Bug on Shooting.

But Billy Hawkins has been coming along as a marksman' for about six years. He joined the 48th Highlanders' about nine years ago. He was a perfect "bug" on shooting, and during most of his spare time, he was at Long Branch ranges. Experts noticed that he was improving day by day, and predicted that he would win something worth while before long. His shooting at the O.R.A. last year, and the D.R.A. at Ottawa last year, won for him a place on the Bisley team, which he had been trying to land for several years. He excelled as a long range shot.

Will Be Great Incentive to Young Men of Regiment.

Congratulations

Telegrams from Acting Mayor Church and Col. J. A. Curcie of the 48th Highland-ers were sent on Saturday to the winner of the King's Prize as follows: "Canadian Team. Bisley: "Well done. City of Toronto sends heartiest congratula-tions. Canada is proud of you. C'aurch (acting mayor)." "Private Hawkins, Bisley: "The 48th Highlanders to a 'The 48th Highlanders to a man congratulate you on your splendid victory in winning

Thirty Expert Swimmers Take

Their First Lesson in New Stroke.

ADIES LEARN NEW YORK, July 26.—(Special)— Splashing about with nymphlike grace in the capacious swimming pool at North Beach, a group of about thirty young women, some of them from dis-tant lands, took their first lesson in swimming by the Australian "crawl" stroke method.

The young women are physical di-ectors in branches of the Young rectors in brancnes of the Young Women's Christian Association thruout the United States and in India and China. Nearly all of them were expert wimmers, and the new course is for the purpose of cauging them to become adept in the art of teaching others. In the customary overhand and the tiring breast stroke modes of propelling oneself thru the water nearly all of the young women excelled, but they were unable to apply these methods to unable to apply these methods to as unable to apply these methods to as much advantage as the natural pad-dling stroke motbod, demonstrated by their instructor. George H. Corsan, who taught at Toronto University and at branches of the Y.M.C.A. The mili-tary-like evolutions of the class at-tracted much attention.

Over 115,000 women are engaged in the factories of India.

Georgia has a canning club composed of sixty young girls. Over 100,000 women are employed ground? by the United States government. A pump handle.

ect the traveling public. After a brief conference with the

arbitrators should become effective

almost think that they had forgotten that cleanliness existed in world, dwelling, as they do, in the thickness of such filth. But I have sometimes noticed that perpetual ex-istence in the midst of unclear things teaches one to fear the things that are clean. These poor old crea-tures will go on, with their coarse jokes and alms-seeking, till a kind Downland, the theory of the teacher of the

Providence rids the world of all such derelicts! There is a perpetual hanger-on, who

takes his stand either on the street corner nearby a lunch place, or just inside the door His face or just red and bloated, his eyes dull with laziness and gormandizing. He stands picking his teeth, and coverily watching one inside

He stands picking his teeth, and covertly watching everyone who passes by. Sometimes he sees some-one whom he knows, slaps him over the shoulder and bids him come inside to eat. The froth foams up from their steins, and the smell of frying fat comes from the stove in the corner. The red-faced hanger-on-laughs loud-ly, and his eyes harrow themselves into slits of satisfaction. Before his com-panion finishes his meal, he slips out into the street smacking his lips in animal enjoyment. If he does not see any of his friends, he begins a conver-sation with a stranger who may be waiting for a car, invites him into the lunch place, and slips away just be-fore the stream for the first of the fore the stream for the stream for the stream for the fore the stream for the first of the fore the stream for the first of the first of the stream for the stream for the fore the stream for the stream for the stream for the fore the stream for the stre lunch place, and slips away just be-fore the stranger has finished. He is one of those human parasites, who live on others, and whose vision never strays beyond the limits of his own

appetite. Some day, nature will re-taliate, and throw him in the eatingtrough of the worms. Around the corner from the saloon down there, there is a woman stand-ing, holding a sma'l child by the hand. At the first glance the pathos in her these uprisings and tells him that he and others heard Bourassa in Winni-

quiry, mysterious to the unwarned, insolent to the observer. And one sees that the red of her cheeks is not sees that the red of her cheeks is not the natural giow of health and normal living, nor the droop to her mouth the sadness of a struggle for decency. so much as the cynicism of too much knowledge. One looks at the child and wonders if it knows for what sin it is being the cloak, and one can-not refrain from glancing on down thru the years of its little life. Bye and bye, someone comes along and

and bye, someone comes along and speaks to the woman. It is a kind-faced old lady, who does not think it s sa-be-if aced oid lady, who does not think it light legging on the street. She takes a crisp bill from her purse, and walks on. The woman with the cynical mouth laughs and shrugs her should-ers. And the mystery in her eyes be-comes, deeper. for she sees a depper. young fellow stepping off a car. He sees that the look in her eyes is not pathos, neither is the droop to her mouth. He does not take a bill from his pocket, but takes her by the arm and says a few things to her, which do not ex-press pitv for her distressing state. They walk down the street and turn in at a side entrance, the little child

in at a side entrance, the little child receiving a slap and told to run ahead. And the droop to the woman's mouth becomes more cynical, her eyes more

of cleavage, if it can be dignified by that term, is the disaffection of three or four Democratic senators who are frankly fighting free wool and free sugar. That any of these men in the final test will defeat the administra-tion's tariff bill is not seriously con-

In a Tight Place. The western Republican senators who used to be insurgents and preach-ed low traffic and free trade in and out of season, are now frankly embarrassed. It is trying for Cum To Follette and others to be lined up with the stand-patters against tariff eduction, but they can get no possible kudos from trailing after the Democratic procession, hence they can only attack the bill for taking away too much protection for the farmer and not taking enough away from the manufacturer. They may newspapers and complain that the bill has no reciprocity clauses. Recipro city came in with the McKinley bil of 1890, but it cannot be said that the United States has ever accomplished much with it. Interlocking Directorates.

The house committee on banking and currency is inclined to make the administration's bill even more progressive or "radical," if you prefer that ferm. Thus one amendment forbids the same man to serve as a director of more than one national bank. This is a blow aimed at the interlocking directorates of the country. An Arkansas member proposed an amendment making it a penal offence for bank officials to speculate in stocks and bonds, and it was all but adopted. Friends of the bill think it would be better not to load up the measure with too many amendments but if the recommendations of the Pujo committee which investigated the money trusts are ever to be acted upon, now is the time when we are overhauling the national bank act, and the currency laws of the country

Better Nothing Than Modern Dress

Clergyman Suggests a Dress of Beads of Perspiration Rather Than Suggestive Fashions.

SPARTANBURG, S. C., July 26 .-(Special.)—In an editorial on "Sensu-ality in Women's Dress," the Rev Stephen A. Nettles, editor of The Southern Christian Advocate, says: "Somehow it seems that many women love to display their forms. It has gone so far that in some cities laws have been passed forbidding the appearance of women upon the streets in certain styles of dress.

"Really, we believe it would morally be far better for the women to follow the custom of many African tribes who are robed in nothing more than beads of perspiration than to wear the suggestive dresses that many are now

adorning their bodies with. "Let the press and the pulpit and the city councils and the state legislatures, and truly modest women of our land do all in their power to avert the destruction being called down upon our country by the devilish customs and costumes."

Norwegian Statesman Dead. CHRISTIANIA. Norway. July 26. Christopher Christopersen. formerly foreign minister in the Norwegian Gabinet, under the premiership of M. Cabinet, under the premiership Knudsen, died here today. He He be given a state funeral.

The lake is, or was, 46 feet lowest point, and the plan of the In this new axle the Cadillac Company once more gives evidence of its leadership in motor car development and motor car progress. The advantages of this axle do not lie in its being particularly an im-provement so far as its functions as an akle are concerned, but rather in the manifold advantages attained in other directions through the medium of the axle.

axle. In place of the single beyel pinion and single beyel driving gear common to ordinary construction, there are two beyel pinions and two beyel driving gears. This affords two different gear ratios, each driving direct from the engine to the axle without intermediate gearing. The usual single direct gear ratios range from about 3.5 to 1 down to 4 to 1 according to the car. Any single gear ratio is necessarily what it is be-cause a single gear ratio must be, or should be, the particular one which is best adapted for all around general use. No one single gear ratio can possibly be just right for all speeds and for

At the concert the singing of the O'Connor sisters was a feature very ber of passengers are reported in-ber of passengers are reported in-

has finally decided to abandon the

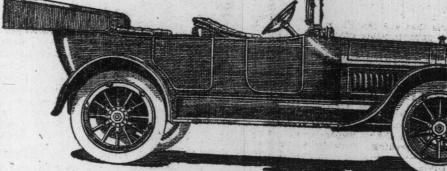

This great increase in car speed in its relation to engine speed accomplishes a number of desirable/things. Among these is a decrease in gasoline consumpton for a given mileage. This is due to the fact that with the engine turning over slowly-comparatively speaking-a given quantity of gas is utilized to greater advantage and generates more of gas is utilized to greater advantage and generates more actual power than with the engine turning over more rapidly. Friction also is materially reduced by reason of the parts operating more slowly and this, too, is a factor in reducing gasoline consumption when driving on the high

Another great advantage is that with this direct drive high gear ratio, there is obtained an extraordinary luxurious smoothness in running, together with a marked quietness and a comparative freedom from the vibration which, to a greater or less extent, is ever present when traveling at high speed with a low gear ratio.

Accorded.

The new car will be on exhibition at our sales room from Monday, July 28

cause a single gear ratio must be, or should be, the particular one which is best adapted for all around general use. No one single gear ratio can possibly be just right for all speeds and for all conditions. But by using two direct gear ratios we have exactly doubled the means for promoting the economical and efficient application of power developed by the engine to the driving of the car. In the new Cadillac axle we have, as before stated, two direct-drive gear ratios. The low direct drive gear, which is 3.66 to 1, is especially adapted for city driving, where starting, stopping and slowing down are frequent and where cautious operation is necessary. The high direct drive gear ratio to the other is made by means of a simple, convenient electric switch. The advantages of the high direct drive gear ratio lie primarily in the fact that with it, any given speed of the car. For example: at an engine speed of 700 revolutions per mour, while on the high direct gear is engine speed of 700 approximately 21 miles per hour; while on the high direct gear it will travel approximately 30 miles per hour with no increase in engine speed.

SHANGHAI, July 26 .- The fighting hetween the rebels and the government forces, which was resumed at 9 o'clock last night, after fruitless negotiations for an armistice, ceased at daylight today, when the southerners withdrew. Their attack again was unsuccessful.

The consular body is considering expelling Dr. Sun Yat Sen, General Huang-Sing, and General Chen Chi-Nei, who are conducting the revolution from the safety of the foreign settlement.

The casualties of the southerners around Shanghai total 1200. The losses of the northerners are much less.

Early Collapse. LONDON, July 26.—"The defeat of the southerners at \$hanghai," says the Pekin correspondent of The Times, "is calculated seriously to affect the prospects of the southern movement. "Many rumors are current in Pek-ing indicating the probably caply call ing, indicating the probably early col-lapse of the movement. Unless the Naking army shows unexpected spirit and certain provinces prove their sympathy by immediate active assist-ance to the southerners, government success is inevitable."

Foreigners Want Help. HANKOW, China, July 26.—Urgent appeals were received yesterday from the foreigners resident in Ku-Ling for a naval guard. There are over 2000 of them there, consisting mostly of women and children.

Su-Chow Fallen. ST. PETERSBURG, July 26.—A despatch from Shanghai says it is officially announced there that the City of Su-Chow has fallen into the hands of the northern forces, and the farrisons of the forth at the farrisons of the forth at the garrisons of the forts at Wu-Sung also have joined them.

Ardor Dampened. FUCHOW, China, July 26.-The de-feat of the southern revolutionary troops at Shanghai seems to have dampened the ardor of the people of the Province of Fo-Kien, who sym-pathize strongly with the rebel movement, but now seem inclined to re-main passive, unless the southerners achieve an important military success.

Just Some Remarks By Commentator

The late James Conmee, who died in rizona the other day, was one of the most interesting personages in Canadian public life.

