## C. H. POST

BROCKVILLE.

The Exclusive Women's Wear Shop.

Spiteful. "Why do you hate him?" "He has been knocking me to the girl I go with." What did he tell her?" "What my salary is."

Ugly Comparison "Dad, what do they mean by peren-"Continuing from year to year," an-

wered pop. "Like my hat," interposed ma. And then there was a deep, porten tous silence.

#### The Local Paper

Subscribe to your lecal paper and pay in advance. Write or phone in have a new baby.

questions are as vital to your life as any worldwide issues. The local paper doesn't exist to tell you what the world is doing, nor to discuss matters touching the affairs of nations; its place is to keep you in touch with the neighbornood. Nothing else can take its place; you can choose between big dailies, but you must take the local papers if you would know the local news. It is the fashion to poke fun at the local paper and its paltry items of seemingly small importance, but without it none of these things would be recorded, and it is of more importance for you to know what is being done close to your home than what is happening a thousand miles away. If you must drop some paper this year, do not drop your local paper nor your own farm paper. The up-to-date farmer needs his farm paper as much as the greery or hard-ware dealer needs the commercial publication devoted to his interests Read as widely as you wish if you can afford it, but take your local paper and your farm publication always .- The Faraer's Acvocate, Winnipeg, Man.

### JUNETOWN

Mrs. James Herbison, who has been visiting relatives at Redwood, N. Y, for the past five weeks, returned home on Monday.

Mr. and Mrs. Anson Mallory and their mofher, Mrs. Joseph Mallory.

Mrs. Henessy, of Cae Hill, who has been the guest of Mrs. Wm. Punvis for the past ten days returned home on Tuesday.

Mr. and Mrs. John Herbisch went to Ottawa on Saturday to spend X as with the latters brother, Sergt. John Summers and family.

Miss Arley E. Purvis has returned home from spending the past two weeks with relatives in Brockville.

Miss Mary Purvis, Ottawa, Miss Maude Avery, and Orma Mulvaugh, Toronto, Misses Beatrice Avery and Fern Warren, Brockville, and Miss Gertrude Scott, Ganani que, are spending the Christmas holidays with their parents here.

The remainder will continue their course in the ordinary manner. Practically all the members of the graduating class have signified their intention of joining the C. A. D. C

Mrs. DeWolfe Receives Letter from France

France, Nov. 19, 1916 Dear Mrs. DeWolfe-

You will probably have heard, before this reaches you. of the sad death of your son, Pte. R. DeWolfe. I want to tell you how well he was liked by all his fellows and how cheerfully he carried out any orders given him. He was a fine chap, and his loss is keenly felt by all. Please accept my heartfelt sympathy in your sad bereavement

The mothers and wives of men serving their country so well out here have a very hard part to play in this terrible struggle. We out here don't think what we have to go through so much because we really haven't time. Our minds are occupied by other thoughts. I would far sooner be out here in the midst of it than at home where ones thoughts are continually turned to those away.

As your son's company commander I have nothing but the highest praise children and Miss Florence Maltory, of of the part your volle son played. If Peterboro, arrived last week to visit there is ever anything I can at any time do for you, I shall be only to pleased, if it is within my power.

I remain Very sincerely yours B. A. Rhodes, Major C Company

## Bright Prospects for Ottawa Winter Fair

During the past few years the Ottawa Winter Fair has made remarkable progress and last year was an excellent record in both quality of exhibits and entries, in all departments. The pcultry department created a number of entries as did also the sheep and swine departments. Early indications. as shown by the interest taken in the show by live stockmen and poultrymen, lead the management to believe that the coming Winter Fair, to be held Jan. 16 to 19, will equal or even sur- Tennant, Caintown, for Christmas.

pass the show of January 1916. With expectation and reasonable agement are putting forth every effort adequately provide for the comfort and convenience for the record crowds which are expected to attend; visitors buildings to be the best in Canada and last week the guest of his sister Mrs. the very last word in the way of equipment and conveniences for their comfort. An excellent dining-room will be operated under the supervision of the management and visitors will be able to obtain wholesome meals at moderate prices.

An excellent programme of lectures bas been arranged for, dealing with conditions that have arisen out of the war, there is a great future for purebred live stock breeders in Canada and it is very important that the breeding prospects should be discussed at this time. The various classes of live stock will be discussed from this point of view, by some of the most prominent live stockmen in Canada.

During the week of the Winter Fair a number of important meetings will be held, including the annual meeting of the Eastern Ontario Seed Grower's be held at the close of a missionary ad-Association, which will be teld in the dress by Mrs. T. S. Kendrick, Monday Winter Fair building on Tuesday evening, Jan. 8. Missionary collecnight, Jan. 16th, also the annual meeting of the Eastern Ontario Poultry evening of Jan. 18th.

Entries for the Ottawa Winter Fair W. D. Jackson, Secretary, Ottawa.

Light of Men.—John 1: 1-18. Commentary—1. Jesus the Word was 145). 1. In the beginning—Comment with sexpression with Gen. 1:1. Lefare the work of creation commend, Jesus existed. He was uncreated. The human mind may run back as ar into the past as it is able, and it may not reach a point of time when hardst did not exist. "In the begining he "was" and he is to continue he same forever (Heb. 13:8). The pening warse of John's Gospel clearly out forth Christ's eternity and deity. forth Christ's eternity and deity. Word—Word express thoughts. are used to reveal ideas. "The Word" is Christ (v. 14) who in his person and acts reveals the Father.

Arrist is the embodiment of divine revelation. The Word was with God—
The original language indicates not only but also that he was in union and communion with God. Not only is the oteratity of Christ proclaimed, but also his complete unity with God. 2.
The same—The Word, was in the beginning with God—This seems to be a repetition of what was said in the first verse; but it is repeated to guard the doctrine, and to prevent the pensibility of a mistake. He had said that he was before creation, and that . The Word was with Godthat he was before creation, and that he was with God; but he had not said in the first verse that the union with God was from the beginning. He now

resses that idea and assures us that union was not one that commenced in time, and which

ight be, therefore, a mere union of pling or a compact, like that be-cen other beings; but was one

refere, a union of nature, or Barnes. Again the truth

which existed in eternity, and which

exenveyed to us that Jesus is divine.

The fact that he "was in the beginning with Go—shows that he is both oternal and uncreated. 3. All things were made by him— Carist is here declared to be the Creater; and this expression affirms his delty, for divine works are ascribed the him. Compare the words, "By whom also he made the worlds" (Heb. 1: 2.) Without him—Apart from him. Was not any thing made—This is a denial of the eternity and held by the whole thinking world out-side of Judaism and Christianity; or, ther, its proper creation was never much as dreamed of save by the lidren of revealed religion.—J., F. & Word was the sole Creator. m was life—This is a clear afation that he is the only source of Rife. By him both physical and optical life are given. After he had ted vegetable life and all animal ting the highest, he breathed dust of the earth, and man bea living soul. Jesus himself dethe life" (John 14: 6.) The life was the light of men-Observe how fre-quently John's thoughts overlap and run into one another. Creation leads to life, and life leads on to light. The Word is the lightconid, "I am come a light into the world" (John 12: 46), and, "I am the light of the world" (John 8: 12.) 5. light shineth in darkness-The ent tense is here used. The light and still shines. It shines .nto

physically darkness to scatter ft, also into the spiritual. John use3 the term darkness to express the sinof man, and Jesus came to turn the darkness into light. The to be equal with the Father. Being darkness comprehended it not—"The The darkness of sin is deep, and is cely penetrated by the light of the g Word as he is voluntarily, subreject the light is to remain in dark. to receive the light is to besin (1 John 1: 7.) Another allowable Christianity.
transaction is, "The darkness overII. Through The Laght shines Christ's life was underived and inhar though he has been rejected by the multitudes during the centuries since be came of earth. II. The word manifested (vs. 6-17) et shown the existence and nature of

the Word, and now he refers to the by whom this Word is intro agency by whom this world. John the Baptist etold by a long succession ophets, and now a prophet, the extest of the list, was commissioned the Christ. 7. To bear witness of the Isht The mission of John the Bapprepare the way for Carist's coming by preaching repent ance and by telling the people of his This was an exalted mission and one that required strong and unfaltering courage him-Through John the Bay -John's purpose was so to elain Christ's coming and to introduce him that the world would ceive Him as King and Saviour. not that Light-John the Paptist came clothed with divine au thority, but he was only a man; yet a employed to introduce to the world the King of kings and Lord of kords. God chose to commit this immetant service to a man rather than to angels. 9. Lighteth every man that cometh into the world—The foreof Christ was not the true ight. He could give light to comonly of the vision of the true Christ would give illuminalaght. Christ would give intuina-tion to all the world. He said, "As long as I am in the world I am the light of the world." When he went way in his bodily presence, he still paried in the person of the Holy 19. The world knew him not-

chough he was in the world from the beginning and the world was made by

the wet he was not recognized. The

11. Unto his own-On the human side

received him not -: involved an in-

is of the people were filled with his of an earthly king and a mid temporal kingdom, and not a vision of the humble Galilean.

was a Jew, and he came first to

eople, the Jews, His own

leave the glory he had with er and take upon him huma Even then most of those for humbled himself rejected h As many as received him-received him, acknowledging sighably wielding the state of the second second him-received him acknowledging sighably wielding the second secon received him, acknowledging his Messiahship, yielding themselves to his authority, trusting him for salvation. Power.—Right and ability. To become the sons of God.—They become the sons of God by the new birth (John 3; 1-8). On the human side there are repentance and faith, and on the divine side there is the importation of spiritual life. 13. Not of blood, etc.—No human agency, power or will can bring about the relation of sonship with God, but it is a divine proces. Man places himself in an attices. Man places himself in an atti-tude of desire, submission and faith before the Lord and he is created

anew in Christ Jesus.

14. the Word was made flesh—in the incarnation Jesus received a human body, being born of a woman, and was possessed of a human soul, dwelt among us—The writer of this Government was associated for received. Gospel was associated for months and years with Jesus in the flesh, we beheld his glory—He appeared as a man, and he also manifested his glory in the miracles he wrought, in his utterances, and marvelously in his atter-ances, and marvelously in his transfig-uration and in his resurrection and as-cension. 15-17. John the Baptist teld beforehand of the coming of Christia and when he came, he declared to the multitudes that it was he. John performed well his mission. He took no honor to himself and highly exalt ed him, whose forerunner he was Moses gave the law, but the imparta-tion of grace is from Jesus Christ.

tion of grace is from Jesus Christ.

III. The word revealing the Father (v. 18). Jesus is one with the Father, and therefore in the incarnation was able to reveal him to the world. God had had revealed himself in the law, in the prophets, in his dealings with individuals and with nations and in miracles; but he made an additional and glorious revelation of himself in the life and mission of his Son. No man ever saw God in the sense that he saw him, and Christ in the words he spoke, in the spirit he manifested and in the works he performed has shown us the father. Through the revelation made to us by the Son, we have a glorious view of the Father. We are led to know what God is and what he would have us to be.

Ouestions—Who wrote the words

would have us to be.

Questions.—Who wrote the words
we study to-day? Under what names is
Christ mentioned? What statements
declare his eternity? What statements show that Christ is divine? What kind of darkness is mentioned? To whom did Christ come? What must one do in order to receive him? What is the result of receiving Christ? What was the mission of John the Baptist? What is the purpose of John's Gospel?

PRACTICAL SURVEY.

Topic, God revealed to humanity. I. Through the divine Word.

