of the Government railways to the Canadian Pacific.

He estimated that on the basis of the 1931 operating figures this would result in a saving of $60,000,000. A month later he filed a statement with the Commission showing possible annual savings of $6,340,000 through co-operative arrangements and $75,000,000 by unification of the two systems under private management.

Mr. Beatty was asked whether there was any method by which the lines merged under his proposal might be "unscrambled" later. He replied:

I do not think they are "unscramblable" if your effort is to secure maximum economy. My view of that has always been that if you approach this with the idea that you are going to have maximum economies, you cannot at the same time restore those in a few years in the condition in which you got them. I do not think that is possible. If you are going to abandon a piece of track because you don't need it, you won't save much if you say in five or six years, "I have to give it back in the condition in which I got it."

Sir Henry Thornton estimated a saving of $60,000,000. His opinion on amalgamation under some unified form of administration or private ownership will be found at page 668 of the proceedings of the Commission, as follows:

Amalgamation under some unified form of administration will, in theory, produce the maximum of economies, of which a material proportion will doubtless fructify. It has been estimated that these economies would yield a return of something like $60,000,000 per annum, increasing progressively from the first year and reaching the figure named perhaps at the expiration of a five-year period. Whether all of this sum can be salvaged by amalgamation is arguable, but whatever it may be should not be ignored in the discussion, and it would represent after its full attainment a continuous and annual return.

Speaking of the influence of politics on the management of railways, he said, as reported at pages 668 and 669 of the proceedings:

This difficulty would of course be removed if the two railways were amalgamated under private ownership; but at once there is aroused in the minds of the citizens of our Dominion that fear which is quite justifiably displayed whenever a great and formidable monopoly appears—a fear which the activities of many monopolies in the past have justified. There will also be the criticism that with the removal of competition there is bound to be a deterioration in service and efficiency, irrespective of the desire and effort of the management to avoid such results.

In short, for a variety of reasons the amalgamation of the Canadian National and the Canadian Pacific would be definitely repugnant to the people of the Dominion in my judgment; and, apart from anything else, it becomes politically impracticable. I believe it must therefore be discarded as a solution.

It will be seen from the foregoing that while Sir Henry Thornton had theoretical views on amalgamation and unification, yet he definitely discarded the idea that either was a solution of Canada's railway problem.

Later on Mr. Beatty was again examined before the Commission, when he spoke on the necessity of complete unification. His views will be found at page 2410 of the proceedings of the Commission. I cite them:

I would point out the self-evident fact that maximum economies are only possible through complete unification. The more favourably situated lines, the better facilities and equipment of the two companies would be available to carry out the combined operation in the most efficient manner and at the least expense.

It is evident that complete unification bespeaks permanency. There would be but one railway system. The Duff Commission saw in unified management a permanent fusion, an unscramblable proposition, and as it had rejected merger and monopoly under private or public ownership, quite logically it also rejected unified management, which in its opinion meant a permanent merger. As the two railway systems could not in that event be separated subsequently and restored to their former condition as individual systems, the Commission, after examining the whole field and considering the various proposals submitted, reported in favour of co-operation.

Sir Edward Beatty's unification plan would doubtless ensure economies if it remained in

the realm of theory and did not touch the earth. Unfortunately—or fortunately—railways run on the ground. They are serving human beings, for whom they were built.

At the time Mr. Beatty appeared before the Commission the railways had a free hand as to abandonments and rail-lifting; but under an amendment made to the Railway Act about a year and a half later no such steps could be taken without approval being first obtained from the Railway Commission. Mr. Beaudry Leman, a member of the Duff Commission, drew the attention of Mr. Beatty to the change, and this interesting conversation will be found at page 2459 of the proceedings:

Commissioner Leman: In your project of unification do you visualize carrying on through the instrumentality of the Canadian Pacific Railway, or have you been investigating the advantages or otherwise of a third body stepping in and carrying on—a body upon which the Government and yourselves would be represented and which, of course, would take the responsibility for everything that is to be done in the way of abandonments, including the dissatisfaction created thereby, and the bringing together of the policies of the companies, which would retain their identities?

Mr. Beatty: That is feasible. It has two disadvantages. It brings the Government into closer association with the administration of the properties than I think is wise, and it also renders doubtful the type that would be selected for appointment to the Board. The reason I suggested the Canadian Pacific as the means is that I would rather start with a Board that is known. I did think there would have to be added to the Board in course of time men not necessarily nominees of the Canadian Pacific Railway. If the Government selected the directors I would not like it, but if the Government established a tribunal to select them, an independent body composed of men, as I have mentioned, from the Canadian Bankers Association, the Canadian Chambers of Commerce and a judge of the Supreme Court, then of course you would be almost certain to get the type of men whose ability would justify the selection.

Commissioner Leman: Would there not be a great advantage from the Canadian Pacific Railway point of view in not having the odium and unpopularity of deciding? You have 5,000 miles of road that you contemplate abandoning. This is not a popular move.

Mr. Beatty: No. To that extent it would be helpful. Perhaps we could not escape our share of the responsibility, no matter what happened.

Commissioner Leman: But if you contemplate resuming your identity at a later date would there not be some advantage in having a third body during the intermediate period?

Mr. Beatty: We have always contemplated from the beginning that there would be an over-riding Commission which would be a court of appeal in all these matters. It would be in the shape either of a glorified railway commission or a separate and independent body which would pass on this very thing, and permit or refuse to permit the abandonment of properties in the public interest. I think that is essential. I do not think you should say to a private body of men like a board of directors, "You have unlimited power to do these things."

I would point out that we have never had the conditions under which the Canadian Pacific Railway Company would agree to unified management. Perhaps I should recall that the Senate resolution assured the Canadian Pacific a dividend on its common shares, which at that time were earning ten per cent. For several years the company has passed the dividend on its common stock. Surely no one to-day would guarantee the Canadian Pacific a dividend on that stock.

True, Sir Edward Beatty has often said, "Let us first agree on the principle, and then we will discuss details." I would suggest that the principal conditions of any projected association are usually based on what each party brings in and takes out as its share of profit. I have often wondered whether, in case the Canadian National capitalization were revalued on the basis of a part of its bonded indebtedness, so as to bring it to the level of the total bonded obligations of the Canadian Pacific Railway and thus to put the two systems on a fairly equal basis, the Canadian Pacific Railway would join in a scheme of unified management under which it would receive equal treatment in the apportionment of profits. I understand that the Canadian Pacific Railway was at one time desirous of ranking the Candian National obligations with its own common stock, the Canadian Pacific to have the privilege of receiving interest on its obligations and on preferred stock. When the Canadian Pacific Railway invites the Canadian National Railways to come and play in its yard, the Canadian National is entitled to know what will be the conditions of the game, and I would suggest to Sir Edward Beatty that he drop generalities and give the public a fair outline of his plan.

One must not lose sight of the fact that any scheme of unified management would be contingent upon a financial arrangement satisfactory to the Canadian Pacific Railway. This aspect of the question is but an aside, as the Act of 1933 forbids amalgamation and unified management and control of the railway systems which form part of the Canadian National Railways. It must not be forgotten, and of course my colleagues around me do not forget, that the Act of 1933 originated in this Chamber and was unanimously adopted. I think I am quite logical, therefore, in stating that the Act of 1933 superseded the Senate resolution of 1925, and that it is now the law of the land.

120049

Right Hon. Mr. MEIGHEN: Not quite. I wish it were.

Hon. Mr. DANDURAND: There was a change in the trusteeship, which I think was welcomed in many quarters, but the sense of the Act remained.

Right Hon. Mr. MEIGHEN: It was welcomed by the job-hunters.

Hon. Mr. DANDURAND: I will state what has been achieved so far under this Act and in conjunction with it. The stereotyped suggestion of $75,000,000 or $60,000,000 of savings under co-operation, or even under unified management, is at present, manifestly, a hopeless proposition. Apart from line abandonments, the co-operative measures which the two railways have put into effect since the passage of the Canadian National-Canadian Pacific Act of 1933, are estimated to have resulted in a joint annual saving of $1,092,500. These co-operative measures have had to do with the pooling of passenger services and the joint use of certain facilities. In the matter of line abandonments not a great deal has been accomplished, although a joint executive committee of the officials of the two companies has been giving continuous study to the possibilities of various proposals in this respect. Abandonment proposals are in two categories: (a) those relating to functionally duplicate lines, and (b) those relating to non-competitive thin-traffic lines. Those in category (a) are required to be dealt with under the Canadian National-Canadian Pacific Act of 1933; those in category (b) may be dealt with without reference to the Canadian National-Canadian Pacific Act, because no joint interest is involved, and each company may deal with such mileages as a purely company matter. But no mileage could be abandoned by either railway without the authority and approval of the Board of Railway Commissioners, which hears argument for and against all applications.

The situation regarding co-operative line abandonments of functionally duplicate lines may be summarized as follows:

| | Mileages C.N. | Mileages C.P. | Total | Estimated joint annual saving |
|---|---|---|---|---|
| 2 projects actually accomplished | 11 | 28 | 39 | $42,300 |
| 15 projects approved by Joint Executive Committee, but no formal application for abandonment has yet been filed | 330 | 295 | 625 | 525,600 |
| 13 projects studied, but rejected owing to lack of sufficient economy | Indefinite | | 407 | .... |
| 19 projects still being studied | Indefinite | | 1,563 | Indefinite |
| Total mileage | | | 2,634 | |

Right Hon. Mr. GRAHAM: Are those the figures per year?

Hon. Mr. DANDURAND: Per year.

The situation with respect to thin-traffic branch lines is as follows:

| | C.N.R. Mileage | C.N.R. Estimated annual savings | C.P.R. Mileage | C.P.R. Savings unknown |
|---|---|---|---|---|
| Applications granted | 252 | $261,000 | 80 | .... |
| Applications denied | 271 | 186,000 | 40 | .... |
| Applications withdrawn | 38 | 10,000 | Nil | .... |
| Applications awaiting decision of Board of Railway Commissioners | 16 | 8,000 | Nil | .... |
| Applications on which action deferred | 22 | 20,000 | Nil | .... |
| Total | 599 | $485,000 | 120 | .... |

From the foregoing figures it will be noted that the economies resulting from mileage abandonments actually accomplished have been $1,087 per mile—the figure of my honourable friend from Montarville (Hon. Mr. Beaubien) was much higher—

Hon. Mr. BEAUBIEN: I said $2,000.

Hon. Mr. DANDURAND: —$1,087 per mile under joint arrangement, and $1,035 per mile from abandonment of thin-traffic lines. If it were possible to abandon the whole of the 5,000 odd miles included in the Canadian Pacific's unification abandonment program, the resultant economies would amount to

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120050

about $5,500,000; and as the 5,000 miles of line affected are 66 per cent Canadian National mileage, the Canadian National properties would bear the brunt of this dismemberment.

To secure the economies referred to, the consent of the Board of Railway Commissioners would, as already stated, be required in every instance, as would also the consent of the bondholders whose investment in former privately owned lines would be affected. In addition, the wholesale abandonment of struggling communities of people who have settled along our colonization railways, and established industries which would be injuriously affected, would have to be considered. The $75,000,000 saving claimed for unification takes no account of the possible demands for compensation from such sources, nor of the cost of compensating employees displaced, who are estimated to number 22,314, or seventeen per cent, on the basis of last year's pay-rolls. In addition, the cost of lifting the rails themselves would be a considerable item, and this has not been taken into consideration by the proponents of unification.

With respect to the abandonment applications of the two principal railways during the past five years, the Board of Railway Commissioners has supplied figures, from which it will be noted that the mileage of Canadian National Railways abandonments refused by the Board exceeds the mileage of the abandonments granted. The figures are as follows:

| | |
|---|---|
| Canadian National Railways— | |
| Applications for abandonment.. | 29 |
| Mileage involved.. .. .. .. .. | 614·81 |
| Mileage granted.. .. .. .. .. | 272·64 |
| Mileage pending.. .. .. .. .. | 28·52 |
| Mileage refused.. .. .. .. .. | 276·15 |
| Mileage withdrawn.. .. .. .. | 37·50 |
| Canadian Pacific Railway— | |
| Applications for abandonment.. | 9 |
| Mileage involved.. .. .. .. .. | 172·92 |
| Mileage granted.. .. .. .. .. | 117·12 |
| Mileage refused.. .. .. .. .. | 55·83 |

At the time the Canadian Pacific abandonment program was set up, proposals to abandon railway mileage did not require the approval of the Board of Railway Commissioners, but in 1933 the Railway Act was amended to read as follows:

Section 165 (a). The company may abandon the operation of any line of railway with the approval of the Board, and no company shall abandon the operation of any line of railway without such approval.

It may be opportune to indicate the difficulties that are met in the matter of co-operation by the two companies in their efforts to reduce expenses. During the session of 1934 the Minister of Railways desired to introduce bills to unify the telegraph and express services, with the consent and approval of the two railways, but he had to abandon his projects because, forsooth, of ominous rumblings which indicated that the bringing together of those two branches of the railway systems under a unified régime was regarded as the thin edge of a merger.

So much has been heard of Canadian National Railways deficits that the man in the street is usually surprised when he is told that since consolidation under the present arrangement in 1923 the system has never failed to meet its operating expenses, even during the worst years of the depression, and that at the present time it is able to achieve a net operating revenue of about $15,000,000, and to contribute, notwithstanding the uncontrolled and unregulated highway competition of recent years, more than $6,000,000 a year towards fixed charges due the public. This has been possible despite the fact that the railways constituting the Canadian National Railway System, unlike those of the Canadian Pacific Railway, were designed for operation not as a unit, but as competing systems. Furthermore, it must not be forgotten that the fixed charges of the Canadian National lines, guaranteed by the Dominion and certain of the provinces, are an inheritance from private ownership.

Inasmuch as the return of the National Railways to private management would not lessen the responsibility of the owners, the people of Canada, the question may well be asked whether it would cure our railway ills. On the contrary, any arrangement for unified management and operation would enlarge and increase the responsibility to the extent that the financial obligations of the private company were involved in it. At the present time the Government knows where it stands so far as its railway obligations are concerned. Does anyone know where it would stand under unification?

I have had occasion to repeat, after Sir Edward Beatty, that unification means permanency. One cannot retrace one's step. What will be the fate of the railways in five or ten years? My honourable friend from Montarville (Hon. Mr. Beaubien) has stated that every day the railways are losing more and more traffic to their competitors on land, on water and in the air. Then certain important questions arise. Under joint management, who would provide new capital? Who would be responsible for refunding? Who would issue the necessary security for the refunding, at maturity, of Canadian

120051

Pacific as well as Canadian National issues if business were not good? Would the Government's guarantee not be required? Under joint management, whatever happened, would the Government not be forced to furnish railway services? Would the Government not have to cover the yearly deficits? Would not the obligations of the State increase rather than diminish?

After all, the deciding factor in the railway situation is the amount of business offering. Unification would not increase railway traffic. That it would decrease present working expenses is doubtful in view of the fact that the estimated saving of $75,000,000 was predicated upon 1930 operations, and that since that time the combined operating expenditures of the two railways, even under separate management, have dropped from $382,000,000 to $286,000,000. This reduction reflects the economies which the two railways have been obliged to introduce in their own interests. It reflects also the lessened volume of business available to them. It is impossible to suppose that under any plan of operation, separate or united, an additional saving or reduction of $75,000,000 on expenditures can be made if the efficiency of the railways is to be maintained and a reasonable service provided.

Thus we arrive at the same conclusion as the Royal Commission did. The extreme competition to which that body directed attention is no longer in evidence. Both railways have learned their lesson in this matter and are co-operating whenever it is possible to do so within lines of existing legislation. Competitive branch-line construction is virtually a thing of the past, as are unwise or unnecessary hotel and steamship ventures. In 1933, when answering Mr. Beatty's point that competition and co-operation were incompatible, my right honourable friend (Right Hon. Mr. Meighen) said that as time went on the area of competition would be gradually reduced, while the area of co-operation would be proportionately enlarged.

As to hotels, I might mention in passing that an agreement has just been entered into by the two companies, to the very great advantage of each, for joint and equal use of the new Canadian National hotel at Vancouver.

Wholesale abandonment of mileage under the unification plan is recognized as being impracticable as a policy. But that fact ought not to prevent the two railways from studying abandonment projects that would not result in leaving struggling communities without railway service upon which they were dependent. In brief, the Government feels that within the confines of the present legislation, subject to the will and desire of the railway managements to co-operate, and subject also, if necessary, to the arbitral features of the Act, it will be possible to achieve whatever worth-while further economies can be achieved, without inviting by completely merging administration and operation of the railways and consolidating their physical properties the very grave potential dangers to which royal commissions have repeatedly directed attention, and with much less hardship and disturbance of the social and economic life of the country than would result from a merger of the railways.

The Government fully appreciates the gravity of the extent of assistance required to enable the Canadian National Railways to pay bond interest, and has explored every possible avenue for improvement. The results indicate clearly that any improvement possible through amalgamation or unified management would be trivial when compared with the dislocation of business that such a move would bring about. The policy of the Government will be to operate the Canadian National Railways as economically as possible and at the same time to put forward every effort to increase the volume of traffic, which is the real key to the situation. The Government is satisfied that only through increased volume of traffic can the railway problem be solved or the situation materially improved from the national viewpoint.

Now I come to the motion before us. It asks the Senate to urge Parliament to settle the railway problem of Canada at an early date. It offers no concrete proposal, nor any other kind of proposal. But its mover, my honourable friend from Montarville (Hon. Mr. Beaubien), suggests that the Government adopt the Senate's resolution of 1925. If he looks at its terms, though, he will realize that no one, not even himself, would suggest them to-day. Present conditions are not those of 1925. The honourable senator adds that, if his suggestion is not acceptable, the Government should call in the best authorities in the land to give advice. But I would ask him: What tribunal does he suggest? Has he in mind another royal commission?

Hon. Mr. CASGRAIN: They are no good.

Hon. Mr. DANDURAND: The Duff Commission was composed of the highest authorities. Its members were: Right Hon. Lord Ashfield, of London, England, Right Hon. Lyman Poore Duff, Sir Joseph W. Flavelle, Mr. Beaudry Leman, Mr. Leonor Fresnel Loree, of New York, Mr. Walter Charles Murray, and Mr. John Clarence Webster. I am convinced

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120052

that if they were reconvened to-day—and I doubt if my honourable friend or anyone else, after exploring the whole country, could suggest more capable men—they would maintain their conclusions of 1932, even under the present changed conditions. The Senate in 1933 had a public and exhaustive inquiry before adopting the Canadian National-Canadian Pacific Bill, which was based on the conclusions of that royal commission. Will the Senate in 1938 reverse its decision of 1933? Will it do so simply as a result of Sir Edward Beatty's campaign throughout the land? Will it do so without a serious inquiry, and without hearing the views and arguments of our own Canadian National executive?

My honourable friend has said that if the Government wants more light it should call in the best authorities in the land. To my mind, the best authorities are close at hand. They are charged with the execution of the will of Parliament. I refer to the members of the joint co-operative committee appointed by the two railway companies to effect economies as directed by the Act of 1933. The representatives forming that co-operative committee are: for the Canadian National, S. W. Fairweather, Director, Bureau of Economics, chairman; C. S. Gzowski, Chief Engineer of Construction, and N. B. Walton, Chief of Transportation; and, for the Canadian Pacific, H. D. Grout, Assistant to the Vice President, chairman; R. B. Jones, Assistant Engineer, and G. C. Brooks, Chief Joint Facility Accountant. This committee initiates and considers co-operative projects, and submits such definite proposals as may result to a joint executive committee composed of directors of both railways. The Canadian National representatives are S. J. Hungerford, President, H. J. Symington, K.C., and James Y. Murdock, K.C., while the Canadian Pacific is represented by Sir Edward Beatty, President, and two other directors, who at different times have been W. N. Black, and W. N. Tilley, K.C., or Ross H. McMaster. Only this joint executive committee deals with co-operative proposals that are recommended. They have to be passed upon by the board of directors of each railway, and if they involve abandonments they also require final approval and authority of the Board of Railway Commissioners.

The Senate could call these experts before one of its committees and ask them to explain what they have done, what they are doing and what they expect to do. On maps that were filed by the two companies with the Duff Commission they could show us projected abandonments. These maps are no longer secret, since they have to be presented—piecemeal, it is true—before the Railway Board when an application is made to have an abandonment approved.

If the Senate appointed a committee and it found any impediment in the way of more effective co-operation between the railways, Parliament and the public should be informed. Perhaps there is a psychological situation which should be shifted or removed.

If it were made clear that the idea of amalgamation under any form must be discarded, and that unified management would mean amalgamation, perhaps then the present campaign for amalgamation would come to an end and the Canadian Pacific authorities would devote themselves whole-heartedly to thorough application of the principles set out by the Duff Commission and in the Act of 1933, so as to bring them to full fruition. I feel that when the amalgamation idea is dropped much more rapid progress will be forthcoming.

There is one feature of this railway question which is of paramount importance. The leaders of both parties, when seeking a mandate from the people, declared their railway policy. In 1930 Mr. Bennett reached power with the flamboyant slogan, "Competition ever, amalgamation never," and this principle was embodied in the Act of 1933. He did not recede from that position in the campaign of 1935. In that campaign Mr. King, likewise, told the people that the Liberal party stands for the maintenance of the integrity of the Canadian National Railways as a publicly owned and publicly controlled service.

My honourable friend from Montarville has cited that part of the press of Canada which in 1933 supported the views of Sir Edward Beatty. But the opinions expressed by those newspapers were not heeded by the party leaders, Conservative or Liberal. In these circumstances, if any different policy is to be formulated for handling the railway problem, is it not only just and proper that it should be submitted to the people in due time? No one, surely, would suggest that the elected representatives could break faith with their mandators.

Right Hon. ARTHUR MEIGHEN: Honourable members, there is nothing that so contributes to happiness of mind and, I suppose, consequentially, to health of body, as facility in forgetting. If a man is a good forgetter he will go through life with much less anguish than if memories of the past haunt him all his days. I do not wonder that my hon. friend opposite (Hon. Mr. Dandurand) is indeed strong and rugged. Physically and intellectually he is in the pink, because he possesses that facility in a superlative degree. We have before us a resolution urging upon the administration of which he is a distinguished member the solution of our railway problem. I do not know that I have heard the horrors of that problem portrayed by anyone in more impressive language than was used by my honourable friend opposite in other days. My memory goes back a long way: I am not blessed with that capacity which he possesses to such a high degree. It goes back to 1921, when candidates who had his ardent support pictured this dominion as hurrying into the depths of bankruptcy because of the folly of the then administration in becoming, on account of assuming liabilities, the owner of properties which were its surety. They were thoroughly convinced that we should be faced with a terrific railway problem, and they ascribed all its woes, complications and troubles to public ownership. Well, sixteen years have passed. I ask my honourable friend: Does he think the railway problem of to-day presents fewer troubles and complications and a lighter challenge than it did in 1921 and 1922?

Hon. Mr. DANDURAND: I was sympathetic with my right honourable friend at the time.

Right Hon. Mr. MEIGHEN: The sympathy was expressed by opposition—which I thought was rather unfair opposition. Now that I know my honourable friend I can hardly believe he gave expression to things which I heard from his lips at that time.

Our railway problem of to-day transcends in every feature, especially its discouraging and depressing features, anything which it presented in 1921. There was nothing then even dreamed of comparable to what faces us right now. It has got worse every year since; even in the good years. In a few moments I shall recite why, as I believe it is not difficult to assess responsibility for the present situation.

My honourable friend engages to-day in a very interesting debate with Sir Edward Beatty by way of answer to the motion of the honourable senator from Montarville (Hon. Mr. Beaubien). When he ceases debating with Sir Edward Beatty he debates with himself, with his own conclusions of 1925, in attempting to show what babes in the woods the Senate committee members at that time were. In addition he pleads for the continuance of two railway systems because, in his judgment, there must be competition; yet in the very next breath he is showing that the day of competition is gone. That is not an answer to this motion.

I am glad my honourable friend said what he did about the Duff Commission. I do not know how anyone could have a different view. If ever there was a commission appointed by parliament or government which was competent for its task, it was that one; if ever there was a commission free of partisanship as between contending forces in Canada, it was the Duff Commission; and if ever a commission did its work intelligently and thoroughly, that one did. I know it did not report in favour of amalgamation. My belief is that it felt the people of Canada were not prepared for that. I do not know whether they are prepared yet. It reported in favour of something which it thought was possible and practicable, and laid down lines for getting results which it deemed so essential. In its report the commission recommended as a cardinal principle that the administration of the National Railways should be removed from governmental influence altogether; should, in fact, be answerable in future not to Government, but to Parliament. This was the considered opinion of the Duff Commission, a commission, as my honourable friend says, was composed of the very best men that could have been selected for the purpose.

During the following session the report took the form of legislation under the Canadian National-Canadian Pacific Act, supported by both houses of Parliament. This legislation implemented the report to the letter, from its first line to its last. As soon as the best available chairman of the Board could be chosen he was appointed by Order in Council.

After one year and nine months of operation the Government of which my honourable friend is a member repealed that legislation in its chief feature, took away the supremacy of Parliament and restored the supremacy of Government, and did so because of, or after, a statement by its Minister of Railways that he was not going to see the National Railways run without the influence of the Government, as it might destroy his political life.

To-day the report of the Duff Commission is in ashes as to its cardinal feature. We have now a return to governmental operation directly under the Minister of Railways, and, if my information is within fifty per cent of being correct, we have a restoration of political patronage on a scale never known before.

I 20054

Some disappointment was expressed as to the achievement of the one year and nine months' operation. That is not a long period and never could give a fair trial to any system. Surely a man of the intelligence of my honourable friend knows that. The cardinal principle of operation free from Government influence could not be tested within that time. There could be a return for only one complete year. But the principle was thrown aside. This much, though, was accomplished: a scale of precipitate indebtedness was reversed. For nine years, according to the report, in respect of annual obligations, apart entirely from obligations to the Government, we had been running behind at the rate of $50,000,000 a year, and for new capital expenditures we had run into debt to the extent of another $50,000,000. We did not get rid of all the $50,000,000 deficit in operation, though we got rid of some; but we did get rid of the whole $50,000,000 for new capital expenditures. The retirements in that year and nine months were greater than the increased capital investment.

I now assess responsibility for the mire we are in with respect to our National Railways. We had nine years of a railway orgy under Sir Henry Thornton; nine years of a railway debauch, during which we went into debt at a rate exceeding $100,000,000 a year. Yet we wonder at our railway problem!

Hon. Mr. CASGRAIN: And the Canadian Pacific, too.

Right Hon. Mr. MEIGHEN: The Canadian Pacific, pleading by way of excuse, perhaps by way of valid reason, that it had to follow the example set, had done so and suffered some of the consequences. No wonder it cannot pay dividends. Possibly it had to follow; I am not a railway man and do not know. But I do know who set the pace, who acquired roads that were worthless, who built hotels that have had to be closed for years, who built boats that had to be tied up at docks, who made the National Railways a virtual appendage of the Liberal party. I can name him now. I have told him so to his face. There lies the responsibility for our position. Increase capital charges against a system to that gigantic extent, and unless it is an industry on the ascent in the commercial world, growing in importance and in consequence, that industry is sure to be sunk. And the railway industry is not on the ascent; it is on the road down.

Someone said we cannot possibly have amalgamation because it would eliminate competition. I do not know that we can have amalgamation but I know we never should have needed it nor anything similar if we had taken the right course. However, we need never fear lack of competition. All railways to-day have competition, the like of which they have not known for a hundred years. Railways in every country have competition. They know now what competition is. They are not the commercial aristocrats they were twenty-five or thirty years ago. They have now to cater to the public as other business concerns in competition with one another have had to cater all through the decades. The railways have competition of motor trucks and buses, they have still the old competition of the lakes, and now they have the latest competition of air services. The railways will never lack competition. That is not what they are suffering from. They are suffering from a contraction of the business they can do, owing to the competition to which I have referred. The National Railways system is suffering as well from a multiplication of liabilities because of attachment to Government. The Government in office to-day is the Government that did the attaching just two years ago;—

Some Hon. SENATORS: Hear, hear.

Right Hon. Mr. MEIGHEN: —and the man chiefly responsible is the Minister of Railways.

Now let me examine the defence made by my honourable friend opposite. Apparently the leader of the Government in this House does not feel we have any very heavy or forbidding railway problem. He is not at all afraid of it to-day.

Hon. Mr. DANDURAND: I should like it to improve.

Right Hon. Mr. MEIGHEN: Yes; I do not doubt he would like it to improve. I wish he would tell us what he is doing to improve it. We have no figures from him. I know where the system was two years ago: we had all the figures then. I know at that time we were running behind somewhat less than $1,000,000 a week. We had reduced the annual deficit by $2,000,000 or $3,000,000. With that reduction the present Minister of Railways proclaimed himself wholly dissatisfied. He ridiculed such reductions as had been made in connection with the merchant marine and other services as detailed by Mr. Fullerton. Those reductions did not satisfy him at all. There was a $48,000,000 deficit to be got rid of, and he was going to amend the Act to accomplish this. Have we had a report on how much of that has been got rid of? Up to last year we had a straight four years of operation since the Act went into effect in 1933. We had the benefit of the accelerated business era. We are on the down-grade now, but up to 1937 we had had very good

I 20055

years. I should like to know the operating results to the end of 1937. The Minister of Railways was not satisfied with a reduction of $2,000,000 or so in the annual deficit and the clear wiping out of all new capital expenditures. He was going to get into the saddle and do things, and do them soon. Has he done anything under his amending Act? I cannot get any figures. I do not get any from the leader of the Government. I have not heard anything of the results for 1937. They may be somewhat better. They ought to be a great deal better, for 1937 is the best year we have had since 1928. But I venture to suggest that when they do come down they will be a disappointment to this House. I do not believe they will be satisfactory. I do believe they will show the great bulk, if not all, of the deficit of 1935 continued. If that is not a problem, then I know not how to measure one.

The honourable senator from Montarville (Hon. Mr. Beaubien), who introduced this motion, in one of the best speeches I have heard in either House in many a day, told us that taxes are the very essence of the difficulties that we hear about from hour to hour and from day to day. And they are. It is for that reason we have unemployment. The load of taxation keeps down the activity of business; it presses on us so heavily that business cannot expand; and if business cannot expand it cannot take on more labour. It is only by expansion of business and production that we can ever reduce the volume of our unemployment. Taxation is the burden that prevents that expansion. Only the day before yesterday I met in the hall of this building one of the leading men in a great industry in our province, an industry of first magnitude, carrying on business in many countries of the world. I know of no industry better or more unselfishly managed; I know of none where labour is happier. He told me the management were discouraged. They had given their lives to the expansion of the enterprise; they had given everything. "But," he said, "last year we paid $3 in taxation for every dollar we could pay our shareholders, and for the three years previous we paid $300,000 in taxation although our shareholders lost $100,000." I find now the management are buying some small Government annuities. Their courage for expansion and for more employment has gone, crushed out of them by the burden of taxation. And the main element in this burden of taxes is still our National Railways. It is a tremendous problem. If we are satisfied with the pace we are going to-day, well, I know business is not satisfied, and I know no man out of employment, if he is intelligent, can be satisfied, for it is one of the causes of his being where he is to-day.

I come back now to the Senate resolution of 1925, so frequently referred to by the honourable member from Montarville. I was not a party to that resolution. I was in the other House at the time and I think I commented somewhat severely on it there. I have not changed my views in the interim. I do not think we ever could operate on the basis of that resolution. I do not see how the members of the Senate committee then thought the railways could operate under it. The resolution provides that there shall be joint operation under a board, five of the members to be selected by one system, five by the other, and five by those ten. I do not think it is an unwise suggestion. I think the suggestion is worth consideration as a method of securing a unified directorate, if unified operation is decided on. But the other terms of the resolution seem to me utterly impossible.

Right Hon. Mr. GRAHAM: And so was that one, utterly impracticable.

Right Hon. Mr. MEIGHEN: I am not so certain of that, but I do not intend to discuss it, for the resolution as a whole could not possibly be adopted. My honourable friend opposite was a member of the Senate committee. The resolution provided that the Canadian Pacific should be guaranteed an agreed dividend on its stock. I do not see how that could have been wisely recommended even in 1925.

Hon. Mr. DANDURAND: The Canadian Pacific was earning ten per cent on its common stock at that time.

Right Hon. Mr. MEIGHEN: Then after the Canadian Pacific was paid all interest on its bonds, presumably on its preferred stock and also on its common stock, whatever was left should be applied on a valuation, to be fixed by the Government, of the Canadian National, based upon the earning capacity of the road. I am afraid not very much consideration was given to that resolution. My honourable friend has become much more thorough in his findings in the years that have intervened. Imagine unified operation with the cream all going to the one system! If there was anything left after the bonds and stock of the privately-owned system were taken care of, the other system would get it. I do ont think my words in the Commons were at all too strong to apply to a resolution such as that.

But the main essence of the findings was that there would have to be unified operation some day. I must confess I am not sure there will have to be unified operation. I have lost a lot of confidence in Government operation from practical experience of it.

Hon. Mr. CASGRAIN: Hear, hear.

Right Hon. Mr. MEIGHEN: I do not know why it should be so. There is nobody in the Dominion who should be more disappointed than I am.

Hon. Mr. CASGRAIN: That is right.

Right Hon. Mr. MEIGHEN: In England it is possible to have virtually unified operation. There they have a healthy public opinion. They have four railway systems, it is true, but the legislation under which those four system operate brings about virtual unification as we seek to get it here. I should like to get by unification something just like what they have achieved in England.

Hon. Mr. CASGRAIN: That is right.

Right Hon. Mr. MEIGHEN: But it all rests upon a certain measure of capacity of governments to keep away from undue interference.

Hon. Mr. CASGRAIN: Hear, hear.

Right Hon. Mr. MEIGHEN: They have such freedom from interference in England. We cannot get it in Canada. We struggled to get it. For that purpose we put a certain plan into operation, but it was no sooner in than it was changed by our successors. Such has been our experience from the very birth of the problem to this hour. I have for my part given up hope that you can do anything so long as you are going to have these alternate Governments, each smashing everything done by its predecessor—so long as you are going to have a return of government interference after each election—so long as you are going to have sectional appeals to the employees of the railways against a political party because it would dare even to consider anything in the nature of unified management. In England there was never such care taken of other employees as was taken of railway employees when its railway legislation was enacted. Never in any branch of industry has it been possible to show more concern for the workers. The Government took care that, no matter what happened, no employee should suffer. Whether his position was changed or he was reduced in salary, he got compensation. In every phase of the settlement the first man looked after was the employee. Nevertheless the four great railway systems have made gains and savings amounting to millions of pounds. As a result of the legislation the hundreds of railways were saved from bankruptcy, with losses which would have run into millions of pounds. Those railways have been put on a paying basis with a good return to their shareholders. That has not been done at the expense of labour, for the employees have been protected at every stage. We could do something similar in Canada if we had the same healthiness of public opinion and the same character of political appeal that they have in the old land; but we have not. If we continue the way we are doing now we shall come to something worse than unification—to something such as other countries and our provinces have come to. We cannot continue on this path.

I appeal to my honourable friend to join me in this. I hope the Senate will abandon the findings of 1925 and address itself again to the task of finding something practical and applicable, and that at least will help. I am not going to try to drive the Government into something which it is afraid will defeat it. In my heart of hearts I do not believe there is any reason in the world why it has resisted unification but fear of defeat. That would affect any Government. There is none so virtuous as to be prepared to accept defeat as the price of service. But surely we can do something to improve what exists to-day. If the returns for 1937 are up to the expectations which were advanced two years ago, very well; but I am certain they will disappoint us. If we get the same sad story, surely we can do something to help pave the way so that next session we can place on the Statute Book a law which will be an improvement on the present position.

You ask me if I am in favour of unification. I should like to think public opinion was such that it could be done, and after it was done there would not be those selfish, vile appeals to class prejudice which always seem to follow in Canada. If we had reasonable appeals and reasonable statements of fact at election time, there is not an employee of the National Railways or any other railway who would have any fear of unification. But I know we shall not have reasonable appeals, and I can see grave danger in the direction of unification when that unification is to be accompanied by a tremendous organization as an engine to defeat and destroy a political party. It should not be so, but it will be in Canada.

I ask my honourable friend to bring down at the earliest date the returns of actual results for the past year and, if he can, the results of this year—which will be a great deal worse. My honourable friend says we

120057

are moving out of the depression. The last time those words could have been used was six months ago. Since then we have been moving back down the disastrous trail. The unemployment figures given are six months old, or older than that. If we had figures up to date we should see no bright star, and we shall not until some assurance is given, not only in this country but also in a country near us, that a person can expand his business without being regarded as a public enemy.

But my point is this. We must not think things are all right because employment returns were getting better seven or eight months ago. The problem is a big one, it is right on our backs, and it will not be overcome as soon as a committee of this House is appointed, even though that committee may do its utmost to improve the situation.

Hon. F. B. BLACK: Honourable senators, after the brilliant speeches made by the two leaders of this House, I do not intend to venture any very extended remarks on the railway question. It is admitted by everybody that this is an extremely serious question, one which affects the whole economic life of Canada, and that unless some relief can be obtained from taxation we are headed, as has been said by the right honourable leader on this side (Right Hon. Mr. Meighen), in the same direction that some of our provinces have gone. We are coming to the point where the whole financial structure of Canada will be in the mud. In other words, if we continue our process of creating debt we shall have to go into bankruptcy.

The remarks of the honourable leader of the House (Hon. Mr. Dandurand) led me to believe that he would like to see this whole question considered more fully by the Senate, possibly in committee. In 1925, thirteen years ago, we had a special committee on the subject of railways. The committee sat behind closed doors, and the evidence taken was not published. The information obtained was extremely valuable, and its use in successive years would have done much to prevent the enormous railway debt which has been accumulated. I gathered from the remarks of the honourable leader opposite that he would welcome something in the nature of an investigation which might lead us to recommend, not amalgamation, not unification, but some method of joint management whereby this enormous annual deficit could be gradually reduced.

Honourable members of this Chamber do not believe that by one immediate act we can cut off $60,000,000 or $75,000,000 of expenditure, but we do believe that over a period of years it can be done. That such a thing was possible was very clearly set forth before the committee in 1925 by the heads of both the railways, and by other experts on traffic problems, who mentioned definite amounts which could be saved. I do not believe that any committee of this House which conducts its investigations along party lines will get anywhere, but it seems to me that this railway problem is one question which is large enough to bring both parties in this country together. From what I have observed of the actions of honourable members of this House since coming here, I am perfectly satisfied that they can so divest themselves of party spirit, of party antagonism or party loyalty—call it what they will—as to consider without bias the welfare of this country and the necessity of some action towards economy. I believe that they may be able to recommend to Government some solution of this railway problem which would bring about the salvation of the country.

The right honourable the leader on this side of the House (Right Hon. Mr. Meighen) stressed very strongly, and properly so, the situation which confronted Great Britain and the solution that was reached. He particularly called attention to a most important fact, namely, that not one railway employee in that country, from the highest to the lowest, suffered by the conversion of about one hundred lines into four lines. It is true that that sort of thing cannot be done in a year, or in two or three years. Through process of time there is a gradual elimination of employees. Death, advancing years, retirement, and the movement from one sphere of activity to another all take their toll. The result is that in most businesses, especially those employing large numbers of men, there is an almost complete change in personnel every ten years. I shall give you an example of that, because I do not want you to think I am exaggerating. I am interested in a business that has about 600 or 680 employees. In this business we find that there is an average change in personnel of about 10 per cent a year.

Now let us suppose, in connection with the railways, that about ten per cent of the employees drop out each year, that another ten or fifteen per cent reach a pensionable age, and that another percentage desire to change their employment. In that process the surplus will be very quickly eliminated. I do not think it would take more than three, or at the most four years, to take care of all employees who might at first be superfluous if the railways were organized in such a way as to eliminate duplication of employment.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120058

During those three or four years the employees eliminated would have to be taken care of. The means of doing that has been well demonstrated in Great Britain.

I am going to suggest for the consideration of this House the advisability of appointing a special committee to consider this railway problem—a committee which will have power to bring before it experts on traffic problems, and which, if it is unable to report this year, will be continued to the beginning of next session. This committee should be composed of the best minds of this House. It should consist of members who will give the subject before them impartial and thorough consideration, who will entirely disregard all party benefit or party injury, and whose only concern will be the reduction of taxation and debt, the improvement of our economic situation, and the welfare of Canada. With that end in view, I submit to this House the following amendment:

That all the words after "That" in the first line of the resolution proposed by the honourable senator from Montarville be stricken out, and that there be substituted therefor the words: "a committee of the Senate be appointed to inquire into and report upon the best means to relieve the country from the extremely serious railway expenditure, with power to send for persons, papers and records."

In moving this resolution I do not like to take upon myself the responsibility of even suggesting who should be the members of the committee. If such a committee is to be formed—and I hope it will be, because I believe some real good may come out of it—I think the leaders on both sides of the House might suggest the names of those who are to be its members. I have pleasure, therefore, honourable senators, in moving this amendment to the resolution now under discussion.

The Hon. the SPEAKER: Is it your pleasure, honourable members, to adopt the amendment?

Hon. Mr. MURDOCK: I would ask whether an amendment can be made to a motion of this kind?

Right Hon. Mr. MEIGHEN: Why not?

Hon. Mr. CASGRAIN: Any member can move any resolution he likes. If we do not like it we can throw it out.

Hon. Mr. BEAUBIEN: An amendment can be made to a motion.

Hon. Mr. MURDOCK: I am not taking exception to the amendment. I am just asking the question.

Right Hon. Mr. MEIGHEN: I do not know of any reason why this motion is not amendable, like any other.

Hon. Mr. CASGRAIN: It is a resolution.

Right Hon. Mr. GRAHAM: May I ask a question? Is it not a mistake to confine the inquiry to expenditure? As a matter of fact, the size of the expenditure might not be a serious matter. If the business of the railways increased, the expenditure also would of necessity have to be increased from a business standpoint. I think the wording of the resolution should be carefully looked into.

Hon. Mr. DANDURAND: I would suggest that the honourable gentleman (Hon. Mr. Black) postpone his amendment till the next sitting, so that we may see what form is best to cover what he intends to cover.

Hon. Mr. BLACK: I have no objection whatever to that suggestion. The amendment was drawn in such a way as to make it as brief and as broad as possible. The word "expenditure" certainly covers the expenditure of the railway. However, with the leave of my seconder, I am quite ready to have this regarded as a notice that I propose to move an amendment at the next sitting. Then we shall have time to consider more carefully the wording of the amendment.

Right Hon. Mr. MEIGHEN: The amendment is in exactly the same words as the motion of Honourable Senator David in 1925, with the single exception that the adjective before the word "expenditure" is "extremely serious" instead of "ruinous." This is a great tribute to the moderation of my honourable friend (Hon. Mr. Black).

Hon. Mr. DANDURAND: I should like to examine into the form of the amendment, because I think the committee, in order to carry out the wish expressed by Parliament in the Act of 1933, might well inquire into what is going on. I am not quite sure the amendment as proposed would cover that. If my honourable friend will simply treat this as a notice of motion we shall have time to consider the extent of the mandate to be given to the committee.

Hon. Mr. BLACK: I shall be very glad indeed to do what has been suggested, because unless we have harmony in our endeavour to secure an inquiry we shall not get anywhere with the inquiry itself.

The Hon. the SPEAKER: Has the honourable member (Hon. Mr. Black) leave to withdraw his amendment?

The proposed amendment was withdrawn.

Hon. Mr. BLACK: I move the adjournment of the debate until Tuesday next.

The motion was agreed to.

The Senate adjourned until to-morrow at 3 p.m.

# Unemployment Linked To Rail Deficits In Canada

## Meighen Makes Unification Plea

### Tory Senator Contends Tax Burden Is Keeping Business From Expanding, With Consequent Curtailment in Production and Work

### Directs Criticism at Dunning

### System Under Which Railways in Britain Co-operate Recommended for Canada; Safeguards for Employes Stressed in Speech

By NORMAN MacLEOD
Ottawa Bureau of The Windsor Daily Star

OTTAWA, March 10.—Climaxing what federal circles regard as the most forthright and authoritative presentation of Canada's railway problem to Parliament for many sessions, Right Hon. Arthur Meighen told the Senate yesterday that unemployment figures in Canada will not improve "until some assurance is given, not only in this country, but also in another country near us, that it is going to be possible to expand in business without being regarded as a public enemy."

#### Deficits and Jobs

THE CONSERVATIVE leader in the Upper House linked the railway deficits, which the treasury has had over the past score of years to a total of hundreds of millions of dollars, to the taxation and unemployment situation which the Dominion is facing today and declared:

**"Business is not satisfied (with the railway burden) and I know no man out of employment, if he is intelligent, will be satisfied, for it is one of the causes of his being where he is today."**

While confessing that "I have lost a lot of confidence in government operation from practical experience of it," the Conservative Senate leader pleaded for unification and cited England's successful experience with it. No workers had ever been more generously dealt with, he declared, than the transport workers in Great Britain whom unification had affected. Yet in spite of the far-reaching provision that had been made for them, hundreds of millions of dollars had been saved by the policy.

"I should like to get by unification," Mr. Meighen declared, "something just like they have achieved in England. If we continue the way we are doing now we shall come to something worse than unification, to something like other countries and our provinces have come to. We cannot continue in this path."

#### Beaubien Motion

Mr. Meighen was speaking on the motion introduced some weeks ago in the Senate by Hon. C. P. Beaubien to have a special committee of the Upper House consider the country's railway problem. While not averse to naming a committee, the Conservative leader saw little reason to expect that it would do much good. In his view the great mistake that had been made with respect to the railway situation was the repeal of the co-operate legislation following the report of the late Duff Commission, which had been scrapped by the present administration allegedly for purposes of political power and patronage.

**"If my information is within 50 per cent. of being correct," the Conservative Senate leader declared, "we have a restoration of political patronage on a scale never known before."**

He dealt vigorously and without gloves—except that he named no name—in ascribing responsibility for the growth of the railway problem to its present proportions.

"I know," he declared strongly, "who acquired roads that were worthless; I know who built hotels that have had to be closed for years; I know who built boats that had to be tied up at docks; I know who made the National Railways a virtual appendage of the Liberal Party. I can name him now. I told him so to his face."

During the greater part of the period to which Mr. Meighen was referring Hon. Charles A. Dunning, present minister of finance, who yesterday was the champion of sound finance against Social Credit in the House of Commons, was minister of railways.

#### Text of Speech

The text of Mr. Meighen's speech follows:

"The main principle of the Duff Commission report was that the administration of this road should be removed from governmental influences altogether, and to achieve that result the commission recommended that if the report were implemented by legislation the management of the road should no longer be answerable to governments, but to Parliament.

"As soon as possible the following session the report of that commission took the form of legislation under the Canadian National-Canadian Pacific Act, supported by both Houses of Parliament. The report was implemented to the letter from its first line to its last.

"After one year and nine months of operation the government, of which my honorable friend (Mr. Dandurand) is a member, repealed that legislation in its chief feature, restored the supremacy of government, took away the supremacy of Parliament, and did so because of or following language of its minister of railways, that he was not going to see the National railways run without the influence of government as it might destroy his political life.

#### "Report Is in Ashes"

"That commission's report today is in ashes as to its main, central, cardinal feature. We have today a return of governmental operation directly under the minister of railways, and if my information is within 50 per cent. of being correct, we have a restoration of political patronage on a scale never known before.

**"Some disappointment was expressed as to the achievement of the one year and nine months operation. That is not a long period. It never would give a fair trial to any system. There could only have been the return for one complete year. But it was thrown aside.**

"This, though, was accomplished: a scale of precipitate indebtedness was reversed. For nine years, according to the report, we ran behind in the taking care of annual obligations, outside entirely of obligations to the government, at the rate of $50,000,000 a year, and we ran in debt besides $50,000,000 more for new capital expenditure. We did not get rid of the $50,000,000 we were running behind in operation, but we did get rid of the whole $50,000,000 of new capital expenditure. The retirements in that year and nine months were greater than the increased capital investment.

#### Places Responsibility

"I assess now responsibility for the mire we are in with respect to our National railways. We had nine years of a railway orgy under Sir Henry Thornton. We had nine years of railway debauch, during which years we went into debt at the rate of over $100,000,000 a year. And then we wonder at our railway problem."

Senator Casgrain: "And the Canadian Pacific, too."

Senator Meighen: "The Canadian Pacific, pleading by way of excuse, perhaps by way of valid reason, I know not, they had to do it because of the example set them, they followed its pursuit and suffered some of the consequences. That is correct. No wonder they cannot pay dividends. Possibly they had to follow—I do not know, I am not a railway man—but I know who set the pace; I know who acquired roads that were worthless; I know who built hotels that have had to be closed for years; I know who built boats that had to be tied up at docks; I know who made the National railways a virtual appendage of the Liberal Party. I can name him now. I told him so to his face. There lies the responsibility for our position.

**"Some one said we cannot possibly have amalgamation because it would eliminate competition. I do not know that we can have amalgamation, but we never would have needed it or anything similar if we had taken the right course. But we need never fear lack of competition. All railways today have competition the like of which they have not known for one hundred years.**

"The railways have competition of motor trucks and buses; they have the old competition of the lakes, and now they have competition of the air services. The railways will never lack competition. That is not what they are suffering from. They are suffering from a contraction of the business they can do, owing to the competition to which I have referred. The National railways system is suffering as well from multiplication of liabilities because of attachment to government. The government in office today is the government that did the attaching just two years ago."

Some honorable senators: "Hear, hear."

Senator Meighen: "And the man chiefly responsible is the minister of railways.

"Now let me examine the defense made by my honorable friend opposite. I know where the system was two years ago; we had all the figures then. I know at that time we were running behind something less than $1,000,000 a week. We had reduced the annual deficit by $2,000,000 or $3,000,000; very little. With that reduction the present minister of railways proclaimed himself wholly dissatisfied. He was going to get into the saddle and do things, and do them soon. Has he got anything done under his amending act? I cannot get any figures. I do not get any from the leader of the government. I have not heard anything of the results for 1937. They may be somewhat better. They ought to be a great deal better, for 1937 is the best year we have had since 1928. But I venture to suggest when they do come they will be a disappointment to this House.

#### Taxes and Unemployment

"The honorable senator from Montarville (Beaubien) who introduced this motion is one of the best speeches I have heard in either House in many a day, told us that taxes are the very essence of the difficulties that we bear about from hour to hour and day to day. And they are. That is the reason we have unemployment.

**"The load of taxation keeps down the activity of business. The load of taxation presses on us so heavily that it cannot expand, and if business cannot expand it cannot take on more later. It is only by expansion of business and production that we can ever reduce the volume of our unemployment. Taxation is the burden that prevents that expansion.**

"Only the day before yesterday I met in the hall of this building one of the leading men in a great industry in our province, an industry of certain magnitude, carrying on business in many countries of the world. I know of none better managed; I know of none more unselfishly managed; I know of none where labor is happier. He told me the management were discouraged. They had given their lives to the expansion of that enterprise; they have given everything. 'But,' he said, 'last year we paid $3 in taxation for every dollar we could pay our shareholders; and for the three years before we paid $300,000 in taxation although our shareholders lost $100,000. I find now the management is buying some small government annuities.'

#### Losing Courage

"Their courage for expansion and for more employment has gone. It is being crushed out of them out of the burden of taxation. And the main element in our burden of taxes is still our national railways.

"I say it is a tremendous problem. If we are satisfied with the pace we are going today, well, I know business is not satisfied, and I know no man out of employment, if he is intelligent, will be satisfied, for it is one of the causes of his being where he is today.

"I come back now to the resolution of 1925, so frequently referred to by the honorable representative for Montarville. I was not a party to that resolution. I was in the other House at the time and I think I commented somewhat severely on it there. I have not changed my views in the interim. I do not think we ever could operate on the basis of that resolution.

"I do not see how the members of the committee then thought they could operate under it. The resolution provides that there shall be a joint operation under a joint board, five of the members selected by one system, five by the other and five by those 10. I do not think it is an unwise suggestion. I think it is worth consideration as a method of a unified directorate, if unified operation is decided on. But the other terms of the resolution seem to me utterly impossible.

"After the Canadian Pacific was paid all interest on its bonds—presumably on its preferred stock and then on its common stock—whatever was left should be applied on the valuation to be fixed by the government upon the Canadian National, based upon the earning capacity of the road.

#### One to Get "Cream"

**"Imagine unified operation with the cream all going to the one system, and if there was anything left the other system would get it after the bonds and stock of the privately-owned system were taken care of. I do not think my words in the Commons were at all to strong to apply to a resolution such as that.**

"But the main essence of the findings was there would have to be unified operation some day. I must confess I am not sure there will have to be unified operation. I have lost a lot of confidence in government operation from practical experience of it.

Senator Casgrain: "Hear, hear."

Senator Meighen: "I do not know why it should be so. There is nobody in the Dominion who should be more disappointed than I am.

Senator Casgrain: "That is right."

#### System in England

Senator Meighen: "In England it is possible to have virtually unified operation. There they have a healthy public opinion. They have four railway systems, it is true, but the legislation under which those four systems operate brings about virtual unification as we seek to get it. I should like to get by unification something just like they have achieved in England."

Senator Casgrain: "That is right."

Senator Meighen: "But it all rests upon a certain measure of capacity of government to keep away from undue interference."

Senator Casgrain: "Hear, hear."

Senator Meighen: "They have that in England. We cannot get it in Canada. We struggled to get it. We put it in operation for a time but it was no sooner in than it was changed. That has been our experience from the very birth of the problem to this hour. I have for my part given up hope that you can do anything so long as you are going to have these alternative governments smashing everything that has been done by the preceding government. So long as you are going to have a return of government interference after each election, so long you are going to have sectional appeals to the employes of the railways against a party because it would even dare to consider anything in the nature of unified management.

#### Care of Employes

"Why, in England, when the railway legislation was enacted, there never was such care taken of employes of any industry as was taken of the railway employes. Never in any other branch of industry has it been possible to show such concern for the workers the government took care, no matter what happened, that no employe should suffer. No matter whether his position was changed or he was reduced in salary, he got compensation. In every sphere of the settlement the first man looked after was the employe. Nevertheless the railways made gains and savings in millions of pounds. As a result of the legislation the railways were saved from bankruptcy, with losses which would have run into millions of pounds. These railways have been put on a paying basis with a good return to their shareholders.

"That has not been done at the expense of labor; the employes have been protected at every stage. We could do something similar in Canada if we had the same healthiness of public opinion and the same character of political appeal that they have in the Old Land; but we have not it. If we continue the way we are doing now we shall come to something worse than unification, to something like other countries and our provinces have come to. We cannot continue on this path.

**"I make this appeal to my honorable friend to join me in this. I hope the Senate will abandon the findings of 1925, and will adjust itself again to the task of finding something that will be practical and applicable, and that at least will help.**

#### Sees Fear of Defeat

"I am not going to try to drive the government into something which they are afraid will defeat them, for in my heart of hearts I do not believe there is any other reason in the world why they resisted unification except fear of defeat. That will affect any government. There is none so virtuous as to be prepared to accept defeat as the price of service. But surely we can do something to improve what exists today. If we get returns for 1937 that are up to expectations which were advanced two years ago, very well, but I am certain they will disappoint us. If we get the same sad story, surely we can do something to help to pave the way so that next session we can place on the statute books a law that will be an improvement on the present position.

"You ask me if I am in favor of unification. I should like to think we had public opinion so it could be done, and after it was done there would not be those selfish vile appeals to class which always seem to follow in Canada. If we had reasonable appeals at election time and reasonable statement of facts, there is not an employe of the National railways or any other railway who would have any fear of unification. But I know we shall not have that reasonable appeal, and I can see grave danger in the direction of unification when that unification is to be accompanied by a tremendous organization as an engine to defeat and destroy a political party. It should not be so, but it will be in Canada.

"I ask my honorable friend at the earliest date to bring the returns down of the actual results for the year 1937, and, if he can, the results of this year, for they are going to be a great deal worse.

#### Alleges Recession

"My honorable friend says we are moving out of the depression. He is talking just six months behind. That is the last time those words could have been used. We have been moving back down the disastrous trail for six months. The unemployment figures given are six months old, or more than that. If we had them up to date they would be no bright star, and they are not going to be until some assurance is given, not only in this country but in another country near us, that it is going to be possible to expand in business without being regarded as a public enemy.

"But my point is that we must not think things are all right because employment returns were getting better seven or eight months ago.

"The problem is a big one; it is right on our backs; and it is not going to be solved the minute a committee of this House is appointed, even though that committee does its utmost to improve the situation."

#### CONDEMN ORNAMENTS

Sharp ornaments on automobiles have been condemned by the Pan-American Medical Association.

## Fascists Meet In Basements

### Organizer Claims Party Has 12,000 Followers in This Province

TORONTO, March 10.—The Fascist organization in Ontario has 12,000 members, all but 3,000 of them in Toronto, said Joseph C. Farr, organizer and chairman of the Canadian Nationalist Party, yesterday following a preliminary organization tour of the province.

Farr, 38, and Irish born, said he believed Jewish financiers were behind all Communist agitation.

"I have nothing against the Jew individually, but I am against them collectively," he said.

Ontario membership in the Canadian Nationalist Party was made up of lawyers, doctors and business men, the majority between 18 and 35 years old, Farr said. They pay a subscription to the party of 25 cents monthly.

Farr also holds the position of chairman of the council of the Nationalist Social Christian Party, headed by Adrien Arcand, of Montreal.

Without headquarters, members of the Nationalist party hold meetings privately in the basements of private homes. Farr said they hoped to hold a public meeting shortly.

## *Paintings Found Damaged Slightly*

OTTAWA, March 10.—Director Eric Brown of the National Gallery of Canada said no damage of any consequence, not enough to make a claim for insurance, had been done to paintings recently loaned to Smith's Falls Art Association but now returned to the gallery.

A Smith's Falls despatch said the art association had offered a reward for information leading to the finding of those responsible for the damage to the three pictures.

"One or two of the paintings had minor damages," said Mr. Brown. "This frequently happens when we loan pictures. It is of no consequence to us."

## Woman's Hair Found on Axe

### EVIDENCE AT TRIAL

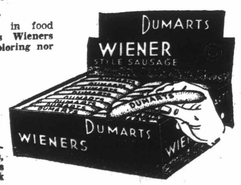
### Munchuk Opens Second Fight for Life

ST. CATHARINES, March 10.—An axe found under steps at the rear of William Munchuk's home had gray hair, "longer than a man's," on the blunt end of it, Constable Thomas George of the St. Catharines police force testified yesterday in Munchuk's trial on a charge of murder.

Munchuk is charged with the murder of 66-year-old Mrs. Amy Seabright, a neighbor, June 8, 1936. He was found guilty and sentenced to be hanged last autumn but on appeal was granted a new trial. With his wife, Annie Munchuk, he previously had been tried for the murder of John Seabright, wife of Amy. Mrs. Munchuk was acquitted and Munchuk was sentenced to 20 years' imprisonment on a reduced charge of manslaughter.

A collection of four axes, a hammer and a shovel was produced yesterday before Mr. Justice J. A. Hope and an Ontario Supreme Court jury. Munchuk is alleged to have killed Mrs. Seabright with one of the axes after having fatally injured her husband in a similar manner. Mr. and Mrs. Seabright died during a quarrel with the Munchuks over a fence dividing the families' properties.

Evidence given in Munchuk's last trial by George O'Rorke, city policeman who died last month, was read into court records yesterday. O'Rorke had described finding three axes in the cellar of the Munchuk home. One axe with a long handle apparently had been wiped shortly before it was found, he had said. Another, found under a back step, had hair on the blunt end.



George told of arresting Munchuk at his home and also described the axe with hair on it, considerably smaller than the long-handled one, he said. The exhibits were identified by Inspector Duncan Brown of the city police force who took charge of them at the scene of the crime.

#### RUSH PLANE ENGINES

Manufacture of airplane engines is being pushed in Italy.

Once Tried....
YOU WILL INSIST ON—
DUMARTS
ANGOSTURA Flavored
WIENERS

- Flavored with ANGOSTURA— Delicious, distinctive flavor—used by famous chefs—recognized as the world's finest flavor. Exclusive to Dumarts.
- GOVERNMENT INSPECTED— Made from choice meats—all Government Inspected for your protection. Insist on Government Inspected Meats.
- FILTERED SMOKE— New modern process of smoking Wieners, removes smudge, soot and harsh irritants present in "raw" smoke—adds flavor—exclusive to Dumarts.
- WHOLESOME— Nourishing—high in food value. Dumarts Wieners contain neither coloring nor preservatives.
- IDENTIFIED— Every Dumarts Wiener carries Dumarts name—look for the name branding.

Once tried you will always insist on Dumarts, order by name "Dumarts Identified Wieners"—look for the name branding.

DUMARTS FINER QUALITY—AT NO EXTRA COST

USED by 100,000 Women in England
Jackson's NRG Bread Simplicity Diet
NOW AVAILABLE TO YOU!

*It's true* that over 100,000 women in England went on a bread-and-butter slimming diet; that the majority of those who obeyed the simple rules *reduced* their weights.

*It's true* that Jackson's introduced the bread-and-butter slimming diet in Canada by inviting 16 Hamilton women to follow the diet and eat Jackson's new NRG white loaf—the bread which Jackson's developed for this purpose.

*It's true* that every one of these 16 women lost weight in bust, hip and waist; that they felt better, and looked better.

*It's true* that Jackson's NRG Bread has ingredients scientifically blended in perfect proportion so as to be a weight-reducing factor.

FINALLY, *it's true*—that if YOU are overweight, Jackson's NRG Bread, eaten according to the simple rules of Jackson's Bread-and-Butter Simplicity Diet, WILL lose pounds for you—give you a slimmer, more youthful figure. You'll experience no discomfort—no weakness—no fatigue.

Every member of the family will enjoy this amazing and nutritious loaf—a bread that will maintain your energy at a high level and yet costs no more than ordinary bread.

Order this new, hearth-baked loaf from your Jackson salesman today. Ask him for folder giving full instructions on Jackson's Simplicity Diet. J338

CONFIDENCE REGAINED

It is common knowledge that overweight places a serious physical handicap on a woman, and indeed on a man also. Statistics provided by life insurance companies indicate that life expectancy is reduced, and that energy is lacking which would be available at the proper weight.

One of the principal benefits of Jackson's Bread-and-Butter Simplicity Diet, with NRG Bread, is psychological. With better figures and a knowledge of better health, women who have tested this diet find that they are happier than they were before. The dangerous feeling of self-pity is replaced by a new pride, self-confidence, and zest for living. Just as a woman realizes that she is again physically attractive, she gains confidence from the fact that she is liked by her friends and her family.

## Britain Buys Most Of Canada's Fruit

OTTAWA, March 10.—The United Kingdom was Canada's best customer for fresh fruits during January with purchases worth $940,958 of a total of $1,016,567 exported, the Dominion Bureau of Statistics reported yesterday. Fresh apples formed the bulk of the exports with a value of $1,007,134, compared with $907,186 worth exported in the same month a year ago.

### 80 YEARS IN CHOIR

Charles Wills has completed 80 years as singer in the church choir in Bridge, England.

## Ex-M.P. in Bruce To Leave Farm

WALKERTON, March 10.—Walter Findlay, a well-known public figure of this district, who represented South Bruce in the House of commons from 1921 to 1925, during the days of the U. F. O. Government, has decided to retire from active farming and agricultural pursuits.

He has leared the homestead of 200 acres, situated on lot 14, concession 15, Brant Township, for a term of years to his neighbor, Richard Ostergoff.

## Upside Down Writer Smart

### Chicago Inversionist Best Speller in His Fifth Grade Room

CHICAGO, March 10.—Frank Balek, 11, is out in front scholastically even if he does write upside down, backwards, and from bottom to top instead of from top to bottom.

Several years ago teachers at the Fulton elementary school despaired of the progress of Frank, an inversionist, but his principal, William R. Bowlin, disclosed yesterday that Frank is the best speller in his fifth grade room.

"He found his own way out of his difficulties," Bowlin said. "He originated a way of writing upside down. At the institute of juvenile research where we took him, they had never seen such development."

Frank used to read from right to left. Now he reads normally, but his writing is the reverse of everything normal. Clutching his pencil in his left hand he writes rapidly from right to left, beginning at the lower right hand corner. His words appear upside down to him but appear rightside up to anyone facing him.

Although his reading is normal he can also read when the printing is turned upside down.

Bowlin said Frank's intelligence quotient was 95.

## Outlines Rise In Milk Price

### Euler Shows Increase from $1.54 Per Cwt. to $2.19 in Five Years

OTTAWA, March 10.—Average price of fresh milk in 15 Canadian cities rose from $1.54 a hundredweight in 1933 to $2.19 in January this year, Trade Minister Euler said in the House of Commons yesterday answering a question by Liguori Lacomben, Liberal, Laval-Two Mountains.

Fresh milk delivered at railway stations in Montreal was priced at $142 a hundredweight in 1933 and increased each year to $2.20 in January this year. In Quebec city, the price rose from $1.38 in 1933 to $2.14 last January.

Mr. Euler said average price for first quality creamery butter in six Canadian cities in 1933 was 22.8 cents a pound wholesale and rose to 35.3 cents between 1933 and last January. Prices in Montreal rose from 23.3 cents in 1933 to 35.3 cents in January.

Total value of dairy products in Canada in 1933 was $170,828,667 and increased to $208,238,128 in 1936, the minister said.

# Tory King-Makers Are Busy in Ottawa

## Three Who Receive Most Attention on Parliament Hill Are General McRae, Hon. H. H. Stevens and Harold Daley

Continued From Page One, This Section

of the ill-fated Reconstruction Party in the 1935 election—and presumably the custodian of the 300,000 votes which that party polled and upon which all political parties are casting avid eyes as the time of another general election approaches.

Parliament Hill recognizes that these three individuals may very well play decisive roles in the drama of Conservative leadership that is now being enacted.

### ONE QUESTION

The question is largely the extent to which this influential triumvirate decides to make common cause in the present situation. They have all been closely together in the past. The part that General McRae has played is a matter of somewhat spectacular political history. Mr. Daley is perhaps less well-known to the public, but he occupied at one time in the councils of Conservatism in the capital, a position not dissimilar to that which the late widely-respected Alex Smith held in Liberal circles. And he is still the sort of figure with which political imaginations in the capital like to conjure. Finally, he has always been a close associate and confidant of Hon. "Harry" Stevens.

Unquestionably, these relationships of the past could mean much in the present situation if the parties concerned chose to revive them. The rumor around Parliament Hill, furthermore—it may or may not have any factual basis—is that the triumvirate is on the way to an understanding.

General McRae's quarrel with Mr. Bennett is a matter of common knowledge in federal circles, and while the retiring party chieftain referred to it in the conference of the past weekend in a vein commonly regarded as intended to conciliate the general, there are those who wonder if the former organiner might not be prepared to support a drive to place Hon. Harry Stevens in the party leadership as an appropriate measure of revenge. The suggestion is not seriously credited, however, largely because of the prevailing belief that under no circumstances is it possible for Mr. Stevens to capture the leadership. The debacle that he caused in the Conservative Party with his Reconstruction Party movement is too recent and of too fresh memory, it is considered, to be overlooked by the delegates to the forthcoming gathering.

### POSSIBILITY SEEN

What is regarded as a serious possibility, however, is that Messrs. McRae, Daley and Stevens might agree upon a Conservative leader who would look upon Mr. Stevens as his first lieutenant. Who would that leader be? Would it be Hon. W. D. Herridge? It is in connection with speculation such as the foregoing that the Washington reformer derives his principal importance as a contender at the forthcoming convention.

Undoubtedly Hon. Dr. R. J. Manion is the earliest aspirant in the field. In thus coming out in the open, he is regarded on Parliament Hill as having committed a tactical blunder which should disqualify him from any aspirations to direct Tory strategy. He has simply raised his head as the one to receive the clubs that were ready from numerous quarters for any aspirant. What will be done in the next few months to Dr. Manion and his Liberal past is something that conceivably should arouse the interest of the Humane Society; it can only be of incidental ultimate interest to Conservatives.

In the meantime, the situation on Parliament Hill is this: If anyone gets up and declares that Tim Buck is to become leader of the Conservative Party, it is not safe to argue with him. For nobody knows.

## Question Him

### Second Suspect Held in Smash and Grab Robbery

Raymond Lauzon, 34, of Tecumseh, was arrested this morning by Detective Sergeant Campbell and Detective Hill. He is being held at headquarters for questioning in connection with the robbery, early yesterday morning, of the Studebaker jewelry shop, 50 London street west, where watches, rings and other articles valued at more than $200 were taken from the display window.

Joseph Donoghue, 32, of 819 Assumption street, was arrested on the street near the store a short time after the store window was broken by a brick. Police say they found two rings and a wrist watch in his pockets.

## *Housing Problem Worrying Mayor*

Mayor Wigle told the board of control today that certain companies were notifying welfare tenants they will have to vacate when warmer weather arrives. He wondered whether another application should be made to the provincial government regarding higher rentals.

Con. Reaume recalled that Premier Hepburn had suggested that "paying tenants" now occupying city-owned houses should move elsewhere, so that welfare families could take over.

"There's some merit in that, too," said Con. Reaume.

In view of the housing situation, the matter is to receive further discussion in the near future.

## Assistant Posties

AUCKLAND, N. Z., March 10.—High school boys are being employed as assistant postmen during rush periods in Auckland, New Zealand, the lads accompanying the postmen on their routes and delivering mail on one side of the street while the postmen do so on the other.

## Board Agrees To Payment

### Bank Will Receive $11,448 Award for Reaume Property

### Holds Mortgage

### Was Used in Construction of Drouillard Road Subway

Board of control today decided to pay to the Provincial Bank of Canada the award of $11,448 which had been granted for the J. D. and Celeste Reaume property in connection with the construction of the Drouillard road subway. The bank holds a mortgage.

### WILL BE REGISTERED

On the advice of City Treasurer Cock, the property is to be registered and come into the city's possession. Mr. Cock felt that $1,600 should be deducted from the total sum as that amount had been proposed for removal of the residence which, he said, had not been moved.

However, Mayor Wigle pointed out that the $1,600 item had not been specified in the terms of the award, nor in the judgment of Judge Coughlin in setting the aggregate amount.

Representing the bank, J. E. McKeon declared that the bank's assignment had prior right over the arrears of taxes, which amounted to $4,497. Property Manager K. E. Shaw recently appraised the premises at Edna avenue and Drouillard road at $2,795.

Mr. McKeon stated that if the property were to remain on the tax roll, it would continue in the name of Reaume subject to the bank's mortgage, but the bank was not anxious to acquire it.

### BALANCE IN CASH

Less than half of the award is to be paid in debentures and the balance in cash, $2,500 already having been advanced from surplus funds. The matter has no bearing on civic estimates because the former City of East Windsor had established a special account to meet such awards.

Con. Reaume at first expressed the opinion that the property should remain on the tax roll.

"But we will have no difficulty in selling it," claimed Con. Cooper.

Con. Reaume: "We should not go into the selling business."

Con. Cooper: "We were offered $1,800 for a piece of property near this one not half the size and turned it down."

Con. Whyte wondered why the Reaume premises had not been registered before, and Con. Cooper explained that the issue over the award had delayed such action.

When Mr. Cock advised the board to register the property, Con. Reaume said he would acquiesce and change his former view that it should remain on the tax roll.

## Had Knife And "Billy"

### Cyril Jenkins Jailed for Threatening His Father-in-Law

### Gets Seven Days

### Charges Accuser With "Meddling in His Affairs"

Cyril Jenkins, of Sandwich West, will have a full week in the quiet atmosphere of the county jail to consider a more peaceful method of preventing his father-in-law from "meddling in his affairs," than that of threatening him with a butcher knife and a blackjack.

### APPEARS SURPRISED

In county police court Magistrate Hanrahan sentenced Jenkins to seven days when he found him guilty of the charge of "threatening bodily harm," laid by his father-in-law, Timothy Gray, also of Sandwich West.

Jenkins appeared surprised to learn that he was alleged to have made "passes" at his relative with the carving utensil and the blackjack. He admitted having threatened Mr. Gray with a "black stick which might have looked like a blackjack," but contended that it was the only weapon used.

"He's got it in for me because he thinks I tipped off the cops about his still," Jenkins suggested as a reason for his wife's parent's action in bringing him into court. "It cost him $100, but I didn't squeal. What do I care how much whisky he makes," he added.

Gray testified that Jenkins accosted him in the centre of the street and started waving at him with the knife and blackjack.

"He said he'd cut my guts out," stated the father-in-law.

### DENIES HE HAD TROUBLE

Although Gray denied he had had any trouble with Jenkins prior to the day of the alleged assault, the son-in-law insisted that his accuser had consistently interfered with his domestic life.

"We used to live together but my wife and I had to leave two months ago because he wouldn't leave us alone. He insisted on meddling with our affairs after we left his home so I tried to scare him with the stick," Jenkins maintained.

"You have never been in trouble before have you?" Cecil Croll, his counsel, asked Jenkins.

"Not of any importance," was the reply.

"You haven't any previous record?" emphasized Mr. Croll.

"Not to amount to anything," answered Jenkins.

### STILL NOT SURE

"You haven't any previous record," repeated Mr. Croll.

"No, I guess not," replied Jenkins.

Mr. Croll made an earnest plea on Jenkins' behalf asking that he be placed on suspended sentence.

"It is apparently one of those domestic wrangles. There were no injuries suffered," Mr. Croll pointed out. "Jenkins is of an excitable nature and such a characteristic and a knife prove a dangerous combination. I think it would be for his own good if he is shown that he can't use such a weapon," remarked Magistrate Hanrahan as he passed sentence.

HALT the Ravages of Premature Old Age

*The Unnecessary Devitalization of Premature Old Age May Be Avoided Through the Simple Use of Phyllosan*

All of us — especially those past forty — pay a high price for the high-tension lives we lead. The times we live in subject our bodies and our nervous systems to a constant, gruelling strain. Usually the strain doesn't begin to tell until late. Then, at the very age at which we should be able to begin to enjoy life to the full, devitalization begins to take its toll. First, a gradual loss of interest in work and leisure and those close to us — then growing discouragement — fatigue — "nerves". Every petty duty assumes the proportions of an overwhelming, impossible task . . . nothing any longer seems right . . . then growing irritability — loss of true companionship — fear of the future.

But, fortunately, you don't have to "just sit by" and feel yourself slipping out of the mainstream of life and activity — you don't have to submit to the ravages of premature old age. The experience of thousands of men and women shows that we can avoid unnecessary devitalization — and help win back vigour and stamina—through the simple use of PHYLLOSAN tablets.

*"The effect of Phyllosan tablets upon me is more gratifying than I can express — making a vast improvement in my appearance and giving me fresh life and energy. I feel and look years younger!"*

*"I have derived great benefit from the use of Phyllosan tablets. I feel much more vigorous and bright — and, apparently look it, because a woman who came to stay with me treated me almost as a person of 25 or 30. She could scarcely be brought to believe that I am forty-five."*

(Original letters can be inspected on application.)

Phyllosan (*pronounced Fill-O-San*) is the discovery of one of the world's foremost physicians, Dr. E. Buergi, Professor of Medicine at the University of Berne, Switzerland. It contains no habit-forming drugs, no stimulants. A product whose primary ingredient comes from purely natural sources, Phyllosan cooperates with the natural processes of your body to strengthen your nerves, enrich your blood, rebuild all your bodily energies. And the beneficial effects are not temporary but LASTING.

Phyllosan is so simple to take: Just two tiny tablets before meals. Take them regularly and the results will surprise you. Don't waste precious time, don't put off helping yourself to a happier, more vigorous life. Join the thousands of men and women who have, through the simple use of Phyllosan, won themselves buoyant energy and lasting vitality. Start taking Phyllosan tablets today!

*Buy* PHYLLOSAN *from your druggist . . . 85c. ($1.50 for double quantity).*

*Distributed by:*
McGILLIVRAY BROS., LTD., TORONTO

'PHYLLOSAN'
(PRONOUNCED FILL-O-SAN)
*The word 'Phyllosan' is a registered trade mark*

PHYLLOSAN TABLETS *help enrich your blood . . . strengthen your nerves . . . build up your reserves of vital power. Recommended by many physicians, especially to those past 40.*

## Chief Gives 1937 Report

### Shows Fifteen Killed in Windsor as Compared With 11 in 1936

CONTINUED FROM PAGE THREE THIS SECTION

persons were fingerprinted during the year, 125 at their own request. On file at headquarters now there are 36,355 sets of fingerprints and 5,895 photographs of known criminals.

A vandal tendency by certain elements of the community is indicated by the necessity of replacing 172 traffic signs that were either missing or damaged, early in the year.

### AUTO ACCIDENTS

Investigations of auto accidents require much time as complete reports must be made out by constables where death, injury or damage in excess of $50 result. There were 567 accidents reported during the year as compared with 536 in 1936. In 154 accidents no personal injury to those involved was reported but 143 were hurt in collisions and 205 were injured when struck by autos. There were 59 collisions between autos and bicycles and 13 between autos and street cars. There were 15 fatalities in auto accidents during the year as compared with 11 in 1936, twelve dying as the result of being struck by cars, two in collisions and one in an auto upset. The latter was Constable David Beckett, a member of the force.

Police cars during the year rolled up 369,598 total mileage and have now traveled 776,213 miles. The chief recommends that new autos be purchased annually.

During the year 1,648 licenses were issued through the department for various types of business. The revenue derived, $20,266.50, was turned over to the city treasury.

Chief Renaud concluded his report with a message of appreciation for the support accorded the department by the commission and others who contribute to an effective law enforcement agency.

## Seek Young Thugs

OTTAWA, March 10.—Police today sought two young thugs who attacked and robbed Mrs. Mary May, 80-year-old widow, in her home here, escaping with $25 in cash and some jewelry. Posing as telegraph messengers, the men entered the house and gagged and bound the aged woman.

### INVITE THRESHERS

SARNIA, March 10.—Sarnia Chamber of Commerce today extended an invitation to the Ontario Threshers Association, meeting in London, to hold their 1939 convention in the tunnel city.

# Lord Halifax Once Viceroy

## Had Narrow Escape as His Train Bombed in India

## Favors Germany

### Has Ultra Conservative Views; Contrasted to Anthony Eden

LONDON, Eng., March 10.—The new chief of the British foreign office, the Rt. Hon. Sir Edward Frederick Lindley Wood, Baron Irwin, Viscount Halifax, presents an amazing contrast to Capt. Anthony Eden, the man he succeeds.

**NEARLY ECLIPSED**

CAPTAIN EDEN, youthful man-of-action, captured the imagination of the British people by his handsome features, stylish dress, and by his flare for dramatic oratory.

Long leader of the ultra-conservative pro-German bloc in England, Halifax, as lord president of the cabinet council, was almost overshadowed by Eden's brilliance.

Tall, reedy and devoutly Catholic, Halifax enjoys the full support of Prime Minister Neville Chamberlain. Both are regarded as stiff Conservatives. Both favor making trade agreements with Germany and Italy.

Coming from Yorkshire's most important family, the new chief of the foreign department was educated at Eton and Oxford, and entered parliament in 1910. In 1921 he was named under-secretary for the colonies and later he became viceroy of India. He caused a sensation in 1936 when he told his peers that the "era of German grievances must be closed."

**SENT TO BERLIN**

It was not until three months ago that Halifax gained the public spotlight. Then, in connection with the Conservative party's policy of cooperation with Germany, he was sent by Chamberlain to Berlin to open negotiations with Hitler.

Secretary Eden, denouncing the trip, firmly stated his opposition toward dealings with "immoral" Fascistic nations. Recently, simultaneous with his resignation Captain Eden reaffirmed his convictions regarding Hitler and Mussolini.

"If we are to have peace in these times, it means that in any aggreements we make today there must be no sacrifice of principles and no shrinking of responsibilities merely to obtain quick results that may not be permanent," the embittered Eden spoke.

Britons, while still loyal to the "liberalism" of the retiring secretary, know that as a compromiser his successor has no peer. They hope that he will bridge the gap created by Eden's resignation and stabilize the nation's foreign relations.

**ESCAPED BOMB IN INDIA**

Halifax, at 57, has held the posts of president of the national board of education and minister of agriculture in addition to his colonial duties. While in India he escaped miraculously when a native threw a bomb under his train.

A keen huntsman, he was originally invited to Berlin by Gen. Hermann Wilhelm Goering, to inspect a Nazi hunting exhibition. While the whole world awaited with anxiety news of his chat with Hitler, he insisted on describing the mission as "a hunting and exploring trip."

After conferring with Hitler, Goering and Goebbels, Halifax returned to London, where reporters were not surprised to hear him say, "Now that the door has been opened, it will remain open."

# New Record

NEW YORK, March 10.—The Grace liner Santa Rosa was back from the West Indies today with a new record.

It docked with eight stowaways aboard.

Immigration authorities permitted the group, young Puerto Ricans between 15 and 23 years old, to debark after each produced a birth certificate and proved he was an American citizen.

# Sit-Downers Are Evicted

## PENN STATE PLANT

### Clubs and Tear Gas Used by Non-Strikers

HATBORO, Pa., March 10.—State police today patrolled the entrances to the Roberts and Mander stove factory, cleared of sit-down strikers by non-striking workmen armed with clubs and tear gas.

Inside the plant, officials sought to determine the damage caused by the pitched battle last night in which a score were injured.

Leaders of both the back-to-work movement and the Steel Workers Organizing Committee, a C.I.O. affiliate, considered throwing picket lines about the plant.

The disorder grew from sporadic fist fights outside the gates to a pitched battle for possession of the plant.

Bricks were hurled by several hundred workmen and townspeople who marched on the plant. The sit-down strikers retaliated with heavy flint pebbles.

The invaders, gaining entrance through a back door, fired several tear gas bombs, Chief of Police William Holawanger said. The strikers replied with a stream of water from a fire hose.

State police, summoned by Sheriff Edwin H. Bellis of Montgomery County, quelled the riot and cleared the plant of the remaining strikers who weathered the tear gas.

The C. I. O. union had held the plant since February 4. Members of the union refused to handle castings made in another part of the plant where the workers are members of an A. F. of L. affiliate, R. J. Lever, field agent for the S. W. O. C., said.

Philip R. Cipp, general manager for the company, said he hoped that the plant could be opened to all workers within a few days.

# Pays Fine of $25 For Leaving Crash

CHATHAM, March 10.—Walter Trudell, of the Sherman apartments, King street, pleaded guilty to a charge of leaving the scene of an accident and was fined $25 and costs, $30.75 in all, by Magistrate S. B. Arnold in court here yesterday.

It was alleged that Trudell had been involved in two accidents in the city during the afternoon of March 2 and in both instances had failed to stop for

# Tug Loses In Grim Battle

## TO GET FREIGHTER

### Captain of Bigger Ship Wouldn't Give Up

BOSTON, March 10.—To the captains of the Halifax tug Foundation Franklin and the disabled freighter Azalea City the episode off Cape Race, Nfld., was more than a battle against a terrific gale.

The story behind the news in Boston is that the Foundation Franklin lost a tidy sum of money because Capt. L. P. M. Ressijac of the Azalea City wouldn't give in.

For one week Capt. Ressijac was responsible for three passengers, two women and a man, and a crew of 48 men on his 5,000-ton freighter with a cargo of 5,500 tons of general freight, while his vessel was helpless because the propeller had been swept away.

A northwest gale, reaching heights of 60-70 miles an hour, carried her 600 miles from Cape Race toward Bermuda. The tug Foundation Franklin hearing word of the trouble, had chugged promptly to the scene, and for several days bobbed over mountainous seas beside the freighter, anxious and ready to pass a line aboard the stricken vessel.

Had the moment come when Capt. Ressijac felt it necessary to accept the proffered aid, the Azalea City would have been "salvaged" under admiralty law, her owners bound to pay the rescuers a large proportion not only of the value of the vessel but of her costly cargo.

It was one of those dramatic situations which put a tremendous responsibility on sea captains. One man, solely answerable for a decision which might mean a small fortune for the vessel's owners and at the same time the responsibility of protecting 51 human lives.

It was a feat of seamanship to keep the propeller-less ship before the gale, cunningly steered to prevent broaching to in the trough of the 30-foot seas and foundering.

Then the United States Coast Guard cutter Chelan arrived alongside the Azalea City, and for three days the heavy seas snapped time and again the huge towing hawsers passed from the cutter to the helpless freighter. But Capt. Ressijac stuck it out.

A week after the Azalea City first ran into trouble, the tug Relief out of New York, chartered by the freighter's owners to lend assistance, arrived longside the Azalea City.

On the arrival of the Relief, the Foundation Franklin, which had dogged the drifting course for five days, put about for Halifax, loser against a grim captain.

# Old Fort Malden To Be Beautiful

AMHERSTBURG, March 10.—Returned from a visit to Ottawa where he conferred with officials of the Historic Sites Department, John A. Marsh, secretary of the committee in charge of Old Fort Malden, Dominion Government park, announced that the department would proceed with the committee's plans for beautification of the site.

Stone pillars are to be constructed at the entrance to the park and a hedge is to be planted along the front of the grounds. The local committee has been pressing the government for the construction of a museum and has the assurance of the officials at Ottawa that one will be built next year.

# Successive Dips

LONDON, Eng., March 10.—Sixty-year-old H. J. Bull of Folkestone, England, has broken a record for successive dips in the sea by not missing

# Go on Strike

CLARKSBURG, W. Va., March 10.—Six schoolboy patrolmen at a downtown grade school went on a sit-down strike yesterday.

They told auto club officials, in charge of their organization, that they did not propose to do further patrol duty until arrangements were made for weekly free movies. They removed their white belts and badges and turned them into the auto club.

George M. Brase, managing director of the auto club, said it would be impossible to grant the boys' demands. He said he would obtain new patrol members at the school.

**TEACHER PUZZLED**

REGINA, March 10.—One Regina public school teacher cannot decide whether one of her students is dull or brilliant. To an examination question asking the names of five Arctic animals, he answered "three polar bears and two seals."

# Urges Colony Be Populated

## British Guiana Points to Possibilities With Her Resources

GEORGETOWN, British Guiana, March 10.—Plans for development of British Guiana by transportation of the surplus populations of British West Indian islands to this colony were outlined in a resolution passed at a public meeting in Georgetown, Jamaica, Barbados and other islands of the West Indies had teeming populations which they could not possibly provide for, it was said. British Guiana, the sole British possession on the South American continent, covers an area of 90,000 square miles. A sparse population of 320,000 inhabits the colony, and efforts to improve this situation should be made.

It was pointed out that British Guiana has fertile sugar-producing coastlands, a wealth of timber, tens of thousands of ounces of fine gold and thousands of carats of diamonds.

Representations to the British Government would be made in an effort to have an imperial investigation leading to a settlement plan of development. This would bring about prosperity for this colony, it was felt, and at the same time remove the pressing problem of over-population in British West Indies islands.

# Gas Fatal To Dentist's Son

## 16-Year-Old Boy Had Been Playing With Apparatus

HASTINGS, Eng., March 10.—A Hastings dentist entered his surgery, hung up coat and hat, swung back the curtains, turned around.

Then he paused, petrified. There was the still figure of a man in the dentist's chair, the gas apparatus clamped over his face.

He tore off the mask. The victim was his son.

Story was told at Hastings when a verdict of accidental death was returned on Eric Vivian Jones, 16, dental mechanic's apprentice.

He was found dead in his surgery at Robertson street.

The boy had been interested in chemical contrivances, said Mr. Jones, and his daughter had told him that she had seen Eric playing with the apparatus.

He was studying for an examination and, as usual, slept at the surgery after night school to save the journey home.

**200,000 ON RELIEF**

Slightly more than 200,000 persons in Belgium are receiving unemployment relief.

# Sees Beauty In Grain Elevators

WINNIPEG, March 10.—Western Canada's huge cylindrical cement grain elevators are highly admired by European architects, M. S. Osborne, professor of architecture at the University of Manitoba, said in an address here.

"Their simple lines may lead to a style of architecture expressive of the plains—the horizontal feeling we have in this country."

Manitoba streets display a "battle of styles" which would be lessened with zoning laws, he said.

# Coast University Has Many Races

VANCOUVER, March 10.—Varieties of nationalities at a League of Nations Assembly is rivaled by University of British Columbia undergraduates here.

Twenty-five nations are represented. Eighty-seven per cent. of the students are of British origin, but 281 have parents of other nationality.

Americans and Japanese lead the non-British groups with 49 students each. There are 28 Chinese and three East Indians.

Nearly every European country is represented in the balance.

tion to several thousand visiting Legionnaires.

**PLAYING WITH MATCHES**

While the Heintzman fire was engaging the attention of practically all men on duty, a call was received at 7.05 a.m. to the home of Douglas W. Wethington, 388 Patricia road. A child playing with matches had set fire to curtains in one of the bedrooms, and a babe sleeping in a crib nearby received a slight burn on the forehead.

Mr. Wethington beat out the flames with his bare hands and also suffered burns. When firemen arrived, however, the blaze was out.

Fire of unknown origin broke out this morning in the basement of 638 Randolph street, the residence of Mrs. Gladys Stuart. Three pieces of equipment responded to the call and quickly subdued flames which threatened to completely destroy the basement. No serious damage was incurred and the fire was confined to the area immediately surrounding the furnace.

Shortly before noon the men were called again to the home of Wilfred Phelps, 471 Pitt street east, where a roof fire caused damage estimated at $100.

# School Fetes

## Patterson, Assumption to Celebrate Birthdays in 1938

Two celebrations are being planned for Windsor schools this year, it was announced at the Board of Education Building today. Patterson Collegiate and Assumption Street School are both planning anniversary ceremonies.

Dates for the celebration of Assumption's 25th anniversary have been tentatively set for MAY 4-6. It is expected that a reunion of former teachers and students of the school will be a feature of the program.

Cornerstone for the present Patterson Collegiate was laid in August, 1888, and the collegiate will commemorate the event with a special program next fall.

# "Contacts" Lauded

LONDON, Eng., March 10.—When cerebro spinal meningitis broke out on H.M.S. Shropshire, Seaman Terence Leamy, 17, the patient, and 25 "contacts" were landed at Gibraltar.

**Get at the Cause of Constipation!**

You know that constipation often gives you that dopey, sunken-bogged down feeling. Why not get at the *cause* and fix it?

If you eat what most people do—things like bread, meat and potatoes—the chances are all that's the matter with you is *you don't get enough "bulk."* And "bulk" doesn't mean what you may think. It's a *kind* of food that isn't entirely consumed, but leaves a soft, bulky mass in the intestines that aids elimination.

If this is your trouble, what you need is a dish of crisp, crunchy Kellogg's All-Bran for breakfast every day. It contains the "bulk" you need, plus Nature's intestinal tonic vitamin $B_1$, and iron.

Eat All-Bran every day, drink plenty of water, and see if the old world doesn't look a lot brighter! All-Bran is made by Kellogg in London, Ont. Sold by every grocer.

# Politics In Hydro Seen By Challies

## Former Tory Minister States Partisanship Ruled Roebuck

## Speaks in House

## M.L.A. Calls for New Deal Free from Political Expediency

By Arthur Wells

TORONTO, March 10.—Hope for a new deal in Hydro, free from partisan politics, so that it may be removed from the "nightmare of the last three years," was expressed in the Ontario Legislature yesterday by Hon. G. H. Challies, one-time provincial secretary in the Henry Government.

**TRUSTS IN DR. HOGG**

"WITH ALL the sincerity I am capable of, I urge the premier to give Hogg (Dr. T. H. Hogg, Hydro chairman) his head. He will then have a hogshead of justice and a thimbleful of politics, instead of a hogshead of politics and a thimbleful of justice, which was for so many months rampant.

"I have implicit confidence in Dr. Hogg's professional capacity as well as his integrity of purpose," Mr. Challes declared. "Anyone who attempts seriously to piece together the various elements of the power policy of the present administration for the past few years is sooner or later confronted with a very simple explanation—the prime purpose of the government has been governed by cheap partisan politics.

"Cheap partisan politics dictated the marathon Hydro speeches of the honorable member from Bellwoods (Mr. Roebuck) who from 1934 to 1937 dominated the personnel and the program of the O.H.E.P.C.

**CRITICAL OF LYON**

"Cheap partisan politics dictated the absurd but transparent device of having an estimable old gentleman, a retired newspaper editor, forsake his farm to act as chairman of the O.H.E. P.C. What a travesty—Stewart Lyon presuming to sit in the seat occupied with such distinction by the late Sir Adam Beck, and by men like McGrath and Cook. Everyone now knows that Chairman Lyon took his cue from the then attorney-general of this province, who was more concerned about slinging mud at the record of the Conservative Government, than with serving the real interest of the public.

"Cheap partisan politics created the cruel and unfair treatment of a great engineer, Dr. F. A. Gaby who was guilty of nothing more serious than an inability to foresee the greatest business depression in history. I must say that in that respect Dr. Gaby had distinguished company all over the world.

"Cheap partisan politics dictated the attempt, on the part of the government, to persecute its political opponents by unfair merciless public inquiry from which emerged only a severe condemnation of the government itself, one court declaring in no uncertain terms that the action failed hopelessly and entirely and that it was utterly unfounded and cruel.

**MUZZLING OF EXPERTS**

"Cheap partisan politics dictated the muzzling of the engineering experts in all the Hydro offices who could and would, had they been given a chance, gladly have told the prime minister that his attorney-general's cheap political claptrap about the overpurchase of power and the impossibility of power shortages would, within a very few years, be proven to be sheer bunkum.

"Only the other day, in his address to the Ontario Municipal Electric Association, Dr. Hogg frankly admitted that the technical staff of the Hydro including himself, were in no way whatever responsible for the policies or the programs of the Hydro under the dark days of the Roebuck-Lyon domination.

"If the premier had been frank with the electorate, there would have been a very different story to tell on the 6th of October. Of all the elections since Confederation, in any of the provinces, the last one in Ontario was the most hypocritical. Out on the public platform the premier was damning the power barons of St. James street, while his henchman was in intimate contact with representatives of the same power barons working out the basis of a new power deal. The premier was during the night dreaming about "back-to-Niagara" and during the day propounding silly proposals about diverting Hudson Bay rivers into the Great Lakes and developing small streams like the Madawaska as a means of meeting the growing power pains of this province.

**COURTS UPSETTING LAWS**

"While all the topsy-turvy talk about the power program of this government was going on during the last Parliament, one court after another was finding the legal basis for its power procedure was just as fictitious as the engineering basis. It is too bad that the litigation over the repudiation of power contracts did not finally get to the law lords of the Privy Council, as the people in this province deserve to have expunged from the law records the unorthodox and un-British series of repudiation acts perpetrated by and with the approval of the present administration.

"The preamble of the so-called repudiation acts will go down in history as one of the greatest burlesques to be found anywhere in the statutes of a British Legislature. It will be amusing to read the preamble to the bill when the new legislation is introduced confirming the recent contract revisions.

"It seems that the premier of Quebec, who has been strangely silent on this export quarrel with the Dominion Government and the Beauharnois interests, is using the premier of Ontario as a cat's paw. As a practical proposition this government wants the Hydro to act as a "go between," as an agency that will buy Quebec power and sell it to the aluminum and other American interests for use in the United States.

**SEES DEBT TO QUEBEC**

"Of all the reversals of policy perpetrated by this administration, the change from the Roebuck-Lyon threats to existing power exports at Niagara to the Hepburn-Hogg appeal for the right to export 125,000 additional power is the most baffling. I can only explain the change of heart by the desire of the premier to help certain Quebec friends who may have helped him during the recent election campaign."

At the outset Mr. Challies found fault with the Speech from the Throne, criticizing the government for putting into the mouth of the lieutenant-governor the statement that there was a $92,000,000 saving on Hydro contracts. That statement, he said, was on a par with some of the premier's pre-election promises.

"We feel," he declared, "that the only fair way in which the facts can be presented to the House and the public is by a public inquiry by a committee of the House. We feel if the government is sincere in its Hydro programs such a committee will be appointed forthwith."

"The prime minister in his speech Tuesday stated that when he took office they found Hydro reserves about depleted because of the drain upon them on account of the former Quebec purchases. What are the facts? When the present government took office it found established a rate stabilization fund, its prime and only purpose being to take care of just such unforeseen contingencies as occurred as a result of loss of revenue due to the depression period.

**EXPLAINS FUND**

"This fund had to its credit approximately $14,000,000 in 1931. There was drawn from this account from 1931 to 1934 inclusive $9,651,083.72, having $4,348,916.20 left as a credit at the end of 1934. The important fact to remember, along with the facts just outlined, is that while there were withdrawals from the rate stabilization fund the amount of reserves set up in general reserves account was for the same period $14,938,707.12, or $5,287,623.40 more was set aside as reserves, than was taken out of the fund established to stabilize rates."

He condemned the government for not providing added transmission facilities to lessen what he termed a "dangerous overload" on the Leaside terminal. No blame could be placed on the government for the serious situation that developed at Niagara due to the ice jam, he said, but the construction of a new transmission line and installation of greater transformer capacities after 1935 would have been an indication of the failure of the government's power policy.

"Such an indication must not be made," Mr. Challies declared, "no matter what the risk is just before an election. This government gambled with the destinies of the people of the Niagara system from 1934 to the present time, and while they have been partially successfully, the danger is not over.

**NEW TRANSFORMERS**

"I am creditably informed that new transformers were ordered prior to the October election sufficient to meet just such a contingency. The contract for these transformers was not to be made public until after the election. This means that the equipment cannot be installed until this summer. For political purposes this administration is running Hydro into the ground.

"What I wish to emphasize is—what would have been the situation in 1935-36-37-38 without Quebec power had such an emergency arisen as the one the Niagara system is now facing.

"The answer is quite apparent to all. The position of the Conservative opposition in year after year warning the government that just such a crisis would take place, places the responsibility and blame for lack of action where it justly belongs, on the shoulders of the former Hydro commission and the present government.

"It is time those in factory, farm, home and stores should realize how this government has gambled with their prosperity and happiness in order to gain a snap decision at the polls."

**RATE REDUCTIONS**

Mr. Challies deprecated the government's stress of rate reductions and the claim that prior to 1937 there never in the history of the systems had been a general rate reduction in the Niagara area. He point'ed out that power at cost is the basic principle of Hydro, so if rates are too high the credit in reserves or grants is made to the municipalities.

"How a general flat rate reduction can be equitably made and fairly applied when the rates vary anywhere from $14.21 per horsepower, as in Ottawa, to $72.68 per horsepower, as in Courtright, is hard to determine," he continued.

"The comparison of revenues as of the years 1931-32 with 1937 is only another evidence of unfair advantage. The year 1931-32 being the depth of the depression as far as Hydro finances are concerned, and the year 1937 that of greater business stimulation, a comparison must be taken at face value and ignored.

"The conclusive answer to all this political propaganda emanating from Hydro offices since this government came into office is found in this fact that under Conservative rule from 1923-1934, the capital invested by the commission and the municipalities increased from $225,000,000 to $400,000,000.

**GIVES REASONS FOR CUTS**

It is apparent, Mr. Challies maintained, that rate reductions were made for three reasons—regular services were not maintained; revenues kept pace with reduced rates, due to the fact that load increases were in a greater ratio than the reduction in rates; load increases were in a greater ratio than the reduction in rates; load increases were phenomenal on all systems.

"Never was it so true that facts are stranger than fiction, for the facts as disclosed since the then attorney-general was summarily dismissed from his position of domination in the Hydro are stronger even than the fiction he perpetrated upon the long suffering Hydro from 1934 to 1937.

The prime minister would add greatly to the gaiety of the nation if he would now induce the honorable member from Bellwoods to broadcast to the people of this province a series of talks as a sequence to his four one-hour radio harangues of 1935.

"How the people would laugh when the most perfect power pessimist of the ages tried to explain his declaration about: Back-to-Niagara for power, no truck or trade with the power barons of St. James street, Quebec power never would be needed, power shortages are impossible.

"Dr. Hogg's statement to the Ontario Municipal Electric Association should be in the hands of every elector of this province. It is a perfect vindication of the stand taken by the Conservative Party in opposition to the Roebuck-Lyon tomfoolery during the long trying period when those two gentlemen were suffering from Hydrophobia."

**FAVORS DEEP WATERWAY**

Ontario has sufficient electric power to meet anticipated requirements up to 1946, Mr. Challies said, but after that it will become a problem which every public leader in the province must face. The St. Lawrence is the best source for meeting further increases and he urged Premier Hepburn, who has repeatedly opposed the proposition, to "face this question squarely."

Power prices have been negotiated in the premier's office in some cases "as in the Lake Sulphite agreement," Mr. Challies said. This brought the reply from Premier Hepburn that details of the proposed agreement with the collapsed pulp project were worked out by the Hydro Commission but no agreement was signed.

"Why did Lake Sulphite say so?" asked Conservative Leader Macaulay. "That's one of the things I want investigated."

Turning to the Government's "back to Niagara" election policy and its planned diversion of more water at the cataract, Mr. Challies said the government knew before the election this was impossible because of international difficulties.

**PREMIER OBJECTS**

Objecting to the statement, Premier Hepburn said a letter had been received from Ottawa in September by Provincial Secretary Harry Nixon, but was not shown to him until later as he was busy campaigning.

"What right had you to campaign on a back-to-Niagara policy when your colleague had a letter in his pocket saying you couldn't go back?" asked Mr. Macaulay.

"I didn't keep it in my pocket," Mr. Nixon interjected. "I sent it down to Hydro."

"I was traveling too fast for him to catch up," the premier added.

# Too Close

ST. LOUIS, March 10.—Ralph Goodman laid his razor aside, reached for a towel and for the first time in years experienced a "shave" he described as "too close."

The towel pulled a .25 calibre pistol from the table. The gun discharged.

City hospital physicians treated Goodman for a bullet wound in his right leg.

# Wily Plan

OTTAWA, March 10.—An amendment to the Immigration Act that would prohibit entry of "persons over 15 years of age physically capable of reading, who cannot read the English or the French language or some other language or dialect commonly spoken by and native to the people of Europe" was introduced in the House of Commons yesterday by A. W. Neill, Independent, Comox-Alberni.

While Mr. Neill gave no detailed explanation of his purpose, the bill would have the effect of virtually excluding Japanese.

# Costly Search

## Each Gallon of Gasoline Worth $6; Plenty of Gasoline

REGINA, March 10.—Every time Sir Hubert Wilkins fills his huge ship with fuel at Aklavik, at the mouth of the Mackenzie River, it costs the Soviet Government $8,000, C. J. McFarlane, gasoline company representative said in an address here.

Mr. McFarlane traveled 7,000 miles by air, 1,000 miles by boat and 1,000 miles overland to carry gasoline and batteries for the searchers. Gasoline costs between $4 and $6 a gallon in the far north, because of transportation difficulties.

At Fairbanks, Alaska, he said, earthquakes occur sometimes at the rate of 70 a day. Aside from broken dishes and cracked walls, little damage was done.

**TO WAR ON BETTING**

Australia will war on betting.

# HAND OF CHANCE IS EXPOSED

PASADENA, Calif., March 10.—Two scientists here are completing a "probability machine" which could tell the average man's chance of being killed in an automobile accident, or of throwing a seven with a pair of dice.

It was designed, however, as an aid to making movie film less grainy.

A company manufacturing film asked Drs. Alexander Goetz and W. O. Gould, California Institute of Technology physicists, to see what they could do.

They combined higher mathematics, graphs, photo-electric cells, microscopes and a few other gadgets and turned out a "graininess meter" and an "integrator," which together make the probability machine.

"The grains on photographic film," Dr. Gould explained, "are tiny particles of silver. To the natural eye they may seem evenly distributed, but under the microscope the particles are shown to be grouped together in spots.

"Our task was to find whether this was a random grouping, or from cause."

While their tests are not completed, Drs. Goetz and Gould found that the graininess invariably was increased in making a positive print.

"This machine could be used in bacteria tests," said Dr. Goetz, "to determine the percentage of dead and live ones. It could determine whether the death of one would bring the death of others in the neighborhood."

In the statistical field, the integrator could be used to reduce a wildly fluctuating chart to a single curve, eliminating much figuring.

**EASE COMMERCE TAXES**

Brazil will eliminate taxes on interstate commerce.

**Do you add one for the pot?**

**- it's better that way. You should use a warmed crockery teapot - a teaspoonful for each person and one for the pot - add fresh, boiling water and steep five minutes - to get all the flavour from TEA.**

# May Enlarge Safety Patrol

## Trustees to Debate Plan Launched for Separate Schools

Establishment of a safety patrol among students of Windsor public and secondary schools will be discussed at next Wednesday's meeting of the Windsor Board of Education, it was announced today.

Operation of a safety patrol about separate schools of the city was started this week. Windsor Police Department is sponsoring the patrol, and it is expected that the department will make representations to the board at its next meeting.

The board of education has asked the police commission, at various times, for some protection at busy intersections near schools. Caretakers at some of the schools have been doing this work but have objected, pointing out that they cannot take care of all intersections.

It is expected that representations will be made by the caretakers when the subject comes up for discussion.

WINDSOR, ONTARIO, FRIDAY, MARCH 11, 1938

**To Consider Motion**

CITY COUNCIL probably will be asked Tuesday night to vote on Ald. Morris' motion to abolish the board of appeal on relief matters and have the work reverted to elected representatives. The board was appointed "to keep relief out of politics."

# Police Solve Smash and Grab Raid

## City Argues Baby Case

### Judge Will Determine Who Is Responsible for Upkeep

### Nine Months Old

### Windsor and Toronto Both Balk at Maintaining Infant

Whether or not welfare is an "institution" was argued before Judge George F. Mahon in county court, yesterday afternoon, when the City of Windsor and the City of Toronto argued responsibility for the upkeep of a nine-months-old baby.

**RESERVES DECISION**

Welfare regulations and provisions of the Children's Protection Act were cited in an effort to determine whether Windsor or Toronto is legally responsible for the infant's board and room. Judge Mahon reserved his decision.

Last January 29, application was made under the Children's Protection Act, to have the infant made a ward of the Roman Catholic Children's Aid Society here. Judge Mahon granted the application, naming the City of Windsor as responsible for the little one's keep.

L. Z. McPherson, Windsor city solicitor, moved yesterday to have the county judge's order altered to make Toronto responsible for maintenance of the baby. R. C. Baird, of the Toronto city solicitor's office, argued the case for the Queen City.

Evidence disclosed that the child's mother went from Windsor to Toronto December 26, 1935. Though the mother had not been in that city a year and therefore did not qualify for relief there, she was given temporary relief for several days in November, 1936. And then, though she could not yet qualify under the welfare department's "year's residence" requirement, the mother was admitted to a welfare hostel in Toronto on December 4, 1936. The child was born in the hostel in June, 1937. After keeping the child and mother until October 9, the City of Toronto sent them to Windsor on that date.

**MORE THAN YEAR ELAPSED**

Under the Children's Protection Act, responsibility for the upkeep of a Children's Aid ward rests with the municipality in which the child has lived for a period of one year previously—or the municipality in which the mother lived for one year prior to the child's birth.

It was pointed out that when the child's mother was admitted to a welfare hostel in Toronto, she had not lived a year in Toronto. More than a year elapsed, however, between her arrival in Toronto on December 26, 1935 and her departure for Windsor on October 9, 1937.

The Children's Protection Act provides that time spent in a charitable institution is not to be included when the one-year residence term is figured out. The question argued yesterday was whether the fact that the mother was given shelter by the welfare department could be interpreted as meaning that she had been in a charitable institution.

Mr. Baird cited a Court of Appeals decision in which the court ruled in favor of a broad interpretation of the "charitable institution" clause in the Children's Protection Act. The court in that case ruled that children boarded in private homes under supervision of the Children's Aid Society were in charitable institutions.

## Likely to Face Many Charges

### GILBERT JONES

### Being Held for Police of Kent County

If police in Kent County want Gilbert Jones, 22-year-old Morpeth man, they can have him, city police court officials decided this morning. In the meantime Jones was remanded to Monday to await word from Chatham.

Arrested here two weeks ago, Jones has been held on a charge of leaving the scene of an accident which caused serious injuries to William Fowler, 72, of 817 Ouellette avenue, at Goyeau and Wyandotte streets. But Jones was also sought as the eighth member of a gang which had been raiding gasoline stations and stores in Kent County. Another member of the gang, Roy Brown, 19, also of Morpeth, said to have been with Jones at the time of the accident here, surrendered to police after his car bogged in a field near his home village.

"There are several charges that may be preferred against Jones in Chatham," Crown Attorney Allan suggested this morning when he advanced the plan of having him transferred for trial.

### *Who Told You That?*

First-Aid Man: "Did you hold a mirror to her mouth to see whether she was still breathing?"

Assistant: "Yes, and she opened her eyes, gasped and reached for her powder puff."

## Find Most Of Jewelry

### Raymond Lauzon Admits He Tossed Brick Through Window

### Involves Another

### Stolen Watches and Rings Cached Under Back Steps of House

Raymond Lauzon, 34, of Tecumseh, has admitted to police it was he who tossed the brick through the Studebaker jewelry shop window, 50 London street west, early Wednesday morning. His confession resulted in recovery of most of the stolen watches and rings, found cached under the back steps of a Pelissier street house, not far from the store.

**WAS IDENTIFIED**

Lauzon was picked up yesterday morning by Detective-Sergeant Campbell and Detective Hill, but was stubborn in his insistence he knew nothing about the robbery until identified by witnesses in a show-up line. He then dictated a two-page statement in which he involved Joseph Donoghue, 32, of 819 Assumption street.

Donoghue was arrested by Constables Smith and Harold McLean on the street near the store, with two rings and a wrist watch in his possession. After receiving Lauzon's statement, police recovered ten watches, six rings, three wrist bands and a gold cross from the hiding place on Pelissier street.

**HAD BEEN DRINKING**

He and Donoghue had been drinking Tuesday night, until their funds gave out, and they conceived the idea of crashing a jewelry store window to replete their resources, Lauzon said in his statement. A piece of paving brick he found on the street was the instrument used.

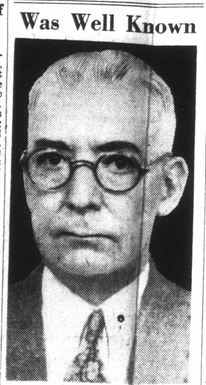
Lauzon pleaded guilty when arraigned formally before Magistrate Brodie, and was remanded to Monday for sentence.

## Heart Attack Proves Fatal

### TO NORMAN F. WRAY

### Was Former Treasurer of Devonshire

Well known in Windsor fraternal circles, Norman F. Wray, 61 years of age, died this morning at his home in Detroit, following a heart attack.



Mr. Wray lived in Windsor for several years, prior to going to Detroit 10 years ago. He was a public accountant by profession and was also at one time treasurer of the Devonshire Race Track.

His widow, Mrs. Harriett Wray, is also well known throughout the district as a vocalist, having been guest soloist at St. Andrew's Presbyterian Church on several occasions.

Mr. Wray was a former member of the Windsor Kiwanis and Lions Clubs and also the Windsor lodges of the Mocha Shrine and the Scottish Rite.

Surviving besides his widow are two brothers, Walter, of Detroit, and William, of Long Beach, Calif., and three sisters, Mrs. Albert Lamb, of Petreland, and Mrs. Eleanor Crittenden and Mrs. Elizabeth May, of Detroit.

## Windsor's Othmar Grotto Greets Grand Monarch

WINDSOR'S Othmar Grotto turned out last night to honor Mr. O. F. Hildebrandt, of Rock Island, Illinois, grand monarch of the Mystic Order of Veiled Prophets of the Enchanted Realm. Mr. Hildebrandt is shown in the centre, with Mr. E. Blake Winter, deputy grand monarch, at his left, and Mr. E. G. Cade, monarch of Othmar Grotto, at his right.

## Sees Hydro Income Loss

### Utilities Commission Fears Reaction from Gasoline Buses

Hydro will lose a revenue of $70,000 to $80,000 per year, which loss Hydro users will have to make up, if Windsor street cars are replaced by gasoline buses, the Windsor Utilities Commission plans to inform the street railway inquiry ordered by the Ontario Municipal Board and being conducted by W. H. Furlong, K.C., chairman of the Sandwich, Windsor & Amherstburg Railway.

**MERELY SEND LETTER**

Meeting in the Canada Building yesterday, the utilities commission decided against sending any delegation to the street railway probe. Instead, the commission will merely call attention, in a letter, to the fact that swinging away from electricity in the operation of the city's public transportation system would be a blow to the publicly-owned Hydro system.

Commissioner Carmichael expressed annoyance at statements made by Mr. Furlong during the course of his inquiry, to the effect that service beyond Brock street in Ward Five should have been terminated because of the condition of the roadbed.

"If that were done," Commissioner Carmichael said, "what would the hundreds of employes of the Canadian Industries, Limited, plant do for transportation. This district is referred to as a poorer district, but these are the people who need street railway transportation."

**THINKS BUSES MEANT**

Commissioner Edwards suggested that Mr. Furlong probably meant that buses should carry on beyond Brock street.

"He doesn't say that," Commissioner Carmichael declared, adding, "He's full of wet hay."

"I'm not an authority on public transportation," Commissioner Edwards declared, "and I'm not in a position to say what kind of transportation system we should have.

"But this commission should point out that if the use of Hydro is discontinued it will mean a loss of between $70,000 and $80,000, which Hydro users will have to make up.

"There's no need for this commission to appear at the inquiry. Mr. Keith can just send a letter, calling the inquiry's attention to that fact.

**AGAINST INTERFERENCE**

"I don't think this commission should try to tell how the street railways should be run or to interfere or try to influence the inquiry one way or the other. I just think it's our duty to call their attention to the loss that Hydro will suffer if electric power is abandoned. That's the only interest this commission has in the situation."

J. Clark Keith, general manager for the commission, agreed that the $80,000 loss in revenue would have to be absorbed by customers of the Ontario Hydro-Electric Power Commission. Because of the fact that a large portion of the cost of Hydro is the cost of transmission, Windsor would take a larger share of the loss than other municipalities, O. M. Perry, Hydro manager, said.

Commissioner Carmichael agreed with the remarks made by Commissioner Edwards and moved that the

## Dropped

AT the request of City Solicitor MacPherson prosecution of the Ritz tobacco shop, 1175 Ottawa street, was dropped in Windsor Police Court this morning. A charge of failure to clear the sidewalk of an accumulation of snow had been preferred by police, with February 24 indicated as the date of the offence.

Gerald McHugh, K.C., was present to contest the case which had been billed as a trial of the bylaw's validity but found he had no need for the legal ammunition he had collected. Police said the charge was laid following the complaint of a woman who said she suffered a painful fall in front of the Ottawa street shop.

## City Employe Holds 3 Jobs

### BOARD ISSUES BAN

### Hydro Worker Must Quit Coal, Finance Lines

Employes of the Windsor Utilities Commission will not be allowed to hold other jobs on the side, the commissioners decided at yesterday's regular meeting in the Canada Building.

Commissioner Edwards called the commission's attention to a Hydro employe who, he said, has been carrying on fuel and finance businesses.

It was recalled that a resolution was passed a year ago, providing that employes could not continue other gainful occupations without the knowledge and consent of the management.

O. M. Perry, Hydro manager, said he posted that order up, the day after it was received. No one had consulted him since then, about extra-mural businesses, he said.

As a result, the commission passed a new resolution, with the "knowledge and consent" clause deleted. It provides that after May 1 no employe of the commission may hold any outside job or carry on any other business.

"There are too many unemployed," Commissioner Riberdy pointed out, "for one man to be holding three jobs."

Commissioner Edwards said the man in question had made very little on his coal business and had no intention to giving it up. He didn't feel the same way about the finance business, however, the commissioner said.

"He says," Commissioner Edwards reported, "that the finance business is a hobby with him, or something."

Commissioner Edwards said he investigated the case, following a complaint received a month ago. Commissioner Riberdy said he had received a similar complaint.

Mr. Perry said he was informed that the employe in question had explained that it would take him two years to get out of the finance business.

The commissioners agreed that it might take the employe some time to collect money already loaned out. Under the resolution, though, he will not be allowed to make further loans or carry on further business—outside of collections—after May 1.

## Claims Unrest Follows Ban

### ON MASONIC ORDERS

### Grand Monarch Welcomed to Windsor

"There is no civil unrest in countries where free speech, friendship, fellowship and acquaintanceship prevail and where one knows that the person sitting next to him doesn't carry a hatchet with which to dash out his brains," O. F. Hildebrandt of Rock Island, Illinois, declared last night, at the Prince Edward Hotel.

Mr. Hildebrandt is Grand Monarch of the Mystic Order of Veiled Prophets of the Enchanted Realm and his visit to the city included an appearance before the Othmar Grotto at their semi-annual banquet where he was introduced by E. Blake Winter, formerly of Windsor, now of Toronto.

"Only in countries where Masonic orders have been suppressed is there civil unrest," Mr. Hildebrandt believes. "Broad vision," he said, "is the greatest necessity in avoiding friction between peoples and countries."

Mr. Hildebrandt observed that in his opinion the hard times which so many seem to think are present in Canada and the United States exist largely as a state of mind rather than realities.

George M. Cartmill of Othmar Grotto was presented with a plaque symbolical of the honorary past monarch's office.

## Bookie Pays Heavy Fine

### Matt Podgin Assessed $116 on Charge of Exhibiting

Because it was the second conviction recorded against the Paramount poolroom, 329 Ouellette avenue, this year, a fine of $116 including costs, was set as Matt Podgin, 37, of 1239 Parent avenue, pleaded guilty to exhibiting race track information this morning. Magistrate Brodie was informed that the previous conviction was on January 10.

Police raided the poolroom on Wednesday and found 100 customers in the place. Three telephones were in use and three charts were seized.

Bernard D. Caplan, K.C., represented the accused and entered the plea of guilty.

### AUNT HET

"A few people workin' together can boss anything, but it don't worry me. I'm a majority in my own business, and that's the only one I care about runnin'."

## Awaits Word About Paring

### Board of Education Not Notified by Sinking Fund Trustees

Windsor Board of Education had not received any notice, today, of the decision of the Board of Trustees of the Windsor Sinking Fund that the board's public school budget should be cut from $670,000 to $660,000.

**CHAIRMAN ABSENT**

T. Roy Noble, business administrator for the board, explained that the chairman, P. P. McCallum, is out of the city, so that no special meeting will, in any event, be called before next week.

Mr. Noble pointed out that the $660,000 limit prescribed by the board of trustees is actually below last year's public school budget total, which was $663,000. The $660,000 figure is the limit set in the refunding plan for public school estimates—any expenditure beyond that amount must be accompanied by an additional levy for income interest.

"Our budget last year," Mr. Noble explained, "was settled before the $660,000 figure was arrived at in the refunding plan. They cut us down, though I don't know why—no other departments were cut down."

**SEES CUT UNLIKELY**

Mr. Noble explained that any further cuts in the budget would have to be made by the board.

"But if I know the board," he added, "they won't cut another cent off the estimates."

The board of education's estimate for public school purposes this year was originally $715,000. Elimination of $20,000 in maintenance estimates reduced that figure to $695,000 before the budget was submitted to council. Further cuts reduced the total to $679,000 and, finally, at a special meeting this week, to $670,000.

**REVENUE ANTICIPATED**

Board of education officials point out that with last year's mill rate and this year's increased assessment total, the board may expect revenue totalling $822,000.

With the budget fixed at $786,000 now, including $116,000 for interest, the board will have $36,000 to spare, he said. Because the $670,000 operating budget is $10,000 in excess of the limit in the refunding plan, the board will, if this total is allowed to stand, have to raise an additional $12,500 for the bondholders. Even with that additional amount, however, the public school rate of last year will still raise $23,000 more than the board requires to carry on under the present budget, Mr. Noble says.

## Case Delayed

### Hearing in Gatfield Will Adjourned at Request of Solicitors

Further legal action with respect to the mystery wills of the late William N. Gatfield, retired coal company executive, was delayed today until March 21.

Judge Mahon announced that the hearing scheduled for his chambers at 10:30 o'clock today was postponed at the request of solicitors.

Lawyers interested in the case have undertaken to draft an order directing an issue of the case, to be brought before Judge Mahon for approval. The case will then go to the Supreme Court for trial.

## Action Taken as Post Held By Con. Bennett Is Dropped By Board

### FORD MOTOR COMPANY LOANING VEHICLES WHICH WILL BE USED IN EXPERIMENT STARTING MARCH 21

THE Sandwich, Windsor & Amherstburg Railway inquiry gained sudden momentum in the past 24 hours, with two major developments occurring in the probe ordered by the Ontario Municipal Board. They were:

1. Announcement at last night's hearing by W. H. Furlong, K.C., railway board chairman, that starting Monday, March 21, four 25-passenger transit buses will be placed on the Amherstburg division in a test to decide whether losses of present trolley operation may be eliminated.

2. Disclosure yesterday that Con. George Bennett will be relieved of his duties as public relations manager when the rail board decides next Monday to abolish the position.

**Ford Buses Loaned**

THE bus experiment is made possible by the Ford Motor Company of Canada agreeing to loan the vehicles, which will be brought here from Detroit, Mr. Furlong stated.

He said he pointed out to W. R. Campbell, Ford president, that as the company is Windsor's largest taxpayer it is vitally interested in the transportation debt. Agreement on the bus test was then reached, though it is the first time the Ford firm has made such concessions to a municipality.

The buses will be driven by two trolley operators on the Amherstburg line who are familiar with the handling of vehicles of that type, asserted Mr. Furlong. For the first few days of the test, street cars will also be kept in operation in case buses cannot handle the traffic, and also to gauge public reaction.

**Mr. Furlong declared that if tests show that an Amherstburg bus service doesn't make a profit, he will recommend that the franchise be leased to a private company, "because we cannot afford to make money on city lines, and squander it on other divisions."**

**Scrap Value $20,000**

Chief Engineer Roy M. Dominey stated that the scrap value of tracks and overhead construction on the line would be about $20,000, or almost enough to cover the investment in three buses.

Current rumors that Con. Bennett was to lose his job came to a head Thursday afternoon when the former mayor and S.W. & A. trainman admitted he had received verbal notice from Mr. Furlong that the post of public relations manager was to be discontinued.

It is the third change in administration since the investigation opened a few weeks ago. John B. Aylesworth had been named company solicitor, while George A. Scott, mayor of Riverside, was appointed new auditor.

**Talks with Bennett**

Chairman Furlong explained that he had held "preliminary conferences" with Con. Bennet in regard to his duties.

"I assured him," he said, "that I would advise him beforehand of any action to be taken in regard to his position, and I kept my promise on Tuesday when I told him that at its regular meeting on Monday the railway commission would abolish his position."

"I took the 'front door' method," said the chairman further. "I told Mr. Bennett what was going to happen, and I gave him the opportunity of presenting reasons against the abolition of the position."

His discussions with the public relations manager have been "amicable," declared Mr. Furlong. On Monday, he said he would give a statement in regard to his action.

**Controller's Comment**

Questioned by The Star, Con. Bennett said Mr. Furlong told him his position isn't warranted on the S.W. & A.

**He had concentrated principally in keeping accidents to a minimum, Con. Bennett stated, and he believed he had succeeded in promoting safety to an appreciable degree.**

No date has been set for the controller's return to the trolleys, nor does he know to which run he will be assigned. But he implied that any line will be satisfactory.

As a result of his retirement from the public relations post, Con. Bennett will fill a role new to him—that of motorman. Previously, he had been a conductor on the Tecumseh line, but all cars are now "one-man" vehicles.

As for attending board of control meetings, he commented he would regard those occasions as "my day off."

As a motorman he will be paid on an hourly basis, the same as any other trolley operator.

Mr. Furlong's announcement about the test for the Amherstburg line came after the chief engineer of the rail-

## Small Buses Are Favored

### Gasoline Type Wanted by Council's Special Committee

### Long Argument

### Brief Is Prepared for Submission to S. W. & A. Chairman

City council's special committee on transportation yesterday afternoon went on record as being in favor of a system of lightweight gasoline buses to supplant the street cars.

**21 TO 25 PASSENGERS**

Sponsor of a resolution to that effect, Con. Cooper declared vehicles carrying from 21 to 25 passengers would prove the most economical.

He was supported by committee chairman Ald. Martin and Ald. MacMillan, but Con. Bennett declined to endorse the motion on the ground that experts should determine the method of transit following experimentation with trackless trolley coaches and gasoline buses.

All were agreed that there should be a "progressive system of transition" as proposed by Con. Cooper, also that street railway equipment taken from an abandoned line ought to be utilized on other lines where needed. This, it was said, would prevent indiscriminate scrapping or waste.

Ald. Begley was the only absentee from the special meeting held in the office of City Solicitor L. Z. McPherson. Ald. Martin stated that Mr. Begley was ill.

**WILL PRESENT BRIEF**

Mr. McPherson produced a provisional draft of a brief and amended clauses during the discussion. The revised brief will be submitted to city council next Tuesday night, and to W. H. Furlong, K.C., chairman of the board of the Sandwich, Windsor and Amherstburg Railway Company, on Wednesday night.

While Mr. McPherson will present the council's official document to the railway hearing, members of council and board of control may offer comment. Con. Cooper stated definitely that he intends to furnish data on various forms of transportation to show why he favors the small buses.

Con. Bennett remarked that while some of the railway's present equipment might be regarded as obsolete, there is some that can be used for a long time.

**GRADUAL CHANGE SEEN**

"The change in the system will be gradual," said Ald. Martin.

Con. Reaume, who attended the meeting as "a guest," thought that lines which are not paying should be abandoned first.

"I would like to ascertain when the brief is presented," Con. Reaume said, "whether the street railway company is going to bear any part of the costs for fixing up the roadways in Ward Five. I don't know whether the company should do that legally, but I am of the opinion that the cars have affected the street."

Con. Bennett believed it would be incumbent on the city to finance any repairs or improvements.

Ald. MacMillan held that the company should pay a share.

Ald. Martin said that the bus companies in Detroit pay to the municipality three-fourths of a cent or one cent a mile for each vehicle, according to number of passengers, toward street maintenance.

"As long as street cars and tracks are in good condition," Ald. Martin added, "we should use them, with gasoline buses to help them out."

**BUS SIZE DEBATED**

"I am in favor of progressive transition," observed Con. Bennett, "but I am not prepared to say which type of vehicle is best. You can't convert me on the small type of gasoline bus because it could not give adequate service."

Ald. Martin: "They are used right in Detroit."

Con. Bennett: "But only as feeder lines. If they were operated alone

## Senator Meighen's Warning

There is probably no man in Canada who knows more about our railway situation than the Rt. Hon. Arthur Meighen, Conservative leader in the Senate and former Prime Minister.

Senator Meighen has been in public life for many years. He was a member of the old Union Government, succeeded to the Prime Ministership after the retirement of Sir Robert Borden and for a number of years led the Opposition in the Commons. He was high in party affairs during the years when the Canadian National system was taking shape and he has been a keen student of every phase of the problem's development. Indeed, it is safe to use the old expression and say that Mr. Meighen has forgotten more about the railway picture than most public men will ever know.

We make these remarks at this time because of Mr. Meighen's speech in the Senate this week, a speech occasioned by Senator Beaubien's motion to have a special committee of the Upper House consider the railway problem. Mr. Meighen was not opposed to the committee idea, but questioned the likelihood of getting any concrete result from such a move. He suggested that a major error had been made with the repeal of co-operative legislation based on the report of the Duff Commission, legislation which had been scrapped by the present Government, he charged, for reasons of political power and patronage. And if his information was within 50 per cent. of being correct, Mr. Meighen added, Canada had seen a restoration of political patronage on a scale hitherto unknown.

The Conservative leader was delightfully pointed. "I know," he said, "who acquired roads that were worthless; I know who built hotels that have had to be closed for years; I know who built boats that had to be tied up at docks; I know who made the National Railways a virtual appendage of the Liberal Party. I can name him now. I told him so to his face."

(Our Ottawa correspondent points out that during the greater part of the period to which Mr. Meighen was referring, Mr. Dunning, present Minister of Finance, was Minister of Railways.)

In explanation of the Duff Commission, Mr. Meighen explains that the main principle of its exhaustive report was that the administration of the publicly-owned Canadian National Railways should be removed from governmental influence altogether, and to reach that result the commission suggested that if the report were implemented by legislation the management of the road should no longer be answerable to governments, but to Parliament. Legislation along these lines was put through, but after a year and nine months of operation the Liberal Government repealed the legislation in its chief feature, restoring the supremacy of the Government.

"The commission's report today," Mr. Meighen observes, "is in ashes as to its main, central, cardinal feature. We have today a return of governmental operation directly under the Minister of Railways. . . .Some disappointment was expressed as to the achievement of the one year and nine months operation. That is not a long period. It would never give a fair trial to any system."

Despite the short period Mr. Meighen finds there were real accomplishments under the reform that followed the Duff Commission's report. We quote him in this respect:

> "This, though, was accomplished: a scale of precipitate indebtedness was reversed. For nine years, according to the report, we ran behind in the taking care of annual obligations, outside entirely of obligations to the Government, at the rate of $50,000,000 a year; and we ran in debt besides $50,000,000 more for new capital expenditure. We did not get rid of the $50,000,000 we were running behind in operation, but we did get rid of the whole $50,000,000 of new capital expenditure. The retirements in that year and nine months were greater than the increased capital investment.
>
> "I assess now responsibility for the mire we are in with respect to our National railways. We had nine years of a railway orgy under Sir Henry Thornton. We had nine years of railway debauch, during which years we went into debt at the rate of over $100,000,000 a year. And then we wonder at our railway problem."

Senator Meighen, in discussing suggestions for amalgamation or unification of the C.N.R. and C.P.R. makes a point that is usually overlooked. Mentioning the argument that it would eliminate competition and therefore be against the public interest, he states emphatically that we need never fear lack of competition, for all railways today have competition the like of which they have not known for a century—motor trucks and buses, the lakes and, now, the air services. Indeed, Mr. Meighen points out, the real sufferings of the railways today are from a contraction of the business they can do, owing to these other factors in the transportation field.

Mr. Meighen deplores, and properly, that the railway situation has become a political football. He has almost given up hope that anything can be done "as long as you are going to have these alternative governments smashing everything that has been done by the preceding government." Praising the success of efforts to solve the railway problem in Great Britain, the senator remarks that, "we could do something similar in Canada if we had the same healthiness of public opinion and the same character of political appeal they have in the Old Land—but we haven't." Then he added these significant words: "IF WE CONTINUE THE WAY WE ARE DOING NOW WE SHALL COME TO SOMETHING WORSE THAN UNIFICATION, TO SOMETHING LIKE OTHER COUNTRIES AND OUR PROVINCES HAVE COME TO. WE CANNOT CONTINUE ON THIS PATH."

Mr. Meighen is right, of course. We cannot continue on the present path. The railway problem, if allowed to go on as at present, will ruin Canada. Surely it is not too much to suggest that the head of our Government should appreciate this fact and be taking some steps to meet it. Ways and means, worked out by experts, have been suggested. There have been placed before the Ministry definite plans for easing the burden and bringing some sanity and order into the present chaotic, backbreaking situation. But what is the Government doing? What does it suggest? What moves does it propose to make? No one seems to know. If the Government has any thoughts on the subject it has succeeded in keeping them pretty much to itself. Meanwhile, the railway problem drifts—and Canada drifts. Mr. King's responsibility as leader of the Government is indeed a heavy one.

## *Remove the Obstacles!*

Mr. Meighen always says something worth while, but he never uttered a stronger sentence than when he told the Senate this week that unemployment figures will not improve "until some assurance is given, not only in this country, but also in another country near us, that it is going to be possible to expand in business without being regarded as a public enemy."

There is a wealth of meaning in that short statement. The trend of government in recent years has been to place obstacle after obstacle in the path of activity, by regulations and impositions calculated to discourage commerce and industry. It is no wonder that the situation has become so serious, particularly in the United States. Business does not know where it is going. It cannot plan for the future, for it never knows what the morrow will produce in the way of greater regimentation, heavier taxes, further obstacles.

The way to restore old time prosperity in the United States and Canada both is to remove some of the fetters from business, to produce genuine tax reductions, to ease regulations that are putting gray hairs into the heads of men who want to do their share in leading their respective countries out of the slough of depression or recession or whatever one chooses to call it.

In the language of the track, governments should give Business its head! Then we would see developments and progress truly worth while.

## *"Proof" of Hereafter*

Lawyers set a great store by testimony. It is not surprising, therefore, that Claude W. Rowe, a New York barrister, has collected testimony to aid him in deciding whether or not there is a God and a hereafter. He polled 692 colleagues and in his book, "The Lawyer's Proof of the Hereafter" quotes President Roosevelt as saying: "Attempts to deny God have and always will come to naught."

Mr. Roosevelt, of course, is correct. His statement recalls Voltaire, the eminent Eighteenth Century French philosopher, who admitted in his old age that he had spent his life trying to prove there is no God but that he had failed. Voltaire was one of the brightest minds of his day. He was an agnostic most of his life. When he tried to prove that he was right, he had finally to admit he was wrong.

## *Hydro Agreements*

The shadow of the new agreements with the Quebec power companies strutted across the political stages at Queen's Park and at Ottawa yesterday.

In the House of Commons, Mr. King gave a three-hour speech in which he discussed the matter of allowing power to be exported, and gave his reasons for referring the matter to Parliament.

In the Ontario Legislature, Hon. W. L. Houck, vice-chairman of the Hydro-Electric Power Commission, was at the same time voicing the Commission's reasons for entering into the agreements, and sharply answering the criticism of Mr. A. W. Roebuck, former Attorney-General.

The Prime Minister, by the very manner in which he couched his remarks, seems to have left the door open for the granting by Parliament of Hydro's application for the export of power. He suggested that there "must be many cases where it would be an injustice not to grant a license, provided the case is justified in the light of all circumstances and is judged on its merits." He did not, however, state the position his government takes on the issue.

Mr. King was charged by Mr. Bennett and Mr. Rowe with evading responsibility of taking a definite stand with regard to the application from Ontario. Mr. Rowe challenged the Prime Minister three times to tell the House his attitude to the Hepburn request, and Mr. King sat silent.

Mr. King, in lengthy and careful terms, explained why Premier Hepburn's personal request, made just before the end of the year, had at that time been refused. Mr. Hepburn pressed for an immediate assurance that Ontario would have permission to export electrical energy to the United States, and Mr. King found himself unable to give this, as he had previously informed two Quebec applicants that Parliament would be asked to decide on the matter of exports. Mr. King apparently did not tell Mr. Hepburn that the House of Commons would not grant the request. He did, however, inform him that the Government was unable to grant it, at that time. Hence Mr. Hepburn's anger, the definite split between Ottawa and Queen's Park and the events leading up to the present situation.

The Prime Minister was careful in his remarks not to add fuel to the fire. Deftly, he endeavored to say that the issue is not a particular one in which the Ontario Hydro's application is all that is at stake, but rather that it is a matter of general policy to be decided.

Mr. King, incidentally, rapped Mr. Rowe for suggesting that he, Mr. King, had been frightened by Mr. Hepburn. He chided Mr. Rowe with having sought cover in the House of Commons, instead of fighting his battles with Mr. Hepburn on the floor of the Ontario Legislature.

At Queen's Park, Mr. Houck appears to have made a good job of answering Mr. Roebuck, and there were times when he did not "pull his punches." His address was primarily a reiteration that the reason for the new agreements was the need for more adequate power supplies and the danger of the Hydro losing its case with the Beauharnois Company before the Privy Council.

## *A Poor Appeal*

We have received a copy of propaganda pamphlets issued by the Canadian Nationalist Party, which gives as its address P.O. Box 335, Toronto. It outlines the aims and objects of this group.

Like all other Fascist-inclined organizations, anti-Semitism seems one of its chief characteristics. Under the cloak of opposition to Communism, it attacks the Jews. "Unite solidly against the fact of Jewish international economic and financial domination. . . .Only under democracy can their tool—Communism—rise and flourish—to delude the oppressed masses of the people with its promises of an early paradise—a paradise where all are the slaves of their Jewish overlords and masters."

Judging the Canadian Nationalist party by its own pamphlets, we find that between the two evils—Communism and Fascism—there is little choice. We cannot imagine Canadians choosing either.

## *Essex Exports*

Importance to Essex County of its share of the exports of Canada was very clearly set forth by Mr. W. Donald McGregor before the Lions Club, which observed "Ford Night." He particularly referred to the exports of automobiles and parts, which, in 1936, amounted in value to $27,000,000. Of this total, $19,000,000 constituted the value of these automobiles and parts made in this county.

These figures suggest that every resident of the county should be vitally interested in Canada's trade policies. Upon the exports, particularly those of automobiles, the prosperity of the area largely depends. Mr. McGregor correctly states that manufacture of cars which are for other countries has enabled the companies to spread their employment over a much greater portion of the year than they would otherwise have been able to do. As all firms are seeking to even up employment over the year as much as is possible, this export business is highly important. Were it possible to double or treble it, one can readily see how much effect this would have in the matter of providing steadier work.

Mr. McGregor's address contained a multitude of statistics, proof that he has given much study to the matter of Canada's trade, particularly as it affects Essex County. It is not easy for the average citizen to work out for himself such a complete picture as Mr. McGregor gave, simply because the average man is not in a position to acquire all the essential facts. It is valuable, therefore, that the situation be explained as Mr. McGregor has done. For instance, how many people in the county were aware that Essex County last year exported $92,000 worth of ice! There are many things about one's own community that one does not know.

All trade is not, of course, export trade. Almost concurrently with Mr. McGregor's address statistics were released in Washington indicating the trend of imports by Canada from the United States. These figures show that automobiles, parts and accessories made up the largest item in point of value of the exports from across the border to this dominion. The value of this item was $50,700,000 in 1937 as compared with $37,800,000 in 1936, an increase of almost $13,000,000.

While trade is the interchange of goods and Canada cannot expect to export products if she does not import some, it does seem regrettable that there is such a volume of cars, parts and accessories imported when Canada has developed so many fine organizations for making them.

## *An Interesting Test?*

Not often do members of legislatures or parliaments resign their seats and seek a test of opinion in their constituencies in between general elections. However, Mr. Charles Cockroft, Social Credit member of the Alberta House for Stettler, suggests that he may do this before another session is called.

Mr. Cockroft was Provincial Treasurer and Minister of Municipal Affairs in the Aberhart Government, but resigned when he admitted that he could not see just where that administration was going in respect to its dividend promises to the people of the province. Apparently he still cannot see that it is making any progress in this regard. He will await the report of the Social Credit Board on its plans for the carrying out of the pledges of 1935. Mr. Cockroft proposes to then resign and ask the people of his constituency "to express their further desires."

The former member of the cabinet may not have such a bad idea at that. It might be a fairly good test of public opinion in Alberta in regard to Mr. Aberhart. However, when we see any member of any legislature voluntarily resigning in this manner and leaving his fate in the hands of the electors we shall then believe what we see.

## *Soldier Settlers*

Little fault will be found with the decision of the Dominion Government to extend until 1941 the bonus provision for soldier settlers in arrears on their payments. Under the plan, which otherwise would have expired this year, for every dollar a soldier settler pays off his arrears, he is credited with an additional dollar as a bonus. The extension will, however, apply to arrears of prior to March 31, 1938.

Soldier settlers have not had an easy time. In the first place most of them took up land when values were high. With falling prices for their products, and high interest rates and capital payments, many have failed, while others are still struggling to meet their payments.

The scheme may be regarded as a good deal of a failure. According to figures given at Ottawa, out of 25,000 settlers there have been more than 10,000 abandonments and quit claim deeds. The government has already written off $43,000,000 while $50,000,000 is still owing.

No doubt the soldier settlement plan was formulated for the very worthy purpose of re-establishing returned soldiers and in part payment of the services they rendered their country. It has proven no great boon, however, in cases where veterans have been loaded up with debt for most of their natural lives. Settlement schemes, housing schemes and other such public endeavors have for the most part been a financial failure, and have proven of no great benefit to most of those they were designed to help. Private initiative in such matters has been more successful.

I throw myself on the mercy of the court . . . But understand one thing . . . I'm NOT sorry! . . . It was excusable . . . I would do it again . . . In fact, it would be a pleasure.

* * *

What, sir? . . . I emptied every blinkin' chamber of my pistol at him . . . I sure did! . . . One bullet missed him, they tell me . . . I'm sorry about that . . . I wouldn't have had that happen for anything . . . Pity him? . . . Hah!

* * *

You want me to tell you my own story in my own way? . . . Gladly! . . . First of all, I didn't know the man . . . I never saw him before . . . You see, I wasn't shooting him as an individual . . . There wasn't anything personal in it . . . It was just a gesture . . . A gesture against something that has become unbearable.

* * *

It had been driving me mad for weeks . . . No one will know how I suffered . . . At first it didn't bother me . . . I only heard it intermittently . . . But soon everybody was doing it . . . My eight little boys came home with it . . . Then my seven little girls! . . . Then my one wife! . . . That's what she thinks . . . Anyway, then the people upstairs . . . The milkman, the butcher, the postman, the garbage gatherer-upper!

* * *

What's that, Your Worship? . . . Get down to the actual slaying? . . . Very well . . . As I said, I never saw him before . . . I sensed dimly that somebody was begging, please, to let him explain . . . I remember it startled me and I began to get jittery . . . Then I looked around and saw the fellow . . . I distinctly heard the words.

* * *

Magistrate Hanrahan: The words?

Joe: Yes, Your Majesty, the words "Bie Mir Bist——"

Magistrate: "Du Schoen?"

Joe: That's it, Your Highness.

Magistrate (fiercely): "And did he say bie mir bist du schoen means that you're grand?

Joe: Exactly. Again he said he'd explain—

Magistrate: That it meant you're the fairest in the land?

* * *

The prisoner nodded.

The spectators were standing, to a man.

Magistrate: Then what?

Joe: He said he could sing bella bella!

Magistrate: Could sing Vunder Bar?

Joe: No, but he mentioned various other places.

* * *

Magistrate: Case dismissed, with the compliments of the court. Also the compliments of the community. Court stands adjourned. And, say, what are you doing for the next few minutes?

Joe: Nothin' special.

Magistrate (taking a shotgun from under his desk): Come on with me. I know a few people who are always singing it. What's that you said each language did?

Joe: Each language only helps me to tell you—

Magistrate: How grand you are?

Joe: Yes, bie mir bist—

* * *

Jimmy Allan (killing them both with an axe): Well, they can't say they didn't ask for it.

### The Simple Life

(Walpole Island items in Wallaceburg News)

Miss Robinson and Mrs. Poland, Detroit, accompanying Miss M. Williams to the Island this week, that Miss Robinson will stay at her cottage this week end.

**Commodore's Hotel**

May be built this summer, the Commodore Mickle mentioned last week, only the insurance part will definitely settle the plan, and the site may change a little, says he; so the world is moving.

The Chief and Council met with a full crew, dispensing of plenty of business. The council passed a motion favoring to protect wild game, quail, pheasant, muskrat and deer, for a term of two years, to experiment, if the game mentioned to increase, that the inhabitants may enjoy with plenty of game after the two years protection. It was expressed that all members could co-operate in this movement, and see if results can be obtained, on this reserve, of course. Headquarters at Ottawa will have to approve this motion.

New janitor was appointed, Mr. Peter Altiman is the new government man taking the place of Mr. Henry Navarre who is detained up north.

**L.O.L. No. 1077**

The Orangemen met at the Orange hall Monday evening March 7, the election took place, and officers were elected and installed, as follows: W.M., H. B. Williams; D.M., Wm. Fisher; Chap., Dan Tooshkenig; Rec.-Sec., Wm. Peters; Fin. Sec., Edwin Jones; Treas., Jaynes Altiman. The meeting was well attended. This lodge very much in deficit, and the new officers are planning to strive for a clean slate, by all means this year. The installing officer, P.M. Mr. Dan Tooshkenig. Speeches were made by the newly elected officers, two old members, Mr. Tooshkenig being a member over 40 years and ex-chief W. Peters over 50 years, the old stand bys of the Orange Lodge on Walpole Island, they built the Orange Hall, now owned by the members of the lodge, they appealed to the young and old of the reserve, that this organization should be uplifted by the whole community of the reserve, where there is good 90 per cent. protestant community. No reason to have a good membership. The lodge with full equipment for lodge work.

## Glancing Up and Down the Universe

It looks like war.

Or, at least, less peace.

When Blum comes in France, can our blooms be far behind?

"Quebec Votes Brunette for Ideal Beauty," says a Montreal headline. Thus does the Ancient Province redeem itself.

World's chess champs are about to play for a side bet of $25,000. Maybe we're wrong, but it seems like big money for just frowning the hardest.

"Insurgents Smash Government Defenses," says a Hendaye headline. That's the Spaniards, for you. Usually this announcement isn't made till Saturday!

German Nazis say anything goes now, and bloodshed will be "Austria's fault." If a guy shoots at you and hits you in the pants, who's to blame? *You*, you sap!

Saskatoon man woke up during the height of a blizzard and saw a thief reaching through the window for his pants. Motto: Believe the weather forecasts, and wear your pants to bed.

U.S. Secretary of the Interior Ickes charges there's a "conspiracy" against public projects. Perhaps not so much a conspiracy as a feeling that the country'd be a whole lot better off without politics.

"Floodless Spring Predicted, But Ohio Valley Wary," says a Pittsburgh headline. And why not? Floodless springs have been predicted ere this.

As only one political party, the Fatherland Front, is recognized in Austria, Sunday's election may be more or less a farce—except, of course, for the manufacturers of adhesive tape, gauze, iodine and coffins.

Recent snowstorm in Montana, we see, "piled drifts to the tops of telegraph poles." Let's see, now. The last time we climbed telegraph poles, they were about 35 feet. Some snowstorm, brother, some snowstorm!

Rt. Hon. Neville Chamberlain tells the Opposition in the British House of Commons that England should hold aloof from the League of Nations because the United States has done so. Well, as it turns out, you couldn't want a better reason.

The fact that a chap in New York actually crawled through a keyhole is somewhat dimmed in its intensity by the fact that the keyhole was more or less one foot high by something like half a foot wide. Why, any star reporter in a newspaper movie could not only have crawled through but dragged the managing editor's daughter after him—to provide the "heart interest."

## Politics—and Other Subjects

### Canadian Legion

MR. H. C. GREEN, Conservative member of the House of Commons for Vancouver South, recently took exception to certain statements made by Mr. A. W. Neill, Independent, Comox-Alberni, with respect to the Canadian Legion. They argued it out as follows:

Mr. Green: "One remark made by my good friend the honorable member for Comox-Alberni (Mr. Neill) I think was unfortunate. Perhaps he did not mean to go quite so far in his attack on the officers of the Canadian Legion. It would be too bad if the committee got the impression that the Legion is made up of ex-officers or wealthy men, because such is not the case. I think the Legion, as well as other soldier organizations across Canada, represents all ranks and all classes."

Mr. Neill: "I did not say 'made up of,' I said 'managed by.'"

Mr. Green: "Well, all these soldier organizations are doing the best they can for the returned soldiers of Canada, and as a returned soldier myself I should like it made clear that there is no question of them being led by wealthy men or ex-officers."

### From Experience

"CONSERVATIVES should stop internal wars," says Colonel Drew. That's a subject on which George has had personal experience.—Stratford Beacon-Herald.

### Soldier Settlers

MORE than one-half of the original soldier settlers have abandoned, or given quit claim deeds, to their land, according to the following figures given in the House of Commons by Mr. M. J. Coldwell, C.C.F., Rosetown-Biggar:

| | |
|---|---|
| Original number of soldier settlers | 25,017 |
| Present number of soldier settlers | 9,888 |
| Number of abandonments, quit claims, etc. | 10,439 |
| Number of civilian purchasers | 5,790 |
| Number of British families | 1,790 |
| Number of repaid loans | 6,566 |
| Number of properties on hand: | |
| Leased, 1937 | 1,887 |
| Unoccupied | 708 |
| | 2,590 |

### Soil Drifting

SOIL DRIFTING is a comparatively recent problem on the prairies, says T. F. Donnelly, Liberal, Wood Mountain, who explains:

"Then we come to soil drifting. For years most of us did not know what soil drifting was. I have been farming in Western Canada for some thirty years, and for probably twenty-five years of that time we did not know what soil drifting meant. It is only in the last few dry years that it has become a problem. I believe that when we have rain again, as we hope we shall in the near future, we shall not be troubled with soil drifting."

THE author was born and brought up in England, graduating in civil and mechanical engineering from the London University. After serving an apprenticeship in railway shops he came to Canada and the United States where he engaged in manufacturing engineering on power and railway equipment. For the last 18 years he has been in consulting engineering practice in New York, with transportation and industrial activities. He is a Member of the American Society of Mechanical Engineers, the American Society of Civil Engineers and the Engineering Institute of Canada.

Recently in England he made a study of the results of the consolidations under the Railways Act of 1921; and in the study the railways, the labour executives and the government bureaus were kind enough to assist with information, advice and criticism. The paper outlines some of the important facts he was able to develop.

# Rationalization of British Railways

120068

The Railways Act of 1921 which consolidated the railways of Great Britain into four large systems divided roughly on geographical lines, described itself as an Act to promote the "more efficient and economical working of the railway system of Great Britain". It was a compromise in a difficult situation.

On the outbreak of war the Government had taken over the control of the railways, guaranteeing the net receipts of the individual companies on the 1913 basis and to return them to the owners unimpaired at the end of the war. Immediately following the war the Government found itself in possession of the railways in an impaired condition and with personnel seriously affected as the result of the war. Wages and the prices of fuel and supplies were more than double pre-war; and labour as a reward for its sacrifices during the war was demanding an eight hour day with the continuation of its war time bonus and wages.

In 1919 the Government introduced for all members of the wages staff an eight hour day instead of the pre-war nine to twelve hour; and in 1920, as the result of negotiations after a one week strike, wages were established on a weekly level just under the then wages and war bonus, with the balance to fluctuate with the 'Cost of Living Index' until wiped out by the fall of that index. This resulted in railway wages in 1920, figured on an hourly basis, averaging about three times pre-war. As passenger rates had been increased less than 50 per cent since 1913, and freight rates with minor exceptions not at all, the Government increased freight rates to about 110 per cent and passenger rates to about 75 per cent over pre-war. Yet in spite of these increases the railways were being operated for the Government at a heavy loss; and in the 20 months ending August 1921 (due largely to a coal strike and deferred maintenance expenditures) the railways had failed to earn their operating expenses by £12,000,000 ($60,000,000). Hence the necessity for Parliamentary action to promote the "more efficient and economical working of the railway system".

Commercial interests wanted lower freight rates; labour wanted the continuation of the high wage scale; and the railway companies wanted the properties back with some assurance in regard to their earning capacity, and they wanted the £60,000,000 ($300,000,000) which as a compromise had been agreed upon as compensation for the increased costs of the arrears of maintenance and other matters. So it is not difficult to understand the

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120069

pressure there was on all interested to make concessions and arrive at a compromise. The Labour Party wanted, and at least one member of the Government appeared to favour, nationalization of the railways. But the public generally was tired of the rigid war time control and was not satisfied that the railways could be operated effectively under a civil service. The shippers, in particular, were strenuously opposed to nationalization; and the more conservative of the labour leaders realized that the possibility of maintaining their high wage scale and at the same time giving the lower freight rates which the shippers were clamouring for, lay in the energetic initiation of reforms by private enterprize, rather than in a slow moving rigid bureaucratic organization such as the Post Office.

The Government proposed to consolidate the railways into a limited number of systems under the control of the Ministry of Transport, and to safeguard the interests of labour by specifying (1) That employees should be represented on the boards of directors of the amalgamated railway systems, and (2) A continuation of the existing Central and National Wages Boards originally set up in 1919 to regulate wages and conditions of labour. The chambers of commerce and the railways strenuously opposed employee representation on the boards of directors; and labour leaders realized that a minority representation on the boards might be of little actual benefit to labour, while the responsibility resulting therefrom would seriously curtail its freedom of action. This feature was accordingly abandoned when it was agreed that labour should have equal representation with the railways on the wages boards and that the existing wage scale and employees jobs were to be maintained. The Act as passed safeguarded railway labour by specifying that no employee of five years standing should as the result of the amalgamations be in any worse position as regards pay or rights; and that any who did so suffer were to receive compensation as decided by arbitration. This clause protected employees from losses resulting from the amalgamations; but it did not safeguard them against being laid off as the result of a depression. In a depression the railways were under a moral obligation to protect the 70 per cent of the employees who were considered to be 'permanent', and who, as such, had at the joint request of the railways and the labour unions been 'excepted' from the national Unemployment Insurance commonly known as the 'dole'. The other 30 per cent who were not classed as 'permanent' came under the protection of the national Unemployment Insurance in case of lay-off. This latter group consisted of shopmen, casuals, auxiliaries, etc.; and there have actually been very few lay-offs of such employees, as in a depression the railways and the labour unions combine to work out short time schedules, etc. to care for these men.

The Railways Act, passed in August 1921 and which went into effect January 1st, 1923, amalgamated the 120 standard gauge railways of Great Britain (excluding the London underground systems), with about 20,000 miles of route, into four geographical groups and about half a dozen jointly owned lines which had a total of about 600 miles; and it specified the conditions under which they should operate. It placed the

120070

process of amalgamation under the Amalgamation Tribunal, rates under the Railway Rates Tribunal, and wages under the National Wages Board.

The public and the commercial interests wanted lower freight and passenger rates which, as stated above, then averaged about 110 per cent and 75 per cent respectively above pre-war. The Act specified that the existing rates should continue in force until the Railway Rates Tribunal fixed new rates to yield the standard return for the railways, to go into force at a date which was subsequently fixed by the Tribunal as January 1st, 1928. But the railways voluntarily reduced rates from time to time, until in 1927 freight rates were about 63 per cent and passenger rates about 50 per cent over pre-war. In 1928 and subsequently many rates were still further reduced. Both passenger and freight rates were, however, increased 5 per cent in October 1937. Yet at the present time, despite the fact that railway unit operating costs are about double pre-war due to the increased prices of labour and materials, the level of railway charges as a whole is only about 50 per cent higher than pre-war, which figure corresponds closely with the increase in the cost of living.

The public also wanted the competition of pre-war days, and at the same time it wanted the convenience of the unified railway system. The grouping of the railways on geographical lines, however, largely eliminated competition except at common points where the systems overlapped; and the shippers were fearful of the effect this would have on the service. But they soon found that as a result of the increased enterprize of the managements, the short routing of shipments, and the elimination of clerical work and delays resulting from transfers between different lines, conditions had improved rather than suffered. So satisfied were they as to the results from this elimination of competition, that in 1932 they agreed to the pooling of freight traffic at all common points so that the most convenient depots and the most economic routes would be available for all shipments. The privilege of using passenger return tickets on any alternative direct route was also introduced at the same time. So the pre-war competition with its extravagancies has now virtually disappeared, with resulting benefits to both the public and the railways.

Though the British railways are not yet above criticism, the reduction in rates and charges, the increased speed and convenience with which freight and passengers are now handled, the co-ordination of highway and rail services (both freight and passenger), and the introduction of many special passenger services make it impossible that the public would ever consider reverting to the conditions of 15 years ago.

Thus the shipping and traveling public has obtained much of what it wanted, and far more than it expected from the Railways Act.

The railway companies wanted their pre-war prosperity as represented by the standard return which was based on the 1913 net earnings plus an allowance for later capital expenditures, and which total was equivalent to a return of about 4.7 per cent on the invested capital. But

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120071

they have never obtained this. In 1929, their best year, they realized 88 per cent of the standard return, and in the 14 years to 1936 they averaged 70 per cent of it. During this 14 year period the railways expended about £200,000,000 ($1,000,000,000) in physical betterments, partly to make good accrued wastage and partly to effect economies. This money came principally from renewal reserves and depreciation funds,—less than 7 per cent of it being charged to new capital, the interest on which resulted in increasing the standard return the railways were entitled to earn. This money was spent for new locomotives and cars, track improvements, signaling, shop equipment, improvement in freight depots, new freight handling equipment, etc. The railways also introduced a vast amount of improvements in operating details. But the maximum economies possible from the use of new equipment and methods of operation have been restricted by staff questions as the Railways Act protected the jobs and rights of employees; and the railways have been scrupulous in observing the spirit of this clause in the Act and in safeguarding human relations when handling their employees. Though exact figures are not available, the railways estimate that less than one per cent of the total employees were dismissed as the result of the amalgamations; and in most of these cases the financial compensation was settled amicably, few cases going to arbitration. Also in the closing of shops, depots and offices the railways moved very cautiously so as not to penalize any locality by removing railway activities until new industrial developments had replaced them in the commercial life of the community. So it will be a generation from the date of amalgamation before the railways will reap the full economic benefits to be expected under rationalization.

Whereas when the Act was passed a time of increasing business activity was expected, the period since 1923 has been one of fluctuating national prosperity. From 1923 to 1932 railway gross revenues decreased 24 per cent, net ton-miles 22 per cent, receipts per train mile 30 per cent for passenger and 14 per cent for freight. Further,—the development of common carrier highway truck and bus competition, and the use of the privately owned motor car and truck, has had a serious effect on the merchandise and passenger traffic of the railways. So it is not surprising that the railway companies have not to date been able to fully realize the financial benefits possible under rationalization. As business improves and highway traffic is brought under better control, and personnel conditions permit the introduction of the labour saving equipment and methods which the railways have planned, they expect to obtain all the financial results that were anticipated. But they have not obtained them to date.

Without the improvement in operating efficiency which resulted under rationalization the combination of the high war time wages for labour which have been substantially maintained to date, the increased prices of materials, and the reduction in freight and passenger rates from their 1921 level would have meant bankruptcy for probably one-third of the rail mileage of the country, with consequent injury to the whole financial system of trust funds, insurance investments, charitable endowments, etc. This im-

120072

provement was not alone that resulting from such items as joint use of rolling stock and facilities, short routing of traffic, standardization of equipment, consolidation of shops, offices, etc. which would naturally be expected from the grouping of a number of railways. The managements realized that rationalization meant a new era for the railways. They were shaken out of their pre-war conservatism, and they became eager to make improvements in operation; and to facilitate this introduced widespread changes in accounting, research and administration. The general attitude and effectiveness of railway labour also improved greatly, as the men saw they could expect to hold their gains only if the railways prospered. The machinery set up to facilitate the prompt settlement of questions affecting the interests and welfare of the staff worked well; and the sensible attitude of the labour leaders resulted in increased respect for the railway trade unions. The result was that despite a large element still favouring socialization of the railways, a spirit of co-operation and general desire to do their best replaced the almost hostile attitude on the part of the men which had at times been in evidence before the war.

It is not possible to apportion the extent to which the improvement in operation of the railways has been due to each of the various features which were directly and indirectly the consequences of the Railways Act. They must all be grouped together as the *total net results* under the rationalization of the railways; and the really remarkable character of these results is indicated by the comparison of the operating results of 1913 and 1936 given later in this paper.

Labour, more than any other interest, has gained by the rationalization of the railways, because it enabled the trade unions to consolidate and hold all the gains made between the outbreak of war and the commencement of amalgamated operation; and further, labour secured a very effective system of settling disputes with the railway managements.

Prior to the war railway wages and hours of labour in Great Britain were in a more or less chaotic state and varied with the cost of living and the general wage scale in the districts. The weekly wage rates for the same class of rail labour varied 30 per cent between the different localities; and the regular weekly hours on which the wage rates were based varied from 48 to 76 for the different classes of labour, four per cent of the employees having wage rates based on over 72 hours per week; and there were erratic rules as to over-time and Sunday and night work. During the war the wage scales and hours, generally speaking, remained unchanged; but to compensate for the increased cost of living all grades of railway labour received an additional compensation known as the War Bonus, which in 1920 amounted to about 38/- ($9.50) per week.

In 1919 when the Government granted an 8-hour day to all members of the railway wages staff in Great Britain, it set up a Committee to review the rates of pay and the conditions of service with the railway trade unions; and a comprehensive National Agreement covering all the railways of Great Britain was worked out. Except for locomotive and train crews,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120073

switch and signalmen, the new rates were on a town and country basis, the London rates being about 8 per cent higher and the rural rates about 8 per cent lower than the rates in the industrial areas of the country. These new weekly rates were about 100 per cent higher than the average English pre-war rates, plus an allowance varying with the cost of living, which allowance has gradually disappeared since as the cost of living has fallen. As the wage scale was on a weekly basis and the work day was changed to an 8-hour from a 9 to 12-hour and the classification of overtime was tightened, the *increase in hourly* rate of pay compared to pre-war varied from 120 to 200 per cent according to the class of labour and the locality, *after* the cost of living differential had disappeared. The benefits to labour of the Agreement can be seen from the following figures giving the *average actual annual* earnings for all employees in the standard gauge railways of Great Britain in various years.

| *Year* | *Average annual earnings* |
|---|---|
| 1913 | £ 76 ($380) |
| 1923 | 182 ($910) |
| 1929 | 180 ($900) |
| 1936 | 178 ($890) |

And when considering the above annual earnings for post war years it should be remembered that the *average* weekly working hours have been decreased about 18 per cent since 1913.

The variations in the post war annual employee earnings are due to changes in the cost of living differential and a temporary reduction in the wage scale in 1936. The figures indicate that the *average actual yearly earnings* of all classes of railway employees in Great Britain are now about 130 per cent higher than pre-war, as compared with about 45 per cent in the cost of living.

There were also set up to handle railway staff questions: Local Departmental Committees and Sectional Councils to deal with hours, welfare, operation, application of wage agreements, etc. at particular depots and on sections of the individual railways; a Central Wages Board and finally a National Wages Board to handle questions of wages, etc. on which there had been a failure to agree. The first three of these were constituted of an equal number of representatives of labour and the railways. The National Board had in addition to these, representatives of the public and an independent government appointed chairman. The decisions of these various boards were none of them binding on labour or the railways. But except in a few cases the decisions of the National Board have satisfied both parties; and in these exceptional instances subsequent direct negotiations between the railways and the trade unions resulted in agreement.

After 15 years experience with this machinery for negotiation it was revised in 1935. The titles of the Central and National Wages Boards were changed to Railway Staff National Council and Railway Staff National Tribunal respectively, to indicate that they dealt with all staff

120074

questions and not merely wages; and an important change was made in the National Tribunal. The National Wages Board had consisted of six railway representatives, six trade union representatives, four representatives of the public, and a government appointed chairman. The new Railway Staff National Tribunal which has replaced it, consists of one railway representative, one trade union representative, and a chairman appointed by agreement, or failing such agreement to be appointed by the Minister of Labour. The chairman is virtually the sole arbitrator of all matters; and by agreement any question can be referred to him for decision without being formally presented to the Tribunal. Direct conferences between the railways and the trade unions are also made a part of the machinery; and it is specified that no question can be referred to the National Council or the National Tribunal unless there has been failure to agree in such a direct conference. In the formal Agreement it is also specified that "The Railway Companies and the Railway Trade Unions shall use their best endeavours to avoid publicity or propaganda in respect to any question while it is under consideration". These changes from the original negotiation machinery set up by the Railways Act are quite important. They indicate the conviction of the railways and the trade unions that their disputes should be settled by direct negotiation between themeslves, and that the public or the government should have no part in them.

As indicating the improved standing of labour in the railway organization since rationalization, it is interesting to note that whereas in the Railways Act and 15 years ago employees were officially known as "servants" of the railways, now they are known as the railways "staff".

The above indicates the more important benefits that rail labour and the public have obtained under the rationalization of the railways of Great Britain considered in its broad and total effects. It is also interesting to see what benefits the railways have obtained from the more effective use of labour which has resulted from the consolidations with their accompanying physical betterments and improvements in operation and administration. To make such a comparison it is necessary to go back to the conditions in 1913. The reason for this is that on January 1st, 1923, the official date of formal amalgamation, many of the more obvious possibilities of unified operation had already been put into practice. From 1914 on, during the period of government possession the railways were largely operated as one unit and many arrangements were made for the economic routing of traffic, the common use of equipment and facilities, and for joint services. And when in August 1921, on the passage of the Railways Act, the railways were handed back to the companies, not only were many of these arrangements continued, but further arrangements, consolidations and informal partnerships were made in anticipation of amalgamation; and these resulted in immediate substantial savings of a permanent nature. These informal arrangements were accelerated because of the clause in the Act which specified that after amalgamation the railways would be permitted to retain in addition to their standard return an amount equal to one-third of the annual savings effected prior to the date of amalgamation. Net earn-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120075

ings in excess of this amount, when considered to be permanent, were to be alloted 80 per cent to reduction in rates and the other 20 per cent was to be added to the standard return which the railways were permitted to earn. As a result of all this a considerable part of the immediate benefits to the railways which were expected under rationalization were already existent in 1923. To obtain a true picture of the way in which the improvement in operation developed under rationalization it is necessary to compare the results of 1913 with those of 1923 and subsequent years.

It is not possible to go into elaborate detail. But a simple and instructive comparison can be made by taking in each year the average train-miles (passenger plus freight) per man-hour of all employees in railway service proper, i.e. exclusive of hotels, docks, etc. This is because under English conditions train-miles are a very fair measure of the work a railway has to perform, since 85 per cent of the train miles are determined by the passenger and merchandise traffic, the servicing of both of which is decided by public convenience and cannot be curtailed at the will of the railway. These figures for all the standard gauge railways of Great Britain combined, are given below. The man-hours have been determined from the average number of employees in each year, with the normal average rated work hours of 58 per week in 1913 and 48 in post war years (House of Commons Documents), and with the percentage of overtime, short time, sick leave and holidays estimated from the information available.

| *Year* | *Man-hours per train-mile* |
|---|---|
| 1913 | 4.43 |
| 1923 | 4.08 |
| 1936 | 3.02 |

That despite the benefits from consolidation which were already in force in 1923 the average man-hours per train mile in that year were only 8 per cent less than in 1913 was probably due to the betterment and deferred maintenance work in progress in 1923, and because the railways had not then fully recovered from the disorganization resulting from the war. With the completion of the program of betterments and the deferred maintenance, and as economies in operation were gradually introduced by the railway managements as the natural wastage of personnel through death and retirement permitted it, the increasing effectiveness of labour under rationalization became evident. This is indicated by the further decrease of 26 per cent in the man-hours per train-mile in the next 13 years to 1936.

These figures indicate that if in 1936 labour had only been as effective as in 1913 the total number of employees in the former year would have been about 46 per cent greater than it actually was. Assuming this percentage applies uniformly to all classes and grades of labour,– and informed investigation indicates that this assumption introduces only a small error,– the total increase in the 1936 payroll for all the standard gauge railways of Great Britain (excluding the London underground system) would have been £40,800,000 ($204,000,000). It is estimated that there

120076

would also have been an increase of about £1,500,000 ($7,500,000) in the cost of fuel and supplies if 1913 equipment and standard of operation had existed in 1936. If the railways had incurred this additional expense of £42,300,000 ($211,500,000) for labour and materials in 1936 they would have shown a net operating deficit of £8,900,000 ($44,500,000) instead of the net earnings of £33,400,000 ($167,000,000) which they actually showed. This saving of £42,300,000 ($211,500,000) is about 26 per cent of the gross revenues for the year, and represents a reduction of about 24 per cent in what the operating expenses would have been with the 1913 standards of efficiency. There was a further saving resulting from the reduction in train miles due to pooling of traffic, closing of branch lines, short routing of shipments, common use of freight cars, etc. in 1936. It is not possible to estimate this, but under the liberal service which public convenience requires in Britain the net percentage saving was not large.

Many of the statements made above are of necessity only approximate due to the limited amount of detailed information available. But as the railways, the labour executives and the government bureaus have been kind enough to assist with information, advice and criticism, it can be assumed they are reasonably accurate.

As previously stated it will be a generation before the full benefits under the rationalization of the railways of Great Britain and its attendant possibilities are realized. But the saving of £42,300,000 ($211,500,000) in 1936, *most of which went to the shippers in reduced rates,* indicates the progress made to date; and the increased effectiveness of labour explains why it is possible to pay labour such greatly increased wages while still keeping freight and passenger rates at a level comparable with the cost of living. However, it must not be forgotten that though wages and salaries constitute two-thirds of the operating expenses of the railways, the effectiveness of labour is only one of the items affecting their prosperity.

Since rationalization the railways have never earned their standard return, and over the last 15 years have averaged only 70 per cent of it. These poor earnings have been largely due to the reduction in freight and passenger rates, the disturbed economic condition of the country prior to 1927 and to the depression since 1930. But if Great Britain experiences years of prosperity such as were foreshadowed in 1927 and 1929 it seems likely that the hopes shared 15 years ago by the public, the progressive railway managers and the labour leaders will be realized in the next 10 or 15 years. The railways should then be earning their standard return plus a satisfactory margin which will permit further reduction in rates; while rail labour, no longer subject to the pre-war conditions of low pay and poor morale, should through still higher wages be sharing in the prosperity of the properties. This will have been the result of the co-operation of the public, the enterprize of the managements, and the common sense policy of the labour leaders.

R E S O L U T I O N.