Mr. Conmee came to the Dominion House in 1905. His reputation as a bitter partisan had preceded him, and there was some prejudice against him among the opposition members from Ontario. Outside of Ontario at that time he was unknown. It may be said without flattery that no private mem-ber on the government side more easily and quickly made for himself a prom-inent place in the house. He was a massive. rugged man. whose appear-ance impressed itself upon his hearers, and he commanded respect because he never talked on any subject with which he was not thoroly familiar. I kneew him, both in the legislature in Toronto and in the house of commons at Ottawa, where he was for many years a unique figure—unique because of his outstanding native ability which

overcame the disadvantage of lack of school education. What Mr. Conmee knew he got by his contact with the world and his ability to assimilate and make use of the knewledge that he thu. he was not thereby familiar. Conmee had a good legal mind, altho, of course, he had never studied law, and was familiar with many legal au-thorities and precedents. He probably gained.

gained. He was with Custer in the Am-erican Civil War. He built railroads for the Canadian Pacific, and he pion-eered in New Ontario, building up a fortune for himself in the bleak and barren north. As a politician he was in a class by

himself, and tho his methods may not have been always strictly conventional, they had the advantage of being en-tirely successful so much so that Conmee was enabled to pull thru on

He disappeared from public life in 1911.after the defcat of the Liberal party and reciprocity. His opponent in Port Arthur, Mr. J. J. Carrick, was regarded as a sure winner in the fight, but Mr. Conmee had a trick that was supposed to overcome even that handi-cap. He figured on the return of the Laurier Government, and almost at Laurier Government, and almost at the last moment it was announced that the Port Arthur election would be de-ferred. His frienda believed that in a deferred election Port Arthur would want to be with the government. Mr. Borden, coming in. Mr. Conmee threw up the sponge, and the election was uncontested uncontested.

When Mr. Conmee came to the leg-slature he was very "raw," and his speeches wers not exactly models of English. However, he applied himself to the business of legislation, sponcered the celebrated Conmee Act, which practically prevented municipalities from getting possession of public utili-ties, and, rather gloried in the as-sociation of his name with a measure

that was roundly condemned. As years passed he became one of the front benchers of the Liberal par-ty; he was often called upon to take up the battle in the house over some

government measure and developed in-government measure and developed in-to a splendid speaker tho his lack of college education, often led him into mispronunciations, which threw the house into spasms of laughter. For instance. during the famous Gamey ses-sion. Mr. Conmee worked off something ike this:

He was defending the high court judges who sat in that celebrated case, and declared that some of the obser-vations of the coposition were "li-billous accus-i-ations against the judi-lous accus-i-ations against the judi-kary of the country." That phrase will live long in the memory of the members of the then legislature. As a time-killer he was a wonder.

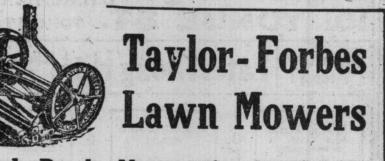

During an all-night sitting of the house, when the Ross Government, were praying for daylight or Valen-tine Stock to save their narrow ma-jority disappearing altogether, Mr. Conmee filled in three or four hours with a very excelient attempt to read a musty report extracted from the archives. He was subject to a lot of banter, but always had the retort courteous. Mr. Course had a splendid grasp of the wants of the north coun-try, and he was always consulted on matters of policy with regard to that William Pugsley and Hon. Wallace Nesbitt, K.C., will cheerfully testify. practically unknown region. Well, perhaps not cheerfully

Billy Bennett of Simcoe, was con-tinually after Conmee when they sat together in the teath parliament. Ben-nett was waspish and often stung the big man from Kainy River cruelly, but Conmee held his own, and more than once came back with telling effect at his "honored frieue"

his "honored friena."

"Jim Conmee." as everyone called him, had his faults, and limitations like the rest of us. but he possessed the qualities of courage and devotion, and dimensional more which it and and glimpsed more quickly and ac-curately than did most of his fellows. the coming greatness of Canada.

Altho she is 70 years of age, Mrs. Julia B. Painter of Pittsburg, has just completed a masterpiece in clay, callknew more about the law governing waterways and riparian rights than ed "The Head of An Apache,' was done without the aid of a living many lawyers of eminence, as Hon. model.

Made By the Natives, for the Natives

-"'Made in Canada."

-The phrase is familiar. You read it many times in the course of a year. But it has a new significance as applied to lawn mowers."

-Canada is a country of lawns.

-750,000 of them.

-A country that has 750,000 lawns is under the necessity of producing a native-made lawn mower that will outclass any lawn mower made anywhere else in the world that may possibly reach Canada.

-Taylor-Forbes lawn mowers are made for the natives, by the natives.

-They embody all the native ability for mechanical construction, along with the native ability for doing things honestly.

-The knives all made of genuine imported Sheffield Steel.

-Ask for a Taylor-Forbes lawn mower and leave the rest to the guarantee.

--- This guarantee is from Taylor-Forbes, Guelph, Canada.

WILKES-HULL. WILKES-HULL. The marriage took place in the Bloor Street Baptist Church on Fri-day morning at ten o'clock of Mary Estella (Fritz) Hail, daughter of Mr. and Mrs. P. W. Hull to Mr. William Edwin Wilkes, the Rev. W. A. Camer-on officiating. The bride wore her tra-veling gown of taupe silk poplin with black hat and a corsage bouquet of pink sweet peas. Her attendant was Miss May Wilkes sister of the groom. and Mr. Ralph Hull was best man. The groom's gift to the bride was a pearl pendant. to the bridesmaid a gold bracelet. and gold links to the best man. Mr. and Mrs. Wilkes left later for their honeymoon in Muskoka. On their return Mr. and Mrs. Wilkes will reside in their new home in North Toronto.

MILLAR-JEFFERIES.

The marriage took place at 68 Riv-The marriage took place at 68 Riv-erdale avenue on Tuesday last, at 2.30 o'clock, in the afternoon, of Florence, second daughter of Mr. W. H. Jef-feries, to Mr.J. H. Millar. The ceremony took place in the drawing-room, which was decorated with marguerites and roses, and a bell of marguerites and smilax hung over the backet of the was decorated with marguerites and roses, and a bell of marguerites and smilax hung over the heads of the bride and groom. The ceremony was performed by the Rev. Canon Plummer, rector of the Church of St. Augustine, assisted by the Rev. D. Christie, pas-tor of the Rhodes Avenue Presbyterian Church. The pretty bride wore a facings, a white clup hat swathed with pink satin, and punk roses, and car-ried a bouquet of bride roses and lilies, and wore the gift of the groom. a goid watch bracelet. Miss Lylyan Jefferies, sister of the bride, was her maid, and wore a gown of pink silk Bedford cord with white satin and lace, hat of pink crepe with pink roses; the groom gave her a goid bracelet, and, to the best man, Mr. Harry Bourke, he gave a pearl scarf pin. After a reception Mr. and Mrs. Millar left on a two weeks' trip to Musikoka, and on their return they will reside for a time at 68 Riverdale ave-nue. Prof. Fallow played the wedding march, and during the signing of the register Mrs. McGill sang "I Love You Truly."

LONDON. July 26 .- The men who pursues him to the portals of the shape the destinies of the British Em- | Chamber with cries of: "What price your independence? pire are not thinking much about the

empire, or about civil war in Ulster. or the curates who will be reduced to selling mechanical jumping mice in the Strand, when the moneys of the church in Wales are utilized for building museums and public washhouses. The great, overwinelming, and absorbing problem is when this session is going to end. Mr. Asquith. rosy and debonair, wants it to end on Aug. 15. The quidnuncs say it cannot be done.

Leicester has received as much advertisement during the last few weeks as a fashicnable spa. A doctor has only to write that the waters of Leicester are a cure for lumbago, sciatica. dizziness. and general debility for its fortune to be made

fortune to be made. MacDonald's Move. Some people believe that Mr. Hew-art would never have been returned if if had not beer, for the cultured and sterling "independent" Socialist, Mr. Ramsay MacDonald giving it forth that if the democrats, who love him. did not foreable the Socialist candidate that if the democrats, who love him, did not forsake the Socialist candidate and vote for the Liberal candidate, he would have nothing more to do with them, You see that Mr. MacDonald is dependent on the Liberal vote of Leicester for his own return, and, be-ing a shrewd Scot, he is not going to kick away the ladder on which he stood. A charming little gentleman who makes socks at Leicester. Sir Maurice Levy, did a noble thing by Maurice Levy. did a noble thing by telephoning that Ramsay would remove the light of his countenance from that excellent town if the Socialists did not chuck the Socialist and vote Liberal. They did. Hence Mr. Hewart. Then, when it was all over, Mr. MacDonald, who had been tongue-tied, suddenly broke loose and denounced as a lie that Sir Maurice had any authority for

crats of Leicester had not feared the frown of their darling Ramsay. So, Lord Wolmer, heir of the Earl of Selborne, son of the Countess of Sel-borne, daughter of the late Marquis of

Salisbury, shocked to the marrow at the untruths which fog the air at election times, boldly stood up in the house of commons to introduce a bill providing that it should be a corrupt practice for anyone to tell a deliberate lie for the purpose of effecting the return of any candidate. All men felt there had been some lying at Leicester; but by whom they were too courteous even to guess.

house echoed with salvos of mirth when this pale, but self-possess-ed youth of the anstocracy propounded democracy would be impossible if eleventh-hour lies were allowed to interfere with the honest verdict of

Plural Voting. Everybody likes Mr. J. A. Pease-familiarly known as Jack Pease-minister of education. As he has nothing to do at present in providing young-sters with more education, he has been given charge of the plural voting bill, the purpose of which, he ad-mits, is to deprive Tories who happen to possess property of the right to vote in more than one constituency. Several evenings during the week have been spent on the committee stage of this measure. The committee stage, as is known, is when line by line is taken to see if any improvements can be made. It is always the opposition which suggests mprovements. Mr. Pease, in the friendliest way, said, of course, hon-

orable gentlemen opposite could propose what amendments they like, but the government did not intend to accept any. Parliamentarians were well aware that this attitude was taken up to avoid what is called the re-port stage—that is, when various alterations have been concluded, a last look round to see that everything is all right. When no amendments have been introduced in committee, no report stage is considered necessary Thus a day would be saved, and the holidays would begin earlier.

But, bless your soul! Mr. Pease is a well-intentioned man. He did what no Liberal minister ought to allow himself to do. He was influenced opposition arguments. He accepted an amendment. Then he said there was a good deal in some other suggestion, and he would carefully about it. This was too much for Lib-eral back-benchers. Led by Sir Henry Dalziel, they rose and trounced the unfortunate Jack Pease truckling to the opposition. They in-timated that if he made any more that Sir Maurice retaliated by Leicester. Sir Maurice retaliated by Whip, and that the Labor whip knew what was going to be done with the information. Mr. MacDonald raved that it was quite unofficial, mere gos-sip, and that he is a grossly injured man. Mr. Hewart is now M. P. 25 divisions, which means that over four of the seventeen and a half hours of the all-night sitting (which ended a few minutes before 8 o'clock on Thursday morning) were spent in walking the division lobbles. Altogether some 300 members saw the sitting out.

Three for Slaughter. Later on the house of lords will eceive the home rule bill, the Welsh disendowment bill, and the plural voting bill, and in three nights, with three blows, that august assembly will knock them out of the ring for this session.

A sharp rebuke was administered to Mr. Masterman, financial secretary to the treasury, by the speaker during a discussion on Thursday evening, on a point of the Insurance Act. Mr. Masterman condemned the action of

Opposition To Bill.

Opposition To Bill. A convulsive roar of hilarit ysound-ed when Sir Maurice Levy sprang to his feet with the announcement that he opposed the bill. At first this was interpreted that he was going to defend the eleventh-hour lie. Not at all. Like all good Liberals. he bates lies. One could see that his soul was bubbling with passionnic desire to cost into the feet was bubbling. Angry protests and requests to "with" "It's non-political," said Major Hen-derson, the Unionist member for North The Speaker: "It seems quite un-necessary to drag in a party refer-ence. The hon. gentleman (Major Henderson) who spoke first did nor the feld to aid the Servis and Greece are pitted an army of 500.000 men to throw into could see that his soul was bubbling with passionate desire to cast into dark dungeons all politicians who de-parted one han's breadth from strict fact. The joy of his life would have been to support what he called a com_ prehensive corrupt practice bill, but he was not going to help Lord Wolmer, whom he, innocent man, suspected of insincerity. Members, bent on fun, yelled indignantly at such an aspers-ion on the nephew of Lord Hugh Cecil. He barge i at Lora Wolmer for hav-ing made a vulgar taunt about a "forg-He bange I at Lord Wolmer for hav-ing made a vuigar taunt about a "forg-ed telegram," when Sir Maurice was introducing the choice of Leicester to the house last Monday. Lord Wolmer stretched his hands to the speaker for guardianship from such insult. The speaker knocked Lord Wolmer back sary guardianship from such insult. The speaker knocked Lord Wolmer back by saying it was not for him to com-plain. Sir Maurice Levy, ever gal-lant. attempted a sneer at Lady Sel-borne, but before he could throw the shaft it was knocked off his hand. Just a Joke. Now the bill, to make election lies a legal offence, was a joke intended to tickle Sir Maurice Levy and Mr. Ramsay MacDonald into a kind of parliamentary cockfight. Liberals, of course, were virtuous, and, therefore,

course, were virtuous, and, therefore, very resentful at the conduct of the young lord. They, the Labor men, and the Nationalists, could have kicked it the Nationalists, could have kicked it on one side by going into the lobby against the bill. But wretched Tory spouters and hireling Tory scribes would, therefore, have informed the world that the Liberals were favor-the to lying at election times. They able to lying at election times. They had to face this, or be parties to the introduction of Lord Wolmer's bill. They were parties. They were as glum as old glue when Lord Wolmer with the stride of a grenadier, march-ed with his bill to the table. The Unionists laughed till their eyes were full of tears. Sir Maurice Levy and Ramsay MacDonald-ah, what woebegone, drop-in-the-sharesad. market countenances they had!