II. Through the divine Light. I. Through the divine Word. The apostle John here presents Christ in the glorious activity of his divine nature, as a new communication from the eternal Father. He speaks of the divine Word as uttering forth the thought and will of God in the hearing of mankind. He shows Him to be the source of all the knowledge we have of the divine Being in His relations to us, His infinite love and the wondergiver, or instructor, to the world. He ful plan of salvation He has made, "I am come a light into the He is also the source of all the know-ledge we have of the life beyond. John was deeply impressed with the divineness of Christ's mission. We find in these verses the record of his personal observation, and in the closest connection with it his declaration of personal conviction. His statements were advanced with a full knowledge of what they involved. He declare to be equal with the Father. Being apprehended it not."—R. V. world an eternal revelation of the eterns of sin is deep, and is emal God. In his own person and life revelation none can reach a true conmoral character of God. The doctrine of the Trinity is fundamental in

> ent. He is the source of life, as he is the Creator of existence, as the Redeemer of human existence. The his tory of Jesus shows us divinity and humanity united in one person. Deity shining. The union of Christ's divinity and his manhood made the re cources of Deity available for man Christ took a complete and kind. perfect soul and body that he might heal the whole malady of sin, which had infected every member and fac-ulty. Nothing was lacking in him to constitute human nature in its com constitute human nature in its completeness, a fulness of every kind of
> perfection. Christ is presented as the
> head of the gospel dispensation, as
> the founder of a new order of things,
> as the author and finisher of man's
> faith. As a Son he came with the
> keys of God's treasury of grade and
> truth. His gracious character appears
> from the great design of his dispensation. He was in tenderest sympathy He was in tenderest symnathy with mankind, though the unrecognized Creator and Redeemer. The whol world at large is said to have been insensible to the character and incred ulous as in the claims of Jesus. There were anarchy and refellion where there should have been subordination harmony. The more emphatic and bitter human rejection became the more clearly the necessity of a Saviour was evident. Christ is the life and light of men in that he delivers them from ignorance, unbelief and vice, and from the ruin and misery which are their invariable attendants and brings them to the knowledge of divine things, to faith and purity. The distinctive need of man is met by the distinctive power of Christ. The Light comes into men's hearts as into its proper, natural dwelling-place. ord asserted his right over all the feelings, instincts, imputes and de-terminations of those hearts as over his rightful subjects. The new birth is the awakening of dormant faculties, the resurrection of buried powers. The real gospel is God's life through Christ, touching man's life and making it new. This portion of scripture opens before us God's living way of making himself known to us, bis way of illuminating our lives. This

subject yields in importance to no

IMPROVE THE

Relative Value of the Male and Female for Breeding Purposes—Well Bred Grades of Good Type Are Superior to Poor Pure-Breds-A Pure Bred Herd-Bull Essential

This is a subject of great importance, as it influences all phases of seltion and breeding operations in any ord, flock or stud on any Canadian rm. Before taking up the relative portance of the male and female of a berd it might be well to settle the advisability of pure-breds or grades for the average Canadian farm, which is a closely allied subject. Having seen the success of many of the older and also younger breeders of pure-bred stock, it is undoubtedly the appiration of the majority of our farmers to own and operate a pure-bred hard of the same gradity or the same herd of the same quality as these men. However, it is an open question as to what proportion of our farmers can ever hope to operate pure-bred herds successfully. Undoubtedly the hest pure-bred stock is the best stock obtainable, and in actual production will be most profitable. Nevertheless is must be remembered that good pure bred stock is expensive and is a load bred stock is expensive and is a load which a large proportion of Canadian farmers cannot hope to finance. The heavy expense in initial outlay is also accompanied by a heavy risk of mortality and appreciation. Again, the pure bred pusingss is a special one, and the formula not only on the setup. which depends not only on the actual production of milk, beef, wool, etc. (depending on the class of stock), but even more on the sales of breeding stock. Such a requires good markets, con-business experience and, business experience and, ove all, great skill in the feeding, uring and developing of the young

T TO START WITH GRADES. In the face of these difficulties the halority of Canadian farmers must majority of Canadian farmers must for many sears to come be content to work largely with grades. The grade is not necessarily a scrub, but may be nearly as profitable in actual pro-duction as a good pure-bred. Certain-ly, well-bred grades of good type are superjoy in every sansa to now must superior in every sense to poor pure breds. Grade are only as good as the pure bred blood which they contain, and under average circumstances may return almost as high interest on in vestment as average pure-breds. The all too common statement that grades are more profitable or more hardy than pure-breds is incorrect if based on a comparison with good based on a comparison with good pure-bred animals, but they may be far more profitable than the poor pure-breds, lacking in size type, con-stitution and utility, and which are valued solely because they have a pedigree.

The herd bull cannot be too good, no matter whether he is heading a pure-bred or a grade herd. There is a very common expression amongst our pure-bred live stock breeders that such and such a bull or ram or stallion is not good enough for a herd of pure-bred females, but would do nicely for grades. This expression is have herds of grade cows averaging a great mistake, and unfortunately is an example of the attitude of many pure-bred breeders toward herds of grade breeding. Such an attitude is deidedly injurious to the grade herds of the bulls used, but rather of go into a herd of good pure-breds should not be reared or sold for breeding purposes. The best sire is the one who is most impressive as a breeder, and surely no herd requires rapid upbuilding more than the common grade. The herd sire transmits desir-

cows from this mating would at the greater menace. Bulls from grade conditions as their dams produce approximately 9,500 pounds of milk per annum more or less, depending on the individual prepotency of their the pure-bred herd, the temptation is sire, for other words, the effirst twenty ire. In other words, th efirst twenty great to sell all pure-bred bull calves

mature daughters of such a buil in one year, would give over 100,000 pounds of milk more than their dams, or more than though they had been sired by a buil with only 4,000 pound records behind him. Valuing this increase at \$1.60 per cwt., it amounts to \$1,760 in one year. Allowing for extra feed and labor for the production of this increased milk, such a buil would change losses in dairying to a good margin of profit, and also pay for his original cost all in one year.

IMPORTANCE OF THE SIRE.

If the records of the dams of this bull on the sire's side had been 15,000 pounds of milk per annum, but on his dam's side none had exceeded 4,000 pounds, what then would be the result? According to Mendel's Law, such a bull would probably throw 25 per cent. of 4,000 pound cows, 25 per cent. of 9,500 pound cows and 50 per cent. of 6,700 pound cows. In reality, this would be a most optimistic estimate for the extremes in his pedigree would detract very seriously from his prepotency. On his twenty mature daughters this bull would show at the most an \$880 increase in one year over their dams, but on the other hand an \$880 lose as compared with hand an \$880 loss as compared with the true 15,000 pound bull. When it is remembered that a bull may serve 75 to 100 cows per annum, it will be greater or less depending on the number of heifer calves. Such a cal-culation might be criticised as theoret-ical. If such doubters would enquire

If the farmer can afford to buy good pure-bred females, he will undoubtedly have the most profitable producers, and if there is a ready market for breeding stock he will have the most profitable business. However, the heavy cash outlay makes it impossible for farmers to adopt outprade at the product of the stock of the sto to adopt pure-breds at once. Purchasing one or two good foundation cows or heifers will undoubtedly be the cheapest wey for any farmer to work in-to pure-bred live stock. In the case of pure-bred sheep and swine the expenditure per in-dividual is so much lighter that it will probably pay every farmer, even alythough he anticipates systematic cross-breeding for market stock, to adopt pure breds as soon as possible. This, however, does not apply in the case of horses and cattle, where values are greater and herds in-crease slower.

over 10,000 pounds of milk per annum, they will find such a calculation well substantiated. These successful farmers do not boast of the cheapness and even more to the reputation of such misled pure-bred breeders. The sire which is not sufficiently good to gree and their prepotency in stamp-ing such characters on the progeny. If all grade bulls and poor pure-bred buils were sent to the butcher at once it might seriously inconvenience Canadian farmers, but it would be the greatest stimulus to the dairy ingrade. The herd sire transmits desirable qualities usually in direct proportion to his breeding. The following is a fair example of what may be
done by the use of good pure head strate the value of the pure-bred sire pends on his prepotency, and the when used on grade herds and flocks. he was the manifestation of God to the world. Without the guidance of revelation none can reach a true conception of the unity, spirituality and moral character of God. The doctrine of the Trinity is fundamental in Christianity.

II. Through the divine Light. Christianity with a safe in caiculating that the cows from this mating would at the greater menace. Bulls from grade herds and flocks. One is safe in calculating that the poor sire in the pure-bred is experiments are progressing the character of salmost safe in stat. These experiments are progressing the propers.

the use of good sires. Such an example of the great importance of the use of only good pure-bred sires will apply equally well to beef cattle, horses or other classes of live stock. The longer the line of good breeding and records behind a pure-bred sire, the greater the chance of being a pre-potent, profitable breeder. Even then it is wiser to choose the aged sire which has proved his power mitting desirable qualities.

The above example of the herd of 4,000 pound cows on which is used a bull whose seven nearest dams averaged 15,000 pounds of milk and the progeny of this mating produced approximately 9,500 pounds of milk, shows the wonderful improvement made in a large herd by one good pure-bred bull. The reverse condition of a herd of cows canable of produof a herd of cows capable of produ-cing 15,000 pounds of milk each per annum, on which a bull whose seven nearest dams gave only 4,000 pounds, might also yield progeny whose re-cords might be the same, namely, approximately 9,500 pounds of milk per annum. The latter example is cer-tainly extreme, but will illustrate a common practice. It is true that a herd of cows averaging 15,000 pounds of milk is exceedingly rare, and the individuals in such a herd are of great value. By the use of such a poor bull as above mentioned, there would be a reduction in the milk flow of the mature progeny of 5,500 pounds of milk per cow, equal to nearly \$90 per cow per annum on milk alone, and at least \$200 per calf, per cow. In other words, an excellent herd may be raised from very cheap females and a good sire, the rapidity of im-provement depending on the excel-lence of both females and male; while an excellent herd of very expensive females may eventually be ruined by the use of a poor herd sire. No female should be bred to a herd sire which is not better than herself in both type and records of production female has, in the case of cattle, only one calf per annum, while the herd sire may have from 50 to 100 progeny per annum hence will do from 50 to 100 times the damage or improve-ment, as the case may be. Certainly the sire is more than half the herd and deserves greater consideration in selection and maintenance. The rela-tive transmitting powers of male and female, other things being equal, are The transmissability of the same. The transmissability of good or bad type or production is a hereditary character, depending on the uniformity of those same charac-ters in the previous sires and dams as seen in the pedigree. There are many things which we cannot yet ex-plain, such as why females of some families may be more prepotent than the males of the same families, or vice versa. However, the progressive successful breeder of any class of

live stock does know and practise the A good pure-bred sire is absolutely essential in herd or flock improvement. The success of such a sire de-

influence those we take of all other doctrines and must terminate in realts which affects God's glory. Christianity is a spiritual revelation to the piritual nature of man. The theol ogy taught by the incarnation is the world's hope. In the world's darkness Christ, the living Mediator, stands an incarnate, luminous manifestation of God. Without this gospel the unfathmable denth the inaccessible height of the character of the Saviour of the world would be wanting to us.-T.

Bound by gold chains about the feet of God.-Tennyson.

IMPERCEPTIBLE GROWTH

It is often difficult to gauge our advance in holiness. To do so we must employ a measure of sufficient capacity. If we confine our attention to a germ stored away in the

other. The views we take of it will few days or weeks, it is likely we shall his heart, a thing the devil cannot be disappointed, being unable to per-ceive any advance. We must rather take in months and years. You shall stand by the seashore and be unable at first to discover whether the tide ebbs or flows. It is only after diligent watching for an appreciable per-iod that you decide that the sea is slowly but certainly advancing.

THE GIRL GOAL.

The clime, the time, the place, the girl; these are four stages of the playwright and the story writer. We must follow the order of nature:

And ther, she made the lassies. O! The last the hest the most finished flower of all creation. She has been called the Sabbath of man. She is from God, and the man who puts his hand on the shoulder of a woman touches the Kingdom of God. And when a man in his own home shuts the door, he can shut out the world

Her 'prentice han' she tried on man,

and shut God in, and that is heaven. The clime, the time, the place, the girl. Think of the beautiful city of Florence, think of him who put the crown of glory on her beautiful name, and think of Beatrice enshrined in his poetry, his one superlative ideal, who sanctifies the scene by her august presence. Dante exalted her by his own splendid gifts, and though she was never his wife, yet is she embalm-ed in the minds of all true lovers as the true and real and lasting partner

of his immortality. The girl is the true goal! Think o John Newton. He goes to the rough calling of a sailor. He is wild and reckless and goes down to the depths of sin, but there is one little star in his black heavens, one, only one little

touch: it is his love for the girl he left behind in old England. This was the saving lifebelt that saved him and lifted him out of the horrors of the slave traffic, and that life enlarged itself so as to comprehend life in Christ Jesus. It made him a man, s preacher, a poet; we sing his hymns in the most polite society. And we take breath and say, What has God

A man once gazed at a beautiful facin the street. Distantly it became his shrine, consummate beauty printed its own portrait on his sensitive soul, and, though he never saw her again she became his charm, his anchorage, his stay, his better life.