WHEREAS there is an insidious and vicious propaganda to discredit the good name of the Canadian National Railways and their benefit and usefulness to the people of Canada, and

WHEREAS those responsible for the underhand propaganda having apparently done what can be done under cover are now coming out publicly and into the open in an attempt to educate the general public to their way of thinking, in order that, when the opportune moment arrives, they may have public support in their endeavours, and

WHEREAS we are fully aware that this has been and is being done, not in the best interests of the people of Canada as a whole, but only in the interests of a favoured financial minority, who are largely citizens of other countries, and

WHEREAS we are decidedly against a monopoly, of any kind, and more particularly against one that would affect and cover one of the most vital things in the life of our country, its rail transportation system, and

WHEREAS the reason we are opposed to the monopoly, not only cover the question of the welfare of thousands of railroad workers in particular, but the welfare of all the citizens of Canada as a whole,

BE IT THEREFORE RESOLVED that this meeting of railroad men and representatives, citizens of the town of Dauphin and surrounding districts, hereby go on record as being absolutely opposed to any move by any party, or parties, which would tend to destroy the identity of the National Railways by pooling, amalgamation or unification with any private concern to constitute a monopoly of rail transportation in Canada, and

BE IT FURTHER RESOLVED that a copy of this resolution be forwarded to

Rt.Hon.McKenzie King, Prime Minister.
Rt.Hon.R.B.Bennett, Leader of the Opposition, in Federal House.
Hon.C.D.Rowe, Minister of Transport.
Hon.Norman Rogers, Minister of Labor. W.J.Ward, M.P.
Senator Dandurand, Senator Meighen. Senator Asseltine.
Senator Murdoch, Hon Robert Hawkins. Hon John Bracken.

# How the *British* Solved their *Railway Problem*

By W. L. WATERS, C.E.

THE Railways Act of 1921 which consolidated the railways of Great Britain into four large systems divided roughly on geographical lines, described itself as an Act to promote the "more efficient and economical working of the railway system of Great Britain." It was a compromise in a difficult situation.

On the outbreak of war the Government had taken over the control of the railways, guaranteeing the net receipts of the individual companies on the 1913 basis and to return them to the owners unimpaired at the end of the war. Immediately following the war, the Government found itself in possession of the railways in an impaired condition and with personnel seriously affected as the result of the war. Wages and the prices of fuel and supplies were more than double pre-war, while labour, as a reward for its sacrifices during the war, was demanding an eight hour day with the continuation of its war time bonus and wages.

In 1919 the Government introduced for all members of the wages staff an eight hour day instead of the pre-war nine to twelve hour; and in 1920, as the result of negotiations after a one week strike, wages were established on a weekly level just under the then wages and war bonus, with the balance to fluctuate with the 'Cost of Living Index until wiped out by the fall of that index. This resulted in railway wages in 1920, figured on an hourly basis, averaging about three times pre-war. As passenger rates had been increased less than 50 per cent since 1913, and freight rates, with minor exceptions, not at all, the Government increased freight rates to about 110 per cent and passenger rates to about 75 per cent over pre-war. Yet in spite of these increases the railways were being operated for the Government at a heavy loss; and in the 20 months ending August 1921, the railways had failed to earn their operating expenses by $60,000,000. Hence the necessity for Parliamentary action to promote the "more efficient and economical working of the railway system."

Commercial interests wanted lower freight rates; labour wanted the continuation of the high wage scale; and the railway companies wanted the properties back with some assurance in regard to their earning capacity, and they wanted the $300,000,000 which, as a compromise, had been agreed upon as compensation for the increased costs of the arrears of maintenance and other matters. So it is not difficult to understand the pressure there was on all interested to make concessions and arrive at a compromise. The Labour Party wanted, and at least one member of the Government appeared to favour, nationalization of the railways. But the public generally was tired of the rigid war time control and was not satisfied that the railways could be operated effectively under a civil service. The shippers, in particular, were strenuously opposed to nationalization; and the more conservative of the labour leaders realized that the possibility of maintaining their high wage scale and at the same time giving the lower freight rates which the shippers were clamouring for, lay in the energetic initiation of reforms by private enterprise, rather than in a slow moving, rigid, bureaucratic organization such as the Post Office.

The Government proposed to consolidate the railways into a limited number of systems under the control of the Ministry of Transport, and to safeguard the interests of labour by specifying (1) that employees should be represented on the boards of directors of the amalgamated railway systems, and (2) a continuation of the existing Central and National Wages Boards originally set up in 1919 to regulate wages and conditions of labour. The chambers of commerce and the railways strenuously opposed employee representation on the boards of directors; and labour leaders realized that a minority representation on the boards might be of little actual benefit to labour, while the responsibility resulting therefrom would seriously curtail its freedom of action. This feature was accordingly abandoned when it was agreed that labour should have equal representation with the railways on the wages boards and that the existing wage scale and employees' jobs were to be maintained. The Act, as passed, safeguarded railway labour by specifying that no employee of five years' standing should as the result of the amalgamations be in any worse position as regards pay or rights; and that any who did so suffer were to receive compensation as decided by arbitration. This clause protected employees from losses resulting from the amalgamations; but it did not safeguard them against being laid off as the result of a depression. In a depression the railways were under a moral obligation to protect the 70 per cent of the employees who were considered to be 'permanent,' and who as such, had, at the joint request of the railways and the labour unions, been 'excepted' from the national unemployment insurance commonly

known as the 'dole.' The other 30 per cent who were not classed as 'permanent' came under the protection of the national unemployment insurance in case of lay-off. This latter group consisted of shopmen, casuals, auxiliaries, etc., and there have actually been very few lay-offs of such employees, because, in a depression, the railways and the labour unions combine to work out short time schedules, etc. to care for these men.

The Railways Act, passed in August 1921, and which went into effect January 1st, 1923, amalgamated the 120 standard gauge railways of Great Britain (excluding the London underground systems), with about 20,000 miles of route, into four geographical groups and about half a dozen jointly owned lines which had a total of about 600 miles; and it specified the conditions under which they should operate. It placed the process of amalgamation under the Amalgamation Tribunal, rates under the Railway Rates Tribunal, and wages under the National Wages Board.

The public and the commercial interests wanted lower freight and passenger rates which then averaged about 110 per cent and 75 per cent respectively above pre-war. The Act specified that the existing rates should continue in force until the Railway Rates Tribunal fixed new rates to yield the standard return for the railways, to go into force at a date which was subsequently fixed by the Tribunal as January 1st, 1928. But the railways voluntarily reduced rates from time to time, until in 1927 freight rates were about 63 per cent and passenger rates about 50 per cent over pre-war. In 1928 and subsequently many rates were still further reduced. Both passenger and freight rates were, however, increased 5 per cent in October 1937. Yet at the present time, despite the fact that railway unit operating costs are about double pre-war due to the increased prices of labour and materials, the level of railway charges as a whole is only about 50 per cent higher than pre-war, which figure corresponds closely with the increase in the cost of living.

### Traffic Pooling

The public also wanted the competition of pre-war days, and at the same time it wanted the convenience of the unified railway system. The grouping of the railways on geographical lines, however, largely eliminated competition except at common points where the systems overlapped; and the shippers were fearful of the effect this would have on the service. But they soon found that as a result of the increased enterprise of the managements, the short routing of shipments, and the elimination of clerical work and delays resulting from transfers between different lines, conditions had improved rather than suffered. So satisfied were they as to the results from this elimination of competition, that in 1932 they agreed to the pooling of freight traffic at all common points so that the most convenient depots and the most economic routes would be available for all shipments. The privilege of using passenger return tickets on any alternative direct route was also introduced at the same time. So the pre-war competition with its extravagancies has now virtually disappeared, with resulting benefits to both the public and the railways.

Though the British railways are not yet above criticism, the reduction in rates and charges, the increased speed and convenience with which freight and passengers are now handled, the co-ordination of highway and rail services (both freight and passenger), and the introduction of many special passenger services make it impossible that the public would ever consider reverting to the conditions of 15 years ago.

Thus the shipping and travelling public has obtained much of what it wanted, and far more than it expected from the Railways Act. The railway companies wanted their pre-war prosperity as represented by the standard return which was based on the 1913 net earnings plus an allowance for later capital expenditures, and which total was equivalent to a return of about 4.7 per cent on the invested capital. But they have never obtained this. In 1929, their best year, they realized 88 per cent of the standard return, and in the 14 years to 1936, they averaged 70 per cent of it. During this 14 year period, the railways expended about $1,000,000,000 in physical betterments partly to make good accrued wastage and partly to effect economies. This money came principally from renewal reserves and depreciation funds—less than 7 per cent of it being charged to new capital, the interest on which resulted in increasing the standard return the railways were entitled to earn. This money was spent for new locomotives and cars, track improvements, signaling, shop equipment in freight depots, new freight handling equipment, etc. The railways also introduced a vast amount of improvements in operating details. But the maximum

**BRITAIN transformed a potential $44,500,000 operating deficit into $167,000,000 of net earnings by amalgamating 120 railways into four major lines, and resorting these new groups to private control, according to this author. Could Canada do the same?**

economies possible from the use of new equipment and methods of operation have been restricted by staff problems, as the Railways Act protected the jobs and rights of employees; and the railways have been scrupulous in observing the spirit of this clause in the Act and in safeguarding their human relations with their employees. Though exact figures are not available, the railways estimate that less than one per cent of the total employees were dismissed as the result of the amalgamations; and in most of these cases the financial compensation was settled amicably, few cases going to arbitration. Also in the closing of shops, depots and offices, the railways moved very cautiously so as not to penalize any locality by removing railway activities until new industrial developments had replaced them in the commercial life of the community—all of which delayed the full economic benefits expected under rationalization.

### Savings

If, in 1936, labour had been only as effective as in 1913, however, the total number of employees in the former year would have been about 46 per cent greater than it actually was. Assuming this percentage applies uniformly to all classes and grades of labour—and informed investigation indicates that this assumption introduces only a small error—the total increase in the 1936 payroll for all the standard gauge railways of Great Britain (excluding the London underground system) would have been $204,000,000. It is estimated that there would also have been an increase of about $7,500,000 in the cost of fuel and supplies, if 1913 equipment and standard of operation had existed in 1936. If the railways had incurred this additional expense of $211,500,000 for labour and materials in 1936, they would have shown a net operating deficit of $44,500,000 instead of the net earnings of $167,000,000 which they actually showed. This saving of $211,500,000 is about 26 per cent of the gross revenues for the year, and represents a reduction of about 24 per cent in what the operating expenses would have been with the 1913 standards of efficiency. There was a further saving resulting from the reduction in train miles due to the pooling of traffic, closing of branch lines, short routing of shipments, common use of freight cars, etc., in 1936. It is not possible to estimate this, but under the liberal service which public convenience requires in Britain the net percentage saving was not large.

It will be a generation before the full benefits under the rationalization of the railways of Great Britain and its attendant possibilities are realized. But the saving of $211,500,000 in 1936, most of which went to the shippers in reduced rates, indicates the progress made to date; and the increased effectiveness of labour explains why it is possible to pay such greatly increased wages while still keeping freight and passenger rates at a level comparable with the cost of living. However, it must not be forgotten that though wages and salaries constitute two-thirds of the operating expenses of the railways, the effectiveness of labour is only one of the items affecting their prosperity.

Since rationalization the railways have never earned their standard return, and over the last 15 years have averaged only 70 per cent of it. These poor earnings have been due largely to the reduction in freight and passenger rates, highway competition, the disturbed economic condition of the country prior to 1927 and to the depression since 1930. But if Great Britain experiences years of prosperity such as were foreshadowed in 1927 and 1929, it seems likely that the hopes shared 15 years ago by the public, the progressive railway managers and the labour leaders will be realized in the next 10 or 15 years. The railways should then be earning their standard return plus a satisfactory margin which will permit further reduction in rates; while rail labour, no longer subject to the pre-war conditions of low pay and poor morale, should, through still higher wages, be sharing in the prosperity of the properties. This will have been the result of the co-operation of the public, the enterprise of the managements, and the common sense policy of the labour leaders.

# Next Year's Autos

THE 1939 automobiles have been fully designed, and blueprints are being run-off for the 1940 models. Definite specifications of the 1939 cars are not yet available to the general public, but the trade has certain information.

The biggest change will be in the type of frames and designs. More "bridge-type" frames will be used and greater stream-line effect will be achieved.

The trend will be towards the elimination of the running board which will be facilitated by the lowering of the drive shaft. At the same time, cars will tend to be wider and generally along the lines of the new Cadillac which was introduced last month. Gadgets and extras will be reduced to the minimum and this may allow a slight lowering of the base price.

Earlier in the year, the automobile industry was believed to be working on radical changes in design in order to stimulate sales but most of these have been deferred. In fact, it is possible that purchasers will even be given the option of models with certain of the old features retained.

The usual rumours have reappeared regarding a still cheaper Ford and a more diversified line by this independent, but otherwise manufacturers seem reluctant to go too far in a new direction.

## On the Wing

### By Wallace Havelock Robb

ONE glorious July morning, this is, as I write. Looks like we'll do some rare old haying to-day! Last field is cut and curing, and we'll clean up sure, before harvest, I believe, all but some second cutting on two good fields. I recall having some second cutting of alfalfa, but it was nothing to blow about. This second-cut clover represents a sort of milestone of progress on the grange. It shows results of restored fertility, representing a sort of extra dividend on the money spent on commercial fertilizer. However, all that is common, shop talk, and I am full of the spirit of morning, right now, and the birds give me many thoughts. They are on the wing.

Starlings are roaming the countryside already, in big flocks, and, I suppose, they are getting a bird's-eye view of which farms are going to have the choicest grain to steal. I dislike the Starlings, mightily, but as to whether they cost us more in stolen grain than they pay us in service in insect control, well, I'm not able to say. Time will have to answer that riddle, but if they keep on increasing and causing other valuable birds to decrease, it'll be a very costly affair to North America. It is human nature to under-estimate the good that the valuable birds do and it is likewise easy to over-estimate the harm that the robber birds do. But it is a beautiful morning, and I'm not going to let this sort of thing worry me.

Last year a pair of Robins built their nest in the steel frame which supports The Poet's Bell. How they stood the booming crash of the bell I'm sure I cannot say, but live and thrive they certainly did. The young ones were fine and strong—h'm! music must be good for the stomachs of birds as well as for their souls. Anyway, back came the birds to the bell again this Spring. And what in the world could be more romantic than a pair of Robins nesting beside a ringing bell? The Robin will nest anywhere close to man. Probably this is one of the main reasons why we love this bird so much. So, to get on with the yarn, they came back again this year, nested in the same place, brought off their young and raised them to safety around the door and lawn, and, believe it or not, the parents are back again fussing about the nest, making minor repairs, and I do believe they'll have another brood! I'm going to start putting nicks in the pine pillars to keep count of the young. It's only fair that we should give the bell credit for all the birds it is raising.

When we first came here, several years ago, we put up narrow shelves for the Phoebes, and they have been used ever since. The one on the front of the house is usually used first, then, for the second brood, the one in the rear. But, this year, a new element has entered. The Phoebes went to the rear first, and the front was taken by barn swallows! So, we have barn swallows twittering above our front door. And Mr. Barnswallow is pretty bossy, too. He dislikes birds coming to my call and hanging around the front door. Yesterday, after he had chased away one of my friends, a Nuthatch, he swooped around my head in a questioning way, seeming to protest that I was attracting undesirable company. They are so "almost human", these birds, that one looks to them for company.

Last week a beautiful Bald Eagle spent some time in the Sanctuary. Ernie and his family saw him in a field eating a Woodchuck, and he flew up on to a high tree on the ridge. My! What a sight he was, with his snow-white head and tail, and his yellow beak and feet! Worth going to see any day! And, so, the day begins. I must away to ring Gitchi Nagamo for the Robins, then some coffee and toast, and away to town with the milk.

# Unions and Agriculture

## When Labor Exploits Labor—How Organized Labor Has Reduced Purchasing Power and Maintained Unemployment

By HECTOR O. PAYNE

THE World War developed in each nation a more efficient production than was dreamed possible. They were able to produce enough for their needs in addition to the needs of millions of soldiers who were destroying wealth as fast as they knew how. When these men came home and began to produce a little instead of destroy a lot, grave social unrest was inevitable. In this fertile field of unemployment and the dole, men weary of waiting for better wages, did what seemed to be the only chance. They formed monopolistic unions and refused, in a body, to work for less than a fixed wage. This seemed to give results, so there followed a long series of strikes resulting in higher wages for less work (shorter hours).

In England where about 90 per cent of the population is engaged in secondary production; the ill effects of arbitrary wages, brought two important changes, Agriculture was so hard hit it was necessary to place tariffs against foodstuffs in order to raise the farmer's income and avoid the extinction of agriculture which was considered necessary chiefly in case of war. The second effect of high wages and short hours was an increase in the price of finished goods. These higher priced products failed to find a market in a world where labor in some countries was not organized. On the continent the situation was much the same, import duties of two or three dollars a bushel of wheat being necessary before a farmer could produce wheat and pay the wages of industrial labor.

In Germany on the one hand we had farmers working as hard as ever but receiving little in return. In an effort to pay the reparations bill, land taxes were so high as to be almost confiscatory, implements and all manufactured necessities were so high as to be out of reach. On the other hand, we had industrial workers receiving very high wages—for a very few hours per week. Thus even with the high wages they could not obtain enough hours per week to support themselves. Now added to these two desperate classes, we had a still more desperate one, five or six million unemployed with no provision to save them from starvation. These people were experiencing their first taste of democracy, they did not think much of it and welcomed Herr Hitler when he promised a return to pre-war conditions.

In Russia, communism, the least intelligent of any labor movement, gained complete sway. As a consequence the nation has been almost totally paralyzed ever since. Her trade with other nations has virtually ceased, a reliable barometer of social welfare. It appears as if another revolution is the only method that will displace blood and coercion by freedom and peace.

In such countries as Canada and the United States, we were not immediately affected by unemployment because there were millions of acres awaiting the plow. We increased production by leaps and bounds without a thought that some day we might produce more than necessary. It is possible there would never have been a surplus of wheat if European countries had not been utterly demoralized financially as well as industrially.

In the meantime, however, unions became stronger. Labor leaders began agitation to increase the hourly rate of pay as in Europe without considering the vastly superior annual wage of the American worker. The railway workers were the first to obtain the closed shop. The railways were among the first to experience paralysis. Now a railway company must be run on a business basis, not on abstract theories of the worker, or it will cease to exist altogether. Railroads were not built for the sole purpose of giving employment to a quota of men. They were built to provide transportation for those who were willing to pay for it and no useful service is performed by running empty ghost trains in order to give employment. If it costs more to operate a branch line than receipts, then that line should be discontinued if there is no means of making it pay its own way. Persistent annual deficits of certain lines, destroy the profits of others, and if they grow large enough, the position of the whole system becomes grave and threatens to throw out of employment all the workers instead of a few.

Railroads like many other lines of business were built from the subscriptions of thousands of workers who were willing to risk their hard-earned savings in a somewhat doubtful venture in the hope their money would be safe and provide income in their declining years. This is common stock, where the investor takes the risk of receiving either nothing or seven or eight per cent according to business conditions. This cushions the effect of business recessions and permits a relatively stable wage scale, which is so greatly desired by many workers, and which would be impossible with preferred stock. The undistributed profits account also stabilized wages.

This type of finance is responsible for almost all of our industrial progress of the past fifty years. Without it, there would be no railroads, no automobiles, no steel and rubber industries and so on without end. This worked well while intelligent management had control. In some cases undue profits went to the shareholders, but they were largely re-invested in new industries bringing in their train new employment peaks, better wages and improved circumstances for the worker. When the depression came, bringing industrial stagnation, carloadings fell off and consequently railway revenue declined. There was not as much work to do and the natural conclusion was that less men could do it. The closed shop of the trainmen's union were able, under the threat of strike, to prevent adequate lay-off. The railways found themselves with a fixed expenditure and a falling income. Dividends to the shareholders dwindled and disappeared. The companies were forced to borrow money on security of the shareholders' property to pay the wages of idle workers. Before the companies had recovered from this blow the union bore down on the management waving the big mob stick of strike, demanded, and received, the restoration of a ten per cent wage cut, while farmers were receiving about one-half their normal income.

No wonder organized labor seeks by every means to prolong the depression when it gives them such a large advantage over farmers. We would be no better off if the profits of the C.N.R. had been ten times as large last year and the union had grabbed them all and a little more.

Any labor leader who insists on all the profits and some red ink is not a friend of labor. He is a stupid traitor, a deformed monster child of communism. As citizens of this country we have civil and property rights. We should guard jealously our social right to work or not as we please as well as our right to own property for profit. You cannot destroy one without destroying the other, any more than you can stab your brain and expect your heart to continue functioning. If we deny the right of money invested in property to a profit, none of us will invest money. We will put it in the bank and no one will borrow.

That is part of the trouble today. People with shares in C.P.R. are receiving no dividends, they will invest no more of their savings in that company or any other until they pay profits. So they deposit their money in a bank for small interest, a totally unproductive venture when no one will borrow it to invest in business. No one with money will finance potential Henry Fords. No new industries or homes will be built to absorb the army of young people leaving school each year. Unemployment will increase and old industries already in dire circumstances will have to pay the increasing dole. As taxes increase on homes and farms, more and more small holders will be forced to sell out to richer people and we finally arrive at a more unequal distribution of wealth than when we started.

In Canada probably 90 per cent of adult males have some small share in real estate, even if it may be indirect through life insurance. The same cannot be said of Russia. As regards the closed shop it brings equally disastrous results in its train. We have the spectacle of the employees of a mill taking complete control. They insist not only on all the profits but bonuses as well. The only way such demands may be met is by increasing to outsiders the price of their products. If the steel workers of all countries organize and the miners do not, the wages of the one increases and that of the other does not. This is not increasing the wages of the workers, it is one class stealing from the other by mob violence.

In certain industries labor organization is impossible because a strike would be impossible. If farmers went on strike for six weeks in seed or harvest time there would be no wages for a year. They would starve as well as the railroader. To end this class robbery we must insist when any man strikes that any other who is willing be allowed to continue, unmolested.

No one is in favor of six dollars a week for textile workers any more than six dollars a week for a farmer and two or three grown sons, with no interest on the money invested in his farm. No problem is solved by organizing the textile hands and forcing their wages to ten dollars only to depress the farmers' purchasing power to three dollars. If there were a country where every worker could be organized class warfare would still disrupt all business. Suppose each class started out at a fair wage. First one class would strike for a ten per cent increase, and so on until they all had the same increase. This process would be repeated many times until wages were, say, 100 per cent higher than to begin with or with the outside world. The manufactured articles for sale outside would be so high priced because of labor

# Wayside Gossip---News, Views and Ideas

## Clover Seed Important Specialty

CLOVER seed is an important specialty on many farms of Central Ontario, as well as in certain other sections of the Province.

Seeing a reaper harvesting alsike seed on No. 7 Highway, between Brampton and Woodbridge, we discreetly negotiated the strand of barb wire strung along the top of the woven-wire fence . . . to discourage leaning, and possibly climbing . . . and cut across the field for a closer inspection of an implement that has made a limited "comeback".

Owing to dry weather, the alsike stand was short and Mr. Joseph H. Wright had started into the 11-acre field with the mower, about 4 a.m. that morning. His object in getting on the job so early, of course, was to take advantage of the dew, since the drier the alsike the larger the number of heads broken off and lost. While the mower can cut closer than the reaper, the swaths must be raked up, and during this operation, the horses tramp the alsike. So later in the morning, the reaper was put into action.

Mr. Wright's son, Eldon, was on the machine when we called, and he told us that they had 30 acres of alsike seed, of which 10 acres was a volunteer stand. In addition, there were 28 acres of red clover seed. Twelve acres of alfalfa had been left for seed but conditions again proved unfavorable for seed formation, so they finally cut it for hay. The alsike being harvested was very clean. The Wright farm is 217 acres in extent. Eldon said that some have their mowers equipped with tables for cutting alsike seed.

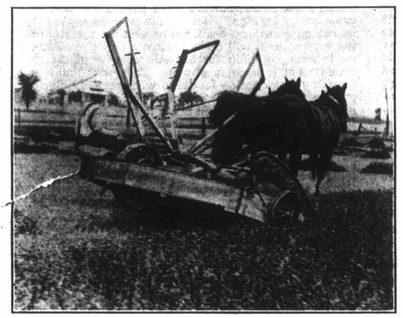
In view of the current discussion on specialization, a remark made to us by Mr. Alex. Wilson of Mono Road, illustrates quite graphically one angle of specialization. On his 275 acres, this year, he has 80 acres of alsike seed, part of which is volunteer stand. It promised a fine yield, Mr. Wilson thinking the crop might run 7 or 8 bushels per acre. "I have so much alsike this year," he said, "that I have been doing a bit of shivering. A little hot weather when the seed was setting, or a hail storm before I get it harvested, would make a tremendous difference."

One mow of the barn is filled with alsike seed, so as to facilitate threshing. When the dew is on the alsike in the field, they thresh out of the barn. Once the alsike outside is dry enough they switch to that.

Some sweet clover is usually left for seed, but this year Mr. Wilson only has the alsike. A certain acreage of pure sweet clover is commonly grown for hay, which is fed to the cows.

While a lot of alsike seed is grown, a diversified production program is followed. Mr. Wilson has 22 cows and each year he turns off several baby beeves and a dozen two-year-old butcher cattle of his own rearing, besides selling cream. He also markets the litters of three brood sows, and raises a couple of colts.

## Appreciate "Treated" Roads – Dust a Triple Liability



WHILE driving out to Brampton, the other morning, our attention was attracted by a car tearing along the side-road we were approaching. Away from the wheels rolled an impressive cloud of dust. Indeed, so heavy was the dust formation that we idly thought we should not like to live in a house beside that particular road.

Our momentary reflection failed to give the mass of road dust its full dues . . . as we realized a little later, while talking to Mr. N. L. Powell, Engineer for Peel County. What he told us is obvious enough, but then it is frequently the obvious things we overlook until someone or something draws our attention to them.

"That dust consists entirely of road material. Loose gravel is gradually ground into dust by passing cars and trucks, which also whirl it into the air, from which it settles on to the roadside and adjoining properties. Such dust represents gravel that must be replaced if the road is to be maintained in good condition."

According to commercial literature we have seen, engineers estimate this loss of gravel at from 100 to 300 cubic yards per mile annually. And as farm people know only too well, that is not the only loss. In fact, loose gravel and flying dust carry a triple liability.

A rather striking example of a second form of loss was cited to us by Mr. Powell. During road-building operations in the southern part of Peel, where fruit and truck crops are featured, one grower suffered severe loss to his raspberry crop. Passing trucks stirred up so much dust that the berries were rendered unsaleable, the part next the road being dried and hardened. Moreover, a lot of the canes were killed. Owing to the extraneous nature of the traffic, the grower was able to collect heavy damages, which was paid out of insurance provided for that purpose.

*Harvesting alsike seed with a reaper, on the farm of Joseph H. Wright, Malton, Ont.*

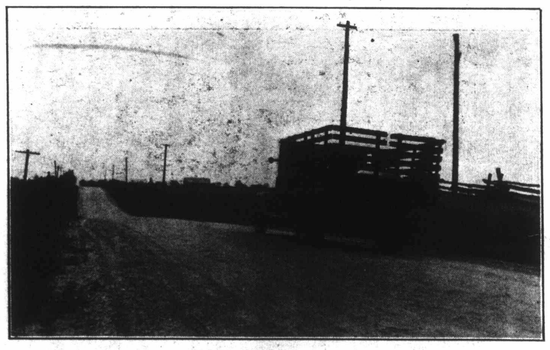
While ordinary farm crops do not suffer like fruit, road dust is a factor even in hay . . . as Stuart Carberry of Malton told us later in the day.

"When I bought this farm, the previous owner advised me always to sow grain in that field next the road. 'If you grow hay,' he said, 'you will find that the half next the road is full of dust when you cut it. By growing grain you can blow the straw outside and so get rid of the dust.'"

Mr. Carberry also mentioned that on an ordinary gravel road carrying considerable traffic, the road fences are white with dust. This phase of the question was summarized for us by Mr. Powell, who pointed out that not only is it unpleasant and unhealthy to sit out on the verandah or lawn of a home close to a loose-gravelled road, but the dust gets in to the house, making it much more difficult to keep clean and adding to depreciation. Loose gravel and clouds of dust also provide a degree of hazard for motorists.

These disadvantages have lead to the practice of treating such roads to consolidate the gravel. Peel County now has fifty miles of county road treated with calcium chloride, thirty miles having been treated for the first time this spring. To date, this year, five carloads of calcium chloride have been applied in Peel, and another three or four carloads will be used before the end of the season.

"To consolidate the gravel, a certain amount of clay, or binder soil, is necessary, in addition to the calcium chloride," explained Mr. Powell. "When moist, clay binds the road material together, the necessary moisture being provided by the calcium chloride, which has the property or power of drawing moisture from the air. In Peel County we don't have to go far for clay. In fact, we just scrape the shoulders of the road in towards the centre.



"The amount of calcium chloride required runs from 3 to 6 tons per mile the first year. This is for a 20-foot road, though we only spread the chloride over 17 feet, as it runs out the full width itself. The second year, only 60 to 70 per cent of the first-year application is necessary, or 2 to 4 tons per mile. This material is costing us $26.38 per ton, delivered."

Such treatment, Mr. Powell continued, produces a firm roadbed, and does away with the clouds of dust one can't see through. "It also reduces the cost of gravel. In fact, the saving in gravel will pay for the calcium chloride."

In addition to the fifty miles of treated roads, he told us that they had treated an area in front of each house located on a county road. This is known as "spot treatment".

To see for ourselves, what difference treatment made to a road, we drove up a stretch of county

(*Continued on page 19*)

*This county road in Peel has been treated with calcium chloride. Before treatment was started, it was considered inadvisable to grow hay in the field to the right, as the hay contained so much dust.*

# Mac's Meanderings

THIS year again we invested in a few pigs with which to endeavor to make a little "Pin money" in addition to our main revenue from the sale of milk. After all, our chief responsibility is our herd of dairy cows and the marketing of what they produce—both as to calves and milk. I have found that when the work connected with just this is done well there is little time for anything else and so we were very backward about making the necessary investment that would be the first step in insuring pork to sell in the fall.

We do not keep pigs the year around. We have no suitable place to keep the sows and so each spring we have to decide whether or not we are going to be pig farmers as well as dairy farmers. This year we decided on the former and accordingly purchased a litter of white pigs possibly slightly less than a couple of months old. We thought them better value at eight dollars each than to buy weanlings at five dollars. And there was the additional advantage in that they would be ready for market that much sooner, thus giving the market price that much shorter time to take its fall slump.

When we bought those pigs we decided to let somebody else do the worrying as to what to feed them, so we bought for them a prepared hog feed. How it does cost! But also, how those pigs do grow! It was on May 23 that their former owner and his son put them in a crate and lifted the crate and pigs on to the back of their express wagon. Today, which is just a little over six weeks since those pigs were delivered, any one of the ten would make a pretty sizeable armful for any ordinary man to lift and, if the price of hogs will just hold for another month, I feel quite sure that those pigs are going to show a reasonable profit over their feed. Of course, it is too much to expect that that profit will cover all the time I have spent feeding them, but then we farmers don't charge anything for our time anyway.

When those pigs arrived the long trough that we put in their pen made them look lonesome. by and by they did not look so lonesome and in course of time their snouts just about filled the trough. Then conditions got so cramped that it was necessary to provide further eating accommodation.

# Practical Discussions by Practical Farmers

## First 100 Lbs. of Hog Costs Much Less

A LANARK COUNTY hog raiser was asking whether it would be more profitable to sell his pigs at 100 lbs. or 200 lbs. Any hog raiser who keeps a set of scales in his pen . . . and he should . . . will soon find out that the first 100 lbs. takes very little more than one-half the amount of feed required to put on the last 100 lbs. In other words, the second hundredweight will cost him nearly twice as much as the first. So why not sell your hogs when they reach 100 lbs. to some of these people who are continually telling us how much money there is in feeding hogs?

York Co. ARCH. SMITH.

## Raw vs. Pasteurized Milk for Calves and Children

IN your March 19 issue, I noticed a statement by a Mr. John McKee on the feeding of raw and pasteurized milk to calves.

He cited an instance of a prominent breeder of pure-bred dairy cattle having unsatisfactory results when feeding pasteurized milk to calves, but stated that their growth was normal when they were fed raw milk. The inference was that calves will not do well on pasteurized milk. I would like to call to Mr. McKee's attention a paper in The Journal of Dairy Research, Vol. 8, No. 3, page 311. The investigators conducting this experiment fed raw milk to one lot of calves and pasteurized milk to another lot of calves. When the experiment ended the skeletal development of each group of calves was the same, but the interesting thing about this experiment was that twenty-four out of the thirty-six calves which had been fed raw milk, reacted to the tuberculin test and on the post mortem twenty-three showed tuberculous lesions. Only one calf out of the group fed pasteurized milk reacted to the tuberculin test but an exhaustive post mortem showed no tuberculous lesions.

There may be a legitimate question as to the nutritive value of raw and pasteurized milk for calves, but it should be remembered that raw milk is always a potential source of disease organisms.

Most authorities recognize that pasteurized milk is better than raw milk for children when the potential dangers are considered. It must also be remembered that milk is deficient in certain essential elements so a child must have some food such as orange juice to supplement this deficiency.

Your paper appears to be on the raw milk side of the question so probably you will not be interested in this side of the issue.

By the way, the Journal of Dairy Research is an English—not an American—publication.

Urbana, Ill., U.S.A.

## Many Farmers Suffer by Sacrificing Speed for Thoroughness

YOU ask for opinions on Speed vs. Thoroughness.

I believe that at haying and harvesting time many farmers are much too thorough and for the sake of cleaning up a field very well as they go, thev get two or three loads of hay wet that they would have had in if they were a little faster.

Being thorough rather than speedy when plowing allows a great many weeds to mature. There is nothing nicer on a farm than a straight furrow nicely turned but . . . working a shorter day I can plow 20 acres to my neighbor's 15 any time of the year and, although he does match plowing, I believe it would be more economical for him to get a wider-bottomed plow and worry more about ragweed than his straight furrow.

However, a man can hoe very poorly and do a speedy job. Here he would be saving time and effort to go a little slower. It is mistaken economy to shoe a horse quickly and fail to trim his feet properly, or oil the binder and neglect many oilholes.

In general, I believe many farmers, especially of the older generation, sacrifice speed for thoroughness and in this highly-competitive age suffer accordingly.

Last week the daily paper spoke of general rain throughout the Province. In our particular section we must be sinners as the rain barely penetrated an inch and was dried out by Saturday. Grain will be a very near failure, especially late oats, if it doesn't rain right away.

Congratulations for your editorial re Mr. Herridge's speech. We are burdened with too many public men who talk but say nothing. One of the dullest sessions of any Parliament since Confederation produced 4½ million words of what?

Certainly not the "action" we voted for.

Durham Co. A. H.

## July Effective Time to Plow

YOUR request for a discussion on "Plowing Sod in July" is a timely topic. This is the time to plow sod or anything else, just as soon as the crop is removed. We have followed this practice for years with good results. The long, hot summer days and the length of time before the freeze-up give one ample time to make a clean-up of all weeds, except "field bindweed". It also puts the soil in good tilth for any crop.

Our plan is to use a fairly wide-bottom tractor-drawn plow fitted with rolling coulter and skimmer and good new wide shares. When we used horses the stubble plows fitted with wheels under the beam and sharp knife coulters were used. This tends to light draft and best work. The skimmer, a necessary and valuable attachment, was always used.

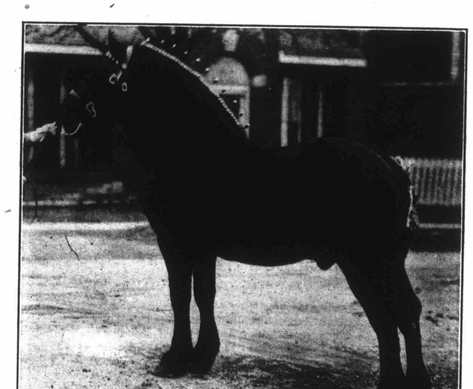
I like to plow fairly large lands which mean fewer crowns and finishes. Only a good plowman can make a good crown, cutting all the soil and full depth. I like to plow a fairly good depth and then top-work.

Once we plowed a tough sod very light, then disked and worked those thin furrows all to pieces, and plowed full depth later. The work required to obtain the desired result was quite as much as when full depth at first was practised.

A tractor is a great thing for heavy field work in hot weather. Many times we have plowed and prepared sod land for fall wheat that would have tried the horses to the limit.

When the plowing is completed we work the land with whatever implements are most suitable and often enough to keep down all weed growth and prepare a seed-bed. A good plan is to roll right after plowing, then use a sharp spike-tooth harrow, afterwards disking or cultivating lightly. One has to use the implements he has or else buy or borrow . . . but the main thing is not to pull up the sod. For this reason a tandem disk harrow is a fine, and almost indispensible, implement, as it cuts and pulverizes the soil and makes a great seed-bed. A cultivator, or cultivating harrow, is best for getting out twitch.

I know of nothing to be gained by allowing the furrows to lie untouched after plowing. The idea is, I think, to dry them out but it is pretty dry if no weed growth appears. It is a good plan to plow July-plowed land late in the fall, if conditions permit. By that time, the sod should be rotted and the frequent workings this land has had may have tended to make it solid, so plowing again will do good.



There is no known way of ridding land of weeds as effective as the bare summer fallow, which begins in the spring before growth appears and ends with the freeze-up. But for fairly clean land and for keeping land that way, July plowing followed with thorough working, is an excellent plan.

We usually sow our July-plowed land to fall wheat but such land is fine and suitable for nearly all grain and hoed crops. When fall wheat is sown the work must be well done because it is just two months from plowing to sowing, and it is very necessary to work it so as to conserve moisture to germinate the seed should the season be dry.

Ontario Co. FARM LOVER.

## Using Scales

*A correspondent claims that the scales should be used in raising hogs, as a means of checking costs. His statement suggests a topic we have never discussed on this page, and possibly we have been overlooking a worthwhile question, in an age when it pays to know as definitely as possible what one is doing. If you are one of those who use scales in your feeding operations, explain what use they serve, such as for mixing feed in the proper proportions, checking rates of gain and market weights. For these purposes do scales make a profitable investment? Can you cite one or more cases where your scales definitely made you some money? While we were not thinking of milk scales when we suggested this topic, we are always glad to hear from dairymen who weigh and tabulate each cow's production.*

*Mel Laet 3rd, grand champion Percheron stallion at Ormstown Fair for Dawes Brewery, Montreal.*

## Is This Reader a Specialist?

IN your July 2 issue you requested the views of readers on what they considered specializing in farming.

I know one farmer whose main specialty is selling milk, but who also has a large flock of hens. Sometimes he feeds hogs. Lately, in fact, he has gone quite extensively into hogs. For years he grew no wheat but in 1934-35, on his 150-acre farm, he had over 30 acres . . . but unfortunately, it winter-killed.

Another man quit mixed farming and concentrated almost exclusively on the production and sale of whole milk. I am informed, however, that the dairy company to which he is shipping has cut him down to one can per day. As a result, he has a lot of milk that he must separate, and sell the cream . . . with a big supply of skimmed milk for which he has no outlet, not having stock and poultry to convert it into marketable produce.

That man is a specialist . . . in a line that appears to be overdone, judging by the cussing and discussing I hear among fluid milk producers, concerning holdbacks and returned milk.

I think I am what is known as a mixed farmer, since I have no special lines. I am not farming as extensively as I did 25 years ago. A son is operating 116 acres, while some other land is rented. The last 12 years we have been farming something over 170 acres, of which 23 acres is in forest . . . with the stock kept away from it. This woodlot is on good land but I am leaving it to posterity.

We cultivate 75 acres of good land, which is the most conveniently located for operating, and we cultivate it in such a way that it does not grow weeds. I can't see that it pays to grow weeds to absorb nutriment from the soil that should be going into useful crops. Or to buy twine and hire threshers at $2.50 per hour to handle weeds.

We keep three or four breeding Shorthorns, and three milch cows. We veal some calves and raise a few baby beeves. Over 50 acres is in permanent pasture. A good portion of this has been cultivated, but it is not as convenient to work or as good soil as what we crop. To use this grass we buy quite a number of stockers. We feed a few every winter and pasture others. Four years out of five I find this profitable.

# The Canadian Countryman

A WEEKLY MAGAZINE for progressive farmers, published every Saturday by the Canadian Countryman Publishing Company, Limited.

T. J. Tobin.....Manager
Daniel McKee.....Editor
George B. Hood.....Associate Editor
Helena M. McKee.....Editor Home Department

SUBSCRIPTION PRICE: Canada and Great Britain, $1.00 per year, in advance: United States and foreign countries, $1.00 per year, in advance, plus postage. Renewals should be signed in the name, including initials, which appears on the address label to prevent duplication. Subscribers in ordering change of address should give old as well as new P.O. address.

ADVERTISING RATES: 55 cents per line, agate flat. Live stock advertising rates on application. Notice to discontinue an advertisement and all changes in copy must be received twelve (12) days prior to date of publication. Canadian Countryman is a member of the Audit Bureau of Circulations. Copies of A.B.C. statements and audits available on request.

QUESTIONS ANSWERED: Questions will be answered for subscribers on any subject pertaining to agriculture. When sending in questions the full name and address must be given. All enquiries will be answered as promptly as possible, either through the paper or by mail. When a personal answer is desired, postage should be enclosed.

CORRESPONDENCE IS INVITED on all points bearing on agriculture, live stock, new grains, grasses or vegetables, experiments, handy devices, etc.; in fact, anything that is helpful and practical will be welcome. Write on one side of the sheet only. Manuscript not accepted will be returned promptly if postage is sent. Address all letters to

THE CANADIAN COUNTRYMAN,
204 Richmond St. W., Toronto 2, Canada
Member Agricultural Press Association.
Member Audit Bureau of Circulations.

VOL. XXVII. Toronto, July 23, 1938. No. 30.

## He Prefers a Dictatorship to Democracy

WE are living in the country at the present time and the other morning when we were driving to work we picked up one of our neighbors and gave him a ride into Toronto. He is a German who has been out in this country for about nine years. He has an attractive and well-built home, a large garden where he and his wife can amuse themselves, and altogether one might say that he lives under conditions that are as nearly perfect as one can hope for in this imperfect world. In spite of this he is not satisfied. He is an expert cabinet maker and a few months ago his union called him and his fellow workmen out on strike. They won the strike and got the increase in wages they demanded, but this man is still far from being happy. In fact he told us the other day that if he could sell his place, he and his wife would pack up and go back to Germany. He likes Canada well enough apparently, he is proud of his home, but the trouble is he cannot get steady work. He says he was much better off in Germany than he has been in Canada, and believes that he would have no difficulty at all in getting a steady job in Germany. He told us of a friend of his, a master bricklayer, who has just returned from Germany to Canada, and he said that when he was in the Fatherland there was a shortage of bricklayers. There was more work than men to do it. Naturally under these circumstances he would prefer living under a dictatorship in Germany to the ups and downs of existence in Canada under a democracy. He feels Canada has let him down, and we don't blame him. It is not Canada, however, which has done so, but Canadian politicians and labor leaders.

It is certain that if this man went back to Germany he would receive less wages than he has received in Canada for doing the same kind of work. His living costs, particularly what he would pay for food, would also probably be higher in Germany than they are here. Yet he wants to go back. Why? Because he has figured out in his own way the answer to the problem that our friend Malcolm Macdonald of Springfield in Elgin County presented to our readers in a recent issue, which was as follows:

"If a guy has no job at ten a day, how much relief should he get from a forgotten taxpayer who has no cash?"

This man has found out something that labor leaders and reformers in Canada and the United States choose to ignore. He has discovered that wages consist of two things, namely, the hourly rate and the number of hours a man is employed. He unquestionably gets a higher rate of wages in Canada than he would get in Germany, but he feels that he would be better off with a lower rate of wages and steady work. That is why he would like to go back and live under Herr Hitler's regime.

We in this country are inclined to turn up our noses at dictatorship as practised in Germany and Italy, but in our opinion these countries have in certain respects handled their economic problems in a more intelligent way than we have.

In Canada the index of the hourly rate of wages paid in a number of important industries increased from 168.3 in 1933 to 191.7 in 1937. That is the increase was about 13 per cent. As a matter of fact the index of wage rates is higher now than it was in 1919 when farm products were selling at war-time prices. In the United States the increase in wage rates must be greater than it is in Canada. Yet both countries are faced with a grave unemployment problem and are spending vast sums on relief.

In Germany people do not have to bother about self-seeking labor leaders and self-seeking reformers. Hitler is the big boss and people have to do as he says. Herr Hitler says he cannot raise wages because such a policy would interfere with the increased production of goods and retard national progress. The rate of wages under Hitler's regime has remained practically at the same level as it was at the bottom of the depression five years ago, yet the average worker is better off because he has steady employment.

This is what Hitler has accomplished for workers, according to an article which appeared a short time ago in the New York Times. We quote as follows:

"Achievements in German domestic affairs in the last five years are impressive, even startling, provided one disregards the financial factor in them. Industrial production has risen from 34,800,000 marks in 1932 to approximately 75,000,000 marks in 1937; that is, production has more than doubled. Agricultural production has increased in value from 8,700,000 marks to 11,900,000 marks. The national income has risen from 45,200,000,000 to 68,000,000,000 marks.

"Unemployment has decreased from more than 6,000,000 in January, 1933, to a little more than 500,000 in January of this year, and of this half million by far the larger number are actually of physical or racial disability. While wages have practically remained stable at the lowest levels of the depression, earnings have increased both through steadier and longer working hours and by reason of shifting workers into the higher wage brackets. The index figure was 92.7 for a four-week period in 1933; it is now 111.9, and the nation's total wage income has increased from 26,000,000,000 marks to 39,000,000,000.

"While capital income, as shown in the reports of German industrial corporations, was practically nonexistent in 1932, because the companies were then not only unable to make a return on the capital invested but not even able to meet depreciation charges, the average German stock company last year could write off eight per cent of its turnover for depreciation and still show a profit of 630,000,000 marks for 1936-37, as compared with a loss of 470,000,000 marks in 1932-33.

"As a result of this industrial expansion government revenues have risen from 10,170,000,000 marks in 1932-33 to approximately 18,000,000,000 in 1937-38. The government's unemployment charges have decreased in the same period from 2,081,000,000 marks to something less than 600,000,000 marks a year."

We personally don't like the idea of living under a dictatorship, but it is our opinion that the average man does not care what system of government he lives under provided it gets results. There is an old saying that nothing succeeds like success. Hitler with his policy has been getting somewhere, while our so-called social reformers, notably those in the United States, have been getting nowhere.

We said to a politician who was in the office the other day, "Unless you fellows get down to brass tacks and quit encouraging certain classes of labor to exploit other classes, we are going to have a dictatorship in this country in 10 years," and we believe future events will show that we were right.

## Ontario Wheat Growers Handicapped

REPRESENTATIVES of the Ontario Flour Millers' Association have been requesting the Federal Government to give them and Ontario wheat growers some consideration in regard to freight rates. As things are at present, the rates on Ontario flour impose a handicap on the millers in meeting competition in foreign markets and this, of course, means that Ontario wheat growers receive a lower price for their wheat than they would get otherwise.

The freight rates on grain from Ontario points to the seaboard are also higher than they should be. Here is a curious anomaly. The rate on South African and Argentine corn from Quebec City to Chatham is 14 cents per cwt. On Ontario wheat and wheat products the rate from Chatham to Quebec City is 26 cents per cwt., or almost double. While Ontario wheat has to pay a rate of 21 cents per cwt. from Chatham to Montreal, the average rate Australian wheat has to pay to the seaboard is about 12½ cents per cwt. This gives Australian wheat growers a very distinct advantage over us in the export market and under these circumstances it is not much wonder that 10 flour mills in Ontario with a combined daily capacity of 1,100 barrels have had to discontinue operations during the past three years.

Australia, which is one of our chief competitors in the export market, has also the advantage of a depreciated currency. For example, in a publication issued by the Department of Trade and Commerce at Ottawa, the price for wheat received by the Australian grower was given as three shillings and twopence per bushel. This at the normal rate of exchange would be equivalent to approximately 76 cents, but with the depreciated currency in Australia it is equivalent to 63 cents. This, with the advantage of lower freight rates, has enabled Australia to capture markets which were formerly held by Canada. Thus in 1927, 86.4 per cent of the flour imported by the British West Indies came from Canada. In 1936 only 62.5 per cent was imported from this country. In 1927 no flour was imported by Trinidad from Australia, but in 1937 24.1 per cent of the imports were received from that country, while imports from Canada dropped from 99.4 per cent to 58.8 per cent.

Ontario is going to have a large crop of wheat this year. Only about 4,000,000 bushels are required for domestic needs and the rest must be exported. A large part of last year's crop is still unsold, and unless the pressure of supplies is relieved by export unnecessarily low prices are inevitable.

It is to be hoped that all the facts of the situation are taken into consideration by the powers that be at Ottawa and that the present disequilibrium in the freight rate structure is remedied. Ontario wheat growers do not want a "hand-out" from the Government. They merely request justice.

---

It is estimated that world supplies of wheat will be about 435,000,000 bushels larger than last year. Excluding Russia and China, a world crop of around 4,160,000,000 bushels is forecast, on the basis of present prospects. The increase is mainly caused by higher yields in Canada and the United States.

If trade conditions in the world were normal, this year's large crop could be sold at remunerative prices, but with European countries restricting imports and stimulating home production by means of quotas, tariffs and subsidies, lower prices and a large carry-over seem to be inevitable. The United States Government is encouraging farmers to hold their crop off the market, but it remains to be seen to what extent this policy will maintain prices.

## Rippling Rhymes

By Walt Mason

SOME old delegates can tell, by the aspect, by the smell, of the leaves upon the trees, by the briskness of the breeze, by the dew upon the pike, what the weather will be like. Seers official have their maps and their colored charts, perhaps, and a lot of queer machines well designed to spill the beans; and they study all these things, and announce to us, "By jings, storms are coming from the east, there will be a flood, at least, that will make the rivers go to a ghastly overflow. And a blizzard will come forth from the bleak and frozen north, so you'd better hide away underneath a stack of hay." But these prophets have to place with the true forecasting race; they are doubtless worthy chaps who must have their charts and maps; they were never born to read signs that all true prophets heed. But beneath his trees and vines rests the man who's studied signs since he was nine inches high; and he views the brilliant sky which gives promise of a day that will be serene and gay; and he says, "The wind's not right—there will be a storm ere night". And behold, by afternoon winds like banshees wail and croon, and the rain is pouring down, flooding out the weary town. But official prophets say, "It will be a pleasant day, and to picnics you may go with no fear of grief and woe."

# Hard Country and Gold

XXII

## By Clem Yore

AFTER arriving at the trap-line cabin Kon-It'l's wound was washed out and redressed and the shaman made comfortable on a bed beside Kanuakalak. Julie Marie cooked a big meal and then placing Crowfoot on watch, Jim and the girl went to sleep. Worn out, Jim dropped into a deep slumber from which he was rudely awakened by Crowfoot's cry of alarm.

"What is it?" he asked, noting that Julie Marie had gone.

"They have come," announced Julie Marie, who was staring out of the tiny window. "The bottom is full of them, Jim. Must be seventy-five or a hundred. Tuyuk is talking. Here he comes!"

Jim went to the window. Tuyuk was seen approaching, alone.

"Tell him, Crowfoot, that if he comes any closer I will shoot him," ordered Jim. Crowfoot cried a jabbering pargon through the door. Tuyuk stopped, lifted his voice and yelled: "Give us Kanuakalak, then we go."

Jim stared around at a sound from Kon-It'l. Julie Marie said: "Kon-It'l wants to talk to Tuyuk." Jim lifted the shaman to his feet, and assisted him to the door which Crowfoot opened. Tuyuk, at sight of Kon-It'l, started to rush forward. Jim pointed a rifle at him. Tuyuk stopped, then yelled: "Where is Kanuakalak?" Kon-It'l, pain-stricken, had difficulty in talking; but after an effort raised his voice until it carried across the bottom. "Go back to your villages. If you make fight with white man I will be killed. Moreau's girl is here and she is doing much for me. I am shot in the hip. Unless I get to white doctor I will die." Tuyuk laughed, wickedly.

"Why does shaman trust white girl? Kon-It'l knows how to heal. Why does he not use his medicin?" An angry bellow came from the Indians. They moved forward in a concerted action as if to rush the cabin. Kon-It'l yelled, frantically: "You are like boys! Papin is dead; Murdock is dead; Senati, the son of Kanuakalak, is dead! Nothing can stop the magic of the white man! Go away before it is too late!"

"It is the bad medicine of Kanuakalak!" yowled Tuyuk. "Give the evil woman to us and we go. If you do not, then we make fire, burn cabin."

Kon-It'l screamed for Tuyuk to go, Jim holding him up with an arm; for the old man was plainly about to collapse. But whatever he said was met with loud jeering cries from the maddened savages eager to assault the cabin.

Back of Jim, Julie Marie stood, a small pocket mirror in one hand, daubing her face with the foul mess of grease which she dug from the can of rancid drippings. Swiftly she worked until her entire countenance, her throat, both hands and wrists were speckled with repulsive looking blotches and pimply areas resembling pustular eruptions.

Her face was transformed into such an atrocity of horror that she could not refrain from smiling as she stared in her glass after placing the can back on the shelf. Then she leaned over Kanuakalak who had been lying in a stupor, oblivious to the hullabaloo going on about her. "Kanuakalak," she said, exhibiting herself to the old woman, "please tell them that unless they go away, at once, you will do to them what you have done to me." Kanuakalak's eyes widened as she partly lifted herself from the bed.

"What has happened to you?" she gasped.

"I did it with that can of skillet-drippings," laughed Julie Marie. "Hurry, Kanuakalak! Cry out to Tuyuk, I am going outside! This is our only chance to save you."

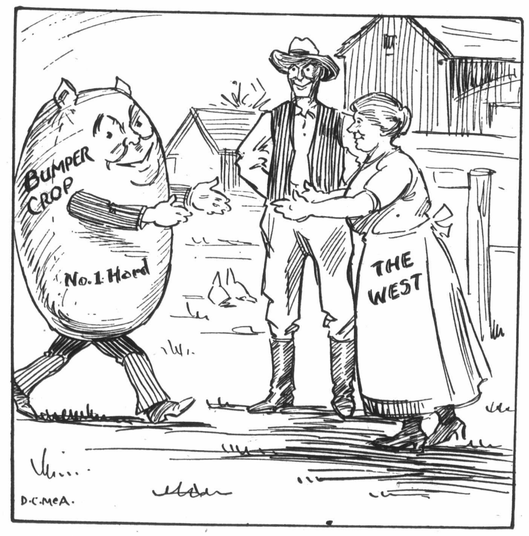
She ran to the door, brushed by Jim and Kon-It'l, and stepping clear of the cabin, exhibited herself to Tuyuk and the bucks behind him. Instantly, the Indians stilled. Then the voice of Kanuakalak came out of the cabin in a high, thin, squeaking pitch: "Tuyuk, see! My medicine is stronger than that of Kon-It'l and you! You try *maka-putik-maka;* but I no care! I bring two sons of Bo'-jo Jim O'Neill and Kon-It'l is shot. Now I make Moreau's girl get the quick stinking sickness. Come and get her! Come and get me! If you think you are a shaman, Tuyuk, come into this cabin. What I can do to white girl, as fast as you can wink your eye, I can do to you and all your men. Tuyuk is a fool! Ha! ha! ha! he! he! he!" The old woman's voice ended in a screeching crescendo which caused even Jim to turn about and stare at her. Julie Marie started toward Tuyuk.

"Take me with you, Tuyuk! Take me with you!" she screamed, staggering through the snow. "Help me! My father was friend to you and your people, many years! Help me now! Save me from the evil of Kanuakalak! Ohhhhhhhhh, Tuyuk!"

Tuyuk seemed paralyzed as the girl tottered toward him; his mouth gaped, his eyes popped, and then, wheeling, his voice lifted in a loud scream of fright, he yelled: "It is true! This girl has the stinking-sickness! See her face! Run!"

That band of men needed no second urging. It split in all directions, fleeing with shouts of utter alarm. Tuyuk, too, was fear-stricken and hurried up the bald mountain where he gathered his men and vanished over the ridge. After Kon-It'l had been carried to his bed Jim said to Julie Marie: "You imp, however did you get such a detestable make-up?" She showed him the can of old grease, laughing, as she said:

"Before you rescued me I conceived the notion of using that to frighten away the two Indians guarding me. Then, just now, the idea came again. But wasn't Kanuakalak great in the way she played her part? Wasn't she splendid?"



Kanuakalak said: "Wipe it off, Julie Marie, you make me think of nothing but blisters." Kon-It'l groaned and turned to the wall. Crowfoot walked outside, returning in a few moments.

"I hear guns! Over hill I hear guns!" he said.

Jim ran from the cabin; heard the intermittent purring sound of a sweetly clicking motor. As Julie Marie finished cleaning her face she joined him. "That's Larry," he said. "He's making wide circles between this place and Swede Ole's." Then the airplane was distinctly heard. Jim threw some wood in the stove causing a white smoke to rise above the trees. After a few moments the airplane appeared, circled twice, and then swooped. Larry was seen at a cockpit window with Audrey Page. He waved a hand, and, as the ship dropped like a hawk into the little bottom, he threw out a weighted parcel, waved again, elevated the plane, gave her the gun, and boomed away. Jim ran to the package, tore it open and read this note:

"Karluk reached Smith's at five this morning. Bishop Fleming, Moreau and Touhey with relief party are at Swede Ole's hide-out where they caught Billy the Mug and Ole. I'll send them here and when you get back to Ole's will shoot you-all to Moreau's. Audrey says: 'Let's make it a double wedding'.

Larry."

*When the prodigal returns.*

After reading the note Julie Marie snuggled into Jim's arms. "I'll always keep this," she said, "just to remember the thrill I feel racing through me this minute."

"I'm going to take back that old can of grease," said Jim, "seal it up in a mason-jar, all bound round with a red ribbon, to remind me how you looked when you ran into the snow. It has been a long, broken-up sort of courtship, you and I have had, honey, but from now on I'm the loving lobo."

"Who's afraid of the big, bad wolf," chirped Julie Marie. "Just read my answer to that in my eyes."

"I don't know whether that is a threat or an invitation, but whatever it is, it makes my arteries go tinga-ling-ling. Here's my badge of ownership." That caress! Jim said: "From now on you go where I go, stay where I stay, and be the other part of me. There I am! Off in a cloud of dust."

"I'll be as easy to get rid of, Jim, as a birthmark. Don't you know that nothing can douse an Alaskan spouse?" Julie Marie's eyes were cascading with tumbling gaiety; but she was filling with emotion that was bringing her to the borderland of sobs.

* * *

Later, Bishop Fleming, Pierre and Mike arrived with sleds and returned Julie Marie and Jim with Kanuakalak and Kon-It'l to Swede Ole's. Here they found Billy the Mug and Swede Ole guarded by some of Smith's men, who had caught them as they were attempting to escape to the Yukon. While Bishop Fleming looked after Kon-It'l and Kanuakalak, Jim told what had happened to him and Julie Marie. Then Audrey Page narrated her adventures.

Billy the Mug had come into Circle the day after Christmas, unknown to her, had conferred with Art Peavey and then had set out for Swede Ole's. She did not learn of his presence in Circle until some days after the big blizzard. Then when Larry came to her she had told him that Billy was on his way to join Denby and Papin. Larry told the radio operator at Fairbanks to tell Jim to hide the totem and to be on his guard; for at that time Audrey did not know exactly where Billy was or what he would do. When Art Peavey told her that Billy's destination was some new hide-out of Swede Ole's, she got in touch with Larry and he attempted to call up Julie Marie. Not being able to communicate with Moreau's they decided to fly over and see what was wrong. They landed the day after Julie Marie was caught by Papin; picked up Mike and Pierre and flew to Smith's, where they learned that the girl had not appeared. Two days later Bishop Fleming came in and reported that he had been attending to twelve or fifteen cases of smallpox which Papin had spread in three scattered villages.

When Karluk reached Smith's with the news that Julie Marie and Jim were with Senati and heading after Kon-It'l to rescue Kanuakalak, Larry and Audrey cruised the forests hoping to locate them; but the dense tree tops prevented them from getting their trail. They were about to give up when Audrey spied the white spiral of smoke arising from the trap-line cabin's chimney.

Billy the Mug and Swede Ole, after being told that Murdock and Papin were dead, revealed the entire plot which had been planned by Murdock, after Papin had told him of meeting Jim at Dutchman's Creek. Kanuakalak related how Papin, while the Christmas festivities were going on, had come to her, bound and gagged her, throttled the papoose, and laid it on the owl-feather pillow, and then had taken her away on a sled stolen from Moreau's. They had laid out the storm in a wickie-up where Papin had been staying while in communication with Kon-It'l getting ready for this coup. Kon-It'l corroborated all Kanuakalak said. The stricken wretch was more fearful of his people than he was of any punishment in store for him from the Alaskan authorities.

It took but two days for Larry to transport everybody from Ole's to Moreau's; and two more for him to fly back to Fairbanks for U.S. Marshals to bring Kon-It'l, Billy the Mug and Swede Ole to jail. Then he applied for and received a thirty-day leave of absence with the use of his plane.

With Jim, Pierre and Mike, ten days after the rescue, Larry flew to Jay Bird River, selected a level, snow-covered slough, about a mile-and-a-half from where Jim's father had

# The Countrywoman at Home

## Letters of a Countrywoman

DEAR AMY:—

If you didn't like cats, and persistently refuse the neighbors' kind offers to wish one on you, and then have a dainty, fascinating little kitten plant herself in your household like a burr on a silk skirt that refuses to be shaken off—well, just tell me what you would do about it? This kitten arrived about a week ago, and spent her first night on an easy chair on our next door neighbor's verandah. Next morning when we were weeding the flower border the kitten sidled up to the dividing fence, put a paw through the wire and tried to play with my fingers as I pulled up the weeds. I shooed it away, and told it that I didn't want any cats—and a few minutes afterwards found it purring beside me. How did it get over the fence? I strongly suspect that Queenie knows how it got over! I took it by the scruff of the neck and gently planted it on the other side of the woven wire fence. She ran up and down the fence—trying in vain to poke her head through. Presently she sat down, and took a careful survey of the situation, and then her 'sea-grey" eyes spotted something—a tall cherry tree on our neighbor's side of the fence, but with branches bending over our side. Kitty skinned up that tree like a flash and dropped down beside us. I couldn't help admiring her cleverness and I laughed—then I knew that the cat and Queenie had won out—any resistance on my part was out of the question. "Poor little thing, she's hungry!" And off Queenie went to warm up some milk—although I told her that with the price milk is nowadays, that kitten would put me on relief—but she doesn't care!

We had a treat last week-end. Beryl and Ross leaving their family in the care of their helper drove up in time for dinner on Saturday, and went back to Muskoka on Sunday. After dinner Ross thought he'd take a sun bath. After a while he gave up the attempt. He said it was no use trying to rest in the sunshine with half a dozen bluebottles—each about the size of a partridge—roosting on his face.

The poor boy had rather a tough time of it this trip as the radiator of his car got overheated and made the water boil, so he had to stop at several places and cool it off with cold water. At Orillia he had to get it blown out or something.

We still have a cottage unrented; the people took it and then gave it up. Ah, well, everyone is apt to have worry and we mustn't expect things to go too smoothly.

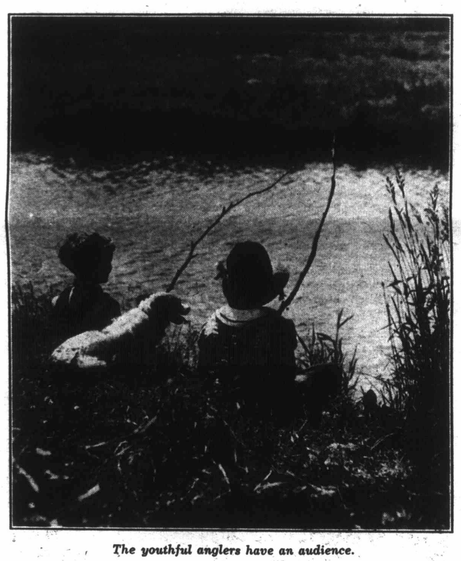
I had a pleasant surprise on Monday. A good-looking lady called about noon and introduced herself as Mrs. F——, who occasionally read my C.C. letters. I think she said her husband's office was in the same building as the C.C. Her husband came along presently and recognized me. They had been sitting on the seat in the little park when I had paused there to say "Good-morning" to the flowers on my way back from the Post Office. I hadn't seen them, for, as you know, I'm rather dumb and stupid when there is an East wind blowing, and east seems to be the prevailing wind this year.

On Tuesday there was a garden party at the Rectory, and on Wednesday I 'phoned to the hotel on the hill to ask if Mr. and Mrs. F—— would come and have afternoon tea with us; but I was too late, they had gone. However, they seem to be very nice people and I hope to meet them again—some day when the east wind is not blowing.

I hear that the garden party was quite a success financially as well as from a social point of view. I don't know how much money was made, but the object is to help towards finishing the basement of our church.

Queenie and I found it very pleasant sitting there listening to the band, and watching the pretty faces and bright dresses of the young people. I think that girls are wearing more vivid colors this year than ever before. Sometimes in a group of four you will see so many harmonizing colors—green, pink, blue and yellow. The blues and yellows are especially pretty. I often smile now to remember how frightened we were of wearing bright colors when I was young. It is true there isn't much to the dresses nowadays, but surely they are more graceful and artistic.

Now that the school is closed I miss the hundreds of brightly dressed girls streaming past Sunshine Cottage. And the boys, too—many of the smaller ones have a cheerful "Hello" for me when we meet in the street. You are wrong when you say that I like boys better than girls. I'm very fond of our girls. I just want to see a more even division, so that there will be a boy for every girl. You may be right when you say there are more boys than girls out of work. It certainly seems to be that way in Parry Sound! All the time I've been here I have never had a girl or woman ask for food, but there are lots of boys and men in that sad condition. It must be hard for a young man to have to ask for a bite to eat, but I think that anyone who has something to give should give cheerfully. My slogan during June was, "Give with a smile or don't give at all", but I'm thinking of changing it to "Kick up a fuss and you won't be bothered so much". However, I've only sent one man away without food when he asked for it, and that was because I hadn't done my shopping that day and I hadn't anything to give.



An interruption here: The kitten had disappeared. Queenie had put it in the woodshed while she went to see a pink lily that was blooming in Mrs. T——'s lily-pond. When she came back there was no sign of the kitten. We both searched carefully, upstairs and down and in the garden, Queenie calling "Kitty, Kitty, Kitty". Presently she heard a faint "Meow". She said it seemed to come out of the skies, but I assured her that she was mistaken—that kitten was no angel. It had broken down one of my coreopsis this very morning, taken the flower in its paw and pretended to smell it, and so broke the stem. The meow came again and was located in the apple tree—quite out of our reach. Our neighbor's son came to the rescue; he climbed the tree and handed down the kitten. It's queer that a cat can run up a tree with apparent ease, but cannot come down. It doesn't know how to back up. So I'm out of luck again. I don't want the little thing to be killed; but I wish its mistress would claim it. You can see it is a pet cat for it is clean in its habits; and accustomed to being petted.

Phyllis has been doing without her helper since the holidays began and letting the girls take week about to do the housekeeping. It seems to agree with them as they are all looking fifty per cent healthier than when they were attending school. Of course, they are out-of-doors a great deal, and then it is a relief to know that the exams are happily over—passed with honors. They do a lot of swimming and, of course, Peter must "wim", too—he loves being in the water and does not mind being "ducked". I am glad to know that there is a caretaker—or supervisor—taking care of the beach this summer. Sometimes he takes Peter out to "wim", much to that young gentleman's delight.

I wish you could see our little garden—the roses are especially beautiful. Of course, we know they will soon be over, so we are just revelling in their beauty while we can. I'm glad they have thorns—it saves them from the kitten. He doesn't like to have his little paws pricked, so he does not molest them.

The vegetables are doing well, too. We had new carrots for dinner, and our second crop of lettuce is ready to use. Next week we will have green peas, green beans, beets and carrots—all we want to use, and the cauliflowers are already forming little heads. There is something thrilling and

*The youthful anglers have an audience.*

## A Quiet Game of Bridge

By Bertha C. Foster Golder

THE telephone bell rang and Mother's voice asked, in agitated tones, for Dad.

"Your mother went over to Mrs. Seymour's, for a game of bridge," he remarked, taking the receiver from my hand. "Yes, yes, dear, I'll bring it over as quickly as I can. Why . . . ." but Mother had rung off.

"Two quarts of tomato juice, at once," Dad repeated, wonderingly. He sent me down to the cellar to fetch the sealers.

"It must be a party, if they want all that," I said, as Dad put on his coat.

"They seem in a hurry," he remarked, ruefully, his eye on the arm chair near the radio, where he had been comfortably listening to an exciting program. "I shall not be long, Anne. I hope," he added.

"Strange, sending for tomato juice," I muttered, but I, too, was interested in the radio and soon forgot the unusual request.

After a considerable time the front door opened and I heard laughter and excited voices in the hall.

"Everything went wrong from the start," Mother was saying, speaking very fast. "Mrs. Seymour had put the younger children to bed and Mary had gone out with her boy friend, Ted, and taken the red setter for a walk, so we thought we were going to have a peaceful time. Mrs. Clarke and Alice Brown, like myself, had been asked in for just a friendly game. But, from the first, as I said, everything went wrong."

"Too bad," Dad murmured, helping Mother off with her coat.

"The house was chilly," she continued, "and Mrs. Seymour lit the grate fire, but nothing would make it burn. We took turns in holding a newspaper in front of the grate, until our arms ached, but directly we put it down the fire went out. Mrs. Seymour had to

(*Continued on page 11*)

# The Hearthstone Circle

THE impossible (or practically impossible) does happen sometimes and my trip to Winnipeg did come true. Ten wonderful days—packed to the full. Days and nights on the train—and how I love them! Days visiting with old school friends—and how we talked! Then the splendid days at the Canadian Women's Press Club Conference—what a glorious time we did have! All I need now is ten days in which to recover my breath.

Some folk moan about the weariness and monotony of travel, specially long train journeys, but to me the longer the better, they never make me either tired or bored. To me it is a pleasure to be able to sit while other energy than my rather exhausted supply, propels me comfortably through rolling miles of lovely landscape. I like to talk with anyone who is willing to talk with me, though I like just as much to rest and say nothing. I like to balance my way back to the observation car and watch the silver rails unwind into the ever rolling distance. I like to get off at the longer stops and walk up and down amid the station bustle. Most of all I like to go into the diner and while away the time over the always delicious food and coffee and enjoy the always pleasant and expert service while our so amazingly small and equally amazingly efficient dining-room and kitchen are swayed along beside an ever changing picture framed by the window at each table. I really like to sleep on the train, too, in the snug, comfortable berths and lulled by the song of the wheels.

It is specially nice now with the air-conditioning which keeps the whole car fresh and just the right temperature and also eliminates the dust and cinders which were the inevitable accompaniment of open windows.

Yes, I love travelling on the train and this last trip taken though it was in the midst of a hot spell only confirmed me more thoroughly in my love. Give me the opportunity and I'd be off again to-morrow—to the Coast this time—either or both, but I'd have to have my family along. What I covet for our boys more than anything is the chance to travel and, first of all, the thrill and education of seeing their own land from coast to coast.

They say if a person wants a thing badly enough and keeps working toward it, they will get it eventually. What I am working toward for each of our children is a year of travel before they go on to college—if they do. The ideal age for children to travel is between ten and sixteen. They are most observant then and not too concerned with romance. It looks as if I'll have to hurry with our fourteen-year-old. He is getting very "grown-up" and the travelling funds are still very tiny. He'll probably solve the problem by earning his own way about when he gets a little older, but it would be so nice to be along with him for once at least. You see, I was almost literally "born travelling" myself and nothing amazes me more, when I have time to think of it, than to find myself in the same house doing the same things year after year—and liking it, too. It takes a trip like the one I've just had to get the wander lust working again.

JANET JEAN.

Dear Janet Jean:

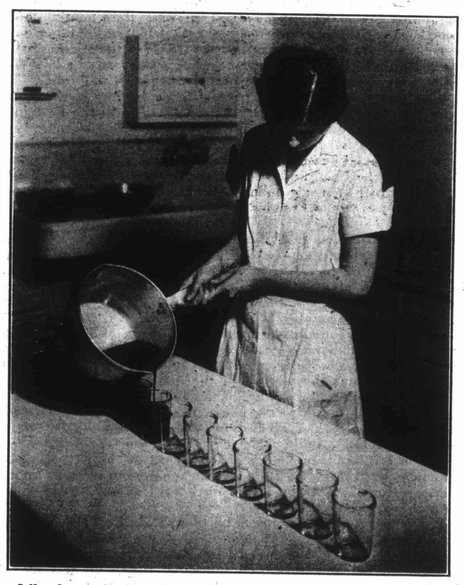
Now that we are getting settled I miss the letters of my Circle friends. Our C.C. has been forwarded so I am able to follow the discussions and enjoy the magazine as per usual. Although we had many well-wishers, we didn't succeed in leaving our northern home until shortly before Christmas. We were obliged to slaughter two head of cattle and that was really the worst day I've ever lived through. I hated parting with my pets and up until the very last I hoped some one might adopt one or more.

We left on a very cold day which became more so as the sun went down. I nearly froze on the way out. A neighbor gave us a cup of tea but I was anxious to be at the station in time. There was no wood there and the train was late. We were a hundred miles south before I felt warm all through again. I enjoyed the trip in the air-conditioned coach and rested well without a sleeper. It was a beautiful moonlight night and hard to believe it was 22 degrees below outside. Everyone was pleasant. We were delayed by a freight derailment but made up the time and were only an hour or two late upon our arrival at Toronto.

I was delighted that it was daylight when we were getting in so I could see the trees. Even though leafless they seemed to welcome me. Yes, we had trees up north—too many of the wrong kind—but I loved the birch which were all too few. We had sent down a box of preserves and canned goods by express and that gave more trouble than the Customs Inspector of all the rest of the baggage.

Friends met us at the station and, after lunch and a little visit, we returned to the business section. I had to walk all around Eaton's College Street so as not to miss a single window, before going upstairs where the blind pianist was playing carols in the piano department. One advantage of a long absence is the thrill of the return. In the evening I had a few visitors, a correspondent, a neighbor's boy from the North and the younger ones home from business. After spending a comfortable night we 'phoned some of my Circle friends and, though we were unable to meet, it was fun to hear their cheerful voices. We had an appointment to meet a friend and correspondent of long standing, together with her husband, at Eaton's next day. More fun—it was quite easy to recognize them for they were exactly as we had imagined. Such a lovely place for lunch as the Georgian Room was before Christmas with its bright decorations and carol singing. Can you imagine how hungry I was to hear them?

After lunch we were taken by our friend to spend the night at their farm in Peel County. That I won't describe except to say how much I enjoyed seeing the cattle and poultry (not to mention gathering and counting eggs). Before the open fire that evening I could not but think of the comparison between real farming and pioneering in the North. I cannot go into detail of that visit without making this too lengthy. We returned to Toronto the next day and in the evening left for Philadelphia, where we spent Christmas.



During our stay in Philadelphia we visited the Franklin Institute. We didn't see nearly all we wanted to and intended going back to the planetarium—but we didn't. We also attended the private view at the Academy of Fine Arts of the Annual Exhibition of Oils, and several smaller exhibitions.

We sailed from New York on St. Patrick's Day after an early morning drive over from Philadelphia. The music was playing, streamers flying and people waving and shouting, till I became a little teary as the skyline faded. But there was much to be done and this was my first trip to sea. I decided to unpack and then go on deck. Although it was a cruise ship (making its last trip) we had to introduce ourselves. Our first day out was very rough and many did not go to the dining-room at all. There were about sixty passengers on board. I was none too sure of myself, but was one of the three women on board not seasick. I didn't count the men but some of the crew got caught. Each morning there was a ship's paper put at the cabin door giving the events of the day on board, the world news by radio and the stock market report. On our second day out it was more calm and we had a boat drill, replete with life belts and even the fire hose going, with everyone at their consigned boat stations. All directions are given from the bridge by a special broadcasting system.

On Saturday evening the Captain gave a get-together dinner. The menus were special with a place for autographs and favors for all. Everyone had on their best bib and tucker. Later there was dancing on the sport deck. Sunday morning there was service, and in the afternoon we obtained permission to visit the bridge. This was most interesting but space will not permit detail. The methods of discovering and checking fires were nothing short of miraculous. Every possible precaution was taken to ensure safety. We also visited the chart room. The sea was the most beautiful color.

Early Monday morning we were awakened by shouts that I thought were from a man overboard no less, but they were Haitian swimmers who had come out to dive for money as the ship came in. There were from fourteen to eighteen. Our cabin was on the promenade deck so I could hop in and out easily. Haiti is hilly and barren. We stopped at Point au Prince, where we hired an auto and went to a hotel to meet a Haitian woman who had come down with us. She spoke a little English but mostly French. The natives speak English and a dialect which is partly native and partly French. Everything is done by bargaining, so the markets and streets are noisy. The hotel was more like a large private home. A number of young men (the Jamaican football team) were having breakfast on the verandah.

(*Continued on page 12*)

*Jelly glasses should be thoroughly sterilized and placed on the table where they can be filled easily.*

## From the Open Kettle

HOT as the weather is just now the preserving kettles must work overtime for the fruit season is at its height. This week we are concerned with jams, conserves and jellies, and to get the best results and insured keeping qualities recipes should be followed closely.

It is always best to make small quantities of jams and jellies at one time, as the mixture cooks better, does not boil over if a large saucepan is used, is in less danger of burning as it can more easily be stirred thoroughly, and "jells" better. If the quantity is doubled in any of these recipes, you must double the time for cooking and cooling.

You can always prevent a jam or jelly from boiling over in a large saucepan by putting in a good quarter teaspoonful of butter before the boiling starts. This prevents the frothing, and thus obviates skimming also.

If your jelly turns out to be too soft then you have too much sugar for the amount of pectin. The addition of a little commercial pectin before re-boiling will fix it up in short order.

*Raspberry Jelly*

4 cups raspberries
1 cup water
Loaf sugar

Combine raspberries and water. Cook over low heat fifteen minutes. Strain through thin cloth. Measure juice. Add one pound loaf sugar to each pint. Bring to boiling point and cook hard fifteen minutes. Test to see whether jelly is thickening. Add a little more sugar if necessary and test again. Turn into sterilized jars and when cool, cover with paraffin, or memba seals. Approximate yield: 6 one-half pint jars.

*Kate's Blackcap Jam*

4 cups blackberries
2 cups black currants
4 cups sugar
¼ cup fine brandy

Wash the blackberries and currants, which should be ripe but not overripe, and add sugar. Cook slowly, stirring a little to keep from scorching. When beginning to thicken add three spoons of brandy, simmer a few minutes longer, and remove from stove. Use remaining brandy to moisten paper tops to your jam jars. Fill jars with jam, cover with paper tops, and later with pleated paper caps. Tie and seal.

*Ripe Gooseberry Jam*

1 quart ripe gooseberries
3 cups sugar
1 cup cold water

## Unto the Hills

"I will lift up mine eyes unto the hills: from whence cometh my help? My help cometh from God who made heaven and earth."—Psalm CXXI: 1.

"Unto the hills around do I lift up
My longing eyes.
O whence for me shall my salvation come?
My hope arise?
From God, the Lord, doth come my perfect aid.
From God, the Lord, who heaven and earth hath made."
—Psalm CXXI: 1 (Metrical).

ONE cannot choose but quote also the metric version of this text which has been so loved by all hill dwellers since it was first written so long ago.

In ancient times the hills were a sort of sanctuary, a refuge when tribal battles pressed too closely. They were a natural fortress from which men might sally forth to defeat their enemies—a hiding place in which they might find safety and rest and abiding. Even in our later and more troubled years hills have proved bulwarks and offered safety to fighting men.

But it is seldom for physical safety or material advantage that we lift our eyes to them to-day. Dwellers among the hills we find in them a sort of stalwart friendship, a brave abiding in spite of all our petty change and loss. Holiday folk who know them less well, recognize in them strength and loveliness—not enemies to subdue, as men talk of the insurmountable Mount Everett, but wise and kindly seers ready, are we but willing, to open to us from their heights a vision of the world below, and from their valleys to instil us with a strength, a quiet courage, a steadfastness, which we may take back, not a mere memory, but part of our very selves, into our daily life.

God speaks to our hearts in many ways, in none more clearly than in the strength and loveliness of the hills which He has made. Though we may not stand among them they are a refuge for our hearts, "a peace out of pain". In grief, in loss, in loneliness, they speak to us of endurance. In struggle they speak to us of strength, and in defeat of an abiding security.

Yet in themselves these hills to which we lift our eyes are merely rock and stone. Imperishable and unchanging though they seem to us, we know them to be mutable, and are aware that during every hour time carves even on them, its slow inexorable change. As Jesus said to His disciples, the hills might well make answer: "The words that I speak unto you I speak not of myself". "I have not spoken of myself but the Father which sent me, He gave me commandment what I should say and what I should speak. . . . Whatsoever I speak therefore—even as the Father saith unto me, so I speak."

So it is that in times of anxiety, we "lift up our eyes unto the hills". "From whence cometh my help?" we question. And the answer is immediate, "My help cometh from God, who made heaven and earth".

God "who made heaven and earth"—The same stars, the same hills that have watched, unchanging, over our lives! We, too, are the children of this great Creator. Our help is with Him; our lives are in His hands. There is no more to be said, the hills have spoken their message.

"The Lord is my light and my salvation, whom shall I fear? The Lord is the strength of my life; of whom shall I be afraid? . . . In the time of trouble he shall hide me in His pavilion. In the secret of His tabernacle shall He hide me. He shall set my feet upon a rock."

However haltingly we have followed Him, whatever blunders we have made, we are His. Now, in the midst of disaster, we may trust in Him. Waiting on Him we may be "of good courage"; for He "will strengthen our hearts".

—CLAUDE R. VANE.

## Talky Tooter of Balsam Grove

By Bertha E. Green

THE bird that had alighted on the water with hardly a splash was quite near Grandfather Gurk, the bullfrog, and his lily-pad, and Grandfather Gurk was happy once more—he had someone to talk to.

The bird that floated so lightly and easily upon the surface of the pond was not a small bird, being at least a foot and a half in bird-length, or from tip to tip. Its feathers were mostly white, only the wings and back being a darker soft bluish grey, excepting the ends of the neatly folded wings, which were black with white tips. The eyes and also the feet of the bird, which the bullfrog had noticed, when the bird was about to light, were yellow, the feet having a faint tinge of green.

Now the bullfrog was particularly interested in bird-bills, for he often noticed that, even though the feet, body, wings, tail, and even the head of one bird might appear to be the same in shape and color, as those of another bird, there was, almost always, a difference in bills. So it was, that Grandfather Gurk looked at this bird's bill very carefully and, as he expected, the bill had a distinguishing mark on it. This mark on the greenish-yellow bill was a jet-black band that crossed the bill near the tip.

All the time that the bullfrog had been looking at the bird, he had been asking himself the question: "Who can this bird be?" He had just made up his mind as to what family the bird belonged to, and was going to speak, when the bird spoke, saying:

"I know what you are going to say, Master Gurk. You have guessed that I am a gull, but you are not sure what kind of a gull has come to visit you and Willow Pond. Isn't that right?"

"Exactly right," said the bullfrog. "If I had to find a name for you, I would call you a Ring-Billed Gull."

"That is just what my name is!" exclaimed the gull. "Do you make guesses like that every time?"

Grandfather Gurk was pleased with himself, but did not reply. He just said nothing at all, and tried to look very wise.

"I suppose you wonder why I came to the pond," said the gull. "I have heard about you and about Willow Pond, from some of my friends, the lake-birds who have visited you, but what I really came here for, this morning, was a fish."

"Did you catch it?" asked the bullfrog.

"It was here waiting for me," replied the gull laughing. "You see, it was not a live fish, but a dead one."

"Oh, I forgot that you were a gull, and fond of such things for your dinner," said Grandfather Gurk. "And, because you are a gull, and gulls are all lake-birds in this part of the country, your home is by the big lake, and there would be no use in my asking you to come and stay at Willow Pond."

"Not the least bit of use asking," said the ring-billed bird. "Listen, Master Gurk. The great lake furnishes or provides me with far more of the food that I like, than Willow Pond could do, but there is another reason and that is a place for nest-building."

"That isn't much of a reason," said Grandfather Gurk. "Here, on the banks of Willow Pond, amidst the reeds, the rushes, and the marsh at the eastern end, there are a great many places where a thousand birds could build their nests all at once, without crowding, either."

"I do not doubt you for a moment," said the gull. "But every bird has some favorite kind of place for nest-building, just as your favorite seat is on that lily-pad."

"And what nest-spot have you chosen?" asked the squatty frog.

The bird rose and flew to a perch on the end of the sunken log, and then replied:

'Way out on an islet, rough, treeless, and bare,
All stony and windswept—I make my home there.
A grassy-climp, a hollow, grey eggs, two or three,
That hatch out grey gulls, each a Ring-bill like me.

Having said this the Ring-billed gull flew away, leaving Grandfather Gurk alone with his thoughts, and they were of his visitors who, so far, had been most interesting. However, a few days later in late Summer, Grandfather Gurk once again was sitting on his lily-pad, and he had found this morning a most enjoyable one. This had been a "duck-day" for the squatty frog, that is, Willow Pond had been visited by no less than seven different kinds of ducks, and Grandfather Gurk had talked with them all. The Little Butter-ball, the quacking Mallard, the swift Green-winged Teal, the slim Pintail, the Red-head, the Widgeon, and one cross, solitary Black Duck that had halted for a while, and given the big frog a chance to ask questions.

## Housewifely Wit and Wisdom

By Mabel Crews Ringland

### Getting the Meaning of it

**A TRIP to our western provinces does something to you. It's a tonic I'd like to prescribe for every easterner at least once in five years; oftener for the smug ones. The West says we're smug and self-centered. Maybe so. A jaunt over the prairies will knock that out of you quicker than anything I know. It reminded me of the explorer who said, "The thing was impossible, so we did it."**

**That's just what they are doing in the West today. Slugging along against impossible odds of weather, grasshoppers, creditors and other killjoys, hoping against hope for a crop *this year*. Everything points now to a bumper harvest in 1938. Rain poured down on northern and central Manitoba and Saskatchewan the other day, like pennies from heaven. It turned the streets of the stirring little outpost I was visiting to a sea of muck, but nobody cared a hoot for personal discomfort; they didn't even bother with umbrellas. In the West rain means life, waving wheat fields, healthy stock, a full dinner pail, the happiness of debts paid off. We in the East just haven't any idea how they pray for it.**

**This week I have talked with all sorts of folk in Manitoba—waitresses and taxi drivers, miners and prospectors, fur-traders and old-timers of the Northwest, co-operative leaders of the new West, editors, railroad men, air pilots, school-teachers, housewives and storekeepers; even the Premier, a former Ontario boy, who, I discovered was a student at O.A.C., Guelph, just before my husband and I attended the College. From the Premier down to the humblest toiler it's the same old story of optimism, of stamina, of faith in the West — something to tie to in these days of uncertain loyalties. Making the best of it, no matter what. Rooting for the West, as much as for yourself, because the fate of every one of us is bound up with that of our country.**

**In Flin Flon, far north frontier mining town of Manitoba, on the edge of Saskatchewan, I chatted with a most intelligent woman of Swedish birth, who is steeped in this spirit of Canadianism. In her attractive home she told me of the interest of their Women's Institute Members in the welfare of the young women of Flin Flon and in the school library; of the Women's Guild of the Co-operative Society and their Fair of All Nations, and other community enterprises, all helping to build a better province, a better Canada.**

**When I complimented her on her grasp of the situation she said modestly, "I *think* I get the meaning of it. But we can't do all things overnight. Each one must work hard at what she can do best and have a patience."**

**There was no doubt in my mind that she *had* got the meaning of it. Orchids to all our Canadian women, who, like her, see the vision, yet don't dodge the homely day-to-day duties that will never put them in the headlines. They are the backbone of Canada, whether they live in the East or the West. May more of us "get the meaning of it!"**

## Hard Country and Gold

(*Continued from page 7*)

found the gold, landed his ship and walked to the hairpin bend of the river. Here, a single chunk of frozen sand and gravel, dug by Jim from beneath the giant fissure, was thawed out at a fire and panned. It yielded more than an ounce of gold in small nuggets and dust. The old sourdoughs, Pierre and Mike, danced about like children. Such a spot had been the dream of their lives.

A camp was made and two days spent in staking placer claims up and down the river in the names of Jim, Julie Marie, Pierre, Bishop Fleming, Larry and Audrey, Leon, Babtiste, Willie Joe, Nowak, Kanuakalak and Crowfoot. These were carefully selected and overlapped, in some instances, so that the ground they included was all in one body, with the conglomerate hill as its centre. Jay Bird River flowed enough water to permit the gold dredge they had bought to be floated to their diggings. This they decided to do as soon as the ice went out. It was agreed not to notify any one of their discovery until the dredge had been installed.

"Unquestionably," Jim said, as they broke camp and were about to start for the plane, "this entire area will prove to be one of the richest placer fields ever found. Remember, Mike, that morning I first looked down into this country?"

"He said the rivers used to run where the mountain tops are now, Pierre," grinned Mike. "Willie Joe thought he was a little daffy and got breakfast fast. He scared Willie Joe, talking about rivers jumping around like that."

"Well, I saw it as clearly as ever I saw anything. Here is the pivotal-point of all the churning up of this whole region. The residue of the Ice Age's grinding down of mountains, and all the detrital flow of the great glacier rivers, centred here. Why, it's like looking at the sedimentary remains of three great ranges, washed-out by supernatural forces and the tailings compressed into one vast deposit of gold-bearing sands hardened into a conglomerate lump that must be miles wide and reaching all the way to bed rock. Holy Smoke, I just thought of something! A town will spring up near here, that will make Dawson City look like a wide place in a trail. Why didn't I think of a townsite location? We'll have to do just that, right now."

Mike looked at Pierre, grinning. He said: "Pierre and I thought that all out. While you and Larry were hammering around, driving stakes and putting up location-notices, we went to that flat, up yonder, which is a moose wallow, like Dawson was first built on, and stuck down a townsite stake with all our names on it. And don't think we didn't do it regular. That notice reads about like this: In accordance with the act of March 3rd, 1891 (26 Statute, page 1905) we the undersigned do hereby claim, by right of discovery and prior location, this townsite, which we name O'Neill, running in the following directions, etc., etc."

"Why, you two old magpies are realtors, now!" laughed Jim.

"Realtors? W'at's dat, Mike?" asked Pierre.

"Oh, guys like Soapy Smith, and those early long-tail, high-hat slickers who knew which way the cat was going to jump and were on hand when she landed to sell her a corner lot to light on. Such fellows have the power of revelation and edge-in on the ground floor of every town that pops up in the front of civilization."

"Dat's us, hein? Realtors! Mebbe we better send down to Skagway for Ma Pullen to run our first hotel?"

"No, we'll get Stroller White out of his Sob Room on The Stroller's Weekly, at Juneau, to come up and install another Sourdough Hotel. He's the baby. Maybe we can do a rushing side-line business, selling snow worms, too."

"Sourdough Hotel," said Jim. "That the one whose stationery is still sold to tourists?"

"Yep," said Mike. "And that fake hotel's letter heads were sold by the carload. It was at 1333 Icicle Ave., Dawson. Rates an ounce a day. Some of the house rules were: Towels changed weekly: Anyone troubled with nightmare will find a halter on the bedpost: Guests wishing to do a little driving will find hammer and nails in the closet: If the lamp goes out take a feather out of the pillow, that's light enough for any room: Don't worry about paying your bill, this house is supported by its foundations. Stroller White had about as much to do with making Alaska famous as any man who ever went inside."

Talking, laughing, spinning anecdotes of early days, Mike and Pierre entertained Jim and Larry as they flew back to Crazy River.

The double wedding of Jim and Julie Marie, Larry and Audrey was to be celebrated St. Valentine's Day. And that morning Bishop Fleming and Jim went to Kanuakalak to inform her of the money banked for her at Fairbanks and to arrange for her disposition of it. Startled and disturbed, she lifted a stricken face to the missionary.

"I believe I will give half to you for your school," she said, "and the rest to the Russian Mission, for a girls' school."

Bishop Fleming said, tenderly: "Have you decided where you want to live, Kanuakalak? I'm taking Okalik and Karluk back with me, until summer; then they return here to work for Pierre. Would you like to make my mission your home?"

"Not a chance," blurted Jim. "Julie Marie and I have talked that all out. Kanuakalak stays with us, always. Her share of Bo'-jo Jim O'Neill's gold isn't all she is getting out of this. She has to share Young Bo'-jo, that's me, and mebbe another little Bo'-jo, coming along, later. She's part of us now."

Kanuakalak smiled into Jim's eyes, and the delight in her face as she realized the import of his words made her positively beautiful. "That way, Bishop," she said, "is better. It is just what I want to do. Always here, with Jim and Julie Marie."

After the wedding ceremony, which Bishop Fleming performed in his trail clothes, and as Jim kissed Julie Marie, Smoky, who had been admitted to the living-room, dropped to the floor, placed his enormous head on his paws and actually seemed to sulk. He shot Julie Marie and Jim swift glances out of the corners of his big eyes in utter disgust.

Pierre Moreau, eyes swimming in tears, brought in a large basket of bottles. "Chambertin, 1904, Mike!" he guffawed. "Now, by golly, you gonna celebrate! Bishop, I got a bottle for you, too. Will you get a little happy wid us ole sourdough fellows? Please, Bishop, Le bon Dieu doan care for yust dis wan tam. Wat y'u say, hein?"

"All right. I'll drink a glass or two, if you will sing The Wreck Of The Julie Plante. You two scoundrels, you'll get me unfrocked yet," smiled the Bishop. "Sure!" yelled Pierre and then sang joyously:

"On wan dark night on Lac St. Pierre,
De win' she blow, blow, blow!
An' de crew of de wood scow, 'Julie Plante',
Got scairt an' run below;
For de win' she blow lak hurricane,
Biemby she blow some more,
An' de scow bus' up on Lac St. Pierre,
Wan arpent from de shore.

De Captinne walk on de fronte deck,
An' walk de hin' deck, too—
He call de crew from up de hole,
He call de cook, *also*.
De cook she's name was Rosie,
She come from Montreal,
Was chambre maid on lumber barge,
On de Grande Lachine Canal.

De night was dark, lak' wan black cat,
De wave run high an' fas',
W'en de Captinne tak' de Rosie girl
An' tie her to de mas'.
Den he *also* tak' de life preserve,
An' jomp off on de lak',
An' say: 'Good-bye, ma Rosie, dear,
I go drown, for yore sak'.'

Nex' mornin' very early
' 'Bout ha'f-pas' two—t'ree—four,
De Captinne, scow, an' de poor Rosie
Was corpses on de shore;
For de win' she blow lak hurricane
Biemby she blow some more,
An' de scow bus' up on Lac St. Pierre
Wan arpent from de shore.

Now, all good wood scow sailor man
Tak' warning by dat storm,
An' go marry some nice French girl
An' leev on wan big farm;
De win' can blow lak hurricane,
An' s'pose she blow some more,
You can't get drown on Lac St. Pierre,
So long you stay on shore."

(THE END)

## A Quiet Game of Bridge

(*Continued from page 8*)

fetch coal oil, which frightened Alice Brown into fits."

"Dangerous," Dad muttered, but I don't know if he meant the coal oil, or Alice Brown's fits!

"When we finally got the cards dealt one of the children woke up and called for a drink of water.

"I thought it was tomato juice," I put in, irreverently, but Mother ignored my flippancy.

"We made a start at last and the bidding was high. Mrs. Seymour was my partner and I knew we were going down, but just as things were getting exciting there was a loud shout from

"It's about time we had another comb in this family—why don't you get one FREE with your Pearl Soap coupons?"

WAITING FOR YOU!

in town is your copy of this week's Toronto Star Weekly — don't forget it.

outside. Mrs. Seymour sprang up and we all ran out into the hall.

"It's Mary," she cried. "Oh, dear me—has there been an accident?"

Before we could get there the front door opened and Mary implored us to stay where we were. She was holding her gloves in one hand, and with the other trying to keep Joe, the setter, from getting in.

"Go back, Mother, don't touch me! My gloves are ruined but—oh, poor Joe!" She sank down on the steps, overcome with what we supposed were tears.

"My darling," Mrs. Seymour started towards her, then she drew back, while Mary continued to make queer, gurgling noises. At last we made out what she was trying to tell us. Joe had found a skunk, which he chased down a drain pipe, where he had got stuck. They had had to pull him out, but she thought he must have killed the skunk because . . . words failed her.

"What ever can we do with poor Joe?" she ended.

"Keep him away from the door! He can't come into the house," her mother cried, in tones of despair. Then an idea occurred to me. I had read, somewhere, that tomato juice would remove the odor of skunk from one's clothing . . . ."

"You telephoned Dad! How bright of you, Mother," I interrupted again.

"Well, we washed Mary's gloves and then we put Joe in a tub and poured the juice over him. I left them rinsing him off."

"A tomato juice shampoo! Did it work, Mother?"

She nodded as she sank, exhausted, into a chair.

"A nice quiet game of bridge," Dad teased.

"What a blessing I put down plenty of tomato juice," said Mother.

## Letters of a Countrywoman

(Continued from page 8)

satisfying about going out into the garden and picking your dinner, and seeing how things have grown during the night.

This morning when I was pulling the carrots I found the prettiest worm. The body was black with green and gold trimmings. I had never before seen one like it. I brought it in and put it in one of the glass tumblers picturing "Bashful—the dwarf". Queenie brought it a fresh carrot and we have it under observation, watching it through the reading glass. I wonder if it will develop into a butterfly? When I saw it a few minutes ago it was tucking into the carrot leaf like everything.

It feels hot enough for a thunderstorm to be brewing. I believe there is one whale of a storm close at hand, so I must post this before the storm comes. Hoping to hear from you soon,

As ever,
TORIA.

## The Hearthstone Circle

(Continued from page 9)

The entrance had the most atrocious wallpaper I've ever seen, but a few steps brought us to a vine-covered verandah, and outside a patio, where I saw the first tropical flowers.

The city is hilly and the roads bad, but the government buildings, palace and parks are show places. The natives regret that the U.S. marines are no longer stationed there and that the Americans have left. The line upon which we travelled was going out of existence so Haiti was no longer a port of call. The shops have no fronts but open directly on the street. They sell mahogany tables, silver trinkets, beads, straw baskets, hats, hand bags and belts —also rum. There are also dry goods stores. I would like to have visited their large market for foodstuffs, but there were so many flies and odors, not to mention noises, issuing forth that I just bought a huge carry-all basket in which I packed our soiled and heavy clothes when we left the ship the following day. Several passengers were noted agriculturalists, so between times we found it interesting to talk shop. We left Haiti in the late afternoon and arrived the following morning at Kingston. The little donkey carts rattling along the streets soon caught my eye, and the fact that the natives carry all sorts of things on their heads. There seems a never ending profusion of flowers and the trees are beautiful, bearing flowers, pods, fruits, seeds and beans. Jamaica is also hilly but the hills are not barren, they are ever changing in beauty and when you go up into them you can look out to sea.

The recent strikes have caused quite a disturbance. Labor is paid very little. They receive for a week what we paid for a day up north, yet they buy and prepare their own food. Nevertheless I cannot feel that destruction of life and property is the way to better conditions. The laborers and servants are blacks and varying degrees of yellow. Some are East Indians. This letter has become far too long, so I must leave a description of life here for another time.

*(To be colored with paints or crayons. Whenever you come to a word spelled in CAPITAL letters use that color.)*

"HERE, let's plant this here and that there!" cries BROWN-haired Teddy. "I have a nice deep hole for this one and I will dig you another for your plant anywhere you want it, Susie May!"

"Thank you, Teddy!" says YELLOW-haired Susie May, "I think I will stick mine in here! This side of the PURPLE pansies. Those BLUE pansies are beautiful! Where did you get them?"

"Aunt Frances gave me this bunch and the YELLOW ones are for you!" replies Teddy.

"Don't you think this RED flower I have here is pretty? It has such wonderful big GREEN leaves, too, but do you notice the stalk is a much lighter GREEN? See, it has so many buds on it. We can watch it bloom and bloom!" says Susie May.

"Who painted the pot YELLOW? Did you?" asks Teddy.

"Yes, don't you like it? I thought it looked like sunshine!" Susie May answers.

The pansies all have GREEN leaves and the little plant with the round PINK (use RED lightly) flowers has lighter GREEN leaves. Of course the ground is BROWN and Teddy's trowel is GRAY (use BLACK lightly) with a bright RED handle.

"How do you like my gardening apron?" asks Susie May, "Mother got it at the Church Fair!"

"Oh, it is swell. Those BLUE and PINK flowers look like real ones!" says Teddy. "I wish my dark BLUE overalls had some flowers on them, too!"

"Well, perhaps we could paint some on!" says Susie May.

Susie May's dress is light YELLOW and the apron is piped in bright RED. Susie May's socks are YELLOW and her slippers are BLACK.

Teddy wears a TAN (use BROWN and YELLOW mixed) blouse and his shoes are TAN, too.

Susie May's hair ribbon is bright RED.

The fence is White but you can see BLUE sky between the slats. The grass is GREEN. Both children have PINK cheeks and RED lips. Paint the border of this picture GREEN, a bit darker than the grass, and the lettering RED.

Dear Janet Jean:

Yes! I know I wrote you very recently, but why not again, especially when I come with the offer of a recipe for "Miss Lilac" in particular and the clan in general? I clipped it from a daily paper a year ago, tried it and, finding it excellent, am glad to pass it on. If celery is not liked, the quantity may be made up with all tomatoes, though personally I like the celery.

*Tomato and Celery Soup*

6 cups ripe tomatoes (cut in pieces)
1 cup chopped onion
2 cups chopped celery (stalks and tops)
2 tablespoons flour
2 tablespoons granulated sugar
1 tablespoon salt
1/16 teaspoon cayenne pepper
2 tablespoons butter

Simmer first three ingredients for forty-five minutes. Press through sieve. There should be 4 cups of puree. Combine dry ingredients with enough puree to make a thin paste. Add this to hot puree. Add butter and cook till thickened—5 minutes should do. Pour in sterilized jars and seal. Yield—two pints.

This is only a small amount but recipe may be doubled or, indeed, trebled quite easily. It certainly is good some cold winter night when the mercury is trying to push the bottom out of the glass, in place of doing its best to spill over the top as it is today.

To "Scotch Nell" I would suggest a good fly spray used once a week for several weeks as a start. Spray thoroughly in all cracks. If there are small nail holes in the plaster fill these with putty or plaster of paris and paint when dry. Then paint all paintable surfaces of the bed, shellac with clear shellac all other surfaces, not forgetting the ends of the slats. This will clear up the trouble. It may sound like a big job but takes only a short time in view of results. The fly spray kills all live creatures. The paint coats any ova deposit which clings to rough or broken surfaces and naturally there can be no hatching.

I am taking it for granted that surfaces will be washed between sprayings and before painting. A very small brush may be needed on hard-to-get-at places such as where parts fit together at head and foot.

This information comes out of a long and bitter war, staged in a very old house where plaster was continually breaking, and I can vouch for its effectiveness. New plaster finished the trouble which was chronic before.

Good luck to both.

VEE.

"Your stuff" is always very, very acceptable and we are delighted to hear from you.—J. J.

Dear Janet Jean:

"Scotch Nell" was enquiring how to rid the house of bed bugs. I am happy to give her a remedy which worked wonders in both cases. My sister had a rooming house in the city and tried everything she heard of as well as having the city fumigate for her (which did no good). She finally tried burning sulphur and never was bothered with them after. The other was an old farm house. In both cases they took about five pounds of sulphur, put it into an old pail, set the pail in a pot with some ashes in the bottom and then lit a match to the sulphur after closing every door and window. The fumes will choke everything very soon. Leave for an hour or two. I have tried it each spring to prevent moths.

I offer a suggestion. Would you kindly print the name in larger letters when giving a recipe or household discovery of any kind? It would make it easier to read. Your Hearthstone Circle is a source of helpfulness to me.

HELP ON A BIT.

Thank you so much for your help.—J. J.

Dear Janet Jean:

We have taken the Countryman for some time. Although I have never written to the Hearthstone Circle before, each week I read and enjoy the letters in it.

To-day I noticed where "Miss Lilac" wanted a recipe for Tomato Soup. Here is a good recipe which when used with as much milk as you use with soup tastes very good:

1 peck ripe tomatoes
1 bunch celery
6 medium-sized onions
6 cloves

When the above vegetables are cooked thoroughly, strain well, add ½ cup of melted butter and stir in ½ cup flour which has been mixed with a little water to prevent lumping. Add ¾ cup sugar, 2 tablespoons salt and ¼ teaspoon cayenne pepper. Boil the whole mixture well and can while hot.

Has anyone a recipe for making jam with salts instead of Certo? We always make a lot of jam at our place and I would greatly appreciate a recipe of this kind.

I am not much good at writing long letters so will leave space for the more-gifted writers.

MARIGOLD.

Your help is much appreciated and we hope you'll come again.—J. J.

Dear Janet Jean:

I have often wanted to write to the H.C. and tell you how much I enjoy all the letters. Also I like Toria's letters. She has so many little everyday things happen to her like us all. Cherry's letters are always so full of useful hints we farmers' wives who can't visit the city stores often appreciate. We live on a farm and are one of the fortunate ones as we have Hydro power and also water in both our house and barn. We find they make our work much easier, and I think I would be lost without them. My electric washer is indeed a great labor-saver and our bathroom is only small, but I can't tell you how convenient.

I believe I have the recipe for the floor paint "R. M." wished. I have used it and found it very good. I put a coat of floor paint over it. Allow four ounces of glue to one gallon of soft water, put water on stove in a large kettle, add the glue, stir well, and when it boils add gradually four or five pounds yellow ochre. Keep the mixture at the boiling point for a few minutes, then apply to the floor with a white-wash brush while hot. As it cools, return to the stove till warm. A little warm water may be added to the mixture as you work, so it will flow readily from the brush. It also dries quickly. I hope this is what "R. M." wanted.

I have often thought I could help "Jersey Lily" with her hooked rugs. At least I could send her full directions, as there are a number of little details that are important when making them. I have made several rugs, and enjoy the work very much. I would be very glad to send her directions, either by letter to her, or a letter to the H.C. My address will be with Janet Jean. I made a rather pretty rug this past Winter, with a black Scottie dog with a red bow on his neck, and a blue background. I make it for my daughter's room and luckily her room is mostly blue.

As I am a newcomer I must not stay, but I sincerely hope I have helped a bit and that I may come again.

Wishing the Circle every success and thanking you all,

JOHN'S PAL.

Thank you and you may indeed come again.—J. J.

Dear Janet Jean:

Having just received our June 18 Canadian Countryman, and on reading the Home Page, I see that "Miss Lilac" sends in or asks for a recipe for Canned Tomato Soup. I hasten to send in mine which we all like very much. I, however, use a lot more of real creamy milk than of the canned Tomato Soup, but this I think depends on each one's personal taste. I always add a very little soda to my Tomato Soup before mixing with the milk to keep milk from curdling. I like to heat butter to a slightly brown stage, add some flour to this, then pour in my cold canned Tomato Soup and a little cold water. Let this come to a boil, then put in a little soda, when it is ready to mix with the milk which has been heated in another saucepan. Thicken with rolled crackers or biscuits before serving.

*Tomato Soup*

1 peck tomatoes
2 bunches celery
6 medium-sized onions
¼ cup sugar
½ cup flour
Speck of cayenne pepper

Wash tomatoes, celery and peel onions and cut all into pieces. Boil all together gently for half an hour, then rub through a sieve. Add salt, sugar and pepper and put on stove to heat. Mix flour with cold water until quite smooth. Stir into the hot tomatoes, and cook, stirring constantly until it boils a few minutes. Put in jars boiling hot, filling jars brimming full, and seal at once.

Have had this recipe now and used for four or five years and like it very much. Have not been able to buy any that I like as well as this. Have had no trouble in its keeping nice for the year.

I am a seventy-year-old grandmother in the country, and have very poor eyesight, as my eyes seem to be failing very fast. Have had them looked after by a specialist, as well as good opticians, but get very little comfort from them. Am writing this now, but if my eyesight keeps on failing as fast as it has done the last year, I fear I cannot see to write at all in another year.

From one of H.C. appreciative readers.

ANGELICA.

So very sorry to hear about your eyes and hope they will stand by you for years yet. Thanks so much for your help.—J. J.

120094

Dear Janet Jean:

I have been a reader of "The Hearthstone Circle" for several years and have received much assistance from it. I am always interested in hearing about your boys, especially the baby, as he is nearer the age of my own little ones.

Just a few hints which may be of help to someone:

If you have trouble with streaks in your butter, try working in the salt, then leaving the butter to stand from ten minutes to half an hour, then working well again.

I find my bread is lighter if left to rise in the pans longer than the one hour allowed in some recipes. I put my whole baking (three ovenfuls) in the pans at the same time and usually leave in a warm place about two hours before putting any of it in the oven. If enough flour has been mixed in, it will not run over.

I would be grateful if someone would tell me an effective method of removing rust from tinware. I am also anxious to know what sort of adhesive I could buy to use for the seams in making over a rubberized raincoat to fit a little girl. The seams have not been sewn, but have been stuck with some sort of adhesive substance.

Although "Minerva" lives in a community where the farmers' wives are unselfish and where a hired man's wife is often given the seat of honor, it does not always follow that conditions are the same everywhere. There are smug, self-centured communities, too, just as "Twig" describes. Possibly "Twig", instead of being unfriendly, as "Minerva" suggests, is too accomplished for her neighbors, and they are afraid she may outshine them and their daughters at social gatherings. "Twig" may be thankful that she is not permanently settled in that particular neighborhood.

I would advise her to find some hobby to take up her spare time and let the neighbors go their way. When she has children she need never lack for a hobby. Since you play the piano, "Twig", teach the children (if they are old enough) to play. It may require patience, but when they are older they will thank you, for a good musician is popular at almost any social gathering. Take an interest in their hobbies. Take them for walks through the woods when spring comes. Let them watch for the first buds, the first birds, etc. They will see plenty of interesting things, and if you can answer one-twentieth of their questions, you can give yourself a high score as a naturalist. Let them help you plant the garden (what if they do tramp or uproot a few flowers or vegetables?), and watch the growing things. Nearness to Nature brings us nearer the Creator, and love of Nature and of producing something with the work of their own hands will give your children hobbies to turn to for relaxation in whatever walks of life they find themselves. One has only to teach Agriculture and Nature Study to country children to realize that some children (and grown-ups too) go through woods and fields day after day without observing much of their surroundings. Read good poetry to your children. Time spent with them will pay you greater dividends than any number of bridge parties or teas.

And, "Twig", do not start your children in life with inferiority complexes. Never let them hear you complain of slights to them or yourself. Make such a good time for them amongst themselves that the neighbors' children may well be envious and will find excuses to join in their work or play. What I have said is only meant to be suggestive since I do not know much about the circumstances, but certainly a child's popularity at school does not depend upon the wealth of his (or her) parents.

JUNE MARIE.

I thank you for your very nice letter.
—J. J.

---

Nearly two hundred and thirty-nine million dozens of eggs (238,913,108 dozens) were consumed in Canada in 1937, an increase of 643,576 dozens on 1936. The estimated value of farm eggs for 1937 is placed at $38,489,000.

91 York St., Guelph

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go
The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.
A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

**COUNTRYMAN CIRCULATION REPRESENTATIVES**

***CARRY THIS LETTER OF AUTHORITY***

Circulation representatives of Canadian Countryman carry a letter of authority, copy of which is reproduced below. This letter sets down clearly the rules under which they are required to work. They will always be glad to show this letter for your inspection.

To Whom It May Concern:—

This is to certify that (name of agent), the bearer, is an accredited representative of The Canadian Countryman Publishing Co., Ltd., and is given authority to collect and receipt for subscriptions to The Canadian Countryman at $1 per year, $1.50 for two years, or $2 for three years.

The acceptance of this credential by (name of agent) carries with it his guarantee that the following rules will be strictly observed:

1. Full subscription price will be collected in every case.
2. No premium of any kind will be given.
3. No other publication will be offered in combination with Canadian Countryman.
4. Subscriptions will be accepted only from actual farmers. This credential will be void after (date).

Yours very truly,
The Canadian Countryman Publishing Co. Ltd.
T. J. TOBIN,
Manager.

P.S. — An agent of Canadian Countryman who cuts our subscription prices, or otherwise violates the above rules in any particular, will be discharged immediately.

# Review of the Market Situation

## Hogs Highest in Eight Years at Winnipeg
## Cattle Fail to Clear Despite Buffalo Strength

OTTAWA—The cattle market generally staged a reasonably satisfactory performance throughout last week. Some price reductions occurred, with cows, as a rule, affected the most. Some strength was lent to the market at Toronto by reports of good prices received for Canadian cattle at Buffalo, where a sharp advance in cattle prices developed. The movement to the south was a little heavier, shipments being attracted by improved markets. On the other hand, with lower prices prevailing on recent sales of Canadian cattle in Great Britain, buying on Overseas account was curtailed.

Prices at Buffalo were up 25c to 50c on grass cattle and as much as 50c to 75c on fed steers. Two loads of good fleshy Canadian steers, averaging around 1,150 lbs., brought $10.25, another load around 980 lbs. $10, while other Canadian steers sold from $9.85 downward. Canadian calves sold up to a high of $10. The most recent quotation on good heavy Canadian steers at St. Paul was $11, but later advices from that point reported an easier trend with no sales of Canadians.

Exports to the United States for the week amounteed to 785 beef cattle, 311 dairy, 1,176 calves, and 51 hogs, making the totals to date this year 24,064 beef cattle, 5,288 dairy, 29,194 calves, and 95 hogs. Exports in the same period last year consisted of 98,652 beef cattle, 6,509 dairy, 62,-709 calves, and 46,502 hogs.

Two steamers unloaded Canadian cattle at Birkenhead during the week. The S.S. Manchester Brigade and Manchester Division cattle ranged generally from 15½c to 16c per pound dressed weight, including offal, with some good lightweights likely to make one-half cent more. The general demand for fat cattle was variable during the week, while store cattle were easier. Prices for best dairy cows are holding up but other qualities were weaker. Cattle from the S.S. Delilian were sold at Glasgow on the 14th to a fair attendance of buyers, with steers making 8½c per pound alive, and bulls 6½c. The steer price is about ¼c below the average for the last previous shipment.

The S.S. Norwegian sailed from Montreal for Cardiff on July 9th with 168 cattle and the Manchester Commerce from Montreal for Birkenhead on the 14th with 375. Total exports Overseas to date amounted to 22,788 head this year, compared with 4,017 in the same period last year.

### Cattle Alleys Not Cleared

ON a moderate run that included only 400 Westerns, trade in cattle was dull throughout last week, with some 600 cattle unsold at the close. Prices on inferior grades of steers and heifers were down 15c to 25c cwt. and on butcher cows 25c to 50c, while fed calves gained 25c and bulls were firm on export buying. Some good to choice weighty steers were taken for the U.S. at $7.50 to $7.80 cwt., and overseas exporters paid $6.50 to $7.25 for 250 steers. Good butcher steers and heifers made $6.50 to $6.75 and a few tops $7, while common grades were peddled at $4.50 to $5.50. Butcher cows closed at $3 to $4, with canners mostly $2.50. Good butcher bulls sold at $4.35 to $4.75 and one top $5. Western stockers were plain and sold slowly at $4.25 to $5.25, with a few better kinds at feeders $5.50. Milkers and springers slow with tested tops $60 each.

Montreal cattle prices dipped 25c or more lower, under a slow trade. Steers ranged from $4 to $7.60 cwt., with good ones sometimes as low as $6.50 and mediums down to $5. Heifers made $4 to $6, odd tops $6.50, some common $3.50, good butcher cows $5, mediums up to $4.50 and common as low as $3.

The Winnipeg cattle supply was more liberal and quality fairly plain. Even so, the trade staged a good performance, though slowing up somewhat in late sessions, with cows closing about 25c lower, and other classes well in line with the previous week. A small number of heavy steers made $7 to $7.50 cwt., dry-fed handyweights up to $7.50, suitable grass steers from $6 to $6.75, and plainer kinds $4 to $5.50. An active demand centered on fed yearlings with a few tops at $8.50 and the balance from $7 to $8. Good cows closed from $4 to $4.25, plainer grass kinds from $3 to $3.75, canners and cutters $2 to $2.50. Replacement cattle were all taken care of, with fleshy feeders around $5, good stockers $4 to $4.50, and plain lights $3.50 down.

### Cattle Soared Then Broke

CHICAGO—The fat cattle market soared to new heights on the crop early last week and then broke sharply so far as common, medium and good grades were concerned. Strictly good and choice kinds meanwhile showing a downturn. Only strictly choice and prime cattle held on, these finishing steady, although 25-50c higher than the close a week earlier. Top went to $12.80, with the next highest price $12.75; with long yearlings up to $12.35, light steers $12.65, and light yearling steers $12.00.

The line of price cleavage was around $12.00 or $12.25. Kinds of value to sell above these prices held steady, after reaching a new peak for the year. But the bottom dropped out of the market on all others and the lower the grade the more the downturn. Greasy and shortfed kinds, some of them grading up to good and better, fell off badly, breaking 50c-$1.00. It was the grass cattle that in many instances showed a dollar loss from Monday to Thursday.

### Calves Advanced at Toronto

CALVES advanced 25c to 50c cwt., at Toronto, last week. Choice veals made $8 to $8.50 cwt., others mostly $6 to $8, and a few common as low as $4.

Montreal calf market had an easier undertone. Grassers made $4 to $4.50 cwt., common drinkers and light veals $4.50 to $5.50, and other veals up to $7.25 and $7.50.

Winnipeg calves active and firmer, best veals $6 to $6.50, others $3 to $5.50 cwt.

### New High for Hogs

HOG prices advanced on most markets last week, a new eight-year high being established at Winnipeg. The Canadian hog run totalled 40,154 head, compared with 61,472 in the same week last year. Totals to date, this year, 1,749,313; last year, 2,189,715.

Toronto hog prices gained 40c cwt., bacons closing at $12.25 off trucks. Light feeding pigs brought $4 to $5.50 each, and 70 to 80-pound feeders $9 to $10 each.

Most Ontario plants closed higher. Hamilton paid $12 to $12.25 for bacons alive off cars, and $16 to $16.35 dressed. Brantford, $11.65 alive. Stratford, $15.65 dressed. Barrie, $11.60 alive, $15.60 dressed. Guelph, $11.25 alive, $15.35 dressed. Kitchener, $11.50 alive, $15.65 dressed. Peterboro, $11.50 alive, $15.40 dressed. Hull, $11.50 alive, $15.70 dressed, and Moncton $11.15 alive, $15.20 dressed.

Montreal sold bacons at $12 to $12.25, fed and watered, but mostly $12. Trucked bacons brought $12.25. Rail-graded hogs were $16.25 to $16.50.

Winnipeg hogs established a new eight-year high, bacons selling up to $12, f. & w. Feeders in strong demand at $12 to $12.50.

### Lambs Lost Dollar

THE previous week's price of $12 cwt. at Toronto, attracted a liberal supply of lambs, last week. These included many roughs. The market opened firm at $12 cwt. for good ewes and wethers, but receded to $11 by the close, with bucks at a discount of $2 per cwt. Sheep steady at $2 to $4. Good yearlings $6 to $7.

Montreal sold good lambs at $10 to $10.50 cwt. and closed at a top of $10. Several lots sold ungraded at $10. Sheep, $2 to $3.50, with tops $4.

Winnipeg lambs stronger, tops $10, other good kinds $9.50 to $9.75.

### Hides and Wool

THE price of wool advanced another cent per lb. last week, dealers reporting a better demand. A despatch from England reported demand as good at the London wool auction. Especially was this true of the better sorts. French and German buyers competed freely. Hides remained unchanged.

Prices delivered Toronto:

Green country hides, 4½c lb.; cured, 5c. Green country calf skins, 6c. Green country kip skins, 6c. Lamb skins, 25-40c each; No. 1 and 2 horse hides, $2.00 each; No. 3, $1.00. Horse hair, 32c lb. Wool, flat, 10½c. Tallow, No. 1, 3c lb.

### Bacon Higher Overseas

Priced in shillings per 112 lbs.

| | Week ended July 14 | Previous week | Same wk '1937 |
|---|---|---|---|
| Can. bacon | 102-104s. | 98-100s. | 86-90s. |
| Danish | 103-106s. | 99-102s. | 93-96s. |
| English | 103-106s. | 98-102s. | 91-96s. |
| Irish | 102-108s. | 98-104s. | 90-99s. |
| Swedish | 102-105s. | 96-101s. | 91-95s. |
| Dutch | 103-105s. | 99-101s. | 92-95s. |
| Baltic | 102-104s. | 98-100s. | 86-90s. |
| Can. hams | 101-105s. | 101-104s. | 100-103s. |

### The Wheat Situation

WHEAT markets were still under pressure last week. Up to Friday's closing, Winnipeg futures netted losses extending to 1¾c per bushel. Ontario wintter wheat was quoted as much as 5c lower. The bearish trend was due, in some measure, to lower Liverpool quotations, which were attributed partly to cheap offerings from Russia and Danubian countries.

### Feed Trends

MIDDLINGS dropped a dollar per ton last week, while bran and shorts held unchanged. One mill quoted linseed meal a dollar per ton lower, but cottonseed meal advanced $2 a ton, because of higher asking prices at Southern United States mills. Corn also gained a dollar per ton, owing to renewed strength across the line, where exports and Government corn loans proved stimulating.

The United States feed market advanced during the week ended July 12, influenced by increased inquiry for lighter offerings. Strengthening factors also included the persistently high temperatures through the interior valleys and in the Middle Atlantic areas, together with advances in corn prices. Wheat millfeeds gained about $1.00 per ton, while high-protein feeds strengthened, with advances of 50c to $1.50 per ton for cottonseed and soybean meals.

The U.S. index of wholesale feedstuff prices advanced to 100.8 (1935-36 = 100), compared with 98.6 the previous week and 100.9 two weeks earlier.

### Potatoes, Beans, Hay

NO. 1 graded potatoes from Southwestern Ontario were selling at 95c to $1 per bag, delivered Toronto, last Saturday morning. The dollar was for stock in new, branded bags.

No. 2's were quoted at 60 to 65c and ungraded at 75c.

One dealer reported few potatoes coming from the Hamilton district, figuring they must be finding an outlet in Hamilton and other centres.

The total commercial early crop of potatoes in the United States, which includes production in the early, second early, and intermediate states, is indicated to be 47,799,000 bushels. This is 5 per cent smaller than the 50,441,000 bushels harvested in 1937, but 20 per cent larger than the 1927-36 average of 39,974,000 bushels.

Beans were holding about steady, with hand-picked whites $1.40 per bushel, f.o.b. shipping point; choice-primes $1.30 and yellow-eyes $2.25. Not only are beans being exported overseas, but the trade is not anticipating as big a 1938 crop.

Hay remained seasonably quiet. No. 2 timothy was nominally quoted at $10 to $11 ton, delivered Toronto; No. 3, $8 to $9; oat straw, $6; wheat straw, $7.

### Dairy and Poultry Produce

BUTTER firmed fractionally last week. There was a flurry of buying, partly due to speculators and partly from distributors who needed supplies. Demand quieted off by Saturday, however, with No. 1 Ontario creamery solids, 25c lb. Toronto.

At Montreal, 92-score fresh Quebec butter was quoted at 25½-25½c on Friday.

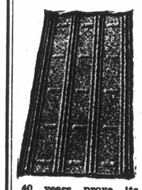
No. 1 cream was 25c lb. butter-fat on truck.

Stocks of butter in storage across Canada on July 1, 1938, totalled 32,750,555 lbs., or 23.4% above July 1, 1937.

Large cheese ranged from 14½ to 14½c lb. in Toronto, last Saturday morning.

J. E. Singleton, Dominion Dairy Commissioner, has just returned from England, and he reports that the demand for mature Canadian Cheddar cheese is on the increase in Great Britain.

The practice of aging cheese in Montreal instead of in the United Kingdom is also growing, Mr. Singleton found. Specialists who have spent years studying the best methods of maturing cheese explained that the average humidity in the air in Montreal was 5 per cent less than in the United Kingdom and for that reason better results were obtained by leaving the product in Montreal for a year or more.



Cheese made in the Brockville and Belleville districts in June and September, 1937, was commanding the top prices in the United Kingdom. Some of it was over two years old, but the bulk of what was described as old Canadian Cheddar was from twelve to eighteen months old.

Storage stocks of cheese in Canada, on July 1, 1938, totalled 30,976,099 lbs., or 1.3 million lbs. over last year.

## New U.S. Import Regulations on Cattle

OTTAWA—A new order of the United States Department of Agriculture, which became effective July 1, stipulates that all Canadian cattle entering that country other than those for immediate slaughter must now be accompanied by a qualified veterinarian's certificate, showing that they have been tested within thirty days from the date of shipment and found to be free from bovine tuberculosis and other contagious disease. The order is not applicable, however, to cattle being exported directly from an accredited area. The order states that its effect is to render steers and spayed heifers from Canada, except those for immediate slaughter, subject to the same T.B. test and certification requirements as other classes of cattle from Canada. Attention is drawn to the reduction from 60 to 30 days of the period in which cattle must have been tested.

**DILLON'S**
**STANDARD RIBBED ROOFING**

Poultry grit, $12 ton or 75c cwt. Oyster shell, hen or chick, $16 ton or 90c cwt. Oyster shell substitute, $10-$11 ton or 60-75c cwt.

### Wool Prospects

WASHINGTON — Although little change in domestic wool prices is expected in the immediate future, some strengthening in prices may occur before the end of the year, the Bureau of Agricultural Economics reports. Stocks of finished and semi-finished goods probably have been sharply reduced in recent months, and some recovery in mill consumption of wool from present low levels appears likely for the late summer and fall. Prices in foreign markets may continue steady in view of prospects for some decrease in production in the Southern Hemisphere.

### The Army Worm Outbreak

DURING the last week there has been a widespread outbreak of the army worm in most counties of the Province, but more severe in some than in others. This insect is like an ordinary cutworm. The color is green to brown or nearly black, with longitudinal stripes along the back and sides. When full-grown it is nearly two inches long. Most of the damage has been done to grasses, barley, oats and corn. Alfalfa, sweet clover, red clover, peas, beans, potatoes, tomatoes and most other crops have not been attacked. When barley or oats are attacked the damage is caused by the leaves and heads being eaten off.

The worms usually come from grass, their favorite breeding place. From this they often move in large numbers to nearby corn or grain. In many cases, however, they actually have bred in the grain itself, the eggs being laid on the leaves. Hence grain may be attacked without any invasion from the surroundings. Every farmer should at once walk through his barley, oats and corn in the evening to see if it is being injured by this pest, and should do this daily until all danger is past.

*Control*

Poison bait in most cases is very effective, but sometimes must be supplemented by a trench or furrow.

*Formula for the Poison Bait*

| | |
|---|---|
| Bran | 25 lbs. |
| Paris Green | 1 lb. |
| Cheap molasses | ½ gal. |
| Water enough to moisten the bait without making it sloppy | about 2½ gals. |

Mix the bran and Paris Green dry, thoroughly, until the green can be seen everywhere through the bran. This can be done most easily on a concrete or tight board floor by shovelling it over just as in mixing concrete. Do not mix with the hands and do not inhale the Paris Green dust. Next level the surface of the pile, add the water and molasses thoroughly mixed and shovel again until the mixture is well moistened, but will fall through the fingers like damp sawdust. This poison bait should be applied after 6 p.m. and should be scattered by hand. In corn broadcast it over the ground just as one would broadcast grain. The above amount should be sufficient to cover 1½ acres, but only 1 acre in a very heavy infestation. Barley and oats may be treated in the same way, but if the grain is very thick or fallen the bait must be thrown forcibly into the crop to reach the ground, and in such cases even 30 lbs. per acre, or more, may be needed. The lodged parts will usually require most bait. Do not treat any grain field unless noticeable damage is really being done.

To prevent the worms moving from an infested field to an uninfested, scattering the bait for a few yards ahead of them may be sufficient, but if they are very numerous this will have to be supplemented by making a trench or deep furrow. In sandy land this can usually be done with a plough, leaving the straight side of the clean-cut furrow towards the crop to be protected. Two furrows about a yard apart are better than a single one. In clay land the furrow must be deepened to a trench 12 inches or more in depth, with the straight wall towards the threatened crop cut clean or better even cut under. In both cases poisoned bait should be thrown into the furrow or trench. Post holes at intervals may have to be dug in either the furrow or trench.

### Municipalization of Milk Distribution

By R. K. Jones

THE Milwaukee Co-operative Milk Producers' field representative, C. W. Fletcher, has an article in Hoard's Dairyman, a ranking dairy journal across the border, in which he points out the dangers to farmers in the proposed Wisconsin legislation for milk municipalization. By this measure a municipality would be allowed to take over the distribution of all fluid milk within its corporate limits, to manufacture dairy products and to regulate the price to the consumers of the fluid product. Bills similar to the present one were defeated in Wisconsin in 1935 and again last year. Although there is no like measure being proposed here, farmers would be well advised to keep themselves informed of the points at issue.

Mr. Fletcher warns all concerned in the production of milk that if the cities and towns did their own distributing there would be intense political control of the milk business. "... It is a certainty," he contents, "that under the law of human nature and the universal ignorance of consumers in regard to milk distributing costs, the immediate demand would be for cheaper milk. ... Where would the farmers be in a battle of that kind? Would the politicians be interested in a higher income for him? Or would they say, 'low-priced milk for the consumer with, we hope, good returns to the producers; but no matter what his return, low prices to our voters, for they are the ones we live on'.

"Let us look at another very important phase of this question, the building up of increased consumer usage of diary products.

"Under the competitive system this is being hammered away at constantly because increased usage means higher volume and lower costs to distributor and producers. Salesmen are trained by experts on methods of getting the housewife to increase her purchases. The radio, newspapers, billboards, and leaflets are used to increase consumption. Children are approached in both home and school by clever, high-class methods to get them to demand of their parents more dairy products.

"Results are obtained not only to the benefit of the dairy industry but to the benefit of the community as a whole through increased health and greater efficiency of the general populace. These things are attained by competitive methods with other foods and must be thought of in that light.

"What might this situation be under municipal control?" If we eliminate all co-operative or private industry from the competitive food field in the milk distributing industry and give municipalities complete control of that phase of the business, it is only reasonable to believe that those who would be placed in charge would be responsible primarily to a political party, or to the municipality—not in any way to the producer.

"Their biggest problem would be to see how cheap the consumer could buy milk; not how much, not how good this milk would be. Price only would be the main consideration. They would not dare to increase sales, for they would be competing with other food dealers. They would remember these food dealers were voters who might see to it that their positions were not secure after the next election. As long as their positions were subject to the whims of a political situation, no long time program could be inaugurated.

"The milk wagon driver, undoubtedly under civil service, would have a certain area in which to deliver milk. His salary would be assured, so he would have no greater incentive to increase sales than a mailman would have to get people to write more letters. If the people wanted milk he would deliver what they wanted, with no attempt to increase his own burden. Under that system any practical milkman will agree that per capita consumption, over a period of time, must decrease in the face of active sales effort from competing food.

"The municipality, because of the uncertainties of sales and supply, would be forced to enter the manufacturing field of dairy products. This branch of the industry, because of its character, would undoubtedly be a white elephant on their hands. They would not be interested in maintaining prices or increasing sales, but simply in getting rid of the product.

"It is reasonable to believe they would buy as little milk for manufacturing as possible, with the result that producers who regularly supply the market, might, during flush production periods, find themselves without a continuous outlet for their entire production. What effect might this have on the co-operative or privately owned butter, cheese, or condensing plants? These plants have their taxes, their stockholders' interests, and their responsibilities for maintaining fair markets for never ending supplies."

The Co-operative Milk Producers' representative concludes his article by summing up that "Shrewd, selfish politicians can see in this one of the greatest chances for self-aggrandizement of any situation of modern times. Socialistic-minded people, and we have plenty of them, can see an opportunity to try out another deliciously vague theory—political control of the most important food supply of the masses.

"I have merely attempted to give some of the highlights of this controversial subject. I am firmly convinced that this is another attempt to place the noose of regimentation more tightly around producers' necks. Bargaining rights for producers are inherent and sacred. They should be protected at all costs."

---

W. T. Hunter, for six years Jersey Fieldman for the Canadian Jersey Cattle Club, has resigned, and is now distributing Jersey milk. ... Mr. Hunter was formerly manager of the Experimental Farm at Summerland, B.C., and it was while he was in the Okanagan Valley that Calgarth Starlight was purchased. Starlight is that sensational long-time producer that in all probability will, in a few weeks, be the world's long distance Jersey cow. ... Three years ago Bill Hunter moved to Toronto and was the Jersey Milk Specialist for the Canadian Jersey Cattle Club, and under his guiding genius the sale of Jersey milk went up by leaps and bounds. ... He has purchased the Twin Cities Dairy in Kitchener, Ontario, and changed its name to Kitwat Jersey Dairy. He plans to specialize in Jersey milk entirely, and has completely remodelled the dairy and installed a milk bar that is second to none. Already his milk sales have gone up 25% and the milk bar is succeeding beyond Bill's fondest dreams. ... In his work throughout Canada Bill made many friends. His ability to have things done right and his genial personality fit him admirably for his new work.

# Classified Opportunities

## —To Buy, Sell or Exchange

**In this department are inserted advertisements properly classified, of any and everything that farmers and their families might wish to buy, sell or exchange.**

**Rate: 6 cents per word for each insertion.**

**No advertisement less than 90 cents each insertion.**

**ALL ORDERS FOR CLASSIFIED ADVERTISING MUST BE ACCOMPANIED BY CASH, MONEY ORDER OR CHEQUE.**

**State clearly the number of insertions desired.**

**Give full name and post office address.**

**Name and address to be counted, also each number and initial. Compound words are counted as two words. For example, the following advertisement would be counted as 20 words:**

FOR SALE — 100 ACRE FARM, LOT 4, Con. 2, Downie, $80 acre. J. S. Jones, R. R. 1, Lindsay, Ont.

**If replies are to come to a box number at Canadian Countryman office and we are to forward them, figure 10 cents extra on the charge for each insertion, to cover postage.**

**ALL ORDERS, CHANGES OR CANCELLATIONS MUST REACH US BY SATURDAY, ONE WEEK PREVIOUS TO DATE OF ISSUE.**

## Where Good Registered Livestock May be Purchased

SCUGOG TOWNSHIP, 100 ACRES, SQUARE brick house, large barn, steel roof, driving house, buildings in good repair, about five acres bush. Good loam soil. Must be sold. Carleton Graham, R.R. No. 3, Port Perry, Ontario.

**FEMALE HELP WANTED**

WANTED — HOUSEKEEPER, BY REFINED bachelor, 44 years, no objection to one child. State salary. Box 106, Canadian Countryman, Toronto.

**FOR SALE**

**THIS Beautiful MONUMENT**

Height 2 feet 6 inches
Cost Only **$39** Freight Prepaid
40 V-Sunken Letters Free
Stones from $6 to $60.50

Send for Free Catalog containing complete details and illustrations of all stones.

*No Agents Wanted*

**LO'NS STONE WORKS LTD.**
(Established 1908)
Box 244, Norwood P.O., Winnipeg, Man.

BUY WHERE YOU SAVE! SHOE LACES, 6 pair (black), 25c; Bingo games, 30c; tie and collar holders (set), 25c; ready-knot silk ties, 60c; reading glasses, 25c; tooth brushes, 20c; bathtowels, pair, 80c; face cloths, each 10c; hand towels, pair, 45c. Each sent postpaid. William Wells; Durham, Ontario.

FOR SALE — 28 x 45 MOUNT FOREST separator with elevator, in good running condition. $450.00. Apply Box 104, Canadian Countryman, Toronto.

**HELP WANTED**

EARN MONEY GATHERING MEDICINAL roots, herbs, weeds, barks. Hundreds growing wild have cash value. Stamp brings details. Write Box 078, Islington, Ontario.

FREE SPAWN, NITROGEN, BOOKLET. $40.00 weekly growing mushrooms for us or your local market, fresh or dried. Dominion Patent 331563. North American Spawn Company, 169 Yonge, Toronto.

$50 MONTHLY GROWING MUSHROOMS for us. Free spawn and nitrogen. We show you how. Information free. Grade A spawn only. Georgian Bay Produce, Box 515, Toronto.

WANTED IMMEDIATELY, SINGLE MAN for general farm in Oxford County, good milker, good with horses, non-smoker. State age and wages. Winter work if satisfactory. Box 102, Canadian Countryman, Toronto.

**INVENTORS**

INVENTIONS EXAMINED AND ADVICE as to the best procedure in promoting, financing, selling, manufacturing and marketing of unpatented and patented ideas. Write Redgrave-Redgrave & Co., McCormick Bldg., St. Catharines, Ontario.

**LIGHTNING RODS**

PROTECT LIFE AND PROPERTY FROM lightning. Farm property loss from lightning over the past ten years has amounted to several million dollars, while the loss on properly rodded buildings has been negligible. Don't gamble on losing your buildings and crop. Write for full information. Dominion Lightning Rod Company, Dundas, Ontario.

NO NEED TO WORRY WHEN THE NEXT electric storm comees along if your buildings are equipped with a Guaranteed Universal Lightning Rod System. Even if struck, the chances are that no damage will be done. Why take a chance on a staggering loss? Write for full particulars. Universal Lightning Rod Company, Hespeler, Ontario.

**MEDICAL**

**ARE YOU RUPTURED?**

RELIEF, COMFORT, POSITIVE SUPPORT with our advanced method. No elastic or undertraps or steel. Write Smith Manufacturing Co., Dept. 88, Preston, Ontario.

**MILKING MACHINES AND REPAIRS**

IF YOU REQUIRE REPAIRS FOR YOUR milker (any make), take advantage of our complete service and save money. New and rebuilt milkers always in stock at prices which will interest you. Universal Milker Supply, Peterborough, Ont.

**PHOTOGRAPHY**

**SEND YOUR FILMS**

SONG POEMS WANTED. SUCCESSFUL composers invite authors to submit lyrics. Write "Composer" (Box 38), c/o Rays Advt. Agency, Cecil Court, London, W.C. 2, England.

WANTED ORIGINAL POEMS, SONGS, FOR immediate consideration. Send poems to Columbian Music Publishers Ltd., Dept. C37, Toronto.

## C. M. Blyth Buys Half Interest in "Campbell's Command"

THE better a herd the more difficult becomes the problem of selecting a bull. Realizing this Mr. C. M. Blyth of Guelph, Ont., has followed the policy of always being on the lookout for a promising young herd sire, with individual merit and concentration of proven blood lines, that should ensure further progress in his Blythwood herd of Scotch Shorthorns. Thus the announcement that he has succeeded in purchasing from Mr. Grant Campbell of Moffat, Ont., a one-half interest in the imported bull calf, "Campbell's Command".

"I consider this the most promising deal I ever made in Shorthorns, for I had made up my mind that I was going to have a top son of either 'Calrossie Command' or 'Calrossie Control' at the head of my herd. And if I had gone to the Perth sale in Scotland, in February, I could not have obtained a bull whose breeding would please me any better . . . and I doubt whether my pocket-book would have stretched enough to have gotten one possessing the quality this calf is showing," said Mr. Blyth, in commenting on his purchase.

No price was mentioned, but we gathered it was a very substantial figure.

"Campbell's Command" was born on the boat coming over from Scotland, on November 17. He is a rich red roan, sired by "Calrossie Command", whose sire was "Calrossie Control" by "Collynie Royal Leader". His dam was sired by "Calrossie Scout Leader", whose sire was "Collynie Royal Leader" by "Balcairn White Eagle". "Campbell's Command" thus carries a concentration of the "Royal Leader" blood, through a son and grandson. According to Mr. Blyth, this line of breeding is the most popular in Scotland today, being sought after by the most constructive breeders overseas.

"Campbell's Command" is being fitted at Campbell Farms by Billie Black and will be shown at the Canadian National Exhibition, where breeders will have an opportunity to see this great young prospect.

## Col. Deacon Had Both Grands at Calgary

BOTH Shorthorn grand championships at the Calgary Exhibition went to the Glenburn Farms herd of Col. F. H. Deacon, Unionville, Ont. The Glenburn string won 6 championships, 4 reserve championships, 13 firsts, 4 seconds, 2 thirds, 1 fourth and 1 fifth.

Besides winning the 2-year-old class, Klaymor Royal became senior and grand champion. The junior and reserve grand went to Glenburn Declamation, first prize bull calf and reserve junior to G. Declaration, 1st prize junior yearling. G. Detonator was 2nd prize junior yearling. Col. Deacon also won first on pair of bulls.

In females, Glenburn Myrtle 6th, 1st 2-year-old heifer, was senior and grand champion female; G. Clara 6th, 1st 3-year-old cow, reserve senior and reserve grand champion. G. Butterfly 12th, 1st prize junior yearling and junior champion female, G. Myrtle 5th, fifth in 2-year-olds, G. Brawith Bud 3rd, first in senior yearling heifers, G. Rosewood 6th, third in senior yearlings, G. Mysie 6th, second in heifer calves, and G. Annette 5th, third in heifer calves.

Glenburn entries won first in graded and junior herds, 1 and 4 for pair of females, 1 and 2 on get-of-sire, and 1 and 2 on progeny of dam.

Princeton Publican, owned by John Gardhouse & Sons, of Weston, Ont., was awarded the reserve senior championship ribbon. Entries from the Duke of Windsor's E.P. ranch at High River, Alta., took several second, third and fourth prize ribbons.

## Jas. Douglas and Sons Add to Their Herd

MESSRS. JAS. DOUGLAS & SONS, Caledonia, have purchased recently all the females, a large proportion imported, from the Wychwood Farm herd, Concord, Ont. These should make an important addition to the strong Willowbank collection. The same enterprising breeders secured a capital young bull in the sale held recently at Edellyn Farms, Wilson, Ill. This promising youngster, Sultan Waverly, is by the great show bull, Sultan Browndale, and his dam is imported Collynie Lady Augusta. Thus, he carries much of the very best blood of the breed, and, with his grand head, straight lines, smoothness and sappiness, he should make good as a sire.

Douglas Hart, of Woodstock, Ont., sold two 4 per cent bulls around Dominion Day. One went to Sam. S. Roth, of Baden, Ont. The dam has 16,000 lbs. of milk as a three-year-old and has never been below 4%, having had another 4% test in early July. She will give the leader in the 305-day division a close run for fat production, as she is also bred for that division. . . . The other bull went to G. G. Callon, of Ancaster, Ont. This bull's dam has not been below 4% for two years, and is now making a nice four-year-old record.

Here is the filler that suits every silo . . . upright, pit, trench or temporary. No need to level the filler or to get the pipe straight . . . universal joint takes care of alignment. Elbows available to deliver in any direction. Handy to set . . . easy to move by hand, fits in cramped corners.

The Case silo filler-hay chopper serves every forage cutting need, including the modern molasses-silage method of storing green grasses and legumes. Its straight-down shear cut saves power and gets bigger capacity from your tractor . . . reduces knife wear and resharpening . . . cuts cleaner on ribbed shear plate. Makes the most of your man-power too . . . positive-push open-slat feeder with streamlined sides saves a man. Toothgrip feed rolls with floating drum overload control permit fast feeding without fear of clogging.

See your Case dealer today. Get one of these fast, clean-cutting, long-life fillers. Put up your silage at its prime, and at savings that soon repay for your investment and earn extra profits for years to come. Mail the coupon today.

**BE SURE TO SEE THE NEW CASE CORN BINDERS**

Before you buy any corn binder . . . or worry along another season with an old one, look at the new Case heavy-crop corn binders, both horsedrawn and power-drive tractor types. Straight stalk-way avoids clogging; precision power parts for fast work and long life. Balanced between big wheels; no tongue truck needed.

**CASE**

SEND COUPON FOR YOUR COPIES

For both silo filler book and new folder of facts about green hay silage, fill blanks below, mark machines that interest you—mail to J. I. CASE CO., Dept. G-101, Toronto, Ont.

### If Your Renewal is Due

*Readers of Canadian Countryman who have received notice that their renewal subscriptions are due, should see that their renewal orders are sent by the earliest possible mail. Be sure your subscription is paid up so that you will not miss any copies of your Countryman. Subscription rates: $1.00 per year (52 issues); $1.50 for two years (104 issues); $2.00 for three years (156 issues).*

## From the Open Kettle

(Continued from page 9)

Wash gooseberries and remove stems and blossom ends. Add water and cook until skins are soft. Add sugar and cook rapidly until thick and clear. Pour into sterilized containers and seal when cold.

*Blueberry and Apple Conserve*

4 cups blueberries
4 cups tart apples
Juice and rind of 1 lemon
6 cups sugar

Wash, quarter and core the apples and put through the food chopper. Mix all the ingredients and cook until the mixture is thick and clear. Pour into sterilized glasses and seal.

*Spiced Cherries*

One quart pitted cherries (either sour or sweet), three cupfuls granulated sugar, ½ cup good cider vinegar, one teaspoon cinnamon, ¼ teaspoon each of allspice and cloves, a small pinch of salt.

Cook all together until cherries are soft and mixture has cooked down until quite thick.

## Unions and Agriculture

(Continued from page 3)

costs that no one would buy them. Chaos could be expected from this cause alone without an even more important one.

Union theories stand on the principle that if two men are engaged in similar work they should be paid equal wages. This is a prime falsity of communism. We have all witnessed two carpenters working side by side building a table. One expertly builds a neat and serviceable table. The other cuts his material wrong, etc., and after spending twice the time turns out an ugly, rickety job that quickly falls to pieces. One would receive forty cents for the good table and the second eighty cents.

With the closed shop the lazy worker cannot be fired. In an effort to adjust such glaring injustices the government of the country would be urged to undertake the regulation of such practices by laws. We would see thousands of rules and regulations, quotas and codes, restrictions and bonuses, prohibitions, fines and punishments. And yet in spite of this bewildering regimentation, sloth and inefficiency would increase with each new regulation. With the introduction of this government control, an army of non-productive parasites feed on the labors of the workers, lowering their standard of living. The state becomes rotten with corrupt politics, one large class imposing on a smaller class by the ballot box.

When only seventy-five per cent of the workers are organized, they persecute the unorganized. A recent example of this took place in Toronto. If the farmers wish to buy steel roofing or any other manufactured goods they must pay union labor $4 a day. When milk prices advanced a cent a quart, Toronto housewives formed a boycott. This is cheating the farmer two ways.

When labor becomes organized under one unscrupulous and personally ambitious leader the logical result is that his mob overthrows democratic government and sets him up as dictator to usher in a new era. Securely established, the heel of blood soon destroys all opposition and he goes vainly on with his task of regimentation and personal agrandizonment. He brings war to add laurels to his crown and suppress dissatisfaction with his unworkable plans. The leaders of the French revolution that did not guillotine each other while in office, later met the same fate they had meted out to hundreds.

## Mac's Meanderings

(Continued from page 4)

Last year we cut about six inches off the end of a big molasses puncheon in order to make a deep tub for water in the field for the horses. We decided to use the shallow end as an extra "trough" for those pigs. It works fine except that we have to go into the pen to put the feed into it and that isn't so funny with ten perpetually hungry pigs in the pen. Bu there is always a way and so, when the door is opened to enter with the feed, the ten pigs all rush out. While they are out the first pail of feed can easily be emptied in the shallow tub. Then when they all scramble for the tub the second pail can be emptied in the trough. By that time they are sufficiently occupied that a third pail can be emptied wherever desired.

That tub is one of the finest means of illustrating pig nature. I have been told that a pig's inner organs and a person's are identically the same. The more I see pigs (and people) the more I believe that the likeness is not entirely confined to the inward parts but to the disposition as well. There are some of those pigs that think they should cover as much space in that tub as they possibly can. There would be ample room for the whole ten of them to eat out of it if they would be content to stand around in a circle and politely put their snouts in the part of the tub nearest to them. But no, they must sprawl across the tub and feed out of the far side of it. One of them has a habit of sitting on one edge like an old lady bathing her feet and with her nose dipped in at the opposite side.

When those pigs make their first grand rush for the tub the one first there gets his snout jammed against the far side of the tub, but the rush of others behind him usually keels him over on his back on the opposite side of the tub all together. So the first isn't always first, for he usually finds the tub full of pigs by the time he gets to his feet again.

On the whole they are a fairly happy crowd and as long as the meals come with a fair degree of regularity they live in blissful ignorance of the fact that the one thing they love most—to eat—is the one thing that will hurry them all the faster to the common end of well-fed pigs. "A short life and merry one" seems to most aptly describe the situation as far as they are concerned.

## On Choosing a Breed

WE heard quite an animated discussion this week between two dairymen, each of whom kept two breeds of dairy cattle. They both cater to a city milk market but their conclusions were the exact opposite. One held that a Channel Island breed was the most satisfactory and profitable. The other held that his Holsteins brought him the most returns. They quoted figures to prove their contentions which were quite interesting at least. Our opinion was that one man had a better herd of Holsteins while the other had a better herd of Jerseys.

A good cow is a good cow no matter what breed she is. There are certain conditions to which one breed is more adaptable than the other. There are certain localities which are noted for a certain breed of cattle and it is advantageous to own that breed in that locality. The markets are much wider. The opportunities for securing breeding stock of the best families are much greater. The demand for the milk products is also likely to be greater.

In a market that requires golden milk, there is no doubt but that the product of the Guernsey is most suitable. To secure a premium on butter, particularly where good pasture and high-quality roughage is available, the Jersey breed is best adapted. When feed is not so plentiful and the cows have to shift for themselves yet still produce a good quality of milk, the Scotchman's Cow, the Ayrshire, comes nearest filling the bill. To transform the feed and pasture of our rich, level lands into a marketable product for cheese, powdered milk or the city trade, there the Holstein is supreme.

Many of our grade men are going into pure-breds every year and getting their herds accredited. Some of them are changing their breeds. The breed they most desire, is the one they are most likely to be successful with, but still we think they should not forget the market for their product and the breed that their neighbors keep.

The dairyman who would breed Guernseys in a district where 85 per cent of the cattle are Ayrshires, or would keep Jerseys where a district is famous for its Holsteins, can expect to have rather a difficult row to hoe. Success is not impossible, but it is much more difficult when the neighbors are not helping out. The majority of people are seldom wrong.—D. H. H.

## Pheasant Eggs Shipped to Scotland

THE first shipment of live pheasant eggs, to be used for propagation purposes, ever sent from Canada or North America to the Old Country left Montreal recently aboard the S.S. Antonia. Shipment of the eggs reversed a practice that has existed for two hundred years, during which time Canadian and American game bird breeders have always imported eggs and birds from the Old Country.

The Canadian eggs were sent by O. A. Zuercher, well-known breeder and game conservationist of Rawdon, P.Q., to Sir William Coates Cross of Scatwell, Muir of Ord, Ross-shire, Scotland. They will be used to introduce the blood of the hardy acclimatized Northern Quebec bird into the older Scottish strain.

Comprising ninety eggs of the Ring-Necked species, a cross between the Chinese and Mongolian pheasants and the most popular species among breeders, the shipment was packed in an insulating layer of bran in which each egg will have to be turned twice daily to prevent the undeveloped germ from sticking to the top of the shell.

Acclimatizing the Ring-Necked pheasant to the rigors of the Northern Quebec climate, a feat considered impossible by most breeders a few years ago, is the work of Mr. Zuercher, who is a Canadian war veteran and pensioner. Starting four years ago, with one clutch of eggs, which he placed under hens, Mr. Zuercher has since built up and stocked one of the largest pheasantries in the Dominion. Among the birds in his run is the world's champion layer—Lady Grimm—a pullet with 149 eggs in 162 days to her credit. Not once has this Laurentian breeder lost a bird through disease or extremes in climate.

Primarily interested in wild life restoration—Mr. Zuercher has an expert's knowledge of the possible future of pheasant breeding in Canada. Without importing any birds there are enough potential breeders in Canada, he states, to produce annually 5,000,000 eggs within three years, an abundance that would permit pheasant shooting on a large scale.

"If the trial shipment of birds to England proves successful," says Mr. Zuercher, who has already sent eggs overland for distances of 2,500 and 3,000 miles, "acclimatized species of other game birds such as grouse and wild turkey, all hardier than the Old World strain, will be sent to the British Isles."

## Practical Discussions

(Continued from page 5)

Two brood sows are usually kept, and their litters fattened to 200 lbs. or over by the last of August and February of each year . . . to avoid the heavy runs later. I also have over 20 registered ewes. Some of the lambs are sold for breeding purposes, while others are marketed for slaughter.

This year we have left 5 acres of alsike, 3 acres of alfalfa and 10 acres of red clover for seed. The red clover flowered early and we began cutting it June 15, so as to give the second crop a better opportunity to grow and produce seed. I have a special mill for cleaning seed and sell most of it to neighbors at a dollar per bushel more than the seedsmen will pay.

We have 11 acres of fall wheat that is looking well, also 5 acres of Erban oats and 5 acres of Nobarb barley, which will go for seed. We have no silo and do not want one. Instead we grow some mangels, turnips and soy beans, along with mixed hay, alfalfa and some sweet clover. Besides these soil-building legumes, we make a lot of manure and sow fertilizer, which pays well, in my experience. All wet spots are tile-drained.

With favorable weather, we grow good crops, but are never crowded with work, having leisure to attend ball games and other gatherings. My system of farming may not be as profitable as some specialists', but it suits me; I manage to make a living and we are not slaves.

Durham Co. OLD TIMER.

Editor's Note—We question whether those advocating specialized farming believe that farmers should necessarily concentrate on one or two lines. Rather are they thinking of the way in which some particular line is handled . . . if we interpreted their meaning correctly. For instance, "Old Timer" caters to the local demand for clover seed. By keeping his land free of weeds and using special cleaning equipment, he is apparently producing a quality of seed that people want, and thereby securing a higher price than he could obtain for "ordinary" seed grown on land just ordinarily clean and run through an ordinary mill in the ordinary way. We would say that he specialized in seed production. And the same in hogs. Timing his farrowings so that the litters will reach market when the runs are comparatively light is, we consider, one form of specialization. In other words, specialization is largely a matter of doing a really good job. We shall be interested in learning whether or not readers agree with our definition, and whether or not they would rate "Old Timer" as a specialist. It is a subject well worth our consideration.

## Wayside Gossip

(Continued from page 4)

highway, north from Woodhill. Glancing into the mirror of our car, we could see little dust behind us . . . just a faint waft of material here and there, as our wheels rolled over spots where the gravel had not been cemented together quite well enough. In general the road had a hard, dust-proof surface.

What a change when we got by the treated section! Our mirror revealed a dense cloud of dust drifting on to somebody's property. We were glad not to be following ourselves.

On the way back, we stopped to ask a few people what they thought of the treated highway that ran past their farms.

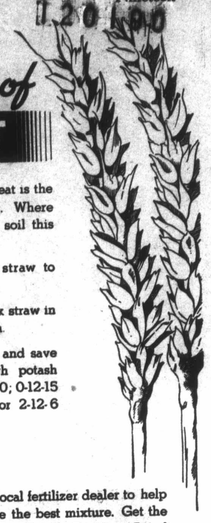
"It's a great thing," said Mr. A. W. Fleming of Mono Road. "And the road is getting better all the time. Each annual treatment improves the surface, so that it will soon be like a paved road."

According ot Mr. Alex. Wilson, on the other side of Sand Hill, the road in front of his farm was treated last year, but not this. "I considered it a fine step, as the treatment laid the dust and hardened the road."

Mr. Carberry's experience with untreated highway has been mentioned. Since clay and calcium chloride were added to the gravel in front of his farm, the dust nuisance has been eliminated. Not only can he now grow hay free of ground gravel, but he finds the road better to travel.

---

India possesses the largest number of cattle of any country in the world, but owing to adverse climatic and economic conditions, the productive value of the cattle industry is not commensurate with its size. The majority of milk cows in India are seriously underfed.



## The Song of the Lazy Farmer

MIRANDY'S all excited, she has put a brand-new shirt on me, and made me wash behind my ears, because this ev'ning, it appears the preacher's comin' out to call. You'd think the heavens sure would fall the way she's scrubbed and cleaned the place, till you can almost see your face the way it shines so spick and span; that preacher must be quite a man to call for all this splurge and fuss when he comes out to dine with us. There's two fat chickens in the pot, when he has et, as like as not, his mind won't be on higher things, but on his stomach-ache, by jings.

At any rate, I allus feel, salvation after a full meal is easier on mortal man, I'll try to stand it if I can. But when that minister begins to lecture me about my sins and name the things I shouldn't do, I know I'll feel when he is thru that I have led a wicked life, and if it wasn't for my wife my future would be black indeed. My virtues all have gone to seed, I'm lucky to be out of jail, on Sunday morning oft I fail to show up at the preachin' place, that's why I lack so much in grace. I try to treat my neighbors right, but often stay too late at night at Deacon Jones's harness store a-swappin' yarns, so more and more Mirandy's give up hope for me, she thinks I'm wicked as can be. Yet when I climb the golden stair and meet St. Peter waitin' there, perhaps he'll say, "How do you do, old feller, I like fishin' too".

## Forestall a sit-down strike of WINTER WHEAT

ONE of the hazards of growing winter wheat is the lodging of the crop due to weak straw. Where there is plenty of available potash in the soil this danger is greatly reduced.

Heavy heads of grain require strong straw to support them.

Low yields, poorly filled kernels and weak straw in winter wheat all point to potash starvation.

You can produce more profitable crops and save labor and trouble by choosing a high potash fertilizer for winter wheat, such as 0-12-10, 0-12-15 or 2-12-10. On very heavy land 0-12-6 or 2-12-6 may be used.

More Potash means More Profit

Ask your local fertilizer dealer to help you choose the best mixture. Get the report of the Ontario Fertilizer Board from your Agricultural Representative.

## From the Open Kettle

(Continued from page 9)

Wash gooseberries and remove stems and blossom ends. Add water and cook until skins are soft. Add sugar and cook rapidly until thick and clear. Pour into sterilized containers and seal when cold.

*Blueberry and Apple Conserve*

4 cups blueberries
4 cups tart apples
Juice and rind of 1 lemon
6 cups sugar

Wash, quarter and core the apples and put through the food chopper. Mix all the ingredients and cook until the mixture is thick and clear. Pour into sterilized glasses and seal.

*Spiced Cherries*

One quart pitted cherries (either sour or sweet), three cupfuls granulated sugar, ½ cup good cider vinegar, one teaspoon cinnamon, ¼ teaspoon each of allspice and cloves, a small pinch of salt.

Cook all together until cherries are soft and mixture has cooked down until quite thick.

## Unions and Agriculture

(Continued from page 3)

costs that no one would buy them. Chaos could be expected from this cause alone without an even more important one.

Union theories stand on the principle that if two men are engaged in similar work they should be paid equal wages. This is a prime falsity of communism. We have all witnessed two carpenters working side by side building a table. One expertly builds a neat and serviceable table. The other cuts his material wrong, etc., and after spending twice the time turns out an ugly, rickety job that quickly falls to pieces. One would receive forty cents for the good table and the second eighty cents.

With the closed shop the lazy worker cannot be fired. In an effort to adjust such glaring injustices the government of the country would be urged to undertake the regulation of such practices by laws. We would see thousands of rules and regulations, quotas and codes, restrictions and bonuses, prohibitions, fines and punishments. And yet in spite of this bewildering regimentation, sloth and inefficiency would increase with each new regulation. With the introduction of this government control, an army of non-productive parasites feed on the labors of the workers, lowering their standard of living. The state becomes rotten with corrupt politics, one large class imposing on a smaller class by the ballot box.

When only seventy-five per cent of the workers are organized, they persecute the unorganized. A recent example of this took place in Toronto. If the farmers wish to buy steel roofing or any other manufactured goods they must pay union labor $4 a day. When milk prices advanced a cent a quart, Toronto housewives formed a boycott. This is cheating the farmer two ways.

When labor becomes organized under one unscrupulous and personally ambitious leader the logical result is that his mob overthrows democratic government and sets him up as dictator to usher in a new era. Securely established, the heel of blood soon destroys all opposition and he goes vainly on with his task of regimentation and personal agrandizonment. He brings war to add laurels to his crown and suppress dissatisfaction with his unworkable plans. The leaders of the French revolution that did not guillotine each other while in office, later met the same fate they had meted out to hundreds.

## Mac's Meanderings

(Continued from page 4)

Last year we cut about six inches off the end of a big molasses puncheon in order to make a deep tub for water in the field for the horses. We decided to use the shallow end as an extra "trough" for those pigs. It works fine except that we have to go into the pen to put the feed into it and that isn't so funny with ten perpetually hungry pigs in the pen. Bu there is always a way and so, when the door is opened to enter with the feed, the ten pigs all rush out. While they are out the first pail of feed can easily be emptied in the shallow tub. Then when they all scramble for the tub the second pail can be emptied in the trough. By that time they are sufficiently occupied that a third pail can be emptied wherever desired.

That tub is one of the finest means of illustrating pig nature. I have been told that a pig's inner organs and a person's are identically the same. The more I see pigs (and people) the more I believe that the likeness is not entirely confined to the inward parts but to the disposition as well. There are some of those pigs that think they should cover as much space in that tub as they possibly can. There would be ample room for the whole ten of them to eat out of it if they would be content to stand around in a circle and politely put their snouts in the part of the tub nearest to them. But no, they must sprawl across the tub and feed out of the far side of it. One of them has a habit of sitting on one edge like an old lady bathing her feet and with her nose dipped in at the opposite side.

When those pigs make their first grand rush for the tub the one first there gets his snout jammed against the far side of the tub, but the rush of others behind him usually keels him over on his back on the opposite side of the tub all together. So the first isn't always first, for he usually finds the tub full of pigs by the time he gets to his feet again.

On the whole they are a fairly happy crowd and as long as the meals come with a fair degree of regularity they live in blissful ignorance of the fact that the one thing they love most—to eat—is the one thing that will hurry them all the faster to the common end of well-fed pigs. "A short life and merry one" seems to most aptly describe the situation as far as they are concerned.

## On Choosing a Breed

WE heard quite an animated discussion this week between two dairymen, each of whom kept two breeds of dairy cattle. They both cater to a city milk market but their conclusions were the exact opposite. One held that a Channel Island breed was the most satisfactory and profitable. The other held that his Holsteins brought him the most returns. They quoted figures to prove their contentions which were quite interesting at least. Our opinion was that one man had a better herd of Holsteins while the other had a better herd of Jerseys.

A good cow is a good cow no matter what breed she is. There are certain conditions to which one breed is more adaptable than the other. There are certain localities which are noted for a certain breed of cattle and it is advantageous to own that breed in that locality. The markets are much wider. The opportunities for securing breeding stock of the best families are much greater. The demand for the milk products is also likely to be greater.

In a market that requires golden milk, there is no doubt but that the product of the Guernsey is most suitable. To secure a premium on butter, particularly where good pasture and high-quality roughage is available, the Jersey breed is best adapted. When feed is not so plentiful and the cows have to shift for themselves yet still produce a good quality of milk, the Scotchman's Cow, the Ayrshire, comes nearest filling the bill. To transform the feed and pasture of our rich, level lands into a marketable product for cheese, powdered milk or the city trade, there the Holstein is supreme.

Many of our grade men are going into pure-breds every year and getting their herds accredited. Some of them are changing their breeds. The breed they most desire, is the one they are most likely to be successful with, but still we think they should not forget the market for their product and the breed that their neighbors keep.

The dairyman who would breed Guernseys in a district where 85 per cent of the cattle are Ayrshires, or would keep Jerseys where a district is famous for its Holsteins, can expect to have rather a difficult row to hoe. Success is not impossible, but it is much more difficult when the neighbors are not helping out. The majority of people are seldom wrong.—D. H. H.

## Pheasant Eggs Shipped to Scotland

THE first shipment of live pheasant eggs, to be used for propagation purposes, ever sent from Canada or North America to the Old Country left Montreal recently aboard the S.S. Antonia. Shipment of the eggs reversed a practice that has existed for two hundred years, during which time Canadian and American game bird breeders have always imported eggs and birds from the Old Country.

The Canadian eggs were sent by O. A. Zuercher, well-known breeder and game conservationist of Rawdon, P.Q., to Sir William Coates Cross of Scatwell, Muir of Ord, Ross-shire, Scotland. They will be used to introduce the blood of the hardy acclimatized Northern Quebec bird into the older Scottish strain.

Comprising ninety eggs of the Ring-Necked species, a cross between the Chinese and Mongolian pheasants and the most popular species among breeders, the shipment was packed in an insulating layer of bran in which each egg will have to be turned twice daily to prevent the undeveloped germ from sticking to the top of the shell.

Acclimatizing the Ring-Necked pheasant to the rigors of the Northern Quebec climate, a feat considered impossible by most breeders a few years ago, is the work of Mr. Zuercher, who is a Canadian war veteran and pensioner. Starting four years ago, with one clutch of eggs, which he placed under hens, Mr. Zuercher has since built up and stocked one of the largest pheasantries in the Dominion. Among the birds in his run is the world's champion layer—Lady Grimm—a pullet with 149 eggs in 162 days to her credit. Not once has this Laurentian breeder lost a bird through disease or extremes in climate.

Primarily interested in wild life restoration—Mr. Zuercher has an expert's knowledge of the possible future of pheasant breeding in Canada. Without importing any birds there are enough potential breeders in Canada, he states, to produce annually 5,000,000 eggs within three years, an abundance that would permit pheasant shooting on a large scale.

"If the trial shipment of birds to England proves successful," says Mr. Zuercher, who has already sent eggs overland for distances of 2,500 and 3,000 miles, "acclimatized species of other game birds such as grouse and wild turkey, all hardier than the Old World strain, will be sent to the British Isles."

## Practical Discussions

(Continued from page 5)

Two brood sows are usually kept, and their litters fattened to 200 lbs. or over by the last of August and February of each year . . . to avoid the heavy runs later. I also have over 20 registered ewes. Some of the lambs are sold for breeding purposes, while others are marketed for slaughter.

This year we have left 5 acres of alsike, 3 acres of alfalfa and 10 acres of red clover for seed. The red clover flowered early and we began cutting it June 15, so as to give the second crop a better opportunity to grow and produce seed. I have a special mill for cleaning seed and sell most of it to neighbors at a dollar per bushel more than the seedsmen will pay.

We have 11 acres of fall wheat that is looking well, also 5 acres of Erban oats and 5 acres of Nobarb barley, which will go for seed. We have no silo and do not want one. Instead we grow some mangels, turnips and soy beans, along with mixed hay, alfalfa and some sweet clover. Besides these soil-building legumes, we make a lot of manure and sow fertilizer, which pays well, in my experience. All wet spots are tile-drained.

With favorable weather, we grow good crops, but are never crowded with work, having leisure to attend ball games and other gatherings. My system of farming may not be as profitable as some specialists', but it suits me; I manage to make a living and we are not slaves.

Durham Co. OLD TIMER.

Editor's Note—We question whether those advocating specialized farming believe that farmers should necessarily concentrate on one or two lines. Rather are they thinking of the way in which some particular line is handled . . . if we interpreted their meaning correctly. For instance, "Old Timer" caters to the local demand for clover seed. By keeping his land free of weeds and using special cleaning equipment, he is apparently producing a quality of seed that people want, and thereby securing a higher price than he could obtain for "ordinary" seed grown on land just ordinarily clean and run through an ordinary mill in the ordinary way. We would say that he specialized in seed production. And the same in hogs. Timing his farrowings so that the litters will reach market when the runs are comparatively light is, we consider, one form of specialization. In other words, specialization is largely a matter of doing a really good job. We shall be interested in learning whether or not readers agree with our definition, and whether or not they would rate "Old Timer" as a specialist. It is a subject well worth our consideration.

## Wayside Gossip

(Continued from page 4)

highway, north from Woodhill. Glancing into the mirror of our car, we could see little dust behind us . . . just a faint waft of material here and there, as our wheels rolled over spots where the gravel had not been cemented together quite well enough. In general the road had a hard, dust-proof surface.

What a change when we got by the treated section! Our mirror revealed a dense cloud of dust drifting on to somebody's property. We were glad not to be following ourselves.

On the way back, we stopped to ask a few people what they thought of the treated highway that ran past their farms.