Poor Ramsay MacDonald! There is not a back-bench Unionist. who does not make fun of him. He has talked so much about his "independence." a word which he must most cordially hate, that -a new meaning has been given to the word. The has been given to the word. The other night we had another glimpse of Labor party "independence." We are going to have two new judges of appeal. Mr. Martin, the native-of British Columbia, who represents St. Pancras, led the revolt of money-sav-ing Liberals against 612 000 a very ing Liberals against £12,000 a being spent on these two new judges. They said £10,000 a year was quite enough, and the Labor men, just to show they were not bossed by the government, voted with the revolters. They were defeated. They knew they would be defeated. The government then proposed that the sum should be £12,000. The revolters, staunch to their principles, intended to vole against this sum. The Unionists decided to vote against it, siso. A cold shiver ran thru the Labor ranks. Tories, Labor men, and Liberal revolt-ers combined might "down" the gov-ernment. The prospect was black tragedy. So the Labor men set their lips and voted for £12,000. Poor Mr. Ramsay MacDonald' How poined be Ramsey MacDonald! How pained he must be when Mr. Stanley Wilson

Tory organization," he was met with garia, Servia and Greece, in the death angry protests and requests to "with-

Henderson) who spoke first did not bring in the question of party." Loud cries of "Withdraw."

Mr. Masterman: "If you think, Mr. Speaker, that I am out of order, I will gladly withdraw; but I think it is largely a question of politics." The Speaker (sharply): "The right hon. gentleman made a most provoca-Austria.

tive statement, considering the very moderate speech addressed to him. It was out of order, and quite unneces-

sary. Opposition cheers. . There were renewed cries of "With-draw!" but Mr. Masterman said dog-gedly: "I was not asked to withdraw, and I shall not withdraw. If the speaker requests me to withdraw, I

will do so. The speaker said the expression was not unparliamentary, and there-fore he could not ask him to withdraw.

Denmark has passed a widow's

pension law. A union for housewives has been formed in London.

New York forbids the employment of women in factories, mercantile es-tablishments and mills within four weeks after she has given birth to a child.

"AND NOT SO LONG AGO THE HORSE WAS USED FOR WORK!"

Russia. Austria, then would go to an extreme to keep Servia and her sister nations from annexing more territory or spreading their influence in the church, with the czar as godfather. Balkans For a time peace reigned in the Bal-On the other hand Russia feels that kans.

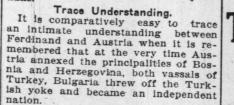

she must have a seaport free from ice during the entire year. By the Slavic control of the Balkan sea coast Russia would get what she wishes. These two ambitions, conflicting as they do, form the basis on which rests Austria's aid of Bulgaria, and Russia's assistance to the Greeks and The horrible massacre of Bulgaria

Christians by the Turks in 1853 gave Russia an opening to attack Turkey. England saw that the Russian control of Constantinople and the mouth of the Black Sea would give the Russians command over the sea route to India. With a Russian fleet in the Mediterranean and an army on the Indian frontier, it would have been but a short step for the czar to terminate British rule in India. As India was a/profit-able source of revenue, England join-ed the Turks in an effort to repulse the Russians. With the ald of France and England, the Turks finally triumphed, and the Treaty of Paris in 1856 brought

the Crimean War to a close. Bulgaria, the bone of contention over which the war began, was made principality under the suzeranity of the sultan. The diplomatic hand of Austria was seen when the Bulgarian as-sembly chose Ferdinand, a second-lieutenant in the Austrian army as

This appeared to be a death blow to Russia in the Balkans. An Aus-trian and a Roman Catholic sitting -By DeBeck. on the Bulgarian throne was a state

.....

Such Such a trend of events showed that a strong friend-ship, if not closer relations, ex-isted between Bulgaria and Austria. Russia, to further her interests in the Delivers turned to Service a Slevic trend of Russia, to further her interests in the Balkans, turned to Servia, a Slavic nation like herself. With the forma-tion of the Triple Alliance, composed of Germany, Italy and Austria, and the Triple Enterts in Thick. England of Germany, Italy and Austria, and the Triple Entente, in which England, France and Russia are joined, the keeping of peace in Europe was given into the hands of these six nations. When necessity joined the Serbs,

Improvement in Stock Market May be Merely for Effect ding up of the world's stock markets may be preliminary to peace, and in-tended to get a better basis for selling these new issues. Basic conditions in trade, under the new tariff, must receive careful con-sideration. Those who think the ad-

Not Yet Cleared Up—May Be Bad Money Squeeze This Fall. Hudson's weekly letter to Erickson Perkins & Co. is as follows: NEW YORK, July 25.—Stocks have been strong this week under the eadership of United States Steel. As a consequence, sentiment has improv-id and there has been some little im-provement in leading industries. New quantity. New England cotton mill owners know this and they have sounded a warning of the dangers to come under the lower tariff steel orders are a little larger. Cop-per metal, helped by the strike in the Lake Superior district, because tend-ing to restrict the output on a market

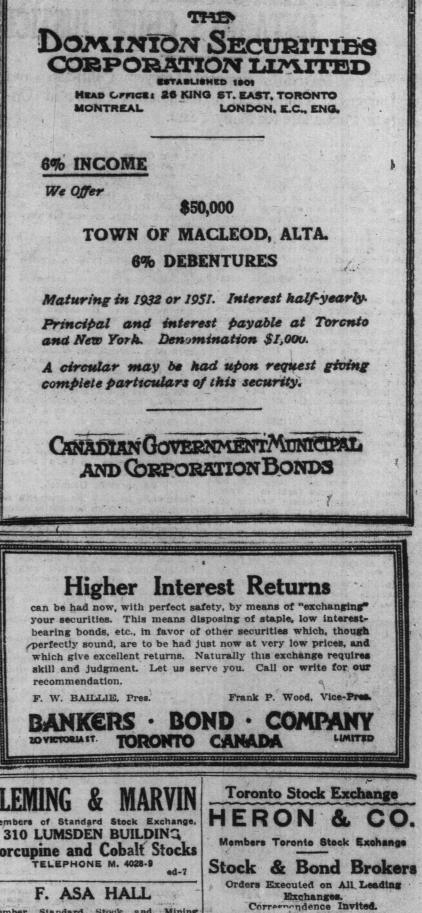

Ing to restrict the output on a market not over-stocked, has risen from % to % cent a pound, with quite heavy buying for foreign account. The movement in stocks had a short integest to help it along. Since it got under way there has been some little public buying, but we do not think it has been large. We will not predict how much further it will go. if any. We think the rise has been overdone, if we consider present conno position to stand a large demand for crop moving. Their surplus re-serves are low, and the western banks have low balances here, and the mon-ey which would ordinarily go west for handling the crops, has been sent to Europe, to tide over the big banks, which had the Balkan situation to cope with. That money (upwards of \$50,000,000) is unavailable. verdone, if we consider present con-itions. Does the future foreshadow any decided change for the better? This is worth considering, in trying to diagnose the situation. Our own view is that the future is much mixed; that e present rise in stocks is intended to get a batter level to sell on, and incidentally to help sell some new securities, like the New Haven issue of \$67,000,000 six p.c debentures. It remains to be seen how successful this will be.

The future of the bond market is a matter of no little concern. With New York City 4.1/2's selling at par,

The subjoined diagram taken from Moody's Magazine shows the distribution of the gross earnings of the railroads of the United States last year. It will be noted that labor took 44.17 cents of every dollar, the next largest portions going to interest on funded debt, and for materials, sup-plies, and miscellaneous expenses. Dividends called for one of the smaller fractions, amounting to less than five cents, being in fact little more than the amount paid out for taxes. The shaded portion of the circle shows the proportion of each dollar earned that went to operating expenses and taxes; it will be noted that 73.57 cents was eaten up in that way.

office of chief justice of Ontario. Sir William Meredith is a rare type in the public life of Canada. If in mentality he belongs to the twentieth century,

career at Gray's Inn, London, but a desire to make his fortune in the colonies seized him and in 1834 he had sailed with three cousins for Quebec. While the others remained in Lower Canada, he pressed on into the more thickly populated districts in Lower Canada, he pressed on into the more thickly populated districts of Upper Canada and took up his residence on a bush farm in West-minster Township, where shortly af-terwards he married the daughter of a neighboring settler.

to the office of clerk of the division court of Middlesex, a position which he held continuously until he lost his life in the Thanes disaster of 1881.

His Early. Life. Ralph, or "Bill" as he be-

public life of Canada. If in mentality he belongs to the twenticth century, in spirit he would be a fitting figure for the feudal period. He has that dominating bearing that seeks no favor by honeyed phrases but achieves its purpose by sheer word of com-mand. The eldest son of a remarkable family consisting of eight sons and four daughters. Sir William was born no a backwoods farm eight miles from London, Ontario, on March 31, 1840. His father, the son of a Dublin law-yer, had emigrated to Canada a few years previously. He had been des-tined for the bar and after a course at Trinity College, Dublin, had even spent two years in preparation for this career at Gray's Inn, London, but a desire to make his fortune in the colonies seized him and in 1834 he

Corporation Counsel

Meanwhile in 1888 Mr. Meredith re-moved his home from London to Toronterwards he married the daughter of a neighboring settler. Soon after the birth of his eldest son, John Meredith gave up the rough life of the farm and went to Port Stanley as deputy collector of cus-toms. From there he moved to Lon-don in the course of a year or two and accepted the post of market clerk. This was followed by his appointment

meant retirement from that position of prominence in the public eye which they previously occupied. This might well have been the case with the ex-leader of the Opposition, who was withdrawing from the centre of the legislative stage into the quiet clois-ters of Osgoude Half. It would have been the case with nine out of every ten appointess. But William Ralph Meredith was not an ordinary man and his change of role only emphasiz-ed this fact. As a judge he has been a much more important figure and has had his hand in a greater variety of affairs than ever he had as a member of the legislature. meant retirement from that position of the legislature.

There are two sides to Sir William's activities since 1894. He has been much on the front of the stage; he has also been working behind the scenes. The limelight has been focussed on him from gallery and wings in his lightning-change characterizations

chums of those early days as a some-what lanky youth, long of arm and

did physical appearance, well educat-did physical appearance, well educat-ed and admirably fitted to give a solid grounding to his student. Under his eye, William Meredith forged ahead At nineteen he obtained a scholarship minis did Thend and Tavorite lieutenant in the premiership, it is small wonder that there should be a bond of sym-pathy between the chief justice, as an ordinary citizen, and the premier, as a man in occasional need of advice, Theorem is no constant of advice, At nineteen he obtained a scholarship which entitled him to two years at the Law School at Toronto. In 1861 he was called to the bar, and return-

The was called to the bar, and return-ing to London, entered into partner-ship with his former mentor. That as a young lawyer in his boy-hood home, he was popular and es-teemed, is attested by the survivors of that period. Sir William Meredith may be Temporamentally distortation of the survivors of that period. of that period. Sir William Meredith may be temperamentally dictatorial today; in the sixties and seventies policy or the handling of a difficulty, business.

today; in the sixtles and seventies he was too intent on getting ahead to allow any natural bent in this direction to make itself felt. His popularity was rather that of the man who stooped to be friendly than of the one who mingled on terms of equality. Among the workingman of agreeable enough to those they meet, equality. Among the workingmen of the town he was greatly admired-his talents impressed them with awe: while among his compeers, his abili-ties were highly regarded.