There is a wondrous workshop where they are making plans of lifeyour life and mine included. You did not see behind the veil, how small the trifles were which hindered you in your quest, how small the items which helped you to come into a large inheritance. Oh, the ships that pass in the night, leaving on the water only a glimmer of the stern lights dancing on the waves! Oh, the ships that did not pass without a signal a hail, a sail in company and more.

"Only an accident," says a careles one. There are no accidents with God. says the thoughtful soul. The hairs of your head are all numbered; and He is pilot of the bubble on the breaker. After long searching, we have to confess, "Lo, these are part of His ways, and yet how little is known of

7, 1917.-Jesus, the Life and

Light of Men.-John 1: 1-18. Commentary—1. Jesus the Word (vs. 15). 1. In the beginning—Compare this expression with Gen. 1:1. Before the work of creation commenced, Jesus existen. He was uncreated. The human mind may run back as far into the past as it is able, and it can not reach a point of time when Christ did not exist. "In the beginning" he "was" and he is to continue the same forever (Heb. 13:8). The opening verse of John's Gospel clearly cots forth Christ's eternity and deity. stary-1. Jesus the Word s torth Christ's eternity and deity.

Word—Word express thoughts.

by are used to reveal ideas. "The Word is Christ (v. 14) who in his person and acts reveals the Father. ion. The Word was with Godhe original language indicates not pay that the Word was "with" God. communion with God. Not only is the oterative of Christ proclaimed, but also his complete unity with God. 2. The same—The Word Was in the beginning with God—This seems to be a repetition of what was said in the first worse, but it is venerated to the first verse; but it is repeated to great the doctrine, and to prevent the possibility of a mistake. He had said that he was before creation, and that he was with God; but he had not said in the first verse that the union with God was from the beginning. He now resses that idea and assures us that union was not one that commenced in time, and which wight be, therefore, a mere union of feeling or a compact, like that between other beings; but was one tween other beings; but was one which existed in eternity, and which was, therefore, a union of nature, or ace.—Barnes. Again the truth exenveyed to us that Jesus is divine The fact that he "was in the begin-ang with Go shows that he is both sternal and uncreated.

3. All things were made by him— Carist is here declared to be the Crea-ter; and this expression affirms his y, for divine works are ascribed to him. Compare the words, "By whom also he made the worlds" (Heb. 1: 2.) Without him—Apart from him. Was not any thing made—
This is a denial of the eternity and creation of matter, which was ade of Judaism and Christianity; or, er, its proper creation was never nuch as dreamed of save by the children of revealed religion.-J., F. & he Word was the sole Creator. him was life—This is a clear affirmation that he is the only source of Rife. By him both physical and eated vegetable life and all animal into the body he had formed out of the dust of the earth, and man be-came a living soul. Jesus himself de-ctared, "I am the way, the truth, and the life" (John 14: 6.) The life was the light of men—Observe how frequently John's thoughts overlap and

wan into one another. Creation leads source of all the knowledge we have on to life, and life leads on to light.

—Plummer. The Word is the lightus, His infinite lowerand the wonderregiver, or instructor, to the world. He said, "I am come a light into the He is also the source of all the knowregiver, or instructor, to the world. He giver, or instructor, to the world. He is also the source of all the augustication of the world" (John 12: 46), and, "I am the ledge we have of the life beyond. John was deeply impressed with the divineness of Christ's mission. We likely the close the record of his shone and still shines. It shines into the physically darkness to scatter ft.

and also into the spiritual John uses of personal conviction. His statements the term darkness to express the sin were advanced with a full knowledge of what they involved. He declared to be equal with the Father. Being darkness apprehended it not."—R. V. world an eternal revelation of the etermination of the etermination of the etermination of the etermination. The darkness of sin is deep, and is ernal God. In his own person and life emily penetrated by the light of the diving Word as he is voluntarily, sub-the world. Without the guidance of revelation none can reach a true convenience of the world. reject the light is to remain in dark. weaks; to receive the light is to be-moral character of God. The doctrine common saved from sin, even from all of the Trinity is fundamental in sin (1 John 1: 7.) Another allowable Christianity.

transaction is, "The darkness overmume it not." The Light shines on Christ's life was underived and inherugh he has been rejected by the multitudes during the centuries since

be came of earth. II. The word manifested (vs. 6-17). 6. A man sent from God-John has and shown the existence and nature of the Word, and now he refers to the agency by whom this Word is introagency by whom this world. John the Baptist was foretold by a long succession prophets, and now a prophet, the preatest of the list, was commissioned to declare the immediate appearing of the Christ. 7. To bear witness of the Light The mission of John the Ban that was to prepare the way for Christ's coming by preaching repentby telling the people of his oming. This was an exalted speedy coming. This was an exalted faith and unfaltering courage Through him—Through John the Bap-John's purpose was so to pro claim Christ's coming and to intro duce him that the world would re eelve Him as King and Saviour. He was not that Light-John Light-John the Reptist came clothed with divine authority, but he was only a man; yet a world the King of kings and Lord of God chose to commit this important service to a man rather than to angels. 9. Lighteth every man that cometh into the world-The forewas not the true runner of Christ He could give light to com-Laght. paratively few, and to them the know igo only of the vision of the tru illuminato all the world. He said, "As I am in the world I am the the world." When he went might of the world. in his bodily presence, he still remained in the person of the April to give light to the world.

world knew him not- Aligh he was in the world from the beginning and the world was made by the, yet he was not recognized. The winds of the people were filled with of an earthly king and a plendid temporal kingdom, and not with a vision of the humble Galilean. 11. Unto his own-On the human side was a Jew, and he came first to His own received him not-it involved an inconceivable humiliation for Jesus to leave the glory he had with the Father and take upon him human nature. Even then most of those for whom he humbled himself rejected him. 12. As many as received him—Some rereceived him, acknowledging his Messiahship, yielding themselves to his authority, trusting him for salvation. Power.—Right and ability. To become the sons of God—They become the sons of God by the new birth (John 3; 1-8). On the human side there sons of God by the new birth (John 3; 1-8). On the human side there are repentance and faith, and on the divine side there is the importation of spiritual life. 13. Not of blood, etc.— No human agency, power or will can bring about the relation of sonship with God but the techniques. ship with God, but it is a divine pro-ces. Man places himself in an atti-tude of desire, submission and faith

before the Lord and he is created anew in Christ Jesus.

14. the Word was made flesh—In the incarnation Jesus received a hu-man body, being born of a woman, and was possessed of a human soul. dwelt among us—The writer of this Gospel was associated for months and years with Jesus in the flesh. we beheld his glory—He appeared as a man, and he also manifested his glory in the miracles he wrought, in his atterances and marylously in his terminal. ances, and marvelously in his transfig uration and in his resurrection and as-cension. 15-17. John the Baptist told beforehand of the coming of Christ and when he came, he declared to the multitudes that it was he. John performed well his mission. He took no honor to himself and highly exalt ed him, whose forerunner he was Moses gave the law, but the imparta-tion of grace is from Jesus Christ.

III. The word revealing the Pather (v. 18). Jesus is one with the Father, and therefore in the incarnation was able to reveal him to the world. God had had revealed himself in the law. had had revealed himself in the law, in the prophets, in his dealings with individuals and with nations and in miracles; but he made an additional and glorious revelation of himself in the life and mission of his Son. No man ever saw God in the sense that he saw him, and Christ in the words he spoke, in the spritt he manifested and in the works he performed has been in the works he performed has show us the father. Through the revelation made to us by the Son, we have a glorious view of the Father. We are led to know what God is and what he

would have us to be.

Questions.—Who wrote the words we study to-day? Under what names is Christ mentioned? What statements declare his eternity? What statements show that Christ is divine? What kind of darkness is mentioned? To whom did Christ come? What must one do in order to receive him? What is the result of receiving Christ? What was the mission of John the Baptist? What is the purpose of John's Gospel?

### PRACTICAL SURVEY.

Topic, God revealed to humanity. I. Through the divine Word.

II. Through the divine Light, I. Through the divine Word. apostle John here presents Christ in the glorious activity of his divine na-ture, as a new communication from the eternal Father. He speaks of the divine Word as uttering forth the thought and will of God in the hearing of mankind. He shows Him to be the he was the manifestation of God to the world. Without the guidance of ception of the unity, spirituality and moral character of God. The doctrine

ent. He is the source of life, as he is the Creator of existence, as the Re deemer of human existence. The his-tory of Jesus shows us divinity and humanity united in one person, Delta shining. The union of Christ's di-vinity and his manhood made the resources of Deity available for man kind. Christ took a complete and perfect soul and body that he might heal the whole malady of sin, which had infected every member and fac-ulty. Nothing was lacking in him to constitute human nature in its con pleteness, a fulness of every kind of perfection. Christ is presented as the head of the gospel dispensation, as the founder of a new order of things, as the author and finisher of man's As a Son he came with the faith. faith. As a son ne came with the keys of God's treasury of grace and truth. His gracious character appears from the great design of his dispensaion. He was in tenderest sympathy with mankind, though the unrecogniz ed Creator and Redeemer. The whole world at large is said to have been insensible to the character and incred lous as in the claims of Jesus. There were anarchy and revellion should have been subordination and harmony. The more emphatic and bitter human rejection became. the more clearly the necessity of a Saviour was evident. Christ is the life and light of men in that he deliver them from ignorance, unbelief vice, and from the ruin and misery which are their invariable attendants and brings them to the knowledge of divine things, to faith and purity. The distinctive need of man is met by distinctive power of Christ. The Light comes into men's hearts as into its proper, natural dwelling-place. ord asserted his right over feelings, instincts, impulses and de terminations of those hearts as over his rightful subjects. The new birth is the awakening of dormant faculties, the resurrection of buried pow ers. The real gospel is God's life through Christ, touching man's life and making it new. This portion of scripture opens before us God's living way of making himself known to us,

his way of illuminating our lives. This

subject yields in

HOW TO IMPROVE THE

Relative Value of the Male and Female for Breeding Purposes-Well Bred Grades of Good Type Are Superior to Poor Pure-Breds-A Pure Bred Herd Bull Essential

farm. Before taking up the relative importance of the male and female of the herd it might be well to settle the advisability of pure-breds or grades for the average Canadian farm, which is a closely allied subject. Having seen the success of many of the older seen the success of many of the ower and also younger breeders of pure-bred stock, it is undoubtedly the as-piration of the majority of our farm-ers to own and operate a pure-bred herd of the same quality as these men. However, it is an open question as to what proportion of our farmers can ever hope to operate pure-bred herds successfully. Undoubtedly the hest pure-bred stock is the best stock obtainable, and in actual production will be most profitable. Nevertheless it must be remembered that good pure bred stock is expensive and is a load which a large proportion of Canadian farmers cannot hope to finance. The heavy expense in initial outlay is also accompanied by a heavy risk of mortality and appreciation. Again, the pure-bred pusiness is a special one, which depends not only on the actual production of milk, beef, wool, etc. (depending on the class of stock), but depends even more on the sales of pure-bred breeding stock. Such a business requires good markets, conbusiness requires good markets, considerable business experience and, above all, great skill in the feeding, rearing and developing of the young uires good markets, con

BEST TO START WITH GRADES. In the face of these difficulties the majority of Canadian farmers must for many years to come be content to work largely with grades. The grade is not necessarily a scrub, but may be nearly as profitable in actual pro-duction as a good pure-bred. Certain-ly, well-bred grades of good type are superior in every sense to poor purporeds. Grade are only as good as the pure bred blood which they contain and under average circumstances may return almost as high interest on in vestment as average pure-breds. The all too common statement that are more profitable or more with good based on a comparison pure-bred animals, but they may be far more profitable than the poor far more profitable than pure-breds, lacking in size, type, con-stitution and utility, and which are valued solely because they have a pedigree.