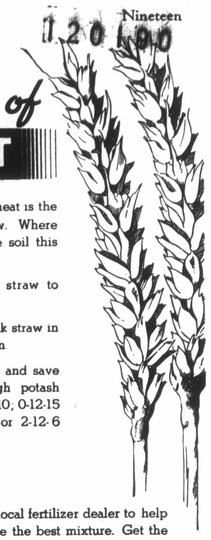
"It's a great thing," said Mr. A. W. Fleming of Mono Road. "And the road is getting better all the time. Each annual treatment improves the surface, so that it will soon be like a paved road."

According ot Mr. Alex. Wilson, on the other side of Sand Hill, the road in front of his farm was treated, last year, but not this. "I considered it a fine step, as the treatment laid the dust and hardened the road."

Mr. Carberry's experience with untreated highway has been mentioned. Since clay and calcium chloride were added to the gravel in front of his farm, the dust nuisance has been eliminated. Not only can he now grow hay free of ground gravel, but he finds the road better to travel.

---

India possesses the largest number of cattle of any country in the world, but owing to adverse climatic and economic conditions, the productive value of the cattle industry is not commensurate with its size. The majority of milk cows in India are seriously underfed.



## The Song of the Lazy Farmer

MIRANDY'S all excited, she has put a brand-new shirt on me, and made me wash behind my ears, because this ev'ning, it appears the preacher's comin' out to call. You'd think the heavens sure would fall the way she's scrubbed and cleaned the place, till you can almost see your face the way it shines so spick and span; that preacher must be quite a man to call for all this splurge and fuss when he comes out to dine with us. There's two fat chickens in the pot, when he has et, as like as not, his mind won't be on higher things, but on his stomach-ache, by jings.

At any rate, I allus feel, salvation after a full meal is easier on mortal man, I'll try to stand it if I can. But when that minister begins to lecture me about my sins and name the things I shouldn't do, I know I'll feel when he is thru that I have led a wicked life, and if it wasn't for my wife my future would be black indeed. My virtues all have gone to seed, I'm lucky to be out of jail, on Sunday morning oft I fail to show up at the preachin' place, that's why I lack so much in grace. I try to treat my neighbors right, but often stay too late at night at Deacon Jones's harness store a-swappin' yarns, so more and more Mirandy's give up hope for me, she thinks I'm wicked as can be. Yet when I climb the golden stair and meet St. Peter waitin' there, perhaps he'll say, "How do you do, old feller, I like fishin' too".

## Forestall a sit-down strike of WINTER WHEAT

ONE of the hazards of growing winter wheat is the lodging of the crop due to weak straw. Where there is plenty of available potash in the soil this danger is greatly reduced.

Heavy heads of grain require strong straw to support them.

Low yields, poorly filled kernels and weak straw in winter wheat all point to potash starvation.

You can produce more profitable crops and save labor and trouble by choosing a high potash fertilizer for winter wheat, such as 0-12-10, 0-12-15 or 2-12-10. On very heavy land 0-12-6 or 2-12-6 may be used.

More Potash means More Profit

Ask your local fertilizer dealer to help you choose the best mixture. Get the report of the Ontario Fertilizer Board from your Agricultural Representative.

## For POULTRY PROFITS:

## Feed Your Loafers To Your Layers!

EGG market prospects are full of promise . . . *for the man with eggs to sell.*

Here's an easy way to make sure that you *have* eggs to sell:

Every flock of yearlings has some non-layers . . . loafers that have quit work for the season. They're no asset—as long as they stay in the flock. But they *can* be an asset, if you swap them for good feed to keep the layers laying.

Cull them out. "Cash" them. Turn them into Purina laying mash. Use it to keep your workers working, right through the top-price season.

There are 3 Purina laying feeds . . . Layena, and Lay Chow, and Family Flock Chow. Ask your dealer which one best fits your circumstances.

**IT'S EASY**

**There's nothing difficult or mysterious about culling out non-layers. Just look at the vent. If it's moist, loose and open, she's laying. If it's dry, tight and puckered, she's loafing. If you have the least doubt about how to do it, many Purina dealers are offering to help cull flocks . . . ask your dealer.**

## And for Dairy Dollars:

HOW is your milk flow holding up? What with heat, and flies, and tough, short grass, most herds are sagging badly.

That means that the cheques will be sagging badly, too . . . not just for the present, but for months to come. Because once a cow falls off in her milk, it's mighty hard to bring her back again.

Yet some herds are holding up . . . herds whose owners really realize what their cows are up against, in Summer, and feed them a Purina milking ration (Milk Chow, or 24% Cow Chow-and-chop) plus Purina Bulky-las if they are short of green feed.

Milk Chow, and Cow Chow-and-chop, are real milk-makers. Bulky-las is a real body-builder . . . bulky, palatable, and succulent, taking the place of the dried-up pasture grasses. They're both high in minerals. And they're very attractively priced.

These two feeds together really "do the job"—keeping up the milk flow and the milk cheques, and keeping up the cow. Better speak to your dealer about a supply, today.

**E. E. Bonter & Son, Albury, Ont., are feeding Milk Chow to their good Holstein herd, on pasture. They know it will keep up their milk cheques.**

## Turning Leaves

By Wallace Havelock Robb

THIS Autumn, instead of musing upon blowing leaves and shifting winds and dark and scudding clouds, I had long planned to talk a bit about "Leaf Mould". That was to be one of my special Fall essays—leaf mould. I had meant to delve a little into the poetry of "The Moon of Falling Leaves". I had meant to draw on all my years of harvests and Indian Summers and whirling leaves and whining Blue-Jays and leaves all bunched in a wind-swept corner, and leaves lying flat in the rain, and leaves smouldering in a pile where someone had made a bonfire and the trash of beauty's departed glory wouldn't burn readily, for very spite, let us say, or would it burn? Well, if it did, I can picture those dense clouds of rolling, yellowish-white smoke. I recall the piles and piles of leaves from the soft maples on the dirt-road streets of Belleville, Ontario, when I was a boy. Bonfires all over the place! Sometimes, after school, on a day of no wind, the air would be filled with haze—and a sweet aroma.

Those were the days of muddy streets and springy, plank crossings. One had to know his crossings personally in those days, because, after rain, well, there might be a puddle under the crossing, which causeway through a sea of mud consisted of two or three planks laid lengthwise. So, you see, if the crossing had a muddy hollow under it, and the plank ends went down suddenly, f-f-f-t! up, through the cracks, shot a stream of mud and water! But those times are past, and the streets are paved—and Mayor Bone of Belleville says that the property owners are the people who are paying for it all—and they're the people who know it! But I was a lad in those old days, and the old, dirt roads with grass along the borders seemed pretty nice to me in Autumn, with an endless sea of leaves for a few days, then long piles of leaves, many of them burning at once.

Even in those old days of burning leaves there existed the few, the odd gardener, who didn't burn a leaf, but made huge, not to say vast, piles of leaves in some corner, that they might rot there and turn to leaf mould. But there were plenty of horses, causing readily available and cheap fertilizer, so, nobody cared how much potential leaf mould was turned into smoke.

And, so, I meant to write about leaf mould, but there is a mean wind blowing, blowing up a three-day rain, and, knowing me to be a man of moods, maybe you'll excuse me when I change the subject to "Turning Leaves". I must write as I feel, and I'm not very sure how I feel this morning. Yesterday was Sunday, and the usual peace was upset by intermittent doses of radio searching to hear the latest news about that madman in Germany, Hitler, and possible war. And who can write about leaf mould and peace when there is war in the air? And who can write about anything but war, when war is in the air? And even when one says to himself, "Who am I to plead with fate over a war? How can I and hours of worry or prayer have much effect? I'll try and dismiss it from my mind," one can say it over and over, but one cannot dismiss from thought a possible war when war is in the air.

And, so, the leaves are turning on the trees as I write. I'll maybe write of turning leaves, but, methinks the turning leaves will be merely a poetical way of saying that the whole world is in a state of turning leaves. We are reorganizing Abbey Dawn Grange, so the leaves are turning for us, this Autumn, with a little upheaval all our own. I try to think of how we are improving everything, turning over a new leaf, as it were, when the leaves are turning, but, confound that idiot in Germany—the leaves are turning over there, too, and what of it?

# Unions and Agriculture

## Officer of Brotherhood of Railway Carmen of America Criticizes Hector O. Payne's Article — Mr. Payne's Reply

Editor, Canadian Countryman:—

Referring to an article by Mr. H. O. Payne in the July 23, 1938, issue of the "Canadian Countryman" claiming that labor unions and labor leaders are in effect "big bad wolves", are a curse to farmers and the country, etc., etc., I want to point out that this is just a lot of foolish, misleading propaganda being used to create friction and ill-feeling between the wealth producers on the land and the wealth producers in industry. Mr. Payne is just playing the same old game of "Divide and Conquer"—keep the producers divided and fighting amongst themselves so that the financial manipulators and money changers can continue getting away with the spoils, exploiting both farmers and industrial workers. If Mr. Payne's long working hours and starvation wage ideas are sound, then China should have the highest standard of living and be the most prosperous country in the world. The facts are that reducing the standard of living of industrial workers will certainly not benefit farmers but will just have the opposite effect. The only solution for the farmers' difficulties is a greatly increased standard of living for all by balancing the productive powers of the people, demanding that the producers get a fair share of the wealth they produce and increasing their purchasing power so that consumption of wealth by the masses will balance their producing ability. There is no justification for poverty amidst plenty. Human rights should have precedence over private profits or the "wages of money".

Unfortunately for the industrial workers and for Canada, only about 25 per cent of workers in industry are organized. There is very little, if any, organizations of workers in the industries which directly affect the farmers, such as farm machinery manufacturing, meat processing, vegetable canning, etc. The workers in these industries are generally exploited as much, or worse, than the farmers. If the workers in all industries were organized into responsible labor unions and securing a decent Canadian standard of living, with security of employment, the farmers and the country as a whole would be benefited and life made more worth while.

Wages of workers in most all industries are only a fraction of the total cost to the consumers. If the farmer could purchase his farm machinery, household effects, motor cars, shoes, clothing, etc., from the manufacturer at cost, the purchases could be made at about one-half the present prices. In most industries wages are less than 30 per cent of the cost to the consumer. Suppose, for example, that wage slaves in industry agreed to cut their present wages in half, and suppose all this saving was passed along to the consumer (which is very doubtful), retail prices would come down 15 per cent or less. Industrial workers' purchasing power would be cut 50 per cent, the 15 per cent cut in retail prices would still leave them a net loss in purchasing power of 35 per cent. Would this cut in purchasing power of the industrial workers benefit the farmer? It would simply reduce his home market to that extent—Mr. Payne cannot fool all the people all the time.

Regarding labor costs, increased efficiency and productivity of industrial labor. Let us look at this situation in the much abused railway industry. Taking 1920 as an example when farmers and most people were fairly prosperous. The efficiency and productivity of railway labor has increased more than 32 per cent since 1920—two railway employees are now handling more ton miles of revenue freight and giving more railway service than three did in 1920. Over 70 per cent of railway employees, including railway officials, receive less than $125.00 per month. Surely even Mr. Payne would not care to see respectable Canadian citizens trying to raise families and exist in cities, paying property taxes in most cases even higher than is paid on most farms, doing such responsible work as is needed today on railways and the great bulk of them exist on less than $125.00 per month.

With all due respect to Mr. Payne, his knowledge of labor conditions on railways seem to be just as incorrect as his other statements affecting industrial workers. The "closed shop" does not exist on the railways. Membership in the unions is voluntary, railway employees join and remain in the unions of their own free will and accord. The unions are democratic 100 per cent. However, railway employees are sufficiently intelligent to know that it is in their interests to belong to responsible labor unions. Railway unions have not just developed in recent years, they had been functioning in a constructive and democratic way for more than fifty years. Mr. Payne is also wrong with regards the unions preventing staff reductions, when there is not sufficient traffic to justify running a train, the train crew get no pay. Immediately there is not sufficient business to justify retaining workers in other branches of railway service they are automatically laid off. The proof of the pudding is in the eating thereof, approximately one-third of railway employees are now laid off. Responsible labor unions are a constructive force functioning in the interests of wealth producers. Recently the Premier of Canada thanked a large delegation of representatives of labor unions for their active co-operation with the Government in dealing with industrial conditions in Canada during the trying years of depression. Union officers and members compare very favorably with any other class of citizens.

**IN our issue of July 23 we published an article by Mr. Hector O. Payne of Billings Bridge, Ont., headed "Unions and Agriculture". We thought it a very fine article. It dealt with the economic position of agriculture and pointed out that the high wage rates which are being demanded by organized labor reduces the purchasing power of farmers and results in unemployment. In our opinion it was one of the best articles we have ever published. Mr. J. Corbett, General Chairman of the Brotherhood Railway Carmen of America, thinks otherwise. In fact he does not agree with Mr. Payne's views at all. We are publishing Mr. Corbett's letter on this page and Mr. Payne's reply to it.**

However, we can agree with one of Mr. Payne's statements with regards the wealth producers supplying the needs of Canada, including vast supplies of food and war munitions during the Great War when nearly a half million of Canada's best citizens were taken out of productive and placed in destructive duties (War). Organized labor claims that with all the technological improvements in machinery, etc., during the past twenty years, farmers and industrial workers can now provide a much higher standard of living for all by working only a reasonable number of hours. Work, not money, creates all wealth. If workers can produce for war they can produce for peace, with the workers getting the benefit.

Farmers should not take too seriously Mr. Payne's statements regarding alleged short working hours in industry. In all too many industries the hours worked are far too long. Organized labor favors a reduction in working hours so that all may have an opportunity of useful employment with an adequate standard of living. However, even with an eight-hour work day the city worker on the average takes at least three-quarters of an hour morning and evening to get to and from work, this with an hour for lunch takes him away from home 10½ hours per day. The average industrial worker takes some pride in his home, spending considerable time keeping his lawns, garden, flowers, etc., in good condition. Then there are always odd jobs to do to keep the home in good repair. After taking all these conditions into consideration, realizing that if the industrial worker is off work for sickness, weather, break down in machinery, unemployment, etc., he gets no pay, he has no security. Short hours and supposed "high" wages are not what Mr. Payne would have the farmers believe.

Propaganda used to stir up strife between farmers and industrial workers is the same kind of poison that is used to create bitterness and war between nations. Fortunately increasing numbers of farmers are thinking for themselves. They realize that wealth producers on the land and in industry are all in the same boat, are all being exploited by the same manipulators. The sooner farmers and industrial workers get together as friends working for a common cause—justice and a square deal for all—take control away from the exploiters by peaceful and democratic methods, the better it will be for all concerned.—J. Corbett, General Chairman, Brotherhood Railway Carmen of America.

*Mr. Payne's Reply*

I have read Mr. Corbett's article with a great deal of interest. My conclusion that some labor unions are a curse not only to the country at large but especially to its own members is also the firm conviction of those most qualified to know, namely, 85 per cent of the former members of unions in the American steel mills, who have not paid their dues. These men know that some unions are a racket, fostered by men with a gift of the gab and an aversion for work, men who haven't the slightest idea why the wheels go around, men whose only qualification for leadership is the fact they can bludgeon the middleman (the capitalist) into attempting to collect higher wages from the consumer. Of course it is very convenient for labor leaders to forget the untold millions of dollars that their members lost during last summer's strikes as a direct result of their leader's actions. An unsatisfied demand of today for either goods or services is not filled tomorrow. If a man goes hungry or ragged for a time he does not, when he is financially able, eat twice as much or wear two shirts. Those six weeks of strike wages are gone, gone forever.

My game is not Divide and Conquer, but Supply and Demand, a law which controls human

# ANOTHER SUCCESSFUL WESTERN FAIR

DIRECTORS of the seventy-one-year-old Western Fair looked cheerful as we took our leave on Thursday of last week, following the conclusion of the live stock judging. And they had more than one reason. Since the weather hazard makes finances an ever-present problem for fair boards, the men behind the big exhibition at London, Ont., had cause to feel pleased about the rate at which the turnstiles were clicking during the fore part of the week. With the weather favorable, and no epidemic to keep away the children, attendance figures marked up daily gains over 1937, and more people turned out on Wednesday, Farmers' Day, than in either of the past two years.

Directors' second reason for satisfaction was the fine display of live stock. The showing of heavy horses was the best for some time, with the heavy draught teams again an attractive feature. In beef cattle the Hereford entry proved relatively strong While Shorthorn and Aberdeen-Angus numbers registered a drop, splendid representatives of these breeds were out. The dairy cattle were all up to average, Holsteins again being out in strength, Ayrshires showing an increase and Jersey breeders contributing a very fair exhibit. There was a fine swine show, while the sheep men rather excelled themselvs, having more than 500 entries. The display of fruit, grain and vegetables was considerably better than usual, with the entry big and quality good.

The Confederation and Manufacturers' Buildings were reasonably well filled. Educational exhibits arranged by different departments of the University of Western Ontario attracted a great deal of attention, as did the exhibits of Byron Sanitarium and the Experimental Farms. The Junior section was rated as the best ever.

**Clydesdales**

Judge—W. F. Batty.

Awards—Brood mare with foal by her side: 1, Valley Crest Farms Ltd., Oakville, on East Kirkland Blossom; 2, J. E. Falconer, Petrolia, on Marry Maid; 3, James G. Calder, Thamesford, on Flossie Dale; 4, A. Archibald, St. Thomas, on Dunmore Betty.

Foal of 1938: 1, Falconer; 2, Valley Crest Farms, on Valley Crest Trademark; 3, Calder, on Rock; 4, Archibald, on Dunmore Betty's Foal.

Filly, 1 year old: 1, Valley Crest Farms, on Toors Ophelia; 2, Wm. J. Dale, Clinton, on Pleasant View Lady.

Filly, 2 years old: 1, Valley Crest Farms, on Torrs Scottish Queen; 2, Archie D. MacFarlane, Camlachie, on Peggy Footman; 3, Vernon Morley, Norwich, on Molly Baron; 4, R. J. Scott, Cromarty, on Cresent Jean; 5, Falconer, on Maids Charm.

Filly, 3 years old: 1, McFarlane, on Jennie Footman; 2, Falconer, on Ruby Entrance; 3, Hon. M. F. Hepburn, St. Thomas, on Bessie of Kinnaird; 4, Duncan Johnson, Crinnan, on Augustine Footman; 5, John Hogg, Thamesford, on Polly Dundee.

Stallion, 1 year old: 1, Nelson Wagg, Claremont, on Torr's Research; 2 and 4, Falconer, on Silver Stamp and Coronation; 3, Brandon Bros., Forest, on Forest Realisation; 5, T. J. McMichael, Seaforth, on Donald Moncur.

Stallion, 2 years old: 1, Wagg, on Torr's Consul; 2, Valley Crest Farms, on Torrs Premier; 3 and 4, Falconer, on The Brave Scot and The President; 5, McMichael, on Flowerprint Supreme.

Stallion, 3 years old: 1, Wagg, on Torr's Regent; 2, Brandon, on Majestic Footman; 3, Calder, on Entrance Supreme 3rd.

Stallion, 4 years old and upwards: 7, John C. Henderson, London, on Arnieve.

Get of sire: 1, Brandon Bros.; 2, R. J. Scott; 3 and 4, J. E. Falconer; 5, Wm. J. Dale.

Progeny of dam: 1, Brandon; 2 and 3, Falconer; 4, Dale; 5, Hogg.

Stallion, any age: Nelson Wagg, on Torrs Transformer.

Mare, any age: Valley Crest Farm, on Torr's Scottish Queen.

Mare, Canadian-bred, any age: 1 and 5, Falconer, on Merry Maid and Winsome Lass; 2 and 3, McFarlane, on Jennie Footman and Peggy Footman; 4, Morley, on Molly Baron.

Grand Championship Ribbon for best Clydesdale stallion: Nelson Wagg, on Torrs Transformer.

Grand Championship Ribbon for best Clydesdale Female: Valley Crest Farm, on Torr's Scottish Queen.

**Percherons**

Judge—Dr. J. Hassard.

Awards—Brood mare, with foal by side: 1 and 2, Thos. F. Hardy, Melbourne, Ont., on Roxanna Lady and Minnie B.; 3, Haas Bros., Paris, on Fairview Monarch Beauty.

Foal of 1938: 1, Haas, on Koncarness Belle; 2 and 3, Hardy, on Irevotation and Mac Laet.

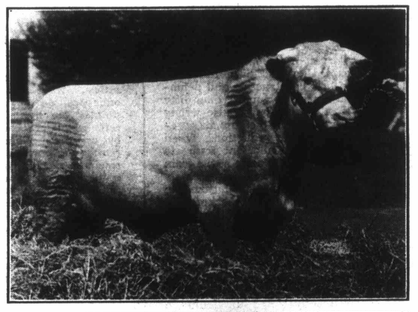
Filly, 1 year old: 1, Hardy, on Queen; 2, R. S. O'Neil, London, on Silver Lady.

Filly, 2 years: 1, Haas, on Babe Laet; 2, Hon. M. F. Hepburn, St. Thomas, on Lady Belle.

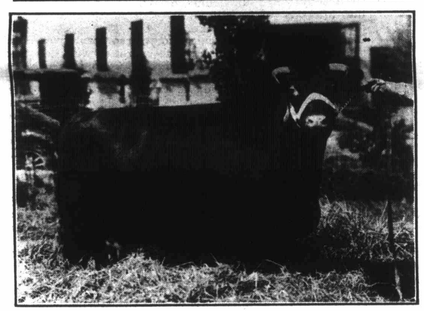
Mare, 3 years: 1, Hardy, on Crystal; 2, Hepburn, on Dean's Gem.

Stallion, 1 year: 1, Ray Lupton, Embro, on Coronation College Monarch; 2, Archie Pedden, Strathroy, on Don Bisique; 3 and 5, Hardy, on Prince and Marquis 2nd; 4, O'Neil, on Lincoln.

Stallion, 2 years: 1, Dan Goodbrand, Paris, on Laet's Emblem; 2, Dawes Brewery, Montreal, Que., on Mel Laet; 3 Pine Ridge Stables, London, on Orpheus.



Stallion, 3 years: 1, Pedden, on Dixey Degas; 2 and 3, Dawes Brewery, on Laeteur and Woodsire Superior.



Stallion, aged: 1, Dawes Brewery, on Mel Laet 3rd; 2, Haas, on Refiner.

Get of sire, 3 animals: 1, Hardy. Progeny of dam, 2 animals: 1, Dawes Brewery; 2 and 3, Hardy.

Best Stallion: Archie Pedden, on Dixey Degas.

Best Mare: Thos. Hardy, on Roxanna Lady.

# Practical Discussions by Practical Farmers

## Feeding Western Lambs

I NOTICED in the Countryman where a reader was asking about making profits on lambs. In the late fall I have a bunch of lambs shipped to me from the West. They are small and don't cost much money. As soon as I get them I put them in a pen adjoining the barn.

It is important to supply grain at the start, but if lambs are allowed too much corn at the beginning they may gorge themselves. I eliminated this by getting a hammer mill and running all feed properly balanced through it.

I used to put the corn in troughs and the hay in racks and let the lambs help themselves, but this did not work well. Some would eat nothing but hay and many would eat too much corn, and so many died.

But since buying the hammer mill the lambs get the feed they need, not the feed they like.

Grinding makes the feed more palatable and encourages the lambs to eat more. Ground feed is also more quickly, more easily and more completely digested, and the grinding saves feed. Waste takes the profit out of lamb-feeding.

I am sending a picture of a feeding rack for lambs which saves half the waste formerly experienced. The 2 x 6 posts are first set on top of the ground, about 2 feet, 6 inches apart one way and 6 feet the other. A 12-inch board is nailed on the outside at the bottom of these posts all the way around. About 10 inches above this, other boards are nailed all the way around but on the inside of the posts. With this type of rack the lambs reach down for the roughage instead of up, so none is wasted.

The rack should not be more than 2½ feet wide so the lambs can reach to the centre from each side. I make my racks 18 feet long with posts set on the ground so they can be moved to one side when cleaning the pen. I have plenty of these racks and I never allow them to become empty because it requires less feed to fatten a lamb when it is self-fed. A lamb fed well one day and neglected the next will not put on weight, but often loses weight.

Always keep a supply of clean fresh water and salt in front of them. For mineral mixture I use 1 part ground limestone mixed with 2 parts salt. Limestone is not only a builder of bone but prevents the lambs from getting too much salt at the start and so keeps them from going off feed. When these lambs become fat they command a good price.

Middlesex Co. J. D. L.

## Offensive Odor in Cistern

I READ with great interest your "Discussions" from week to week and wondered if I, too, might get some help with a problem that seems quite important to me. Our soft-water cistern—a large cement one—has developed a very disagreeable odor, making the water almost unfit to use. I have heard a number of others complain of the same trouble, but have not heard of any real remedy. We cleaned ours thoroughly last year but it was not long till it was as bad as ever. If any one knows of any remedy would they please let us have it?

Grey Co. GREY BIRD.

## Advises Resting Land and Green Manuring

IN your valuable paper we have been reading considerable about nematode damage. With many farmers, I am sure, it will serve as an excuse for the results of poor management.

It is quite possible that there is need for looking out for the pest, but as for being a plague, I don't believe in it. For decades now we have been taking more away from our soil than we have returned to it. How can we expect the soil to remain as fertile as it was?

It is impossible for any farmer with 100 acres to rest 20 of them each year, but until we start a program such as this we are going to keep ourselves poor buying fertilizer to maintain our crop yields.

It is a characteristic of this century that with steadily increasing expenses (taxes, machinery, luxuries) the farmer is faced with steadily decreasing yields or income. The situation is mainly an economic one. Where to start to correct it is a very difficult thing to say, but in my opinion the remedy for most of the problems facing the farmer is this—reduce his inescapable expenses to a level where he can take his living off 80% of his land, restoring the rest with green manure, etc., over a period of years so that he is more able to meet his remaining expenses from increased crop yields. Certainly then the soil would be more fertile, the farmer would be happier and, I think, nematodes would be forgotten.

I am looking forward to reading your article on nematodes and soil fertility, probably learning something I didn't know before.

Durham Co. A. H.

## Cistern and Lambs

*One of our readers is experiencing trouble with a cistern and would appreciate suggestions from anyone who has overcome a condition of this nature. . . . We would also like to learn the experience of other farmers who have fed Western lambs. Do they make a reasonably satisfactory feeding proposition? Since many of the lambs fed in Ontario lacked sufficient finish this past year, we would appreciate readers stating as definitely as possible the kind and amount of grain, supplementary concentrates, hay and other feed given. Mention any changes in ration from time to time.*

## No Use Conserving Fertility to Grow Weeds

I DO not entirely agree with "Fertility Lover" in his contentions that our crops are not as good as they used to be. It is many years since this district harvested as good crops as this year and never in my recollection have two succeeding years been as good as the last two. Three years ago, of course, we had a drouth, but even then the good farmers who practise summer cultivation had good crops. The dim, distant past looks very rosy to some people while the future does to others.

*George Wilson, formerly Manager of the Norfolk Fruit Growers' Association, who has been appointed Director of the Co-operative and Markets Branch, Ontario Department of Agriculture.*

While I doubt whether there is too much plowing done, I believe there is too much plowing at the wrong time of year. Practically all the plowing on this farm is done between July 1 and August 10. After that I think it is too late to plow. I agree that the practice of growing spring grain and plowing in September and October, possibly skimming in September and plowing deeper later, is wrong. We seed down practically all our spring grain. If for some reason a field is not in fit shape to be seeded, we sow early grain which will be harvested by the first of August and then we use a one-way disc on the stubble at once.

If summer-worked land is clean and intended for corn and roots next year, we can sow fall rye which will give us some pasture in the fall and again in the spring, besides helping to prevent erosion and loss of nitrates. If the land is dirty, we ridge it up in the late fall. Fields that are naturally washy, we try to get seeded down to alfalfa mixtures and leave them for several years in sod.

I do think that most Ontario farmers grow too much spring grain and so perhaps do too much late fall plowing, but the man who thinks he can grow spring grain with spring plowing, never had to contend with quack grass and sow thistle. These weeds grow best in fertile soils and cannot be controlled except by summer plowing. There is no use conserving fertility to grow weeds.

The value of power equipment is greater in the summer than it is in the spring as there are usually some wet spots in a field that will be puddled by being worked before they are properly dry.

Oxford Co. DAIRYMAN.

## Climbing the Icy Mountain

I AM a young farmer's wife, married in the first years of the depression. I am a reader of the Canadian Countryman and enjoy its comics, Women's pages and especially the Practical Discussions.

I read among the Practical Discussions an article written by one who signed himself "Looking Ahead". I thought what a wonderful young man to look ahead, when so many are looking behind rather than for the future . . . with the consequence that many are on relief.

Farming for the young people is a rather hard pull these days, with high taxes, rent and all the other debts too numerous to mention that go with farming. Farming is like a big icy mountain and ambitious young people who are trying to climb up the mountain find that when they are part way up, the Money Man who sits on top with a long pole, pushes them back down to the bottom, so they have to make a fresh start.

The Money Man had his start, maybe he farmed at one time, when prices were high, taxes low and other things in comparison. Maybe he had a father to start him up, and give him a shove up the mountain when he fell back. But what about the poor young man today whose father has passed to the Great Beyond, and who is struggling to make an honest living off the farm, and stay off relief?

The older person says: Why don't more young people farm? Young people cannot make enough money to make a payment on a farm. The price of pigs is unsteady, also milk. There is no set price for farm products . . . prices are always rising or falling, but mostly falling.

The Money Man owns the farm. He doesn't like farm mortgages, and would rather invest in stocks and bonds. The consequence is that the young farmer cannot climb the icy mountain but is kept down at the bottom.

However, may I add in closing that all we can do is, "Keep Looking Ahead" and try to smile.

Frontenac Co. POLLY ANN.

## One Person Should Handle Hens

THE requirements for high production in winter are first of all, chickens from a bred-to-lay strain properly raised from the time they are hatched to maturity. Then they must be properly cared for. When buying chicks one should order them early for delivery early in March, so they will be ready to lay early in the fall when older hens are moulting.

It costs no more to raise good chicks than it costs to raise the cheap ones, and it is a waste of time and money to try to make good layers out of poor chicks. Good chicks from blood-tested, government-approved flocks are by far the best investment. The initial cost may be a little more but it pays to get the best, since it is to the well-filled egg baskets that we look for returns from all our work and outlay.

## Facts Which Mr. Corbett Ignores

ON page three of this issue there is a discussion by Mr. Corbett, General Chairman of the Brotherhood of Railway Carmen of America, and Mr. Payne, one of our subscribers, in regard to the relationship between trade unions and agriculture. We have indicated that the facts are all on Mr. Payne's side of the argument, but there are certain statements made by Mr. Corbett which we cannot allow to go unchallenged.

Mr. Corbett accuses Mr. Payne of trying to keep farm producers and urban producers apart "and fighting among themselves so that the financial manipulators and money changers can continue getting away with the spoils, exploiting both farmers and industrial workers". Then he concludes his letter by saying: "Fortunately increasing numbers of farmers are thinking for themselves. They realize that wealth producers on the land and in industry are all in the same boat, are all being exploited by the same manipulators. The sooner farmers and industrial workers get together as friends working for a common cause—justice and a square deal for all—and take control away from the exploiters by peaceful and democratic methods, the better it will be for all concerned."

Mr. Corbett appeals, not to the intelligence, but to the cupidity of our readers. We live in a very old world. What he says was said hundreds of years ago. Various countries have passed through revolutions to correct what he claims is wrong. The workers, the proletariat, got control and drove out "the financial manipulators and money changers" and murdered the bourgeoisie, and the result was that conditions for workers became worse instead of better. Even in Russia conditions are now gradually changing and business is being carried on more and more as it is in this country.

There are a few financial manipulators in this and other countries who ought to be shot or put in jail, but to declare that finanicers and "money changers" are getting away with the spoils and making things difficult for both farmers and urban workers is absolutely wrong. Mr. Corbett says that human rights should be placed before money rights, or "the wages of money". He should know that our whole difficulty —the difficulty of farmers to make both ends meet and the vast extent of unemployment in urban industry—is caused by the fact that money rights have not been getting a square deal.

Mr. Corbett is a railwayman. All railwaymen do not think as he does. Railwaymen who have lost their jobs are "sore" at those who, because of seniority, or some other cause, have benefited at their expense.

Some years ago we were talking to a Trainman on the C.P.R. while on our way to a dairy convention in London. It was during the worst part of the depression. He said that the whole trouble was that people engaged in the building trade wanted too high wages. He declared that times would improve at once if wages were cut.

To try to separate human rights from money rights is folly. Everyone should know that. A man told us only the other day that he recently bought a farm for $1,400 that a few years ago sold for $6,000. Mr. Corbett would no doubt say that that was all right. Farmers who have seen the value of their farms depreciate, and who cannot get a fair return on the investment they have in them, would not agree.

We have a friend who has worked hard all his life and saved his money. He figured that if he bought some C.P.R. stock he would be putting his hard-earned money into something that would give him at least a fair return. We met him on the street the other day and he told us that this stock had not returned him a nickel in dividends for six years. Mr. Corbett, no doubt, would say that that was all right. He is apparently satisfied that this man should do without the comforts and pleasures of life and save up his money with a view to having something to live on in his old age and then be left "flat" because the C.P.R. and other railways are paying out higher wages to their workers than they should in justice to their shareholders and farmers who use the services of the railroads.

The railways in both Canada and the United States are in a very bad state financially. One reason for this is that wages are a major item in operating them, and railway workers and other urban workers have not been willing to take a reasonable cut in wages.

Mr. Corbett declares that industrial wages are less than 30 per cent of the cost to the consumer. Competent authorities on the matter would deny this. They say that about 85 per cent of the cost of most commodities goes to labor. Some economists say it all goes to labor eventually, and it is obvious that this must be so.

A simple illustration shows this. Take the case of some man who has a business, who pays his employees miserably low wages and who piles up a nice profit for himself. What does he do with the money? Under normal conditions he would pay the money to labor by building himself a nice home, buying possibly a fleet of automobiles and by disposing of it in other ways. Some he would invest in other enterprises and thus create more jobs for labor. All the money this rascal, this exploiter of labor, earns eventually goes back to labor, although it does not go to the labor he employs in his factory. One of our major difficulties at the present time is that our railways and other business corporations are not making adequate profits. Moreover, people with money hesitate to invest it in new enterprises, and thus provide employment for labor, because they are afraid that the profit that they might make will be taken away from them by our so-called social reformers.

Numerous illustrations might be given to show that human rights and money rights are one and the same thing. We know a member of a trade union who invested his savings in real estate. When the depression came virtually all these savings were wiped out. This was partly because the local politicians in the municipality in which he lives delude themselves by thinking that by their actions they are placing human rights above money rights.

The most striking illustration that money rights and human rights are indistinguishable occurs in agriculture. If farmers were getting a fair return on the money they have invested in their farms they would have no complaint.

In July the index number of the price of farm products was 71.5, taking the year 1926 as 100. Last year, according to the figures published by the Department of Labor at Ottawa, the index numbers of the rate of wages paid in various urban industries in Canada were as follows:

| | Index Number |
|---|---|
| Building trades | 95.9 |
| Metal trades | 105.6 |
| Printing trades | 96.8 |
| Steam railways | 105.4 |
| Common factory labor | 104.2 |
| Miscellaneous factory trades | 103.5 |

It will be noted that the index number of the rate of wages paid by our railways stands at 105.4, compared with a "rate of wages" in July of this year for farmers of 71.5. This is a difference of 33.9 points.

Perhaps Mr. Corbett does not know it, but farmers do not feel very happy about this situation, and neither do the railway workers who have been laid off. Mr. Corbett says that the efficiency of railway employees has increased 32 per cent since 1920. We wonder whether this is due to the fact that railway employees work longer hours for the pay they get, or to the fact that railway management owing to falling revenues has been forced to provide the means to make their employees more efficient. We would hazard the guess that it is the latter.

Mr. Corbett thinks that railway employees are entitled to higher wage rates because they are more efficient. Farmers are a good deal more efficient than they were in 1920. The last figures we saw dealing with the subject showed that the efficiency of the farmer has kept pace with that of the industrial worker.

Mr. Corbett says that farmers and industrial workers are being exploited by "the same manipulators". We would like to know who these manipulators are. Let us get down to brass tacks.

The major portion of the revenue of farmers in Ontario is derived from the sale of milk and its products. The whole milk business is an important branch of the dairy industry in this province and Toronto is one of the principal markets for whole milk.

At the present time dairy farmers shipping to Toronto are receiving about five cents per quart for their milk, and the Toronto housewife has to pay 12 cents a quart. Mr. Corbett would no doubt say that in this case the milk distributors are the exploiters. Milk distributors themselves, however, claim that there is little money in the whole milk business. Some of them describe it as "a headache". Practically the whole seven-cent margin between what the producer receives and the consumer pays is taken up in the cost of pasteurizing, bottling and distributing the milk. Mr. Corbett need not take our word for this. He may ask the Milk Control Board if it is not so, or even consult some of the officials of the Toronto milk shippers' association about the matter. If Toronto milk shippers are to get a higher price for their milk, consumers of milk will have to pay a higher price for it.

Mr. Corbett seems to think that Mr. Payne wants to lower the standard of living of the industrial worker. We are sure this is not his idea, and it is certainly not ours. The difference between Mr. Corbett and us is that we want to raise the standard of living of all workers, including farmers, while he is only concerned about maintaining a high standard of living for certain privileged groups of workers. We claim that all workers would benefit if there were a fairer ratio between the rate of wages of railway employees and similar workers and the price of farm products.

We want to increase the purchasing power of farmers and increase the *annual income of all workers.* (Annual income is, of course, quite different to *rate of wages.* A man may receive a *high rate of wages* but his *annual income* may be quite low.) All that Mr. Corbett seems concerned about is that railway workers who are lucky enough to have jobs should get the maximum rate of wages, whether this is a handicap to farmers and causes unemployment or not. In this he is like most labor leaders.

## Rippling Rhymes

By Walt Mason

VOICES sometimes are so low, coming on the radio, that I fain would rise and say, "Why not give your lungs full play. I can hear some words at times when you tell of daily crimes, but when you attempt to speak some kind message to the meek, I can only hear you hum, like a jews harp out of plumb." Then as though the talker heard my unspoken heartfelt word, he begins to rant and roar till I butt the kichen door in my haste to get outside, to the woodlands wild and wide, where no radios are found and loud speakers don't abound. Sometimes on a pleasant night there's announced a rattling fight to determine who shall wear champion wreaths upon his hair. We assemble in the gloom of the darkened sitting room, all prepared to hear it through, to the final ballyhoo. The announcer then uprears and dismisses all our fears; he can reach us with his voice that should make all men rejoice. Even stone deaf men can hear such a voice, so strong and clear. Now the fight is under way, and spectators start to bray; thousands of them whoop and yell and we wonder what befell the announcer, for his tones are submerged by cheers and groans; and when everything is done I can't even guess who won. Radio is truly grand but there should be cops on hand to run in the noisy guys who shout comments less than wise.

# Seven Were Veiled

By Kathleen Moore Knight

XXI

PHYLLIS, watching with unseeing eyes the rivulets that coursed down the windows of the sunroom, heard the wailing of the wind and the shuffle of men treading ponderously as though they carried a heavy burden. She dabbed her eyes swiftly with her handkerchief and walked out into the hall.

They were just coming in the terrace door, the water dripping from their hat brims and trickling down their faces — Pete, Christopher, Burke the chauffeur and Slim Holloway, the island policeman who had been on duty at the gate. And they were carrying something on an old storm door, something big and bulky, with a soggy steamer rug thrown over it.

Elisha and the red-faced detective were there, too, and Dr. Sargent and a man, whom she had never seen before, with a camera under his arm.

"Couch in there, be they?" Elisha indicated the powder room under the stairs. "Better lay him down there, boys. Got a sheet or somethin' to put under him, Phyllis—somethin' ye don't care about?"

Phyllis flew to the linen closet at the head of the stairs and came back with sheets and a large white mattress cover in her arms. Elisha took them away from her and spread them on the chintz-covered couch.

The men laid their burden down gently.

"All right, Sim. You better go back to the gate. You, too, Burke. We'll send for ye when we need ye. Much obliged."

At a nod and a meaning wink from Elisha, Christopher drew Phyllis out of the room. In the corridor the rest of the household were clustered whispering in a sort of shocked excitement.

"Why on earth did they bring him in here?"

"Heart failure, of course."

"Yes. Or alcoholic."

"But Christopher said—murder!"

And presently the door of the powder room opened and Elisha stood there, stern and solemn. Behind him, at the hastily improvised bier, they could see Dr. Sargent straightening the folds of the sheet that covered the body. Bill Deeter was walking up and down the room impatiently.

"Well, folks," Elisha said, "I calc'late you've all heard the news by now. This man was found dead in the woods this mornin' not more 'n a quarter of a mile from this house. They ain't any other house within a mile an' a half, direction he was found. He wa'n't drunk—don't look like a drinkin' man, nor a hobo, neither. Seems as if we'd ought to be able to find out where he come from an' what for."

Dudley Houghton grunted.

"Suicide, of course."

Elisha looked at him soberly.

"Not with a bullet straight into the back of his head and no revolver anywhere round."

Corliss Brent broke the shocked silence. "You mean—somebody killed him?"

"Yup. . . . Fust thing we got to do is identify him. He don't belong on the island and he ain't one of the reg-lar summer folks. Now I hate to ask ye, but I got to do it. I want you should all go in there and take a look at him. You might have seen him on the boat or round the island somewheres."

One by one, silently, they filed into the little room. Phyllis, standing in the shelter of Christopher's arm, watched them with dull, horror-filled eyes, waiting her own turn.

Dudley Houghton stalked impatiently to the side of the bier, gave one perfunctory glance at the dead man's face, and marched out again.

"Ridiculous waste of time. Never laid eyes on the fellow before, of course."

Then Aunt Laurie, Dwight, Ailsa—glancing at the still white face—shaking their heads wordlessly.

Anita Templeton-Smith had disappeared. Pete went in search of her and found her sniffling hysterically in the corner of the living-room divan.

"I won't be treated this way!" she sobbed. "After all I've borne in this house, now I'm practically accused of murdering an utter stranger."

"Pull yourself together, old dear," Pete advised coolly. "Maybe you can prove he *wasn't* an utter stranger. That *would* be a sensation! Just think that one over!"

Anita gave vent to a fresh burst of sobs.

"I won't go! I can't bear to look at a dead body. I shall faint."

Corliss went across the room and put her arm about Anita's plump shouders with a kind of irritated sympathy.

"Come along, Anita, and get it over. It's just a formality. Take Norman's arm—that's right."

But as they paused beside the body, it was Corliss herself who suddenly pressed her handkerchief to her lips—whose hand clutched Norman's sleeve with a tense grip. Norman was grinning a trifle sardonically as they went out.

"Can't take it, can you, my love? I'd never expect a hard-boiled wench like you to grow pale at the mere sight of a stiff."

She managed a taut, caustic smile and a shrug.

"Oh, I'm all right. But it's giving me the jitters—all this sudden death around the place. I don't mind admitting it."

And then Phyllis found herself standing there beside the couch looking down into the dead man's face. It was such a nice face—mild, kindly, with a broad intellectual forehead from which the silvery hair had receded in two sharp peaks, and a straight, high-bridged nose. She could see the little dents at each side which his glasses had made. She thought that behind the glasses those closed eyes would have been blue and a trifle vague.

And someone had killed this gentle, amiable old man!

Phyllis' lips were quivering uncontrollably. Bill Deeter had stepped to her side and was watching her sharply.

"Have you ever seen him before?"

Her eyes filled with tears. Yes, she had seen him before, only a few hours ago, lying in a moon-drenched glade. And they had left him there alone, she and Christopher.

Christopher's hand closed about her arm just above the elbow and he was turning her about to look compellingly into her eyes.

"Phyllis dear, don't take it too hard. There's nothing we could have done." He knew the thoughts that were passing through her mind. "You don't know who he is, do you, darling?" He phrased the words carefully.

"No, I don't."

"Well, that's that," Elisha said with cheery resignation. "I didn't really expect nuthin', so I ain't disappointed. But there's a few things Bill and me'd like to git straightened out. S'pose we all go in the settin' room an' talk things over. Everybody here?"

And then, for the first time, they noticed that Francine was missing.

XXII

Pete Bishop went up the front stairs two at a time, and they heard him rapping a lusty tattoo on her door.

"I say, Fran, open the door, will you?"

He paused, listening; then tried again.

"You'll have to cut out the beauty sleep, Francie. Sorry, old dear, but you must wake up. Something serious has happened."

And after a long moment of silence:

"Well, darling, you brought it on yourself. Papa's coming in with the hairbrush."

And presently he came racing down the stairs again with a scared look on his round good-natured face.

"Say," he gasped, "she's not there! And she hasn't been to bed either! It's turned down neat as a whistle, with the pyjamas on top and not a wrinkle in the whole outfit."

Everybody seemed to be talking at once. In the general agitation Christopher's hand sought Phyllis' and closed over it warningly. Then Elisha was thundering for silence.

"Stop your chatterin', will ye? This ain't no time for it. Somebody ask Burke to step in here."

The chauffeur, it seemed, was still in the kitchen, discussing the gruesome discovery in the woods with Hattie Parsons. He appeared with miraculous promptness in the open doorway, his cap in his hands.

"Burke," Elisha's manner was mild, "you druv Mrs. Drake down-island, did ye? Or did she take a car herself?"

Burke's usually impassive face showed discreet amazement.

"Mrs. Drake, sir? No, indeed. No car has been out of the garage since yesterday afternoon, sir, when I brought Miss Ferris home."

"Hm. Couldn't 'a' took one without you noticin', I s'pose?"

"No sir." Burke was courteous but none the less positive.

"Mm. That's all, Burke. Jest wait around a spell. I may need ye. Bill, step out here into the hall a minute, will ye?"

In the living room there was an uneasy sense of apprehension as the little group of people sitting there discussed this new mystery in low voices. Phyllis lifted a pitiful drawn face to Christopher.

"We've got to tell, Chris," she whispered. "It was she—with the veil."

He nodded abruptly.

"Yes, I suppose we must. You saw her—but you didn't leave your room. Come on. Let's catch Elisha by himself and tell him."

He was out in the hall, holding low-voiced conference with Sim Holloway and Buck Edwards, the chief of police. Bill Deeter was nowhere in sight. Christopher beckoned to him with a jerk of the head.

Elisha dismissed the men and followed Christopher and Phyllis into Marvin Heath's empty library.

"Got somethin' on your mind?" he asked.

Christopher closed the door.

"We've been holding out on you, Phil and I," he said, "but now that Francine has disappeared, we thought you ought to have the facts."

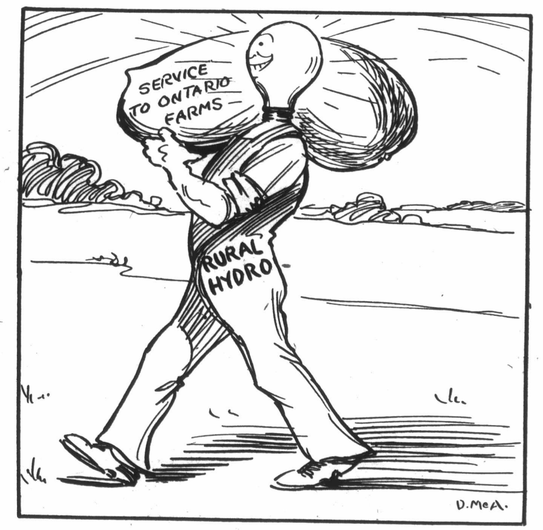
And then he told him the strange story of the disappearing bridal veil and the inexplicable attack on Phyllis.

"So you thought it was Francine, did you? Hm. An' last night ye saw the weddin' veil walkin' off by itself through the woods. Now this mornin', Francine, she's gone, too." Elisha ran a horny hand over his long jutting chin. "Hm."

"And there's something else," Phyllis said. "I tried to get you last night to tell you. Didn't you get the message I left with Joel Baxter?"

"Nope. Ain't ben to the market sence noon yesterday. But no matter. What was it you was aimin' to tell me?"

Phyllis was holding tight to Christopher's hand, but her eyes were steady.



"It was Dwight Garrison, Elisha. He believes he saw me coming out of this room with my wedding veil on, that horrible night just before Father died —and that I came in here to poison him. He—he promised not to tell"—her voice faltered, but her chin went up valiantly—"if I'd marry him."

"Did, did he?" Elisha's thin lips were a straight stern line. "He is sort of a low-down cur, ain't he? . . . 'Twa'n't you—that he sees comin' out?"

"Why, of course it wasn't!" Phyllis cried indignantly.

"There, there, now; Ain't got no call to git riled up. 'Tain't no crime, 's I know of, goin' in to show off your weddin' fixin's to your father. I jest want to git the record straight. . . . So either this feller Garrison is lyin', or somebody went into Marvin Heath's study that night with your veil on and

# Letters of a Countrywoman

DEAR AMY:—

Thank you heartily for the birthday present. It was jolly good of you to let me choose what I needed most. I am getting a book that I hope will be useful to me as a writer as it features the different markets where one can get almost every variety of rejection slips. I haven't sent out a story for a long time, so of course feel lonely for a rejection slip.

I think I see you smile, as Dick does when he posts a manuscript for me: "I wish I had your persistence in spite of discouragement, Mother", he remarks. But just listen to this: "Fannie Hurst submitted 86 stories to Saturday Evening Post and all were rejected. Her 87th sold. Persistence plus a systematic study of the profession of writing, is the road followed by successful professionals."

I have persistence anyway—so stop your smiling—all of you.

I got a lot of nice presents but won't weary you with a list. Had a jolly birthday; stayed in bed until noon, then after a good dinner spent the afternoon on the couch on the veranda, and received my visitors there—and very congenial visitors they were. One was from a farm—evidently a prosperous farm—near Toronto. She had a few days to play, spent some in Buffalo, came home and announced that she was going to Parry Sound for a day or so. When asked the reason of this choice she said she was going to find out whether there was such a person as "Toria" in Parry Sound and, if so, why?

She cleverly concealed whatever disappointment she may have felt and chatted genially about her children and their pets, and the squirrels and other pets I used to write about in my C.C. letter when I was living on the farm. Our next door neighbor dropped in and the conversation took a wider sweep, and soon we were discussing everything from "Cabbages to Kings" and settling the affairs of the nation with a finality that would have surprised wiser heads than ours—if there are any. Queenie is a born lecturer and knows exactly how the world should be run. I am not a talker, but I'm a terror to think, and I try to be a good listener.

A young man who was once our manager when we ran a summer resort, also dropped in to say "Hello". When he had gone our next door neighbor remarked: "Well, I think it was real nice of that young man to come in just to see an elderly woman". I drew myself up the length of the lounge and asked in an icy tone if "Elderly woman" referred to me, because the term did not fit—even if it was my 80th birthday (which it wasn't).

You should have seen her wilt—I didn't—but I'm sure she must have wilted—inwardly. However, I agreed with her that the young man was very pleasant and thoughtful.

He is a school teacher now and usually drops in once or twice during his holidays. The first time he came I was busy trying to uncrate a buffet that was in an oak crate. I had been working at it for an hour, was all tired but and had removed only one strip of oak. He kindly offered to help and so let himself in for more than an hour's hard work before that thing was out of it's crate. Since then he has made his calls on Sunday — and I don't blame him.

No, the kitten hasn't a permanent name yet; we called it Trixie and then found that the family already had a Trixie cat, so they had the first claim. Then I called it "Fleas" for I was sure nobody else would have that name for a pet cat; and also because it frequently scratched behind its ears. I got a package of defleaing powder, Queenie applied it, apparently with success, but until somebody finds a suitable name I'm afraid "Fleas" will stick, though as a matter of fact I have no proof that that kitten harbors a flea. I haven't seen a flea for thirty-three years, and that was in "dear old London" and the landlady said I must have brought it.

This kitten is really very intelligent and seems to understand every word we say to it. This morning it jumped up on my bed and attempted to lick my face. "Get out of here, I don't want you!" I said in an unfriendly tone. It sprang right off the bed, sat under the rocking chair and gazed at me pathetically with eyes that plainly said: "Why are you so cross this morning?"

When it wants an egg it goes into the pantry, sits behind the egg case and meows—but I think Queenie is romancing when she says that it lifts the cover and counts the eggs to see how many we have used.

I am beginning to wish I was a little more able, more capable of going for long walks, climbing hills, etc., etc., for if one can't do these things one may live in a place for years and yet know very little about it. I realized this keenly last Saturday when a party of tourists, including one C.C. reader, called on me during the afternoon and asked what scenic or other attractions Parry Sound has to offer to visitors. They had already seen Tower Hill with its lovely flowers, landscaping and wonderful view over the bay, the waterfront, lots of Indians and Toria.

For the life of me I couldn't think of the Ferry that would have taken them over to Parry Island, and the Indian village, or I might have directed them to the beach with its bathing beauties—including my long-legged grand-daughters, but I just didn't think of it at the time.

Well, the holidays are almost over and it will be a sad time for Peter when the girls, his devoted slaves, go back to school, and he will miss all the fun. The girls and his Daddy have been teaching him a little game. They sit on their heels before him, he pushes with both hands and over they go. Then he laughs very heartily. Once when he was walking up town with his mother she noticed that one shoe was unlaced and knelt down to lace it. The next thing she knew she was on her back on the sidewalk, and Peter was having a great laugh.

On my birthday, before my visitors came, I was memorizing that beautiful poem by John Greenleaf Whittier called "At Last". It seemed to fit in with my birthday, and is alleged to have been recited over his death-bed by one of his relations. The poem begins—

"When on my day of life the night is falling,
And, in the winds from unsunned spaces blown,
I hear far voices out of darkness calling
My feet to paths unknown.

Thou who hast made my house of life so pleasant,
Leave not its tenant when its walls decay;
O Love Divine, O Helper ever present,
Be Thou my strength and stay.

Be near me when all else from me is drifting—
Earth, sky, home's pictures, days of shade and shine
And kindly faces to my own uplifting
The love which answers mine.

I have but Thee, my Father! let Thy Spirit
Be with me then to comfort and uphold;
No gate of pearl, no branch of palm I merit,
Nor street of shining gold."

There are two more verses, but I've copied enough. All Whittier's poems are beautiful because one can feel them, they are so understanding.

(Continued on page 13)

## At the Western Fair

By Edith Metcalf Wilson

FROM the rosy depths of September's dawn the sun rose confidently but presently was obscured by rain clouds and shone no more for the rest of the day; yet the enthusiam which attended the two opening days of London's Fair was carried over into Wednesday, September 14, and evidenced in crowded buildings, parking grounds and driveways. Thirteen hundred more people entered the grounds on the first two days than last year and they were rewarded by exhibits and entertainment even better than past records.

Behind the glass cases of women's work were beautiful specimens, not only from women, but prominent among the finely quilted comforters was one made by an old man using 2,820 pieces of cloth, the same needle and no thimble.

Dr. Florence Stark of O'Brien, Ontario, who sent three exquisite pieces of petit point last year had an entire handbag done in the finest of petit point artistry. One wonders how her eyes survive the attendant strain.

Mrs. E. W. Hall of London had a red ribbon on a needlepoint picture of the famous painting, the Last Supper; and Mrs. Harold Oddie of St. Vital, Winnipeg, followed with a blue ribbon for a similar needlepoint study, the Archer.

A Coronation touch was given in a purple hooked rug made by Mrs. Williamson of London, featuring as its only decoration the gold crown of the Coronation.

A novelty among the quilts was a hoop-skirted girl carrying a parasol, applied at intervals. Similarly a John and Jane figured quilt

(Continued on page 12)

*Home-making Club projects and judging contests were a successful feature of Woodstock Fair. Here are four of the winners. Left to right they are Miss Elsie Patterson, Thamesford, first in "Clothes Closets Up To Date" for senior girls; Miss Elva German, Beachville, first in the "Milky Way" contest for seniors; Miss Christine Matheson, Embro, first in "Milky Way" contest for juniors, and Miss Doris Rowland, Embro, first in "Clothes Closets Up to Date" for juniors.*

# LUSCIOUS WAYS WITH PEACHES

HERE is the secret of cooking with fresh peaches—to produce a cooked product with an uncooked flavor. Otherwise it would be like gilding the lily to have peach recipes at all. Alone they have everything they need, sweetness, fragrance, flavor. Use them for these qualities and do not bury them in stronger flavors. Each recipe should be almost as simple as "Peaches and Cream".

Near the shores of the Great Lakes peaches reach a golden perfection. We have eaten peach shortcake there which is close to a miracle. The fresh taste of the newly cut slices is retained, yet the peaches are surrounded by a rich syrup. While the biscuit shortcake is baking, about half a dozen peaches are sliced and dropped into a syrup made of 1 cup sugar, ½ cup water and ¼ cup butter. This is heated to boiling and then cooled. The shortcake is split and buttered while hot, and peaches with syrup put between and on top of layers. It is served at once while warm.

Monk's Omelete is very unusual and makes a most inexpensive and pleasing dessert.

*Monk's Omelet*

8 large peaches
½ cup powdered sugar
2 eggs, well beaten
Fine, dry bread crumbs
3 tablespoons melted butter

Peel and slice peaches. Add sugar and simmer until peaches are tender. Add small amount of hot sauce to eggs, mix well and return to remaining hot sauce. Line a greased pie pan with a thin layer of the fine bread crumbs. Turn in simmered peaches and cover ¼ inch deep with remaining crumbs. Dribble with butter and bake in hot oven (400 degrees F.) 15 minutes or until lightly browned. Cool. Approximate yield: 6 portions.

For a Peach Spice Cake of delicate flavor with an unusual frosting. Do not beat the batter too hard after the addition of peaches as it is desirable to have a few large pieces visible in the baked cake.

There are spice cakes using prunes and spice cakes using apples. In each case the fruit loses its flavor identity even while adding to the cake quality. Here we have a peach spice cake of unusually soft texture, but if the peaches are mashed or beaten into this cake their delicate flavor is lost, and the cake loses in quality as well as in its usually-fine flavor.

*Peach Spice Cake*

2 cups sifted flour
1½ teaspoons baking powder
1 teaspoon baking soda
½ teaspoon salt
½ teaspoon cloves
½ teaspoon nutmeg
½ teaspoon allspice
½ teaspoon cinnamon
½ cup butter
1 cup sugar
3 egg yolks
1 cup diced peaches
½ cup sour milk
2 egg whites, stiffly beaten

Mix and sift flour, baking powder, baking soda, salt, and spices. Cream butter until soft, add sugar gradually, creaming after each addition, until light and fluffy. Add egg yolks and beat well. Add flour alternately with milk, a small amount at a time, beating until smooth after each addition. Add peaches. Fold in egg whites and turn into greased (8-inch) layer pans. Bake in moderate oven (375 degrees F.) 30 minutes or until done. Cool and frost with Special Peach Frosting.

*Special Peach Frosting*

1 cup sugar
1/3 cup flour
¼ cup lemon juice
2 teaspoons grated lemon rind
2 cups mashed peach pulp
2 tablespoons butter
2 eggs, beaten

Mix flour and sugar. Add lemon juice, grated rind, and peaches. Cook over hot water 10 minutes, stirring constantly until smooth and thickened. Add butter. Add a small amount of this thickened mixture to beaten eggs, mixing well together. Return to remaining hot mixture. Cook 2 minutes longer, and beat for 3 minutes. Approximate yield: Frosting for 2 (8-inch) layers.

Peach Plum Conserve is a deep amber color, quite tart and good in flavor.

*Peach Plum Conserve*

4 cups peeled peaches sliced
4 cups diced fresh plums
10 cups sugar
1 lemon, thinly sliced
1 cup chopped walnuts

Mix fruits with sugar and cook over moderate heat until thick enough so that a small amount jells on a cold saucer. Add nuts and turn into hot, sterilized jars. Cool and seal with paraffin. Approximate yield: 10 one-half pint jars.

*Peach and Plum Salad*

12 large red plums
6 large ripe peaches
1 cup sugar

Wash and halve plums. Remove pits. Pare and quarter peaches. Place fruit in alternate layers in glass serving dish, sprinkling each layer with sugar. Chill one hour before serving. Approximate yield: 6 portions.

*Pfirsich Kuchen*

3 cups sifted flour
4 teaspoons baking powder
½ teaspoon salt
½ cup butter
¾ cup sugar
1 egg, well beaten
1 cup milk
5 large, ripe peaches, sliced
Brown sugar
Cloves

Mix and sift dry ingredients. Cream butter and sugar. Add egg. Add milk. Add flour and beat quickly until smooth. Spread dough thin in two greased, shallow pans (6 by 10 by 1 inch) and arrange peaches on dough in rows. Sprinkle liberally with sugar and cloves. Bake in moderate oven (375 degrees F.) 30 minutes. Serve warm or cold. Approximate yield: 2 kuchen.

*Southern Peach Cobbler*

1 recipe plain pastry
8 medium sized peaches, peeled
2/3 cup sugar
¼ cup brandy
Confectioners' sugar

Divide pastry. Roll one part into a strip 4 inches wide and long enough to line the sides of a quart casserole. Put peaches, cut, in casserole. Add sugar and brandy. Cover with remaining pastry, rolled thin, and slashed to allow escape of steam. Bake in hot oven (450 degrees F.) 10 minutes. Reduce heat to moderate (350 degrees F.); dredge with confectioners' sugar and bake 5 minutes longer. Approximate yield: 6 portions.

Very unusual is the use of peach halves instead of crust topping for a meat pie.

*Peach and Beef Pie*

3½ cups diced, cooked beef
¼ cup chopped green pepper
2 cups left over gravy
Salt
Pepper
6 ripe peaches
¼ cup catsup

Place beef, green pepper and gravy in shallow, wide casserole. Sprinkle with salt and pepper. Cover and bake in moderate oven (350 degrees F.) 20 minutes. Peel and halve peaches. Remove stone and fill centres with catsup. Place, hollow side down, on top of meat, cover and bake 20 minutes longer or until peaches are tender. Approximate yield: 6 portions.

## The Sewing Box

By Mary Lister

### Cross Stitch Cushion

THE season of long, quiet evenings will soon be with us. Soon the family will be gathering around the fireside and the need for comfortable, bright cushions will be a reality. This lovely cushion is delightfully trimmed with a border of simple cross stitch in bright colors. It is stamped on the finest Irish linen that will wash and wear and give you no end of pleasure. The embroidery is done in gold, green, red, brown and black on either gold, ecru or brown linen. The four sides of the square are finished with a row of buttonhole stitching which repeats the color of the cross stitching and gives an unusual and effective finish to the cushion.

Design No. 184—Stamped linen cushion top (state color), the matching back and complete instructions for embroidery and finishing. Price 70 cents. Threads for working, 20 cents. Cushion form, 18 by 18 inches, 60 cents.

Address your order to The Sewing Box, The Canadian Countryman, 204 Richmond St. West, Toronto.

## Games for the Corn Roast

By Joan Fraser

"EVERYONE please form a double circle—girls on the inside and boys on the outside," rang out a cheery voice, and the eager crowd of young people who had gathered on the lawn beneath the harvest moon knew that a good time was in store for them. "Has everyone a partner?" continued the leader. "Fine! Now we'll sing the Jolly Miller. It goes to the tune of Turkey in the Straw.

"There's a jolly old miller, and he lives in the mill,
And the wheel goes around with a right good will,
One hand in the hopper and the other in the sack,
And the right steps forward, and the left steps back.

"While we are singing, the girl takes her partner's arm and all move in a clockwise direction. When we come to the last line of the song—The right steps forward, and the left steps back—the girl steps forward to get a new partner, while the boy steps back to get a different girl. I have no partner, so I'll stand in the centre, and while you are stepping forward and back, I'll try to grab a fair maiden from another chap. Then he'll have to take my place in the centre and the game goes on."

When the Jolly Miller had produced the desired effect of co-mingling the crowd in an informal manner and infusing all hearts with gayety, the leader suggested, "Let's change the game. Keep the same formation, though—a double circle. Jean and Jack, you may be 'It' for French Tag, or Two Deep as it is sometimes called." Jack chased Jean across the circle, in and out among the partners who stood watching, almost tagging her several times. After some skilful dodging she finally stopped in front of another girl. That girl's partner then became the fugitive, and the game progressed.

Partner Squat Tag was then introduced. "This time the girls form an outside circle," directed the leader, "while the boys form a circle on the inside. Girls move in a clockwise direction, boys counter-clockwise," indicating with his hand. 'Now halt! Take your partner's hand and remember who he is. Drop hands and continue marching as before to the tune of Ned's mouth organ. When Ned stops playing, find your partner as quickly as possible and then squat. The last couple to squat drop out of the game." This contest provided a great deal of merriment and lasted until, by process of elimination, only one pair of players was left.

The leader then arranged the crowd in a single circle, choosing about ten of their number to stand in the centre for Circle Dodge Ball. A large rubber ball was produced with which the players who formed the circle endeavored to hit those in the centre. Any of the centre players thus hit joined the circle. The object was to see which ones could, by clever dodging, remain longest in the centre.

Circle Jump followed. Keeping the same single circle one player was placed in the

## The Work of Rightness

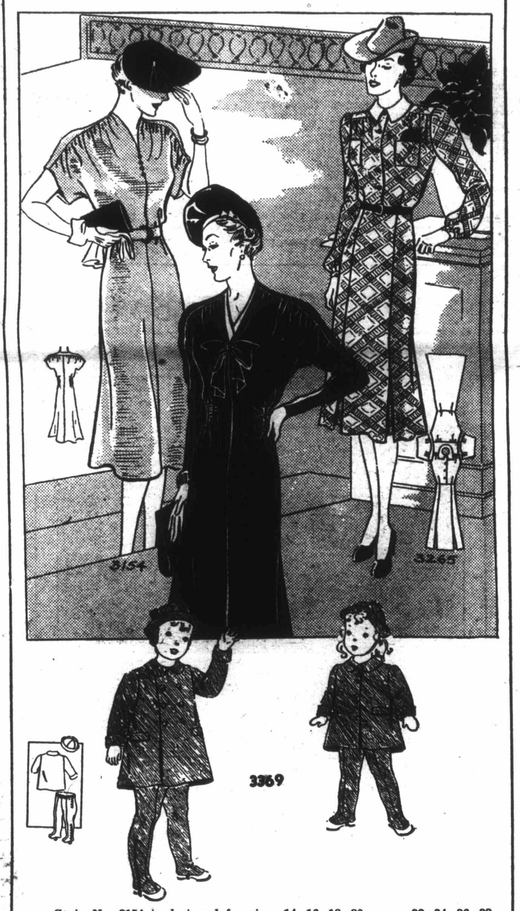
"And the work of rightness shall be peace; and the effect of rightness, quietness and assurance for ever."
—Isaiah XXXII: 17.

WE sometimes, I am convinced, lose the true force and meaning of a passage of Scripture because we do not stop to translate its archaic expressions into our common, everyday language. For instance most of us have come to believe that the word "righteousness" has some mystic spiritual meaning which has nothing to do with our everyday actions and decisions. For that reason I have chosen to use in its stead the more forthright and more understandable word "rightness". We may not be sure just what "righteousness" is, but we do know "rightness". We know right from wrong. We know that "rightness" is God's way and leads us to God, and that wrongness leads away from Him. We are happy and content when we are moving toward Him, and however merry and hilarious we may be, however successful in our business, however much admired and flattered by those around us, we are deep in our hearts unhappy, and discontented and homesick when we turn away from Him. In the simple little everyday things of life as well as in its great decisions we know right from wrong.

And the text which we have quoted comes home to us with more force, with more personal appeal when we interpret it to mean that "rightness" works for peace and quietness and assurance. As we consider our own lives we are, most of us, willing to subscribe to this statement. The feeling that we are right, that in so far as we have been given to know, the way we follow is God's way, gives us an assurance, a stability, a serenity of heart which shuts out worry and uncertainty and apprehension. Our feet are "set upon a rock". There is no need for bluster, no need for argument. It is the man who is wrong who is likely to lose his temper: to enforce his decision by bullying and tyranny. For quietness and assurance in our own hearts sheds its influence on those about us. It carries with it an atmosphere of peace which reaches out beyond ourselves. Even when we meet with the most violent opposition the rightness of our cause is recognized, and the fairness of our decisions. For the recognition of rightness is given to all. We may turn our backs upon it, and deaden our hearts, but we still do know the right is right.

Not only does this rightness give us in ourselves assurance and peace and courage, but it gives us a wisdom we do not otherwise possess. Rightness includes fairness and justice. We see the other fellow's side of things. Behind his mean acts and his tantalizing words we see the circumstances which have tended to make him what he is. The way of "rightness"—God's way for us—is not a selfish way. We want our opponent's good as well as our own good. We try to think for him as much as we think for ourselves. And because goodness for us both is the will of God we have His help in our decisions and His guidance in our words and actions. Such a position works toward peace. Such a "rightness" in the hearts of all men would establish "quietness and assurance forever".

And this is as true of nations as it is of individuals. "Rightness exalteth a nation"—"not by might nor by power—but by My Spirit, saith the Lord". Not great fleets, nor vast armies, nor huge stores of munitions will help us to work out the tangle of world affairs. Not cutting sarcasms, nor the power of wealth, nor the position of tyranny, will enable us to settle our class problems, or our personal quarrels. Only "rightness"—the rightness which is righteousness, which is generous and unselfish and sincere, and sees the other side as it sees its own—only this will lead us into truth and peace. And this *will!* It may be long in the coming, because men and nations have so set their hearts on material possessions that they have choked back and dulled, and sometimes all but killed their awareness to God and to His will. But we can say with the great American poet James Russell Lowell:



"Right is right—since God is God,
And right must surely win.
To doubt would be disloyalty:
To falter would be sin."

Wrong and injustice rankle in the heart. They cannot but produce resentment and hate. All international struggle, all class warfare, all personal greed, is the result of some deviation from rightness—some selfishness, some greed, some tyranny, some fear. But rightness is stronger than evil. It can wipe wrong out. So the cure for all of us must be to be right. To establish in our own lives, in our homes, in our business relations, and to do what we can to establish and uphold in community and country that righteousness whose work is peace, and whose effect is quietness and assurance forever. Let us dedicate ourselves to this cause, for, having done so, we shall know the way in which we may best serve it. God Himself will teach us.

—CLAUDE R. VANE.

There are now 342 women farmers' clubs in 67 counties of the Province of Quebec. These clubs, states the Quebec Minister of Agriculture, augment the effect of the lectures and demonstrations given by the official instructress of the Domestic Economy and Handicraft Sections of the Department.

## Fashions of the Day

Style No. 3154 is designed for sizes 14, 16, 18, 20 years, 32, 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4½ yards of 39-inch material for short sleeved dress. Price 15 cents.

Style No. 3265 is designed for sizes 14, 16, 18, 20 years, 32, 34, 36, 38, 40, 42, 44, and 46 inches bust. Size 36 requires 4⅛ yards of 39-inch material with ¼ yard of 35-inch contrasting. Price 15 cents

Style No. 3369 is designed for sizes 2, 4, 6 and 8 years. Size 4 requires 3⅛ yards for single breasted coat, hat and leggings. Price 15 cents.

Fall and Winter Fashion Book, 15 cents per copy.

Pattern Dept., Canadian Countryman, 204 Richmond St. West, Toronto.

## Talky Tooter of Balsam Grove

By Bertha E. Green

IT was on the sunny side of the Spruce Grove, which was also the side sheltered from the rough, cold wind that someone was hiding. It was a large, grey, tawny, furry body that lay stretched out on one of the spruce branches, twenty feet at least above the ground. It was a bobcat, Old Judge Fuzzer. His fur coat was rough, almost mussy looking on account of its mottled coloring of buff and grey. His tail was bobbed, his whiskers bristly, his sharp ears twisted and tufted at the tips, and the thicker fur on his neck made almost a ruff, or a muffler.

Old Judge Fuzzer was not asleep, but through half-open eyes was watching a pair of rabbits who were playing amongst the boulders. Suddenly the long, two-eared cottontails whisked into a hiding place in a nearby rock-pile and where they had been playing there now stood a whitish-furred, long-bodied, short-legged animal who sat up straight-backed and turned up a saucy nose at the bobcat on his branch but a short distance away.

The big cat stretched himself and rose to a crouching position on the spruce limb. He leaned over until his whiskered face was in full view of the smaller furry fellows below him and said: "I might have known that the cottontails would not have a chance to come out and play in the sunshine very long. There are so many rascals out on the ridge this morning."

"Just what I said to myself when I spied you up there, Master Fuzzer," said the watcher on the ground, in a high squeaky voice.

The bobcat's whiskers bristled with anger, and though he tried to keep his temper he almost squealed as he said: "If there is one real rascal around here it is you, Master Whitey Weasel."

The little fellow on the ground, wrinkled up his sharp nose, for nothing was more fun for him than making the bobcat angry. Whitey Weasel was feeling pretty good anyway for with the coming of frosty weather his fur coat of muddy brown was rapidly changing to the white suit of which he is so proud. The tip of his tail was already a jet black and he whisked it around in front of him and waved it at the bobcat as he shouted teasingly:

If you measure tails with temper,
Why, a weasel, you must see,
Will be never nasty mannered,
Rude, nor rough, nor peppery.
But a bobcat, a Judge Fuzzer!
If you look, you'll never fail
To say to yourself: "His temper
Is as short as is his tail".

"That isn't so," squealed the bobcat. "My tail isn't as short as——I mean my tail isn't as short as——I tell you both my tail and my temper are as fine as any weasel's."

By this time the bobcat was very angry, and all the more so because he saw that the teasing weasel had been joined by a cousin of his, Master Marty, the stone marten. Master Marty was as fond of teasing the bobcat as Whitey Weasel but he did not say anything to make the bobcat angrier for he wished to tell the bobcat of a visit to be made.

As soon as the marten had managed to quiet the weasel he said to the bobcat: "Can you tell me who lives in the Three-Oak bramble patch?"

"I don't know," replied Old Judge Fuzzer. "I can see the patch way down in the marsh but not even a bird is anywhere around it."

"Will you go with me to visit it, Master Fuzzer?" asked Marty Marten. "I'm afraid to go alone for fear the Snowy Owl might catch me on the way."

"I'm going, too," squeaked Whitey Weasel.

"Better wait 'til you're asked," snorted the bobcat. "I'll go with you as soon as the ground is frozen hard enough, Marty."

"The little pools are covered with ice now," said the marten. "Look at this!"

(*Continued on page* 13)

## Luscious Ways With Peaches

(*Continued from page* 9)

*Old-Fashioned Peach Butter*

5 pounds of peaches
3 pound of sugar

Peel and slice the peaches. Cover with sugar and let stand over night. Cook for three hours over low heat; then pour into sterilized glasses and when cool seal with melted paraffin and paper tops. Approximate yield: 8 one-half pint jars. This butter is especially wholesome eaten with bran muffins. Also good with waffles.

*Peach and Almond Marmalade*

5 pounds of peaches
3 pounds of sugar
8 cups blanched split almonds

Place peeled and sliced peaches in kettle with sugar and cook gently until peaches are soft. Put through a colander and continue to simmer until marmalade begins to thicken (218 degrees F.). Then add split almonds and take from stove. Put into sterilized glasses or earthenware pots. Cover with thin papers dipped first in Kirsch or brandy. Then attach and seal paper tops. Aproximate yield: 8 one-half pint jars. This marmalade is delicious with toast made from home-made bread.

## Games for the Corn Roast

(*Continued from page* 9)

centre, armed with a small bag filled with sand attached to a lengthy cord. Seizing the end of the cord, he swiftly whirled the bag with a circular motion beneath the feet of those in the circle. Any player who, by failing to jump quickly enough, got the string tangled about his feet, became "it", while the centre player took his place in the circle.

Another singing game was Rig-a-jig-jig. With the circle players standing still the centre player marched around the inside of the line while all sang:

"As I was walking down the street,
Heigh-o, heigh-o, heigh-o, heigh-o,
A pretty girl I chanced to meet,
Heigh-o, heigh-o, heigh-o.

*Chorus*

Rig-a-jig-jig, and away we go, away we go, away we go,
Rig-a-jig-jig, and away we go, heigh-o, heigh-o, heigh-o!"

At the words, "A pretty girl I chanced to meet," the centre player chose one of the opposite sex as he walked around the circle to accompany him. Then when the chorus commenced he clasped her left hand with his left and her right hand in his right. Thus linked, they skipped lightly around the circle during the singing of the chorus. Then she dropped behind him and in single file they marched around the circle while all sang the verse over again. At "A pretty girl I chanced to meet", he chose another girl as partner while she chose another boy. The game went on until all were chosen.

The leader then requested the couples to march up the centre to where he stood. On reaching him the first couple was directed to the left, the next to the right, etc., down the sides, across the back of the lawn, and up the centre in four lines. In this formation they played some relay games. The four players standing at the head of the lines were each given a balloon. They were instructed to pass the balloon overhead down the line to the end player who, on receiving it, ran up to the head of his line and passed it down again. When the original head player was back in his position again, he squatted down to indicate that his line was finished. The line finishing first was acclaimed the winner. A second time they tried the balloon relay by passing it between their legs, and a third time by passing it over the first player's head, then between the second player's legs, over the head of the third, etc.

# I Called to Chat About Baking But Found a Kitchen Filled with People and Sausages

By Evangeline

MRS. SAM SCHNEIDER AND DAUGHTER, McMAHON, SASK.

ON one of those brisk, sparkling days that make Autumn so delightful in Western Canada I dropped in on Mrs. S. G. Schneider of McMahon, Saskatchewan. Mrs. Schneider is prominent in her community. President of The Women's Community Aid and noted for cooking and baking skill. I expected to have a friendly chat with her about baking bread and cakes but found her with a kitchen filled with men and women working at making sausages. There were heaps and heaps of sausages!

"What in the world are you going to do with all these sausages?" I inquired.

"Oh, we are just making up a year's supply," smilingly replied Mrs. Schneider. "Half of the quantity we smoke. The other half we can. To can them I cook them the same as I would for the table and bottle them in sterilized jars. With ½ inch of fat on top of each jar and well sealed the sausages will keep indefinitely if the jars are turned upside down and left on my cellar floor." Later on Mrs. Schneider with true Western hospitality invited me to try her sausages. And were they good! The buns Mrs. Schneider makes are simply grand, too. Also her bread. It's as white as white can be. And so tasty! At an opportune time I asked Mrs. Schneider what flour she used.

"The best flour made and that's Robin Hood," said Mr. Schneider, breaking into the conversation. "We have tried cheaper flours but don't like them."

"But don't forget, Dad," said Mrs. Schneider, "we get two more bakings from a sack of Robin Hood."

Mrs. Schneider speaks from experience. She started using Robin Hood 26 years ago. Off and on since then she has tried other brands but none have proved as dependable or economical as Robin Hood. She bakes all her cakes and pastry with it as well as her bread, and says "Robin Hood gives them all a better flavor!"

I am sure you will get fine results with Robin Hood Flour with your very first baking. What makes me so sure is because I have seen with my own eyes the choice wheat the millers use for this flour. I have seen this wheat washed until all the grit and dirt have been removed and the grains fairly sparkle with cleanliness. I have seen this CLEAN wheat milled oh, so carefully, and the flour sifted through silk cloths until it is very, very fine. With such fine, clean, white flour a woman's baking simply can't help looking and tasting better.

You cannot lose anything by buying a sack of Robin Hood. The results are guaranteed and you are the judge. If, after trying it for two bakings of bread, pies, cakes, anything you wish to use it for, you are not fully satisfied with the results, just return the unused portion of the sack and get your money back plus 10 per cent. Unless the millers were sure of the superiority of Robin Hood they wouldn't dare make such an offer.

## Pigs in Blankets

Here's an appetizing way to serve sausage.

Brown a pound of sausage in the frying pan. Then roll them in squares of pastry. Bake in a moderately hot oven of 375°F. until pastry is nicely browned and the sausage cooked. Serve with or without a cream sauce.

### Pastry

To make the pastry blankets use 3 cups of Robin Hood Flour, 1 cup shortening, ½ teaspoon salt, ½ cup cold water. Rub the shortening into the flour and salt. Add the water slowly. Roll the pastry out to the same thickness as for pies.

## You'll Want This NEW RECIPE BOOK

Here it is, Ladies! The NEW Robin Hood recipe book, "Baking Made Easy", just off the press. The most modern, up-to-the-minute, and practical book that ever came into your kitchen. Sixty-four pages containing more than 100 tested recipes for bread, cakes, cookies, quick breads, puddings, pies, sandwiches, frostings and fillings.

As the name of this new book indicates, every step is shown clearly. A beginner can take the book and prepare appetizing meals. At the same time, there is much that will be new and interesting to the experienced housewife. Send 9c in stamps and the book will be mailed to you promptly. Write to Robin Hood Flour Mills, Ltd., Dept. "B", Toronto, Ont., or Montreal, Que. Please mention this publication.

**IS YOUR BABY GETTING A TOOTH?**

YOUR BABY must "get a tooth". But he need not get a fever with it.

If baby's mother is wise he won't.

Here is what one wise mother, Mrs. Archie Begbie, of Consecon, has to say: "We have not lost one night's rest through teething as I always use my old standby, Baby's Own Tablets. They are worth their weight in gold."

And Mrs. Alfred Hauser, of Guelph, Ont., says: "I have eight children, have used Baby's Own Tablets for 21 years, and find them very beneficial during teething."

Give these safe, little tablets at the first sign of teething fever. Sweet-tasting, easy to take, prompt in action, yet safe for the most delicate baby. Analyst's certificate in every package.

Effective in Constipation, Simple Fever, Diarrhoea, Upset Stomach, Colic, Simple Croup and Fretfulness. Get a box today. Sickness so often strikes in the night.

Your money back from your druggist if results don't satisfy you. 25 cents.

**Don't Forget Your Renewal**

*Notice was sent recently to all Countryman readers whose renewal subscriptions are due. Your prompt attention will be appreciated. Better look after it RIGHT NOW.*

Dispensing with the balloons the leader then placed a chair at the head of each line, about five yards from the first player. The first player ran up around the chair and then back to the end of his line, striking the upraised hand of the second player as he passed. This was the signal for the second player to run. The line which had its original head player back in position again was acclaimed winner. A variation of this relay was for the players to hop on one foot, holding the other foot by the hand. Another variation was to use a skipping rope as a mode of locomotion.

On the seat of each chair the leader now deposited a handful of letters of the alphabet (an anagram box provides plenty). "A spelling contest," he announced, "of three-letter words. Each player will take his turn in spelling whatever three-letter word I call out. The first word is 'Cat'." The line which had the leader's entire list spelled correctly was acclaimed winner.

Following this, the four lines were merged into two lines which took up their positions at opposite sides of the lawn. "Two Dogs and a Bone" was the next game. A bottle placed in the centre of the lawn equidistant from the two lines represented the "bone". At the leader's word, "Go!" the player standing at the extreme right of one line and the player standing at the extreme right of the other line moved diagonally up to the bottle. The object was to see which player could grab the bottle and run with it to his line without being tagged by his adversary. Should he be tagged, he dropped out of the game; should he reach home safely with the bottle, the other player dropped out. The game continued until one of the sides had no players left.

"Black and White" was the name of the next game. With the same two lines in the same position the leader named one line "Black" and the other "White". They came up to the centre, facing each other. The leader then threw into the air a square board painted black on one side and white on the other. If it fell with the black side down, then the line named "White" chased the "Blacks" back to their own territory, tagging some of them. Those tagged were forced to join the "Whites". And the game commenced again.

After the evening's exertion the young folks were glad to sit down and join in community singing while lunch was being served. Two or three competent song leaders, stationed at certain points in the circle, kept up a friendly rivalry between their groups. When lunch was over they all joined hands to give a hearty rendering of "Auld Lang Syne" —a grand finale to a memorable evening.

## At the Western Fair

(*Continued from page 8*)

attracted attention with its quaint childish figures.

The Women's Institutes of Western Ontario had some fine quilts on display with the Deleware branch receiving the red ribbon for senior work, followed by Brydges; while the Lakeside Institute had the honors on the junior quilt, seconded by Deleware. East Middlesex displayed the work they have been doing with antique furniture, showing articles before and after re-finishing.

Mrs. L. A. Coghill of Kingsville had charge of an interesting library in the same booth, featuring the work of our Canadian writers. Mrs. Coghill had work of her own in the collection, a poem of her granddaughter's, Margaret Helen Coghill, 10 years old, and work by her daughter, Gladys Coghill of Timmins, Ont. Lady Tweedsmuir honored the library by sending some of her work: Scent of Water and Reindeer at Christmas; Katherine Hale was represented in "The Island and other poems"; Jack Miner's book on himself and the birds was there; Johannah Hatwood's Marching, a story of the Women's Institute movemen, and Marjorie Pickthall's Book of Remembrance had a prominent place.

The Ontario Hospital used large photographs and posters to explain Metrazol "shock" treatment in a neighboring booth. "This drug developed in Austria," we read, "resembles camphor. Each injection produces a convulsion, but remarkable results follow." There is very careful nursing coupled with recreation and occupational therapy between treatments. "Mental illness," the posters continued, "is a form of delirium of personality disorder. More than 50 per cent of the patients admitted are returned home convalescent. Last year 326 were discharged from 484 admissions." "Most mental illness is preventable and curable," was the comforting conclusion. There are clinics, we learned, which assist physicians to keep people mentally well—an encouraging tendency of the times.

The Dominion Department of Agriculture exhibits was dominated by a large colored photograph of sheep grazing on the green hillside. Five of the commonest weeds causing that distressing malady, Hay Fever, were shown; ribgrass, pigweed, lamb's quarters, giant and common ragweed.

A highly educational exhibit for those who feed children was featured by the War Memorial Children's Hospital. At seven and a half cents a pound we can feed bananas which are rich in Vitamin C, for ten cents a quart milk furnishes an abundance of calcium for bones and teeth, brown bread at six cents a pound is rich in phosphorus, protein, iron, Vitamin B and calcium, while liver at fifteen cents a pound has an abundance of vitamins A, B and G, also protein, phosphorus, and iron.

There was a decided trend towards better health movements in various other booths. Queen Alexandra Sanitarium depicted the work that is being done to fight the scourge of tuberculosis, showing X-ray pictures of patients be-

(*Continued on page 19*)

*(To be colored with paints or crayons. Whenever you come to a word spelled in CAPITAL letters use that color.)*

YELLOW-HAIRED Susie May and BROWN-haired Teddy are going back to school again. Susie May has a big bunch of PINK (use RED lightly) roses and PURPLE asters. There are a few ORANGE (use RED and YELLOW mixed) color daisies, too, and GREEN leaves. The daisies have BLACK centres.

Susie May wears a RED Snow-White cap and a RED dress trimmed with GREEN peaked edging about the neck and short sleeves. Her socks are RED and her slippers BLACK.

Teddy wears a PINK blouse and BLACK tie and belt. His trousers are GRAY (use BLACK lightly). He has White socks and BROWN shoes. His cap is YELLOW.

"I see you have a nice RED apple for Teacher!" says Susie May.

"Oh, it's not for teacher. It's for us —at recess time!" replies Teddy.

"My slate is BLACK with a YELLOW border. Yours is BLACK with a RED border. I have a BLUE book under my slate," says Susie May.

"Look at the leaves! The oak, over your head, leaves are RED."

**WOMEN IN THEIR "40's"**

**Were Never Meant To Suffer Like This!**

HERE'S wonderful advice for women who dread hot flashes, dizzy spells, nervous hysteria, spells of "blues" and loss of pep. Life from 35 to 52 can be even richer than 20 ever dreamed if you'll only take a little extra care of yourself during this "change." And here's good sound advice:

Get more fresh air, 8 hours sleep and in case you need a good general system tonic rely on TIME-PROVEN Lydia E. Pinkham's Vegetable Compound, made *especially for women* from Nature's wholesome herbs and roots.

Pinkham's Compound helps Nature tone up delicate female systems, build more physical resistance and thus helps calm jangly nerves, lessen distress from female functional disorders and give you more PEP to enjoy life.

For over 60 years one woman has told another how to go "smiling thru" with Pinkham's—why not give it a chance to help YOU.

*Lydia E. Pinkham's*

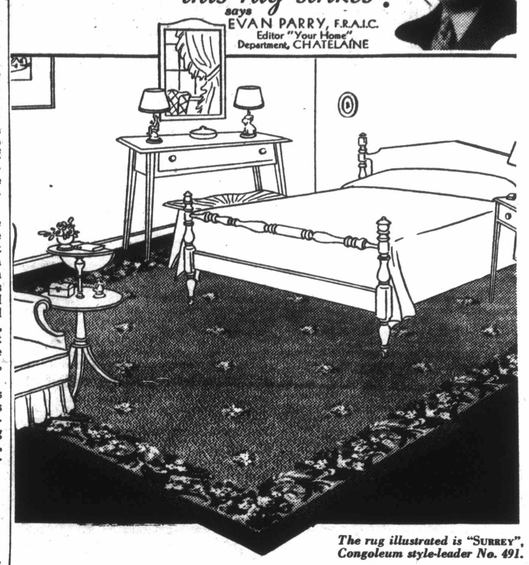
## Letters of a Countrywoman

(*Continued from page 8*)

Now, about the family? Dick is five pounds better than he was two weeks ago. He has been drinking an extra pint of milk a day—between meals. He was below normal, but looks quite five pounds better now. Phyllis looks like a carefree girl again; in looks at any rate she has thrown off several years. The girls are good little housekeepers, and have done their share to bring about this good result. They are clever little dressmakers, too.

Of course I must record a mishap or you might be disappointed. Last week I lost my mail-box key, and although we turned the contents of the house upside down, still no sign. We had to ask the Post Office people to get our mail from the box, and I hated to bother them. When I was doing some washing with the machine I heard something rattling about; put my hand into the soapsuds and fished out the key. Blest if I know how it got there.

I've used up all my space so must sign off.



As ever,

[illegible]TORIA.

*I like the* **NEW NOTE** *this rug strikes!*

says EVAN PARRY, F.R.A.I.C. Editor "Your Home" Department, CHATELAINE

*The rug illustrated is "SURREY", Congoleum style-leader No. 491.*

**"This pattern is one of the most attractive Congoleum has ever produced," says Evan Parry. "The simple design with an old rose background is a new note. This rug can also be used in rooms other than bedrooms." ¶ What Evan Parry says of the pattern illustrated above is true of the whole Congoleum Fall line: these rugs are beyond question the smartest, most colourful Congoleum designers have ever evolved. ¶ See these sensational patterns at your dealer's—and remember— Congoleum Gold Seal Rugs have many other advantages: they are *easy-to-clean*—a damp mop keeps them spotless—they *lie flat* without *fastening of any kind*— and they are surprisingly inexpensive. Look for the Gold Seal when buying: it is your *only guarantee* of complete satisfaction.**

# Review of the Market Situation

## Cattle, Hog and Lamb Prices Closed Lower
## Reduced Supplies Send Potatoes Higher

OTTAWA—The cattle market experienced rather a dull and draggy session at all centres last week and considerable ground was lost in a price way. Dullness in the trade at Toronto was apparent on both plain cattle and stockers and prices on most grades were down 15c to 25c, although the offering was no heavier than during the previous week. In the West, receipts were fairly liberal and quality none too good. The result was a market that was rather disappointing to shippers, especially after the previous week's fairly active trade. Prices throughout the West were anywhere from 25c to 50c lower with nearly all classes sharing in the decline. Several Eastern orders for store cattle remained unfilled at Winnipeg, the quality desired not being readily obtained.

The Buffalo market was off 25c or more, with grass cattle extremely slow. Some sales of Canadian steers were made between $8 and $9 cwt., with most loads going from $8.50 up. A few Canadian calves were sold from $12 cwt. downward. Recent quotations at St. Paul on good Canadian cows were $6.60 and grass steers up to $7.90.

Exports to the United States during the week consisted of 1,298 beef cattle, 384 dairy cows and 869 calves, making the totals to date this year 35,834 beef, 7,768 dairy, 37,032 calves, and 95 hogs, as compared with 148,148 beef, 9,220 dairy, 85,960 calves, and 59,832 hogs in the corresponding period a year ago.

Trade on fat cattle was generally dull on British markets last week, with prices easier and ranging from 40s. 6d. to 42s. 6d. per live hundredweight (112 lbs.). Store cattle sales were disappointing also but good quality dairy cows and heifers in milk continue dear. The demand for these latter continues strong at good prices.

No Canadian cattle have left ports since Friday, September 9. Exports to date this year amount to 36,177, compared with 6,547 in the corresponding period last year.

### Cattle Slow After Drop

NO improvement occurred in the Toronto cattle trade, up to 2 p.m. Monday. Rather conditions looked worse. Besides 700 stale cattle, fresh offerings numbered 4,600 head, including 1,500 from the West.

Only about 400 cattle had been sold by 2 p.m. Not enough butchers were included to establish a market, though odd lots were taken at $4 to $5.75 cwt. by small buyers. No weighty steers and no bulls had been sold and few cows. Cows were being weighed at $3 to $4.25, with some canners $2.25 to $2.50.

Fed calves were moving to the killing pens at about-steady prices, choice making $9 to $9.50 and medium downward to $6.50 cwt.

The few loads of stockers sold mostly went to speculators at $4 to $5.15 cwt.

Last week, Toronto sold 6,321 cattle, including 1,000 Westerners, mostly stockers. Trade was dull throughout on both killers and stores, with prices down 15c to 25c on steers, heifers, and bologna bulls. Small butcher operators were fairly well represented but the larger abattoirs did not take their usual quota. Weighty steers proved the slowest movers, several loads remaining unsold. One load of steers made $7, with others between $5 and $6.50 cwt. Good butcher steers and heifers opened at $6.25 for tops but later no sales were made above $6 and the bulk went at $4.50 to $5.75. Cows held steady at $3 to $4.50, with canners $2.25 to $2.50. Fed calves unchanged between $6 and $9.50. Stockers eased slightly at $4 for common, up to $5.15 for picked lots, and $5.25 for some feeders. Milkers and springers steady up to $70 and $75 each.

Montreal cattle sales totalled 2,707 on the two markets. All grades were well represented and plain to medium butchers declined 25c, with other kinds fairly steady. Good steers mostly made $6 to $6.65 cwt., some up to $7, mediums $5 to $5.50, and common generally $4 to $4.90. Heifers ranged between $2.50 and $5.50, butcher cows $3 to $4.75, canners and cutters $2 to $2.75. Bulls were lower in both quality and price, ranging from $2.50 to $4.25.

Winnipeg weighed up 5,062 cattle. Quality was generally plain to medium with few finished steers showing. Trade proved draggy on all butcher steers and top cows and there was a fairly heavy carryover of these classes. Top cows were 25c to 50c lower. Most action was displayed on medium cows, these selling fairly steady from $2.50 to $3. Canners and cutters sold steady from $1.75 to $2. Odd choice steers topped at $6. The bulk of the good butcher steers brought $5 to $5.50 and the plainer end from $3.50 to $4.50. Only a few cows were eligible to sell up to $3.75. Stocker quality was plain and light kinds held steady with the bulk at $3.50 to $4.25 and odd tops $4.50. Plain heavy feeders were weak in sympathy with butcher cattle.

### Chicago Cattle Market

CHICAGO—The fed steer and yearling market gave a very good account of itself last week, and probably the outstanding feature of the trade was the scarcity of medium-weight and weighty steers of all grades. Receipts of cattle at Chicago were 14,000 larger than a week earlier, but the principal part of the increase was accounted for in a run of Westerns that amounted to about 12,000 head. Most of the Western crop consisted of well-bred mountain, Wyoming and Colorado stockers and feeders, hence the supply of killers was not much larger than the previous week. Strictly choice and prime fed steers and yearlings met an active demand from all interests and medium-weight and weighty kinds closed the period strong to 25c higher, quality considered. All yearling cattle remained steady but prime little yearlings were a little better. Killers were inclined to fight the market on most sessions and slowness was the keynote, particularly on steers and yearlings of value to sell at $9.00-$11.00, and steers within this price spread closed the period weak to 25c lower. Medium grade weighty offerings in instances showed more loss. Common and medium grade grass cattle, the supply of which consisted largely of natives and a few Western killers, held about steady. The week's top again stood at $13.35 cwt.

The way killers bought everything with weight and often substituted when weight was not available would suggest that the fed steer market is in a healthy condition, and many in the trade feel that prices are going still higher. Despite the increase in numbers, beef tonnage was not large last week, and this probably had a stimulating effect upon a rather dependable wholesale market.

### Veal Calves Advanced

VEALERS remained the one bright spot at Toronto, Monday, when receipts numbered 1,500. With 600 to 800 head being exported across the line weekly, demand continued steady to firm. Choice same week last year. Totals to date this year 2,170,622; last year, 2,687,970.

Toronto hogs dropped 35c to 50c, bacons closing at $9.25 to $9.40 cwt. off trucks but mostly at $9.35.

Hamilton packers' prices opened at $9.75 alive and $12.50 to $13.25 dressed and closed at $9.25 and $12.50 to $12.85 for bacons. London paid $9 alive. Brantford opened at $9.15, closed at $9 alive. Guelph paid $8.75 alive, $12 dressed. Kitchener $8.80 and $12. Stratford opened $12, closed at $12.25 dressed. Barrie opened $9.25 alive, $12.65 dressed, and closed $9.10 and $12.40. Peterboro opened $9.25 and $12.50, closed $9 and $12.25. Hull opened $9.25 and $12.65, closed $9 and $12.30. Moncton paid $9.40 and $12.70.

Montreal sold bacons at $9.75, fed and watered, with odd sales up to $10 and truck hogs at $10. Rail grades brought $13.50.

### Hides, Wool and War

THE hide trade is watching Europe. Buyers are afraid to take on further commitments, fearing a downward reaction in the event of a settlement of Europe's more pressing problems. On the other hand, holders of hides and wool are not anxious to sell, as a war would start prices climbing. So little trading is taking place. Prices remained unchanged, as follows, delivered Toronto:

Green country hides, 5½c lb.; cured, 6½-6¾c. Green country calf skins, 8c. Green country kip skins, 7c. Lamb skins, 25-50c each. No. 1 and 2 horse hides, $2.00 each; No. 3, $1.00. Horse hair, 32c lb. Unwashed fleece wool, 12-13c lb.; rejects, 9c. Tallow, No. 1, 3c lb.

### The Wheat Situation

WAR clouds are commonly a signal for higher grain prices, and last week proved no exception. Wheat advanced quite sharply from recent lows, later lost part of the gains as tension eased, but strengthened further at the close, when European conditions appeared to take a turn for the worse.

At Winnipeg, the October wheat future closed 4¼c higher, with slightly lesser gains on more distant options, wheat for delivery next May rising 3¾c. Dealers' quotations for Ontario winter wheat showed some variation, but ranged 1 to 4c per bushel higher.

The Argentine surplus available for export was officially estimated at 24,726,000 bushels. Russian offers were again withdrawn, according to trade reports. Recent Russian shipments have been of poor quality which sold at very low prices. Germany grain is a buy now; that it is unlikely to go much lower.

Settlement of the European situation might bring a temporary easing in grain and flour prices, of course. Meanwhile, however, flour, millfeed and concentrate quotations closed approximately at the same levels as the previous week-end. A fair demand for Canadian millfeeds is coming from the States, mostly for bran.

United States feedstuff markets firmed during the second week of September, influenced principally by advances in feed grains. Wheat millfeeds were in better request and averaged about 75c per ton higher. High-protein feeds were irregular. Cottonseed and linseed meals eased slightly, while soybean meal sold higher for immediate shipment but held unchanged for deferred delivery. Gluten feed and meal were quoted lower. Changes in other feeds depended mostly upon local conditions of supply and demand.

The U.S. index of wholesale feedstuff, prices advanced to 90.8 (1935-36 = 100), compared with 89.4 the previous week and 95.5 a month back.

### Potatoes, Turnips, Etc.

REDUCED receipts pushed potatoes to a high of 90c per 90-lb. bag for No. 1 Ontarios last week. The advance resulted in dealers getting busy to uncover fresh sources of supply, and delivery of these potatoes weakened quotations. Thereupon some who had been holding back dumped further offerings on the market, so that week-end prices were about 10c a bag under last week's high time.

On Monday morning No. 1 Ontario potatoes were quoted at 75 to 80c per bag . . . with receipts not overly plentiful, as the late crop is not yet quite ready, though being dug in a limited way. Heavy frost in north-central areas of the province is expected to reduce yields.

Some New Brunswick Mountains are due to arrive this week, costing 90c per bag delivered. P.E.I. potato shippers are asking $1.05 Toronto, with no takers.

The Federal Fruit Branch states that blight is present in many Prince Edward Island fields. Concerning New Brunswick potato conditions the Ottawa report, dated Sept. 15, said: "Digging under way but not general until next week. Yield reported much below average due to large percentage of late blight, although quality commercial stock said to be good. Wire enquiry demand showing some improvement."

One Ontario turnip exporter told us that he had not paid less than 15c per bushel to growers last week, while a second called the price 13 to 15c, with emphasis on the 13c.

Said Exporter No. 1: "Growers are pushing turnips on the market too fast, thus making the situation bad. While demand was fairly good last week, it is off to-day (Monday)."

A heavy percentage of waxed turnips are being shipped from some Ontario points, with waxing plants at Centralia and Exeter getting under way last week.

The P.E.I. turnip price was reported at

13c per bushel to growers on Monday, though 35 cars were shipped to Boston last week, at 14c per bushel.

Export demand firmed beans. Handpicked whites were called $1.20 per bushel, f.o.b. shipping point, with some asking $1.25. Yellow-eyes, $2.

Onions were firm, $1.05 per 100 lbs. being asked for No. 1 yellows, 1¾ inches up.

A member of the seed trade told us that alsike seed good enough to make No. 1 Canadian grade was bringing up to $6 per bushel in well-threshed form. Alsike that could be cleaned into export grade was worth as much as $5. Seed containing trefoil and sweet clover, he said, was only bringing around $2 per bushel.

The crop of red clover seed looks big, and no real market basis has yet been established. Some fairly good seed was reported sold at $4.50 to $5.50 per bushel in the rough.

Alfalfa seed is expected to be scarce, and little was carried over. Some well threshed seed has been sold at $7.50 to $9 per bushel, with as high as $10 paid.

Sweet clover seed is very low, one man quoting us $1 to $1.40 per bushel in the country.

Demand for hay remained at a low ebb, with no change in prices. No. 2 timothy nominal at $10 to $11 ton, delivered Toronto, and No. 3, $8 to $9. Oat straw, $5 ton delivered, and wheat $6.

### Dairy and Poultry Produce

BUTTER prices showed little net change from the previous week's closing level. No. 1 Ontario creamery solids were quoted, Monday morning, at 22½c lb., delivered Toronto. Heavy stocks and liberal production remained depressing factors.

No. 1 cream was quoted at 22 to 23c lb. butter-fat on truck.

The underlying tone of the United States butter market continued to improve last week, though the price was only 26¼c lb. in New York on Sept. 16.

Large cheese was quoted at 14½ to 14½c lb. Toronto, Monday, a.m.

When Toronto egg prices got above the Montreal level last week, receipts started to move from the East to Toronto. Normally Montreal is about a cent above Toronto. This situation caused an easier trend in Toronto, with prices of A-large and A-medium closing a cent or two under last week. However, pullet eggs advanced, consumers turning to them because of the higher prices of larger eggs.

Receipts of chickens continued heavy at Toronto, especially the lighter weights. Trade is generally slow, with prices declining on light weights.

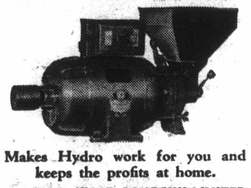
### Cheese Board Prices

AT Alexandria, last Saturday, 2,036 boxes of white cheese sold at 13 3-4c lb.; 277 colored and 115 colored triplets, 13 13-16c. Belleville, 1,670 white 13 7-8c, 919 colored 13 13-16c. Campbellford, 814 white, 805 colored, 13 3-4c. Casselman, 1,210 white, 13 3-4c. Cornwall, 377 white 13 3-4c, 1,362 colored 13 3-4 to 13 13-16c. Delta, 1,332 white 13 13-16c to 13 3-4c, 279 colored 13 13-16c.

Finch, 179 white 13 3-4c, 555 colored 13 13-16c. Iroquois, 571 white 13 11-16c, 719 colored 13 13-16c. Lanedowne, 123 white, 449 colored, 13 13-16c. Madoc, 845 white 13 7-8c. Napanee, 1,650 white, 250 colored 13 13-16c. Ottawa, 196 white 13 3-4c, 260 colored 13 13-16c. Perth, 630 white 13 13-16c.

### Cash Grain

FOLLOWING are last Saturday's closing quotations for carlots of Western cash grain, on the basis of c.i.f. bay ports:



No. 1 Northern wheat, 71¼c; No. 2 Northern wheat, 69¼c; No. 3 Northern wheat, 68c; No. 4 Northern wheat, 63¼c.

No. 2 C.W. oats, 36½c; No. 3 C.W. oats, 34½c; No. 1 feed oats, 33½c.

No. 3 C.W. barley, 40¾c.

No. 1 feed screenings, $12.50 per ton; No. 2 feed screenings, $11 per ton.

Wood's Electrical Farm Equipment

THE W. C. WOOD COMPANY LIMITED
2482 Dundas St. West, Toronto, Ont.

**Grain Futures, Winnipeg, September 17:**

Wheat—Oct., 66⅛c; Nov., 66¾c; Dec., 66c; May, 69⅛c.

Oats—Oct., 31⅛c; Dec., 29⅞c; May, 31⅜c.

Barley—Oct., 36¾c; Dec., 37c; May, 38⅛c.

Flax—Oct., $1.38. Rye—Oct., 41¾c.

### Ontario Grains, Wholesale

ON Saturday Ontario grains were quoted at the following prices, f.o.b. shipping point:

Wheat, weighing 58 lbs. or better per bushel, 53-57c; oats, No. 3 white, weighing 27 lbs. or better, 24-29c; feed barley, 45 lbs. up, 33-36c; corn, 60-65c; rye, 38-40c; malting barley, 48 lbs. or better, 42-44c; buckwheat, 40-41c.

### Flour, Concentrates and Grain

MANITOBA first patent bread flour, $2.67⅛ per (cotton) bag ($5.35 bbl.) in mixed cars delivered, second patent bread flour, same basis, $2.42½ per bag ($4.85 bbl.), winter wheat flour, $1.95 per bag ($3.90 bbl.); bran, in mixed cars, delivered, $17.00 ton; shorts, $19.00 ton; white middlings, same basis, $27.00. Ton lots at mill or warehouse door: Bran, $16.00; shorts, $18.00; middlings, $26.00.

Gluten feed, 29% protein, $29.00 ton in less carlots, f.o.b. Port Credit, or in ton lots at Toronto warehouse.

Oil cake, 33% protein, $38.00 ton, f.o.b. mill, Toronto, in carlots; $41.00 in ton lots. Oil cake, 38-40% P., from Canadian flax, $39.00 ton in carlots, f.o.b. Baden, or $40.50 ton, Toronto; less carlots, $1.00 ton more.

Cottonseed meal, 41% protein, $32.00 ton, in carlots, delivered Toronto, and $35.00 ton in less carlots.

Ontario-grown soybean oilcake meal, high protein, $33.00 ton in carlots, f.o.b. Baden, or $34.00 Toronto; $1.00 ton more in ton lots.

Whole yellow corn, 14% moisture, in 100-lb. bags, $34.00 ton, at elevator. Ground corn, $35.00 ton, and cracked corn, $36.00.

### Miscellaneous Feeds

SALT, carlots, f.o.b. factory — No. 1 fine, $4.83 per ton, bulk; No. 1 fine, barrels, $1.09; No. 1 fine, 100-lb. sacks, 29c; No. 1 coarse, $7.27 per ton, bulk; No. 1 coarse, 100-lb. bags, 38c; block, 50 lbs., plain, white, 24c each; block, iodized, 18c each; dairy salt, 50-lb. sacks, 23c each; table salt, 280-lb. (net) barrels, 20 x 14, $2.01 bbl. (All salt prices net f.o.b. factory).

Poultry prices f.o.b. warehouse, Toronto: 100-lb. bags of coarse or fine salt, 57c cwt.

Sulphur, $3.00 cwt., or 4c lb. Epsom salts, $3.00 cwt., or 4c lb. Glauber salts, $2.50 cwt., or 3c lb. Hydrated lime, for spraying, $16 ton, 45c per 50 lbs. Ground limestone, 80-lb. paper bags, $6.25 ton, 30c per 80 lbs.

Molasses, one barrel (45 to 50 gals.), 19c gal.; half barrel of 25 gals., 22c gal.; 5-gal. cans, $1.60. Tins returnable.

Digester tankage, 69% protein, $52 ton or $2.70 cwt. Digester tankage, 50% protein, $46 ton or $2.40 cwt. Meat meal, 50%, $43 ton or $2.25 cwt. Meat scraps, 60%, $52 ton or $2.70 cwt.; 55% hog concentrate, $43 ton or $2.25 cwt.; pig starter, $43 ton, $2.25 cwt.; pig grower, $37 ton, $1.85 cwt.

White fish meal, 70% protein, $72 ton or $3.70 cwt.

Special bone meal for cattle or poultry, $51 ton, $2.55 cwt. Bone char, 100-lb. bags, $42 ton, or $2.10 cwt.

Poultry grit, $12 ton or 75c cwt. Oyster shell, hen or chick, $16 ton or 90c cwt. Oyster shell substitute, $10-$11 ton or or 60-75c cwt.

### Montreal Poultry Trade

MONTREAL—Live poultry developed a weaker tone last week. Receipts increased considerably and with demand slow some accumulation of stocks took place. Poorly finished birds are still hard to move, the demand being for heavy, good-quality birds. Chickens, 5 lbs. up, wholesaled at 18-20c lb.; 4½-5 lbs., 16-18c; 4-4½ lbs., 14-16c; under 4 lbs., 13-15c. Fowl, 5 lbs. up, 17-18c; 4½-5 lbs., 15-17c; 4-4½ lbs., 13-15c; under 4 lbs., 11-13c. Old roosters, 11-13c. Young ducks, 5-6 lbs., 17-19c; 4-5 lbs., 16-17c; 3-4 lbs., 15c. Paying prices to shippers are approximately 1 to 3c below wholesale quotations.

The dressed poultry market was steady with fresh-killed fowl continuing in good demand.

Judge—Noel Gibson.

Awards—Ram, 2 years and over: 1, 2, and 4, Robert G. Charter, Blackwater; 3, William Milne, Wheatley. Ram, yearling: 1, Milne; 2 and 3, Charter. Ram, lamb: 1, 2, 4 and 5, Charter; 3 and 6, Milne.

Champion Ram: Robert Charter.

Ewe, 2 years and under 3 years: 1 and 4, Milne; 2 and 3, Charter. Ewe, yearling: 1, 2 and 4, Charter; 3 and 5, Milne. Ewe, lamb: 1, 2, 3 and 4, Charter; 5 and 6, Milne.

Champion Ewe: William Milne.

Pen, 3 ewe lambs: 1, Charter; 2, Milne. Pen, 3 ram lambs: 1, Charter. Open flock: 1, Charter; 2, Milne. Wether lamb: 1, Charter.

### Sale Dates

SATURDAY, OCTOBER 1. — Shorthorns. Combination Sale of C. M. Blyth, Robt. Elliott & Sons, and W. J. Kay at Guelph, Ont.

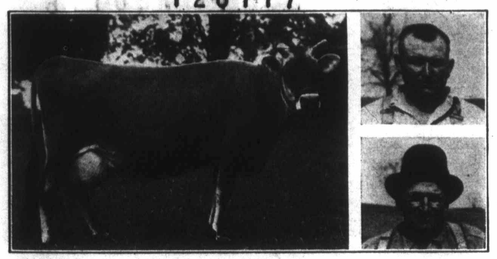
MONDAY, OCTOBER 3. — Shorthorns. Combination Sale of James Douglas & Sons, Caledonia, and W. J. Russell, Unionville. Sale at Unionville, Ont.

TUESDAY, OCTOBER 4. — Shorthorns. Production Sale of Shorthorns at St. Marys, Ont., by H. Noel Gibson, Ernest Robson & Son, Jas. Watt and Robinson Bros.

WEDNESDAY, OCTOBER 5.—Shorthorns. Combination Sale of P. H. Deacon, Unionville; T. A. Russell, Downsview, Ont., and John Gardhouse & Sons, Weston. Sale at Unionville, Ont.

THURSDAY, OCTOBER 6. — Ayrshires. Dispersal sale of Ayrshires at the Alfalfa Bank Farm of W. B. Collver & Sons, Wellandport, Ont.

WEDNESDAY, OCTOBER 19. — Annual Auction Sale of surplus stock at the Ontario Agricultural College, Guelph, Ont.



TUESDAY, OCTOBER 25. — Aberdeen-Angus. Complete dispersal sale of Malcolm Bailey, Uxbridge, Ont.

WEDNESDAY, OCTOBER 26. — Shorthorns. Annual Sale of the Western Ontario Consignment Sale Company, at London, Ont.

TUESDAY, NOVEMBER 8. — Holsteins. The 19th Guelph Sale at Guelph, Ont. A. B. Brubacher, Bridgeport, Ont., Sales Manager.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

*Pansy Loo, in the Jersey herd of Bert Kellum (below) and Omar Haviland (above) at Waterford, Ont., recently completed an official record of 19,361 lbs. milk, 934 lbs. fat, in one year. Her top month's output, 1,833 lbs., came in her FIFTH month after freshening, and at the close of the year she was still rolling out 47 lbs. a day.*

*Since 1930, Kellum & Haviland's regular milking ration has been 24% Purina Cow Chow and home-grown grain. Pansy Loo was conditioned for freshening, and fed for her first month of milking, on Purina Cow Dryena.*

# CLEARED $362.97 LAST YEAR WILL MAKE MORE THIS YEAR

FRANK BERRY, South Mountain, Ont., cleared $362.97 from his Purina-fed flock last year. And he figures he will do better this season.

Mr. Berry raised 417 White Leghorn pullets, last year. He found the first egg on August 9, at 4 months and 4 days. Between then and March 7, when he sold the whole flock, he gathered 4,117 DOZEN eggs—590 dozen a month, or 237 eggs a day. He sold $1,053.36 worth of eggs, and sale of pullets brought in $228.70—a total income of $1,282.06.

*Frank Berry, with one of his pullets—5¾ lbs., at less than 4½ months.*

Against this he charged $919.09 as total cost of buying chicks and feeding, right through to time of sale. So he CLEARED $362.97, plus all eggs for household use.

This year, Mr. Berry's 450 Barred Rock pullets averaged 5½ to 5¾ lbs. at just over 4 months, and he found the first egg at 4 months and 6 days. They are coming up fast in egg production and egg size, enabling him to cash in fully on Fall egg prices.

**Both years, Mr. Berry raised his flock on Purina Startena and Growena. His last year's laying ration was Layena. This year he will feed Layena or Lay Chow, depending on his supply of home-grown grain.**

It's a profitable example to follow!

# MORE MONEY FROM TURKEYS FINISHED THIS EASY WAY

YOU can raise the price of your turkeys several cents a pound (and add on pounds as well) by finishing them with Chicken Fatena Checkers Four or 5 weeks on Checkers plumps the bird out, gives them that meaty milk-fed look, and helps eliminate pin-feathers. Housewives like the look of Fatena-

finished birds, and are willing to pay more for them.

Begin feeding Fatena Checkers 4 or 5 weeks before marketing, or when your turkeys are 22 weeks old. If they have been on grain or mash, begin by scattering Checkers on top of the usual feed morning and evening. The birds soon take to them. From then on, keep Checkers before the birds all the time.

Fatena Checkers give *good* results if fed half-and-half with dry, well-matured home grains. But they give *best* results if fed as the whole ration.

Use these Checkers, too, for finishing chickens—2 weeks turns the trick. No crate, no milk, no muss—but a crate-fattened, milk-fed finish that means more money.

*Winners in the county Bacon Hog Competition at Central Canada Exhibition, Ottawa. "Outstanding for bloom and firmness of finish," said the judge. Above—First prize pen shown by Clarence MacGregor, Jasper, Ont. Raised on Purina Pig Startena and Pig Growena—no milk. Mr. MacGregor won the same placing last year with pigs fed the same way. Below — Second prize pen for Hubert Maitland, Jasper, Ont., another Startena-Growena lot. Mr. Maitland took first in pen of 6 bacon hogs at Ottawa Winter Fair last year, with pigs raised on the same feeds.*

# FEEDING

Published by

**Purina Mills, Woodstock, Ontario**

## "GOSH! HOW THEY'VE IMPROVED THE FEED!"

**That's What Your Cows Will Say After a Week on the New Purina Cow Chows—Not in Words, but in Milk**

THE old Purina Cow Chows were top-notch dairy feeds. None better, in their day. Thousands of dairymen proved that fact.

But the new Purina Cow Chows are *better than the old!* You can see the difference in the milk pail almost right away—and you keep right on seeing it, because these *new* Cow Chows are made according to a new principle.

### Why They're Better

This new principle is simple—yet so effective that putting it to work is the greatest forward step in feeding milkers for many years. It means recognizing that some feed ingredients are much more easily digestible than others, and that some feed ingredients are not only easily digestible themselves but assist the digestion of others. It means measuring rations, not by what you put in the cow's mouth, but by *what she has left to put in her udder* after the work of digestion is paid for.

Putting it another way—a hammer mill operator charges you more for grinding a ton of alfalfa than a ton of grain, because it takes more time and more power. Your cows "charge" you more for digesting certain feed ingredients than others, for the same reason—because they take more time and more power—and the cows take their toll right out of the feed itself. Purina Cow Chows have been re-built, re-balanced, to cut down the "power" needed for digestion, and leave more net food value free for making milk.

### It's a Fact, Not a Theory

These new feeds have been thoroughly tested out at the Purina Experimental Farm. Sixty cows were divided into two even groups—matched cow for cow in weight, age, stage of lactation and milking ability. One group was fed a first-rate old-standard dairy ration. The other was fed the new Therm-rich ration. The cows on the new feed averaged 141 lbs. per month MORE MILK—an *extra 80-lb. can per day from each 17 cows.*

At the end of 6 months the rations were switched. The ones put on the new ration promptly came up in milk, the others dropped back!

### Builds Cows Up

Another point: In the 6 months the cows on the new ration gained 146 lbs. apiece. It's a milk-maker—but not a "blaster". It makes milk, and at the same time *builds cows up.*

These new Therm-rich Cow Chows, built to balance your home-grown grain, will help you get highest returns with a minimum of cash outlay. Plan to profit from that fact, this Fall and Winter. See your Purina dealer, and talk it over with him, your first trip to town.

**CHECKERBOARD TIME**

Every MONDAY WEDNESDAY FRIDAY

| | Noon |
|---|---|

Fun, music, songs—and good sound sense. You'll enjoy it. Tune in!

## TURN YOUR HOME-GROWN GRAIN INTO A SELF-FEEDER RATION

IF you are one of the thousands of pig feeders who have tried out hopper feeding you certainly don't want to go back to that old slop-lugging slavery.

But maybe you have a big crop of good grain. Maybe you are looking to hogs as the best way to market it. Maybe you have always fed chop the slop-feeding way, and you're doubtful how it would work in a hopper.

Here's the answer to your problem: 22% Pig Chow. It is built to balance chop for hopper-feeding. Naturally, it will do just as good a job if slop-fed . . . but it's built to do the same job fed dry from a self-feeder.

You mix 100 lbs. of Pig Chow with 200 lbs. of chop. That makes a very low-cost ration, and it's BALANCED. So it gives you very economical gains, and gets your pigs away to market 4 to 6 weeks earlier than straight chop.

If you haven't enough grain to carry your pigs through, remember Pig Growena, the complete ration. It's a hopper ration, too, and great pig feed.

See Puffiness Go

Quick Relief Saves Horse for Next Day's Work . .

Puffy knees mean time lost during the busy work periods. You must give your horse *quick* relief if you want to use him next day. Absorbine does this. It sends an *increased* blood supply to the sore muscle area where puffiness shows. And the blood carries off the congestion quickly. Use Absorbine twice daily. Will not blister. Used by farmers for over 40 years. At druggists. $2.50 a bottle. W. F. Young, Inc., Lyman Building, Montreal, Canada.

Absorbine's action goes direct to sore area

## At the Western Fair

(Continued from page 13)

fore and after various types of treatment, including the collapsed lung. The medical department of Western University exhibited the iron lung along with many other medical devices in life saving.

The paintings in the art gallery have never been lovelier than this year. Clare Bice, a London, Ont., artist, had done a large painting of Peter MacGregor, the first settler of that city, standing axe in hand, plaid scarf blowing over his strong shoulders, intelligent head thrown back towards his wife, Lavinia, and young son, Mahlon—a sharply cut group against a background of freshly cleared land around a log cabin. Where that cabin stood is now the southwest corner of King and Ridout streets.

In one corner was a collection of Robert Holmes' paintings of Canadian wild flowers from life. They looked just as they did in our own woodlot, early bloodroot pushing up from the decaying bark at the base of a rotting tree trunk, milkweeds scattering their white fluff at the bursted apex of a ripened seed pod, graceful wild columbines lifting their bright heads, Jack-in-the pulpit beneath the swaying tree-tops; until looking at them we might say to each other: "Let's go gathering wild flowers, again!"

I go from one exhibition to the next recalling the beautiful pictures exhibited before and vividly impressing each new one on my mind to add to the ones already there, do you? The London Camera Club had as many lovely exhibits as ever. Last year the snow scenes seemed the most remarkable. This year it was the silvery, billowy, windblown cloud effects. In one a young brother and sister were silhouetted on a hill against a silver sunset, as they stood windswept and lost in admiration. The Silver Lining was another beauty, with the cloud's outline sharply etched in silver from the dying sun.

The farm scenes were among the most remarkable. In, Hurrying the Work, the farmer driving his three horses hastened the day's plowing against a background of sunset clouds. In another, four horses strained against the wind drawing a binder over a nearly finished field, while above the silver clouds were driving, light raying downwards from their edges. September Gale was both appropriate and convincing. One was tempted to turn up the coat collar against the blast which bent the tree-tops and blew the first leaves of autumn downwards. Rain on the Screen was the title of another, showing beyond the ruffled kitchen curtain, the trickles of rain against the screen.

Then we pulled up short before a picture of a fat man absorbed in a radio program and the whole entitled Charlie. We laughed with him and we laughed also at the small boy singing with a widely opened mouth as he played on his accordion in utter abandon.

Across the aisle the art students of Western University were doing rapid sketches of exhibition visitors and at the far end they had sculptured a huge reproduction of the lovely painting, The Doctor.

Downstairs the farm women were thronging the stove dealers. Every conceivable kind of modern range was present with gleaming electric models in the majority. They looked so tempting and yet there were cases where the old kitchen range (now burnished and glorified beyond recognition) was the only solution to the problem of large, old-fashioned kitchens and winter's intense cold.

GOODYEAR'S Complete LINE

For Tough Going... GOODYEAR "SURE-GRIP" Tractor Tires

● The big, solid, widely-spaced, self-cleaning bars on this husky Goodyear provide maximum gripping traction . . . give a continuous and uniform pull without jerkiness or side slip . . . in any going. Overlapping design provides smooth rolling on hard ground . . . extra traction where it is needed most. Chemically treated rubber resists wear and barnyard acids.

ALL-TRACTION TRACTOR TIRE

● The only tractor tire with full 4-way traction in any direction . . . forward, backward or sidehill. The only tractor tire offering Goodyear's exclusive "controlled wear" feature. For sand, loam and other loose soil conditions the "All Traction" tops them all.

RIB-TREAD TRACTOR TIRE

● An easy steering front wheel tire heavily reinforced to withstand scuffing and wear.

IMPLEMENT TIRE

● A slow-wearing tire, rolls easily and smoothly, protects valuable equipment, saves you money.

It will pay you to specify Goodyear tires when buying a tractor or implement. Ask your Goodyear dealer about Goodyear tires for new and old equipment.

## Choicely Bred Shorthorns at Series Opener

MOST practical have been the ideals of the three Shorthorn breeders contributing entries to the Blyth-Elliott-Kay auction in the Winter Fair Buildings, Guelph, on Saturday, October 1. If you have had the opportunity of looking over these splendid herds in their own pastures you will appreciate what we mean . . . deep, thick, short-legged matrons showing splendid breed character and the ability to raise their calves well. And as you would expect, outstanding sires have been used in these herds.

Three of W. J. Kay's four entries are by Brawith Toft, good-breeding son of Brawith Boy (Imp.), Highland supreme champion and senior sire in the Willowbank herd of Jas. Douglas & Sons. This summer, Mr. Kay purchased Killearn Beauty Lad 2nd, an outstanding bull calf of select ancestry.

Bred females in the contribution of Robert Elliott & Sons carry the service of Collynie Hilyard (Imp.), their present herd sire. He was bred by Duthie Webster and carries a double cross of the great Collynie Royal Leader . . . being a roan son of Cairnsale Satisfaction by Collynie Royal Leader and out of Royal Hilda by Rosehaugh Victor by Collynie Royal Leader. Included are several gets of Blythwood Golden Archer, a son of Divide Golden Archer, grandson of that great breed improver, Browndale Count.

A lot of the heifers in the consignment of C. M. Blyth are by Divide Golden archer, that stood first at the Chicago International and American Royal in 1933. He was champion at Guelph in 1934, and is by Browndale Archer by Browndale Count. Most of the Blythwood females are bred to Divide Goldust, he a prize-winning son of Browndale Goldspur by Browndale Count. Three of the females are in calf to Mr. Blyth's junior herd sire, Blythwood Golden Era, outstanding son of Divide Golden Archer . . . and by notable coincidence showing the same breeding from the fourth generation down, as Campbells Command, the grandson of Collynie Royal Leader in which Mr. Blyth recently bought a half-interest from Grant Campbell.

This sale makes a grand opener for a great series of Shorthorn auctions.

## Douglas-Russell Shorthorn Auction

NO introduction is needed by the Willowbank herd of James Douglas & Sons, of Caledonia, Ont., that produced Browndale Count, rated the greatest Shorthorn sire the breed has known in America. On this occasion, the Douglases have joined with W. J. Russell, who built his outstanding Klaymor herd on foundation stock personally selected in Scotland.

The 25 choice females from the noted Douglas herd include: Kinellar Broadhooks 2nd, consistent 1937 junior yearling winner, bred to Drynie Roister, dark roan, 1937 prize-winner. Rosebud Rachael (Imp.), young cow of foundation calibre; bred to Brawith Boy (Imp.). Browndale Augusta 2nd, royally bred and selling with choice, red heifer calf by the champion Brawith Boy (Imp.). Morning Blossom 27th, senior yearling show heifer from the family that produced the immortal Count; bred to Brawith Boy (Imp.). Browndale Myrtle 7th, junior yearling show heifer from noted family of winners, and bred to Browndale Brawith Boy, reserve senior champion bull at 1938 C.N.E.

Also from the family of Browndale Count is Morning Blossom 28th, junior yearling show heifer, bred to Browndale Brawith Boy. Brawith Jilt 2nd, deep, short legged show heifer, bred to Browndale Brawith Boy. Lady Rosewood 25th is from a cow the Douglasses consider their best, and in calf to Edellyn Browndale Sultan.

The W. J. Russell consignment comprises 9 choice daughters of Collynie Royal Barrage, bred by J. Duthie Webster; 6 nice heifers by Aldie Reynoldstown, that carries the blood of the noted Collynie Royal Leader. Also the following five bulls—all sons of Collynie Royal Barrage—Klaymor Beau Ideal, at of an outstanding imported cow and rated as a top-notch herd bull prospect. Klaymor Butter, smooth bull carrying a wealth of flesh under a good hide that should make good in showring or breeding herd. Klaymor Beacon, red bull with splendid character and type, from a family of famous winners. Klaymor Benefactor, another great herd bull prospect that will improve tail heads and hindquarters. Klaymor Beau, well-balanced, smooth, line-bred grandson of Rosehaugh Mandarin; his full brother has been grand champion at leading 1938 shows.

## Shorthorn Entries From Three Show Strings

CURRENT show reports provide plenty of publicity for the Deacon-Gardhouse-Russell sale at Glenburn Farms, Unionville, Ont., on Wednesday, October 5th.

The lengthy list of wins scored at the 1938 Canadian National Exhibition by the Glenburn Farms herd of Col. F. H. Deacon, Unionville, Ont., included both grand championships. As the Glenburn herd has also been prominent at Canadian and Chicago fairs for a number of years, it is only natural that Glenburn sale entries should either be prize-winning animals or closely related to prominent winners of previous years.

Among Glenburn Farms' females not mentioned in the sale advertisement are, Glenburn Brawith Bud 3rd, senior yearling that stood first at Calgary and well up at other 1938 shows. Glenburn Rosewood 6th, breedy, show granddaughter of Edellyn Favorite. Glenburn Roan Lady 10th, thick show heifer by Brawith Chief. Glenburn Myrtle 7th, considered one of the most valuable individuals in the sale; the progeny of her sister, Glenburn Myrtle 2nd, undefeated as a group this past two years, while the get of her sire, Brawith Chief, placed first wherever shown in Canada this year. Glenburn Blossom 4th carries crosses of such noted bulls as Browndale Archer, Edellyn Favorite and Fanor Chief 9th. Glenburn Annette 5th, another winning member of the 1938 show herd. Glenburn Broadhooks 7th, second prize senior calf at C.N.E. Glenburn Beatrice 2nd, red Oct. '37 calf, considered one of the best in the offering.

Ten head come from the Brae Lodge herd of T. A. Russell, Downsview, Ont. Three bulls and two 1937 heifers are by Brae Lodge Footprint, junior champion at C.N.E. and Royal in 1935, and well up at Chicago; winner of grand challenge shield at the C.N.E. in 1935 and 1936 for the best bull bred and owned in Canada. The red yearling bull, Haylands Importer, is by Divide Gold Nugget that topped the 1936 Allen Cattle Company sale at $1,800. One of the Footprint bulls is out of that great breeding matron, Nonpareil 60th (Imp.). The red Brae Lodge Crocus 5th, and the roan Mayflower Brae 3rd, are daughters of Raveni Master, a great-grandson of the famous Browndale Count.

From the Aberfeldy herd of John Gardhouse & Sons, Weston, Ont., are entered ten head. Among them the red show heifer, Rosewood Caroline, out of the well-known Rosie O'Grady, grand champion Shorthorn female at London last week. She is bred to the prize-winning Princeton Publican . . . as is Princess Averne, junior yearling show heifer out of Princess Roberta, reserve junior champion at the 1935 Royal. Also, Aberfeldy Rosewood will have a calf by Princeton Publican at her side by sale time. Four of the heifers were sired by Velvet Lad, he by Collynie Magic Lute. Velvet also got Aberfeldy Acme, a summer yearling bull entry.

## Scotch Shorthorns Selling at St. Mary's

THIRD in the great series of Shorthorn sales is the auction at Robinwood Farm, two miles south of St. Mary's, Ont., on Tuesday, October 4. Most of the Robinson Bros.' entries are by Robinwood Model and Robinwood Clerk, both of these herd bulls being sons of Collynie Royal Barrage (Imp.), bred by Duthie Webster.

The eleven head from H. Noel Gibson's herd features the blood of his bull, Proud Arrow, a grandson of the noted Browndale Member.

Ernest Robson ": Sons consign several females sired by, or bred to, Rare Commander, another grandson of Browndale Member. Also two open heifers by Divide Advance.

The seven head selected from the well-known herd of J. A. Watt include two heifers by Millhills Ransom (Imp.), that also sired one of the bulls contributed by Robinson Bros. Ransom's gets are certain to attract keen interest.

## Guernseys Sold at King

SOME splendid "buys" were available at the Guernsey sale held at King, Ont., September 17, by Ethelmere Farms, King, and Valley Crest Farm, of Oakville, Ont. Indeed, W. C. Harris, of King, was so impressed with the opportunity presented that he took eleven head, including the 4-year-old cow, Ethelmere Flora Dora, at $185; the yearling bull, Valley Crest Aristocrat, at $150; the fresh 6-yr.-old cow, Lakewood Nancy, at $150; the 8-yr.-old cow, Don Alda Pauline's Daisy, at $137.50; 4-yr.-old V.C. Gladys, $135; the 4-yr.-old Fenham Madam, $130, and two head at $100 each.

Several other buyers were from the King and Oakville districts, including R. McLelland, of Maple, who paid $185 for the 7-yr.-old, Rosewood Duchess, and $150 for the 5-yr.-old, Brooknill Diana. Geo. H. King, Oakville, took the 4-year-old, Lakewood Lady, at $135, and the 2-yr.-old, V.C. Primrose Queen at $110. Mrs. F. W. Orrall, Sault Ste. Marie, bought the 6-yr.-old Briar Rose of Ethelmere for $180 and the 7-yr.-old Royal's Peg of Ethelmere for $125. A. Wetherall, Woodbridge, $110 for the 2-yr.-old E. Pride and $110 for the 4-yr.-old Lakewood Countess. J. D. Elmsley, Oakville, got the 9-yr.-old Lady Jane of Ethelmere at $115, while L. Nichols, Gormley, paid $100 for the 10-yr.-old, Aida of Ethelmere, and Leask Bros., Seagrave, $100 for the 4-yr.-old V.C. Frances.

Other buyers included: Thos. Roadhouse, King; H. Kelly, Schomberg, and E. Pearce, Claremont.

Mr. G. W. Hinman, Madison, N.Y., purchased 45 pure-bred Holsteins in Eastern Ontario. Breeders supplying cattle are: J. Kenneth Thorpe, South Mountain, 9; Alex. R. Collison, Brinston, 8; Clarence Green, Lyn, 5; Herb. Cuthbertson, Perth, 3; J. W. MacLeod, Dalkeith, 3; John McArthur, Lancaster, 6; two each from Jas. Couch, Smith's Falls; E. H. Mills, Spencerville; Stanley Stephenson, Russell; Jos. G. Judge, Jasper; and one each from Geo. H. Goodfellow, Lancaster; J. and R. Bowes, Almonte and Victor Kellough, Almonte.

**FROM THREE NOTED HERDS**

**At Glenburn Farms, Unionville, Ont.**

**Wednesday, Oct. 5th, 1938**

Rosie O'Grady, grand champion Shorthorn female at London, Saskatoon and Regina for John Gardhouse & Sons, Weston, Ont. Her bred, show daughter is selling.

T. A. RUSSELL
Brae Lodge Farm, Downsview, Ont.

T. A. Russell consigns 4 bulls and 6 females. . . . Three of the bulls and 2 heifers sired by the outstanding show and breeding sire, Brae Lodge Footprint, winner at the C.N.E. in 1935 and 1936 of the E. J. Freysenq Cup for best bull bred and owned in Canada. . . . One bull by Divide Gold Nugget that gained outstanding success in the Allen Cattle Company herd, Colorado Springs, Colorado, and which topped their 1936 sale at $1,800. . . . Two heifers by Raveni Master, great show and breeding bull and great-grandson of Browndale Count. . . . One bull and 2 heifers out of good Rosewood cows that have won outstanding showring success. . . . A choice, junior bull calf out of the great breeding matron, Nonpareil 60th (Imp.), mother of Brae Lodge Nonpareil, undefeated as a junior yearling and winner of five grand championships.

J. GARDHOUSE & SONS
Aberfeldy Stock Farm, Weston, Ont.

Three choice entries of T. A. Russell, Weston, Ont. From left to right, Rosewood 60th, Rosewood of Brae Lodge 2nd and Brae Lodge Crocus 5th.

F. H. DEACON
Glenburn Farms, Unionville, Ont.

John Gardhouse & Sons are selling 2 bulls and 8 females. . . . Four 1937 daughters of Velvet Lad, including—Rosebud Camelia, red, undefeated as calf on Western Circuit; jr. ch. at Brandon and Regina; res. jr. at Calgary, Edmonton, Saskatoon and London. Princess Bloom, red show heifer from 1st prize winner at 1935 Royal. . . . Two show heifers carrying the service of Princeton Publican, undefeated aged bull in the West—Rosewood Caroline, red daughter of Rosie O'Grady, grand champion female at London, Saskatoon and Regina. The roan Princess Averne, top jr. yearling at Brandon and well up at other shows. . . . The Roan Laddie 2-yr.-old, Aberfeldy Rosewood, will have calf at side by Princeton Publican. The roan 2-yr.-old Victoria Princess, full sister of the $315 heifer, sold to Maxwelton farms last year. . . . A red, Oct. '37 bull by Brae Lodge Footprint, and a summer yearling show bull by Velvet Lad.

Glenburn Declaration, consigned by F. H. Deacon, Unionville, Ont. This bull stood first as a calf and first three times as a yearling. His full sister, Glenburn Clara 6th, was C.N.E. grand champion.

F. H. Deacon offers 2 bulls and 16 females . . . Glenburn Declaration, dark red, Jan. '37 son of Bugler's Guard; deep, smooth, good-headed bull that stood first at C.N.E. as calf, and at his first three shows as yearling. His full sister, Glenburn Clara 6th, undefeated as 2-yr.-old at seven 1937 shows, and gr. ch. female at 1936 C.N.E. Glenburn Defender, red, Nov. '37 son of Brawith Chief. Smooth, deep, lowset calf by sire of 1st prize get at seven 1936 shows . . . 6 good cows—Glenburn Goldie, from the mating of 2 International grand champions, bred to Bugler's Guard. Glenburn Rosewood 4th, smooth full sister of cow that dropped the great 1936-37 International grand champion, Rosewood of Heifred 4th; rebred to Bugler's Guard. Glenburn Graceful Lass 5th, richly bred sister of the dam of the $530 Glenburn Brigadier; sells with roan heifer calf by Brawith Chief. Glenburn Jilt 3rd, typical of the breedy, good-headed, rich-colored daughters of Glenburn Field Marshall. Her first calf, by Brawith Chief, selling separately; rebred to Bugler's Guard. Glenburn Gloster Queen 4th, full sister of Glenburn Acquisition, prominent prize-winner sold to Jas. Douglas & Sons. Glenburn Brawith Bud 2nd, short-legged heifer and good milker, that did well by her first calf, and rebred. . . . Also, 10 choicely bred heifers that are prize winners or from families prominent in the show-ring.

# Unions and Agriculture

(*Continued from page 3*)

desires and actions as surely as the law of gravity determines the behaviour of inert matter. Certain agitators out West convinced some of the farmers that this law was a myth, that higher prices could be forced on the consumer if they organized. They tried what you suggest as "the only solution", to demand that the producers get a fair share of the wealth they produce. The rest of the story is sad, too sad to bear repetition. Now, the law of supply and demand determines the price of services as inexorably as it does that of goods. Cite any period of prosperity you will and you will find it was a period when government interference and labor strikes were at a minimum, a period when the supply of goods almost filled the demand for them. Name any depression in history and you will find it was an era in which there was an excess of some class. The balance is missing.

In England, when the steam engine was introduced and the factory system began, there was an excess of weavers and spinners and thousands were thrown out of work. One with a machine could do what thirty had done before, working at home by hand. The factories could and did fill the demand. The manual workers were forced to abandon their trade and become established in some other form of employment where there was a demand for their services.

Every major depression since has had this same characteristic, an over-supply of some class of labor. During the past forty or fifty years we have had a revolution in agriculture. It has come slowly and unostentatiously. The day of the ox cart and the flail on the barn floor have given way to ten-ton trucks and combines. Nor is this all. Every farm machine has had its efficiency increased to give a net gain of forty to one. Neither is the revolution ended. Research along chemical and organic lines may double the present efficiency in agricultural production without considering the advances made in producing synthetic substitutes in factories for products that were once cultivated in the fields.

What is to become of these surplus farmers who persistently produce more than is required? When a number accumulate in the cities, more often than not a fatherly city council gives them a few dollars and sends them to some desolate spot in the north to live a primitive life of self-sufficiency. Why are they not absorbed in city life? Many factors enter this complex equation. One of them is the price of labor. If the supply increases the price should find its own level, and eventually it will in spite of any and all obstacles. Why does it not strike a balance? Because the government passed a minimum wage law that is too high and unions have in certain cases monopolized the market.

Possibly this is somewhat detached and far away, so let us take a case in point to prove exactly why your adroit manipulation of percentages is false. Tour Ontario from Fort William to Kingston and count the number of farm houses being built which might be called modern. Enquire how many were financed solely from current farm receipts and you will count them on the fingers of one hand. Why? Without doubt, the demand is present, the materials are present, and the labor to build them is present. Why? Entirely because the farmers are unable to meet the demands of organized labor. When a man is willing to work for what he can get he will not be idle for long, and, if he is a carpenter, new buildings will go up. This is the major if not the sole cause of the slums in England. The building trades have refused to work for the poor people. They insist on high pay for a lazy day. The case of automobiles is analogous. What was once a large market for new cars is now a nightmare of second-hand crates. And so on with other commodities and services. The farmer is out of the market and those who once supplied his wants are unemployed.

To get back to your unwarranted criticism, I would like to point out that your communistic line against the "financial manipulators and money changers" is a boomerang, since a substantial portion of all large industrial enterprises is owned by their employees. Your "exploiters and manipulators" are only boogeymen since you dare not name one. Midst unsound platitudes and "ifs and ands", reminiscent of an old doggerel, I find a reference to the long hours of hard labor in China. Then you jump to an unsound conclusion. Later you conclude a paragraph with "Work, not money, creates all wealth". This I am sure is original. To begin with you contradict your former conclusion. I believe you will agree in defining wealth as goods which someone desires. In the second place no one ever inferred that money as such ever produced a pair of pliers. Further, a man carrying a boulder up a ladder and dropping it, over and over again, is working but not producing wealth. All work that produces wealth is intelligently directed. A further requirement in the production of wealth is that if the individual is unable to buy his own equipment (rolling stock, dies, etc.) someone else must buy them for him to achieve the desired result. This is one reason the Chinese are so poor. They cannot finance their tools. They cannot afford to be rich. You seem to believe all that is necessary is for them to join a union and become rich.

In regard to your reference to railway labor costs, it is sufficient to point out, that you cite the fair balance of 1920. Although the average wage of railway employees has only increased ten per cent since, the wages of any given individual are probably double today what they were then. On the other hand, commodity prices are only about one-half what they were then, and present farm income is largely absorbed in fixed charges, such as taxes, interest, etc. There was a satisfactory balance then, but such a condition has long since disappeared.

Your reference to Premier King has no bearing on the subject. Mr. King is a politician and as such desires the support of organized labor at the next election.

In conclusion, I believe in fair competition and an equal opportunity for all Canadians and not special privileges to certain classes, granted by decree of government or any other body, and if you think you can bankrupt all trade and industry as you have the railways, you are sorely mistaken.

## Seven Were Veiled

(*Continued from page 7*)

wa'n't anxious to be seen. You think it was Francine. And 'twa'n't more 'n hour or two later—jest about time for p'ison to 'a' took holt—that Heath hed his spell."

Elisha looked out of the window where the rain was lashing drearily against the pane, and his eyes were narrow and thoughtful.

Phyllis gave an impatient gesture.

"But, Elisha, all this can wait. We've got to go after Francine."

"One thing at a time. I sent Bill Deeter hotfootin' it down that wood road fifteen minutes ago, and I jest told Sim to go after him and git started searchin' the salt meaders."

He put his hand inside his old black sweater, rummaged in the pocket of his shirt, and drew out an envelope folded in the middle.

"You may as well see this. Come in the mail last night. I jest picked it up as I come by the post office."

Christopher drew out the single sheet of note paper and unfolded it with a puzzled frown. Then he gave a roar.

**Greater Economy and Satisfaction**

**—easier Operation, with a**

**FLEURY**

**"RAPID-EASY"**

**HAMMER MILL**

Greater capacity, superior quality of work, lower power requirement, convenience and ease of operation, and low upkeep cost make these mills economical and time-saving. A light cheap mill is poor economy when you can get capacity plus quality with the "Rapid-Easy." Material is broken up by hard steel hammers, without rubbing against the screen, until fine enough to pass through. Less friction; less power; less time. Write for free illustrated folder on the "Rapid-Easy."

**Four Sizes**

"Rapid-Easy" Hammer Mills come in four sizes for the stock feeder, neighborhood miller, custom man and commercial plants. All built of best materials by expert workmen.

**SATURDAY, OCT. 1, 1938**

**The 38 attractive lots comprise 12 cows with calves at foot, 10 bred heifers, 9 open heifers and 7 bulls, and have been selected from these three outstanding herds—**

C. M. BLYTH, Blythwood Farm, Guelph — ROBT. ELLIOTT & SONS, Mapleton Farms, Guelph — WM. J. KAY, Stonehaven Farm, Guelph

W. J. Kay is selling—2 good bulls, one a thick, meaty summer yearling out of a Browndale Supreme cow; the other a senior calf out of a Field Marshal dam, with the next dam by Browndale Goldspur, one of the best sons of "Count". Also 2 heifers, one a thick junior yearling out of a show cow, and bred to the new bull, Killearn Beauty Lad 2nd. The open heifer is by a Deacon sire.

Robt. Elliott & Sons consign—3 cows with calves, and all rebred to Collynie Hilyard, Imp., bred by Duthie Webster, and carrying a double cross of Collynie Royal Leader blood . . . including the 5-yr.-old roan, Mapleton Blossom 7th, with roan heifer calf by Hilyard. Her good, dark roan yearling daughter also in sale. . . . The red 3-yr.-old Mapleton Beauty 5th, with very attractive red, Jan. heifer calf by Blythwood Golden Archer. . . . The smooth, red 6-yr.-old, Mapleton Mischief 2nd, with red, Jan. bull calf by B. Golden Archer. She is an exceptionally good milker and a splendid breeder. . . . Also, one dark red bull, Mapleton Cornet, just turned year, out of Glenburn Myrtle, an exceptionally good milking, 5% cow. Out of this same cow is the red Mapleton Myrtle, just turning two, and due in October to the imported bull. Meriting particular mention, are the red summer yearling, M. Mischief 5th; the roan summer yearling, M. Missie 5th, and the beautifully headed, deep, smooth M. Orange Lady, just turned year. . . . Seven heifers in all, three being bred to Collynie Hilyard, Imp., a bull of real outstanding type and pedigree.

C. M. Blyth contributes—7 cows with calves at foot, 6 bred heifers, 4 open heifers and 4 bulls. Males include, the red, thick, smooth Blythwood Goldust, born Oct. 20, '37, out of a richly bred Roan Lady cow and sired by Divide Goldust, Blythwood Beau, dark red, b. Oct. 12, '37; stylish, good-headed bull, out of good Rosewood cow. Blythwood Mint, blocky, deep, smooth roan, b. Nov. 20, '37, by Divide Goldust and out of B. Roan Lady, one of Blythwood's best cows. Lancaster Archer, red, b. Jan. 4, '37, by son of Divide Golden Archer, smooth, deep, good-headed bull, ready for heavy service. . . . The cows comprise—Blythwood Roan Lady 21st, red 5-yr.-old, a richly bred Roan Lady out of an imported cow; real foundation cow, regular breeder, excellent milker, with red Jan. bull calf by Divide Goldust at foot, and rebred to him. The good breeding Rosewood Lady 8th, red 9-yr.-old, beautifully bred Rosewood out of imported cow, with red heifer calf by Goldust. Rosewood Lady 9th, 7-yr.-old roan daughter of Drynie Rosewood (Imp.); excellent breeder, with outstanding dark roan bull calf by Goldust, and rebred to Blythwood Golden Era. Rosewood Gold, red, 5-yr.-old, by Drynie Rosewood (Imp.); deep, thick, lowset cow with red bull calf. Blythwood Roan Lady 29th, red 2-yr.-old, out of same Roan Lady cow as Blythwood Stamp and B. Scottish Special, two bulls that were champions and outstanding sires; has red bull calf at foot, by Godust and rebred to B. Golden Era; one of most valuable breeding prospects in sale. Missie Blythwood 11th, red, richly bred 2-yr.-old that shows her breeding value by the excellent red bull calf at foot, by Divide Goldust, and rebred to him. Augusta Pet 5th, beautifully bred 2-yr.-old, with outstanding bull calf at foot by Princeton Queller, J. A. Watt's herd sire.

PUBLIC ARCHIVES

ARCHIVES PUBLIQUES

CANADA

"Good Lord, Elisha! Who sent this?"

Phyllis snatched the note from his hands, and her lips whispered over the words that were printed there:

"'In the interest of justice I feel it my duty to tell you that Marvin Heath was killed by a veiled lady.'"

XXIII

Just that. There was no salutation, no signature. And the letters had been carefully cut out of a magazine and pasted on the sheet of note paper.

"Ben readin' detective stories, that feller had, I shouldn't wonder. They gen'ally fix up their letters thataway, I'm all I hear. But it's a pretty good dodge. Pretty hard to trace a thing like that."

"But the address—that must be a give-away."

Elisha shook his head.

"'Tain't."

He gave a dry chuckle. Pretty smart, that was. Fact is, I left my copy of the *Chronicle* in the settin' room yesterday—right in the big chair abaft the fireplace, and they jest cut off the stencil address and pasted it on the envelope."

Phyllis' jaw had an angry set, and her face was flushed. She tossed the letter down on the table as though it scorched her fingers and walked to the window—staring with angry eyes at the storm-whipped landscape.

"It's not hard to guess who sent it. But I didn't think even he would stoop to anything so contemptible."

Elisha raised his eyebrows. "This feller Garrison?"

"Of course."

He picked it up and put it in his pocket. "Wall, you're probably right. Jest the same I'm goin' to send it up to the city to find out if they's any finger-print on it. Meantime, this ain't findin' Francine. Guess we'd better concentrate our forces. Them salt meaders ain't goin' to be easy to cover, not in this storm, they ain't."

At the door he turned back.

"Seems kind of queer, Phil, you seein' that weddin' veil walkin' right out of your life, so to speak, and not doin' anythin' about it. I'd almost 'a' thought you'd 'a' run after it or yelled for Chris and got him to."

Phyllis wheeled sharply and looked at him, and slowly the color drained out of her face.

"Why, Elisha . . ." she whispered.

Christopher's hand closed warningly over her fist as it gripped the back of the chair.

"I don't think it was very strange, Phil has been through a lot the past few days. Waking up like that in the middle of the night, naturally she was confused."

"Sure, I understand. Got the heeby jeebies, didn't ye? Thought ye was seein' things, I guess."

XXIV

In the coatroom at the end of the hall the men were hurriedly donning waterproof coats and old hats. Christopher was shrugging his broad shoulders into a stained oilskin when Phyllis ran down the stairs and stood before him, a determined little figure in flannel slacks and a black rubber coat and broad-brimmed hat.

"Darling, you can't come! You can't do any good, and you'll be soaked."

"I'm going with you, Chris! I couldn't bear to stay here, wondering. Rain won't hurt me."

He eyed her worriedly. "But, sweetheart, it's no job for a girl, and we'll be too busy to look out for you."

"Let's git agoin', boys." Elisha's head popped in at the terrace door, and with it came a great gust of wind and rain. His eyes lighted on Phyllis.

"What's this? Where do you think you're goin'?"

"Please, Elisha."

He gave her another searching look and grunted.

"Oh well, don't know 's it 'll do ye any harm. 'Tain't no picnic we're agoin' on, but you know that, I guess. Snap into it, boys."

Across the soaking lawn, head down against the slashing storm. Then the lane, with the overarching trees making a dripping cavern. The rain was a soft staccato patter on the roof of foliage.

Then they were out of the woods, on the sandy road that led across the meadows, and there was stinging salt spray mingled with the rain.

The men slogged along ahead in a sober, pre-occupied haste that seemed to shut her out. Even Christopher was apparently no longer aware of her. He was ahead there with Elisha, body bent against the wind. Now and then they exchanged a brief word, but their voices were weak and hollow against the noise of the tempest. Through the driving rain Phyllis could see other men in the distance, moving over the rough hummocks of beach grass.

It seemed to Phyllis that her very feet dragged with the weary despair that was in her heart. Could it be only two days ago that she had stood in the library and felt her world crash about her head? And as though at the crack of some diabolic whip the devil dogs of terror and hatred and death had been unleashed; and now they were tearing apart this little group of friends.

Father dead—and that mild gentle old man; and Francine was somewhere out here in the storm. Hatred and suspicion among those who were left. And now even she and Christopher were floundering in the black morass of tragedy, mired with the same mud as the others, for they had lied to Elisha.

What sent Francine fleeing from the house last night with the sterling well floating about her? Could Phyllis have stopped her? Suppose she had called from the bedroom window—might it have saved Francine?

Saved her? From what?

And the unknown old man—he had even then been lying somewhere in the woods through which Francine had passed.

Could it have been Francine who killed him? Might she, flying through the woods, have come upon him unexpectedly and shot him?

Francine—golden haired, feminine, fragile—fleeing through the night with a loaded revolver in her hands?

And then she remembered her own swift pursuit of that white figure. The shot might not have been heard from the house, but surely she would have heard it. No, it had not been Francine.

And then the question came again, more insistently now:

What was Christopher doing in the woods that night?

She gave her head an impatient shake as though to toss off with the raindrops that nagging question that demanded an answer.

It was too ridiculous. And she couldn't insult Christopher by asking him.

"Heavy going, little one." Pete Bishop was linking his arm in hers.

She gave him a brief white smile as they trudged on together in silence. And at last they climbed the long sandy slope to the cut through the dunes and came out onto the beach that stretched away on either hand into a blue smother of mist and foam. The wind was coming straight in off the ocean, and huge white-capped rollers pounded on the shore.

"Better stay up here where you'll get some shelter from the dunes," Pete advised. He was in a hurry to join Christopher and Elisha, who were already halfway down the beach.

"What are they going to do?"

"Take a trek up and down the shore, I fancy, though I don't believe there's a chance of her being here."

Pete's voice was offhand and did not betray his own belief that Elisha had chosen the most likely spot for his search.

"You stay there. We won't be long."

Then Elisha was going off in one direction and Pete and Christopher in the other, and their dark figures quickly grew blurred and indistinct against the storm.

And presently she was alone, a desolate, bedraggled little figure in a shiny black coat and storm hat, crouching in a hollow among the dunes with the surf roaring in her ears.

*(To be continued)*

## Practical Discussions

*(Continued from page 5)*

Hens must be comfortable to lay well. Plenty of room . . . no overcrowding on floor or roost . . . and plenty of fresh air without draughts needs to be provided. They also require plenty of room to eat, which means an adequate amount of hopper space for all. If the houses are damp the hens will not be healthy. Part cotton on some of the windows, in addition to poultry netting, will provide fresh air.

The best of laying mash pays well. This can be made at home if one is sure not to leave out any of the necessary items. One can use a mixture of whatever ground grains he or she has, but a variety of grains is a neeessity. After grinding them, one should add 10 per cent beef meal or fish meal, 1 per cent salt, 1 per cent cod liver oil and 3 per cent bone meal. A portion of alfalfa meal may be added or the alfalfa can be fed as hay, enclosed in a piece of wire netting hung where the hens can get it.

Keep the laying mash in hoppers all the time. Little or no scratch grain should be fed in the morning as the hens will not be hungry for the mash if their crops are full of grain. The grain fattens the hens and produces the egg yolks, but they may be absorbed by the hen, and not finished as eggs if the materials for making the whites are lacking. The mash provides the materials for making the whites of eggs.

Oyster shell is required for the shells, while the hen needs grit for grinding the grains.

The scratch feed is only needed at dusk . . . what the hens will clean up quickly, giving more in colder weather and less as mild weather comes on. Use mixed grain, wheat, cracked corn, oats, barley and buckwheat. The hens like variety. Some grain is too fattening; corn alone will not do.

Nothing is more important than fresh water. At daybreak when the hen leaves the roost she looks first for a drink. How can she eat enough dry mash without plenty of fresh water? Set the fountains up so that litter will not be scratched into them as the water must be clean.

Sanitation is of the utmost necessity if hens are to be kept healthy . . and unhealthy hens will not lay. Vermin must be destroyed and the roosts kept free from mites. Feed nothing on the floor; use troughs for the scratch grain. The nests should be kept cleaned out as well. I have used ashes in the bottom of the nests, covered with straw to keep down mites. Broken eggs will run through straw and breed mites if nothing else is in the bottom of the nest.

One person should look after the hens. They do not like strangers. Frightened hens will not lay, so move quietly and carefully among them.

Gather eggs frequently so they will be less likely to be broken in the nests as the hens are apt to start eating them if this happens, and the habit is hard to cure when once started.

Cull out any hens that lack good appearance. Know your hens and study their needs and they will prove a good investment.

WHITE LEGHORN FAN.

Highest yields of flax per acre are obtained in France, Belgium and Northern Ireland, where the industry is an old established one. Much of the output in Northern Ireland may be said to be of Canadian origin, the pedigree flax seed grown in Canada and exported to Ireland being much in demand in that country. In Canada, an excellent quality of flax seed is grown for all purposes.

# St. Mary's Shorthorn Sale

**41 Choice Shorthorns from 4 Leading Herds**

**8 cows, 6 with calves at foot . . . 30 bred and open heifers . . . 3 bulls selling at**

**Robinson Bros. Farm, St. Mary's, Ont.**

**TUESDAY, OCTOBER 4th, 1938**

**Robinson Bros., St. Mary's,** contribute: 2 good bulls, including a thick-fleshed, well-balanced, good-headed, dark roan son of Millhills Ransom (Imp.). He should prove one of the year's tops. Also listed are 12 good heifers of pleasing color and conformation . . . with pedigrees as fashionable as found in any herd.

**H. Noel Gibson, Delaware, offers:** 5 good cows, 3 of which have calves at foot. Also 6 attractive heifers, all being roans with good heads and excellent type. Their pedigrees exceptionally choice.

**Ernest Robson & Son, Denfield, will sell:** 3 excellent cows with calves at foot. Butterfly Rose, dark roan, would be an outstanding cow in any herd, sells with roan bull calf by Rare Commander and rebred to him. Others are a Rosewood and a Jilt. Also, a good, bred 2-year-old heifer and 5 attractive open heifers. All have fashionable pedigrees.

**J. A. Watt, Elora,** has a good red yearling bull and 6 outstanding heifers. The pedigrees are up to the high Watt standard. Two of the heifers by Millhills Ransom (Imp.). Both are tops . . . and one, a nice roan, can be made a winning senior calf for the Royal Winter Fair.

## Mac's Meanderings

THE season of the Fall Fairs is at hand and you may judge from the condition of farm work throughout the countryside that the Fairs will be well attended. With the exception of clover seed and buckwheat, threshing is about done. The silos also are pretty well all filled. Plowing has not yet become such an urgent job that one could not let it stand for a day or so to take in the local or neighboring fairs.

Personally I have only attended one fair to date, but that one reported an all-time record in the matter of attendance. I am also quite sure that, in so far as live stock is concerned, the numbers were well above the average of past years.

For some years the smaller fairs have been having rather a hard time of it. Too many people get tired going year after year to what they term "the same old thing". Human nature (or modern human nature) craves excitement and too many people forget that the fair is not primarily an excitement-producing institution. Rather is it primarily an educational concern with a little excitement thrown in like spice in solid food. But a lot of people come and eat up the spice without trying to find out anything about the rest of the meal.

Just the same the life of a fair depends upon getting the crowds and you can't draw the crowds to a small fair only by one string. There must be variety. Some will spend most of their time looking at cattle, others at horses, some at the farm produce. Some are most interested in the needlework and some in the Midway. If there is an excuse for the latter it is that those drawn thither may accidentally become interested in some more valuable feature and return home with something worth while after all.

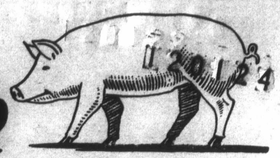
Personally my experience with the small fairs has been more often in the role of a small exhibitor than merely as a spectator. Some people have a flair for one thing and some for another. I have had a flair for taking a few head of stock to a few of the local fairs and quite frequently getting pretty badly trimmed thereby. If it takes a good sport to come back for more, then I must be a pretty fair sport.

As an exhibitor, and from the viewpoint of an exhibitor, I have watched the small fairs grow from the "horse and buggy" days to today, when every available foot of ground on the fairground, as was the case of the fair I attended yesterday, was packed with cars. And not only that, but the roadside lined for rods in either direction from the fairgrounds. I can remember when each fair had its little group of local exhibitors and for some outsider to come in with anything of a bulky nature was most unusual.

Today it is different and there is no difficulty in loading a truckful of cattle or other live stock and covering all fairs within a radius of thirty miles or so. The same fitting and the same gathering of necessary equipment does for four or five fairs. Once the necessary help become somewhat broken in, the hardship connected therewith is not serious. Even the animals become accustomed to the turmoil and through time, show little ill effect. But these long-distance exhibitors are more or less a source of worry to local exhibitors. They never know just who to expect and, while they have been constant supporters of the home fair, they may find themselves robbed of their prize money at any time by two or three outsiders. Just the same, in most cases the fair boards welcome the outsiders because they bring more people to the fair from wider distances to see how so and so's cattle or horses are going to stack up against somebody else's. Some fairs make an effort to see that special prizes are retained in the local district. In such cases when regular prizes are not sufficiently tempting to draw outside exhibitors the local exhibitors have little competition. However, as I mentioned at the start, the management of small fairs is quite a problem anyway one looks at it, and those men who do their best to carry on a successful fair year after year, are deserving of a great deal of sympathy, rather than the criticism that they quite often get.

---

In the war against mosquitoes, the cause of malaria in Australia, the civic authorities of Brisbane have placed Medaka fish in all of the city pools. The medaka resembles a small goldfish and has a voracious appetite for mosquito larvae.



## The Song of the Lazy Farmer

WHEN I was young the women wore a lot of clothing on before and twice as much as that behind, but now it seems that they don't mind a-goin' 'round with ev'ry knee in plain sight for the world to see. It used to be a cause for shock if you should glimpse a piece of sock, but now bare ankles ain't no treat; in fact, you see a lot of meat where'er you go, for folks expose more than they cover up with clothes. The bathin' suits girls wear to-day would make my mother faint away, when she was fixed up for a swim you couldn't see a leg or limb. But nowadays competition's keen to let a lot of hide be seen. Just why the women want to show bowlegs or swaybacks I don't know, the most has got so many flaws they ought to wear more clothes because their clothes is prettier than them; when covered up with stitch and hem they don't look bad, but what a fright they are when they're exposed to sight;

If we could make them women see how better lookin' they would be with plenty clothes hung on their frame to cover up the faults of same, we'd have a market for our wool. This farmin' job would be less tough if women only wore enough, the skirts they wore in mother's day would surely make our farmin' pay; the clothes she wore, both thick and full, used up an awful lot of wool. Prosperity will come again if women listen to us men, and hide their blemishes from view, and cover up their legs, in lieu of struttin' 'round for all to see their bunions and their corns, by gee!

# FEED YOUR HOGS... the SHUR-GAIN WAY and GET $50.00-per-ton FOR YOUR GRAIN

**And not only will you get more than double the present market price for your grain but you will also be building better hogs—healthier, thriftier, more "selects" per litter.**

**With ample grain for feed this season's farmers with an eye to extra profit are looking to this method of marketing their grain at high prices. Here is the way to figure it:**

1. **Grain at cash prices is worth $20.00 per ton.**
2. **650 lbs. of grain plus $1.40 worth of SHUR-GAIN Hog Concentrate will build 200 lbs. of pork on a weanling pig.**
3. **With hog prices at 9c, that 200 lbs. of pork will bring you $18.00. Subtract the $1.40 for SHUR-GAIN Hog Concentrate and the balance, $16.60 is what you actually get for 650 lbs. of grain — or, more than $50.00 per ton!**

**See your SHUR-GAIN Dealer now and have him give you greater details of the extra profit from every hog fed the SHUR-GAIN way.**

**SHUR-GAIN HOG CONCENTRATE**

"Good Lord, Elisha! Who sent this?"

Phyllis snatched the note from his hands, and her lips whispered over the words that were printed there:

"'In the interest of justice I feel it my duty to tell you that Marvin Heath was killed by a veiled lady.'"

XXIII

Just that. There was no salutation, no signature. And the letters had been carefully cut out of a magazine and pasted on the sheet of note paper.

"Ben readin' detective stories, that feller had, I shouldn't wonder. They gen'ally fix up their letters thataway, I'm all I hear. But it's a pretty good dodge. Pretty hard to trace a thing like that."

"But the address—that must be a give-away."

Elisha shook his head.

"Tain't."

He gave a dry chuckle. Pretty smart, that was. Fact is, I left my copy of the *Chronicle* in the settin' room yesterday—right in the big chair abaft the fireplace, and they jest cut off the stencil address and pasted it on the envelope."

Phyllis' jaw had an angry set, and her face was flushed. She tossed the letter down on the table as though it scorched her fingers and walked to the window—staring with angry eyes at the storm-whipped landscape.

"It's not hard to guess who sent it. But I didn't think even he would stoop to anything so contemptible."

Elisha raised his eyebrows "This feller Garrison?"

"Of course."

He picked it up and put it in his pocket. "Wall, you're probably right. Jest the same I'm goin' to send it up to the city to find out if they's any finger-prints on it. Meantime, this ain't findin' Francine. Guess we'd better concentrate our forces. Them salt meaders ain't goin' to be easy to cover, not in this storm, they ain't."

At the door he turned back.

"Seems kind of queer, Phil, you seein' that weddin' veil walkin' right out of your life, so to speak, and not doin' anythin' about it. I'd almost 'a' thought you'd 'a' run after it or yelled for Chris and got him to."

Phyllis wheeled sharply and looked at him, and slowly the color drained out of her face.

"Why, Elisha . . ." she whispered.

Christopher's hand closed warningly over her fist as it gripped the back of the chair.

"I don't think it was very strange. Phil has been through a lot the past few days. Waking up like that in the middle of the night, naturally she was confused."

"Sure. I understand. Got the heeby jeebies, didn't ye? Thought ye was seein' things, I guess."

XXIV

In the coatroom at the end of the hall the men were hurriedly donning waterproof coats and old hats. Christopher was shrugging his broad shoulders into a stained oilskin when Phyllis ran down the stairs and stood before him, a determined little figure in flannel slacks and a black rubber coat and broad-brimmed hat.

"Darling, you can't come! You can't do any good, and you'll be soaked."

"I'm going with you, Chris! I couldn't bear to stay here, wondering. Rain won't hurt me."

He eyed her worriedly. "But, sweetheart, it's no job for a girl, and we'll be too busy to look out for you."

"Let's git agoin', boys." Elisha's head popped in at the terrace door, and with it came a great gust of wind and rain. His eyes lighted on Phyllis.

"What's this? Where do you think you're goin'?"

"Please, Elisha."

He gave her another searching look and grunted.

"Oh well, don't know 's it 'll do ye any harm. 'Tain't no picnic we're agoin' on, but you know that, I guess. Snap into it, boys."

Across the soaking lawn, head down against the slashing storm. Then the lane, with the overarching trees making a dripping cavern. The rain was a soft staccato patter on the roof of foliage.

Then they were out of the woods, on the sandy road that led across the meadows, and there was stinging salt spray mingled with the rain.

The men slogged along ahead in a sober, pre-occupied haste that seemed to shut her out. Even Christopher was apparently no longer aware of her. He was ahead there with Elisha, body bent against the wind. Now and then they exchanged a brief word, but their voices were weak and hollow against the noise of the tempest. Through the driving rain Phyllis could see other men in the distance, moving over the rough hummocks of beach grass.

It seemed to Phyllis that her very feet dragged with the weary despair that was in her heart. Could it be only two days ago that she had stood in the library and felt her world crash about her head? And as though at the crack of some diabolic whip the devil dogs of terror and hatred and death had been unleashed; and now they were tearing apart this little group of friends.

Father dead—and that mild gentle old man; and Francine was somewhere out here in the storm. Hatred and suspicion among those who were left. And now even she and Christopher were floundering in the black morass of tragedy, mired with the same mud as the others, for they had lied to Elisha.

What sent Francine fleeing from the house last night with the wedding veil floating about her? Could Phyllis have stopped her? Suppose she had called from the bedroom window—might it have saved Francine?

Saved her? From what?

And the unknown old man—he had even then been lying somewhere in the woods through which Francine had passed.

Could it have been Francine who killed him? Might she, flying through the woods, have come upon him unexpectedly and shot him?

Francine—golden haired, feminine, fragile—fleeing through the night with a loaded revolver in her hands?

And then she remembered her own swift pursuit of that white figure. The shot might not have been heard from the house, but surely she would have heard it. No, it had not been Francine.

And then the question came again, more insistently now:

What was Christopher doing in the woods that night?

She gave her head an impatient shake as though to toss off with the raindrops that nagging question that demanded an answer.

It was too ridiculous. And she couldn't insult Christopher by asking him.

"Heavy going, little one." Pete Bishop was linking his arm in hers.

She gave him a brief white smile as they trudged on together in silence. And at last they climbed the long sandy slope to the cut through the dunes and came out onto the beach that stretched away on either hand into a blue smother of mist and foam. The wind was coming straight in off the ocean, and huge white-capped rollers pounded on the shore.

"Better stay up here where you'll get some shelter from the dunes," Pete advised. He was in a hurry to join Christopher and Elisha, who were already halfway down the beach.