Enters Politics. In the year 1872 the new law making it impossible for a man to sit concurrently in the Dominion House concurrently in the Dominion House of Commons and the provincial legis-lature, deprived the late Sir John Carling of his seat at Toronto. The constituency of London became va-effect a judicial autocrat. In private constituency of London became va-cant. William Mcredith, who had meanwhile succeeded Mr. Scatcherd as of the most delightful of conversationcity solfcitor, was selected as Conser- alists with a rich store of knowledge vative candidate; and in a bye-election and anecdote.

That strong personality which today distinguishes him on the bench was not slow in making itself felt in the seventies. He had not served six years in the legislature before he bad attained to the position of leader of the Opposition - In 1878 Sir M C of the Opposition. In 1878 Sir M. C. solitary habits. Cameron resigned the leadership to go on the bench; he was succeeded at ways in Berlin h Cameron resigned the leadership to go on the bench; he was succeeded at once by the representative for London. For sixteen years thereafter Mr. Mere-dith was the captain of the minority

came known among his youthful as-sociates, attended the old London Toronto, as senator, as chancellor and Professor Cockerell of Boulder Uni-Grammar School. at present than the three-mile twin tunnel which the Canadian Northern Rallway is boring thru the heart of Mount Royal here. The entire drift is 3½ miles in length, and at the rate the property of the programmer the provided in the the provided in the the street to the water-front, the freight sheat at the provided in the the provided at Haymarket the work is progressing, there should be a hole from end to end early next front, the freight sheds at Haymarket. square, and the bridges across the Back River, from the mainland. All of year, while cars should be able to operate thru it before the end of 1914. That is, of course, if no unexthis work will take many more long months' work-just how many no one The land that the railway purchased pected and unforeseen delays occur.

So far, the workers have been singu-larly fortunate, both in the charac-ter of the rock thru which the bore must be driven and in meeting with traffic of the city the railway hopes to make its profit. Mount Royal was once a flery vol-

cano-so the geological experts de-chare, and the rallway engineers have found abundant evidence to substantiate the experts' view. The moun-tain consists of a volcanic intrusion of igneous rocks, forced up thru a bed of Trenton limestone. Evidently there have been several stages of eruption. The two principal rocks encountered yet are Trenton limestone, which was found on the sides, and which was very hard, and crystalline, and good for tunnedling and Escoute which good for tunnelling, and Essexite, which was very hard and somewhat difficult to drill, but otherwise good for tunnelling.

Just what the centre of the moun tain is like has yet to be learned. Mr. S. P. Brown, the chief engineer in charge of the work, expects that much of the Breccia and some of the limestone walks in the heart of the mountain will require masonry lining, other portions. he thinks, will require only a mentral wall for sup-port, while for the Essexite no central wall will be required except for ven-tilation and safety. The tunne, will be 22 feet in height

This small heading is

there is very little escape of heat, a high temperature is reached and re-tained. When needed for use the insulating lid is removed from the top of the block, exposing a plane hot surface to record on the bore and one day a month ago they nalled a board with this inscription on a tree at the Dor-chester street heading: "Canadian Nor-thern tunnel, new record for the Am-erican continent, \$10 feet in 31 days." dith was the captain of the minority in the cold shades of opposition. An Able Leader. In many respects Sir William was an able leader, but even had he bett the most capable of men, it is doubt-ful if he could have made any more serious ibroads on the government majority than he did. His opponent

rather infamous, Sutherland clear-ances. Home rule would have pre-vented the depopulation of the High-lands. Further, only by the home rule will the people be brought back to the land. Take another instance of the evil effects of the union in disregarding the representa-tive principle. Lord Selborne wants Growing suspicious Wright wired home and found that his wife was still there. Then, convinced that the tive principle. Lord Selborne wants England to settle her own ecclesiassthi there. Then, convinced that the fake telegram sent him was a trap into which he might fall, and know-ing that he could not possibly board the Empress of Ireland, he walked into the central station and gave himtical affairs without interference from Scotland and Ireland. Had this It is said that Wright came to Mont-

simple plan been followed, there would have been no disruption in Scotland. There would have been no disruption but for the Patronage Act, which was thrust upon Scotland, not mere-ly against the wishes of the peo-ple, but in violation of the Act of real as "G. G. Jones," a name which the detectives found on the telegrams sent to Mrs. Wright in Ingersoll. ple, but in violation of the Act of Union.

Scotland's Grievance. In the words of Macaulay: "The British legislature violated the ar-A Splendid Swimmer ticles of union, and made a change in the constitution of the Church of Scotland. From that change has flowed almost all the dissent now ex-isting in Scotland. Year after year

Daughter of King George Enters Competition for Ladies' Chal-lenge Shield.
LONDON, July 26.—Among those taking part in the annual swimming and diving competitions at the Bath Club there was no keener competitor than Princess Mary, who has well been named the "open-air-Princess." For five years she has been a member of the Bath Club, to which the Prince of Wales also belongs.
ed almost all the disect the the transmission of the solution would have been rectified had parliament accept-ed what is known as the Claim of Right, which was rejected by the votes of the English members. Scot-land's grievance now is, not so much that she gets legislation thrust upon her against her will, as that she

of the Bath Club, to which the Prince of Wales also belongs. The race in which the young prin-cess took part was that for the Lad-ies' Challenge Shield. In this the competitors have to swim fifty yards, by breast stroke, and to pass in float-ing, diving and ornamental swimming. The princess went thru the various The princess went thru the various tests very well, tho she was not placed among the first three.

there is not a great work awaiting to the hand of the Scottish legis-lature? Who is there who can stand by and witness the squalor and mis-ery in their cities? Who is there with soul so dead that he could look with equanimity at the manhood of Rough Paris Music Hall Causes Scotland leaving their shores as at the present time? The power of a nation rests on the happiness of its citizens. What were they, if they had not be-hind them the moral fibre of a free and contented people?"

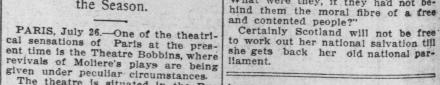

The theatre is situated in the Rue have gone slumming into this thede la Gaite, in one of the poorest and roughest sections of the city, and is nothing more than a music hall of the lowert cort. W The fly is a carrier of disease germs. It is only within the last few years that the crime has been brought home to him and fully proven. Not so long ago such diseases as yellow fever were regarded as unexplainable visitations, but connection was discovered between yellow fever and the mosquito, and also between malaria and another species of mosquito. The banishment of the mosquito has practically eliminated these diseases in regions where they were most deadly; and this was accomplished by schemes not merely to protect from its bite but to prevent the breeding of the mosquito.

Ten or twelve years ago medical experimenters began to be suspicious of the house fly, and to try to find out just what the fly might be guilty of doing. The whole danger of the fly hinges upon the fact that the majority of diseases are caused by minute living organisms which get into the various parts of the body and grow there. feeding upon the blood or tissues of the body, and thus causing what we call illness. The fly, because of its habits, comes into contact with the source of such germs and conveys them directly or indirectly to as.

If the fly were a huge beast like a tiger, and if we could see it pounce upon man, woman or child and carry them off to destruction, we would need no one to incite us to action against it, but the fly is apparently to insignificant a thing, and its connection with the

A and all the second and the second and the second and the

terrible death-roll for which it is responsible, is so unapparent from any direct evidence which we can see, that it is yet regarded by many as simply a disagreeable nuisance.

On the other hand, a great deal has been done to spread the knowledge of the crime of the fly, and "flyswatting" contests have been carried on in many cities, and other plans adopted to stamp out or lessen this pest. What should be kept in mind, most of all, however, with regard to the fly and its danger is that it is the carrier of disease germs, not the originator, and, therefore, that the abolition of disease depends in the first place upon-cleanliness. In the second place, a study of the habits of the fly will show that it breeds almost invariably in filth, refuse, manure and the like, so that the prime requisite in preventing the breeding of the fly is again-deanliness. If sanitary conditions were perfect in every respect, there would be no plac: for the fly to originate, there would be no disease germs for him to carry.

Persons fond of statistics like to tell us how many quatrillions of flies will be produced during the summer from one lone female fly who has wintered over. Fortunately there are many things which prevent this reproduction with such mathematical accuracy, but it is sufficient to remember that the fly does reproduce a numerous progeny and that it takes only a few days to grow from the egg to the fully developed fly. We have mentioned that the source of breeding is always in some medium which cleanliness and proper sanitation would remove. Let us see now what authoritative er-

A REAL PROPERTY PARTY

perimenters and observers have found out as to the actual crime of the fig:---

A STATE AND A STAT

- the that he all Important

たちきのちょう きしょうちょう うちま

and the state of the set

So active a part does the house fly play in the transmission of the typhoid germ and the spread of typhoil fever, that it is called by many the "typhoid fly." This tedious and dangerous disease is caused by germs or "bacilli" which lodge in the intestines causing ulcerations, and spreading poisons thru the body. This parasite gets into the human body thru our eating or drinking of something in which it is lodged—water, milk, oysters, raw vegetables, etc. The fly which feeds indiscriminately on all kinds of matter is frequently responsible for the transference of the germs to the food or drink of the person who becomes diseased. Careful observations of typhoid epidemics in connection with military operations prove conclusively the agency of flies in transmitting the disease.

Laboratory experiments conducted by many medi.al scientists have given abundant proof that the typhoid germ is carried on the feet of the flies. Again it must be remembered that the typhoid germ does not originate with the fly, and that, if we had perfect sanitation, there would be no dangerous disease to be transmitted. However, really perfect sanitation is as far off as the millennium, and in the meantime all other preventive measures, including fly-swatting, fly-traps, etc., should be used.

Typhoid, unfortunately, is not the only disease transmitted by the house fly. The dreaded cholera is another. An army surgeon, Major R. Macrae of India, from experiments during the cholera outbreak there. (1894), wrote his conclusions thus:—"The practical lessons the experiments teach is, that files should be looked upon in the light of poisonous agencies of the worst kind during cholera epidemics, as it is clear that if they find access to the poison they will carry and distribute it, and every possible means should be taken to prevent their getting into contact with either food or

drink of any kind."

Dysentery, infant diarrhoea, tuberculosis, anthran, ophthalmia, diptheria, smallpox, and many other diseases are now said to be transmitted by the fly. Just recently it has been shown by investigators that the much dreaded infantile paralysis is transmitted by the stable fly, which is common to all barnyards, and frequently intrudes the domains of his relative the housefly.

A great many methods for the destruction of the fly have been in use for some time, from window-screens to sticky fly paper, but what is of the most importance is the removal of possible breeding places, as well as the destruction of every fly that can be destroyed. The "swat-the-fly" campaign should begin when the first fly is coaxed from his hiding place by the warmth of the spring sun, and it should continue as long as there is a fly in sight. The campaign for cleanliness and improved sanitation should continue from year's end to year's end—should never let up until there is no place for the fly to breed and grow, and no contaminating refuse from which he can catry the hidden messengers of death.

Success of U.S. Parcel Post

EDITORIAL

Parcel post has been an amazing success in the United States. Coming into effect last New Year's day the first six months service ended with June, and that brief period resulted in the establishment of a new and vast transportation system with shipments on a scale estimated to reach to more than 600,000,000 packages per annum. From information derived from many and various sources it is apparent that the parcel post has appealed to every class thruout the length and breadth of the United States. Hardly a single section of the country however remote and isolated but has made a quick response to the opportunity for every and show a parcel to present the section of the country the opportunity for easy and cheap parcel transportation. Public interest is displayed even more vividly in the numerons for improved service recived by the postoffice department. In the efforts made by the department to meet them, may be traced as was only remarked the present of a direction a human traced, as was aptly remarked, the process of adjusting a huge to inform passengers of the and valuable machine to the needs of the people.

In an interview with a representative of The New York Sunday Times, Mr. Albert S. Burleson, the United States post-Canadia master general, said that "the next step forward in the developmaster general, said that "the next step forward in the develop-ment of the parcel post is likely to be a regulation increasing the weight limit on parcels shipped under the present rates." As the government business of carrying parcels is developed," he proceeded, "I prophesy—Yes, I have no doubt that the government will finally handle all of the parcels shipped in this country. There can be no competition with the government in an enterprise of this sort." Mr. Burleson declared that the government were trying to do two things. One of them is to government were trying to do two things. One of them is to develop the efficiency of the service, and the other purpose is to serve all of the people without distinction. It has already started on this last, by three new regulations that came into effect on the first of July, and are intended to overcome complaints. One of these permitted the use of ordinary stamps, another cheapened and enlarged the provisions for insurance, and the third established a cash on delivery system by which the government collects the price and remits it to the consignor of the shipment on an additional 10 cent stamp being offered.

