Saw the prisoner had a scratch on the side o the head; after he had separated them the deceased threw a knife at her husband, which grazed the hand of witness; prisoner then made an attempt to rush at his wife again. With regard to the excitement which this law has kindled in the public mind, the Journal of Commerce is under no mistake. The excitement is intense, and is extending itself every hour. This morning the mails brought us the following letter, with published:-

"MERIDEN, CONNECTICUT, Oct. 16, 1850. "MERIDEN, CONNECTION, Oct. 10, 100."

The language of the Resolution, adopted with so much enthusiasm at Meriden, does not necessarily imply that the laws will be resisted by violence, but it is clear that when a law is so heartify detested, violence can hardly fail to arise from a pertinacious attempt to carry it into effect. How the free colored population of the North are affected by it, how sensible they are of the danger in which they stand of being carried away into slavery under it, and how strong is the determination not to submit to any such an abuse of its provisions, may be understood from the narrative of an unfortunate occurrence which took place at Aquackarcick, in new Jersey, on Saturday evening last. It is related in a letter which appears in the Tribune of this morning is—

He is a man of fine personal appearance, and good talents. In an address of an hour and a half, he dissected the law, clearly pointed out its outrageous violations of the constitution and of the Divine law, and appealed with great power to the hearts and intellects of his hearers.

Mr. Wh. Boole,—Sir,—The preparation invented by
you for the hair, has been extensively used in my family,
and they give it the decided preference over all other
eompositions of the kind. It invigorates and beautifies
the hair, and clears the skin of all impurities, without
producing any ultimate deleterious effects, which are so
frequently the result of many well-known patentied compounds.

WINSLOW LEWIS.

It is an indepensable article for the Ladies, as it keeps the hair in place and our, and the akin or parting of the hair free from dandrill and sour!. For children, it leys the foundation of a good head of hair.

BOGLE'S AMOLE.

BOGLE'S AMOLE,

A COMPOUND FOR SHAVING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is derived from the Amole, or "soap plant," of Catilorias, an article used by the antives of that country for washing a said thus the use of strong alkali, so hurtint to the skin, is avoided. Its vegetable and detergent properties have the purest and most nourishing effects on the skin,—it southes and allays irritation, and has a fine, thick, creamy father, which does not dry on the face. It is a decided tuxtry to be shawed with this incumparable soap. It is done up in sleignan style, calculated either for the drassing case of the 'rough and ready's 'traveller, or the toilet of the most foundations connoiseour.