The herd bull cannot be too good no matter whether he is heading a pure-bred or a grade herd. There is a very common expression amongst our pure-bred live stock breeders that such and such a bull or ram or stallion is not good enough for a herd of pure-bred females, but would do nicely for grades. This expression is a great mistake, and unfortunately is an example of the attitude of many pure-bred breeders toward herds of grade breeding. Such an attitude is desire which is not sufficiently good to

dams (three full generations) have given 15,000 pounds of milk per annum. If such a bull were used on a herd of grade cows whose average production is 4,000 pounds per annum, one is safe in calculating that the poor sire in the pure-bred is even a property of the grade in state of flock, are necessary, and the better these females, the more rapid will be the improvement of the generations if every Canadian stock breeders and flocks, excepting that the poor sire in the pure-bred is even a premature loss and would properly in the grade or pure-bred nerd or flock; are necessary, and the better these females, the more rapid will be the improvement of the generations. If every Canadian stock breeders and flocks, excepting that the one is safe in calculating that the cows from this mating would at the same age and under the same feed conditions as their dams produce approximately 9,500 pounds of milk per commands. The purposes no matter how good the individual prepotency of their the pure-bred herd, the temptation is the pure-bred herd, the pure-bred herd, the p sire. In other words, th efirst twenty great to sell all pure-bred bull calves

This is a subject of great importince, as it influences all phases of selection and breeding operations in any cerd, flock or stud on any Canadian or more than though they had been greatly. The writer is well acquaint of the characteristics of such a bull, in for breeding purposes and, if poor in dividuals or with poor backing, other pounds of milk more than their dams, or more than though they had been greatly. The writer is well acquaint of the characteristics of such a bull, in for breeding purposes and, if poor in dividuals or with poor backing, other purposes. or more than though they had been sired by a bull with only 4,000 pound records behind him. Valuing this increase at \$1.60 per cwt., it amounts to \$1,760 in one year. Allowing for extra feed and labor for the production of this increased milk, such a bull would change losses in dairying to a good margin of profit, and also pay for his original cost all in one

IMPORTANCE OF THE SIRE.

If the records of the dams of this buil on the sire's side had been 15,000 pounds of milk per annum, but on his dam's side none had exceeded 4,000 pounds, what then would be the result? According to Mendel's Law, such a bull would probably throw 25 per cent. of 4,000 pound cows, 25 per cent of 9,500 pound cows, and 50 per cent. of 9,500 pound cows and 50 per cent. of 6,700 pound cows. In reality, this would be a most optimistic estimate for the extremes in his pedigree vould detract very seriously from his prepotency. On his twenty mature daughters this bull would show at the most an \$880 increase in one year over their dams, but on the other hand an \$880 loss as compared with the true 15,000 pound bull. When it is remembered that a bull may serve cing 15,000 pounds of milk each per 75 to 100 cows per annum, it will be seen that the profit or loss will be nearest dams gave only 4,000 pounds. greater or less depending on the number of heifer calves. Such a calculation might be criticised as theoretproximately 9,500 pounds of milk per ical If such doubters would enquire

If the farmer can afford to buy good pure-bred females, he will undoubtedly have the most profitable producers, and if there is a ready market for breeding stock he will have the breeding stock he will have the most profitable business. How ever, the heavy cash outlay makes it impossible for farmers to adopt pure-breds at once. Purchasing one or two good foundation cows or heifers will undoubtedly be the cheapest wey for any farmer to work into pure-bred live stock. In the case of pure-bred sheep and swine the expenditure per individual is so much lighter that it will probably pay every farmer, even alythough he anticipates systematic cross-breeding for market stock, to adopt pure-breds as soon as possible. This, however, does not apply in the case of horses and cattle, where values are greater and herds increase slower.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

from the farmers all over Canada who have herds of grade cows averaging over 10,000 pounds of milk per an-num, they will find such a calculation well substantiated. These successful farmers do not boast of the cheapness cidedly injurious to the grade herds and even more to the reputation of uniform records behind such a pedisuch misled pure-bred breeders. The gree and their prepotency in stamping such characters on the progeny. seo anto a herd of good pure-breds If all grade bulls and poor pure-bred should not be reared or sold for breed-bulls were sent to the butcher at ing purposes. The best sire is the one once it might seriously inconvenience who is most impressive as a breed-Canadian farmers, but it would be er, and surely no herd requires rapid upbuilding more than the common grade. The herd sire transmits desirable qualities usually in directions. er, and surely no herd requires rapid upbuilding more than the common grade. The herd sire transmits desirable qualities usually in direct proportion to his breeding. The following bornion to his breeding. The following bornion by the use of good pure-bred sire is absolutely essential in herd or flock improvement. The success of such a sire depends on his prepotency, and the greatest stimulus to the dairy industry that could possibly be imaging dustry that could possibly be imaging.

A good pure-bred sire is absolutely essential in herd or flock improvement. The success of such a sire depends on his prepotency, and the greatest stimulus to the dairy industry that could possibly be imaging.

A good pure-bred sire is absolutely essential in herd or flock improvement. The success of such a sire depends on his prepotency, and the safest and flocks. These experiments are progressing cheapest nurchase. Good females, and three full generations have

pure-bred or grade herds will suffe greatly. The writer is well acquaint ed with herds of excellent pure-bre females where one or two bulls lack ing in type or breeding have ruine these herds as to size, type, quality particularly of udders and teats, of production, or all combined; while herds of poorer foundation stock have improved in the same proportion during the same number of years by the use of good sires, Such an ex ample of the great importance of the use of only good pure-bred sires apply equally well to beef forses or other classes of live stock The longer the line of good breeding and records behind a pure-bred sire, the greater the chance of being a prepotent, profitable breeder. Even then it is wiser to choose the aged sire, which has proved his power of transmitting desirable qualities. The above example of the herd of

4,000 pound cows on which is used a bull whose seven nearest dams averaged 15,000 pounds of milk and the progeny of this mating produced approximately 9,500 pounds of milk, shows the wonderful improvement made in a large herd by one good pure-bred bull. The reverse condition of a herd of cows capable of producing 15,000 pounds of milk each per annum. The latter example is cer tainly extreme, but will illustrate a very common practice. It is true that a herd of cows averaging pounds of milk is exceedingly rare, and the individuals in such a herd are of great value. By the use of such poor bull as above mentioned, there would be a reduction in the milk flow of the mature progeny of 5,500 pounds of milk per cow, equal to nearly \$90 per cow per annum on milk a one and at least \$200 per calf, per cow In other words, an excellent herd may be raised from very cheap females and a good sire, the rapidity of im provement depending on the excel lence of both females and male; while an excellent herd of very expensive females may eventually be ruined by the use of a poor herd sire. No female should be bred to a herd sire which is not better than herself in both type and records of production. The female has, in the case of cattle, on-ly one calf per annum, while the herd sire may have from 50 to 100 progeny per annum hence will do From 50 to 100 times the damage or improve-ment, as the case may be Certainly the sire is more than half the herd and deserves greater consideration in selection and maintenance. The rela tive transmitting powers of male and female, other things being equal, are the same. The transmissability of the same. The transmissability of good or bad type or production is a hereditary character, depending on the uniformity of those same characters in the previous sires and dams as seen in the pedigree. There are many things which we cannot yet explain such as why females of some families may be more prepotent than the males of the same families, or vice versa. However, the progressive successful breeder of any class of

-Canadian Countryman

octrines and must terminate in results which affects God's glory. Christlanity is a spiritual revelation to the spiritual nature of man. The theology taught by the incarnation is the world's hope. In the world's darkness incarnate, luminous manifestation of God. Without this gospel the unfath omable depth, the inaccessible height of the character of the Saviour of the world would be wanting to us.-T.

PRAYER

Pray for my soul. More things are wrought by prayer Than this world dreams of. Wherefore the door, he can shut out the world let thy voice Rise like a fountain for me, night and

day. For what are men better than sheep or That nourish a blind life within the

brain,

If. knowing God, they lift not hands of prayer

THE GIRL GOAL

The clime, the time, the place, the girl; these are four stages of the playwright and the story writer. We must follow the order of nature:

Her 'prentice han' she tried on man. And then she made the lassies. O! The last, the best, the most finished flower of all creation. She has been called the Sabbath of man. She is from God, and the man who puts his hand on the shoulder of a woman touches the Kingdom of God. And

when a man in his own home shuts

and shut God in, and that is heaven. The clime, the time, the place, the Florence, think of him who put the crown of glory on her beautiful name, and think of Beatrice enshrined in his poetry, his one superlative ideal, who sanctifies the scene the scene by her august Dante exalted her by his presence. Dante exalted her by his own splendid gifts, and though she was never his wife, yet is she embalmed in the minds of all true lovers as

of his immortality. The girl is the true goal! Think of John Newton. He goes to the rough calling of a sailor. He is wild and reckless and goes down to the depths of sin, but there is one little star in his black heavens, one, only one little ity. If we confine our attention to a germ stored away in the locker of of the empire

the true and real and lasting partner

touch; it is his love for the girl he left behind in old England. This was the saving lifebelt that saved him and him out of the horrors of the slave traffic, and that life enlarged itself so as to comprehend life in Christ Jesus. It made him a man, a preacher, a poet; we sing his humns in the most polite society take breath and say, What has God wrought?

A man once gazed at a beautiful facin the street. Distantly it became his shrine, consummate beauty printed its own portrait on his sensitive soul. and, though he never saw her again, she became his charm, his anchorage, his stay, his better life.

There is a wondrous worksho where they are making plans of life—your life and mine included. You did not see behind the veil, how small the hindered you in trifles were which your quest, how small the items which helped you to come into a large in heritance. Oh, the ships that pass in the night, leaving on the water only a glimmer of the stern lights dancin on the waves! Oh, the ships that di Think of the beautiful city of not pass without a signal a hail, a sail in company and more.

"Only an accident," says a careles one. There are no accidents with God says the thoughtful soul. The very hairs of your head are all numbered and He is pilot of the bubble on the breaker. After long searching, we have to confess, "Lo, these are part of His ways, and yet how little is known of -H. T. Miller.

## ON ARTIC WARRIORS

Armies Not Recruited From People of Polar Regions.

Battle history halts at the Arc tic Circle. Beyond that human life is so difficult to sustain that its wilful waste is unthinkable. The Lapps and Samoyeds of Arctic Russia, like the eskimos of North America and Greenland, are so often compelled in times of dearth and famine to sacrifice their aged weaklings that this form of death has become a vague religious and social triumph with them.

The armies of the great white Czar, lighthose of the King-Em-peroy, ays rearson's Weekly, are places; indeed, he men are of such meagre stature and intellect that a military training is next to impossible—certainly not a thing to be persevered with in the days of a great campaign.

The population of Arctic Russia, both in Asia and in Europe, cutside the official and mercantile classes, contains few elements which are truly Slavonic, but in the minds of insular Britons the reputation of Arctic dwellers pertains to all the people living in Serbia, which is always portrayed as a land of ice and snow and unhealthy marsh.

The Siberian battalions, which have won so great a fame in the Russian campaigns, are drawn manly from territory as near the equator as Great Britain. It is undeniable that their winters are teribly severe, but in the hot summer crops of the utmest value can be sown, ripened and harvested. It is not impossible to lead a robust life in the Siberia of military

The real natives of the Arctic can endure hunger and fatiguecan march in their own fashion through hurricane and blizzardbut their value is rather to the explorer of the inhospitable North than to the soldier. As hunters they are wonderfully clever, yet they are curiously formal in administering the coup de

They will apologize to the fierce white bear which they have cornered before advancing to a close attack with bone tipped arrows and spears, a duel in which the odds seem decisively on the bear destroying the man. They are therefore not cowards in any sense, and few British sportsmen would risk their lives against bear and wolf and walrus protected only by futile weapons and their own personal dexterity.