"What are they going to do?"

"Take a trek up and down the shore, I fancy, though I don't believe there's a chance of her being here."

Pete's voice was offhand and did not betray his own belief that Elisha had chosen the most likely spot for his search.

"You stay there. We won't be long."

Then Elisha was going off in one direction and Pete and Christopher in the other, and their dark figures quickly grew blurred and indistinct against the storm.

And presently she was alone, a desolate, bedraggled little figure in a shiny black coat and storm hat, crouching in a hollow among the dunes with the surf roaring in her ears.

*(To be continued)*

## Practical Discussions

*(Continued from page 5)*

Hens must be comfortable to lay well. Plenty of room . . . no overcrowding on floor or roost . . . and plenty of fresh air without draughts needs to be provided. They also require plenty of room to eat, which means an adequate amount of hopper space for all. If the houses are damp the hens will not be healthy. Part cotton on some of the windows, in addition to poultry netting, will provide fresh air.

The best of laying mash pays well. This can be made at home if one is sure not to leave out any of the necessary ingredients. One can use a mixture of whatever ground grains he or she has, but a variety of grains is a neeessity. After grinding them, one should add 10 per cent beef meal or fish meal, 1 per cent salt, 1 per cent cod liver oil and 3 per cent bone meal. A portion of alfalfa meal may be added or the alfalfa can be fed as hay, enclosed in a piece of wire netting hung where the hens can get it.

Keep the laying mash in hoppers all the time. Little or no scratch grain should be fed in the morning as the hens will not be hungry for the mash if their crops are full of grain. The grain fattens the hens and produces the egg yolks, but they may be absorbed by the hen, and not finished as eggs if the materials for making the whites are lacking. The mash provides the materials for making the whites of eggs.

Oyster shell is required for the shells, while the hen needs grit for grinding the grains.

The scratch feed is only needed at dusk . . . what the hens will clean up quickly, giving more in colder weather and less as mild weather comes on. Use mixed grain, wheat, cracked corn, oats, barley and buckwheat. The hens like variety. Some grain is too fattening; corn alone will not do.

Nothing is more important than fresh water. At daybreak when the hen leaves the roost she looks first for a drink. How can she eat enough dry mash without plenty of fresh water? Set the fountains up so that litter will not be scratched into them as the water must be clean.

Sanitation is of the utmost necessity if hens are to be kept healthy . . and unhealthy hens will not lay. Vermin must be destroyed and the roosts kept free from mites. Feed nothing on the floor; use troughs for the scratch grain. The nests should be kept cleaned out as well. I have used ashes in the bottom of the nests, covered with straw to keep down mites. Broken eggs will run through straw and breed mites if nothing else is in the bottom of the nest.

One person should look after the hens. They do not like strangers. Frightened hens will not lay, so move quietly and carefully among them.

Gather eggs frequently so they will be less likely to be broken in the nests as the hens are apt to start eating them if this happens, and the habit is hard to cure when once started.

Cull out any hens that lack good appearance. Know your hens and study their needs and they will prove a good investment.

## Mac's Meanderings

THE season of the Fall Fairs is at hand and you may judge from the condition of farm work throughout the countryside that the Fairs will be well attended. With the exception of clover seed and buckwheat, threshing is about done. The silos also are pretty well all filled. Plowing has not yet become such an urgent job that one could not let it stand for a day or so to take in the local or neighboring fairs.

Personally I have only attended one fair to date, but that one reported an all-time record in the matter of attendance. I am also quite sure that, in so far as live stock is concerned, the numbers were well above the average of past years.

For some years the smaller fairs have been having rather a hard time of it. Too many people get tired going year after year to what they term "the same old thing". Human nature (or modern human nature) craves excitement and too many people forget that the fair is not primarily an excitement-producing institution. Rather is it primarily an educational concern with a little excitement thrown in like spice in solid food. But a lot of people come and eat up the spice without trying to find out anything about the rest of the meal.

Just the same the life of a fair depends upon getting the crowds and you can't draw the crowds to a small fair only by one string. There must be variety. Some will spend most of their time looking at cattle, others at horses, some at the farm produce. Some are most interested in the needlework and some in the Midway. If there is an excuse for the latter it is that those drawn thither may accidentally become interested in some more valuable feature and return home with something worth while after all.

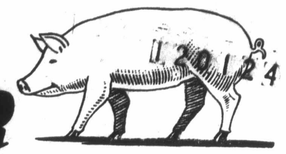
Personally my experience with the small fairs has been more often in the role of a small exhibitor than merely as a spectator. Some people have a flair for one thing and some for another. I have had a flair for taking a few head of stock to a few of the local fairs and quite frequently getting pretty badly trimmed thereby. If it takes a good sport to come back for more, then I must be a pretty fair sport.

As an exhibitor, and from the viewpoint of an exhibitor, I have watched the small fairs grow from the "horse and buggy" days to today, when every available foot of ground on the fairground, as was the case of the fair I attended yesterday, was packed with cars. And not only that, but the roadside lined for rods in either direction from the fairgrounds. I can remember when each fair had its little group of local exhibitors and for some outsider to come in with anything of a bulky nature was most unusual.

Today it is different and there is no difficulty in loading a truckful of cattle or other live stock and covering all fairs within a radius of thirty miles or so. The same fitting and the same gathering of necessary equipment does for four or five fairs. Once the necessary help become somewhat broken in, the hardship connected therewith is not serious. Even the animals become accustomed to the turmoil and through time, show little ill effect. But these long-distance exhibitors are more or less a source of worry to local exhibitors. They never know just who to expect and, while they have been constant supporters of the home fair, they may find themselves robbed of their prize money at any time by two or three outsiders. Just the same, in most cases the fair boards welcome the outsiders because they bring more people to the fair from wider distances to see how so and so's cattle or horses are going to stack up against somebody else's. Some fairs make an effort to see that special prizes are retained in the local district. In such cases when regular prizes are not sufficiently tempting to draw outside exhibitors the local exhibitors have little competition. However, as I mentioned at the start, the management of small fairs is quite a problem anyway one looks at it, and those men who do their best to carry on a successful fair year after year, are deserving of a great deal of sympathy, rather than the criticism that they quite often get.

---

In the war against mosquitoes, the cause of malaria in Australia, the civic authorities of Brisbane have placed Medaka fish in all of the city pools. The medaka resembles a small goldfish and has a voracious appetite for mosquito larvae.



## The Song of the Lazy Farmer

WHEN I was young the women wore a lot of clothing on before and twice as much as that behind, but now it seems that they don't mind a-goin' 'round with ev'ry knee in plain sight for the world to see. It used to be a cause for shock if you should glimpse a piece of sock, but now bare ankles ain't no treat; in fact, you see a lot of meat where'er you go, for folks expose more than they cover up with clothes. The bathin' suits girls wear to-day would make my mother faint away, when she was fixed up for a swim you couldn't see a leg or limb. But nowadays competition's keen to let a lot of hide be seen. Just why the women want to show bowlegs or swaybacks I don't know, the most has got so many flaws they ought to wear more clothes because their clothes is prettier than them; when covered up with stitch and hem they don't look bad, but what a fright they are when they're exposed to sight;

If we could make them women see how better lookin' they would be with plenty clothes hung on their frame to cover up the faults of same, we'd have a market for our wool. This farmin' job would be less tough if women only wore enough, the skirts they wore in mother's day would surely make our farmin' pay; the clothes she wore, both thick and full, used up an awful lot of wool. Prosperity will come again if women listen to us men, and hide their blemishes from view, and cover up their legs, in lieu of struttin' 'round for all to see their bunions and their corns, by gee!

**FEED YOUR HOGS... the SHUR-GAIN WAY and GET $50.00-per-ton FOR YOUR GRAIN**

And not only will you get more than double the present market price for your grain but you will also be building better hogs—healthier, thriftier, more "selects" per litter.

With ample grain for feed this season's farmers with an eye to extra profit are looking to this method of marketing their grain at high prices. Here is the way to figure it:

1. Grain at cash prices is worth $20.00 per ton.
2. 650 lbs. of grain plus $1.40 worth of SHUR-GAIN Hog Concentrate will build 200 lbs. of pork on a weanling pig.
3. With hog prices at 9c, that 200 lbs. of pork will bring you $18.00. Subtract the $1.40 for SHUR-GAIN Hog Concentrate and the balance, $16.60 is what you actually get for 650 lbs. of grain — or, more than $50.00 per ton!

See your SHUR-GAIN Dealer now and have him give you greater details of the extra profit from every hog fed the SHUR-GAIN way.

# "AMALGAMATION NEVER . . ."

## THE CASE FOR THE C.N.R.

During the past several years a concerted attack has been made upon the Canadian National Railways to force an amalgamation with the Canadian Pacific Railway. The claim is made by proponents of amalgamation, or unification, as it is now called, that, under such a scheme, $75,300,000 could be saved in a normal year.

A picture is presented of 40,000 miles of railway. serving less than 11,000,000 people, or one mile for every 225 persons, as compared with 250,000 miles in the United States, or one mile for 500 persons. Germany has about 35,000 miles of railway, or one mile for 1,800 persons, while in Great Britain, with 24,300 miles, there are 1,900 persons to the mile.

Canadian railway mileage is divided almost entirely between the two great systems, the Canadian National Railways, with about 22,000 miles, and the Canadian Pacific Railway, with about 17,000 miles.

The Canadian National has earned its fixed charges in only two years since its establishment; and the Government has been required to pay amounts varying from $4,000,000 in 1927 to $61,000,000 in 1932 to cover the interest on its bonds, to say nothing of accrued interest due the Government on advances and deficits in past years. The total amount, including accrued interest due the Government, which stood against the Canadian National System at the end of 1935 was computed at $2,809,-472,325.

The Canadian Pacific, on the other hand, has never failed to pay its fixed charges, and from 1889 till the beginning of the depression it had paid over a billion dollars in dividends.

The difference in the showing of the two systems was attributed to (1) the over-building of railways; and (2) public ownership, which, it was claimed, resulted in less efficient operation of the Canadian National.

The remedy at first suggested was that both systems should be amalgamated under C.P.R. management, but this has latterly been changed to management under an independent board. It seems logical to some that if the two systems were to be merged there must be a considerable saving.

The common view is one of long stretches where the two railways run almost alongside each other; of duplicate stations

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120129

and terminal facilities; of expensive ticket offices side by side or just across the street from one another. Some have had the experience of being solicited by two rival traffic organizations, each desiring to secure their railway business.

When the average citizen pays his Federal income tax and realizes that about one-third of the total amount raised by income tax is required to meet the deficit on Canadian National bonds; and when he thinks of duplicate trains operated mainly, as he has been informed, to provide work for railway men whom he supposes to be highly paid; and when he is told that fear of the railway vote is the chief reason for the failure of governments to deal "firmly" and "courageously" with the railway question, he is easily persuaded that amalgamation is the only way out.

But is it? We submit that the following survey of the subject conclusively shows that amalgamation, or unification, is not the solution.

*THE INTERCOLONIAL:*

Without railways there could have been no Dominion of Canada. The Intercolonial, completed from Halifax to Riviere du Loup in 1876 and extended to Montreal in 1898, was built purely as a national undertaking; and has since been operated more with a view to public service than as a commercial undertaking. It is a well-known fact that its route is longer than might have been necessary had its purpose been solely to transfer goods and passengers from one part of the country to the other.

Judged from the standpoint of a commercial enterprise, the Intercolonial has not been an entire success; but who can say what its value has been to Canada, in the first place in making the Dominion possible and, in the second place, in helping to bind together elements having little natural cohesion? No estimate that is expressed in dollars and cents can adequately portray the value of this piece of railway to Canada.

The completion of the Intercolonial, important and vital though its building undoubtedly was for Canada, left the Dominion only partly formed. There was yet to be incorporated into its fabric that vast expanse of practically unsettled and largely unexplored territory stretching from the Great Lakes across the rock-bound region where the then unrealized El Dorado of the Laurentian Shield reaches its southernmost extremity, across the seemingly limitless prairies, across range after range of mountains among the highest and most rugged in the world, to the waters of the Pacific. This great region must be added to Canada; but without a railway it could not be done.

*THE CANADIAN PACIFIC:*

The people of Canada, then numbering less than 3,500,000 persons, not it must be said without serious misgivings, under-

120130

took to build a line of railway to the Pacific coast. We will not go into a recital of all the vicissitudes of the early attempts. The Government had already constructed or placed under contract more than one-fifth of the total distance between Montreal and the Pacific when a change of government transferred the whole enterprise into the hands of a group of Montreal capitalists.

It is customary to extol the courage and foresight of these intrepid pioneer railway builders, and we have no desire to dim their laurels or to damn them with faint praise; but it must be remembered that they as a group had just previously won millions of dollars in an American railway enterprise. A bankrupt railway, but one which held valuable land grants, was taken over by the syndicate for next to nothing; immigrants had poured into the country; and through the sale of land and in other ways connected with the rapid development of the country the little group of adventurers had made a clean-up. They were thus in the mood to duplicate the coup in Canada.

*GOVERNMENT AID:*

The Government gave them $25,000,000 in cash; 25,000,000 acres of land in alternate blocks throughout the most productive parts of the prairie region; and turned over to them free of charge the surveys and the 713 miles of railway already constructed which had cost $37,785,000. Cash subsidies received by the C.P.R. from Dominion and Provincial Governments amounted in 1916 to a total of $67,000,000. Land grants from the same sources amounted to 28,000,000 acres, of which 16,541,000 had been sold up to June 30th, 1916, to net the Company $68,000,000, while the remainder was conservatively valued at $119,000,000. Thus it will be seen that the assistance received by the C.P.R., in addition to other valuable considerations, amounted to $291,785,000. Other valuable considerations comprised freedom for ever from taxation of the railway and "all stations and station grounds, workshops, buildings, yards and other property, rolling stock and appurtenances required and used for the construction and working thereof, and the capital stock of the Company by the Dominion, or by any Province hereafter to be established, or by any municipal corporation therein; and the lands of the Company, in the North-West Territories, until they are sold or occupied shall also be free from taxation for 20 years after the grant thereof from the Crown."

Another consideration was a monopoly of railway transportation in the West within 15 miles of the International Border. This monopoly provision almost led to armed conflict in Manitoba, while the exemption from taxation for 20 years on lands held up or hindered for years the development of many

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120131

districts throughout the West because the Company allowed the title of its lands to remain in the Crown until disposed of, which meant that such lands were free from taxation until 20 years after they were sold by the Company.

The interest of certain members of the C.P.R. syndicate in railway and land speculations in the Western United States undoubtedly influenced the Company in seeking a more southerly route than that which had originally been located by Sandford Fleming, the Government engineer. They were seemingly more concerned with competing with United States railways for traffic originating and terminating in the United States than with the possibilities of developing Canada. However, since Donald A. Smith, later Lord Strathcona, the largest individual landowner in the Canadian West, was a member of the syndicate, it cannot be said that they were entirely unaware of the possibilities of the Canadian West.

This action of the C.P.R., in deciding to hug the northern boundary of the United States, constitutes the basis of many of its—and Canada's—later railway difficulties. If the builders of the C.P.R. had considered the matter more particularly from the standpoint of the interest of Canada they would have retained the northern route, securing thereby the lowest gradients; but, of greater importance, their main line would have traversed a more productive section of the country. It would have provided a sort of backbone for the country, from which feeders could have been built north and south. This would have made much less likely the possibility of another important railway being built farther north. In their preoccupation with conditions to the south of them they neglected their greatest field of opportunity and acquired a vulnerability which may yet lead to the downfall of the railway they were at such pains to build.

The C.P.R. was completed in five years instead of the ten allowed by the contract. Branch lines were energetically constructed and in Ontario and Quebec lines were built paralleling the existing Grand Trunk lines. Thus the C.P.R. was the first to build duplicate railway lines from which the country was later to suffer so much.

*THE GRAND TRUNK:*

The origin of the Grand Trunk Railway System goes back to days before a transcontinental railway was seriously thought of. It was, in fact, begun in 1853, long before the formation of the Dominion of Canada. Although, like all other railways, it had received some government aid, it was a purely commercial enterprise; its purpose was to carry Canadian products to the seaboard through United States ports and to provide a short route for American goods from the Western States to the

120132

American seaboard. Despite its strategic location, both with respect to Canadian and United States traffic, the Grand Trunk, controlled in England and directed from there, was not an outstanding financial success.

The Grand Trunk had been invited to extend its lines to the Pacific before the C.P.R. was built, but had declined. Then when the building of the Canadian Pacific had opened up the West, when the country was filling with immigrants, and the flow of wheat from the prairies had begun, the Grand Trunk looked with longing upon what it had missed. At this time it was under the direction of Charles M. Hays, a dynamic American. The people of Canada were in an optimistic mood, in decided contrast to the pessimism of even a decade earlier. The population of the West, not more than 100,000 in 1870, had increased to 645,517 by 1901; and that year the Canadian Pacific handled over 50,000,000 bushels of wheat. Cities had sprung up where a few years before there had been only trading posts. The possible place of Canada in Empire communications was being discussed; speeches and editorials of the time had much to say about the "All-red line."

*THE CANADIAN NORTHERN:*

The C.P.R. was not popular in the West. Having a monopoly, its officers and agents were too often inclined to follow a policy of "the public be damned." The clause in its charter giving it a monopoly within 15 miles of the Boundary caused endless trouble until eventually the Dominion Government was forced to negotiate its cancellation. Although the C.P.R. could prevent for a while competition from United States roads, it could not prevent competition from other Canadian lines.

Beginning with a short piece of railway in Manitoba in 1897, two enterprising railway contractors, William Mackenzie and Donald Mann—the most remarkable of all the remarkable tribe of railway builders—rapidly developed a network of lines covering the prairies from the head of the Lakes to the foothills of the Rockies, which they called the Canadian Northern Railway. Their plan was most audacious. Their roads were built quickly and cheaply with the proceeds of cash subsidies or bond issues guaranteed by municipal, provincial or federal governments, but they retained control as sole owners of the common stock. Through their contracting firm most of the lines were built; then through equipment companies they bought and sold to the company the necessary equipment. Companies controlled by them dealt in lands secured as subsidies and settled immigrants to provide traffic for the railway. They also owned the town sites along the right of way.

*THE GRAND TRUNK PACIFIC:*

The Canadian Pacific owed its origin to the efforts of the Conservative government of Sir John A. Macdonald. The Liberal party, following the custom of parties, had been critical of the enterprise and pessimistic about its possibilities. When they attained power under Laurier in 1896, however, and when, as a result of their immigration policy, the West began to boom they became the most ardent believers in the possibilities of the West. As the C.P.R. was undoubtedly a monument to Macdonald, so the Liberals desired to erect a similar monument to Laurier. Their desires and the ambitions of Charles M. Hays soon converged in an agreement.

The Grand Trunk first asked government assistance for a line of railway from its Western terminus at North Bay to a new port on the North Pacific coast. Since the Grand Trunk's eastern terminus was at Portland, Maine, the Maritime Provinces naturally protested against public funds or credit thus being used to divert traffic from their ports. It was therefore finally agreed that the Grand Trunk through a subsidiary company to be known as the Grand Trunk Pacific should build from Winnipeg to Prince Rupert, near the mouth of the Skeena River. The Government was to guarantee the bonds of the Grand Trunk Pacific, both as to interest and principal, which were also guaranteed by the Grand Trunk itself. In addition the Government agreed to pay the interest on the mountain section for seven years after the official completion of the line, and for three years further if the Grand Trunk Pacific could not pay it, allowing the company 40 years for repayment.

*THE NATIONAL TRANSCONTINENTAL:*

From Moncton, N.B., to Winnipeg, following a route through Quebec, Ontario and Manitoba, far north of the zone of settlement, the Government undertook to construct a first-class line of railway which upon completion should be leased to the Grand Trunk Pacific for 50 years, rent free for seven years and thereafter at a rental equivalent to 3 per cent. of the cost of construction. It was planned with the lowest gradients, the longest tangents and easiest curves of any railway on the continent. Throughout, its standard of construction was the best.

Viewed from the standpoint of booming Canada in the year 1903, the scheme was perfectly feasible and not half so foolhardy as the building of the C.P.R. had seemed twenty-five years earlier. If Canada were to advance as rapidly during the coming quarter-century as she had in the past quarter-century the Grand Trunk Pacific scheme could scarcely fail. Although in retrospect it is easy to see the flaws in the arguments of 1903, it must be admitted that no one could then have been expected

120134

to know that just as the railways were on the verge of completion a world war would break out, to be followed by a world depression. Nevertheless, there was one serious flaw in the scheme which should have been seen at that time, and indeed was seen by many. That was the folly of paralleling the already existing prairie lines of the Canadian Northern. The obvious plan was for the Grand Trunk Pacific to absorb the Canadian Northern. But Mackenzie and Mann, angered because the Government had lent its aid to a competitive system, refused to sell. The Government, not yet having learned that all railways are really public utilities and not entitled to follow their own whims or fancies irrespective of the national welfare, failed to force a union of the two systems.

*SOARING COSTS:*

The Canadian Northern proceeded with all speed to consolidate its position before the Grand Trunk Pacific could invade its field. The C.P.R. also began an intensive building campaign. Even though immigrants were flocking into the country there was not labor enough to go round and wages rose steeply, not only for railway construction but in every other line of industry. This in turn was reflected in higher prices for materials of all kinds, with the consequent effect that actual costs soon bore but little relation to original estimates.

The estimated cost of the 1,800 miles of the National Transcontinental between Moncton and Winnipeg was $61,415,000 or $34,000 a mile; but by 1915 the actual cost had amounted to $159,881,197 or $88,500 a mile. There was some graft involved in this and much carelessness but the chief reason other than increased wages and costs already referred to was the fact that a high-grade railway was being thrust through a wilderness. Even this excess of cost might have been offset by lower operating expenses if there had been any traffic for the line when it was finished, but there was next to none.

*THEN CAME THE WAR:*

Immigration, which added 128,364 persons to the Canadian population in 1903 and in 1913 a maximum of 402,432, was a boon while the building fever was at its height. But many were merely transients. Too few of them went on the land and consequently scant traffic was produced for the railways; and when construction ended with the outbreak of the war the country was flooded with unemployed men. The recruiting sergeants shortly took up the slack but the development of the country remained at a standstill. Furthermore, the newer districts through which the Grand Trunk Pacific and the National Transcontinental were built were not as easily settled and opened up as

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120135

the bare prairie had been; the land must be cleared of timber, for which both time and money were required.

Meanwhile the Canadian Northern had extended westward from Edmonton to the Pacific, and eastward from Port Arthur to Atlantic tidewater. In their frantic efforts to get a foot on either ocean, Mackenzie and Mann had brought the art of parliamentary lobbying to a point never before reached in Canada. They bought and subsidized newspapers across the Dominion and retained promising political lawyers. Time after time they appeared at Ottawa, begging and finally demanding assistance. One of the last acts of the Laurier administration in 1911 was the guaranteeing of an issue of bonds amounting to $35,500,000 for the completion of Mackenzie and Mann's line from Port Arthur to Montreal. When the Borden Government assumed office upon Laurier's defeat, two of its members were men previously associated with Canadian Northern affairs. One of these was Thomas White, the Minister of Finance, a former Canadian Bank of Commerce officer, and the other was Arthur Meighen, the Solicitor General.

*THE GOVERNMENT IS HOOKED:*

During the first three years of the Borden Government's term of office, Mackenzie and Mann secured $20,040,000 in cash and guarantees; then in the early months of 1914, they descended in force upon Ottawa and literally compelled the Government to extend them further credit to the extent of $45,000,000. In consideration of this the Government became a partner of Mackenzie and Mann in the ownership of the Canadian Northern by securing $40,000,000 of the Company's $100,000,000 capital stock.

The outbreak of the war found the Canadian Northern distinctly vulnerable. Not only was the Government now joint owner, but the credit of municipalities and provinces across Canada was in jeopardy; in fact, the credit of the Dominion itself was at stake. The Grand Trunk Pacific had refused to assume the operation of the National Transcontinental upon its completion in 1915 on the ground that its cost, and consequently rental charges based on that cost, was greatly in excess of the original estimate. Even aside from the matter of the National Transcontinental the Grand Trunk Pacific could not meet its operating expenses, to say nothing of its interest charges. The parent company in consequence was itself rapidly approaching insolvency. Both the Canadian Northern and the Grand Trunk Pacific looked to the government for help and unless the roads were allowed to go into receiverships, then generally considered as not in the public interest, there was no other course left to the Government but to provide assistance.

120136

*DRAYTON-ACWORTH COMMISSION:*

In July 1916 the government appointed a Royal Commission to investigate the whole railway situation and to suggest possible remedies. The Commissioners were: A. H. Smith, President of the New York Central Railroad; Sir Henry Drayton, Chief Commissioner of the Board of Railway Commissioners of Canada; and W. M. Acworth, a noted English railway authority. The majority report, signed by Drayton and Acworth, advised the government to take over the three railways (Canadian Northern, Grand Trunk Pacific and Grand Trunk) and operate them in conjunction with other railways already built or acquired by the government. The report advised against the roads being allowed to go into bankruptcy and declared that even as regards those securities not guaranteed by the Government there was a moral responsibility upon the Government to safeguard the investors. "Technically, of course, the Government has no responsibility beyond that of meeting its guarantees. But if the two companies went into the hands of receivers, we cannot doubt that investors outside Canada would believe, however erroneously, that the Dominion Government had treated them badly and that the result would be serious injury to the credit of the Canadian Government, and indeed of all Canadian enterprises. And this result is one that, putting it on pecuniary grounds alone, the Canadian people should in their own interest spend a good deal of money to avoid. We therefore consider that Canada should assume the responsibility of seeing that the interest on these securities is met."

Commissioners Drayton and Acworth were not in favor of direct operation by the Government, but by a company to be known as the "Dominion Railway Company," of which the Government would be the only shareholder and which would be charged with the responsibility of operating the roads free from political control or interference. Control was to be vested in a self-perpetuating board of five trustees. A minority report was submitted by Commissioner Smith which, even if acted upon, could not have changed in any essential degree the subsequent course of events: it might merely have deferred the day of reckoning.

*ACQUISITION OF CANADIAN NORTHERN:*

On August 1, 1917, the Government announced that it intended to acquire control of the remaining capital stock of the Canadian Northern. Under the terms of the 1914 arrangement the Government had power simply to foreclose on the stock, but it proposed instead to let the price, if any, to be paid for the stock be decided by arbitration. Although the railway had not earned its fixed charges for many years and seemed unlikely

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120137

to do so for many years to come, the board of arbitration set a price of $10,800,000. It has been contended that the position of the Canadian Bank of Commerce, heavily involved on account of Mackenzie and Mann, probably had as much to do with the award as any considerations of actual value.

Up to the time of its acquisition, and exclusive of this award, the Government of Canada had advanced to the Canadian Northern by way of loans $30,819,686. It now assumed liabilities amounting to $382,061,087, with a certainty that at least a further hundred million dollars would be required to bring the road to the point where it could provide satisfactory service. As a matter of fact, during the following five years more than a quarter of a billion dollars were required to pay for betterments and to meet operating deficits on the Canadian Northern.

The Canadian Northern continued in its corporate capacity. Mr. D. B. Hanna, who had been associated with the road from its early days, was retained as President with a board of directors appointed by the Government. The operation of railways previously owned by the Government, including the Intercolonial, National Transcontinental and others, was entrusted to the Canadian Northern Board. Then, in June 1919, all the railways acquired or to be acquired by the Government were consolidated by Act of Parliament under the name Canadian National Railways, to be directed by a Board of not less than five or more than fifteen persons, appointed by the Governor-in-Council. This Board was charged with the duty of co-ordinating all the Government lines into one system.

*GRAND TRUNK PACIFIC GOES INTO RECEIVERSHIP:*

In March, 1919, the Grand Trunk Pacific was placed in receivership with the Dominion Minister of Railways as receiver. The parent company struggled along for two years more but eventually it also passed into the control of the Government. If the Government had been willing to release the Grand Trunk from its obligations concerning the Grand Trunk Pacific it probably could have weathered the storm and continued as a privately owned and operated railway. But, since the Government had already lent the Grand Trunk Pacific $83,639,237 and would be compelled to find $40,000,000 in the next three years for replacements and operating deficits, and had assumed capital obligations amounting to $129,518,484, the Government could not be expected to take all the loss and let the Grand Trunk slide from under. Although the Canadian National Railways had been set up in June 1919 to operate all goverment railways, operation of the Grand Trunk Pacific remained under a separate Board, appointed however by the Government, till September

120138

1920, when it, too, came under the Canadian National Railways Board.

*ACQUISITION OF THE GRAND TRUNK:*

The first steps toward the acquisition of the Grand Trunk were taken in November, 1919, but it was not till nearly two years later that complete control passed to the Government. In the meantime protracted negotiations were proceeding to decide what, if anything, should be paid for the capital stock. The matter was finally left to arbitration, the Board of Arbitration consisting of Sir Walter Cassels of the Exchequer Court, Sir Thomas White, and Former President W. H. Taft of the United States. During the course of the arbitration it was disclosed that for some years the accounts of the company had been manipulated to show profits where there were none so that dividends might be paid and that the physical property of the system had been allowed to deteriorate greatly through lack of proper maintenance. The arbitrators decided that the stock was worthless, but certain stockholders were dissatisfied and began litigation which is still before the courts. Although the capital stock cost the Government nothing, the Government assumed liabilities aggregating $298,341,289 in addition to loans previously made of $1,148,533.

*THE PEOPLE PAY:*

At the end of 1922, the year that all the Government roads were brought under one management, Canada had expended for railways, without counting subsidies received by the C.P.R., the following amounts in cash:

| | |
|---|---|
| Canadian Northern Railway Company | $298,799,591 |
| Grand Trunk Railway Company | 84,560,342 |
| Grand Trunk Pacific Railway | 123,586,034 |
| Can. Govt. Rys.—Capital Expenditures, less deficits | 429,563,445 |
| | $936,509,412 |

In addition to the above, the Government assumed with respect to these roads liabilities due to the public amounting to $804,503,144. Not all of this bore the guarantee of the Government, but the Government's responsibility, both for principal and interest was now implied by reason of its having taken over the properties. A considerable portion of this indebtedness, due to the poor financial standing of the respective companies previous to their failure, was at high interest rates. That a reduction in these rates should have been made a condition of their assumption is contended by many who argue that, when

CANADA

120139

the Government was virtually placing its credit behind issues previously of doubtful value, the least that might have been asked of the holders was that they accept a reduction in interest.

*THE CANADIAN NATIONAL SYSTEM:*

In January, 1923, all the roads variously acquired by the Government, comprising a total of 22,468 miles (20,575 in Canada and 1,893 in the United States), were placed under the management of the Canadian National Railways System, with Sir Henry Thornton as President and Chairman of the Board. Sir Henry Thornton's coming to Canada coincided with the beginning of an upswing in business, which many persons believed was the beginning of permanent recovery from the effects of the war. Under the impetus of this movement and also due to the stimulus provided by the personality of the new President, the Canadian National System showed in 1923 gross earnings of $256,961,590 and a net income surplus of $13,501,648 which, however, fell $21,539,732 short of meeting interest charges on the debt due to the public. This, however, was an improvement over the previous year of $11,507,499. Revenues were down for the years 1924 and 1925 and in the latter year a Committee of the Senate recommended unification of the two systems along the lines since suggested by Sir Edward Beatty, but no action was taken in the matter by the Government.

Quickly improving business conditions soon rendered ridiculous any suggestion that the Canadian National System be interfered with. In 1926 the gross revenues reached $270,982,223, providing an income surplus of $41,586,242 or $2,389,009 more than enough to pay all the interest on the debt to the public. Although revenues increased in 1927, expenses were relatively higher, so that the System fell $4,200,678 short of meeting its interest charges. In 1928, however, revenues soared to $304,591,269, providing, after all interest charges had been met on the bonded indebtedness, a surplus of $2,638,900. That was the high point. From 1928 till the depth of the depression was reached in 1933, railway revenues shot downward to a low in the latter year of $148,519,742. Although thousands of employees were dismissed and wholesale economies were instituted, expenses could not drop as fast as revenues. Consequently in 1929 the deficit was $13,408,705; in 1930, $35,585,895; 1931, $60,869,795; 1932, $61,006,919; and in 1933, $60,017,713.

*THE BOOM YEARS:*

The following table shows the details of Canadian National operations for the years 1923 to 1928 inclusive:

120140

| | 1923 | 1924 | 1925 |
|---|---|---|---|
| Operating revenues | $256,961,590 | $239,596,670 | $249,411,884 |
| Operating expenses | 235,838,046 | 221,622,049 | 216,290,434 |
| Net operating revenue | $ 21,123,544 | $ 17,974,621 | $ 33,121,450 |
| Net of taxes and Income Credits and Debits—Net Dr. | 7,621,896 | 3,202,293 | 2,677,597 |
| Net available for interest | 13,501,648 | 14,772,328 | 30,443,853 |
| Interest on debt due public | 35,041,380 | 38,361,704 | 40,438,235 |
| Deficit or surplus | $ 21,539,732 | $ 23,589,376 | $ 9,994,382 |

| | 1926 | 1927 | 1928 |
|---|---|---|---|
| Operating revenues | $270,982,223 | $274,879,118 | $304,591,269 |
| Operating expenses | 223,561,262 | 233,305,267 | 249,731,695 |
| Net operating revenue | $ 47,420,961 | $ 41,573,851 | $ 54,859,574 |
| Net of taxes and income Credits and debits—Net Dr. | 5,834,719 | 5,248,432 | 10,409,794 |
| Net available for interest | $ 41,586,242 | $ 36,325,419 | $ 44,449,780 |
| Interest on debt due public | 39,197,233 | 40,526,097 | 41,810,880 |
| Deficit or surplus | 2,389,009 | 4,200,678 | 2,638,900 |

N.B. In each of the above years there was charged against the Canadian National Railways, merely as a book entry, interest on various Government loans made previous to the acquisition by the Government of the various roads and subsequently. In 1923 this interest charge was $30,157,943; by 1928, it had increased to $32,507,337.

120141

The onset of the depression and the sudden and unforeseen loss of revenues and consequent mounting deficits, provided opponents of the Canadian National with their opportunity. Naturally, the C.P.R. interests, who had never looked with equanimity upon a huge railway enterprise backed by Government credit and capital in competition with themselves, were quick to take advantage of the situation. Both in parliament and out of parliament, a concerted attack was made upon the System and its President. Undoubtedly, during the expansive days of the boom the Canadian National had spent money with a lavish hand. Luxuriant passenger trains were provided to catch the fancy of the travelling public; hotels and summer resorts were built and in every way stiff competition had been given the Canadian Pacific. The Canadian National has been blamed for all the spending that was done and the C.P.R. has claimed that its own spending was forced upon it in an attempt to meet the pace set by its publicly-endowed competitor. But there is no doubt that the C.P.R. was also caught by the infection of boom times and did not always require much urging. Despite vociferous claims to the contrary, the Canadian National was not alone to blame, as may be demonstrated by reference to hotel expenditures, for which the C.N.R. has been widely criticised. In the nine years from 1923 to 1931 inclusive, the C.P.R. spent $46,887,999 as compared with $22,153,824 spent by the Canadian National. The C.P.R. may have felt that it was required to spend money in order to keep up with its rival, but surely it was not necessary to spend *twice* as much.

*COLLAPSE OF THE BOOM:*

There was a certain amount of politics involved. Sir Henry Thornton had been appointed by a Liberal administration and his plans and policies were lavishly supported by the Government which naturally, if not wisely, was inclined to take credit unto itself when revenues were soaring. But when depression descended upon the scene, the Conservatives were in power, headed as fate would have it by R. B. Bennett, most of his life a C.P.R. solicitor. There is no intention here to impugn the integrity of either Mr. Bennett or his administration; they were faced with an extremely serious situation and when they were compelled to meet railway deficits of over $60,000,000 a year, it was not strange that they should have sought not only to place the blame upon their erstwhile bombastic opponents but also to find some means whereby the pressure of railway deficits might be removed from the Treasury. The railway committee of the House of Commons provided the opportunity for those who had long awaited their chance to attack Sir Henry Thornton and through him to strike at the Canadian National Railways. During the 1931 session the affairs of the System were raked over publicly and Sir Henry and his officers were grilled

120142

on the stand in a manner which, when all due allowances are made, was more suggestive of personal or political animus than concern for the public weal. Assertions were made and rhetorical questions asked with apparently no other purpose than to provide a hostile press with libel-free headlines.

Sir Henry had made powerful enemies and now they seemed to be in the saddle. In his bitterness and distress he came to believe that recurring changes of political management would tend to render the operation of a publicly-owned railway difficult if not impossible, and was therefore all the more easily persuaded to enter into an understanding with Sir Edward Beatty for the consolidation of the two railways under a management representative of both roads, and in which he might have a place. In consequence of this understanding he, at Beatty's suggestion, recommended to the railway committee the appointment of a Royal Commission to investigate the whole railway situation.

*THE DUFF COMMISSION:*

This recommendation was passed on to the House by the Committee and on November 20th, 1931, Mr. Bennett appointed a Royal Commission to "inquire into the whole problem of transportation in Canada, particularly in relation to railways, shipping and communication facilities therein, having regard to present conditions and the probable future developments of the country, and report their conclusions and make such recommendations as they think proper."

The Commissioners were: Lord Ashfield, of London, England; Chief Justice Lyman P. Duff, of the Supreme Court of Canada (Chairman); Sir Joseph Flavelle of Toronto; Beaudry Leman, a Montreal banker; L. F. Loree, of New York, President of the D. & H. Railway; Dr. W. C. Murray, President of the University of Saskatchewan; and Dr. J. C. Webster, a physician of Shediac, N.B.

The Commission held numerous public meetings in various parts of the country and travelled over most of the railway mileage of the Dominion. Naturally, among those whose evidence was of most interest and importance was that of the various officers of the two railway systems. Sir Edward Beatty presented an elaborate scheme for amalgamation. In a secret session he submitted a plan based on the abandonment of 5,051 miles of duplicate or light traffic lines, comprising 1,743 miles of C.P.R. line; 3,258 miles of C.N.R. lines; and 50 miles of Northern Alberta Railways. He contended that if the railways were amalgamated and these abandonments and other economies put into effect, savings could be made, on the basis of 1930 traffic, amounting to $75,300,000 a year and he produced statistical figures in support of his assertion.

120143

*THAT $56,000,000 ESTIMATE:*

Mr. S. W. Fairweather, Director of the Bureau of Economics, Canadian National Railways, was asked by the Commission to prepare estimates of possible economies under consolidation. He worked out a scheme of savings aggregating $56,000,000 a year but specifically warned the Commission that, while the saving which could be foreseen as a result of consolidation was undoubtedly large, it "could only be effected by the resolute facing of a situation which would require sacrifices both individually and collectively as, if it is to reach large proportions, it would involve drastic abandonments of line, reduction in quantity and quality of service, particularly passenger service, and a considerable disturbance of the railway labor and material market. Canada would also have to be prepared to accept the risk attendant upon monopoly, the possibility of inadequate service, of inefficiency, of carelessness, and of political difficulties arising from the creation of a large group with a common interest." He further declared that such a scheme "was predicated upon a docile or practically helpless public and an equally docile or helpless staff of employees."

*SIR HENRY FALTERS BUT STICKS:*

When Sir Henry actually came down to the point of declaring for amalgamation he faltered. Doubtless the thought of handing over to its ruthless competitors the road which had been his pride was more than he could stand. His testimony was far from conclusive, but there is no doubt of the bitterness he felt in regard to what he considered to be the interference of politics.

"One of the inherent disadvantages of any state-owned enterprise, such as the Canadian National Railway," he said, "is the problem of political interference—and one might also add, public pressure. In making this statement I wish it distinctly understood that I imply no criticism of any party or any government, present or past. I merely state a fundamental and universally admitted condition.

"The leaders of all political parties and the people of Canada as a whole are a unit in their desire to prevent political invasion of the Canadian National Railway. But the plain fact is that, irrespective of such wishes and desires, the problem presents difficulties beyond the control of our leaders, be they ever so patriotic or high minded. After all in any form of popular government it must be accepted as axiomatic that the business of the government is politics and, irrespective of whether one likes it or not, politics is something with which a government must reckon in all its activities.

"This difficulty would of course be removed if the two railways were amalgamated under private ownership; but at once there

120144

is aroused in the minds of the citizens of our Dominion that fear which is quite justifiably displayed whenever a great and formidable monopoly appears—a fear which the activities of many monopolies in the past have justified. There will also be the criticism that with the removal of competition there is bound to be a deterioration in service and efficiency, irrespective of the desire and efforts of the management to avoid such results.

"In short, for a variety of reasons, of which two have been expressed, the amalgamation of the Canadian National and the Canadian Pacific would be definitely repugnant to the people of the Dominion, in my judgment; and, apart from anything else, it becomes politically impracticable. I believe it must therefore be discarded as a solution."

*DUFF COMMISSION AGAINST AMALGAMATION:*

The decision of the Royal Commission, dated September 13, 1932, was definitely against amalgamation; co-operation was recommended instead.

"We have carefully weighed the informing and voluminous evidence which has been placed before us in regard to a subject of major importance to the Canadian people and, in arriving at our conclusions and making our recommendations, we have endeavored to eliminate any considerations as to what might be theoretically the best course to pursue under other circumstances and in other countries, and to base our judgment solely on what is best for the people of Canada.

"The complete amalgamation of the two systems has been suggested as a method, not only for attaining a measure of economy, but also for the most effective use of the properties. This raises the question whether it may be done either by public or private ownership. Whatever merits or demerits this proposal may have, the time is not opportune for giving serious consideration to this particular remedy; neither complete public nor complete private ownership is possible.

"To establish a monopoly of such magnitude and importance would place in the hands of those responsible for the administration of the system powers that would, if not properly exercised, prejudice the interests of the Dominion as a whole.

"It has also been suggested that the Canadian National Railways should be leased to the Canadian Pacific Railway, either in perpetuity or for such a period as would afford an opportunity to effect substantial economies.

"A lease in perpetuity presents certain difficulties. It would, whatever safeguards may be adopted, result in the establishment of a monopoly.

"Other considerations which militate against a perpetual lease are twofold: first, should the population of Canada greatly increase, the volume of traffic would grow and the railway mile-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

age be materially enlarged, with the result that the management of so great a system might well become unwieldly and necessitate segregation. The second reason is a natural and justifiable hesitation to commit, finally, future generations, and even the present one, to a policy adopted under the stress of difficult circumstances, which may not be best adapted to a new set of conditions difficult to forecast.

. . . . . .

*RECOMMENDATIONS:*

"These and other plans have not fulfilled the conditions which in our opinion are necessary to any practicable solution of the Canadian railway problems. That solution must have regard to the following:

"(i) Correct evils which admittedly are apparent in the operations of the past.

"(ii) Provide machinery for co-operation between the two railways with a view to improving their financial position.

"For the sake of clarity certain main considerations which have been present to our minds are here stated:—

"(i) The identity of the two railway systems should be maintained.

"(ii) The management of the Canadian National Railways should be emancipated from political interference and community pressure.

"(iii) Machinery should be provided for co-operation between the two systems for the elimination of duplicate services and facilities and the avoidance of extravagance.

"(iv) The attainment of a scale of economies which will bring the burdens of the National System within reasonable dimensions and effectively check extravagant and costly operation.

"(v) Reasonable protection for the privately-owned undertaking against arbitrary action by the publicly-owned undertaking which might unfairly prejudice the interests of the privately-owned undertaking.

"In outline the plan we respectfully recommend for adoption is as follows:—

"Three Trustees should be appointed by the Governor in Council, in whom should be vested all the powers of the present Board of Directors of the Canadian National Railways, both in respect of the parent and all subsidiary corporations of the System; and any and every power and authority necessary to enable them to administer the property and operate the System and every part thereof.

. . . . . .

"While the responsibility for the direction and control of the System should be laid upon the Chairman and his associate Trustees, provision should be made for the post of Chief Operating Officer, with the titular rank of President. Under his care should be placed the entire working of the railway in detail. The exact extent of his authority should be covered by regulations or by-laws to be made by the Trustees.

"The President should be appointed by the Trustees and should be responsible to them and not directly to the Government or Parliament.

. . . . . .

*FOR CO-OPERATION:*

"A statutory duty should be imposed upon the Trustees as well as upon the Board of Directors of the Canadian Pacific Railway that, consistently with the provisions of the existing law and with the recommendations of this report and with the provision of all reasonable services and facilities, they should adopt as soon as practicable such co-operative measures, plans and arrangements as shall, consistent with the proper handling of traffic, be best adapted to the removal of unnecessary or wasteful services or practices, to the avoidance of unwarranted duplication in services or facilities, and to the joint use and operation of all such properties as may conveniently and without undue detriment to either party, be used.

"In order effectively to carry out the injunction to co-operate, the Board of Trustees of the Canadian National Railways and an equal number of directors of the Canadian Pacific Railway shall meet at regular intervals for the purpose of discussing and agreeing in respect of matters referred to in the previous paragraphs. In the event of a failure to agree, there may be an immediate reference to the Arbitral Tribunal provided for in the next succeeding paragraph.

"For the purpose of settling disputes and in particular, disputes concerning the desirability of any co-operative measures or arrangements or course of action and for the settling of details of any scheme giving effect thereto and for determining the conditions thereto, an Arbitral Tribunal should be set up for each occasion. The Arbitral Tribunal should be composed, first, of the Chief Commissioner of the Board of Railway Commissioners and, second, of one representative from each of the two railways."

*CANADIAN NATIONAL - CANADIAN PACIFIC ACT:*

At the following session of Parliament the Canadian National-Canadian Pacific Act, 1933, was passed to implement the recommendations of the Commission. The Act provided that in place of the existing Board of Directors there should be appointed three Trustees as recommended by the Commission; the two rail-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120147

ways were directed to institute co-operative economies, and arrangements were provided for the setting up of Arbitral Tribunals. The Act specifically stated, moreover, that nothing in the Act should be deemed to authorize an amalgamation of the two railways.

Charles P. Fullerton, K.C., F. K. Morrow, and J. E. Labelle, K.C., were shortly afterwards appointed to constitute the Board of Trustees, and the old Board of Directors was discontinued. The Trustees, having been appointed on the recommendation of the Royal Commission, recognized their obligation to implement as far as they were able the provisions of the Act. Consequently they immediately set in motion machinery to effect economies in connection with the elimination of duplicate trackage and services and pooling of train services. These were matters of a naturally complicated nature, but they were rendered all the more difficult because, on the one hand, Canadian National officials were averse to sharing with their competitors such traffic advantages as their road might have, while there was opposition from railway labor which feared, not without justification, that unemployment would result. The chief difficulty, however, was with the C.P.R., which complied with very poor grace.

Sir Edward Beatty was not slow to express his disagreement with the Duff Commission findings, voicing his disappointment in various speeches throughout the country. He was still convinced that amalgamation, or as he later came to term it, unification, was the final solution of the railway question. The year following the report of the Duff Commission was the worst yet for the railways and Sir Edward still had many sympathetic listeners. The following table shows the situation of the Canadian National during the worst of the depression:

| | 1931 | 1932 | 1933 |
|---|---|---|---|
| Operating revenue .... | $200,505,162 | $161,103,594 | $148,519,742 |
| Operating expenses.. | 199,312,995 | 155,208,161 | 142,812,559 |

120148

*THE TOUCHE REPORT:*

The complicated financial structure of the Canadian National Railway System had been from the beginning an obstacle to the proper presentation of the System's true relationship to the Canadian people. The existing situation lent itself too well to misrepresentation on the part of those opposed for one reason or another to the National System. Sir Henry Thornton had devoted a great deal of attention to the problem, but without reaching any satisfactory solution.

The Government Auditors of the Canadian National Railways, George A. Touche & Co., in their report to Parliament in March, 1935, stated, in connection with the capital structure, that they conceived it to be their duty, under Section 13 of the Canadian National-Canadian Pacific Act, 1933, to bring to the notice of Parliament the facts of the situation then existing. The following is a brief summary of their 1935 report.

The auditors pointed out that at the 31st of December, 1934, the Consolidated Balance Sheet of the Canadian National Railway System showed the Dominion in the joint capacity of controlling shareholder and creditor in the amount of $1,817,118,-010.43, which was classified as follows:—

| | | |
|---|---|---|
| Capital Stock owned by the Dominion— Canadian National Railway Company Old Grand Trunk..... | $165,627,738.70 | |
| Canadian Northern Railway Company..... ..... | 100,000,600.00 | |
| | | $265,628,338.70 |
| Old Grand Trunk Debentures..... | | 15,142,633.33 |
| Dominion advances—for deficits, as adjusted | | 324,074,527.39 |
| Dominion loans for Capital purposes, as adjusted ..... | | 348,506,415.42 |
| Interest accrued by railways on Dominion advances and loans..... | | 459,486,186.74 |
| Dominion Capital appropriations— Canadian Government Railways..... | | 404,279,908.85 |
| Total Dominion of Canada Account as reconciled with official Government certificates ..... | | $1,817,118,010.43 |

The auditors pointed out that the position of the Dominion, as shown in the railway accounts, was that of a large creditor as well as that of a shareholder. In one sense, the Dominion was lending money to itself. "Is it not a fact," the auditors asked, "that what the Dominion owns is the final equity after the debt to the public?" They expressed the belief that, in general terms, final equity should be represented by capital stock.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The auditors made the following recommendations:

1. That the old Grand Trunk stock of **$165,627,738.70** be written out because the Grand Trunk Board of Arbitration in 1921 had declared the stock worthless and had found the intrinsic property investment values were substantially overstated on the books.

2. That the Canadian Northern stock be written down from **$100,000,600.00** to **$18,000,000.00** to bring the book value of the stock in accordance with the findings of the Canadian Northern Board of Arbitration in 1918.

3. That Dominion advances for deficits aggregating **$324,074,527.39** be written out because it represented a contribution by the shareholders to replace their impaired capital.

4. That the interest accruals of **$459,486,186.74** on Dominion advances and loans be written out because the Dominion in Public Accounts had set up no relative asset. In other words, the Dominion had already written the amount off, and there was no good reason why the books of the railway system should continue to show the item.

5. That the governmental grants in aid of construction represented by the old Grand Trunk Debentures amounting to **$15,142,633.33** be written off because this portion of the grants was placed junior to the old Grand Trunk stocks declared worthless under the 1921 arbitration.

The auditors further recommended the exchange of the Dominion's (then) capital stock holdings and creditor claims in respect of corporate loans, advances and interest accruals, for shares of capital stock in the Canadian National Railway Company, the stated value of which would have been at 31st December, 1934, $361,026,454.13 made up as follows:

| | |
|---|---|
| 1918 Arbitration value of the Canadian Northern Railway Company common stock | $ 18,000,000.00 |
| Dominion loans for Capital purposes—as adjusted | 348,506,415.42 |
| | $366,506,415.42 |
| Less: Impairment of Shareholders' Capital during the year 1934—represented by that portion of the deficit not paid in cash by the Dominion | 5,479,961.29 |
| Total stated value of capital stock | $361,026,454.13 |

The sum total which would then stand to the credit of the Dominion at the 31st December, 1934, would be **$765,306,362.98**, made up as follows:

| | |
|---|---|
| Total stated value of capital stock | $361,026,454.13 |
| Dominion Capital appropriations—Canadian Government Railways | 404,279,908.85 |
| | $765,306,362.98 |

The effects of such an exchange of securities would be—

(a) The status of the Dominion would not be altered insofar as its equity in and claim upon existing assets of the National System were concerned.

(b) The control by the Dominion of all corporate units of the National System would be centralized through the Canadian National Railway Company.

(c) Whereas the Net Debt of Canada as shown in Public Accounts would be increased, apart from current advances, by only **$15,748,921.60**, in respect of the Canadian Government Railways, the proposed exchange would eliminate from the capital stock and liabilities of the National System **$1,046,331,686.16**.

If the above recommendations were carried out the capital account of the National System would appear thus:

| | | |
|---|---|---|
| Borrowed Capital— | | |
| From the public | | $1,246,330,439.18 |
| Owned or Share Capital— | | |
| Capital Stock held by the Dominion | $361,026,454.13 | |
| Dominion expenditures for Canadian Government Railways | 404,279,908.85 | 765,306,362.98 |
| | | $2,011,636,802.16 |

The auditors quoted the Drayton-Acworth Report of 1917 with respect to the Intercolonial Railway, which applies with equal significance to the whole of the National System:

"It has indeed recently been ingeniously argued that it (the Intercolonial Railway) ought to have earned interest at a commercial rate from its first inception, and that all the interest that it has not earned during its whole existence ought to be capitalized and compounded to ascertain the real cost of the railway to the people of Canada. We cannot accept this somewhat fantastic argument. If this theory were accepted, it is manifest that a similar course ought to be followed in the case of ordinary railway companies. Interest, which, of course, has never been paid, ought to be calculated in the same way on all the cash subsidies which private lines have received and on the value of all land grants which they have obtained, and all this ought to be carried into an imaginary account on which imaginary earnings ought to be obtained. Further, the capital account of every railway company ought to be recast in the same way, so as to carry forward into the accounts the money that ought to have been paid for dividends on the share capital, in years when either no dividends or only insufficient dividends were in fact paid."

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120151

The recommendations made by George A. Touche & Co. were not acceptable to the Bennett Government; not only that but they were removed as auditors for the year 1935 and the Toronto firm of Clarkson, Gordon, Dilworth & Nash was appointed in their place. However, Touche & Co. were re-appointed auditors by Parliament in 1936, and in 1937 the general principles of their capital structure recommendations were approved by Parliament by way of the Canadian National Railways Capital Revision Act.

*POSSIBLE ECONOMIES CANVASSED:*

In accordance with the provisions of the Canadian National-Canadian Pacific Act, various projected economies were being studied by joint committees composed of officials of the two roads. Where trackage belonging to one system was to be eliminated, an attempt was made to find trackage of similar length and business potentialities belonging to the other system which could be eliminated. The most promising field for economies was found in passenger traffic and various pooling arrangements were studied. According to estimates of Canadian National traffic officers, duplication in passenger trains aggregated about 3,600,000 car miles, which if eliminated might save about $3,600,000 a year.

Before the Canadian Pacific would consider the matter of pooling, however, it insisted that there should be joint terminals at the principal points and that at Montreal all of the principal pool and non-pool trains should make use of the C.P.R. Windsor Street station. In order to provide union stations as suggested by the C.P.R., large capital outlays were necessary in most cases and for this reason the C.N.R. objected, objecting also to the exclusive use of Windsor Street station. What the C.P.R. proposed was in effect that the C.N.R. should practically go out of the passenger business except as an adjunct to the C.P.R.

*LIMITED PASSENGER POOL:*

Arrangements providing for the pooling of passenger traffic on a transcontinental basis having fallen down, the next step was to attempt a smaller pool, and with the expectation that passenger services west of Toronto—to Chicago where the C.P.R. through its Michigan Central double track from Detroit has an advantage—would be pooled later, the C.N.R. agreed to pool Montreal-Toronto and Ottawa-Toronto passenger traffic where it already had an advantage. Agreements covering these pools became effective on April 2, 1933, resulting in an annual economy of $495,000. This arrangement was extended on March 11, 1934, to include a Quebec-Montreal pool and the elimination of further trains between Montreal-Toronto, resulting in added

120152

savings of $477,000 a year. These, however, are the only pools that have been put into effect; and in the meantime the C.N.R. feels that it has been let down in that the more advantageous—to the C.N.R.—pooling of passenger traffic west of Toronto is still in abeyance.

*DUPLICATE TRACKAGE:*

Since the Canadian National-Canadian Pacific Act went into effect about 655 miles of duplicate trackage, resulting in an annual saving of approximately $625,000 has been eliminated. Other arrangements, such as joint switching arrangements, combined terminals, etc., have resulted in saving about $200,000, making a total annual saving to date of less than $1,700,000.

Economies possible from the elimination of trackage were found to be greatly less than had been anticipated. In the first place, the amount of trackage that is actually duplicate is much less than the public were led to believe by Sir Edward Beatty and others. A survey of duplicate and thin traffic lines made by the C.N.R. of its own lines involving a total of 1,800 miles showed upon consideration of all circumstances, future possibilities of the districts, lack of other transportation and the difficulty of securing the consent of the Board of Railway Commissioners, that only about 600 miles could reasonably be eliminated; and when application was finally made to the Board of Railway Commissioners for permission to abandon this 600 miles the Board agreed with respect to only about half of it. Thus died the myth widely believed throughout Canada that there existed 5,000 miles of railway tracks that could be torn up without detriment to the public service.

*SLOW RECOVERY:*

Although the railways reached bottom in 1933, the climb out of the depression has been slow. For one thing, the western grain crops have been relatively small and the fortunes of Canadian railways are closely linked to grain movements. However, during recent years mining has come increasingly into the picture. And most significant of all, the region of greatest mining activity is along the line of the National Transcontinental and north of it; along that line which was built thirty years too soon but which may yet return a handsome profit to its owners—the Canadian people—even though it may not entirely justify its builders for anticipating the future by so many years.

The following table shows the slow but steady climb of the Canadian National out of the great hollow of the depression:

Although the report of the Duff Commission put somewhat of a check upon the activities of Sir Edward Beatty and others advocating amalgamation, the continuance of the depression favored their schemes insofar as they could still point to large annual deficits and cater to the general desire for lower taxes.

The defeat of the Bennett Government in 1935, in which the railway vote undoubtedly played a part—although perhaps not as great a part as some seem to think—and the return of the Mackenzie King administration, generally believed to be more favorably disposed toward a publicly-owned railway system—despite its large and influential anti-public-ownership Quebec bloc — imposed a further check upon the amalgamation campaign. The appointment of Mr. C. D. Howe, a new man to public life, gave the sorely harassed System renewed hope. Notwithstanding his previous associations with big business enterprises, he seems seriously desirous of permitting the Canadian National to work out its salvation as a publicly-owned concern.

*TRUSTEE PLAN TERMINATED:*

One of the first steps of the new administration was the amendment of the Canadian National-Canadian Pacific Act, by which the Board of Trustees was abolished and a Board of Directors consisting of seven was provided instead. George A. Touche & Co. were re-appointed auditors and, in general, their recommendations of 1935 concerning the revision of the Canadian National capital structure were implemented by legislation and a duplication of approximately $1,500,000,000 of liabilities was eliminated.

120154

The directors subsequently appointed were: S. J. Hungerford, Montreal; J. Y. Murdoch, K.C., Toronto; J. H. Symington, K.C., Montreal; D. H. McDougall, Montreal; Wilfrid Gagnon Montreal; B. L. Daly, Montreal; and R. J. Moffat, Bradwell, Sask. Mr. Hungerford, who had held a somewhat anomalous position under the Trustees, was made President and Chairman of the Board. As signifying the important place which mining has attained in Canada, two directors—Messrs. Murdoch and McDougall—were prominent mining men. An innovation was the appointment of one director (Mr. Daly) at the nomination of organized railway labor; and another (Mr. Moffat) on the nomination of farmers' organizations.

*SENATE INVESTIGATION, 1938:*

On March 30, 1938, the following resolution, moved by Hon. C. P. Beaubien, K.C., was adopted in the Senate:

> *Resolved*—That a Committee of the Senate be appointed to enquire into and report upon the best means of relieving the country from its extremely serious railway condition and financial burden consequent thereto, with power to send for persons, papers and records, and that the said Committee consist of twenty Senators.

This, to begin with, was a most unfair resolution. Its major premise was the assumption that an allegedly serious financial situation was due to the failure of the railways when, as a matter of fact, the railways are providing, in a situation that is not of their making, the cheapest transportation in the world.

The Committee got under way early in April and examined in all 26 witnesses, mostly officers of the two railway systems. The question why co-operation had not been more successful was first considered and Mr. Fairweather and Mr. John E. Armstrong, Assistant Chief Engineer, Canadian Pacific Railway, described the manner in which the Joint Co-operative Committees had approached the problem and worked out formulae for the study of various suggested economies and the reasons why greater results had not been achieved.

It was evident from the testimony of Mr. Fairweather that the C.P.R. had never wholeheartedly been behind the idea of co-operation and that such measures as had been adopted were more at the expense of the Canadian National than of the Canadian Pacific. Mr. Fairweather was of the opinion that the field of economies through co-operation was limited to a possible $10,000,000 a year, most of which was incapable of realization at all without some overriding authority to compel both railways to institute economy projects obviously in the public interest. Mr. Armstrong and other Canadian Pacific officers, on the other hand, while agreeing with Mr. Fairweather that the field was limited, disagreed as to the alleged responsi-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120155

bility of the C.P.R. for the failure to achieve greater economies through co-operation. While Mr. Fairweather was entirely distrustful of the practicability of unification, the Canadian Pacific officers were united in their agreement as to the practicability of unification.

*SIR EDWARD BEATTY:*

Sir Edward Beatty reiterated his case for unification. His submission was similar to that with which the public has become so familiar, except that he had dropped his previous demand that the amalgamated roads be operated under C.P.R. management and that the Government guarantee the interest on C.P.R. debenture stock and bonds. He still held to his estimate presented to the Duff Commission of yearly savings from unification amounting to $75,300,000, based on conditions similar to the year 1930.

His submission was presented under five principal heads:

1. That the two railway companies should continue to own their present properties, the securities of the companies to remain in their present ownership, there being no new capital set-up.
2. That there should not be any guarantee to the Canadian Pacific of a return on its stock or other capital issues.
3. That "each group of owners should continue to receive under unification the net earnings which past experience indicates their company would have received as an independent institution, and that the additional net earnings made available by unification be shared between them on an equitable basis", and "that the Government would directly receive at least half of these savings."
4. That adequate provision should be made to prevent the unified company from neglecting its duty as a public utility, and depriving any community of necessary railway service, by adding, if necessary, to the strength and powers of the Board of Railway Commissioners.
5. That adequate provision should be made to protect the rights of railway workers.

*DISPLACEMENT OF LABOR:*

Sir Edward entered into a lengthy discussion of the question of the displacement of labor. He pointed out that the annual turnover of railway labor on the Canadian Pacific through death, retirement, or other reasons, is almost 5 per cent. The total labor saving under unification he estimated at from 15 per cent to 17 per cent. Assuming therefore that the labor situation on the Canadian National is similar, in five years—which is the time he estimates unification would require—by not hiring additional workers, the regular annual decrease in person-

120156

nel would equalize the number of men eliminated through unification.

Asked what division as between the two railways there should be of the profits arising from unification, Sir Edward declined to say. He could not say whether it should be on a 40-60, 50-50 or 60-40 basis. That, he said, would have to be settled by negotiation between the Government, on the one hand, and the Canadian Pacific on the other.

The C.P.R. filed with the Committee as an exhibit a detailed statement of the economies which had been assumed in making up the estimate of $75,300,000 and a number of the Company's higher officers went on the stand to explain the various items to the Committee. During their examination it became evident that nothing like the 5,051 miles of track which the C.P.R. scheme proposed could be abandoned. Nevertheless, Canadian Pacific officers still contended that much of the mileage of the National Trancontinental, especially between Nakina and Winnipeg, could be abandoned or else degraded.

*MR. HUNGERFORD:*

Mr. Hungerford, in his turn, expressed himself as extremely doubtful that anything like the savings claimed by Sir Edward Beatty could be effected. He himself declined to make any estimates of possible savings, saying that no estimate could be much more than a guess. He contended that the railway was bound to consider the needs of the community in any contemplated reductions or eliminations of service. That there is a field for economy through the elimination of duplicate services he freely admitted but he believed that such eliminations as were practicable could still be effected through co-operation. He did not believe, however, that the necessary co-operative measures could be inaugurated without some measure of compulsion and he recommended the setting-up of an appropriate tribunal to enforce economies obviously in the public interest.

Mr. Hungerford strongly deprecated the attacks and misrepresentations that were being directed against the Canadian National System by self-styled experts and writers advocating amalgamation.

"The wisdom of the formation of the Canadian National Railways cannot be judged solely from its financial results." Mr. Hungerford said. "There is a sounder justification for the operation of the property than railway profits. That justification is found in railway service. I am firmly of the opinion that, judged from that point of view, the Canadian National Railways, far from being a danger to the national existence, has aided in large degree and is continuing to aid in the development of the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120157

country. Amounts by which the property fails to earn interest on bonded indebtedness are more than offset by these features.

*THE SYSTEM'S ACHIEVEMENT:*

"In the administration of this property there is always taking place a balancing of two features; on the one hand the real need of service to the public and, on the other hand, a requirement to render the property self-sustaining. That it has never since 1923 failed to meet its operating expenses, notwithstanding the great depression, and that during the years of prosperity it succeeded in earning its interest charges to the public is a remarkable achievement, having regard to the condition of the properties when they were taken over by the Government and the requirements of public service which it was necessary to meet.

"There is a tendency to consider the income deficits of the Canadian National as deficits arising out of the operation of the property but this is not so. The property, in fact, has a very great earning capacity under normal traffic conditions. For the 15-year period, 1923-1937 inclusive, its operating revenues exceeded its operating expenses by $361,346,000 or an average of $24,090,000 per annum. Even in the years of depressed earnings, 1932 to 1937 inclusive, the System earned $71,567,000 in excess of its operating expenses, an average of $11,928,000 per annum. In the five most prosperous years, 1925-1929, the property earned $225,287,000 over its operating expenses, an average of $45,057,000 per annum. These figures relate to the all-inclusive system. The deficits arise not from the operations but from the heavy burden of interest charges."

Mr. Hungerford stated that the proposals advanced by Canadian Pacific officers, under which they claimed economies of $75,300,000 a year, were based upon two groups of assumptions, both of which he believed to be unsound: (1) That the quantity of transportation service is greater and the quality higher than is needed; and (2) that Canadian Pacific unit costs can be applied with propriety to Canadian National operations without due regard to differences in geographical distribution of lines and the relative traffic, maintenance and operating problems.

*ALLEGED ECONOMIES UNREALIZABLE:*

In summing up with regard to the asserted economies from unification or amalgamation, he said:

"It is my judgment that they are largely unrealizable. Railway earnings purchased at the expense of the development of Canada and of a wide disturbance in the already disturbed labor and material markets of the country would be too dearly obtained. The country instead of being better off would be worse off. Yet it is only to the extent that a program of drastic

120158

reduction in expenses could be achieved that the country would be warranted in inviting the perils of monopoly and of the great difficulties which I foresee in the type of management of the joint enterprise which is now proposed. It is my opinion that monopoly does not make for efficiency. I do feel that there is a very grave danger of a slackening of the morale of the organization, of a lessening of initiative and enthusiasm, a loss of sympathetic contact between the management and the men and between the management and the public. The risks are, in my opinion, so great that they could only be offset by the reality of substantial economies on a scale which I, for my part, cannot envisage."

*MR. KINGSLAND RALLIES TO THE DEFENCE:*

Mr. W. A. Kingsland, Vice-President of the Canadian National Railways, Central Region, had a word to say about the C.P.R. proposal to abandon Canadian National main line from just west of Ottawa to Capreol, and from Beaverton, 64 miles north of Toronto, through Capreol to Long Lac, and from Nakina to Paddington, just east of Winnipeg; and the further proposal to take up the Canadian National line from Superior Junction, just east of Sioux Lookout, to Conmee, 35 miles west of Port Arthur, a total abandonment of 1,570 miles, all of which, he declared, was the very best in Canada as to grades and curves.

"The population served in the area referred to is approximately 55,000 and in 1937 the earnings in the territory amounted to $3,000,000. That is local earnings, in and out from the stations, not counting through business. The property investment, other than railway, is estimated at $24,000,000," Mr. Kingsland said.

"The section from Ottawa to Capreol is a lumbering area but 10 miles east of Capreol there are very important mining possibilities.

"From Capreol west to Long Lac there are lumber, pulpwood and mining developments, and being in the mineral belt the area is under active investigation by the mining industry.

*PROMISING MINING REGION:*

"From Armstrong until the prairie lands are reached (approximately sixty miles east of Winnipeg) the Canadian National runs through a territory which has seen probably the greatest mineral development during the past ten or fifteen years. At Collins west of Armstrong, the Chromium Mining and Smelting Company have been actively developing their property and have been shipping ore from this point . . .

"Sioux Lookout, which originally was only a railway terminal, has developed into a headquarters for the air service, radio service and the mining industry in this section. As a result, the town has prospered through these sources and become a sub-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120159

stantial community with the usual interests associated with the northern developments. It is the air base for the various air lines.

"At Hudson, twelve miles west of Sioux Lookout, located on Lac Seul, is situated the base for the movement of freight into the Red Lake and Patricia areas by the transport companies. The water route from this point is approximately 110 miles and a heavy tonnage is handled by tug and scow during the season of open navigation and by tractor and sleighs during winter . . . The tonnage through Hudson has more than doubled during the last two years and, on account of the activity in the Red Lake and Patricia districts, it will, undoubtedly, materially increase . . .

*SET THE COUNTRY BACK MANY YEARS:*

"To abandon this potentially rich and productive north country appears to me as an industrial impossibility and from a railroad viewpoint the proposal to abandon or degrade this Canadian National Transcontinental road shows a lack of understanding of the conditions. Here you have on one hand a line with fine gradients and curvatures and on the other hand a line of heavy grade and sharp curvatures. On the Canadian National line it is possible on the first section under consideration, i.e., Ottawa-Capreol, to handle 50 per cent more tonnage in either direction per locomotive than on the corresponding C.P.R. line, Smith Falls-Sudbury; and on the second section, Capreol-Armstrong, a locomotive can handle 80 per cent more tonnage westward and 110 per cent more eastward than can be handled on the C.P.R. line, Sudbury-Fort William. In regard to the C.P.R. line, Fort William-Winnipeg, and the corresponding C.N.R. line, Armstrong-Winnipeg, the C.N.R. line can handle 65 per cent more tonnage per locomotive than the C.P.R. line. Eastward, however, the C.P.R. can handle approximately 20 per cent more out of Winnipeg per locomotive than can the C.N.R. on its Winnipeg-Sioux Lookout line. This involves primarily grain movement to the lakehead . . .

"The abandonments contemplated in the C.P.R. proposal, if made effective, in my opinion would set this whole north country back many years and would cause a financial loss to Canada of many millions of dollars per annum.

"In my judgment, the line should neither be abandoned nor degraded, but on the other hand, as we have an ideal situation, the line should gradually be built up to the highest possible standard so as to provide the fastest and best possible route between Eastern and Western Canada, not only for the advantage of Canada, but in the interest of national defence."

*EFFECTS OF WESTERN CROPS:*

In a discussion concerning future prospects of the Canadian

120160

National, Mr. Fairweather was asked to estimate the effect on Canadian National finances of a good grain crop in the West.

"I did make a study of this particular question," he answered. "This study was designed to show the direct and indirect effect upon the Canadian National Railways of what might be called a reasonable average crop and a bumper crop, as compared with the crop failures which we experienced in 1937. When you get into these estimates you have got to deal in millions because you cannot touch any problem of the transportation economy without dealing in very large figures. I set as a minimum crop the crop of last year, 165,000,000 bushels, and I compared that with a crop of 400,000,000. Now, in the direct movement of grain and grain products, I estimate that the difference in a year—that is the effect of that crop, the difference between 165,000,000 and 400,000,000—would represent for the Canadian National Railway System $17,000,000 of gross revenue."

*Senator Calder:* "That is on hauling grain alone?"

*Mr. Fairweather:* "That is the grain alone. But that only begins to open up the picture because, if you assume that a 400,000,000 bushel crop is harvested in Western Canada and marketed, the wealth that is produced by that crop will permeate the whole economic fabric of the country and the railways will respond to that condition because everybody will be travelling in some degree, and will be shipping goods, because they will be buying more, selling more and producing more. Now it is interesting to note that that secondary effect of the distribution of wealth is more important than the primary movement of grain. It amounts, according to my figures—I am trying to give the touch of, I won't say reality, but trying to bring it down to perspective—it amounts, in my opinion, to about $20,000,000 additional gross revenue, so that the two things combined would produce $37,000,000 additional gross.

"Of course, that is not all of the picture because you have the cost to consider and on the movement of grain we have, in the interests of the national economy, shaved the freight rate on grain down pretty thin, with the object of leaving as much wealth as possible in the hands of the farmers. The result is that $17,000,000 of additional direct revenue, after charging the out-of-pocket expenses that go with it, I estimate that approximately $1,500,000 would be left. But with regard to the other $20,000,000, that is traffic in which the rate is much more profitable; and on that business we would get, in my opinion, over $10,000,000. So, to sum it up, we would get an increase of about $37,000,000 in gross revenue, and an increase in net of about $12,000,000. That is on the basis of an average crop. If you come to a bumper crop—and a bumper crop I define as 560,000,000 bushels—the figures would show a total increase in

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120161

gross revenue of $62,000,000 and in net revenue of $20,000,000 and that lends point to what I previously was saying as to what would happen to the Canadian National if traffic really should come back to something like what it used to be."

*RISKS OF UNIFICATION:*

At another point in his examination Mr. Fairweather was asked to define the risks attendant upon unification, at which he had previously hinted.

"The risks are many," he replied. "I have spoken of one that, in my humble opinion, is this, that rather than a set of economies that you are looking for you would get increased expense. Is that a big enough risk? I maintain this, that you see the evils of competition between railways and you are apt to assume that there are no benefits. But it is my humble opinion that the benefits of competition, of a reasonable amount of competition, far outweigh the evils of competition and that, if you take away from the transportation picture of this country, in railways, the cleansing power of competition, you are going to see things happen in expenses after a period of years—when the surge of the present training of personnel is passed—you will find things happen to the railways that you never dreamed could happen. . .

"A very grave risk attached to unification is the financial burden of debt which would be put upon the people of Canada, whether they knew it or not. If one has had any criticism of the railway situation in Canada, it has been, perhaps, as to the way in which the financial burden of private enterprises was assumed by the Government, directly and indirectly. Now, under no plan of unification that I can conceive of would it be possible to avoid extending the generality of the guarantee of securities to the Canadian Pacific securities as well as to the Canadian National because the properties, if you are going to seek any large measure of economy, must physically be inextricably scrambled, and they could not be unscrambled. . . The people of Canada might wake up one day and find that they had succeeded in loading themselves with an effective structure of railway debt that would be very large indeed."

*C.P.R. ESTIMATE DOES NOT STAND UP:*

Messrs. T. H. Cooper, Comptroller, and N. B. Walton, Chief of Transportation, Canadian National Railways, took up the C.P.R. $75,300,000 estimate of savings and discussed it item by item. They showed that, as between 1930 and 1937, the combined costs of the two systems had been reduced by a total of $77,802,717. The combined revenues of the two systems in 1930 were $446,580,624; while in 1937 they were only $343,482,166. Naturally, with such a decrease in the total traffic, there would be a corresponding reduction in the total operating expenses, and

120162

it is also quite natural that many of the items included in the C.P.R.'s $75,300,000 estimate have been put into effect in achieving the reduction of $77,802,717 in the combined expenses. This the Canadian National officers pointed out.

The Canadian National officers also proved that in case after case the C.P.R. estimate was not based on a complete knowlege of Canadian National affairs. Two instances out of many are here cited: In the C.P.R. estimate the Canadian National expenses in 1930 at Montreal were shown, "Station Employees", $1,358,579, "Station Supplies and Expenses", $113,400, or a total of $1,471,979. An actual check of the Canadian National figures for Montreal for that year shows that the figures used in the estimate are in error to the extent of $180,000. One other major point, Winnipeg, was checked. For Winnipeg the C.P.R. submission indicates the Canadian National expense for "Station Employees" at $721,112, and "Station Supplies and Expenses" at $44,136, a total of $765,248. This is at variance to the extent of $167,000 with the actual expenses.

The C.P.R. estimate gives the total Canadian National expenses at Montreal for 1930 for "Yardmasters and Yard Clerks", "Yard Conductors and Brakemen", "Yard Enginemen" and "Fuel", as $1,673,471, which is at variance from the actual figures to the extent of $197,000. Similarly, at Winnipeg, the Canadian National expenses for these four accounts are estimated by the Canadian Pacific at $1,016,681, which is in error to the extent of $162,000.

*LABOR PRESENTS ITS CASE:*

Messrs. W. L. Best, Secretary, Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, and A. R. Mosher, President, Canadian Brotherhood of Railway Employees, appeared before the Committee on behalf of railway workers. Mr. Best dealt with other forms of transport that are now being subsidized by government and which are direct competitors of the railways, showing that the annual cost to the taxpayer for waterways amounts to $32,057,018, and for highways (based on figures for 1935 showing the difference between expenditures by municipal, provincial and federal governments and total amount received from taxes and licenses), $37,866,828, making a total of $69,923,844, or more than $27,500,000 in excess of the Canadian National deficit for 1937.

He disagreed with Sir Edward Beatty's statement that unification would not seriously displace labor. As an illustration he pointed out that in 1928 there were 3,750 names of locomotive engineers on the lists of the 16 Canadian Pacific seniority districts; in 1938 there were 2,850, showing an annual retirement rate of only 2.4 per cent. Dealing with the heavy displacement of railway labor during recent years, Mr. Best stated that in 1929

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120163

there were 187,486 employees engaged in all railway services in Canada, while in 1937 the number had dropped to 125,300.

"It is somewhat astonishing but, nevertheless, a fact," he remarked, "that, whilst there has been considerable agitation and complaint from some quarters because of reduced dividends on capital investment, there has been apparently little concern shown for the deplorable loss in human values."

*RAILWAY WORKERS NOT HIGHLY PAID:*

Another interesting point touched upon by Mr. Best, and one upon which there is much public misunderstanding, was the question of railway wages:

"There were 10,707 Canadian railway employees who in the year 1936 received monthly average earnings of less than $65 per month. This group embraced chiefly maintenance of way laborers who engaged in hard manual labor, who are exposed to all types of weather conditions and who, likewise, are the victims of irregular and uncertain employment due to the seasonal character of the work performed by them.

"There was a total of 15,025 employees, representing 12.4 per cent of the entire group, who received $75 per month or less. In this group will be found telephone switchboard operators, regular apprentices, car cleaners, station agents, non-telegraphers (small station) and others.

"There were 41,238 employees, representing 34 per cent of the total, who received less than $85 per month. In this group ranging between $75 and $85 were bridge and building department apprentices, sectionmen, storemen, freight handlers and others.

"There were 50,337 Canadian railway employees, or 41.5 per cent of the total, who received average monthly earnings of less than $110 in 1936. In this group below $110 will be found many skilled mechanics who must serve apprenticeship or engage in their work for years before being qualified or possessed of sufficient skill for the performance of the service required of them. This group includes carmen, moulders, stationary engineers, signalmen, helpers to mechanics, floating equipment employees and others.

*ALMOST THREE-QUARTERS EARN LESS THAN $125:*

"Almost three-quarters earned less than $125 per month in 1936. Below this figure were 87,331 employees, or 71.9 per cent of the total. In this group were carpenters and bridgemen, section foremen, blacksmiths, boilermakers, clerks, carmen, electrical workers, machinists, pipefitters, sheet metal workers and switch tenders.

"There were only 15.7 per cent of the employees who earned $150 per month or more. In this group earning between $125

120164

and $150 per month were bridge and building foremen, pile driver, ditching, hoisting and steam shovel employees, constables and policemen, station agents (telegraphers and telephoners), foremen in freight sheds, sleeping and parlor car inspectors and conductors, road freight brakemen and flagmen, yard brakemen and helpers and yard firemen and helpers.

"Only 15.7 per cent of the total number of employees earned more than $150 per month. There were 112,727, or 92.8 per cent of the total, who earned $200 or less. In this group with earnings ranging from $150 to $200 per month are assistant engineers and draftsmen, extra gang and snow plow foremen, signal foremen, foremen linemen, inspectors and sergeants of police, supervisory agents and assistants, road passenger brakemen, baggagemen and flagmen, yard conductors and yard foremen, engineers, firemen and others.

*LESS THAN 2 PER CENT EARN MORE THAN $250:*

"Less than 2 per cent of the total number of employees, including the officials, earn more than $250 per month. Out of the total of 121,447 employees, there were 119,154, or 98.1 per cent of the total, who fell below $250 per month. Those earning from $200 to $250 per month embraced miscellaneous officials, general foremen, train despatchers and traffic supervisors, yardmasters, road passenger and road freight conductors and road freight engineers and motormen.

"There were 2,293 whose earnings were over $250 per month. Of this number 585 were executives, general officers and assistants; 896 were division officers and the remainder were road passenger engineers and motormen who had devoted a major part of their working lives to the service prior to accumulating sufficient seniority to enable them to hold this limited number of preferred positions.

"When it is found that less than 2 per cent of those engaged in actual railway service, including the officials, earn in excess of $250 per month, that almost 75 per cent of the railway employees earn less than $125 per month, that 40 per cent earn less than $100 per month, that 12.4 per cent earn less than $75 per month and that 8.8 per cent earn less than $65 per month, it will readily be observed that the impression held by many with respect to high railway wages is the result of a vivid imagination based upon inaccurate rumors, rather than upon reliable and official statistical facts."

*FUNDAMENTAL ECONOMIC REQUIREMENTS:*

Mr. Mosher went somewhat deeply into fundamental economic questions. In his introduction he said:

"The purpose of an economic system, from the standpoint of the people, is the provision of food, clothing and shelter, and the maintenance of the highest possible standards of living which

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120165

the natural resources, the mechanical equipment, the technical skill and the labor of the country can attain. The industries of the nation ought to provide opportunities of employment for every able-bodied citizen, so that they will be able to maintain themselves and their dependents on a basis commensurate with the material and human resources available. It is also essential that standards of living should steadily improve, and employment should steadily increase to provide for a growing population.

"In the light of these facts, the workers must oppose by every means in their power, any policy which would decrease employment, would reduce purchasing power and would restrict rather than expand the services to which the people of a richly-endowed nation are entitled. No one will argue that Canada cannot sustain, at a high level, the living standards of a comparatively small population which has as its heritage enormous natural resources, and highly developed industries. The people of Canada have every right to look forward to the future with optimism and courage, and it is deplorable that many business and political leaders seem to have lost faith in their country and themselves. . . . . "

*IF CANADIAN RAILWAYS HAD ARGENTINE RATES:*

Mr. Mosher referred to the fact that Canadian railway rates are among the lowest in the world and discussed the effect of higher rates on the fortunes of Canadian railways.

"Let us suppose," he said, "that the Canadian railways had been able to charge a ton-mile rate equal to the Argentine rate on the freight they hauled. The C.N.R. would then have shown a net operating revenue of about $105,000,000 instead of $11,000,000. Allowed the Argentine rate, all Canadian railways would have shown a net operating revenue of about $250,000,000 instead of $53,000,000. If the C.N.R. had been able to collect the Australian average ton-mile rate last year, it would have shown a net operating income of about $195,000,000 instead of $11,000,000."

As the only alternative to a reorganization of the present economic system on a more equitable basis, Mr. Mosher suggested to the Committee that they might investigate the following: "1. The possibility of reducing the rate of interest on the C.N.R. indebtedness. This would place the burden on those who can bear it—the bond-holders—rather than upon the railway employees who cannot do so. 2. The regulation of competitive forms of transport . . . railway rates are subject to complete regulation, while highway transport, as well as transport by water and by air, have been wholly unregulated. 3. The increase of passenger and freight rates, in such a manner as to permit the railways to earn a reasonable rate upon their capital investment. . . . "

120166

*CANADA'S CHANGING FACE:*

Most of the advocates of amalgamation have based their arguments upon the assumption that there are 5,000 miles of functionally duplicate track which could be torn up without serious inconvenience to the public. Canada would seem, from this argument, to consist of two relatively large traffic areas, or pools, one consisting of the thickly settled portions of Ontario and Quebec and the other of the Prairie Provinces. Between these, and providing a perpetual barrier, lies a rugged and broken wasteland, 1,000 miles across. Each of the three transcontinental railways built a line through this region, and the amalgamationists argue that, since from their point of view, there can be little hope of local traffic, only one of the three lines need be maintained. In view of the source of most amalgamation propaganda, it is perhaps not strange that the C.P.R. line is the one suggested to be retained. Then, to connect the two central traffic pools with the Atlantic, on the one hand, and the Pacific, on the other, it is suggested that one line, or two at most, be retained.

The discovery of rich mineral deposits throughout a considerable area of what was formerly the barrier region entirely alters the picture; and it is now probable that the region as a whole will provide as much railway traffic, proportionately, as any other section of Canada. In the Central Provinces there must always be a certain amount of competition from motor vehicles and shipping, but in the land of granite the railway must for a long time continue to be the chief transportation agency.

After Confederation, the principal task which the Canadian people had to face was the settlement and opening up of the West, but today the greatest task is the development of the North. One of the chief drawbacks to Canada's development is that in the past the country has been considered as little more than a narrow strip of territory along the northern border of the United States. The lines which now constitute the Canadian National were built, however, upon the assumption that Canada was much more than such a narrow strip. Yet even their builders, at the time of their projection, did not envisage the mineral possibilities which are now about to change the face of the country.

*NEW HOPE IN THE NORTH:*

Hitherto, Canada has looked enviously over the wall to the South. But with greater knowledge of the richness of the North, of which mineral wealth is only a part, the Canadian people will look more and more to the North. They will count themselves fortunate that, mistaken though their previous premises may have been, they now have a great transcontinental railway system as a base from which to promote the development of

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120167

the North. Some day when the North is properly developed, people will look back at the present-day proposal to tear up these strategically-placed tracks as curious manifestations of depression psychosis.

Transportation, especially railway transportation, is coming more and more to be recognized as a matter of national concern. Even though, from a commercial standpoint, railways may not be profitable, railway transportation cannot be dispensed with. Often the argument is used: "In a private business, if a branch factory did not pay it would be closed down." That is true, but in most cases railways cannot be closed down; the service they provide is too intimately connected with the national economy to permit of such a course.

*RATIONALIZATION ALREADY ATTAINED:*

In the early days of railways they were privately owned, although in Canada all have received greater or less governmental assistance because of the national nature of their undertaking. After a period of unregulated private operation, it was found necessary, in country after country, to apply greater or less governmental regulation or control. In Great Britain, the 120 railways existing in 1921 were amalgamated by Act of Parliament into four privately owned and operated regional systems. In the United States, some form of amalgamation under Government auspices seems inevitable. It is argued, by analogy, that unification is therefore desirable in Canada; but Canada has already brought amalgamation to its logical conclusion—the establishment of two great systems, one publicly owned and the other privately owned. Under the present economic order there is still a place for competition; and it is doubtful if the creation of a vast railway monopoly, operated by the Government, or by the C.P.R., or by a so-called independent Board, would be desirable in the existing state of affairs.

*MONOPOLY A REAL DANGER:*

Sir Edward Beatty has been at some pains to minimize the dangers of monopoly. He suggests that such a possibility could be overcome by placing the combined railways in the hands of a Board consisting of fifteen persons, five appointed by the Government, five by the C.P.R., and the other five appointed by the first ten. But no person who knows anything about the ramifications of the C.P.R., and of the influence which it has had with most of the Governments of Canada, willl readily believe that any such board would be free from C.P.R. domination. In the first place, each of the C.P.R. appointees would be undoubted C.P.R. men, while of any five men appointed by any Government it would be strange if at least one did not have some affiliation with the C.P.R., or some of its connections. This would mean, at the outset, a six to four advantage for the

120168

C.P.R.; and by the time these ten had selected their five colleagues the result, in all probability, would be nine to six in favor of the C.P.R.

The C.P.R. is much more than a railway company; it has affiliations in every section of the country and is interested in every industry and every line of business. It does not hesitate to use its economic and financial power to promote its particular ends, as many Canadian business men could attest if they dared run the risk of the C.P.R.'s displeasure. Consequently, if the C.P.R. were in a position to dominate the railway transportation field, it would also be able to dominate the economic and political life of Canada. It is all very well for Sir Edward Beatty to protest that the C.P.R. has changed since the days when its name was a stench in the nostrils of the West. Undoubtedly the change from a ruthless American railway builder, as president, to a suave public relations counsel is an improvement, but has the real nature of the organization changed? Only dire necessity should compel the Canadian people to put themselves in the power of any monopoly; and there is no evidence that such a need now exists, or is likely to exist.

*SIR EDWARD BEATTY'S REASONS:*

Sir Edward Beatty attempts to justify the strenuous efforts he has put forth on behalf of his unification scheme on the ground that the C.P.R. is a large taxpayer and naturally interested in reducing its taxes. That might be a justifiable reason if it were true that through amalgamation the taxes of the C.P.R. would be materially reduced, but as an experienced railway man Sir Edward must know that the actual saving under unification would be extremely slight—so slight, in fact, as not appreciably to affect the taxes of the C.P.R. It is doubtful if the savings which would accrue to the C.P.R. from any practicable amalgamation scheme would equal, in a good many years, the money which the C.P.R. has already, in one way or another, expended upon its amalgamation campaign.

We must therefore look elsewhere for the reason. It seems likely, aside from the obvious economic and political advantages to be derived from the control of a railway monopoly, that the uncertain future of all railways is perhaps the best clue to Sir Edward's activities. There was a time, in the heyday of railways, when the securities of a well-managed railway were considered gilt-edged; but, for a number of reasons, those days have passed, probably never to return.

*RAILWAYS APPROACHING OBSOLESCENCE:*

Most of the steam railways, at least in North America, are approaching obsolescence. New materials and new equipment call for radical alterations in railway methods, but with the huge sums invested in existing equipment the railways cannot

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120168

afford to adopt many new ideas. The competition of trucks, buses and airplanes, which on the one hand, is making the adoption of new methods inevitable, renders it, on the other hand, more difficult for the railways to provide the capital for new methods and equipment. All this, of course, is reflected in the price of railway securities. The C.P.R. has outstanding stock of a par value of $763,668,470 and bonds aggregating $172,714,900; and while it has never failed to meet its fixed charges, and until the depression had paid consistently high dividends, the present price of C.P.R. stock would suggest that the investing public is not very sanguine as to the likelihood of its resuming its former scale of dividend-paying in the very near future.

In such circumstances it is understandable that Sir Edward Beatty and his fellow directors might desire to have the Government back of their securities. The first amalgamation proposals were made on such a basis, but as opposition developed Sir Edward ceased insisting upon this. No one who has followed the course of Canadian railway history, however, can fail to realize that no railway merger would be possible without an implication of government guarantee so palpable as eventually to force the government to accept the responsibility. Not all the present C.N.R. bonds bear the Government's guarantee, but the guarantee is implied.

*THE DEBT BOGEY:*

Sir Edward Beatty and other amalgamation advocates have harped so much upon the Canadian National debt and have left the details of their proposals in such obscurity that most people in Canada have a very confused idea of the whole matter. So much emphasis has been placed upon deficits that many persons believe that the Canadian National is actually losing money through *operation*. Relatively few persons, on the other hand, realize that its deficits arise from its inability to earn money enough *after paying operating expenses* to pay the interest, most of it at high rates, on bonded indebtedness for which private mismanagement before the era of Government ownership was largely responsible. It has not been proposed under any amalgamation scheme—nor is such a thing possible—that the Government should be relieved of this indebtedness. The claim is made that the savings under amalgamation would be sufficient to offset interest requirements, but this claim has not been substantiated.

*COMPARISON OF OPERATING RATIOS:*

A further claim is that under C.P.R. management, or under what is termed "independent management," that part of the unified system now comprising the Canadian National could be more efficiently operated. It is true that the Canadian National's

120170

operating ratio is consistently higher than that of the C.P.R. The operating ratio represents the proportion of operating expenses to gross revenue. In 1937, for instance, the Canadian National's operating ratio was 91.12, while that of the C.P.R. was 80.69. In other words, of every dollar which the Canadian National received, 91.12 cents went for expenses. These figures do not accurately show the relative costs of the two systems, because of differences in their respective methods of accounting, but it is true that Canadian National costs are higher. This is not due, as some contend, to the fact that the Canadian National is government-owned, but to other quite demonstrable reasons.

In the first place, the Canadian National was made up of a group of railways built separately and not with a view to joint management; while the C.P.R. was built as a unified system into which extensions or additions were planned to fit. Then the C.N.R. lines, as has been shown, are more generally in the sections of the country where settlement is sparse and traffic consequently light. Maintenance and supervision costs, and to a certain extent operating costs, are approximately the same for light traffic as for considerably heavier traffic. There are other reasons, aside from relatively efficiency, for differences in operating ratios. Among Class 1 railways in the United States there is a wide spread in operating ratios, running all the way (1937 figures) from 55.98 for the Norfolk and Western and 56.95 for the Chesapeake and Ohio to 77.55 for the New York Central; 80.94 for the Chicago, Milwaukee, St. Paul and Pacific; 82.01 for the Atchison, Topeka and Santa Fe; 84.86 for the Chicago, Rock Island and Pacific; and 90.59 for the Chicago and Northwestern. The contention that under unification C.P.R. costs could be applied to the C.N.R lines cannot be sustained.

*OBJECTIONS TO PUBLIC OWNERSHIP:*

When it comes to the argument that the Canadian National is less efficient than the C.P.R. because of public ownership, the contention is no easier to sustain. The Canadian National is operated under corporate form, just as the C.P.R. is. In the one case, the Government is the sole shareholder; in the other, the shareholders are distributed through many countries. The operating officers, however, are exactly the same type of men in each case: they have grown up in the same school. The same opportunities and incentives are open to the personnel of each. The present head of the Canadian National began his railway life as a mechanic (on the C.P.R.) and has worked up to the top.

The C.P.R. has a fine record of efficiency, yet it has made many mistakes, but because it is privately-owned its mistakes are not blazoned to the world as the mistakes made by the Canadian National frequently are. When comparisons between public and private enterprises are made, it is not unfair that

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120170

the records of the Grand Trunk and the Canadian Northern should be taken into consideration. Any publicly-owned institution would have to go far to equal their records of failure and inefficiency. Furthermore, the history of railways in the United States and elsewhere does not provide a very inspiring record on the side of private railway operation.

There are, however, certain weaknesses in public ownership, some of which affect the Canadian National Railways. The likelihood of the party in power to claim credit for its successes, and for the party in opposition to be driven thereby into a position of seeming hostility, is one of the drawbacks. The former practice of appointing political directors, selected on a regional basis, was an undoubted mistake. Directors so appointed seemed to recognize no other function than that of urging the expenditure of money in their respective districts. There is no reason why capable directors could not be appointed to administer the national system just as they would any other business entrusted to their hands. The present Board represents a move in this direction and, as such, has met with general approval.

Another drawback to public ownership is that, so far at any rate, a majority of Canadians are prejudiced against what is termed "the Government in business." There are many powerful agencies interested in discrediting public ownership, but there are few, and none of them powerful, interested in giving the other side of the question. Consequently, all sorts of canards find ready circulation and easy acceptance if they are aimed at public ownership.

*RAILWAYS AS PUBLIC UTILITIES:*

The statement is often made that if the Canadian National did not have the Government behind it, "it would have to live on its income," like any other business. Those who so argue overlook, however, the essential difference between a railway system and any other type of business. It was precisely because of this difference that the railways were taken over by the Government in the first place. They were unable to live within their income. If they had been ordinary businesses they might have been discontinued, or else, have been reorganized and given a fresh start with new capital. It would never be in the public interest to discontinue the Canadian National System, nor could it be reorganized and placed in private hands if a guarantee of adequate public service were required. In other words, railways are a national necessity. When they cannot be operated profitably as commercial concerns—which is always the case in a new country—they must either be heavily subsidized, as the C.P.R. was, or taken over and operated by the Government, as was the case with the other railways.

120172

The need for railways in opening up new territory, and the necessity for carrying products such as wheat, coal and ore at less than commercially profitable rates are additional reasons in Canada why providing railway transportation must be considered a function of Government. It is conceivable that if railway rates were to be raised the Canadian National might earn enough to pay its fixed charges; but there is also the possibility that higher rates would so restrict business as to defeat this end. Therefore it can be argued that it is preferable that deficits should be met out of taxation rather than that essential railway services should be dispensed with, or that rates should be increased.

*FUTURE PROSPECTS:*

Even though it is demonstrably better business from a national standpoint for Canadian National deficits to be paid out of taxes rather than that rates should be raised or services unduly reduced, the question may still be asked whether railway deficits must be paid indefinitely, or if there is any prospect of relief. In answer to such questions, it may be said that the Canadian National System is as efficient as any on the continent; that its tracks are in good order; that it has the lowest grades and easiest curves; that its equipment is reasonably up-to-date; that its personnel compares favorably with that of any other railway; that it can handle twice its present traffic with very little additional capital expenditure; and that if it could secure forty per cent more traffic (not quite as great a volume as it had in 1929), it could pay all its fixed charges and leave a handsome balance for the people.

There are some who fear that, due to the competition of trucks, buses and airplanes, the railways will never see prosperity again. This may be true in some countries and in certain parts of Canada. In parts of Ontario and Quebec, for instance, it is likely that other forms of transportation will largely supplant the railway, as well as in certain parts of the Prairie Provinces when highways there are finally hard-surfaced. But, due to the rugged nature of the territory which its transcontinental lines traverse, and to the fact that the winters are much more severe in that part of the country where its future traffic will largely be secured, the effect of this competition upon the Canadian National will become increasingly less as the North is developed. Consequently if there is one railway system in North America which seems to have a future it is the Canadian National.

Motor vehicles are subsidized by municipalities and provincial and federal governments through the provision of highways which the proceeds of licenses and gasoline taxes do not suffice to maintain. It is inconceivable, for other reasons as well, that governments will continue this subsidization indefinitely without

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

S7105
120173

insisting upon regulations that will put competition on a more equitable basis.

*CONCLUSION:*

Summing up then, it may be said that amalgamation is not the way out because:—

1. The mileage which it was claimed could profitably be torn up, and upon which savings were predicted, is greatly over-estimated.

2. The savings claimed as possible through the elimination of duplicate services are also greatly over-estimated as duplicate services which cannot be eliminated through co-operation are not extensive.

3. Canadian National deficits are not due to operating losses, but to inability of the System to earn the interest on excessive bonded indebtedness which no scheme of amalgamation could overcome.

4. Canadian National deficits are not due to public ownership, nor is the record of private ownership, despite the past success of the C.P.R., such as to suggest that private operation would be any more successful.

5. With the development of the North sufficient traffic can be provided to enable the C.N.R. not only to pay its fixed charges but a profit in addition.

6. The creation of a railway monopoly would be definitely contrary to public interest since it would be impossible to prevent control from passing into the hands of the C.P.R.

7. For every dollar by which railway deficits might be reduced through amalgamation, it is certain that many more dollars would be lost to the community in restriction of production, curtailment of services, dislocation of business, and relief payments made necessary by the enforced idleness of former railway workers.

Therefore, the Canadian people would be well advised to hold fast to their railway system, acquired at so great a cost in grief and money, and insist that their Governments give it the fullest possible opportunity to continue as a publicly-owned system, by restraining their own inclination to create political capital at its expense, and by appointing as directors the most capable and conscientious men available. If through the hostility of its enemies, the apathy of its friends, or the venality of governments, the Canadian National System should ultimately fail as a publicly-owned enterprise, the present railway problem will be as nothing in comparison with the one which will then be upon the country.

# RAILWAY FACTS

Published by the Citizens' Group for Railway Action.

No. 10 | 607 TEMPLE BLDG., TORONTO 2, ONT. | Feb. 1, 1939

## Montreal Station Plan Contrary to 1933 Law

Observers of public events have expressed surprise that the Dominion Government approved the proposal of the Canadian National Railways to build a passenger terminal in Montreal which would be used exclusively by trains of that railway.

The project is, in effect, a violation of a statute of the Parliament of Canada. This statute, the Canadian National-Canadian Pacific Act of 1933, directed both these major railways to proceed with pooling and such other co-operative measures as would bring about economies in operation.

Pooling projects now in effect create an annual saving of about $1,700,000. Further co-operation, especially in passenger services, will be rendered much more difficult, it is stated, by the building of a station at Montreal which all are agreed cannot be used as a union station.

There has been no repeal of or amendment to the 1933 law.

## U.S. Railroads Don't Earn Fixed Charges

Railroad Data published by a Committee on Public Relations of the Eastern United States railroads states that, for 1938, the carriers would have had the largest deficit in their history if it had not been for a rate increase authorized by the Interstate Commerce Commission in 1937.

There is no serious proposal for an increase in railway rates in Canada. On the contrary, the trend is in the other direction, as witness the agreed charges authorized by statute in 1938.

Despite the rate increase, operating revenues of U.S. railroads were 14.8 per cent. under 1937. Net operating revenue (the money available for interest, dividends, etc.) fell 38.7 per cent. below 1937. This figure for 1918 is 58.3 per cent. below the net for 1930.

Considering the carriers as a group, they failed by $125,000,000 to earn fixed charge in 1938. The amount available for fixed charges was $98,000,000 in 1937 and was $524,000,000 in 1930.

## Says C.N. Pays 3 Cents When One Cent Would Do

"I doubt if any capital expenditures can be justified at this time," writes one Ontario weekly editor privately to Railway Facts, "and I am in favor of all other economies possible.

"For instance, looking over the many so-called press releases coming into this office, I observe the Canadian National Railways is the only institution which apparently can afford to pay first-class postage on what is distinctly third-class matter."

## Consolidations Help, Says U.S. Committee

The committee appointed by the President of the United States last year to inquire into the railroad wage situation, made a report which included comments on the merit of consolidations. Following are excerpts:

"Competition between railroads is of continually lessening importance to the public as other modes of transportation supply more and more of that competition which was once provided only by competition between the railroads themselves. The result is that further railroad consolidation may be effected in many cases with great public benefit. Proper consolidations would also be a factor in the elimination of circuitous routing, with the direct result of increasing carrier earnings without increases in rates to the public.

"No objection could be urged today against consolidation that could not have been urged with much greater force against the actual consolidations of the past. Yet without the consolidations of the past there would be no major rail systems of today. The progress and accomplishments of the past are indicative of the possibilities of accomplishments of the same sort that may be realized in the future.

"Those who have had experience in rail transportation recognize that the only true co-ordination is that which is brought about through consolidation. The practical difficulties which inhere in co-ordination are absent in consolidation."

## Some Rail Guarantees as to Interest Only

The $216,207,142 of railway debt which is guaranteed by the Dominion government as to interest only consists of Grand Trunk 4 and 5 per cent. perpetual guaranteed and debenture stock, Great Western Railway 5 per cent. perpetual debenture stock and 4 per cent. perpetual debenture stock of the Northern Railway of Canada.

The Great Western Railway, operating in southwestern Ontario, was a part of the Grand Trunk system many years prior to the acquisition of the Grand Trunk by the Canadian Government through receivership proceedings.

## Prefers Union Station

A Manitoba editor, who is opposed to the present Montreal terminal plan, even as a relief measure, favors a union station project if it can be economically justified. He writes: "If a new union terminal would enable the railways to give more efficient service and meet competition by other transportation systems, then it might be a good investment."

## 184 Editors' Opinions Published in Pamphlet

One hundred and eighty-four Canadian editors have answered the questionnaire sent by the Citizens' Group for Railway Action regarding the projected Montreal terminal for the exclusive use of the Canadian National Railways.

A digest of the comments of the editors has been sent to Prime Minister King and Transport Minister Howe. Editors were identified only as to number and province. The digest now has been published in pamphlet form and is available to any citizen who cares to write to the Citizens' Group for Railway Action.

The editors voted six to one against the expenditure, and said that if it was justified as a relief measure, the station built should be a union station.

Railroad leaders and all engineers are agreed that the tunnel site could not, except at vast expense, be converted into a union station.

## Pass Resolution Deploring Building of New Terminal

Directors of the Citizens' Group for Railway Action have passed a resolution deploring the decision of the government to proceed with construction of an exclusive Canadian National Railway passenger terminal in Montreal.

The resolution adds that, if the Government is convinced that some public works are essential in Montreal as measures of unemployment relief, the Government should see to it that a new passenger terminal, if any, be a union station.

It is added that this resolution reflects the opinions of members of the Group whose views on the question were obtained by questionnaire.

## Contracts are Signed; Work Begins Quickly

Contracts for excavation and substructure to an amount of $1,100,000 have been let by the Canadian National Railways in connection with the proposed $12,600,000 passenger terminal in Montreal.

Work began Thursday, January 26, and it was stated that large gangs would be employed beginning January 30.

## Favors Relief Expenditure

While disapproving of the terminal project, and preferring a union station to the present Montreal plan, one Alberta editor favors the expenditure as a relief measure. He says: "Expenditure for national objects for unemployment relief is preferable at any time to direct relief, where recipients are physically able to do the work."

## Scotch Voice on Phone Tells Off D. J. Little

Dalton J. Little, secretary of the Citizens' Group for Railway Action, was told on the telephone the other evening in strong Scottish accents that some person or group would "get even" with him for his continued campaign to arouse public opinion to the gravity of the Canadian railway problem.

The man refused to give his name or telephone number and declined an opportunity to meet Mr. Little to discuss the question. He did say, however, that he was a member of "the union". He would not listen to the contention that the ultimate interest of all railway workers demanded that there be a solution of the problem on sound lines.

Before he closed the conversation, the voice also said that "we" would "get even" also with another member of the Citizens' Group who was supposed to be connected with a large corporation which deals with many members of the general public, including railway employees. The man did not wait to hear the thought that this corporation was also a large shipper of goods and that railway workers needed the goodwill of shippers and the general public.

Mr. Little said later that the man used no profane language and threatened no bodily harm and that there was no need to ask for police protection.

## Senate Gets Facts, Commons Votes Money

Resumption of the hearings of the special Senate Committee on Railways is expected.

Hearings of the Senate Committee are the principal source of public information regarding the Canadian railways and the railway problem. On occasions when questions are asked in the House of Commons respecting the Canadian National Railways, it is customary for the Minister of Transport to reply that the matter is one for the railway management to deal with and that it is inexpedient for the Government to ask the railway for the information desired by the member.

The principal duty of the House of Commons in connection with the Canadian National Railways has been to vote the funds necessary to meet the deficit on interest on the funded debt. The amount so voted last year for 1937 was $42,000,000 and it is expected that the amount required this year for 1938 will be at least $53,000,000.

## Foresaw End of Deficits

"If all goes well the National Railways will be paying both operating and fixed charges in a few years' time." — Winnipeg Free Press, October 29, 1923.

# FOREWORD

THIS PAMPHLET is published by the Citizens' Group for Railway Action as a contribution to the discussion of the Canadian Railway Problem and its publication is not to be taken as an endorsation of the views of the Author. The Proceedings of the Senate Committee have been edited so as to give the paper as submitted. For a fuller presentation of the Author's views upon collateral topics as established under examination, the reader is referred to the Proceedings.

# Wages and Working Conditions
## of
# *Employees in Train and Engine Service*

Mr. Chairman, Gentlemen of the Committee:

With your permission I should like to confine myself rather strictly to a consideration of the employees in train and engine service — engineers, firemen, conductors, brakemen, baggagemen and flagmen. I propose to argue that the agreements governing their wages and working conditions are seriously obsolescent, if not totally obsolete, and provide a serious obstacle to the recovery by the railways of the competitive position to which their basic strength as carriers would entitle them. In order to prove that position, certain basic propositions concerning the railway industry as a whole are first offered.

The railways are now and have continuously been since not later than 1923, a declining industry. That relative shrinkage was masked up to 1928 by the rise in general business activity, but the drastic decline since that date is only partly the result of a cyclical decline in general business; it is also the result of a secular decline which has been running substantially unbroken since the end of the last war. Table 1 is given as proof of that statement. It shows railway gross earnings as a percentage of the national income produced. These percentages are given rather than the original figures, because the wide movements in all economic series make it difficult to see trends in them which become perfectly clear in the percentage comparisons.

TABLE 1

Railway Gross Earnings as a Percentage of the National Income Produced

| Year | Freight percentage | Passenger percentage |
|---|---|---|
| 1921 | 7.81 | 2.20 |
| 1922 | 7.70 | 1.93 |
| 1923 | 7.85 | 1.98 |
| 1924 | 7.27 | 1.88 |
| 1925 | 7.06 | 1.71 |
| 1926 | 7.23 | 1.65 |
| 1927 | 6.82 | 1.56 |
| 1928 | 7.25 | 1.47 |
| 1929 | 6.56 | 1.37 |
| 1930 | 6.25 | 1.29 |
| 1931 | 6.23 | 1.14 |
| 1932 | 6.41 | 1.08 |
| 1933 | 6.26 | 0.99 |
| 1934 | 6.36 | 0.96 |
| 1935 | 6.22 | 0.91 |
| 1936 | 6.20 | 0.87 |
| 1937 | 5.91* | 0.85* |

* Based on preliminary estimates of the national income

That comparison is not put forward as something novel. It is merely an attempt to put into definite and measurable form what is common knowledge — that the railways are losing position. They are under pressure all along the line. The lush earnings which they once had upon their main lines have been very

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120179

greatly reduced and the modest profits on many branch lines have been replaced by substantial losses.

A great many factors have contributed to that change. It would be a grave mistake to set it down as all due to motor competition. In fact, motor competition for freight traffic did not become important till about 1929-1930,* and it was not until 1933 that general rate changes were instituted in the central region to meet it. In relation to passenger traffic, it is possible that the pressure of motor competition has been important, but it should be noted that these losses of the railways were occurring at a time when the volume of passenger travel was increasing more rapidly than at any time in the past. In other words, these figures greatly understate the relative losses of the railways in the passenger business. For present purposes, however, it is enough to say that the railways have been under the most severe pressure since 1923 to re-arrange their services to make them more desirable to the travelling and shipping public. And it is against that background of an industry fighting what has, to date at least, been a long, losing battle, that I want to consider the wages and working conditions of the train and engine service employees.

Trains operation involves certain peculiarities which deserve notice. Firstly, the volume of traffic fluctuates and therefore the number of trains. Those movements are probably beyond any control and are certainly beyond the control of the railways, but they make it necessary to have more workers on the list of availables than can regularly find full-time work except at the seasonal peak. In some way or other the job must be made sufficiently attractive to hold them in this field. Secondly, even the engineer, who is the most skilled member of the train crew, need not be a person of an unusual skill. A man of sound intelligence could be trained to operate a locomotive in a very short time. In the pre-war period when the labour force was being rapidly increased, men quite frequently ran as full-fledged engineers after only six months' experience. The distinguishing mark of these men is not any unusual skill or the necessity of long training; it is the possession of certain general qualities of character and intelligence. They must be capable of accepting responsibility and fulfilling it exactly. It is not an occupation which is carried out under the eye of a foreman. They work, in large measure, beyond any but the most general controls. If they do their work well it is because they are responsible men who are governed by a sense of honour and esprit de corps. If they wished to sabotage operations they could do so with the greatest of ease and in such fashion as would make it impossible to impose any discipline upon them. They stand therefore in a position of unique power, and it is one of the major tasks of management to evoke their co-operation because, by the very nature of their work, it cannot be compelled. The results of these unusual conditions are embodied in the methods of wage payment and in the working agreements governing the application of their labour.

Payment for work done is made upon the so-called dual basis of time or mileage. It amounts to working upon a piece rate of pay with a high guaranteed day rate. The basic equation is that 100 miles in freight service or in passenger engine service and 150 miles in passenger train service equals one day's work. If additional mileage is run inside the normal day, it calls for additional payment on a pro rata basis. That is, one hundred and fifty miles in freight service inside eight hours would call for a minimum of one and one-half days' pay. If

*The joint committee of the railways reported to the Duff Commission a loss of about $24,000,000 in freight revenue in the year 1930. This was equal to about 7.4 per cent. of the rail freight earnings of the year and to only 5.8 per cent. of the rail freight earnings of 1928.

120180

the duty for which the man was called is completed with less than one hundred miles' run, it still calls for a full day's pay, while any time put in over the normal day is paid for at time-and-a-half unless payment upon a mileage basis would produce a still greater amount. In addition, certain employees in assigned service operating regularly scheduled trains enjoy guarantees of a minimum monthly pay.

This system of incentive wage payment was introduced in the Middle Western United States in the late 1880's by railway management and spread very rapidly. I have no reason to believe that it was not eminently fair and wholly satisfactory at the time of its introduction. Train speeds and railway signalling being what they then were, it probably was a right and proper basis of wage payment. But though railway operations have improved out of all recognition in the last fifty years, the unions have continuously and, so far, successfully, resisted any alteration in that totally obsolete arrangement. Among the results of that refusal to change the basic equation as railway operating conditions and general economic conditions changed, the following may be noted:—

(1) It makes the wages cost per train mile absolutely inflexible. Its influence is toward encouraging the railway management to increase the size of trains, and therefore to reduce the volume of employment offered.
(2) As train speeds increase it makes it necessary either to give the senior employees who take the fast runs the opportunity to make inordinately large earnings, or else to give them rather startling amounts of leisure time by limiting the maximum monthly mileages which they may run.
(3) It has encouraged an attempt to define each job as narrowly as possible and then to exact additional payments for any service rendered which is outside the very limited range of duties as so defined.

In various scattered sources there is a great deal of information about these employees. Their numbers, equated time paid for and wages earned are all reported, by classes, in the Statistics of Steam Railways of Canada. Their disputes concerning rates of pay have frequently led to the appointment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, and the reports are all published in the Labour Gazette. The railways print the agreements covering wages and working conditions with each separate class of employees. Finally, the Labour Gazette has published all the reports of the decisions of the Canadian Railway Board of Adjustment No. 1 which is the final court of appeal for the interpretation of these agreements. It is proposed here to piece together the information contained in these various sources in order to document fully the conclusions outlined above.

The Canadian Railway Board of Adjustment No. 1, which has just been mentioned, needs a word of explanation. It is a body formed in 1918 to ensure a uniform application in Canada of the orders of the Director-General of Railroads of the United States covering wages and working conditions. It was found so useful that it was continued in existence after the war as a final court of appeal on the interpretation of these agreements. It has had over twenty years of unbroken existence. It is composed of six representatives of the railway unions* and six officers appointed by the railway companies. While provision is made for breaking a deadlock if one should occur it has never had to be evoked.

Its procedure is strictly that of a court of appeal. When a dispute arises, it is carried through the normal channels of adjustment inside the individual railroad system. Not until it has been carried to the head of the system without

CANADA

120181

settlement is there any right of appeal to this Board. When such appeal is made, it is made on the basis of an agreed statement of fact subscribed to by the union affected and by the railway company. It is therefore proper to state that the cases which come before the Board embody important questions of principle. They have passed up the line to the most senior officers of the unions and of the railways respectively. Anything of minor importance is sifted out. These cases represent points of principle to which the unions affected are deeply committed.

I turn here to the proof of these three points. No special proof is necessary for the first proposition. It is obvious that if each member of the train crew is paid for each mile run there is no way in which wages cost per train mile can be reduced except by cancelling the train altogether. The cost per mile can be increased by keeping the men on duty until overtime is paid, but it cannot be reduced. Therefore the only remaining course open to management is to increase the size of the train and so reduce the wages cost per revenue ton mile.

There are two qualifications to that statement. Firstly, after a train passes a certain size an additional brakeman must be employed, so reducing to some extent the economy of increasing train size. Secondly, if a special agreement is made beforehand with the unions affected, short motor trains may be run with less than the normal full crew.

The second point is one which requires rather fuller mention. The mileage rate of pay is set with the normal run in mind; but there are an increasing number of runs on which very high speeds are made. It is true that the strain of operation may be greater but it is highly questionable that it rises in step with the speed of the train. Certainly the desirable runs seem to be those which permit a man to go out to the distant terminal and then to return within the one working day. At the last Board of Conciliation and Investigation, the railways, in their *Introductory Statement*, brought up a case which should be quoted in full.

> In main line service enginemen run only between divisional points. To take another case for illustration. Engineers running in through passenger service between Montreal and Brockville in approximately three hours would earn their day's pay of 126 actual miles run, and in addition would receive payments for preparatory time, initial terminal service and final terminal delay, representing a total time of approximately five hours, or 180 miles, which would be $2.07 per hour for the five hours worked. On many such runs engineers make the round trip in the same day and so for one calendar day representing on the basis of the case mentioned ten hours actual working time receive for the calendar day pay for two basic days amounting to a total of $20.70. Under the application of temporary mileage limitation regulations adopted at the request of the Employees engineers in this service earn approximately $269 for working ten hours per day on only thirteen calendar days per month. It is not claimed that this is an average condition. The example, however, indicates what the present high rates of pay do produce in compensation under the conditions actually existing in such service as that mentioned.

The question before that Board was whether the 10 per cent. reduction in the basic rate of pay which was then in effect should be cancelled. The agreement which ended the dispute conceded the men's contention. That is, the effective rate of pay was increased by 11 per cent., lifting the earnings of this employee to $23 for each calendar day of service rendered. Even with the reduced mileage then in effect that gives monthly earnings of $299. Since that time, most of those temporary limitations have been lifted* with a corresponding increase in

*Cf. Case No. 469, Labour Gazette, XXXVIII (November, 1938), pp. 1215-16. In this case it was shown that in one case the mileage of engineers was increased from 4,160 to 5,200 miles per month; in another, from 4,200 to 5,397 miles in assigned service. On the facts cited above, $299 per month is the current earnings for approximately 4,680 equivalent miles, and only 3,276 actual road miles. If the present mileage be assumed to be 5,397 miles, then monthly earnings would rise to $345 per month for 15 calendar days of work.

120182

the earnings of those senior employees who are able to get the increased mileage.

It is not argued that this is an average case, but it does show what is to an increasing degree possible. In this case, the fastest trains are scheduled to make the run in two hours and twenty minutes in each direction, leaving at three p.m., returning to Montreal at 10.30 p.m., with a rest period of better than two hours and a half at Brockville. It is suggested that $23 is hardly to be described as niggardly remuneration for that service.

There is no data published in Canada which make it possible to show how general such a situation is. With rising speeds for both freight and passenger trains, it must be becoming increasingly so, but the Canadian wage statistics give no indication of it. They show the equated hours paid for, not the hours actually worked. It is therefore necessary to turn to the United States for statistics which indicate the discrepancies between the hours worked and the hours paid for. *The Wage Statistics—Class I Steam Railways in the United States*, published by the Bureau of Statistics of the Interstate Commerce Commission, have been analysed by Mr. Bertrand Fox in the March, 1935, issue of the Harvard *Review of Economic Statistics*, who has shown that continuously from 1921 to 1932 there was a growing disparity between time paid for and time actually worked. The situation at 1937 is embodied in the following table:

TABLE 2

Compensation Paid to Road Train and Engine Service Employees in 1937 as a Percentage of the Total Paid to Each Class — Class I Steam Railways of the United States

| Nature of payment | Class of Service: Road passenger % | Road freight (through freight) % | Road freight (local and way freight) % |
|---|---|---|---|
| Straight time actually worked | 61.98 | 64.75 | 73.41 |
| Straight time paid for but not worked | 32.50 | 25.28 | 7.29 |
| Total straight time paid for | 94.48 | 90.03 | 80.70 |
| Overtime paid for | 2.87 | 5.35 | 17.11 |
| Constructive allowances | 2.65 | 4.62 | 2.19 |

It will be seen from this table that even in the local and way freight service the compensation for straight time actually worked does not amount to 75 per cent. of the total compensation received. Whether the Canadian situation is so extreme as that cannot be determined from the existing records, but it is clear beyond the shadow of a doubt that the tendencies in the two countries are the same. If we are not yet at that state, we are rapidly approaching it.

The third tendency which was stated to be present was one to define the assignment narrowly and then to extract additional payments for any additional service rendered. The theory upon which it proceeds is that the management having accepted the basic mileage as a full day's work can properly be required to pay additional compensation if it requires anything to be done or left undone which would increase the time in which the basic day's service may be rendered. Closely allied to this, are two other forms of payment. Punitive rates of pay are set upon certain services not as a means of increasing the pay, but as a penalty rate so severe that the service will not be required. The other type represents an effort to "make work." The penalty rates are designed to encourage the management to call additional crews into service even though the work could be done by those crews already in service. The cases to which refer-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120183

ence will now be made will be predominantly, but not wholly, of the first type. The first example to which I wish to refer is Canadian Railway Board of Adjustment, Case No. 413. The facts were that the engines used on two trains operated into Huntsville, Ontario, were too long to be turned on the turntable there. Their crews were therefore ordered to proceed light to Scotia Junction, a distance of 15 miles and turn on the wye there. For that service they were offered payment upon a mileage basis. The offer was refused and a claim made for an additional minimum day's pay on the ground that their initial assignment had been completed and that the additional work called for the beginning of a new day, for pay purposes. There is no suggestion in the report that the entire service was not completed within the normal hours of work, but the employees' claim was sustained by the Board. Interesting as showing the extent to which the unions go in attempting to use a narrow interpretation of the rules as a means of extracting extra pay is Case No. 400. A passenger train was delayed for an hour and fifty minutes about four miles out of Saskatoon by the derailment of one of the cars. The conductors and trainmen claimed payment under the terminal detention rules, which would have resulted in additional payment solely because the derailment occurred within the yard limits as defined for the freight service. The claim of the employees was not sustained.

I bring that case up as an example of the attitude of a sea lawyer who is working strictly inside the rule and not in any sense with what is equitable.

Case No. 304 is rather less pleasant in its implications. A conductor and crew booked rest immediately upon arrival at their terminal after a run of 9 hours and 45 minutes, although their train contained livestock and there was no switch engine at the terminal. The appearance therefore was one of conduct which bordered upon sabotage. The men were disciplined and their appeal from that discipline was carried up to the Board. "They stated that their action in booking rest was justified by Rule 27 of the conductors' and Rule 32 of the trainmen's schedule which provide that conductors or trainmen on arrival at terminals are not to be called for immediate duty if they want rest, and that they are to be judges of their own condition." Their claim was not sustained, but the fact that the union was ready to press their claim in such a case is itself significant.

Perhaps the best example of all the "make pay" cases is No. 421. An engineer and fireman had been called for a "turn around" trip between Moncton and Springhill Junction. As a result of a breakdown on the line they were required to take a relief engine out to the train which was being held up and after that were ordered on to Halifax where they were relieved. The railway company tendered pay for 110 miles, of which 100 miles was for road service and 10 miles for the initial and final terminal arbitraries. This would suggest that the service was completed within eight hours and certainly, at the outside, in less than nine. The men applied for a total of 458 miles, which equals over 4½ basic days' pay. Their claim was sustained by the Board.*

Among the "make work" cases, No. 163 is distinctly interesting. The company had a self-propelled steam crane upon the main line. It was placed in charge of a conductor. The employees contended that it should be classified as a

*The rules under which the decision was made, No. 40F on the Engineers' Schedule, No. 40G on the Firemen's Schedule, read as follows: "Men assigned to regular runs will be entitled to any engine placed on the run; except in case of engine failure when they will follow their engine to terminal." **Rates of Pay and Rules Governing Service of Locomotive Engineers, Canadian National Railways, Steam Lines East of Armstrong, etc.**, effective September 1, 1929. It is difficult for an outsider, even when he has knowledge of the rule, to understand how it can have been made to justify so large a payment.

120184

work train. Therefore, as a work train it should, according to the schedules of both the conductors and the trainmen, have, not only a conductor, but two brakemen as well. The company claimed that it was not a train, that any section foreman who had passed the required tests on the operating rules could be used with perfect safety. It had been given to the trainmen for one reason only, namely that there were a number of spare conductors available and the superintendent preferred to give it to the senior available man. No attempt to justify any need for two additional trainmen appears in the record, but the Board upheld the claim of the employees.

Of the same general order is the provision that "regular way-freight trains will not be double-headed except (1) where there is but one freight train each way daily, and (2) in cases of storms in which event the tonnage will not exceed the rating of the largest engine attached."

The result is, of course, to increase the number of trains and therefore the number of conductors and trainmen employed.

If a yard crew is used beyond yard limits it is paid at road rates for the road work done with a minimum of one hour for such service and is also paid for the yard work which it was thereby unable to do. Similar rules are made against the use of a road crew within yard limits. The effort there seems to be toward its total prohibition rather than toward the exaction of extra payment for it. The governing rule seems to be in the trainmen's schedule and reads as follows: "Switching transfer, and industrial work, wholly within the recognized switching limits will, at points where yardmen are employed, be considered as service to which yardmen are entitled but this is not intended to prevent trainmen from performing switching incidental to their own train or assignment." That ruling was applied in Case No. 423 to prohibit the road crew from doing any such work at Allandale. The yard at that point is not big and it is permissible to surmise that enforcement may have resulted in the use of an additional yard crew with its attendant increase in expense.

It is further provided that in "turn-around" service, the maximum run in any single trip shall not exceed 80 miles in passenger service, or 25 miles in all other services. The result is that it is very hard to offer service on many branch lines without paying at least two full days' pay for every calendar day of service. An example of the operation of this rule is given by Case No. 464. The date is 1937. On the Pine Falls branch of the Canadian National a mixed train leaves Pine Falls daily, except Sunday, at 8 a.m., and arrives at Winnipeg, a distance of 70 miles, at 11.20 a.m. This is an assigned service and no further duties are required of the crew until they report for the return trip which leaves Winnipeg at 5 p.m., arriving at 8.20 p.m. It is therefore a long working day, but with a very considerable block of free time in the middle of it. The conditions, otherwise, are not arduous. This is one of the lines which is shown by the Report of the Royal Commission to Inquire into Railways and Transportation (1931-32) to be of a very light density. The company tendered payment on the basis of "actual miles between Pine Falls and Winnipeg Terminal with terminal time consumed at Pine Falls in either direction and actual working time in Winnipeg Terminal." That basis produced a payment of 204½ miles per day, or more than two basic days' pay per calendar day worked. The employees, however, claimed that they should be paid on either one of two bases:—

(a) the minimum day of 100 miles for each trip plus time working or delayed at each terminal, or
(b) on the basis of actual miles between Pine Falls and Winnipeg in each direction plus terminal time at Pine Falls, plus all the time at Winnipeg.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I 20185

The contention of the employees was sustained by the Board. The record does not show how much that would amount to. Subject to correction, it is suggested that it is somewhere in the neighbourhood of 250 miles or 2½ days' pay.

Mention should also be made of the rules for the classification of trains. Way freight service is compensated at higher rates than through freight and rules of an almost unbelievable complication are provided for determining the exact combination of stops and/or switches which may be made before the way freight rates apply. Similarly, when a freight car is added to a passenger train the pay of the train crew is put upon a through freight basis, not upon a passenger train basis. The result is to increase the rate of pay per mile for conductors from 4.72 to 6.25 cents per mile or by 32.4 per cent., and of trainmen from 3.18 to 4.91 cents or by 54.4 per cent. Correspondingly, the Engineers' schedule reads: "Road engineers performing more than one class of road service in a day or trip will, except as otherwise provided in Article 32 (a), be paid for the entire service at the highest rate applicable to any class of service performed with a minimum of 100 miles for the combined service. The overtime basis for the rate paid will apply for the entire trip."

Nothing has been said above concerning the so-called arbitraries or constructive allowances. These are payments for work which once was and is no longer required and are in addition to the payments for the mileage run. For example — engineers and firemen are paid 30 minutes initial preparatory time and an additional 30 minutes as final inspection time. These are purely arbitrary allowances which were adopted originally as a means of increasing the effective pay without changing the nominal mileage rates. Upon the average, they increase the earnings of the employees in these classes by some 11 per cent. over what they would be on the time or mileage basis. Comparison of that figure with the one for these payments shown in table 2 above will show that these arbitrary payments in Canada are well over twice those paid on American roads.

The assignment of work within this field is strictly upon a seniority basis. The men with the longest service record take the assigned runs, those junior to them work on a first-in, first-out basis but with provision to increase (or diminish) the number eligible to be called as the average mileage exceeds or falls below established maxima (or minima). During the seasonal lulls in traffic, there are therefore men who are totally without work. It is a system which is imposed by the men themselves. So far as can be seen from the available information, the position of the railway companies is that they are ready to assist in the enforcement of any such regulation provided it does not directly increase their costs. Such a system of distribution of opportunity to work cannot be condemned so long as depressions are short and the basic trend of the industry is toward expansion; but if either of those fails, the burden falls entirely upon the junior man. Since 1926 the trend of employment has been markedly downward. At 1937 the average number in employment in these classes was only 77.2 per cent. of the number at 1926. As a means of easing the burden, the senior men did for a time make reductions in their maximum mileage so as to distribute the work more widely,* but those reductions have since been cancelled. The possibility of a conflict of interest between the senior and junior employees should, therefore, not be overlooked. As things now stand, those who are out of employment altogether are totally unrepresented in the matter. The decision is made by those in

*That movement gave employment to men who might otherwise have been without it, but it did nothing to reduce the cost to the railroad. Therefore, in so far as high direct wages costs were a reason for a reduction in train mileage, this was no solution at all.

I 20186

employment and therefore capable of retaining their voting power. It is a situation in which the senior men might, if they consulted their own personal interest only, arrive at decisions which would be not only against the national interest, but against the interest of the whole body of train and engine service employees. It is suggested that certain features of the present situation are consistent with the situation to be expected if that were the case.

There is one further aspect of this matter which is deserving of special attention. The railway lines of this country are not of equal value. The only survey of them which is available to those not in railway employment is that reported at pages 32-38 of the *Report of the Royal Commission to Inquire into Railways and Transportation in Canada* (1931-32). It is there shown that at about 1930, some 9.6 per cent. of all the line mileage was of relatively heavy density, having 2,750,000 net ton miles or more of traffic each year per mile of line; about 48.5 per cent. was of medium density having from 250,000 to 2,750,000; and 42 per cent. were light traffic lines with less than 250,000 net ton miles per mile of line per annum. Railways are magnificently effective as carriers of heavy tonnages over the longer distances and it is probable that the lines of the first class could support a wage structure even higher than that now in effect. Train service is more frequent and therefore it is possible to avoid some of the excess payments. The net result is to give pay out of all relation to the earnings on equivalent skill and responsibility in other occupations and to give unusual amounts of leisure time as well. But that is supportable, as I say, on account of the unusual earnings on those lines with heavy traffic. But as we come down the scale in density these payments to labour become more difficult to bear and in relation to the third class it forms a crushing burden. It is quite possible that those lines with the least density, which have negative earnings, at best, or no earnings at all, may be paying the highest rate per month to those who are on them, because only one train moves per day; that the tendency is to have the rate of payment vary inversely with productivity.

From the national standpoint the present position is anomalous in the extreme. These light-traffic branches are in place. The capital in them is sunk. If the railways can earn enough to keep those properties in repair, they will continue to operate them as feeders to the main lines even though they are unable to earn anything directly from their operation. But because the traffic is thin and the costs of train operation so high, service is reduced, so discouraging what traffic remains and directly encouraging the building of highways and the movement of freight over them. Under the very best of circumstances, the continued existence of the 42 per cent. of all mileage which lacks tonnage is open to question. When such lines are deliberately weighed down by extremely restrictive rules which combine to reduce the value of the service given and to increase the cost of it, their position becomes hopeless. It need hardly be added that this is a problem of very deep concern to the employees as well as to the nation at large.

The discussion above has not been at all exhaustive, but it is taken as providing adequate proof that these agreements are obsolete in their construction, capricious in their action, and unbearably restrictive in their effect upon the service rendered. That statement is not in any way dependent on the distress of the railways since 1928. This situation has been developing progressively for a great number of years. Nor is it dependent on the rise of motor competition over the last two decades. Motor competition and the decline in the volume

CANADA

120187

of traffic for other reasons have together precipitated the problem. They make it necessary to meet it now because it cannot be put off any longer; but it existed before they became important.

Historically, the problem can be condensed into the following statement — that in the years of their development the railways had a practically complete monopoly of land transport and that their net returns were then distinctly generous. Believing that those excess returns were permanent, the management were willing to share part of them with their employees. Those in train and engine service, because of their unique bargaining power, were able to appropriate a much larger share of that excess than their numbers would justify. The events of the last twenty years have stripped the railways of most of their monopoly power and profits but, up to the present time, these employees have been able to force other claimants upon the industry and the general public to bear all the burdens and have themselves gone scot-free. The arguments which they have advanced before successive boards of conciliation show that they consider that they have a perpetual right to the wages and conditions given them during the railways' hey-day.

Positively it is not proposed that anything be done drastically or without full discussion. Nor is there any reason why these employees should not continue to be unusually secure in their employment and to be generously compensated; what is asked is not a total overturning of their present position, but a surrender of those parts of it which the uncontrollable forces of change are rendering daily more vulnerable. These employees were relatively stationary in numbers over the years 1912-1928 and have been declining since then. As a result there is a very heavy concentration in the upper age-classes. Very substantial changes could be introduced over the next five years without any serious disturbance to the established expectations of those now in employment.

# Western Agriculture and the Railway Situation

The Honourable
The Chairman
Special Senate Committee
Ottawa

Mr. Chairman:—

May I at the outset be permitted to place on record my conviction, that the people of Canada have in the past been exceedingly well served by their railways. The passenger equipment is the last word in luxury and services and rates compare favourably with those in other countries. In respect to freight transportation Canada can boast of the lowest rate basis of any white country in the world. Only India, China and Japan, with their low labour cost, are a mere trifle below Canadian rates. The average ton-mile receipts of Canadian railways in cents is 0.969. United States rates are a shade higher. The following are the bases of other countries: Australia 2.733, Great Britain 3.058, France 4.010, Sweden 4.057 and Denmark 6.456. The European rate basis is from three to over six and a half times as high as it is in Canada.

And that tells only part of the story. Canadian railways function under the very severe handicap of having to operate the largest per capita mileage of any country in the world, except Australia, normally meaning the smallest volume of traffic per mile. Furthermore, the personnel cost of railway operation in North America is enormously higher than it is in Europe. It is clear that the amazingly favourable result in economical operation attained in Canada, which claims the admiration of railway executives everywhere, must be ascribed almost solely to a high degree of general efficiency and superior executive direction.

It may be argued that the taxpayers and shareholders have in recent years contributed liberally towards the low freight rate structure, but the fact remains that under traffic conditions prevailing some years ago, the privately owned railway was able over a long period consistently to earn a fair dividend for its shareholders, attesting to the soundness of the enterprise. The National system, of course, has not been so fortunate, but considering the handicaps incidental to political management, it has in recent years made commendable progress towards economical operation. We should also bear in mind that unprofitable railway operation is not peculiar to Canada. The privately owned railways of the United States are, with only two or three exceptions, now in receivership or facing bankruptcy. Australia and Denmark,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES

CANADA

120191

in spite of high rates, have for many years faced enormous losses upon their state railways.

At any rate, it is abundantly evident that the character of our railway operation in Canada, apart from unwise expansion, has been wholly admirable. I particularly desire to stress this fact, because I regard it as the most discouraging feature of our present grave railway situation. If the cause of this were merely inefficient management, the solution would be comparatively simple. But having regard to the facts, it is obvious that our railway problem has its roots in fundamental impediments of a much more perpexing character.

**Highway and Air Competition.**

The most serious of these is new competition. The past decade has witnessed spectacular progress in efficient highway and air traffic, which has revolutioned the whole transportation picture the world over. Every country now has its railway conundrum in more or less aggravated form. The extent to which this competition may ultimately undermine the solvency of steam railways is at present of unknown quantity. It depends entirely on the further development of increased mechanical efficiency and the extension of highways. We do know, however, that this new competition has now succeeded in practically destroying steam railway investment in most countries. More live stock is now delivered by truck than by rail to the leading markets in the United States. Over a million trucks use the highways of that country and Canada today. It is a paramount factor in our railway problem, which cannot be ignored in any intelligent consideration of the future of Canada's transportation services.

I quote the following item from a British periodical:

> "Alarmed at the fall in their receipts during the present year, the railway companies have approached the government for help. . . . In passenger services, the railway companies have largely met the challenge by acquiring a controlling interest in road transport undertakings. But in the goods services this cannot be done to the same extent, as about four-fifths of all transport of goods by road takes place in vehicles owned by traders, or their subsidiaries, and not in independent cartage undertakings. The private road contractor, with freedom to pick his services and adjust his charges without legal restriction, continues to make serious inroads into the more profitable forms of goods transport."

It is competently estimated that British railways to-day do not control more than ten per cent. of the total public and private trucking over distances of 50 miles.

The most reliable and conclusive evidence of the complete collapse of the steam-transportation industry may be found in the record of

120192

Canadian Pacific shares. This stock, for many years a steady dividend payer and regarded as the safest of investments, and quoted on exchanges everywhere, a few years ago reached a high of $280. Split into four these shares are to-day quoted at $5! This almost unbelievable retrogression is a reflection of the consensus of judgment of shrewd investors the world over. This calamity has occurred in spite of admittedly excellent management, the enjoyment of abundant capital resources and every facility for economical financing. The inevitable conclusion is that the investor has lost faith in the ability of steam transportation to give any reasonable return on capital in the future. I regard this, by the way, as one of the most disturbing consequences of our railway situation. In British investment circles Canadian Pacific securities have for many years been regarded as the barometer of Canada's credit standing. Overseas public confidence in our country is now being rapidly undermined. We assuredly cannot afford to run the risk of a second Grand Trunk debacle.

It is absolutely incorrect to ascribe the decline in Canadian railway earnings to a mere temporary curtailment of traffic due to general economic dislocation. In Canada, as elsewhere, we face a basic and progressive mechanical change of crisis proportions, which it is utterly absurd to ignore. Any plan to place our railway transportation system on a solvent basis must anticipate a permanent and increasing per capita curtailment of passenger and profitable, short-haul freight traffic. The problem which now faces the world of rail transportation is not of a temporary character. The crucial question is whether, in view of the steady curtailment of traffic, steam railways can survive even after utilizing every possible economy in operating cost.

**The West and Transportation.**

The colonization of Western Canada was proceeded with on a basis of low transportation costs. Owing to its inland position and remoteness from tidewater, it goes without saying that the development of this great agricultural empire would have been impossible under any other conditions. A low freight basis, inward and outward, constitutes Canada's contract with the western settler, who is compelled to produce almost solely for a highly competitive, low price market and must himself absorb the entire transport and handling costs. Argentina, Canada's chief competitor in the wheat market, enjoys a freight rate to tidewater equivalent this year to only 5½ per cent of the value of the wheat. Western Canada's cost to the lake-head amounts to at least 25 per cent. The railway situation as it has developed during the past decade is, therefore, a matter of profound

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120193

interest to western farmers and has naturally given rise to serious apprehension, not solely confined to the implications of the vast burden of taxation now involved.

The organization of the Railway Commission, with absolute control over rates and services, was hailed with universal satisfaction as a protective measure to the shipper, but the apathy of successive governments of Canada towards the grave situation which has developed in the operation of our two great railway systems, has naturally drawn public attention to the inescapable conclusion, that public control of railway earnings inevitably implies an equal responsibility to the shareholders and bondholders of railways in respect to the safety of their investment, over which the Railway Commission, a semi-judicial body, exercises power of life and death. That this aspect of railway investment must sooner or later engage the attention of that body cannot be doubted.

The transparent unwillingness of successive governments to incur the political risks incidental to dealing constructively with what is unquestionably the greatest problem facing our country to-day has naturally led western farmers into the firm conviction, that the remedy which must eventually be applied will assuredly also follow the lines of least resistance, namely, an increase of freight rates. This conviction is materially strengthened in view of the public statement in Toronto by the Minister of Railways to the effect that the solution of the problem lies in "building up traffic and obtaining reasonable rates for that traffic". The sinister implication is only too clear, and it becomes evident that the apprehension of western farmers is well founded.

I have no hesitation in making the positive statement, that an increase in freight rates sufficient to enable Canadian railways to maintain services and solvency, would constitute an unmitigated calamity to the now over-burdened prairie farmer. It would assuredly result in the depopulation of the western prairie section with calamitous results to eastern industry and business. It is an alleged remedy which a responsible government, conscious of the dire consequences, would not even consider for a moment until every other possible avenue of successfully solving the railway problem had been thoroughly explored and tried out. The present situation and future prospects are so serious that Canada cannot afford to reject any practical method whatever of bringing railway operating costs into line with earnings.

**Business Rehabilitation.**

Various plans designed to increase railway earnings or to reduce expenses, in order to avoid the imposition of higher rates, have from time to time been placed before the public. One school urges immediate

120194

unification of operations coupled with an economy programme. Another, which apparently includes the government of the day and the Federal leader of the official opposition, seems to be convinced that the problem is not one of particular urgency and may safely be expected to solve itself through increased traffic due to increased population and the eventual return of "normal" business activity, coupled with such economies as may be brought about by friendly co-operation between the two systems.

The latter argument was effectively disposed of by the President of the Canadian Pacific, who very logically pointed out that in principle and practice co-operation and competition were incompatible. Sensible people will agree with that verdict. Furthermore, the present proposal presumably agreed upon by both the government and its railway management, to spend some $12,000,000 on the new Montreal terminal of the Canadian National, ignoring the more economical scheme of a union terminal, is clearly a deliberate violation of the whole principle of friendly co-operation and definitely stamps this plausible appeal for cohesive effort as insincere. It bears rather all the ear-marks of an attempt to block completely a rational solution of our railway problem. The proponents of the *laissez faire* approach to the problem apparently are not particularly concerned about the probability of having in the interval to compel the taxpayers of Canada to make good another half billion dollars of deficits.

What the anti-unification forces are pleased to regard as "normal" business, is, I assume, a return of the boom conditions of 1928, though we would need to do considerably better than that, as the National lines showed a deficit of about $30,000,000 on even that highly favourable year's operations. These optimists conveniently ignore the fact that air line, motor bus and motor truck transport are daily making further serious inroads upon steam railway traffic. It is a highly significant fact, that while our exports up to July 1937 had increased 103 per cent over the low of depression, manufacturing volume 125 per cent, electric power production 233 per cent, newsprint 310 per cent and mineral output 305 per cent, car loadings only improved by 43 per cent.

**Agricultural Deflation.**

The economic picture is, of course, never static, but it is always normal in the sense that it is the creation of prevailing conditions, to which, whether they be good, bad or indifferent, the citizen ultimately adjusts himself and carries on more or less satisfactorily. That factor frequently creates the illusion of better times just "around the corner". It is, however, quite safe to assume that an improvement in Canadian

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120195

business of sufficiently substantial proportions to lift railway traffic into a profitable volume, cannot occur as long as export agriculture must function under a demoralized price level. The gold price of wheat in Liverpool is now the lowest in centuries, and the enormous world carry-over of unsalable wheat precludes every chance of relief within the near future.

In fact, leading economists the world over see no possibility of an early and favourable change in the various important factors which have produced the prevailing low agricultural world prices. If that conclusion is correct—and I firmly believe it is—it behooves all countries largely dependent on agricultural production, to face stern realities and to adjust their internal affairs to the new economic set-up, which may easily govern our business life for a generation or longer. Needless to add, spectacular transportation expansion could not possibly become a feature of an economic era in Canada dominated by a persistent agricultural price deflation. Canada can, however, adjust herself quite comfortably and happily to the present depressed business basis and limited export opportunities, granting that all groups in our domestic economy are prepared to accept proportionate sacrifices. Our agriculture has set the example. The first essential is to realize clearly the difference between 1929 and 1939.

Consider also the steady deterioration in the Federal, provincial and municipal budget positions; the disastrous effect of the large sales taxes upon consumer purchasing power, raising the retail price level by 10 to 14 per cent, which has almost completely cancelled out the beneficial fall in wholesale prices; the progressive demoralization of world trade; the steadily increasing taxation almost everywhere, due to vast and unproductive armament expenditure as well as various other adverse factors; and having in mind that nowhere on the economic horizon is there the remotest indication of any early reversal of the present drift into rigidly controlled international trade, it is difficult indeed to find realistic grounds for an optimistic forecast in respect to business conditions in Canada, leading to substantially increased traffic. It would be more rational and more in harmony with economic thought to look for a worthwhile up-turn in Canadian business *after* we have cleaned house with our railways than *before*. If $50,000,000 was deducted from our annual Federal deficit there would be a substantial basis for improvement.

The safe plan for Canada to follow in any consideration of constructive policies, is undoubtedly to accept the *status quo* as approximately normal for some years to come. To anticipate early and largely increased business activity and to base domestic railway policies on the strength of such a supposition, is equivalent to ignoring stern facts

120196

and indulging in "wishful thinking". The Canadian people, particularly those following agriculture, have every reason to congratulate themselves upon the heroic manner in which they have contrived to surmount a long period of adverse conditions. They will do so equally successfully in the future, providing our political leadership faces realities and removes such obvious and unnecessary burdens upon the Canadian taxpayer as are clearly involved in the present destructive railway situation.

**The Population Carrying Capacity.**

The plausible suggestion that the solution of our railway problem will presently be found in a large increase in Canada's population is worthy of careful study. I need not apologize for dealing with it at some length. The present railway set-up in Canada was admittedly based on a population approximately twice as great as the present. It was confidently predicted that such a point would easily be reached within a not distant future. That this prediction proved utterly erroneous is now common knowledge. It is also to be noted that, having regard to recent climatic idiosyncracies, our views on the population carrying capacity of Canada must necessarily undergo a very severe revision.

Furthermore, we are now in the midst of dealing constructively with the aftermath of the recent unprecedented period of destructive drouth. The difficult task of approximately defining the areas in the west definitely unfit for settlement and methods of preventing the colonization of such lands, so as not to create new problems in the future, are only in process of study and solution at the present time. Important property interests and profuse public expenditures are involved in these decisions. It is also well to bear in mind that the highly perplexing undertaking of evacuating an impressive number of farmers from the drouth areas, and colonizing them in districts offering more favourable climatic conditions, has only been well started. Under the circumstances, it stands to reason that until these agricultural survey and re-settlement jobs are fairly completed, it would be unthinkable folly to complicate this involved situation by a further influx of new agricultural population.

The Minister of Agriculture of Saskatchewan recently expressed grave doubts as to whether his province could sustain any additional population. A recent soil survey of that province limits the area fairly fit for cereal production to 33 million acres. The cultivated area now exceeds 29 million acres. We are apparently close to the margin of safety in our agricultural occupation of that province. So great an authority as Dr. Raymond Pearl of Johns Hopkins University suggests

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120197

that the United States is now dangerously over-populated, having in view the rapid depletion of natural resources. While expressing no opinion on this subject, Canada's safety limit in population, considering our severe climatic and transportation handicaps and the maintenance of an acceptable standard of living for our people, is an element in the railway situation, the consideration of which has not, by any means, been exhausted and which cannot be ignored.

**Natural Increase in Population.**

Granting, however, that we can accommodate and must look to a substantial increase in population to solve our railway problem, there is little consolation to be found in the vital statistics of Canada. The drift here, as elsewhere, is distinctly towards a lower net rate of increase in population. If we are to depend on natural accretion the case seems hopeless, as it would not be difficult to show that within the not distant future, Canada's population will certainly be approaching a stagnant or possibly decreasing basis. Decidedly, the element of time holds out no hope whatever of creating additional traffic by virtue of natural increase in population. Quite the reverse.

The possibility of the increased population remedy, therefore, resolves itself into the prospect of augmenting our population by means of a substantial immigration. The question here arises as to whether a large agricultural immigration, inevitably followed by a corresponding increase in export food products, would not completely demoralize our present limited, overseas markets. It would, in fact, certainly have that immediate effect, of which the farmers of the West are quite convinced, and would, therefore, at present violently resist any attempt of solving the railway problem by a process which was bound to destroy their market and reduce the existing farm population to a still lower standard of living.

However, disregarding this weighty objection, I must still reluctantly confess that such an apparently easy solution of our problem looks to me almost as idle as anticipating this result through the process of natural increase. In the first place, the people of Canada, rightly or wrongly, are not immigration-minded and probably will not be for years to come. The best evidence of that fact is the record of our immigration administration, which presumably reflects the state of mass public opinion. If Canada to-day opened her doors wide to European people, the volume of arrivals would probably not show any substantial increase, aside from a momentary influx of political refugees. In spite of this fact, our policy has consistently been designed to hedge entrance into Canada around with every conceivable obstacle,

120198

to the extent that immigration has now been reduced to a mere trickle compared with what it was some years ago.

**The Leak by Emigration.**

Even that insignificant influx of people is now fairly absorbed by departures from Canada. There are now one million and a quarter Canadian-born people domiciled in the United States. It has been estimated that Canadians, and those of Canadian origin living in the United States to-day, represent a population one-third as large as Canada's total present population. During the past eight years we have lost to that country alone an average of 10,638 of our population per annum, according to official statistics in Washington. A large number of British and European settlers have also returned to their former homes. Canada, therefore, actually faces a net loss of people each year aside from our modest natural increase;—a highly disturbing fact discreetly ignored in our immigration reports. The persistent and ominous leak of population to our southern neighbor, which seems to proceed in spite of prohibitory legislation, and of the actual extent of which we can form no reliable estimate, is a highly important factor always to be reckoned with in our population problem.

Moreover, it is obvious that the present, and preceding governments are not, and have not been, prepared to endorse a vigorous immigration policy as being within the scope of practical politics. That official attitude at once disposes of the opportunity of solving the railway problem through the long-range remedy of a substantial immigration movement. It may, therefore, be dismissed without further argument, as it is evidently contrary to existing public policy. It may, of course, be argued that some time in the future the official attitude towards immigration may, in obedience to the force of public opinion, undergo a radical change. While I see no present indication of such a change, it may be useful to examine Canada's chances of attracting a large influx of people in the event of any such reversal of policy. Frankly, they appear very slim indeed.

**Immigration from Europe.**

The obsession which now fills the minds of most of our population, that it is an inestimable privilege to permit an immigrant to come to our shores and homestead or purchase a piece of land, will unquestionably be largely removed within the near future, when the realization will dawn upon us that our most urgent invitations to do so will be unheeded. We will learn, to our dismay, that the wholesale subdivision of landed estates in Europe is giving the farmer there better social

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I'20199

and economic opportunities, and much superior markets, than Canada can offer him in the uncertain field of highly competitive export production with the further handicap of expensive, long distance transportation.

Moreover, in the food importing countries—in the past the most fruitful sources of immigration—high tariffs and other import limitations have brought increased prosperity to domestic agriculture. Even if we modified our somewhat exacting specifications and freely accepted industrial immigration, we should encounter a distinct reluctance on their part to leave the economic security they now enjoy in Western Europe in terms of unemployment and sickness insurance, pensions of various sorts and a complete programme of other social services.

With the pressure of density of population relieved through the rapidly falling birth rate in Western Europe, it will assuredly be increasingly difficult to tempt prospective homeseekers to go far afield. This attitude is clearly demonstrated by the fact, that the movement of people into Great Britain and other European countries is now larger than departures, while most overseas countries, including not alone Canada, but also Australia, New Zealand and Argentina, show a net loss between arrivals and departures. These figures tell the tale eloquently.

**Passing of the Migration Era.**

We might as well become completely reconciled to the fact that the days of large-scale migration are over, certainly as far as the present generation is concerned, and in all likelihood for generations to come. After the fantastic increase in world inhabitants of the past century, when the population of the earth more than doubled in the brief space of 80 years—in sympathy with the opening up of three new continents for colonization, improved transportation and the development of power and mechanization—we are again back to normal, which, according to history, means a scarcely perceptible increase from century to century, with long periods of a receding world population. There is every reason to believe that we now find ourselves in one of the latter phases with all its implications.

All European countries, except Russia, are barely maintaining their population to-day and the tendency is still towards an ever-decreasing birth rate and a stagnant population. It is not unreasonable to anticipate that a period of the greatest rate of increase in world population may logically be followed by a century of actual decrease. The persistent world-wide war complex, economic depression and abnormal unemployment, are in themselves powerful factors in that direction.

I'20200

In brief, we have now entered an era in world evolution distinctly and progressively antagonistic to the voluntary migration of peoples. Coupled with this handicap is the dismal fact that there never was a time when this Dominion had less favourable prospects to offer the newcomer. Under the circumstances, thinking people must inevitably conclude that the proposal to solve the railway situation by a substantial and early increase in Canada's population is an impossibility for years to come, and must be dismissed as entirely visionary and evidently based on a complete lack of knowledge of the present day conditions surrounding this issue.

**Economies in Operation.**

Seeing no possible amelioration of Canada's railway problem in any prospective increase in traffic earnings due either to the early advent of a general and substantial expansion in business, or to a large increase in our population, it is useful to turn our attention to the possibility of solving the problem by instituting economies in operating expenditure. I am not competent to enter into the technical side of railway operation and shall, therefore, confine my remarks to the largest item in the operating budget.

It is highly significant that practically every plan of railway rationalization so far made public avoids any reference to the central cost factor, namely the wage item, which represents about 62 per cent of the total operating expenditure. Most of these plans, on the other hand, contain confident assurances that railway personnel need anticipate no interference with its economic status. It seems to be tacitly agreed that this subject is sacrosanct and that a government engaged in the railway business cannot afford even to discuss the labour question. In view of the fact, however, that this issue actually constitutes the central point in the whole railway controversy, it is necessary for me to deal with it at some length and with considerable frankness, particularly as no one else has, as far as I am aware, seen fit to do so.

In implementing any unification plan the taxpayers would quite properly expect that all undue hardship to employees should, as far as possible, be avoided. The theory, however, which seems to prevail in many quarters, that the main preoccupation of our railway system is to provide permanent and highly paid jobs, cannot be tolerated. Railway labor, which has always been the most highly paid and best treated trade in Canada, has no claim whatever to any more generous treatment than would be accorded employees in other lines of business affected by changes in organization.

Any displacement of railway labour, which might be the immediate effect of reorganization, is purely a disagreeable but necessary by-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120201

product. Any consideration of such extraneous factors should never be permitted to influence remedial action in a matter so deeply affecting the welfare of all the people of Canada. If, from motives of political expediency, special provision were to be made for displaced labour, the cost should certainly be assumed by the people of Canada and not by the employing railways, which are in no position financially, and under no moral obligation, to extend compassionate treatment to superfluous employees.

In spite of the fact that capital invested in our railway enterprises, aside from money borrowed, has long ago ceased to receive any returns whatever, it is apparently still assumed that railway labour has no responsibilities to its employers or to the public beyond performing its daily tasks. The clear implication seems to be that railway labour, secure in its powerful fighting organizations, admits no interest whatever in adequately protecting its own jobs. That duty is conveniently delegated to the taxpayers, shareholders and consumers of transportation. I venture to question the justice, certainly the wisdom, of this attitude. I can think of no other occupational group privileged to impose such arbitrary responsibilities upon the public.

**The Railway Wage Level.**

Taking railway wages in 1913 at 100, in 1901 they stood at 68.8 and in 1937 they reached 196.1. That shows an increase of nearly 200 per cent over 36 years. Farm product prices during the same period increased 14.9 per cent. Railway wages increased between 1913 and 1937 by 96.1 per cent while farm product prices fell 0.2 per cent, and the cost of living for a family increased only by less than $3.00 per week. During that period we cheerfully created the present enormous deficit on the operation of the National Lines and it apparently never occurred to anyone in authority that there was an obvious answer to that state of affairs. Canada has certainly treated her railway employees most generously, largely at the expense of agriculture, the heaviest user of railway transportation, and certainly at the direct expense of the taxpayer.

The economic formula under which modern society functions is very simple. Out of every dollar we pay over the counter, an average of about 85 cents is absorbed in the payment for human services. Normal employment is the result solely of normal consumption of goods and services. The volume of consumption is controlled by the purchasing power of the consumer, and this is determined by the fluctuation in the general price level, which is controlled absolutely by the wage level. Orthodox economy expects the law of supply and demand to maintain reasonable equilibrium between wages and prices, so as to keep purchasing power and employment normal at all times. When, however, we successfully contrived to impose arbitrary wage levels on our economy, the law of supply and demand at once became a dead issue and we thus created our unemployment problem, because while labour can enforce arbitrary wages, it cannot compel the consumer to provide employment by buying its product at artificial prices.

120202

The high wage theory is merely a transparent economic absurdity. Social justice to all occupational groups must be the guiding principle in the well-balanced community. This admits of neither high nor low wages, but demands wage levels based on justice only. Purchasing power must be fairly distributed amongst all classes according to their contributions to the common welfare. About half of our population lives in the countryside. The purchasing power of that group determines the prosperity of the nation. The farmer normally receives so small a share of the national income that his purchasing power is governed entirely by the level of urban prices. As long as these are unduly high, as they must be under our high wage level, he is out of luck.

More than one-quarter of the population derives its living from the wage pay-rolls. The purchasing power of this important group is also of grave concern. It must, nevertheless, be recognized that even so numerically important a class as the wage earners cannot receive an unduly large proportion of the income derived from production, without depriving the other three-quarters of purchasing power in terms of higher industrial prices. It is, by the way, well to bear in mind that the crisis of 1930 arose when the industrial wage level was at its highest peak. That did not save the situation. *There is, in fact, no economic salvation in high wages unless they are the result of higher individual efficiency.*

**Farm and Labour Incomes.**

Canada has stubbornly based her whole economy upon her supposed ablity to pay the world's highest urban wage level That is one of the confused theories we have imported from the United States, the fountain head of most of our economic wisdom. Almost the sole function of the protective tariff to-day is to guarantee and maintain this artificial wage structure. In a country where the living of one-half our population depends on agriculture, which must compete freely in its entire production with black, brown, yellow and white peasant and peon labour, such a generous urban wage policy is, to say the least, ambitious to the point of imbecility. It is a typical product of the single-track mind bereft of all sense of proportion. The average consumer can, of course, refuse to buy industrial products in normal volume, as he has been doing for several years, but when Canadian railways are

ARCHIVES PUBLIQUES
CANADA

120203

forced to impose an artificial wage level upon a utility such as transportation, which we are all compelled to patronize, a situation arises which western farmers will only submit to under the strongest protest.

I am not familiar with agricultural opinion in Eastern Canada, but would quote for your information the following extract from a recent editorial in "The Canadian Countryman", a leading farm periodical published in Toronto:—

> ". . . . One of the fundamental reasons why farm business and urban business as a whole cannot be carried on satisfactorily with our present general price level is that the rate of wages paid in our most important urban industries is too high compared with farm prices. Taking the year 1913 as 100, we find that the index number of the price of farm products in November this year was 101. The index number of the rate of wages paid in our major urban industries is approximately 191. As trade is very largely simply an exchange of goods and services between people who work in the city and those who work on the farm, it is not much wonder that there should be so much unemployment and suffering when a disparity of this kind exists. Considered in terms of purchasing power the situation is even worse. Taking 1913 again as our base year, we find that the index number of the purchasing power of the price of farm products in November was 79. The purchasing power of wage rates was 149. That is the purchasing power of wage rates is about double that of the purchasing power of the price of farm products. This is an intolerable situation. . . . ."

Thinking farmers throughout Canada are apparently of one opinion on this subject. One finds it difficult to reconcile the hour rate of earning of the western farmer, estimated at between 10 and 15 cents, with the comparatively princely wages paid at least in the upper grades of railway employment. No one can dispute that the competent farmer possesses a wide assortment of knowledge and skill much superior to the average run of railway labour He might with full justice demand a compensation for his year's labour equal to that of the railway employee.

The hazard to life in railway employment is strongly emphasized in wage conferences. That superstition is many years out of date. With modern safety devices it is doubtful whether the occupation of a train crew is nearly as dangerous as that of a taxi-driver on our crowded streets. There is, in fact, neither rhyme nor reason in the whole theory of present wage differentials. Half of Canada's wage-earners, backed by militant organizations, now collect 80 per cent of the national wage bill.

Existing hour rates of wages are constructed neither with reference to technical skill, duration of training period, hazard to life and health nor on any other rational premises. The unvarnished truth is, of course,

120204

that they are based almost entirely on the efficiency, cash resources and solidarity of each individual labour organization, and upon the vulnerability of public welfare in respect to the essential services the members of each such organization are responsible for maintaining and, therefore, have the power to demoralize through the medium of strike. Labour's ability to impose its will on the community depends exclusively on these factors.

The great international railway brotherhoods are admittedly the wealthiest and most powerful of all labour organizations, and have, therefore, been able to coerce their employers and the public into acquiescing in a wage scale which bears no reasonable relation to the earnings of other comparable occupational groups. Railway labour, not alone by its uncompromising attitude on wages, but by its notoriously wasteful cost- and job-increasing shop conditions, has now brought practically all North American roads to the point of bankruptcy. Western agriculture considers that a searching judicial inquiry into the justification of the railway wage scales is long overdue. Unless an effective check is applied, an increase in freight rates is inevitable.

**Foreign Control of Railway Labour.**

I might here observe that as a matter of public policy it is in the highest degree improper, if not actually dangerous, for the labour relations of the government railways to be dictated by organizations domiciled in, and under the sole jurisdiction of, a foreign country, able to exercise at all times the power to completely demoralize the transportation system of Canada and to bring strong pressure to bear on its Canadian members, as has obviously been done, to strike, with foreign financial support, for higher pay in the interest of uniformity of compensation on both sides of the line, irrespective of the varying economic conditions prevailing in each country.

It should be made absolutely clear to Canadian railway employees, that the wage level in the United States, which is now regarded as the standard for Canada, can have no sensible bearing on the Canadian wage level. It stands to reason that public policy in the United States influenced by party politics, might be at any moment—and actually is at the present time—actively directed towards general economic and wage standards, which might be quite antagonistic to the public policy and prevailing economic status of Canada. To perpetuate the existing state of affairs is tantamount to surrendering to the United States government—which has, from obvious political motives, recently intervened successfully to maintain the high wage rates of her own bankrupt railways—the final decision in Canada's railway problem.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

ARCHIVES PUBLIQUES
CANADA

120205

No other nation in the world would tolerate such a labour organization set-up for a moment, particularly where it involved an indispensable public utility. Canada's dull acquiescence in this preposterous situation is a sinister reflection upon our unwillingness to deal intelligently with labour issues and indicates the danger of Canada's position as an employer of an army of highly organized public servants able, not alone to impose their views through a threat to dislocate our whole transportation system, but also to inflict political retaliation when exorbitant demands have to be resisted. I cannot imagine a weaker or more vulnerable instrument for dealing with labour disputes of large dimensions than a democratic government.

**Wages and Freight Rates.**

One would suppose that intelligent railway labour leadership in Canada, knowing that they are no longer serving an invulnerable transportation monopoly, would by this time pause and consider the future in the light of commercial self-interest. They cannot fail to realize that they have now exploited the people of Canada to the utmost limit, and that the time is long overdue to shed the 1929 "boom" complex. The earnings of a controlled public utility are strictly confined to the business available. The fortunes of its employees must in the last resort move up and down in harmony with those of the enterprise itself, unless we are frankly to cast overboard all the rules of prudent business administration.

There is, in fact, no place for the high, arbitrary wage scale, unless labour can invent a painless formula by which the patrons of railways can be coerced into providing the revenue required in terms of increased rates and volume of traffic. In the absence of such the present attitude of railway labour is simply tantamount to a demand that they continue to be in part affluent pensioners on the bounty of their needy fellow citizens—a position not calculated to enhance the prestige of a large and honourable occupational group, whose insular leadership has apparently forgotten the admonition to "live and let live".

The demand of labour in 1936 for a ten per cent increase in wages—adding $22,000,000 per annum to railway operating costs, equivalent to 8 per cent—made under threat of strike and with full knowledge of the precarious financial situation of both railways and in the face of a substantially reduced cost of living, was an unprecedented exhibition of callousness and disloyalty towards the interests of both their employers and the Canadian taxpayer. This preposterous demand, unjustly acceded to, constituted a major calamity. It was a crude and craven admission of the strange theory that, as long as the people of Canada are in the railway business, the wages of employees shall bear

120206

no relation whatever to the ability of the business to finance itself. The taxpayers will be forced to shoulder the deficit. It set a new precedent in government operation of utilities. One wonders how the privately operated railway can efficiently manage its own labour relations teamed up with a competitive system under political control, whose decision in any labour dispute is bound to prevail. The strategic advantage of labour under such a set-up is evident.

From a point of view of transportation rates, the western farmer occupies the most vulnerable position of any group in Canada. Any government which undertook to protect the present extravagant railway wage level by an increase in freight rates—and that is the plain issue involved—even though the agricultural export rate structure were left intact, would sign its own death warrant in the West. The effect would be a higher operating and living cost, which would further reduce the prevailing near-slum standard of living of western agriculture. It must be clear to the simplest intellect that the remedy for the desperate straits of our railroads is not higher rates, meaning higher commodity prices, further restricted trade and transportation and more destructive competition, but a sane wage bill substantially reducing operating costs.

**Canadian vs. British Labour Attitude.**

Canadian labour leadership, in spite of repeated assurances of full protection for railway employees, went on record recently in opposition to unified operation of our two railways. This was an amazing demonstration either of complete lack of business perspicuity or of callous indifference to the ultimate fate of these enterprises. It seems unthinkable that any responsible person should, in these days of universal stress and sacrifice, seriously advocate an increase of rates as a solution of our railway problem, until every other possible avenue of relief, including the rationalization of wages, had been completely exhausted. If that is a reasonable conclusion, it is obvious that railway labour cannot hope ultimately to maintain its present wage level under separate management of our two systems, for the simple reasons, first, that there is no relief in sight in terms of substantially increased traffic revenue, secondly, because no one is able to indicate where any further considerable economies can be effected under dual management, and, thirdly, because of the increasing competition of other means of transportation. Coupled with these facts is the peremptory demand of a rapidly increasing section of the public that this indefensible fiscal leak be stopped without delay.

Granting that the present unjustifiable wage level may eventually have to be reduced even under unified operation, it is still evident that the pressure on the wage earner must presently become infinitely

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120207

stronger under separate management, deprived of any other means of reducing operating costs and rapidly going into bankruptcy. One would naturally suppose that the only possible chance of railway labour's maintaining anything like the present level of wages would be precisely through unification. British railway labour, drawing very low wages and confronted with the same situation, quickly recognized that the only effective guarantee of fair wages and working conditions is a solvent employer. After the unification of all the British railways into four regional groups, railway workers there are now pressing for complete amalgamation of these into one concern in the interest of still further operating economies. Canadian railway labour apparently has no interest in Canada's railway problem, beyond what they erroneously conceive to be to their immediate advantage in terms of jobs and wages.

Or, it is conceivable that Canadian railway employees consider their position unassailable and still hopefully pin their faith to the old-fashioned method of terrorizing the public by the threat of domestic warfare, and the dislocation of our transport services. If so, I would hazard the opinion that a general railway strike has now lost its terrors. It would not, in these days of efficient motor transportation, constitute anything like the menace it once represented. Public opinion would assuredly be strongly adverse to the labour point of view in a fight practically involving the welfare of Canada. A strike would be irretrievably lost before it started.

**Economies Under Unification.**

Competent opinion assures us that unified operation of our railways might easily effect such substantial savings as to eliminate the present aggregate losses. Those opposed to unification question that statement. Obviously, it is difficult to calculate even the approximate saving to be effected with such important controversial issues outstanding as the extent of abandonment of unprofitable lines, which clearly must be a matter of careful consideration and probably of lengthy negotiation with the interests affected. In this submission, I shall not attempt to go further than to express very general opinions, based entirely on a somewhat lengthy experience as a senior business executive, upon a subject clearly bristling with technicalities.

To the direct economies which may be gained by unified operation of our system of railways, the safest interim approach is perhaps the application of ordinary, common sense. It stands to reason that the complete duplication of traffic solicitation and facilities, executive management, expensive and continent-wide service offices, publicity, accounting and scores of other overhead costs could be cut in two or largely curtailed under unification. Some could be completely elimin-

120208

ated. That these savings would in the aggregate amount to an impressive sum is indisputable. It is clear that a great public utility can, other things being equal, operate most efficiently and economically as one unit, relieved of all the expensive and vexatious problems incidental to keen competition for the patronage of the public.

Whether the economies incidental to unified operation would, or would not, completely cover the present deficit, is not the point. In view of the serious position of both our railway systems, the taxpayers of Canada have the right to demand that every possible avenue towards reduced operating cost be exhaustively explored and fully utilized in order, first, to limit the tax burden, and, secondly, to leave open the door to possible rate reductions in the future. Every single move promising any substantial economy in aggregate operating expenditures is absolutely mandatory if we wish to salvage our five billion dollar railway plant and ensure indispensable rail facilities for our people.

**Competition Indefensible.**

On the general subject of the propriety of the present competitive set-up in our railway services, may I point out that democracy contemplates that the government shall at all times impartially conserve the legitimate interests of its citizens without fear or favour. Shareholders in the private railway system invested in good faith in a concern incorporated under Canadian law, took great risks and are clearly entitled to decent treatment. When the government of Canada first embarked upon railway operation, the public business was fairly divided between the two systems. That was as it should be. Now all government patronage goes, as far as possible, to the National Lines. It is plainly a case of competition without gloves between a government and a group of its taxpayers. The normal limiting factors in competitive effort are efficiency and available capital. Irresponsible competition ultimately leads to bankruptcy and elimination. The process of the survival of the fit maintains equilibrium in business, and it is important in the interest of sound and sane national development that this natural process should not be obstructed.

The President of the National Lines, in his evidence before the Senate Committee, suggested that the mission of his system was not to make profits, but to render services to the public. In a recent speech at Toronto, Mr. S. W. Fairweather, Chief of Research of the National Railways, said:

> "There is another side of the deficit of the Canadian National; primarily the railway is not operated for profit, but for public service and the development of the country . . . . it would be a short-sighted policy to make railway profits the criterion and test of development."

