up to the average, as it has made rapid pro gress during the last few days. Grain will be below the average, as it, too, was badly affected by the early drought, though on heavy land there will be a fair

yield, but there is little now to indicate that the cereals will be beyond an average, or for that matter scarcely up to it. It is little early yet to prophesy what the root crop will be, but it is in a fair way now

to be good as the wet season will make the roots and weeds flourish. It is an old saying that,-

of mind. The apples are the most promising feature of this season's crops, and unless the destruc-tive canker-worm creates considerable havoor there will be an immense yield. Nearly every tree was loaded with blossoms, and now that the fruit has begun to set, everything points to a large harvest. However, there are many things to interfere with the successful growth of apples even after they get started well along in life, and it may be that the crop will be only an average one after all. There are some reports of the voracious insects and bugs destroying the leaves and blossoms, and are some reports of the voracious insects and bugs destroying the leaves and blossoms, and if they have been allowed to get much start on the farmer they will take the very life out of the trees. these pests, and if the farmers have given their orchards about three applications they will be little troubled with bugs; finot, and the bugs have appeared in their trees, they will oreate considerable havoc. This evil should be kept in the strictest subjection by the farmer for the apple crop is in this re-spect to a large extent under the farmer's control, and an early and complete surveil-lance of his orchard will reward the indus-trious farmer for his toil and put him on his guard. Liberal Conservative Meeting. The meeting held in the Court House on Monday evening in the interests of the liber al conservative party must certainly have been most gratifying to the speakers, Messra. Mills, Ritchie and Roscoe, at least in point of attendance. Notwithstanding a contin-nous downpour of rain from six o'clock till the hour of assembling, the capacious build-ing was well filled when the chairman, W. M. Forsyth, Esq., introduced the first speak-er, Mr. Mills, to the audience. It is unneces-sary for us to give our readers a summary of the address delivered by the nomine of the party, further than to say, following along in quick succession he touched upon the grate issues of the day in a clear andco noise manner, and from time to time elicited the appearse of his admirers. The business situation is much brighter, and goods and prices favor the purchaser in a way not equalled for years. So buoyant are all the prospects, that we have prepared to meet our large and growing custom, by purchasing the

Largest, Choicest and Most Representative Stock of Goods

we have yet had the pleasure of placing before the public. In selecting which, we have been guided by the unvarying principle—" to secure the very best." Where style was the consideration we have insisted on goods faultlessly fashioned; and in all classes of goods we demanded those that

and were, in fact, the best and newest procurable. These we purchased carefully and methodically, buying close and figuring a narrow margin of profit, so that we can offer the same for much less than the ordinary cost.

Our patrons form a community possessed of good taste, and endowed with a discriminating sense of harmony and appropriateness, and we ask for a test of our resources and ability to meet the needs of every patron, feeling that we were never so well equipped to supply their wants.

We can convince the most sceptical that it is unprofitable and unfair to send their money away to firms, they know little or nothing sbout, giving them the opportunity of sending in return anything they may see fit, when they can buy

and from just as good people right in their own community.

Our store is as heretofore a place where all are cordially welcome, a place where goods, prices and courteous treatment are just right.

Thanking you one and all for your valued patronage during the past seventeen years, trusting you will continue to show your appreciation of our efforts in your behalf. and promising to guard well your interests this spring of 1896, as the champion of low prices, superior goods and honest treatment.

In this county the hay and apples are the all-important crops, and last season's experience with the apple yield must convince the farmer that the immense prices obtainable in the English market for our fruit is a sufficient inducement to stimulate him to make every exertion to secure a good crop, for the big prices come when one hardly expects them. It is a scientific fact that many derange-ments of the system emanate from the nerve centres at the base of the brain. South American Nervine cures stomach and ner-vous troubles because it acts immediately on the Nerve centres. J. W. Dinwoodie, of Campbellford, Ont., says: "I do not hesitate to say that South American Nervine is the best medicine I have ever taken; it complete-ly cured me of nervous prostration and the attendant diseases of the liver and stomach that follow this weakness."