They are free from national duties and taxation, and their intercourse, even with fur traders of blood alien to their own, is very meagre, indeed. There are dia lects spoken by those tribes which have never been interpreted and never reduced to writing, and their ideas of the great world outside the tundras and steppes are

very crude. A generation may pass before the story of the Grand Duke's great campaign filters north, and even then it will be incomprehensible to persons to whom a crowd of even a hundred human beings would be a marvel. Now and then a stray whaler or exploring ship comes within sight of the shore camps and a little barter by means of signs is carried on, but the inland dwellers have not even this communication with the outside

It isn't every fellow who can fall in his own estimation without hurting himself.

METEORS.

Why They and Falling Stars Show Varied Collors.

The earth's atmosphere is now be-lieved to have three fairly distinct streta, the first, extending up to about forty-five miles, having natrogen as the leading constituent, the second, with its the damp construct, the second, with its upper limit a about 125 miles, being chiefly hydrogen, and the third, at a greater height consisting of a very thin gas, which has been named "geocoronium"

gas, which his been named "geocoronium"

Dr. Alfred Wegener has attempted to
explain the striking differences of color
in mefeors or "shooting stars" and says
that meteors coming from outer space
are not sufficiently heated in the exceedingly light gas to become luminons.

Their fall through the hydrogen layer
couses them to become incandescent, and
fcfore they reach the lowest stratum
most of them are completely dissipated.
A few of the largest, however, penetrate
the nitrogen atmosphere, a very small
number reaching the earth's surface.

It is found that the deep falling meteors pass through three stages of coloryellow-white, green and deep red- and
it is concluded that the green is due to
incandescence of the hydrogen and the
red to that of the nitrogen.

Only the first stage is seen in
cuickly dissipated meteors, the
yellow or something reddishness
evidently the glow of the metor
stance—London Family Herald.

## AMERICAN COLONEL GIVES FREE ADVICE TO RHEUMATICS

SAYS IT'S SHEER FOLLY FOR ANYONE TO SUFFER THESE DAYS.

Rheumatism can't be cured so long s your system is weak and run down. You must first build up and get strength to fight off teh disease Ferrozone cures because it builds up, because it renews the blood and

dissolves the Uric Acid and the poi sons that cause rheumatism.
It is proved right here that Ferro one does cure.

Col. H. M. Russ, of Edwards, St Lawrence Co., one of the fine old heroes of the Civil War, was com-pletely restored by Ferrozone. Read is statement:
"I couldn't get around without

cane, and then only with difficulty.

"Rheumatism took complete control of my limbs.

"Suffering was more intense that hardships on the battlefield. "When my doctor had done his bes got Ferrozone. Then came a quick change.

"Ferrozone gave me comfort at once, eased the pain and took the stiffness out of my muscles.

"I am well to-day. Ferrozone cured me completely. I can jump and run like I did forty years ago." Be sensible about your case. If your

present medicine is useless give it up.
Don't experiment again. Ferrozone is known on all sides to be a cure that does cure. Why not get a supply to-day. The sooner you begin Ferroto-day. The sooner you begin Ferro-zone the quicker you will get well. Price 50c per box or six for \$2.50, at all dealers, or direct by mail from The Catarrhozone Co., Kingston, Ont.

## Ship Signals at Sea.

There are various ways in which ships signal at sea. The most general method in daylight is by code flags and pennants, these being arranged according to an international system of signals. But sometimes, owing to weather conditions or distance, it is not easy to distinguish the colors, pat-terns or shapes of the flags and then other methods have to be adopted. Chief among these is a system of exhibiting cones, balls or drums, various orders and positions representing different things according to the recognized international code. One combination means, Show your ensign; another, Is war declared? Another, War is declared. Another, Beware of torpedoes, or channel is mined. other, Enemy is in sight. Another, lookout; enemy's ships r ported about disguised as merchant men, and so on.—Exchange.

The Hamilton People Care for Their Soldiers' Dependents in a Comprehensive Way. Jan 19

The Hamilton Branch of the Patriotic Fund finds room for its energies everywhere.

In Hamilton the Canadian Pat-

In Hamilton the Canadian Patriotic Fund has 25 guardian accounts for children in Homes, for women who are not able to handle their own money. To these accounts are de-posited the proceeds of sales of prop-erties made on behalf of soldiers. The number of these accounts is in creasing monthly, many of the de-pendents having recently asked that the Fund be to some extent their bankers.

The Hamilton Fund owns a ceme tery plot in which has been buried, since the formation of the Branch, 78 children, wives and other dependents of men of the C.E.F.

The Fund has at the present time an employment department, where are listed those desirous of obtaining sitthose desirous of obtaining aitnations, and each day some of these are brought into contact with people desiring their services.

desiring their services.

The social service work extends far atield, everything being done that is possible to protect the women, to restore to their home such as have gone astray, and to strengthen the moral fibre of the weak. A few illustrations fibre of the weak. A few illustrations will show how thoroughly the officials of the Fund do this work:

An enlisted man had been earning \$15 • week. His wife, apparently had \$15 ° week. His wife, apparently had been always a bad manager. There were five children and with the man's enlistment she was in receipt of \$70 a month. She immediately contracted debts for a baby carriage and furniture, and the end of each month found her without any ready money. The eldest child, a girl of eleven years, did some of the buying and the consequence was extravazance. The consequence was extravagance. The Hamilton Fund arranged with a lady helper to receive the allowance from

footing generally. The man has since returned. The daughter had been brought home and the affairs of the family are in such a position that the man himself has felt free to again offer himself for enlistment.

Another man an exceptionally de-

Another man, an exceptionally de Another man, an exceptionally assirable type of soldier, left his little family, at the time of the second contingent, happily situated in a nice hame with a warrant officer's pay and allowance. All seemed to go well until the wife developed a mental troutil the wife developed a mental troutil tie wife developed a mental trouble which made it necessary to remove her to an asylum for insane.
The fund took charge of the household placed the four children in care
of a competent housewife, kept the
home intact, the insurance paid and
made application for the return of made application for the return of the enlisted man. The prompt at-tention to the case will undoubtedly result in a permanent cure of the unfortunate woman and the man he in his own home to welcome his wife when she is able to return.

In one case a wife had so mis-conducted herself that it finally be came necessary to take proceedings through the Children's Aid Society and her two small boys were placed in a home. For a time it appeared that this meant the final collapse of the woman's will power, but repeated in-terviews, some small kindly acts, some little payments of old accounts. the adjustment of back taxes, relief from pressing creditors, brought from the soldier's wife a promise that she would work and remove herself from the companions who had caused her much trouble. This woman has now for months past been working stead-ily, visiting her children regularly, buying clothes for them, and depositing monthly with the Patriotic Fund her separation allowance and assign-ed pay. This is being used towards ed pay. This is being used towards the payments on her home, and in addition she has made some deposits the fund and disburse it on account of the children. The eldest child was sent to an Industrial Home temporarily and the family placed on a better daily work in a factory.

tal imports amounted to nearly 8,500 Drooping, Tired, Weary dozen annually.

Japan ordered 800,000 cotton loom

from England prior to the war; only 90,000 have been delivered. The Brit-ish ban on iron and steel has prevent-ed delivery of the remainder.

As many as 65 new companies were formed in Russia in July against 23 in the same month of 1915. The total

capital, too, was 105,880,000 roubles (£11,000,000 at normal rate of exchange), against £4,000,000. Bolivia's trade during the first four months of the year amounted to £8,031,200, an increase of £3,064,000 over the total for the corresponding period. the total for the corresponding period of last year. The increase, however, was wholly in exports. Shortage of coal in Venezuela is

favoring the increasing importation of electrical appliances for domestic and industrial use, especially fans. stoves, irons, ovens, pumping outfits, and motors of from 1 to 25 h.p. The importation of cotton goods in-

to New Zealand increased from £400. 000 in the first half of 1914, and a sin ilar amount in the same period of 1915, to £630,000 in that of 1915. Higher prices were to some extent r sponsible.

Japan imported iron of various

kinds during the first half of the pre sent year to the extent of £5,700,000 more than in the corresponding perlod of last year. The United Kingdom the United States, Sweden, and China were the chief suppliers.

The British participation in the trade of Ceylon rose from 38.7 per cent, in 1913 to 42.2 per cent, in 1915; and that of British Possessions from 36.6 per cent. to 31.9 per cent; while the trade of foreign countries declined from 30.7 per cent to 25.9 per

NEIL FERGUSON,

How to Make Starch.

This is the way to make plain boiled starch: Allow two tablespoonfuls of starch to a galion of water. Wet the starch with cold water until it is of the consistency of cream. Then pour over it the water, which is bubpour over it the water, which smooth bling. Stir constantly until smooth bling. Add an and boil for five minutes. Add ar inch of candle—to a gallon—or a ta blespoonful of lard to give a very smooth starch. This is the foundation for all starching, excepting that done with uncooked starca. If a very stiff starch is desired a tablespoonful of gum arable water to a quart of starch gives good results. To prepare gum arabic water pour two cups of boiling water over a quarter of a pound of gum arable. When the gum is dissolved, strain t solution into a bottle, cork and to p on hand for use in the laundry.

Minard's Liniment C. res Burns, Etc. Veal en Casserole.

Fry out in the casserole several cubes of salt pork with an onion; place a thick slice of meat in this and add a crn of tomatoes and bay leaf, if at hand. Season and cover. Cook in oven one and one-half hours and serve in caserole with plain boiled rice for vegetable.

A cupful of vinegar added to the water in which colored clothes are to be rinced will preserve the color.

"NO MAN'S LAND."

What It Means to Get Lost in Between the Lines.

A London paper says: Seven men including a N.C.O., went out to exincluding a N.C.O., went out to explore an enemy sap. The Boche awaited them. The Boche threw bombs. Five of the party set back. It was assumed that the other two had been killed or wounded. Two days later a lone figure was seen walking about between our own and the enemy lines. Both sides fired at him. The man rushed like a scared rabbit into a big shell hole. Five days later a worn, dishevelled, khaki-clad dirty, unshaven man came over the parapet. a worn, disnevelled, knakt clad, dirty, unshaven man came over the parapet. Rough but kind words of cheer greeted him as well as a stretcher. The poor fellow was light headed. For a week, without either food on drink, he had been in "No Man's Land." The only food he had had was grass and daisies. Think of it. A week in "No Man's Land" without either food or drink, with a big bombardment or drink, with a big bombardment go-ing on intermittently from both sides and both friend and foe-your iden-tity unknown to either—firing at you!

### Winter Walking.

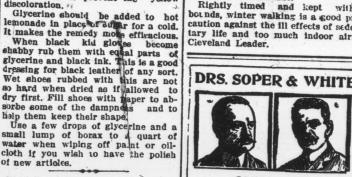

Winter walking diminishes greatly the time spent in the open air by those who ride in automobiles. It comes near putting bicycles out of Don't give in to that depressed, played out, don't care sort of feeling. Better days are ahead. Cheer up, do use. From steamboats to canoes, there is almost entire cessation of water outings.

All of which means that more walk-ing instead of less ought to be done in cold weather. There is no other way of moving about the open air which keeps a healtny human being's feet so warm and brings such a glow of warmth from the body itself If the pedestrian is properly clad, especially in respect to keeping dryshod, all of the effects of winter walking should be beneficial.

With a little care and discretic such exercise can be made as agreeable as it is wholesome. Usually there is no dust. Often the temperature is neither too low for comfort nor too high for vigorous exercise without weariness or lassitude.

Rightly timed and kept within bounds, winter walking is a good pre-caution against the ill effects of sedentary life and too much indoor air.-Cieveland Leader.

the knowledge of the only man who matters. She feels that it would be ob-taining the most priceless thing in the wide world by false pretences it she did not tell him every tiny thing about herself.
Now, no reader must be angry with

Now, no reader must be angry with me, or think that I do not appreciate her lover at his true worth, it I just point out that, by confessing about any previous affair, a girl is applying some sort of test of her man's love.

If—please nurifie the if—he loves as he should do, then his devotion will be but strengthened by such convincing proof that his girl loves him with all others, to care fer her always in the future.