120209

Such an operating policy under the present railway set-up would, of course, be absolutely unjustifiable. That the government of Canada should furnish transportation at less than cost in order to promote the development of the country, or any part thereof, might conceivably be excellent public policy in many cases. But however meritorious such a policy might be, it would now necessarily involve compelling the shareholders of the competing private railway system to become equal contributors with the government towards any such objective of general public interest, by means of what would virtually amount to discriminatory taxation. This principle creates a preposterous situation.

It is clearly unethical for a government to enter active business in competition with its own taxpayers. If a government is at any time confronted with the necessity, in the public interest, of socializing any utility or business enterprise, it is its bounden duty to leave no stone unturned forthwith to create of such business a public monopoly and, even at considerable sacrifice, to give every private concern in the same business the fullest opportunity to escape from the admittedly impossible situation of competing with its own government, having the capacious pockets of its taxpayers—including even those of the private competitive enterprises—to resort to to liquidate the financial consequences of eventual extravagance and mismanagement. The record of our National Railways, with its periods of reckless expansion and duplication of services, provides the most convincing proof, if any is needed, of the fairness and soundness of this principle in public administration. The present railway set-up in Canada is obviously immoral, illogical and indefensible.

**Competition and Services.**

In the early days the west fought persistently and justly for competition in transportation. With the advent of the Railway Commission and public control of rates and services, however, this issue at once became obsolete. The assertion that competitive enterprise is desirable in order to promote efficiency in railway services is not convincing. According to that theory we should also have competition in telephone and postal services and in other public utilities, when it is common knowledge that the tendency the world over is precisely to operate all public utilities as a monopoly under rigid state control, not alone in the interest of efficiency and economy, but also to avoid the burden of uneconomic services. Public service enterprises are everywhere regarded as "natural" monopolies.

It is true that the absence of the spur to improve services afforded by keen competition might lead to deterioration. On the other hand, it is equally true that such competitive services are generally inaugurated long before they are economically justified, thus leading to extravagance. Under unified, non-political control improved services would be provided as soon as they would pay their way and no sooner. Under competition they are offered as a bait for increased patronage. Presently the competing line must follow suit and also embark upon a losing adventure. It may, I think, be successfully argued that in the last resort, one solvent railway will give better services than two competing lines both hovering on the verge of bankruptcy.

120210

Our outstanding problem is to make the transportation system of Canada as a whole pay its way, consistent with rendering adequate—but only adequate—services to the public. The western farmer is of the opinion that the people of Canada evidently are not in a position to demand and pay for "palaces on wheels" or any other expensive superfluities. If they were, both railways would probably now be in solvent circumstances. Granting a moderate and sane view on the subject of services, I cannot see the slightest justification for maintaining competitive railway transportation. On the contrary, it is not alone absolutely indefensible in principle, but it defeats the paramount objective of economy in operating cost.

**Abandonment of Unprofitable Lines.**

It has been asserted that one of the most promising, and also perhaps the most controversial, objectives in the reduction of aggregate railway operating costs, lies in the abandonment, or part abandonment, of the enormous mileage of paralleling and unprofitable lines, estimated by the Duff Commission at 17,000 miles. This problem in railway operation is not, of course, peculiar to Canada, nor indeed to new countries. Great Britain has faced the same situation. It is estimated that if military considerations were ignored and British railways could substitute truck service, 2,600 miles of single track lines could profitably be abandoned, representing 13 per cent of the total route mileage. During the past ten years one per cent of the aggregate mileage has actually been completely abandoned.

I shall, however, offer no comment on this subject beyond this, that if the Railway Commission, with all the facts before it, deems it essential in the public interest that services should be maintained over any unprofitable lines, then, having due regard to any subsidy or equivalent a railway may in the past have received in respect to the construction and operation of an apparently superfluous line, the government of Canada should assume its just and proper share of the annual losses involved, by special and direct subsidy to the operating railway. That would keep the record straight.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120211

Furthermore, as a public contribution towards, and in order to facilitate, railway rationalization, western people would unquestionably support a very liberal policy in that respect, so that no injustice may be inflicted either upon the railways or upon vested interests along existing unprofitable lines. The government might conceivably subsidize motorized highway transport to serve such areas, in some cases using the abandoned right-of-way. With this highly efficient alternative now available, the obstacles to abandonment should not present anything like the difficulties they did some years ago. At any rate, the solution of the railway problem is of so urgent a character that sacrifices can be safely demanded from all interested classes of the community.

**The Political Implications.**

A dispassionate survey of the railway situation would not indicate that it is by any means hopeless. Obvious opportunities for substantial economies in operation present themselves in numerous directions. There is, however, no easy way out. The easy remedies have been exhausted by this time. We now face those uncomfortable issues in economies, which involve fundamental changes and controversial policies. Several feasible railway unification plans have been constructed amply protecting the public interest.

The arguments hitherto advanced against unification are based almost entirely on the extremely doubtful virtues of competition and ignore the crucial points, which are, first, the moral impropriety and the economic wastefulness of competition and, secondly, the urgent business problem of salvaging an indispensable public utility through facilitating operating economies, rather than through increasing the cost of services to the farmer and the general public. That unified management of the two systems will eventually be forced upon the people of Canada admits, as I see it, of no doubt whatever, simply because there is no other easy way to eliminating operating losses. Presently an overwhelming majority of the Canadian people will demand the common sense solution of the problem.

It is painfully evident that the real obstacle to railway rationalization is the political implications involved. The personnel, representing about one per cent of the population, but controlling perhaps a quarter million votes, constitutes one of the serious problems of democracy engaged in the dangerous pastime of ownership and operation of "Big Business". An isolated major adventure in state socialism embracing an army of perfectly unionized workers cannot possibly succeed. Successful control and socialization of business necessitate a political dictatorship, able to restrain the unionization of labour for bargaining

120212

purposes. That has been demonstrated over and over again in Europe since the war. When a democratic government undertakes, directly or indirectly, to bargain with large bodies of powerfully organized employees, its final decision obviously affects its own political fortunes and, therefore, opens the door wide to political corruption. In every general election the railway vote would naturally favour the highest bidder. We cannot afford to ignore this deadly menace to our public life.

It has even been suggested, that railway unification in Canada would constitute a public menace, as so large an organization would be politically all-powerful. That, of course, is sheer nonsense. Whether the railway vote is concentrated under one management or under two or half a dozen, the railway brotherhoods will always act as one unit and labour, under the present set-up, will bestow its political rewards or punishments as one unit. The danger of labour domination obviously lies solely in the political administration of railways.

**Non-Political Control.**

I am in complete agreement with the Drayton-Acworth Royal Commission report which says on this subject:

> ". . . . We believe that the history of railways all over the world, where the management is directly under a minister responsible to a democratic Parliament, confirms our position that under such a system the public suffer because special interests obtain concessions at the expense of the community as a whole. It is for this reason that we have emphasized our recommendation that the management of the railways be entrusted to a body independent of politics."

The government and the Federal Transport Department must be divorced entirely from the management of our railways, through unified control under a board of possibly fifteen directors, five elected by the government, five by the shareholders of the Canadian Pacific Railway and one each nominated by some such representative and non-political bodies as the Canadian Chamber of Agriculture, the Chamber of Commerce of Canada, the Trades & Labour Council, the Canadian Manufacturers' Association and the Engineering Institute of Canada. A board so constituted would completely protect the management of the unified railways from political pressure and would also give the taxpayers and shippers of Canada direct representation uninfluenced by politics.

Such a board should elect and appoint its own officers, and it would be important that minority groups within the directorate should have full and independent access to the impartial and final judgment of the Railway Commission on all majority decisions upon rates and services

with which they were not in agreement. A semi-judicial body such as this, with a back-ground of technical knowledge of railway administration, and having available a staff of competent technical advisers, and being specially charged with the responsibility of safeguarding the joint interests of the owners of the unified system—the citizens of Canada and the shareholders of the Canadian Pacific—would assuredly come nearer rendering safe and sane decisions than the political head of a department, exposed to the influence of pressure groups and hampered by uninformed public opinion and party considerations.

**Conclusion.**

That Canada's railway problem must be solved at the earliest moment is mandatory, not alone because it involves an intolerable and wholly unnecessary burden on the taxpayer, but especially because it is exercising a distinctly demoralizing influence on public opinion. Coupled with our enormous expenditure on relief, our apathetic attitude towards this destructive leak in our national resources has already created the illusion in the minds of too many of our citizens that the public purse is bottomless and that we can with impunity continue to add to our fantastic public indebtedness.

In order to conveniently defer constructive action, timid political leadership has from year to year deliberately reassured the public in respect to Canada's fiscal position, until many otherwise intelligent citizens, influenced by irresponsible, financial "witch-doctors", are now actually beginning to believe that credit and debt, public and private, are, in fact, largely a matter of accounting tricks and the liberal printing of currency. When the government itself refuses to face the desperate realities and complacently condones a ruinous deficit on railway operations, which in saner times would not be tolerated for a moment, we may confidently anticipate that the man-on-the-street is going to be no less complacent, and many will be quite ready to support weird plans to solve fiscal problems by financial magic. That is the price democracy pays when governments choose to under-rate the disastrous effect on mass-opinion of an attitude of unconcern respecting spectacular financial losses.

Transportation in a far-flung country like Canada is the central operation of our industrial and agricultural economy. It intimately touches the life of every citizen and it behooves Canada to promote, by every means within her power and at almost any sacrifice, the highest possible degree of efficiency and economy in her vital transportation services. Confronting an identical problem in 1921, a determined government in Great Britain, facing strong opposition by the railways, by labour, by the technical press and the general public, abolished

120214

wasteful competition through the wholesale amalgamation of 120 railways into four regional, non-competitive systems. The new set-up has now earned the approbation of everyone. It saved the situation completely. Are our Canadian leaders unable to emulate this example of bold statesmanship?

What I believe to be a rapidly growing majority of Canadian citizens, and almost the entire press of Canada, are to-day united in the demand for speedy railway rationalization. Are we to confess that, facing this national emergency, our political leaders are unable to sink considerations of party advantage and to agree on a rational plan of unification in the best interests of Canada? If our statesmen of today wish to avoid the opprobrium of the public of tomorrow, they have no choice but to pursue the logical course dictated by common sense and a realistic conception of the grave problem facing us all.

The responsibility resting on our political leaders of all parties is a heavy one. If the welfare of Canada is to be made subservient to the fortunes of political parties and occupational pressure groups, our case is desperate indeed. But I cannot bring myself to believe that our leaders cannot be brought to agree on sinking selfish interests in meeting a crisis, which, unless surmounted through co-operative effort of high-minded men, threatens to perpetuate the existing economic stress and ultimately to tarnish the good name of Canada in the financial centres of the world, thus retarding the clock of national progress. That is the inevitable penalty we would pay.

SUMMARY OF EVIDENCE FOR AND AGAINST
CANADIAN PACIFIC ESTIMATE OF SAVINGS
FROM UNIFICATION.

INTRODUCTION

The tabulated summary of the Canadian Pacific estimate of savings of $75,373,000 is to be found on page 416 of the Record. In the left-hand column of this statement is an outline of the assumptions made and of the principal physical changes which would be involved. The Exhibits "A" to "F" listed there appear on pages 417 to 421 inclusive, and further details as to Exhibit "A" are to be found on pages 427 to 432 inclusive.

The Committee charged with the preparation of the Canadian Pacific estimate assigned the problem of the physical changes outlined in the left-hand column to different officers than those who were responsible for the calculations. Correspondingly it was necessary to call separate witnesses to demonstrate these physical changes from those giving evidence as to the calculations of the savings shown in the right-hand column. This was necessary on account of the fact that the officers best able to deal with they physical side of the study were not in many cases the same as those who could best deal with converting these facts into money calculations. The evidence of Mr. Macnabb, Mr. McNeillie, Mr. O'Brien, Mr. Pyne and Mr. Humphrey dealt principally with the physical changes in the left-hand column, and the other witnesses supported the figures shown in the right-hand column.

The main item of the gain - Item 2 - is an estimated saving of $64,268,000 in Operating Expenses. Five witnesses supported this Item - Mr. Armstrong, Mr. Newman, Mr. Jefferson, Mr. O'Brien and Mr. Liddy. Item 6 of the summary, relating to Express economies, was dealt with by Mr. McDonnell, Item 4 -

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

C 202116

British Columbia Coast Service, and Item 5 - Telegraphs, were covered respectively by Captain McMurray and Mr. Howard, Each witness dealing with estimated savings presented summary sheets of the calculations based on 1930, and each indicated where possible the variation from the 1930 estimate either upwards or downwards resulting from changes in conditions which might affect the estimate of savings available when traffic returns to normal levels.

The Committee indicated interest as to the possible effect should no line abandonments take place. The simplest and most adequate method of doing this is to consider the cost of providing the necessary services if line abandonments are not made, and the question was therefore dealt with in its entirety by Mr. Liddy (pages 905 and 906), who presented the calculation of the amount of reduction in the estimate which should be made

(a) if no line abandonments are included, and

(b) if line abandonments were made only to the extent of the 2,098 miles common to both the Canadian National and Canadian Pacific estimates.

This was done by calculating the total cost of placing a tri-weekly service on the lines and maintaining them on the basis of that service.

Mr. W. M. Neal, Vice-President, Western Lines, presented (pages 983 and 984) a summary of the variations upwards and downwards which the preceding witnesses had stated should be made in the original estimates,.

Following the close of the Canadian Pacific evidence the Canadian National presented witnesses who commented upon and criticized some of the Canadian Pacific estimates. The Canadian Pacific made no detailed reply, but its witnesses were fully prepared to explain the points raised by the Canadian National and clear up certain misapprehensions which had arisen in a study of the figures. It has been thought desirable, for the sake of convenience, to set out as briefly

ARCHIVES PUBLIQUES
CANADA

120217

as possible in one memorandum the principal arguments of both parties under the headings of Exhibit 49 on page 416 of the Record, listing them in the same order as they appear there.

LINE ABANDONMENTS

Mr. T. C. Macnabb, General Superintenddnt, New Brunswick District, Canadian Pacific Railway, dealt with this item at pages 608-664 of the Record. He stated (pages 609 and 610) that the Canadian Pacific study covered 5,051 miles of lines which might be suitable for abandonment and that the Canadian National study covered 4,259 miles, including 1,966 miles of thin traffic lines. He pointed out, however, that a large measure of the estimated savings could be achieved without abandonment by re-routing traffic and reducing maintenance. A complete elimination of line abandonment would only reduce the total saving by $7,248,000.

Mr. Macnabb emphasized the fact (page 610) that consideration by the Canadian Pacific of these abandonments took into account the rule that public interest was of first importance and that the business of the district, the needs of the people, the alternative rail and highway facilities and the possible future growth of individual districts were fully considered. He agreed that some adjustments of the estimate of abandonments on the 1930 basis would probably be necessary due to altered conditions, but he thought that the ultimate measure of savings would be little changed.

Mr. Appleton, Mr. Kingsland and Mr. Warren, the Vice-Presidents respectively of the Atlantic, Central and Western Regions of the Canadian National, took exception to the proposals for abandonment of certain sections of the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120218

lines dealt with in the Canadian Pacific estimate (pages 1086 to 1111). They based their objections principally upon the amount of population served, the local traffic derived, and the future possibilities of the territories affected. In some cases they believed the lines referred to should not be abandoned because they were constructed with better grades and greater capacity than the alternative routes. These witnesses expressed the opinion that the solution of the railway problem was to "stand pat", economize as much as possible, and hope for an increase in traffic.

Mr. Macnabb points out, however, that in the areas proposed for abandonment the earnings fall far short of paying the cost of maintenance and operation of the lines, when all factors are taken into consideration. Alternative means of transportation, highway, water or air, are available to serve most of these areas. He submits that evidence of the necessity for alternative routes in the past does not constitute an argument against abandonment, since by better maintenance and operation and improved facilities required to handle the increased traffic on the remaining line or lines interruptinns (such as Kamloops-Vancouver) would be diminished. Despite the objections that have been expressed to the abandonment of certain specific sections of line, the fact remains that it is agreed by both Railways that there is a large superfluous trackage in Canada that can be abandoned without detriment to adequate and efficient transportation.

The Canadian National criticism has proceeded on a wrong basis. As pointed out by Mr. Macnabb, the schedule was not intended at all to indicate the precise choice of lines to be abandoned. It was indicative of the superfluous mileage in the various areas involved. If a Canadian National line included in the schedule possessed advantages justifying its retention, it would be retained.

PASSENGER TRAIN AND CAR MILES

Mr. R. G. McNeillie, Passenger Traffic Manager, Canadian Pacific Railway, gave evidence (pages 664 to 674 and 752 to (763) that the original estimate of savings under this head had been compiled by other officers of the Company, since retired, after a careful and comprehensive survey of the 1930 traffic. It took into account the fact that between common points, such as Montreal-Toronto, Montreal-Quebec and Ottawa-Toronto, many duplications of train service were in existence and train mileage might be eliminated by the consolidation of trains.

Mr. McNeillie filed as Exhibit No. 63 (pages 938 to 940 of the Proceedings):

(a) the details of the Canadian Pacific 1932 estimate showing a saving of 7,574,454 passenger train miles, on the basis of 1930 traffic volume, under a plan of unification;

(b) the revised (1938) estimate showing a saving of 6,649,836 passenger train miles (instead of 7,574,454 miles as originally estimated), on the basis of 1930 traffic volume, under a plan of unification; and

(c) the details of the estimated reductions $3,508,413 passenger train miles) possible, on the basis of 1937 traffic volume, under a plan of unification.

Mr. C. W. Johnston of the Canadian National did not refer in any way to the original Canadian Pacific estimate of saving of 7,574,454 passenger train miles, or the revised (1938) Canadian Pacific estimate of a saving of 6,649,836 passenger train miles, on the basis of 1930 volume of traffic, under a plan of unification.

Mr. Johnston estimated (pages 1224 and 1225) that 2,467,307 passenger train miles could be saved on the basis of 1937 traffic volume, under either unification or co-operation, and stated that, if the mileage saved by pooling arrangements and through independent action are taken into account, that estimate is similar to the Joint Canadian Pacific - Canadian National estimate of February 7, 1933 (Exhibit No.40 - pages 227 to 232 of the Proceedings.)

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120220

Mr. McNeillie agrees with Mr. Johnston that the 2,467,307 passenger train miles on the basis of 1937 traffic volume could be saved under a plan of unification, and considers this could be increased to the 3,508,413 miles (provided certain track abandonments are made) included in the Canadian Pacific estimate, which is the result of a more exhaustive study of conditions than was apparently undertaken by the Canadian National for the purpose of their estimate.

Inasmuch as the Joint Estimate of 1933 (filed as Exhibit No. 40) was based upon the then current level of traffic, and was compiled to indicate the extent of obviously duplicate passenger train service under a plan which would provide for union or joint stations at the principal common points, but not under general unification, it is not on a comparable basis with the Canadian Pacific estimates of the savings available under unification. The 1933 Estimate was not a study to determine the maximum reductions that could be made under unification.

SAVINGS IN FREIGHT AND MIXED TRAIN MILES AND FREIGHT CAR MILES

At page 673 of the Record Colonel E. G. O'Brien, Freight Transportation Assistant, Canadian Pacific Railway, gave evidence as to the manner in which the study was made of the anticipated reduction of 5,301,323 freight train and mixed train miles and 67,157,402 freight car miles. At the request of the Committee copies of detailed working sheets were filed, showing how this information was prepared, and some thousands of detailed reports were presented for examination.

Consolidation of merchandise was explained (page 704) as the possibility of placing in one car merchandise now moving in two cars on competitive lines. The heavier loading of carload traffic was indicated (page 679) as a possible saving due to using under unified management large cars to better advantage. Rerouting of empty cars was explained (pages 679-80) under two headings: the possibility of sending foreign cars home via shorter routes,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120221

and the ability to use more direct routes for the movement of Canadian empty cars. Rerouting of traffic was shown (pages 691-704) to be the result of the ability to use a more direct route or line with better grade.

At the request of the Committee, Colonel O'Brien made a comparison (page 689) between his estimate and that made by the Canadian National for the Duff Commission. This comparison indicated that the Canadian Pacific estimate of savings was very conservative.

Criticism of Colonel O'Brien's evidence by Canadian National witnesses related more closely to his subsequent evidence as to the money value of the reduction in train and car miles and will be referred to under the heading "Transportation-Rail Lines."

CONSOLIDATED LOCOMOTIVE AND CAR SHOPS

Mr. R. A. Pyne, Superintendent of Motive Power and Car Departments, Western Lines, Canadian Pacific Railway, gave evidence (pages 736 to 746) as to the methods used to achieve the savings under this head, which were estimated at $14,360,000. It was contemplated that there would be a reduction in locomotive and car mileage and a further reduction in locomotive and car repair expense due to a higher percentage of modern equipment available and a concentration of repair work on a mass production basis at the best equipped shops.

Mr. Pyne pointed out that under unification the number of main shops could be substantially reduced, and economies would also be effected in running repairs from consolidation of facilities and the elimination of terminals. The locomotive mileage completed between general repairs would be increased in certain territory because of advantages from redistribution and increase in modern power available. Furthermore, the shopping of car equipment would be affected in proportion to line mileage reduction and co-ordination of services.

No substantial criticism of Mr. Pyne's evidence was offered by any Canadian National witness; in fact, Mr. Roberts agreed that

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120222

savings could be made but was unable to state the amount.(page 1215).

CONSOLIDATING SUPERVISORY ORGANIZATIONS

Mr. H. J. Humphrey, Vice-President and General Manager,Eastern Lines, Canadian Pacific Railway, gave evidence on this subject (pp. 774 to 779).He stated that the method of arriving at the estimate was to study all supervisory units of both railways and estimate what could be done by unification after deducting proposed line abandonments. The unified system was to be divided into four Regions as against six of the two railways operated separately. In 1930 the two railways had twenty-three Districts and seventy-five Divisions, which would be reduced to thirteen Districts and fifty-two Divisions under unificiation. In the estimate given by the Canadian National before the Duff Commission, it had been proposed that three Regions, nine Districts and fifty Divisions be set up. The reduction of the number of Districts and Divisions would mean that each Superintendent and General Superintendent would have an increased mileage to supervise. However, the efficiency of supervisory work is only limited by by the distance from headquarters and the volume of traffic,and in Canada because of the thinness of traffic it is usually the size of the territory which is the limiting factor and not the amount of mileage or traffic within the territory.

Mr. Humphrey mentioned the large amount of wasted effort at present caused by necessary conferences between the corresponding supervisory officers of each Company. This would disappear under unification. He stated that as a fully experienced railway officer he believed that the outlined plan of unification of supervisory services could be put into effect without detriment to the standard of railway services.

Mr. Warren for the Canadian National expressed the belief (pages 1101 to 1103) that it would be an impossibility to have proper supervision under this scheme. The average mileage for the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120223

Canadian National line Superintendents on the Western Region is 1,103 and an increase in this mileage could not properly be made. Since 1930 the Operating supervisory staff and Despatching, Mechanical and Engineering supervisory forces on the Canadian National Western Region had been reduced with a saving of $295,600 annually. If traffic returned to the 1930 level, two Division superintending offices would have to be restored, costing an additional $70,000. The Canadian Pacific does not agree that an average of approximately 1,100 miles is the maximum that can be operated efficiently. The fact is that in the Canadian Pacific Western territory particularly there are divisions of considerably greater mileage.

In discussing the Canadian National estimate (page 1272) Mr. Fairweather mentioned the fact that removal of regional headquarters at Moncton would affect the public interest. In the discussion which followed it became apparent that it was believed that the Canadian Pacific estimate of savings would involve the destruction of Moncton as a railway headquarters. The Canadian Pacific estimate of unification savings included no economies to be derived from interference with the Intercolonial Railway, and, indeed, Sir Edward Beatty (page 567) indiscussing the question of the "national interest" said that he should have no objection to the Intercolonial being excluded from the unification arrangement and being run by the Government as they saw fit in the national interest.

INCREASED RAILWAY OPERATING REVENUES

Mr. C. E. Jefferson, Freight Traffic Manager, Canadian Pacific Railway, explained to the Committee (pages 708 to 716) that the estimated gain in gross freight revenues of $2,135,000 made by the Canadian Pacific Railway was based on re-routing of traffic movements which were and still are highly competitive between the Canadian Pacific and Canadian National on International, Interstate and

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120224

Great Lakes traffic (Exhibit 61, page 909 of the Record). This is traffic on which the connecting lines of each system enjoy a portion of the haul that under unification could be diverted to the rail and steamship lines of the unified system that longer hauls might be obtained.

There is also additional "gross" revenue to be gained from readjustments of interline divisions - $1,500,000 and estimated gain in "net" revenue through re-routing over unified lines of Canadian Pacific traffic through Detroit Gateway $1,136,000 (see page 984 of the Record).

In reviewing his original estimate, Mr. Jefferson increased it by saying that there would also be additional gains in "gross" freight revenues of $3,635,000 and in "net" freight revenues of $1,135,000, total $4,771,000.

This estimate appears conservative in view of a similar estimate made by the Canadian National Railways on page 489 of the Record - re-routing of interline traffic $5,385,800 and adjustment of interline divisions $2,500,000, page 476 of the Record, or an estimated total gain in "gross" freight revenue of $7,885,800.

Mr. Long, the witness for the Canadian National Railways, repudiates the statements made by the Canadian Pacific and Canadian National Railways, as given above, except that he did not dispute the estimated gain in "net" Revenue through the re-routing over unified lines of Canadian Pacific traffic through the Detroit Gateway, amounting to $1,136,000. It is significant that this item was not disputed by the witness for the Canadian National Railways, for the obvious reason that they are desirous of securing this re-routing through co-operation.

Mr. Long believes the estimated gain in "gross" freight revenues made by the Canadian Pacific Railway through the re-routing of freight traffic, amounting to $2,135,000 and readjustment of interline divisions, amounting to $1,500,000

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120225

is very difficult of accomplishment.

Many reasons were given with which Mr. Jefferson does not agree and is still of the opinion that his estimates are conservative and insofar as the rerouting of traffic is concerned, can readily be accomplished, and furthermore there are other instances where a "gain" in gross freight revenues can be made and if there is unification of these two railways more should be found.

Mr. Long is of the opinion )page 1231) that nothing could be accomplished in the way of obtaining additional revenue through readjustment of interline divisions. Mr. Jefferson, after carefully reading the evidence of the witness for the Canadian National Railways, is of the opinion many of the situations to which reference is given would not arise through unification of the Canadian National and Canadian Pacific. There is no doubt unification would afford an opportunity of substantially improving railway operating revenues through the adjustment of interline divisions. True it would take time and effort but the fact cannot be disputed that during a period of five years much could be accomplished and the estimate made is a modest and conservative one to achieve.

Mr. Long (page 1231) argues that the Canadian Pacific estimate should not include any savings by rerouting of northbound traffic from New England, on the ground that the Interstate Commerce Act reserves to the United States carriers their long haul, i.e., the right to turn over traffic to a Canadian line at Wells River. Mr. Jefferson argues that nothing could

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120226

prevent the unified system from refusing to accept freight from United States connections at Wells River, Vt., since the Company could refuse to run a through freight service north of that point. It is clear that Mr. Long is really of the same opinion, since, on page 1233, he argues that the New York Central System could refuse to accept southbound Canadian traffic at the Niagara Gateway, and could insist on taking it over at Hamilton. He cannot be right on both points. In addition, on page 1232, Mr. Long argues that no savings would result from rerouting of southbound traffic to New England from the Canadian Pacific leased line from Newport, Vt. to Wells River, Vt., to the Central Vermont Railway. He argues that the Canadian Pacific has a long lease on the Newport to Wells River line, for which it pays $246,000 a year. The Canadian Pacific estimate of savings by rerouting assumed that this lease would be honoured but that does not interfere with the making of savings by diverting traffic from the leased line.

## DECREASED RAILWAY OPERATING EXPENSES

In each of the sub-headings under this division of the estimate, "Maintenance of Way and Structures", "Maintenance of Equipment", "Savings in Rail Traffic Expense", "Transportation", and "General", an item is included for savings in supervisory expense. These would be made possible through the consolidation of staffs and the elimination of duplicate effort. In arriving at this estimate a ready means was to estimate from the experience of Canadian Pacific officers what the cost of a

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I 20227

unified system would be and take this from the total of the costs under separate operation. Mr. Cooper, Comptroller of Canadian National Railways, believed the estimate claimed economies as a product of unification which could be and had since been made otherwise (p.1137). Since 1930 the cost of supervision on the Canadian National had been reduced by $5,414,992. By the application of a formula of the American Railway Engineering Association it was calculated that twenty per cent or $721,863 of this was due to diminished business. A further amount of $579,471 was attributable to salary deductions. The subtraction of these items from the figure of $5,414,992 left a balance of $4,113,658, which Mr. Cooper said represented the economies of a permanent nature effected by the Canadian National without unification. He claimed that the Canadian Pacific estimate should be reduced by this amount.

In commenting upon Mr. Cooper's evidence, Mr. S. J. W. Liddy, Assistant to the Comptroller, Canadian Pacific Railway, doubts the propriety of the application of an arbitrary formula to determine the proportion of decrease in supervisory expense attributable to diminished business in view of the unusual conditions which have prevailed. He points out that no actual study has been made and claims that in time a much larger proportion than indicated will ultimately prove to be temporary. Mr. Liddy further points out that the primary concern of the Canadian Pacific in compiling the estimate was the calculation of the amount of savings attributable solely to

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120228

unification. If the officers in setting the amount of the savings had provided for the higher costs on the Canadian National they would have placed the percentage of reduction for the unified management very much higher. Exception is also taken to the Canadian National's assumption that the permanent economies which Mr. Cooper computed should be entirely deducted from the estimated economies of the Canadian Pacific. Estimated savings in supervisory forces would be reduced little, if any, more than in proportion to the general reduction in supervisory expenses. Apart from a minor percentage of the total expenses which may be considered permanent economies, it is still considered that the estimate is a fair valuation of the economies possible on the basis of a normal year.

The evidence given under the individual headings of this division may be summarized as follows:

(a) Maintenance of Way and Structures

Mr. J. E. Armstrong, Assistant Chief Engineer of the Canadian Pacific, explained in detail (pages 779 to 801) how the Canadian Pacific mileage and the mileage under unification had been derived, and then showed how the cost of maintaining the unified mileage had been determined, partly by applying various unit costs derived from an analysis of Canadian Pacific costs.

Savings in superintendence were determined from the known cost of Canadian Pacific office units adjusted downward, on an arbitrary basis, in the case of general offices, and

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120229

upward, in proportion to the tributary mileage, in the case of other office units, Track maintenance costs on the Canadian Pacific were analyzed and known costs were divided by weighted units which made allowance for single and double track main lines, for branch lines, and for higher costs in Eastern than in Western Canada. The unit costs so derived were applied to the weighted units of the unified mileage to secure the estimated costs of maintaining this mileage.

After the witness had developed in detail all the items appearing in the column headed "Estimated Total Combined Railways Operated as a Unit" in the table at the top of Page 423, except the item for "Telegraph and Telephone Lines" which was to be handled by another witness, it was obvious that the difference betweenthe figures in that column and in the column headed "Total Combined Railways Operated Separately" was the figure of "Net Savings" shown in the last column.

The Canadian National witness, Mr. C. B. Brown (pp. 1198-1207), did not criticize the mileage figures quoted by the Canadian Pacific witness except to say that he would proceed on the assumption that no mileage would be abandoned. He did not agree with the formula used by the Canadian Pacific for deriving costs for the unified railways, but preferred, what he considered to be, a more simple method which consisted of dividing reported costs by reported mileage. With per mile costs derived in this manner, he ignored the Canadian Pacific estimate of savings under unification and apparently endeavoured to demonstrate that Canadian National costs for Maintenance of Way and Structures were on a parity with Canadian Pacific costs, and, consequently, that there would be little, of any, saving under unification.

He stated that because of differences between the Canadian National and the Canadian Pacific situations, the Canadian National would have to spend annually, as of 1937,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120230

approximately $1,800,000 more for tie renewals, $600,000 more for maintenance of timber bridges, $1,500,000 more because of preponderance of mileage in Eastern Canada where track maintenance costs $500.00 more per mile than in Western Canada, and $1,500,00 less because of lesser traffic density, than would be indicated b the Canadian Pacific per mile costs for Maintenance of Way and Structures, which he had derived.

Mr. Armstrong submits that it may be left to the judgment of the Committee as to whether the Canadian Pacific method of weighting for single and double track main lines, for branch lines, and for difference between Eastern and Western Canada costs is more accurate than the method suggested by the Canadian National witness, which assumes all lines to cost the same per mile regardless of location and whether single or double track main lines or branch lines.

He draws attention to page 486 of volume 33 of the Proceedings of the American Railway Engineering Association, which indicates that approximately 28% of the ties installed by the Canadian National and approximately 71% of the ties installed by the Canadian Pacific in 1930 were treated ties. On page 491 of the same volume it is stated that the Canadian National installed an average of 202 and the Canadian Pacific an average of 220 ties per mile of maintained track in 1930. It is, therefore, apparent that the Canadian Pacific estimated cost of ties required for the unified mileage is more generous than the Canadian National thought necessary for its own trackage in 1930.

The amounts charged to track maintenance in the Canadian Pacific estimate provide over $600.00 per mile more for maintaining track in Eastern Canada than in Western Canada. This is more generaus than the $500.00 figure suggested by the Canadian National witness.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120231

The remaining two items mentioned by the Canadian National witness are the $600,000 more for maintenance of timber bridges and the $1,500,000 less on account of less traffic density. These items together result in a saving of $900,000 per annum, of which no direct account has been taken in the Canadian Pacific estimate of savings under unification.

The Canadian Pacific is unable to find any real criticism of its figures in the Canadian National evidence in regard to savings in Maintenance of Way and Structures costs under unification.

Although the Canadian Pacific estimate of savings under unification was prepared on the basis of deducting estimated unified railway costs from the summation of the costs of the present separate railway rather than as an item by item estimate of the savings themselves, the resulting savings in Maintenance of Way and Structures may be approximately summarized as shown in more detail in Exhibit No. 78 on Page 1040 as follows:

| | |
|---|---|
| Line abandonment ..... | $ 7,005,000 |
| Abandonment of duplicated yard, station and other facilities on lines retained, and changed standards of maintenance on alternate lines not abandoned ..... | 5,391,000 |
| Superintendence ..... | 2,493,000 |
| Total saving ..... | $14,889,000 |
| of which the amount due to line abandonment is ... | 4,512,000 |
| leaving a total if no lines are abandoned of ..... | $10,377,000 |

It will be noted that the saving from abandonment of duplicate facilities and changed standards of maintenance on alternate lines not abandoned amounts to only $150 per mile of the unified mileage or a reduction of less than 10%. Had it been possible to determine the actual duplications in physical properties and to estimate directly the economies that would be possible, it is reasonable to expect that the economies from this source would have been at least as great as the amount included in the estimate.

ARCHIVES PUBLIQUES
CANADA

120232

(b) Maintenance of Equipment

The evidence of Mr. W. A. Newman, Chief Mechanical Engineer, Canadian Pacific Railway, is found on pages 802 to 821 of the Record. Mr. Newman shows that savings under this heading are effected by:

1. Reduction in locomotive and train car miles due to unification thereby reducing use of less efficient equipment and consequently necessity for maintenance.

2. Ability to maintain combined equipment under unification at lower average level of unit maintenance costs approximating Canadian Pacific level or possibly slightly less.

These two methods of securing reduction of expense apply in detail to the following accounts:

(1) Superintendence.
(2) Shop Machinery.
(3) Steam Locomotive Repairs.
(4) Freight Train Car Repairs.
(5) Passenger Train Car Repairs.
(6) Work Equipment Repairs.
(7) Other Expense.

In his evidence Mr. Newman explains that savings in superintendence are based upon the reorganization that would be effected under unified management as explained in Mr. Humphrey's evidence, the expense of the enlarged superintendence organization being related to the cost of superintendence of the Canadian Pacific less reduction of 20% for the more efficient management possible for unified system. The expenses for all the other divisions under which Maintenance of Equipment was considered are all directly related to the extent which equipment is actually used. This is first translated into locomotive, freight train car and passenger train car miles and these translated into a total cost to maintain equipment, using the cost of

maintenance per mile for the Canadian Pacific for 1930 - in the case of locomotive and freight train car repairs, 5% below such cost - as a measure of the level of maintenance cost at which it was considered equipment could be repaired for under the benefits of unified management.

The basis of setting up the repair costs for equipment under unification is taken most conservatively, there being very great possibilities of further substantial savings by the utilization to the best advantage of the combined rolling stock, shop and other facilities. The standardization of class and type of new rolling stock offers distinct advantages, and improvement in fuel consumption can be effected.

The Canadian National witness, Mr. J. Roberts, (pp 1207-1224) agreed that savings could be effected by a reduction in locomotive and train car miles and directed his criticism against the application of Canadian Pacific unit costs to the repairing of Canadian National equipment. Mr. Roberts justified the Canadian National increased repair costs as follows:

Locomotives:

(1) 13.45% greater average capacity of Canadian National locomotives.

(2) A greater number of classes of locomotives.

(3) The more extensive application of modernizing devices.

(4) Less performed mileage in level Prairie country.

(5) A repair cost level 7% under the average for Class I U.S.A. roads.

Freight Train Cars:

The more extensive application of modernizing devices.

Passenger Train Cars:

The Canadian National 1937 repair costs were lower.

than for the Canadian Pacific and therefore no savings were possible by the application of Canadian Pacific unit costs.

The comments of the Canadian Pacific witness on the Canadian National evidence in relation to the various arguments advanced are;

Locomotives:

(1) This is dealt with by the Canadian Pacific witness on page 808 of the Record. There has been no increase in the Canadian Pacific average cost of repairs per locomotive mile although the average tractive effort has increased 18% since 1925.

(2) Discounted in the Canadian Pacific estimate by retirement of less desirable locomotives and segregation of similar classes to the most suitable territory.

(3) The policy of modernization of the Canadian Pacific by increasing utilization and efficiency has assisted in maintaining repair costs at a uniform level.

(4) Offset by increased cost due to bad water conditions, resulting in little variation in repair costs.

(5) Canadian Pacific cost levels are more pertinent as conditions of operation are similar. Referred to by Canadian Pacific witness on page 808 of the Record.

Freight Train Cars:

Increased costs due to modernization are not permanent and only apply to a proportion of old equipment. This also assists in savings by providing a greater proportion of modernized equipment for use under unification.

Passenger Train Cars:

Unit repair costs for 1937 for both roads must be disregarded as they are inflated by a proportion of air-conditioning expenses. The Canadian Pacific estimate is based on an average cost level that it is considered can be worked to under unification. Referred to by the Canadian Pacific witness on page 812 of the Record.

(c) Savings in Rail Traffic Expenses

Mr. Jefferson referred (pages 849 to 865) to the estimated savings in traffic expenses - based on year 1930 - $5,775,517 or 38% (Exhibit 60, page 907 of the Record).

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

C 20235

Canadian National Railways estimated a saving of $6,800,000 or 45% (Exhibit 60, page 907 of the Record).

Mr. Jefferson stated that unified operation would permit of extensive consolidation of headquarters, regional and district supervisory offices and would eliminate economic waste in competitive effort of agencies and advertising. Substantial reductions in miscellaneous expenses, such as dues to Traffic Associations, expense of Development and Industrial Bureaux, stationery and printing, would be possible.

Mr. Jefferson stated precise savings on 1937 basis could not be calculated accurately without a complete resurvey, but it was safe to predict that 35% to 40% would be a reasonable measure of savings.

Mr. Long of the Canadian National Railways (pp 1230-40) was of the opinion that this could not be accomplished, having regard to the savings which had been effected by the two railways in 1937, compared with 1930.

Mr. Jefferson is still of the opinion that notwithstanding savings which have been effected since 1930 there is no reason to modify the statement made by him that under unification the traffic expenses for the year 1937, for the two roads operated separately, could be reduced from 35% to 40%.

(d) Transportation - Rail Lines

Colonel O'Brien's evidence on this subject, commencing at page 865, dealt with the money value of the reduction in train and car miles previously referred to, and also covered savings to be effected by reductions in superintendence and despatching, elimination of duplicate station service, elimination and consolidation of duplicate yard service, and

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120236

included reduction in train service expense by reason of fewer train miles with smaller costs for fuel, water, lubricants and other train supplies and expenses. The total saving under this heading was shown as $23,994,376.

Mr. Appleton and Mr. Walton offered criticisms of Colonel O'Brien's evidence. Mr. Appleton (pages 1986 to 1905) took exception to the suggestion of re-routing all traffic now handled by the National Transcontinental and claimed that a loss of $727,000 per year would result. Colonel O'Brien draws attention to the fact, however, that on a previous occasion Mr. Mallory, Executive Assistant to the Chairman and President of the Canadian National Railways, stated that the line was not equipped for a traffic movement of any serious dimensions and that Mr.Appleton gave evidence before the Duff Commission to the effect that not much traffic was being handled on the line and that a study was being made to put in some sort of highway service to relieve the railway of the expense of operation. Mr. Hungerford at page 1071 of the Record intimated that it would be economically desirable to abandon operation of the National Transcontinental. Colonel O'Brien states that traffic between Montreal and Saint John can be handled at slightly lower cost via the Canadian Pacific shorter route, and that Mr. Appleton took into account only the grade and not the distance.

Mr. Walton's criticism (pages 1167 to 1183) was that the Canadian Pacific estimate indicated a transportation ratio of 33.9%, which in the light of United States experience was not realizable. Colonel O'Brien points out, however, that Mr. Walton has made a basic error in computation and that the anticipated transportation costs of the unified system would be 37%, or excluding Telegraph and Express 35.8%. Mr. Walton's evidence indicates that reduction to 35.8% is entirely realizable.

Mr. Walton also criticized the proposed consolidation of Divisions, the cost of despatching trains, the reduction in station service costs, the study of yard costs and the routing

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120237

of interstate traffic. Colonel O'Brien suggests that these criticisms arose mainly from a misapprehension as to the methods of computation followed by the Canadian Pacific. For example, yard expenses show a saving of $3,072,042. This is attributable to studies made by Superintendents in their respective territories, Mr. Walton understood a percentage was applied to all yards and made reference to the Niagara Frontier and the Grand Trunk Western. These points do not come into the Canadian Pacific calculation in any respect, and the only points considered were those in Canada where the roads maintain duplicate facilities.

Mr. Walton implied that the Canadian Pacific intended to increase the use of United States coal. Colonel O'Brien states that this is incorrect and that the savings estimated presupposed the distribution of coal from the present sources.

(e) General Expenses

Mr. Liddy for the Canadian Pacific supported this item (pages 893 to 901). He stated that these items covered costs of a general nature chargeable to the railway undertaking as a whole. Each railway has an administration which is an almost complete duplication of the other in its functions. The consolidation of these executive positions would permit of extensive economies. Much time and effort is entailed in numerous conferences and committees between the two companies, all of which would automatically disappear. There were also numerous examples of overlapping effort and both railways kept practically identical books and statistics. He pointed out that salaries and expenses of clerks and attendants of the chief officers were also duplicated, and while more individual clerks would be required to run the office in which a larger volume of work was handled, a substantial reduction in staff could be

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120238

effected by the increased opportunity for specialization of work. Clerical work in settling accounts between the two railways also involved considerable expenditure.

Mr. Liddy stated that the economies effected under distress conditions since 1932 were almost of an entirely different nature to those contemplated under the study of unification savings. On the assumption that when revenues returned to the 1930 level these items of general expenses would return to 90% of the 1930 level, the estimate of 1930 would be reduced by $428,900.

Mr. Liddy believed the abandonment or non-abandonment of lines would have very little effect on general expenses.

## MISCELLANEOUS INCOME ITEMS

Mr. Liddy's evidence under this heading (pages 902 and 903) showed that the saving was estimated at $211,000, comprised of a saving of $50,000 in hire of equipment by more rapid return of equipment owned by United States lines due to shorter home routing, and a saving of $161,135 from consolidation or abandonment of separately operated properties such as the railway company's abattoirs in Montreal and the electric railway between Paris and Port Dover, Ontario.

## BRITISH COLUMBIA COAST SERVICES

Captain R. W. McMurray, Manager, British Columbia Coast Steamship Service, Canadian Pacific Railway, dealt with this item (pages 965 to 970). His evidence was that the item of $450,000 involved the elimination of operation of two vessels in the Alaska service, the traffic being carried by the more

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120239

frequent operation of the remaining vessels. It also contemplated the consolidation of car barge services between the mainland and Vancouver Island and the elimination of one mainland terminal. Consolidation of staffs would also involve savings.

Mr. Warren for the Canadian National expressed the belief (pages 1103 to 1110) that in 1936 and 1937 the Alaska passengers could not have been handled by less than the entire six ships operating. The growth of tourist business to Alaska would continue. Mr. Warren admitted, however, that he had not worked out whether by a re-arrangement of ships on the Alaska route and by continuous operation two ships could be eliminated. The elimination of Port Mann as a terminal for car barges would mean an additional car mileage due to the rail haul from Port Mann to Vancouver Harbour.

Part of Mr. Warren's criticism of Captain McMurray's evidence arose from a misprint in the Record on page 968, where the clause "This would give an annual saving of $104,000 with the elimination of the extra services and the elimination of one barge fleet" should read "the elimination of one barge slip."

Captain McMurray points out that as to the additional rail haul claimed by Mr. Warren, the Canadian Pacific assumed that under unification the cars would not have been routed to Port Mann.

Mr. Warren argued that traffic routed to Vancouver instead of Port Mann would have to pay harbour dues at Vancouver, while Port Mann is free. Actually, this would be more than offset by the savings due to elimination of Port Mann which is maintained at the expense of the Canadian National Railways.

TELEGRAPHS (RAILWAY AND COMMERCIAL)

This subject was dealt with by Mr. D. L. Howard, Assistant to General Manager, Communications, Canadian Pacific Railway (pages 945 to 965)

He stated that the estimated net saving in commercial service was $798,133, to which was added a saving of $149,635 for railway service telegraph, making a total of $947,768 net saving due to unification of telegraph services. Shortly after this estimate was made a joint committee of Canadian National and Canadian Pacific Telegraphs officers was set up and their agreed joint estimate was $1,011,000. That committee also estimated that savings from co-operation of the two telegraph companies would amount to $220,000 per annum.

Mr. Howard informed the Committee that since these figures were prepared there had been no permanent change in conditions which would reduce the estimated savings. On the contrary, there have been changes which would materially increase the figures. For example, large capital expenditures have been made for duplicate broadcasting equipment and stock ticker service.

He added that during the five-year period 1933-1937 a total of 335 employees left the Canadian Pacific Communications service on account of retirement, resignations or death. As the total number to be released under the 1932 report was 445 and as it was jointly estimated it would take five years to put the two systems together the combined attrition in the two companies would more than take care of the labor situation during the process of unification.

Mr. Howard also referred to the apparent difficulties in connection with the Montreal Telegraph lease which had arisen when unification was being considered, and at the close of his evidence (p964)a letter from the Presi ent of that Company was read

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120241

by Colonel Biggar, which indicated that these difficulties could be overcome.

No exception to Mr. Howard's evidence was taken by any subsequent witness.

## EXPRESS OPERATIONS

Mr. T. E. McDonnell, President of the Canadian Pacific Express Company, showed in his evidence (pages 720 to 736) that the method of arriving at the estimate was to list competitive express agencies and determine how much should be added to the agency expenses of the Canadian Pacific to take care of the volume of traffic handled by the Canadian National. Divisional supervisory offices were then gone into, adding to Canadian Pacific expenses what would be required for a consolidated company. The same method was used as to headquarters offices. The final result was a saving of $1,450,000.

At about the same time a separate estimate was made on the basis of savings with combined express companies without unification of railways. This was presented to the Duff Commission and amounted to $900,000. Following that a joint co-operative express committee agreed that such savings would be $1,000,000.

Mr. McDonnell stated that if no line abandonments were made the estimate of $1,450,000 would be reduced by $135,000.

He added that the Express Company's staff records show that in the next five years the number of retirements, resignations, dismissals and deaths on a life-expectancy basis will be greater than the number of displacements from unification.

No evidence was produced which was at variance with Mr. Mr. McDonnell's submissions.

COLONIZATION, DEVELOPMENT AND INSURANCE

Mr. S. J. M. Liddy gave evidence as to this item (page 903), which shows a saving of $300,000. He pointed out briefly that the duplication of the work of the departments dealing with the above matters was self-evident and that their consolidation would effect economies in administration.

Mr. Cooper (pp. 1161-2) believed that the item of $200,000 for Immigration, Colonization and Development should be eliminated on the ground that the Canadian Pacific used part of this expenditure in connection with its land operations and ocean steamships activities, and further that the Canadian Pacific had heretofore charged the entire Colonization and Immigration expense to Land Surplus and not to Railway Operating Expense. Mr. Liddy points out that these arguments have no bearing on whether or not economies would arise in this item through unification. The only question involved is whether or not unification would permit a reduction in expenditures now being incurred for this purpose by the two railways. Mr. Cooper argues that the decrease in colonization activities since 1930 has narrowed the field for economies. However, Mr. Liddy's submission is that with a return to 1930 level of business, expenditures on Immigration and Colonization for separate operation would again increase, and unification would permit of smaller expenditures.

INTEREST ON RELEASED STORES AND TRACK MATERIAL

Mr. Liddy dealt with this item on pages 903 and 904. The saving of $1,700,000 was an Engineering estimate of the net salvage value of material that would be released on the abandoned lines, and shows also a reduction in materials and supplies made

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120243

possible by consolidation of supply depots. This makes possible a reduction on released stores and track materials of $34,000,000, which, at five per cent interest, gives an annual saving on the investment of $1,700,000. Mr. Vaughan questions this estimate on the grounds that permanent reductions had already been made in Stores and Track Materials. However, the Canadian Pacific officers are still of the view that the reductions which have been made cannot be regarded as permanent, and that the estimate fairly represents what can be saved under normal conditions.

## INTEREST ON REDUCTION IN INVESTMENT IN EQUIPMENT

Mr. Liddy stated at pages 904 and 905 that the saving of $4,650,000 was predicated on the fact that the quota of locomotives and cars required to operate the unified system would not be as great as for the two systems operated separately since there would be a reduction in train and car mileage. The released units were appraised at average book values, and the saving shown was the interest on the reduction in investment so calculated.

Mr. Liddy added that as the unified railway would not have to purchase new equipment for a period, the real measure of savings would eventually be the cost of new equipment, not an average cost on book figures. Using the higher current values, a saving of $7,600,000 would be made. In other words, on a realistic basis the Canadian Pacific estimate was $3,000,000 too low.

Mr. Vaughan argued (page 1242) that in view of the substantial reductions made in the equipment inventories in both companies since 1930 the economies would not be possible to the extent indicated. Mr. Liddy's view is, however, that the reductions since 1930 have only an indirect bearing upon the further reductions which would be possible should the railways be placed under unified management. In the original estimate the savings in units due to unifying the systems were taken merely at the locomotive and car mileage percentage reductions possible under

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120244

unification . This method of calculation made no allowance for the greater utilization of equipment possible under the unified management, Therefore, notwithstanding the reductions which have taken place, Mr. Liddy believes there is no reason to consider that the number of units which would be released through unified management should be altered in any manner.

## ESTIMATED SAVINGS FOREGONE IF MILEAGE NOT ABANDONED

At the end of Mr. Liddy's evidence (pages 905 and 906) he filed Exhibit No. 70 (page 943) which showed that if none of the 5,013 miles were abandoned but were instead continued in operation with a tri-weekly train service, the total cost of maintenance and operation of this mileage would be $7,248,798. If the mileage included in the Canadian Pacific study but not in the Canadian National study of unification savings were continued on a tri-weekly basis the cost of operation and maintenance would be $4,213,090. These calculations were made on an estimated cost per train mile of $1.75.

Mr. Liddy emphasized the fact that in these estimates no credit had been offset against the total cost for any revenue earned by the operation of the trains. Should any of the lines included produce substantial earnings, these earnings would more than offset any miscellaneous items which might not have been included in the $7,248,798 cost of train service,

Mr. Hungerford was questioned by the Committee (page 1070) as to his views on this estimate. He expressed the view that the amount stated to be the cost of maintenance and operation was too low, but admitted that this was an off-hand opinion.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120245

Mr. W. M. Neal, Vice-President, Western Lines, Canadian Pacific Railway (pages 979 to 1003) presented impressive evidence confirming the care and accuracy that governed the preparation of the Canadian Pacific estimate. He emphasized the fact that the methods used were those employed from day to day in the conduct of the Company's business, absolute reliability being an essential.

To obtain a clear picture of the total revisions made by the Canadian Pacific witnesses in the original estimate of $75,373,000, the itemized statement read into the Record by Mr. Neal at pages 983 and 984 is of value. It shows that the total deductions from the original figure made in the light of subsequent experience are now calculated at $4,801,000, whereas the total increases amount to $9,056,000. Taking into consideration all the evidence and bearing in mind that the estimates of the various witnesses are not by any means exhaustive as to the possibilities of savings, it may be said with confidence that savings due to unification on the 1930 level would not be less than the figure presented to the Royal Commission.

It was also pointed out at page 985 of the Record that under 1937 conditions the estimate of savings would be reduced to $59,740,000, assuming that the savings would be reduced in proportion to the reduction in expenses. Mr. Fairweather, at page 206, expressed the opinion that the savings would be reduced in proportion to the reduction in expense.

Extracts from the evidence of George M. Harrison, one of the labour members of the Committee of Six appointed by the President to study the transportation situation, given before the Committee on Interstate Commerce of the United States Senate during hearings on Bills to amend the Interstate Commerce Act.

---

Page 34 "Our experience in the past has been that when there have been railroad consolidations, there have been increases of fixed charges and increases of burden. We have found that one railroad would lease another, would guarantee the interest on the bonds, would stand behind the principal, and would guarantee the interest on that stock. We think that is wrong. Senate bill 2009 covers those principles; and I think they are good principles and undoubtedly are in the public interest and are necessary.

"Now, we realize that to the extent there are unifications made and the extent that they can be shown to be in the public interest, railroad labor will be adversely affected. So we say that the Interstate Commerce Commission shall have the authority - and that is in the report - to provide for reasonable provisions for the protection of labor. The Commission now has that authority, but it is disputed by the railroads. The Committee of Six agrees that labor shall be protected in those measures authorized by the Commission.

"In the report of the Committee of Six we do not undertake to lay down the specific, detailed protection that should be accorded labor by the Commission, but we were much of the opinion that in prescribing the protection the Commission would undoubtedly follow what seems to be generally the practice; and that is represented in an agreement that now exists between substantially all of the railroads and all of the employees' labor unions. It provides a schedule of benefits and protections.

"So to that extent I think the interest of labor will be protected, the public interest will be protected, and the opportunity to eliminate some bad situations in the railroad transportation machine will be available.

"Recently we have had some railroads that have had to quit doing business; they just could not survive on the volume of traffic. In such a case, probably a merger could have been made in the public interest; it would have been a good thing for some other railroad to take it over; but because of the restrictions and the difficulties involved, nothing could be done about it. I should look for a strengthening of the railroad situation,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120247

Page 34 cont'd

when those unsound segments finally, through the process of elimination, are gotten out of the picture. I think that will strengthen the whole railroad transportation machine."

Page 36:

"Now, that noble experiment of coordinating the physical facilities was probed and enjoyed for 3 years under the Emergency Railroad Transportation Act, to which I made reference earlier in my testimony, through the office of the Federal Coordinator of Transportation."

"The Committee of Six, based on their practical experience, have said that there is nothing to that suggestion of coordination of the physical facilities, and the Committee of Six has endeavored to point out that there are so many difficulties involved and so many conflicting interests that there is not much that can be done in that direction, and the committee points out particularly the effect upon communities and the effect upon service and competition and the impossibility of accommodating the interests of the various carriers who may be called upon to surrender some advantage they possess in a given situation to bring about physical coordination."

"Then our primary objection to the whole theory is in principle, as I indicated earlier today, that we have this tremendous investment in the railroad plant, and we much prefer to try our hand at finding some way to profitably employ the existing plant rather than to reduce it in undertaking to continue the investment without its productive use, together with a possibility of expanding other transportation facilities, and I wanted the committee to know that railroad labor is absolutely opposed to the theory and practice of coordination. We rather believe, as practical men, that if there is anything in this situation, the way to accomplish it is through such consolidations as can be shown to be in the public interest, thereby getting a real solution of that difficulty. "

"Of course, if coordinations may be subsequently written into this bill over the objections of railroad labor, why, we would anticipate that the committee would look with favor upon the same considerations and protections being accorded the interest of labor that might be adversely affected pretty much along the same general approach as we had, provided that labor is protected in consolidations when they are made."

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120248

Page 37:

"If you can take these financially weak railroads that are operating in a territory where rail transportation is essential and still the traffic is light, and have some of the stronger roads absorb those weak roads, you will be doing a real job for transportation and for the employees and for the public, and that is the real scientific approach to a solution as we see it.

"Now, if you get around in the various terminals and undertake to coordinate the physical facilities, you do not remedy the trouble that bothers you. The trouble that bothers you is the unfavorable financial results, and there is not enough involved in the possibilities of coordination to even begin to scratch the surface of a remedy. That is not only my opinion as a representative of labor but it is the opinion of the managers of the industry." } 3

Page 38:

Senator Reed: "Having run into your brotherhoods at different times in my career, I think I understand their approach, which again is an approach of maintaining employment as stable as possible but if in the working out of this problem it became necessary or desirable to have unification and if the men who were displaced by unification or consolidation were taken care of by a reasonable adjustment, such as you now have with the management, would that not largely take care of the labor situation?"
Mr. Harrison: "I think in the main, Senator --"
Senator Reed: "Thank you, very much.
Mr. Harrison (continuing). -"that it protects labor."
Senator Reed: "Thank you, very much. We all want to protect labor. There is no unfriendliness among us. I am one, if you please, who believes there is no answer to this railroad problem except consolidation or, prior to consolidation, a very substantial unification of facilities, so as to reduce the operating expenses and the cost of service down to a point where the railroads can sell more service."

## QUESTIONS FOR MR. HUNGERFORD

120249

QUES. 1: You expressed to the Royal Commission the belief that there would be no way of dealing with the railway problem except a larger volume of traffic for the railways. Do you still hold this opinion?

QUES. 2: Do you not believe that important savings could be made, for example, by substituting one supervisory organization for two?

QUES. 3: Do you not agree that it would be possible to increase net earnings by rerouting and consolidation of traffic, so as to use the most advantageous lines, and use engine capacity to the maximum?

QUES. 4: Do you not agree with the late Sir Henry Thornton, in his evidence to the Royal Commission, that in this way, even if no lines were abandoned, great economies could be obtained by lowering the standard of maintenance on one of two duplicate main lines?

QUES. 5: Do you not believe that increased earnings for the two railways could be obtained by substituting use of their lines for that of connecting railways, as Mr. Jefferson pointed out?

QUES. 6: Do you not believe that important economies could be obtained by complete consolidation of telegraph services?

QUES. 7: Do you not believe that savings could be made by the abolition under unified management of duplicate ticket offices?

QUES. 8: In your evidence to the Royal Commission you said that savings in the amount of $60,000,000, which you mentioned, could not be obtained "under all the conditions" in this country. Were you referring to the possibility of local and sectional discontent?

QUES. 9: Assuming that these considerations are not a part of the question as it is put to you, and that you are only asked to say how much could be saved by unified management of the railways, without depriving communities of adequate service, or neglecting the rights of labour, where would you put the figure of possible savings under unified management?

QUES. 10: Would you suggest that savings by amalgamation of head offices, rerouting of traffic, greater use of lines of the Canadian railways, abolition of duplication of ticket offices and consolidation of telegraph services would produce any serious unfavourable reaction in Canada?

QUESL 11: If so, why? That is, do you believe that no savings should be made because each item of savings must affect the interest of some individual?

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

QUES. 12: Is it for this reason that you told the Royal Commission that, given a free hand, you would prefer the National Railways to be in the hands of a private corporation?

QUES. 13: Mr. Fairweather stated that the unification of express services was not desirable, and that greater savings than $900,000 per annum could be made by the Canadian National by unifying the operations of express and freight departments. Do you agree with this?

QUES. 14. Have you read the evidence of Mr. T. E. McDonnell, to the effect that this latter plan would not produce real economies?

QUES. 15. If Mr. Fairweather's theory is correct, why has it not been applied in the Canadian National?

QUES. 16. Are the policies of the Canadian National affected today by political pressure of any sort?

QUES. 17. Why does the Canadian National still maintain duplicate facilities at certain points - two round-houses, for example, at the Head of the Lakes, and two main shops in the Winnipeg area?

QUES. 18. Are you in favour of pooling of all passenger train operations, as recommended by Mr. Fairweather to the Royal Commission and to this Committee?

QUES. 19: Would you be in favour of Mr. Fairweather's suggestion to appoint a body to force co-operation on the railways?

QUES. 20: To the extent that either of these plans produced economies would not the effects on community and labour interests be the same as though the economies had been obtained by unification?

QUES. 21: If political pressure is the reason why economies cannot be made by unification, how would the over-riding authority, suggested by Mr. Fairweather, meet this condition?

QUES. 22: Mr. Fairweather suggested to this Committee that it might be necessary to limit the powers of the Board of Railway Commissioners, in order to obtain the abandonment of lines in some cases. Are you in favour of this?

QUES. 23: Is it not a fact that the Board of Railway Commissioners might refuse permission to abandon a line as a result of independent applications by the separate railways, because adequate provision was not made for a substitute service, while the Board might agree to abandonment of the same line under unification?

QUES. 24: Have any applications under co-operation been refused?

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120254

QUES. 25: Do you consider it within the duties of officers of the Canadian National Railways to consider the political effect of economies?

QUES. 26: Do you not believe that unification permits of economies which could not be made under co-operation?

QUES. 27: What about the duplicate Head Offices?

QUES. 28: Have you examined Sir Edward Beatty's statement that present labour attrition exceeds the rate at which staff reductions need be made under unification?

QUES. 29: Do you believe that unification, as recommended by Sir Edward Beatty, to the extent of saving $75,000,000 per annum in normal times, would involve the throwing of thousands of workers out of employment?

QUES. 30: If so, can you give us figures to disprove Sir Edward Beatty's calculations?

QUES. 31: Were you familiar with the process of preparing the estimate of $56,000,000 savings from unification submitted to the Royal Commission?

QUES. 32: Have you any reason to believe that this estimate was not prepared as a serious one?

QUES. 33: Was it not prepared on the initiative of Sir Henry Thornton, before the Royal Commission was appointed?

QUES. 34: Was not the study of possible abandonment of 2,434 miles of railway initiated by the Canadian National, before the suggestion had been made by Sir Edward Beatty, or the Royal Commission?

QUES. 35: If political considerations, such as preventing men from being thrown out of work, affect the operations of the Canadian National, would you care to fix a figure of their effect? That is, would you care to say how much money the Canadian National spends in a year because its officers feel that it is their duty to do more than run a railway economically?

QUES. 36: In view of your opinion as to possibility of savings by eliminating duplicate head offices, by rerouting and consolidating traffic, by lowering the standards of maintenance of redundant lines, by consolidation of telegraph services, and by a greater use of Canadian instead of foreign railway mileage, are you prepared to endorse Mr. Fairweather's statement that only $10,000,000 per annum could be saved by joint action of the railways under coercion?

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

10252

QUES. 37: Were you given the task of co-ordinating railway services in Canada, so as to give the country adequate railway service, without any instructions to consider political effect, could you not save much more than $10,000,000 per annum?

QUES. 38: The Canadian Pacific estimate of savings is based on the assumption that 1930 would be a normal year. What do you think of this assumption?

QUES. 39: If it is too much to hope for the restoration of traffic levels such as those in 1930, what hope is there of increasing traffic placing the Canadian National on a paying basis?

QUES. 40: If it is true that 1930 levels may be exceeded, would not the savings from unification be greatly increased?

QUES. 41: Is it not a fact that, at traffic levels such as would make the Canadian National a paying undertaking, the possible savings from unification would be very large indeed?

QUES. 42: If you have no other suggestion to make for solving the problem before this Committee, do you see any reason why the Government of Canada should not authorize representatives to discuss unification with the Canadian Pacific Railway; to obtain an agreed estimate of the savings which might be made; and to work out a plan of division of savings which could be submitted to Parliament?

120253

Paragraph 1. Mr. Hungerford implies that the Canadian National officers gave evidence that the Canadian Pacific estimate was "unsound and largely impracticable of accomplishment". Actually, the Canadian National officers' criticisms of the Canadian Pacific estimate dealt with details - except as far as the general criticism was offered - that independent economies of the both systems had already made many of the savings contemplated by the Canadian Pacific. The Canadian National officers, in their evidence before the Committee on the Canadian Pacific estimate of savings, did not discuss the practicability of the savings suggested by the Canadian Pacific.

Paragraph 2. No general criticism of the savings was offered distinguishing between theoretical and practical savings. Mr. Hungerford did offer a statement of opinion on this point in his own evidence. The Canadian National officers, in their detailed examination of the Canadian Pacific estimate, confined themselves entirely to offering figures of the savings under various headings which, in their opinion, were nearer correct than the figures offered by the Canadian Pacific.

Paragraph 3. Mr. Hungerford, despite the long debate on the question, now admits that he is not making a rebuttal. He argues (a) that he cannot make one because the Canadian Pacific did not say precisely where the physical change would be made which permit the savings. The Canadian Pacific objected to doing this because the statement that, for example, a certain train service would be eliminated, or a certain shop closed, would create local prejudice against them. It should be remembered, of course, that the Canadian Pacific was, for example, merely saying that so many train miles of certain duplicate services could be eliminated, or so many duplicate shops closed. They had to base their estimate on actual studies, but the savings could equally well be made by eliminating the other train services, or closing other shops than those which they were considering. By giving details of location of their physical changes, they would be exposing themselves to criticism,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

U 20254

although the unified management might make equivalent savings by alternative changes. Mr. Hungerford's reason for not making a specific surrebuttal to the Canadian Pacific's specific rebuttal of Canadian National criticisms does not seem to have any point. Mr. Hungerford argues (b) "that the test of the value of the $75,000,000 is not primarily a question of figures, but is one of the practicability of what is proposed to be done". The Canadian National officers were called, as Senator Dandurand so often said, to test the figures of the Canadian Pacific estimate, and departmental officers corresponding to the witnesses of the Canadiam Pacific were called for this specific purpose. What Mr. Hungerford is now saying is that they did not accomplish this.

Paragraph 4: Mr. Hungerford brings up the 5,000 mile abandonment, and again repeats the statement that $16,366,000 per annum savings were dependent on this. Sir Edward Beatty pointed out (Page 582, Proceedings, 1938) that "the figure included the net savings in maintenance of equipment and transportation expenses due to rerouting traffic and cancellation of trains on these lines, although much of this saving would be accomplished following unification whether the lines were abandoned or not". The Canadian Pacific later estimated actual reduction in the estimate of $75,000,000 which would result if no line abandonments were made as $7,240,000. (Page 906, Proceedings, 1938).

Paragraph 5: Mr. Hungerford objects to the Canadian Pacific quotation of Mr. Fairweather's estimate of $56,230,000, on the ground that Mr. Fairweather has stated that "much of what was discussed therein was impracticable of accomplishment". This might be contrasted with Sir Henry Thornton's testimony to the Royal Commission (Pages 1038-1039, Proceedings, 1938), as follows:

> "Amalgamation under some unified form of administration will, in theory, produce the maximum of economies of which a material proportion will doubtless fructify. It has been estimated that these economies would yield a return of something like $60,000,000 per annum, increasing progressively from the first year, and reaching the figure named perhaps at the expiration of a five-year period. Whether all of this sum can be salvaged by amalgamation is arguable, but whatever it may be it should not be ignored in the discussion, and it would represent after its full attainment a continuous and annual return."

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120255

His reason for discarding it as a solution ~~is~~ that it was "politically impracticable", not that it was theoretical and unattainable.

Paragraph 6. Mr. Hungerford says that the Canadian Pacific estimate of savings is "based upon drastic reductions in the quantity and quality of railway service", and this language is repeated, in one form or another, throughout his letter. On this point Mr. Hungerford is merely confusing two types of economy. Since 1930 both railways, acting independently, have made substantial economies, and since the two railway systems offer duplicate services in almost all parts of the country in competition with one another, the greatest field for independent economies has been in those branches of railway service which ~~is~~ are non-competitive. The reason is obvious, since, if saving is made in competitive services, the company making the economy suffers in the competition for business. On the other hand, unification economies, estimated to amount to only 15% of the operating expenses of the combined systems, arise solely in those fields of railway activity which are competitive and duplicating. Therefore, the fear of drastic reduction in the "quantity and quality of service", is far less in the case of unification economies than in the case of unilateral economies already made in non-competitive fields. A typical unification economy would be the pooling of Toronto - Montreal services. This has certainly not resulted in a drastic reduction of either volume or quality of service. Another example would be the opportunity available to provide the City of Montreal with unified terminal facilities. We might contrast with these the economies made since 1930 by the reduction of the volume and quality of service on non-competitive branch lines by both companies.

Paragraph 7: Mr. Hungerford argues that the Canadian Pacific rebuttal is simply playing upon words when it says that Canadian Pacific costs "were not applied to Canadian National operations, but to a new unified system". There is no playing ~~of~~ on words. Unification of the railways would not be, as Mr. Hungerford

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

J 20256

says, "a mere change of names". It would be a radical change of conditions, and in the cases where the Canadian Pacific estimate used Canadian Pacific costs as a basis, the assumption was made that a unified system would have operating conditions at least as favourable as those of the Canadian Pacific.

Paragraph 8: Mr. Hungerford argues that the Canadian Pacific is wrong in saying that the differences in physical characteristics, traffic and operating problems between the two systems "are compensating or in total are unimportant". He bases this on his statement that the Canadian National "has special problems which confront it in rendering pioneering and national transportation service to much of Canada". The Canadian Pacific has services of this kind to render also, but the important point is that unification savings are not based on any assumption that pioneering and national transportation services will be reduced or abolished.

Paragraph 9: Mr. Hungerford brings up the argument that unification would result in disadvantage to the national welfare, because it would entail the use of less manpower than under existing competitive conditions. This is a statement which defies all accepted economic principles. If it were true, the country would be better off if it took twice as many farmers to producerour present crops, and twice as many workers to give us our present volume of manufacturing and mineral production. It obviously cannot be correct, and it would be immeasurably better for Canada to have railway labour stabilized at a level which the industry can support than to maintain an artificial employmemt level in unproductive and wasteful effort. The accepted principle that suitable compensation would be provided to displaced employees during the period of readjustment should dispose of this point.

Perhaps the most interesting point in all Mr. Hungerford's letter is that at which he says that "public interest can never be reduced to the confines of an estimate prepared by railway technicians, however expert they

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120257

may be, but, on the contrary, must necessarily be determined by public authority". In what capacity does Mr. Hungerford appear in this question? Is he a railway technician? In that event, his dicta of what is practicable or impracticable in the public interest must be judged by his own standards as to the limits of what railway technicians are capable of doing. It is as railway technicians that he and his officers criticized the evidence of Canadian Pacific officers. If, on the other hand, Mr. Hungerford is offering opinions as to what the national policy should be, he appears to be usurping the functions of Government and of Parliament.

MEMORANDUM

120258

1. "To many Canadians it will doubtless be news that the Canadian National Railways have no operating loss and that the deficits, about which so much has been heard and which admittedly have such a serious effect upon our national finances, pertain entirely to interest charges due public investors and relate for the most part to former privately-owned lines which the government took over and continued in operation in the national interests."

Comment

(a) A play is made on term "operating loss" which is computed before taxes, equipment rents and other similar items which are an integral part of the results of running the enterprise. Taking these into account in 1938, the Canadian National Report (Page 13) shows a deficit of $1,019,255 before Fixed Charges, which totalled $53,451,741. The total cash deficit was, therefore, $54,470,096 before any interest on the money invested by the Dominion in the so-called "Proprietor's Equity"; i.e., on the large investment by the Dominion Government in Government Railways plus moneys advanced to the Canadian National but no longer charged as part of that system's liabilities. These items amount to a very large sum which, in essence, represents borrowings by the Dominion Government from the public on which the Government has to pay interest, although this interest is not annually charged as part of the Canadian National deficit.

(b) The privately owned lines were taken over on the strength of the recommendation of the Drayton-Acworth Commission, which stated (page lxxii):

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120259

"We have recommended that the Intercolonial and the Transcontinental lines should be handed over free of cost for the reasons which we have given above. But we think it should always be borne in mind, both by the trustees and by the public, that the real capital of the new system includes the cost of these lines. In other words the trustees are responsible for a return, not merely on the capital of the companies' railways acquired, but also on the capital invested in the Government railways. For though the Government railways have no separate capital account, properly so called, their construction has cost the people of Canada $276,000,000, and the people of Canada are paying interest on this amount every year out of the general taxation of the country."

Not only has this recommendation of the Royal Commission been ignored in the present accounting system of the Canadian National Railways -- since no interest is charged by the Government on the former Government Railways now included in the system -- but Senator Dandurand's language would indicatethat he wishes the public to believe that it is a satisfactory result for the Canadian National to meet actual operating expenses, and return no interest on any part of the cost of the great physical property of which it has the use.

2. "It is important also to bear in mind that the interest referred to is guaranteed by the government of Canada and is a continuing obligation regardless of what disposition be made of the National lines."

Comment

That is true but it is noted that concurrently the suggested method whereby large economies could be effected to reduce the burden of these guarantees is rejected.

3. "The Committee was impressed with the large measure of public service rendered by the Canadian National Railways in the interests of pioneering and development, the cost of which is included in the deficits referred to." "It has been utilized as an instrument of national development and obliged to operate extensive mileage for reasons of national policy."

Comment

No evidence was produced to the Committee to show that the National Railways carry a much greater burden of light traffic lines than do other railways. The Duff Report (page 33) shows Canadian National light traffic

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120260

mileage as 42.92% of the total, whereas the Canadian Pacific had 36.82% of similar lines. In view of the respective net earnings of the two systems, it would appear that its light traffic mileage is an inadequate defence of operating results of the National, and, in any event, the fact that the system has a large percentage of lines of poor earning capacity would appear to be an argument for, not against, a serious effort to reduce the costs of operating it.

So much has been said of the "pioneering and development" services of the system that it should be pointed out that no analysis of the amount of these services is or could be made available. It is a fact that much of the excess of duplicate railway services in Canada results from the construction and present operation of too many main through routes to handle the traffic available. On mileage of this nature, some pioneering and development may have occurred, but it is incorrect to give the impression that there is a prospect that such lines may reasonably expect to become profitable as pioneering and development in their territory increases. The Canadian National lines from Red Pass to Prince Rupert; from Red Pass to Vancouver; its two main lines from Winnipeg east to Long Lac; the line from Long Lac to Capreol; and the National Transcontinental line from Quebec to Moncton are not likely to become profitable ventures as a result of pioneering and development in their territories. In short, the theory of pioneering and development as a national service which justifies independent operation of the Canadian National System has no foundation -- especially in view of the fact that there is no more reason for any lines serving pioneer areas to be abandoned under unification than there is for them to be abandoned under present conditions. The existence of lines of a pioneer type, as far as this existence is real, can be better guaranteed if the Canadian National net earnings be increased, than under present conditions.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120261

4. "It is felt that it would be disastrous policy to attempt to eliminate railway deficits by the withdrawal of essential railway facilities."

Comment

The withdrawal of essential railway facilities is not a part of any plan of unification of railways. In any event, no such withdrawal could occur without approval of the Board of Transport Commissioners.

5. "The Committee was impressed also with the great potential value attaching to National lines which are located so as to make possible the development of the immense mining and forest areas of Northern Canada. The National Railways was splendidly located for the future development of the Dominion, and if the evidence taken by the Committee should do nothing more than direct attention to the potential value of the National Railways to the future of Canada it will have served a useful public purpose."

Comment

No witness was asked to put a figure on the amount of this potential value or date when it would be realized upon so that it might be clear whether by itself it would be sufficient to relieve the national burden. As, however, it will not be destroyed, it is not a proper argument for avoiding increasing the value of all the National Railway operations by the other means which have been suggested.

It is particularly important to note that the mere fact that development of natural resources occurs along the lines of the Canadian National in the North is not evidence that this factor can be depended upon to eliminate the deficits of the system, or even to reduce them. For example, some evidence before the Committee stressed the importance of the service rendered to the nation by the National Railways in providing access to the Noranda Mine. It

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120262

should not be forgotten that, had the National Railways not provided this access, it would, as has actually occurred, have been provided soon after by the Temiskaming and Northern Ontario Railway, while the profitable nature of the Noranda Mine exploitation would have ensured that the interests in control of that property could and would have provided railway service to it, had no railway company been willing to do this.

It is particularly impressive that, despite the very profitable nature of this development, the Canadian National branch line serving it and built for this special purpose, is one of those quoted by the Canadian National as constituting a burden on the system. Since, in such an outstanding case as this, the construction of a developmental line has failed to justify itself as a business proposition for the system, what hope is there that the general extension of mining and development along the lines of the Canadian National will prove the solution of the problem of its deficits?

It may again be pointed out that the greater the economy introduced into the operations of the whole system, the better will the National Railways be able to carry out developmental functions in the national interest without imposing any unnecessary burden on the taxpayers.

6. "By the provisions of this Act, the railways are now enabled to make contracts with shippers on an "agreed charge" basis for through business. It is too soon to determine the possible effect of this new legislation upon the situation, but your Committee is satisfied that the position of the railways today in the transportation field is quite different from that of 1925."

Comment

This statement would seem to imply that permission to make "agreed charges" places the railways in a better competitive position than they were in 1925. Actually, were "agreed charges" to enable the railways to recapture all the business they have lost to competitive

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120263

services since 1923, they would only be in as good a position as in that year. No one who appreciates the permanent nature of the development of highway transport and of the diversion of business from railways to ships as a result of the opening of the new Welland Canal, will have any hope that any method of rate making will enable the railways to recapture all the business lost since 1923. "Agreed charges" can accomplish no more for the railways than to enable them to check the increase of loss of business to competitive services.

7. "Unfortunately its debt and deficits seemed to stand as an indictment against its administration, and although Canadian Pacific business was also on the down grade, and was fighting its own battle, its contribution before the Committee focussed entire attention upon Canadian National Railway deficits as though they were the cause of all our railway troubles. The psychology of this situation placed the Canadian National Railways in the position of having to defend and justify its administration."

Comment

Except for a passing reference by Sir Edward Beatty in his sketch of railway history, there is no evidence on record before the Committee presented by the Canadian Pacific which draws attention to the Canadian National deficits. The terms of reference to the Committee say that it is appointed to "enquire into and report upon the best means of relieving the country from its extremely serious railway condition and financial burden consequent thereto". The exhibits prepared by the Dominion Bureau of Statistics and filed by Colonel Biggar at the beginning of the hearings in 1938 did describe the general railway situation and pictured the financial condition of the Canadian National. After that, the proceedings of the Committee followed the line defined by Senator Dandurand (page 1, Proceedings 1938): "We shall have to test co-operation as we have it under the Act of 1932-33, what it has done, what it is in the making, and what it can effect, and then we shall have to test the formula

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

12026.4

of unified management, which is Sir Edward Beatty's pet child".

8. "This campaign of propaganda has not only hampered the working out of co-operative arrangements but has also obscured theunderlying problem of the adjustment of the railway industry to the changed conditions brought about by the development of highway transport."

Comment

This is a mere repetition of a statement made by Mr. S. J. Hungerford in his surrebuttal, and is an expression of opinion not supported by any evidence produced before the Committee.

9. "The Committee inquired closely into these possibilities, from which it appeared that only a portion of the savings could be definitely measured, and these applied more particularly to road abandonments which, in the judgment of the Committee, could not be made."

Comment

Canadian National witness (page 197, Proceedings 1938) admitted over a thousand miles of railway could be abandoned under co-operative agreement. Obviously much greater mileage could be abandoned without affecting public interest under a plan of unified management.

It seems incorrect to say that the savings which could be definitely measured applied chiefly to road abandonments. Examination of the evidence in favour of the Canadian Pacific estimate shows that only 10% of the estimated savings would arise from line abandonment, and that savings of other types could be estimated with much precision.

10. "Thus it was impossible for the Committee to give consideration to the proposals included in the larger sphere of savings, and the reluctance of the Canadian Pacific to divulge this vital information because of possible public reaction did not assist the Committee to reach a conclusion favourable to unification."

Comment

This is an odd claim in view of the immense amount of detail furnished the Committee. It was pointed out by the Canadian Pacific

Comment

This is an odd claim in view of the immense amount of detail furnished the Committee. It was pointed out by the Canadian Pacific

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120265

that the publication of certain details asked for by Senator Dandurand would affect its competitive position and Senators Meighen and McRae proposed that such information be furnished to the Railway Commission for examination and report. To this the Canadian Pacific offered no objection but Senator Dandurand opposed the suggestion, claiming that the details should be made available to the Committee so that they could be tested by the Canadian National experts (pages 757-763, Proceedings 1938).

11. "Further leading questions to the Canadian Pacific in relation to financial matters under unification, such as new capital requirements, refunding of Canadian Pacific maturing obligations in the event of unification, and the inevitable pledge that the government would be obliged to give in connection with the new borrowings, all remained practically unanswered."

Comment

Note the play on the word "practically". All questions asked on these points were answered, but it was, of course, repeatedly pointed out that such detail arrangements could not be worked out except by the two parties to the proposed contract in negotiation.

12. "It was contended by officials of the National Railways that all savings practical of attainment could be secured under a policy of enforced co-operation with respect to which it was held that savings of from $10,000,000 to $15,000,000 might be effected, even under present depressed condition of railway transport."

Comment

Mr. S. W. Fairweather (page 207, Proceedings 1938) gave an estimate of $10,000,000 savings from co-operation. He also gave figures of $24,000,000 and $35,000,000 savings from co-operation to the Royal Commission (page 206, Proceedings 1938). There is no record in the evidence before the Committee of an estimate of $15,000,000.

In connection with the whole question of the savings from

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

12026

co-operation as compared with those from unification, it may be noted that, as Senator Dandurand himself said to the Committee (Page 1389, Proceedings 1938), "greater economies can be more easily effected under unification". As he put it, "everybody sees that". As for the prospects of savings under co-operation, it seems proper to draw attention to a remark of the Minister of Transport, reported in Proceedings of the House of Commons Standing Committee on Government Railways and Shipping (Page 38, Proceedings, 1939). Mr. Howe said: "Considering all the disturbance up and down the country, and that they have saved less than two million dollars a year for both railways, I think if they had been allowed to run and had attended to problems within the railways with the energy with which they have been worrying about this co-operation, both railways would be much further ahead today". This does not sound as though the Minister of Transport was in accord with Mr. Fairweather, Mr. Hungerford, or Senator Dandurand.

The statement that all savings practical of attainment could be secured by co-operation leaves out of consideration the very obvious fact that the savings which could be made more easily and with the least disturbance to our economic system would be those which could be accomplished by amalgamating the head offices and supervisory staffs of the two systems. These savings, which would run into millions of dollars per annum of themselves, can obviously be made under unification but not under co-operation.

15. "Complaint has been voiced by members of the Committee that, though five years have elapsed since co-operation as a measure of government policy became effective, so little has been accomplished. That criticism would seem to lose sight of the fact that even under unification five years and more would be required to secure expected results."

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120267

Comment

The difference is that five years of co-operative effort have saved $1,900,000 per annum. Five years of unification effort can save an amount estimated by the Canadian National at over $56,000,000 per annum and by the Canadian Pacific as from $60,000,000 to $75,000,000 per annum. The precise amount of the savings cannot be determined, since Senator Dandurand has refused to encourage the making of an impartial expert study.

14. "The Committee feels that the situation may be ameliorated by co-operation aimed at elimination of duplicate services where no essential public interest is involved."

Comment

This is all that is contemplated under unification and by one general agreement eliminating conflict of interest the task which is impractical piecemeal is made possible of achievement.

15. "The recommendations thus referred to were embodied in the Statutes of Canada, but their working out has been thwarted and impeded by a desire of one of the railways to impose upon the people of Canada a policy rejected by the Duff Commission for the same reasons which compel this Committee once more to reject unification as a measure of national policy."

Comment

No evidence to this effect was produced before the Committee, and the draft report of the Committee as originally submitted by Senator Dandurand has been amended, on Senator Hugessen's statement that the picture given in the words above was unfair to the Canadian Pacific.

Sir Edward Beatty's remarks in this connection (page 1377, Proceedings 1938) are of interest:

"The ingenious suggestion is offered that perhaps, if your Committee will express a firm opinion against unification, this would permit greater progress with co-operation. I have already pointed out that there has been no delay or lack of interest in connection with co-operation, on the part of the Canadian Pacific Railway. We believe in savings by co-operation, and only object to the present system because it is inadequate. Therefore, no statement that the complete co-operation known as unification is not to be tried would cause us to alter our attitude in respect of the importance of making any possible savings by incomplete co-operation. I do not see why fear of unification should limit the efforts of co-operation of the officers of the Canadian National - unless it is meant that, fearing that success in obtaining savings by co-operation may prove the advantages of unification, they have deliberately limited their efforts."

Evidence in connection with telegraphs (page 965, Proceedings 1938) and express (page 756, Proceedings 1938) clearly shows that the Canadian Pacific has vainly urged co-operative efforts on these items, on each of which $1,000,000 of economies have been estimated - by joint committees of officers of the two railways. Incidentally, if Senator Dandurand was referring to the Canadian Pacific as the railway which blocked co-operation, what has he to say about the Montreal Terminal? It was shown before the Committee (Page 448, Proceedings 1938) that the existence of independent terminal facilities in Montreal has played an important part in preventing a more complete pooling of passenger train services than has yet been obtained.

16. "that further and more serious attempts should be made to give effect to the letter and the spirit of the Canadian National-Canadian Pacific Act of 1933, the two railways to agree between themselves to a referee - preferably the Chairman of the Board of Transport Commissioners - for the adjustment of such differences as may arise concerning co-operative policies. That, in the opinion of the Committee, offers the only practical course looking to the improvement of our present railway difficulties."

Comment

Sir Edward Beatty's remarks in this connection (page 1376, Proceedings 1938) are of interest:

"In answer to enquiries from your committee, some of the officers of the Canadian National have suggested that the savings so far agreed upon under co-operation, of approximately $1,700,000 per annum, might be increased to $10,000,000 per annum, provided that some Board is set up which will relieve the railways of the odium of initiating economies. Since the Canadian Pacific has suggested that economies may be made of a much larger sum per annum, it must be clear that it does not fear this odium. The officers of the Canadian National may, but, since any form of co-operation, compulsory or otherwise, can only obtain its initiative from a suggestion from some quarter, it must be evident that to add a representative of the Government to the co-operative committees of the two railways is merely to suggest that the state must take over the burden of odium from the Canadian National Railways. After all, is this not merely to say that this department of Government is to be relieved from the duty of economizing ?"

SPECIAL COMMITTEE

*Appointed to*

Enquire into and Report upon the Best Means of Relieving the Country from its Extremely Serious Railway Condition and Financial Burden Consequent Thereto.

SUBMISSION BY

SIR EDWARD BEATTY

*Chairman and President, Canadian Pacific Railway Company*

**HONOURABLE MEMBERS OF THE COMMITTEE:**

It is not my intention to take your time for any lengthy discussion of the events which led to the situation which your Committee has been appointed to examine. On the other hand, you may permit me, in order to facilitate my approach to the questions before you, to recite, briefly, certain historic facts.

**HISTORY:**

The Canadian Pacific Railway Company is not a corporation of an ordinary type. It is an institution created, to carry out a national purpose, by the joint action of the Government of Canada and private investors appealed to by that Government to assist it in fulfilling the terms of that other contract on which the existence of the Dominion as a nation depends.

You are all familiar, I assume, with the history of the circumstances in which the Canadian Pacific Railway was constructed. In order to obtain the union of the scattered Colonies of British North America, a contract was undertaken between their Governments, and part of that contract involved the construction of two railway systems. One was to connect the Maritime Provinces with Central Canada—using for that purpose a route which, to be entirely on Canadian soil, must, of necessity, be somewhat uneconomic. It was agreed that that railway should be constructed at the public expense, and the Intercolonial was thus built.

The other necessary railway project was one to connect Central Canada—and, through the Intercolonial, the Maritime Provinces—with the Province of British Columbia.

The history of this project may be summed up quite simply. The Government of Canada undertook to construct it as a public work, but, unfortunately, difficulties of construction and the resulting cost soon made it appear that the task might be one which might overburden the finances of a young nation and be so long drawn out as to defeat its object. So grave did these difficulties become, that the Government of the day found it necessary to abandon this form of project, and to invite private interests to participate in the work.

As you are aware, the original railway system of Canada was the Grand Trunk—a corporation financed in England, which, in obtaining a convenient route between the Middle West of the United States and the American seaboard, had found it advisable to pass over Canadian soil, and which, in this somewhat indirect fashion, became an important factor in transportation in the present Provinces of Ontario and Quebec. That Company was offered the right to participate in constructing a transcontinental railway system. Because its proprietors did not believe that such a project would be economical, if the line were constructed entirely on Canadian soil, the Grand Trunk refused the invitation, and, indeed, used its great influence in the financial markets of England to discredit any possibility of success for a company whose lines were constructed entirely on the soil of the Dominion.

The Dominion Government, regarding this condition as an essential of the construction of a national transcontinental railway, abandoned negotiations with the Grand Trunk, and succeeded in inducing a group of Canadian business men to undertake the rash adventure of building a railway from Montreal to the mouth of the Fraser River.

It is thus a fact that the Canadian Pacific Railway is the first and most vital of all the public works of the Dominion of Canada. Its relations with the Government were established by a formal contract, and while details of the terms of that instrument have been varied from time to time, the Company holds, as both a right and an obligation, the status of a public enterprise constructed primarily to assure the country adequate transportation facilities. It was quite realized by the Government of the day that private capital used for this purpose was entitled to make legitimate profit. Indeed, there is no better evidence of this than that the Government agreed to transfer to the syndicate the completed portions of the railway, a sum of

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120279

money in cash and certain Crown lands—not as a gift, but as a condition of a contract.

At the time that this transaction was undertaken the only comment made was concerning the rash spirit in which the syndicate had undertaken its obligations. Fortunately for them, and for the Dominion, the adventure proved one of modest profit, and the syndicate, through its successors, the Canadian Pacific Railway, has been able to fulfil the onerous obligations which it undertook, not only up to the letter of the contract, but far beyond that.

It is not my intention, if your Honourable Committee will permit, to explore any further than this the causes which have led to the existing railway problem, and to my attempt to offer a solution. With your consent I should like to confine my evidence to explaining the origin, the nature and the effects of the solution which I suggest.

## THE SHAUGHNESSY PLAN:

As you are aware, the first formal suggestion made, on behalf of the Canadian Pacific Railway, looking to unified operation of the two railway systems, was that made by the first Lord Shaughnessy in a memorandum addressed to the Government on April 16th, 1921. At that time the country was just emerging from the primary effects of the Great War and the economic outlook was wholly unsettled. The suggestion was substantially that the Canadian Pacific Railway lines should be transferred to ownership of the Government; that the Government would, as a *quid pro quo*, agree to guarantee a fixed annual dividend to the shareholders of the Canadian Pacific in perpetuity. There was the further suggestion that, in order to avoid any danger of political interference, the Canadian Pacific Railway should be given a contract to operate the combined systems.

## THE SENATE COMMITTEE, 1925:

In 1925 a Committee of your House was appointed to consider the question anew, and in due course a report was prepared and recommendations were made that the two railway systems should be merged for purposes of administration and operation under the direction of a Board of fifteen directors—five named by the Canadian Pacific Railway, five named by the Government, and five chosen by the first ten; that the Canadian National Railways be recapitalized; that the Canadian Pacific Railway be guaranteed an agreed dividend on its stock, and that, in the event of a surplus being earned, a dividend at the same rate as paid to the Canadian Pacific Railway be paid to the Government on the new capitalization of the Government railways. After the payment of these dividends, any surplus would be divided between the Canadian Pacific and Canadian National Railways, in proportion to the valuation of the two systems. This Report was concurred in by your Honourable House.

The year 1925 happened to be that in which a temporary return of prosperity to the world produced conditions in which the pressure of the railway problem was forgotten. It ushered in the period in which the Government authorized very large expenditures upon its railway activities.

## THE ROYAL COMMISSION, 1931-2:

By 1931 depressed conditions of business made it clear that a railway problem still existed, and, in discussing this matter with the late Sir Henry Thornton, I suggested to him that he should propose a Royal Commission to investigate means for providing relief for railway losses. The result was the Royal Commission to Inquire into Railways and Transportation in Canada.

This Royal Commission brought in a Report—to my surprise, in view of the trend of the investigation—in which the idea of unification was set aside on the ground that the time was not opportune. It is well known—indeed, it is indicated in the Report—that opinion of the Commission was divided. The country had only lately experienced the onset of depression, and, in 1932, it was not unusual to hear the suggestion made that, within a year or two, the Dominion would enter on an even greater period of expansion and prosperity than it had ever experienced. It was, indeed, not unusual to find those who really hoped at that time that improving business conditions would soon place the Canadian National Railways on a sound earning basis.

In the circumstances the Royal Commission recommended the establishment of a system providing for more or less enforced co-operation between the railway companies.

I ask your Honourable Committee to note that the suggestion so often made to the effect that the Royal Commission condemned unification is not correct. Some members of the Commission—in the words of the Report—"Would have preferred a plan which would have established a complete dissociation of the Government of Canada from the responsibilities of competitive railway management, or of any direct interest therein." The Report was frankly a compromise, and it was made because the Commission hoped that it would, in their words, "afford early relief to the Federal Treasury." In addition, the Commission said "We feel compelled, as a matter of public duty, to strike a serious note of

120280

warning to the people of Canada. Unless the country is prepared to adopt the plan we have proposed, or some other equally effective measures, to secure the efficient and economical working of both railway systems, and thereby not only reduce the burden on the federal treasury but improve the financial position of the privately-owned railway, then the only courses that would be left would be either to effect savings in national expenditures in other directions, or to add still further to the burdens under which the industries of the country are suffering by the imposition of yet further taxation. Failing the adoption of one or other of these courses, and there are obvious limits to their application, the very stability of the nation's finances and the financial credit of the Canadian Pacific Railway will be threatened, with serious consequences to the people of Canada and to those who have invested their savings in that railway."

In the course of its hearings the Royal Commission heard evidence, among other, from the late Sir Henry Thornton and myself. In preparing this evidence we were both endeavouring to accede to specific requests made by certain members of the Commission, as well as to give evidence along general lines. Sir Joseph Flavelle, for instance, was very anxious to obtain information as to the savings which might result from unified operation of the railway systems.

The then President of the Canadian National stressed several points. One, that, while the depressed business conditions of 1931-1932 had brought the matter to a head, this had merely aggravated existing conditions. Two, that the Canadian railways were, in his opinion, "subsidizing out of their earnings the shippers of grain and grain products of Canada," and that "as far as the Canadian National is concerned" the public "can have low freight rates, unremunerative operation and increased taxes, or they can have higher freight rates, remunerative operation and lower taxes." He stressed especially the fact that the Canadian freight rates are lower than those of the United States. He pointed out particularly that the two competing railways must maintain the same freight rate structure. In the third place, he went on record that the desirable policy would be for the railways "to reach an agreement with each other to divide traffic on some reasonable basis." He argued that "whether times be evil or good, there is never any excuse for waste," and insisted that one of the advantages of the depression was that it would bring home to the railways the necessity of avoiding wasteful competition. Fourthly, he proposed the unification of competitive city ticket offices, the pooling of passenger services, the co-ordination of freight services, the elimination of duplicate trackage, the consolidation of telegraph companies and hotel systems, the joint use of local facilities and the interchange of trackage rights wherever economical. Finally, its President impressed upon the Commission the difficulties inflicted on the Canadian National Railways by political pressure.

On my own part, I offered the Royal Commission a suggestion which is substantially the same as that which, more fully developed later, has come to be known as unification.

## UNIFICATION:

There are merely a few general points which I regard as vital to a plan of railway unification. One is that the two railway companies should continue to own their present properties. It is not my intention to suggest that the Canadian National should be transferred to Canadian Pacific ownership, or the Canadian Pacific to Government ownership. The securities of the companies would remain in their present ownership. No question is involved of the value of the properties, or of any new capital set-up.

Another point is that I have not suggested that any guarantee should be given to the Canadian Pacific of a return on its stock or other capital issues. I say this, because I am convinced that no guarantee of interest on the debenture stock and bonds of the Canadian Pacific will be necessary. As to dividends on the stock, I do not see that it is necessary to give shareholders any protection beyond a reasonable opportunity for the company which they own to earn a reasonable profit.

The third of my fundamental points is that each group of owners should continue to receive under unification the net earnings which past experience indicates their company would have received as an independent institution, and that the additional net earnings made available by unification be shared between them on an equitable basis. I assume that the Government would directly receive at least half of these savings. These details, of course, could only be determined at the time of the formal contract.

My fourth basic theory is that adequate provision should be made to prevent the unified Company from neglecting its duty as a public utility, and depriving any community of necessary railway service. This, of course, can be easily arranged, by adding, if necessary, to the strength and powers of the Board of Railway Commissioners. I may remind you that the Board among its very wide powers today controls the cancellation of trains, the closing of stations and the abandonment of lines.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120281

My fifth, and, in some ways, the most important consideration, is that adequate provision should be made to protect the rights of railway workers. I propose, with your permission, to deal with this particular question at greater length later, but satisfactory precautions of this nature are a prerequisite of the acceptance by the Canadian Pacific Railway Company of any plan of unification.

Since it has been suggested by some of the critics of my plan that I am not sufficiently specific, may I point out that I am convinced that the conditions which I have just outlined are quite specific enough to ensure that any plan of unification will be entirely without danger to the public interest? The suggestions which I have offered are definite enough to form the basis of a contract which would readily be arrived at by negotiation between authorized representatives of the Government and of the Canadian Pacific Railway Company. When, as I hope, these conferences are undertaken, further details of the arrangement will undoubtedly arise for examination and will be dealt with as they appear. I do not see how I can make a more specific suggestion except as the result of such conferences.

Obviously, no formal contract can be arranged until the conferees have reported to their principals. Those acting on behalf of the Canadian Pacific Railway must obtain the authority of its owners, and the representatives of the Government must receive approval of the responsible Government of the day. The suggestion that any arrangement could be entered into on such a basis as would not be in the public interest is, I submit, merely an assumption that our system of democratic and responsible government is not functioning.

The advantages of unification are apparent. They would include, first: Considerable relief for the Treasury of the nation. It is true that we could scarcely expect unification to relieve the Treasury of all its burdens arising from the present railway situation. Only in the event of a radical change in world and Canadian economic conditions could this occur. However, I am convinced that the relief which could be afforded would be most important.

Second, unification would permit the Canadian Pacific to earn a fair return on prudently invested capital, and I am confident that I do not need to impress upon you the importance of this to the nation, as well as to the investors themselves.

Third, the savings of unification would leave both railway companies in a better position to carry on the inevitable process of remodelling, modernizing and improving the railway services of the Dominion. As a railway man I can assure you that we must continue to deal with this task extensively and that, in present circumstances, the efforts of both railway companies are hampered.

In the fourth place, unification, by stabilizing the railway industry, aids in freeing us from the now imminent danger of forced abandonment of light traffic lines to an increasing extent. So much has been said of the mileage to be abandoned under unification that I should like to remind you that both railway systems are increasingly pressed, by financial exigencies, to search for opportunities for line abandonment, and that, despite certain difficulties in obtaining permission for these abandonments, they are becoming inevitable. I am afraid—I much regret to say it—that there are many established communities in Canada which will not be able to obtain regular railway service in the future unless something be done to free both railway companies from their present financial stresses.

Fifthly, unification will permit the stabilization, on what I hope will be a lasting foundation, of the employment of railway workers. At present this large body of our citizens is engaged in an industry which is in an unsound economic position. For the moment the Government may be able to maintain the present situation by the providing of large sums annually for railway deficits. This cannot continue indefinitely, and I am honest in saying that no one can be a better friend of railway workers than the man who urges that the industry on which their livelihood depends should be rescued from a condition of insolvency.

On this point, I may say that I am not alarmed over the outlook for the Canadian Pacific Railway. By stringent economy that Company has been able to survive the stresses of recent years, and I look forward with confidence to its future.

There are other incidental advantages which are not without importance. Certainly, I feel assured that all members of the national legislature would welcome the removal of railway transportation from the political field. Another advantage is that the unified system would be in a position to meet the competition of other forms of transport with an efficiency which would be much greater than at present.

## THE ESTIMATES OF SAVINGS:

Naturally, much interest is displayed in the accuracy of the various estimates of savings which have been offered. In my own case, I have repeatedly quoted the fact that a Committee of Canadian Pacific officers, after an exhaustive study, concluded that, given conditions similar to those of 1930, annual

120282

savings of $75,300,000 could be realized by the unified railways.

I have been prepared to accept the substantial accuracy of this estimate, in view of the extent of unnecessary duplication of railway services. Your Committee, however, may desire some account of the basis and methods used for this calculation, and, without being too technical, I shall endeavour to explain the origin of the figures. Estimates of savings were submitted by both the Canadian Pacific and the Canadian National Railways as the result of requests to them of the Royal Commission. Three estimates were made—$75,300,000 by the Canadian Pacific, based on 1930; $50,340,000 by the Canadian National, based on 1931—practically the level of traffic in 1937, and $56,440,000 by the Canadian National on a year of normal traffic, which was taken as 30% above 1931, or practically the level of traffic in 1930.

I should like to explain to your Committee the precise procedure followed in making the estimate offered by the Canadian Pacific Railway.

When the Royal Commission requested that the Canadian Pacific exhibit in money its estimate of the amount of railway duplication, I arranged for a committee of our officers from the operating, engineering, traffic, mechanical and accounting departments to convene and to prepare an answer to the Commission's request.

They surveyed the existing supervisory organizations of the two railways as independent units, and the probable organization of a railway as unified; the location and function of the various lines of railway; the passenger and freight train services; and the terminal and shop facilities. Each phase was assigned to officers qualified to deal with it. When information covering a special problem was not available, the senior officer in the territory affected was consulted. In other words, the resources of the entire organization were used by the committee in its work. The committee understood they were not trying to determine the maximum limit of savings, but only what could reasonably be expected under normal conditions.

In addition to savings resulting from unification of actual operations, there are other advantages. Account must be taken also of the saving in future capital expenditures. In providing for the normal growth of traffic and changes in its character, the extension of one plant would obviously cost less that the extension of two. This consideration would apply throughout the entire scheme of additions and betterments necessary to adapt the system from time to time to the use of new machinery and methods. I regard this as a most important element in unification, and one involving a very large item of saving.

As has already been pointed out, our estimate was offered with two prepared by the Canadian National Railways. One of those was a figure of $56,440,000, based on a year in which traffic would be 30% above the volume of 1931. This is a little over the level of traffic in 1930, and it is, therefore, reasonable to compare the Canadian Pacific figure of $75,300,000 with the Canadian National estimate of $56,440,000.

Close examination of the two estimates shows that both included economies from reduction in general overhead expenses, traffic solicitation, advertising and regional supervision; from line abandonments; from rerouting of traffic; from increased car and train loading; from consolidation of repair work; from readjustment of passenger train services; from operating joint freight and passenger terminals; from consolidating express and telegraph services; from reduction in accounting, and other expenses. Individual items appear in each estimate which are not in the other, but, considering that two quite different methods were followed in compiling the estimates the close similarity in result is unquestionable proof that, at the time of the Royal Commission, responsible officers of both Companies were in general agreement that the savings to be had were substantial.

It is only proper to point out that the Canadian National officers, in presenting their estimates, which were stated to be based on the experience gained from consolidation of the properties of the Canadian National, expressed the opinion that, lacking the stimulus of competition with another system, the amount of the estimated economies was to a certain degree questionable, and that the economies as planned might meet with opposition from the public and employees. For my part, while recognizing these problems, I felt and still feel that the necessities of the case require action, and that the estimated economies can, if wisely and gradually carried out, be achieved without injuring the shipping public, the communities involved or the railway employees. In an address in 1926, I drew attention to these difficulties but, in view of events since then, I am certain that there is no option but to unify the systems. Evidence of experienced railway officers on this point will be available if your Committee desires to hear it.

There are those who admit that, at the time of the Royal Commission hearing, the estimates were sound, but argue that since then savings have been made by both railway companies on such a scale that the economies estimated in 1932 could no longer be made.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120283

This argument reflects some misunderstanding of the case. The estimates of 1932 were prepared to show the savings which could be secured by joint action only, not the economies which could be carried out by each railway independently, and are, therefore, just as valid today as then. Of course, it is admitted that improvements in railway technique have altered the situation to some extent, but there are only two new or important factors which might alter the amount of savings—(a) co-operative savings secured by joint action, which, including projects in effect and agreed upon, total $1,771,000 per annum, and (b) variation in amount of duplication which changes with the traffic volume. As to the latter, estimates were for a normal year, taken as 1930, and are, therefore, still the estimates which should be considered. In 1938 they would be less, but in a year of greater traffic than 1930 they would be more. As a basic year, 1930 may still be considered as a fair average. Those who invite us to await an early return to traffic at the level of 1927 or 1928 as normal must admit that estimates on the lower level of 1930 are reasonable and conservative.

I will not try, at this time, to take you through my evidence before the Royal Commission or the mass of detail which the work of the Canadian Pacific committee entailed. The conclusion reached is not to be taken as a precise amount for which a definite plan of action has been worked out, but as the considered judgment of a group of responsible officers as to the level of probable savings. With the Royal Commission I stressed that some things were probably included in the estimate which, in practice, would not be realized, but that, on the other hand, many known items of savings were not included, because it had not been practical to put a value on them, though they were certain to be secured. The character of these savings will be indicated to you. The Committee's conclusions were for the information of a Royal Commission; the task was seriously undertaken and capably discharged, and its results can be accepted as a reasonable and conservative conclusion by men accustomed to deal with the problems which would be involved when adopting the plan of unification. It is an estimate which supports the case for unification, but is not the only argument.

An item of the estimate, which has only moderate importance, insofar as amount of saving is concerned, but has provoked most of the discussion, is that of line abandonment, and it is desirable that this be seen in its proper perspective. It is only one of perhaps twenty general items considered. The Commission had asked both railways what mileages they thought could be abandoned if the railways were operated as a unit. It was natural that each railway should include in its estimate the savings from the line abandonments about which the Commission had enquired. The Canadian Pacific had estimated total maintenance of way savings of $14,888,000; examination of the estimate shows that only a portion of these savings would arise from the fact that duplication could be eliminated in respect of approximately 5,000 miles, from which maintenance savings would be about $7,000,000, or about $1,400 per mile. This compares with average maintenance expenditures per mile of line in 1930 of Canadian Pacific of $1,672 and of Canadian National $2,028. The Canadian National estimated abandonments of 2,434 miles. It is not vital to the question, whether we carry out line abandonments on the general scale I had indicated, or on the scale of the plan put forward by the Canadian National. Where two duplicate main lines are involved, if it were decided not to abandon either, undoubtedly much of the economy could be secured by altering the standard of maintenance of one, and avoiding its future improvement. The Board of Railway Commissioners now protects the public interest in connection with line abandonment, and it is futile to attempt to anticipate their specific action.

One further point: We have the interesting fact that the Royal Commission was informed that from $30,000,000 to $35,000,000 per annum could be saved by measures of compulsory co-operation. This may well have been one of the most important factors in leading the Commission to recommend that compulsory co-operation should first be tried. Later, I shall offer some reasons for the failure of co-operation to provide an adequate solution of the problem, but, at this point, I may say that, since co-operation, carried to the extent where it would afford important savings, would have to employ many of the same measures taken for this purpose under unification, an estimate of $35,000,000 to be saved by co-operation is fairly good evidence that much more could be saved by complete unification. As shown by the evidence before the Commission, the estimated savings of $30,000,000 to $35,000,000 per annum did not take into consideration the economies to be obtained by dispensing with duplicate executive, supervisory, soliciting, accounting and engineering staffs, and by carrying out complete pooling of freight express and other services and facilities, as would be possible under complete unification.

I assume that your Honourable Committee will wish to explore this subject more fully, and, when you so desire, I shall be glad to offer a detailed explanation of our estimate,

120284

and to have available officers of the Company who have an intimate knowledge of the subject to appear before you and give evidence in support of the methods followed and the bona fides of the result.

I have never hesitated to use the 1930 basis for the reason that the process of unification will take some years. I think that your Honourable Committee will agree that we may hope for conditions in which the volume of traffic of 1930 may be attained again by the time that unification becomes wholly effective. Indeed, I am afraid that, if this hope is vain, more serious measures than unification may have to be contemplated to solve the nation's transportation problem.

## NO OTHER SOLUTION OFFERED:

One fact which interests me is that, up to the present time, there has been no alternative offered to unification—except co-operation. The plan suggested in the Senate Committee Report of 1925 was unification. The nearest thing to an alternative which is offered is that we should possess our souls in patience and wait for the return of such prosperity as to eliminate railway deficits.

On that point I have only one thing to say—that this is the same prophecy which, commencing with the Drayton-Acworth Report recommending that the Government should take over the railways which now constitute the Canadian National Railways, has been used by everyone who has opposed constructive action to solve the railway problem.

In recommending the amalgamation of the Canadian Northern, Grand Trunk, Grand Trunk Pacific, and Canadian Government Railways in 1917, the Drayton-Acworth Commission stated:

> "If then we take as a starting point a deficiency of roughly $12,500,000 a year . . . ; if we assume that this will not seriously increase for the next year or two, but will not, on the other hand, diminish, . . . then in order to reach a position of solvency, the Dominion Railways would need to earn an additional gross income of some $50,000,000, and to retain one-quarter of that amount as net. The present gross income is well over $100,000,000; and it is not unreasonably sanguine to hope that it may increase 50 per cent in the course of six or seven years, if Canada continues to progress at a normal rate."

Five years later, in 1922, gross income had more than doubled, but the deficit had increased more than fourfold to $58,000,000. In spite of this, optimists still said "that sufficient traffic to sustain the National System can be developed within a reasonable period of normal progress." In 1926, when revenues had increased to $270,000,000, there was still a deficit of approximately $30,000,000, but the statement was made that "the C.N.R. was rapidly approaching the day when it would cease to be a burden upon the Canadian people." Much happened between 1926 and 1932; in one year the revenues were almost three times greater than in 1917, but even then the deficit was nearly $30,000,000. In 1932, the deficit was almost as great as the gross earnings in 1917, but the assertion is repeated that: "If we were today on a normal trend of gross earnings, we would be earning an amount sufficient to pay interest on all the securities in the hands of the public." It will be noted that this forecast did not take into account interest on the Government's advances to the Railways.

In 1935, it was said that: "It is not fewer miles of track, but more freight that is the solution of Canada's railway problem" and in 1937 that "the solution of Canada's railway problem is not to be found in cutting operating costs further, but in building up traffic, and obtaining reasonable rates for that traffic by regulation."

I have always felt that the problem should be dealt with on the basis of the actual existing situation. In view of the failure of these forecasts to materialize, I suggest that we approach the problem with greater regard to reality.

## THE DIFFICULTIES OF CO-OPERATION:

The suggestion has been made quite frequently that, since unification of the railways would involve certain consequences which many of our citizens believe to be dangerous or objectionable, it is the duty of the railways to explain why the method of co-operation laid down in the Canadian National-Canadian Pacific Act of 1933 has not been used more extensively than has been the case.

Your Committee has already reviewed the whole process of compulsory co-operation, as recommended by the Royal Commission, and made mandatory by the Canadian National-Canadian Pacific Act of 1933. You are aware that many co-operative projects have been examined, and some accepted by both railway companies, and put into effect.

In addition certain projects have been studied, and abandoned owing to belief, on the part of the representatives of both of the railway companies, that they were not economically desirable.

Yet other projects have been favourably reported upon and approved, but are not yet in effect, and others are under study, or are listed for consideration.

CANADA

Besides these operations of the Joint Co-operative Committee, the railways agreed to consider the unification of express and telegraph services, but, on presentation to Parliament of the empowering legislation, objections were raised, and the Government withdrew the bills.

Recently, by direct negotiation under the authority of the Act, it has been possible to arrive at an arrangement to meet the situation produced at Vancouver by the construction there of a new hotel.

In no case, has either of the railways invoked the right to ask for the appointment of a tribunal to deal with any project on which agreement had been found impossible.

I can assure you that the Canadian Pacific Railway has taken its obligations under the Act seriously, and I must assume that the attitude of the Canadian National Railways has been identical. Thus, in view of the comparatively small savings accomplished by co-operation under the provisions of the Act, I believe that I am right in saying that there must be something wrong with the system—not with its execution, even though that has been disappointingly slow.

It is not surprising to me that this should be the case. Co-operation and competition scarcely seem suitable bedfellows. Co-operation and compulsion seem almost less suited for companionship. It is a fact that the two great railway systems in this country are competing for business, and it is inevitable that, in any attempt to unify their services piecemeal, there will be certain difficulties. I should like to point out how these make co-operation an unsatisfactory substitute for unification.

Co-operation, under the Act, is to be carried out by two competing companies which retain their independent operating organizations. Unification, as the term is here used, is a plan by which the properties and services of the two railways, on such detailed terms as may later be arranged, will be entrusted to a single operating organization. As has been said, the plan, as now suggested, leaves ownership of the properties in its present hands and contemplates joint operation for joint interest. The distinction between these plans, in their effect on efforts to eliminate duplication, is an essential one.

Unification is a general plan which, once adopted in principle at the executive centre, is then carried out throughout the railway system. Co-operation is an attempt to build up individual projects of unification, each of which must, in the end, come to the executive for approval.

Whenever a measure of co-operation is studied, it is discovered that one of the difficulties in obtaining from it all the savings possible is that to do this would require the consolidation of other services or facilities. For example, wherever train services are pooled, one of the limits to the advantage to be gained is that the new pooled service will still have to use yard and shop facilities which have not been pooled. In some cases this actually prevents the completion of an otherwise desirable project; in other cases it means that the limited pooling which is finally adopted does not accomplish all the savings which it might.

Unification, on the contrary, starts with the assumption that all possible savings are to be made, within the limits of the plan as finally adopted. Therefore, it does not matter whether you start by trying to pool shops or by pooling train services. At whatever point it is discovered that any difficulty is presented to the pooling of one service by the fact that another type of service is not pooled, this can at once be overcome. All the savings which are possible of attainment not only become automatically apparent, but are more easily realized.

In addition, the officers engaged in a process of unification would have no limit to their activities except the rules of business, the terms of the unification contract, and the provisions of the statute authorizing such unification. The officers engaged in attempts at limited and piecemeal co-operation necessarily find their hands tied by the obligation that nothing which they do may interfere with the maintenance of a sound competitive position for the system which employs them.

To take a case: To instruct the officers of the two companies to co-operate in routing trains into one or other station will accomplish minor savings. They must keep in mind, at all times, that this routing may, in the case of terminals or junctions, decidedly affect the probable choice by passengers of the route to be followed for further travel, beyond the territorial limits of the co-operative project under discussion. It must be clear how serious a limitation this is to intelligent co-operation, when you compare it with general instructions to officers to remove duplicate routes of travel, and all the facilities which exist for them.

The failure of either of the railway companies to request the appointment of a tribunal to complete a detailed item of co-operation on which agreement was not reached is quite natural. The officers of the two systems are in constant and daily contact, on many points. They are quite accustomed to reaching agreement. They should be able to avoid the application of compulsion to force a friendly competitor into an agreement which he dislikes. Finally, as each railway has,

made all the concessions which its officers consider intelligent and businesslike, neither one should have any desire to risk the imposition of additional disadvantages—such as must result, to one or other of the parties to the discussion, from any conceivable report of a tribunal. This could only magnify the difficulties of co-operation owing to the fact that the parties would constantly fear the establishment of adverse precedents. It would involve something in the nature of contentious litigation which would not create an atmosphere favourable to cordial and effective co-operation.

In the end, the paradox develops that, the more successful our attempts to unify properties and services by co-operation, the more impossible would be the condition which we attained. We should ultimately reach a point at which the great majority of our train services throughout the country would be run in common over commonly operated lines. We should have the extraordinary spectacle of two staffs of railway workers engaged in joint operation of a railway system, and supervised by two separate head offices and official staffs.

We might have the picture of two groups of salesmen engaged in competing with each other to obtain passenger and freight traffic to be carried on the same trains.

## CO-OPERATION OR UNIFICATION.

We are warned that the objections to unification, as I have suggested it, are very grave. Let me examine them, one by one, and consider how co-operation would meet them.

There is first the objection that unification would create a transportation system beyond the ability of one Board of Directors and one management to conduct successfully. I disagree with this—but consider how co-operation would affect this aspect of the problem. Co-operation, carried to the extent where it became a valuable method of reducing expense, would create very substantially a unified railway system, but one not operated by one Board of Directors and one management, but by two Boards and two managements. I think that your Honourable Committee will realize that if it is impossible for one administration to conduct successfully the railway transportation of all Canada by means of one unified system of railways, it will be somewhat more difficult for two administrations to do it simultaneously and in co-operation.

The second general objection is that we should create by unification a monopoly under which the interests of the shipper and traveller would be neglected. It is my clear impression that to set up what might be called a dual monopoly, operating the same railway system, would not avoid this danger, but would, by its divided responsibility, make inefficient railway service the standard in this country, and produce unnecessarily high charges or reduced standards of service.

The next objection is that unification might deprive communities in Canada of railway services. To the extent to which co-operation was parallel in its effect to unification, this would also be the case. The disadvantage would be that, to some extent, co-operation would not be—even in its most complete form—entire unification. Thus, the co-operating railways would not be able to use as many methods of adjusting their services to the needs of various communities and localities as a unified railway system could.

When we come to consider the effect on the interest of railway workers of these two alternative methods of arriving at the same general condition, I may point out that the maintenance of separate managements, and the limitations of co-operation as compared with unification would render impossible the full and satisfactory application of those long term and complete measures of protecting the interest of railway workers, which, in my opinion, must and will be employed under an intelligent and businesslike method of unification.

Indeed, it is clear that those railway workers who have been encouraged to believe that safety for labour will better be obtained under the present system than under rationalization of the industry in which they are engaged are already noting that co-operation is no more, should it ever be possible to carry it out on a major scale, than unification in disguise, retaining all the supervisory officers in service, and making the personnel savings entirely among workers. For example, the *Saskatoon Star Phoenix* of March 28th, 1938, reports that, at a meeting of the Saskatoon Joint Council of Railway Unions, repeal of the Canadian National-Canadian Pacific Act was demanded. It must be clear that co-operation, to the degree that it might be made effective, would have the same result as unified management in respect of displacement of labour. It would, carried to the extent which its advocates suggest as possible, affect the interests of labour almost as much as unification. In my opinion, it would do this without permitting the use of proper precautions and remedial measures. Under co-operation, adjustments made for the benefit of labour have to be dealt with according to the effect of each individual co-operative measure. In this way, there is lacking the general advantage of arrangements which, under unified management, might be made by agreement between representatives of the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

railways and representatives of the employees.

There would, of course, be one advantage—if your Committee believe it to be an advantage—in co-operation: The nominal independence of the two railway systems would be maintained. It would not be a real independence—for it is as difficult to "unscramble" physically a piece of railway track, a railway service, or a railway terminal, which has been placed in joint use by co-operation, as it is to perform the same service for one which has been brought under unified management.

The actual effect under co-operation would be that the head offices and supervisory staffs of the two railway systems would retain their independent existence. Railway workers throughout the country in train service, in freight sheds, in shops, and on track maintenance, would find their numbers reduced by co-operation—as by unification. The more successful the co-operation, the closer its results would approximate those of unification. The more highly paid officers and employees, however, would not be affected, and would remain in independent units to exercise joint direction of the diminished staff of railway workers.

The Canadian Pacific Railway has been at all times willing and eager to arrange co-operative measures. The difficulty has been to find the places where they would be effected. Our willingness should be obvious in view of the fact that the $1,135,000, which represents the net annual savings by co-operative measures so far put into effect, amounts to 30% of the former cost, to the two companies, of the operations affected. Savings at this rate are decidedly attractive, and no devotion to a better plan would prevent the Canadian Pacific Railway from carrying co-operation to its practicable limit. Believing, as the officers of that Company do, in the inevitability of final and general consolidation of the business of the two railways, it must be evident that they would have no disposition to block partial measures where these can be arranged.

**MONOPOLY:**

One objection often made to unification is that it would produce a monopoly of transportation which might be used to the disadvantage of the public. That a monopoly would be created, within the comparatively narrow field of railway service, is quite true. On the other hand, it must be remembered that monopolies of railway transportation are not infrequent in Canada at present.

The Canadian Pacific possesses a rather complete monopoly in the Kootenay district of British Columbia; in Southern Alberta and Southwestern Saskatchewan. The Canadian National possesses a complete monopoly between Edmonton and Prince Rupert; Edmonton and Kamloops; in much of Northern Saskatchewan and Manitoba; in the territory between Winnipeg and Quebec; in the Lake St. John district of Quebec; in the Northern portion of New Brunswick and Nova Scotia; and in the Province of Prince Edward Island. The Canadian Pacific monopolizes railway transportation in an area South of the Canadian National transcontinental lines from Nipigon as far as Sudbury; in the territory between Sudbury and Sault Ste. Marie; between Sherbrooke and Saint John, N.B., on the so-called "Short Line," and in Southwestern Nova Scotia. These are examples of fairly complete monopoly. In the areas in question, while through traffic may be competitive in type, local traffic is absolutely non-competitive. Neither the charges nor the standard of service in these areas can be affected in the least by competition between Canadian railways. It is imposible, for example, for anything which the Canadian Pacific does to affect the cost or comfort of a passenger travelling from Edmonton to Prince Rupert; or for anything that the Canadian National does to affect the fortunes of the traveller or shipper between Lethbridge and Calgary. The Canadian Pacific has absolutely no influence on the charges or standards of service on the Canadian National between Cochrane and Quebec. The Temiskaming and Northern Ontario Railway has an absolute monopoly of service in a large and important area of Northern Ontario. Yet, the charges and standards of service of these railways in the areas mentioned are on the same basis as similar charges and standards in areas where competition is fully developed.

**FREIGHT RATES:**

As a matter of fact, any idea that the existence of two railways affects freight rates by keeping them low should be fairly well exploded by the fact that, many years ago, a political agitation against the charges for the transportation of grain on the Canadian Pacific in Western Canada was used as a powerful lever to obtain governmental subsidies for rival private interests in connection with the construction of the Canadian Northern Railways. It was freely alleged that the Canadian Pacific was robbing the farmers of Western Canada, and the promoters of the Canadian Northern Railway promised great things in the way of lower transportation charges. It is undeniable that a temporary lowering of these charges was forced on the Canadian Pacific Railway at that time. The effect on rates was of a passing nature. The

railway which was to force Canadian Pacific charges down became bankrupt; passed into the hands of the Government, and is now a part of the Canadian National System. The rate of charges so established proved too low to support the later Grand Trunk Pacific, and, today, the Canadian Pacific is the only solvent one of these companies. Further, the coming of the War, and the alteration in economic conditions which resulted, ended in a condition in which the undertaking of the Canadian Northern to maintain a certain level of grain rates became impossible of performance, and, when the grain rates were settled, on their present basis, no consideration was given to these forgotten passages of history.

Perhaps the best evidence that it is not the existence of two railways that guarantees low freight rates, can be drawn from a statement by an officer of the Canadian National System. In evidence before the Royal Commission, there is quoted a statement by an official of the Canadian National, in attempting to set up some alternative to unification, stating that "the situation calls for a courageous facing of facts, provision of rates high enough to pay the cost of services; equitably distributed and free from statutory limitations."

This would, of course, be one way of attempting to solve the railway problem, but not, in my opinion, the correct one. It does not appear to me desirable to attempt to increase the cost of transportation in Canada in order to maintain unnecessary duplicate railway services. My own preference is always in the direction of trying to eliminate waste, in order to give the public the cheapest possible service. Freight rates may, from time to time, have to be increased in order to meet changes in general economic conditions, but, as far as I know, it is possible to solve the railway problem by other methods than those recommended by the official in question. In any event it is reasonably apparent that the elimination of the Canadian National as a separately operated system would not reduce the tendency to increased freight rates.

Freight and passenger rates in Canada are not set by the railway companies in competition with each other. They are—and this is very fortunate for the people of Canada—set by the railways, openly in an endeavour to keep rates adjusted to the economic needs of the nation.

Freight rates in the main are kept low by a highly concentrated effort of railway managements to deal intelligently and consistently with a difficult problem. They are, in Canada, as low as they are in any major country in the world, and far lower than in all countries except the United States which compete with us for markets abroad. For example, the average rate for carrying a bushel of grain an average distance of 750 miles from point of production to water navigation is less than 13c. in Canada. My information indicates a rate of 11.74c. for a haul of 144 miles in the Argentine Republic, and 8c. for a haul of 88 miles in Australia.

This is an entirely natural state of affairs, since Canadian grain must be delivered in the markets of the world in competition with the grain of other countries, and the Canadian railways must, therefore, make such charges for their proportion of the transportation and handling as, combined with ruling ocean rates and very low charges for elevation and other handling, will permit this object to be attained. Since rail haul is, in the case of Canada, a far more important portion of the journey than in Australia or the Argentine Republic Canadian rail rates on grain must rule much lower than is the case in these competing countries.

That is typical of the influences which really set Canadian railway rates. It is true, of course, in the particular case of grain rates, that their establishment on a statutory basis makes them comparatively inflexible, by preventing their increase when the traffic would bear such an increase, and thus, in compensation, preventing their lowering, when the traffic finds it difficult to bear the existing charges.

As a consequence of the method of approach to the rate situation above described, the Canadian railways, without compulsion, and in an endeavour to protect their traffic, between January 1st, 1930, and June 30th, 1934, reduced over 100 individual rates for each one which was increased.

**STANDARDS OF SERVICE:**

The same thing is largely true of standards of service. For example, when air-conditioning was applied to Canadian railway travel, this was recognized by railway companies as involving additional cost without any increase in passenger fares. Since the Canadian railways operate on the Continent of North America, their passenger service must be generally of the standards accepted on this Continent. Thus, when air-conditioning became general in the United States, it was inevitable that it would be adopted for long distance travel in Canada. Neither competition between the Canadian railway companies nor an order of the Board of Railway Commissioners was needed to effect this important change in the standards of railway service.

**COMPETITIVE FACTORS:**

After all, it is quite reasonable that this condition should prevail. The volume of railway shipment and railway travel is exposed to possible limitation from two factors among others. One is the competition from other forms of transportation. The subsidized highway transportation of this country has diverted from the railways a mass of passenger business—which now uses private motor cars, and, to a less extent, buses. It has taken away an amount of commercial freight traffic which cannot be assessed exactly. It is even more difficult to obtain figures showing the competitive effect of our great waterways. Impossible as it is to weigh precisely the effect of these forms of competition in diverting traffic from the railways, I am sure that you will realize that it is important. In addition, the Panama Canal has created a situation in which the railways find it necessary—in order to hold their transcontinental freight business—to maintain a structure of rates for this type of traffic which is out of keeping with the normal structure. When you hear, for example, that it is possible to ship goods to Vancouver from Montreal cheaper than it is to ship the same goods to Edmonton, you might remember that this is not by any desire of the railways, but because extraneous competition forces them to do it, and that one of the reasons why no downward adjustment can be made in rates not affected by highway and waterway competition is that these forms of competition have carried many other rates to a point much lower than they need or should be.

The other factor which tends to keep railway rates low is one generally forgotten. While people travel or ship goods because they desire to travel or ship goods, they can neither travel nor ship goods if the rates are too high. Thus, the one object of every railway traffic executive is to keep rates as low as is commensurate with the needs of revenue, and low enough to enable people to travel freely and to ship goods freely. When times are hard and prices low, railway rates must be kept down. In better times, they may be allowed to rise a little. If, at any time, they rise too much, business dries up.

**PUBLIC CONTROL:**

It should be clearly understood that I am not suggesting that the Board of Railway Commissioners has no valuable functions. It is my opinion that public utilities of a semi-monopolistic type should, at all times, be subject, in charges and standards of service, to the orders of a tribunal which can prevent exploitation of the public or neglect of its interests. I have, indeed, repeatedly suggested that the powers of the Board should be extended wherever this appears necessary.

May I point out in addition that a necessary condition of unification is that the Canadian Government will continue to own the Canadian National Railways? That carries with it the assumption of increased effect of the public will on the policies of both the railway systems. If the railways undertake experiments in monopolistic oppression of the people, then, under unification, this would have to be with the consent of the Government. I may enquire of your Honourable Committee whether it would be your intention to permit monopolistic abuse of the public interest by the unified railway system, or whether you have the least doubt of your ability to prevent it.

Monopoly is a word which has a sinister significance in the minds of many people. In this case it is an argument obviously designed to frighten the public, but it loses much of its terror when it is considered that in this instance monopoly will be strictly regulated by public authority; that public opinion itself is a more potent influence in the conduct of large operations than ever before, and that the attitude of railway officers towards their public responsibility is drastically different from that of fifteen or twenty years ago. These factors, combined with the heavy losses of the past twelve years due to the maintenance of competitive systems, must be given serious weight in appraising former objections to unification.

**LABOUR UNDER UNIFICATION:**

Perhaps the most important objection made to unification is the possibility that it might affect unfavourably the interests of Canadian railway workers. I believe that this question must be examined very thoroughly, but that by such examination it will be discovered that the fears expressed by the opponents of unification have no real foundation.

Unified management can only be made valuable by methods which will ultimately involve a reduction in the amount of labour employed by the railways, and it is not surprising that not only railway workers themselves, but all good citizens, express a keen desire to have the incidence of the reduction in employment under unification set out in some detail for public consideration.

The whole progress of modern civilization has sprung from the desire to save labour. Every machine which has ever been invented has been an attempt to save wasted labour, and put it to useful occupations. On the other hand, since the chief economies of unification are ultimately to be made by saving labour, it is certainly my duty to explain as carefully as possible what will happen to labour under it.

1 2 0 2 9 0

In the first place, I may point out the arithmetical fact that the annual turnover of railway labour on the Canadian Pacific is almost 5%. Each year almost 5% of our employees die, retire, seek other employment, or leave the service for other reasons. The total savings of labour under unification are estimated at 15% to 17%. Thus, assuming that the labour situation on the Canadian National System is approximately the same as on the Canadian Pacific, we can see that, in the five years, at least, which will be required to accomplish unification, a policy of not hiring additional workers would reduce the staffs of the two railway systems more than the savings of unification would involve.

I can illustrate the labour situation in another fashion; More than 20% of the present employees of the Canadian Pacific Railway have five years' or less service. That is, were we to attempt the impossible, and to make all labour savings under unification overnight, the number of employees displaced would be no greater than that of our men with five years' service or less.

It would be dishonest on my part, however, to pretend that these simple facts offer a complete answer to those who fear the minor and temporary consequences to labour of a policy of rationalizing our railway situation.

It is true that more railway workers will leave the service in the time required for unification than would be necessary to accomplish the estimated saving. This is, however, not the same thing as saying that no one will lose employment. The fact that, for example, a locomotive engineer retires does not necessarily open an immediate opportunity for the employment of an accountant or a freight checker who can be dispensed with as a result of unification. There are, however, certain compensating facts. One is that we should have available the entire employment opportunities of the two railways. That is, under unification, the transfer to useful employment of labour saved will be easier than is the case with two independent systems.

I do not think that we should fail to realize that Canadian railway employment has been on a generous and well paid basis. For example, comparing conditions in this country with those in the United States, I find that, while the number of railway employees in Canada was for 1936 14.5% below the figure of 1916, the corresponding decrease on the Class I roads in the United States was 35.3%. I find also that in Canada, for each unit of operating revenue, the railways employ over 40% more workers than do the Class I railroads of the United States. To some extent this condition results from the difference in underlying economic conditions in the two countries, such as density of population and traffic, proportion of lines of light traffic, types of traffic, and the effects of highway and waterway competition. The figures which I have quoted, however, will indicate quite clearly that Canadian railway management has not overdone labour saving.

In fact, the relations between railway management and labour in this country have been at all times such as to lead me to say with certainty that any conceivable management of the unified system will deal fairly with labour, and I am confident that, where every effort fails, and any man loses employment, public opinion will support the management of the unified system in providing equitable compensation to assist those displaced in becoming re-established in other employment.

I should like very much to be able to offer some definite promise concerning the extent of this compensation, but I think you will see the difficulties which lie in the way of an *ex parte* statement of this sort—especially at this stage of the discussion. It would not be honest for me to pretend that I can commit the Government—the representatives of the owners of the Canadian National—to a fixed labour policy. For my part, I could not consent to any plan of unification which did not include adequate provision of this nature.

There are precedents elsewhere for the application of measures to prevent labour savings under railway unification becoming oppressive to labour. The railways of the United Kingdom, in the process of amalgamation, agreed to measures for the protection of their staffs during the period of transition. It is well known that these plans worked well, and that, generally speaking, it was possible to hold labour savings under amalgamation down to the rate set by natural turnover.

As you know, in the United States also provision has been made to protect the interest of employees where measures of co-ordination are undertaken, and, in May, 1936, a specific agreement was arrived at between all the important railway companies and the representatives of railway workers. That agreement provides for compensation to employees displaced as a result of co-ordination measures.

I cannot say that it would be possible to apply precisely similar measures in Canada, since conditions in the three countries vary considerably. Nor can I venture to pledge both the Canadian railway systems to a specific labour policy after unification. I can say that any management of a unified railway system in Canada is certain to do its best to adopt the best features of both these systems—for anything else would be entirely contrary to the spirit which has ruled in the labour policies of Canadian railways in the past.

I believe that the effect of unification on labour and its interests has been genuinely misunderstood, and that once the facts of the case are known, it will cease to be possible for the opponents of railway rationalization to use this particular bogey.

If credence were given to the picture of unification as it is sometimes painted, your Honourable Committee might expect to see great numbers of railway workers thrown into the street as soon as agreement was reached for unification. That is not correct.

A study of the probable effect upon employment of the estimated economies under unified management as compared with the natural attrition of labour indicates that many more openings will be created for employment by the annual attrition withdrawals from service than there will be employees displaced under unified management arrangements to fill the positions. Let us assume that the estimated economies under unified management could proceed at the rate of 25% for each of the first two years, 20% in the third year, 15% in each of the fourth and fifth years. On this basis and with the known fact that railway labour turnover is about 5% per annum, even if we succeeded in five years in reducing our annual labour costs as much as 17% the railways would require to engage from 993 men in the first year to 2,015 in the fifth year—an average of almost 1,500 per annum—in excess of the number of employees displaced as a result of the unified management economies.

In other words, with employment at the level of 1937 there would be 22,506 positions closed in the five year period as a result of the economies, but, on the other hand, there would be 29,947 positions opened by reason of the 5% annual employment attrition, the excess being 7,441.

This is apart from any increase as a result of an improvement in traffic conditions. Should traffic volume return to the level of the year 1930, it is estimated that over 25,000 additional workers would be required as compared with the number needed with traffic volume at the level of the year 1937.

After unification is complete, of course, the full 5% of all railway posts will again be opened each year for railway workers.

I can assure you that, in any plan of unification which would be acceptable to the Canadian Pacific, proper provision for any small number of cases where it is difficult to retain present workers in the service will be made, and you may put aside the fear that labour will suffer from large scale dismissal as a result of the adoption of a plan of unification.

**CONCLUSION:**

I have attempted to deal with those detailed objections which have been raised to unification. May I now deal with the subject in a somewhat broader fashion? We hear, for example, that this community fears the loss of some of its residents, that such a merchant believes that his business will be unfavourably affected, and that, after all that I have said concerning provision for labour, we must, in the end, face the fact that unification means fewer railway workers.

Is it not a fact that all of these objections are merely the objections to economic progress? When the motor car replaced the horse-drawn carriage, and the steamship put sailing craft out of commission, all of these consequences resulted. All that those who use these objections are saying is that they believe that the unwise rioters who smashed looms in England more than a century ago, because they took the place of manual workers, were sounder economists than Adam Smith.

The only reason for accepting unification is that it is in the national interest, and it is in the national interest because every measure which will reduce the cost of carrying on the vital task of transportation in Canada is in the national interest. It is in the national interest because the public finances of this country need relief, and unification will afford it. It is for these reasons that I have come to the conclusion that unification cannot be avoided.

This is not the first time that it has been sought to make important railway economies in Canada by removing duplication. After the Government acquired the systems which now constitute the Canadian National Railways, it proceeded to seek efficiency and economy by organizing them into a single operating unit. This, since it was the amalgamation of railways under the same ownership, differed radically from the programme which I am now suggesting, but it is a fact that the object of obtaining economy is the same in both cases.

I have never welcomed unification. The Canadian Pacific is a highly developed organization, and an object of pride to all its officers and employees. Under unification, it will lose its identity—and that is a real loss to those of us who have spent a lifetime in its service.

Even with the acute competition given it by what I consider has been an unwise venture of the state into the railway field, I still believe that the Canadian Pacific can survive as an independent institution. Far from eagerness, as my critics have it, to seize the publicly owned system, I feel deep regret that, only by unification, can we remove the greatest danger of which I know to the future of the nation.

In a recent public address I said that unification is inevitable. The public need compels it.

# CHAPTER 170.

## An Act respecting Railways.

SHORT TITLE.

**1.** This Act may be cited as the Railway Act. 1919, c. 68, s. 1. Short title.

INTERPRETATION.

*Definitions.*

**2.** In this Act, and in any Special Act as hereinafter defined, in so far as this Act applies, unless the context otherwise requires, Definitions.

(1) "Board" means the Board of Railway Commissioners for Canada; "Board."

(2) "by-law," when referring to an act of the company, includes a resolution; "By-law."

(3) "charge," when used as a verb with respect to tolls, includes to quote, demand, levy, take or receive; "Charge."

(4) "company" includes a person, and where not otherwise stated or implied means "railway company," unless immediately preceded by "any", "every" or "all", in which case it means every kind of company which the context will permit of; and "railway company" or "company" when it means or includes "railway company," "Company" and "Railway Company."

(*a*) includes every such company and any person having authority to construct or operate a railway; and

(*b*) in the sections of this Act which require companies to furnish statistics and returns to the Board, or provide penalties for default in so doing, includes further any company constructing or operating a line of railway in Canada, even though such company is not otherwise within the legislative authority of the Parliament of Canada, and includes also any individual not incorporated who is the owner or lessee of a railway in Canada, or party to an agreement for the working of such a railway;

"Costs." (5) "costs" includes fees, counsel fees and expenses;

"County." (6) "county" includes any county, union of counties, riding, district, or division corresponding to a county, and any separate municipal division of a county;

"Court." (7) "court" means a superior court of the province or district, and, when used with respect to any proceedings for

(*a*) the ascertainment or payment, either to the person entitled, or into court, of compensation for lands taken, or for the exercise of powers conferred by this Act, or

(*b*) the delivery of possession of lands, or the putting down of resistance to the exercise of powers, after compensation paid or tendered,

"County court." "Superior court." includes the county court of the county where the lands lie; and "county court" and "superior court" are to be interpreted according to the Interpretation Act and amendments thereto;

"Exchequer Court." (8) "Exchequer Court" means the Exchequer Court of Canada;

"Express toll." (9) "express toll" means any toll, rate or charge to be charged by any company, or any person or corporation other than the company, to any persons, for hire or otherwise, for or in connection with the collecting, receiving, caring for or handling of any goods for the purpose of sending, carrying or transporting them by express, or for or in connection with the sending, carrying, transporting or delivery by express of any goods, or for any service incidental thereto, or for or in connection with any or either of these objects, where the whole or any portion of the carriage or transportation of such goods is by rail upon the railway of the company;

"Goods." (10) "goods" includes personal property of every description that may be conveyed upon the railway, or upon steam vessels or other vessels connected with the railway;

"Highway." (11) "highway" includes any public road, street, lane or other public way or communication;

"Inspecting Engineer." (12) "inspecting engineer" means an engineer who is directed by the Minister, or by the Board, to examine any railway or works, and includes two or more engineers, when two or more are so directed;

"Judge." (13) "judge" means a judge of a superior or county court hereinbefore mentioned, as the case may be;

"Justice." (14) "justice" means a justice of the peace acting for the province, district, county, riding, division, city or place where the matter requiring the cognizance of a justice arises; and, when any matter is authorized or required to be done by two justices, the expression "two

120294

justices" means two justices assembled and acting together;

"Lands." (15) "lands" means the lands, the acquiring, taking or using of which is authorized by this or the Special Act, and includes real property, messuages, lands, tenements and hereditaments of any tenure, and any easement, servitude, right, privilege or interest in, to, upon, under, over or in respect of the same;

"Lease." (16) "lease" includes an agreement for a lease;

"Minister." (17) "Minister" means the Minister of Railways and Canals;

"Owner." (18) "owner", when, under the provisions of this Act or the Special Act, any notice is required to be given to the owner of any lands, or when any act is authorized or required to be done with the consent of the owner, means any person who, under the provisions of this Act, or the Special Act, or any Act incorporated therewith, is enabled to sell and convey the lands to the company, and includes also a mortgagee of the lands;

"Plan" (19) "plan" means a ground plan of the lands and property taken or intended to be taken;

"Provincial Legislature." (20) "provincial legislature" or "legislature of any province" means and includes any legislative body other than the Parliament of Canada;

"Railway." (21) "railway" means any railway which the company has authority to construct or operate, and includes all branches, extensions, sidings, stations, depots, wharves, rolling stock, equipment, stores, property real or personal and works connected therewith, and also any railway bridge, tunnel or other structure which the company is authorized to construct; and, except where the context is inapplicable, includes street railway and tramway;

"Railway Act, 1888." 1888, c. 29. (22) "Railway Act, 1888," means the Act of the Parliament of Canada passed in the year one thousand eight hundred and eighty-eight, chapter twenty-nine, intituled *An Act respecting Railways*, and the several Acts in amendment thereof;

"Registrar of deeds." (23) "registrar of deeds" or "registrar" includes the registrar of land titles, or other officer with whom the title to the land is registered;

"Registry of deeds." (24) "registry of deeds," or "office of the registrar of deeds," or other words descriptive of the office of the registrar of deeds, include the land titles office, or other office in which the title to the land is registered;

"Rolling stock." (25) "rolling stock" means and includes any locomotive, engine, motor car, tender, snow-plough, flanger, and every description of car or of railway equipment designed for movement on its wheels, over or upon the rails or tracks of the company;

"Secretary." (26) "Secretary" means the Secretary of the Board;

"Sheriff." (27) "sheriff" means the sheriff of the district, county, riding, division, city or place within which are situated any lands in relation to which any matter is required to be done by a sheriff, and includes an under sheriff or other lawful deputy of the sheriff;

"Special Act." (28) "Special Act", when used with reference to a railway, means any Act under which the company has authority to construct or operate a railway, or which is enacted with special reference to such railway, whether heretofore or hereafter passed, and includes

(*a*) all such Acts,

1903, c. 71. (*b*) with respect to the Grand Trunk Pacific Railway Company, the National Transcontinental Railway Act, and any amendments thereto, and any scheduled agreements therein referred to, and

(*c*) any letters patent, constituting a company's authority to construct or operate a railway, granted under any Act, and the Act under which such letters patent were granted or confirmed;

"Telegraph." (29) "telegraph" includes wireless telegraph;

"Telegraph toll." (30) "telegraph toll," or "toll," when used with reference to telegraph, means and includes any toll, rate or charge to be charged by any company to the public, or to any person, for the transmission of messages by telegraph;

"Telephone toll." (31) "telephone toll," or "toll," when used with reference to telephone, means and includes any toll, rate or charge to be charged by any company to the public, or to any person, for use or lease of a telephone system or line, or any part thereof, or for the transmission of a message by telephone, or for installation and use or lease of telephone instruments, lines or apparatus, or for any service incidental to a telephone business;

"Toll" and "rate." (32) "toll," or "rate," when used with reference to a railway, means and includes any toll, rate, charge or allowance charged or made either by the company, or upon or in respect of a railway owned or operated by the company, or by any person on behalf or under authority or consent of the company, in connection with the carriage and transportation of passengers, or the carriage, shipment, transportation, care, handling or delivery of goods, or for any service incidental to the business of a carrier; and includes also any toll, rate, charge or allowance so charged or made in connection with rolling stock, or the use thereof, or any instrumentality or facility of carriage, shipment or transportation, irrespective of ownership or of any contract, expressed or implied, with respect to the use thereof; and includes

120296

includes also any toll, rate, charge or allowance so charged or made for furnishing passengers with beds or berths upon sleeping cars, or for the collection, receipt, loading, unloading, stopping over, elevation, ventilation, refrigerating, icing, heating, switching, ferriage, cartage, storage, care, handling or delivery of, or in respect of, goods transported, or in transit, or to be transported; and includes also any toll, rate, charge or allowance so charged or made for the warehousing of goods, wharfage or demurrage, or the like, or so charged or made in connection with any one or more of the above-mentioned objects, separately or conjointly;

"Traffic." (33) "traffic" means the traffic of passengers, goods and rolling stock;

"Train." (34) "train" includes any engine, locomotive or other rolling stock;

"Undertaking." (35) "the undertaking" means the railway and works, of whatsoever description, which the company has authority to construct or operate;

"Working expenditure." (36) "working expenditure" means and includes

(*a*) all expenses of maintenance of the railway;

(*b*) all such tolls, rents or annual sums as are paid in respect of the hire of rolling stock let to the company; or in respect of property leased to or held by the company, apart from the rent of any leased line;

(*c*) all rent charges or interest on the purchase money of lands belonging to the company, purchased but not paid for, or not fully paid for;

(*d*) all expenses of or incidental to the working of the railway and the traffic thereon, including all necessary repairs and supplies to rolling stock while on the lines of another company;

(*e*) all rates, taxes, insurance and compensation for accidents or losses, including any such compensation payable under the provisions of any Act of the Parliament of Canada or of any provincial legislature providing for compensation to workmen for injuries or in respect of an industrial disease;

(*f*) all salaries and wages of persons employed in and about the working of the railway and traffic;

(*g*) all office and management expenses, including directors' fees, and agency, legal and other like expenses;

(*h*) all costs and expenses of and incidental to the compliance by the company with any order of the Board under this Act; and

(*i*) generally, all such charges, if any, not hereinbefore otherwise specified, as, in all cases of English railway companies, are usually carried to the debit of revenue as distinguished from capital account;

"Clerk of the peace." "Justice." "Sheriff."

(37) when any matter arises in respect of any lands which are not situated wholly in any one district, county, riding, division, city or place, and which are the property of one and the same person, "clerk of the peace," "justice," and "sheriff," respectively, mean any clerk of the peace, justice or sheriff for any district, county, riding, division, city or place within which any portion of such lands is situated. 1919, c. 68, s. 2.

*Construing with Special Acts.*

General rules as to construing.

**3.** Except as in this Act otherwise provided,

(*a*) this Act shall be construed as incorporate with the Special Act; and

(*b*) where the provisions of this Act and of any Special Act passed by the Parliament of Canada relate to the same subject-matter the provisions of the Special Act shall, in so far as is necessary to give effect to such Special Act, be taken to over-ride the provisions of this Act. 1919, c. 68, s. 3.

Special Act referring to corresponding provisions.

**4.** If in any Special Act passed before the seventh day of July one thousand nine hundred and nineteen, it is enacted that any provision of any general railway Act in force at the time of the passing of such Special Act, is excepted from incorporation therewith, or if the application of any such provision is, by such Special Act, extended, limited or qualified, the provisions of this Act relating to the same subject-matter, shall, unless otherwise provided in this Act, be taken to be excepted, extended, limited, or qualified, in like manner. 1919, c. 68, s. 4.

APPLICATION OF ACT.

To what persons, companies and railways applicable.

**5.** This Act shall, subject as herein provided, apply to all persons, railway companies and railways, within the legislative authority of the Parliament of Canada, whether heretofore or hereafter, and howsoever, incorporated or authorized, except Government railways, to which however it shall apply to such extent as is specified in any Act referring or relating thereto. 1919, c. 68, s. 5.

Application to—

Foreign companies.

**6.** The provisions of this Act shall, without limiting the effect of the last preceding section, extend and apply to

(*a*) every railway company incorporated elsewhere than in Canada and owning, controlling, operating or running trains or rolling stock upon or over any line or lines of railway in Canada either owned, controlled, leased or operated by such company or companies, whether in either case such ownership, control, or operation is acquired by purchase, lease, agreement or by any other means whatsoever;

120298

Companies running trains into Canada.

(*b*) every railway company operating or running trains from any point in the United States to any point in Canada;

Railways deemed to be works for general advantage of Canada.

(*c*) every railway or portion thereof, whether constructed under the authority of the Parliament of Canada or not, now or hereafter owned, controlled, leased, or operated by a company wholly or partly within the legislative authority of the Parliament of Canada, or by a company operating a railway wholly or partly within the legislative authority of the Parliament of Canada, whether such ownership, control, or first mentioned operation is acquired or exercised by purchase, lease, agreement or other means whatsoever, and whether acquired or exercised under authority of the Parliament of Canada, or of the legislature of any province, or otherwise howsoever; and every railway or portion thereof, now or hereafter so owned, controlled, leased or operated shall be deemed and is hereby declared to be a work for the general advantage of Canada.

Railways excepted from those deemed to be works for the general advantage of Canada.

2. The provisions of the last preceding paragraph of this section shall be deemed not to include or apply to any street railway, electric suburban railway or tramway constructed under the authority of a provincial legislature, and which has not been declared to be a work for the general advantage of Canada otherwise than by the provisions of the said paragraph. 1919, c. 68, s. 6; 1920, c. 65, s. 1.

Railways declared to be for general advantage of Canada.

Special Act.

**7.** Where any railway, the construction or operation of which is authorized by a Special Act passed by the legislature of any province, is declared, by any Act of the Parliament of Canada, to be a work for the general advantage of Canada, this Act shall apply to such railway, and to the company constructing or operating the same, to the exclusion of such of the provisions of the said Special Act as are inconsistent with this Act, and in lieu of any general railway Act of the province. 1919, c. 68, s. 7.

Provincial railways connecting with or crossing Dominion Railways, subject to this Act.

**8.** Every railway, the construction or operation of which is authorized by Special Act of the legislature of any province and which connects with or crosses or may hereafter connect with or cross any railway within the legislative authority of the Parliament of Canada, shall, although not declared by Parliament to be a work for the general advantage of Canada, be subject to the provisions of this Act relating to

(*a*) the connection or crossing of one railway with or by another, so far as concerns the aforesaid connection or crossing;

(*b*) criminal matters, including offences and penalties; and

(*c*) navigable waters.

1919, c. 68, s. 8.

BOARD OF COMMISSIONERS.

*Constitution.*

Board, how constituted.

**9.** There shall be a commission, known as the Board of Railway Commissioners for Canada, consisting of six members appointed by the Governor in Council.

Court of record.

2. Such commission shall be a court of record, and have an official seal which shall be judicially noticed.

Tenure.

3. Each commissioner shall hold office during good behaviour for a period of ten years from the date of his appointment, but may be removed at any time by the Governor in Council upon address of the Senate and House of Commons.

4. A commissioner shall cease to hold office upon reaching the age of seventy-five years.

Reappointment.

5. A commissioner on the expiration of his term of office shall, if not disqualified by age, be eligible for reappointment. 1919, c. 68, s. 9.

Chief Commissioner and Assistant Chief Commissioner.

**10.** One of such commissioners shall be appointed by the Governor in Council, Chief Commissioner, and another of them Assistant Chief Commissioner of the Board.

2. Any person may be appointed Chief Commissioner who is or has been a judge of a superior court of Canada or of any province of Canada, or who is a barrister or advocate of at least ten years' standing at the bar of any such province.

3. Any person may be appointed Assistant Chief Commissioner who is or has been a judge of a superior court of Canada or of any province of Canada, or who is a barrister or advocate of at least ten years' standing at the bar of any such province, or who is a barrister or advocate of any such province and has held office as a commissioner of the Board for a period of at least ten years.

4. The Chief Commissioner shall be entitled to hold the office of Chief Commissioner, and the Assistant Chief Commissioner the office of Assistant Chief Commissioner or that of Chief Commissioner, so long as they respectively continue to be members of the Board.

Powers of Assistant Chief Commissioner.

5. The Assistant Chief Commissioner shall have all the powers of the Chief Commissioner; but such powers shall not be exercised by him except in the absence of the Chief Commissioner, and whenever he has acted it shall be conclusively

120300

clusively presumed that he so acted in the absence or disability of the Chief Commissioner within the meaning of this section. 1919, c. 68, s. 10.

Deputy Chief Commissioner.

**11.** Another of the commissioners shall be appointed, by the Governor in Council, Deputy Chief Commissioner of the Board.

Powers of Deputy Chief Commissioner.

2. In case of the absence of the Chief Commissioner and the Assistant Chief Commissioner, or of their inability to act, the Deputy Chief Commissioner shall exercise the powers of the Chief Commissioner for him or in his stead, and in such case, all regulations, orders and other documents signed by the Deputy Chief Commissioner shall have the like force and effect as if signed by the Chief Commissioner.

Presumption.

3. Whenever the Deputy Chief Commissioner appears to have acted for or instead of the Chief Commissioner, it shall be conclusively presumed that he so acted in the absence or disability of the Chief Commissioner and of the Assistant Chief Commissioner within the meaning of this section.

Authority to other commissioner.

4. Where the Chief Commissioner deems it necessary for the more speedy and convenient despatch of business he may by writing authorize any commissioner to sign regulations, orders and other documents in his stead, and when done pursuant to such authority the same shall have the like force and effect as if signed by the Chief Commissioner. 1919, c. 68, s. 11.

Quorum.

**12.** Two commissioners shall form a quorum, and not less than two commissioners shall attend at the hearing of every case: Provided that

Powers of single Commissioner.

(*a*) in any case where there is no opposing party and no notice to be given to any interested party, any one commissioner may act alone for the Board; and

(*b*) the Board, or the Chief Commissioner, may authorize any one of the commissioners to report to the Board upon any question or matter arising in connection with the business of the Board, and when so authorized such commissioner shall have all the powers of two commissioners sitting together for the purpose of taking evidence or acquiring the necessary information for the purpose of such report, and upon such report being made to the Board, it may be adopted as the order of the Board, or otherwise dealt with as to the Board seems proper.

Presiding officer.

2. The Chief Commissioner, when present, shall preside, and the Assistant Chief Commissioner, when present, in the absence of the Chief Commissioner, shall preside, and the opinion of either of them upon any question arising when he is presiding, which in the opinion of the commissioners is a question of law, shall prevail.

Questions of law.

CANADA

120302

120301

Vacancy.

3. No vacancy in the Board shall impair the right of the remaining commissioners to act. 1919, c. 68, s. 12.

Interest, kindred or affinity.

Illness, absence, etc.

**13.** Whenever any commissioner is interested in any matter before the Board, or of kin or affinity to any person interested in any such matter, the Governor in Council may, either upon the application of such commissioner or otherwise, appoint some disinterested person to act as commissioner *pro hac vice;* and the Governor in Council may also, in case of the illness, absence or inability to act of any commissioner, appoint a commissioner *pro hac vice:* Provided that no commissioner shall be disqualified to act by reason of interest or of kindred or affinity to any person interested in any matter before the Board. 1919, c. 68, s. 13.

Commissioners and officers not to hold interest in stock or equipment.

**14.** No commissioner or officer of the Board shall directly or indirectly,

(*a*) hold, purchase, take or become interested in any stock, share, bond, debenture or other security, of any company subject to this Act; or

(*b*) have any interest in any device, appliance, machine, patented process or article, or any part thereof, which may be required or used as a part of the equipment of railways or of any rolling stock to be used thereon, or of any other work or undertaking subject to this Act.

If acquired by will or succession.

2. If any such stock, share, bond or other security, device, appliance, machine, patented process or article, or any part thereof or any interest therein, comes to or vests in any commissioner or officer of the Board by will or succession for his own benefit, he shall, within three months thereafter absolutely sell and dispose of the same, or his interest therein. 1919, c. 68, s. 14.

Residence.

**15.** Each commissioner shall during his term of office reside in the city of Ottawa, or within five miles thereof, or within such distance thereof as the Governor in Council at any time determines. 1919, c. 68, s. 15.

Whole time.

**16.** The commissioners shall devote the whole of their time to the performance of their duties under this Act, and shall not accept or hold any office or employment inconsistent with this section. 1919, c. 68, s. 16.

*Offices.*

Offices in Ottawa.

**17.** The Governor in Council shall, upon the recommendation of the Minister, provide, within the city of Ottawa, a suitable place in which the sessions of the Board may be held, and also suitable offices for the commissioners, and for the Secretary, and the officers and employees of the

R.S., 1927.

Board, and all necessary furnishings, stationery and equipment for the conduct, maintenance and performance of the duties of the Board.

Offices elsewhere than in Ottawa.

2. The Governor in Council, upon the recommendation of the Minister, may establish at any place or places in Canada such office or offices as are required for the Board, and may provide therefor the necessary accommodation, furnishings, stationery and equipment. 1919, c. 68, s. 17.

*Sittings and Disposal of Business.*

Sittings.

**18.** The Board may hold more than one sitting at the same time, and, whenever circumstances render it expedient to hold a sitting elsewhere than in Ottawa, may hold such sitting in any part of Canada. 1919, c. 68, s. 18.

Sittings, how conducted.

**19.** The commissioners shall sit at such times and conduct their proceedings in such manner as may seem to them most convenient for the speedy despatch of business.

2. They may, subject to the provisions of this Act, sit either together or separately, and either in private or in open court: Provided that any complaint made to them shall, on the application of any party to the complaint, be heard and determined in open court. 1919, c. 68, s. 19.

Arrangement of sittings and business.

**20.** Subject to the provisions of this Act, the Board may make rules and provisions respecting

(*a*) the sittings of the Board;

(*b*) the manner of dealing with matters and business before the Board;

(*c*) the apportionment of the work of the Board among its members, and the assignment of members to sit at hearings, and to preside thereat; and

(*d*) generally, the carrying on of the work of the Board, the management of its internal affairs, and the duties of its officers and employees;

and in the absence of other rule or provision as to any such matter, such matter shall be in the charge and control of the Chief Commissioner or such other member or members of the Board as the Board directs. 1919, c. 68, s. 20.

*Experts.*

Experts.

**21.** The Governor in Council may, from time to time, or as the occasion requires, appoint one or more experts, or persons having technical or special knowledge of the matters in question, to assist in an advisory capacity in respect of any matter before the Board. 1919, c. 68, s. 21.

R.S., 1927.

120303

*Secretary.*

Secretary.

**22.** There shall be a Secretary of the Board who shall be appointed by the Governor in Council, and who shall hold office during pleasure, and reside in the city of Ottawa. 1919, c. 68, s. 22.

Duties of Secretary.

**23.** It shall be the duty of the Secretary

(*a*) to keep a record of all proceedings conducted before the Board or any commissioner under this Act;

(*b*) to have the custody and care of all records and documents belonging or appertaining to the Board or filed in his office;

(*c*) to obey all rules and directions which may be made or given by the Board, or the Chief Commissioner, touching his duties or office, and in the event of a conflict of such rules or directions those made by the Board shall prevail;

(*d*) to have every regulation and order of the Board drawn pursuant to the direction of the Board, duly signed and sealed with the official seal of the Board, and filed in the office of the Secretary.

Record books.

2. The Secretary shall keep in his office suitable books of record, in which he shall enter a true copy of every such regulation and order, and every other document which the Board may require to be entered therein, and such entry shall constitute and be the original record of any such regulation or order.

Certified copies.

3. Upon application of any person, and on payment of such fees as the Board may prescribe, the Secretary shall deliver to such applicant a certified copy of any such regulation or order. 1919, c. 68, s. 23.

Acting Secretary.

**24.** In the absence of the Secretary from illness or any other cause, the Board may appoint from its staff an acting secretary, who shall thereupon act in the place of the Secretary, and exercise his powers. 1919, c. 68, s. 24.

*Staff.*

Staff of Board.

**25.** Such other officers, clerks and employees as are necessary for the proper conduct of the business of the Board may be appointed in the manner authorized by law. 1919, c. 68, s. 25.

*Salaries and Payments.*

Commissioners.

**26.** The Chief Commissioner shall be paid an annual salary of twelve thousand five hundred dollars, the Assistant Chief Commissioner an annual salary of nine thousand dollars, and each of the other commissioners an annual salary of eight thousand dollars.

R.S., 1927.

120304

When and how payable.

2. Such salaries shall be paid monthly out of the unappropriated funds in the hands of the Receiver General for Canada.

Secretary.

3. The Secretary may be paid out of money appropriated by Parliament for such purpose such annual salary as may from time to time be fixed by the Governor in Council. 1919, c. 68, s. 26.

Staff.

**27.** The officers, clerks and employees attached to the Board may be paid out of such money as may be appropriated by Parliament for the purpose. 1919, c. 68, s. 27.

Others.

**28.** Whenever the Board, by virtue of any power vested in it by this Act or any other Act of the Parliament of Canada appoints or directs any person, other than a member of the staff of the Board, to perform any service, such person shall be paid therefor such sum for services and expenses as the Governor in Council may, upon the recommendation of the Board, determine. 1919, c. 68, s. 28.

Paid monthly.

**29.** The salaries or remuneration of all such officers, clerks, stenographers, and messengers, and all the expenses of the Board incidental to the carrying out of this Act, including all actual and reasonable travelling expenses of the commissioners and the Secretary, and of such members of the staff of the Board as may be required by the Board to travel, necessarily incurred in attending to the duties of their office, shall be paid monthly out of moneys to be provided by Parliament. 1919, c. 68, s. 29.

*Franking Privilege.*

Correspondence free of postage.

**30.** All letters or mailable matter addressed to the Board or the Secretary at Ottawa, or sent by the Board or the Secretary from Ottawa, shall be free of Canada postage under such regulations as are from time to time made in that regard by the Governor in Council. 1919, c. 68, s. 30.

*Annual Report.*

Annual report to Governor in Council.

**31.** The Board shall, within two months after the thirty-first day of December in each year, make to the Governor in Council through the Minister, an annual report for the year ended on the thirty-first day of December, showing briefly,

(*a*) applications to the Board and summaries of the findings thereon under this Act;

(*b*) summaries of the findings of the Board in regard to any matter or thing respecting which the Board has acted of its own motion, or upon the request of the Minister;

R.S., 1927.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120305

(*c*) such other matters as appear to the Board to be of public interest in connection with the persons, companies and railways subject to this Act.

Report to be laid before Parliament.

2. The said report shall be forthwith laid before both Houses of Parliament, if then in session, and if not in session then during the first fifteen days of the next ensuing session of Parliament. 1919, c. 68, s. 31.

*General Jurisdiction and Powers.*

Powers of Railway Committee transferred.

**32.** Whenever, by an Act or document, the Railway Committee of the Privy Council is given any power or authority, or charged with any duty with regard to any company, railway, matter or thing, such power, authority or duty may, or shall, be exercised by the Board. 1919, c. 68, s. 32.

Jurisdiction.

**33.** The Board shall have full jurisdiction to inquire into, hear and determine any application by or on behalf of any party interested,

(*a*) complaining that any company, or person, has failed to do any act, matter or thing required to be done by this Act, or the Special Act, or by any regulation, order or direction made thereunder by the Governor in Council, the Minister, the Board, or any inspecting engineer or other lawful authority, or that any company or person has done or is doing any act, matter or thing contrary to or in violation of this Act, or the Special Act, or any such regulation, order, or direction; or

(*b*) requesting the Board to make any order, or give any direction, leave, sanction or approval, which by law it is authorized to make or give, or with respect to any matter, act or thing, which by this Act, or the Special Act, is prohibited, sanctioned or required to be done.

Mandatory orders.

2. The Board may order and require any company or person to do forthwith, or within or at any specified time, and in any manner prescribed by the Board, so far as is not inconsistent with this Act, any act, matter or thing which such company or person is or may be required to do under this Act, or the Special Act, and may forbid the doing or continuing of any act, matter or thing which is contrary to this Act, or the Special Act; and shall for the purposes of this Act have full jurisdiction to hear and determine all matters whether of law or of fact.

Restraining orders.

All powers of a superior court.

3. The Board shall, as respects the attendance and examination of witnesses, the production and inspection of documents, the enforcement of its orders, the entry on and inspection of property, and other matters necessary or proper for the due exercise of its jurisdiction, have all such powers, rights and privileges as are vested in a superior court.

120306

Appointment of receiver not to oust jurisdiction of Board.

**4.** The fact that a receiver, manager, or other official of any railway, or a receiver of the property of a railway company, has been appointed by any court in Canada or any province thereof, or is managing or operating a railway under the authority of any such court, shall not be a bar to the exercise by the Board of its jurisdiction; but every such receiver, manager, or official shall be bound to manage and operate any such railway in accordance with this Act and with the orders and directions of the Board, whether general or referring particularly to such railway; and every such receiver, manager, or official, and every person acting under him, shall obey all orders of the Board within its jurisdiction in respect of such railway, and be subject to have them enforced against him by the Board, notwithstanding the fact that such receiver, manager, official, or person is appointed by or acts under the authority of any court; and wherever by reason of insolvency, sale under mortgage, or any other cause, a railway or section thereof is operated, managed or held otherwise than by the company, the Board may make any order it deems proper for adapting and applying the provisions of this Act to such case.

Adapting and applying Act.

Certain decisions of Board conclusive.

**5.** The decision of the Board as to whether any company, municipality or person is or is not a party interested within the meaning of this section shall be binding and conclusive upon all companies, municipalities and persons. 1919, c. 68, s. 33.

Power to make orders and regulations.

**34.** The Board may make orders or regulations

(*a*) with respect to any matter, act or thing which by this or the Special Act is sanctioned, required to be done, or prohibited;

(*b*) generally for carrying this Act into effect;

(*c*) for exercising any jurisdiction conferred on the Board by any other Act of the Parliament of Canada.

Application.

2. Any such orders or regulations may be made to apply to all cases or to any particular case or class of cases, or to any particular district, or to any railway or other work, or section or portion thereof; and the Board may exempt any railway or other work, or section or portion thereof, from the operation of any such order or regulation for such time or during such period as the Board deems expedient; and such orders or regulations may be for such time as the Board deems fit, and may be rescinded, amended, changed, altered or varied as the Board thinks proper.

Penalties.

3. The Board may by regulation or order provide penalties, when not already provided in this Act, to which every company or person who offends against any regulation or order made by the Board shall be liable.

ARCHIVES PUBLIQUES
CANADA

120307

Other liability.

**4.** The imposition of any such penalty shall not lessen or affect any other liability which any company or person may have incurred. 1919, c. 68, s. 34.

Jurisdiction of Board as to agreements.

**35.** Where it is complained by or on behalf of the Crown or any municipal or other corporation or any other person aggrieved, that the company has violated or committed a breach of an agreement between the complainant and the company—or by the company that any such corporation or person has violated or committed a breach of an agreement between the company and such corporation or person,—for the provision, construction, reconstruction, alteration, installation, operation, use or maintenance by the company, or by such corporation or person, of the railway or of any line of railway intended to be operated in connection with or as part of the railway, or of any structure, appliance, equipment, works, renewals or repairs upon or in connection with the railway, the Board shall hear all matters relating to such alleged violation or breach, and shall make such order as to the Board may seem reasonable and expedient, and in such order may, in its discretion, direct the company, or such corporation or person, to do such things as are necessary for the proper fulfilment of such agreement, or to refrain from doing such acts as constitute a violation or a breach thereof. 1919, c. 68, s. 35.

Board may act upon its own motion.

**36.** The Board may, of its own motion, or shall, upon the request of the Minister, inquire into, hear and determine any matter or thing which, under this Act, it may inquire into, hear and determine upon application or complaint, and with respect thereto shall have the same powers as, upon any application or complaint, are vested in it by this Act. 1919, c. 68, s. 36.

From time to time.

**37.** Any power or authority vested in the Board may, though not so expressed, be exercised from time to time, or at any time, as the occasion may require. 1919, c. 68, s. 37.

Governor in Council may refer to Board for report or action.

**38.** The Governor in Council may at any time refer to the Board for a report, or other action, any question, matter or thing arising, or required to be done, under this Act, or the Special Act, or any other Act of the Parliament of Canada, and the Board shall without delay comply with the requirements of such reference. 1919, c. 68, s. 38.

Works ordered by the Board.