In January, the first month of operation, the United States department dealt with 38,730,826 parcels. In February the number increased to 47,994,318, or by 23.91 per cent. The growth during March exceeded the February ratio, the parcels handled reaching 61,574,778. April showed a small reduction to 59,546,678, but at the postoffice business usually falls off at the end of the sphrg buying season, the shipments by parcel post have gone right on with very little reduction. In a recent communication to the chairman of the com-mittee and to the postmaster general, Mr. Lewis "Father of the Parcel Post " takes for his text the reduction in the con-Parcel Post," takes for his text the reduction in the cost of living, by making transportation articulate between the producer and the consumer. He points out that there has hitherto been no transportation for retail, and equally so are the dealings of the housekeeper. He strongly urges an increase in the weight limit and a reduction in the pound rate.

A Savage Rejoinder

To cross the Atlantic in 72 nours in a water plane is something which is said now to be a possibility clearly in sight. The water plane is a flying machine built so that the machine

may come down to the water and float, and if it is driven down even by exigency and not by choice it will not sink. The water plane when per-fected will be a safer machine,

Canadian roads might follow. Passengers marooned for hours in hay fields in this country invariably get the reply "In a few minutes," when they ask "When are we going to move?" and the minutes very often lengthen into hours.

Better Than Punishment

That a school teacher's correction of schoolboy errors is in any sense punishment is an exploded notion in these days. The boy is not to be punished. To punish him is seen to make him dislike his school tasks all the more. The point is to rouse the dormant energies so that the child will delight in ac-

A Boston teacher compelled a boy who had made a mistake to step up and shake hands with her. The fun of the thing so emphasized the better way in memory that the slip was not made again.

William J. Bryan

Mr. Bryan as Secretary of State is under fire. We are told that he is stingy, greedy, inattentive to business and generally unfit. The New York papers have been assailing him and even some of the London papers have taken him to task for serving grape juice instead of champagne.

Pipe Dream

Many of the dreams of modern science have come true, and the world has become accustomed to marvels in the way of scientific accomplishment. But the most daring dream of all-sinking a shaft to the centre of the earth and otherwise interferes with his -contemplates a thing so stupendous as to pleasure in life. Another one tells make all past achievements seem insignificant. me that Tennyson is rot, ice cream and cake, and sentimental twaddle.

dry in the first two books of "Para-

who is regarded as dry stuff.

Death is without emergencies here but life is perpetual emergencies here."

In last Sunday's issue we discussed some of the arguments in favor of retaining the present appeals in civil cases to the judicial committee of the Imperial Privy Council. We ventured to say that some of these arguments lacked substantial foundation, and also to present some of the arguments relied upon by those who would cut off the right of appeal. Our editorial has provoked a somewhat spirited protest, if not rebuke, from Mr. John V. Savage of The British Empire Trade Journal. We take pleasure in reproducing his letter, which reads as follows:

Editor Sunday World:

The writer of the article on page 2 of your current issue, headed "The Case For and Against the Privy Council" is either a very ignorant man or else he pretends to be. Take his remarks as to the first of the two arguments. The litigant who carries his case to the Supreme Court takes it to the King, the King is the constitution. Does the writer of the article expect the litigant to go to a man sitting on a stool? Re his remarks as to the English judges. All the world knows they are immaculate, and not to be bought at any price. Are the Canadian judges on such a pedestal? His remarks re the English Parliament are beneath contempt. His instance of a man being run over and crippled for life, etc., etc., are childish to the extreme.

John V. Savage. 135 Palmerston avenue, Toronto, July 20th.

As to the first point made by Mr. Savage, we are glad to see that he concurs in our opinion that the subject carries his appeal to the foot of the throne just as much by an appeal to the Supreme Court at Ottawn as by an appeal to the Drive Council IS THIS WHAT YOU ARE DOING FOR YOUR CITY? different types of the same race. But what are variety of peal to the Privy Council would not be to impair any right the subject now has to have his case judged by the King. Every judge of every court in the British Empire is a representative of His Majesty.) As the Chief Justice said to the prince:

I then did use the person of your father;

- The image of his power lay then in me:
- ,And, in the administration of his law,
- Whiles I was busy for the commonwealth.

The Sunday World having journeyed so far in amity with Mr. Savage will not part company with him upon any dispute respecting the English Judges. What we said was that if it were a reproach to Canadian judges that they generally decided cases between municipalities and franchise-holding corporations in favor of the municipalities, it must not be forgotten that their lordships of the Privy Council had as uniformly decided against the municipalities and in favor of the corporations. No reflection was intended upon either the Canadian or the British judges, but we are not prepared to admit if challenged to say anything on the subject that the judges of any other country are "immacu late" and Canadian judges corrupt. We think it quite likely that people in private life and in public life are just as virtuous in Canada as they are in England, and we doubt if they are "immaculate" in either country.

Mr. Savage thinks it is ridiculous for a man whose legs have been cut off in a railway accident to become peevish because he has to wait a few years more for his money. We had one case in this province where the plaintiff, recovering a verdict of \$7000, asked to have it reduced by one-half so as to prevent the company wearing him out by an appeal to the Privy Council.

It strikes us in this way. If Canadians have not brains enough to decide their own lawsuits, let us import British lawyers to decide them for us, but let them be Canadian judges holding court in Canada.

When Mr. Bryan at the age of thirty-six

was nominated for president of the United States, he was at once described by his opponents as a frothy young orator, who had no other gift but the gift of gab. But as time went on Mr. Bryan was found to wear well, and it became impossible to dismiss him as a garrulous boy. In 1904 he came out for goverment ownership of railways, and then we were told he was insane. Of course like nearly every man who favors anything progressive, he is denounced as an anarchist.

But after seventeen years Mr. Bryan enjoys the confidence of the American people, and is regarded as a man of stainless character and great intellectual gifts. The effort now is to show that he is not "practical."

We think Mr. Bryan made a mistake in leaving Washington for the lecture tour under the circumstances, and at the time he did, but he may console himself with the reflection that he would have been denounced for something else, if he had not made this particular mistake. However, the Colonel is accustomed to hard blows.

Ho !

forces would result in immediate destruction of man, nor Isabella Valancey Crawthe apparatus used. But no man can say what advances will be made in that science in a single extracts or in fugitive contri generation, or what agencies may be discovered nor were they familiar with Parker, for neutralizing the effect of the high temperatures which are believed to exist in the core of the earth. In fact, it is more than possible that within 200 years, or even half that time, a trip to the centre of the earth may be simply a matter of time cards and train rules, with no more danger than now exists in surface transportation.

Science and the Empire

In a recent lecture, Sir C. P. Lucas dealt in dise Lost" as any bot my young an exceedingly interesting and sugestive way friends could. But I was willing to with the influence of science upon empire. Nat- and not in John Milton, and I stuck urally he had especially in mind the British Empire, because alone in the world today its pleasure in it, and when I had ended pleasure in it, and when I had ended the north and the south are mine, and the north and the south are mine, and the north and the south are mine, and the north and the south are mine. lem of how to remain united while widely it all over again, a book a day, so that separated by sea. Distance, he said, implied I might understand it that second time, I read

This is not a mere theory, because it is every year becoming increasingly evident that in each dominion an individual Newfoundland, are not only conscious of distinct nationality, but their peculiar climatic of their inhabitants. Thus, then, the problem of empire is how to ously increased in proportion to the size of the whole.

Charles was really the product ing influence to distance and diversity. Science can not uncreation of large units. Science and religion are, the two most underrated factors in the Empire today, ...

an's national ideals are uni versal, and just as suitable to Britain ford, nor Archibald Lampman, nor or Canada as to the United States. William Wilfred Campbell, except in They are the ideals of whoever adopts "Land, who is, indeed, rather looked down up-

I am larger, better than I thought I did not know I held so much good

Towards the close of his life in 1891 he wrote the "L of G's Purport." when, as he says, "I end it here in sickness. poverty and old age." yet nover qualls. "I sing of life yet mind me well of death." he says cheerfully, tho it "Draws sometimes close to me, as face to face." And the purpose of his "haughty" song is to "celebrate the "dear reader" finally, "to end all gossmoke, one of my young friends has sip and egotism." and offers "one of his own cherished thoughts for a parting word." and this is what he says: "While I cannot understand it or argue it out. I fully believe in a clus and purpose in Nature, entire and several; and that invisible spiritual results. just as real and definite as the visible, eventuate all concrete life and all materialism, thru Time The book (Leaves of Grass), ought to emanate buoyancy and gladness, too, for it has grown originally commenced. I should be willing to jaunt the whole life over again, with all its worldly failures and serious detriments, deficiencies and denials, to get the happiness of retraveling that part of the road." It has been noted that each of the books of Dante's great poem ends with the word "stars." We, city dwellers in Canada, do not live enough with the stars. Walt Whitman never forgot. them, and in "Specimen Days" he tells us that the great questions are to be considered by their light. "In silence of a fine night, such questions are answered to the soul the best answers that can be given. With me, too, when depressed by some specially sad event. or tearing problem. I wait till I go out ider the stars for the last voiceles

Motorcycle Gossip Conducted By A. N. B.

tember.

Canadian Motorcycle Association Tour.

The Canadian Motorcycle Association endurance run has been cancelled, and in its place a tour will be held to Rochester, on Aug. 2. 3 and 4. The Toronto riders so thoroly enjoyed themselves on their recent trip to the American town that they have persuaded the C. M. A. executive to change the original plan C. M. A. riders from all over Ontario will meet in Niagara Falls on Saturday, Aug. 2. at the Gen-esce Hotel, which will be the official headquarters in that town. The To-ronto riders will probably take the boat to the Falls, and ride to Buffalo, while riders from London, Guelph, Galt Woodstock. Paris and other Ontario towns will journey fo Hamilton and thence to Buffalo. On Sunday, Aug. 3. the entire contingent will start for Rochester, and will be accompanied by the Buffalo Club boys. On arriving at Rochester the Rochester Hotel, which is directly opposite the Rochester Mo-torcycle Club headquarters, will be the stopping place. During the day the boys will take trips to all the beautiful points in the neighborhood, and return to Totonto on Monday. Civic Holiday, via Buffalo. It is expected that riders from all the district surrounding Ro-chester will be on hand to welcome the boys and help them to enjoy them-selves. original plan C. M. A. riders from

T. M. C. Races At Exhibition. Fine weather and a splendid card of events, with a full entry in each event, was the rule on Saturday last at Exhibition Park, when the Toronto Motorcycle Club held their second race meet of this scason. While the crowd was not as much

While the crowd was not as great as at the previous meet, counter-at-tractions, and the fact that many of the speed fans are on their vacations. accounted for lack of interest. From a accounted for lack of interest. From a racing standpoint, however, the meet was all that could be desired. The boys all seemed anxicus to get some of the prize money and as many as fifteen turned out for some of the events. This kind of enthusiasm is all that is re-quired to make racing a success, and assure the permanent advancement of the club. the club.

Side Lights. McCrossen created a sensation on the turns, and would make a good match for Har ld Cole,

Tommy Smith was more successful on his Excelsior than on the old Doug-

Harold Pratt is some rider, and hould collect some change before the season closes.

A Sidecar Pionic. Mr. W. Greenwood, of the Tangent Cycle Co., and Triumph agent for Canada, is the "daddy of them all," when it comes to motorcycling in Canada. Mr. Greenwood proposes run-ning a sidecar pionic today (Sunday, July 27) to Holland Landing, up by the big anchor. The invitation is for Triumph riders only, and the occu-pant of the sidecar must be of the fair sex, or the driver will not be welcome. Ladies will provide eat-ables, and an early start will be made from the Harbord streetbridge. If the weather should not be suitable made from the Harbord street bridge. If the weather should not be suitable the picnic will be postponed for a week. The club will hold a tour to Hamilton today, and the annual en-durance run will be held on the three days, including Labor Day, which is the first Monday in Sep-tember.