But if it happened that he did not

But if it happened that he did not love deeply and sincerely enough to hear all about the other man—who, as was the case with my friend, was met long before the girl ever realized that such a person a "Mr. Right" existed without losing i me of his respect and regard for the irl, then I would say seriously that would be hetter for their future has these if they parted

their future has liness if they parted at once.

There is an dage tradition that permits a man a many flirtations or "affant" as the sheet sheet or his marriage. His dallings are recognized preliminaries finding the right gir.—the one who he can honor above all others. The may not be right, but it just is so.

There is a silly saying: "The more loves a man has shed, the more he'll honor the woman he'll wed." Well, just so long as men are content to apply that code of morality to them-

apply that code of morality to them selves, it is only just that they should let it apply in some measure to the

Like most men who have things pretty much their own way in this world. Sir Prederic was of a jealous world. Sir Frederic was of a jealous disposition. All his life he had got just what he wanted—a mother who worst ipped him—servants who came, and with haste m his beck and call metabors who looked up to him and some of whom trodled him—money in a undance—a fine estate entirely untatumbered; he had but to set his heary moon a thing to obtain it.

unintumbered; he had but to set his hear upon a thing to obtain it.

And he had set his heart upon Signa. He was hard hit the first evening he saw her—all the harder that she had taken so little notice of him; he felt still more sure that he loved her after her visit to the Park, but now that this fellow, Hector—Varren, had stepped in between them he felt certain that he loved her passionately, and that he must and would have and that he must and would have

The thought that the girl he. Sir Frederic, loved, the future mistress of Blyte Park, should spend the day alone with this unknown nobody, with handsome face and opera-singer

for this is what in his own mind Sir Frederic stigmatized Hector Warren's calm, easy bearing—was simply intolerable, maddening. With a hasty stride of his long legs he reached the lane, and jumping on his horse, which he had left bridled to a gate, he struck his spurs into the high-bred animal, and rode home full pelt, Hector Warren's cool smile and quietly haughty voice haunting him all the way, and making his self-love ache worse than his bruised hand.

Flinging his bruised hand.
Flinging his bridle to a groom who
ran forward with obsequious haste,
Sir Frederic entered the house—a
grand place, as Signa had said—and
was passing through to his room to
dress for dinner, when he heard Lady
Blyte's voice calling him from the

He hesitated a moment, then pushed the half-open door wide, and en-

Lady Blyte looked up anxiously; she had seen him from the window dismount, and knew that something had gone wrong.

'How long you have been, dear,' she said, glancing up from her book with that smile with which she was so chary to the rest of the world, but

ochary to the rest of the world, but lavished on her adored son.

"Yes," he said, morosely, dropping into a chair, and thrusting his hands in his pockets—"yes, I have been waiting at the Rectory."

"I thought you had gone there," remark!"

marked Lady Blyte, softly.

He flushed and looked down.

"Yes, I've been there. I went to—to inquire after Miss Grenville. It was the proper thing to do."

course, dear," she assented "And she is none the worse for her

"I don't know—I didn't ask her," he said, shortly. "She was out; she had been out all day with—Mr. Warren." Lady Blyte raised her eyebrows with a look of surprised disapproval. "But not alone. Frederic?"

"As good, or as bad, almost." h. id, angrily. "Archie alone was said, angrily. WES with them.

"Dear me!" said Lady Blyte; and there was strong disapproval in her

"It—it was an accident, it seems," he said, sullenly—"at least so she thinks. Of course she wouldn't say

what wasn't true—"
Lady Blyte looked down in silence.
"Of course she wouldn't," he re"She thinks that it was an accident, but I dare say he could have prevented it. They went out in a boat, got caught in a storm, and went to St. Clare's, where they were kept by the storm. At least,

he says they were kept."
"Dear me!" said Lady Blyte again. Sir Frederic beat the devil's tattoo with his big feet on the Turkey car-

"I can't think how she could have allowed him to take her," he said,

engrily. "I suppose it was his cheer impudence that did it."
"Who is this Mr. Warren? You

mean the man you met the other night, dear?" 'Yes. I wish somebody would tell me," he replied, between his teeth.
"It is my opinion that he is an adventurer: Lady Rookwell declared that was an opera-singer or something that sort, and I'd stake my-my life she was right, for all the airs he

gives himself. "It is very strange," said Lady yte. "I am surprised that she Blyte should have gone with him. She di not strike me as that sort of girl— She did "What on earth do you mean by that sort of girl?" he asked, irrit-

"I mean a sort of girl who would commit an i discretion of that sort, dear," exclaimed the fond mother, meekly. ". was so favorably impressed by her when she was perhaps. You know, Frederic, I liked her very mech."

er very na ch.
"It wasn't her fault," he said, sullenly. "It was his doing, I'm sure of
that. He planned and schemed it all beforehand!' and but for his mother' presence, he would

"Curse him"
"Did you see her, dear?"
"Yes, J.-I waited; I thought I had better wait," he said, with a flush.
"Mrs. Podswell was anxious, ill, in

fact; and I-I didn't know what had happened to her," and he turned his face away.

Lady Blyte looked up at him and

She knew that he had set sighed his mind upon the girl in deep earnest, and she smothered a sigh.

"I—I don't think I would suffer my-self to be put out. dear," she said, timidly. "After all, it wasn't her fault, as you say, and—and—it doesn't

"Doesn't matter!" he excaimed.
"Doesn't matter that—that she should make a friend of this fellow w comes from heaven knows where!

"Of course it matters, in a sense, dear," said Lady Blyte, and it is very aunoying, but—but, Frederic, if you are quite sure—" and she stopped.

"Quite sure of what?" he demanded, though he knew what she was going thosen.

though he knew what she was going to say.

That you have made up your mind, dear. You have seen so little of her, only twice, three times—"

"That doesn't signify," he said, huskit, "It's all the same as if I had known her for years. If you mean, and I in love with her—yes, I am," and le trowned and clinched his hane in his pockets. "I have quite made up my mind."

Lay Blyte smothered another sigh. She had hoped for something different in the way of a daughter-in-law than this Signa Grenville, whose past was altogether brilliant, and who

in the way of a daughter-in-law then this Signa Grenville, whose past the late of the late with the dairy-maid and wanted to marry her, she knew that he would

"Well, dear," she said, gently; "I have nothing to say against her—" "Against her!"

"No, certainly not, Frederic. It is not necessary that your wife should have money or title; it would be bet-

"I don't want either," he said, sullenly.

"No," she assented, with a proud, aughty smile. "So that that doeshaughty smile. n't matter. And she is very beautiful and—and—distinguished looking, I am sure. The Grenvilles are an old family.'

amily."

He made an impatient gesture.
"It would be all the same if—if they
"not." he said, huskily. "I—I were not." he said, huskily.

were not." he said, huskily. "I — I have made up my mind."
"Then, dear, you need not be uneasy, I think," she said, with a touch of proud confidence. "And as to this Mr. Warren, I should not let him disturb me in any way. He is a mere nobody, and quite poor, it appears. It is not likely that she would hesitate in her choice between him and you."

He bit his lip and stared out of the window, but his face cleared some-

window, but his face cleared some-what. After all, it was not likely. He

what. After angal was not havely, he could not have all thing to fear from the rivalry of such a man, and yet—
"Even if she were taken by this man's manners—Lady Rookwell was here this morning and said he were here this morning and said he rather good-looking." Was

"He is very good-looking; he is andsome," he said, with savage handsome," candor.

"Well, well, she may have taken a "Don't," he said, almost livid with jealousy. "It is impossible. I don't believe it."

She looked up, and her lip trembled. How certainly he must love her—this girl whom he had seen just three

"I don't say it, I merely suppose at, I won't go even so far as that; don't be impatient with me, dear," and the proud eyes filled with sudden tears, "I her you pardon," he said. "I "I don't say it, I merely suppose it,

"I beg you pardon," he said.

—I am out of sorts and upset. Of course there was nothing in it. She

cannot help it, and—and—"
"It will all come right," she said,
eagerly, smilingly. "She is not the
girl to hesitate between you. Don't
think any more about him. She must come here again; I will go and see her myself. It will all come right,

dear. "It must," he said, hoarsely, gnawing at his lip. "I—don't know what has come to me. I have never feit like this before. The sight of that fellow drove me mad. I—I nate him."
"Frederic!" she murmured.

"I cannot help it," he said, flerce

Dinned is late at the rectory as well as at the park, for at half-past six the rector has not returned, and Signa and her aunt spend a very uncomfortable half hour of it. Mrs. Podswell would have liked to have said some unpleasant things about Signa's adventure; but there is a quiet dignity in Signa's bearing, a steady look in the beautiful eyes that warn Mrs. Pedswell that it would be scarcely safe; so she contents herself with meaning faintly at intervals and bearing herself as if she were a deeply injured individual, and was suffering untold anguish by the shock Signa's absence has inflicted on her. Signa tries a little conversation, and

attempts to enter into particulars of their trip, but Mrs. Podswell will scarcely speak, and at last Signa takes a book and relapses into silence—no reading, but thinking of the rain a the storm and the fire in the c but most of all of that sudden pr in the face and light in Hector

## ALLY REPLY TO GERMANY AGREED UPON

Britain and France Settle Terms and Will Answer This Week.

## WILSON NEXT

Russia Has Sent Her Reply to French Government, Too.

London, Cable.—Great Britain and France have fully agreed upon the terms of the reply to be made or the peace proposals of the Teutonic allies, the Associated Press learned at the Foreign Office to-day. It, is hoped here that the answer may be despatched by the end of this week, but other nations of the Entente, although agreed in principle, may require ver-bal alterations which would neces-sitate further delay.

It is expected that once this reply

has been forwarded the responses to President Wilson's note will follow very shortly.

Russia's reply to the German peace proposals was telegraphed Monday to the French Government, says a Reuter despatch from Petrograd.

MUST UNMASK BATTERIES. Paris, Cable.—The newspapers to-day comment freely on Germany's reply to President Wilson's note concerning peace. All of them affirm that it contains nothing not contained in the first communication of Dr. von Bethmann-Hollweg, the German Imperial Chancellor, except that it pro Imposes a conference in some neutral

"Germany," says the Temps, "in-vites her adversaries to a conference without making to them any disclo-sure of what she proposes to say unti-their delegates surround the green

Germany desires peace, that is evident." continues the Temps, "but it will be a German peace which she will tear from her adversaries by a ruse, not having had the power to conquer them by force. That is the significance of the manoeuvre which outlines it-self more clearly every day."

La Laberte remarks that Germany received the American note Decem-ber 22, and that her reply had already left Berlin the 26th. "Never in the exchanges of communications with the Government at Washington," says La Liberte, "has Wilhelmstrasse shown such celerity. In the period of the torpedoing of the Lusitania Germany aflowed entire months to pass without communicating to Mr. Wilson explanations embarrassing and belated. The German note is silent on the essential point; it evades that en-tirely. Our enemy declines to unmask her batteries. The trap is more evident than ever, but the allies will not be caught,"

THINK GOOD HAS RESULTED.

Washington, Report.—In spite of the wide gulf between the insistence of the Central Powers for an immediate peace conference and forecast of a unanimous refusal by the Entente Allies to enter such a conference without knowing Germany's terms in advance, the United States Govern-ment believes that the negotiations in

progress are resulting in good.

While there were no official advices upon the subject, the view still persisted in German quarters to-night that the note of the Central Powers might be followed by some highly confidential oral or written communi-cation to President Wilson, in which at least broad tentative terms might be stated. In this connection officials noted with interest Berlin press des-patches saying that Ambassador Gerard, who as a result of his recent visit to the United States is thoroughly familiar with the views of President Wilson, had taken lunch with Alfred Zimmermann, the German Foreign Minister, and probably discussed the

peace situation with him.

Just what the United States could Just what the United States cound do toward bridging the gulf in case the Alfres hold to their opposition to a conference is the subject of serious discussion among officials, but as yet no concrete proposal has been advanc-ed. It is said officially that it even has not yet been decided whether this country will send on to the Entente the Teutonic reply to the President's note, as embodying a new suggestion, or whether its mere publication here would be considered sufficient. The official text of this reply still is await and no further step is expected be fore it arrives.