**39.** When the Board, in the exercise of any power vested in it, in and by any order directs or permits any structure, appliances, equipment, works, renewals, or repairs to be provided, constructed, reconstructed, altered, installed,

120308

operated, used or maintained, it may, except as otherwise expressly provided, order by what company, municipality or person, interested or affected by such order, as the case may be, and when or within what time and upon what terms and conditions as to the payment of compensation or otherwise, and under what supervision, the same shall be provided, constructed, reconstructed, altered, installed, operated, used and maintained.

Cost, by whom paid.

2. The Board may, except as otherwise expressly provided, order by whom, in what proportion, and when, the cost and expenses of providing, constructing, reconstructing, altering, installing and executing such structures, equipment, works, renewals, or repairs, or of the supervision, if any, or of the continued operation, use or maintenance thereof, or of otherwise complying with such order, shall be paid. 1919, c. 68, s. 39.

Approval of certain works after construction.

**40.** Whenever any Act of the Parliament of Canada requires or directs that before the doing of any work the approval of the Board must be first obtained, and whenever any such work has been done without such approval, the Board shall nevertheless have power to approve of the same and to impose any terms and conditions upon such company that may be thought proper in the premises: Provided that where the doing of such work affects the safety of the public or the employees, no such approval shall be given without due notice and hearing. 1919, c. 68, s. 40.

Extension of time specified by Board.

**41.** When any work, act, matter or thing is, by any regulation, order or decision of the Board, required to be done, performed or completed within a specified time, the Board may, if the circumstances of the case in its opinion so require, upon notice and hearing or, in its discretion, upon *ex parte* application, extend the time so specified; but where such regulation, order or decision requires any act, matter or thing to be done for the safety of the public or the employees of the railway, no extension shall be granted without hearing on notice. 1919, c. 68, s. 41.

Employment of counsel in public interest.

**42.** The Board may, in any application, proceeding or matter of special importance pending before it, if in the opinion of the Board the public interest so requires, apply to the Minister of Justice to instruct counsel to conduct or argue the case or any particular question arising in the application, proceeding or matter as to any public interest which is or may be affected thereby or by any order or decision which may be made therein; and, upon such application to him by the Board, or of his own motion, the Minister of Justice may instruct counsel accordingly. 1919, c. 68, s. 42.

120309

Stated case for Supreme Court of Canada.

**43.** The Board may of its own motion, or upon the application of any party, and upon such security being given as it directs, or at the request of the Governor in Council, state a case, in writing, for the opinion of the Supreme Court of Canada upon any question which in the opinion of the Board is a question of law or of the jurisdiction of the Board.

Proceedings thereon.

2. The Supreme Court of Canada shall hear and determine such question, and remit the matter to the Board with the opinion of the Court thereon. 1919, c. 68, s. 43.

Effect of judgment of other courts.

**44.** In determining any question of fact, the Board shall not be concluded by the finding or judgment of any other court, in any suit, prosecution or proceeding involving the determination of such fact, but such finding or judgment shall, in proceedings before the Board, be *primâ facie* evidence only.

*Lis pendens.*

2. The pendency of any suit, prosecution or proceeding, in any other court, involving questions of fact, shall not deprive the Board of jurisdiction to hear and determine the same questions of fact.

Findings of fact conclusive.

3. The finding or determination of the Board upon any question of fact within its jurisdiction shall be binding and conclusive. 1919, c. 68, s. 44.

*Orders and Decisions.*

Orders may come into force:

Upon contingency;

Upon terms;

For limited time.

**45.** The Board may direct in any order that such order or any portion or provision thereof, shall come into force at a future time or upon the happening of any contingency, event or condition in such order specified, or upon the performance to the satisfaction of the Board, or a person named by it, of any terms which the Board may impose upon any party interested, and the Board may direct that the whole, or any portion of such order, shall have force for a limited time, or until the happening of a specified event.

Interim orders.

2. The Board may, instead of making an order final in the first instance, make an interim order, and reserve further directions either for an adjourned hearing of the matter, or for further application. 1919, c. 68, s. 45.

Relief.

**46.** Upon any application made to the Board, the Board may make an order granting the whole or part only of such application, or may grant such further or other relief, in addition to or in substitution for that applied for, as to the Board may seem just and proper, as fully in all respects as if such application had been for such partial, other, or further relief. 1919, c. 68, s. 46.

120310

Interim *ex parte* order.

**47.** The Board may, if the special circumstances of any case so require, make an interim *ex parte* order authorizing, requiring or forbidding anything to be done which the Board would be empowered, on application, notice and hearing, to authorize, require or forbid; but no such interim order shall be made for any longer time than the Board may deem necessary to enable the matter to be heard and determined. 1919, c. 68, s. 47.

Order need not show jurisdiction.

**48.** No order of the Board need show upon its face that any proceeding or notice was had or given, or any circumstance necessary to give it jurisdiction to make such order. 1919, c. 68, s. 48.

Rule of court.

**49.** Any decision or order, made by the Board may be made a rule, order or decree of the Exchequer Court, or of any superior court of any province of Canada, and shall be enforced in like manner as any rule, order or decree of such court.

Practice.

2. To make such decision or order a rule, order or decree of any such court, the usual practice and procedure of the court in such matters may be followed; or, in lieu thereof, the Secretary may make a certified copy of such decision or order, upon which shall be made the following endorsement signed by the Chief Commissioner and sealed with the official seal of the Board:—

"To move to make the within a rule (order *or* decree, *as the case may be*) of the Exchequer Court of Canada (*or as the case may be*).

"Dated this day of A.D. 19

"A.B.

[Seal.] "Chief Commissioner of the Board of Railway Commissioners for Canada".

Copy to the registrar.

3. The Secretary may forward such certified copy, so endorsed, to the registrar, or other proper officer of such court, who shall, on receipt thereof, enter the same as of record, and the same shall thereupon become and be such rule, order or decree of such court.

When order rescinded or changed. 1888, c. 29.

4. When a decision or order of the Board under this Act, or of the Railway Committee of the Privy Council under the Railway Act 1888, has been made a rule, order or decree of any court, any order or decision of the Board rescinding or changing the same shall be deemed to cancel the rule, order or decree of such court, and may, in like manner, be made a rule, order or decree of such court.

Optional to enforce otherwise.

5. It shall be optional with the Board, either before or after its decision or order is made a rule, order or decree of any court, to enforce such decision or order by its own action. 1919, c. 68, s. 49.

In *Canada Gazette.*

**50.** Any rule, regulation, order or decision of the Board, shall, when published by the Board, or by leave of the Board, for three weeks in the *Canada Gazette,* and while the same remains in force, have the like effect as if enacted in this Act, and all courts shall take judicial notice thereof. 1919, c. 68, s. 50.

*Review and Appeal.*

Board may review, etc.

**51.** The Board may review, rescind, change, alter or vary any order or decision made by it, or may rehear any application before deciding it. 1919, c. 68, s. 51.

Governor in Council may vary or rescind.

**52.** The Governor in Council may at any time, in his discretion, either upon petition of any party, person or company interested, or of his own motion, and without any petition or application, vary or rescind any order, decision, rule or regulation of the Board, whether such order or decision is made *inter partes* or otherwise, and whether such regulation is general or limited in its scope and application; and any order which the Governor in Council may make with respect thereto shall be binding upon the Board and upon all parties.

Appeal to Supreme Court as to jurisdiction by leave of Judge.

2. An appeal shall lie from the Board to the Supreme Court of Canada upon a question of jurisdiction, upon leave therefor being obtained from a judge of the said Court upon application made within one month after the making of the order, decision, rule or regulation sought to be appealed from or within such further time as the judge under special circumstances shall allow, and upon notice to the parties and the Board, and upon hearing such of them as appear and desire to be heard, and the costs of such application shall be in the discretion of the judge.

Appeal to Supreme Court by leave of Board.

3. An appeal shall also lie from the Board to such Court upon any question which in the opinion of the Board is a question of law, or a question of jurisdiction, or both, upon leave therefor having been first obtained from the Board within one month after the making of the order or decision sought to be appealed from, or within such further time as the Board under special circumstances shall allow, and after notice to the opposite party stating the grounds of appeal; and the granting of such leave shall be in the discretion of the Board.

Entry of application.

4. No appeal, after leave therefor has been obtained under subsection two or three of this section, shall lie unless it is entered in the said Court within sixty days from the making of the order granting leave to appeal.

Security for costs.

5. Upon such leave being obtained the party so appealing shall deposit with the Registrar of the Supreme Court of Canada the sum of two hundred and fifty dollars, by way

120312

of security for costs, and thereupon the Registrar shall set the appeal down for hearing at the nearest convenient time; and the party appealing shall, within ten days after the appeal has been so set down, give to the parties affected by the appeal, or the respective solicitors by whom such parties were represented before the Board, and to the Secretary, notice in writing that the case has been so set down to be heard in appeal as aforesaid; and the said appeal shall be heard by such Court as speedily as practicable.

Notice of appeal.

Powers of the Court.

6. On the hearing of any appeal, the Court may draw all such inferences as are not inconsistent with the facts expressly found by the Board, and are necessary for determining the question of jurisdiction, or law, as the case may be, and shall certify its opinion to the Board, and the Board shall make an order in accordance with such opinion.

Board may be heard.

7. The Board shall be entitled to be heard by counsel or otherwise, upon the argument of any such appeal.

Costs.

8. The Court shall have power to fix the costs and fees to be taxed, allowed and paid upon such appeals, and to make rules of practice respecting appeals under this section; and, until such rules are made, the rules and practice applicable to appeals from the Exchequer Court shall be applicable to appeals under this Act.

Practice.

Members of Board not liable for costs.

9. Neither the Board nor any member of the Board shall in any case be liable to any costs by reason or in respect of any appeal or application under this section.

10. Save as provided in this section

Proceedings of Board final save as above.

(*a*) every decision or order of the Board shall be final; and

(*b*) no order, decision or proceeding of the Board shall be questioned or reviewed, restrained or removed by prohibition, injunction, *certiorari,* or any other process or proceeding in any court. 1919, c. 68, s. 52.

*Practice and Procedure.*

Rules of practice and procedure.

**53.** The Board may make general rules regulating, so far as not inconsistent with the express provisions of this Act, its practice and procedure. 1919, c. 68, s. 53.

*Notice and Service.*

Notices, how signed: By Board;

**54.** Any notice required or authorized to be given in writing

(*a*) by the Board, may be signed by the Secretary or Chief Commissioner;

By Minister and others;

(*b*) by the Minister, inspecting engineer, or other officer or person appointed by the Minister, or the Board, may be signed by the Minister, or by such inspecting engineer, officer or other person, as the case may be;

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120313

By company or corporation;

(*c*) by any company or corporation, may be signed by the president or secretary, or mayor, warden, reeve or other principal officer thereof, or by its duly authorized agent or solicitor; and

By any person.

(*d*) by any person, may be signed by such person or his duly authorized agent or solictor. 1919, c. 68, s. 54.

Mode of service.

**55.** Service of any notice, summons, regulation, order, direction, decision, report or other document, unless in any case otherwise provided, may be effected

On companies required to name agent.

(*a*) upon a railway, telegraph, telephone, or express company to which this Act in whole or in part applies, by delivering the document or a copy thereof to the person entered by the company as its agent in the agents' book in subsection two of this section provided for; or at his residence, to any member of his household; or at the place of business or other place entered in the agents' book, to any clerk or adult person in his employ; or if at the time of attendance to serve any document the place of business or other place aforesaid is closed or no one is in attendance therein for receiving service, service of the document may be effectively made by mailing the same or a copy thereof at any time during the same day or the next following day by registered letter, postage prepaid, addressed to the agent at such place of business or other place, and the service shall be deemed to have been effected at the time of attendance for service; or if the company has not caused the required entry to be made in the agents' book, then posting up the document or a copy thereof in the office of the Secretary of the Board shall be effective service upon the company, unless the Board otherwise orders; but the Board may in any case direct that the fact of service upon an agent and the nature of the document served shall be communicated to the company by telegraph, or may make any other order or direction it deems proper as to such service;

Railway companies.

(*b*) upon any railway company, whether included in the last preceding paragraph or not, by delivering the document or a copy thereof to the president, a vice-president, or a managing director, or the secretary or superintendent of the company; or at the head or any principal office of the company, to some adult person in its employ;

Other companies.

(*c*) upon any company other than a railway company, whether such company is included in paragraph (*a*) or not, by delivering the document or a copy thereof to the president, a vice-president, or the manager or secretary of the company; or at its head office, to some adult person in its employ;

120314

Municipalities.

(*d*) upon a municipality or civic or municipal corporation, by delivering the document or a copy thereof to the mayor, warden, reeve, secretary, treasurer, clerk, chamberlain or other principal officer thereof;

Co-partnerships.

(*e*) upon a firm or co-partnership, by delivering the document or a copy thereof to any member of such firm or co-partnership; or at the last place of abode of any such member, to any adult member of his household; or at the office or place of business of the firm, to a clerk employed therein;

Individuals.

(*f*) upon an individual, by delivering the document or a copy thereof to him; or at his last place of abode, to any adult member of his household; or at his office or place of business, to a clerk in his employ:

Order for service by publication.

Provided that if, in any case within the jurisdiction of the Minister, or the Board, it is made to appear to the satisfaction of the Minister, or the Board, as the case may be, that service cannot conveniently be made in the manner above provided, the Minister, or the Board, as the case may be, may order and allow service to be made by publication of the document or notice thereof for any period not less than three weeks in the *Canada Gazette*, and also, if so ordered, in any other newspaper; and such publication shall be deemed to be equivalent to service in the manner above provided.

Agents' book.

2. There shall be kept in the office of the Secretary of the Board a book to be called the agents' book in which every railway, telegraph, telephone, and express company to which this Act in whole or in part applies shall enter its name and the place of its head office and the name of an agent at Ottawa and his place of business or some other proper place within Ottawa where he may be served for such company. 1919, c. 68, s. 55.

Duty of company upon being served.

**56.** Every company shall, as soon as possible after receiving or being served with any regulation, order, direction, decision, notice, report or other document of the Minister, or the Board, or the inspecting engineer, notify the same to each of its officers and servants performing duties which are or may be affected thereby, by delivering a copy to him or by posting up a copy in some place where his work or his duties, or some of them, are to be performed. 1919, c. 68, s. 56.

Notice of application.

**57.** Unless otherwise provided, fifteen days' notice of any application to the Board, or of any hearing by the Board, shall be sufficient: Provided that the Board may in any case direct longer notice or allow notice for any period less than fifteen days. 1919, c. 68, s. 57.

120315

Notice of application for permission to work on Sunday.

**58.** Notice of any application to the Board for permission as provided by the Lord's Day Act, to perform any work on the Lord's Day in connection with the freight traffic of any railway, shall be given to the Department of Railways and Canals, and shall fully set out the reasons relied upon.

Costs.

2. The costs of any such application shall be borne by the applicant, and if more than one, in such proportions as the Board determines.

Procedure in other respects.

3. In all other respects the procedure provided by this Act, shall, so far as applicable, apply to any such application. 1919, c. 68, s. 58.

*Ex parte.*

**59.** Except as herein otherwise provided, when the Board is authorized to hear an application, complaint or dispute, or make any order, upon notice to the parties interested, it may, upon the ground of urgency, or for other reason appearing to the Board to be sufficient, notwithstanding any want of or insufficiency in such notice, make the like order or decision in the matter as if due notice had been given to all parties; and such order or decision shall be as valid and take effect in all respects as if made on due notice.

Rehearing.

2. Any company or person entitled to notice and not sufficiently notified may, at any time within ten days after becoming aware of such order or decision, or within such further time as the Board may allow, apply to the Board to vary, amend or rescind such order or decision, and the Board shall thereupon, on such notice to other parties interested as it may in its discretion think desirable, hear such application, and either amend, alter or rescind such order or decision, or dismiss the application, as may seem to it just and right. 1919, c. 68, s. 59.

*Amending Proceedings.*

Amendments.

**60.** The Board may, upon terms or otherwise, make or allow any amendments in any proceedings before it. 1919, c. 68, s. 60.

*Costs.*

Costs.

**61.** The costs of and incidental to any proceeding before the Board, except as herein otherwise provided, shall be in the discretion of the Board, and may be fixed in any case at a sum certain, or may be taxed.

Payment.

2. The Board may order by whom and to whom any costs are to be paid, and by whom the same are to be taxed and allowed.

Scale.

3. The Board may prescribe a scale under which such costs shall be taxed. 1919, c. 68, s. 61.

120316

*Witnesses and Evidence.*

Powers regarding witnesses and evidence.

**62.** The Board may order that any witness resident or present in Canada may be examined upon oath before, or make production of books, papers, documents or articles to, any one member of the Board, or before or to any officer of the Board, or before or to any other person named for the purpose by the order of the Board, and may make such orders as seem to it proper for securing the attendance of such witness and his examination, and the production by him of books, papers, documents, or articles, and the use of the evidence so obtained, and otherwise exercise, for the enforcement of such orders or punishment for disobedience thereof, all powers that are exercised by any superior court in Canada for the enforcement of subpœnas to witnesses or punishment of disobedience thereof: Provided that no person shall be compellable, against his will, to attend for such examination or production at any place outside the province in which he is served with the order of the Board for the purpose.

Commissions to take evidence in foreign countries.

2. The Board may issue commissions to take evidence in a foreign country, and make all proper orders for the purpose, and for the return and use of the evidence so obtained. 1919, c. 68, s. 62.

Evidence by affidavit.

**63.** The Board may accept evidence upon affidavit or written affirmation, in cases in which it seems to it proper to do so.

Who may administer oaths in Canada.

2. All persons authorized to administer oaths to be used in any of the superior courts of any province may administer oaths in such province to be used in applications, matters or proceedings before the Board.

Commissioners for Supreme and Exchequer Courts.

3. All persons authorized by the Governor in Council to administer oaths within or out of Canada, in or concerning any proceeding had or to be had in the Supreme Court of Canada or in the Exchequer Court of Canada, may administer oaths in or concerning any application, matter, or proceeding before the Board.

Oaths outside Canada.

4. An oath administered out of Canada, before any commissioner authorized to take affidavits to be used in His Majesty's High Court of Justice in England, or before any notary public, certified under his hand and official seal, or before the mayor or chief magistrate of any city, borough or town corporate in Great Britain or Ireland, or in any colony or possession of His Majesty out of Canada, or in any foreign country, and certified under the common seal of such city, borough, or town corporate, or before a judge of any court of supreme jurisdiction in any colony or possession of His Majesty, or dependency of the Crown out of Canada, or before any consul, vice-consul, acting-consul.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120317

consul, pro-consul or consular agent of His Majesty exercising his functions in any foreign place, certified under his official seal, concerning any application, matter or proceeding had or to be had by or before the Board, shall be as valid and of like effect, to all intents, as if it had been administered before a person authorized by the Governor in Council as in this section provided.

Documents in testimony of administration of oaths.

5. Every document purporting to have affixed, imprinted or subscribed thereon or thereto, the signature of any such person or commissioner so authorized as aforesaid, or the signature or official seal of any such notary public, or the signature of any such mayor or chief magistrate and the common seal of the corporation, or the signature and official seal of any such consul, vice-consul, acting-consul, pro-consul or consular agent, in testimony of any oath having been administered by or before him, shall be admitted in evidence before the Board without proof of any such signature or seal being the signature or seal of the person or corporation whose signature or seal it purports to be, or of the official character of such person.

Informalities shall not invalidate.

6. No informality in the heading or other formal requisites of any oath made before any person under any provision of this section shall be an objection to its reception in evidence before the Board, if the Board thinks proper to receive it; and if it is actually sworn to by the person making it before any person duly authorized thereto, and is received in evidence, no such informality shall be set up to defeat an indictment for perjury. 1919, c. 68, s. 63.

Fees and allowances.

**64.** Every person summoned to attend before the Minister or the Board, or before any inspecting engineer, or person appointed under this Act to make inquiry and report shall, in the discretion of the Minister or the Board, receive the like fees and allowances for so doing as if summoned to attend before the Exchequer Court. 1919, c. 68, s. 64.

No person to be excused from producing.

**65.** No person shall be excused from attending and producing books, papers, tariffs, contracts, agreements and documents, in obedience to the subpœna or order of the Board, or of any person authorized to hold any investigation or inquiry under this Act, or in any cause or proceeding based upon or arising out of any alleged violation of this Act, on the ground that the documentary evidence required of him may tend to criminate him or subject him to any proceeding or penalty; but no such book, paper, tariffs, contract, agreement or document so produced shall be used or receivable against such person in any criminal

120318

proceeding thereafter instituted against him, other than a prosecution for perjury in giving evidence upon such investigation or inquiry, cause or proceeding. 1919, c. 68, s. 65.

Documents issued by the company.

**66.** In any proceeding before the Board and in any action or proceeding under this Act, every written or printed document purporting to have been issued or authorized by the company, or any officer, agent, or employee of the company, or any other person or company for or on its behalf, shall, as against the company, be received as *primâ facie* evidence of the issue of such document by the company and of the contents thereof, without any further proof than the mere production of such document. 1919, c. 68, s. 66.

Documents issued by Minister, Board or engineer.

**67.** Every document purporting to be signed by the Minister, or by the Chief Commissioner and Secretary or either of them, or by an inspecting engineer, shall, without proof of any such signature, be *primâ facie* evidence that such document was duly signed and issued by the Minister, the Board, or inspecting engineer, as the case may be.

Copies.

2. If such document purports to be a copy of any regulation, order, direction, decision or report made or given by the Minister, the Board, or an inspecting engineer, it shall be *primâ facie* evidence of such regulation, order, direction, decision or report. 1919, c. 68, s. 67.

Documents certified by Secretary.

**68.** Any document purporting to be certified by the Secretary as being a copy of any plan, profile, book of reference or other document deposited with the Board, or of any portion thereof, shall, without proof of the signature of the Secretary, be *primâ facie* evidence of such original document, and that the same is so deposited, and is signed, certified, attested or executed by the persons by whom and in the manner in which, the same purports to be signed, certified, attested or executed, as shown or appearing from such certified copy; and also, if such certificate states the time when such original was so deposited, that the same was deposited at the time so stated.

Documents in custody of the Board.

2. A copy of any regulation, order or other document in the custody of the Secretary or of record with the Board, certified by the Secretary to be a true copy, and sealed with the seal of the Board, shall be *primâ facie* evidence of such regulation, order or document, without proof of signature of the Secretary.

Certificate that no order or regulation made.

3. A certificate purporting to be signed by the Secretary, sealed with the seal of the Board, shall be *primâ facie* evidence of the facts therein stated without proof of the signature of the Secretary. 1919, c. 68, s. 68.

*Inquiries.*

Board may order.

**69.** The Board may appoint or direct any person to make an inquiry and report upon any application, complaint or dispute pending before the Board, or upon any matter or thing over which the Board has jurisdiction under this or the Special Act.

Minister may order inquiry.

2. The Minister may, with the approval of the Governor in Council, appoint and direct any person to inquire into and report upon any matter or thing which the Minister is authorized to deal with under this Act or the Special Act. 1919, c. 68, s. 69.

Powers.

**70.** The Minister, the Board, or the inspecting engineer, or person appointed under this Act to make any inquiry or report may

Entry.

(*a*) enter upon and inspect any place, building, or works, being the property or under the control of any company, the entry or inspection of which appears to it or him requisite;

Inspection.

(*b*) inspect any works, structure, rolling stock or other property of the company;

Attendance and returns.

(*c*) require the attendance of all such persons as it or he thinks fit to summon and examine, and require answers or returns to such inquiries as it or he thinks fit to make;

Production.

(*d*) require the production of all material books, papers, plans, specifications, drawings and documents; and

Oaths.

(*e*) administer oaths, affirmations or declarations;

Generally.

and shall have the like power in summoning witnesses and enforcing their attendance, and compelling them to give evidence and produce books, papers or things which they are required to produce, as is vested in any court in civil cases. 1919, c. 68, s. 70.

*Inspecting Engineers.*

Appointment of inspecting engineers.

**71.** Inspecting engineers may be appointed by the Minister or the Board, subject to the approval of the Governor in Council.

Duties.

2. It shall be the duty of every such inspecting engineer, upon being directed by the Minister or the Board, as the case may be, to inspect any railway, or any branch line, siding, or portion thereof, whether constructed, or in the course of construction, to examine the stations, rolling stock, rails, roadbed, right of way, tracks, bridges, tunnels, trestles, viaducts, drainage, culverts, railway crossings and junctions, highway and farm crossings, fences, gates, and cattleguards, telegraph, telephone or other lines of electricity, and all other buildings, works, structures, equipment, apparatus, and appliances thereon, or to be constructed

R.S., 1927.

120320

structed or used thereon, or such part thereof as the Minister, or the Board, as the case may be, may direct, and forthwith to report fully thereon in writing to the Minister or the Board, as the case may be.

Powers of inspecting engineer.

3. Every such inspecting engineer shall have the same powers with regard to any such inspection as are by this Act conferred upon a person appointed by the Board to make an inquiry and report upon any matter pending before the Board.

Duties of company respecting inspecting engineers.

4. Every company, and the officers and directors thereof, shall afford to any inspecting engineer such information as is within their knowledge and power, in all matters inquired into by him, and shall submit to such inspecting engineer all plans, specifications, drawings and documents relating to the construction, repair, or state of repair of the railway, or any portion thereof.

Inspecting engineers may travel free.

5. Every such inspecting engineer shall have the right, while engaged in the business of such inspection, to travel without charge on any of the ordinary passenger trains running on the railway, and to use without charge the telegraph wires and machinery in the offices or under the control of any such company.

Use telegraph wires.

Transmission of telegrams.

6. The operators, or officers, employed in the telegraph offices or under the control of the company, shall, without unnecessary delay, obey all orders of any such inspecting engineer for transmitting messages.

Proof of engineer's authority.

7. The production of his appointment in writing, signed by the Minister, the Chief Commissioner, or the Secretary, shall be sufficient evidence of the authority of such inspecting engineer. 1919, c. 68, s. 71.

RAILWAY COMPANIES.

*Incorporation.*

General powers.

**72.** Every railway company incorporated under a Special Act shall be a body corporate, under the name declared therein, and shall be vested with all such powers, privileges and immunities as are necessary to carry into effect the intention and objects of this Act, and of the Special Act, and which are incident to such corporation, or are expressed or included in the Interpretation Act. 1919, c. 68, s. 72.

*Offices.*

Head office.

**73.** The head office of the company shall be in the place designated in the Special Act, but the company may, by by-law, from time to time, change the location of its head office to any place in Canada: Provided that notice of any such change shall be given to the Secretary of the Board.

Change of location.

R.S., 1927.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120321

To be registered.

2. The Secretary of the Board shall keep a register wherein he shall enter all such changes of location so notified to him.

Other offices.

3. The directors of the company may establish one or more offices in other places in Canada or elsewhere. 1919, c. 68, s. 73.

*Provisional Directors.*

Provisional directors.

**74.** The persons mentioned by name as such in the Special Act shall be the provisional directors of the company.

Quorum.

2. A majority of such provisional directors shall form a quorum.

Powers.

3. The provisional directors may

(*a*) forthwith open stock books and procure subscriptions of stock for the undertaking;

(*b*) receive payments on account of stock subscribed;

(*c*) cause plans and surveys to be made; and

(*d*) deposit in any chartered bank of Canada moneys received by them on account of stock subscribed.

Moneys deposited.

4. The moneys so received and deposited shall not be withdrawn, except for the purposes of the undertaking, or upon the dissolution of the company.

Tenure of office.

5. The provisional directors shall hold office as such until the first election of directors. 1919, c. 68, s. 74.

Allotment of stock.

**75.** If more than the whole stock has been subscribed, the provisional directors shall allocate and apportion the authorized stock among the subscribers as they deem most advantageous and conducive to the furtherance of the undertaking. 1919, c. 68, s. 75.

*Capital.*

Shares.

**76.** The capital stock of the company, the amount of which shall be stated in the Special Act, shall be divided into shares of one hundred dollars each.

Application of proceeds.

2. The moneys raised from the capital stock shall be applied, in the first place, to the payment of all fees, expenses and disbursements for procuring the passing of the Special Act, and for making the surveys, plans and estimates of the works authorized by the Special Act; and all the remainder of such moneys shall be applied to the making, equipping, completing and maintaining of the railway, and other purposes of the undertaking. 1919, c. 68, s. 76.

First meeting of shareholders.

**77.** So soon as twenty-five per centum of the capital has been subscribed, and ten per centum of the amount subscribed has been paid into some chartered bank in Canada,

120322

ada, the provisional directors shall call a meeting of the shareholders of the company at the place where the head office is situate, at which meeting the shareholders who have paid at least ten per centum on the amount of stock subscribed for by them shall, from the shareholders possessing the qualifications hereinafter mentioned, elect the number of directors prescribed by the Special Act.

Notice thereof.

2. Notice of such meeting shall be given by advertisement for the time and in the manner hereinafter required for meetings of shareholders. 1919, c. 68, s. 77.

Increase of capital stock.

**78.** The original capital stock of the company may, with the approval of the Governor in Council, be increased, from time to time, to any amount, if

By vote.

(*a*) such increase is sanctioned by a vote, in person or by proxy, of the shareholders who hold at least two-thirds in amount of the subscribed stock of the company, at a meeting expressly called by the directors for that purpose; and

Minutes.

(*b*) the proceedings of such meeting have been entered in the minutes of the proceedings of the company.

Notice of meetings and object.

2. Notice in writing stating the time, place and object of such meeting, and the amount of the proposed increase, shall be given to each shareholder, at least twenty days previously to such meeting, by delivering the notice to the shareholder personally, or depositing the same in the post office, post paid, and properly directed to the shareholder. 1919, c. 68, s. 78.

*Shares.*

Personal property.

**79.** The stock of the company shall be personal property. 1919, c. 68, s. 79.

Registration of transfers.

**80.** No transfer of shares, unless made by sale under execution, or under the decree, order or judgment of a court of competent jurisdiction shall be valid for any purpose whatever, until entry thereof is duly made in the register of transfers, except for the purpose of exhibiting the rights of the parties thereto towards each other, and of rendering the transferee liable, in the meantime, jointly and severally, with the transferor to the company and its creditors: Provided that, as to the stock of any company listed and dealt with on any recognized stock exchange by means of scrip, commonly in use endorsed in blank and transferable by delivery, such endorsation and delivery shall, excepting for the purpose of voting at meetings of the company, constitute a valid transfer. 1919, c. 68, s. 80.

Exception as to listed shares represented by scrip.

CANADA

120323

**81.** Transfers, except in the case of fully paid-up shares, shall be in the form following, or to the like effect, varying the names and descriptions of the contracting parties as the case requires, that is to say:—

Form of transfer.

"I, (A. B.), in consideration of the sum of paid to me by (C. D.), hereby sell and transfer to him share (*or* shares) of the stock of the , to hold to him, the said (C. D.), his executors, administrators and assigns (*or* successors and assigns, *as the case may be*), subject to the same rules and orders and on the same conditions upon which I held the same immediately before the execution hereof. And I, the said (C. D.), do hereby agree to accept of the said (A. B.) share (*or* shares) subject to the same rules, orders and conditions.

"Witness our hands this day of , in the year 19 ."

As to paid-up shares.

2. In the case of fully paid shares the transfer may be in such form as is prescribed by by-law of the company. 1919, c. 68, s. 81.

Restrictions on transfers.

**82.** No shares shall be transferable until all previous calls thereon have been fully paid up, or until the said shares have been declared forfeited for the non-payment of calls thereon.

Whole share.

2. No transfer of less than a whole share shall be valid. 1919, c. 68, s. 82.

Certicate of proprietorship of share.

**83.** The certificate of proprietorship of any share shall be *primâ facie* evidence of the title of any shareholder, his executors, administrators or assigns, or successors and assigns, as the case may be, to the share therein specified. 1919, c. 68, s. 83.

Sale without certificate.

**84.** The want of a certificate of proprietorship shall not prevent the holder of any share from disposing thereof. 1919, c. 68, s. 84.

Transmission of stock otherwise than by transfer.

**85.** If any share in the capital stock of the company is transmitted by the death, bankruptcy, last will and testament, *donatio mortis causâ*, or by the intestacy of any shareholder, or by any lawful means other than the transfer hereinbefore mentioned, the person to whom such share is transmitted shall deposit in the office of the company a statement in writing signed by him, which shall declare the manner of such transmission, and he shall deposit therewith a duly certified copy or probate of such will and testament, or sufficient extracts therefrom, and such other documents and proofs as are necessary.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

CANADA

120324

2. The person to whom the share is so transmitted as aforesaid, shall not, without complying with this section, be entitled to receive any part of the profits of the company, or to vote in respect of any such share as the holder thereof. 1919, c. 68, s. 85. Transferee must comply.

**86.** The company shall not be bound to see to the execution of any trust, whether express, implied or constructive, to which any share or security issued by it is subject, whether or not the company has had notice of the trust; and it may treat the registered holder as the absolute owner of any such share or security, and shall not be bound to recognize any claim on the part of any other person whomsoever, with respect to any such share or security, or the dividend or interest payable thereon; Provided that nothing in this section contained shall prevent a person equitably interested in any such share or security from procuring the intervention of the court to protect his rights. 1919, c. 68, s. 86. Company not bound to see to execution of trusts.

**87.** Every shareholder who makes default in the payment of any call payable by him, together with the interest, if any, accrued thereon, for the space of two months after the time appointed for the payment thereof, shall forfeit to the company his shares in the company, and all the profit and benefit thereof. Non-payment of calls. Forfeiture.

2. No advantage shall be taken of the forfeiture unless the shares are declared to be forfeited at a general meeting of the company, assembled at any time after such forfeiture has been incurred. 1919, c. 68, s. 87. Procedure.

**88.** Every shareholder so forfeiting shall be by such declaration of forfeiture relieved from liability in all actions, suits or prosecutions whatsoever which may be commenced or prosecuted against him for any breach of the contract existing between such shareholder and the other shareholders by reason of such shareholder having subscribed for or become the holder of the shares so forfeited. 1919, c. 68, s. 88. Effect of forfeiture.

**89.** The directors may, subject as hereinafter provided, sell, either by public auction or private sale, any shares so declared to be forfeited, upon authority therefor having been first given by the shareholders, either at the general meeting at which such shares were declared to be forfeited, or at any subsequent general meeting. Sale of forfeited shares.

2. The directors shall not sell or transfer more of the shares of any such defaulter than will be sufficient, as nearly as can be ascertained at the time of such sale, to pay Limitation.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

L 20325

pay the arrears then due from such defaulter on account of any calls, together with interest, and the expenses attending such sale and declaration of forfeiture.

Surplus proceeds to defaulter.

3. If the money produced by the sale of any such forfeited shares is more than sufficient to pay all arrears of calls and interest thereon due at the time of such sale, and the expenses attending the declaration of forfeiture and the sale of such shares, the surplus shall, on demand, be paid to the defaulter.

Payment of arrears before sale.

4. If payment of such arrears of calls and interest and expenses is made before any share so forfeited and vested in the company is sold, such share shall revert to the person to whom it belonged before such forfeiture, who shall be entitled thereto as if such calls had been duly paid.

Any shareholder may purchase.

5. Any shareholder may purchase any forfeited share so sold. 1919, c. 68, s. 89.

Certificate of treasurer to constitute title.

**90.** A certificate of the treasurer of the company that any share of the company has been declared forfeited for non-payment of any call, and that such share has been purchased by a purchaser therein named shall, together with the receipt of the treasurer of the company for the price of such share, constitute a good title thereto.

To be registered.

2. Such certificate shall be by the treasurer registered in the name and with the place of abode and occupation of the purchaser, and shall be entered in the books to be kept by the company, and such purchaser shall thereupon be deemed to be the holder of such share.

Purchase money.

3. The purchaser shall not be bound to see to the application of the purchase money.

Irregularity.

4. The title of the purchaser to such share shall not be affected by any irregularity in the proceedings in reference to such sale. 1919, c. 68, s. 90.

Certificate of forfeiture of share.

**91.** A certificate of the treasurer of the company that any share of the company has been declared forfeited for non-payment of any call or interest accrued thereon, and that such share has been purchased by a purchaser therein named shall be sufficient evidence of such facts. 1919, c. 68, s. 91.

Shareholders may advance.

**92.** Any shareholder who is willing to advance the amount of his shares, or any part of the money due upon his shares, beyond the sums actually called for, may pay the same to the company.

Interest.

2. Upon the principal moneys so paid in advance, or so much thereof as, from time to time, exceeds the amount of the calls then made upon the shares in respect of which such advance is made, the company may pay such interest at

L 20326

at the lawful rate of interest for the time being, as the shareholders, who pay such sum in advance, and the company agree upon.

No interest out of capital.

3. Such interest shall not be paid out of the capital subscribed. 1919, c. 68, s. 92.

Limited liability.

**93.** Every shareholder shall be individually liable to the creditors of the company for the debts and liabilities of the company to an amount equal to the amount unpaid on the stock held by him, and until the whole amount of his stock has been paid up: Provided that no action shall be instituted or maintained against any such shareholder in respect of his said liability until an execution at the suit of the creditor against the company has been returned unsatisfied in whole or in part. 1919, c. 68, s. 93.

Municipal corporations may take stock.

**94.** Municipal corporations in any province of Canada duly empowered so to do by the laws of the province may, subject to the limitations and restrictions in such laws prescribed, subscribe for any number of shares in the capital stock of the company. 1919, c. 68, s. 94.

Aliens.

**95.** All shareholders in the company, whether British subjects or aliens, or residents in Canada or elsewhere, shall have equal rights to hold stock in the company, and to vote on the same, and, subject as herein provided, shall be eligible to office in the company. 1919, c. 68, s. 95.

Shareholders have equal rights.

Record of shareholders.

**96.** A true and perfect account of the names and places of abode of the several shareholders shall be entered in a book, which shall be kept for that purpose, and which shall be open to the inspection of the shareholders. 1919, c. 68, s. 96.

*Calls.*

How made.

**97.** The directors may, from time to time, make such calls of money as they deem necessary upon the respective shareholders, in respect of the amount of capital respectively subscribed or owing by them, if the intervals between such calls, the notices of each call, and the other provisions of this Act and of the Special Act, in respect of calls, are duly observed and given.

Notice.

2. At least thirty days' notice shall be given of each call.

Amount.

3. No call shall exceed ten per centum of the amount of each share subscribed, unless otherwise provided in the Special Act.

Intervals.

4. No call shall be made at a less interval than two months from the previous call.

Annual amount.

5. A greater amount shall not be called in, in any one year, than the amount prescribed in the Special Act.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120327

Resolution.

6. Nothing herein contained shall prevent the directors from making more than one call by one resolution of the Board. 1919, c. 68, s. 97.

Publication of notice of call.

**98.** At least four weeks' notice of any call upon the shareholders of the company shall be given by weekly publication in the *Canada Gazette*, and in at least one newspaper published in the place where the head office of the company is situate.

Evidence.

2. A copy of the *Canada Gazette* containing any such notice shall on production thereof be sufficient evidence of such notice having been given. 1919, c. 68, s. 98.

Liability of shareholder.

**99.** Every shareholder shall be liable to pay the amount of the calls so made, in respect of the shares held by him, to the persons, and at the times and places, from time to time appointed by the company or the directors. 1919, c. 68, s. 99.

Overdue calls bear interest.

Five per cent.

**100.** If, on or before the day appointed for payment of any call, any shareholder does not pay the amount of such call, he shall be liable to pay interest upon such amount, at the rate of five per centum per annum, from the day appointed for the payment thereof to the time of the actual payment. 1919, c. 68, s. 100.

Failure to pay call.

Suit.

**101.** If, at the time appointed for the payment of any call, any shareholder fails to pay the amount of the call, he may be sued therefor in any court of competent jurisdiction, and such amount shall be recoverable with lawful interest from the day on which the call became payable. 1919, c. 68, s. 101.

Pleadings.

**102.** In any action or suit to recover any money due upon any call, it shall not be necessary to set forth the special matter, but it shall be sufficient to declare that the defendant is the holder of one share or more, stating the number of shares, and is indebted in the sum of money to which the calls in arrear amount, in respect of one call or more, upon one share or more, stating the number and amount of each of such calls. 1919, c. 68, s. 102.

*Meetings of Shareholders.*

Annual meeting.

**103.** A general meeting of the shareholders for the election of directors, and for the transaction of other business connected with or incident to the undertaking, to be called the annual meeting, shall be held annually on the day mentioned in the Special Act, or on such other day as the directors may determine.

120328

Special meetings.

2. Other general meetings, to be called special meetings, may be called at any time by the directors, or by shareholders representing at least one-fourth in value of the subscribed stock, if the directors, having been requested by such shareholders to convene a special meeting, fail, for twenty-one days thereafter, to call such meeting. 1919, c. 68, s. 103.

At head office.

**104.** All general meetings, whether annual or special, shall be held at the head office of the company. 1919, c. 68, s. 104.

Notice of meetings.

**105.** At least four weeks' public notice of any meeting shall be given by advertisement published in the *Canada Gazette*, and in at least one newspaper published in the place where the head office is situate.

Place and day.

2. Such notices shall specify the place and the day and the hour of meeting.

Publication.

3. All such notices shall be published weekly.

Evidence of notice.

4. A copy of the *Canada Gazette* containing such notice shall, on production thereof, be sufficient evidence of such notice having been given. 1919, c. 68, s. 105.

Business.

**106.** Any business connected with or incident to the undertaking may be transacted at an annual meeting, except such business as is, by this Act or the Special Act, required to be transacted at a special meeting.

At special meeting.

2. No special meeting shall enter upon any business not set forth in the notice upon which it is convened. 1919, c. 68, s. 106.

Voting.

**107.** The number of votes to which each shareholder shall be entitled, at any meeting of the shareholders, shall be in the proportion of the number of shares held by him, on which all calls due have been paid. 1919, c. 68, s. 107.

By proxy.

**108.** Every shareholder, whether resident in Canada or elsewhere, may vote by proxy, if he sees fit, and if such proxy produces from his constituent an appointment in writing, in the words or to the effect following, that is to say:—

Form of proxy.

"I, of , one of the shareholders of the , do hereby appoint of , to be my proxy, and in my absence, to vote or give my assent to any business, matter or thing relating to the undertaking of the said that is mentioned or proposed at any meeting of the shareholders of the said company, in such manner as he, the said thinks proper.

"In witness whereof, I have hereunto set my hand and seal the day of in the year ."

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120329

Valid. 2. The votes by proxy shall be as valid as if the constituents had voted in person. 1919, c. 68, s. 108.

Majority vote. **109.** Every matter or thing proposed or considered at any meeting of the shareholders shall, except as otherwise specially provided, be determined by the majority of votes and proxies then present and given.

Binding. 2. All decisions and acts of any such majority shall bind the company and be deemed the decisions and acts of the company. 1919, c. 68, s. 109.

Notices by secretary. **110.** All notices given by the secretary of the company by order of the directors shall be deemed notices by the directors of the company. 1919, c. 68, s. 110.

*President and Directors.*

Chosen at annual meeting. **111.** A board of directors of the company, to manage its affairs, the number of whom shall be stated in the Special Act, shall be chosen at the annual meeting.

Or special meeting. 2. If such election is not held at the annual meeting, the directors shall cause such election to be held at a special meeting duly called for that purpose, within as short a delay as possible after the annual meeting.

Voting. 3. No person shall vote at such special meeting except those who would have been entitled to vote if the election had been held at the annual meeting. 1919, c. 68, s. 111.

Municipal corporations to be represented. **112.** The mayor, warden, reeve or other head officer of any municipal corporation, in any province of Canada holding stock in any company to the amount of twenty thousand dollars or upwards, shall be *ex officio* one of the directors of the company, in addition to the number of directors authorized by the Special Act, unless in such Special Act provision is made for the representation of such corporation on the directorate of such company. 1919, c. 68, s. 112.

Qualifications of directors. **113.** No person shall be a director unless he is a shareholder, owning twenty shares of stock, and has paid all calls due thereon, and is qualified to vote for directors at the election at which he is chosen.

Disability of officers, contractors and sureties. 2. No person who holds any office, place or employment in the company, or who is concerned or interested in any contract under or with the company, or is surety for any contractor with the company, shall be capable of being chosen a director, or of holding the office of director.

Majority of directors British subjects. 3. A majority of the directors shall be British subjects, unless the Governor in Council otherwise permits. 1919, c. 68, s. 113.

120330

Term of office. **114.** The directors appointed at the last election, or those appointed in their stead in case of vacancy, shall remain in office until their successors are appointed. 1919, c. 68, s. 114.

Vacancies in directorate. **115.** Vacancies in the board of directors shall be filled in the manner prescribed by the by-laws. 1919, c. 68, s. 115.

How filled. **116.** In case of the death, absence or resignation of any of the directors, others may, unless otherwise prescribed by the by-laws, be appointed in their stead by the remaining directors.

If no quorum. 2. In case such remaining directors do not constitute a quorum, the shareholders, at a special meeting to be called for that purpose, may, unless otherwise prescribed in the by-laws, elect such other directors.

If not filled. 3. If such appointment or election is not made, such death, absence or resignation shall not invalidate the acts of the remaining directors. 1919, c. 68, s. 116.

President and Vice-President. **117.** The directors shall, at their first or some other meeting after their election, elect one of their number to be the president of the company; and they may, in like manner, elect one or more vice-presidents.

Tenure. 2. The president shall hold his office until he ceases to be a director, or until another president has been elected in his stead, and unless otherwise provided by by-law, shall always, when present, be the chairman of and preside at all meetings of the directors.

Duties. 3. In the absence of the president the vice-president, or one of the vice-presidents, according to such priority as may be prescribed by by-law or determined by the directors, shall act as chairman.

Chairman. 4. In the absence of the president and the vice-president, or vice-presidents, the directors at any meeting at which not less than a quorum are present, shall be competent to elect a chairman from among their number to preside at such meeting. 1919, c. 68, s. 117.

Quorum. **118.** A majority of the directors shall form a quorum.

Acts of quorum binding. 2. The directors at any meeting regularly held, at which not less than a quorum are present, shall be competent to exercise all or any of the powers vested in the directors; and the act of a majority of a quorum of the directors present at any such meeting shall be deemed the act of the directors. 1919, c. 68, s. 118.

Votes of directors. **119.** No director shall have more than one vote, except the chairman, who shall, in case of a division of equal numbers, have the casting vote. 1919, c. 68, s. 119.

Casting vote.

Directors subect to shareholders and by-laws.

**120.** The directors shall be subject to the examination and control of the shareholders at their annual meetings, and shall be subject to all by-laws of the company, and to the orders and directions from time to time made or given at the annual or special meetings if such orders and directions are not contrary to or inconsistent with any express direction or provision of this Act or of the Special Act. 1919, c. 68, s. 120.

Directors not to contract with company.

**121.** No person who is a director of the company shall enter into, or be directly or indirectly, for his own use and benefit, interested in any contract with the company other than a contract which relates to the purchase of land necessary for the railway, nor shall any such person be or become a partner of or surety for any contractor with the company. 1919, c. 68, s. 121.

Directors may make by-laws.

**122.** The directors may make by-laws or pass resolutions, from time to time, not inconsistent with law, for

(*a*) the management and disposition of the stock, property, business and affairs of the company;

(*b*) the appointment of all officers, servants and artificers, and the prescribing of their respective duties and the compensation to be made therefor; and

(*c*) the retirement of such of said officers and servants, on such terms as to an annual allowance or otherwise, as in each case the directors, in the interest of the company's service, and under the circumstances, consider just and reasonable.

By-laws for election of officers.

2. The directors may also, from time to time, make by-laws or pass resolutions for the election or appointment of officers of the company, who need not be directors, as vice-presidents of the company, and may by any such by-law or resolution specify the manner of such election or appointment and define the powers, duties, qualifications and term of office of such vice-presidents, each of whom shall have and may exercise, subject to the limitations set forth in any such by-law or resolution, all the powers of a vice-president elected by the directors pursuant to the provisions of this Act.

Evidence.

3. A copy of any such by-law or resolution certified as correct by the president, secretary or other executive officer of the company and bearing the seal of the company shall be evidence thereof. 1919, c. 68, s. 122.

Appointment of officers. Security.

**123.** The directors shall, from time to time, appoint such officers as they deem requisite, and shall take such sufficient security as they think proper from the managers and officers, for the time being, for the safe-keeping and

120332

accounting for by them respectively of the moneys raised by virtue of this Act and the Special Act, and for the faithful execution of their duties.

By bond or guarantee.

2. Such security may, as the directors deem expedient, be by bond or by the guarantee of any society or joint stock company incorporated and empowered to grant guarantees, bonds, covenants or policies for the integrity and faithful accounting of persons occupying positions of trust, or for other like purposes. 1919, c. 68, s. 123.

Vice-President, powers of.

**124.** In the case of the absence or illness of the president, the vice-president or one of the vice-presidents shall have all the rights and powers of the president, and may sign all debentures and other instruments, and perform all acts which, by the regulations and by-laws of the company, or by the Special Act, are required to be signed, performed and done by the president.

Empowering a director to act.

2. In the absence or illness of the president and the vice-president, or vice-presidents, any director of the company acting under the express authority of the board of directors may while so acting exercise the rights and powers of the president or vice-president as hereinbefore set forth.

Entry in minutes.

3. The directors may, at any meeting of the directors, require the secretary of the company to enter such absence or illness among the proceedings of such meeting.

Evidence of absence or illness.

4. A certificate of any such absence or illness signed by the secretary of the company shall be delivered to any person requiring the same on payment to the treasurer of one dollar, and such certificate shall be *primâ facie* evidence of the absence or illness therein certified. 1919, c. 68, s. 124.

Copies of minutes to be evidence.

**125.** Copies of the minutes of proceedings and resolutions of the shareholders of the company, at any annual or special meeting, and of the minutes of proceedings and resolutions of the directors, at their meetings, extracted from the minute book, kept by the secretary of the company, and by him certified to be true copies extracted from such minute book, when sealed with the company's seal, shall, without proof of the signature of such secretary, be evidence of such proceedings and resolutions. 1919, c. 68, s. 125.

Accounts.

**126.** The directors shall cause to be kept, and, annually, on the thirty-first day of December, to be made up and balanced, a true, exact and particular account of the moneys collected and received by the company, or by the directors or managers thereof, or otherwise for the use of the company, and of the charges and expenses attending the erecting, making, supporting, maintaining and carrying on of the undertaking, and of all other receipts and expenditures of the company or the directors. 1919, c. 68, s. 126.

*Dividends and Interest.*

Declaration of dividends.

**127.** Dividends, at and after the rate of so much per share upon the several shares held by the shareholders in the stock of the company, may, from time to time, be declared and paid by the directors out of the net profits of the undertaking. 1919, c. 68, s. 127.

Reserve fund.

**128.** The directors may, before recommending any dividend, set aside out of the profits of the company such sums as they think proper as a reserve fund, to meet contingencies, or for equalizing dividends, or for repairing, maintaining, renewing or extending the railway or any portion thereof, and shall submit their action in regard to such reserve fund to the shareholders at a general meeting for their approval.

How invested.

2. The directors may invest the sum so set apart as a reserve fund in such securities, not inconsistent with this or the Special Act, as they select. 1919, c. 68, s. 128.

No dividend out of capital.

**129.** No dividend shall be

(*a*) declared whereby the capital of the company is in any degree reduced or impaired; or

Or if call unpaid.

(*b*) paid out of such capital; or

(*c*) paid in respect of any share, after a day appointed for payment of any call for money in respect thereof, until such call has been paid:

Proviso as to interest.

Provided that the directors may in their discretion, until the railway is completed and opened to the public, pay interest at any rate, not exceeding five per cent per annum, on all sums actually paid in cash in respect of the shares, from the respective days on which the same have been paid, and that such interest shall accrue and be paid at such times and places as the directors appoint for that purpose. 1919, c. 68, s. 129.

No interest if shareholder in arrears.

**130.** No interest shall accrue to any shareholder in respect of any share upon which any call is in arrear, or in respect of any other share held by such shareholder while such call remains unpaid. 1919, c. 68, s. 130.

Arrears deducted from dividend.

**131.** The directors may deduct, from any dividend payable to any shareholder, all or any such sum or sums of money as are due from him to the company on account of any call or otherwise. 1919, c. 68, s. 131.

*Bonds, Mortgages and Borrowing Powers.*

Authorized.

**132.** Subject to the provisions of this Act and of the Special Act, the directors of the company may, when thereunto authorized by the Special Act, issue bonds, debentures,

120334

tures, perpetual or terminable debenture stock, or other securities, if duly empowered in that behalf by the shareholders, at any special meeting called for the purpose by notice in the manner provided by this Act, or at any annual meeting in case like notice of intention to apply for such authority at such annual meeting has been given, at which meeting, whether annual or special, shareholders representing at least two-thirds in value of the subscribed stock of the company and who have paid all calls due thereon, are present in person, or represented by proxy.

Securities, how executed.

2. Such securities,

(*a*) if in the form of bonds, may be signed by the president, or the vice-president or one of the vice-presidents, or a director, and countersigned by the secretary or an assistant or local secretary of the company; and any coupons attached to such bonds shall bear the signature of the treasurer or secretary of the company: Provided that the signature of the president on the bonds, and the signature of the treasurer or secretary on the coupons, may be engraved, lithographed or otherwise mechanically reproduced *facsimile* of such signatures respectively; and such reproduced and all other signatures of the officers aforesaid shall, for all purposes, be valid and binding upon the company, notwithstanding that at the date of the issue or certification of the bonds or coupons the persons whose signatures so appear are not the president, vice-president, director, treasurer, secretary, or assistant or local secretary, of the company as the case may be; Bonds.

(*b*) if in the form of debenture stock, may be signed in the same way as herein provided for the signature of bonds, or may be signed by the secretary or an assistant or local secretary of the company and countersigned by the registrar or an assistant or local registrar of the stock for the time being, or such other officers as the directors may designate; Debenture stock.

(*c*) if in any form other than bonds or debenture stock, may be signed in the same way as herein provided for the signature of bonds. Other securities.

When and where payable. Interest.

3. Such securities may be made payable at such times and in such manner and at such place or places in Canada or elsewhere, and may bear such rate of interest, not exceeding six per centum per annum, as the directors think proper.

Terms of sale.

4. The directors may, for the purpose of raising money for prosecuting the undertaking, issue, and sell or pledge, all or any of the said securities, at the best price, and upon the best terms and conditions, which at the time they may be able to obtain.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

120335

Extent of borrowing power.

5. The power of issuing securities conferred upon the company by this Act, or under the Special Act, shall not be construed as being exhausted by any issue, and such power may be exercised from time to time: Provided that the limit to the amount of securities fixed in the Special Act shall not be exceeded. 1919, c. 68, s. 132.

Securities pledged for loans or advances.

**133.** When securities issued under the last preceding section have been deposited or pledged by the company, as security for a loan or for advances made to it, and such loan or advances have been paid off and such deposit or pledge redeemed, such securities shall not be deemed to have been paid off or to have become extinguished, but shall be deemed to be still alive, and the company may reissue them, or may cancel them and issue other securities in lieu thereof; in such event the person to whom such issue or reissue is made shall have the same rights and priorities as if the securities had not previously been issued.

When not deemed paid off.

2. Where a company has deposited any of its securities to secure advances from time to time on current account, such securities shall not be deemed to have been paid off or extinguished by reason only of the account of the company ceasing to be in debit while the securities remain so deposited.

Reissue not a new security.

3. The issue or reissue of a security under this section shall not be treated as the issue of a new security for the purpose of any provision limiting the number or amount of the securities to be issued.

To be retroactive.

4. This section shall be retrospective in its operation, and shall apply to securities heretofore as well as to securities hereafter issued, deposited or pledged, and to past as well as to future transactions relating to or affecting the same, but nothing therein shall prejudice

Pending proceedings not affected.

(*a*) the operation of any judgment or order of a court of competent jurisdiction pronounced or made in any legal proceedings which were pending on the nineteenth day of May, one thousand nine hundred and nine, as between the parties to the proceedings, in which judgment was pronounced or the order made, and any appeal from any such judgment or order shall be decided as if this section had not been enacted;

Issue of securities in place of those paid off.

(*b*) any power to issue securities in the place of any securities paid off, or otherwise satisfied or extinguished, reserved to a company by the securities themselves, or by any mortgage or trust deed securing them. 1919, c. 68, s. 133.

Provincial railways.

**134.** No power to issue or dispose of any such securities conferred by any Special Act of a provincial legislature shall, if such railway is thereafter brought under the legislative

120336

lative authority of the Parliament of Canada, be subsequently exercised without the sanction of the Governor in Council. 1919, c. 68, s. 134.

Mortgage deeds of trust.

**135.** The company may secure such securities by one or more deeds of trust by way of mortgage or charge creating such mortgages, charges and encumbrances upon the whole of such property, assets, rents and revenues of the company, present or future, or both, as are described therein: Provided that such property, assets, rents and revenues shall be subject, in the first instance, to the payment of any penalty then or thereafter imposed upon the company for non-compliance with the requirements of this Act, and next, to the payment of the working expenditure of the railway.

Powers which may be granted in mortgage.

2. By such a mortgage deed the company may grant to the holders of such securities or the trustee or trustees named in such mortgage deed all and every the powers, rights and remedies granted by this Act in respect of the said securities, and all other powers, rights and remedies, not inconsistent with this Act, or may restrict the said holders, or trustee or trustees, in the exercise of any power, privilege or remedy granted by this Act, as the case may be; and all the powers, rights, and remedies, so provided for in such mortgage deed, shall be valid and binding and available to the said holders and trustee or trustees in manner and form as therein provided. 1919, 68, s. 135.

Property excepted from mortgage.

**136.** The company may except from the operation of any such mortgage any assets, property, rents or revenue of the company, and may declare and provide therein that such mortgage shall only apply to and affect certain sections or portions of the railway or property of the company.

Special description.

2. Where any such exception is made, the company shall in such mortgage deed expressly specify and describe, with sufficient particularity to identify the same, the assets, property, rents or revenue of the company, or the sections or portions of the railway not intended to be included therein or conveyed thereby. 1919, c. 68, s. 136.

Deposit with Secretary of State.

**137.** Every such mortgage deed, and every assignment thereof, or other instrument in any way affecting such mortgage or security, shall be deposited in the office of the Secretary of State of Canada, and notice of such deposit shall forthwith be given in the *Canada Gazette*. 1919, c. 68, s. 137.

Notice.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120337

Other filing, deposit or registration not necessary.

**138.** Where the provisions of the last preceding section have been complied with, or where by any Act of the Parliament of Canada heretofore or hereafter passed, provision was or is made for the deposit in the office of the Secretary of State of Canada of any mortgage or mortgage deed given to secure the payment of bonds or other securities issued by the company and the provisions with regard to such deposit have been duly complied with, it is hereby declared and enacted that it was and is unnecessary for any purpose that such mortgage, or any assignment thereof, or any other instrument in any way affecting it, should have been or should be otherwise deposited, registered or filed under the provisions of any law respecting the deposit, registration or filing of instruments affecting real or personal property: Provided that if such Act expressly required or requires some additional or other deposit, registration or filing, nothing herein contained shall be taken or held to dispense therewith or to waive any non-compliance with such requirement. 1919, c. 68, s. 138.

Copy of instruments deposited, evidence of.

**139.** A copy of any mortgage deed securing any bonds, debentures, or other securities issued under the authority of this Act and the Special Act, and of any assignment thereof, or other instrument in any way affecting such mortgage or security, deposited in the office of the Secretary of State of Canada, purporting to be certified to be a true copy by the Secretary of State, or by the Deputy Registrar General of Canada, shall be *primâ facie* evidence of the original, without proof of the signature of such official. 1919, c. 68, s. 139.

Ranking of securities.

**140.** Subject however to the payment of the penalties and the working expenditure of the railway as hereinbefore provided, the securities so authorized and the mortgage deeds respectively securing the same shall rank against the company, and upon the franchise, undertaking, tolls and income, rents and revenues, and the real and personal property thereof, according to the priorities, if any, established by such mortgage deeds.

Holder a mortgagee.

2. Each holder of the said securities shall be deemed to be a mortgagee or encumbrancee upon the mortgaged premises *pro rata* with all other holders of the same issue and in accordance with and having regard to the priorities, if any, so established; but no proceedings authorized by law, or by this Act, shall be taken to enforce payment of the said securities or of the interest thereon except through the trustee or trustees appointed by or under such mortgage deed or deeds. 1919, c. 68, s. 140.

120338

Default of company.

**141.** If the company makes default in paying the principal of or interest on any of such securities at the time when such principal or interest, by the terms of the securities, becomes due and payable, then at the next annual general meeting of the company, and at all subsequent meetings, all holders of such securities so being and remaining in default, shall, in respect thereof, subject to the provisions of the next following section, have and possess the same rights, privileges and qualifications for being elected directors, and for voting at general meetings, as would attach to them as shareholders, if they held fully paid-up shares of the company to a corresponding amount. 1919, c. 68, s. 141.

Rights of security holders.

Limitations affecting such rights.

**142.** The rights given by the last preceding section shall not be exercised by any such holder, unless it is so provided by the mortgage deed, nor unless the security in respect of which he claims to exercise such rights has been registered in his name, in the same manner as the shares of the company are registered, at least ten days before he attempts to exercise the right of voting thereon.

Registration.

2. The company shall be bound on demand to register such securities, and thereafter any transfers thereof, in the same manner as shares or transfers of shares. 1919, c. 68, s. 142.

Other rights not affected.

**143.** The exercise of the rights so given as provided by the last two preceding sections, shall not take away, limit or restrain any other of the rights or remedies to which the holders of the said securities are entitled under the provisions of such mortgage deed. 1919, c. 68, s. 143.

Transfer by delivery.

**144.** All such securities may be made payable to bearer, and shall, in that case, be transferable by delivery until registration thereof, as hereinbefore provided.

Or writing if registered.

2. While so registered, they shall be transferable by written transfers, registered in the manner prescribed in the mortgage deed or deeds. 1919, c. 68, s. 144.

Power to borrow by overdraft, etc.

**145.** The company may, for the purposes of the undertaking, borrow money by overdraft or upon promissory note, warehouse receipt, bills of exchange, or otherwise upon the credit of the company, and become party to promissory notes and bills of exchange.

Note or bill of company, how made.

2. Every such note or bill made, drawn, accepted or endorsed by the president or vice-president or one of the vice-presidents of the company, or other officer authorized by the by-laws of the company or by resolution of the directors, and countersigned by the secretary, or assistant or local secretary, or treasurer of the company, shall be

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120339

binding on the company, and shall be presumed to have been made, drawn, accepted or endorsed with proper authority, until the contrary is shown.

No seal necessary.

3. It shall not be necessary in any case to have the seal of the company affixed to any such promissory note or bill of exchange.

No bill payable to bearer.

4. Nothing in this section shall be construed to authorize the company to issue any note or bill payable to bearer, or intended to be circulated as money, or as the note or bill of a bank.

Officers not personally liable.

5. Neither the president, vice-president or secretary, nor any other officer of the company so authorized as aforesaid, shall be individually responsible for any such promissory note or bill of exchange made, drawn, accepted or endorsed, or countersigned by him, unless such promissory note or bill of exchange has been issued without proper authority. 1919, c. 68, s. 145.

*Contracts Respecting Rolling Stock.*

Deposit of contract evidencing lease, etc., of rolling stock.

**146.** Any contract evidencing the lease, conditional sale or bailment of rolling stock to a company shall be in writing, duly executed by the parties thereto, and the same or a copy thereof may be deposited in the office of the Secretary of State of Canada, within twenty-one days from the execution thereof, and no contract so deposited need be otherwise deposited, registered or filed under the provisions of any law respecting the deposit, registration or filing of instruments affecting real or personal property, and upon the due execution and deposit of any such lease, conditional sale or bailment of rolling stock as aforesaid, the same shall be valid against all persons.

Notice of deposit.

2. Notice of such deposit shall forthwith thereafter be given in the *Canada Gazette*. 1919, c. 68, s. 146.

*Purchase of Railway Securities.*

Company not to purchase railway stock.

**147.** Except as in this Act or the Special Act otherwise provided, no company shall either directly or indirectly, employ any of its funds in the purchase of its own stock, or in the acquisition of any shares, bonds or other securities, issued by any other railway company, or in the purchase or acquisition of any interest in any such stock, shares, bonds or other securities. 1919, c. 68, s. 147.

*Disposing of Lands obtained as Subsidy, etc.*

Company may dispose of lands acquired from Crown.

**148.** Any company which has obtained from the Crown, by way of subsidy or otherwise, in respect of the construction or operation of its railway, a right to any land or to an interest in land, has, and from the time of obtaining such right has had, as incident to the exercise of its corporate powers, authority to acquire, sell or otherwise dispose of the same or any part thereof.

120340

May convey right to another company.

2. Such company may convey such right or interest, or any part thereof, to any other company which has entered into any undertaking for the construction or operation, in whole or in part, of the railway in respect of which such land or interest in land was given; and thereafter such other company shall have, in respect of such land or interest in land, the same authority as that of the company which has so conveyed it. 1919, c. 68, s. 148.

Lands given to company by any person.

**149.** If any lands have been given to the company by any corporation or person, as aid towards, or as consideration in whole or in part for the construction or operation of the company's railway, either generally or with respect to the adoption of any particular route, or on any other account, the authority of the company, and of any other company to which it may convey its right in any of the said lands, shall be the same as if such lands had been obtained by the company from the Crown as aforesaid. 1919, c. 68, s. 149.

*Purchase of Railway by Person without Corporate Power to Operate.*

Purchaser to obtain authority to operate.

**150.** If any railway, or any section of any railway, is sold under the provisions of any deed or mortgage, or at the instance of the holders of any mortgage, bonds or debentures, for the payment of which any charge has been created thereon, or under any other lawful proceeding, and is purchased by any person not having corporate power to hold and operate the same, the purchaser shall not run or operate such railway until authority therefor has been obtained as in this section provided.

Application to Minister.

2. The purchaser shall transmit to the Minister an application in writing stating the fact of such purchase, describing the termini and lines of route of the railway purchased, specifying the Special Act under which the same was constructed and operated, and requesting authority from the Minister to run and operate the railway, and shall with such application transmit a copy of any writing preliminary to the conveyance of such railway, made as evidence of such sale, and also a duplicate or authenticated copy of the deed of conveyance of such railway, and such further details and information as the Minister may require.

Minister may authorize.

3. Upon any such application, the Minister may, if he is satisfied therewith, grant an order authorizing the purchaser to run and operate the railway purchased until the end of the then next session of the Parliament of Canada, subject to such terms and conditions as the Minister may deem expedient.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120341

Purchaser thereupon authorized to operate railway.

4. The purchaser shall thereupon be authorized for such period only and subject to such order, to run and operate such railway, and, subject to the other provisions of this Act, to take and receive such tolls in respect of traffic carried thereon as the company previously owning and operating the same was authorized to take, and the purchaser shall also be subject to the terms and conditions of the Special Act of the said company, in so far as the same can be made applicable.

Must apply to Parliament.

5. The purchaser shall apply to the Parliament of Canada at the next following session thereof after the granting of such order by the Minister for an Act of incorporation, or other legislative authority, to hold, run and operate the railway.

One extension allowed.

6. If such application is made to Parliament and is unsuccessful, the Minister may extend the order to run and operate such railway until the end of the then next following session of Parliament, and no longer.

Closing of railway.

7. If during such extended period the purchaser does not obtain such an Act of incorporation or other legislative authority, such railway shall be closed or otherwise dealt with by the Minister, as may be determined by the Governor in Council.

Provision for temporary operation.

8. Provided, however, that notwithstanding anything herein contained the purchaser may, pending the obtaining of authority from the Minister, run and operate the railway for a period not exceeding fifteen days subject to the provisions of this Act and to the terms and conditions of the special Act in so far as the same can be made applicable. 1919, c. 68, s. 150.

*Agreements for Sale, Lease and Amalgamation.*

Agreement for sale, lease or amalgamation of railway.

**151.** Where the company is authorized by any Special Act of the Parliament of Canada to enter into an agreement with any other company, whether within the legislative authority of the Parliament of Canada or not, for selling, conveying or leasing to such company the railway and undertaking of the company, in whole or in part, or for purchasing or leasing from such company the railway and undertaking of such company, in whole or in part, or for amalgamation, such agreement shall be first approved by

Approval of shareholders.

two-thirds of the votes of the shareholders of each company party thereto, at an annual general meeting, or at a special general meeting, of each company, called for the purpose of considering such agreement, at each of which meetings shareholders representing at least two-thirds in value of the capital stock of each company are present or represented by proxy.

120342

Board to recommend sanction.

2. Upon such agreement being so approved, and duly executed, it shall be submitted to the Board with an application for a recommendation to the Governor in Council for the sanction thereof.

Notice in *Canada Gazette*.

3. Notice of the proposed application for such recommendation shall be published in the *Canada Gazette*, for at least one month prior to the time, to be stated therein, for the making of such application, and also, unless the Board otherwise orders, for a like period in one newspaper in each

Newspapers.

of the counties or electoral districts through which the railway to be sold, leased or amalgamated, runs, in which a newspaper is published.

Action of Board.

4. Upon such notice being given the Board shall grant or refuse such application, and upon granting the same shall make a recommendation to the Governor in Council for the sanction of such agreement.

Proceedings upon sanction.

5. Upon such agreement being sanctioned by the Governor in Council, a duplicate original of such agreement shall be filed in the office of the Secretary of State of Canada; and thereupon such agreement shall come into force and effect and notice thereof shall be forthwith given in the *Canada Gazette*.

Notice. Evidence.

6. The production of the *Canada Gazette* containing the notice mentioned in subsection five of this section shall be *primâ facie* evidence that the requirements of this section have been complied with.

Exemptions in certain cases.

7. Whenever the agreement does not involve any sale or amalgamation and may be terminated by either company on giving a notice not exceeding twelve months, the Board may, notwithstanding anything in this section, by order or regulation, exempt the company from complying with any of the foregoing conditions with respect to any such agreement. 1919, c. 68, s. 151.

Amalgamation.

**152.** Upon any agreement for amalgamation coming into effect, as provided in the last preceding section, the companies, parties to such agreement, shall, subject to the provisions of this Act and the Special Act authorizing such agreement to be entered into, be deemed to be amalgamated, and shall form one company, under the name and upon the terms and conditions in such agreement provided; and the amalgamated company shall possess and be vested with all the railways and undertakings, and all other the powers, rights, privileges, franchises, assets, effects, and

Powers, etc. of amalgamated company.

properties, real, personal and mixed, belonging to, possessed by, or vested in the companies, parties to such agreement, or to which they, or any or either of them, may be or become entitled; and shall be liable for all claims, demands, rights, securities, causes of action, complaints, debts, obligations,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120344

tions, works, contracts, agreements, or duties, to as full an extent as any or either of such companies was, at or before the time when the amalgamation agreement came into effect. 1919, c. 68, s. 152.

Saving of rights and claims.

**153.** Notwithstanding anything in any agreement made or sanctioned under the provisions of the last two preceding sections, every act, matter or thing done, effected or confirmed under or by virtue of this Act, or the Special Act, before the date of the coming into effect of such agreement, shall be as valid as if such agreement had never come into effect; and such agreement shall be subject and without prejudice to every such act, matter or thing, and to all rights, liabilities, claims and demands, present or future, which would be incident to, or consequent upon such act, matter or thing if such agreement had never come into effect.

Amalgamated company in place of former companies.

2. In the case of an agreement for amalgamation, as to all acts, matters and things so done, effected or confirmed, and as to all such rights, liabilities, claims and demands, the amalgamated company shall for all purposes stand in the place of and represent the companies who are parties thereto and the generality of the provisions of this section shall not be deemed to be restricted by any Special Act, unless this section is expressly referred to in such Special Act, and expressly limited or restricted thereby. 1919, c. 68, s. 153.

*Agreements for Interchange of Traffic and Running Rights.*

Directors may make traffic agreements.

**154.** The directors of the company may, at any time, make and enter into any agreement or arrangement, not inconsistent with the provisions of this or the Special Act, with any other company, either in Canada or elsewhere, for the interchange of traffic between their railways or vessels, and for the division and apportionment of tolls in respect of such traffic.

And agreements for:

2. The directors may also make and enter into any agreement or arrangements, not inconsistent with the provisions of this or the Special Act, for any term not exceeding twenty-one years

Running powers;

(*a*) for the running of the trains of one company over the tracks of another company;

Division of tolls;

(*b*) for the division and apportionment of tolls in respect of such traffic;

Management and working;

(*c*) generally in relation to the management and working of the railways, or any of them, or any part thereof, and of any railway or railways in connection therewith; and

Joint committee.

(*d*) to provide, either by proxy or otherwise, for the appointment of a joint committee for the better carrying into effect of any such agreement or arrangement, with such powers and functions as are considered necessary or expedient;

Conditions.

subject to the like consent of the shareholders, the sanction of the Governor in Council upon the recommendation of the Board, application, notices and filing, as hereinbefore provided with respect to amalgamation agreements:

Proviso.

Provided that publication of notices in the *Canada Gazette* shall be sufficient notice, and that the duplicate original of such agreement or arrangement shall, upon being sanctioned, be filed with the Board.

Board may exempt from conditions.

3. The Board may, notwithstanding anything in this section, by order or regulation, exempt the company from complying with any of the foregoing conditions, with respect to any such agreement or arrangement made or entered into by the company for the transaction of the usual and ordinary business of the company, and where such consent of the shareholders is deemed by the Board to be unnecessary.

Saving.

4. Neither the making of any such arrangement or agreement, nor anything therein contained, nor any approval thereof, shall restrict, limit, or affect any power by this Act vested in the Board, or relieve the companies from complying with the provisions of this Act. 1919, c. 68, s 154.

*Insolvent Companies.*

Scheme may be filed in Exchequer Court.

**155.** Where a company is unable to meet its engagements with its creditors, the directors may prepare a scheme of arrangement between the company and its creditors, and may file it in the Exchequer Court.

May affect shareholders and capital.

2. Such scheme of arrangement may or may not include provisions for settling and defining any rights of shareholders of the company as among themselves, and for the raising if necessary of additional share and loan capital.

3. There shall be filed with such scheme of arrangement

Declaration to be filed.

(*a*) a declaration in writing under the common seal of the company to the effect that the company is unable to meet its engagements with its creditors; and

Affidavit.

(*b*) an affidavit made by the president and directors of the company, or by a majority of them, that such declaration is true to the best of their respective judgments and beliefs.

Court may restrain action.

4. After the filing of the scheme, the Exchequer Court may, on the application of the company, on summons or motion

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120345

motion in a summary way, restrain any action against the company on such terms as the Exchequer Court thinks fit.

Notice of filing.

5. Notice of the filing of the scheme shall be published in the *Canada Gazette*.

No execution without leave.

6. After such publication of notice, no execution, attachment, or other process against the property of the company shall be available without leave of the Exchequer Court, to be obtained on summons or motion in a summary way. 1919, c. 68, s. 155.

Assent to scheme: By bondholders.

**156.** The scheme shall be deemed to be assented to

(*a*) by the holders of mortgages or bonds issued under the authority of this or any Special Act relating to the company, when it is assented to in writing by three-fourths in value of the holders of such mortgages or bonds;

By debenture holders;

(*b*) by the holders of debenture stock of the company, when it is assented to in writing by three-fourths in value of the holders of such stock;

By charge holders;

(*c*) by the holders of any rent charge, or other payment, charged on the receipts of or payable by the company in consideration of the purchase of the undertaking of another company, when it is assented to in writing by three-fourths in value of such holders;

By preference shareholders;

(*d*) by the guaranteed or preference shareholders of the company, when it is assented to in writing by three-fourths in value of such shareholders, if there is only one class of such shareholders, or three-fourths in value of each class, if there are more classes of such shareholders than one;

By ordinary shareholders.

(*e*) by the ordinary shareholders of the company, when it is assented to by a special meeting of the company called for that purpose.

Assent of leasing company:

2. Where the company is lessee of a railway, the scheme shall be deemed to be assented to by the leasing company when it is assented to

By bondholders;

(*a*) in writing, by three-fourths in value of the holders of mortgages, bonds and debenture stock of the leasing company;

By preference shareholders;

(*b*) in writing, by three-fourths in value of the guaranteed or preference shareholders of the leasing company, if there is only one such class, and by three-fourths in value of each class, if there are more classes than one of such shareholders; and

By ordinary shareholders.

(*c*) by the ordinary shareholders of the leasing company, at a special meeting of that company called for that purpose.

120346

120347

No assent required from class not interested.

3. The assent to the scheme of any class of holders of mortgages, bonds or debenture stock, or of any class of holders of a rent charge or other payment as aforesaid, or of any class of guaranteed or preference shareholders, or of a leasing company, shall not be requisite in case the scheme does not prejudicially affect any right or interest of such class or company. 1919, c. 68, s. 156.

Application for confirmation of scheme.

**157.** If, at any time within three months after the filing of the scheme, or within such extended time as the Exchequer Court, from time to time, thinks fit to allow, the directors of the company consider the scheme to be assented to, as by this Act required, they may apply to the Exchequer Court by petition in a summary way for confirmation of the scheme.

Notice of application.

2. Notice of any such application shall be published in the *Canada Gazette*.

Confirmation of Court.

3. The Court, after hearing the directors, and any creditors, shareholders or other persons whom it thinks entitled to be heard on the application, may confirm the scheme, if satisfied that the scheme has been assented to, as required by this Act, within three months after the filing of it, or within such extended time, if any, as the Court has allowed, and that no sufficient objection to the scheme has been established.

Enrolment in Court.

4. The scheme when confirmed shall be enrolled in the Exchequer Court, and thenceforth it shall be binding and effectual to all intents, and the provisions thereof shall, against and in favour of the company and all persons, have the like effect as if they had been enacted by Parliament.

Notice thereof.

5. Notice of the confirmation and enrolment of the scheme shall be published in the *Canada Gazette*. 1919, c. 68, s. 157.

Rules of practice.

**158.** The Judges of the Exchequer Court may make general rules for the regulation of the practice and procedure of the Court under the three last preceding sections of this Act, which rules shall have force and effect when they are approved by the Governor in Council. 1919, c. 68, s. 158.

Copies of the scheme to be kept for sale.

**159.** The company shall at all times keep at its principal or head office printed copies of the scheme when confirmed and enrolled, and shall sell such copies to all persons desiring to buy them at a reasonable price, not exceeding ten cents for each copy. 1919, c. 68, s. 159.

*Sale of Subsidized Railways not kept in Repair.*

Subsidized railways must be in safe and efficient condition.

**160.** Whenever it is made to appear to the Minister that any railway owned by a company incorporated by the Parliament of Canada, the construction of which has been aided by a subsidy from the Government of Canada, cannot

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120347

cannot by reason of the condition of such railway or of its equipment be safely and efficiently operated, the Minister may apply to the Board for an order that the said railway, or its equipment, or both, shall be put in a safe and efficient condition, which order the Board is hereby authorized to make after such notice to the president or manager of the company and the trustee of the bondholders, if any, as to the Board seems reasonable, and the Board may, by order, direct what repairs, improvements or additions shall be made to the said railway, or equipment, or both, and within what times the same shall be undertaken and completed respectively.

Application to Board.

On failure of company to comply with order, a lien may be created.

2. If the company fails to comply with such order of the Board, the Governor in Council may, upon the recommendation of the Minister, approve of such order, and direct that a copy of such order and of the order of the Governor in Council approving thereof, certified by the Secretary of the Board and the Clerk of the Privy Council respectively, shall be filed by the Minister in the office of the Registrar of Deeds of each county through which such railway runs, and upon such orders being so filed there shall, *ipso facto,* be created a first lien or mortgage upon the said railway and its equipment in favour of His Majesty for the amount of the said subsidy, which shall immediately thereupon become due and payable to His Majesty.

Enforcement of lien.

3. Such lien may be enforced by His Majesty in the same manner and by the like proceedings as any other lien upon property may be enforced by His Majesty in the Exchequer Court of Canada.

Court may order sale.

4. The said Court may order such railway and its equipment to be sold to satisfy such lien, and pending such lien may appoint a receiver to manage and operate such railway.

Moneys realized from sale to be applied by the Minister towards repair, etc. of such railway.

5. Any moneys realized from such sale may, with the consent of the purchaser, be applied by the Minister under the direction of the Chief Engineer of Government Railways towards the repair and improvement of such railway and equipment so far as the same may be deemed necessary by the Minister, and any moneys so realized, and not in the opinion of the Minister required for such repairs and improvements, may be paid to the company owning the railway at the time of the sale, or to the trustee for the holders of any outstanding bonds or other securities secured by mortgage or otherwise upon such railway. 1919, c. 68, s. 160.

POWERS—

120348

POWERS—CONSTRUCTION OF RAILWAYS.

*Limitation of Time for Construction.*

Commencement.

**161.** If the construction of the railway is not commenced and fifteen per centum of the amount of the capital stock is not expended thereon in survey, purchase of right of way, and actual construction work, or, in the case of a branch or extension of the railway, if fifteen per centum of the bond issue authorized therefor is not expended thereon in actual construction work, within two years after the passing of the Act authorizing the construction of such railway, branch, or extension, as the case may be, or, where the Parliament of Canada grants an extension of the time for commencing such construction, within the time so granted; or, if the railway or branch or extension, as the case may be, is not completed and put in operation within five years from the passing of such Act, or, where the Parliament of Canada grants an extension of time for completion, within the time so granted; then the powers granted by such Act or by this Act shall cease and be null and void as respects so much of the railway or branch or extension, as the case may be, as then remains uncompleted. 1919, c. 68, s. 161.

Completion.

*General Powers.*

Powers of company.

**162.** The company may, for the purposes of the undertaking, subject to the provisions in this and the Special Act contained

Entry upon lands. Surveys.

(*a*) enter into and upon any Crown lands without previous license therefor, or into or upon the lands of any person whomsoever, lying in the intended route or line of the railway, and make surveys, examinations or other necessary arrangements on such lands for fixing the site of the railway, and set out and ascertain such parts of the lands as are necessary and proper for the railway;

Receive grants and bonuses.

(*b*) receive, take and hold, all voluntary grants and donations of lands or other property or any bonus of money or debentures, or other benefit of any sort, made to it for the purpose of aiding in the construction, maintenance and accommodation of the railway; but the same shall be held and used for the purpose of such grants or donations only;

Acquire property.

(*c*) purchase, take and hold of and from any person, any lands or other property necessary for the construction, maintenance and operation of the railway, and also alienate, sell or dispose of, any lands or property of the company which for any reason have become not necessary for the purposes of the railway;

Dispose of property not required.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120349

Placing of railway.

(*d*) make, carry or place the railway across or upon the lands of any person on the located line of the railway;

Cross and connect with other railways.

(*e*) cross any railway, or join the railway with any other railway at any point on its route, and upon the lands of such other railway, with the necessary conveniences for the purposes of such connection;

Construct and operate railways.

(*f*) make, complete, operate, alter and maintain the railway with one or more sets of rails or tracks, to be worked by the force and power of steam, electricity, or of the atmosphere, or by mechanical power, or any combination of them;

Buildings, equipment, etc.

(*g*) construct, erect and maintain all necessary and convenient roads, buildings, stations, depots, wharves, docks, elevators, and other structures, and construct, purchase and acquire stationary or locomotive engines, rolling stock, and other apparatus necessary for the accommodation and use of the traffic and business of the railway;

Branch railways.

(*h*) make branch railways, and manage the same, and for that purpose exercise all the powers, privileges and authority necessary therefor, in as full and ample a manner as for the railway;

Transport passengers and freight.

(*i*) take, transport, carry and convey persons and goods on the railway, and regulate the time and manner in which the same shall be transported, and the tolls to be charged therefor;

Remove trees.

(*j*) fell or remove any trees which stand within one hundred feet from either side of the right of way of the railway, or which are liable to fall across any railway track;

Make tunnels and other works.

(*k*) make or construct in, upon, across, under or over any railway, tramway, river, stream, watercourse, canal, or highway, which it intersects or touches temporary or permanent inclined planes, tunnels, embankments, aqueducts, bridges, roads, ways, passages, conduits, drains, piers, arches, cuttings and fences;

Divert highways and waterways.

(*l*) divert or alter, as well temporarily as permanently, the course of any such river, stream, watercourse or highway, or raise or sink the level thereof, in order the more conveniently to carry the same over, under or by the side of the railway;

Construct drains.

(*m*) make drains or conduits into, through or under any lands adjoining the railway, for the purpose of conveying water from or to the railway;

Divert drains, pipes and wires.

(*n*) divert or alter the position of any water pipe, gas-pipe, sewer or drain, or any telegraph, telephone or electric lines, wires or poles;

Telegraph, etc.

(*o*) construct, acquire and use telegraph, telephone or electric lines and plant;

120350

Alter and substitute other works.

(*p*) from time to time alter, repair or discontinue the works hereinbefore mentioned, or any of them, and substitute others in their stead; and

Other necessary acts.

(*q*) do all other acts necessary for the construction, maintenance and operation of the railway.

Gauge.

2. The tracks of every railway, the construction of which is commenced after the seventh day of July, one thousand nine hundred and nineteen, shall be of the standard gauge of four feet eight and one-half inches, unless otherwise permitted by the Board. 1919, c. 68, s. 162.

Diversions and alterations, to be made good.

**163.** The company shall restore, as nearly as possible, to its former state, any river, stream, watercourse, highway, water pipe, gas-pipe, sewer or drain, or any telegraph, telephone or electric line, wire or pole, which it diverts or alters, or it shall put the same in such a state as not materially to impair the usefulness thereof. 1919, c. 68, s. 163.

Damage.

**164.** The company shall, in the exercise of the powers by this or the Special Act granted, do as little damage as possible, and shall make full compensation, in the manner herein and in the Special Act provided, to all persons interested, for all damage by them sustained by reason of the exercise of such powers. 1919, c. 68, s. 164.

Compensation.

Exercise of powers in United States.

**165.** Any company operating a railway from any point in Canada to any point on the international boundary line may exercise, beyond such boundary, in so far as permitted by the laws there in force, the powers which it may exercise in Canada. 1919, c. 68, s. 165.

*Commencement of Works.*

Requirements before works commenced.

**166.** The company shall not, except as in this Act otherwise provided, commence the construction of the railway, or any section or portion thereof, until the general location has been approved by the Board as hereinafter provided, nor until the plan, profile and book of reference have been sanctioned by and deposited with the Board and duly certified copies thereof deposited with the registrars of deeds, in accordance with the provisions of this Act. 1919, c. 68, s. 166.

LOCATION OF LINE.

Map.

Contents.

**167.** The company shall prepare, and submit to the Board, in duplicate, a map showing the general location of the proposed line of the railway, the termini and the principal towns and places through which the railway is to pass, giving the names thereof, the railways, navigable streams and tidewaters, if any, to be crossed by the railway, and

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120351

such as may be within a radius of thirty miles of the proposed railway, and, generally, the physical features of the country through which the railway is to be constructed, and shall give such further or other information as the Board may require.

Scale. 2. Such map shall be prepared upon a scale not smaller than six miles to the inch, or upon such other appropriate scale as the Board may determine, and shall be accompanied by an application in duplicate, stating the Special Act authorizing the construction of such railway, and requesting the Board's approval of the general location as shown on the said map.

Application.

Approval of Board. 3. The Board may approve such map and location, or any portion thereof, or may make or require such changes and alterations therein as it deems expedient.

Board may approve whole or portion. 4. Where the Board approves the whole or any portion of such map and location such approval shall be signified upon the map and the duplicate thereof accordingly.

Filing. 5. The map when so approved and the application shall be filed in the Department of Railways and Canals and the duplicate thereof with the Board.

Application of section. 6. The provisions of this section shall only apply to the main line, and to branch lines over six miles in length. 1919, c. 68, s. 167.

*Plan, Profile and Book of Reference.*

Plan, profile and book of reference. **168.** Upon compliance with the provisions of the last preceding section, the company shall make a plan, profile and book of reference of the railway.

Plan. 2. The plan shall show

(*a*) the right of way, with lengths of sections in miles;
(*b*) the names of terminal points;
(*c*) the station grounds;
(*d*) the property lines and owners' names;
(*e*) the areas and length and width of lands proposed to be taken, in figures, stating every change of width; or other accurate description thereof;
(*f*) the bearings; and
(*g*) all open drains, watercourses, highways and railways proposed to be crossed or affected.

Profile. 3. The profile shall show the grades, curves, highway and railway crossings, open drains and watercourses.

Book of reference. 4. The book of reference shall describe the portion of land proposed to be taken in each lot to be traversed, giving numbers of the lots, and the area, length and width of the portion of each lot proposed to be taken, and names of owners and occupiers so far as they can be ascertained.

Further information. 5. The Board may require any additional information for the proper understanding of the plan and profile.

120352

Sections. 6. The plan, profile and book of reference may be of a section or sections of the railway.

Quebec. 7. In the province of Quebec the portion of the railway comprised in each municipality shall be indicated on the plan, and in the book of reference, by separate number or numbers. 1919, c. 68, s. 168.

Plans and profiles, how prepared. **169.** All plans and profiles required by law to be deposited by the company with the Board, shall be drawn to such scale, with such detail, upon such materials, and shall be of such character, as the Board may, either by general regulation, or in any case, require, or sanction.

Certification. 2. All such plans and profiles shall be certified and signed by the president or vice-president or general manager, and also by the engineer of the company.

Book of reference. 3. Any book of reference, required to be so deposited, shall be prepared to the satisfaction of the Board.

Board may refuse sanction. 4. Unless and until such plan, profile and book of reference are so made satisfactory to the Board, the Board may refuse to sanction the same, or to allow the same to be deposited with the Board. 1919, c. 68, s. 169.

Sanction by Board. **170.** Such plan, profile and book of reference shall be submitted to the Board which, if satisfied therewith, may sanction the same.

Effect. 2. The Board by such sanction shall be deemed to have approved merely the location of the railway and the grades and curves thereof, as shown in such plan, profile and book of reference, but not to have relieved the company from otherwise complying with this Act.

Board may sanction deviation of one mile. 3. The Board upon the application of the company may sanction a deviation of not more than one mile from any one point as shown on the general location approved by the Board, and any such deviation shall be shown upon the general location plan filed with the Department of Railways and Canals, and upon the duplicate thereof filed with the Board.

Further information. 4. Before sanctioning any plan, profile or book of reference of a section of a railway, the Board may require the company to submit the plan, profile and book of reference of the whole or of any portion of the remainder of the railway or such further or other information as the Board may deem expedient. 1919, c. 68, s. 170.

Board may fix time for acquiring land. **171.** In granting any such sanction, or in giving leave under any provision of this Act to take lands without the consent of the owner, the Board may fix a period

(*a*) within which the company must acquire the lands or take the necessary steps for such purpose; or

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120353

(*b*) within which the notice hereinafter required to be given, preliminary to proceeding to arbitration to fix compensation or damages, shall be conclusively deemed to have been given.

Application for time limit.

2. In the event of the order granting such sanction or leave, whether made before or after the passing of this Act, providing no such time limit, any owner or person interested in the lands may apply to the Board for an order that the company shall acquire such lands, or take the necessary steps for such purpose, within such time as the Board deems proper, and thereupon the Board may make such order in the premises as appears just.

Company must acquire within one year.

3. Where no time is fixed by the Board as above mentioned, if the company, within one year after any such sanction or leave has been given by the Board, or in any case where no such sanction or leave is necessary, if the company within one year after the plan, profile and book of reference have been deposited with the registrar of deeds, does not either acquire the lands covered by such sanction, leave, or plan, profile and book of reference, or give the notice hereinafter required to be given preliminary to proceeding to arbitration to fix compensation or damages in respect thereof, the company's right to take or enter upon, without the consent of the owner, any part of such lands which it has not within the said year either acquired or given such notice in respect of, shall at the expiration of such year absolutely cease and determine, unless the Board, after notice to the owner and upon such terms as the Board may deem proper, otherwise orders.

Liability for damages.

4. If no such order is made by the Board the company shall be liable for damages and costs to any person damaged by such failure to acquire the lands or give such notice. 1919, c. 68, s. 171.

*Deposit of Plans, etc., after Sanction.*

Deposit with Board.

**172.** The plan, profile and book of reference, when so sanctioned, shall be deposited with the Board, and each plan shall be numbered consecutively in order of deposit.

With registrar of deeds.

2. The company shall also deposit copies thereof, or of such parts thereof as relate to each district or county through which the railway is to pass, duly certified as copies by the Secretary, in the offices of the registrars of deeds for such districts or counties respectively. 1919, c. 68, s. 172.

*Errors.*

Errors.

**173.** The railway may be made, carried or placed across or upon the lands of any person on the located line, although through error or any other cause, the name of such person has not been entered in the book of reference, or

120354

although some other person is erroneously mentioned as the owner of or entitled to convey, or as interested in such lands. 1919, c. 68, s. 173.

Corrections. Procedure.

**174.** Where any omission, misstatement or error is made in any plan, profile or book of reference so registered, the company may apply to the Board for a certificate to correct the same.

Notice.

2. The Board may, in its discretion, require notice to be given to parties interested, and, if it appears to the Board that such omission, misstatement or error arose from mistake, may grant a certificate setting forth the nature of the omission, misstatement or error and the correction allowed.

Deposit.

3. Upon the deposit of such certificate with the Board, and of copies thereof, certified as such by the Secretary, with the registrars of deeds of the districts or counties, respectively, in which such lands are situate, the plan, profile or book of reference shall be taken to be corrected in accordance therewith, and the company may, thereupon, subject to this Act, construct the railway in accordance with such correction. 1919, c. 68, s. 174.

*Deposit of Plans, etc., of Completed Railway.*

Plan and profile of completed line must be filed: With Board.

**175.** A plan and profile of the completed railway or of any part thereof which is completed and in operation, and of the land taken or obtained for the use thereof, shall, within six months after completion of the undertaking, or within six months after beginning to operate any such completed part, as the case may be, or within such extended or renewed period as the Board at any time directs, be made and filed with the Board.

At registry office.

2. Plans of the parts of such railway so completed or in operation located in different districts and counties, prepared on such a scale, and in such manner and form, and signed or authenticated in such manner, as the Board may from time to time, by general regulation or in any individual case, sanction or require, shall be filed in the registry offices for the districts and counties in which such parts are respectively situate. 1919, c. 68, s. 175.

*Duties of Registrars of Deeds.*

Duties of registrars of deeds.

**176.** Every registrar of deeds shall receive and preserve in his office, all plans, profiles, books of reference, certified copies thereof, and other documents, required by this Act to be deposited with him, and shall endorse thereon the day, hour and minute when the same were so deposited.

Extracts and copies.

2. All persons may resort to such plans, profiles, books of reference, copies and documents so deposited, and may make extracts therefrom, and copies thereof, as occasion

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120355

Fees.

requires, paying the registrar therefor at the rate of ten cents for each hundred words, so copied or extracted, and ten cents for each copy made of any plan or profile.

Registrar to furnish certified copies.

3. The registrar shall, at the request of any person, certify copies of any plan, profile, book of reference, certified copy thereof, or other document, deposited in his office under the provisions of this Act, or of such portions thereof as may be required, on being paid therefor at the rate of ten cents for each hundred words copied, and such additional sum, for any copy of plan or profile furnished by him, as is reasonable and customary in like cases, together with fifty cents for each certificate given by him.

Certificate of registrar.

4. Such certificate of the registrar shall set forth that the plan, profile or document, a copy of which, or of any portion of which, is certified by him, is deposited in his office, and shall state the time when it was so deposited, and that he has carefully compared the copy certified with the document on file, and that the same is a true copy of such original.

Evidence.

5. Such certified copy shall be *primâ facie* evidence of the original so deposited, that such original was so deposited at the time stated and certified, and that the same was signed, certified, attested or otherwise executed by the persons by whom and in the manner in which the said original purports to be signed, certified, attested or executed, as shown or appearing by such certified copy; and in the case of a plan, that such plan is prepared according to a scale and in a manner and form sanctioned by the Board. 1919, c. 68, s. 176.

*Board may Require Further Plans, etc.*

Further plans, etc., as Board requires.

**177.** In addition to the plans, profiles and books of reference elsewhere provided for, the company shall, with all reasonable expedition, prepare and deposit with the Board, any other or further plans, profiles, or books of reference of any portion of the railway, or of any siding, station or works thereof, which the Board may from time to time order or require. 1919, c. 68, s. 177.

*Deviations, Changes and Removal.*

Deviations, changes or alterations.

**178.** If any deviation, change or alteration is required by the company to be made in the railway, or any portion thereof, as already constructed, or as merely located and sanctioned, a plan, profile and book of reference of the portion of such railway proposed to be changed, showing the deviation, change or alteration proposed to be made, shall, in like manner as hereinbefore provided with respect to the original plan, profile and book of reference, be submitted for the approval of the Board, and may be sanctioned by the Board.

Plan, profile, etc.

Sanction.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

ARCHIVES PUBLIQUES
CANADA

120356

2. The plan, profile and book of reference of the portion of such railway so proposed to be changed shall, when so sanctioned, be deposited and dealt with as hereinbefore provided with respect to such original plan, profile and book of reference. Deposit.

3. The company may thereupon make such deviation, change, or alteration, and all the provisions of this Act shall apply to the portion of such line of railway, at any time so changed or proposed to be changed, in the same manner as they apply to the original line. Company may execute works.

4. The Board may, either by general regulation, or in any particular case, exempt the company from submitting the plan, profile and book of reference, as in this section provided, where such deviation, change, or alteration, is made, or to be made, for the purpose of lessening a curve, reducing a gradient, or otherwise benefiting the railway, or for any other purpose of public advantage, as may seem to the Board expedient, if such deviation, change, or alteration does not exceed three hundred feet from the centre line of the railway, located, or constructed, in accordance with the plans, profiles and books of reference deposited with the Board under this Act. Board may dispense with proceedings.

5. Nothing in this section shall be taken to authorize any extension of the railway beyond the termini mentioned in the Special Act. 1919, c. 68, s. 178. Termini to be observed.

**179.** The company shall not, at any time, make any change, alteration or deviation in the railway, or any portion thereof, until the provisions of the last preceding section are fully compiled with, nor remove, close, or abandon any station, or divisional point nor create a new divisional point which would involve the removal of employees, without leave of the Board; and where any such change is made the company shall compensate its employees as the Board deems proper for any financial loss caused to them by change of residence necessitated thereby. 1919, c. 68, s. 179. Unauthorized changes forbidden. Compensation.

*Branch Lines.*

**180.** The company may, for the purposes of its undertaking, construct, maintain and operate branch lines, not exceeding in any one case six miles in length, from the main line of the railway or, except as hereinafter provided, from any branch thereof. 1919, c. 68, s. 180. Power to construct.

**181.** Before commencing to construct any such branch line, the company shall Procedure.

(*a*) make a plan, profile and book of reference, showing the proposed location of the branch line, with the particulars Plans, etc.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

ticulars hereinbefore required as to plans, profiles and books of reference of the main line, and deposit the same, or such parts thereof as relate to each district or county through which the branch line is to pass, in the offices of the registrars of deeds for such districts or counties respectively;

Notice of application to Board.

(*b*) upon such deposit, give four weeks' public notice of its intention to apply to the Board under this section, in some newspaper published in each county or district through which the branch line is to pass, or, if there should be no newspaper published in such county or district, then for the same period in the *Canada Gazette:*

Provided that the Board may dispense with or shorten the time of such notice in any case where it deems proper; and

Papers to be submitted.

(*c*) after the expiration of the notice submit to the Board, upon such application, a duplicate of the plan, profile and book of reference so deposited. 1919, c. 68, s. 181.

Board may authorize branch line.

**182.** The Board, if satisfied that the branch line is necessary in the public interest or for the purpose of giving increased facilities to business, and if satisfied with the location of such branch line, and the grades and curves as shown on such plan, profile and book of reference, may, in writing, authorize the construction of the branch line in accordance with such plan, profile and book of reference, or subject to such changes in location, grades and curves as the Board may direct.

Time for construction.

2. Such authority shall limit the time, not exceeding two years, within which the company shall construct and complete such branch line. 1919, c. 68, s. 182.

Papers to be deposited with Board.

**183.** There shall be deposited with the Board the authority and the duplicate of such plan, profile and book of reference, together with such papers and plans as are necessary to show and explain any changes directed by the Board, under the provisions of the last preceding section.

Copies with registrars of deeds.

2. The company shall deposit in the registry offices of the counties or districts through which the branch line is to pass, copies, certified as such by the Secretary, of the authority, and of the papers and plans, showing the changes directed by the Board.

No extension allowed.

3. No branch line shall be

(*a*) extended under the foregoing provisions for the construction of branch lines; or

(*b*) constructed so as to form, in effect, an extension of the railway beyond the termini mentioned in the Special Act.

I 20358

Special Act controlled.

4. Except with reference to branch lines authorized by the Special Act to be constructed between any two points or places definitely fixed or named therein, no power to construct branch lines in any Special Act contained, inconsistent with the foregoing provisions for the construction of branch lines, shall have any force or effect: Provided that nothing in this subsection shall be deemed to take away or impair the rights or powers of any company under any contract with the Government of Canada, approved and ratified by a Special Act of the Parliament of Canada. 1919, c. 68, s. 183.

Saving.

Provisions applicable.

**184.** Upon compliance with the requirements of the last four preceding sections all the other provisions of this Act, except sections one hundred and seventy and one hundred and seventy-two, relating to the sanction by the Board of the plan, profile and book of reference of the railway, and the deposit thereof with the Board and in the offices of the registrars of deeds for the districts or counties through which the railway is to pass, shall, in so far as applicable, apply to the branch lines so authorized, and to the lands to be taken for such branch lines. 1919, c. 68, s. 184.

*Industrial Spurs.*

Branch lines required by owner of any industry.

**185.** When any industry or business is established or intended to be established, within six miles of the railway, and the owner of such industry or business, or the person intending to establish the same, is desirous of obtaining railway facilities in connection therewith, but cannot agree with the company as to the construction and operation of a spur or branch line from the railway thereto, the Board may, on the application of such owner or person, and upon being satisfied of the necessity for such spur or branch line in the interests of trade, order the company to construct, maintain and operate such spur or branch line, and may direct such owner or person to deposit in some chartered bank such sum or sums as are by the Board deemed sufficient, or are by the Board found to be necessary to defray all expenses of constructing and completing the spur or branch line in good working order, including the cost of the right of way, incidental expenses and damages.

Owner to deposit cost.

Payment therefrom to the company.

2. The amount so deposited shall, from time to time, be paid to the company upon the order of the Board, as the work progresses.

Repayment to owner by rebate on tolls.

3. The aggregate amount so paid by the applicant in the construction and completion of the said spur or branch line shall be repaid or refunded to the applicant by the company by way of rebate, to be determined and fixed by the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120359

the Board, out of or in proportion to the tolls charged by the company in respect of the carriage of traffic for the applicant over the said spur or branch line.

Lien to owner meantime.

4. Until so repaid or refunded, the applicant shall have a special lien for such amount upon such branch line, to be reimbursed by rebate as aforesaid.

Discharge of lien.

5. Upon repayment by the company to such applicant of all payments made by the applicant upon such construction, the said spur or branch line, right of way and equipment shall become the absolute property of the company free from any such lien.

Operation of branch to be regulated by Board.

6. The operation and maintenance of the said spur or branch line by the company, shall be subject to and in accordance with such order as the Board makes with respect thereto, having due regard to the requirements of the traffic thereon, and to the safety of the public and of the employees of the company.

Provisions applicable.

7. All the provisions of this Act respecting the construction of spur or branch lines shall apply to any spur or branch line constructed under this section. 1919, c. 68, s. 185.

Use of spur for another industry.

**186.** Notwithstanding anything done under the last preceding section and notwithstanding any agreement made thereunder or otherwise the Board may, on application, permit any owner of another industry or business or any person intending to establish another industry or business, within six miles of the railway, to have traffic carried over any spur or branch line, or any part thereof, constructed pursuant to the said section or to have such spur or branch line extended: Provided that any terms and conditions which the Board thinks just and reasonable shall always be imposed, and regard shall always be had to the convenience of the owner or person having senior rights in such spur or branch line. 1919, c. 68, s. 186.

Removal.

**187.** No branch line or spur constructed pursuant to either of the last two preceding sections shall be removed without the consent of the Board. 1919, c. 68, s. 187.

*Stations.*

Stations, location of to be approved by Board.

**188.** Before the company proceeds to erect any station upon its railway, the location of such station shall be approved of by the Board.

Facilities.

2. Every station of the company shall be erected, operated and maintained with good and sufficient accommodation and facilities for traffic.

Board may order station.

3. The company shall erect, maintain and operate stations at any points on the railway designated by the Board, and shall provide such accommodation and facilities in connection therewith as the Board directs.

120360

On railways subsidized by Parliament.

4. In the case of any railway, whether subject to the legislative authority of the Parliament of Canada or not, subsidized in money or in land, after the eighteenth day of July, one thousand nine hundred, under the authority of an Act of the Parliament of Canada, the payment and acceptance of such subsidy shall be taken to be subject to the covenant or condition, whether expressed or not in any agreement relating to such subsidy, that the company, for the time being owning or operating such railway, shall, when thereto directed by order of the Board, maintain and operate stations, with such accommodation or facilities in connection therewith as are defined by the Board, at such points on the railway as are designated in such order. 1919, c. 68, s. 188.

THE TAKING AND USING OF LANDS.

*Restrictions—Crown Lands.*

Crown lands.

**189.** No company shall take possession of, use or occupy any lands vested in the Crown, without the consent of the Governor in Council.

Consent.

2. Any railway company may, with such consent, upon such terms as the Governor in Council prescribes, take and appropriate, for the use of its railway and works, so much of the lands of the Crown lying on the route of the railway which have not been granted or sold, as is necessary for such railway, and also so much of the public beach, or bed of any lake, river or stream, or of the land so vested covered with the waters of any such lake, river or stream as is necessary for making, completing and using its said railway and works.

May not alienate.

3. The company may not alienate any such lands so taken, used or occupied.

In trust.

4. Whenever any such lands are vested in the Crown for any special purpose, or subject to any trust, the compensation money which the company pays therefor shall be held or applied by the Governor in Council for the like purpose or trust. 1919, c. 68, s. 189.

*Public Beach and Waters.*

Compensation.

Public beach and lands covered with water.

**190.** The extent of the public beach, or of the land covered with the waters of any river or lake in Canada, taken for the railway, shall not exceed the quantity hereinafter limited in the case of lands which may be taken without the consent of the owner. 1919, c. 68, s. 190.

*Naval and Military Lands.*

Naval or military lands.

**191.** Whenever it is necessary for the company to occupy any part of the lands belonging to the Crown reserved for naval or military purposes, it shall first apply

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120361

for and obtain the license and consent of the Crown, under the hand and seal of the Governor General.

License or consent.

2. No such license or consent shall be given, except upon a report first made thereupon by the naval or military authorities, in which such lands are for the time being vested, approving of such license and consent being so given.

Entry.

3. The company may, with such license and consent, at any time or times enter into and enjoy any of the said lands for the purposes of the railway. 1919, c. 68, s. 191.

*Indian Lands.*

Indian lands.

**192.** No company shall take possession of or occupy any portion of any Indian reserve or lands, without the consent of the Governor in Council.

Consent.

2. When, with such consent, any portion of any such reserve or lands is taken possession of, used or occupied by any railway company, or when the same is injuriously affected by the construction of any railway, compensation shall be made therefor as in the case of lands taken without the consent of the owner. 1919, c. 68, s. 192.

*Other Railways.*

Lands of other companies.

Use of tracks, etc.

**193.** The company may take possession of, use or occupy any lands belonging to any other railway company, use and enjoy the whole or any portion of the right of way, tracks, terminals, stations or station grounds of any other railway company, and have and exercise full right and power to run and operate its trains over and upon any portion or portions of the railway of any other railway company, subject always to the approval of the Board first obtained and to any order and direction which the Board may make in regard to the exercise, enjoyment or restriction of such powers or privileges.

Approval of Board.

Procedure therefor.

2. Such approval may be given upon application and notice, and, after hearing, the Board may make such order, give such directions, and impose such conditions or duties upon either party as to it may appear just or desirable, having due regard to the public and all proper interests.

Compensation.

3. If the parties fail to agree as to compensation, the Board may, by order, fix the amount of compensation to be paid in respect of the powers and privileges so granted.

Board may order proceedings.

4. Where the proposed location of any new railway is close to or in the neighbourhood of an existing railway, and the Board is of opinion that it is undesirable in the public interest to have the two separate rights of way in such vicinity, the Board may, when it deems proper, upon the application of any company, municipality or person interested, or of its own motion, order that the company constructing

120362

structing such new railway shall take the proceedings provided for in subsection one of this section to such extent as the Board deems necessary in order to avoid having such separate rights of way.

Joint use of tracks, etc.

5. The Board, in any case where it deems it in the public interest to avoid the construction of one or more new railways close to or in the neighbourhood of an existing railway, or to avoid the construction of two or more new railways close to or in the neighbourhood of each other, may, on the application of any company, municipality or person interested, or of its own motion, make such order or direction for the joint or common use, or construction and use, by the companies owning, constructing or operating such railways, of one right of way, with such number of tracks, and such terminals, stations and other facilities, and such arrangements respecting them, as may be deemed necessary or desirable. 1919, c. 68, s. 193.

*Mines and Minerals.*

Mines to be protected.

**194.** No company shall, without the authority of the Board, locate the line of its proposed railway, or construct the same or any portion thereof, so as to obstruct or interfere with, or injuriously affect the working of, or the access or adit to any mine then open, or for the opening of which preparations are, at the time of such location, being lawfully and openly made. 1919, c. 68, s. 194.

Company not entitled to minerals.

**195.** The company shall not, unless the same have been expressly purchased, be entitled to any mines, ores, metals, coal, slate, mineral oils, gas or other minerals in or under any lands purchased by it, or taken by it under any compulsory powers given it by this Act, except only such parts thereof as are necessary to be dug, carried away or used in the construction of the works.

Exception.

Not included in conveyance.

2. All such mines and minerals, except as aforesaid, shall be deemed to be excepted from the conveyance of such lands, unless they have been expressly named therein and conveyed thereby. 1919, c. 68, s. 195.

Mining under or within 40 yards of any railway.

**196.** No owner, lessee or occupier of any such mines or minerals lying under the railway or any of the works connected therewith, or within forty yards therefrom, shall work the same until leave therefor has been obtained from the Board.

Application for leave of Board.

2. Upon any application to the Board for leave to work any such mines or minerals, the applicant shall submit a plan and profile of the portion of the railway to be affected thereby, and of the mining works or plant affecting the railway, proposed to be constructed or operated, giving all reasonable

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120361

for and obtain the license and consent of the Crown, under the hand and seal of the Governor General.

License or consent.

2. No such license or consent shall be given, except upon a report first made thereupon by the naval or military authorities, in which such lands are for the time being vested, approving of such license and consent being so given.

Entry.

3. The company may, with such license and consent, at any time or times enter into and enjoy any of the said lands for the purposes of the railway. 1919, c. 68, s. 191.

*Indian Lands.*

Indian lands.

**192.** No company shall take possession of or occupy any portion of any Indian reserve or lands, without the consent of the Governor in Council.

Consent.

2. When, with such consent, any portion of any such reserve or lands is taken possession of, used or occupied by any railway company, or when the same is injuriously affected by the construction of any railway, compensation shall be made therefor as in the case of lands taken without the consent of the owner. 1919, c. 68, s. 192.

*Other Railways.*

Lands of other companies.

Use of tracks, etc.

**193.** The company may take possession of, use or occupy any lands belonging to any other railway company, use and enjoy the whole or any portion of the right of way, tracks, terminals, stations or station grounds of any other railway company, and have and exercise full right and power to run and operate its trains over and upon any portion or portions of the railway of any other railway company, subject always to the approval of the Board first obtained and to any order and direction which the Board may make in regard to the exercise, enjoyment or restriction of such powers or privileges.

Approval of Board.

Procedure therefor.

2. Such approval may be given upon application and notice, and, after hearing, the Board may make such order, give such directions, and impose such conditions or duties upon either party as to it may appear just or desirable, having due regard to the public and all proper interests.

Compensation.

3. If the parties fail to agree as to compensation, the Board may, by order, fix the amount of compensation to be paid in respect of the powers and privileges so granted.

Board may order proceedings.

4. Where the proposed location of any new railway is close to or in the neighbourhood of an existing railway, and the Board is of opinion that it is undesirable in the public interest to have the two separate rights of way in such vicinity, the Board may, when it deems proper, upon the application of any company, municipality or person interested, or of its own motion, order that the company constructing

120362

structing such new railway shall take the proceedings provided for in subsection one of this section to such extent as the Board deems necessary in order to avoid having such separate rights of way.

Joint use of tracks, etc.

5. The Board, in any case where it deems it in the public interest to avoid the construction of one or more new railways close to or in the neighbourhood of an existing railway, or to avoid the construction of two or more new railways close to or in the neighbourhood of each other, may, on the application of any company, municipality or person interested, or of its own motion, make such order or direction for the joint or common use, or construction and use, by the companies owning, constructing or operating such railways, of one right of way, with such number of tracks, and such terminals, stations and other facilities, and such arrangements respecting them, as may be deemed necessary or desirable. 1919, c. 68, s. 193.

*Mines and Minerals.*

Mines to be protected.

**194.** No company shall, without the authority of the Board, locate the line of its proposed railway, or construct the same or any portion thereof, so as to obstruct or interfere with, or injuriously affect the working of, or the access or adit to any mine then open, or for the opening of which preparations are, at the time of such location, being lawfully and openly made. 1919, c. 68, s. 194.

Company not entitled to minerals.

**195.** The company shall not, unless the same have been expressly purchased, be entitled to any mines, ores, metals, coal, slate, mineral oils, gas or other minerals in or under any lands purchased by it, or taken by it under any compulsory powers given it by this Act, except only such parts thereof as are necessary to be dug, carried away or used in the construction of the works.

Exception.

Not included in conveyance.

2. All such mines and minerals, except as aforesaid, shall be deemed to be excepted from the conveyance of such lands, unless they have been expressly named therein and conveyed thereby. 1919, c. 68, s. 195.

Mining under or within 40 yards of any railway.

**196.** No owner, lessee or occupier of any such mines or minerals lying under the railway or any of the works connected therewith, or within forty yards therefrom, shall work the same until leave therefor has been obtained from the Board.

Application for leave of Board.

2. Upon any application to the Board for leave to work any such mines or minerals, the applicant shall submit a plan and profile of the portion of the railway to be affected thereby, and of the mining works or plant affecting the railway, proposed to be constructed or operated, giving all reasonable

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120363

reasonable and necessary information and details as to the extent and character of the same.

Protection and safety of the public.

3. The Board may grant such application upon such terms and conditions for the protection and safety of the public as to the Board seem expedient, and may order that such other works be executed, or measures taken, as under the circumstances appear to the Board best adapted to remove or diminish the danger arising or likely to arise from such mining operations. 1919, c. 68, s. 196.

Board may order compensation in certain cases.

**197.** The company shall, from time to time, pay to the owner, lessee, or occupier of any such mines such compensation as the Board shall fix and order to be paid, for or by reason of any severance by the railway of the land lying over such mines, or because of the working of such mines being prevented, stopped or interrupted, or of the same having to be worked in such manner and under such restrictions as not to injure or be detrimental to the railway, and also for any minerals not purchased by the company which cannot be obtained by reason of the construction and operation of the railway. 1919, c. 68, s. 197.

Examination of mine workings.

**198.** If necessary in order to ascertain whether any such mines are being worked, or have been worked, so as to injure or be detrimental to the railway or its safety or the safety of the public, the company may with the written permission of the Board, after giving twenty-four hours' notice in writing, enter upon any lands through or near which the railway passes wherein any such mines are being worked, and enter into and return from any such mines or the works connected therewith; and for such purpose may make use of any apparatus of such mines and use all necessary means for discovering the distance from the railway to the parts of such mines which are being worked. 1919, c. 68, s. 198.

*Extent of Lands that may be Taken without Consent.*

Lands taken without consent.

**199.** The lands which may be taken without the consent of the owner shall not, subject to the provisions of the next following section, exceed

For right of way.

(*a*) for the right of way, one hundred feet in breadth, except in places where the rail level is or is proposed to be more than five feet above or below the surface of the adjacent lands, when such additional width may be taken as shall suffice to accommodate the slope and side ditches;

For stations, etc.

(*b*) for stations, depots and yards, with the freight sheds, warehouses, wharfs, elevators and other structures for

120364

the accommodation of traffic incidental thereto, one mile in length by five hundred feet in breadth, including the width of the right of way:

Interests less than fee simple.

Provided that no interest in land less than a fee-simple interest shall be acquired without the consent of the owner, except upon leave of the Board and upon such terms and conditions as the Board may impose. 1919, c. 68, s. 199.

*Leave to Take Additional Lands.*

Where more ample space required.

**200.** Should the company require, at any point on the railway, more ample space than it possesses or may take under the last preceding section, for the convenient accommodation of the public, or for the traffic on its railway, or for protection against snowdrifts, or for the diversion of a highway, or for the substitution of one highway for another, or for the construction or taking of any works or measures ordered by the Board under any of the provisions of this Act or the Special Act, or to secure the efficient construction, maintenance or operation of the railway, it may, whether before or after the railway has been opened for the carriage of traffic, apply to the Board for authority to take the same for such purposes, without the consent of the owner.

Procedure.

2. The company shall give ten days' notice of such application to the owner or possessor of such lands, and shall, upon such application, furnish to the Board copies of such notices, with affidavits of the service thereof.

What application must include.

3. The company, upon such application, shall also furnish to the Board, in duplicate

Plan, etc.

(*a*) a plan, profile and book of reference of the portion of the railway affected, showing the additional lands required, and certified as hereinbefore provided with respect to plans and profiles required to be deposited by the company with the Board;

Particulars to be specified.

(*b*) an application, in writing, for authority to take such lands, signed and sworn to by the president, vice-president, general manager or engineer of the company, referring to the plan, profile and book of reference, specifying definitely and in detail the purposes for which each portion of the lands is required, and the necessity for the same, and showing that no other land suitable for such purposes can be acquired at such place on reasonable terms and with less injury to private rights.

Authority from Board.

4. After the time stated in such notices, and the hearing of such parties interested as may appear, the Board may, in its discretion, and upon such terms and conditions as the Board deems expedient, authorize in writing the taking,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I 20365

for the said purposes, of the whole or any portion of the lands applied for.

In duplicate.

5. Such authority shall be executed in duplicate, and one of such duplicates shall be filed, with the plan, profile, book of reference, application and notices, with the Board; and the other, with the duplicate plan, profile, book of reference and application, shall be delivered to the company.

Deposit with registrars of deeds.

6. Such duplicate authority, plan, profile, book of reference and application, or copies thereof certified as such by the Secretary, shall be deposited with the registrars of deeds of the districts or counties, respectively, in which such lands are situate.

Provisions of this Act which apply.

7. All the provisions of this Act applicable to the taking of lands without the consent of the owner for the right of way or main line of the railway shall apply to the lands authorized under this section to be taken except sections one hundred and seventy and one hundred and seventy-two relating to the sanction by the Board of the plan, profile and book of reference of the railway, but the deposit with the Board and with the registrar of deeds shall be made as in this section provided.

Repeal and change of certificates made under 1888, c. 29, s. 109.

8. The Board may, upon consent in writing having been first obtained from the Minister in that behalf, repeal, rescind, change or vary any certificate of the Minister made under section one hundred and nine of the Railway Act 1888. 1919, c. 68, s. 200.

*Using Lands for Special Purposes.*

Use of adjoining lands.

**201.** The company, either for the purpose of constructing or repairing its railway, or for the purpose of carrying out the requirements of the Board, or in the exercise of the powers conferred upon it by the Board, may enter upon any land which is not more than six hundred feet distant from the centre of the located line of the railway, and may occupy the said land as long as is necessary for the purposes aforesaid; and all the provisions of law at the time applicable to the taking of land by the company, and its valuation, and the compensation therefor, shall apply to the case of any land so required.

If owner does not consent.

2. Before entering upon any land for the purposes aforesaid, the company shall, in case the consent of the owner is not obtained, pay into the office of one of the superior courts for the province in which the land is situated

Sum to be deposited.

(*a*) such sum, as is, after two clear days' notice to the owner of the land, or to the person empowered to convey the same, or interested therein, fixed by a judge of such superior court; and

Interest.

(*b*) interest for six months upon the sum so fixed.

I 20366

As security for compensation.

3. Such deposit shall be retained to answer any compensation which may be awarded the person entitled thereto, and may upon order of a judge of such court, be paid out to such person in satisfaction *pro tanto* of such award, and the surplus, if any thereafter remaining, shall by order of the judge, be repaid to the company.

Deficiency to be paid.

4. Any deficiency in such deposit to satisfy such award shall be forthwith paid by the company to the person entitled to compensation under such award. 1919, c. 68, s. 201.

**202.** Whenever

Obtaining materials for construction or operation.

(*a*) any stone, gravel, earth, sand, water or other material is required for the construction, maintenance or operation of the railway, or any part thereof; or

Transport.

Tracks or conduits.

(*b*) such materials or water, so required, are situate, or have been brought to a place at a distance from the line of railway, and the company desires to lay down the necessary tracks, spurs or branch lines, water pipes or conduits, over or through any lands intervening between the railway and the land on which such materials or water are situate, or to which they have been brought;

the company may, if it cannot agree with the owner of the lands for the purchase thereof, cause a land surveyor, duly licensed to act in the province, or an engineer to make a plan and description of the property or right of way, and shall serve upon each of the owners or occupiers of the land affected a copy of such plan and description, or of so much thereof as relates to the lands owned or occupied by them respectively, duly certified by such surveyor or engineer.

Plan and description.

Provisions of this Act which apply.

2. All the provisions of this Act shall, in so far as applicable, apply, and the powers thereby granted may be used and exercised to obtain the materials or water, so required, or the right of way to the same, irrespective of the distance thereof: Provided that the company shall not be required to submit any such plan for the sanction of the Board.

Title may be acquired.

3. The company may, at its discretion, acquire the lands from which such materials or water are taken, or upon which the right of way thereto is located, for a term of years or permanently.

Arbitration.

4. The notice of arbitration, if arbitration is resorted to, shall state the extent of the privilege and title required.

Tracks not to be used for other purposes.

5. The tracks, spurs or branch lines constructed or laid by the company under this section shall not be used for any purpose other than in this section mentioned, except by leave of the Board, and subject to such terms and conditions as the Board sees fit to impose.

Power of Board.

6. The Board may restrict or forbid the exercise of any power under this section. 1919, c. 68, s. 202.

ARCHIVES PUBLIQUES
CANADA

120367

Snow fences.

**203.** Every railway company may, on and after the first day of November, in each year, enter into and upon any lands of His Majesty or of any person lying along the route or line of the railway, and erect and maintain snow fences thereon, subject to the payment of such land damages, if any actually suffered, as are thereafter established, in the manner provided by law with respect to such railway.

Compensation.

Removal.

2. Every snow fence so erected shall be removed on or before the first day of April then next following. 1919, c. 68, s. 203.

*Purchase and Conveyance.*

Purchase of more land than required.

**204.** Except as otherwise hereinafter provided, whenever the company can purchase a larger quantity of land from any particular owner at a more reasonable price, on the average, or on terms more advantageous, than those upon which it could obtain the portion thereof which it may take from him without his consent, it may purchase such larger quantity.

Re-sale.

2. The company may sell and dispose of any part of the lands so purchased which may be unnecessary for its undertaking. 1919, c. 68, s. 204.

Power of representative persons to convey.

**205.** All tenants in tail or for life, *grevés de substitution,* guardians, curators, executors, administrators, trustees and all persons whomsoever, as well for and on behalf of themselves, their heirs and successors, as on behalf of those whom they represent, whether infants, issue unborn, lunatics, idiots, *femes-covert* or other persons, seized, possessed of or interested in any lands, may, subject to the provisions of the next following section, contract and sell and convey to the company all or any part thereof. 1919, c. 68, s. 205.

Order of judge may be had.

**206.** When such persons have no right in law to sell or convey the rights of property in the said lands they shall not sell or convey the same without obtaining from a judge, after due notice to the persons interested, the right to sell the said lands: Provided that where any person interested is absent from the district or county in which the lands lie, or is unknown, the judge may order such substitutional service of notice as he deems proper or may dispense with notice.

Purchase money.

2. The said judge shall give such orders as are necessary to secure the investment of the purchase money, in such a manner as he deems necessary, in accordance with the law of the province, to secure the interests of the owner of the said land. 1919, c. 68, s. 206.

Limitation of powers to convey.

**207.** The powers by the last two preceding sections conferred upon

(*a*) rectors in possession of glebe lands in the province of Ontario;

120368

(*b*) ecclesiastical and other corporations;
(*c*) trustees of land for church or school purposes;
(*d*) executors appointed by wills under which they are not invested with, and have not otherwise, power to sell the real property of the testator; and
(*e*) administrators of persons dying intestate seized of real property, where such administrators have not power to sell such property;

shall only extend and be exercised with respect to any of such lands actually required for the use and occupation of the company. 1919, c. 68, s. 207.

Conveyance to vest fee simple.

**208.** Any contract, agreement, sale, conveyance or assurance made under the authority of any of the last three preceding sections shall be valid and effectual in law, to all intents and purposes and whatsoever; and any conveyance so authorized shall vest in the company receiving the same the fee simple in the lands therein described, freed and discharged from all trusts, restrictions and limitations whatsoever.

Indemnity to persons conveying.

2. The person so conveying is hereby relieved from liability for what he does by virtue of or in pursuance of this Act. 1919, c. 68, s. 208.

Application of purchase money.

**209.** The company shall not be responsible for the disposition of any purchase money for lands taken by the company for its purposes, if paid to the owner of the land or into court for his benefit. 1919, c. 68, s. 209.

Prior contracts.

**210.** Any contract or agreement made by any person authorized by this Act to convey lands, either before the deposit of the plan, profile and book of reference, or before the setting out and ascertaining of the lands required for the railway, shall, if such contract or agreement or notice thereof by caveat or otherwise, is duly registered with the proper registrar of deeds, be binding at the price agreed upon, if the lands are afterwards so set out and ascertained within one year from the date of the contract or agreement, and although such lands have in the meantime become the property of a third person.

May be carried out.

2. Possession of the lands may be taken, and the agreement and price may be dealt with, as if such price had been fixed by an arbitration award as hereinafter provided, and the agreement shall be in the place of an award. 1919, c. 68, s. 210.

Rental when parties cannot sell.

**211.** If, in any case not hereinbefore provided for, any person interested in any lands so set out and ascertained is not authorized by law to sell or alienate the same, he may agree upon a fixed annual rent as an equivalent, and not upon a principal sum, to be paid therefor.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120369

How fixed.

2. If the amount of the rent is not fixed by agreement, it shall be fixed and all proceedings shall be regulated, in the manner in this Act prescribed. 1919, c. 68, s. 211.

Rent chargeable to working expenses.

**212.** Such annual rent and every other annual rent, agreed upon or ascertained, and to be paid for the purchase of any lands, or for any part of the purchase money of any lands which the vendor agrees to leave unpaid, shall, upon the deed creating such charge and liability being duly registered in the registry office of the proper district, county or registration division, be chargeable as part of the working expenditure of the railway. 1919, c. 68, s. 212.

*Publishing Notice of Plans and Making Agreements.*

Compensation or damages may be agreed for.

**213.** After the expiration of ten days from the deposit of the plan, profile and book of reference in the office of the registrar of deeds, and after notice thereof has been given in at least one newspaper, if any published, in each of the districts and counties through which the railway is intended to pass, application may be made by the company to the owners of lands, or to persons empowered to convey lands, or interested in lands, which may be taken, or which suffer damage from the taking of materials, or the exercise of any of the powers granted for the railway; and, thereupon, such agreements and contracts as seem expedient to both parties may be made with such persons, touching the said lands or the compensation to be paid for the same, or for the damages, or as to the mode in which such compensation shall be ascertained.

Agreements authorized.

Company may grant easement, etc.

2. The company may at any time grant or agree to grant to the owner of any lands injuriously affected, or likely to be injuriously affected, by the exercise of the company's powers, any easement, servitude or privilege over or in respect of the company's lands or the lands being taken by the company, and may construct and maintain or agree to construct and maintain any work for such owner's benefit; and any such agreement may be enforced by the Board, or damages may be recovered for the breach thereof in any court of competent jurisdiction.

General notice.

3. Such deposit of plan, profile and book of reference and such notice of such deposit, shall be deemed a general notice to all parties of the lands which will be required for the railway and works. 1919, c. 68, s. 213.

Disagreement.

**214.** In case of disagreement between the parties, or any of them, all questions which arise between them shall be settled as hereinafter provided. 1919, c. 68, s. 214.

120370

EXPROPRIATION PROCEEDINGS.

*Notice.*

Notice of expropriation to be served.

**215.** Preliminary to proceeding to arbitration to fix compensation or damages the company shall serve upon the opposite party a notice, which shall contain

(*a*) a description of the lands to be taken, or of the powers intended to be exercised with regard to any lands therein described;

(*b*) a declaration of readiness to pay a certain sum or rent, as the case may be, as compensation for such lands or for such damages; and

(*c*) a notification that if within ten days after the service of this notice, or, where the notice is served by publication, within one month after the first publication thereof, the party to whom the notice is addressed does not give notice to the company that he accepts the sum offered by the company, either he or the company will be entitled to apply to have the compensation fixed by arbitration as provided in this Act. 1919, c. 68, s. 215.

Certificate of surveyor or engineer.

**216.** Such notice shall be accompanied by the certificate of a sworn surveyor for the province in which the lands are situated or an engineer, who is not interested in the land or in the amount of compensation or damages, which certificate shall state

(*a*) that the land, if the notice relates to the taking of land shown on the said plan, is required for the railway;

(*b*) that he knows the land, or the amount of damage likely to arise from the exercise of the powers; and

(*c*) what sum is, in his opinion, a fair compensation for the land and damages aforesaid. 1919, c. 68, s. 216.

Service by publication.

**217.** If the opposite party is absent from the district or county in which the lands lie, or is unknown, an application for service by advertisement may be made to a judge of a superior court for the province or district, or to the judge of the county court of the county where the lands lie.

Application for.

2. Such application shall be accompanied by such certificate as aforesaid, and by an affidavit of some officer of the company, that the opposite party is so absent, or that, after diligent inquiry, the person on whom the notice ought to be served cannot be ascertained.

Judge shall order notice.

3. The judge shall order a notice as aforesaid, but without such certificate, to be inserted three times in the course of one month in a newspaper published in the district or county.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120371

county, or, if there is no newspaper published therein, then in a newspaper published in some adjacent district or county, and in such other newspaper, if any, as the judge may direct. 1919, c. 68, s. 217.

Notice may be abandoned.

**218.** Where the notice given improperly describes the lands or materials intended to be taken, or where the company decides not to take the lands or materials mentioned in the notice, it may abandon the notice and all proceedings thereunder, but shall be liable to the person notified for all damages suffered and costs incurred by him in consequence of such notice and abandonment, and such damages shall be fixed and such costs taxed by the judge, or as he directs.

Damages and costs.

New notice may be given.

2. The company after payment of such damages and costs, if any, may, notwithstanding the abandonment of any former notice, give to the same or any other person notice for other lands or materials, or for lands or materials otherwise described.

Notice in lieu of abandonment.

3. Where the amount of compensation payable under the notice has been referred to arbitration, the company may, in lieu of abandoning the notice pursuant to subsection one hereof, give to the opposite party and to the arbitrator, a notice varying the description of the lands or materials to be taken or the powers intended to be exercised by the company; which subsequent notice shall also contain

Particulars of notice.

(*a*) a declaration of readiness to pay a certain sum or rent as the case may be, as compensation for such lands or for damages for such materials or powers, and damages suffered and costs incurred by such opposite party in consequence of the former notice;

(*b*) a notification that if within eight days after the service of such notice, the party to whom the notice is addressed does not give notice to the company that he accepts the sum offered by the company, the arbitrator may proceed to fix the compensation for the lands, materials or powers described in such subsequent notice.

Evidence.

4. In the event of the arbitration proceeding pursuant to such subsequent notice, all evidence taken and proceedings had under the former notice, shall, in so far as they are applicable, be used in the arbitration upon the subsequent notice and the proceedings on both notices shall be deemed one arbitration, but the company shall be liable to pay all damages suffered and costs incurred by the opposite party by reason of the company having failed to demand by the original notice, the lands, materials or powers as described in the subsequent notice. 1919, c. 68, s. 218.

120372

*Arbitrator.*

If sum offered not accepted.

**219.** If within ten days after the service of such notice, or, where service is made by advertisement, within one month after the first publication thereof, the opposite party does not give notice to the company that he accepts the sum offered by it, either party may apply to the judge of the county court of the county in which the lands lie, or, in the province of Quebec or in any other part of Canada where there is no county court, to a judge of the superior court for the district or place in which the lands lie, to determine the compensation to be paid as aforesaid.

Appointment of arbitrator.

Notice.

2. Ten days' notice of such application shall be given by the company to the opposite party, or *vice versa*.

Service by publication.

3. If the opposite party is absent from the district or county in which the lands lie, or is unknown, service of such ten days' notice may be made by advertisement as hereinbefore authorized: Provided that the judge may dispense with, shorten or lengthen the time or times for the publication of the notice in any case in which he deems it proper. 1919, c. 68, s. 219.

Constituting arbitrator.

**220.** Such judge shall, upon application being made to him as aforesaid, become the arbitrator for determining such compensation: Provided that where such judge is personally interested in the land or in the amount of the compensation or damages in question, or where for any other reason it is necessary, either party may, on six days' notice to the opposite party, apply to a judge of a superior court to appoint, and that judge may appoint, a county or superior court judge to be arbitrator, and in such case the judge so appointed shall be the arbitrator for the purposes aforesaid.

Procedure.

2. The arbitrator shall proceed to ascertain such compensation in such way as he deems best, and, except as hereinafter provided, his award shall be final and conclusive. 1919, c. 68, s. 220.

Award.

*Determining Compensation.*

Increased value of remaining lands to be considered.

**221.** The arbitrator, in deciding on such value or compensation, shall take into consideration the increased value, beyond the increased value common to all lands in the locality, that will be given to any lands of the opposite party through or over which the railway will pass, by reason of the passage of the railway through or over the same or by reason of the construction of the railway, and shall set off such increased value that will attach to the said lands against the inconvenience, loss or damage that might be suffered or sustained by reason of the company taking possession of or using the said lands.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

L 20373

Date of compensation fixed.

2. The date of the deposit of the plan, profile and book of reference with the registrar of deeds shall be the date with reference to which such compensation or damages shall be ascertained: Provided, however, that if the company does not actually acquire title to the lands within one year from the date of such deposit then the date of such acquisition shall be the date with reference to which such compensation or damages shall be ascertained.

Interest may be allowed.

3. The arbitrator may include in the award an allowance for interest on the compensation or damages from the date of deposit of the plan, profile and book of reference with the registrar of deeds or for such shorter time as he deems proper. 1919, c. 68, s. 221.

Company may offer easement, etc.

**222.** In mitigation of any injury or damage caused or likely to be caused to any lands by the exercise of the company's powers, the company may, by its notice of expropriation or by subsequent notice filed with the arbitrator, and served upon the opposite party, prior to the close of the hearing before the arbitrator, undertake to abandon or grant to the owner of the above mentioned lands or the party interested therein any portion of the company's lands, or the lands being taken, or any easement, servitude or privilege over or in respect of the same, or to construct and maintain any work for the benefit of such owner or person interested, and if such owner or person interested, by writing filed with the arbitrator, consents to accept what is so undertaken, or if the arbitrator approves thereof in the award, such undertaking shall be binding upon the company, and the compensation or damages shall be fixed in view of what is so undertaken, and the undertaking may be enforced by the Board, or damages may be recovered for the breach thereof in any court of competent jurisdiction. 1919, c. 68, s. 222.

*Costs of Arbitration.*

Costs, how disposed of.

**223.** The costs of the arbitration shall be in the discretion of the arbitrator and shall be paid by the party against whom he allows the same and it shall be the duty of the arbitrator to state in his award whether the whole or any part of the costs are allowed and by whom the same are to be paid.

Taxation.

2. The amount of the costs, if not agreed upon, may be taxed by the proper taxing officer for the taxation of costs of an action or suit tried before the judge who acted as arbitrator, and appeal may be taken from such taxing officer as in the case of the costs of such an action or suit.

120374

No fees.

3. The arbitrator shall not be entitled to any fee or reward for his services as arbitrator, but shall be paid, as part of the costs of the arbitration, all his actual necessary and reasonable travelling and other expenses incurred in or in connection with the arbitration. 1919, c. 68, s. 223. Expenses.

*Proceedings of Arbitrator.*

Examination by arbitrator.

**224.** The arbitrator shall examine on oath or solemn affirmation such witnesses as appear before him, but no more than three expert or opinion witnesses shall be called in behalf of any party: Provided that the arbitrator may by consent of the parties decide the matter upon view or inspection of the property without examining witnesses, but any party or his representative may in such case be permitted to point out and explain such things as seem material to the case. 1919, c. 68, s. 224. Proviso.

Powers of arbitrator.

**225.** The arbitrator may in any case with respect to such arbitration

(*a*) enter upon and inspect any land, place, building, works or other thing, being the property of or under the control of the company or the opposite party, the entry or inspection of which appears to him requisite; Entry.

(*b*) inspect any works, structure, rolling stock or property of the company; Inspection.

(*c*) require the production of all books, papers, plans, specifications, drawings and documents relating to the matter before him; and Production.

(*d*) administer oaths, affirmations or declarations. Oaths.

Compelling witnesses.

2. He shall have the like power in summoning witnesses and enforcing their attendance and compelling them to give evidence and produce books, papers or things which they are required to produce as is vested in any court in civil cases.

Witnesses' fees.

3. The persons attending and giving evidence at any such arbitration shall be entitled to the like fees and allowances for so doing as if summoned to attend before the Exchequer Court.

Incriminating papers.

4. The provisions hereinbefore contained with respect to the production before the Board of books and papers which may tend to criminate the persons producing them shall apply to persons attending and giving evidence at any such arbitration. 1919, c. 68, s. 225.

Notes of evidence.

**226.** The arbitrator shall take down in writing the evidence brought before him, unless either party requires that it be taken by a stenographer; in which case a stenographer shall be named by the arbitrator, unless the parties agree upon one.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120375

Stenographer. 2. The stenographer shall be sworn before the arbitrator before entering upon his duties.

His expenses. 3. The expense of such stenographer, if not arranged by agreement between the parties, shall form part of the costs of the arbitration. 1919, c. 68, s. 226.

Notice of award to be given. **227.** After making the award, the arbitrator shall forthwith notify the parties that the award has been made, and shall forthwith deliver or transmit by registered post the award and the depositions, exhibits and all other papers connected with the arbitration to the clerk of the court, to be filed with the records of the said court.

Award, etc., to be filed.

How notice to be given. 2. The notice of the making of the award may be given by registered letter addressed to the parties at their usual or last known post office addresses, or addressed in care of their representatives, if any, who appeared for them in the arbitration proceedings. 1919, c. 68, s. 227.

*Preventing Delay.*

Arbitrator to proceed speedily. **228.** After the making of the application constituting him arbitrator, or in the case of appointment by order of a judge of a superior court after the receipt of such order or a copy thereof, the arbitrator shall proceed with and complete the arbitration and award as speedily as possible, having regard to the interests of the parties, and he may give any directions respecting the proceedings which he deems proper to prevent delay. 1919, c. 68, s. 228.

Directions to prevent delay.

Death or delay of arbitrator. **229.** If the arbitrator dies before the award is made, or is incapacitated, disqualified or unable to act, either party may, on six days' notice to the opposite party, apply to a judge of the superior court to appoint, and such judge shall appoint, any county or superior court judge to be arbitrator in the place of the arbitrator who has died, become incapacitated, disqualified or unable to act.

Application to court or judge.

Proceedings not to be repeated. 2. The proceedings shall not in any such case require to be recommenced or repeated.

Costs. 3. The cost of applications and proceedings under this section shall form part of the costs of the arbitration proceedings. 1919, c. 68, s. 229.

*Impeaching Award.*

Award not invalidated by want of form. **230.** No award shall be invalidated by reason of any want of form or other technical objection, if the requirements of this Act have been substantially complied with, and if the award states clearly the sum awarded, and the lands or other property, right or privilege for which such sum is to be the compensation.

120376

Payee need not be named. 2. The person to whom the sum is to be paid need not be named in the award. 1919, c. 68, s. 230.

Arbitrator not disqualified by— **231.** If the arbitrator is not himself personally interested in the amount of the compensation he shall not be disqualified because he has previously expressed an opinion as to the amount of compensation or because he is related or of kin to any shareholder of the company. 1919, c. 68, s. 231.

Opinion; Kindred.

*Appeal from Award.*

Appeal from award. **232.** Within one month after receiving from the arbitrator or from the oposite party a written notice of the making of the award, the company may, where the award exceeds six hundred dollars, and any other party may, where such party in his notice of appeal claims more than six hundred dollars or objects to some easement or other thing approved by the arbitrator without his consent as hereinbefore provided, appeal from the award upon any question of law or fact, or upon any other ground of objection, to a superior court, or to the court of last resort of the province in which the lands lie, if a judge of a superior court has been constituted arbitrator.

Where award less than six hundred dollars. 2. Where the award is less than six hundred dollars the company or the opposite party may, within the time limited by this section, appeal from the award upon any question of law or upon any question of mistake appearing on the face of the proceedings, to a superior court or to the court of last resort as the case may be; and upon the hearing of the appeal such court shall decide any question of fact upon the evidence taken before the arbitrator as in the case of original jurisdiction.

Court may admit other evidence. 3. The court may, where, from any other evidence it deems proper to admit, it is clearly satisfied that injustice has been done, set aside the award or remit it to the arbitrator for reconsideration with such directions as it deems proper.

Practice and proceedings on appeal. 4. Upon such appeal the practice and proceedings shall be, as nearly as may be, the same as upon an appeal from the decision of an inferior court to the said superior court, subject to any general rules or orders from time to time made by the court to which such appeal lies in respect to such appeals.

No further appeal, etc. 5. The decision of such court shall not, except where the amount awarded by or claimed in the appeal from such decision exceeds five thousand dollars, be subject to further appeal, and except as herein provided there shall be no appeal from, or proceedings had to impeach or set aside any award made under this Act. 1919, c. 68, s. 232.

*Paying Money into Court, etc.*

Payment of compensation into court in some cases.

**233.** (*a*) If the company has reason to fear any claim, mortgage, *hypothèque*, or encumbrance; or

(*b*) If any person to whom the compensation or annual rent, or any part thereof, is payable, refuses to execute a proper conveyance; or

(*c*) If the person entitled to claim the compensation or annual rent cannot be found, or is unknown to the company; or

(*d*) If, for any other reason, the company deems it advisable;

the company may pay such compensation into court, with the interest thereon for six months, and may deliver to the clerk or prothonotary of such court an authentic copy of the conveyance, or of the award or agreement, if there is no conveyance.

Title.

2. Such conveyance, or award or agreement, shall thereafter be deemed to be the title of the company to the land therein mentioned. 1919, c. 68, s. 233.

Lands not in Quebec.

Publication of notice.

**234.** Where the lands are situated elsewhere than in the province of Quebec, a notice of such payment and delivery, in such form and for such time as the court appoints, shall be inserted in a newspaper, published in the county in which the lands are situated, or, if there is no newspaper published in the county, then in the official gazette of the province, and also in a newspaper published in the nearest county thereto in which a newspaper is published.

What notice shall state.

2. Such notice shall state that the conveyance, agreement or award constituting the title of the company is obtained under the authority of this Act, and shall call upon all persons claiming an interest in or entitled to the lands, or any part thereof, to file their claims to the compensation, or any part thereof. 1919, c. 68, s. 234.

Lands in Quebec.

**235.** Where the lands are situated in the province of Quebec, the notice shall be published as required in cases of confirmation of title, and the registrar's certificate shall be procured and filed as in such cases. 1919, c. 68, s. 235.

Compensation in place of land.

Encumbrances.

**236.** The compensation for any lands which may be taken without the consent of the owner shall stand in the stead of such lands; and any claim to or encumbrance upon the said lands, or any portion thereof, shall, as against the company, be converted into a claim to the compensation, or to a like proportion thereof; and the company shall be responsible accordingly, whenever it has paid such compensation or any part thereof to a person not entitled

120378

to receive the same, saving always its recourse against such person; but nothing herein contained shall prejudice any owner's right to a lien for unpaid purchase money unless such compensation is actually paid to such owner or paid into court pursuant to this Act. 1919, c. 68, s. 236.

Lien for purchase money.

Effect of adjudication.

**237.** All such claims filed shall be received and adjudicated upon by the court, and the adjudication thereon shall forever bar all claims to the land, or any part thereof, including any dower, mortgage, *hypothèque* or encumbrance upon the same.

Disposal of compensation.

2. The court shall make such order for the distribution, payment, or investment of the compensation and for the security of the rights of all persons interested, as to right and justice and to law appertains.

Interest.

3. If the order for distribution, payment, or investment is obtained within less than six months from the payment of the compensation into court, the court shall direct a proportionate part of the interest to be returned to the company.

For further period.

4. If from any error, fault or neglect of the company, such order is not obtained until after six months have expired, the court shall order the company to pay into court, as part of the compensation, the interest for such further period as is right.

Costs.

5. The costs of the proceedings, in whole or in part, including the proper allowances to witnesses, shall be paid by the company, or by any other person, as the court orders. 1919, c. 68, s. 237.

*Right of Company to take Possession.*

Upon payment or tender.

**238.** Upon payment or legal tender of the compensation or annual rent awarded or agreed upon to the person entitled to receive the same, or upon the payment into court of the amount of such compensation, in the manner hereinbefore mentioned, the award or agreement shall vest in the company the power forthwith to take possession of the lands, or to exercise the right, or to do the thing for which such compensation or annual rent has been awarded or agreed upon. 1919, c. 68, s. 238.

*Proceedings in case of Resistance.*

Warrant.

**239.** If any resistance or forcible opposition is made by any person to the exercise by the company of any such power the judge shall upon or without notice to the opposite party as he deems proper, on proof to his satisfaction of such award or agreement and of payment or tender of the sum awarded or agreed upon or of payment thereof into

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

ARCHIVES PUBLIQUES
CANADA

120379

into court, issue his warrant to the sheriff of the district or county, or to a bailiff, as he deems most suitable, to put down such resistance or opposition, and to put the railway company in possession.

How executed.

2. The sheriff or bailiff shall, in the execution of such warrant, take with him sufficient assistance for such purpose, and shall put down such resistance or opposition and put the company in possession. 1919, c. 68, s. 239.

Warrant for immediate possession in certain cases.

**240.** Such warrant shall also be granted by the judge without such award or agreement, on affidavit to his satisfaction that the immediate possession of the lands or of the power to do the thing mentioned in the notice, is necessary for the construction or maintenance of some part of the railway with which the company is ready forthwith to proceed. 1919, c. 68, s. 240.

Procedure upon application for such warrant.

**241.** The judge shall not grant any warrant under the last preceding section, unless

Notice.

(*a*) ten days' previous notice of the time and place when and where the application for such warrant is to be made has been served upon the owner of the lands, or the person empowered to convey the lands or interested in the lands sought to be taken or which may suffer damage from the taking of materials sought to be taken, or the exercise of the powers sought to be exercised, or the doing of the thing sought to be done by the company; and

Deposit of compensation.

(*b*) the company gives security to his satisfaction, by payment into court, of a sum in his estimation sufficient to cover the probable compensation and costs of the arbitration, and not less than fifty per centum above the amount offered by the company in the notice mentioned in section two hundred and fifteen or certified by the surveyor or engineer under section two hundred and sixteen, whichever is larger; or, if the judge deems proper, pays the party in part and gives security for the balance.

Where notice cannot be served.

2. Where for any reason service of such notice can not be made, or can not be made promptly, the judge may, on proof to his satisfaction of circumstances justifying it, order substitutional or other service of such notice or dispense with such notice. 1919, c. 68, s. 241.

Costs.

**242.** The costs of any such application and hearing before the judge shall be borne by the company, unless the compensation awarded is not more than the company had offered to pay.

120380

Repayment of deposit.

2. No part of such deposit or of any interest thereon shall be repaid, or paid to such company, or paid to such owner or party, without an order from the judge, which he may make in accordance with the terms of the award. 1919, c. 68, s. 242.

*Procedure.*

To be continued in court where commenced.

**243.** Any proceeding under the foregoing provisions of this Act relating to the ascertainment or payment of compensation or the delivery of possession of lands taken, or the putting down of resistance to the exercise of powers, shall, if commenced in a superior court having jurisdiction, be continued in such superior court, or, if the proceeding is commenced in a county court having jurisdiction, it shall be continued in such county court; and where there are different interests in the same lands all shall as far as possible be dealt with in one proceeding. 1919, c. 68, s. 243.

Different interests.

MATTERS INCIDENTAL TO CONSTRUCTION.

*Respecting Wages.*

Current rate.

**244.** In every case in which the Parliament of Canada votes financial aid by way of subsidy or guarantee towards the cost of railway construction, all mechanics, labourers or other persons who perform labour in such construction shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed; and if there is no current rate in such district, then a fair and reasonable rate.

Minister may determine.

2. In the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Minister, whose decision shall be final. 1919, c. 68, s. 244.

*Respecting Navigable Waters.*

Navigation not to be obstructed.

**245.** No company shall cause any obstruction in, or impede the free navigation of any river, water, stream or canal, to, upon, along, over, under, through or across, which its railway is carried. 1919, c. 68, s. 245.

Bridges to be properly floored.

**246.** No company shall run its trains over any canal, or over any navigable water, without having first laid, nor without maintaining, such proper flooring under and on both sides of its railway track over such canal or water as is deemed by the Board sufficient to prevent anything falling from the railway into such canal or water, or upon the boats, vessels, craft, or persons navigating such canal or water. 1919, c. 68, s. 246.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120381

Spans of headway and waterway.

**247.** Whenever the railway is, or is proposed to be carried over any navigable water or canal by means of a bridge, the Board may by order in any case, or by regulations, direct that such bridge shall be constructed with such span or spans of such headway and waterway, and with such opening span or spans, if any, as to the Board may seem expedient for the proper protection of navigation.

Operation of draw.

2. The Board may in like manner, if any such bridge is a draw or swing bridge, direct when, under what conditions and circumstances, and subject to what precautions, the same shall be opened and closed. 1919, c. 68, s. 247.

Proceedings for construction of works in navigable waters.

**248.** When the company is desirous of constructing any wharf, bridge, tunnel, pier or other structure or work, in, upon, over, under, through or across any navigable water or canal, or upon the beach, bed or lands covered with the waters thereof, the company shall, before the commencement of any such work,

Approval by Governor in Council.

(*a*) in the case of navigable water, not a canal, submit to the Minister of Public Works, and in the case of a canal to the Minister, for approval by the Governor in Council, a plan and description of the proposed site for such work, and a general plan of the work to be constructed, to the satisfaction of such Minister; and

Board to authorize.

(*b*) upon approval by the Governor in Council of such site and plans, apply to the Board for an order authorizing the construction of the work and with such application, transmit to the Board a certified copy of the Order in Council and of the plans and description approved thereby, and also detail plans and profiles of the proposed work, and such other plans, drawings and specifications as the Board may, in any such case, or by regulation, require.

No deviation.

2. No deviation from the site or plans approved by the Governor in Council, shall be made without the consent of the Governor in Council.

Powers of Board.

3. Upon any such application, the Board may

(*a*) make such order in regard to the construction of such work upon such terms and conditions as it may deem expedient;

(*b*) make alterations in the detail plans, profiles, drawings and specifications so submitted;

(*c*) give directions respecting the supervision of any such work; and

(*d*) require that such other works, structures, equipment, appliances and materials be provided, constructed, maintained, used and operated, and measures taken, as under the circumstances of each case may

120382

appear to the Board best adapted for securing the protection, safety and convenience of the public.

Company to construct.

4. Upon such order being granted, the company shall be authorized to construct such work in accordance therewith.

Operation also to be authorized by Board.

5. Upon the completion of any such work the company shall, before using or operating the same, apply to the Board for an order authorizing such use or operation, and if the Board is satisfied that its orders and directions have been carried out, and that such work may be used or operated without danger to the public, and that the provisions of this section have been complied with, the Board may grant such order. 1919, c. 68, s. 248.

*Bridges, Tunnels and other Structures.*

Bridges.

**249.** The Governor in Council may, upon the report of the Board, authorize or require any railway company to construct fixed and permanent bridges, or swing, draw or movable bridges, or to substitute any of such bridges for bridges existing on the line of its railway, within such time as the Governor in Council directs.

Consent of Governor in Council.

2. No company shall substitute any swing, draw or movable bridge for any fixed or permanent bridge already built and constructed without the previous consent of the Governor in Council. 1919, c. 68, s. 249.

Headway over cars.

**250.** Every bridge, tunnel or other erection or structure, over, through or under which any railway passes, shall be so constructed and maintained as to afford, at all times, an open and clear headway of at least seven feet between the top of the highest freight car used on the railway and the lowest beams, members, or portions of that part of such bridge, tunnel, erection or structure, which is directly over the space liable to be traversed by such car in passing thereunder.

Powers of Board to order alteration.

2. The Board may, if necessary, require any existing bridge, tunnel, or other erection or structure to be reconstructed or altered, within such time as it may order, so as to comply with the requirements mentioned in the last preceding subsection; and any such bridge, tunnel, or other erection or structure, when so reconstructed or altered shall thereafter be maintained accordingly.

Space above rail.

3. Except by leave of the Board the space between the rail level and such beams, members or portions of any such structure, constructed after the first day of February, one thousand nine hundred and four, shall in no case be less than twenty-two feet six inches.

Structures not owned by company.

4. If, in any case, it is necessary to raise, reconstruct or alter any bridge, tunnel, erection or structure not owned by the company, the Board, upon application of the company,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

pany, and upon notice to all parties interested, or without any application, may make such order, allowing or requiring such raising, reconstruction or alteration, and upon such terms and conditions as to the Board shall appear just and proper and in the public interest.

Board may exempt certain structures.

5. The Board may exempt from the operation of this section any bridge, tunnel, erection, or structure, over, through or under which it is satisfied no trains, except such as are equipped with air brakes, are run. 1919, c. 68, s. 250.

Where length exceeds 18 feet.

**251.** The company shall not, within the limits of any incorporated city or town, or where its line of railway crosses a highway, whether within or without such limits, commence the construction or reconstruction of, or any material alteration in any bridge, tunnel, viaduct, trestle, or other structure, through, over, or under which the company's trains are to pass, the span, or proposed span or spans, or length of which exceeds eighteen feet, until leave therefor has been obtained from the Board; but the company may, without such leave, commence such construction, reconstruction or alteration at any place beyond the said limits, if such construction, reconstruction or alteration is not at a highway crossing and is in accordance with standard specifications and plans approved by the Board.

Leave or approval of Board.

Company shall submit plans, etc. as required by the Board.

2. Upon any application to the Board for such leave, the company shall submit to the Board the detail plans, profiles, drawings and specifications of any such work proposed to be constructed, and such other plans, profiles, drawings and specifications as the Board may in any case, or by regulation, require.

Powers of Board. Terms.

3. Upon any such application the Board may

(*a*) make such order with regard to the construction of such work, and upon such terms and conditions, as it deems expedient;

Alterations.

(*b*) make alterations in the detail plans, profiles, drawings and specifications so submitted;

Supervision.

(*c*) give directions respecting the supervision of any such work; and

Other works.

(*d*) require that such other works, structures, equipment, appliances and materials be provided, constructed, maintained, used, and operated, and that such measures be taken, as, under the circumstances of each case, may appear to the Board best adapted for securing the protection, safety and convenience of the public.

Company may construct.

4. Upon such order being granted the company shall be authorized to construct such works in accordance therewith.

Board to authorize operation.

5. Upon the completion of any such work the company shall, before using or operating the same, apply to the Board for an order authorizing such use or operation, and the

the Board may grant such order if it is satisfied that its orders and directions have been carried out, and that such work may be used or operated without danger to the public, and that the provisions of this section have been complied with.

Passageway for public.

6. Upon the application of any municipality or municipalities interested, the Board may, where it deems it reasonable and proper, require the company to construct under or alongside of its track upon any bridge being constructed, reconstructed or materially altered by the company a passageway for the use of the public either as a general highway or as a footway, the additional cost to the company of constructing, maintaining and renewing which, as fixed by or under the direction of the Board, shall be paid by the municipality or municipalities as the Board may direct, and the Board may impose any terms or conditions as to the use of such passageway or otherwise which it deems proper. 1919, c. 68, s. 251.

*Crossings and Junctions with other Railways.*

Leave of Board.

**252.** The railway lines or tracks of any railway company shall not cross or join or be crossed or joined by or with any railway lines or tracks other than those of such company, whether otherwise within the legislative authority of the Parliament of Canada or not, until leave therefor has been obtained from the Board as hereinafter provided.

Plans, etc. to be submitted.

2. Upon any application for such leave the applicant shall submit to the Board a plan and profile of such crossing or junction, and such other plans, drawings and specifications as the Board may, in any case, or by regulation, require.

3. The Board may, by order,

Powers of Board.

(*a*) grant such application on such terms as to protection and safety as it deems expedient;

(*b*) change the plan and profile, drawings and specifications so submitted, and fix the place and mode of crossing or junction;

(*c*) direct that one line or track or one set of lines or tracks be carried over or under another line or track or set of lines or tracks;

(*d*) direct that such works, structures, equipment, appliances and materials be constructed, provided, installed, maintained, used or operated, watchmen or other persons employed, and measures taken, as under the circumstances appear to the Board best adapted to remove and prevent all danger of accident, injury or damage;

(*e*) determine the amount of damage and compensation, if any, to be paid for any property or land taken or injuriously

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

injuriously affected by reason of the construction of such works;

(*f*) give directions as to supervision of the construction of the works; and

(*g*) require that detail plans, drawings and specifications of any works, structures, equipment or appliances required, shall, before construction or installation, be submitted to and approved by the Board.

No operation until authorized.

4. No trains shall be operated on the lines or tracks of the applicant over, upon or through such crossing or junction until the Board grants an order authorizing such operation.

Board shall see to compliance.

5. The Board shall not grant such last mentioned order until satisfied that its orders and directions have been carried out, and that the provisions of this section have been complied with. 1919, c. 68, s. 252.

Connections of intersecting railway lines.

**253.** Where the lines or tracks of one railway are intersected or crossed by those of another, or upon any application for leave to make any intersection or crossing, or in any case in which the tracks or lines of two different railways run through or into the same city, town or village, the Board may, upon the application of one of the companies, or of a municipal corporation or other public body, or of any person or persons interested, order that the lines or tracks of such railways shall be so connected, at or near the point of intersection or crossing or in or near such city, town or village, as to admit of the safe and convenient transfer or passing of engines, cars and trains, from the tracks or lines of one railway to those of another, and that such connection shall be maintained and used.

Costs and terms of connections.

2. In and by the order for such connection, or from time to time subsequently, the Board may determine by what company or companies, or other corporations or persons, and in what proportions, the cost of making and maintaining any such connections shall be borne, and upon what terms traffic shall be thereby transferred from the lines of one railway to those of another.

Connections between intersecting provincial and Dominion railways.

3. Where the lines or tracks of any railway within the legislative authority of a province intersect the lines or tracks, or run through or into the same city, town or village as the lines or tracks, of a railway within the legislative authority of the Parliament of Canada, and it is desired by the company owning or operating either of such railways, or by any municipal corporation, or other public body, or any person interested, that the lines or tracks of such railways should be connected, so as to admit of the safe and convenient transfer of engines, cars and trains from the lines or tracks of one of such railways to those of the other, and for the reasonable receiving, forwarding, delivering and

interswitching of traffic between such railways, and there exists in the province in which such connection is desired a provincial railway, public utilities, or other board, commission or body, having power to require such connection between two railways within the legislative authority of such province, hereinafter in this subsection called the provincial board, proceedings may be taken in accordance with the following provisions:—

Proceedings.

(*a*) Either of such companies, or any municipal corporation, or other public body, or any person interested, may file with the Secretary of the Board, and with the secretary of the provincial board, an application for an order that such connection should be required to be made, together with evidence of service of such application upon the railway companies interested or affected; and, where the application is not made by the municipality, upon the head of the municipal corporation within which the proposed connection is situate;

Application for order.

(*b*) After the receipt of the said application, the Board and the provincial board may, by joint session or conference, in conformity with the practice established or adopted by them, hear and determine the said application, and may order that the lines or tracks of such railways be so connected at or near the point of intersection, or in or near such city, town, or village, upon such terms and conditions, and subject to such plans, as they may deem proper;

Hearing of application by Board and provincial authorities.

(*c*) The Chief Commissioner and the chairman of the provincial board of any province having concurrent legislation carrying into effect the purposes and objects of this subsection, may make rules of procedure and practice covering the making of such applications and the hearing and the disposition thereof;

Rules of procedure.

(*d*) The Chief Commissioner and the chairman of the provincial board may assign or appoint from each board the members comprising the joint board that may be required to sit for the hearing and determining of such applications as they arise;

Constitution of joint boards.

(*e*) Any order aforesaid may be made a rule of the Exchequer Court and shall be enforced in like manner as any rule, order, or decree of such court. 1919, c. 68, s. 253.

Enforcement of order.

Safety appliances at rail level crossings.

**254.** The Board may order the adoption and use at any such crossing or junction at rail level, of such interlocking switch, derailing device, signal system, equipment, appliances and materials, as in the opinion of the Board renders it safe for engines and trains to pass over such crossing or junction without being brought to a stop. 1919, c. 68, s. 254.

*Highway Crossings, etc.*

Railway on highway.

Leave.

Compensation.

Consent of municipality.

**255.** The railway of the company may, if leave therefor is first obtained from the Board as hereinafter authorized, but shall not without such leave, be carried upon, along or across any existing highway: Provided that the company shall make compensation to adjacent or abutting landowners if the Board so directs, said compensation to be determined under the arbitration sections of this Act, in so far as such sections are applicable, and provided that the Board shall not grant leave to any company to carry any street railway or tramway, or any railway operated or to be operated as a street railway or tramway, along any highway which is within the limits of any city or incorporated town, until the company has first obtained consent therefor by a by-law of the municipal authority of such city or incorporated town; and provided that where leave is obtained to carry any railway along a highway the Board may require the company to make compensation to the municipality if the Board deems proper, said compensation to be determined under the arbitration sections of this Act, in so far as such sections are applicable.

Highway to be kept open.

2. The company shall, before obstructing any such highway by its works, turn the highway so as to leave an open and good passage for carriages, and, on completion of the works, restore the highway to as good a condition as nearly as possible as it originally had.

Rights saved.

3. Nothing in this section shall deprive any such company of rights conferred upon it by any Special Act of the Parliament of Canada, or amendment thereof, passed prior to the twelfth day of March, one thousand nine hundred and three. 1919, c. 68, s. 255.

Application for crossings.

**256.** Upon any application for leave to construct a railway upon, along or across any highway, or to construct a highway along or across any railway, the applicant shall submit to the Board a plan and profile showing the portion of the railway and highway affected.

Powers of Board.

2. The Board may, by order, grant such application in whole or in part and upon such terms and conditions as to protection, safety and convenience of the public as the Board deems expedient, or may order that the railway be carried over, under or along the highway, or that the highway be carried over, under or along the railway, or that the railway or highway be temporarily or permanently diverted,

Protection, etc.

or that such other work be executed, watchmen or other persons employed, or measures taken as under the circumstances appear to the Board best adapted to remove or diminish the danger or obstruction, in the opinion of the Board, arising or likely to arise in respect of the granting

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120388

of the application in whole or in part in connection with the crossing applied for, or arising or likely to arise in respect thereof in connection with any existing crossing.

As to land required.

3. When the application is for the construction of the railway, upon, along or across a highway, all the provisions of law at such time applicable to the taking of land by the company, to its valuation and sale and conveyance to the company, and to the compensation therefor, including compensation to be paid to adjacent or abutting landowners as provided by the last preceding section, shall apply to the land exclusive of the highway crossing, required for the proper carrying out of any order made by the Board.

Supervision.

4. The Board may exercise supervision in the construction of any work ordered by it under this section, or may give directions respecting such supervision.

Detailed plans, etc., in certain cases.

5. When the Board orders the railway to be carried over or under the highway, or the highway to be carried over or under the railway, or any diversion temporarily or permanently of the railway or the highway, or any works to be executed under this section, the Board may direct that detailed plans, profiles, drawings and specifications be submitted to the Board.

Regulations by Board.

6. The Board may make regulations respecting the plans, profiles, drawings and specifications required to be submitted under this section. 1919, c. 68, s. 256.

Powers of Board as to existing crossings.

**257.** Where a railway is already constructed upon, along or across any highway, the Board may, of its own motion, or upon complaint or application, by or on behalf of the Crown, or any municipal or other corporation, or any person aggrieved, order the company to submit to the Board, within a specified time, a plan and profile of such portion of the railway, and may cause inspection of such portion, and may inquire into and determine all matters and things in respect of such portion, and the crossing, if any, and may make such order as to the protection, safety and convenience of the public as it deems expedient, or may order that the railway be carried over, under or along the highway, or that the highway be carried over, under or along the railway, or that the railway or highway be temporarily or permanently diverted, and that such other work be executed, watchmen or other persons employed, or measures taken as under the circumstances appear to the Board best adapted to remove or diminish the danger or obstruction in the opinion of the Board arising or likely to arise in respect of such portion or crossing, if any, or any other crossing directly or indirectly affected.

Protection, etc.

As to land required.

2. When the Board of its own motion, or upon complaint or application, makes any order that a railway be carried across or along a highway, or that a railway be diverted, all

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120389

all the provisions of law at such time applicable to the taking of land by the company, to its valuation and sale and conveyance to the company, and to the compensation therefor, shall apply to the land, exclusive of the highway crossing, required for the proper carrying out of any order made by the Board.

Supervision by Board.

3. The Board may exercise supervision in the construction of any work ordered by it under this section, or may give directions respecting such supervision. 1919, c. 68, s. 257.

Preventing obstruction of view.

**258.** The Board shall, without limiting any general power elsewhere conferred, have power, for the purpose of diminishing the danger at any highway crossing with any railway heretofore or hereafter constructed, to order

(*a*) that any trees, buildings, earth or other obstruction to the view, which may be upon the railway, or the highway or any trees on any adjoining lands, shall be removed;

(*b*) that nothing obstructing the view shall be placed at such crossing or nearer thereto than the Board designates;

and for any such purpose the Board shall have power to authorize or direct the expropriation of any land, the acquirement of any easement and the doing of anything deemed necessary, and shall have power to fix and order payment of such compensation as it deems just. 1919, c. 68, s. 258.

Apportionment of cost of protection, etc.

**259.** Notwithstanding anything in this Act, or in any other Act, the Board may, subject to the provisions of the next following section of this Act, order what portion, if any, of cost is to be borne respectively by the company, municipal or other corporation, or person in respect of any order made by the Board, under any of the last three preceding sections, and such order shall be binding on and enforcible against any railway company, municipal or other corporation or person named in such order. 1919, c. 68, s. 259.

When railway to bear whole cost.

**260.** In any case where a railway is constructed after the nineteenth day of May, one thousand nine hundred and nine, the company shall, at its own cost and expense, unless and except as otherwise provided by agreement, approved by the Board, between the company and a municipal or other corporation or person, provide, subject to the order of the Board, all protection, safety and convenience for the public in respect of any crossing of a highway by the railway. 1919, c. 68, s. 260.

120390

Foot bridges.

**261.** The Board may order any company to erect over its railway at or near, or in lieu of any highway crossing at rail level, a foot bridge or foot bridges, for the purpose of enabling persons, passing on foot along such highway, to cross the railway by means of such bridge or bridges. 1919, c. 68, s. 261.

Railway Grade Crossing Fund.

**262.** The sums appropriated and set apart to aid actual construction work for the protection, safety and convenience of the public in respect of highway crossings of railways at rail level in existence on the first day of April, one thousand nine hundred and nine, shall be placed to the credit of a special account to be known as "The Railway Grade Crossing Fund," and shall be applied by the Board, subject to the limitations hereinafter set out, solely towards the cost, not including that of maintenance and operation, of actual construction work for the purpose aforesaid.

Apportionment of money of Railway Grade Crossing Fund.

2. The total amount of money to be apportioned, and directed and ordered by the Board to be payable from any such annual appropriation shall not, in the case of any one crossing, exceed forty per cent of the cost of the actual construction work in providing such protection, safety and convenience, and shall not, in any such case, exceed the sum of twenty-five thousand dollars, and no such money shall in any one year be applied to more than six crossings on any one railway in any one municipality or more than once in any one year to any one crossing.

Provincial contributions to fund.

3. In case any province contributes towards the said fund, the Board may apportion, direct and order payment out of the amount so contributed by such province, subject to any conditions and restrictions made and imposed by such province in respect of its contribution.