The following signed challenges have been received by the Motorcycle Editor, Sunday World:
I hereby challenge W. Duff or Bob Scott to race for the amateur championship of Canada, for either five miles or ten miles.—Fred Miles.
I hereby challenge W. Duff or Bob Scott to a five or ten-mile \$0-50 C. I. amateur stock race, to be run off at the T. M. C. race meet on Aug. 20.—Hugh McCrosson.
Vious that the proper field, and, in fact, the natural one for the cycle-car, is between the motorcycle and the automobile; this field is somewhat narrow, for it is possible to purchase the best in motorcycles for around \$250, while for \$475 a really respectable and reliable full grown automobile can be obtained; therefore first to a five or ten-mile \$0-50 C. I. amateur stock race, to be run off at the T. M. C. race meet on Aug. 20.—Hugh McCrosson.

Aug. 20.—Hugh McCrosson. I hereby challenge E. McIntosh to a race of 25 miles, to be run off at the Toronto Motorcycle Club's meet. —Frank Moritz. Dr. J. P. Thornley, chairman of the competition committees of the F. A. M., will have to look to his laurels, if he wishes to hold his present posi-tion. At the recent state convention in Elmira, N. Y., a resolution for his removal from office resulted in a vote of 50 for and 30 against, but as all resolutions require a two-thick by two votes. Dr. Thornley, while having a large number of friends, seems to have made some enemies in the F. A. M.

of existing road conditions. England

The Cyclecar

The future of the cyclecar in this

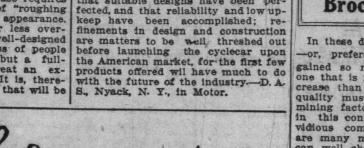

country is certainly an assured fact, but with possible limitations, as com-

pared with England, simply because

portant industry, but the difficulties to be overcome are many, prominent among which are first cost and de-sign. The natural requirements call for light, but very strong construction, in order that small horepower may be used, comfortable but compact bod-ies, and, last, a complete absence of complicated parts. As regards the price, a more serious problem confronts us, for it is ob-vious that the proper field, and, in fact, the natural one for the cycle-car is between the motorwole and the

Independent Tires Double Tire Service

Positively neither skid or side slip, wear longer, give added service in minimizing tire troubles, worries and expense to the lowest possible degree. Note carefully these 'exclusive Independent Tire features :

Sturdy, deep centre-tread of high-grade Para rubber; firmly grips the most slippery road or pavement. Its right principle of construction eliminates all danger of side-skidding.

Unusually thick surface tread-as much genuine rubber in the surface of tire as in the centre tread above it-this considerably multiplies the life of Independent Tires.

Cushion of thick, highest quality red rubber between fabric and body of tire-gives additional springiness and resiliency, lengthening life of tire and car. Toughness and heat resistance of this red rubber cushion prevents the separation between fabric and the rubber body of tire which shortens life of ordinary tires. We are the originators and exclusive users of this red rubber cushion, which adds at least 25 per cent. to the life of the Independent Tire. , Six layers of best Sea Island cotton duck, calendered (rubber filled

and pressed together), by largest and heaviest machine in Canada, re-sulting in lifelong grip between rubber body of tire and duck fabric. Core composed of heavy woven fabric, rubber filled and calendered,

giving vicelike grip on rim and outwearing the common rubber core.

Independent Red Rubber INNER TUBES Guaranteed for two years against heat and deterioration. Tougher fabric, yet more resilient; minimize punctures, blowouts and general tube trouble and expense Ask for PROOF.

The Independent Tire Co. of Toronto, Limited Phone M. 2593. Branch 32I University Street, Montreal

In these days, when the automobile or, preferably, the motor car-has sained so remarkable a vogue, and one that is far more likely to in-crease than diminish, the matter of quality must become the all-deter-mining factor. It is not necessary, in this connection, to enter into in-vidious comparisons, because there are many manufacturers whose cars can well challenge and invite the strongest competition. Each make has its own claims to public approval, and makes its own appeal. Among them, however, some of the newer

these are the three outstanding features of MICHELIN Red Rubber Tubes and of the three Quality-UNAPPROACHABLE QUALITY comes first. as long as other makes. Tester

pansion in its power of output. This year the capacity of the works has been tripled, and yet there is no cessation of the demand. The cars built include various types, but the firm's specialty is the five and seven. built include various types, but the firm's specialty is the five and seven-passenger car of from 30 to 40 horse power. Taxicabs Limited, 60 Jarvis street, line up a fleet of these cars, which have given entire satisfaction, a result highly creditable to T. J. Storey, the general manager, and equally acceptable to John A. Thomp-son, 258 Beatrice street, the Toronto agents.

agents. A photograph of Taxicabs Limited fleet of Brockville Atlas Cars appear-ed in the illustrated section of last week's Sunday World.

Tourist: "And how many children have you, Mr. Green?" Farmer Green (doubtfully): "Well, now, I dunno exactly. There's Bob, an' Jack, an' Alice-wife, how many chil-dren are there?" Mrs. Green: "Seven; five boys and two girls."

Tourist: "A fine family and a fine farm, Mr. Green. You've a large stock, I presume?"

I presume?" Farmer: "Aye. I've a hundred and seventy-three head of cattle. eight horses, seven hundred and eighty-one sheep, an' twenty-seven pigs. Then thero's three hundred and fifteen geese. eighteen turkeys. an' just two hundred and fifty-nine fowls."

A bishop was one day addressing a Sunday school, when he said. In a most impressive way:

its own claims to public approval, and makes its own appeal. Among them, however, some of the newer companies command special reason for attention, on account of their strik-ing progress. As an individual example, the Brockville Atlas Autos have a really remarkable record. For the last two years the factory has been work-ing to the limits of its capacity, and no finished car has remained unsold, altho there has been continuous ex-Quality, Durability, and Economy-The Michelia Inner Tube is universally celebrated for its quality, and lasts three times N B .- Remember it is essential not only to know the best tube, but also to know how to preserve it when in use. The secret is to keep it always well inflated, and frequently verify the pressure with a Michelin Pressure

The close finish between Barnes and Morrison brought the stand to its feet and "Wilf" will have to go faster next time.

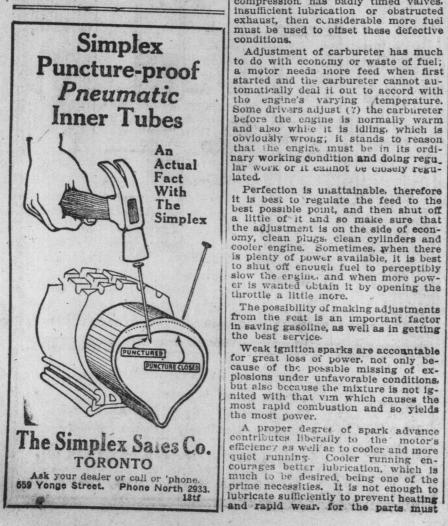

W. J. Porter gets away great with his smooth running Matchless.

Its looked like old times to see Barnes and Newport in harness again

Walt Andrews wants a new pace-maker.

A novelty which promises to become popular was seen at the Exhibition on Saturday, in the form of an adjustable Saturday, in the form of an adjustable pulley for belt-driven machines. This is known as the Phillipson Pulley, which may be attached to any belt-driven machine using a v-belt. By simply placing the foot on the pulley boss the rider may reduce his gear to any desired ratio in an instant, and altho the belt, naturally, goes very slack the pulley still grips perfectly, and does not allow the least slip. While this appliance is not yet on the mar-ket in Canada, it has become yery popular in England, and it will cer-tainly be a wonderful help in side-car work in this hilly country of ours.

T. M. C. Meeting. Fifty-five members' turned out at the regular-meeting of the T. M. C. on Wednesday night, despite the pour-ing rain. It was decided to postpone the race meet on Aug. 2 to Sept 20, as he Scottiah pionic takes place on as he Scottish picnic takes place on Monday, Aug. 4, and the club will sup-ply riders for that date.

AN AUSTRO-DAIMLER ELECTRO-GASOLINE FIRE ENGINE NOW IN SERVICE IN VIENNA.

Sometimes there is waste of gasoline rom leakage, as evaporation will keep easiest. from leakage, as evaporation will keep pace with small leaks so that they Of course, low gear work is wasteful

Of course, low gear work is wasteful of fuel, and it is equally true that high speed is also wasteful. largely on ac-count of air resistance increasing ra-pidly with speed; at 10 miles per hour the wind pressure is only 4-10 pound per square foot. at twice that speed it is four times greater, and at 40 miles per hour it reaches 6 4-10 pounds per square foot. easily pass unnoticed, especially if so located that the gasoline runs down a pipe for a distance, thus exposing more surface to evaporation. Mixing cylinder oil or kerosene with the gasoline renders small leaks visible, as

many an experimenter has discovered. square foot Coasting should be practiced when-Prominent among the causes of large ever there is an opportunity for it, this offers the only way to compensate for part of the extra fuel burned in gasoline consumption is a poor condi-tion of the motor; if it has not good compression has badly timed valves, insufficient lubrication or obstructed exhaust, then considerable more fuel must be used to offset these defective conditions Avoid the use of brakes whenever possible; power lost by their use can never be recovered. Do not make avoidable stops, it takes power to start again

Adjustment of carbureter has much again. to do with economy or waste of fuel; a motor needs more feed when first to do with economy or waste of fuel; a motor needs more feed when first started and the carbureter cannot au-tomatically deal it out to accord with the engine's varying temperature

Cost of Cars

Whether or not the cost of motor Perfection is unattainable, therefore it is best to regulate the feed to the best possible point, and then shut off a little of it and so make sure that the adjustment is on the side of econ-omy, clean plugs, clean cylinders and cooler engine Sometimes when there Radford, vice-president and general cooler engine. Sometimes, when there is plenty of power available, it is best to shut off enough fuel to perceptibly slow the engine, and when more pow-er is wanted obtain it by opening the throttle a little more

"The average person intending to buy a car has absolutely no idea of the real cost of building a motor car," says Mr. Radford. "He thinks that the castings and other parts are outlefty made and ther parts are throttle a little more. The possibility of making adjustments

from the seat is an important factor in saving gasoline, as well as in getting quickly made, and that materials are inexpensive. Tell the average per-

Weak ignition sparks are accountable son that a certain casting, of alumi-num, would cost about \$35 or \$40 for great loss of power, not only be-cause of the possible missing of ex-plosions under unfavorable conditions, to the manufacturer, and he but also because the mixture is not ig-nited with that vim which causes the be astonished. One who is not familiar with the construction of an auto-mobile does not begin to realize the most rapid combustion and so yields the most power. immense amount of work necessary in

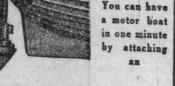

A proper degree of spark advance contributes liberally to the motor's efficiency as well as to cooler and more quiet running. Cooler running en-courages better lubrication, which is much to be desired, being one of the prime necessities. It is not enough to lubricate sufficiently to prevent heating and rapid wear. for the parts must

real cost is, and then, when he finds out, he believes he is being charged extortionately, when in fact he usual-ly gets extras at just about what they cost the mean fact me cost the manufacturer.

"I find that a surprisingly large number of Cartercar owners are peo-ple who have previously used other cars, but have changed to this car because of the gearless transmission. This form of transmission eliminates the buying of new parts, because there is nothing about it to cause trouble. I believe this is only a step, how-ever, to the simplicity that will be obtained in motor car construction during the next few years."

By Fred Hitchin-Kemp.

PEEP BEHIND THE SCENES

The Stage in Canada

scenes! Elderly patrons perhaps cher-ish in silence a vague knowledge that life of stage folk is full of evil and fraught with many snares and pitfalis for the young stage-struck youth and maiden. While to the healthy light-hearted young man or girl the life of the actor and actress appears full of ioyous interest, even if one deducts for for actor and actors and actors one deducts for folk as vagabonds, demoralizers! And folk as vagabonds, demoralizers! And who can wonder when one takes into

tits drawbacks. To the writer who first went to a theatrical show at the age of six and has seen behind the scenes for a quarter of a century, Canada's stage at present affords an interesting study as compared with theatrical conditions in the old country and in Europe-America.