The extreme delicacy of the situa-tion and the fear of misstep on the part of each group of belligerents con-vince officials that it may be a longbefore any really substantial re-is obtained.

That the Allies will declare that there must be a military solution to the war, both in their note to the President and in their reply to the Central to-day both on the basis of statements at the Allied Embassies and from cabled press comment. A London despatch to-day following one from Petfrograd yesterday as well as intimations from both Paris and Rome that the Allies could not discuss. the Allies could not discuss peace until the actually held the territories they considered essential for their future was taken to indicate that the Alli want to wait for a substantial military victory and a reversal of the pres

ent military situation.

OFFER MADE SERIOUSLY. Ams.er an. Cable.—Commencing reply to President Wil-e Lokal Anzeiger of "From the fact that allowed the Christ-

enemies must gain the conviction that we made the peace offer seriously. Should Mr. Wilson be induced by our Should Mr. Wilson be induced by our note to recommend to our enemies that they send representatives to a neutral place for the purpose of peace negotiations, we should still be far from abandoning ourselves to the hope that the move would meet with success at London, Paris, Petrograd and Rome."

The Taegliche Rundschau of Berlin says: "Our Government's announcement of its desire to bring about an end of the conflict with our enemies in personal negotiations without the co-operation of neutrals is very satisfactory, because it gives us a guarantee that we will decline decisively the interference of non-parti-cipants in the fighting and in the crea-

The Vossische Zeitung, referring to the Swiss note, says: "If further neutral notes are couched in similar terms, they certainly will find a sympathetic understanding among us. The Swiss note breathes the honesty of that true neutrality which has characterized Switzerland during the entire

#### NO MORE AIR RECRUITS.

Ottawa, Report.-The Naval Service Department announced to-day that no more Canadian recruits for the naval air service will be required for some time, probably some months. A large number of Can-adians have offered for this ser-vice, and enough have been accepted to provide a steady movement over seas for two or three months.
addition there is a lengthy list men from which recruits may be taken

#### WORLD'S POTATO CROP SHORT.

Rome, Cable.-The International Institute of Agriculture reports poor potato crops in northern hemisphere Its provisional estimates are 201,000, ooo quintals for nine countries in-cluding the United States, Canada, Switzerland and the Netherlands, Italy and Japan, and also England, Ireland and Scotland, where the crops are the lowest on record. The figures for Germany and Austria are not available.

## NO TIME NOW TO TALK PEACE

Czar Says Enemy Sees De feat is Near.

While Allies' Strength Grows Daily.

Petrograd, Cable.-In the course of an order issued to all the units of the Russian army, dated Dec. 25, the Emperor, in a prief review showing how the inequalities of the recanical resources for wariare as between the ames and the central powers are being graduany removed, with the re-sult that the enemy strength is apparently waning, while that or Russia and her allies is continually growing, procceds to say:

"Germany is feeling that her com plete defeat is near, and near also is the hour of retribution for all her wrongdoings and violation of the moral law. As in the time of her strength she declared war, so now, feeling her weakness near she suddenly offers to enter upon peace perotiations, desiring to complete such negotiations before her military talent is exhausted.

"At the same time she is creating a false impression about the strength of her army by utilizing her temporary success over the Roumanian who lack experience in the conduct of modern warfare." Arguing that the allies are entitled

to choose a favorable hour for peace negotiations, just as Germany chose a favorable hour for declaring war, the order sava:

"This time has not yet arrived. The enemy has not been driven out of the provinces he has occupied. Russla's attainment of the tasks created by the war-regarding Constantincple and the Dardanelles as well as the creation of a free Poland from all three of her now incomplet; tribal districtshas not yet been guaranteed. To conclude peace at this moment conclude peace at this moment would mean failure to tilize the fruits of the untold trials of the beroic Russian troops and fleet. These trials and the still more sacred memory of those noble sons of Russia who have fallen on the battlefield do not permit of thought of peace until final victory over our enemies. Who dares to think that he who brought about war shall have it in his power to conclude the war at any time he likes?"

conclusion, the Emperor, exressing confidence that no Russian soldier would desire peace until the enemy had been expelled from Russian soil and had given guarantees to prevent a possible repetition of a

prevent a possible repetition of a treacherous attack, says:

"Let us be firm in the certainty of our victory, and the All-Highest will bless our standards and vill cover them afresh with glory and give us leace worthy of your heroic deeds, my glorious troops, a peace for which future generations will bless your memory, which will be sacred tocur memory, which will be sacred to them.' -

HUNS MUST TURN IN OLD SHOES.

Londom Cable.-A Reuter despatch from Amsterdam says that the latest German papers contain the Federal Council's regulations regarding shoes and clothing for 1917. They prescribe that only two pairs of so-called "shoes de luxe" will be sold on the turning in of cast off, but still wearable pairs. The utilization of cast-of clothing is to be entrusted to communities which have a monopoly for the purchase of these articles. The exchange of old for new articles will of pass without replying Wilson's note, even our be allowed only through tickets.

# **BRITISH LABOR**

Ben Tillett Talks Plainly of Germans Claim the Allies' American Action.

Not Acceptable as a War New Defences Stronger Mediator.

Chicago, Report.—Ben Tillet, noted British agitator and labor leader, has granted an interview, which the Chicago Herald prints, to William Hard in London. He said:

"If there is any country the British workingman does not think enough of to want advice from it's yours.

"We don't hate America," he said. "But we hate America's present conduct. Germany has desolated Serbia and Belgium. The only peace is to get Germany out of Belgium and Serbia. To do this the United States has not spent a dollar or a man. We will not listen to a people who are always talking about peace and never coing anything to get peace.

"I don't mean that the United States should fight. But the United States might at least have thrown into the scales of this conflict the weight of its solemn protest against the awful and brutal and beastly attacks on Serbia and Belgium.

"The United States was the greatest neutral. It had all he opportunity to raise a voice to check the militar ism that took Europe into war. Now ish that took Europe into war. Now, does it suppose that it is going to be welcomed when it tries to raise a voice against the anti-militarism forces that are going to take Europe into rease?" into peace

Tillett told of a visit to Germany before the war, when he attended a meeting of Labor men. There was to be a resolution brought forward about war. He said:
"There were many British in favor

of it and some French leaders. I was in favor of it.
"It was a resolution declaring that

if ever a war broke out in Europe the working class of every country concerned should at once go on a general upheaval strike. Industry would be tied up. The war would have to stop. Well, what happened at that meeting? When that resolution was reached there was not one German who was oven willing to die. German who was even willing to dis-cuss it, and, worse, when it came to

cuss it, and, worse, when it came to a vote there was not one hand raised to vote for it, not one.

"I went to the leader and I said, This is all your Kaiser wants to know. All that he wants to know. All that he wants to know there is not one of you who dare that there is not one of you who dar even to say a word or raise a band for a resolution adopting the one and only practical way in which the working class can ever stop a war. "But we are Germans," they said.

We are not allowed to take part in any such resolutions.

"He (the Kaiser) started a war one

month afterward; and the leaders of the German working class in the Reichstag, while the British Labor Reichstag, while the British Labor Larty was still appealing for peace, voted war credits to the Kaiser to break the bodies and souls of the people of Belgium. They tricked us, and they tricked the working class of France and they tricked and mass-France, and they tricked and mass-sacred the working class of Belgium. Tell Oswald Garrison Villard that we are not sick of this war, and we never will be sick of this war till we pu down that kind of trickery and con-spiracy and beastliness in Europe. "One thing more. We don't want

mediation at all. But if we did want mediation, would we want it from a country like yours, all full of Germans and all full of daily riots by daily plots by Germans? What do you think of that?

# **ALLIES GUARD**

New York despatch - The Herald this morning publishes the following: For some days skippers of trans-Atlantic and coastwise steamers have been bringing to New England reports of strange appearing craft that were making their way westward. They made no reply to signals and could not be approached. They steered a vagrant course and were described variously as of the fashion of merchantmen, transports, light cruisers and even of submarines. Pieced together, these reports filled in with the suspicion, now apparently confirmed, of shifting went.

of shipping men. The commerce protectors are described as large and powerful, but capable of fair speed. They were described stgned, it is said, to meet the German U-boat danger, and in anticipation of an attempted raid off the Canadian coast similar to that made by the U-53 off Nantucket, on October 8th. The off Nantucket, on October 8th. The British Admiralty, it is said, determined to make impossible another such raid, and the fleet of commerce protectors was the fruition of the plan then formulated.

## ROYALTY VISITS CANADIANS.

London, Eng. cable- The King and Queen, Princess Mary and Queen, Princess Mary and Princes Henry and George visited the King George Hospital. Their Majestles spoke in French to some of the French-Canadians, took a special interest in spinal and paralysis cases, and asked many questions of the trench life. In the case of men, some of whom had been admitted. of whom had been admitted to the hospital only the day before, the King talked with the soldiers of American nationality, thanking them for having come to this country and volunteered their services.

Many a man has come back. spite of the fact that he has burned his bridges behind him.

## SOMME FIGHT IS ON U. S. COURSE ENDED, HUNS SAY

Attempt is a Failure.

Than Those Lost.

He declares the great battle that began there on July 1 may now be considered to have been terminated, and asserts that the fact of the Germans being enabled to reconstruct their line means that all the efforts and losses of the five months' offen-sive by the Entente forces were in vain, as if it is desired to resume the

vain, as it it is desired to resame the attack it must be begun all over again as in the beginning.

"As to the new defences the writer says they have been perfected to such a degree that even the foremost wire, with the troops holding them occupying deep dugouts and having adequately protected communication trenches. Moreover, he asserts, the new defensive lines are stronger than those of July 1, as "behind the first line trenches, which were constructed under hostile artillery fire, are more than a dozen of the strongest sort of defensive lines, which have been built absolutely without interference and with great care."

As a further sign of the exhaustion of the offensive the writer notes a let-up in the air activity of the Entente, although German squadrons had been carrying out raids toward the

Regarding the Roumanian cam-paign, the military critic points out that navigation on the Dannibe for the Russians has been definitely stopped with the occupation of Tultcha by the Bulgarians, leaving the Russians only the railroad lines to Rent and Jassy, while the Russian croops in Dobrudja have been driven into the extreme western corner of the province

INSTRUCTIONS TO GERMAN PRESS INSTRUCTIONS TO GERMAN PROPERTY London, Eng., cable—A Reuter despatch from Amsterdam to-day says:
"German newspapers are being

"German newspapers are being instructed to declare that the Somme Instructed to declare that the Somme battle has now been finally finished. They state that the German position is now stronger than on July 1, and that behind the foremost German lines are more than a dozen very strong defence lines.

## BRITISH MADE TRENCH RAIDS

Good Results Obtained Around Armentieres.

Airmen Also Bombed Works of Enemy.

London, Eng ,cable-The official report from British headquarters in France to night reads:

"Some 50 Germans approached our lines Menday night in the neighborhood of Les Boeuts. Eighteen of them were taken prisoner; the remainder suffered heavy casualties from our machine gun fire.

"Monday night we entered trenches "Monday night we entered trenches northeast of Armentieres and drove off an enemy working party. The enemy's positions east of Ploegsteert were also raided; casualties were inflicted upon the enemy and

were inflicted upon the enemy and prisoners were secured.

"In the neighborhood of Les Boeufs and Gueudecourt we bombarded the enemy trenches during the day with satisfactory results.

"At other places along the front artillary activity has accuting the day of the satisfactory and the satisfactory results."

tillery activity has continued. "On the night of Dec. 24-25 our aeroplanes car-ried out successful bombing operations on places of military importance be

## NO REST FOR HUNS IN WEST

Allies Gave Enemy No Rest On Christmas.

Germans Short of Fresh Troops-Morale Weak.

London, Eng. cable-Heavy artillery and minor infantry activity continued along the west front during Christmas night and to-day. All idea of a Christmas truce was abandoned by the Ger mans when the sharp patrol assaults with which the British and French troops began the day were kept up till midnight without a breathing spell, The constant hammering at the vulnerable spots in their defences evidently is taking effect on the nerves of the German troops. Never knowing where the attack is coming from and whether it means a small operation or another big push, such as Nivelle's victory on the Meuse, has prepared them for, the Kaiser's soldiers are obtaining little relaxation from the fearstrain of trench warfare.