4. In this section

"Crossing" defined.

(*a*) "crossing," means any steam railway crossing of a highway, or highway crossing of a steam railway, at rail level, and every manner of construction of the railway or of the highway by the elevation or the depression of the one above or below the other, or by the diversion of the one or the other and any other work ordered by the Board to be provided as one work of protection, safety and convenience for the public in respect of one or more railways not exceeding four tracks in all crossing or so crossed;

"Municipality" defined.

(*b*) "municipality," means an incorporated city, town, village, county, township, parish, or rural municipality.

Grant for rail level crossings.

5. The grant of two hundred thousand dollars each year for ten consecutive years from the first day of April, one thousand nine hundred and nineteen, made under the provisions of an Act passed in the said year, chapter thirty,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120391

shall be expended for the purposes mentioned in the said Act, subject to the terms and conditions in this section contained. 1919, c. 68, s. 262; 1926, c. 14, s. 1.

Overhead crossings. Width and height of highway.

**263.** Unless otherwise directed or permitted by the Board, the highway at any overhead railway crossing shall not at any time be narrowed by means of any abutment or structure to a width less than twenty feet, nor shall the clear headway above the surface of the highway at the central part of any overhead structure, constructed after the first day of February, one thousand nine hundred and four, be less than fourteen feet. 1919, c. 68, s. 263.

Facilities for traffic.

**264.** Every structure by which any railway is carried over or under any highway or by which any highway is carried over or under any railway, shall be so constructed, and, at all times, be so maintained, as to afford safe and adequate facilities for all traffic passing over, under or through such structure. 1919, c. 68, s. 264.

When rail level not obstruction.

**265.** Whenever the railway crosses any highway at rail level, whether the level of the highway remains undisturbed or is raised or lowered to conform to the grade of the railway, the top of the rail may, when the works are completed, unless otherwise directed by the Board, rise above or sink below the level of the highway to the extent of one inch without being deemed an obstruction. 1919, c. 68, s. 265.

Inclination of approach.

**266.** The inclination of the ascent or descent, as the case may be, of any approach by which any highway is carried over or under any railway, or across it at rail level, shall not, unless the Board otherwise directs, be greater than one foot of rise or fall for every twenty feet of the horizontal length of such approach.

Fencing approaches.

2. A good and sufficient fence at least four feet six inches in height from the surface of the approach or structure shall be made and maintained on each side of such approach, and of the structure connected with it. 1919, c. 68, s. 266.

Signboards at level crossings.

**267.** Signboards at every highway crossed at rail level by any railway, shall be erected and maintained at each crossing, and shall have the words *Railway Crossing* painted on each side thereof in letters at least six inches in length.

In Quebec.

2. In the province of Quebec such words shall be in both the English and the French languages. 1919, c. 68, s. 267.

*Drainage and Power, Mining and Irrigation Works.*

Ditches, drains and flumes.

**268.** The company shall in constructing the railway make and maintain suitable water pipes, flumes, ditches and drains along each side of, and across and under the

railway,

R.S., 1927.

120392

railway, to connect with water pipes, flumes, ditches, drains, drainage works and watercourses upon the lands through which the railway runs, so as to afford sufficient outlet to drain and carry off the water, or to convey the water supply, and so that the then natural, artificial, or existing drainage, or water supply, of the said lands shall not be obstructed or impeded by the railway. 1919, c. 68, s. 268.

**269.** Whenever

If drainage insufficient.

(*a*) any lands are injuriously affected by reason of the drainage upon, along, across, or under the railway being insufficient to drain and carry off the water from such lands; or

Or municipality desires.

(*b*) any municipality or landowner desires to obtain means of drainage, or the right to lay water pipes or other pipes, temporarily or permanently, through, along, upon, across or under the railway or any works or land of the company; or

Or company desires.

(*c*) the railway company desires to obtain means of drainage, or the right to lay water pipes or other pipes, temporarily or permanently, through, along, upon, across or under any lands adjoining or near the railway;

Board may order or permit drainage or laying of pipes.

the Board may, upon the application or complaint of the municipality or landowner, or of the company, order or permit the company to construct such drainage or lay such pipes, and may require the applicant to submit to the Board a plan and profile of the portion of the railway or lands to be affected, or may direct an inspecting engineer, or such other person as it deems advisable to appoint, to inspect the locality in question, and, if expedient, there hold an inquiry as to the necessity or requirements for such drainage or pipes, and to make a full report thereon to the Board.

Terms and conditions.

2. The Board may upon such report, or in its discretion, order how, where, when, by whom, and upon what terms and conditions, such drainage may be effected, or pipes laid, constructed and maintained, having due regard to all proper interests, and may fix the compensation, if any, which should be paid to any owner injuriously affected or may direct the compensation, if any, to be determined under the arbitration sections of this Act.

Order not needed where consent, etc.

3. An order of the Board shall not be required in the cases in which water pipes or other pipes are to be laid or maintained under the railway, with the consent of the railway company in accordance with the general regulations, plans or specifications adopted or approved by the Board for such purposes. 1919, c. 68, s. 269.

Drainage proceedings under Provincial Acts.

**270.** Whenever by virtue of any Act of any province through which the railway runs, proceedings may be had or taken by any municipality or landowner for any drainage, or drainage works, upon and across the property of any other landowner in such province, the like proceedings may, at the option of such municipality or landowner, be had or taken by such municipality or landowner for drainage, or drainage works, upon and across the railway and lands of the company, in the place of the proceedings before the Board in the last preceding section provided.

Provincial laws to apply.

2. In case of any such proceedings, the drainage laws of the province shall, subject to any previous order or direction of the Board made or given with respect to drainage of the same lands, apply to the lands of the company upon or across which such drainage is required, to the same extent as to the lands of any landowner of such province:

Option of company.

Provided that the company shall have the option of constructing the portion of any drain, or drainage work, required to be constructed upon, along, under or across its railway or lands.

If option not exercised.

3. In the event of the company not exercising such option, and completing such work within a reasonable time, and without any unnecessary delay, such work may be constructed or completed in the same manner as any other portions of such work are provided under the laws of such province to be constructed.

Approval of Board.

4. Notwithstanding anything in this section contained, no drainage works shall be constructed or reconstructed upon, along, under or across the railway or lands of the company until the character of such works, or the specifications or plans thereof, have been first submitted to and approved of by the Board.

Costs.

5. The proportion of the cost of the drain, or drainage works, across or upon the railway, to be borne by the company, shall, in all such cases, be based upon the increase of cost of such work caused by the construction and operation of the railway. 1919, c. 68, s. 270.

Power, mining and irrigation works.

**271.** When any person having authority to create, develop, enlarge or change any water-power, or any electrical or power development by means of water, or to develop and operate mineral claims or mines, or to use water for irrigation purposes, desires for any such purpose to carry any canal, tunnel, flume pipe, ditch or wire across, over or under any railway, and is unable to agree with the railway company as to the terms and conditions upon which the same may be so carried over, under or across the said railway, an application may be made to the Board for leave to construct the necessary works.

Application to Board.

120394

Plan and profile.

2. Upon such application the applicant shall submit to the Board a plan and profile of the railway at the point where it is desired to make such crossing, and a plan or plans showing the proposed method of carrying such canal, tunnel, flume pipe, ditch or wire across, over or under the said railway, and such other plans, drawings and specifications as the Board in any case or by any regulation requires.

Terms of order.

3. The Board may, by order, grant such application on such terms and conditions as to protection and safety, payment of compensation or otherwise, as it deems just and proper, may change the plans, profiles, drawings and specifications so submitted, and fix the place and mode of crossing and may give directions as to the method in which the works are to be constructed and as to supervision of the construction of the works and the maintenance thereof, and order that detailed plans, drawings and specifications of any works, structures, equipment or appliances required shall before construction or installation be submitted to and approved by the Board. 1919, c. 68, s. 271.

*Farm Crossings.*

Farm crossings.

**272.** Every company shall make crossings for persons across whose lands the railway is carried, convenient and proper for the crossing of the railway for farm purposes.

Live stock.

2. Live stock, in using such crossings when at rail level, shall be in charge of some competent person, who shall take all reasonable care and precaution to avoid accidents. 1919, c. 68, s. 272.

Necessary crossings may be ordered by Board.

**273.** The Board may, upon the application of any landowner, order the company to provide and construct a suitable farm crossing across the railway, wherever in any case the Board deems it necessary for the proper enjoyment of his land, and safe in the public interest.

Terms and conditions.

2. The Board may order and direct how, when, where, by whom, and upon what terms and conditions, such farm crossing shall be constructed and maintained. 1919, c. 68, s. 273.

*Fences, Gates and Cattle-guards.*

Company shall erect.

**274.** The company shall erect and maintain upon the railway

Fences.

(*a*) fences of a minimum height of four feet six inches on each side of the railway;

Gates.

(*b*) swing gates in such fences at farm crossings of the minimum height aforesaid, with proper hinges and fastenings; and

Cattle-guards.

(*c*) cattle-guards, on each side of the highway, at every highway crossing at rail level with the railway.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120395

To be joined.

2. The railway fences at every such highway crossing shall be turned into the respective cattle-guards on each side of the highway.

To be suitable.

3. Such fences, gates and cattle-guards shall be suitable and sufficient to prevent cattle and other animals from getting on the railway lands.

Exemption by Board.

4. The Board may, upon application made to it by the company, relieve the company, temporarily or otherwise, from erecting and maintaining such fences, gates and cattle-guards where the railway passes through any locality in which, in the opinion of the Board, such works and structures are unnecessary.

Duty of company while constructing.

5. Where the railway is being constructed through enclosed lands, the company shall, by fencing its right of way before any existing fences are taken down or by other effective means, prevent cattle or other animals escaping from or getting upon such enclosed lands or from one enclosure to another or upon the property of the company by reason of such construction or of any act or thing done by the company, its contractors, agents or employees. 1919, c. 68, s. 274.

*Gates to be Kept Closed.*

Gates to be closed.

**275.** The persons for whose use farm crossings are furnished shall keep the gates at each side of the railway closed, when not in use. 1919, c. 68, s. 275.

OPENING RAILWAY FOR TRAFFIC.

*Inspection and Leave of Board.*

Leave of Board for opening railway.

**276.** No railway, nor any portion thereof, shall be opened for the carriage of traffic, other than for the purposes of the construction of the railway by the company, until leave therefor has been obtained from the Board, as hereinafter provided.

Application therefor.

2. When the company is desirous of so opening its railway or any portion thereof, it shall make an application to the Board for authority therefor, supported by affidavit of its president, secretary, engineer or one of its directors, to the satisfaction of the Board, stating that the railway, or portion thereof, desired to be opened, is in his opinion sufficiently completed for the safe carriage of traffic, and ready for inspection.

Inspection.

3. Before granting such application, the Board shall direct an inspecting engineer to examine the railway, or portion thereof, proposed to be opened.

When opening reported to be safe.

4. If the inspecting engineer reports to the Board, after making such examination, that in his opinion the opening of the railway or portion thereof so proposed to be opened for

120396

for the carriage of traffic, will be reasonably free from danger to the public using the same, the Board may make an order granting such application, in whole or in part, and may name the time therein for the opening of the railway or such portion thereof, and thereupon the railway, or such portion thereof as is authorized by the Board, may be opened for traffic in accordance with such order.

Board may grant application.

When opening reported dangerous.

5. If such inspecting engineer, after the inspection of the railway, or any portion thereof, reports to the Board that, in his opinion, the opening of the same would be attended with danger to the public using the same by reason of the incompleteness of the works or permanent way, or the insufficiency of the construction or equipment of such railway, or portion thereof, he shall state in his report the grounds for such opinion, and the company shall be entitled to notice thereof, and shall be served with a copy of such report and grounds, and the Board may refuse such application in whole or in part, or may direct a further or other inspection and report to be made.

Notice.

Boar l may refuse.

Further inspection.

6. If thereafter, upon such further or other inspection, or upon a new application under this section, the inspecting engineer reports that such railway, or portion thereof, may be opened without danger to the public, the Board may make an order granting such application in whole or in part, and may name the time therein for the opening of the railway, or such portion thereof, and thereupon the railway, or such portion thereof as is authorized by the Board, may be opened for traffic in accordance with such order.

Order for opening.

Leave to carry freight traffic.

7. The Board, upon being satisfied that public convenience will be served thereby, may, after obtaining a report of an inspecting engineer, allow the company to carry traffic over any portion of the railway not opened for the carriage of traffic in accordance with the preceding provisions of this section. 1919, c. 68, s. 276.

*Board May Order Railway to be Opened.*

Board may order opening.

**277.** The Board, in any case where it deems it right, may, upon the application of any person interested or of its own motion, order the opening of any railway or line or any portion thereof, for traffic, and may require the company to do all things necessary therefor, within such time as the Board fixes. 1919, c. 68, s. 277.

SAFETY AND CARE OF ROADWAY.

*Animals not to be at Large Near Highway Crossings.*

Cattle not allowed at large near railway.

**278.** No horses, sheep, swine or other cattle shall be permitted to be at large upon any highway, within half a mile of the intersection of such highway with any railway at

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120397

at rail level, unless they are in charge of some competent person or persons, to prevent their loitering or stopping on such highway at such intersection.

May be impounded.

2. All horses, sheep, swine or other cattle found at large contrary to the provisions of this section may, by any person who finds them at large, be impounded in the pound nearest to the place where they are so found, and the pound-keeper with whom the same are impounded shall detain them in like manner, and subject to like regulations as to the care and disposal thereof, as in the case of cattle impounded for trespass on private property. 1919, c. 68, s. 278.

*Thistles and Weeds to be Kept Cut.*

Company to remove weeds, etc.

**279.** Every company shall cause thistles and all noxious weeds growing on the right of way, and upon land of the company adjoining the railway, to be cut down or to be rooted out and destroyed each year, before such thistles or weeds have sufficiently matured to seed. 1919, c. 68, s. 279.

*Dry Grass to be Removed.*

Company to keep right of way clear.

**280.** The company shall at all times maintain and keep its right of way free from dead or dry grass, weeds and other unnecessary combustible matter. 1919, c. 68, s. 280.

*Fire Protection.*

Orders and regulations.

**281.** The Board may make orders and regulations

Fire guards, etc.

(*a*) respecting the construction, use and maintenance, in connection with the railway, of fire guards or other works which may be deemed by the Board to be necessary and suitable to prevent, as far as possible, fires from being started or occurring, upon, along or near the right of way of the company;

Fire-rangers.

(*b*) requiring the company to establish and maintain an efficient and competent staff of fire-rangers, equipped with such appliances for fighting fires or preventing them from spreading, as the Board may deem proper, and to provide such fire-rangers with proper and suitable equipment to enable them to move from place to place along the line of railway with all due speed;

Patrol.

(*c*) requiring the company to maintain an efficient patrol of the line of railway and of the lands in the vicinity thereof to which fires may spread, and generally defining the duties of the company and of the fire-rangers in respect thereof;

Return as to fire-rangers.

(*d*) requiring the company to make returns of the names of fire-rangers in its employ in the performance of the above-mentioned duties, and of the places or areas in which they are from time to time engaged;

120398

Reports of fires.

(*e*) requiring the company to make reports and returns of fires occurring upon or near its right of way.

Applicability of orders, etc.

2. Any such orders or regulations may be made applicable during or after the construction of the railway, or during such time, and in such manner, as the Board deems proper.

Following fires.

3. For the purpose of fighting and extinguishing fires, the fire-rangers of the company may follow the fires which spread from the railway, to, over and upon the lands to which they may spread.

Entering lands for fire-guard purposes.

4. Subject to the terms and conditions of any order or regulation of the Board, the company may at all times enter into and upon any lands of His Majesty or of any person lying along the railway, for the purpose of establishing and maintaining thereon the fire guards or other protection directed by the Board, and for the purpose of freeing from dead or dry grass, weeds, and other unnecessary inflammable matter, the land between such fire guards and the line of railway. 1919, c. 68, s. 281.

*Packing.*

Packing in spaces.

**282.** The spaces behind and in front of every railway frog or crossing, and between the fixed rails of every switch, where such spaces are less than four inches in width, shall be filled with packing up to the under side of the head of the rail.

In splayed ends.

2. The spaces between any wing rail and any railway frog, and between any guard rail and the track rail alongside of it, shall be filled with packing at their splayed ends, so that the whole splay shall be so filled where the width of the space between the rails is less than four inches.

Height of.

3. Such packing shall not reach higher than to the under side of the head of the rail.

Of what to consist.

4. Such packing shall consist of wood or metal, or some equally substantial and solid material, of not less than two inches in thickness, and, where by this section any space is required to be filled in on any railway, shall extend to within one and a half inches of the crown of the rails in use, shall be neatly fitted so as to come against the web of such rails, and shall be well and solidly fastened to the ties on which such rails are laid: Provided that if there is at any time any method of packing which, in the opinion of the Board, is an improvement over the present requirements, the Board, after hearing on notice, may authorize or direct the use of such improved method. 1919, c. 68, s. 282.

*Board may Direct Inspection and Order Repairs.*

When railway out of repair.

**283.** Whenever any complaint is made to the Board, or the Board receives information, that any railway, or any portion thereof, is dangerous to the public using the same,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120399

from want of renewal or repair, or insufficient or erroneous construction, or from any other cause, or whenever circumstances arise which, in its opinion, render it expedient, the Board may direct an inspecting engineer to examine the railway, or any portion thereof.

Inspection.

Board may order repairs.

2. The Board may, upon the report of the inspecting engineer, order any repairs, renewal, reconstruction, alteration or new work, materials or equipment to be made, done or furnished by the company upon, in addition to, or substitution for, any portion of the railway, which may, from such report, appear to the Board necessary or proper, and may order that until such repairs, renewals, reconstruction, alteration, and work, materials or equipment are made, done and furnished to its satisfaction, no portion of the railway in respect of which such order is made, shall be used, or used otherwise than subject to such restrictions, conditions and terms as the Board may in such order impose.

May enjoin operation meantime.

Rolling stock may be condemned.

3. The Board may by such order condemn and thereby forbid further use of any rolling stock which, from such report, it may consider unfit to repair or use. 1919, c. 68, s. 283.

*Inspecting Engineer may Forbid Operation.*

Inspecting engineer may forbid operation.

**284.** If in the opinion of any inspecting engineer, it is dangerous for trains to pass over any railway, or any portion thereof, until alterations, substitutions or repairs are made thereon, or that any of the rolling stock should be run or used, the said engineer may, by notice in writing

By notice.

(*a*) forthwith forbid the running of any train over such railway or portion of railway; or

(*b*) require that the same be run only at such times, under such conditions, and with such precautions, as he by such notice specifies; and

(*c*) forbid the running or using of any such rolling stock.

What notice shall state.

2. Such notice shall state the reasons for such opinion of the inspecting engineer, and distinctly point out the defects or the nature of the danger to be apprehended.

Service of notice.

3. The notice may be served upon the company owning, running, or using such railway or rolling stock, or upon any officer having the management or control of the running of trains upon the railway, or the management or control of the rolling stock.

Action of Board.

4. The inspecting engineer shall forthwith report such notice to the Board, which may either confirm, modify or disallow the act or order of such engineer.

Notice thereof.

5. Notice of such confirmation, modification or disallowance, shall be duly given to the company. 1919, c. 68, s. 284.

120400

ACCIDENTS.

*Notice to be Sent to Board.*

Notice to Board of accidents.

**285.** Every company shall, as soon as possible and immediately after the head officers of the company have received information of the occurrence upon the railway belonging to such company, of any accident attended with personal injury to any person using the railway, or to any employee of the company, or whereby any bridge, culvert, viaduct, or tunnel on or of the railway has been broken or so damaged as to be impassable or unfit for immediate use, give notice thereof, with full particulars, to the Board.

By company.

By employees.

2. The conductor or other employee in charge of the train, place or structure in connection with which such accident occurred, shall as soon as possible after such accident notify the Board of the same by telegraph.

Board may regulate.

3. The Board may by regulation declare the manner and form in which such information and notice shall be given and the class of accidents to which this section shall apply, and may declare any such information so given to be privileged. 1919, c. 68, s. 285.

*Board May Direct Inquiry.*

Appointment of officer to inquire into accidents.

**286.** The Board may appoint such person or persons as it thinks fit to inquire into all matters and things which it deems likely to cause or prevent accidents, and the causes of and the circumstances connected with any accident or casualty to life or property occurring on any railway, and into all particulars relating thereto.

Officer to report to Board.

2. The person or persons so appointed shall report fully in writing, to the Board, his or their doings and opinions on the matters respecting which he or they are appointed to inquire, and the Board may act upon such report and may order the company to suspend or dismiss any employee of the company whom it may deem to have been negligent or wilful in respect of any such accident. 1919, c. 68, s. 286.

Powers of Board.

OPERATION AND EQUIPMENT.

*Orders and Regulations of Board.*

Regulations of Board.

**287.** The Board may make orders and regulations

Speed of trains.

(*a*) limiting the rate of speed at which railway trains and locomotives may be run in any city, town or village, or in any class of cities, towns or villages; and the Board may, if it thinks fit, limit certain rates of speed within certain described portions of any city, town or village, and different rates of speed in other portions thereof;

Use of steam whistle.

(*b*) with respect to the use of the steam whistle within any city, town or village, or any portion thereof;

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120401

Passing from car to car. (*c*) with respect to the method and means of passing from one car to another, either inside or overhead, and for the safety of railway employees while passing from one car to another;

Coupling. (*d*) for the coupling of cars;

Shelter. (*e*) requiring proper shelter to be provided for all railway employees when on duty;

Prevention of fires. (*f*) with respect to the use on any engine of nettings, screens, grates and other devices, and the use on any engine or car of any appliances and precautions, which may be deemed by the Board necessary and most suitable to prevent, as far as possible, fires from being started or occurring upon, along, or near the right of way of the railway;

Protection generally. (*g*) with respect to the rolling stock, apparatus, cattle-guards, appliances, signals, methods, devices, structures and works, including light, heat and power lines or wires, to be used upon the railway, so as to provide means for the due protection of property, the employees of the company, and the public and all persons travelling on His Majesty's service;

Length of sections etc. (*h*) with respect to the length of sections required to be kept in repair by employees of the company, and with respect to the number of employees required for each section, so as to ensure safety to the public and to employees;

Number of men. (*i*) designating the number of men to be employed upon trains, with a view to the safety of the public and of employees;

Hours of duty. (*j*) limiting or regulating the hours of duty of any employees or class or classes of employees, with a view to the safety of the public and of employees;

Fuel. Motive power. (*k*) providing that a specified kind of fuel or a specified kind of power or method or means of propulsion shall be used on any or all locomotives and trains in any district; and

Safety, etc. (*l*) generally providing for the protection of property, and the protection, safety, accommodation and comfort of the public, and of the employees of the company, in the running and operating of trains and the speed thereof, or the use of engines, by the company on or in connection with the railway.

Orders, etc. may be made applicable during construction. 2. Any orders or regulations under this section may be made applicable during or after the construction of the railway, or during such time, and in such manner, as the Board deems proper. 1919, c. 68, s. 287.

120402

Uniformity. **288.** The Board shall endeavour to provide for uniformity in the construction of rolling stock to be used upon the railway, and for uniformity of rules for the operation and running of trains. 1919, c. 68, s. 288.

Payment of salary or wages. **289.** The salary or wages of every person employed in the operation, maintenance or equipment of any railway to which the Parliament of Canada has granted aid by means of subsidy or guarantee shall be paid not less frequently than semi-monthly during the term of employment of such person. 1919, c. 68, s. 289.

*By-Laws, Rules and Regulations of Company.*

Company may make by-laws, etc. **290.** The company may, subject to the provisions and restrictions in this and in the Special Act contained, and subject to any orders or regulations of the Board made under the authority of this Act, make by-laws, rules or regulations respecting

Speed. (*a*) the mode by which, and the speed at which any rolling stock used on the railway is to be moved;

Time tables. (*b*) the hours of arrival and departure of trains;

Loads. (*c*) the loading and unloading of cars, and the weights which they are respectively to carry;

Traffic. (*d*) the receipt and delivery of traffic;

Nuisances. (*e*) the smoking of tobacco, expectorating, and the commission of any nuisance in or upon trains, stations, or other premises occupied by the company;

Operation. (*f*) the travelling upon, or the using or working of the railway;

Officers and employees. (*g*) the employment and conduct of the officers and employees of the company; and

Management. (*h*) the due management of the affairs of the company. 1919, c. 68, s. 290.

Penalty may be prescribed. **291.** The company may, for the better enforcing of the observance of any such by-law, rule or regulation, thereby prescribe a penalty enforceable on summary conviction not exceeding forty dollars for any violation thereof. 1919, c. 68, s. 291.

To be in writing under common seal. **292.** All by-laws, rules and regulations, whether made by the directors or the company, shall be reduced to writing, be signed by the chairman or person presiding at the meeting at which they are adopted, have affixed thereto the common seal of the company, and be kept in the office of the company. 1919, c. 68, s. 292.

Must be approved by Governor in Council. **293.** All such by-laws, rules and regulations, except such as relate to tolls and such as are of a private or domestic nature and do not affect the public generally shall be submitted to the Governor in Council for approval.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120403

Board to report.

2. The Board shall make a report to the Governor in Council upon such by-laws, rules and regulations, and the Governor in Council may thereupon sanction such by-laws, rules and regulations or any of them, or any part thereof, and may, from time to time, rescind the sanction thereof, or of any part thereof.

No effect without sanction.

3. No such by-law, rule or regulation shall have any force or effect without such sanction, or after such sanction has been rescinded. 1919, c. 68, s. 293.

Binding when approved.

**294.** Such by-laws, rules and regulations when so approved shall be binding upon, and shall be observed by all persons, and shall be sufficient to justify all persons acting thereunder. 1919, c. 68, s. 294.

Printed copy to be posted up.

**295.** A printed copy of so much of any by-law, rule or regulation, as affects any person, other than the shareholders, or the officers or employees of the company, shall be openly affixed, and kept affixed, to a conspicuous part of every station belonging to the company, so as to give public notice thereof to the persons interested therein or affected thereby.

Copy to every officer and employee affected.

2. A printed copy of so much of any by-law, rule or regulation, as relates to the conduct of or affects the officers or employees of the company, shall be given to every officer and employee of the company thereby affected.

In Quebec both languages.

3. In the province of Quebec every such notice, by-law, rule and regulation shall be published both in the English and French languages. 1919, c. 68, s. 295.

Company may enforce.

**296.** If the violation or non-observance of any by-law, rule or regulation is attended with danger or annoyance to the public, or hindrance to the company in the lawful use of the railway, the company may summarily interfere, using reasonable force, if necessary, to prevent such violation, or to enforce observance, without prejudice to any penalty incurred in respect thereof. 1919, c. 68, s. 296.

Evidence of by-law or regulation.

**297.** A copy of any such by-law, rule or regulation of the company, certified as correct by the president, secretary or other executive officer of the company, and bearing the seal of the company, shall be evidence thereof. 1919, c. 68, s. 297.

*Equipment of Cars and Locomotives.*

Modern and efficient appliances.

**298.** Every railway company shall provide and cause to be used on all trains modern and efficient apparatus, appliances and means

Communication.

(*a*) to provide immediate communication between the conductor while in any car of any passenger train, and the engine driver;

120404

Brakes.

(*b*) to check at will the speed of the train, and bring the same safely to a standstill, as expeditiously as possible, and except under circumstances of sudden danger or emergency, without causing undue discomfort to passengers, if any, on the train; and

Couplers.

(*c*) to securely couple and connect the cars composing the train, and to attach the engine to such train, with couplers which couple automatically by impact, and which can be uncoupled without the necessity of men going in between the ends of the cars.

Drive wheel brake.

2. Such apparatus, appliances and means for the checking of speed or the stopping of any train shall include a power drive wheel brake and appliances for operating the train brake system upon the locomotive.

Power or train brakes.

3. There shall also be such a number of cars in every train equipped with power or train brakes that the engineer on the locomotive drawing such train can control its speed, or bring the train to a stop in the quickest and best manner possible, without requiring brakemen to use the common hand brake for that purpose.

Continuous, instantaneous action.

4. Upon all trains carrying passengers such system of brakes shall be continuous, instantaneous in action, and capable of being applied at will by the engine driver or any brakeman, and the brakes must be self-applying in the event of any failure in the continuity of their action.

Box freight cars.

5. All box freight cars of the company shall, for the security of railway employees, be equipped with

Outside ladders.

(*a*) outside ladders, on two of the diagonally opposite ends and sides of each car, projecting below the frame of the car, with one step or rung of each ladder below the frame, the ladders being placed close to the ends and sides to which they are attached; and

Hand grips.

(*b*) hand grips placed anglewise over the ladders of each box car and so arranged as to assist persons in climbing on the roof by means of the ladders:

Proviso.

Provided that, if there is at any time any other improved side attachment which, in the opinion of the Board, is better calculated to promote the safety of the train hands, the Board may require any of such cars not already fitted with the side attachments by this section required, to be fitted with the said improved attachment.

Height of draw-bars.

6. Every railway company shall adopt and use upon all its rolling stock such height of draw-bars as the Board determines, in accordance with any standard from time to time adopted by competent railway authorities.

Delay may be allowed for compliance.

7. The Board may upon good cause shown, by general regulation, or in any particular case, from time to time grant delay for complying with the provisions of this section. 1919, c. 68, s. 298.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120405

Board may determine what equipment sufficient.

**299.** The Board may, by general regulation or upon application in any particular case, after hearing on notice, order that any apparatus or appliances specified in such regulation or order shall or shall not be deemed sufficient compliance with the provisions of the last preceding section, or that any apparatus or appliances specified in such regulation or order shall or shall not, when used upon the train in the manner and under the circumstances in such regulation or order specified, be deemed sufficient compliance with the provisions of the said section. 1919, c. 68, s. 299.

Oiling.

**300.** The oil cups or other appliances used for oiling the valves of every locomotive in use upon any railway shall be such that no employee shall be required to go outside the cab of the locomotive, while the same is in motion, for the purpose of oiling such valves. 1919, c. 68, s. 300.

Bell and whistle.

**301.** Every locomotive engine shall be equipped and maintained with a bell of at least thirty pounds weight and with a steam whistle. 1919, c. 68, s. 301.

*Running of Trains.*

Regularity in train time.

**302.** All regular trains shall be started and run, as nearly as practicable, at regular hours, fixed by public notice.

Time tables in both languages.

2. Every railway company shall print in both the English and French languages the time tables that are to be used along its lines within the limits of the province of Quebec. 1919, c. 68, s. 302.

Blackboard.

**303.** Every railway company, upon whose railway there is a telegraph or telephone line in operation shall have a blackboard put upon the outside of the station house, over the platform of the station, in some conspicuous place at each station of such company at which there is a telegraph or telephone office; and when any passenger train is overdue at any such station, according to the time table of such company, the station agent or person in charge at such station, shall write, or cause to be written, with white chalk on such blackboard, a notice stating, to the best of his knowledge and belief, the time when such overdue train may be expected to reach such station.

At stations.

Overdue trains.

Further notice.

2. If there is any further change in the expected time of arrival the station agent or person in charge of the station shall write, or cause to be written on the blackboard in like manner, a fresh notice stating, to the best of his knowledge and belief, the time when such overdue train may then be expected to reach such station.

English and French.

3. Such notices shall, in the province of Quebec, be written in the English and French languages, and, in the other provinces, in English. 1919, c. 68, s. 303.

120406

Position of passenger cars.

**304.** No passenger train shall have any freight, merchandise or lumber car in the rear of any passenger car in which any passenger is carried. 1919, c. 68, s. 304.

*Precautions at Swing Bridges.*

Trains to stop at swing bridges.

**305.** When any railway passes over any navigable water, or canal, by means of a draw or swing bridge which is subject to be opened for navigation, every train shall, before coming on or crossing over such bridge, be brought to a full stop, and shall not thereafter proceed until a proper signal has been given for that purpose.

Board may exempt.

2. Wherever there is adopted or in use on any railway, at any such bridge, an interlocking switch and signal system or other device which, in the opinion of the Board, renders it safe to permit engines and trains to pass over such bridge without being brought to a stop, the Board may, by order, permit engines and trains to pass over such bridge without stopping, under such regulations as to speed and other matters, as the Board deems proper. 1919, c. 68, s. 305.

*Precautions at Railway Crossings.*

Signal at rail level crossings.

**306.** No train or engine or electric car shall pass over any crossing where two main lines of railway, or the main tracks of any branch lines, cross each other at rail level, whether they are owned by different companies or the same company, until a proper signal has been received by the conductor or engineer in charge of such train or engine from a competent person or watchman in charge of such crossing that the way is clear.

Electric railway crossings.

2. In the case of an electric car crossing any railway track at rail level, if there is no competent person or watchman in charge of the crossing, it shall be the duty of the conductor, before crossing and before giving the signal to the motorman that the way is clear and to proceed, to go forward and see that the track to be crossed is clear. 1919, c. 68, s. 306.

Stoppage of trains at rail level crossings.

**307.** Every engine, train or electric car shall, before it passes over any crossing as in the last preceding section mentioned, be brought to a full stop: Provided that whenever there is in use, at any such crossing, an interlocking switch and signal system, or other device which, in the opinion of the Board, renders it safe to permit engines and trains or electric cars to pass over such crossing without being brought to a stop, the Board may, by order, permit such engines and trains and cars to pass over such crossing without stopping, under such regulations as to speed and other matters as the Board deems proper. 1919, c. 68, s. 307.

Where safety devices are installed, Board may otherwise order.

*Precautions at Highway Crossings and in Thickly Peopled Places.*

Use of bell and whistle.

**308.** When any train is approaching a highway crossing at rail level the engine whistle shall be sounded at least eighty rods before reaching such crossing, and the bell shall be rung continuously from the time of the sounding of the whistle until the engine has crossed such highway.

Exception.

2. Where a municipal by-law of a city or town prohibits such sounding of the whistle or such ringing of the bell in respect of any such crossing or crossings within the limits of such city or town, such by-law shall, if approved by an order of the Board, to the extent of such prohibition relieve the company and its employees from the duty imposed by this section. 1919, c. 68, s. 308.

Speed of trains.

**309.** No train shall pass at a speed greater than ten miles an hour

In unfenced portions of thickly peopled places.

(*a*) in or through any thickly peopled portion of any city, town or village, unless the track is fenced or properly protected in the manner prescribed by this Act, or unless permission is given by some regulation or order of the Board; or

Over unprotected highway crossings in thickly peopled places.

(*b*) over any highway crossing at rail level in any thickly peopled portion of any city, town or village, unless such crossing is constructed and thereafter maintained and protected in accordance with the orders, regulations and directions specially issued by the Railway Committee of the Privy Council or of the Board, in force with respect to such crossing, or unless permission is given by some regulation or order of the Board; or

Over crossings where accidents happened.

(*c*) over any highway crossing at rail level, if at such crossing, subsequent to the first day of January, one thousand nine hundred and five, a person or vehicle using such crossing, or an animal being ridden or driven over the same, has been struck by a moving train, and bodily injury or death thereby caused to such person or to any other person using such crossing, unless and until such crossing is protected to the satisfaction of the Board; or

Over crossings not protected as ordered.

(*d*) over any highway crossing at rail level in respect of which crossing an order of the Board has been made to provide protection for the safety and convenience of the public and which order has not been complied with. 1919, c. 68, s. 309.

Trains or cars moving reversely.

**310.** Whenever in any city, town or village, any train not headed by an engine is passing over or along a highway at rail level which is not adequately protected by gates or

otherwise,

120408

otherwise, the company shall station on that part of the train, which is then foremost, a person who shall warn persons standing on, or crossing, or about to cross the track of such railway.

Board may exempt.

2. The Board, upon the application of any railway company or person, shall have power to order that this section shall not apply to any particular trains or classes of trains, or to trains running on any specified portions of the railway of the company: Provided that no such order shall be made with respect to trains engaged in shunting or switching, or in yard or terminal movements. 1919, c. 68, s. 310.

Proviso.

*Respecting the Obstruction of Highway Traffic.*

Train must not obstruct highway more than five minutes.

**311.** Whenever any railway crosses any highway at rail level, the company shall not, nor shall its officers, agents or employees, wilfully permit any engine, tender or car, or any portion thereof, to stand on any part of such highway, for a longer period than five minutes at one time, or in shunting, to obstruct public traffic for a longer period than five minutes at one time, or in the opinion of the Board, unnecessarily interfere therewith. 1919, c. 68, s. 311.

TRAFFIC, TOLLS AND TARIFFS.

*Accommodation for Traffic.*

Accommodation.

**312.** The company shall, according to its powers,

At all stations.

(*a*) furnish, at the place of starting, and at the junction of the railway with other railways, and at all stopping places established for such purpose, adequate and suitable accommodation for the receiving and loading of all traffic offered for carriage upon the railway;

Carriage and delivery

(*b*) furnish adequate and suitable accommodation for the carrying, unloading and delivering of all such traffic;

No delay.

(*c*) without delay, and with due care and diligence, receive, carry and deliver all such traffic; and

Appliances.

(*d*) furnish and use all proper appliances, accommodation and means necessary for receiving, loading, carrying, unloading and delivering such traffic;

Other service.

(*e*) furnish such other service incidental to transportation as is customary or usual in connection with the business of a railway company, as may be ordered by the Board.

What adequate and suitable accommodation shall include.

2. Such adequate and suitable accommodation shall include reasonable facilities for the junction of private sidings or private branch railways with any railway belonging to or worked by the company, and reasonable facilities for receiving, forwarding and delivering traffic upon and from

those

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120409

those sidings or private branch railways, together with the placing of cars and moving them upon and from such private sidings and private branch railways.

May be ordered by Board.

3. If in any case such accommodation is not, in the opinion of the Board, furnished by the company, the Board may order the company to furnish the same within such time or during such period as the Board deems expedient, having regard to all proper interests; or may prohibit or limit the use, either generally or upon any specified railway or part thereof, of any engines, locomotives, cars, rolling stock, apparatus, machinery, or devices, or any class or kind thereof, not equipped as required by this Act, or by any orders or regulations of the Board made within its jurisdiction under the provisions of this Act.

Payment of tolls.

4. Such traffic shall be taken, carried to and from, and delivered at the places aforesaid on the due payment of the toll lawfully payable therefor.

Board may regulate time so as to allow connections to be made between railways for passengers and mails.

5. Where a company's railway crosses or joins or approaches, in the opinion of the Board, sufficiently near to any other railway, upon which passengers or mails are transported, whether the last mentioned railway is within the legislative authority of the Parliament of Canada or not, the Board may order the company so to regulate the running of its trains carrying passengers or mails, and the places and times of stopping them, as to afford reasonable opportunity for the transfer of passengers and mails between its railway and such other railway, and may order the company to furnish reasonable facilities and accommodation for such purpose.

Board may order specific works, tolls, etc.

6. For the purposes of this section the Board may order that specific works be constructed or carried out, or that property be acquired, or that specified tolls be charged, or that cars, motive power or other equipment be allotted, distributed, used or moved as specified by the Board, or that any specified steps, systems, or methods be taken or followed by any particular company or companies, or by railway companies generally.

Right of action on default.

7. Every person aggrieved by any neglect or refusal of the company to comply with the requirements of this section shall, subject to this Act, have an action therefor against the company, from which action the company shall not be relieved by any notice, condition or declaration, if the damage arises from any negligence or omission of the company or of its servant.

Condition against negligence invalid.

Demurrage.

8. The Board may make regulations, applying generally or to any particular railway or any portion thereof, or may make an order in any case where it sees fit, imposing charges for default or delay by any company in furnishing accommodation, appliances, or means as aforesaid, or in receiving,

R.S., 1927.

120410

loading, carrying, unloading or delivering traffic, and may enforce payment of such charges by companies to any person injuriously affected by such default or delay; and any amount so received by any person shall be deducted from the damages recoverable or recovered by such person for such default or delay; and the Board may, by order or regulation, determine what circumstances shall exempt any company from payment of any such charges. 1919, c. 68, s. 312.

Interchange of traffic between connecting lines.

**313.** Where a branch line of one railway joins or connects the line or lines of such railway with another, the Board may, upon application of one of the companies, or of a municipal corporation or other public body, order that the railway company which constructed such branch line shall afford all reasonable and proper facilities for the interchange, by means of such branch, of freight and live stock traffic, and the empty cars incidental thereto, between the lines of the said railway and those of the railway with which the said branch is so joined or connected, in both directions, and also between the lines of the said first mentioned railway and those of other railways connecting with the lines of the first mentioned railway and all tracks and sidings used by such first mentioned railway for the purpose of loading and unloading cars, and owned or controlled by, or connecting with the lines of, the company owning or controlling the first mentioned railway, and such other tracks and sidings as the Board from time to time directs; and the company owning or controlling the secondly mentioned railway shall furnish similar reasonable and proper facilities to the first mentioned railway, and to other lines connecting with its own railway, and shall in all respects be under duties corresponding to those of the company owning or controlling the first mentioned railway, and shall be subject in like manner to the directions of the Board.

Inter-switching.

Reciprocal duties of companies.

Charge regulated by Board.

2. The Board may, in and by such order, or by other orders, from time to time determine as questions of fact and direct the price per car which shall be charged by and paid for such traffic.

Application of section.

3. This section shall apply whether or not the point of connection is within the same city, town or village as the point of shipment or delivery, or so near thereto that the tolls to and from such points are the same. 1919, c. 68, s. 313.

*Equality as to Tolls and Facilities.*

Equal tolls to be charged.

**314.** All tolls shall always under substantially similar circumstances and conditions, in respect of all traffic of the same description, and carried in or upon the like kind of

cars

R.S., 1927.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120411

cars or conveyances, passing over the same line or route, be charged equally to all persons and at the same rate, whether by weight, mileage or otherwise.

No discrimination.

2. No reduction or advance in any such tolls shall be made, either directly or indirectly, in favour of or against any particular person or company travelling upon or using the railway.

Carload quantities.

3. The tolls for carload quantities or longer distances, may be proportionately less than the tolls for less than carload quantities, or shorter distances, if such tolls are, under substantially similar circumstances, charged equally to all persons.

Localities.

4. No toll shall be charged which unjustly discriminates between different localities.

Duty of Board.

5. The Board shall not approve or allow any toll, which for the like description of goods, or for passengers carried under substantially similar circumstances and conditions in the same direction over the same line or route is greater for a shorter than for a longer distance, within which such shorter distance is included, unless the Board is satisfied that, owing to competition, it is expedient to allow such toll.

Competitive points.

6. The Board may declare that any places are competitive points within the meaning of this Act. 1919, c. 68, s. 314.

Pooling prohibited.

**315.** No company shall, without leave therefor having been obtained from the Board, except in accordance with the provisions of this Act, directly or indirectly, pool its freights or tolls with the freights or tolls of any other railway company or common carrier, or divide its earnings or any portion thereof with any other railway company or common carrier, or enter into any contract, arrangement, agreement, or combination to effect, or which may effect, any such result. 1919, c. 68, s. 315.

Facilities for traffic.

**316.** All railway companies shall, according to their respective powers, afford to all persons and companies all reasonable and proper facilities for the receiving, forwarding and delivering of traffic upon and from their several railways, for the interchange of traffic between their respective railways, and for the return of rolling stock.

Through traffic.

2. Such facilities so to be afforded shall include the due and reasonable receiving, forwarding and delivering by the company, at the request of any other company, of through traffic, and in the case of goods shipped by carload, of the car with the goods shipped therein, to and from the railway of such other company, at a through rate; and also the due and reasonable receiving, forwarding and delivering by the company, at the request of any person interested in through traffic, of such traffic at through rates.

120412

3. No company shall

No undue preference.

(*a*) make or give any undue or unreasonable preference or advantage to, or in favour of any particular person or company, or any particular description of traffic, in any respect whatsoever;

Or discrimination.

(*b*) by any unreasonable delay or otherwise howsoever, make any difference in treatment in the receiving, loading, forwarding, unloading, or delivery of the goods of a similar character in favour of or against any particular person or company;

Or prejudice.

(*c*) subject any particular person, or company, or any particular description of traffic, to any undue, or unreasonable prejudice or disadvantage, in any respect whatsoever; or

Allotment of freight cars.

(*d*) so distribute or allot its freight cars as to discriminate unjustly against any locality or industry, or against any traffic which may originate on its railway destined to a point on another railway in Canada with which it connects.

Connecting railway to afford reasonable facilities.

4. Every railway company which has or works a railway forming part of a continuous line of railway with or which intersects any other railway, or which has any terminus, station or wharf near to any terminus, station or wharf of any other railway, shall afford all due and reasonable facilities for delivering to such other railway, or for receiving from and forwarding by its railway, all the traffic arriving by such other railway without any unreasonable delay, and without any such preference or advantage, or prejudice or disadvantage as aforesaid, and so that no obstruction is offered to the public desirous of using such railways as a continuous line of communication, and so that all reasonable accommodation, by means of the railways of the several companies, is, at all times, afforded to the public in that behalf.

Facilities for junction of private sidings, branches, etc.

5. The reasonable facilities which every railway company is required to afford under this section, shall include reasonable facilities for the junction of private sidings or private branch railways with any railway belonging to or worked by any such company, and reasonable facilities for receiving, forwarding and delivering traffic upon and from those sidings or private branch railways.

Equal facilities to be granted to express companies.

6. Every railway company which grants any facilities for the carriage of goods by express to any incorporated express company or person, shall grant equal facilities, on equal terms and conditions, to any other incorporated express company which demands the same.

Agreements to the contrary void.

7. Any agreement made between any two or more companies contrary to this section shall be unlawful and null and void. 1919, c. 68, s. 316.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120413

Board may determine.

**317.** The Board may determine, as questions of fact, whether or not traffic is or has been carried under substantially similar circumstances and conditions, and whether there has, in any case, been unjust discrimination, or undue or unreasonable preference or advantage, or prejudice or disadvantage, within the meaning of this Act, or whether in any case the company has, or has not, complied with the provisions of the three last preceding sections.

May make declaratory regulation.

2. The Board may by regulation declare what shall constitute substantially similar circumstances and conditions, or unjust or unreasonable preferences, advantages, prejudices, or disadvantages within the meaning of this Act, or what shall constitute compliance or non-compliance with the provisions of the three last preceding sections.

Board may order specific works, tolls, etc.

3. For the purposes of the last preceding section, the Board may order that specific works be constructed or carried out, or that property be acquired, or that specified tolls be charged, or that cars, motive power or other equipment be allotted, distributed, used or moved as specified by the Board, or that any specified steps, systems, or methods be taken or followed by any particular company or companies, or by railway companies generally. 1919, c. 68, s. 317.

Facilities to be afforded for movement of grain from the Western Provinces.

**318.** If the company is unable or fails to provide sufficient facilities for the movement of grain from the western provinces to the elevators at the head of lake Superior, or to destinations east thereof, after the close of navigation on the Great Lakes and before the next harvest, and grain in certain sections or districts cannot by reason thereof be marketed, the Board may require the said company to furnish all facilities within its powers for the carriage of such grain in such sections or districts to any intermediate point or points of interchange with another company or any terminal elevator, and there to make delivery thereof to such other company or companies or to such elevator for carriage by such other company or companies as the Board may direct; and the Board may require such other company or companies to transport such grain and supply the necessary cars and engines therefor, and the rates lawfully published and filed by the company in default and obtaining on its route shall apply over the joint route or routes so directed and shall be apportioned between the companies as the Board may direct. 1919, c. 68, s. 318.

Discrimination.

**319.** Whenever it is shown that any railway company charges one person, company, or class of persons, or the persons in any district, lower tolls for the same or similar goods, or lower tolls for the same or similar services, than it charges to other persons, companies, or classes of persons,

120414

Burden of proof.

or to the persons in another district, or makes any difference in treatment in respect of such companies or persons, the burden of proving that such lower toll or difference in treatment does not amount to an undue preference or an unjust discrimination, shall lie on the company. 1919, c. 68, s. 319.

What Board may consider in deciding undue preference.

**320.** In deciding whether a lower toll, or difference in treatment, does or does not amount to an undue preference or an unjust discrimination, the Board may consider whether such lower toll, or difference in treatment, is necessary for the purpose of securing, in the interests of the public, the traffic in respect of which it is made, and whether such object cannot be attained without unduly reducing the higher tolls. 1919, c. 68, s. 320.

Apportionment of toll for carriage by land and water.

**321.** In any case in which the toll charged by the company for carriage, partly by rail and partly by water, is expressed in a single sum, the Board, for the purpose of determining whether a toll charged is discriminatory or contrary in any way to the provisions of this Act, may require the company to declare forthwith to the Board, or may determine, what portion of such single sum is charged in respect of the carriage by rail. 1919, c. 68, s. 321.

*Freight Classification.*

Tariff of tolls subject to classification by Board.

**322.** The tariffs of tolls for freight traffic shall be subject to and governed by that classification which the Board may prescribe or authorize, and the Board shall endeavour to have such classification uniform throughout Canada, as far as may be, having due regard to all proper interests.

Special terms and conditions.

2. The Board may make any special regulations, terms and conditions or order or direction in connection with such classification, and as to the carriage of any particular commodity or commodities mentioned therein, as to it may seem expedient.

Changes of class.

3. The company may, from time to time, with the approval of the Board, and shall, when so directed by the Board, place any goods specified by the Board in any stated class, or remove them from any one class to any other, higher or lower, class: Provided that no goods shall be removed from a lower to a higher class until such notice as the Board determines has been given in the *Canada Gazette*.

United States classification.

4. Any freight classification and exception thereto in use in the United States may, subject to any regulation, order or direction of the Board, be used by the company with respect to traffic to and from the United States. 1919, c. 68, s. 322.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120415

*Tariffs—General Provisions.*

Tariffs of tolls.

Preparation and issue.

**323.** The company or the directors of the company, by by-law, or any officer of the company who is thereunto authorized by a by-law of the company or directors may from time to time prepare and issue tariffs of the tolls to be charged in respect of the railway owned or operated by the company, and may specify the persons to whom, the place where, and the manner in which, such tolls shall be paid.

Local or general.

2. The tolls may be either for the whole or for any particular portion of the railway.

Approval by Board.

3. All such by-laws shall be submitted to and approved by the Board.

Nature of approval.

4. The Board may approve such by-laws in whole or in part, or change, alter or vary any of the provisions therein.

No tolls unless authorized.

5. No tolls shall be charged by the company or by any person in respect of a railway or any traffic thereon until a by-law authorizing the preparation and issue of tariffs of such tolls has been approved by the Board, nor, unless otherwise authorized by this Act, until a tariff of such tolls has been filed with, and, where such approval is required under this Act, approved by, the Board, nor until any other requirements necessary under this Act to bring such tariff into effect have been complied with; nor shall any tolls be charged under any tariff or portion thereof disallowed by the Board, or not in effect in accordance with the provisions of this Act; nor shall the company charge, levy or collect any toll or money for any service as a common carrier except under and in accordance with the provisions of this Act.

Regulations as to publication.

6. The Board may, with respect to any tariff of tolls, other than the passenger and freight tariffs in this Act hereinafter mentioned, make regulations fixing and determining the time when, the places where, and the manner in which, such tariffs shall be filed, published and kept open for public inspection. 1919, c. 68, s. 323.

Form and particulars.

**324.** All tariff by-laws and tariffs of tolls shall be in such form, size and style, and give such information, particulars and details, as the Board may, by regulation, or in any case, prescribe. 1919, c. 68, s. 324.

Disallowance.

Substitution.

**325.** The Board may disallow any tariff or any portion thereof which it considers to be unjust or unreasonable, or contrary to any of the provisions of this Act, and may require the company, within a prescribed time, to substitute a tariff satisfactory to the Board in lieu thereof, or may prescribe other tolls in lieu of the tolls so disallowed.

Effective date.

2. The Board may designate the date at which any tariff shall come into force, and either on application or of its own motion may, pending investigation or for any reason,

120416

postpone the effective date of, or either before or after it comes into effect, suspend any tariff or any portion thereof.

Amendment.

3. Except as otherwise provided, any tariff in force, except standard tariffs hereinafter mentioned, may, subject to disallowance or change by the Board, be amended or supplemented by the company by new tariffs, in accordance with the provisions of this Act.

Consolidation.

4. When any tariff has been amended or supplemented, or is proposed to be amended or supplemented, the Board may order that a consolidation and reissue of such tariff be made by the company.

Power to fix rates and to enforce fair and reasonable rate structure.

5. Notwithstanding the provisions of section three of this Act the powers given to the Board under this Act to fix, determine and enforce just and reasonable rates, and to change and alter rates as changing conditions or cost of transportation may from time to time require, shall not be limited or in any manner affected by the provisions of any Act of the Parliament of Canada, or by any agreement made or entered into pursuant thereto, whether general in application or special and relating only to any specific railway or railways, and the Board shall not excuse any charge of unjust discrimination, whether practised against shippers, consignees, or localities, or of undue or unreasonable preference, on the ground that such discrimination or preference is justified or required by any agreement made or entered into by the company: Provided that, notwithstanding anything in this subsection contained, rates on grain and flour shall, on and from the twenty-seventh day of June, one thousand nine hundred and twenty-five, be governed by the provisions of the agreement made pursuant to chapter five of the Statutes of Canada 1897, but such rates shall apply to all such traffic moving from all points on all lines of railway west of Fort William to Fort William or Port Arthur over all lines now or hereafter constructed by any company subject to the jurisdiction of Parliament.

Proviso as to rates on grain and flour.

1897, c. 5.

Unjust discrimination or undue or unreasonable preference in rates on grain and flour.

6. The Board shall not excuse any charge of unjust discrimination, whether practised against shippers, consignees, or localities or of undue or unreasonable preference, respecting rates on grain and flour, governed by the provisions of chapter five of the Statutes of Canada 1897, and by the agreement made or entered into pursuant thereto within the territory in the immediately preceding subsection referred to, on the ground that such discrimination or preference is justified or required by the said Act or by the agreement made or entered into pursuant thereto. 1919, c. 68, s. 325; 1925, c. 52, ss. 2 and 3.

References in superseding tariffs.

**326.** Every tariff superseding or intended to supersede any other tariff or tariffs, or any portion or portions thereof, shall specify the tariff or tariffs, or portion or

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120417

portions thereof, which it supersedes or is intended to supersede, by giving the reference number or referring to the page and section or item in such a way as to facilitate an accurate and ready reference to what is superseded or intended to be superseded.

Supplements to cancelled tariffs.

2. When any tariff is cancelled without being superseded by a tariff of like issue, a supplement shall be issued to such cancelled tariff and such supplement shall specify the tariff wherein the tolls may thereafter be found. 1919, c. 68, s. 326.

Fraction of a mile.

**327.** In all cases a fraction of a mile in the distance over which traffic is carried on the railway shall be considered as a whole mile.

Fraction of five pounds in weight.

2. In estimating the weight of any goods in any one single shipment on which the toll amounts to more than the minimum, or "smalls" toll, any fraction of five pounds shall be waived by the company, and five or any fraction above five and up to ten pounds shall be deemed ten pounds by the company.

Fraction of five cents.

3. In estimating the tolls to be charged in passenger tariffs hereafter issued, any amount not exceeding two and a half cents shall be waived by the company, and above two and a half cents and up to five cents shall be considered as five cents by the company. 1919, c. 68, s. 327.

*Freight Tariffs.*

Division of freight tariffs.

**328.** The tariffs of tolls which the company shall be authorized to issue under this Act for the carriage of goods between points on the railway shall be divided into three classes,

Standard. (*a*) the standard freight tariff;

Special. (*b*) special freight tariffs; and

Competitive. (*c*) competitive tariffs. 1919, c. 68, s. 328.

What standard freight tariff to specify.

**329.** The standard freight tariff or tariffs, where the company is allowed by the Board more than one standard freight tariff, shall specify the maximum mileage tolls to be charged for each class of the freight classification for all distances covered by the company's railway.

Distances.

2. Such distances may be expressed in blocks or groups, and such blocks or groups may include relatively greater distances for the longer than for the shorter hauls.

What special freight tariffs to specify.

3. The special freight tariffs shall specify the toll or tolls, lower than in the standard freight tariff, to be charged by the company for any particular commodity or commodities, or for each or any class or classes of the freight classification, or to or from a certain point or points on the railway; and greater tolls shall not be charged for a

120418

shorter than for a longer distance over the same line in the same direction, if such shorter distance is included in the longer.

What competitive tariffs to specify.

4. The competitive tariffs shall specify the toll or tolls, lower than in the standard freight tariff, to be charged by the company for any class or classes of the freight classification, or for any commodity or commodities, to or from any specified point or points which the Board may deem or have declared to be competitive points not subject to the long and short haul clause under the provisions of this Act. 1919, c. 68, s. 329.

Standard freight tariff.

**330.** Every standard freight tariff shall be filed with the Board, and shall be subject to the approval of the Board.

Filing. Approval. Publication.

2. Upon any such tariff being filed and approved by the Board the company shall publish the same, with a notice of such approval in such form as the Board directs in at least two consecutive weekly issues of the *Canada Gazette*.

Tolls specified to be the only lawful tolls.

3. When the provisions of this section have been complied with, the tolls as specified in the standard freight tariff or tariffs, as the case may be, shall, except in the cases of special freight and competitive tariffs, be the only tolls which the company is authorized to charge for the carriage of goods.

No toll until compliance.

4. Until the provisions of this section have been complied with, no toll shall be charged by the company.

Changes to be approved.

5. No standard freight tariff shall be amended or supplemented except with approval of the Board. 1919, c. 68, s. 330.

Special freight tariffs.

**331.** Special freight tariffs shall be filed by the company with the Board, and every such tariff shall specify the date of the issue thereof and the date on which it is intended to take effect.

If tolls previously in force are reduced.

2. When any such special freight tariff reduces any toll previously authorized to be charged under this Act, the company shall file such tariff with the Board at least three days before its effective date, and shall, for three days previous to the date on which such tariff is intended to take effect, deposit and keep on file in a convenient place, open for the inspection of the public during office hours, a copy of such tariff, at every station or office of the company where freight is received, or to which freight is to be carried thereunder, and also post up in a prominent place, at each such office or station, a notice in large type directing public attention to the place in such office or station where such tariff is so kept on file: Provided that the Board may by

Notice.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120419

regulation or otherwise determine and prescribe any other or additional method of publication of such tariff during the period aforesaid.

If previous tolls advanced.

3. When any such special freight tariff advances any toll previously authorized to be charged under this Act, the company shall in like manner file and publish such tariff thirty days previously to the date on which such tariff is intended to take effect: Provided that where objection to any such tariff is filed with the Board, the burden of proof justifying the proposed advances shall be upon the company filing said tariff.

Burden of proof.

When tariff effective.

4. When the foregoing provisions have been complied with, any such special freight tariff, unless suspended or postponed by the Board, shall take effect on the date stated therein as the date on which it is intended to take effect, and the company shall thereafter, until such tariff is disallowed or suspended by the Board or superseded by a new tariff, charge the toll or tolls as specified therein, and such special freight tariff shall supersede any preceding tariff or tariffs, or any portion of portions thereof, in so far as it reduces or advances the tolls therein.

No tolls until tariff in force.

5. Until such special freight tariff comes into effect, no such special freight toll or tolls shall be charged by the company. 1919, c. 68, s. 331.

Competitive tariffs.

**332.** Competitive tariffs shall be filed by the company with the Board and every such tariff shall specify the date of the issue thereof and the date on which it is intended to take effect: Provided that where it may be necessary to meet the exigencies of competition, or as the Board may deem expedient, the Board may make rules and regulations governing the filing or publication of such tariffs, and may provide that any such tariffs may be acted upon and put in operation immediately upon the issue thereof by the company, before they have been filed with the Board, or may in any case make a special order or direction allowing any such tariff to go into effect as the Board shall appoint. 1919, c. 68, s. 332.

Filing.

*Passenger Tariffs.*

Division of passenger tariffs.

**333.** The tariffs of tolls which the company shall be authorized to issue under this Act for the carriage of passengers between points on the railway shall be divided into two classes,

Standard.

(*a*) the standard passenger tariff; and

Special.

(*b*) special passenger tariffs.

What standard passenger tariff shall specify.

2. The standard passenger tariff or tariffs, where the company is allowed by the Board more than one standard passenger tariff, shall specify the maximum mileage toll or

120420

tolls to be charged for passengers for all distances covered by the company's railway; and such distances may be expressed in like manner as provided herein in respect of standard freight tariffs.

What special passenger tariffs shall specify.

3. Special passenger tariffs shall specify the toll or tolls to be charged by the company for passengers, in every case where such tolls are lower than the tolls specified in the company's standard passenger tariff. 1919, c. 68, s. 333.

Standard passenger tariff.

**334.** A standard passenger tariff shall be filed approved and published, and amended or supplemented, in the same manner as required by this Act in the case of a standard freight tariff.

Approved and published.

2. Until the company files its standard passenger tariff and such tariff is so approved and published in the *Canada Gazette*, no tolls shall be charged by the company.

Tolls authorized.

3. When the provisions of this section have been complied with, the tolls in the standard passenger tariff shall, except in the case of special passenger tariffs, be the only tolls which the company is authorized to charge for the carriage of passengers. 1919, c. 68, s. 334.

Special passenger tariffs.

**335.** The company shall file all special passenger tariffs with the Board at least three days before the effective date and shall, for three days previous to the date on which any such tariff is intended to take effect, deposit and keep on file in a convenient place, open for the inspection of the public during office hours, a copy of each such tariff, at every station or office of the company where passengers are received for carriage thereunder, and also post up in a prominent place at each such office or station a notice in large type directing public attention to the place in such office or station where such tariff is so kept on file: Provided that the Board may, owing to the exigencies of competition or otherwise, notwithstanding anything in this section contained, determine the time or manner within and according to which publication of any such tariff is to be made.

Notice.

Date and period.

2. The date of the issue and the date on which, and the period, if any, during which, any such tariff is intended to take effect, shall be specified therein.

When effective.

3. When the foregoing provisions have been complied with, any such tariff, unless suspended or postponed by the Board, shall take effect on the date stated therein as the date on which it is intended to take effect, and the company shall thereafter, until such tariff is disallowed or suspended by the Board or expires or is superseded by a new tariff, charge the toll or tolls as specified therein, and such

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120421

such tariff shall supersede any preceding tariff or tariffs or any portion or portions thereof, in so far as it reduces or advances the tolls therein.

No toll before tariff.

4. Until such tariff comes into effect no such toll or tolls shall be charged by the company. 1919, c. 68, s. 335.

*Joint Tariffs.*

Continuous route in Canada.

**336.** Where traffic is to pass over any continuous route in Canada operated by two or more companies, the several companies shall agree upon a joint tariff for such continuous route, and the initial company shall file such joint tariff with the Board, and the other company or companies, shall promptly notify the Board of its or their assent to and concurrence in such joint tariff.

Joint tariffs shall be agreed upon.

Names of companies.

2. The names of the companies whose lines compose such continuous route shall be shown by such tariffs.

Continuous route in the case of carriage by water.

3. If the company owns, charters, uses, maintains or works, or is a party to any arrangement for using, maintaining or working vessels for carrying traffic, by sea or inland water, between any places or ports in Canada, and if any such vessel carries traffic between a port in Canada reached by such company and a port in Canada reached by the railway of another company, the vessel and the railway of either company shall be deemed to constitute a continuous route in Canada within the meaning of this section. 1919, c. 68, s. 336.

Where failure to agree Board may decide.

**337.** In the event of failure by such companies to agree upon any such joint tariff as provided in the last preceding section, the Board on the application of any company or person desiring to forward traffic over any such continuous route, which the Board considers a reasonable and practicable route, or any portion thereof, may require such companies, within a prescribed time, to agree upon and file in like manner a joint tariff for such continuous route, satisfactory to the Board, or may, by order, determine the route, fix the toll or tolls and apportion the same among the companies interested, and may determine the date when the toll or tolls so fixed shall come into effect.

Companies to comply.

2. Upon any such order being made the companies shall as soon as possible, or within such time as the Board may require, file and publish a joint tariff in accordance with this Act, and in accordance with such order.

Apportionment of through rate.

3. In any case when there is a dispute between companies interested as to the apportionment of a through rate in any joint tariff, the Board may apportion such rate between such companies.

120422

Power of Board.

4. The Board may decide that any proposed through rate is just and reasonable, notwithstanding that a less amount may be allotted to any company out of such through rate than the toll such company would otherwise be entitled to charge. 1919, c. 68, s. 337.

From Canada to foreign country.

**338.** When traffic is to pass over any continuous route from a point in Canada through a foreign country into Canada, or from any point in Canada to a foreign country, and such route is operated by two or more companies, whether Canadian or foreign, the several companies shall file with the Board a joint tariff for such continuous route. 1919, c. 68, s. 338.

From foreign country to or through Canada.

**339.** As respects all traffic which is carried from any point in a foreign country into Canada, or from a foreign country through Canada into a foreign country by any continuous route owned or operated by any two or more companies, whether Canadian or foreign, a joint tariff for such continuous route shall be duly filed with the Board. 1919, c. 68, s. 339.

Continuous carriage not to be prevented.

**340.** No company shall, by any combination, contract or agreement, express or implied, or by other means or device, prevent the carriage of goods from being continuous from the place of shipment to the place of destination.

Break in bulk, etc.

2. No break in bulk, stoppage or interruption made by such company shall prevent the carriage of goods from being treated as one continuous carriage from the place of shipment to the place of destination, unless such break, stoppage or interruption was made in good faith for some necessary purpose, and without any intent to avoid or unnecessarily interrupt such continuous carriage, or to evade any of the provisions of this Act. 1919, c. 68, s. 340.

Filing and publication of joint tariffs.

**341.** Joint tariffs shall, as to the filing and publication thereof, be subject to the same provisions in this Act as are applicable to the filing and publication of local tariffs of a similar description; and upon any such joint tariff being so duly filed with the Board the company or companies shall, until such tariff is superseded by another tariff or disallowed by the Board, charge the toll or tolls as specified therein: Provided that the Board may except from the provisions of this section the filing and publication of any or all passenger tariffs of foreign railway companies.

Proviso.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120423

Information which Board may require.

2. The Board may require to be informed by the company of the proportion of the toll or tolls, in any joint tariff filed, which it or any other company, whether Canadian or foreign, is to receive or has received. 1919, c. 68, s. 341.

*Posting of Tariffs.*

Where to be posted.

**342.** The company shall deposit and keep on file in a convenient place, open for the inspection of the public during office hours, a copy of each of its tariffs, at the following places respectively:—

Standard tariffs.

(*a*) Standard passenger and freight tariffs at every station or office of the company where passengers or freight, respectively, are received for carriage, thereunder;

Special tariffs.

(*b*) Special passenger and freight tariffs, at every station or office of the company where passengers or freight, respectively, are received for carriage thereunder, and such freight tariffs also at each of its stations or offices to which freight traffic is to be carried thereunder;

Competitive tariffs.

(*c*) Competitive tariffs, at each freight station or office of the company where goods are to be received and delivered thereunder;

Joint tariffs in Canada.

(*d*) Joint tariffs for traffic passing over any continuous route in Canada, operated by two or more companies, at each freight station or office where traffic is to be received, and at each freight station to which such tariffs extend;

Joint tariffs.

(*e*) Joint tariffs for traffic passing over any continuous route operated by two or more companies, whether Canadian or foreign, from a point in Canada through a foreign country into Canada, or from any point in Canada to a foreign country, at each freight station or office where such traffic is to be received, and at each freight station or office in Canada to which it is to be carried as its destination;

From Canada to foreign country.

From foreign country to or through Canada.

(*f*) Joint tariffs for traffic carried by any continuous route owned or operated by two or more companies, whether Canadian or foreign, from any point in a foreign country into Canada, or from a foreign country through Canada into a foreign country, at each freight station or office in Canada to which such tariffs extend.

Freight classifications.

2. The company shall keep on file at its stations or offices, where freight is received and delivered, a copy of the freight classification, or classifications, in force upon the railway, for inspection during business hours.

120424

Notice to be posted at station of place where tariffs open to inspection.

3. The company shall post up in a prominent place at each of its stations where passengers or freight, respectively, are received for carriage, a notice in large type directing the public attention to the place in such station where the passenger or freight tariffs, respectively, are kept on file for public inspection during business hours, and the station agent, or person in charge at such station, shall produce to any applicant, on request, any particular tariff in use at that station which he may desire to inspect.

Power of Board as to publication of tariffs.

4. Notwithstanding anything in this section, the Board may, in addition to or in substitution for the publication of any tariff required by this section, by regulation or otherwise, determine and prescribe the manner and form in which any such tariff shall be published or kept open by the company for public inspection, and may exempt from any such publication any competitive tariffs, or any joint tariff for traffic carried by any continuous route,

Exemptions.

From Canada.

(*a*) operated by two or more companies, whether Canadian or foreign, from a point in Canada through a foreign country into Canada, or from any point in Canada to a foreign country; or

From foreign countries.

(*b*) owned or operated by any two or more companies, whether Canadian or foreign, from any point in a foreign country into Canada, or from a foreign country through Canada into a foreign country. 1919, c. 68, s. 342.

*Presumption as to Legal Tolls.*

Tariff.

**343.** If the company files with the Board any tariff and such tariff comes into force and is not disallowed by the Board under this Act, or if the company participates in any such tariff, the tolls under such tariff while so in force shall, in any prosecution under this Act, as against such company, its officers, agents or employees, be conclusively deemed to be the legal tolls chargeable by such company. 1919, c. 68, s. 343.

Presumed legal as against company.

*Special Rates for Specific Shipments.*

Regulations permitting.

**344.** Notwithstanding anything in this Act, the Board may make regulations permitting the company to issue special rate notices prescribing tolls, lower than the tolls in force upon the railway, to be charged for specific shipments between points upon the railway, not being competitive points, if it considers that the charging of the special tolls mentioned in any such notices will help to create trade, or develop the business of the company, or be in the public interest, and not otherwise contrary to the provisions of this Act.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120425

Notice to be filed with Board.

2. Every such special rate notice, or a duplicate copy thereof, shall be filed with the Board, and shall exist merely for the purpose of giving effect to the special rate charged for the specific shipment mentioned therein. 1919, c. 68, s. 344.

*Reduced Rates and Free Transportation.*

For Government, charity, expositions, etc.

**345.** Nothing in this Act shall be construed to prevent (*a*) the carriage, storage or handling of traffic, free or at reduced rates, for the Dominion, or for any provincial or municipal government, or for charitable purposes, or to or from fairs and expositions for exhibition thereat, or the carriage, free or at reduced rates, of destitute or homeless persons, transported by charitable societies, and the necessary agencies employed in such transportation, or the carriage at one-half the regular single fare of ministers of religion or persons exclusively engaged in charitable, religious, or eleemosynary work;

Special tickets, immigrants, commercial travellers.

(*b*) the issuing of mileage, excursion or commutation passenger tickets, or the carriage at reduced rates, of immigrants or settlers and their goods or effects, or any member of any organized association of commercial travellers with his baggage;

Railway employees, M.P.P's, press, etc.

(*c*) railways from giving free carriage or reduced rates to their own directors, officers, agents and employees, or their families, or to former employees of any railway, or for their goods and effects, or between points within the province to members of the provincial legislatures or to members of the press, or to members of the Interstate Commerce Commission of the United States and the officers and staff of such commission, and for their baggage and equipment, or to dependent members of the families of members of the Senate and House of Commons of Canada, and members of the Board and such officers and staff of the Board as the Board may determine, and for their baggage, or to such other persons as the Board may approve or permit; or

Exchanging passes, etc.

(*d*) railways or transportation companies from exchanging passes or free tickets with other railways or transportation companies for their officers, agents and employees and their families, goods and effects, or from issuing passes or free tickets to officers and employees of the Department of Railways and Canals, or their families, and their goods and effects, or a similar interchange of passes, or franks with or by telegraph, telephone and cable companies;

120426

(*e*) railways from giving free carriage to the Governor General, and staff, and families, and baggage and equipment: Governor General.

Board may regulate carriage of traffic and prescribe forms, records and returns under this section.

Provided that the carriage of traffic by the company under this section may, in any particular case, or by general regulation, be extended, restricted, limited or qualified by the Board, and the Board, in or by any order or by general regulation, may prescribe the forms to be issued or used by the company for the carriage of traffic at free or reduced rates under this Act, and the terms and conditions applicable thereto, and the records to be kept by the company of all such traffic carried and of all passes, free and reduced rate transportation issued or given by the company, and shall require the making of periodical returns duly verified by affidavit to the Board in respect thereof; and it shall be the duty of the Board to examine such returns with a view to seeing that the law has been observed.

Commutation tickets.

2. Whenever the Board sees fit it may require the company to grant and issue commutation tickets at such rates and on such terms as the Board may order. 1919, c. 68, s. 345.

Members of Parliament and Board etc., free.

**346.** Members of the Senate and House of Commons of Canada, with their baggage, and members of the Board and such officers and staff of the Board as the Board may determine, with their baggage and equipment, shall, on production of cards, certifying their membership or right, which shall be furnished them by the Clerk of the Senate or the Clerk of the House of Commons or the Secretary of the Board, as the case may be, be entitled to free transportation on any of the trains of the company; and the company shall also, when required, haul free of charge any car provided for the use of the Board. 1919, c. 68, s. 346.

No free passes, except as above provided.

**347.** Subject to the provisions of the two last preceding sections of this Act, no company shall hereafter, directly or indirectly, issue or give any free ticket or free pass, whether for a specific journey or periodical or annual pass, and no company shall otherwise arrange for or permit the transportation of passengers except on payment of the fares properly chargeable for such transportation under the tariffs filed under the provisions of this Act, and at the time in effect: Provided that nothing in this Act shall affect the furnishing of free transportation where such is specifically required by any other public general Act of the Parliament of Canada. 1919, c. 68, s. 347.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120427

*Contracts, etc., Limiting Carriers' Liability.*

Contracts, etc., impairing carriers' liability.

**348.** No contract, condition, by-law, regulation, declaration or notice made or given by the company, impairing, restricting or limiting its liability in respect of the carriage of any traffic, shall, except as hereinafter provided, relieve the company from such liability, unless such class of contract, condition, by-law, regulation, declaration or notice has been first authorized or approved by order or regulation of the Board.

Power of Board.

2. The Board may, in any case, or by regulation, determine the extent to which the liability of the company may be so impaired, restricted or limited.

Board may prescribe terms.

3. The Board may by regulation prescribe the terms and conditions under which any traffic may be carried by the company.

Bills of lading to be in French and English in Quebec.

4. Railway companies shall print in both the English and French languages the bills of lading that are to be used along their lines within the limits of the province of Quebec. 1919, c. 68, s. 348.

*Carrying Dangerous Commodities.*

Dangerous goods.

**349.** No passenger shall carry, nor except in conformity with any order or regulation made by the Board in that behalf, shall the company be required to carry upon its railway, gunpowder, dynamite, nitroglycerine, or any other goods which are of a dangerous or explosive nature.

Nature must be marked outside.

2. Every person who sends by the railway any such goods shall distinctly mark their nature on the outside of the package containing the same, and otherwise give notice in writing to the station agent or employee of the company whose duty it is to receive such goods and to whom the same are delivered. 1919, c. 68, s. 349.

Carrying regulated by Board.

**350.** The company shall not carry any goods of an explosive or dangerous nature except in conformity with the regulations made by the Board in that behalf.

Suspected parcels.

2. The company may refuse to take, except in conformity with any order or regulation made by the Board in that behalf, any package or parcel which it suspects to contain goods of an explosive or dangerous nature, or may require the same to be opened to ascertain the fact. 1919, c. 68, s. 350.

*Carrying His Majesty's Mail and Forces.*

Carriage of mails, troops, equipment, etc.

**351.** His Majesty's mail, His Majesty's naval or military forces or militia, and all artillery, ammunition, provisions or other stores for their use, and all policemen, constables or others travelling on His Majesty's service,

R.S., 1927.

120428

shall, at all times, when required by the Postmaster General of Canada, the Minister or Deputy Minister of National Defence, or any person having the superintendence and command of any police force, respectively, be carried on the railway, and with the whole resources of the company if required, on such terms and conditions and under such regulations as the Governor in Council makes. 1919, c. 68, s. 351.

Regulations.

*Checking Passengers' Baggage.*

Company to affix checks.

**352.** A check shall be affixed by the company to every parcel of baggage, having a handle, loop or suitable means for attaching a check thereupon, delivered by a passenger to the company for transport; and a duplicte of such check shall be given to the passenger delivering the same.

Excess baggage.

2. In the case of excess baggage the company shall be entitled to collect from the passenger, before affixing any such check, the toll authorized under this Act. 1919, c. 68, s. 352.

*Passenger Employees to wear Badges.*

Not entitled to exercise office without badge.

**353.** Every employee of the company employed in a passenger train or at a passenger station shall wear upon his hat or cap a badge which shall indicate his office, and he shall not, without such badge, be entitled to demand or receive from any passenger any fare or ticket, or to exercise any of the powers of his office, or to interfere with any passenger or his baggage or property. 1919, c. 68, s. 353.

*Passengers refusing to pay Fare.*

Expulsion.

**354.** Every passenger who refuses to pay his fare or produce and deliver up his ticket upon the request of the conductor may, by the conductor of the train and the train servants of the company, be expelled from and put out of the train, with his baggage, at any usual stopping place: Provided that the conductor shall first stop the train and use no unnecessary force. 1919, c. 68, s. 354.

*Collection of Tolls.*

May be enforced in any court.

**355.** In case of refusal or neglect of payment on demand of any lawful tolls, or any part thereof, the same shall be recoverable in any court of competent jurisdiction. 1919, c. 68, s. 355.

Seizure and sale of goods subject to tolls.

**356.** The company may, instead of proceeding as aforesaid for the recovery of such tolls, seize the goods for or in respect whereof such tolls are payable, and may

R.S., 1927.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120429

detain the same until payment thereof, and in the meantime the said goods shall be at the risk of the owners thereof.

Sale of goods.

2. If the tolls are not paid within six weeks, and, where the goods are perishable goods, if the tolls are not paid upon demand, or such goods are liable to perish while in the possession of the company by reason of delay in payment or taking delivery by the consignee, the company may advertise and sell the whole or any part of such goods, and, out of the money arising from such sale, retain the tolls payable and all reasonable charges and expenses of such seizure, detention and sale.

Application of proceeds.

Surplus.

3. The company shall pay or deliver the surplus, if any, or such of the goods as remain unsold, to the person entitled thereto and may recover the deficiency, if any, by action in any court of competent jurisdiction. 1919, c. 68, s. 356.

Unclaimed goods.

**357.** If any goods remain in possession of the company unclaimed for the space of twelve months, the company may thereafter, and on giving public notice thereof by advertisement for six weeks in the official gazette of the province in which such goods are, and in such other newspapers as it deems necessary, sell such goods by public auction, at a time and place which shall be mentioned in such advertisement, and, out of the proceeds thereof, pay such tolls and all reasonable charges for storing, advertising and selling such goods.

Sale.

Proceeds.

Balance.

2. The balance of the proceeds, if any, shall be kept by the company for a further period of three months, to be paid over to any person entitled thereto.

If unclaimed.

3. In default of such balance being claimed before the expiration of the period last aforesaid, the same shall be deposited with the Minister of Finance for the public uses of Canada.

Limitation of time for claim.

4. Such balance may be claimed by the person entitled thereto at any time within six years from the date of such deposit. 1919, c. 68, s. 357.

*Traffic by Water.*

When Act applies to.

**358.** The provisions of this Act shall, in respect of tolls, tariffs and joint tariffs, so far as deemed applicable by the Board, extend and apply to the traffic carried by any railway company by sea or by inland water, between any ports or places in Canada, if the company owns, charters, uses, maintains or works, or is a party to any arrangement for using, maintaining or working vessels for carrying traffic by sea or by inland water between any such ports or places. 1919, c. 68, s. 358.

120430

*Tolls and Traffic on Bridges and Tunnels.*

Provisions apply to:

**359.** The provisions of this Act in respect of tolls, tariffs and traffic shall, in so far as the Board deems them applicable, extend and apply to

Bridge or tunnel company;

(*a*) any company which has power under any Special Act to construct, maintain and operate any bridge or tunnel for railway purposes, or for railway and traffic purposes, and to charge tolls for traffic carried over, upon or through such structure by any railway; and

Traffic.

(*b*) the traffic so carried over, upon or through such structure. 1919, c. 68, s. 359.

EXPRESS BUSINESS.

*Express Tolls and Tariffs.*

Approval of tolls.

**360.** All express tolls shall be subject to the approval of the Board.

Powers of Board.

2. The Board may disallow any express tariff or any portion thereof which it considers unjust or unreasonable, and shall have and may exercise all such powers with respect to express tolls and such tariffs as it has or may exercise under this Act with respect to freight tolls and freight tariffs; and all the provisions of this Act applicable to freight tolls and freight tariffs, in so far as such provisions are applicable and not inconsistent with the provisions of this section and the five next following sections, shall apply to express tolls and tariffs. 1919, c. 68, s. 360.

Application of Act.

Tariff of tolls.

**361.** Tariffs of such express tolls shall be filed with the Board and shall be in such form, size and style and give such information, particulars and details as the Board, from time to time, by regulation or by order in any particular case, prescribes. 1919, c. 68, s. 361.

Goods not to be carried until tariff is filed, or after disallowance.

**362.** No company shall carry or transport any goods by express, unless and until the tariff of express tolls therefor or in connection therewith has been submitted to and filed with the Board in the manner hereinbefore provided; or in the case of competitive tariffs, unless such tariffs are filed in accordance with the rules and regulations of the Board made in relation thereto; or in any case where such express toll in any tariff has been disallowed or suspended by the Board. 1919, c. 68, s. 362.

Tolls not to be charged until filed and approved.

**363.** No express toll shall be charged in respect of which there is default in such filing, or which is disallowed or suspended by the Board. 1919, c. 68, s. 363.

*Board may define Carriage by Express.*

Board may define carriage by express.

**364.** The Board may by regulation, or in any particular case, prescribe what is carriage or transportation of goods by express, or whether goods are carried or transported by express within the meaning of this Act, and may order that all such goods as the Board may think proper shall be carried by express. 1919, c. 68, s. 364.

*Contracts Limiting Liability of Express Companies.*

Conditions limiting liability to be approved by Board.

**365.** No contract, condition, by-law, regulation, declaration or notice made or given by any company or any person or corporation charging express tolls impairing, restricting or limiting the liability of such company, person or corporation with respect to the collecting, receiving, caring for or handling of any goods for the purpose of sending, carrying or transporting them by express, or for or in connection with the sending, carrying, transporting or delivery by express of any goods, shall have any force or effect unless first approved by order or regulation of the Board.

Regulation of carriage by express.

2. The Board may in any case or by regulation

(*a*) determine the extent to which the liability of such company, person or corporation may be so impaired, restricted or limited; and

(*b*) prescribe the terms and conditions under which goods may be collected, received, cared for or handled for the purpose of sending, carrying or transporting them by express, or under which goods may be sent, carried, transported or delivered by express by any such company, person or corporation. 1919, c. 68, s. 365.

*Returns by Companies Charging Express Tolls.*

Annual return by company.

**366.** Every company and every person and corporation charging express tolls shall make to the Board an annual return of its capital, business and working expenditure, and such other information and particulars, including a statement of unclaimed goods, as the Board directs.

Form, etc., of return.

2. Such return shall be made in such form, covering such period, and at such time, and shall be published in such manner, as the Board from time to time directs. 1919, c. 68, s. 366.

TELEGRAPHS, TELEPHONES, POWER AND ELECTRICITY.

*Telegraphs and Telephones on Railway for Railway Purposes.*

Telegraph and telephone lines.

**367.** The railway company may, as incidental to and as part of its undertaking, construct and operate telegraph and telephone lines upon its railway for the purposes of its undertaking.

120432

Arrangements with other companies.

2. The railway company may, for the purpose of operating such lines or exchanging and transmitting messages, enter into contracts with any companies having telegraph or telephone powers, and may connect its own lines with the lines of any such companies, or may lease its own lines to any such companies.

Part II of Telegraphs Act to apply.

3. Part II of the Telegraphs Act shall apply to the telegraphic business of the railway company. 1919, c. 68, s. 367.

*Special Powers of Railway Companies.*

Electric and other power.

**368.** Whenever in any Special Act passed after the seventh day of July, one thousand nine hundred and nineteen, it is stated or provided that a railway company shall have power to acquire, transmit and distribute electric and other power or energy, such company, subject to the provisions of this Act, may for the purposes of its undertaking acquire, but not by expropriation, electric and other power or energy, and transmit and deliver the same to any place in the municipalities through which the railway is built, and receive, transform, transmit, distribute and supply such power or energy in any form; and may dispose of the surplus thereof, and collect rates and charges therefor, but no such rate or charge shall be demanded or taken until it has been approved of by the Board, and the Board may revise such rates and charges whenever it deems proper. 1919, c. 68, s. 368.

Telegraphs and telephones.

**369.** Whenever in any Special Act passed after the seventh day of July, one thousand nine hundred and nineteen, it is stated or provided that a railway company shall have power to transmit telegraph and telephone messages for the public and collect tolls therefor, such company may, subject to the provisions of this Act, construct and operate telegraph and telephone lines upon its railway, and establish offices for and undertake the transmission of messages for the public, and collect tolls therefor; and for the purpose of operating such lines or exchanging or transmitting messages, may, subject to the provisions of this Act, enter into contracts with any companies having telegraph or telephone powers and may connect its own lines with the lines of, or may lease its own lines to, any such companies.

Tolls subject to Act.

2. No toll or charge shall be demanded or taken for the transmission of any message or for leasing or using the telegraphs or telephones of such company except in accordance with section three hundred and seventy-six of this Act, and the said company and its said business and works

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120433

works shall in all respects be subject to the provisions of the said section.

Part II of Telegraph Act to apply.

3. Part II of the Telegraphs Act, except such portions thereof as are inconsistent with this Act, shall apply to the telegraphic business of such company. 1919, c. 68, s. 369.

Control of municipality.

**370.** No power conferred as in the last two preceding sections mentioned and nothing in the said sections or in the Telegraphs Act, shall authorize such company to construct or operate any line along any highway or public place, without first obtaining the consent, expressed by by-law, of the municipality having jurisdiction over such highway or public place, nor without complying with any terms stated or provided for in such by-law, or authorize such company to sell, dispose of or distribute power or energy within or for use within the limits of any municipality, without the consent, expressed by by-law, of such municipality. 1919, c. 68, s. 370.

*Telephone Connection with Railway Stations.*

Municipal and other systems, connection with stations, etc.

**371.** Whenever any province, municipality, corporation or incorporated company has authority to construct, operate and maintain a telephonic system in any district, and is desirous of obtaining telephonic connection or communication with or within any station or premises of a railway company in such district, and cannot agree with such company with respect thereto, such province, municipality, corporation or incorporated company may apply to the Board for leave therefor.

Board may order upon terms.

2. The Board may also upon the application of any interested party authorize any telephone company operated by any province, municipality or incorporated company to instal at its own expense telephone connection with any station of the company, the annual charge, if any, to be paid by the company for such service and all other terms or conditions connected therewith to be such as the Board may determine, having regard to all local conditions, but in no case is such charge to exceed the customary local rate.

Contracts giving exclusive privileges not to be taken into consideration.

3. Notwithstanding anything in any Act contained, the Board, in determining the terms or compensation upon which any such connection or communication is to be provided for, shall not take into consideration any contract, lease or agreement now or hereafter in force by which the railway company has given or gives any exclusive or other privilege to any company or person, other than the applicant, with respect to any such station or premises. 1919, c. 68, s. 371.

120434

*Putting Wires Across Railways or Other Wires.*

Leave of Board.

**372.** Lines, wires, other conductors, or other structures or appliances for telegraphic or telephonic purposes, or for the conveyance of power or electricity for other purposes, shall not, without leave of the Board, except as provided in subsection five of this section, be constructed or maintained

(*a*) along or across a railway, by any company other than the railway company owning or controlling the railway; or

(*b*) across or near other such lines, wires, conductors, structures or appliances, which are within the legislative authority of the Parliament of Canada.

Plans to be submitted.

2. Upon any application for such leave, the applicant shall submit to the Board a plan and profile of the part of the railway or other work proposed to be affected, showing the proposed location and the proposed works.

Powers of Board.

3. The Board may grant the application and may order the extent to which, by whom, how, when, on what terms and conditions, and under what supervision, the proposed works may be executed.

Authority for works.

4. Upon such order being made the proposed works may be constructed and maintained subject to and in accordance with such order.

When leave not required.

5. Leave of the Board under this section shall not be necessary for the exercise of the powers of a railway company under section three hundred and sixty-seven of this Act, nor for the maintenance of works now authorized, nor when works have been or are to be constructed or maintained by consent and in accordance with any general orders, regulations, plans or specifications adopted or approved by the Board for such purposes. 1919, c. 68, s, 372.

*Putting Lines or Wires Across or Along Highways, etc.*

Lines and wires on highways and public places.

**373.** Subject to the provisions of this section, any company empowered by Special Act or other authority of the Parliament of Canada to construct, operate and maintain telegraph or telephone lines, may, for the purpose of exercising the said powers, enter upon, and, as often as the company thinks proper, break up and open any highway, square or other public place, provided always that

Conditions.

Travel and access.

(*a*) such company shall not interfere with the public right of travel, or in any way obstruct the entrance to any door or gateway or free access to any building;

Height of wires.

(*b*) in cities, towns and incorporated or police villages such company shall not permit any wire to be less than twenty-two feet, or less than any greater height which the Board may direct, above such highway or public place; nor shall it in any municipality permit

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120435

any wire which crosses any highway or public place to be less than eighteen feet, or less than any greater height the Board may direct, above such highway or public place; nor shall it permit any wire which crosses or is adjacent to any private way, entrance or lane used for vehicular traffic to be less than seventeen feet or less than any greater height the Board may direct above such private way, entrance or lane; or erect more than one line of poles along any highway;

Poles. (*c*) all poles shall be as nearly as possible straight and perpendicular, and shall, in cities and towns, be painted;

Trees. (*d*) such company shall not unnecessarily nor without giving at least ten days previous notice to the owner thereof or to the municipality, nor in any case where forbidden by the Board, cut down or mutilate any shade, fruit or ornamental trees, but the Board may when it deems proper dispense with such notice and may in any case make any order or direction it deems fit respecting such trees;

Supervision. (*e*) the opening up of any street, square, or other public place for the erection of poles, or for the carrying of wires under ground, shall be subject to the supervision of such persons as the municipal council may appoint, and such street, square or other public place shall,

Restoration. without any unnecessary delay, be restored, as far as possible, to its former condition;

Where necessary to cut wires or remove poles. (*f*) if for the purpose of removing buildings, or in the exercise of the public right of travel, it is necessary that the said wires or poles be temporarily removed by cutting or otherwise, such company shall, at its own expense, upon reasonable notice in writing from any person requiring it, remove such wires and poles; and in default of such company so doing such person may remove such wires and poles at the expense of such company;

Damage. (*g*) such company shall be responsible for all unnecessary damage which it causes in carrying out, maintaining or operating any of its said works;

Wires cut in case of fire. (*h*) such company shall not be entitled to damages on account of its poles or wires being cut by direction of the officer in charge of the fire brigade at any fire, if, in the opinion of such officer, it is advisable that such poles or wires be cut;

Workmen to wear badges. (*i*) every person employed upon the work of erecting or repairing any line or instrument of such company shall have conspicuously attached to his dress a badge, on which are legibly inscribed the name of such company and a number by which he can be readily identified.

120436

Consent of municipality. 2. Notwithstanding anything in any Act of the Parliament of Canada or of the legislature of any province, or any power or authority heretofore or hereafter conferred thereby or derived therefrom, no telegraph or telephone line, within the legislative authority of the Parliament of Canada, shall except as hereinafter in this section provided, be constructed by any company upon, along or across any highway, square or other public place, without the legal consent of the municipality having jurisdiction over such highway, square or public place.

Leave of Board. 3. If any company cannot, in respect of any such line, obtain such consent from such municipality, or cannot obtain such consent otherwise than subject to terms and conditions not acceptable to the company, such company may apply to the Board for leave to exercise such powers, and upon such application shall submit to the Board a plan of such highway, square or other public place showing the proposed location of such lines, wires and poles.

Powers of Board. 4. The Board may refuse or may grant such application in whole or in part, and may change or fix the route of such lines, wires or poles, and may by order impose any terms, conditions or limitations in respect of the application which it deems expedient, having due regard to all proper interests.

Exercise of powers. 5. Upon such order being made, and subject to any terms imposed by the Board, such company may exercise such powers in accordance with such order, and shall in the performance and execution thereof, or in the repairing, renewing or maintaining of such lines, wires or poles, conform to and be subject to the provisions of subsection one of this section, except in so far as the said provisions are expressly varied by order of the Board.

Putting wires underground, etc. 6. Notwithstanding any power or authority heretofore or hereafter conferred upon any company by or under any Act of the Parliament of Canada, or of the legislature of any province, or any other authority, the Board, upon the application of the municipality, and upon such terms and conditions as the Board may prescribe, may order any telegraph or telephone line, within the legislative authority of the Parliament of Canada, in any city or town, or any portion thereof, to be placed underground, and may in any case order any extension or change in the location of any such line in any city or town, or any portion thereof, and the construction of any new line, and may abrogate the right of any such company to construct or maintain, or to operate, or continue, any such line, or any pole or other works belonging thereto, except as directed by the Board; and where such a line or lines within the legislative authority of the Parliament of Canada and such a line or

Joint order of Board and provincial commission.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120437

lines within the legislative authority of a province, run through or into the same city or town, and such municipality is desirous of having any such lines placed underground, and there exists in such province a provincial commission, public utilities or other board or body having power to order such a line within the legislative authority of such province to be placed underground, the Board and such provincial commission, or public utilities board or body, may by joint session or conference, or by joint board, order any such lines within such city or town, or any portion thereof, to be placed underground, and abrogate any right to carry the same on poles, and the provisions of subsection three of section two hundred and fifty-three of this Act, with the necessary adaptation, shall apply to every such case.

Existing lines.

7. Except as provided in the last preceding subsection, nothing in this section shall affect the right of any telegraph or telephone company to operate, maintain, renew or reconstruct underground or overhead systems or lines, heretofore constructed.

Provisions in special Acts, etc.

8. Nothing in this section shall authorize, or give power to authorize, any company to construct or operate any line or works along any highway or public place without the consent of the municipality having jurisdiction thereover in any case where

(*a*) the Special Act applying to such company requires such consent; or

(*b*) the provisions of section three hundred and sixty-eight, three hundred and sixty-nine or three hundred and seventy apply to such company and require such consent;

and where such consent is so required the provisions respecting the same shall be complied with. 1919, c. 68, s. 373.

*Price and Supply of Certain Power.*

In disputes between lessee of water-power and applicant for electricity Board may fix price.

**374.** In any case where water-power has been acquired under lease from the Crown for the development of electrical energy, and the lessee from the Crown of such water-power and the applicant for the purchase of electrical energy so developed cannot agree as to the quantity to be sold by the lessee to the applicant, and the price to be paid by the applicant to the lessee for such quantity, or either, as the case may be, the Board shall determine and fix the quantity and the price to be paid therefor, or either, as the case may be, and the lessee shall sell, supply and furnish, if the applicant shall then require it, such quantity, and at the price so determined and fixed, as the case may be.

120438

Powers of Board for such purpose.

2. For the purpose of determining and fixing such quantity or such price, the Board may enter on and inspect the property leased from the Crown and all erections and machinery thereon, and may examine all papers, documents, vouchers, records and books of every kind, and may order and require the lessee and any other person to attend before the Board and be examined on oath and to produce all papers, documents, vouchers, records and books of every kind; and for the purpose aforesaid, the Board shall have all such powers, rights and privileges as are vested in a superior court.

Application of section limited.

3. This section shall not apply to any case where the water-power leased from the Crown, has been acquired for, and is used in the development of electrical energy for the direct and immediate industrial or manufacturing operations of the lessee. 1919, c. 68, s. 374.

*Provisions Governing Telegraphs and Telephones.*

Interpretation.

**375.** In this section, unless the context otherwise requires,

"Company."

(*a*) "company" means a railway company or person authorized to construct or operate a railway, having authority to construct or operate a telegraph or telephone system or line, and to charge telegraph or telephone tolls, and includes also telegraph and telephone companies and every company and person within the legislative authority of the Parliament of Canada having power to construct or operate a telegraph or telephone system or line and to charge telegraph or telephone tolls;

"Special Act."

(*b*) "Special Act" means any Act under which the company has authority to construct or operate a telegraph or telephone system or line, or which is enacted with special reference to any such system or line, and any letters patent constituting a company's authority to construct or operate a telegraph or telephone system or line, granted under any Act, and the Act under which such letters patent were granted, and includes the Telegraphs Act and any general Act relating to telegraphs or telephones.

Tolls subject to approval.

2. Notwithstanding anything in any Act passed before the seventh day of July, one thousand nine hundred and nineteen, all telegraph and telephone tolls to be charged by the company, and all charges for leasing or using the telegraphs or telephones of the company, shall be subject to the approval of the Board, and may be revised by the Board from time to time: Provided that the provisions of this subsection shall not apply to the use of telegraph or telephone wires where no toll is charged to the public.

Exception private wires.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120439

Filing of tariffs.

3. The company shall file with the Board tariffs of any telegraph or telephone tolls to be charged, and such tariffs shall be in such form, size and style, and give such information, particulars and details, as the Board, from time to time, by regulation, or in any particular case, prescribes, and unless with the approval of the Board, the company shall not charge and shall not be entitled to charge any telegraph or telephone toll in respect of which there is default in such filing, or which is disallowed by the Board:

Proviso.

Provided that any company, previous to the first day of May, one thousand nine hundred and eight, charging telegraph or telephone tolls, may, without such filing and approval, for such period as the Board allows, charge such telegraph or telephone tolls as such company was immediately previous to the said date authorized by law to charge, unless where the Board has disallowed or disallows such tolls.

Provisions applying to tolls.

4. Such telegraph and telephone tolls may be dealt with by the Board in the same manner as is provided by this Act with respect to standard freight tariffs, and all the provisions of this Act, except as to publication under section three hundred and forty-two applicable to companies thereunder with respect to standard freight tariffs and tolls, shall in so far as they are applicable, and not inconsistent with the provisions of this section, apply to the company with respect to such telegraph and telephone tariffs and tolls.

Classification of messages.

5. The Board may permit the classification of telegraph, telephone and cable messages into such classes as it deems just and reasonable, and may permit different rates to be charged for such different classes.

Publication of tariffs.

6. The Board may, by regulation or otherwise, determine and prescribe the manner and form in which any tariff or tariffs of telegraph or telephone tolls shall be published or kept open for public inspection.

Connections with other systems, power of Board to order.

7. Whenever any company or any province, municipality or corporation, having authority to construct and operate, or to operate, a telephone system or line and to charge telephone tolls, whether such authority is derived from the Parliament of Canada or otherwise, is desirous of using any telephone system or line owned, controlled or operated by the company, in order to connect such telephone system or line with the telephone system or line operated or to be operated by such first mentioned company, or by such province, municipality or corporation for the purpose of obtaining direct communication, whenever required, between any telephone or telephone exchange on the one telephone system or line and any telephone or telephone exchange on the other telephone system or line,

120440

and cannot agree with the company with respect to obtaining such use, connection or communication, such first mentioned company or province, municipality or corporation may apply to the Board for relief, and the Board may order the company to provide for such use, connection or communication, upon such terms, including compensation if any, as the Board deems just and expedient, and may order and direct how, when, where, by whom, and upon what terms and conditions such use, connection, or communication shall be had, constructed, installed, operated and maintained.

Local conversations over competing systems.

8. No order made under the next preceding subsection shall apply to the interchange of local conversations between persons using the telephones of two competing systems or lines where such systems or lines terminate upon switch-boards located within the municipal limits of the same city, town or village, except in the case of rural party line telephones in non-competitive areas, and then only when the Board deems such interchange to be desirable and practicable.

Standards of apparatus to be considered.

9. Upon any such application the Board shall, in addition to any other consideration affecting the case, take into consideration the standards, as to efficiency and otherwise, of the apparatus and appliances of such telephone systems or lines, and shall only grant the leave applied for in case and in so far as, in view of such standards, the use, connection or communication applied for can, in the opinion of the Board, be made or exercised satisfactorily and without undue or unreasonable injury to or interference with the telephone business of the company, and where in all the circumstances it seems just and reasonable to grant the same.

Application of provisions as to joint tariff.

10. Where the telephone system or line operated by the company is used or connected, for purposes of communication as aforesaid, with the telephone system or line operated by any other company or by any such province, municipality or corporation, whether the authority of such company, province, municipality or corporation to construct and operate or to operate such telephone system or line is derived from the Parliament of Canada or otherwise, and whether such connection or communication has been previously or is hereafter established either by agreement of the parties or under an order of the Board, the provisions of this Act with respect to joint tariffs, in so far as they are applicable and not inconsistent with this section or the Special Act, shall apply to such company or companies and to such province, municipality or corporation; and the Board shall have, for the enforcement of its orders in this respect, in addition to all other powers possessed by it

Enforcement of orders.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120441

therefor, the power to order a discontinuance of such connection or communication between such different telephone systems or lines.

Working agreements to be approved by Board.

11. All contracts, agreements and arrangements between the company and any other company, or any province, municipality or corporation having authority to construct or operate a telegraph or telephone system or line, whether such authority is derived from the Parliament of Canada or otherwise, for the regulation and interchange of telegraph or telephone messages or service passing to and from their respective telegraph or telephone systems and lines, or for the division or apportionment of telegraph or telephone tolls, or generally in relation to the management, working or operation of their respective telegraph or telephone systems or lines, or any of them, or any part thereof, or of any other systems or lines operated in connection with them or either of them, shall be subject to the approval of the Board, and shall be submitted to and approved by the Board before such contract, agreement or arrangement shall have any force or effect.

Application of provisions of Act.

12. Without limitation of the generality of this subsection by anything contained in the preceding subsections, the jurisdiction and powers of the Board, and, in so far as reasonably applicable and not inconsistent with this section or the Special Act, the provisions of this Act respecting such jurisdiction and powers, and respecting proceedings before the Board and appeals to the Supreme Court or Governor in Council from the Board, and respecting offences and penalties, and the other provisions of this Act, except sections seventy-two to two hundred and seventy, two hundred and seventy-two to two hundred and eighty-two, two hundred and eighty-seven to three hundred and thirteen, three hundred and twenty-three, three hundred and forty-nine to three hundred and fifty-four, three hundred and sixty to three hundred and sixty-six, three hundred and ninety-four to four hundred and twenty-four, and four hundred and forty-nine to four hundred and fifty-seven, both inclusive in each case, shall extend and apply to all companies as in this section defined, and to all telegraph and telephone systems, lines and business of such companies within the legislative authority of the Parliament of Canada; and in and for the purposes of such application

Interpretation. "Company." "Railway."

(*a*) "company" or "railway company" shall mean a company as in subsection one of this section defined;

(*b*) "railway" shall mean all property real and personal and works forming part of or connected with the telegraph or telephone system or line of the company;

120442

(*c*) "Special Act" shall mean a Special Act as in subsection one of this section defined; "Special Act."

(*d*) "toll" or "rate" shall mean telegraph or telephone toll; "Toll." "Rate."

(*e*) "traffic" shall mean the transmission of and other dealings with telegraphic and telephonic messages. 1919, c. 68, s. 375. "Traffic."

*Marine Electric Telegraphs or Cables.*

Marine telegraphs and cables, when Act to apply to.

**376.** After this section is brought into effect, the last preceding section of this Act shall extend and apply to marine electric telegraphs or cables; and

(*a*) "telegraph" in the said section, unless the context otherwise requires, shall include marine electric telegraph or cable; "Telegraph."

(*b*) "telegraph toll" in the said section, unless the context otherwise requires, shall include any toll, rate or charge to be charged by the company to the public or to any person for the transmission of messages by any marine electric telegraph or cable system whereby messages are transmitted from, to or through Canada; "Telegraph toll."

(*c*) "traffic" in the interpretation provided for by subsection twelve of the said section, and as the application of the said section is extended by the coming into force of this section, shall include messages transmitted from Canada to any other country by means of any marine electric telegraph or cable line; or to Canada from any other country by the like or similar means; or through, or into, or from any part of Canada by means of any marine electric telegraph or cable lines acting in conjunction with land lines or by land lines acting in conjunction with marine electric telegraph or cable lines, by means of a through route or otherwise. "Traffic."

Four months to obtain approval of tariffs.

2. Every company to which this section applies shall have four months after this section comes into force within which to file and obtain approval of its tariffs and tolls; but the Board may, upon application and upon good and sufficient ground being shown, extend such time to a period not exceeding one year, including the said four months.

Coming into force.

3. This section shall come into force upon similar provision being made by the proper authority in Great Britain, and upon proclamation of the Governor in Council. 1919, c. 68, s. 376.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120443

*Government Use and Construction of Telegraphs and Telephones.*

Government may have exclusive use.

**377.** Every railway, telegraph and telephone company shall, when required so to do by the Governor in Council, or any person authorized by him, place at the exclusive use of the Government of Canada any electric telegraph and telephone lines, and any apparatus and operators which it has.

Compensation.

2. Such company shall thereafter be entitled to receive reasonable compensation for such service. 1919, c. 68, s. 377.

Government may erect wires on railway.

**378.** The Governor in Council may, at any time, cause a line or lines of electric telegraph or telephone to be constructed along the line of any railway, for the use of the Government of Canada, and for that purpose, may enter upon and occupy so much of the lands of the company as is necessary for the purpose. 1919, c. 68, s. 378.

STATISTICS AND RETURNS.

Annual returns.

**379.** Every railway, telegraph, telephone and express company and every carrier by water shall annually prepare returns, in accordance with the forms and classifications for the time being required by the Board, of its capital, traffic and working expenditure and of all other information required.

Attestation.

2. Such returns shall be dated and signed by and attested upon the oath of the secretary, or some other chief officer of the company or carrier by water, and shall also be attested upon the oath of the president, or in his absence, of the vice-president or manager of the company or carrier by water, or shall be signed and attested by such other person or persons as the Board may direct.

Period included.

3. Such returns shall be made for the period beginning from the date to which the then last yearly returns made by the company or carrier by water extend, or if no such returns have been previously made, from the commencement of the operation of the railway, or other works, or undertaking, and ending with the last day of December in the year, or other interval, for which the returns are to be made, or with such other date as the Board may direct.

Duplicate for Dominion Statistician.

4. A duplicate copy of such returns, dated, signed and attested in manner aforesaid, shall be forwarded by such company to the Dominion Statistician within one month after the first day of February in each year, or within one month after any other date directed by the Board under the last preceding subsection. 1919, c. 68, s. 379.

120444

Traffic returns monthly.

**380.** Every railway, telegraph, telephone and express company and every carrier by water, if required by the Board so to do, shall prepare returns of its traffic monthly, that is to say, from the first to the close of the month inclusive.

Form.

2. Such returns shall be in accordance with the forms for the time being required by the Board.

Copy to Statistician.

3. A copy of such returns, signed by the officer of the company or carrier responsible for the correctness of such returns, shall be forwarded by the company or carrier to the Dominion Statistician within seven days from the day to which the said returns have been prepared.

Extension of time.

4. The Board may in any case extend the time within which such returns shall be forwarded. 1919, c. 68, s. 380.

Annual returns of accidents showing—

**381.** Every railway, telegraph, telephone and express company and every carrier by water shall annually, or more frequently if the Board so requires, make to the Board, under the oath of the president, secretary or superintendent of the company, or carrier, or of such other person as the Board may direct, a true and particular return of all accidents and casualties, whether to persons, or to animals or other property, which have occurred on the property or in connection with the operation of the undertaking of the company, or carrier, setting forth

Causes and nature.

(*a*) the causes and nature of such accidents and casualties;

Locality and time.

(*b*) the points at which such accidents and casualties occurred, and whether by night or by day; and

Extent and particulars.

(*c*) the full extent of such accidents and casualties and all the particulars thereof.

Period for which returns made.

2. Such returns shall be made for the period beginning from the date to which the then last yearly returns made by the company or carrier extend, or if no such returns have been previously made, from the commencement of the operation of the railway, or undertaking, and ending with the last day of December in the then current year.

Copies of returns.

3. A duplicate copy of such returns, dated, signed and attested in manner aforesaid, shall be forwarded by such company or carrier to the Dominion Statistician within one month after the first day of February in each year.

Copies of by-laws.

4. Every such company and every carrier by water shall also, when required by the Board return a true copy of the existing by-laws of the company, or carrier, and of its rules and regulations for the management of the company or carrier, and of its railway, or of such other undertaking or business as it is authorized to carry on.

Form.

5. The Board may order and direct the form in which such returns shall be made up. 1919, c. 68, s. 381.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120445

Board may require further returns as to accidents.

**382.** The Board may order and direct any railway company to make up and deliver to the Board, from time to time, in addition to the said periodical returns, returns of serious accidents occurring in the course of the public traffic upon the railway belonging to such company, whether attended with personal injury or not, in such form and manner as the Board deems necessary and requires for their information with a view to public safety. 1919, c. 68, s. 382.

Returns privileged.

**383.** All returns made in pursuance of any of the provisions of the four sections of this Act last preceding shall be privileged communications, and shall not be evidence in any court whatsoever, except in any prosecution for

Exceptions.

(*a*) default in making such returns in accordance with the requirements of this Act;

(*b*) perjury in making any oath required by this Act in connection with such returns;

(*c*) forgery of any such return; or

(*d*) signing any such return knowing the same to be false. 1919, c. 68, s. 383.

*To the Board.*

Board may require returns.

**384.** The Board may, from time to time, by notice served upon any railway, telegraph, telephone or express company or any officer, servant or agent of such company, require it, or such officer, servant or agent, to furnish the Board, at or within any time stated in such notice, a written statement or statements showing in so far, and with such detail and particulars, as the Board requires

Assets and liabilities.

(*a*) the assets and liabilities of such company;

Stock.

(*b*) the amount of its stock issued and outstanding, and the date at which any such stock was so issued;

Consideration for stock.

(*c*) the amount and nature of the consideration received by such company for such issue, and, in case the whole of such consideration was not paid to such company in cash, the nature of the service rendered to or property received by such company for which any stock was issued;

Earnings and expenditures.

(*d*) the gross earnings or receipts or expenditure by such company during any periods specified by the Board, and the purposes for which such expenditure was made;

Bonuses and subsidies.

(*e*) the amount and nature of any bonus, gift, or subsidy, received by such company from any source whatsoever; and the source from which, and the time when, and the circumstances under which, the same was so received or given;

Bonds.

(*f*) the bonds issued at any time by such company, and what portion of the same are outstanding and what portion, if any, have been redeemed;

120446

Consideration.

(*g*) the amount and nature of the consideration received by such company for the issue of such bonds;

Liabilities.

(*h*) the character and extent of any liabilities outstanding chargeable upon the property or undertaking of such company, or any part thereof, and the consideration received by such company for any such liabilities, and the circumstances under which the same were created;

Cost of construction.

(*i*) the cost of construction of such company's railway or other works or any part thereof;

Cost of property.

(*j*) the amount and nature of the consideration paid or given by such company for any property acquired by it;

Leases and contracts.

(*k*) the particulars of any lease, contract or arrangement entered into between such company and any other company or person; and

Generally.

(*l*) generally, the extent, nature, value and particulars of the property, earnings and business of such company.

Board may require attendance and production.

2. The Board may summon, or require the attendance of and examine under oath, any officer, servant or agent of such company, or any other person, as to any matters included in such return, or which were required by notice aforesaid to be returned to the Board, and as to any matter or thing which, in the opinion of the Board, is relevant to such return, or to any inquiry which the Board deems it expedient to make in connection with any of the matters in this section aforesaid; and for such purposes may require the production to the Board of any books or documents in control of such company, or such officer, servant, agent or person.

Information for use of Board only.

3. Any information furnished to the Board by any such return, or any evidence taken by the Board in connection therewith, shall not be open to the public, or published, but shall be for the information of the Board only.

And Governor in Council.

4. The Governor in Council may nevertheless require the Board to communicate to him in Council any or all information obtained by it in the manner aforesaid.

Board may make information public on notice to company.

5. The Board may authorize any part of such information to be made public when, and in so far as, there may appear to the Board to be good and sufficient reasons for so doing: Provided that if the information so proposed to be made public by the Board, is of such character that such company would, in the opinion of the Board, be likely to object to the publication thereof, the Board shall not authorize such information to be published without notice to such company and hearing any objection which such company may make to such publication. 1919, c. 68, s. 384.

120447

ACTIONS FOR DAMAGES.

*Breach of Duty under Act.*

Damages for breach of duty under Act.

**385.** Any company which, or any person who, being a director or officer thereof, or a receiver, trustee, lessee, agent, or otherwise acting for or employed by such company, does, causes or permits to be done, any matter, act or thing contrary to the provisions of this or the Special Act, or to the orders, regulations or directions of the Governor in Council, or of the Minister, or of the Board, made under this Act, or omits to do any matter, act or thing, thereby required to be done on the part of any such company, or person, shall, in addition to being liable to any penalty elsewhere provided, be liable to any person injured by any such act or omission for the full amount of damages sustained thereby, and such damages shall not be subject to any special limitation except as expressly provided for by this or any other Act. 1919, c. 68, s. 385.

*Cattle Getting on Railway.*

Damages where animals get on railway.

**386.** When any horses, sheep, swine or other cattle, whether at large or not, get upon the lands of the company and by reason thereof damage is caused to or by such animal, the person suffering such damage shall be entitled to recover the amount of such damage against the company in any action in any court of competent jurisdiction unless the company establishes that such damage was caused by reason of

Exceptions.

Gates not kept closed.

(*a*) any person for whose use any farm crossing is furnished, or his servant or agent, or the person claiming such damage or his servant or agent, wilfully or negligently failing to keep the gates at each side of the railway closed when not in use; or

Gates wilfully left open.

(*b*) any person other than an officer, agent, employee or contractor of the company wilfully opening and leaving open any gate, on either side of the railway provided for the use of any farm crossing, without some one being at or near such gate to prevent animals from passing through the gate on to the railway; or

Fence taken down.

(*c*) any person other than an officer, agent, employee or contractor of the company taking down any part of a railway fence; or

Animals turned on railway.

(*d*) any person other than an officer, agent, employee or contractor of the company turning any such animal upon or within the enclosure of any railway, except for the purpose of and while crossing the railway in charge of some competent person using all reasonable care and precaution to avoid accidents; or

120448

Animals ridden, etc., on railway.

(*e*) any person other than an officer, agent, employee or contractor of the company, except as authorized by this Act, without the consent of the company, riding, leading or driving any such animal or wilfully suffering the same to enter upon any railway, and within the fences, guards and gates thereof.

Animals killed or injured at highway crossing.

2. Where any such animal, by reason of being at large within half a mile of the intersection of a highway with any railway at rail level contrary to the provisions of section two hundred and seventy-eight, is killed or injured by any train at such point of intersection, the owner of such animal shall not have any right of action against any company in respect of the same being so killed or injured; but contravention of the said section shall not in any other case, nor shall the fact that the company is not guilty of any negligence or breach of duty, prevent any person from recovering damage from the company under this section.

Penalty not affected.

3. Nothing in this section shall be construed as relieving any person from the penalties imposed by section four hundred and six of this Act. 1919, c. 68, s. 386.

*Fires from Locomotives.*

Liability for fire caused by locomotive.

**387.** Whenever damage is caused to any property by a fire started by any railway locomotive, the company operating the railway on which the locomotive is being used, whether guilty of negligence or not, shall be liable for such damage and may be sued for the recovery of the amount of such damage in any court of competent jurisdiction.

If modern appliances have been used.

2. If it be shown that the company has used modern and efficient appliances, and has not otherwise been guilty of any negligence, the total amount of compensation recoverable from the company under this section in respect of any one or more claims for damage from a fire or fires started by the same locomotive and upon the same occasion, shall not exceed five thousand dollars.

Insurance.

3. If there is any insurance existing on the property destroyed or damaged, where the company has used modern and efficient appliances and has not otherwise been guilty of negligence, the total amount of damages sustained by any claimant in respect of the destruction or damage of such property shall, for the purposes of this section, be reduced by the amount received or recoverable by or for the benefit of such claimant in respect of such insurance.

No action.

4. No action shall lie against the company by reason of anything in any such policy of insurance.

Limitation.

5. In any action or proceeding under this section the limitation of two years hereinafter prescribed shall begin to run from the date of final judgment in any action brought by

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120449

by the assured to recover such insurance money, or in the case of settlement, from the date of the receipt of such money by the assured, as the case may be.

*Pro rata* apportionment.

6. Where the amount recoverable from the company is limited to such five thousand dollars and such sum is not sufficient to pay all the claims in full, it shall be apportioned among the claimants *pro rata* according to the claims established.

Determination of claims by judge.

7. Where it is made to appear that the total amount of the claims may exceed the said sum, a judge of any superior court of competent jurisdiction may make such order as he deems fit for the proper determination and adjustment of all such claims and of the liability of the company, and if he deems proper, may stay or consolidate any action or actions, and may direct advertisement for such claims and filing and adjudication thereof in such manner and before such tribunal, officer or person as he deems fit, and may order that after such advertisement or notice as he directs all claims not filed and established as directed shall thereafter be barred; and the costs of any such proceedings shall be paid as such judge directs.

Costs.

Restrictions.

8. Except under or in pursuance of such an order, the company shall not be entitled to have any action under this section stayed or the amount recoverable therein lessened because of the limitation of its liability to five thousand dollars as aforesaid, nor shall any payment made by the company to any claimant otherwise than under or in pursuance of such an order prejudice the right of any other claimant to receive his due proportion of such five thousand dollars.

Exception.

9. Nothing in the last two preceding subsections shall prevent or prejudice any action or claim against the company for failure to use modern and efficient appliances or for other negligence.

Insurable interest in property.

10. The company shall have an insurable interest in all property upon or along its route, for which it may be held liable to compensate the owners for loss or damage by fire caused by a railway locomotive, and may procure insurance thereon in its own behalf. 1919, c. 68, s. 387.

*Failure to Equip Trains Properly.*

Failure to equip trains properly.

**388.** Every company which fails to comply with any requirement of this Act

(*a*) with respect to providing and causing to be used on its trains modern and efficient apparatus, appliances or means, or any apparatus, appliance or means in this Act specified, for the providing of communication between the conductor and the engine driver, or for the checking of the speed of any train or the bringing

R.S., 1927.

120450

of the same expeditiously to a standstill, or for the secure coupling and connecting of the cars and the engine composing the train; or

Box freight cars.

(*b*) with respect to equipping its box freight cars, for the security of its employees, with outside ladders and hand-grips, or if the Board so requires, with any other improved side attachment required by the Board; or

Draw bars

(*c*) with respect to adopting and using upon its rolling stock draw bars of a height determined by the Board;

Penalty.

shall, in addition to being liable to any penalty elsewhere provided, be liable to pay to all such persons as are injured by reason of the non-compliance with such requirements, or to their representatives, such damages as they are legally entitled to, notwithstanding any agreement to the contrary with regard to any such person, unless such agreement is authorized by the law of the province in which it is made and by regulation of the Board. 1919, c. 68, s. 388.

*Infraction of Provision or Order respecting Tolls.*

Infraction of order respecting tolls.

**389.** Every company shall, in addition to any penalty in this Act provided in respect of any infraction by the company, or any officer, servant or agent of the company, of any provision of this Act, or of any order, direction, decision or regulation made or given by the Board under this Act, in respect of tolls, be liable, at the suit of any person injured by reason of any such infraction, to three times the amount of the actual damage which such person may be proved to have sustained.

Triple damages.

No action without leave of Board.

2. No action shall be commenced for the recovery of any such triple damages without the leave of the Board first being obtained. 1919, c. 68, s. 389.

*Injuries on Platform, Baggage or Freight Car.*

No claim for injuries in certain cases.

**390.** No person injured while on the platform of a car, or on any baggage, or freight car, in violation of the printed regulations posted up at the time, shall have any claim in respect of the injury, if room inside of the passenger cars, sufficient for the proper accommodation of the passengers, was furnished at the time. 1919, c. 68, s. 390.

*Limitation and Defences.*

Limitation.

**391.** All actions or suits for indemnity for any damages or injury sustained by reason of the construction or operation of the railway shall, and notwithstanding anything in any Special Act may, be commenced within two years next after the time when such supposed damage is

R.S., 1927.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120451

sustained, or if there is continuation of damage, within two years next after the doing or committing of such damage ceases, and not afterwards.

Exceptions—carriage of traffic, tolls.

2. Nothing in subsection one of this section shall apply to any action brought against the company upon any breach of contract, express or implied, for or relating to the carriage of any traffic, or to any action against the company for damages under the provisions of this Act respecting tolls.

Pleadings.

3. Notwithstanding anything in any Special Act or elsewhere contained, the pleadings in any action or suit against the company shall be governed by the law or rules of procedure of the court in which such action or suit is brought, and the company shall not, unless permitted by such law or rules, be entitled to plead the general issue.

Company not relieved by inspection, etc.

4. No inspection under or by the authority of this Act, and nothing in this Act and nothing done, ordered or directed, or required or provided for, or omitted to be done, ordered or directed or required or provided for, under or by virtue of the provisions of this Act, shall, except in so far as a compliance with the Act or with such order or direction, or requirement or provision, constitutes a justification for what would otherwise be wrongful, relieve, or be construed to relieve, any company of or from, or in any wise diminish or affect, any liability or responsibility resting upon it by law, either towards His Majesty or towards any person, or the wife or husband, parent or child, executor or administrator, tutor or curator, heir or personal representative, of any person, for anything done or omitted to be done by such company, or for any wrongful act, negligence or default, misfeasance, malfeasance, or nonfeasance, of such company. 1919, c. 68, s. 391.

OFFENCES, PENALTIES AND OTHER LIABILITY.

*Disobeying Orders of Board.*

Disobeying orders of Board.

**392.** Every company and every municipal or other corporation which neglects or refuses to obey any order of the Board made under the provisions of this Act, or any other Act of the Parliament of Canada, shall for every such offence, be liable to a penalty of not less than twenty dollars nor more than five thousand dollars.

Liability of officers of company.

2. Wherever it is proved that any company has neglected or refused to obey an order of the Board made under the provisions of this Act, or any other Act of the Parliament of Canada, the president, the vice-president, each vice-president where there are more than one, and every director and managing director of such company shall each be guilty of an offence for which he shall be liable to a penalty

120452

of not less than twenty dollars and not more than five thousand dollars, or imprisonment for any period not exceeding twelve months, or both, unless he proves that, according to his position and authority, he took all necessary and proper means in his power to obey and carry out, and to procure obedience to and carrying out of, such order and that he was not at fault for the neglect or refusal to obey the same.

Liability of officers of municipality or corporation.

3. Wherever it is proved that any municipal or other corporation has neglected or refused to obey any order of the Board made under the provisions of this Act, or any other Act of the Parliament of Canada, the mayor, warden, reeve or other head of such corporation, and every member of the council or other ruling or executive body of such corporation, shall each be guilty of an offence for which he shall be liable to a penalty of not less than twenty dollars and not more than five thousand dollars, or imprisonment for any period not exceeding twelve months, or both, unless he proves that, according to his position and authority, he took all necessary and proper means in his power to obey and carry out, and to procure obedience to and carrying out of, such order, and that he was not at fault for the neglect or refusal to obey the same.

Other liability continues.

4. Nothing in or done under this section shall lessen or affect any other liability of such company, corporation or person, or prevent or prejudice the enforcement of such order in any other way.

Prosecution.

5. No prosecution shall be had under this section except by leave or direction of the Board. 1919, c. 68, s. 392.

*Obstructing Inspecting Engineers.*

As to transmission of telegraph messages.

**393.** Every operator or officer employed in any telegraph office of the company, or under the control of the company, who neglects or refuses to obey, without unnecessary delay, all orders of any inspecting engineer for the transmission of messages shall, for every such offence, be liable on summary conviction to a penalty of forty dollars.

Penalty.

Obstructing inspecting engineer on duty.

2. Every person who wilfully obstructs any inspecting engineer in the execution of his duties shall be liable on summary conviction to a penalty not exceeding forty dollars, and, in default of payment thereof forthwith, or within such time as the convicting justice appoints, to imprisonment with or without hard labour for any term not exceeding three months. 1919, c. 68, s. 393.

Penalty.

*Purchase of Railway Securities.*

Company not to purchase.

**394.** Every director of a railway company who knowingly permits the funds of any such company to be applied either directly or indirectly in the purchase of its own stock,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120453

or in the acquisition of any shares, bonds or other securities issued by any other railway company in Canada, or in the purchase or acquisition of any interest in any such stock, shares, bonds or other securities, contrary to the provisions of this Act or the Special Act, shall incur a penalty of one thousand dollars for each such violation.

Penalty.

Separate offences.

2. The acquisition of each share, bond or other security or interest as aforesaid shall be deemed a separate violation of this section.

Recovery and application.

3. Such penalty shall be recoverable on information filed in the name of the Attorney General of Canada, and a moiety thereof shall belong to His Majesty, and the other moiety thereof shall belong to the informer. 1919, c. 68, s. 394.

*Schemes of Arrangement with Creditors.*

Failure of company to keep or sell copies.

**395.** If any railway company fails to keep at all times, at its principal or head office, printed copies of any scheme of arrangement between the company and its creditors, after such scheme has been confirmed and enrolled as provided by this Act, or to sell such copies to all persons desiring to buy them at a reasonable price, not exceeding ten cents for each copy, the company shall incur a penalty not exceeding one hundred dollars, and a further penalty not exceeding twenty dollars for every day during which such failure continues after the first penalty is incurred. 1919, c. 68, s. 395.

Penalty.

*Filing and Registry.*

Company neglecting to file.

**396.** Every railway company, which fails or neglects, within six months after the completion of the undertaking, or within six months after beginning to operate any completed part of the railway, as the case may be, or within such extended or renewed period as the Board at any time directs,

Plan and profile.

(*a*) to file with the Board a plan and profile of its completed railway, or of any such part thereof as is completed and in operation, and of the land taken or obtained for the use thereof; or

Plan of lands taken.

(*b*) to file in the registry offices for the respective districts and counties, in which the parts of such railway so completed, or completed and in operation are situate, plans of the parts thereof and of the land taken or obtained for the use thereof, located in such districts and counties respectively, prepared on such a scale and in such manner, and form, and signed or authenticated in such manner, as the Board may from time to time by general regulation, or in any individual case, sanction or require;

120454

shall incur a penalty of two hundred dollars, and a like penalty for each and every month during which such failure or neglect continues. 1919, c. 68, s. 396.

Penalty.

Registrar of deeds neglecting his duty.

**397.** Every registrar of deeds with whom it is by this Act required that any plan, profile, book of reference, certified copy thereof, or other document relating to the location or construction of any railway shall be deposited, who refuses or neglects

Receiving and preserving documents.

(*a*) to receive and preserve in his office all such plans, profiles, books of reference, certified copies thereof, and other documents duly tendered to him for such deposit; or

Endorsements.

(*b*) to endorse thereon the day, hour and minute when the same were so deposited; or

Copies.

(*c*) to allow any person to make extracts therefrom and copies thereof as occasion requires, upon payment of the fees in that behalf by this Act prescribed; or

Certificates.

(*d*) to certify, at the request of any person, in the manner and with the particulars by this Act required, copies of any such plan, profile, book of reference or document, or such portions thereof as may be required, upon being paid therefor at the rate provided by this Act;

Penalty.

shall be liable on summary conviction to a penalty of ten dollars, and also to an action for damages at the suit of any person injured by any such refusal or neglect. 1919, c. 68, s. 397.

*Removing Industrial Spurs.*

Removing industrial spurs without leave.

**398.** Any company or person who, without consent or order of the Board, removes any spur or branch line constructed under or pursuant to this Act for the purpose of affording railway facilities to, or in connection with, any industry or business established or intended to be established, shall be liable on conviction to a penalty not exceeding one thousand dollars. 1919, c. 68, s. 398.

Penalty.

*Examining Mine Workings.*

Refusing to allow examination of mine workings.

**399.** Any owner, lessee, or occupier of a mine lying under or near a railway or any of the works connected therewith, who, after the company owning or operating such railway has obtained the written permission of the Board and given twenty-four hours notice in writing in that behalf, refuses or neglects to allow any person appointed by such company for that purpose, to enter into and return from such mine or the works connected therewith and make use of any apparatus of such mine and all necessary means for discovering the distance from such railway or

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120455

works connected therewith to the parts of such mine which are being worked, in order to ascertain whether such mine is being worked or has been worked so as to injure or be detrimental to such railway or works connected therewith, or to the safety thereof or of the public, shall for every such refusal or neglect be liable on summary conviction to a penalty not exceeding one hundred dollars. 1919, c. 68, s. 399.

Penalty.

*Matters Incidental to Construction.*

Failing to comply with directions as to construction of bridges.

**400.** Every railway company which fails or neglects to comply with any direction of the Governor in Council, given upon the report of the Board, requiring such company within such time as the Governor in Council directs, to construct fixed and permanent bridges, or swing, draw or movable bridges, or to substitute any of such bridges for bridges existing on the line of the company's railway, shall, for every day after the expiration of the period so fixed, during which the company fails or neglects to comply with such direction, forfeit and pay to His Majesty the sum of two hundred dollars. 1919, c. 68, s. 400.

Penalty.

Structures not in conformity with this Act.

**401.** (*a*) If any bridge, tunnel or other erection or structure over, through or under which any railway passes is not so constructed, or reconstructed or altered, within such time as the Board may order, and thereafter so maintained, as to afford at all times an open and clear headway of at least seven feet between the top of the highest freight car used on the railway, and the lowest beams, members or portions of that part of such bridge, tunnel, erection or structure, which is directly over the space liable to be traversed by such car in passing thereunder; or

Spaces not in conformity.

(*b*) If, except by leave of the Board, the space between the rail level and such beams, members, or portions of any such structure, constructed after the first day of February, one thousand nine hundred and four, is in any case less than twenty-two feet six inches;

Penalty.

the company or owner so constructing shall incur a penalty not exceeding fifty dollars, for each day during which such company or owner wilfully refuses, neglects or omits to comply with the requirements of this Act, as to construction, reconstruction, alteration or maintenance, in this section mentioned: Provided that nothing in this section shall apply to any bridge, tunnel, erection or structure exempted by the Board from such requirements. 1919, c. 68, s. 401.

Proviso.

120456

Structures in violation of this Act.

**402.** Every company which erects, operates or maintains any bridge, approach, tunnel, viaduct, trestle, or any building, erection or structure, in violation of this Act, or of any order or regulation of the Board, shall for each offence incur a penalty of fifty dollars. 1919, c. 68, s. 402.

Penalty.

Improper use of highways.

**403.** Every railway company which, except as authorized by Special Act of the Parliament of Canada, or amendment thereof, passed previously to the twelfth day of March, one thousand nine hundred and three,

(*a*) carries its railway or causes or permits the same to be carried upon, along or across an existing highway without having first obtained leave therefor from the Board; or

(*b*) obstructs any such highway by its works before turning the highway so as to leave an open and good passage for carriages; or

(*c*) on completion of the works fails or neglects to restore the highway to as good a condition, as nearly as possible, as it originally had;

shall incur a penalty of not less than forty dollars nor more than five thousand dollars for each such offence. 1919, c. 68, s. 403.

Penalty.

Failure to erect signboards at crossings.

**404.** Every railway company which fails or neglects to erect and maintain, at each crossing where a highway is crossed at rail level by the railway of the company, a signboard having the words *Railway Crossing* painted on each side thereof, in letters at least six inches in length, and, in the province of Quebec, in both the English and French languages, shall incur a penalty not exceeding forty dollars. 1919, c. 68, s. 404.

Penalty.

*Opening Railway for Traffic.*

Opening railway without leave of Board.

**405.** If any railway or portion thereof is opened for the carriage of traffic, other than for the purposes of the construction of the railway by the company, before leave therefor has been obtained from the Board as hereinbefore provided, the company or person to whom such railway belongs, shall forfeit to His Majesty the sum of two hundred dollars for each day on which the railway is or continues open without such leave. 1919, c. 68, s. 405.

Penalty.

*Safety and Care of Roadway, etc.*

Leaving gates open.

**406.** Every person who

(*a*) wilfully leaves open any gate on either side of the railway, provided for the use of any farm crossing, without some person being at or near such gate to prevent animals passing through it on to the railway; or

Taking down fences.

(*b*) not being an officer or employee of the company acting in the discharge of his duty, takes down any part of a railway fence; or

Turning animals into railway inclosure.

(*c*) turns any horse, cattle or other animal upon or within the inclosure of any railway, except for the purpose of and while crossing the railway in charge of some competent person, using all reasonable care and precaution to avoid accidents; or

Allowing animals to go upon railway.

(*d*) except as authorized by this Act, without the consent of the company, rides, leads or drives any horse, or other animal, or wilfully suffers any such horse or animal to enter upon the railway, and within the fences and guards thereof;

Penalty.

shall, on summary conviction, be liable to a penalty of twenty dollars for each such offence.

Damages to the company.

2. Every such person shall also be liable to the company for any damage to the property of the company, or for which the company may be responsible, by reason of any such act or omission.

Damages to person injured.

3. Every person guilty of any offence under this section shall, in addition to the penalty and liability therein provided, be liable to pay to any person injured by reason of the commission of such offence all damages thereby sustained. 1919, c. 68, s. 406.

Failure to have weeds removed from right of way.

**407.** Every railway company which fails or neglects to cause the thistles and all noxious weeds growing on the right of way, and upon land of the company adjoining the railway, to be cut down, or to be rooted out and destroyed, each year, before such thistles or weeds have sufficiently matured to seed, or which fails or neglects to do anything which it is required by law to do for the purpose of cutting down, or rooting out and destroying such thistles and weeds before they have sufficiently matured to seed, shall

Penalty.

incur a penalty of two dollars for every day during which such failure or neglect continues.

Municipal officers may remove.

2. The mayor, reeve or chief officer of the municipality, township, county or district in which any portion of the right of way or land of the company lies, upon which the company has failed to cut down, or root out and destroy, such thistles and weeds as by law required, or to do anything which the company is by law required to do for the purpose aforesaid, or any justice of the peace in such municipality, township, county or district, may enter upon the portion of the right of way and lands aforesaid, and, by himself and his assistants or workmen, cut down, or root out and destroy, such thistles or weeds, and for that purpose cause to be done all things which the company is by law required to do.

120458

Expenses.

3. Such mayor, reeve, chief officer or justice of the peace may recover the expenses and charges so incurred, and the said penalty, with costs, in any court of competent jurisdiction.

Payment.

4. Such penalty shall be paid to the proper officer of the municipality. 1919, c. 68, s. 407.

Walking on track.

**408.** Every person, not connected with the railway or employed by the company, who trespasses upon the yard or track of the company, except where the same is laid across or along a highway, is liable on summary conviction

Penalty.

to a penalty not exceeding ten dollars. 1919, c. 68, s. 408.

Using highway crossings on foot.

**409.** Any person who uses any highway crossing at rail level for the purpose of passing on foot along such highway across the railway, except during the time when such highway crossing is used for the passage of carriages, carts, horses or cattle along the said highway, is liable on summary conviction to a penalty not exceeding ten dollars, if

Penalty.

If there is a foot bridge.

(*a*) the company has erected and completed, pursuant to order of the Board, over its railway, at or near or in lieu of such highway crossing, a foot bridge or foot bridges for the purpose of enabling persons passing on foot along such highway to cross the railway by means of such bridge or bridges; and

Maintained.

(*b*) such foot bridge is maintained or such foot bridges are maintained by the company in good and sufficient repair. 1919, c. 68, s. 409.

Non-compliance with order of Board.

**410.** If any company refuses or neglects to comply with any order of the Board, made upon the report of the inspecting engineer, under the authority of this Act,

Works.

(*a*) directing any repairs, renewals, reconstruction, alteration or new work, material or equipment to be made, done or furnished by the company upon, in addition to, or in substitution for any portion of the railway; or

Operation.

(*b*) directing that, until such repairs, renewals, reconstruction, alteration and work, materials or equipment are made, done and furnished to the satisfaction of the Board, no portion of the railway in respect of which such order is made shall be used, or used otherwise than subject to certain restrictions, conditions and terms by such order imposed; or

Rolling stock.

(*c*) condemning and forbidding further use of any rolling stock therein specified;

Penalty.

the company shall for each such refusal or neglect forfeit to His Majesty the sum of two thousand dollars.

120459

Aiding or abetting.

2. Any person wilfully and knowingly aiding or abetting any such disobedience or non-compliance shall be liable therefor, upon conviction, to a penalty of not less than twenty dollars, and not more than two hundred dollars.

No prosecution without leave of Board.

3. No prosecution for any penalty under this section shall be instituted without the authority of the Board first obtained. 1919, c. 68, s. 410.

Non-compliance with notice of engineer forbidding the running of trains.

**411.** If any railway company refuses or neglects to comply with any notice in writing of any inspecting engineer, given under the authority of this Act, and duly served upon the company, forbidding the running of any train over the railway of the company, or any portion thereof, or requiring that trains be run only at such times, under such conditions and with such precautions as specified in such notice, or forbidding the running or using of any rolling stock specified in the notice, such company shall forfeit to His Majesty the sum of two thousand dollars. 1919, c. 68, s. 411.

Penalty.

*Notification of Accidents.*

Omitting to give notice of accident.

**412.** Every railway company which wilfully or negligently omits to give immediate notice as by this Act required, with full particulars, to the Board of the occurrence, upon the railway belonging to such company, of any accident attended with serious personal injury to any person using the railway, or to any employee of the company, or whereby any bridge, culvert, viaduct or tunnel on or of the railway has been broken, or so damaged as to be impassable or unfit for immediate use, shall forfeit to His Majesty the sum of two hundred dollars for every day during which the omission to give such notice continues.

Penalty.

Conductors, etc., failing to notify Board by telegraph.

2. Every conductor or other employee who makes a report to the company of the occurrence of any such accident and fails, wilfully or negligently, to notify the Board of the same by telegraph as soon as possible after such accident, is guilty of an offence and liable, on summary conviction, to a penalty not exceeding one hundred dollars. 1919, c. 68, s. 412.

Penalty.

*Operation and Equipment.*

Violation of by-laws and rules.

**413.** Every person who wilfully or negligently violates any by-law, rule or regulation of the company is liable, on summary conviction, for each offence, to a penalty not exceeding the amount therein prescribed, or if no amount is so prescribed, to a penalty not exceeding twenty dollars: Provided that no such person shall be convicted of any such offence, unless at the time of the commission thereof a printed copy of such by-law, rule or regulation was openly affixed to a conspicuous part of the station at which the offender entered the train, or at or near which the offence was committed. 1919, c. 68, s. 413.

Printed copy must be posted.

120460

Failure of company to properly equip its trains.

**414.** Every railway company required by this Act

(*a*) to provide and cause to be used on its trains modern and efficient apparatus, appliances and means, or any apparatus, appliances and means in this Act specified, for the providing of communication between the conductor and the engine driver, or for the checking of the speed of any train or the bringing of the same expeditiously to a standstill, or for the secure coupling and connecting of the cars and the engine composing the train; or

Box freight cars.

(*b*) to equip its box freight cars, for the security of its employees, with outside ladders and hand-grips, or if the Board so requires, with any other improved side attachment required by the Board; or

Draw bars.

(*c*) to adopt and use upon its rolling stock draw bars of a height determined by the Board;

Penalty.

which fails to comply with any requirement of this Act in that behalf shall forfeit to His Majesty a sum not exceeding two hundred dollars for every day during which such default continues. 1919, c. 68, s. 414.

Blackboard.

**415.** (*a*) If any railway company upon whose railway there is a telegraph or telephone line in operation wilfully neglects, omits or refuses to have a blackboard put upon the outside of the station house over the platform of the station, in some conspicuous place, at each station of such company in which there is a telegraph or telephone office; or

Notice of overdue trains.

(*b*) if, when any passenger train is overdue at any such station according to the time-table of such company, the station agent, or person in charge at such station, wilfully neglects, omits or refuses to write or cause to be written in white chalk on such blackboard a notice, in English and French in the province of Quebec, and in English in the other provinces, stating to the best of his knowledge and belief the time when such overdue train may be expected to reach such station; or

Further notice.

(*c*) if, when there is any further change in the expected time of arrival, such station agent, or person in charge of the station, wilfully neglects, omits or refuses to write or cause to be written on the blackboard, in like manner, a fresh notice stating to the best of his knowledge and belief the time when such overdue train may then be expected to reach such station;

Penalty.

such company shall be liable, upon summary conviction, to a penalty not exceeding five dollars for each such wilful neglect, omission or refusal.

Station master also liable.

2. Such station agent or person in charge at any such station shall likewise be liable to a penalty not exceeding five

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120461

five dollars for every wilful neglect, omission or refusal to write or cause to be written upon such blackboard any of such notices as hereinbefore required. 1919, c. 68, s. 415.

Freight car in rear of passenger car. Penalty.

**416.** Every officer or employee of any railway company who directs or knowingly permits any freight, merchandise or lumber car to be placed in any passenger train, in the rear of any passenger car in which any passenger is carried, is guilty of an indictable offence. 1919, c. 68, s. 416.

Penalty for not stopping at swing bridges.

**417.** A company shall be liable to a penalty not exceeding four hundred dollars, if when the railway passes over any navigable water or canal by means of a draw or swing bridge which is subject to be opened for navigation, any train of the company upon such railway is not brought to a full stop before coming on or crossing over such bridge, or if such train thereafter proceeds before a proper signal has been given for that purpose.

Board may permit.

2. This section shall not apply in the case of any bridge over which, by order of the Board under the authority of this Act, engines and trains are permitted to pass without stopping. 1919, c. 68, s. 417.

Employee of company failing to comply. Penalty.

**418.** Every employee of the company who fails to comply with the rules of the company made for carrying into effect the provisions of this Act with regard to the stopping of trains before crossing any such draw or swing bridge, or for preventing such trains from proceeding over any such bridge before a proper signal has been given for that purpose, shall be liable to a penalty not exceeding four hundred dollars, or to six months' imprisonment, or to both. 1919, c. 68, s. 418.

Penalty for failure. To sound whistle. And ring bell. Damages. Exception.

**419.** The company shall incur a penalty of eight dollars if, when any train of the company is approaching a highway crossing at rail level,

(*a*) the engine whistle is not sounded at least eighty rods before reaching such crossing; and

(*b*) the bell is not rung continuously from the time of the sounding of the whistle until the engine has crossed the highway.

2. The company shall also be liable for all damage sustained by any person by reason of any failure or neglect so to sound the whistle or ring the bell.

3. Where a municipal by-law of a city or town prohibits such sounding of the whistle or such ringing of the bell in respect of any such crossing or crossings within the limits of such city or town, such by-law if approved by order of

120462

the Board shall, to the extent of such prohibition, relieve the company from any penalty or liability under this section. 1919, c. 68, s. 419.

Employee neglecting to sound bell or whistle. Penalty.

**420.** Every employee of the company whose duty it is to sound the whistle or ring the bell at any such highway crossing, who neglects to perform such duty as required by this Act, shall for each offence incur a penalty of eight dollars. 1919, c. 68, s. 420.

Penalty for—

**421.** The company shall incur a penalty of one hundred dollars if

Crossing level railway crossing without signal.

(*a*) any train or engine of the company passes over any crossing where two main lines of railway, or the main tracks of any branch lines, cross each other at rail level, whether they are owned by different companies or by the same company, before a proper signal has been received by the conductor or engineer in charge of such train or engine, from a competent person or watchman in charge of such crossing, that the way is clear; or

Train not stopping.

(*b*) any train of the company, before it passes over any such crossing, is not brought to a full stop, unless engines and trains are, by order of the Board under the authority of this Act, permitted to pass over such crossing without stopping; or

Excessive speed in thickly peopled places where track not fenced.

(*c*) any train of the company passes in or through any thickly peopled portion of any city, town or village at a speed greater than ten miles an hour, unless the track is fenced or properly protected in the manner prescribed by this Act, or unless permission to pass at greater speed is given by some regulation or order of the Board; or

Over highway crossings in thickly peopled places.

(*d*) any train of the company passes over any highway crossing at rail level in any thickly peopled portion of any city, town or village at a speed greater than ten miles an hour, unless such crossing is constructed and thereafter maintained and protected in accordance with the orders, regulations and directions specially issued by the Railway Committee of the Privy Council or of the Board in force with respect to such crossing, or unless permission is given by some regulation or order of the Board; or

Over highway crossing where accident has happened.

(*e*) any train of the company passes over any highway crossing at rail level at a speed greater than ten miles an hour, if at such crossing, subsequent to the first day of January, one thousand nine hundred and five, a person or vehicle using such crossing, or an animal being ridden or driven over the same, has been struck by a moving train, and bodily injury or death thereby

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120463

caused to such person or to any other person using such crossing, unless and until such crossing is protected to the satisfaction of the Board; or

Over highway crossing not protected as ordered.

(*f*) any train of the company passes at a speed greater than ten miles an hour over any highway crossing at rail level in respect of which crossing an order of the Board has been made to provide protection for the safety and convenience of the public and which order has not been complied with; or

Moving reversely without warning.

(*g*) whenever in any city, town or village, any train of the company not headed by an engine is allowed to pass over or along a highway at rail level which is not adequately protected by gates or otherwise, the company does not station on that part of the train, which is then foremost, a person who shall warn persons standing on or crossing or about to cross the track of such railway.

Electric railway companies.

2. Every company operating an electric street railway shall incur a penalty of one hundred dollars if

Crossing at rail level without signal from watchman.

(*a*) any electric car of such company passes over any crossing, where its line of railway crosses any line of railway subject to the provisions of this Act, at rail level, before a proper signal has been received by the conductor in charge of such electric car, from a competent person or watchman in charge of such crossing, that the way is clear; or

Or from conductor if no watchman.

(*b*) if there is no competent person or watchman in charge of such crossing, the conductor, before crossing the same, does not go forward and see that the track to be crossed is clear, before giving the signal to the motorman that the way is clear and to proceed; or

Not stopping.

(*c*) any such electric car, before it passes over such crossing, is not brought to a full stop, unless electric cars are by order of the Board under the authority of this Act permitted to pass over such crossing without stopping. 1919, c. 68, s. 421.

Obstructing highway.

**422.** Whenever at any highway crossing at rail level any engine, tender or car, or any part thereof, is wilfully allowed by the company, its officers, agents or employees to stand on any part of such highway for a longer period than five minutes at one time, or in shunting, to obstruct public traffic for a longer period than five minutes at one time, every officer, agent or employee of the company who has directly under or subject to his control, management or direction any such engine, tender or car, shall be liable on

Penalty.

summary conviction to a penalty not exceeding fifty dollars, and the company shall also be liable to a like penalty: Provided that, if the offence is in the opinion of the court excusable, the prosecution for the penalty may be dismissed and the costs shall be in the discretion of the court.

120464

When observing rules of company causes obstruction.

2. No employee shall be liable to such penalty if he proves that the carrying out or observing of the rules of the company was the cause of such obstruction, and in such case the company and its superintendent or other officer in charge of the operation of the railway, or of the division thereof upon which such obstruction occurs, shall each be guilty of the offence mentioned in this section and liable to a penalty not exceeding two hundred dollars. 1919, c. 68, s. 422.

*Intoxication of Employees.*

Intoxication of railway employees.

**423.** Every conductor, locomotive engineer, train dispatcher, telegraph operator, station agent, switchman, signal man, bridge tender or any other person who is intoxicated, or under the influence of liquor, while on duty, in charge of or in any employment having to do with the movement of trains upon any railway, is guilty of an offence, and shall be punished by fine, not exceeding four hundred dollars, or imprisonment, not exceeding five years, or both, in the discretion of the court before which the conviction is had, and according as such court considers the offence proved to be more or less grave as causing injury to any person or property, or as exposing or likely to expose any person or property to injury, although no actual injury occurs. 1919, c. 68, s. 423.

Penalty.

Selling liquor to railway employees on duty.

**424.** Every person who sells, gives or barters any spirituous or intoxicating liquor to or with any servant or employee of any company, while on duty, is liable on summary conviction to a penalty not exceeding fifty dollars, or to imprisonment, with or without hard labour, for a period not exceeding one month, or to both. 1919, c. 68, s. 424.

Penalty.

*Traffic, Tolls, and Tariffs.*

Contraventions in respect of tolls.

**425.** If any company or any director or officer thereof, or any receiver, trustee, lessee, agent or person, acting for or employed by such company, either alone or with any other company or person,

(*a*) wilfully does, or causes to be done, or willingly suffers to be done, any act, matter or thing, contrary to any order, direction, decision or regulation of the Board made or given under this Act, in respect of tolls; or

(*b*) wilfully omits or fails to do any act, matter, or thing thereby required to be done; or

(*c*) causes or willingly suffers or permits any act, matter or thing, so directed or required to be done, not to be done; or

120465

(*d*) contravenes any such order, direction, decision or regulation, or any of the provisions of this Act, in respect of tolls;

such company, director, officer, receiver, trustee, lessee, agent or person shall for each such offence be liable to a penalty of not more than one thousand dollars, and not less than one hundred dollars. Penalty.

2. No prosecution shall be had or instituted for any such penalty without the leave of the Board first being obtained. 1919, c. 68, s. 425. Prosecution by leave.

Giving free passes, etc.

**426.** Any company or any officer or agent thereof, or any person acting for or employed by such company, who, in contravention of the provisions of this Act, directly or indirectly, issues or gives any free ticket or free pass, whether for a specific journey or periodical or annual pass, or who arranges for or permits the transportation of passengers except on payment of the fares properly chargeable for such transportation under the tariffs filed under the provisions of this Act, and at the time in effect, shall for each offence be liable to a penalty not exceeding one thousand dollars and not less than one hundred dollars, and any person other than as provided by this Act who uses any such free ticket or free pass, whether for a specific journey or periodical or annual pass, shall be subject to a like penalty. Using free passes.

2. No prosecution shall be had or instituted for any such penalty without the leave of the Board first being obtained. 1919, c. 68, s. 426. Prosecution by leave.

False billing, etc., by company.

**427.** Any company or any officer or agent thereof, or any person acting for or employed by such company, who by means of false billing, false classification, false report of weight, or by any other device or means, knowingly, wilfully or willingly suffers or permits any person or persons to obtain transportation for goods at less than the required tolls then authorized and in force on the railway of the company, shall for each offence be liable to a penalty not exceeding one thousand dollars and not less than one hundred dollars. Penalty.

2. No prosecution shall be had or instituted for any such penalty without the leave of the Board first being obtained. 1919, c. 68, s. 427. Prosecution by leave.

False billing etc., by any person.

**428.** Any person, or any officer or agent of any incorporated company, who delivers goods for transportation to such company, or for whom as consignor or consignee the company transports goods, who knowingly or wilfully, by false billing, false classification, false weighing, false representation of the contents of the package, or false

120466

report of weight, or by any other device or means, whether with or without the consent or connivance of the company, its agent or agents, obtains, or knowingly or wilfully attempts to obtain, transportation for such goods at less than the regular tolls then authorized and in force on the railway shall, for each offence, be liable to a penalty not exceeding one thousand dollars and not less than one hundred dollars. Penalty.

2. The Board may make regulations providing that any such persons or company shall, in addition to the regular toll, be liable to pay to the company a further toll not exceeding fifty per centum of the regular charge. Further toll.

3. The company may, and when ordered by the Board shall, open and examine any package, box, case or shipment, for the purpose of ascertaining whether this section has been violated. Opening of packages.

4. No prosecution shall be had or instituted for any such penalty without the leave of the Board first being obtained. 1919, c. 68, s. 428. Prosecution by leave.

Unjust discrimination.

**429.** Any person or company, or any officer or agent of any company

(*a*) who offers, grants or gives, or solicits, accepts or receives any rebate, concession, or discrimination in respect of the transportation of any traffic by the company, whereby any such traffic is, by any device whatsoever, transported at a less rate than that named in the tariffs then in force; or

(*b*) for whom the company or any of its officers or agents, is by any such means induced to transport traffic, and thereby to discriminate unjustly in favour of any such person, company, officer or agent as against any other person or company; or

(*c*) who aids or abets the company in any unjust discrimination;

shall for each offence be liable to a penalty not exceeding one thousand dollars and not less than one hundred dollars. Penalty.

2. No prosecution shall be had or instituted for any such penalty without the leave of the Board first being obtained. 1919, c. 68, s. 429. Prosecution by leave.

Departure from tolls in tariff.

**430.** If the company files with the Board any tariff, and such tariff comes into force and is not disallowed by the Board under this Act, or if the company participates in any such tariff, any departure from the tolls in such tariff, when so in force, shall, as against such company, its officers, agents or employees, be an offence under this Act. Offence.

2. No prosecution shall be had or instituted in respect of any such offence without the leave of the Board first being obtained. 1919, c. 68, s. 430. Prosecution by leave.

Neglect to file joint tariff.

**431.** All goods carried or being carried over any continuous route, from a point in Canada through a foreign country into Canada, operated by two or more companies whether Canadian or foreign, shall, unless such companies have filed with the Board a joint tariff for such continuous route, be subject upon admission into Canada, to Customs duties, as if such goods were of foreign production and coming into Canada for the first time.

Goods subject to Customs duties.

30 per cent.

2. Such goods shall be subject to a Customs duty of thirty per centum of the value thereof, if they would not be subject to any Customs duty in case they were of foreign production, and coming into Canada for the first time.

Payable by company.

3. If any such duty is paid by the consignor or consignee of such goods, the same shall be repaid on demand to the person so paying, by the company or companies owning or operating so much of such continuous line or route as lies within Canada. 1919, c. 68, s. 431.

Sending of explosives.

**432.** Every person who

(*a*) sends by any railway any gunpowder, dynamite, nitroglycerine, or any other goods which are of a dangerous or explosive nature, without distinctly marking their nature on the outside of the package containing the same, and otherwise giving notice thereof in writing to the station agent or employee of the company whose duty it is to receive such goods, and to whom the same are delivered; or

Taking them on train.

(*b*) carries or takes upon any train any such goods for the purpose of carriage;

Penalty.

shall be liable on conviction to a penalty not exceeding two thousand dollars or imprisonment for any period not exceeding two years, or both. 1919, c. 68, s. 432.

Carrying dangerous goods.

**433.** Every company which carries any goods of an explosive or dangerous nature except in conformity with the regulations, or an order, made by the Board in that behalf, shall for each such offence incur a penalty of five hundred dollars. 1919, c. 68, s. 433.

Refusing to check baggage.

**434.** If any railway company improperly refuses upon demand to affix a check to any parcel of baggage, having a handle, loop or suitable means for attaching a check thereupon, delivered by a passenger to the company for transport or to deliver a duplicate of such check to such passenger, the company shall be liable to such passenger for the sum of eight dollars recoverable in a civil action. 1919, c. 68, s. 434.

120468

Opening package with intent to steal contents.

**435.** Every person who

(*a*) unlawfully bores, pierces, cuts, opens, enters or otherwise injures any car or any cask, can, bottle, box, case, sack, wrapper, package, container, or rolls of goods in or about any car, wagon, boat, vessel, warehouse, station house, wharf, quay or premises of or belonging to any company;

(*b*) unlawfully breaks the seal upon any car on any railway; or

Drinking or wasting liquids.

(*c*) unlawfully drinks or wilfully spills or allows to run to waste any liquids;

Penalty.

is liable, on summary conviction, to a penalty not exceeding five hundred dollars, or to imprisonment, with or without hard labour, for a term not exceeding one year, or to both. 1919, c. 68, s. 435.

*Express Business.*

Carrying by express without filing tariff, etc.

**436.** Every company which carries or transports, and every officer or employee thereof who directs or knowingly permits to be carried or transported, any goods by express,

(*a*) unless and until the tariff of express tolls therefor or in connection therewith has been submitted to and filed with the Board in the manner required by this Act; or

(*b*) in the case of competitive tariffs, unless such tariffs are filed in accordance with the rules and regulations of the Board made in relation thereto; or

(*c*) in any case where such express toll in any tariff has been disallowed by the Board;

Penalty.

shall be liable to a penalty not exceeding one hundred dollars for each such offence. 1919, c. 68, s. 436.

*Statistics and Returns.*

Failure to furnish returns to Minister.

**437.** Every railway, telegraph, telephone or express company that fails or neglects to prepare and furnish to the Board within such time and in such manner and form, and in accordance with such classifications, and with such particulars and verification, as by or under this Act are required or intended,

Capital, traffic and working expenditure.

(*a*) any return of its capital, traffic and working expenditure, or of any other information required as indicated in the forms for the time being required by the Board; or

Monthly traffic.

(*b*) any monthly return of its traffic in accordance with the forms for the time being required by the Board, if such monthly return is required by the Minister; or

Other information.

(*c*) any other information which may be from time to time required by the Board under this Act;

Penalty. shall incur a penalty not exceeding ten dollars for every day during which such default continues.

Signing false return. 2. Every person who knowing the same to be false in any particular, signs any such return, is guilty of an offence punishable on summary conviction. 1919, c. 68, s. 437.

Returns to Statistician. **438.** Any railway, telegraph, telephone or express company that fails or neglects to deliver to the Dominion Statistician within the time provided in this Act or when required by the Board, and in the form ordered and directed by the Board, or specified in this Act,

Accidents. (*a*) a true and particular return of all accidents and casualties, whether to persons, or to animals or other property, which have occurred on the property of the company, or in connection with the operation of the undertaking of the company setting forth the particulars and verified in manner as by this Act required; or

By-laws, rules and regulations. (*b*) if required by the Board, a true copy of the existing by-laws of the company and of its rules and regulations for the management of the company and of its railway or such other undertaking or business as it is authorized to carry on, within fourteen days after having been so required by the Board; or

Additional returns of serious accidents. (*c*) in the case of a railway company, any other or additional returns of serious accidents occurring in the course of the public traffic on the railway, if thereunto required with a view to public safety by the Board, within fourteen days after the same have been so required;

Penalty. shall forfeit to His Majesty the sum of one hundred dollars for every day during which the company so neglects to deliver such return. 1919, c. 68, s. 438.

Refusal to make returns required by Board. **439.** If the Board at any time, by notice served upon any railway, telegraph, telephone or express company or any officer, servant or agent of such company, requires such company or such officer, servant or agent to furnish to the Board, at or within any time stated in such notice, a written statement or statements showing in so far and with such detail and particulars as the Board requires,

Assets and liabilities. (*a*) the assets and liabilities of such company;

Stock. (*b*) the amount of such company's stock issued and outstanding and the date at which any such stock was so issued;

Consideration therefor. (*c*) the amount and nature of the consideration received by such company for such issue, and in case the whole of such consideration was not paid to such company in cash, the nature of the service rendered to or property received by such company for which any stock was issued;

120470

(*d*) the gross earnings or receipts or expenditure by such company during any period specified by the Board, and the purposes for which such expenditure was made; Receipts and expenditures.

(*e*) the amount and nature of any bonus, gift or subsidy received by such company from any source whatsoever and the source from which and the time when, and the circumstances under which, the same was so received or given; Bonus and subsidies.

(*f*) the bonds issued at any time by such company and what portion of the same is outstanding, and what portion, if any, has been redeemed; Bonds.

(*g*) the amount and nature of the consideration received by such company for the issue of such bonds; Consideration therefor.

(*h*) the character and extent of any liabilities outstanding chargeable upon the property or undertaking of such company, or any part thereof, and the consideration received by such company for such liabilities, and the circumstances under which the same were created; Liabilities.

(*i*) the cost of construction of such company's railway or other works or of any part thereof; Cost of construction.

(*j*) the amount and nature of the consideration paid or given by such company for any property acquired by it; Cost of property.

(*k*) the particulars of any lease, contract or arrangement entered into between such company and any other company or person; and Leases and contracts.

(*l*) generally, the extent, nature, value and particulars of the property, earnings and business of such company; or Generally.

(*m*) any of the matters in this section mentioned; Any matter.

and if such company, officer, servant or agent wilfully or negligently refuses to make such return when and as thereunto required by the Board, or fails to make any such return to the utmost of its or his knowledge, or means of knowledge, such company and every such officer, servant or agent, so in default, shall severally be liable on conviction to a penalty not exceeding one thousand dollars. If wilful or negligent. Penalty.

Imprisonment for officer or servant. 2. Each such officer, servant or agent so convicted shall, in addition to such penalty, be liable to imprisonment in the common gaol of the county in which such conviction is made, for any period not exceeding twelve months. 1919, c. 68, s. 439.

Making false returns. **440.** If any company or any officer, servant or agent of such company wilfully or negligently makes any such return to the Board falsely, or makes any false statement in any

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

any such return, such company and every such officer, servant or agent shall be severally liable on conviction to a penalty not exceeding one thousand dollars.

Penalty.

Imprisonment.

2. Such officer, servant or agent shall also, on such conviction, be liable to imprisonment, for any period not exceeding twelve months, in the common gaol of the county where such conviction is had. 1919, c. 68, s. 440.

Publishing information without leave.

**441.** If any officer or servant of the Board, or any person having access to or knowledge of any return made to the Board, or of any evidence taken by the Board in connection therewith, without the authority of the Board first obtained, publishes or makes known any information, having obtained the same, or knowing the same to have been derived from such return or evidence, he shall be liable, on conviction, to a penalty not exceeding five hundred dollars for each offence, and to imprisonment not exceeding six months, in the common gaol of the country where such conviction is had. 1919, c. 68, s. 441.

Penalty.

*Railway Constables Failing in Duty.*

Failure of constable in duty.

**442.** Every constable appointed under the authority of this Act who is guilty of any neglect or breach of duty in his office of constable shall be liable, on summary conviction, to a penalty not exceeding eighty dollars, or to imprisonment with or without hard labour for a term not exceeding two months.

Penalty.

Deduction from salary of constable.

2. Such penalty may, if the constable is in receipt of a salary from the company, be deducted from any such salary due to such offending constable.

Venue.

3. Any offence under this section may be prosecuted and adjudged within any county, city, district, or other local jurisdiction of the province wherein the offence was committed. 1919, c. 68, s. 442.

*Various Offences.*

Destroying or injuring structures.

**443.** Every person who

(*a*) wilfully breaks down, injures, weakens or destroys any gate, fence, erection, building or structure of a company; or

Removing or defacing notices.

(*b*) removes, obliterates, defaces or destroys any printed or written notice, direction, order, by-law or regulation of a company, or any section of or extract from this Act or any other Act of Parliament, which a company or any of its officers or agents have caused to be posted, attached or affixed to or upon any fence, post, gate, building or erection of the company, or any car upon any railway; or

120472

(*c*) enters upon any railway train, with intent fraudulently to be carried upon the said railway without paying fare thereon; or — Fraudulently entering train.

(*d*) wilfully obstructs or impedes any officer or agent of any company in the execution of his duty upon any train, or railway, or upon any of the premises of the company; or — Obstructing officer of company.

(*e*) not being an employee of the company, wilfully trespasses by entering upon any of the stations, cars or buildings of the company in order to occupy the same for his own purposes; — Trespass on property of company.

shall be liable on summary conviction to a penalty not exceeding fifty dollars, or in default of payment to imprisonment with or without hard labour for a term not exceeding two months. 1919, c. 68, s. 443. — Penalty.

*Penalties Not Otherwise Provided.*

Company or officer doing or omitting to do anything against this Act.

**444.** Any company which, or any person who, being a director or officer thereof, or being a receiver, trustee, lessee, agent, or otherwise acting for or employed by such company, or being a contractor or other person having to do with the railway or other works of the company, does, causes or permits to be done, any matter, act or thing contrary to the provisions of this or the Special Act, or to the orders, regulations, or directions of the Governor in Council, or of the Minister, or of the Board, made under this Act, or omits to do any matter, act or thing, thereby required to be done on the part of any such company or person, shall, if no other penalty is provided in this or the Special Act for any such act or omission, be liable for each such offence to a penalty of not less than twenty dollars, and not more than five thousand dollars, in the discretion of the court before which the same is recoverable. 1919, c. 68, s. 444. — Penalty.

*Continuing Offences.*

Each day's violation of this Act a distinct offence.

**445.** When the violation of or failure to comply with any provision of this Act, or with any regulation, order or direction of the Governor in Council, the Minister, the Board or any inspecting engineer, is made, by this Act or any regulation thereunder, an offence subject to penalty, each day's continuance of such violation, or failure to comply, shall constitute a new and distinct offence. 1919, c. 68, s. 445.

*Company Liable for Acts of its Officers and Agents.*

Company liable for act or omission of officer, etc.

**446.** For the purpose of enforcing any penalty under any of the provisions of this Act, or enforcing any regulation, order, or direction of the Governor in Council, the Minister, the Board, or any inspecting engineer, made under this Act, the act, omission, or failure of any officer, agent,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120473

or other person acting for, or employed by the company, shall, if within the scope of his employment, in every case be also deemed to be the act, omission or failure of such company.

Company liable to same penalty as individual offender.

2. Anything done or omitted to be done by the company which if done or omitted to be done by any director, or officer thereof, or any receiver, trustee, lessee, agent or person acting for or employed by the company, would constitute an offence under this Act, shall also be held to be an offence committed by such company, and upon conviction of any such offence, the company shall be subject to the like penalties as are prescribed by this Act with reference to such persons. 1919, c. 68, s. 446.

*Penalties Constitute a First Charge.*

Penalties a first charge on railway.

**447.** If any company has been convicted of any penalty under this Act, such penalty shall be the first lien or charge upon the railway, property, assets, rent and revenues of the company. 1919, c. 68, s. 447.

*Procedure.*

If penalty $100 or less.

**448.** If any penalty, prescribed for any offence under this Act, or under any order, rule or regulation of the Board, is one hundred dollars or less, with or without imprisonment, the penalty may, subject to the provisions of this Act, be imposed and recovered on summary conviction before a justice of the peace.

If more than $100 and less than $500.

2. If the penalty prescribed is more than one hundred dollars and less than five hundred dollars, the penalty may, subject as aforesaid, be imposed and recovered on summary conviction before two or more justices, or before a police magistrate, a stipendiary magistrate, or any person with the power or authority of two or more justices of the peace.

Board may require Attorney General to proceed.

3. Whenever the Board has reasonable ground for belief that any company, or any person or corporation is violating or has violated any of the provisions of this Act, or any order, rule or regulation of the Board, in respect of which violation a penalty may be imposed under this Act, the Board may request the Attorney General of Canada to institute and prosecute proceedings, on behalf of His Majesty, against such company or person or corporation for the imposition and recovery of the penalty provided under this Act for such violation, or the Board may cause an information to be filed in the name of the Attorney General of Canada for the imposition and recovery of such penalty.

Leave required when penalty exceeds $100.

4. No prosecution shall be had against the company for any penalty under this Act, in which the company might be held liable for a penalty exceeding one hundred dollars, without the leave of the Board being first obtained. 1919, c. 68, s. 448.

120474

RAILWAY CONSTABLES.

*Appointment.*

Who may make appointments.

**449.** A superior or county court judge, two justices of the peace, or a stipendiary or police magistrate, in any part of Canada, a clerk of the peace, clerk of the Crown or judge of the sessions of the peace in the province of Quebec, within whose jurisdiction the railway runs, may, on the application of the company or any clerk or agent of the company, appoint any persons who are British subjects to act as constables on and along such railway.

Qualifications.

Oath to be taken.

2. Every person so appointed shall take an oath or make a solemn declaration, which may be administered by any judge or other official authorized to make the appointment or to administer oaths, in the form or to the effect following, that is to say:—

Form of oath.

"I, A. B., having been appointed a constable to act upon and along (*here name the railway*), under the provisions of the Railway Act, do swear that I am a British subject; that I will well and truly serve our Sovereign Lord the King in the said office of constable, without favour or affection, malice or ill-will; that I will, to the best of my power, cause the peace to be kept, and prevent all offences against the peace; and that, while I continue to hold the said office, I will, to the best of my skill and knowledge, discharge the duties thereof faithfully according to the law. So help me God."

Appointment in writing.

3. Such appointment shall be made in writing signed by the official making the appointment, and the fact that the person appointed thereby has taken such oath or declaration shall be endorsed on such written appointment by the person administering such oath or declaration. 1919, c. 68, s. 449.

*Territorial Limits and Powers.*

Territorial limits of constable.

**450.** Every constable so appointed, who has taken such oath or made such declaration, may act as a constable for the preservation of the peace, and for the security of persons and property against unlawful acts

(*a*) on such railway, and on any of the works belonging thereto;

(*b*) on and about any trains, roads, wharfs, quays, landing places, warehouses, lands and premises belonging to such company, whether the same are in the county, city, town, parish, district or other local jurisdiction within which he was appointed or in any other place through which such railway passes, or in which the same terminates, or through or to which any railway passes which is worked or leased by such company; and

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120475

(c) in all places not more than a quarter of a mile distant from such railway.

Powers of constable.

2. Every such constable shall have all such powers, protection and privilege for the apprehending of offenders, as well by night as by day, and for doing all things for the prevention, discovery and prosecution of offences, and for keeping the peace, as any constable duly appointed has within his constablewick. 1919, c. 68, s. 450.