America. His interest in comedy and in drama may be somewhat due to a remote kinship to two of the world's greatest bus become more refined, more moral and more highly educated. Popular still is the comedian, but the comedian ploneers on the stage, namely Will Kemp, the comedian and dancer of Will must not get so low in his suggestions today as he could ten years ago and

Kemp, the comedian and dancer of Will Shakspere's original companies, and Maria Siddons the great English tra-gedian, whose experiences were widely apart both as to period and reception. One must realize that Shakspere employed no actresses. (How few people know that!) Youth took the female parts on the stage in the time of Elizabeth. Before Henry the VIII. the stage is the preaching stand of the defied the Pope (an event due to the lower cravings of the man, rather than devil. to his spiritual aspirations), the church provided drama for the people, pointing morals by means of the plays, and actors then as well as all lawyers were of the church and its religious

devil. The people of Canada as a mass are professing Christians, and to such the devil's sermons are undesirable, and the poisonous shafts of the devil must to the minds of the moralists, be shielded off from man, woman and child. Yet while fully agreeing with this maxim so susceptical is the body (call it the heart if you like), that des-pite the reasoning of the head the feet orders. The churchmen, that is to say the Christians of England, produced bibli-cal scenes and mystery plays which were written and designed to teach the scriptures and the morals derived there-from. It was of course frequently necessary to introduce the devil, and in every play Satan was morated by pite the reasoning of the head, the feet are drawn towards that stage giving a performance bordering on the sensual or touching lightly on sins of commission, and dangerous theories as to problems of sex. in every play Satan was worsted by the Almighty—or Christ, and the people showed their interest and ap-preciation of that over-throw-of-evil

The producer and presenter of a stage play naturally works for financial profit. He must draw capacity houses.

One believes he can do his best by the roduction of sensational drama; anwith choruses of fine young women, while a third tries to pack his house by advertising "good clean bills." Does the heat work of the best work of the bills." the last variety get the best patron-age? If not, it is the taste of the people that is at fault, and in Canada, where climatic conditions and prosperity make for full-blooded youth, youth is more prone to succumb to temptation and is consequently in need of restraint. His (or her) parents are unable to curb the youthful indiscretions, hence the necessity for some official censor of

stage productions and picture shows. Origin of the Censor. Originally the object of appointing censor was not at all to guard public morals. It was a royal appointment, to prevent the teaching of anti-royal politics by means of the stage when politics by means of the stage when there was strong contention as to the rightful heir to the throne. In time the duty was entrusted to a man who had some knowledge of dramatic work, the appointment being still in the gift

of the lord chamberlain, as the King's

deputy. Of late years the lot of the

official censor has not been an envi-

able one. He has very little to do

with the political bias of plays, altho

now and again a play is refused pro-

the world. This is due to the strong hold religion has obtained in Can-ada, and to the fact that a very large proportion of actors in Canada do not drink intoxicants. As compared with actors in the old country, the dif-ference is strongly marked; and this is a great relief to producers and the-atre managers, who are frequently kept in a state of extreme anxiety as to the ability of their casts to get thru with their part after "a drop too many."

The one great drawback here is that the towns are so modern and the population so small that Can-adians cannot carry a large company or much scenery, as the possible patronage could not, at its best, bring in sufficient money to cover the cost. Many ardent and clever Canadians have tried to give a really fine show in the smaller towns and quickly in the smaller towns, and quickly lost their capital in the patriotic attempt; thus, to a very great ex-tent, American companies have captured the field, and tour the larger cities and towns, leaving alone the many smaller ones, whose populace would welcome and support a big show. There is money to be made in these little townships by a wellknown and well-billed show, but the people have so often experienced "fake shows," that they are very shy of paying down their money until they have ascertained how many have arrived with the show? How many trunks have been hauled to the opera house or the town hall? and how much scenery was brought from the railway depot.

One example of this sort of road show will suffice. In February last a handsome actor who had written and published a high-class drama in blank verse, which was well reviewed in the United States and Europe, got together in Toronto a company of players, and for some weeks daily rehearsed a western drama, filled with good situations and lightened by many humorous parts. Each of the 14 in the cest contributed to the Generic the cast contributed to the financial risks before starting, and town, halls were secured for certain dates, with-in a radius of 30 miles. The towns were billed days ahead of the show, posters representing the scenes enacted and others giving names of the cast were well exhibited in stores and in busy centres. Handbills were dis-tributed from house to house (by the tributed from house to house (by the rather unwilling artists) on the day of the show, and on the first pro-duction the people flocked to the hall, ready to take tickets, many so glad to get an entertainment at all that it mattered not if it was a movie show or vaudeville, drama or com-edy. The night was a flerce one, and the artists who had carried their grips for nearly two miles thru the

men struggled over rutty roads, while the lady and child, each bearing a grip, tried to get forward bravely. Suddenly the child's the artists who had carried their grips for nearly two miles thru the deep snow were still merry and full of ardor. The stage was a very polor one, the local scenery the most de-lapidated, and amateur one could well meet with, and no scenery, save a bar, was carried by the company. Yet the applause was great, and the dol-lars taken at the door covered the fares and one night's accommodation for the party at the best hotel in the place, and the enthusiastic artfor the party at the best hotel in the place, and the enthusiastic artspect of no further trains for hours. No refreshments were obtainable, and the company spent the night between ists did not grumble at having to be called at 5 a. m. to catch their train,

called at 5 a. m. to catch their train, and, after a long walk with their grips, were still going strong when they reached Toronto at about 8 a. m., having had no breakfast and a. m. having had no breakfast and but a meagre supper 15 hours earlier. The grip carrying was joked about as a "hunger march." But, when this sort of excursion had been repeated

Extra Duties. It was the extra duty of one of ried out in a silent and rapid mansort of excursion had been repeated three or four times, and no pay had reached the players, their sole re-a black stocking mask. This proved tain drops on a realistic representaward being one scanty meal a time, very attractive, especially to school tion of, say, a mountain

days they learned and rehearsed two or three plays. Three weeks later the curtain was run down, and there were no funds to pay the salaries. This is the sort of adventure that an actor and actress must be prepared for, particularly in Canada, where the risks are greater, since the population is less than elsewhere.

BROS.

PAUL

. On the other hand, the Marks Bros.' (gloriously billed as the Seven Kings of Repertoire), have proved that by hard labor, persistent with some scenery and talent, a show can be ran in Ontarie, even taking in small towns, with good profit

and his son's love affairs, coupled with the coming to this country of an aunt whom neither have ever seen. By some mishap the real aunt is delayed, and the boy's two chums inveigle the janitor of their college to don her clothes and carry out the deception young man, not knowing of this, pleads with the college widow to impersonate his aunt for the benefit of deluding his father, and at the same time helping him with his love affairs. It so hap pens that the young man's sweetheart is the daughter of the Irish janitor and his father will not listen to his marriage to her, so as the first act pro gresses, two aunts are introduced to the father. The mix-up occasioned by this deception gives opportunity for much splendid comedy, which princi-pally enlists Mr. Abe Reynolds and Mr. Wilbur Cox. Toward the close of the first act the real aunt appears on the scene, and to prove her identity she agrees to take the entire party to During the action of Act Two the janitor discloses his disguise and matters are agreeably settled, and the Hebrew's son marries the janitor's daughter. This all takes place aboard the good ship "Jollytania," bound for Paris. Miss Dolly Morrissey portrays the College Widow, while Miss Alma Bauer impersonates the French aunt; Miss Leah Henry, the sweetheart, while Walter Johnson is the dutiful son; Mr. LeRoy Pruette and Mr. Arthur Henry are the mischievous college Several specialties are introduced in both acts by Beatrice, who won great fame last season as the rag-time violinist, in some "rah-rah" numbers, and Pruette & Henry, who will dance themselves into popularity. Some twenty graceful golden-haired college girls will be seen in fetching gowns for which Max Spiegel's attractions are noted. The opening date

entitled him to lodgings on the floor of the house. Among his top floor of the house. Among his belongings the proprietor noticed a coil of rope. Upon being asked what the rope was for, the man replied: "That's a fire-escape. I always carry it with me, and in case of fire I let myself down from the window." "Yes." replied the landlord, strok-

"RAG TIME VIOLINIST." WITH THE "COLLEGE BEATRICE, THE GIRLS," GAYETY THEATRE, OPENING SATURDAY, AUG 2.

Will Kemp's Comedy.

London

by good, in loud peals of laughter at An Irish lecturer, expatiating on the the discomforture of the king of darknature of man, remarked that one point ness. So well applauded was this class of distinction between human beings of scene that as an attraction it beand lower animals consisted in man's came more and more frequently. capacity for progress. troduced, and in course of time the

man playing the diabolic part became the comedian and enjoyed popularity "Man," exclaimed the lecturer, "is a progressive being; other creatures are stationary. Take, for example, the which exceeded that enjoyed by the impersonators of saints and virtues. ass. Always and everywhere it is the same creature. You never have seen, Thus when the layman took the place and never will see, a more perfect ass of the clergy on the stage he discarded saints and virtues, commenced to teach than you see at the present moment."

history and romantic legend, with dis-A jolly group of traveling men had just got comfortably settled in the regard to religious views, but introducing where possible the comedian, hotel when another arrived. who now gradually became vicious in-"Mighty glad to see you fellows." he exclaimed, enthusiastically, shaking hands all round. deed and secured his applause for his low comedy--his sympathy with lust

and drink,-his mahifest love for wo-"Sorry we can't say so much for men and wine.

an hotel not long ago and applied for a room. The price he was willing to pay entitled him to load and the definition of the group. "Oh. you could, all right, if you'd lie like I do." replied the new-comer. —Tit-Bits. you," returned one of the group.

house. Among his oprietor noticed a being asked what the man replied: "I was afraid, Mrs. Wotherby," said Mrs. Snapperley. "that you wouldn't be able to get over to my house this afternoon, for it isn't so easy to get historical journey from

"Oh, I wouldn't have missed coming "Yes." replied the landlord, strok-ing his chin reflectively, "seems a pretty good idea; but guests with fire-bow all my silver and glass looked on this hotel." how all my silver and glass looked on the dupped by the mayor, corporation and ceived by the mayor, corporation and escapes pay in advance at this hotel." how all my silver and glass looked on -Tit-Bits.

duction on account of its raising hotly contended political subjects. The cen_ sor has to decide for or against plays bearing on social sins and questionable lines bordering on sexual problems. In Canada the local censor seems to But it is useless to have a censor whose

have a still more unthankful task and if he does his duty "without fear or favor" he will be sure to be unpopu-

without their pay, and the company, now consisted of 6, instead of the original 14. So the "book" had to be authority and dictates are to be questioned at every turn, and sometimes overruled by a bench of magistrates. A strong man and a wise man is needcut down to suit the cast available; and, altho the promoter was highly pleased with his shearing, and declared for the arduous job, and his hands need the support of all higher authored the drama to be much the strongities until he has done something er by concentration, the result was drastically opposed to public interests. The certificate which so often ap-pears in the picture shows must have men, one the leader's wife, and one the picture shows must have

done much for keeping out of sight many films that would have had a bad effect upon the juveniles if not on adults, and while it seems often a little A great little actress was she, both A great little actress was she, both hard to prevent the admission of childon and off; and one might at times ren without an adult to shows, the recall the horrors depicted in a once ruling must be admitted to be generpopular child's book, called "A Peep Behind the Scenes," which related ally to the interests of the public

morals, and when plays which bear the ill-treatment meted out to little upon problems of sex are boomed it waifs forced to play in a circus show. would be well in the public interests This child actress thoroly revelled in to limit admissions to adults. How appearing as a coon, or in a funny

to limit admissions to adults. How few philosophers and students of political economy go to see such plays for the purpose of study! The very fact that a delicate subject is being handled with boldness is the main at-traction, and the house will often be found to contain the section of the particularity when playfellows were at hand, was far from her in-clination, and, on one occasion, her stubbornness was too much for her particularity at leave and an attempt was at a pleasant town beside the lake, when the first warm, sunny day appeared; and the man, wife and child, with just one patient actor, set out found to contain the section of the parents' patience, and an attempt was to try their luck with a mere "snack' community who most offend against the recognized ethics of social life in Christian lands. There are of course those who reason that we have no right to enforce our Christian dogmas down their throats the course the course for the construction of the construction of

down their throats, they cannot and for fear of appearing to be maltreat-will not swallow them. Canada they ing the child, the parents had to player, scene shifter, advance bill distributor, and principal