Prisoners taken by the allied troops testify to the embarrassing lack of fresh troops behind the German lines. nesh troops bening the German Imes.
Not only are the soldiers pushed to
the limit of endurance when they occupy the trenches, but their relief
from duty is steadily being cut short
for want of troops to take their
places, according to reliable reports
from the front.

The only members of the allied air forces to celebrate Christmas in their pilot's seats were ten French fliers, who poured shells on the enemy's posts at Nesle, Ourscamp and Cha-pitre.

From talks I have had with English officers here on furlough for the holidays I am convinced that the German

morale has suffered severely within the last month, and that nothing will prevent the allied armies on the west front from smashing forward along a considerable front and forcing a corresponding retirement of the enemy along the entire line,
"What has been accomplished

the Anglo-French forces can be done again," said an officer to me. "We are organized, and we have sufficient artillery for another push along a wider front. We will be able to break through along a line of, say, seven miles, capture guns—and consolidate ourselves in a position to menace the entire German front. This will force the enemy to retire generally to a position which will straighten their

## **TEUTON DRIVE SLOWING DOWN**

Russ Reinforcements in Roumania Now in Range.

Bulgars Lose Heavily in the Dobrudja.

London, Firg., cable-Petrograd despatches to the Times say: There are indications that a German advance cortheast of Bucharest is losing momentum. Each day gained enables Russian reinforcements to come within striking distance, thus helping to hold the present line northwest and south-east of Pilipechti, 30 miles from Braila.

Yesterday's reports of the situation in Dobrudja contam an interesting account of the fighting at Lake Babadag, where the Russians scored an important success over the Bulgarians who were trying to turn our left flank. The enemy was criven back into the lake marshes and mest of the attacking column perished in the swampy region. Dobrudia probably is destined to play an important part in the forthcoming operations. For three winters the delta has not been ice bound, and if this state of affairs recurs this year it will be of much

advantage to our allies.

According to Berlin d spatches in Northern Wallachia, along the southern Moldavian border, and in Dobradja the Teutonic allies continue to make gains over the Russians and Robman-ians. Thirty miles southwest of Braila the invaders have captured the town of Filipechti, and rest of Rimnik Sarat are on the off-asive. In this latter region during the last few days 5,500 Russians have been made pris-

FIERCE BATTLE RATING.

To day's Petrograd statement reads: "The enemy is bombarding with an intense artillery fire the regions of the villages of Planiaks, Maniuff and Gukalovze forest. South of Brzezany the enemy is directing his fire along the heights occupied by us east of the villages of Linguistics. villages of Lipnicadolna and Svistelniki.

"At the source of the River Rimalk the enemy pressed back our advanposts, which withdrew to the main position.

"Throughout the day the enemy, with considerable forces, made a number of attacks on the Filipschti-Lichkotianka front, which were re-rulsed with great losses to him. The righting was especially fleree in the village of Filipeciti, which, on being set afire by the enemy artillery, we evacuated.

"In the Dobrudja there was an exchange of fire by patrols."

## SNUB FOR HOLLAND.

German Answer So Insolent It Must be Altered.

Amsterdam Mable.— The telegraaf says it has reason to believe that Germany's reply to Holland's note regarding the deportation of Belgian workmen is framed in such terms that it was inadvisable to communicate it to the Dutch Parliament and that the Government becomes the same than the contract the contract becomes the contract that the Government has the contract that the Government becomes the contract that the Government has the contract that the Government becomes the contract that the Government has the contract that the Governm ment, and that the Government has requested Berlin to alter the reply in such a manner that it may be presented to the Parliament.

The Dutch Government last month instructed its Berlin representative to notify Germany that the Belgian impression is Holland. A Rotterdam despatch to the London Times, on Dec. 5, said that Germany had responded in words which were tantamount to saying, "Mind your own business." eportations had

WIFE CHARGES ARSON

Windsor despatch-Thomas Mather. farmer of Tilbury West township is in Sandwich Jail on a charge of ar-son, preferred by his wife, Mrs. Lydia Mather. In her complaint, Mrs. Mather alleged her husband deliber-ately set fire to their house, causing a loss of more than \$2,000. Mather says the fire originated from spon-taneous combustion. It is likely he will be tried by jury in the next sitting at Sandwich of the Supreme

## NO TERMS YET FROM THE HUN AS TO PEACE

German Reply Again Offers Nothing Real On Which to Confer.

## THE ALLY ANSWER

Will Refuse to Negotiate Until Something Definite Comes.

Washington despatch — Germany's reply to President Wilson's note was received to-day, and is regarded here as having advanced the peace movement another step despite the fact that it disappoints in not meeting his suggestion for an avowal of terms.

The recention Germany's reply re-

suggestion for an avowal of terms.

The reception Germany's reply receives among the Entente Allies, whose statesmen have publicly dewhose statesmen have publicly de-clared against such a programme, now becomes the point upon which a fur-ther move is hinged. The German note probably is the prelude to a series of carefully-considered delicate moves in the great game of world diplomacy, all possibly leading to an approach for a real discussion of peace terms on grounds which all the beligarents may feel can place them at no direct may feel can place them at no disad-

is the official view of Germany's reply so far as it has been formulated on the basis of the anofficial text.

Neutral dipomatic quarters, too, regarded the note as a step toward peace, and rather leaned to the view that Germany might follow it with a confidential communication of some sort outlining her terms.

The view of the Entente ally Embassies, frankly expressed, was that bassies, frankly expressed, was the note was not an answer to President Wilson's communication, but rather a document for circulation in Germany and in neutral countries with the object of moulding opinion to place the responsibility for continu-

ing the war on the Entente. It was everywhere agreed that the principal sticking-point was the lack of a definite statement of terms such as President Wilson asked and such as Lloyd George declared the Afflies would require if they were not to put "their heads in a noose with the rope and in the hands of the Germans." It is not beyond the realm of dislament. is not beyond the realm of diplomacy. however, to find a way to bridge that difficulty and Germany's failure is not regarded as a block to the negotia tions, although it makes them exceed-

tions, attnough it makes them exceedingly difficult.

Germany's declaration that she regards the work of securing the world against future wars as a work to be taken up after the present conflict is

ended was regarded with a diversity of opinion. Germany's proposal for "an immediate meeting of delegates at a neutral place", is received as admit-tedly much more specific than the original proposal to "enter forthwith into peace negotiations," and to go even further than President Wilson's Suggestion "that soundings be taken."
This alone is singled out by those who regard the reply as a step toward peace, despite the repeated declara-tions of allied statements that it was impossible without a statement of Germany's terms. They expect these two positions, apparently far apart to be reconciled by the art of diplo-macy.

macy. How far the United States can or will be concerned in that can only be decided by President Wilson. Officials assume that Germany expects the United States to inform her ene-

mies of her reply.

Two features of the note beclouded the situation slightly and caused some concern among officials here. The first was the giving out of the text in Berlin before it had opportunity to reach Washington, and the other the connection of the reply with the original German peace proposal. Pre sident Wilson went to great pains in his note to disavow any association or influence with this proposal and the association in the German reply was somewhat disquieting to officials, who foresee the necessity of probably re-iterating the position of this Government. Pending receipt of the official text

attention turns to the reply of the Entente Governments. "At their Em-bassies here the view prevails that their answer, while expressing sym-pathetic regard for the President's purposes and ideals, will decline to negotiate on the status que. The Entente reply to the German proposals is expected to be concluded in the sharpest language, probably taking opportunity to lay stress on the moral questions to which their statesmen have devoted much attention in pub-

Despatches to-day from Petrograd, cutlining the official view there, fore-shadowing that the Allies would not discuss peace terms until they etood in military possession of terrifory they claim attracted much attention.

MORE GOLD FROM OTTAWA.

New York despatch- With onl. three business days of the year remaining after to-day, gold to the amount of \$631,300,000 has been imported into the United States from an sources during 1916. This includes a fresh consignment of \$4,600,000 a fresh consignment of \$4,600,000 from Canada, deposited at the Phila

from Canada, deposited at the Philadelphia mint to the account of J. P. Morgan & Company.

The total of gold imports was brought up to \$639.300,000 with the arrival at the assay office here today of \$8,000,000 from Canada consistent to the same firm signed to the same firm

# Give Now to the Patriotic Fund If ever you would give-give now Bear Ye One Another's Burdens"

Take a present-day illustration. British Columbia—out there under the setting sun—is helping to bear Ontario's burdens. She has sent to the front—that shell-torn front in France—a larger proportion of her manhood

Therefore it comes to pass that we in Ontario are being asked to help in bearing British Columbia's burdens by helping its soldiers' families. It's a fair, a just, request. We all are in the same boat. We must bear one another's burdens. And if one Province, not rich in money, makes heavy calls on the Patriotic Fund, the richer Provinces must help out their poorer neighbor. Under a plan of each Province caring only for its own, the Province sending no men would spend no money. It would neither Fight nor Pay.

Ontario will need about six million dollars in 1917 for the families of its own soldiers. The Canadian Patriotic Fund is asking for that sum as a minimum below which the richest Province in the Dominion will not go. But, as a matter of fact, the Fund hopes Ontario will do still better—will bear another's burdens by helping out gallant British Columbia.

How stands the Western Province? It will require, in 1917, two million dollars for the families of its boys at the front. That is one-third of Ontario's requirements. But Ontario has probably more than seven times the population. British Columbia asks no favors. With only about 350,000 people—not rich in this world's goods, but rich in pluck and good red blood—it is undertaking to raise One Million Dollars for the Canadian Patriotic Fund! That equals \$2.86 per head. Ontario, if it raise six million, will be giving about \$2.38 per head.

But the Western Province will still be short One Million Dollars. Where is this sum to come from? Eastern la. And Ontario, if it wishes to help, can do so only to the extent to which its gifts to the Fund exceed Six A lot of money, isn't it? Yet less than British Columbia is giving, if measured on a per capita basis, and far less if measured by ability to pay. There will be no difficulty in securing the Six Millions if three courses are followed:

1. If all County Councils make reasonably large grants to the national Fund. Three

2. If all towns, whether separated from their counties or not, will undertake campaigns for Courses | voluntary subscriptions.

3. If all citizens, in town or country, contribute fairly according to their mean

As to No. 1. The County Councils are beginning well. Simcoe has decided to largely increase its grant. For grant, jumping it from \$2,500 a month in 1916 to \$5,000 in 1917. The majority of the County Councils will decide at the January sessions how large their grants will be. Public opinion will have great influence on the Councils. Every county ratepayer, sympathetic towards the Fund, should write or speak to his representative on the Council, endorsing a liberal grant. The small tax of three mills on the dollar raises a sum that constitutes a handsome contribution.

As to No. 2. Many towns ignore the duty of holding campaigns. This applies particularly to towns which pay a county tax. Yet this tax never represents a fair or just contribute to the Fund from men of moderate or large means. Practically it is based on what the poore men can afford. The richer should give much more, and they can be reached only through a popular campaign. To relieve anxiety these campaigns should be held in January or February. Will not petriotic men and women in every town take up this duty? They can get all information as to organization and methods by writing to the Canadian Patriotic Fund, Ottawa. And the Fund will assist them also with a campaign of advertising.

As to No. 3. Patriotism of the individual is the basis of the Fund. Everything is built on it. If he will not make some sacrifice for the sake of the mothers, wives and children of the men at the front, the Fund suffers, and they suffer with it. The average family on the Fund requires \$200 a year from it. It is the duty—it should be considered the Privilege—of every Canadian stay-at-home to ask himself: For how many weeks, at \$4 a week, must I, in selfrespect and in gratitude, take care of one of these families? If my county taxation for this purpose means that I am taking care of only one family for one week when I could do more, am I doing the right thing?

The answer to these questions will be found when he sits down and mails his extra gift to the Treasurer of his local Fund, or to

THE CANADIAN PATRIOTIC FUND, OTTAWA.

Four million of these dollars must be secured from individual subscriptions. If there is no Branch of the Fund in your towner county Fund in your towner disend your subscription disent to the Head Office; Partitle Fund;