Justices.

**451.** Any such constable make take such persons as are charged with any offence against the provisions of this Act, or any of the Acts or by-laws affecting the railway, punishable by summary conviction, before any justice or justices appointed for any county, city, town, parish, district or other local jurisdiction within which such railway passes.

2. Every such justice may deal with all such cases, as though the offence had been committed and the persons taken within the limits of his jurisdiction. 1919, c. 68, s. 451.

*Dismissal.*

Dismissal of constables by judge or magistrate.

**452.** A superior or county court judge or a stipendiary or police magistrate, in any part of Canada, or a judge of the sessions of the peace in the province of Quebec, may dismiss any such constable who is acting within his jurisdiction.

By company or agent.

2. The company, or any clerk or agent of the company, may also dismiss any such constable who is acting on such railway.

Powers to cease on dismissal.

3. Upon every such dismissal, all powers, protection and privileges, which belonged to any such person by reason of such appointment, shall wholly cease.

Reappointment.

4. No person so dismissed shall be again appointed or act as constable for such railway, without the consent of the authority by whom he was dismissed. 1919, c. 68, s. 452.

*Records and Evidence Respecting Appointment and Dismissal.*

Company to record appointments and dismissals with clerk of peace.

**453.** The company shall within one week after the date of the appointment or dismissal, as the case may be, of any such constable appointed at the instance of the company, cause to be recorded in the office of the clerk of the peace for every county, parish, district, or other local jurisdiction in which any such constable is so appointed,

(a) such appointment or a certified copy thereof;
(b) the name and designation of any such constable;
(c) the date of his appointment;
(d) the name of the authority making such appointment; and, in the case of dismissal,
(e) the fact of the dismissal of any such constable;

120476

(f) the date of any such dismissal; and
(g) the name of the authority making such dismissal. 1919, c. 68, s. 453.

Book to be kept by clerk of peace.

**454.** Such clerk of the peace shall keep a record of all such facts in a book which shall be open to public inspection, and shall be entitled to a fee of fifty cents for each entry of appointment or dismissal, and twenty-five cents for each search or inspection, including the taking of extracts. 1919, c. 68, s. 454.

Records as to railway constables to be evidence.

**455.** The records relating to appointments and dismissals of railway constables, required by this Act to be kept by the respective clerks of the peace for the counties, parishes, districts or other local jurisdictions in which such constables are appointed, shall, without further proof than the mere production of such records, be prima facie evidence of the due appointments of such constables, of their jurisdiction to act as such, and of the other facts by this Act required so to be recorded. 1919, c. 68, s. 455.

MISCELLANEOUS.

*Sunday Observance.*

Railway to be subject to provincial legislation in force in 1904.

**456.** Notwithstanding anything in this Act, or in any other Act, every railway, situate wholly within one province of Canada and declared by the Parliament of Canada to be either wholly or in part a work for the general advantage of Canada, and every person employed thereon, in respect of such employment, and every person, company, corporation or municipality owning, controlling or operating the same wholly or partly, in respect of such ownership, control or operation, shall be subject to any Act of the legislature of the province in which any such railway is situate which was in force on the tenth day of August, one thousand nine hundred and four, in so far as such Act prohibits or regulates work, business or labour upon the first day of the week, commonly called Sunday.

Such legislation confirmed.

2. Every such Act, in so far as it purports to prohibit, within the legislative authority of the province, work, business or labour upon the said first day of the week, is hereby ratified and confirmed and made as valid and effectual, for the purposes of this section, as if it had been duly enacted by the Parliament of Canada.

Subsequent legislation may be adopted by proclamation.

3. The Governor in Council may, by proclamation, confirm, for the purposes of this section, any Act of the legislature of any province passed after the tenth day of August, one thousand nine hundred and four, in so far as such Act purports to prohibit or regulate, within the legislative authority of the province, work, business or labour upon

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120477

the said first day of the week; and such Act shall, to the extent aforesaid, be by force of such proclamation, ratified and confirmed and made as valid and effectual, for the purposes of this section, as if it had been enacted by the Parliament of Canada.

Effect of proclamation.

4. Notwithstanding anything in this Act, or in any other Act, every railway, wholly situate within the province, and which has been declared by the Parliament of Canada to be in whole or in part a work for the general advantage of Canada, and every person employed thereon, in respect of such employment, and every person, company, corporation or municipality, owning, controlling, or operating the same wholly or partly, in respect of such ownership, control or operation, shall, from and after such proclamation, be subject to such Act in so far as it has been so confirmed.

Exceptions.

5. Nothing in this section shall apply to any railway or part of a railway

(*a*) which forms part of a continuous route or system operated between two or more provinces, or between any province and a foreign country, so as to interfere with or affect through traffic thereon; or

(*b*) between any of the ports on the Great Lakes and such continuous route or system, so as to interfere with or affect through traffic thereon; or

(*c*) which the Governor in Council by proclamation declares to be exempt from the provisions of this section. 1919, c. 68, s. 456.

*Ascertaining Grand Trunk Pacific Railway Earnings.*

Ascertainment of true net earnings of G.T.P.R.

**457.** In order to ascertain the true net earnings of

(*a*) the Eastern Division of the Grand Trunk Pacific railway, for the purposes of the scheduled agreements referred to in the Act passed in the year one thousand nine hundred and four, chapter twenty-four, intituled *An Act to amend the National Transcontinental Railway Act;* and

(*b*) the Grand Trunk Pacific Railway Company, upon its system of railways, at all times while the principal or interest of any bonds made by the said company and guaranteed by the Government are unpaid by the said company;

Inquiry by Board.

the Board shall, upon the request of the Minister, inquire into, hear and determine any question as to the justness and reasonableness of the apportionment of any through rate or rates between the Grand Trunk Pacific Railway Company and any other transportation company, whether such company is or is not a railway company, or if a railway company, whether it is or not as such subject to the legislative jurisdiction of the Parliament of Canada.

120478

Government interests.

2. In any such determination the Board shall have due regard to the interests of the Government of Canada as owner of the said Eastern Division, and of the Intercolonial Railway, or as guarantor of any such principal or interest, and to the provisions of the National Transcontinental Railway Act, and of the Acts in amendment thereof, and of the said scheduled agreements.

Apportionment.

Net earnings.

3. Although, in any such case, the Grand Trunk Pacific Railway Company has agreed to any apportionment, the net earnings shall be ascertained upon the basis of the receipt by the Grand Trunk Pacific Railway Company of such share of such through rate or rates as, in the opinion of the Board, the said company should have received under a just and reasonable apportionment; and such agreement shall be material evidence only and not conclusive.

Appeal.

4. Either party to any such question may appeal from any such determination to the Supreme Court of Canada. 1919, c. 68, s. 457.

*Regulations and Orders of the Railway Committee of the Privy Council.*

Regulations and orders continued.

1888, c. 29.

**458.** All regulations and orders made by the Railway Committee of the Privy Council, under the provisions of the Railway Act 1888, in force on the first day of February, one thousand nine hundred and four, shall continue in force until repealed, rescinded, changed or varied under the provisions of this Act.

Board may repeal.

2. The Board shall have the like powers to repeal, rescind, change or vary such regulations and orders, as in the case of regulations or of orders which the Board may make under this Act. 1919, c. 68, s. 458.

Existing orders of Railway Committee.

1888, c. 29.

**459.** Notwithstanding the repeal of the Railway Act 1888, the orders of the Railway Committee of the Privy Council in force on the first day of February, one thousand nine hundred and four, may be made rules or orders of the Exchequer Court, or of any superior court of any province in Canada, and may be enforced in all respects, as nearly as may be, in the same manner as provided by this Act, in the case of similar orders by the Board.

Penalties for disobeying.

2. All penalties, forfeitures and liabilities attaching, under this Act, to the violation of any regulation or disobedience to any order of the Board, shall apply and attach to any violation of or disobedience to any regulation or order of the Railway Committee of the Privy Council occurring after the first day of February, one thousand nine hundred and four, in all respects, as nearly as may be, as if such regulation or order of the Railway Committee of the Privy Council were a regulation or order of the Board. 1919, c. 68, s. 459.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I.S.O.4278
120479

Powers of Governor in Council continued.

1888, c. 29.

**460.** The Governor in Council shall continue to have authority and jurisdiction to sanction, confirm, rescind or vary, or to take any other action upon any report, order or decision of the Railway Committee of the Privy Council made before the first day of February, one thousand nine hundred and four, under the Railway Act 1888, in as full and ample a manner as if the said Act had not been repealed and as if this Act had not been passed.

Orders and decisions confirmed.

2. Any order or decision so sanctioned or confirmed shall have the same validity, force and effect as if the said order or decision had been so sanctioned or confirmed prior to the first day of February, one thousand nine hundred and four. 1919, c. 68, s. 460.

## CHAP. 43.

An Act to amend the Railway Act.

[*Assented to 11th June, 1928.*]

HIS Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:— R.S., c. 170.

The *Railway Act*, being chapter one hundred and seventy of the Revised Statutes of Canada, 1927, is amended as follows:—

**1.** Section two hundred and sixty-two of the said Act is repealed and the following is substituted therefor:—

Railway Grade Crossing Fund.

"**262.** (1) The sums heretofore or hereafter appropriated and set apart to aid actual construction work for the protection, safety and convenience of the public in respect of highway crossings of railways at rail level shall be placed to the credit of a special account to be known as "The Railway Grade Crossing Fund," and shall (insofar as not already applied) be applied by the Board, subject to the limitations hereinafter set out, solely towards the cost, not including that of maintenance and operation, of actual construction work for the protection, safety and convenience of the public in respect of crossings (railway crossings of highways or highway crossings of railways) at rail level in existence on the first day of April, one thousand nine hundred and nine, and in respect of existing crossings (railway crossings of highways or highway crossings of railways) at rail level, constructed after the first day of April, one thousand nine hundred and nine, provided, however, that the Board shall not apply any moneys out of The Railway Grade Crossing Fund towards the cost of the actual construction work, for the protection, safety and convenience of the public in respect of any existing crossing (railway crossing of a highway or highway crossing of a railway), at rail level, constructed after the first day of April, one thousand nine hundred and nine, unless and except an agreement, approved of by the Board, has been

 entered

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

entered into between the company and a municipal or other corporation or person by which agreement the municipal or other corporation or person has agreed with the company to bear a portion of the cost of the actual construction work for the protection, safety and convenience of the public in respect of such crossing (railway crossing of a highway or highway crossing of a railway), at rail level, constructed after the first day of April, one thousand nine hundred and nine.

Apportionment of money by Board.

(2) The total amount of money, to be applied by the Board out of The Railway Grade Crossing Fund, under the provisions of this section, in the case of any one crossing, where the cost of the actual construction work in providing the protection, safety and convenience for the public does not exceed one hundred thousand dollars, shall not exceed forty per cent of such cost, and the total amount of money, to be applied by the Board out of The Railway Grade Crossing Fund, under the provisions of this section, in the case of any one crossing, where the cost of the actual construction work in providing the protection, safety and convenience of the public exceeds one hundred thousand dollars, shall not exceed forty per cent of such cost, and shall not in any case exceed one hundred thousand dollars.

Provincial contribution to Fund.

(3) In case any province contributes towards The Railway Grade Crossing Fund, the Board may apportion, direct and order payment out of the amount so contributed by such province for the purpose of the said fund, subject to any conditions and restrictions made and imposed by such province in respect of its contribution.

"Crossing" defined.

(4) In this section "crossing," means any railway crossing of a highway, or any highway crossing of a railway, at rail level, and every manner of construction of the railway or of the highway by the elevation or the depression of the one above or below the other, or by the diversion of the one or the other and any other work ordered by the Board to be provided as one work of protection, safety and convenience for the public in respect of one or more railways of as many tracks crossing or so crossed as in the discretion of the Board determined.

Grant for railway level crossings.

(5) The grants or the unexpended portions or moneys thereof made under the provisions of the Acts, chapter thirty-two of the statutes of 1909, chapter fifty of the statutes of 1914, and chapter thirty of the statutes of 1919, of two hundred thousand dollars each year for twenty consecutive years from the first day of April, one thousand nine hundred and nine, may, from and after the passing of this Act, notwithstanding any provision of any of the said Acts, be expended to aid actual construction work for the protection, safety and convenience of the public in respect of crossings (railway crossings of highways or highway crossings of railways) at rail level in existence on the first

120482

day of April, one thousand nine hundred and nine, and in respect of existing crossings (railway crossings of highways or highway crossings of railways) at rail level, constructed after the first day of April, one thousand nine hundred and nine, subject to the terms and conditions in this section contained."

**2.** Subsection one of section two hundred and ninety-five of the said Act is repealed and the following is substituted therefor:—

Printed copy to be posted up.

"**295.** (1) A printed copy of so much of any by-law, rule or regulation, as affects any person, other than the shareholders, or the officers or employees of the company, shall be openly affixed, and kept affixed, to a conspicuous part of every station belonging to the company, so as to give public notice thereof to the persons interested therein or affected thereby.

Publication of by-law for regulation of highway traffic.

Nothing in this subsection contained shall apply to any by-law for the regulation of highway traffic upon or over a railway bridge, public notice of which by-law shall be sufficiently given, to persons interested therein or affected thereby, by the publication thereof in one issue of the *Canada Gazette.*"

## CHAP. 54

An Act to amend the Railway Act.

[*Assented to 14th June, 1929.*]

HIS Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:— R.S., c. 170.

Railway Act amended.

The *Railway Act*, chapter one hundred and seventy of the Revised Statutes of Canada, 1927, as amended by chapter forty-three of the statutes of 1928, is amended as follows:—

**1.** By inserting the following section immediately after section 41:—

Jurisdiction of Board over tolls on International Bridges.

"**41A.** Notwithstanding anything in any special Act heretofore passed, the Board shall have jurisdiction and control over tolls to be charged in respect of the use for pedestrian, vehicular, tramway, street railway, railway or other like traffic on, over, across or through international bridges owned or operated by any company, and all the provisions of this Act relating to tolls and tariffs shall apply *mutatis mutandis*.

"International bridges" defined.

'International Bridges', for the purposes of this section, shall mean and include bridges or tunnels (including the approaches or facilities connected therewith) over or under any waterway being or running along or across the boundary between the Dominion of Canada and any foreign country."

**2.** Section two hundred and sixty-two of the said Act, as enacted by chapter forty-three of the statutes of 1928, is amended by adding at the end thereof the following subsection:—

Grant for ten years from 1929.

"(6) The sum of two hundred thousand dollars each year for ten consecutive years from the first day of April, one thousand nine hundred and twenty-nine, shall be appropriated and set apart from the Consolidated Revenue Fund of Canada to aid actual construction work for the protection, safety and convenience of the public in respect of

highway crossings of railways at rail level in accordance with the provisions of this section."

**3.** Subsection one of section three hundred and thirty-six of the said Act is repealed and the following substituted therefor:—

Continuous route in Canada.

"**336.** (1) Where traffic is to pass over any continuous route in Canada operated by two or more companies, the several companies shall agree upon a joint tariff for such continuous route and the initial company or an agent duly authorized by power of attorney of such company, shall file such tariff with the Board and the other company or companies, shall promptly notify the Board of its or their concurrence in such joint tariff."

Joint tariffs shall be agreed upon.

**4.** Subsection one of section three hundred and forty-one of the said Act is repealed and the following substituted therefor:—

Filing and publication of joint tariffs.

"**341.** Joint tariffs shall, as to the filing and publication thereof, be subject to the same provisions in this Act as are applicable to the filing and publication of local tariffs of a similar description, except that joint tariffs may be filed by one agent or company, duly authorized by power of attorney of the initial company. Upon any such joint tariff being so duly filed with the Board, the company or companies shall, until such tariff is superseded by another tariff or disallowed by the Board, charge the toll or tolls as specified therein: Provided that the Board may except from the provisions of this section the filing and publication of any or all passenger tariffs of foreign railway companies."

Proviso.

**5.** Paragraph *(k)* of subsection one of section three hundred and eighty-four of the said Act is repealed and the following substituted therefor:—

Leases and contracts.

"*(k)* the particulars of any lease, contract or arrangement entered into, or at any time having been entered into, and the particulars of any financial or business relations relevant to any matter within the jurisdiction of the Board existing, or at any time having existed between such company and any other company or person; and"

**6.** Subsection two of section three hundred and eighty-four of the said Act is repealed and the following substituted therefor:—

Board may require attendance and production.

"(2) The Board may summon, or require the attendance of and examine under oath, any officer, servant or agent of such company or of any other company within the legislative authority of the Parliament of Canada, or person, as to any matters included in such return. or which were required by

120485

notice aforesaid to be returned to the Board, and as to any matter or thing which, in the opinion of the Board, is relevant to such return, or to any enquiry which the Board deems it expedient to make in connection with any of the matters in this section aforesaid; and for such purposes may require the production to the Board of any books or documents in the control of such company or any such other company, or in the control of any such officer, servant, agent or person."

**7.** Subsection five of section three hundred and eighty-four of the said Act is repealed and the following substituted therefor:—

Board may make information public on notice to company.

"(5) The Board may authorize any part of such information to be made public when, and in so far as, there may appear to the Board to be good and sufficient reasons for so doing: Provided that if the information so proposed to be made public by the Board is of such character that such company or any other company within the legislative authority of the Parliament of Canada would, in the opinion of the Board, be likely to object to the publication thereof, the Board shall not authorize such information to be published without notice to such company, or any such other company, and hearing any objection which such company or any such other company, may make to such publication."

## CHAP. 36.

An Act to amend the Railway Act.

[*Assented to 30th May, 1930.*]

HIS Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:— R.S., c. 170.

The *Railway Act*, chapter one hundred and seventy of the Revised Statutes of Canada, 1927, is amended as follows:

**1.** By inserting the following section immediately after section eighty-two:—

"**82A.** Every shareholder shall be entitled to have a certificate of proprietorship signed by the officers designated by the board of directors for the purpose, certifying the number of shares held by him and the class thereof. Where any such certificate is signed by a transfer agent acting on behalf of the company, and by a registrar, the signatures of such officers may be facsimiles engraved, printed or otherwise mechanically reproduced. In case any such officer who has signed or whose facsimile signature has been placed upon such certificate shall have ceased to be such before such certificate is issued, it may be issued by the Company with the same effect as if such officer had not ceased to be such at the date of its issue." Signatures on certificates may be facsimiles.

**2.** Subsection one of section two hundred and fifty-five of the said Act is repealed and the following is substituted therefor:—

"**255.** The railway of the company may, if leave therefor is first obtained from the Board as hereinafter authorized, but shall not without such leave, be carried upon, along or across any existing highway: Provided that the compensation, if any, payable by the company to adjacent or abutting landowners shall be determined under the arbitration sections of this Act in so far as such sections are Railway on highway. Leave. Compensation.

Consent of municipality.

applicable, and provided that the Board shall not grant leave to any company to carry any street railway or tramway, or any railway operated or to be operated as a street railway or tramway, along any highway which is within the limits of any city or incorporated town, until the company has first obtained the consent therefor by a by-law of the municipal authority of such city or incorporated town; and provided that where leave is obtained to carry any railway along a highway the Board may require the company to make compensation to the municipality if the Board deems proper, said compensation to be determined under the arbitration sections of this Act, in so far as such sections are applicable."

**3.** Section three hundred and one of the said Act is repealed and the following substituted therefor:—

Bell and whistle.

"**301.** Every locomotive engine propelled on the railway by steam shall be equipped and maintained with a bell of at least thirty pounds weight and a whistle; and every locomotive engine, car or other mechanism, propelled on the railway otherwise than by steam, shall be equipped and maintained with such signalling appliance or appliances as may be approved by the Board."

**4.** Subsection two of section three hundred and fifty-six of the said Act is repealed and the following substituted therefor:—

Sale of goods.

"(2) If the tolls on live animals or goods liable to deteriorate or perish while in the possession of the company are not paid forthwith on demand, or if the tolls on bulk goods, as hereinafter defined, are not paid within two weeks after demand, or if the tolls on any other goods are not paid within four weeks after demand, the company may, without further notice to the consignee or owner advertise and sell the whole or any part of the goods and out of the money realized from such sale retain the tolls payable and all reasonable charges and expenses of such seizure, detention, advertisement and sale. 'Bulk goods' for the purposes of this subsection shall mean and include carload lots of coal, coal products, wood, sand, gravel, brick, scrap metal, and of such other goods as may be approved by the Board."

Application of proceeds.

"Bulk goods" defined.

## ORDER IN COUNCIL P.C. 2910

CERTIFIED *to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency the Governor General on the 20th day of November, 1931.*

The Committee of the Privy Council have had before them a joint report, dated 19th November, 1931, from the Right Honourable Sir George H. Perley, the Acting Prime Minister, and the Minister of Railways and Canals, submitting:

That the Select Standing Committee on Railways and Shipping of the House of Commons of Canada at the recent session of Parliament in its final report, dated July 16, 1931, to the House of Commons, set out amongst other things, as follows:—

> " Your Committee desire to call the attention of the House to the proposal made by Sir Henry Thornton at one of the sessions of the Committee. He referred to the serious position of the transportation business generally and recommended that a commission be appointed for the purpose of considering the whole question of Canadian transportation. Your Committee regard such a recommendation coming from such a source at this time as worthy of the serious consideration of the Government."

Having regard to the vital importance of transportation to the trade and commerce of Canada, the serious and continuing deficits of the Canadian National Railways System, and the diminished revenues of the Canadian Pacific Railway System, conditions which have been brought about in part by duplication of tracks, facilities and services of every kind and in part by competition by other modes of transportation, particularly motor vehicles operating on highways, the Ministers concur with the proposal that the whole subject be studied by Commissioners with the powers hereinafter set forth.

The Ministers, therefore, recommend as follows:—

1. That the Right Honourable Lord Ashfield, of the City of London, Eng.,
   The Right Honourable Lyman Poore Duff, P.C., of the City of Ottawa, in the Province of Ontario,
   Sir Joseph W. Flavelle, Bart., of the City of Toronto, in the Province of Ontario,
   Beaudry Leman, C.E., of the City of Montreal, in the Province of Quebec,
   Leonor Fresnel Loree, C.E., of the City of New York, in the United States of America,
   Walter Charles Murray, LL.D., of the City of Saskatoon, in the Province of Saskatchewan; and
   John Clarence Webster, M.D., of Shediac, in the Province of New Brunswick,
   be appointed Commissioners under Part I of the Inquiries Act, and that the said The Right Honourable Lyman Poore Duff, P.C., be Chairman.
2. That the Commissioners inquire into the whole problem of transportation in Canada, particularly in relation to railways, shipping and communication facilities therein, having regard to present conditions and the probable future developments of the country, and report their conclusions and make such recommendations as they think proper.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120494

3. That the Commissioners shall have all the powers vested in, or which can be conferred on, commissioners under the Inquiries Act, and that all or any of the powers which can be conferred under Part III of the Inquiries Act may be exercised by any three of the Commissioners.

4. That the Commissioners or any three of them shall have power to call before them such persons as they shall judge likely to afford any information on the subject, to call for information in writing and also to call for, have access to and examine all such books, documents and records as may afford the fullest information on the subject, and to inquire of and concerning the promises by all other lawful ways and means whatsoever.

5. That the Departments of the Government Service of Canada and the Board of Railway Commissioners for Canada shall afford the Commissioners and all persons acting under their authority or by their direction, such assistance and co-operation in the matters of the inquiry as the Commissioners may think desirable.

6. That the Commissioners shall report their findings and conclusions with the least possible delay.

7. That a Commission shall issue to the Commissioners in accordance with the terms hereof.

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) E. J. LEMAIRE,
*Clerk of the Privy Council.*

120495

## THE ROYAL COMMISSION
CANADA

GEORGE THE FIFTH, by the Grace of God of Great Britain, Ireland and the British Dominions beyond the Seas KING, Defender of the Faith, Emperor of India.
To all to whom these Presents shall come, or whom the same may in anywise concern.

GREETING:

WHEREAS pursuant to the provisions of Part I of the Inquiries Act, Revised Statutes of Canada, 1927, Chapter 99, His Excellency the Governor General in Council by Order P.C. 2910 on the twentieth day of November, in the year of Our Lord one thousand nine hundred and thirty-one, copy of which is hereto annexed, has authorized the appointment of Our Commissioners therein and hereinafter named to inquire into the whole problem of transportation in Canada, particularly in relation to railways, shipping and communication facilities therein, having regard to present conditions and the probable future development of the country; and has conferred certain rights, powers and privileges upon Our said Commissioners as will by reference to the said Order more fully appear.

Now know ye that by and with the advice of Our Privy Council for Canada, We do by these Presents nominate, constitute and appoint The Right Honourable Lord Ashfield, of the City of London, England; The Right Honourable Lyman Poore Duff, P.C., of the City of Ottawa, in the Province of Ontario; Sir Joseph W. Flavelle, Bart., of the City of Toronto, in the Province of Ontario; Beaudry Leman, of the City of Montreal, in the Province of Quebec, Civil Engineer; Leonor Fresnel Loree, of the City of New York, in the United States of America, Civil Engineer; Walter Charles Murray, of the City of Saskatoon, in the Province of Saskatchewan, Doctor of Laws; and John Clarence Webster, of Shediac, in the Province of New Brunswick, Medical Doctor, to be our Commissioners to conduct such inquiry.

TO HAVE, hold, exercise and enjoy the said office, place and trust unto the said Lord Ashfield, Lyman Poore Duff, Joseph W. Flavelle, Beaudry Leman, Leonor Fresnel Loree, Walter Charles Murray and John Clarence Webster together with the rights, powers, privileges and emoluments unto the said office, place and trust, of right and by law appertaining, during pleasure.

AND we do further appoint the said The Right Honourable Lyman Poore Duff, P.C., to be Chairman of Our said Commissioners.

AND for greater certainty but not so as to restrict the generality of the foregoing, Our said Commissioners are hereby authorized to engage the services of such accountants, engineers, technical advisers or other experts, clerks, reporters and assistants as they may deem necessary or advisable, and the services of Counsel to aid and assist them in such inquiry.

AND we do hereby require and direct Our said Commissioners to report to Our Governor General in Council their findings and conclusions with the least possible delay.

IN TESTIMONY whereof We have caused these Our Letters to be made Patent and the Great Seal of Canada to be hereunto affixed.

WITNESS: Our Right Trusty and Right Well beloved Cousin and Counsellor, Vere Brabazon, Earl of Bessborough, a Member of Our Most Distinguished Order of Saint Michael and Saint George, formerly Captain in Our Territorial Army, Governor General and Commander-in-Chief of Our Dominion of Canada.

At Our Government House in Our City of Ottawa, this twentieth day of November in the year of Our Lord one thousand nine hundred and thirty-one and in the twenty-second year of Our Reign.

By command,

THOMAS MULVEY,
*Under-Secretary of State.*

# Report of the Royal Commission to inquire into Railways and Transportation in Canada

## INTRODUCTION

*To His Excellency the Governor General in Council.*

May it Please Your Excellency:

1. We the commissioners appointed to inquire into the problem of transportation in Canada, have the honour to report that, in pursuance of the comprehensive terms of reference contained in the Order in Council, P.C. 2910, of November 20, 1931, we have conducted an inquiry into the pertinent aspects of the transportation situation. The more detailed and searching phase of our investigation has, by reason of the seriousness of railway affairs, concerned itself with the position of the two principal railway companies, whose problems, difficult enough under normal conditions, have been aggravated in recent years by the continued depression in world trade. A factor of growing importance also has been the rapid development of mechanized road transport, which has already deprived the railways of much short distance passenger and freight traffic. Within the limits of recognized constitutional authority in such matters we have given consideration to certain features of that development.

2. In the course of our investigations we have held eighteen sittings, occupying fifty days altogether, and have travelled over most of the main line mileage of the two chief railway systems. Throughout our journeys we were accompanied by the responsible officials of both railways, thus enjoying the advantage of almost constant discussion with them of matters relating to the inquiry, and of transportation problems more particularly affecting the territories traversed. Our itinerary included the principal centres of the various provinces, with the exception of Prince Edward Island, the only province of Canada in which railway competition may be said to be non-existent. In the case of Prince Edward Island the provincial Government kindly indicated their willingness to transmit in writing any representations on the general question of transportation they might desire to make. With this exception we have had the benefit of direct conference with the government of each province, which has included, in most instances, a full statement by the provincial Prime Minister of any considerations of a special or local character affecting the subject of our inquiry. The expositions we have received in this way of provincial policy regarding highway construction and motor traffic have been comprehensive and valuable.

At all of the provincial capitals visited, and also at Vancouver, Calgary, Montreal and Saint John, we have conducted, in addition, public hearings, duly advertised, at which representations from public bodies, labour and transport organizations and private individuals were invited and received. A list of witnesses appearing, and of persons or organizations who have filed submissions, is included as an appendix to our report.

120497

## CHAPTER I

### I. OUTLINE OF THE DEVELOPMENT OF TRANSPORTATION IN CANADA[1]

3. At this time Canada may be said to be completing the first century of the development of its transportation facilities on a commercial scale. By the early thirties of the nineteenth century 6,000 miles of post and military roads were constructed, the Lachine, the Rideau and the Welland canals completed, and the construction of the Cornwall canal begun.

4. These canal developments were the result of the successful application of steam to the purposes of navigation. The use of the steam locomotive made possible the establishment, in 1836, of the first Canadian railway. These early roads and railways in general served territory adjacent to the inland waterways and for many years there existed, during the season of navigation, intense competition between these two agencies of transport.

5. This contest continued for many years, but eventually the waterways became of secondary importance. Now, after a long period of unquestioned supremacy, the railways, in turn, find their sphere of influence challenged by the ubiquitous motor vehicle; at the same time the enlargement of navigation facilities lends renewed importance to our inland waterways as an avenue of commerce.

6. In addition, we are on the threshold of a noteworthy development of aerial activities, which is hastening the exploitation of a rich and largely unprospected hinterland.

7. From the earliest days of settlement in Canada, the governing bodies of the country have spent public moneys, extended public credits, and made grants of publicly-owned lands, to provide or assist in providing water, road and rail transportation facilities.

8. Aids to navigation and the construction of canals and their maintenance have been exclusively a charge upon the public treasury. The use of these navigation facilities has, since 1904, been accorded, free of tolls, to the shipping of all countries. A certain revenue is, however, provided by leases, rentals, wharfage and elevator fees.

9. The promise of railway construction formed an integral part not only of the Confederation arrangement of 1867, but also of the terms upon which Prince Edward Island and British Columbia later entered the Dominion. The obligation to the Maritime Provinces was discharged by building entirely at public cost, the Intercolonial Railway from Halifax, N.S., to the St. Lawrence at Rivière du Loup, by the construction of the Prince Edward Island Railway, and the provision of a train ferry between that Island and the mainland.

10. The agreement to connect British Columbia with Eastern Canada by a railway from the Pacific Ocean was fulfilled by the building of the Canadian Pacific Railway. Failing to interest private capital in this project the Govern-

[1] The development of transportation in Canada, and particularly of the railways, has been influenced to such an extent by considerations broadly political in character that a knowledge of the historical background of Canadian transportation is indispensable to an adequate appreciation of the present situation. Since no history of the subject, at once complete and concise, is publicly available, an historical outline is provided, as a necessary introductory feature, reserving for inclusion as an appendix a more extended and detailed historical treatment of the development of Canadian Transportation as a whole.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120498

ment undertook the work as a public enterprise. Later a syndicate, which afterwards developed into the Canadian Pacific Railway Company, entered into an arrangement with the Government to construct this transcontinental line in ten years, from 1880 to 1890. The agreement provided that the country subsidize the company by a gift of twenty-five million dollars, twenty-five million acres of land, and of the railway lines already constructed with public moneys at a cost exceeding thirty-seven million dollars.

11. The company carried through its undertaking in five years in place of ten, during which time the Government paid the Canadian Pacific $10,189,521 for 6,793,000 acres of land relinquished by the company, and guaranteed securities of the company to an amount of $15,000,000 to assist its finances over a difficult period. The company paid the guaranteed bonds upon maturity, and the country was relieved from the responsibility of the guarantee.

12. Eighteen years after the completion of the Canadian Pacific, Parliament (in 1903) authorized the building of the National Transcontinental Railway from Winnipeg, Manitoba, to Moncton, New Brunswick, as a part of the Grand Trunk Pacific project. In 1911, the construction of the Hudson Bay Railway was undertaken, also as a government enterprise.

The three railways, the Intercolonial (including the Prince Edward Island line), the National Transcontinental, and the Hudson Bay, embodying 4,650 miles, constructed exclusively with public moneys, have been operated by or on behalf of the Government of Canada. While prior to 1917 the Intercolonial in certain years paid operating expenses, the three railways have earned nothing by way of interest upon the total investment, which, together with certain deficits on operation, now total $512,000,000.

13. Some years after the completion of the Canadian Pacific Railway, construction was commenced as a private enterprise, upon a line of railway running from Winnipeg in a northwesterly direction, with Edmonton as its objective, and easterly to Port Arthur, Ontario. This line came to be known as the Canadian Northern Railway. It secured substantial cash subsidies, guarantees and land grants from the Dominion Parliament, provincial legislatures and from municipalities. By 1901, the line had been completed easterly to Port Arthur; and by 1905, westerly to Edmonton, Alberta.

14. In 1903, the Grand Trunk Railway, which had been operating for over fifty years in Ontario and Quebec, and owned direct lines from Ontario through the States of Michigan and Illinois to Chicago, determined to extend its lines to the Pacific coast of Canada. They made application to the federal Government for a charter to construct the Grand Trunk Pacific from Winnipeg to the Pacific coast, and to make connection from Eastern Canada to Winnipeg through the United States by way of the company's Chicago lines, and by securing running rights over United States railways to the border of Manitoba.

15. The application was refused, but an alternative arrangement was proposed by the Government which contemplated the construction of the Grand Trunk Pacific from Winnipeg to the Pacific coast, with an eastern connection to be provided through a publicly-owned (National Transcontinental) line from Winnipeg to Moncton, N.B., via the city of Quebec.

If, in 1903, the Grand Trunk Railway Company in the east, and the Canadian Northern Railway Company in the west, had been told they must come together and constitute a second transcontinental line, the country would not have been called upon to face the present gravely alarming situation, while a powerful corporation, with a serviceable railway from ocean to ocean, owned and operated by private capital, would, with the Canadian Pacific and Intercolonial, have given the needed transportation facilities for the present and reasonable future requirements of Canada.

120499

16. The ultimate decision of Parliament led to two transcontinental railways being constructed in addition to the already established Canadian Pacific Railway:—

The first, by authorizing the construction of the Grand Trunk Pacific Railway from Winnipeg west to the Pacific coast, which was financially assisted by important guarantees by the federal Government, together with the construction of the National Transcontinental Railway from Winnipeg east to Moncton, via the city of Quebec, as a public enterprise at public cost. At Moncton the new line would connect with the Intercolonial, through to Halifax, and also give access to the port of Saint John, N.B.

The second, by authorizing the Canadian Northern Railway (which received substantial cash subsidies from the Dominion Government, and guarantee of securities) to continue its line westerly from Edmonton to the Pacific coast, and to extend its line easterly from Port Arthur through the provinces of Ontario and Quebec.

Thus there developed by the authority of the Parliament of Canada, the tragedy of three transcontinental railways (providing, with branches, over four thousand miles of unnecessary lines), when two were all the business of Canada required or could support.

17. The outbreak of war in 1914 found the uncompleted transcontinental lines in serious financial difficulties. In the interval between 1914 and 1916 substantial amounts by way of direct loans and the guarantee of securities were obtained from the Dominion Government. In 1916 the position of the railways was such that the Government appointed a Royal Commission to inquire into the general problem of transportation in Canada, with particular reference to the status of each of the three transcontinental railways, the question of their reorganization, or their possible acquisition by the State.

18. The Royal Commission issued its report in 1917, and a majority of the Commissioners recommended that the control of the Canadian Northern, the Grand Trunk and the Grand Trunk Pacific railways, together with that of the original government lines, be transferred to a new body to be known as the Dominion Railway Company, and to be operated "as one united system on a commercial basis under their own politically undisturbed management, on account of, and for the benefit of, the people of Canada".

19. Before these recommendations had the consideration of Parliament, the affairs of the Canadian Northern became critical. The Dominion Government having already provided, or assumed responsibility for, the bulk of the capital of that company, determined to acquire the property as recommended by the Royal Commission. At that time the Government owned 40 per cent of the Canadian Northern common stock, acquired in return for subsidies and guarantees of securities, and in November, 1917, legislation authorizing the purchase of the remaining 60 per cent of the common stock was adopted by Parliament. Arbitrators were appointed to determine the value of these remaining shares, but a limit was set by Parliament of $10,000,000. Although the arbitrators awarded a somewhat higher amount the sum paid was $10,000,000.

20. The Government, also as recommended by the Royal Commission, declined to release the Grand Trunk from its Grand Trunk Pacific obligations and opened negotiations, early in 1918, for the acquisition of both properties. The proposed basis was that the Dominion Government should assume all of the liabilities and obligations of both companies and pay to the Grand Trunk Railway in perpetuity an annual sum equal to the average dividends of the previous ten years. This arrangement was not accepted by the Grand Trunk Railway and negotiations were in progress when, in March, 1919, the Grand Trunk Pacific found itself unable to carry on, and, its parent company, the

120500

Grand Trunk Railway Company, being unable to provide the necessary financial assistance, operation of the railway was continued by the Canadian Northern Board acting on behalf of the Minister of Railways as Receiver of the Grand Trunk Pacific Railway Company. The Canadian Northern Board was at that time operating the original government railways under the title "Canadian National Railways."

21. In October, 1919, the Government agreed to become responsible in perpetuity for the dividends on certain Grand Trunk debenture and guaranteed stocks, and to acquire, at a valuation to be determined by arbitration, the preference and common shares. The arbitration was concluded in September, 1921, and the majority of the arbitrators decided that the preference and common shares of the Grand Trunk Railway had "no value."

22. The effect of these acquisitions was to make the country responsible for the ownership and operation of more than 22,000 miles of railway, including the National Transcontinental and Intercolonial railways. Since then various railway lines, chiefly in Quebec, Nova Scotia and New Brunswick, have been purchased which, together with the construction of branch lines in the Prairie Provinces and elsewhere, has increased the mileage owned and operated by the Government to 23,880 miles.

23. In 1923, these publicly-owned railway properties, together with certain subsidiary corporations, were included in the Canadian National Railway System, under the control and direction of a President and Board of Directors appointed by the Governor General in Council.

24. The Dominion Parliament has voted unstinted financial support to the administrators of the National System. Not only have the requisitions of the Board of Directors been freely met, but the management have from time to time recommended, the Government has approved, and Parliament has authorized and directed the construction of additional branch lines and the purchase of more or less bankrupt lines.

25. As a result, the Canadian Pacific Railway Company, the largest taxpayer in Canada, has been subjected to the competition of publicly-owned and operated railway lines, supported by the financial resources of the country. They had honourably discharged their original contractual obligations with Parliament, and the company's lines had played a great part in binding together the western and eastern provinces of the Dominion. By common consent, the company's administrators had brought faith, courage and invincible energy to the task of building its lines through the undeveloped west. The company's achievement commanded the admiration of both railway operators and the public, and has been a material factor in causing Canada to be favourably known upon three continents. Their operations brought profit to shareholders, and the enterprise became a national asset of acknowledged value and importance to the Dominion.

26. Confronted with the unrestrained competition of the publicly-owned railway, the Canadian Pacific claimed that to protect their business it was necessary that they should meet their competitors in the construction of branch lines in the prairie sections, and generally in the character of service and equipment incident to the activity of their aggresive rival.

27. If good sense had prevailed the executive officers of the two systems would, in 1923, have planned together to meet the transportation requirements of the country, and would have refused to promote or permit irrational and wasteful competition. Irrational competition in branch line construction, and in widely varied services, developed and intensified inherently unhealthy operating conditions in the Canadian National Railways, incident to ownership and operation of one unrequired transcontinental line. These conditions, with

120501

the unexpected severity of a long period of depression, and consequent reduction in tonnage and passengers available for both railways, have imposed upon the Canadian public, as owners of the National System, capital expenditures and losses of great magnitude, and have caused anxiety and deep concern to the holders of securities of the Canadian Pacific Company.

28. Government ownership of railways on a large scale as a national policy was not contemplated or planned by any Government and was not submitted for adoption to the people of Canada. But when in 1917, the Government refused to permit the Canadian Pacific Railway Company to negotiate for the majority shares of the Canadian Northern, there was practically no escape from Government ownership of all the railways now comprised within the Canadian National Railway System. The consequent completion and operation of the hitherto privately-owned and operated lines with the publicly-owned railways followed as a matter of course. Thus by a combination of contractual obligations and parliamentary measures, the country was projected into the railway business on a large scale.

## II. ADMINISTRATION, CANADIAN NATIONAL RAILWAYS, 1923-1931

29. As will be seen from the preceding outline of their development, the Canadian National and the Canadian Pacific Railway systems were established under wholly different conditions. In comparing the results of the operations of the two companies, this important difference should at all times be kept in mind.

30. The Canadian Pacific Company has been developed as a single, unified system. The mileage added has been complementary to existing mileage.

31. The Canadian National Railway, on the other hand, represents for the most part the consolidation of lines that were constructed by private companies and which were, in many respects, competitive systems. Hence there came to be included within the consolidated system extensive track mileages which are duplications. This applies not only to the main line, but to branch lines. In short, while the mileage of the Canadian Pacific has been complementary, the Canadian National system, developed under different conditions, has been handicapped by heavy mileage of non-complementary lines, and the elimination of these duplications has yet to be accomplished.

32. Following upon the consolidation of many lines into the Canadian National system, in 1923, the railway has been energetically administered, and has deservedly won approval by its success in welding together the various working forces of the separate companies in the consolidated system.

33. Running through its administrative practices, however, has been the red thread of extravagance. The disciplinary check upon undue expenditure, inherent in private corporations because of their limited financial resources, has not been in evidence. Requisitions of the management have been endorsed by governments, and successive parliaments have voted money freely, if not lavishly.

34. Within the railway organization there has been freedom in expenditure and encouragement in plans for expansion and extension of services which were inconsistent with prudent administrative practice. The administration failed to realize that this country, with the greatest railway mileage in the world in relation to population, could not afford further capital and maintenance expenditures for unwarranted branch lines, for de luxe services, for unrequired hotels, for the building of ships in competitive service to be shortly abandoned; and, generally, for costly adventures in competitive railways out of proportion to the needs of the country.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

1-20502

35. There has been in the country a general sense of expectancy that the publicly-owned enterprise should give all and sundry the railway service desired, and there is no evidence that the representatives of the people in Parliament exercised any appreciable restraint upon railway estimates placed before them.

## III. CANADIAN NATIONAL FINANCING

36. The cash outlay of the Dominion Government and the guarantee of securities for the railways now comprising the Canadian National System had, up to December 31, 1931, amounted to $2,536,665,089. This sum includes amounts expended on the Eastern Lines of the Canadian National System and on the Hudson Bay Railway, a Government enterprise which is operated by the Canadian National management on behalf of the Government.

| | | |
|---|---|---|
| *(a) Cash* Outlay— | | |
| Investment in Government Railways | $ 390,751,676 | |
| Deficits of Government Railways (to December 31, 1922) | 52,900,955 | |
| Working capital for Government Railways | 15,748,922 | |
| Cash subsidies to Railways | 44,055,120 | |
| Cash loans to Canadian National System (in which are included operating deficits) | 639,414 489 | |
| Deficits on Eastern Lines (excluding 20% reduction account Maritime Freight Rates) | 26,081,222 | |
| Acquisition of Canadian Northern stock | 10,000,000 | |
| Other payments | 22,508,815 | |
| | | $ 1,201,461,199 |
| *(b) Credit:* Liabilities outstanding— | | |
| Guarantees of Railway securities | $ 970,562,290 | |
| Unguaranteed (nominally) Canadian National Railways securities | 305,894,917 | |
| Liabilities of Northern Alberta Railways | 10,000,000 | |
| | | $ 1,286,457,207 |
| Total, Railways now comprising Canadian National System | | 2,487,918,406 |
| Hudson Bay Railway and Terminals | | 48,746,683 |
| Grand total | | $ 2,536,665,089 |

37. It will be observed that the Dominion Treasury has expended on or furnished to these publicly-owned railway properties cash amounting to one billion two hundred and one millions of dollars ($1,201,000,000) exclusive of the Hudson Bay Railway.

38. The Treasury has charged, but has not received from the Canadian National Railways, simple interest upon its cash loans. There is no reason to believe that the capital sum will ever be repaid, or that it will have at any time a realizable value.

39. The Dominion Treasury is also liable for payment of the guaranteed interest upon $970,562,290 of bonds, as well as the principal sum at maturity. In addition, by provision for deficits and refunding, it accepts liability for the interest upon and principal sum of $315,894,917 of bonds in the hands of the public, which, though not specifically guaranteed, are, in effect, a liability of the Government, as the bonds are secured by mortgage upon lines which are a necessary part of the National System.

40. In the absence of net revenue sufficient to cover the interest charges (amounting in 1931 to approximately $56,000,000) upon the securities in the hands of the public, the country must continue to advance the cash necessary to pay the unearned interest. The country must also provide the cash necessary to meet all maturing obligations and all capital expenditures for additions, betterments and new equipment.

1-20503

## IV. COMPARATIVE EARNINGS

41. A comparison of the earnings of these two transcontinental systems for nine years (1923-1931 inclusive) is herewith set up:—

| — | Canadian National | Canadian Pacific |
|---|---|---|
| Mileage | 23,880 | 16,886 |
| REVENUE | | |
| Transportation of— | | |
| Freight | $ 1,714,051,687 | $ 1,278,281,397 |
| Passengers | 321,530,922 | 303,421,444 |
| Mail | 33,158,717 | 34,177,966 |
| Express | 124,337,077 | 97,887,917 |
| Other services, including telegraph, storage, freight, and baggage, demurrage, switching, etc | 144,715,491 | 172,034,966 |
| *Total Operating Revenue* | $ 2,337,793,894 | $ 1,885,803,690 |
| DEDUCT OPERATING EXPENDITURES | | |
| Maintenance of roadway and structures | $ 433,085,344 | $ 279,021,976 |
| Maintenance of rolling stock | 449,367,762 | 319,010,624 |
| Sundry Traffic Expenses, solicitation of business, publishing and filing tariffs, etc | 66,025,579 | 54,375,038 |
| Transportation Expenses, including wages of train crews, locomotive fuel, services at stations, etc | 1,023,650,171 | 745,349,913 |
| Miscellaneous operations, including dining service, grain elevator operation, etc | 21,913,637 | 32,996,863 |
| General Expenses, including salaries and expenses of officers and clerks, etc., legal expense, etc | 73,162,366 | 43,170,152 |
| Less Credit for that portion of these expenses incurred in making improvements, trains carrying construction materials, etc | 10,622,812 | 705,838 |
| Total Operating Expenses | $ 2,056,582,047 | $ 1,473,218,728 |
| *Operating Surplus* | $ 281,211,847 | $ 412,584,962 |
| EXPENDITURES DEDUCTED FROM OPERATING SURPLUS | | |
| Taxes | 45,426,397 | 47,980,820 |
| Uncollectable revenue written off | 441,313 | Dr. 293 |
| Rentals for rolling stock hired less rentals received from others | Dr. 23,794,451 | Cr. 15,443,971 |
| Rentals paid less rentals received in connection with properties used jointly with other carriers | Cr. 576,417 | 271,936 |
| Total Expenditures from Operating Surplus | $ 70,241,578 | $ 32,265,206 |
| Net Railway Operationg Income | 210,970,269 | 380,319,756 |
| *Add* Net Income from properties not part of Transportation plant, but connected thereto, e.g., telegraphs, hotels, steamships, etc., also adjustments which affect the Income of the Period; and Canadian Pacific Railway pensions (included by Canadian National Railway in General Expense) | $ 8,759,749 | $ 54,698,993 |
| Amount available for payment of interest and dividends | $ 219,730,018 | $ 435,018,749 |
| Interest paid on securities in hands of public | $ 387,782,775 | $ 122,138,771 |
| Discount on securities not cleared | $ 14,389,776 | |
| Deficit | $ 182,442,533 | |
| Surplus available for Dividends | | $ 312,879,978 |

## V. THE FINANCIAL POSITION—BOTH SYSTEMS

42. Net income available for interest and dividends is the significant factor in the economic life of a railway system. In the case of the two Canadian railways there has been a marked fall in net income in the years since 1928. That the true picture may appear, figures are appended for the nine-year period 1923 to 1931 inclusive. These show in separate columns the net earnings from rail-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120504

way operations after taxes have been met, the net income receivable after charges for hire of equipment, joint agreements, etc., had been met, and, finally, the interest demands.

The Canadian Pacific, in 1923 and for some years thereafter, was in a strong position in this respect, as the following statement shows:—

| Year | Railway Operating Income | Net Income | Interest |
|---|---|---|---|
| 1923 | $ 34,377,815 | $ 45,394,457 | $ 10,950,933 |
| 1924 | 33,947,358 | 43,378,187 | 11,502,733 |
| 1925 | 40,466,752 | 47,832,609 | 11,912,414 |
| 1926 | 46,481,423 | 52,670,173 | 12,321,890 |
| 1927 | 42,195,457 | 48,008,141 | 13,107,790 |
| 1928 | 55,527,884 | 61,864,295 | 13,007,722 |
| 1929 | 47,454,900 | 55,573,280 | 13,800,618 |
| 1930 | 37,935,359 | 52,467,008 | 16,769,154 |
| 1931 | 26,216,901 | 30,267,126 | 18,765,517 |

During these years dividends on preferred and common shares totalling $278,941,381 were paid and $36,375,124 added to surplus. In these figures, however, are included Special Income from Steamships, Lands, Mines and other investments amounting to $65,382,600. It was not until 1931 that the decline in net income, coupled with the increase in interest charges on the funded debt, began to give concern by leaving an insufficient margin for dividends.

43. The reduction in net income from the peak of 1928 was more pronounced in the case of the Canadian National Railways, as will appear from the following:—

| Year | Railway Operating Income or Deficit | Net Income or Deficit | Interest due Public |
|---|---|---|---|
| 1923 | $ 17,082,972 | $ 13,501,649 | $ 35,041,380 |
| 1924 | 13,236,871 | 14,772,328 | 38,361,704 |
| 1925 | 28,746,699 | 30,443,853 | 40,438,235 |
| 1926 | 42,215,214 | 41,586,242 | 39,197,233 |
| 1927 | 36,712,344 | 36,325,419 | 40,526,096 |
| 1928 | 49,557,977 | 44,449,780 | 41,810,879 |
| 1929 | 36,370,098 | 32,095,275 | 45,503,979 |
| 1930 | 16,045,379 | 15,730,227 | 51,316,121 |
| 1931 | (Deficit) 4,626,419 | (Deficit) 5,282,650 | 55,587,145 |

From the foregoing it will be noted that the increasing demands for interest upon income account added greatly to the embarrassment of the Canadian National net position, whereas the reverse was the case with the Canadian Pacific, whose income from subsidiary sources was available to augment the net earnings. It will also be observed that the decline in the net income of the Canadian Pacific between 1928 and 1931 was only $31,597,169, whereas that of the Canadian National declined by $49,732,430. On the other hand, the interest charges of the Canadian Pacific over the same period increased by $5,757,795, while those of the Canadian National increased by $13,776,266.

Taking the years 1923 and 1931 of the nine-year period, the drop in net income in the case of the Canadian Pacific was $15,127,331 and of the Canadian National, $18,784,299. The interest charges grew from $10,950,933 to $18,765,517 over the same period in the case of the Canadian Pacific, and from $35,041,380 to $55,587,145 in the case of the Canadian National. The latter sum is the interest due the public only by the Canadian National and does not take in account advances from the Government, the interest on which in 1931

120505

amounted to an additional $32,643,624. In 1923 the interest on loans and advances from the Government amounted to $30,157,943. Since reorganization there has been an increasing reliance upon railway borrowings under Government guarantee, and a lessening of cash loans from the public treasury.

The losses of the National System during the period 1923-1931 were:—

| | |
|---|---|
| Excess of interest due public over Net Income | $ 168,052,757 |
| Interest on Government Loans | 288,010,438 |
| | $ 456,063,195 |

In arriving at this amount, and in accordance with established practice, no account is taken of interest on the capital investment in the Canadian Government Railways (i.e. the Intercolonial and National Transcontinental lines), nor have depreciation reserves been set up except in the case of lines operated in the United States.

## VI. ACCOUNTING METHODS

44. In connection with the foregoing statement of operating results, and also with respect to the comparative statement of capital expenditures which is to follow, it is necessary to make reference to certain differences in accounting methods of the two companies.

The accounting practice relative to new equipment differs. The Canadian National charges the entire cost of new equipment to its investment account. The Canadian Pacific charges part of the cost to a reserve account built up from its operating revenues, and the balance to its investment account. With both companies maintenance of equipment including major repairs and retirements of equipment are charged to current operating expenses. Since 1930 the practice of the Canadian Pacific has been uniform with that of the Canadian National in charging the entire cost of new equipment to its investment account.

45. Neither company provides reserves for depreciation for its Canadian lines; no depreciation is provided for in connection with telegraphs, hotels, steamships, or for rolling stock and other property of subsidiaries.

In the United States both railways follow the practice of setting up depreciation on equipment as prescribed by the Interstate Commerce Commission.

46. With the exception of provision for depreciation the Interstate Commerce Commission classification of accounts is followed by the Canadian National in its books, and in the form of its annual report. The Canadian Pacific, in setting up its accounts, does not follow the Interstate Commerce Commission classification, though it is claimed for the Canadian Pacific Railway that the classification is substantially the same, and that in all ordinary distribution of accounts there would be no major differences. But as regards Telegraphs, Express, Steamships and Pensions the Canadian Pacific has followed one method and the Canadian National another.

47. In the annual returns to the Bureau of Statistics of the Dominion both companies are obliged to follow a standard classification of railway accounts laid down by the Bureau. The form of return, while in general similar to that required by the Interstate Commerce Commission, does not include provision for depreciation reserves.

48. In our analysis of the Canadian National Railway accounts it has been necessary to recast the operating figures since 1927 to include the Eastern Lines with the System figures.

The Maritime Freight Rates Act of 1927, as applied to the Canadian National Railways accounts, results in the exclusion of all operations of the company east of Levis from the System figures and the production of a separate operating return.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120506

No good purpose is served by such a division in the accounts, and a great deal of confusion arises through the present method of presenting two separate deficits.

This commission is of the opinion that the Maritime Freight Rates Act should be applied to the Canadian National Railways in a similar manner to that of other railways within the territory described in the Act, and that steps should be taken to provide for the inclusion of Canadian National Eastern Lines operating accounts as part of the System accounts, so that the Canadian National Income Deficit shall be all-inclusive.

120507

# CHAPTER II

## CAPITAL EXPENDITURES

49. From the following statement of capital expenditures it will be seen that, in the nine-year period 1923-1931 inclusive, the investment account of the two systems was increased by $805,122,311. This amount includes the construction and acquisition of branch lines, terminal developments, additions and betterments to roadways, improvements to rolling stock, and river services, coastal services, hotels, telegraphs and, in the case of the Canadian Pacific, ocean steamships. Of this total the Canadian National expended $456,345,456, and the Canadian Pacific, $348,776,855.

### I. CAPITAL EXPENDITURES, 1923-1931

| — | Canadian National | | Canadian Pacific |
|---|---|---|---|
| | $ | $ | $ |
| 1. New lines constructed or acquired : | | | |
| a. In Canada | 89,908,940 | | 70,414,666 |

| Total | | 456,345,456 | 298,505,519 |
| 11. Ocean Steamships | | | 50,271,336 |
| | | 456,345,456 | 348,776,855 |

### II. BRANCH LINE EXPENDITURE

50. An outstanding feature of this large expenditure is the amount spent on branch lines. The two railways expended, during the nine-year period, $162,451,546 in the construction and acquisition of branch lines totalling 5,018·60 miles. A policy of co-operation would have avoided a considerable

53727—2½

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120508

part of this expenditure, probably one-third. This mileage is equivalent to the provision of a line of railway extending from Halifax to Vancouver and back again to the Manitoba boundary.

This branch line expenditure may be summarized as follows:—

| — | Construction | Acquisition | Total |
|---|---|---|---|
| Canadian National Railways | $ 73,256,570 | $ 18,780,309 | $ 92,036,879 |
| Canadian Pacific Railway | 65,067,288 | 5,347,378 | 70,414,666 |
| Total | $ 138,323,858 | $ 24,127,687 | $ 162,451,545 |

MILEAGE INVOLVED

| | | | |
|---|---|---|---|
| Canadian National Railways | 1,895·33 | 649·87 | 2,545·20 |
| Canadian Pacific Railway | 2,265·9 | 207·5 | 2,473·4 |
| Total | 4,161·23 | 857·37 | 5,018·60 |

51. The foregoing statement does not take into account the acquisition, in 1929, on joint account for the two systems, of the Northern Alberta railways from the Alberta provincial government, comprising 915 miles of line, and costing $30,000,000.

52. Canadian National expenditures by provinces for lines constructed were as follows:—

| | |
|---|---|
| Nova Scotia | $ 3,755,699 |
| Prince Edward Island | 367,708 |
| Quebec | 9,056,573 |
| Ontario | 3,413,313 |
| Manitoba | 9,862,746 |
| Saskatchewan | 30,803,441 |
| Alberta | 8,658,296 |
| British Columbia | 5,210,854 |
| | $ 7,128,630 |
| Michigan (U.S.A.) | 2,127,940 |
| Total Expenditure | $ 73,256,570 |

53. Branch line expenditures by the Canadian Pacific, 1923-1931, by provinces, were:—

| | |
|---|---|
| Quebec | $ 3,971,062 |
| Ontario | 633,486 |
| Manitoba | 72,225 |
| Saskatchewan | 38,694,673 |
| Alberta | 18,135,401 |
| British Columbia | 3,560,441 |
| Total Expenditure | $ 65,067,288 |

120509

## III. COSTS OF BRANCH LINE CONSTRUCTION

| — | Canadian National | | Canadian Pacific | |
|---|---|---|---|---|
| | Miles | Average cost per mile | Miles | Average cost per mile |
| Lines under construction January 1, 1923, placed in operation 1923-31 | 319·21 | $ 40,214 | 324·1 | $ 35,470 |
| Lines started subsequent to January 1, 1923, placed in operation 1923-31 | 1,077·42 | 48,396 | 1,516·4 | 31,763 |
| Lines under construction, December 31, 1931 | 498·70 | 51,640 | 425·4 | 30,229 |
| Total | 1,895·33 | $ 47,872 | 2,265·9 | $ 32,005 |

Excess cost Canadian National construction, 1,895·33 miles, at $15,867 per mile ..... $ 30,073,201

54. It will be observed that the average cost per mile in the case of the Canadian National has shown a progressive increase rising from $40,214 to $51,640 over the period, while the average cost per mile of the Canadian Pacific over the same period has declined from $35,470 to $30,229. The cost of individual branch lines varies not only as between the two systems but as between branches of the same system; nevertheless, a majority of the lines were built in similar territory for like purposes. This difference in costs represents an addition to the annual interest charge of almost $800 per mile.

## IV. BRANCH LINE CONSTRUCTION POLICIES

55. Canadian railway development during the past decade has consisted almost entirely of the construction of branch lines and both companies have followed practically the same policy. Your commissioners have questioned the representatives of both lines as to justification for the construction or acquisition of this additional mileage. The explanations given are not such as to convince us that this policy has been sound or wise.

56. On behalf of the Canadian Pacific it was stated that the company had been forced to anticipate the building of branch lines, the construction of which might have been deferred without injury to the public, and that protective lines had had to be projected under a threat of invasion by the Canadian National.

57. The Canadian National stated that to refrain from branch line construction would result in the system being deprived of any opportunity for reasonable and proper development. Strategic territories, contiguous to their main lines, would be entered by their rival and, while admitting that they entered upon the construction of lines not immediately required, they defended this policy on the ground that to open up new territory in anticipation of settlement and immigration, and to maintain the company's relative position with regard to the rival transport enterprise, was in the long run justified.

58. To sum up, it is clear that there was intense rivalry between the two systems in new territory, particularly in the provinces of Saskatchewan and Alberta. The construction program of one company was responded to by an equal or greater program of construction of the other. The development of this territory did not meet expectations, and the railways now find themselves with additional traffic mileage and an increased burden of capital charge.

59. It would be fruitless at this stage to apportion the blame for the competition in branch line construction, but there is no doubt as to the disastrous effects of this competition, and it is imperative that conditions be imposed that will make impossible a repetition of the rivalry in the extension of railway mileage that marked the period from 1923 to 1931.

## V. ACQUISITION OF BRANCH LINES BY PURCHASE

60. In 1914, the Government acquired the New Brunswick and Prince Edward Island Railway. This railway was necessary to provide a connection for the Prince Edward Island train ferry. In 1916, the Quebec and Saguenay Railway was added to the Government railways. Between 1918 and 1920, nine other short railways were acquired by the Government, making altogether an addition of eleven short railways to the Government railways. In 1929, a further six short railways in Eastern Canada were taken over by the Canadian National Railways. The total cost of these railways, including the amounts spent on betterments and improvements, amounts to approximately $35,000,000.

| Rehabilitation | | 844,271 | | |
| | | | 6,764,632 | 35,413 |
| Montreal Tram Lines | 10·68 | | | |
| Cost | | 1,278,202 | | |
| | | | 1,278,202 | 119,682 |
| Total | 649·89 | | 18,780,309 | |
| Grand total | | | $ 34,981,654 | |

61. In explaining the 1929 acquisitions it was stated by representatives of the Canadian National Railways that the "technical" recommendation to purchase came from the Canadian National management but that, with regard to some of them, it was recognized that they were not of advantage from a strictly railway point of view. All of them were, however, in a territory served by the Canadian Government Railways and were natural adjuncts to that system. It was also stated that the service on these short lines under private ownership had been, for the most part, unsatisfactory, and that this led to a strong public demand that the Government should take over the railways. This agitation finally resulted in the lines being taken over, although it was admitted that the condition of these roads and their earning power were such that they must be a burden on the railway system. The recommendation of the

120511

management is understandable under the circumstances, but the commission believes that it would have been better had the Government assumed this burden directly and thus avoided saddling the railways with capital charges and operating expenses resulting from the purchase of railways based solely on a public policy.

62. During the years 1923 to 1931 the Canadian Pacific also took over four short lines, two in Western and two in Eastern Canada. The cost of these acquisitions was:—

| | Miles | | Cost per mile |
|---|---|---|---|
| Algoma Eastern Railway | 86·1 | $ 3,462,500 | $ 40,215 |
| Hereford Railway | 22·5 | 46,378 | 2,061 |
| Lacombe and Northwesterly Jackson-Breton | 72·0 | 1,773,700 | 24,635 |
| Manitoba Great Northern | 26·9 | 64,800 | 2,409 |
| Total | 207·5 | $ 5,347,378 | |

## VI. HOTELS

63. The Canadian National and the Canadian Pacific Railways own twenty hotels and twelve summer resorts, and are financially interested in a number of other hotels and pleasure resorts. In the case of the Canadian National the hotels and resorts are operated as part of the railway organization; in the case of the Canadian Pacific they are separate organizations.

64. The Canadian National hotel investment, at December 31, 1931, amounted to $31,828,234, and the Canadian Pacific, $71,148,772, a total of $102,977,006.

65. The following statements show the total investment in hotels at December 31, 1922, and also the investment at December 31, 1931. It will be seen from this statement that the Canadian National increased its investment in hotels during that period by 229 per cent and that the Canadian Pacific increased its investment by 193 per cent.

| Grand totals | 33,935,183 | 102,977,006 | 69,041,823 |

66. The financial results of the operation of the hotels as shown by the following statements do not include any sums for interest on the investments nor for depreciation. It will be seen that the hotels belonging to the Canadian National show an actual operating loss of $2,130,924 in the nine-year period. If interest on investment and an adequate sum for depreciation are included, this loss would be substantially increased. For the Canadian Pacific the statement shows an operating profit of $7,468,827, but here again if interest on investment and an adequate allowance for depreciation are included this profit would be converted into a substantial loss.

| | 63,112,829 | 55,644,002 | 7,468,827 |

NOTE:—The Canadian Pacific excludes investments on hotels and resorts where they do not hold control.

67. An analysis of investments in hotels reflects similar results from competitive conditions to those which prevailed between the two railways in the larger sphere of operations, with practically similar results—the Canadian National steadily increasing its investment despite increasing losses, and the Canadian Pacific adding to its investment to an even greater extent than its competitor, without commensurate return on the investment.

68. Both the Canadian National and the Canadian Pacific acted on the assumption that, while these hotel ventures had not been profitable in themselves, they might be essential from the standpoint of larger policy since they would afford the necessary stimulus to passenger traffic.

69. The Canadian Pacific has stated that in no case has that company built an hotel in any city where an hotel had already been erected by its competitor. This cannot be said of the Canadian National, but, in fairness to that company, it should be mentioned that their hotel at Winnipeg was constructed in connection with the Grand Trunk Pacific venture, and taken over with that property.

70. There are two modern hotels at Halifax where one would have been ample for the requirements of the public. The Canadian Pacific is interested to the extent of $350,000 in the Lord Nelson Hotel, and the Canadian National has invested $2,440,928 of public money in a terminal hotel originally estimated to cost one-half of that amount.

71. Duplication of hotel facilities on a large scale is also under way at Vancouver. There this commission held its sessions in the shadow of an immense hotel structure in course of erection for Canadian National Railways, on which $5,958,812 has been expended to December 31, last, and $4,750,000 additional will be required to complete. The Canadian Pacific has a first-class hotel almost directly opposite this new hotel, on which they have expended $6,337,412.

72. Whether on the grounds of policy or for reasons which may have seemed convincing at the time, the fact remains that very large sums have been invested in hotels which were not justified from any point of view, investments which could have been avoided if there had been a spirit of co-operation on the part of the management of both systems. It is a deplorable example of a wasteful expenditure of public and private money and one that places a permanent serious financial burden upon both systems.

## VII. COASTAL STEAMSHIP SERVICES

73. When the Canadian National Railways was constituted in 1923, it had a service of steamships on the Pacific coast between Vancouver and Prince Rupert with additional sailings to Alaska during the summer months. This service was established by the Grand Trunk Pacific Railway when that company extended its railway to Prince Rupert. For a time it also provided a steamship service between Vancouver, Victoria and Seattle in what was generally known as the "Tri-City Service", a service which had already been provided by the Canadian Pacific Railway. This tri-city service was abandoned when the Grand Trunk Pacific got into financial difficulties, and consequently the service between Vancouver, Victoria and Seattle was provided only by the Canadian Pacific Railway with a fine fleet of steamers giving a satisfactory service.

74. Up to 1929 the Canadian National Railway steamers on the west coast, providing, as already explained, a service between Vancouver and Prince Rupert, consisted of four boats representing an investment of $1,480,000. The operating net revenues had always been negligible and in one year there was an actual operating loss. At no time were the earnings sufficient to provide any return upon the capital invested.

75. Nevertheless, the Canadian National Railways decided to extend and improve their coastal services and in their budget for 1929 a sum of $5,235,000 was included for the purchase of four steamships for use on the Pacific coast. The reasons given were that the traffic, particularly tourist traffic, on the Vancouver-Prince Rupert-Alaska route was increasing, that the steamships on this service were old, and that at times it was difficult to handle all of the traffic that offered. It was also stated that the Prince Rupert, one of the original fleet, had been damaged in an accident, and that, during the time it was laid up, traffic had to be refused. The estimates were adopted and orders placed for the ships.

76. The vessels were constructed at a cost which exceeded the estimates by $1,500,000. The desire for increased speed and luxurious equipment beyond that provided by their competitor, the Canadian Pacific Railway, explains not only this increase but also the fact that the approximate cost of each vessel exceeded the average cost of the Canadian Pacific vessels by roundly $900,000. The following tables show the expenditure for each company and for each vessel within the period 1923-1931:—

CANADIAN NATIONAL

77. Two of the four new boats, costing $4,300,000, were placed on the "Tri-City Service" between Vancouver, Victoria and Seattle, in competition with the Canadian Pacific steamships engaged on that service. Improvements

120515

to the docks were found to be necessary for the accommodation of the new vessels and roundly $775,000 was spent for this purpose. While the improvements were being made to the dock at Vancouver, the work was swept by fire, and the dock had to be rebuilt at an additional cost of $228,000, bringing the total outlay for improved dock accommodation to more than $1,000,000. The capital investment in vessels and improvements to docks increased from $1,469,000 in 1928 to $8,176,582 at the end of 1930.

78. The "Tri-City Service" of the Canadian National was inaugurated in August, 1930, and was discontinued in September, 1931. The operations on the Pacific coast as a whole, increased the annual loss to the Canadian National System from $98,248 in 1928 to $673,218 in 1930. These figures include interest, but allow nothing for depreciation. The net income of the Canadian Pacific from services on the Pacific coast fell from $1,521,000 in 1929 to $731,600 in 1930.

79. It is impossible to believe that any public interest was served by this duplication of coastal services. Any success that might have come to the Canadian National could only have been largely at the expense of the Canadian Pacific.

The Canadian National was at some disadvantage in not having a service of steamships under its own control, but this situation could have been met had the managements of the two systems been willing to enter into a working arrangement. This is another instance where a willingness to co-operate would have avoided a sacrifice of funds and obviated the heavy losses which fell upon both systems.

## VIII. INCREASE IN ASSETS AND LIABILITIES

80. From January 1, 1923, to December 31, 1931, the Canadian National increased its total assets by $452,325,052, and its total liabilities by $922,430,755. The details of the increase in assets are as follows:—

CAPITAL ASSET ACCOUNTS

| | |
|---|---|
| Property Investment (including railway rolling stock) | $ 390,314,679 |
| Hotels | 22,153,824 |
| Ocean and Coastal Steamships | 7,201,117 |
| Advances to controlled and affiliated companies, and insurance premiums | 45,767,052 |
| Sinking Funds | 15,078,743 |
| | $ 480,515,415 |
| Less decrease in investments (Non-capital) current and deferred assets and unadjusted debit accounts | 28,190,363 |
| | $ 452,325,052 |

The increase of liabilities consisted of increases in the amount of:—

CAPITAL LIABILITY ACCOUNTS

| | |
|---|---|
| Funded Debt due public | $ 471,954,063 |
| Government Loans | 132,468,521 |
| Government appropriations account Canadian Government Railways | 5,729,299 |
| Government assumption of Canadian National Railways Eastern Lines deficits | 26,861,713 |
| Accrued unpaid interest on Government Loans | 287,663,169 |
| | $ 924,676,765 |
| Less reductions in reserve appropriations and current liabilities | 2,246,010 |
| | $ 922,430,755 |

The difference between the increase in the assets and increase in the liabilities is accounted for by the accrued system deficit, including unpaid interest on Government loans, as well as deficits on Eastern Lines.

ARCHIVES PUBLIQUES
CANADA

120516

81. During the nine years in question the Canadian Pacific increased its total assets by **$253,447,438**, and its liabilities by **$266,819,039**. The details of the increase in assets are as follows:—

CAPITAL ASSET ACCOUNTS

| | |
|---|---|
| Property investment, including railway rolling stock, lake and river steamers | $ 215,571,038 |
| Hotels | 46,887,999 |
| Ocean and Coastal Steamships | 56,610,641 |
| Acquired Securities | 48,982,529 |
| Advances to controlled companies and insurance premiums (reduction) | 982,217 |
| | $ 367,069,990 |

CURRENT, DEFERRED AND RESERVE ACCOUNTS

| | |
|---|---|
| Less decrease investments and available resources and current accounts | $ 113,622,552 |
| | $ 253,447,438 |

The increase of liabilities consisted of increases in the amount of:—

CAPITAL LIABILITY ACCOUNTS

| | |
|---|---|
| Ordinary Capital Stock | $ 75,000,000 |
| Preference Capital Stock | 56,575,000 |
| Increase in Funded Debt | 151,824,772 |
| Increase in Premium on Capital Stock less discount on Bonds and Notes | 22,276,695 |
| | $ 305,676,467 |

CURRENT, ETC. ACCOUNTS

| | |
|---|---|
| Less Reduction in Reserves, Appropriation and Current Accounts | $ 38,857,428 |
| | $ 266,819,039 |

The difference between the increase in assets and the increase in liabilities is accounted for by the net reduction in surplus accounts of **$13,371,601**.

82. From January 1, 1923, to December 31, 1931, the Canadian National increased its capital stock and debt as follows:—

| | |
|---|---|
| Ordinary Capital Stock | $ 650 |
| Debt due public | 471,954,063 |
| Government Loans | 132,468,521 |
| | $ 604,423,234 |

The above total does not include amounts advanced by the Dominion Government to the Canadian Government Railways, viz., Intercolonial and National Transcontinental Lines, nor the deficits on the Eastern Lines which under the Maritime Freight Rates Act are borne by the Dominion Government. Nor does it include accrued interest on Government loans to the Canadian National, which, for the period, aggregate **$287,663,169**. Altogether these items total **$924,677,415**.

In the same period the Canadian Pacific increased its capital securities as follows:—

| | |
|---|---|
| Ordinary Stock | $ 75,000,000 |
| Preference Stock | 56,575,000 |
| Funded Debt | 151,824,772 |
| | $ 283,399,772 |

Of the Preferred Stock and Funded Debt, $39,101,055 of the increase had to do with the construction of ocean steamers and the acquisition of a half interest in the Canadian Australasian Line.

120517

83. The following are the condensed balance sheets of the two systems as at December 31, 1931:—

## IX. CANADIAN NATIONAL RAILWAY SYSTEM (INCLUDING EASTERN LINES)

ASSETS

| | | |
|---|---|---|
| INVESTMENTS— | | |
| Property Investment, Railway, etc | | $ 2,201,426,376 |
| Sinking Funds and Special Deposits | | 24,662,823 |
| Acquired Securities (Cost) | | 2,301,088 |
| Investments in affiliated companies | | 28,094,692 |
| | | $ 2,256,484,979 |
| WORKING ASSETS | | $ 95,475,587 |
| *Unadjusted Debits*— | | |
| Miscellaneous | | $ 5,633,063 |
| Discount on Capital Stock and Funded Debt | | 16,499,032 |
| | | $ 22,132,095 |
| | | $ 2,374,092,661 |

LIABILITIES

| | | |
|---|---|---|
| Capital Stocks | | $ 270,231,564 |
| Government Grants | | 17,153,638 |
| Long Term Debt (Public) | | 1,276,457,207 |
| *Dominion of Canada Account*— | | |
| Canadian Government Railways | | 405,209,240 |
| Loans from Dominion | | 604,406,239 |
| Accrued Interest on Loans | | 354,173,113 |
| Eastern Lines Deficits other than 20 per cent rate reduction | | 29,680,372 |
| | | $ 1,393,469,164 |
| Current Liabilities, etc | | 78,618,523 |
| Unadjusted Credits, Miscellaneous | | 5,615,482 |
| Reserves and Depreciation Accruals | | 27,202,799 |
| *Profit and Loss Account*— | | |
| System | $ 664,975,144 | |
| Eastern Lines | 29,680,572 | |
| | | 694,655,716 (Def.) |
| | | $ 2,374,092,661 |

NOTE:—The Profit and Loss Deficit of $694,655,716 includes accrued unpaid interest on Loans from the Government amounting to $356,991,972.

| | $ 1,380,888,588 |

## XI. CAPITAL STRUCTURE, CANADIAN NATIONAL RAILWAYS

84. Representations have been made with respect to the capital structure of the Canadian National Railways. This problem presents several aspects. One is the very large number of companies whose corporate existence must be maintained. Another is the large number of different bond issues and mortgages with different rates of interest, expiring at different periods and with all sorts of different clauses in them. It has been stated that included in the National Railway System there are 251 different bond issues and mortgages; that there are 80 different issues of certificates in the hands of the public; that there are 139 companies whose corporate existence must be maintained; and that 42 separate income accounts and 90 separate balance sheets have to be prepared each year.

85. Another aspect of the problem is the total capital liability of the System. At December 31, 1931, the long term debt of the Canadian National Railways due the public (funded debt unmatured) amounted to $1,276,457,207. The money invested in the original Government Railways, loans by the Dominion Government to the privately-owned railways now absorbed in the System, loans to the Canadian National Railways to meet annual deficits, interest accrued on these loans and unpaid, and deficits on Eastern Lines, together total $1,393,469,164. The total of these two sums is $2,669,926,371.

86. It has been suggested that in view of the excessive capital liabilities in relation to the earning power of the System they should be reduced to an amount which would more nearly approximate the earning power of the railway. The net operating income (i.e., the amount available for interest and dividends) of the Canadian National System for the period 1923 to 1931 inclusive averaged $24,414,447 per annum. This figure would require adjustment if adequate provision were made for depreciation. It is obvious that on this basis of earnings the capital liabilities would require a very drastic writing down. And while this commission is of opinion that it must be frankly recognized that a very substantial part of the money invested in the railways comprised within the Canadian National System must be regarded as lost and that its capital liabilities should be heavily written down, they do not consider that the time is opportune to deal with this important matter.

87. This question as well as that previously referred to, dealing with the present involved financial structure of the Canadian National System, should, in the opinion of the commission, have the early attention of the Board of Trustees, which it is recommended should be entrusted with the control and management of the System.

## XII. GROWTH OF THE BURDEN OF TAXATION

88. The demands of the Canadian National Railway upon the federal treasury have served to create a financial problem which, together with other demands, have led to large increases in borrowings by the Dominion Government and increased taxation.

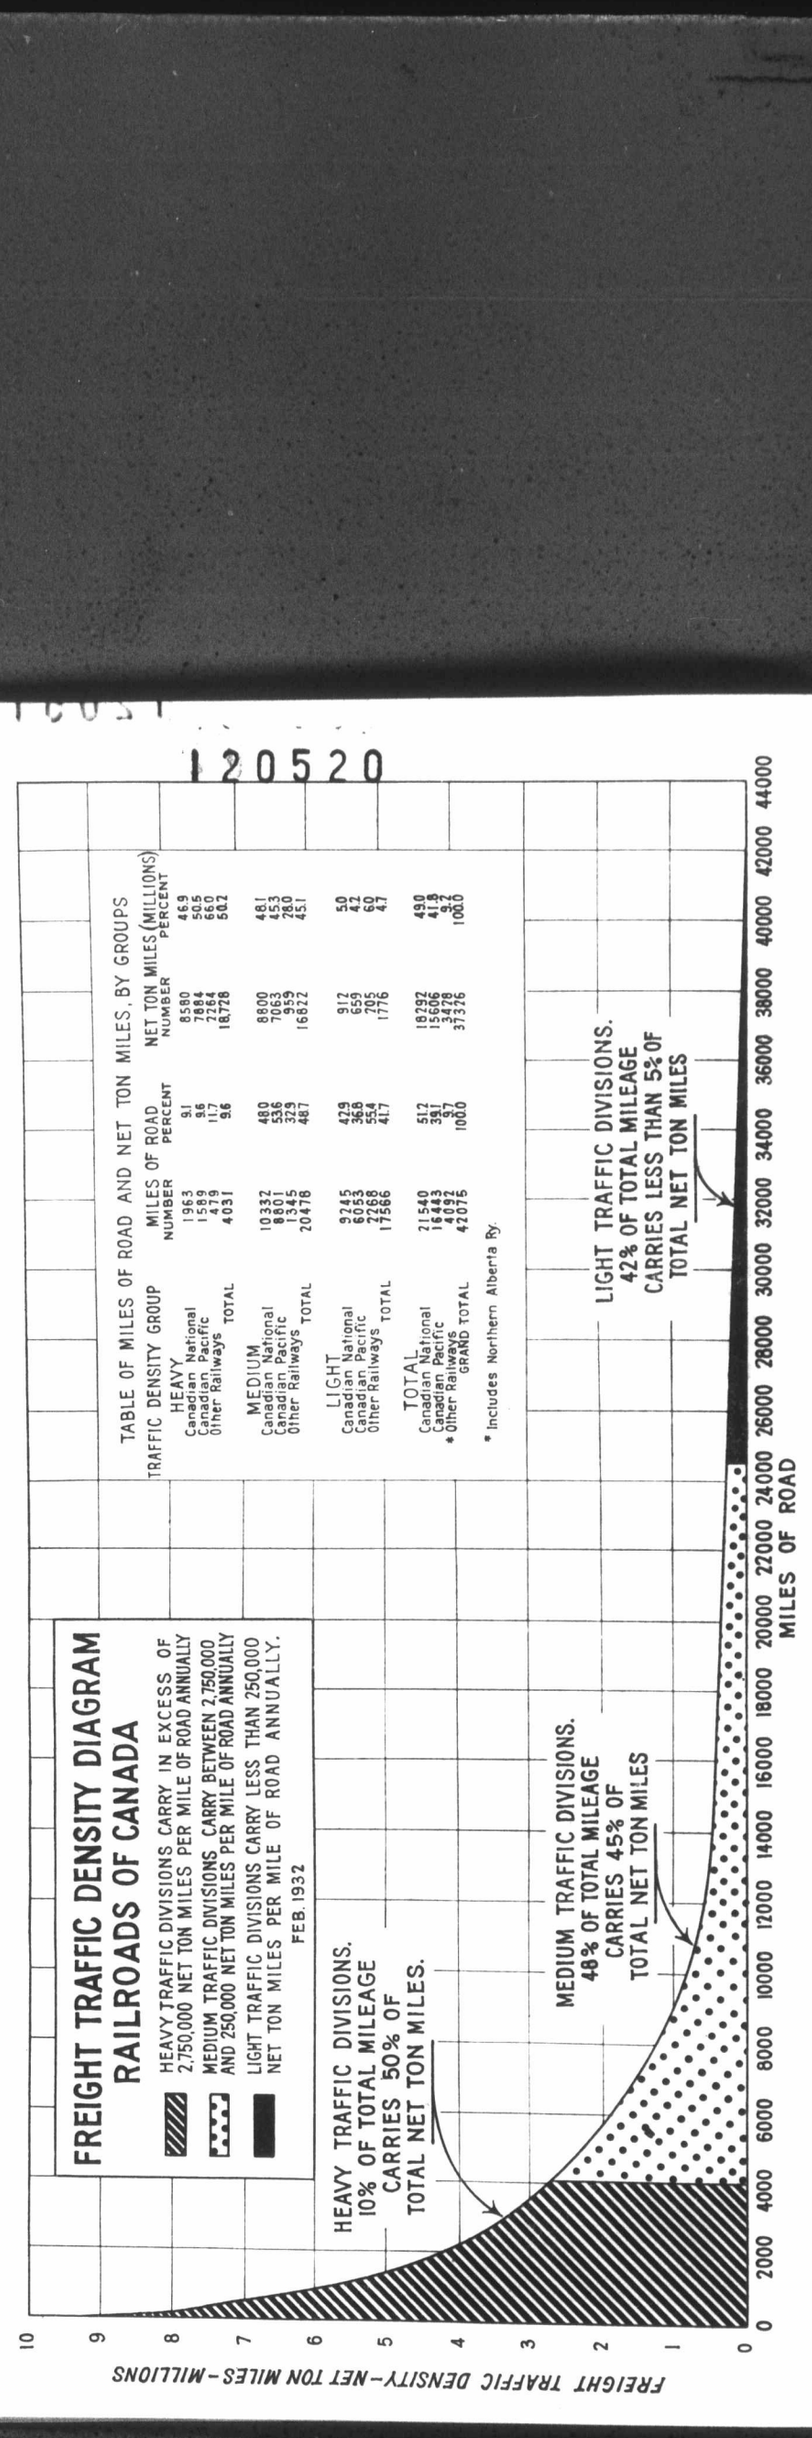
89. When Canada entered the Great War there existed a federal debt of $336,000,000, entailing an annual charge of approximately $20,000,000. War expenditures added about $1,700,000,000 to the debt of the Dominion. In the post-war period, while there were years when the debt was reduced, the result on the whole has been an increase in the net debt. In the year 1930-31 there was added the sum of $83,847,977, and, in the year 1931-32, $119,500,000.

90. The additional carrying charges for the entire debt appear in the official estimates for the present fiscal year 1932-33, in which the interest upon the federal debt, and interest upon Post Office Savings, with $3,500,000 for sinking fund, calls for a payment of $137,400,000. To this must be added a war charge for pensions and special disability claims of $5,000,000 per month, or $60,000,000 for the year. These two items of fixed charges for the year 1932-33, totalling $197,400,000, should be contrasted with the $20,000,000 for the year 1913.

91. It is necessary, therefore, in considering the railway problem, which since 1917 has established claims for such immense sums upon the federal treasury, to ask how the country is to meet these capital and annual charges if continued.

92. It is to be remembered that, coincident with this great increase in federal treasury liability, there has been a vast enlargement in the liabilities of provincial and municipal governments throughout Canada. They have borrowed and spent, and spent and borrowed, and in consequence have increased their debt charges to such an extent that the burden of taxation is deeply resented.

93. Meantime international credits have become disastrously impaired and there is difficulty in securing immediate relief in an acute situation through fresh borrowings from Great Britain and the United States.



94. In considering, therefore, suggested solutions for the present railway situation, we must take cognizance of existing financial conditions, and bear in mind the prevailing low prices for all agricultural, and other primary products; also that the general depression in business is inevitably associated with unemployed men and women upon a hitherto unparalleled scale—with shrinkage in business income returns through greatly reduced profits, or actual losses in industrial and general merchandizing activities—involving reduction or passing of dividends upon investment securities, as well as, in some cases, actual loss in their capital value.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120520

120521

134. The locomotive fuel bill of the two systems dropped from $58,242,655 in 1923 to $29,433,816 in 1931, both companies reducing these expenditures by one-half. The reduction in the price of coal has been but slight, but the drop in tonnage has been considerable. The proportion that fuel bears to the general cost of railway operation is shown in the following statement:—

| Operating Ratios | Canadian National | | Canadian Pacific | |
|---|---|---|---|---|
| | 1923 | 1931 | 1923 | 1931 |
| | per cent | per cent | per cent | per cent |
| Fuel for locomotives | 13·12 | 8·55 | 12·09 | 8·69 |
| Other operating expenses | 78·66 | 91·16 | 68·91 | 71·62 |
| Total | 91·78 | 99·71 | 81·00 | 80·31 |

It will be noted that while the Canadian National fuel ratio dropped from 13·12 per cent to 8·55 per cent, the ratio of other operating expenses increased from 78·66 per cent to 91·16 per cent, not only effecting the saving in fuel but increasing the ratio of total operating expenses to revenues by 7·93 per cent.

135. In seeking a "yard stick" by which to measure operating results of the Canadian National Railways it has been customory to take Canadian Pacific Railway performance. This, however, must not be regarded as an absolute criterion. Operating costs are bound to be affected by differences in size of the properties, the purpose as well as the type and standard of construction, the general physical condition, the differences in character and volume of traffic, average haul of freight, and train and car loadings. However, if the level of expenses of the Canadian Pacific is to be accepted as measurably determining what the relative operating charges of the National lines should be, the information placed before us by the experts who have been engaged in correlating the statistical data of the two systems indicates that the operating costs of the Canadian National System are in certain particulars much higher than they should be. This would appear to be the case in the item of supervisory expenses, also in station and yard services. The Canadian National costs were greater than the Canadian Pacific by 63·5 per cent for superintendence, 38·2 per cent for station service, and 69·7 per cent for yard service, while the train mileage of the National lines was only 22·8 per cent, and the car mileage 34·9 per cent greater than that of the Canadian Pacific.

136. The immense expenditures of the Canadian National for the improvement of its property, the larger additions to its rolling stock, the advantages of increased tractive power, and the more generous expenditure upon the upkeep of its property, should have made possible a great improvement in operating performance. Whether the improvement actually secured has been commensurate with the expenditure involved is a moot question.

## IX. OPERATING RATIOS

137. The operating ratio of a railway (being the proportion of operating expenses to operating revenues) is generally regarded as indicative of the efficiency of operation and management of an enterprise. Under comparable conditions an increase in this ratio would indicate a falling off in the efficiency of the railway; a decrease in the ratio would suggest greater efficiency.

138. In comparing the performance of two railway systems on the basis of operating ratios, it is necessary, before drawing conclusions, to make allowance for factors that may adversely affect results in the case of one or the other. and to ascertain as far as possible that the figures that enter into the calcula-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120522

tions are on a comparable basis. A detailed analysis and comparison of the operating accounts of the Canadian National and Canadian Pacific was made by an independent railway accountant employed by the commission to ensure a fair basis of comparison between the accounts. The results of this comparison appear in the following table:—

OPERATING RATIOS

| Year | Canadian National | Canadian Pacific |
|---|---|---|
| | per cent | per cent |
| 1923 | 91·8 | 81·0 |
| 1924 | 92·5 | 80·5 |
| 1925 | 86·7 | 77·3 |
| 1926 | 82·5 | 75·8 |
| 1927 | 84·9 | 78·5 |
| 1928 | 82·0 | 75·4 |
| 1929 | 85·6 | 77·3 |
| 1930 | 91·4 | 78·4 |
| 1931 | 99·8 | 80·3 |

139. There are undoubtedly factors that adversely affect the Canadian National in comparison with the Canadian Pacific. The officers of the National system operate two great railroads which were constructed as competitors, with consequent duplication of tracks, shops and facilities, a condition which the co-ordination which has gone on progressively for a decade has not yet entirely overcome. There are also considerations of lighter traffic and shorter average haul with consequent greater terminal and yard expenses in the case of the National lines.

140. The Canadian Pacific was constructed and developed as a single unified system of railways and thus avoided many of the disadvantages which apply to the Canadian National system.

141. An analysis and comparison of accounts of both companies, with due regard to the considerations put forward by the Canadian National as adversely affecting their operations, do not, in our opinion, justify the very considerable differences in the operating ratios of the two systems.

## X. POLITICAL AND PUBLIC PRESSURE

142. The conduct of the affairs of the National Railway has been subjected in the past to political and public pressure. It is, however, necessary to make a distinction between unwarranted political interference and the influence of broad public policy. To the latter category belong several of Canada's major transportation schemes, such as the Intercolonial and Canadian Pacific projects, which were the outcome of definite political arrangements based upon broad national considerations. Others, such as the original Grand Trunk, in a lesser sense, and the Canadian Northern and Grand Trunk Pacific in more marked degree, represented a compromise between the aims of private promoters and the endeavour of the state to turn those ambitions to national advantage. While certain of these projects became warmly contested political issues, they were endorsed by the Canadian electorate at successive general elections, and were accepted as approved national policy.

143. The majority recommendations of the Royal Commission on Railways and Transportation in 1917 were designed to provide safeguards against political interference which is instinctively to be feared in the conduct of a public enterprise of the magnitude and character of the Canadian National Railways. But

120523

the Government of the day declined to follow the plan of organization recommended by the commission, which was in substance to place control in a permanent and self-perpetuating Board of Trustees.

144. There was adopted, instead, the plan which is contained in the Canadian National Railway Act. This Act provides for a Board of Directors to a maximum number of seventeen, appointed by Order in Council, holding office from year to year. Appointment to the office of chairman of the board and president of the company is made by the Government, and concurred in by the board.

145. Under the circumstances, the directors' functions have been in practice nothing more than advisory. It would seem that they generally gave formal approval to programs of expenditures which they appeared to regard as the main concern of the president and the Government. This left the railway open to political influence and to public pressure exerted by communities and by associations of business and labour interests.

146. Of direct political interference by ministers and members of Parliament in the detail operations of the railway, we were assured by the officials there was little or none. It was in the larger sphere of policy that political considerations led to unwise and unnecessary capital expenditures, the result of which was to create an atmosphere in which the ordinary principles of commercial operation of the railway were lost sight of.

147. The President of the Canadian National Railways, in a considered statement made to this commission in the course of its inquiry, expressed the following views:—

"One of the inherent disadvantages of any state-owned enterprise such as the Canadian National Railway, is the problem of political interference—and one might also add, public pressure. In making this statement I wish it distinctly understood that I imply no criticism of any party or any government, present or past. I merely state a fundamental and universally admitted condition.

"The leaders of all political parties and the people of Canada as a whole are a unit in their desire to prevent political invasion of the Canadian National Railway. But the plain fact is that, irrespective of such wishes and desires, the problem presents difficulties beyond the control of our leaders, be they ever so patriotic or high minded. After all in any form of popular government it must be accepted as axiomatic that the business of government is politics and, irrespective of whether one likes it or not, politics is something with which a government must reckon in all its activities."

148. The President of the Canadian Pacific appeared to be more concerned over the activities of what he termed "politically-minded" executives of the publicly-owned railway than he was over straight political pressure for definite ends. He said:—

"We talk a great deal about political interference being damaging to railway operations, and we know that that is true, generally speaking. But when we say it we seem to think the only political influence is that exercised by a government, or a member of government, or a member of parliament. To my mind the worst kind comes from the political attitude of men in publicly-owned institutions. Possibly they are not conscious of it, but they become politically-minded; their policies and actions have a political tinge, and that, from my standpoint, is more serious as representing the attitude of the corporation than the isolated act of a member of parliament who tries to get a man employed.

"Years ago the ability of privately-owned railway companies to withstand political pressure was somewhat limited. To-day it is nothing like it was, because we can say 'no' to that kind of pressure. But the politics that develop inside an organization because it is publicly-owned, and not privately-owned, is a serious thing.

"We spoke of not being able to anticipate what government policies would be towards any railway, and I believe we cannot tell from year to year what the policy of any government would be in respect of its railway property. Providing it owns it, and has a measure of control of its policies, and so long as they are putting up the money we cannot avoid that possibility."

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120524

149. Possibly the year 1929 affords a striking example of what political and public pressure, presumably, were able to accomplish.

150. The Canadian National Railway requirements authorized by Parliament during the fiscal year 1929-30 were as follows:—

| | | |
|---|---|---|
| Canadian National Railway Budget for 1929 | $ 53,750,000 | |
| Canadian National Eastern Lines Deficit (1929) and 20 per cent reduction in tolls | 6,808,172 | |
| Prince Edward Island Car Ferry construction | 2,500,000 | |
| Branch Line Construction (1929-1932) | 30,136,325 | |
| Montreal Terminals (Construction) | 50,000,000 | |
| Acquisition of Railways | 31,247,500 | |
| New Equipment Issue | 18,000,000 | |
| | | $ 192,441,997 |

In addition, construction programs were proceeding under prior legislation, the unused authorities being for:—

| | | |
|---|---|---|
| Branch Lines Construction | $ 9,482,021 | |
| Toronto Terminals Construction | 3,583,863 | |
| | | $ 13,065,884 |
| Total expenditures authorized | | $ 205,507,881 |

151. The actual cash expenditures during the same year covered by these authorizations amounted to $113,859,777, the balance, $91,748,104, being chargeable to subsequent years as construction work proceeded or obligations on account of roads purchased matured.

The foregoing does not take into account other legislation which provided for the refunding of $18,000,000 of maturing securities, nor $6,396,000 voted for the Hudson Bay Railway and terminal development, in the same year.

152. The net increase in funded debt of the Canadian National due the public for the year 1929 amounted to $144,670,459; whereas the annual increase for the previous six years had averaged $28,897,648.

153. Annual interest on the funded debt in the hands of the public, which, at the end of year 1928, was $41,810,880, increased to $55,587,145 at the end of the year 1931, due largely to the expansion policies of 1929.

154. When considering the scale upon which branch line extensions and acquisitions, as well as hotel expenditures were made, and railway and steamship services duplicated, it is impossible to avoid the conclusion that the Board of Directors and the management of National Railways were amenable to political influence and pressure, which it would have been in the public interest to have withstood.

120525

# CHAPTER IV

## CONTRIBUTORY CAUSES OF THE RAILWAY PROBLEM

155. Before proceeding to discuss remedies for a solution of the transportation problem, it is proposed to summarize the factors that have contributed to our present situation. There may be differences of opinion in regard to the relative importance of these several factors, but there can be none as to their cumulative effect upon the railways or as to the necessity for a genuine attempt to improve the situation, both in the interests of the railways themselves and of the tax-payers of Canada. The principal contributory causes have been:—

1. The over-development of railways beyond the immediate needs of the country.
2. Aggressive and uncontrolled competition between two nation-wide railway enterprises, a competition the more disastrous in that one of the competitors was publicly-owned and supported by the full resources of the Dominion.
3. The reactions of the world trade repression which began in 1929 and has progressively increased in its severity with each succeeding year.
4. Competition from other forms of transport, notably road transport.
5. Inelasticity of freight rates and railway practice generally which prevents prompt action in the meeting of falling revenues and dealing effectively with competition from other forms of transport.
6. Contractual arrangements with labour organizations which set up a rigid wage scale and inflexible labour practices generally.
7. The special disabilities of the Canadian National Railways due to:—
   (*a*) Assumption, through Government action, of liabilities of insolvent railway systems for reasons of national credit.
   (*b*) Large capital expenditures for improvement of the physical condition of the absorbed systems.
   (*c*) Political and community pressure on the management arising out of direct government control.

Of these items, three have already been dealt with in the preceding chapters, *i.e.*, aggressive and uncontrolled competition, political and community pressure on the management of the Canadian National, and the burden of excessive capital liabilities of the latter system. No further discussion of these matters is called for here.

### I. EXCESS MILEAGE

156. In the earlier part of this report emphasis has been laid on the excess mileage of Canadian railways. The policy of branch line expansion in the period 1924 to 1930 has also been dealt with. It has been pointed out that the population per mile of steam railways in the United States is more than double that in the Dominion, and competent railway authorities in the United States concede that there is a great excess of mileage in their country. Reference has been made to the low traffic densities prevailing upon the greater part of the Canadian mileage. The traffic density maps, which accompany this report, tell the story in graphic form. In the interests of sound railway practice,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120526

a careful examination of all light traffic lines should be undertaken forthwith by both railways to determine what should be retained and what should be abandoned. Where the decision is for abandonment, operations should be promptly suspended, and the salvaged material recovered then or later. Thought should be given to the operation of a considerable mileage during a portion of the year only. Radical reductions, not only in the service on these light traffic lines, but also in the mileage of this group is essential if economic security is to be restored to the railways.

## II. TRADE DEPRESSION

157. In so far as the position of the Canadian railways is the result of the depression in world trade, they have merely shared the general fate of most industries and of railways in other countries. In the United States of America the recession in railway earnings did not appear until 1930, but by the end of 1931 the net operating income of the Class I roads had fallen from $1,395,348,471 to $662,314,465, (more than 50 per cent) which is greater than the reduction shown by the Canadian Pacific Railway Company. The more favourable showing of this company is no doubt due to the drastic reductions in working expenses and services, undertaken at an earlier date than on the United States roads, and therefore showing their full effects in 1931. Since any measures looking to a revival of trade are beyond the scope of the Commission's inquiry, we pass from this topic with the observation that an increase in traffic of even 20 per cent above the figures for 1931, which would still be below the gross earnings for 1925 would result in substantial improvement in the railway position in Canada. Experience gained in operating at reduced costs in the last two or three years should not be lost and should therefore be reflected in a greater ratio of net earnings.

## III. COMPETITION FROM OTHER TRANSPORT AGENCIES

### (a) Road Transport

158. Road transport in the past decade has challenged the supremacy of the railways in the field of transportation both in the conveyance of passengers and freight. In 1923 there were 515,178 private automobiles registered in Canada, while in 1931 this figure had increased to 1,024,385, an increase of nearly 100 per cent. During the same period motor coaches undoubtedly increased considerably. Records for years prior to 1927 are not available but the number of motor coaches registered in 1931 was 1,636, and this represented an increase of 61 per cent over 1927. Motor trucks, both privately-owned and common carrier, now number 165,855, which represents an increase of 214 per cent over the number registered in 1923. The total motor vehicle registrations (exclusive of motorcycles) increased during the period we have under review (viz. 1923 to 1931) from 576,668 to 1,197,188, or more than 100 per cent. This development has brought about a lasting revolution in the travel habits of the people, and in many respects has wrought a transformation in the economic and social life of the country. It has given facilities for transport never before enjoyed by the general public, and has given trade and industry facilities of great and permanent value.

159. But, while the motor vehicle has done much to create and stimulate travel, it has also effected the diversion of a considerable volume of traffic from the railways. It is the private automobile which has mainly been responsible for the diversion of the bulk of the passenger traffic to the highways, with the result that the short distance passenger traffic of the railways has shrunk to small proportions and their long distance passenger traffic is threatened. The

120527

transfer of traffic from the railways to the motor coach has not in the aggregate reached, as yet, large dimensions, but the use of this agency of transport is increasing and its effect upon the railways has, in some of the more densely populated districts, already been considerable. In the conveyance of freight, the motor truck, principally the privately-owned, has made serious inroads into the short distance traffic of the railways.

160. In fairness to the road vehicle, it should be stated that this diversion of traffic from the railways to the highways is in many cases due to the fact that conveyance by road is intrinsically a more suitable form of transport, either because the convenience afforded by the road vehicle outweighs other considerations, or because it is definitely cheaper. But in so far as the diversion is due to lower costs as a result of road vehicles not bearing their fair share of the cost of the highways which they use, or because they are free from regulations analagous to those imposed on other forms of transport, then such a diversion may very well be opposed to the best interests of the country's welfare.

161. With the extension of hard-surface roads and the increasing mileage kept open in the winter, a wider use of motor vehicles must be anticipated and such an extension will bring in its train further diversion of traffic from the railways. In seeking a permanent solution of the railway problem in Canada this comparatively new and convenient form of transport, and its effect upon the railways, cannot be ignored, and a fair basis of competition between these two transport agencies, in so far as they are acting as common carriers of either passengers or freight, must be found, not only in the legitimate interests of the railways but also in the interests of the public and trade and industry generally. We feel that not only is unfair competition between railways definitely harmful to the general welfare but that unfair and unregulated competition between railways and road operators is also damaging, resulting as it does in waste and duplication of effort.

162. In an appendix to this report we have included a chapter giving statistics of highway transport in Canada and information as to the fees charged and the regulations imposed by provincial governments, together with a summary of the views submitted to us of various highway authorities and of those engaged in the motor transport industry.

163. It is generally recognized that there is a need for regulating road motor services and for equalizing the conditions under which road and rail services are provided. Especially is this need recognized when regard is had to the extent of the regulations imposed on the railways, to the almost entire absence of regulations of road operators, particularly those operating freight services, and to the fact that it has been the practice to establish railway freight rates on the assumption that the transportation of freight was to all intents and purposes the monopoly of the railways. Upon this hypothesis tariffs and tolls have been established on a comparatively high scale (when regard is had to the actual cost of operation) for the carriage of short distance package freight and for express services, and upon a lower and less remunerative scale for the transportation of heavy and bulky commodities which are generally conveyed over long distances.

164. If the railways lose a large part of their profitable short distance traffic to the roads a readjustment of the whole freight rate structure may be necessary, with a possible increase in the rates charged for the long distance and heavy freight traffic.

165. It is essential that the country should have the free and unhampered use of the cheapest forms of transport and therefore no restrictions which would unfairly prejudice the road user should be imposed. The railways themselves should be empowered to provide and operate services of road vehicles, subject

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120528

to whatever restrictions are imposed upon other road transport operators. On the other hand, in our opinion, in Canada, where of necessity freight must be conveyed in large quantities over long distances at all times of the year, railway transportation is essential to the economic welfare of the country. Because they are essential and because the railway freight rate structure implies conditions approximating to a quasi-monopoly, the railways require, if they are to continue to operate efficiently, a measure of protection from long distance road competition and an equalization of the conditions under which short distance traffic is carried.

166. Any restrictive regulations imposed on the road vehicle will not determine the division of the functions as between roads and railways except to a relatively limited extent. In our view, this division of function will not be best obtained through the arbitrary action of governments, but rather through the efforts of those engaged in the transport industry. By concentrating less on mutual competition and by turning their energies to the co-ordination of the services they provide, a properly co-ordinated system of transport will be evolved. In our view the true function of road transport, in such a co-ordinated system, as auxiliary and complementary to the steam railways, would appear.

167. Under the constitution of Canada regulation of road transport falls within the exclusive jurisdiction of provincial authorities. While the Dominion Government is not limited by the constitution in the matter of taxation, in practice road vehicle taxes are imposed solely by the provinces. These considerations make it inadvisable for us to make any specific recommendations in regard to the regulation and taxation of road transport. The federal and provincial governments in co-operation should, however, examine this question of the regulation and taxation of road motor vehicles with a view to equalizing the conditions under which road and rail transport is carried on, and to securing uniformity throughout the Dominion. A joint inquiry in which both federal and provincial governments were represented should enable a measure of agreement to be reached upon the general principles which should govern the regulation and taxation of motor vehicles using the public highways. The administration and adaptation from time to time of the agreed principles of road transport might be left to a consultative committee consisting of representatives of the various provincial governments and of the federal Government.

168. In our view the general principles upon which operators of road passenger services and common and contract carriers of freight should be regulated are as follows:—

(i) Schedules of rates and charges should be published.
(ii) Within those schedules common carriers of freight should accept and carry what is offered to them without discrimination between customers and commodities.
(iii) Operators should be insured against all risks, including third party risks.
(iv) Operators should keep accounts on a prescribed system and render returns to appropriate public authority on a common basis.
(v) Minimum standards in regard to working conditions, including wages and hours of labour, should be required.
(vi) In the interests of the safety of the public, a standard of fitness should be required of all operators in regard to their vehicles.
(vii) Due regard should be had to the preservation of road surfaces, and, to this end, restrictions should be imposed upon the size and weight of road vehicles in accordance with the type and character of the highway.

120529

169. Furthermore, we consider that any joint inquiry that may be set up to examine this question should give serious attention to the institution throughout the Dominion of a uniform system of licensing (in addition to the existing licensing for revenue purposes) of road passenger service vehicles and motor vehicles used for the conveyance of freight, whether operated as common carriers, contract carriers, or used exclusively for the conveyance of the freight of their owners. Under such a system it is suggested that a licence should only be granted to common carriers of passengers and freight where it can be proved to the satisfaction of the licensing authority that the service rendered, or proposed to be rendered, is in the public interest.

170. As regards the taxation of road motor vehicles, the amount of such taxation, including the tax on gasoline, should reflect a fair proportion of the cost of providing and maintaining the highways. A fair proportion would, in our opinion, be equivalent to two-thirds of the total cost in respect of highways in urban areas, while in the more undeveloped districts the proportion might be increased. As to the distribution over the various classes of vehicles, it is suggested that the scales of taxation should be so adjusted as to fall with greater severity upon the heavy long distance traffic.

### (*b*) Aviation

171. The development of aviation has been one of the phenomena of the present century and with the advance of aeronautical science, aircraft will play an increasingly important part as an agency of transport. Particularly will this be the case in this country where the physical and geographical characteristics, the sparsity of the population and the long distance between the centres of the population, all tend to favour air transport.

172. Good progress has already been made in the development of this new transportation instrument and much credit is due to those whose responsibility it is to foster that development. The aeroplane is already accepted as a normal means of transport throughout very large areas in Northern Canada. It has rendered possible travel to the farthest limits of the Dominion, with speed and comparative safety and without the large capital expenditures which are inseparable from roads and railways.

173. Great as are it potentialities, aviation is still in its infancy and we feel that it is too early to make any specific recommendations in regard to air transport. The Dominion Government should, however, keep in close touch with the developments which are taking place, and which will to an increasing extent take place in the field of aviation. It is encouraging to observe that the two principal railways have recognized the importance of the newer mode of travel and their investment in one of the largest aviation undertakings in the Dominion may well prove to be the foundation of a proper co-ordination between these two agencies of transport.

### (*c*) Waterways

174. For eight months of the year the facilities of the railways of Canada are duplicated through approximately one-third of their length by a system of inland water transportation which, developed by the Government at great cost, furnishes shippers of long-haul bulk commodities with a service at rates with which the railways are unable to compete. During the navigation season our inland waterway absorbs not only practically the whole of the eastbound export grain traffic from the head of the lakes to lower lake ports, but a considerable portion of internal traffic of the Eastern and Central regions in bulk commodities, such as coal, iron ore and cement.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120530

175. The explanation of the apparent anomaly of a system of inland water transport, dependent upon canals, operating upon a vast scale, partly in conjunction, but largely in substitution for modern rail transport, is that in natural expanse, safety, despatch, and capacity, not to speak of sources of traffic, the Great Lakes-St. Lawrence waterway is without a counterpart among systems of inland navigation. To provide continuous navigation from Montreal through twelve hundred miles of lake and river and to the head of lake Superior has required only seventy miles of canalization. Indeed conditions of navigation on these great bodies of water present a resemblance much closer to the scale and freedom of ocean transport than to the restrictions of the narrow inland waterways which the original advent of railways so largely superseded.

176. The sources of traffic are as extensive as the system itself. Draining the mid-continental basin, the Great Lakes-St. Lawrence route provides not only an interior system of unique length, but an outlet, the sole large outlet by water, to the North Atlantic seaboard, for the widest and richest agricultural areas of both Canada and the United States.

177. The arterial pulse of the movement of commerce through the Great Lakes navigation system is to be found in the Canadian and United States locks at Sault Ste. Marie. It is not generally appreciated that the traffic through the St. Mary's river connecting lakes Superior and Huron is, in a normal season, in excess of the combined anuual traffic through the Panama, the Suez, the Kiel and the Manchester Ship canals. In 1929 the total traffic passed at Sault Ste. Marie (Canadian and United States locks) was 92,616,808 tons; for the Panama it was 30,663,006; for the Suez, 33,466,014; for the Kiel, 21,613,088; and for the Manchester, 6,558,598, a total, for the four salt-water canals of 92,300,000, or a slightly less tonnage than that of the fresh-water system as registered at the principal tally point for our international inland waters.

178. As a result of the trade depression the decline in the ore and grain traffic of the upper lakes is strikingly indicated by the decrease in tonnage passing through the combined Sault Ste. Marie canals since 1929. In 1930, it dropped to 72,897,895 from the peak ninety-two millions in 1929, and to 44,606,325 in the season of navigation of 1931, or more than 50 per cent.

179. Plying these waters are scores of vessels of more than 600 feet in length and of 60 and 70 feet beam, some capable of carrying in a single load 17,000 tons, or 566,666 bushels of grain. The completion of the new Welland Ship canal has admitted these large upper lake freighters to lake Ontario and the upper St. Lawrence waters, and only one hundred miles of river remain to be dealt with to completely modernize the Great Lakes-St. Lawrence route from the ocean to the heart of the North American continent.

180. In 1931, by no means a representative year, the total traffic through the purely Canadian canals along this route amounted to 16,189,074 tons. This figure would necessarily include duplications of cargoes carried through two or more canals. To this movement 27,651 vessels contributed.

The classes of commodities carried included:

| | Tons |
|---|---|
| Agricultural products | 7,737,307 |
| Animal products | 15,830 |
| Manufactures | 2,976,780 |
| Products of forests | 748,419 |
| Products of mines | 4,690,738 |
| Total | 16,189,074 |

181. Two-thirds of the movement of agricultural products, as listed above, consisted of grain, principally wheat. Canadian wheat passing through the

120531

Canadian and United States locks at Sault Ste. Marie during the season of 1931 amounted to 146,016,991 bushels, compared with 312,425,869 bushels in 1928.

182. The magnitude of this inland shipping route to the Atlantic should not be allowed to obscure the great importance to Canada of the Panama canal, not merely as a means of increasing the flow of export grain through the port of Vancouver, but in promoting generally the export trade of British Columbia. Nor should the effect upon Canadian transport generally of the utilization of the Panama canal as an alternative route for Canadian transcontinental traffic be overlooked. During the year ending June 30, 1930, Canadian inter-coastal cargo used this canal to the extent of approximately 180,000 tons westbound and 190,000 tons eastbound.

183. Railway transportation in so far as the movement of grain and bulk commodities is concerned has been largely adjusted to the problem presented by competition from the great inland waterway. The railways carry to and from the head of the lakes and to and from the lower lake ports. The movement of grain in particular is dependent on low inland water transport and the fortunes of the railways themselves in Western Canada are dependent upon the ability of the grain grower to place his product at low cost at ocean ports. In this movement to the eastern coast the inland waterways are a necessary part. If the producers of Western Canada are to continue in the business of growing for export the great bulk of grain and heavy commodity traffic between west and east must continue to use the inland waterways.

184. If and when grain in any considerable volume passes out of the country by the Hudson's Bay route, there will still remain a very large tonnage which will seek the eastern and western ports, and it is not likely that the volume of traffic from west to east will vary greatly from the present figures. Increases in production have in general kept pace with the movement of grain to the Pacific coast, and it is more than likely that a similar experience will result from the opening of the port of Churchill to the export grain trade.

185. While on first consideration it might appear that the construction of canals which are free of all tolls to water carriers is in effect a form of state subsidy to a rival transport agency, yet in so far at least as bulk traffic in grain and heavy commodities is concerned, complaint is not made by the railways on this score. The imposition of tolls would not help and would probably hinder the railways as tending to discourage production. The Canadian Pacific Railway has now, and for many years has had, its own lake boats engaged in the carriage of passengers and package freight, and the Canadian National Railway has a working arrangement for the same purpose with one of the largest of the lakes shipping companies.

186. The further development of the St. Lawrence and lower lakes canal system, whereby package freight may pass from Montreal direct to the head of the lakes without transhipment may eventually make further inroads into the all-rail haul from east to west, but in the case of much of the package freight movement, time is an essential element, and the railways should be able to hold a large share of this movement against their slower competitor.

187. Water-borne traffic will continue to be a factor of major importance in Canadian transportation both on the inland waterways and coastwise through the Panama canal, but rail traffic has in the main been adjusted to the conditions now existing and it does not seem probable that the developments now under way and in contemplation in connection with the Hudson's Bay route, and the deepening of the St. Lawrence-Great Lakes canals, will seriously prejudice the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120532

position of the railways in the future. The competition of water-borne traffic has not been an important factor in bringing about the present difficulties of the railways.

## IV. FREIGHT RATES

188. While we have refrained from making any recommendations we recognize that the question of freight tariffs and tolls is inextricably bound up with the question of transport. The position at the moment, however, is difficult and complex. It has been represented to us by many competent witnesses that any increase in tolls would only impose a further handicap on the Canadian manufacturer and producer at a time when they can least afford to shoulder additional burdens, and that the increased tolls might have the effect of so restricting traffic as to afford little, if any, relief to the railways.

189. It would appear that, at the moment, any adjustment of the freight tolls and tariffs would be inadvisable, but we feel it our duty before passing from this question, to express the view that even under more favourable circumstances the financial position of the railways may be such as to demand that the whole question of tariffs and tolls, in its widest sense, should be the subject of special investigation, with a view to determining whether or not the existing tariffs and tolls charged for the conveyance of freight are just and reasonable both to the railways and their customers. In determining what is fair and reasonable to the railways regard should be had inter alia to the cost (including the remuneration of the capital invested) of providing these services.

## V. CONTRACTUAL RELATIONS WITH LABOUR

190. The wages and conditions of employment of a large majority of the employees of both railways are fixed by agreements with the trade unions concerned. A majority of these employees are members of trade unions which include not only employees of the railways in Canada but also of the railways in the United States. Whether by reason of this close affiliation, or for other reasons, it is the fact that the wages and conditions of service of railway employees in both countries are substantially on the same basis. In recent months the wages of the officers and employees of both systems have suffered certain reductions which have eased the burden upon the railways, and it is satisfactory to record that these changes have been made without any disturbance.

191. With the continuance of good relations between the management and employees of both systems, and a frank recognition of the serious financial situation, much can be done to ease the position of the railways, without imposing any undue hardship upon the employees.

## VI. SPECIAL DISABILITIES OF THE CANADIAN NATIONAL RAILWAY

### (a) Excessive Capitalization and Overhead Charges

192. The Canadian National System suffered under a heavy burden of capital liability and fixed charges with consequent unsatisfactory results of operations from the financial point of view. As this matter has already been dealt with in Chapter III no further reference to it need be made.

120533

### (b) Physical Disabilities of the National System

193. From 1917 to 1922, the management of the companies now comprised in the Canadian National System expended upon capital account in completion and improvement of the lines under their care the sum of $222,547,181. When the new management took over the consolidated lines in 1923, further capital expenditures were required to put the System in condition to obtain a proper share of traffic. The task of bringing the road and equipment to the standard required for efficient operation was undertaken with enthusiasm, and money for these purposes was generously supplied by Parliament.

194. In the result, there emerged an efficient transport system affording a service of high standard and with a loyal and enthusiastic staff of officers and employees, but the price was heavy. In the nine-year period, as will be seen from the figures set up in paragraph No. 49 of this report, there was expended for improvements and betterments to roadway, for rolling stock and on lake and river services and the Montreal terminal scheme, but excluding all branch line construction, $304,551,249. Capital for these purposes had to be raised by increasing the debt of the System. Fixed charges increased in this period by approximately $20,000,000. The introduction of new capital in so large a volume, with every dollar carrying liability for interest from the moment it was expended, would have caused in itself a difficult financial position for the railway, even if there had been no depression in business.

## CHAPTER V

### PROPOSALS AND REMEDIES

195. We have carefully weighed the informing and voluminous evidence which has been placed before us in regard to a subject of major importance to the Canadian people, and, in arriving at our conclusions and making our recommendations, we have endeavoured to eliminate any considerations as to what might be theoretically the best course to pursue under other circumstances and in other countries, and to base our judgment solely on what is best for the people of Canada.

196. We have already made definite recommendations in regard to Road Transport, but the main problem before the commission is to secure relief to Canada from the heavy burden arising out of the railway situation. To attain this relief drastic measures of economy are imperative and schemes having this object in mind have been suggested.

#### I. PLANS

197. The complete amalgamation of the two systems has been suggested as a method, not only for attaining a maximum of economy, but also for the most effective use of the properties. This raises the question whether it may be done either by public or private ownership. Whatever merits or demerits this proposal may have, the time is not opportune for giving serious consideration to this particular remedy; neither complete public nor complete private ownership is possible.

To establish a monopoly of such magnitude and importance would place in the hands of those responsible for the administration of the system powers that would, if not properly exercised, prejudice the interests of the Dominion as a whole.

198. It has also been suggested that the Canadian National Railways should be leased to the Canadian Pacific Railway, either in perpetuity or for such a period as would afford an opportunity to effect substantial economies.

A lease in perpetuity presents certain difficulties. It would, whatever safeguards may be adopted, result in the establishment of a monopoly.

199. Other reasons which militate against a perpetual lease are twofold: first, should the population of Canada greatly increase, the volume of traffic would grow and the railway mileage be materially enlarged, with the result that the management of so great a system might well become unwieldy and necessitate segregation. The second reason is a natural and justifiable hesitation to commit, finally, future generations, and even the present one, to a policy adopted under the stress of difficult circumstances, which may not be best adapted to a new set of conditions difficult to forecast.

200. It is acknowledged that a short term lease (fifteen years for example) would not provide the opportunity for the full measure of economy afforded by amalgamation, or for the wholesale abandonments of functionally duplicate lines, although it was claimed for this plan that it would ensure:

(*a*) A considerable measure of improvement over the present situation and a clearly defined and undivided responsibility;

120535

(*b*) A valuable opportunity to weigh the advantages of unified operation in order that the people might decide, at a future date, and when the pressure of difficult financial conditions has been removed, as to the policy best adapted to the conditions, social and economic, of Canada;

(*c*) A desirable relief from the heavy demands made upon the resources of the Government, not only to cover operating deficits of the National System, but also capital expenditures, which demands must either place too heavy a burden upon the taxpayer or limit expenditures for other important and necessary improvements;

(*d*) That if as a condition of a short term lease a profit-sharing basis was developed, it would introduce in the unified operation of both systems the element of financial interest which would be conducive to efficient management;

(*e*) That removal of railway management from political interference would be achieved effectively without suggesting self-imposed limitations on the exercise of the powers of the Government of Canada.

An objection to this proposal is that under such a plan the systems would tend to merge and that at the termination of the lease it would be extremely difficult to re-establish them as separate entities.

201. These and other plans have not fulfilled the conditions which in our opinion are necessary to any practicable solution of the Canadian railway problem. That solution must have regard to the following:—

(i) Correct evils which admittedly are apparent in the operations of the past.

(ii) Provide machinery for co-operation between the two railways with a view to improving their financial position.

202. For the sake of clarity certain main considerations which have been present to our minds are here stated:—

(i) The identity of the two railway systems should be maintained.

(ii) The management of the National Railways should be emancipated from political interference and community pressure.

(iii) Machinery should be provided for co-operation between the two systems for the elimination of duplicate services and facilities and the avoidance of extravagance.

(iv) The attainment of a scale of economies which will bring the burdens of the National System within reasonable dimensions and effectively check extravagant and costly operation.

(v) Reasonable protection for the privately-owned undertaking against arbitrary action by the publicly owned undertaking which might unfairly prejudice the interests of the privately-owned undertaking.

In outline the plan we respectfully recommend for adoption is as follows:—

#### II. TRUSTEES

203. Three trustees should be appointed by the Governor in Council, in whom should be vested all the powers of the present Board of Directors of the Canadian National Railways, both in respect of the parent and all subsidiary corporations of the System; and any and every power and authority necessary to enable them to administer the property and operate the System and every part thereof.

Senators and Members of the House of Commons and persons holding or having within five years held office or place of profit under the Crown in the right of the Dominion or one of the provinces of Canada, should be disqualified for appointment.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120536

Vacancies among the trustees shall be filled from a panel of eight named by the remaining trustees.

204. One of the trustees should be named as chairman at the date of his appointment with tenure of office seven years. The terms of the remaining trustees should, in order to prevent them expiring on the same date with each other, or on the same date as that of the chairman, be for differing periods of less than seven years, to be fixed in each case in the Order in Council making the appointment. All trustees should be eligible for re-election. All should be persons of proved business skill and capacity; the chairman in particular should have financial, administrative, and executive ability of a high order. On the points of integrity and ability involved in these qualifications, there should be no possibility of doubt in the case of any appointee. The chairman should give his whole time to the duties of his office. All trustees should be paid adequately, the chairman in particular should receive a salary commensurate with the high responsibility with which he is charged, and the special qualifications he must be assumed to possess.

A majority of the trustees should govern its decisions, subject to this qualification that the chairman must be a member of any majority.

## III. BUDGET REQUIREMENTS OF SYSTEM

205. The annual budget of the railway should be under the control of the trustees. Amounts required for income deficits, including interest on railway obligations, for capital and for refunding, should first be submitted to the Treasury Board for its approval and presentation to Parliament by the Minister of Finance.

206. Since the debt of the System in the hands of the public is now very large and more than the railway can carry from its earnings even under improved conditions, sums which are required to meet deficits should be voted by Parliament annually and not raised by the issue of railway securities as has been done in recent years. This recommendation does not apply to capital for improvements and betterments nor to amounts required for refunding.

## IV. ANNUAL REPORT TO PARLIAMENT

207. A report to Parliament by the trustees should be made annually, and should set forth in a summary way the results of operations and the amounts expended on capital account, brought into comparison with the appropriations made by Parliament, so that the exact position shall be placed before Parliament. There should also be provision against utilizing appropriations for capital account to cover deficits in operation, or for interest, without the express authority of Parliament.

## V. AUDIT

208. A continuous audit of the accounts of the System should be made by independent auditors appointed by Parliament from a list or panel drawn up by the trustees and they should make a report to Parliament, calling attention to any matters which in their opinion call for remark. In view of the report of the auditors no examination of the detailed accounts of the System should be necessary by a parliamentary committee. For the purpose of supplying necessary information to Parliament the attendance of the trustees might be necessary. In the interests of discipline and to prevent prejudice to the relations that should prevail between trustees and the staff, we earnestly recommend that the officials of the company in charge of operations should not be asked to appear for examination

120537

134. The locomotive fuel bill of the two systems dropped from $58,242,655 in 1923 to $29,433,816 in 1931, both companies reducing these expenditures by one-half. The reduction in the price of coal has been but slight, but the drop in tonnage has been considerable. The proportion that fuel bears to the general cost of railway operation is shown in the following statement:—

| Operating Ratios | Canadian National | | Canadian Pacific | |
|---|---|---|---|---|
| | 1923 | 1931 | 1923 | 1931 |
| | per cent | per cent | per cent | per cent |
| Fuel for locomotives | 13·12 | 8·55 | 12·09 | 8·69 |
| Other operating expenses | 78·66 | 91·16 | 68·91 | 71·62 |
| Total | 91·78 | 99·71 | 81·00 | 80·31 |

It will be noted that while the Canadian National fuel ratio dropped from 13·12 per cent to 8·55 per cent, the ratio of other operating expenses increased from 78·66 per cent to 91·16 per cent, not only effecting the saving in fuel but increasing the ratio of total operating expenses to revenues by 7·93 per cent.

135. In seeking a "yard stick" by which to measure operating results of the Canadian National Railways it has been customory to take Canadian Pacific Railway performance. This, however, must not be regarded as an absolute criterion. Operating costs are bound to be affected by differences in size of the properties, the purpose as well as the type and standard of construction, the general physical condition, the differences in character and volume of traffic, average haul of freight, and train and car loadings. However, if the level of expenses of the Canadian Pacific is to be accepted as measurably determining what the relative operating charges of the National lines should be, the information placed before us by the experts who have been engaged in correlating the statistical data of the two systems indicates that the operating costs of the Canadian National System are in certain particulars much higher than they should be. This would appear to be the case in the item of supervisory expenses, also in station and yard services. The Canadian National costs were greater than the Canadian Pacific by 63·5 per cent for superintendence, 38·2 per cent for station service, and 69·7 per cent for yard service, while the train mileage of the National lines was only 22·8 per cent, and the car mileage 34·9 per cent greater than that of the Canadian Pacific.

136. The immense expenditures of the Canadian National for the improvement of its property, the larger additions to its rolling stock, the advantages of increased tractive power, and the more generous expenditure upon the upkeep of its property, should have made possible a great improvement in operating performance. Whether the improvement actually secured has been commensurate with the expenditure involved is a moot question.

## IX. OPERATING RATIOS

137. The operating ratio of a railway (being the proportion of operating expenses to operating revenues) is generally regarded as indicative of the efficiency of operation and management of an enterprise. Under comparable conditions an increase in this ratio would indicate a falling off in the efficiency of the railway; a decrease in the ratio would suggest greater efficiency.

138. In comparing the performance of two railway systems on the basis of operating ratios, it is necessary, before drawing conclusions, to make allowance for factors that may adversely affect results in the case of one or the other, and to ascertain as far as possible that the figures that enter into the calcula-

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120538

tions are on a comparable basis. A detailed analysis and comparison of the operating accounts of the Canadian National and Canadian Pacific was made by an independent railway accountant employed by the commission to ensure a fair basis of comparison between the accounts. The results of this comparison appear in the following table:—

OPERATING RATIOS

| Year | Canadian National | Canadian Pacific |
|---|---|---|
| | per cent | per cent |
| 1923 | 91·8 | 81·0 |
| 1924 | 92·5 | 80·5 |
| 1925 | 86·7 | 77·3 |
| 1926 | 82·5 | 75·8 |
| 1927 | 84·9 | 78·3 |
| 1928 | 82·0 | 75·4 |
| 1929 | 85·6 | 77·3 |
| 1930 | 91·4 | 78·4 |
| 1931 | 99·8 | 80·3 |

139. There are undoubtedly factors that adversely affect the Canadian National in comparison with the Canadian Pacific. The officers of the National system operate two great railroads which were constructed as competitors, with consequent duplication of tracks, shops and facilities, a condition which the co-ordination which has gone on progressively for a decade has not yet entirely overcome. There are also considerations of lighter traffic and shorter average haul with consequent greater terminal and yard expenses in the case of the National lines.

140. The Canadian Pacific was constructed and developed as a single unified system of railways and thus avoided many of the disadvantages which apply to the Canadian National system.

141. An analysis and comparison of accounts of both companies, with due regard to the considerations put forward by the Canadian National as adversely affecting their operations, do not, in our opinion, justify the very considerable differences in the operating ratjos of the two systems.

## X. POLITICAL AND PUBLIC PRESSURE

142. The conduct of the affairs of the National Railway has been subjected in the past to political and public pressure. It is, however, necessary to make a distinction between unwarranted political interference and the influence of broad public policy. To the latter category belong several of Canada's major transportation schemes, such as the Intercolonial and Canadian Pacific projects, which were the outcome of definite political arrangements based upon broad national considerations. Others, such as the original Grand Trunk, in a lesser sense, and the Canadian Northern and Grand Trunk Pacific in more marked degree, represented a compromise between the aims of private promoters and the endeavour of the state to turn those ambitions to national advantage. While certain of these projects became warmly contested political issues, they were endorsed by the Canadian electorate at successive general elections, and were accepted as approved national policy.

143. The majority recommendations of the Royal Commission on Railways and Transportation in 1917 were designed to provide safeguards against political interference which is instinctively to be feared in the conduct of a public enterprise of the magnitude and character of the Canadian National Railways. But

120539

the Government of the day declined to follow the plan of organization recommended by the commission, which was in substance to place control in a permanent and self-perpetuating Board of Trustees.

144. There was adopted, instead, the plan which is contained in the Canadian National Railway Act. This Act provides for a Board of Directors to a maximum number of seventeen, appointed by Order in Council, holding office from year to year. Appointment to the office of chairman of the board and president of the company is made by the Government, and concurred in by the board.

145. Under the circumstances, the directors' functions have been in practice nothing more than advisory. It would seem that they generally gave formal approval to programs of expenditures which they appeared to regard as the main concern of the president and the Government. This left the railway open to political influence and to public pressure exerted by communities and by associations of business and labour interests.

146. Of direct political interference by ministers and members of Parliament in the detail operations of the railway, we were assured by the officials there was little or none. It was in the larger sphere of policy that political considerations led to unwise and unnecessary capital expenditures, the result of which was to create an atmosphere in which the ordinary principles of commercial operation of the railway were lost sight of.

147. The President of the Canadian National Railways, in a considered statement made to this commission in the course of its inquiry, expressed the following views:—

"One of the inherent disadvantages of any state-owned enterprise such as the Canadian National Railway, is the problem of political interference—and one might also add, public pressure. In making this statement I wish it distinctly understood that I imply no criticism of any party or any government, present or past. I merely state a fundamental and universally admitted condition.

"The leaders of all political parties and the people of Canada as a whole are a unit in their desire to prevent political invasion of the Canadian National Railway. But the plain fact is that, irrespective of such wishes and desires, the problem presents difficulties beyond the control of our leaders, be they ever so patriotic or high minded. After all in any form of popular government it must be accepted as axiomatic that the business of government is politics and, irrespective of whether one likes it or not, politics is something with which a government must reckon in all its activities."

148. The President of the Canadian Pacific appeared to be more concerned over the activities of what he termed "politically-minded" executives of the publicly-owned railway than he was over straight political pressure for definite ends. He said:—

"We talk a great deal about political interference being damaging to railway operations, and we know that that is true, generally speaking. But when we say it we seem to think the only political influence is that exercised by a government, or a member of government, or a member of parliament. To my mind the worst kind comes from the political attitude of men in publicly-owned institutions. Possibly they are not conscious of it, but they become politically-minded; their policies and actions have a political tinge, and that, from my standpoint, is more serious as representing the attitude of the corporation than the isolated act of a member of parliament who tries to get a man employed.

"Years ago the ability of privately-owned railway companies to withstand political pressure was somewhat limited. To-day it is nothing like it was, because we can say 'no' to that kind of pressure. But the politics that develop inside an organization because it is publicly-owned, and not privately-owned, is a serious thing.

"We spoke of not being able to anticipate what government policies would be towards any railway, and I believe we cannot tell from year to year what the policy of any government would be in respect of its railway property. Providing it owns it, and has a measure of control of its policies, and so long as they are putting up the money we cannot avoid that possibility."

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120540

149. Possibly the year 1929 affords a striking example of what political and public pressure, presumably, were able to accomplish.

150. The Canadian National Railway requirements authorized by Parliament during the fiscal year 1929-30 were as follows:—

| | | |
|---|---|---|
| Canadian National Railway Budget for 1929 | $ 53,750,000 | |
| Canadian National Eastern Lines Deficit (1929) and 20 per cent reduction in tolls | 6,808,172 | |
| Prince Edward Island Car Ferry construction | 2,500,000 | |
| Branch Line Construction (1929-1932) | 30,136,325 | |
| Montreal Terminals (Construction) | 50,000,000 | |
| Acquisition of Railways | 31,247,500 | |
| New Equipment Issue | 18,000,000 | |
| | | $ 192,441,997 |

In addition, construction programs were proceeding under prior legislation, the unused authorities being for:—

| | | |
|---|---|---|
| Branch Lines Construction | $ 9,482,021 | |
| Toronto Terminals Construction | 3,583,863 | |
| | | $ 13,065,884 |
| Total expenditures authorized | | $ 205,507,881 |

151. The actual cash expenditures during the same year covered by these authorizations amounted to $113,859,777, the balance, $91,748,104, being chargeable to subsequent years as construction work proceeded or obligations on account of roads purchased matured.

The foregoing does not take into account other legislation which provided for the refunding of $18,000,000 of maturing securities, nor $6,396,000 voted for the Hudson Bay Railway and terminal development, in the same year.

152. The net increase in funded debt of the Canadian National due the public for the year 1929 amounted to $144,670,459; whereas the annual increase for the previous six years had averaged $28,897,648.

153. Annual interest on the funded debt in the hands of the public, which, at the end of year 1928, was $41,810,880, increased to $55,587,145 at the end of the year 1931, due largely to the expansion policies of 1929.

154. When considering the scale upon which branch line extensions and acquisitions, as well as hotel expenditures were made, and railway and steamship services duplicated, it is impossible to avoid the conclusion that the Board of Directors and the management of National Railways were amenable to political influence and pressure, which it would have been in the public interest to have withstood.

120541

# CHAPTER IV

## CONTRIBUTORY CAUSES OF THE RAILWAY PROBLEM

155. Before proceeding to discuss remedies for a solution of the transportation problem, it is proposed to summarize the factors that have contributed to our present situation. There may be differences of opinion in regard to the relative importance of these several factors, but there can be none as to their cumulative effect upon the railways or as to the necessity for a genuine attempt to improve the situation, both in the interests of the railways themselves and of the tax-payers of Canada. The principal contributory causes have been:—

1. The over-development of railways beyond the immediate needs of the country.
2. Aggressive and uncontrolled competition between two nation-wide railway enterprises, a competition the more disastrous in that one of the competitors was publicly-owned and supported by the full resources of the Dominion.
3. The reactions of the world trade repression which began in 1929 and has progressively increased in its severity with each succeeding year.
4. Competition from other forms of transport, notably road transport.
5. Inelasticity of freight rates and railway practice generally which prevents prompt action in the meeting of falling revenues and dealing effectively with competition from other forms of transport.
6. Contractual arrangements with labour organizations which set up a rigid wage scale and inflexible labour practices generally.
7. The special disabilities of the Canadian National Railways due to:—
   (*a*) Assumption, through Government action, of liabilities of insolvent railway systems for reasons of national credit.
   (*b*) Large capital expenditures for improvement of the physical condition of the absorbed systems.
   (*c*) Political and community pressure on the management arising out of direct government control.

Of these items, three have already been dealt with in the preceding chapters, *i.e.*, aggressive and uncontrolled competition, political and community pressure on the management of the Canadian National, and the burden of excessive capital liabilities of the latter system. No further discussion of these matters is called for here.

### I. EXCESS MILEAGE

156. In the earlier part of this report emphasis has been laid on the excess mileage of Canadian railways. The policy of branch line expansion in the period 1924 to 1930 has also been dealt with. It has been pointed out that the population per mile of steam railways in the United States is more than double that in the Dominion, and competent railway authorities in the United States concede that there is a great excess of mileage in their country. Reference has been made to the low traffic densities prevailing upon the greater part of the Canadian mileage. The traffic density maps, which accompany this report, tell the story in graphic form. In the interests of sound railway practice,

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120542

a careful examination of all light traffic lines should be undertaken forthwith by both railways to determine what should be retained and what should be abandoned. Where the decision is for abandonment, operations should be promptly suspended, and the salvaged material recovered then or later. Thought should be given to the operation of a considerable mileage during a portion of the year only. Radical reductions, not only in the service on these light traffic lines, but also in the mileage of this group is essential if economic security is to be restored to the railways.

## II. TRADE DEPRESSION

157. In so far as the position of the Canadian railways is the result of the depression in world trade, they have merely shared the general fate of most industries and of railways in other countries. In the United States of America the recession in railway earnings did not appear until 1930, but by the end of 1931 the net operating income of the Class I roads had fallen from $1,395,348,471 to $662,314,465, (more than 50 per cent) which is greater than the reduction shown by the Canadian Pacific Railway Company. The more favourable showing of this company is no doubt due to the drastic reductions in working expenses and services, undertaken at an earlier date than on the United States roads, and therefore showing their full effects in 1931. Since any measures looking to a revival of trade are beyond the scope of the Commission's inquiry, we pass from this topic with the observation that an increase in traffic of even 20 per cent above the figures for 1931, which would still be below the gross earnings for 1925 would result in substantial improvement in the railway position in Canada. Experience gained in operating at reduced costs in the last two or three years should not be lost and should therefore be reflected in a greater ratio of net earnings.

## III. COMPETITION FROM OTHER TRANSPORT AGENCIES

### (a) Road Transport

158. Road transport in the past decade has challenged the supremacy of the railways in the field of transportation both in the conveyance of passengers and freight. In 1923 there were 515,178 private automobiles registered in Canada, while in 1931 this figure had increased to 1,024,385, an increase of nearly 100 per cent. During the same period motor coaches undoubtedly increased considerably. Records for years prior to 1927 are not available but the number of motor coaches registered in 1931 was 1,636, and this represented an increase of 61 per cent over 1927. Motor trucks, both privately-owned and common carrier, now number 165,855, which represents an increase of 214 per cent over the number registered in 1923. The total motor vehicle registrations (exclusive of motorcycles) increased during the period we have under review (viz. 1923 to 1931) from 576,668 to 1,197,188, or more than 100 per cent. This development has brought about a lasting revolution in the travel habits of the people, and in many respects has wrought a transformation in the economic and social life of the country. It has given facilities for transport never before enjoyed by the general public, and has given trade and industry facilities of great and permanent value.

159. But, while the motor vehicle has done much to create and stimulate travel, it has also effected the diversion of a considerable volume of traffic from the railways. It is the private automobile which has mainly been responsible for the diversion of the bulk of the passenger traffic to the highways, with the result that the short distance passenger traffic of the railways has shrunk to small proportions and their long distance passenger traffic is threatened. The

120543

transfer of traffic from the railways to the motor coach has not in the aggregate reached, as yet, large dimensions, but the use of this agency of transport is increasing and its effect upon the railways has, in some of the more densely populated districts, already been considerable. In the conveyance of freight, the motor truck, principally the privately-owned, has made serious inroads into the short-distance traffic of the railways.

160. In fairness to the road vehicle, it should be stated that this diversion of traffic from the railways to the highways is in many cases due to the fact that conveyance by road is intrinsically a more suitable form of transport, either because the convenience afforded by the road vehicle outweighs other considerations, or because it is definitely cheaper. But in so far as the diversion is due to lower costs as a result of road vehicles not bearing their fair share of the cost of the highways which they use, or because they are free from regulations analagous to those imposed on other forms of transport, then such a diversion may very well be opposed to the best interests of the country's welfare.

161. With the extension of hard-surface roads and the increasing mileage kept open in the winter, a wider use of motor vehicles must be anticipated and such an extension will bring in its train further diversion of traffic from the railways. In seeking a permanent solution of the railway problem in Canada this comparatively new and convenient form of transport, and its effect upon the railways, cannot be ignored, and a fair basis of competition between these two transport agencies, in so far as they are acting as common carriers of either passengers or freight, must be found, not only in the legitimate interests of the railways but also in the interests of the public and trade and industry generally. We feel that not only is unfair competition between railways definitely harmful to the general welfare but that unfair and unregulated competition between railways and road operators is also damaging, resulting as it does in waste and duplication of effort.

162. In an appendix to this report we have included a chapter giving statistics of highway transport in Canada and information as to the fees charged and the regulations imposed by provincial governments, together with a summary of the views submitted to us of various highway authorities and of those engaged in the motor transport industry.

163. It is generally recognized that there is a need for regulating road motor services and for equalizing the conditions under which road and rail services are provided. Especially is this need recognized when regard is had to the extent of the regulations imposed on the railways, to the almost entire absence of regulations of road operators, particularly those operating freight services, and to the fact that it has been the practice to establish railway freight rates on the assumption that the transportation of freight was to all intents and purposes the monopoly of the railways. Upon this hypothesis tariffs and tolls have been established on a comparatively high scale (when regard is had to the actual cost of operation) for the carriage of short distance package freight and for express services, and upon a lower and less remunerative scale for the transportation of heavy and bulky commodities which are generally conveyed over long distances.

164. If the railways lose a large part of their profitable short distance traffic to the roads a readjustment of the whole freight rate structure may be necessary, with a possible increase in the rates charged for the long distance and heavy freight traffic.

165. It is essential that the country should have the free and unhampered use of the cheapest forms of transport and therefore no restrictions which would unfairly prejudice the road user should be imposed. The railways themselves should be empowered to provide and operate services of road vehicles, subject

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120544

to whatever restrictions are imposed upon other road transport operators. On the other hand, in our opinion, in Canada, where of necessity freight must be conveyed in large quantities over long distances at all times of the year, railway transportation is essential to the economic welfare of the country. Because they are essential and because the railway freight rate structure implies conditions approximating to a quasi-monopoly, the railways require, if they are to continue to operate efficiently, a measure of protection from long distance road competition and an equalization of the conditions under which short distance traffic is carried.

166. Any restrictive regulations imposed on the road vehicle will not determine the division of the functions as between roads and railways except to a relatively limited extent. In our view, this division of function will not be best obtained through the arbitrary action of governments, but rather through the efforts of those engaged in the transport industry. By concentrating less on mutual competition and by turning their energies to the co-ordination of the services they provide, a properly co-ordinated system of transport will be evolved. In our view the true function of road transport, in such a co-ordinated system, as auxiliary and complementary to the steam railways, would appear.

167. Under the constitution of Canada regulation of road transport falls within the exclusive jurisdiction of provincial authorities. While the Dominion Government is not limited by the constitution in the matter of taxation, in practice road vehicle taxes are imposed solely by the provinces. These considerations make it inadvisable for us to make any specific recommendations in regard to the regulation and taxation of road transport. The federal and provincial governments in co-operation should, however, examine this question of the regulation and taxation of road motor vehicles with a view to equalizing the conditions under which road and rail transport is carried on, and to securing uniformity throughout the Dominion. A joint inquiry in which both federal and provincial governments were represented should enable a measure of agreement to be reached upon the general principles which should govern the regulation and taxation of motor vehicles using the public highways. The administration and adaptation from time to time of the agreed principles of road transport might be left to a consultative committee consisting of representatives of the various provincial governments and of the federal Government.

168. In our view the general principles upon which operators of road passenger services and common and contract carriers of freight should be regulated are as follows:—

(i) Schedules of rates and charges should be published.
(ii) Within those schedules common carriers of freight should accept and carry what is offered to them without discrimination between customers and commodities.
(iii) Operators should be insured against all risks, including third party risks.
(iv) Operators should keep accounts on a prescribed system and render returns to appropriate public authority on a common basis.
(v) Minimum standards in regard to working conditions, including wages and hours of labour, should be required.
(vi) In the interests of the safety of the public, a standard of fitness should be required of all operators in regard to their vehicles.
(vii) Due regard should be had to the preservation of road surfaces, and, to this end, restrictions should be imposed upon the size and weight of road vehicles in accordance with the type and character of the highway.

120545

169. Furthermore, we consider that any joint inquiry that may be set up to examine this question should give serious attention to the institution throughout the Dominion of a uniform system of licensing (in addition to the existing licensing for revenue purposes) of road passenger service vehicles and motor vehicles used for the conveyance of freight, whether operated as common carriers, contract carriers, or used exclusively for the conveyance of the freight of their owners. Under such a system it is suggested that a licence should only be granted to common carriers of passengers and freight where it can be proved to the satisfaction of the licensing authority that the service rendered, or proposed to be rendered, is in the public interest.

170. As regards the taxation of road motor vehicles, the amount of such taxation, including the tax on gasoline, should reflect a fair proportion of the cost of providing and maintaining the highways. A fair proportion would, in our opinion, be equivalent to two-thirds of the total cost in respect of highways in urban areas, while in the more undeveloped districts the proportion might be increased. As to the distribution over the various classes of vehicles, it is suggested that the scales of taxation should be so adjusted as to fall with greater severity upon the heavy long distance traffic.

### (*b*) Aviation

171. The development of aviation has been one of the phenomena of the present century and with the advance of aeronautical science, aircraft will play an increasingly important part as an agency of transport. Particularly will this be the case in this country where the physical and geographical characteristics, the sparsity of the population and the long distance between the centres of the population, all tend to favour air transport.

172. Good progress has already been made in the development of this new transportation instrument and much credit is due to those whose responsibility it is to foster that development. The aeroplane is already accepted as a normal means of transport throughout very large areas in Northern Canada. It has rendered possible travel to the farthest limits of the Dominion, with speed and comparative safety and without the large capital expenditures which are inseparable from roads and railways.

173. Great as are it potentialities, aviation is still in its infancy and we feel that it is too early to make any specific recommendations in regard to air transport. The Dominion Government should, however, keep in close touch with the developments which are taking place, and which will to an increasing extent take place in the field of aviation. It is encouraging to observe that the two principal railways have recognized the importance of the newer mode of travel and their investment in one of the largest aviation undertakings in the Dominion may well prove to be the foundation of a proper co-ordination between these two agencies of transport.

### (*c*) Waterways

174. For eight months of the year the facilities of the railways of Canada are duplicated through approximately one-third of their length by a system of inland water transportation which, developed by the Government at great cost, furnishes shippers of long-haul bulk commodities with a service at rates with which the railways are unable to compete. During the navigation season our inland waterway absorbs not only practically the whole of the eastbound export grain traffic from the head of the lakes to lower lake ports, but a considerable portion of internal traffic of the Eastern and Central regions in bulk commodities, such as coal, iron ore and cement.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120546

175. The explanation of the apparent anomaly of a system of inland water transport, dependent upon canals, operating upon a vast scale, partly in conjunction, but largely in substitution for modern rail transport, is that in natural expanse, safety, despatch, and capacity, not to speak of sources of traffic, the Great Lakes-St. Lawrence waterway is without a counterpart among systems of inland navigation. To provide continuous navigation from Montreal through twelve hundred miles of lake and river and to the head of lake Superior has required only seventy miles of canalization. Indeed conditions of navigation on these great bodies of water present a resemblance much closer to the scale and freedom of ocean transport than to the restrictions of the narrow inland waterways which the original advent of railways so largely superseded.

176. The sources of traffic are as extensive as the system itself. Draining the mid-continental basin, the Great Lakes-St. Lawrence route provides not only an interior system of unique length, but an outlet, the sole large outlet by water, to the North Atlantic seaboard, for the widest and richest agricultural areas of both Canada and the United States.

177. The arterial pulse of the movement of commerce through the Great Lakes navigation system is to be found in the Canadian and United States locks at Sault Ste. Marie. It is not generally appreciated that the traffic through the St. Mary's river connecting lakes Superior and Huron is, in a normal season, in excess of the combined anuual traffic through the Panama, the Suez, the Kiel and the Manchester Ship canals. In 1929 the total traffic passed at Sault Ste. Marie (Canadian and United States locks) was 92,616,808 tons; for the Panama it was 30,663,006; for the Suez, 33,466,014; for the Kiel, 21,613,088; and for the Manchester, 6,558,598, a total, for the four salt-water canals of 92,300,000, or a slightly less tonnage than that of the fresh-water system as registered at the principal tally point for our international inland waters.

178. As a result of the trade depression the decline in the ore and grain traffic of the upper lakes is strikingly indicated by the decrease in tonnage passing through the combined Sault Ste. Marie canals since 1929. In 1930, it dropped to 72,897,895 from the peak ninety-two millions in 1929, and to 44,606,325 in the season of navigation of 1931, or more than 50 per cent.

179. Plying these waters are scores of vessels of more than 600 feet in length and of 60 and 70 feet beam, some capable of carrying in a single load 17,000 tons, or 566,666 bushels of grain. The completion of the new Welland Ship canal has admitted these large upper lake freighters to lake Ontario and the upper St. Lawrence waters, and only one hundred miles of river remain to be dealt with to completely modernize the Great Lakes-St. Lawrence route from the ocean to the heart of the North American continent.

180. In 1931, by no means a representative year, the total traffic through the purely Canadian canals along this route amounted to 16,189,074 tons. This figure would necessarily include duplications of cargoes carried through two or more canals. To this movement 27,651 vessels contributed.

The classes of commodities carried included:

| | Tons |
|---|---|
| Agricultural products | 7,737,307 |
| Animal products | 15,830 |
| Manufactures | 2,976,780 |
| Products of forests | 748,419 |
| Products of mines | 4,690,738 |
| Total | 16,189,074 |

181. Two-thirds of the movement of agricultural products, as listed above, consisted of grain, principally wheat. Canadian wheat passing through the

120547

Canadian and United States locks at Sault Ste. Marie during the season of 1931 amounted to 146,016,991 bushels, compared with 312,425,869 bushels in 1928.

182. The magnitude of this inland shipping route to the Atlantic should not be allowed to obscure the great importance to Canada of the Panama canal, not merely as a means of increasing the flow of export grain through the port of Vancouver, but in promoting generally the export trade of British Columbia. Nor should the effect upon Canadian transport generally of the utilization of the Panama canal as an alternative route for Canadian transcontinental traffic be overlooked. During the year ending June 30, 1930, Canadian inter-coastal cargo used this canal to the extent of approximately 180,000 tons westbound and 190,000 tons eastbound.

183. Railway transportation in so far as the movement of grain and bulk commodities is concerned has been largely adjusted to the problem presented by competition from the great inland waterway. The railways carry to and from the head of the lakes and to and from the lower lake ports. The movement of grain in particular is dependent on low inland water transport and the fortunes of the railways themselves in Western Canada are dependent upon the ability of the grain grower to place his product at low cost at ocean ports. In this movement to the eastern coast the inland waterways are a necessary part. If the producers of Western Canada are to continue in the business of growing for export the great bulk of grain and heavy commodity traffic between west and east must continue to use the inland waterways.

184. If and when grain in any considerable volume passes out of the country by the Hudson's Bay route, there will still remain a very large tonnage which will seek the eastern and western ports, and it is not likely that the volume of traffic from west to east will vary greatly from the present figures. Increases in production have in general kept pace with the movement of grain to the Pacific coast, and it is more than likely that a similar experience will result from the opening of the port of Churchill to the export grain trade.

185. While on first consideration it might appear that the construction of canals which are free of all tolls to water carriers is in effect a form of state subsidy to a rival transport agency, yet in so far at least as bulk traffic in grain and heavy commodities is concerned, complaint is not made by the railways on this score. The imposition of tolls would not help and would probably hinder the railways as tending to discourage production. The Canadian Pacific Railway has now, and for many years has had, its own lake boats engaged in the carriage of passengers and package freight, and the Canadian National Railway has a working arrangement for the same purpose with one of the largest of the lakes shipping companies.

186. The further development of the St. Lawrence and lower lakes canal system, whereby package freight may pass from Montreal direct to the head of the lakes without transhipment may eventually make further inroads into the all-rail haul from east to west, but in the case of much of the package freight movement, time is an essential element, and the railways should be able to hold a large share of this movement against their slower competitor.

187. Water-borne traffic will continue to be a factor of major importance in Canadian transportation both on the inland waterways and coastwise through the Panama canal, but rail traffic has in the main been adjusted to the conditions now existing and it does not seem probable that the developments now under way and in contemplation in connection with the Hudson's Bay route, and the deepening of the St. Lawrence-Great Lakes canals, will seriously prejudice the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120548

position of the railways in the future. The competition of water-borne traffic has not been an important factor in bringing about the present difficulties of the railways.

## IV. FREIGHT RATES

188. While we have refrained from making any recommendations we recognize that the question of freight tariffs and tolls is inextricably bound up with the question of transport. The position at the moment, however, is difficult and complex. It has been represented to us by many competent witnesses that any increase in tolls would only impose a further handicap on the Canadian manufacturer and producer at a time when they can least afford to shoulder additional burdens, and that the increased tolls might have the effect of so restricting traffic as to afford little, if any, relief to the railways.

189. It would appear that, at the moment, any adjustment of the freight tolls and tariffs would be inadvisable, but we feel it our duty before passing from this question, to express the view that even under more favourable circumstances the financial position of the railways may be such as to demand that the whole question of tariffs and tolls, in its widest sense, should be the subject of special investigation, with a view to determining whether or not the existing tariffs and tolls charged for the conveyance of freight are just and reasonable both to the railways and their customers. In determining what is fair and reasonable to the railways regard should be had inter alia to the cost (including the remuneration of the capital invested) of providing these services.

## V. CONTRACTUAL RELATIONS WITH LABOUR

190. The wages and conditions of employment of a large majority of the employees of both railways are fixed by agreements with the trade unions concerned. A majority of these employees are members of trade unions which include not only employees of the railways in Canada but also of the railways in the United States. Whether by reason of this close affiliation, or for other reasons, it is the fact that the wages and conditions of service of railway employees in both countries are substantially on the same basis. In recent months the wages of the officers and employees of both systems have suffered certain reductions which have eased the burden upon the railways, and it is satisfactory to record that these changes have been made without any disturbance.

191. With the continuance of good relations between the management and employees of both systems, and a frank recognition of the serious financial situation, much can be done to ease the position of the railways, without imposing any undue hardship upon the employees.

## VI. SPECIAL DISABILITIES OF THE CANADIAN NATIONAL RAILWAY

### (a) Excessive Capitalization and Overhead Charges

192. The Canadian National System suffered under a heavy burden of capital liability and fixed charges with consequent unsatisfactory results of operations from the financial point of view. As this matter has already been dealt with in Chapter III no further reference to it need be made.

120549

### (b) Physical Disabilities of the National System

193. From 1917 to 1922, the management of the companies now comprised in the Canadian National System expended upon capital account in completion and improvement of the lines under their care the sum of $222,547,181. When the new management took over the consolidated lines in 1923, further capital expenditures were required to put the System in condition to obtain a proper share of traffic. The task of bringing the road and equipment to the standard required for efficient operation was undertaken with enthusiasm, and money for these purposes was generously supplied by Parliament.

194. In the result, there emerged an efficient transport system affording a service of high standard and with a loyal and enthusiastic staff of officers and employees, but the price was heavy. In the nine-year period, as will be seen from the figures set up in paragraph No. 49 of this report, there was expended for improvements and betterments to roadway, for rolling stock and on lake and river services and the Montreal terminal scheme, but excluding all branch line construction, $304,551,249. Capital for these purposes had to be raised by increasing the debt of the System. Fixed charges increased in this period by approximately $20,000,000. The introduction of new capital in so large a volume, with every dollar carrying liability for interest from the moment it was expended, would have caused in itself a difficult financial position for the railway, even if there had been no depression in business.

# CHAPTER V

## PROPOSALS AND REMEDIES

195. We have carefully weighed the informing and voluminous evidence which has been placed before us in regard to a subject of major importance to the Canadian people, and, in arriving at our conclusions and making our recommendations, we have endeavoured to eliminate any considerations as to what might be theoretically the best course to pursue under other circumstances and in other countries, and to base our judgment solely on what is best for the people of Canada.

196. We have already made definite recommendations in regard to Road Transport, but the main problem before the commission is to secure relief to Canada from the heavy burden arising out of the railway situation. To attain this relief drastic measures of economy are imperative and schemes having this object in mind have been suggested.

### I. PLANS

197. The complete amalgamation of the two systems has been suggested as a method, not only for attaining a maximum of economy, but also for the most effective use of the properties. This raises the question whether it may be done either by public or private ownership. Whatever merits or demerits this proposal may have, the time is not opportune for giving serious consideration to this particular remedy; neither complete public nor complete private ownership is possible.

To establish a monopoly of such magnitude and importance would place in the hands of those responsible for the administration of the system powers that would, if not properly exercised, prejudice the interests of the Dominion as a whole.

198. It has also been suggested that the Canadian National Railways should be leased to the Canadian Pacific Railway, either in perpetuity or for such a period as would afford an opportunity to effect substantial economies.

A lease in perpetuity presents certain difficulties. It would, whatever safeguards may be adopted, result in the establishment of a monopoly.

199. Other reasons which militate against a perpetual lease are twofold: first, should the population of Canada greatly increase, the volume of traffic would grow and the railway mileage be materially enlarged, with the result that the management of so great a system might well become unwieldy and necessitate segregation. The second reason is a natural and justifiable hesitation to commit, finally, future generations, and even the present one, to a policy adopted under the stress of difficult circumstances, which may not be best adapted to a new set of conditions difficult to forecast.

200. It is acknowledged that a short term lease (fifteen years for example) would not provide the opportunity for the full measure of economy afforded by amalgamation, or for the wholesale abandonments of functionally duplicate lines, although it was claimed for this plan that it would ensure:

(*a*) A considerable measure of improvement over the present situation and a clearly defined and undivided responsibility;

120551

(*b*) A valuable opportunity to weigh the advantages of unified operation in order that the people might decide, at a future date, and when the pressure of difficult financial conditions has been removed, as to the policy best adapted to the conditions, social and economic, of Canada;

(*c*) A desirable relief from the heavy demands made upon the resources of the Government, not only to cover operating deficits of the National System, but also capital expenditures, which demands must either place too heavy a burden upon the taxpayer or limit expenditures for other important and necessary improvements;

(*d*) That if as a condition of a short term lease a profit-sharing basis was developed, it would introduce in the unified operation of both systems the element of financial interest which would be conducive to efficient management;

(*e*) That removal of railway management from political interference would be achieved effectively without suggesting self-imposed limitations on the exercise of the powers of the Government of Canada.

An objection to this proposal is that under such a plan the systems would tend to merge and that at the termination of the lease it would be extremely difficult to re-establish them as separate entities.

201. These and other plans have not fulfilled the conditions which in our opinion are necessary to any practicable solution of the Canadian railway problem. That solution must have regard to the following:—

(i) Correct evils which admittedly are apparent in the operations of the past.

(ii) Provide machinery for co-operation between the two railways with a view to improving their financial position.

202. For the sake of clarity certain main considerations which have been present to our minds are here stated:—

(i) The identity of the two railway systems should be maintained.

(ii) The management of the National Railways should be emancipated from political interference and community pressure.

(iii) Machinery should be provided for co-operation between the two systems for the elimination of duplicate services and facilities and the avoidance of extravagance.

(iv) The attainment of a scale of economies which will bring the burdens of the National System within reasonable dimensions and effectively check extravagant and costly operation.

(v) Reasonable protection for the privately-owned undertaking against arbitrary action by the publicly owned undertaking which might unfairly prejudice the interests of the privately-owned undertaking.

In outline the plan we respectfully recommend for adoption is as follows:—

### II. TRUSTEES

203. Three trustees should be appointed by the Governor in Council, in whom should be vested all the powers of the present Board of Directors of the Canadian National Railways, both in respect of the parent and all subsidiary corporations of the System; and any and every power and authority necessary to enable them to administer the property and operate the System and every part thereof.

Senators and Members of the House of Commons and persons holding or having within five years held office or place of profit under the Crown in the right of the Dominion or one of the provinces of Canada, should be disqualified for appointment.

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

120552

Vacancies among the trustees shall be filled from a panel of eight named by the remaining trustees.

204. One of the trustees should be named as chairman at the date of his appointment with tenure of office seven years. The terms of the remaining trustees should, in order to prevent them expiring on the same date with each other, or on the same date as that of the chairman, be for differing periods of less than seven years, to be fixed in each case in the Order in Council making the appointment. All trustees should be eligible for re-election. All should be persons of proved business skill and capacity; the chairman in particular should have financial, administrative, and executive ability of a high order. On the points of integrity and ability involved in these qualifications, there should be no possibility of doubt in the case of any appointee. The chairman should give his whole time to the duties of his office. All trustees should be paid adequately, the chairman in particular should receive a salary commensurate with the high responsibility with which he is charged, and the special qualifications he must be assumed to possess.

A majority of the trustees should govern its decisions, subject to this qualification that the chairman must be a member of any majority.

## III. BUDGET REQUIREMENTS OF SYSTEM

205. The annual budget of the railway should be under the control of the trustees. Amounts required for income deficits, including interest on railway obligations, for capital and for refunding, should first be submitted to the Treasury Board for its approval and presentation to Parliament by the Minister of Finance.

206. Since the debt of the System in the hands of the public is now very large and more than the railway can carry from its earnings even under improved conditions, sums which are required to meet deficits should be voted by Parliament annually and not raised by the issue of railway securities as has been done in recent years. This recommendation does not apply to capital for improvements and betterments nor to amounts required for refunding.

## IV. ANNUAL REPORT TO PARLIAMENT

207. A report to Parliament by the trustees should be made annually, and should set forth in a summary way the results of operations and the amounts expended on capital account, brought into comparison with the appropriations made by Parliament, so that the exact position shall be placed before Parliament. There should also be provision against utilizing appropriations for capital account to cover deficits in operation, or for interest, without the express authority of Parliament.

## V. AUDIT

208. A continuous audit of the accounts of the System should be made by independent auditors appointed by Parliament from a list or panel drawn up by the trustees and they should make a report to Parliament, calling attention to any matters which in their opinion call for remark. In view of the report of the auditors no examination of the detailed accounts of the System should be necessary by a parliamentary committee. For the purpose of supplying necessary information to Parliament the attendance of the trustees might be necessary. In the interests of discipline and to prevent prejudice to the relations that should prevail between trustees and the staff, we earnestly recommend that the officials of the company in charge of operations should not be asked to appear for examination

120553

## VI. CHIEF OPERATING OFFICER

209. While the responsibility for the direction and control of the System should be laid upon the chairman and his associate trustees, provision should be made for the post of Chief Operating Officer, with the titular rank of President. Under his care should be placed the entire working of the railway in detail. The exact extent of his authority should be covered by regulations or by-laws to be made by the trustees.

The President should be appointed by the trustees and should be responsible to them and not directly to the Government or Parliament.

## VII. CO-OPERATION BETWEEN THE RAILWAYS

210. We have emphasized the fact that a principal weakness of the past decade has been the failure of the railways to act together in their own interests and in the interests of the public. It is not enough that each should take all practicable measures of economy in respect of its own system. There must be joint action with a view to savings in the wider sphere.

211. A statutory duty should be imposed upon the trustees as well as upon the Board of Directors of the Canadian Pacific Railway that, consistently with the provisions of the existing law and with the recommendations of this report and with the provision of all reasonable services and facilities, they should adopt as soon as practicable such co-operative measures, plans and arrangements as shall, consistent with the proper handling of traffic, be best adapted to the removal of unnecessary or wasteful services or practices, to the avoidance of unwarranted duplication in services of facilities, and to the joint use and operation of all such properties as may conveniently and without undue detriment to either party, be so used.

## VIII. CONFERENCE BETWEEN BOARDS

212. In order effectively to carry out the injunction to co-operate, the Board of Trustees of the Canadian National Railways and an equal number of directors of the Canadian Pacific Railway shall meet at regular intervals for the purpose of discussing and agreeing in respect of matters referred to in the previous paragraphs. In the event of a failure to agree, there may be an immediate reference to the Arbitral Tribunal provided for in the next succeeding paragraph.

## IX. CONSTITUTION OF THE ARBITRAL TRIBUNAL

213. For the purpose of settling disputes and in particular, disputes concerning the desirability of any co-operative measures or arrangements or course of action and for the settling of details of any scheme giving effect thereto and for determining the conditions thereof, an Arbitral Tribunal should be set up for each occasion. The Arbitral Tribunal should be composed, first, of the Chief Commissioner of the Board of Railway Commissioners and second, of one representative from each of the two railways.

At the request of either railway and upon it being shown to the President of the Exchequer Court of Canada that the matter is of major importance, two additional members may be appointed by him to the Arbitral Tribunal for the occasion.

214. Where the execution of an order involves the doing of any act which by an existing statute requires the assent or approval of the Board of Railway Commissioners or where in the opinion of the Chief Commissioner himself the

MEIGHEN PAPERS, Series 5 (M.G. 26, I, Volume 189)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

L20554

public interests involved are of sufficient importance to warrant it, no order made by the Arbitral Tribunal shall be operative without the concurrence of the Chief Commissioner and his formal written assent.

The powers of the Arbitral Tribunal shall be capable of being invoked by either railway or by the Dominion or any provincial Government. Subject to the recommendations of this report, all matters of procedure before the Arbitral Tribunal should be governed by regulations made by the Chief Commissioner of the Board of Railway Commissioners with the approval of the Governor in Council.

In the event of conflict between the Board of Railway Commissioners and the Arbitral Tribunal, it should be made clear that the order or decision of the Arbitral Tribunal shall prevail.

## X. JURISDICTION OF ARBITRAL TRIBUNAL

**215.** The Arbitral Tribunal ought not to have jurisdiction to order the construction of extensions and additions to existing lines and facilities, except in such minor matters as connections to give access to existing tracks and terminals which by order of the Arbitral Tribunal or otherwise are used, or are to be used, in common. Subject to the provisions of any statute relating to any particular railway, the Arbitral Tribunal will have full jurisdiction as to measures, plans and arrangements for the joint use of tracks and facilities.

**216.** It is not intended to define with precision the subject matters to which the jurisdiction of the Arbitral Tribunal shall extend, but without limiting the generality of the words used above, the Arbitral Tribunal shall have jurisdiction in relation to the following matters:—

(*a*) Joint use of terminals.
(*b*) Running rights and joint use of tracks where there are actual or functional duplications, or where such may be avoided.
(*c*) Control and prohibition in respect of the construction of new lines and provision of facilities and additional services where no essential need of the public is involved.
(*d*) The joint use of facilities where this would promote economy or permit the elimination of duplicating or unremunerative services or facilities.
(*e*) Abandonment of lines, services or facilities.
(*f*) Pooling of any part or parts of freight traffic or of passenger traffic.
(*g*) Things necessarily incidental to the above enumerated matters.

**217.** The conditions and terms of any order should be entirely within the discretion of the Arbitral Tribunal.

**218.** There shall be no appeal to any court in Canada from any decision of the Arbitral Tribunal on any question of law or fact; except as to a question of law if it is one involving a question of jurisdiction, in which case there should be an appeal to the Supreme Court of Canada, by leave of a judge of that court.

**219.** Subject to the provisions of paragraph 218 hereof, section 44 of the Railway Act shall apply; the first paragraph of section 52 of the same Act shall not apply.

L20555

220. [illegible]

221. It is admitted that [illegible] a great deal of unnecessary capital expenditure [illegible] what is actually required.

222. It is the opinion of the Commission that [illegible] case, and that the suggested Board of Trustees of the Canadian National Railways and the Board of Directors of the Canadian Pacific Railway should formulate and agree to schemes which will permit of the working in harmony of those ancillary services which are now operated competitively. If this problem is attacked by the two managements with goodwill and the desire to co-operate considerable economies should result from their efforts and without in any way prejudicing the service rendered to the public.

## XII. CONCLUSIONS

**223.** Although our terms of reference are strictly concerned with the problems arising out of the transportation situation in Canada, we cannot but be conscious of the national difficulties, in which the financial position of the publicly-owned railways is a factor of first importance. Indeed, we apprehend that the urgent need of discovering means of reducing the large railway deficits was a primary factor in causing the Government to place upon us our onerous task.

**224.** In the foregoing report we have outlined a plan which we believe will ensure progressive and co-ordinated development on an economic basis of the railway systems and afford early relief to the Federal treasury by reducing the alarming and increasing deficits and the demands for further capital expenditure in connection with the Canadian National Railway System.

**225.** Whilst all members of this commission concur in these recommendations which, if carried out in letter and spirit by all concerned (the Government, the Public and the Railways), should effect a considerable measure of relief to the taxpayers of Canada, some members would have preferred a plan which would ~~have established~~ a complete dissociation of the Government of Canada from the ~~responsibilities~~ of competitive railway management or of any direct interest ~~therein~~.

**226.** We feel compelled, as a matter of public duty, to strike a serious note of warning to the people of Canada. Unless the country is prepared to adopt the plan we have proposed, or some other equally effective measures, to secure the efficient and economical working of both railway systems and thereby not only reduce the burden on the federal treasury but improve the financial position of the privately-owned railway, then the only courses that would be left would be either to effect savings in national expenditure in other directions, or to add still further to the burdens under which the industries of the country are suffering by the imposition of yet further taxation. Failing the adoption of one or other of these courses, and there are obvious limits to their application, the very stability of the nation's finances and the financial credit of the Canadian Pacific Railway will be threatened, with serious consequences to the people of Canada and to those who have invested their savings in that railway.