It was in the latter days of this vogue that Will Kemp became the most popular of stage comedians and be it said he did a great deal to raise would their own church, but only pro-triang the thin, the parents had to postpone punishment, sine die, much to the glory of the kid. Once, at ieast, she earned the sympathy of the company. That evening, after a boss, wife, and child slipped off early the company. That evening, after a boss, wife, and child slipped off early the company. That evening, after a boss, wife, and child slipped off early the company. That evening, after a boss, wife, and child slipped off early the company. That evening, after a boss, wife, and child slipped off early the company. That evening after e fatal the did a great deal to raise "I was afraid. Mrs. Wotherby," said Mrs. Snapperley. "that you wouldn't be able to get over to my house this afternoon, for it isn't so easy to get housework." "ON Provided that is the secured house the standard of comedy. He secured has applause more by the artistic con-tortions, pantomimic actions, and his to present the worst side of life as it is in reality, but with a gloss and short, and the public bus high in its charges the hose, announced sites short, and the public bus high in its charges, the boss announced, after glamor that makes vice look . like to

thing began to get less laughable, and several began to handbills, and in return showered him or less necessary for the plot of the kick at the bill distributing from with mud, which was then plentiful play, and for awe-inspiring effect. with mud, which was then plentiful and handy, sticks, stones, and house to house, which they felt was missiles. Finding additional sport in not their job. One of the company, provided with too little cash for his expenses, went giving their visitor sly whacks with sticks, and even with iron bars. Bravely this unpaid "walking adver-and yet so systematically placed ahead for four days as agent in adtisement" took all the showers and vance, and, when his funds gave out. slipped back to his home at Toronto blows, and, after he was lamed, somewhat blinded, and black and blue with Another member of the company was

At fitted together, lashed as if by magic sent off to bill some town (which the show never reached), and he never bruises, the theatre was pack When he ventured to mention matter as worthy of remuneration, appeared / on the stage again. A the promoter threatened "hell." little tittering in the wings, at a se-rious part of the play, was cause one town the agent had booked a beautiful new "music hall, with a booked a with a swing and twist of a rope, with a furniture is rushed on, electricians for dismissing three or four more, splendid stage, fine dressing rooms, and almost every modern convenience." Strange to say, the scenery consisted only of one semi-circular cloth, representing a seascape, and that was unsuitable, as either of the and disclosing an interior of a palace, f the richly furnished and decorated with five scenes which, according to 'the handbills, the players would put on-

By dine of much push and effort, the shows is an art in itself. The call ancient scenery at the old town hall sheet attached to a board on the was obtained on loan, and the four stage or stage entrance gives at a overworked and unpaid actors car- glance to the company particulars as ried stacks of scenery from the one place to the other. By the aid

to time for rehearsal, times of performof gangs of willing lads this was not so difficult on the first journey, but, at that town, the time of the train oh! the woes of the actors, oh! the wocs of the actors, when conveying the company, the time it between 11 p. m. and midnight, they is due to reach that town, and the places, a mile distant, without any and their evening's performance.

the sleeping actor-nursemaid and

man-of-all-work had a banking ac-

count in Toronto, and would pay up!

With a little more capital, an actor

had to return the effects to their length of the "stand" there. masters, property men, agents-in-adlads to assist, after a big day's work and their evening's performance. vance, and other officials, make the traveling as easy and certain as can Like the "Ten little nigger boys,' the process of reduction progressed. Two men elected to remain behind

be, with a minimum of trouble expense to the players. And And the transfer of the tons of scenery and effects is handled by the railways with special attention and with special freight cars and special wagons between depot and opera house, and it is rarely that any hitch in the arrival of such theatrical effects de-lays a big show.

Even the little towns in Ontari possess today better stages and halls for stage plays than can be found in towns ten times their size in the agent, comeold country, and it is safe to say that in a very few years' time Canadians will be wresting the honor of running shows for Canadians from the almighty American and the old one morning, after a fatal vaudeville show, telling the hotel landlord that countryman.

"'The horse and the cow is in

field." read the teacher. "Mary, what is wrong with that sentence?" Mary was evidently more versed in the rules of politeness than in the rules of grammar, for she answered prompt-

Social Notes

Mr. Campbell Sweeny, manager of the Bank of Montreal, in Vancouver, and a brother of the Lord Bishop of Toronto, passed thru town last week, dining with his sister-in-law, Mrs. E. H. Keating, and leaving later the same night en route for St. Andrews by the Sea, where he will join Mrs. Sweeny and Miss Dorothy Sweeny, who have been for some time in New York, where Miss Sweeny has been under-going special treatment.

Mrs. I. Landeau sailed last week by the North German Lloyd steamer Kaiser Wilhelm II., for Germany.

H.R.H. Prince Arthur of Connuaght has taken a house near York, where he will live after his marriage H.M. Queen Alexandra wishes the marriage, which, it is stated, will take place in October, to take place at Sandring-. . .

Miss Enid Hendrie has returned home to Hamilton after spending a month with her aunt in Alberta, Miss Hendrie's marriage will probably take place early in the new year.

Miss Dorothy Cross is visiting her sister, Mrs. Kerr, in Edmonton.

Miss Isabelle Saunders, who has been very popular during her stay in Winnipeg with Miss Sybil Howell, returned home last week. Miss Howell gave a farewell tea for her on Fri-day afternoon.

Major T. H. Cochrane and Mrs. Cochrane, Montreal, sailed for Eng-land by the Royal Edward.

The latest reports from London state that all thought of Her Royal High-ness the Dutchess of Connaught re-ing to Canada, when His Roy-al Highness ratures to finite-Highness returns to finish his ter'n as governor-general-al (providing His Hoyal Highness loss return) has been abandoned. Her Royal Highness is improving daily, and will provably go abroad for a complete change in the course of a week or two-

Millicent Duchess of Sutherland, Lord Alistair Leveson-Gower and Lady Rosemary Leveson-Gower are going to the seaside almost immediately for a complete change and rest.

Mrs. Creighton and Mrs. Fitton of Brantford are at Little Metis.

The presence in Montreal of the commander and officers of the French cruiser Descartes, which was anchored in the harbor, has been the excuse for numerous festivities. Commander Puglicsi-Conti and the officers were the guests of the Back River Polo Club at Cartiervill for the club match, which was largely attended by Club the summer colony and several from town, who motored out for the games. Tea was served in the clubhouse.

Music, where she will teach the art of dancing, aesthetics and physical train-Miss Parker has already introduced the newest dance, the Argentine Tan-go to over two hundred of Toronto's

This is the dance that has been accepted by Queen Mary, and is now the craze on both continents. Miss Parker will resume her class-es in September, and will take a limit-ed number of private pupils in the

Argentine Tango.

Mrs. W. O. N. Parker and her daugh-ters. Miss Edythe, Muriel. and Doro-thy, have gone to their summer home at Juddhaven, Muskoka, till Septem-

LONDON, July 26 .- The Countess of

Ancaster is beginning to show almost as much activity in politics as her fellow countrywoman, the Countess of Lady Ancaster has been seen at a number of political gatherings of late, and her friends are wondering what she is after. This sudden and unprecedented interest in public af-fairs, they say, on the part of the countess indicates that she has pick-ed out something for her husband. Yes, for her husband, for, as is well known, Englishwomen, with the exception of the militants, only engage in politics in order to boost the fortunes of their lords and masters. Lady Ancaster will relinquish her

JULY 27 1913

room for the runners at Syraouse the Grand Circuit utotting meeting there has been shortened to four days. Neither of these running meetings is counted on to altract stake horses, but they will afford an opportunity for some of the others to earn their oats, and, incidentally, they should make racing popular with thousands who perhaps never saw a field of thoro-bred horses in action.

bred horses in action. It is a singular fact that since the jockey club assumed control of racing nearly al' the little running meetings once held in cities and towns up the once held in cities and towns up the state have gone out of existence. Old-time horsemen can remember when more than a score of tracks were in op-eration in New York State outside of the metropolis. The meetings were for the most part unimportant. They were sometimes held in connection with trotting races, and were often fea-tures of the county and district fairs, affording anuscment for the people and tending to popularize the runners in a country where nobody raised them and few owned them. The meetings were short and never produced criti-cism or hostile legislation. But all this has long since passed, and the trotters now monopolize attention on one hundred tracks to one used for running races.

one hundred tracks to one used for running races. The policy of the jockey club helped to bring about the conditions which now exist. Under its rule organiza-tions like the New York Fair Associa-tion found themselves powerless to conduct running races, notwithstand-ing the fact that the law expressly authorized them to do so. Without the sanction of the jockey club they could not obtain the hurses to make a meet-ing, owners fearing they would be out-lawed on all jockey club tracks if they took part in such meetings. Besides giving its approval to the emeeting the jockey club has donated a prize for thorobred stallions at the horse show to be held at the Empire track.

Useless Learnings.

A man who stuttered very badly went to a specialist and after ten different lessons learned to say quite distinctly. "Peter Piper picked a peck of pickled peppers." His friends con-gratulated him on this splendid achive-

ment. "Yes," said the man doubtfully, "but it's s-s-such a d-d-deucedly d-d-ddi_ fficult rem-mark to w-work into an ordin - n - nary c-c-con-vers-s-sation, y'know."—London Opinion.

"Waiter!" called the customer in a restaurant where an orchestra was

"Yes, sir." "Kindly tell the leader of the orches-tra to play something sad and low while I dine. I want to see if it will have a softening influence on this steak" steak.'

Sir Archibald Geikle tells a story of a Scotsman who, much against his own will, was persuaded to take a long holiday. He went to Egypt and visited the Puramid:

The victory of August Belmont's Canada, and now standing as a stal-Tracery in the \$50,000 Eclipse stakes at Sandown Park last week gave the keenest gratification to all American keenest gratification to all American

Special, which was for the three-year-old championship, on the closing day. From the same stable Knight's Differ, Southern Maid. The Usher, and old Plate Glass, were also winners. In addition to Hearts of Oak. Harry Giddings sent two other winners to the post. Venus Urania, the three-year-old sister to St. Bass, the King's Plate winner of 1911, being by Basset-law-Lady Betz, by Hanover, and Widow Wise, a three-year-old filly by Bassetlaw-My Maryland. by Bramble-The latter starting in an open race on the closing day, was as good as 30-10 and 5 in the betting, which proved a rich reward for some of the loyal supporters of the Giddings' stable. Al-tho it was known to the "clockers" that Widow Wise had shown startling apped in her work previous to Wedthat Widow Wise had shown startling speed in her work previous to Wed-nesday's race, the pencillers gave the "blinker" filly little consideration on account of her being a province-bred, and, furthermore, because she was ridden by Mr. Giddings' apprentice, Harry Grav, a lad from this city. This boy, by the way, has developed into a real good 'race rider in a very short space of time, as it was only during the space of time, as it was only during the Ontario Jockey Club's Spring Meeting this year that he sported colors for the first time.

is Beaten at Brandon By College Gent - Best Time 2.09 1-4.

The defeat of the pacing stallion, Grand Opera, 2.12¼, at Brandon last week, simply furnishes additional week, simply furnishes additional proof that "hoss racin' is mighty un-eardin." The big son of Claus For-rester-Little Belle had gone thru the Western Canada Circuit with an un-broken string of victories, and he went into the Brandon race, where he was deemed for defeat such a favore was doomed for defeat, such a favorthe that there was practically no beiting against him, notwithstanding the reports sent out to the daily papers that thousands of dollars were lost when the big pacer was beat-en Doubtless thousands might have been lost had thous hear might have en. Doubtless thousands might have been lost, had there beeen any play against Grand Opera, but the easy victories of Smith & Proetor's horse in his earlier races had about convinced the followers of the West-ern Circuit that it was of no use trying to beat him, and, consequently, speculation was confined entirely to the other contestants in the race, with Grand Ogera barred. In a telegram to his brother after the race, where the race is the race of the race of

the race, Al. Proctor, who has been in charge of Grand Opera since the horse was shipped from here in the pring, states that he had gone off uddenly, and that it was just pos-sible he would ship back to Toronto. Grand Opera has a number of en-agements on the Grand Circuit ater on in the season, and, ro doubt, Mr. Proctor thinks the horse would have a better chance of rounding into form, if he were here in Toronto. The Brandon race was won by Col-In a telegram to his brother after the race, Al. The Earl's Father-in-law (from Chl-cago): "Well. I'm sorry for you, but you can't git any forty years' back wages out of me!"—London Opinion, 914, 2.10, constitutes a creditable

RIDING ASTRIDE OLD AS THE HILLS Leading Women of England Two-Year-Old Son of World's Rode With Spurs Long Before Side-saddles Were Invented.

The truth of the old saying "There A young trotter in which Ed. Geers is nothing now under the sun." has is much interested is a two-year-old apt illustration in the controversy now son of The Harvester, 2.01. called Sir raging over the propriety of women Harvester. Geers took The Harvester, riding astride. The propriety of women riding astride. The practice is almost invariably alluded to as being new, and as a western innovation, yet the facts are that women rode astride bean unbroken three-year-old, and the following fall won three futurities with him, marking the colt in 2.08% in a third heat. Then he continued to train the stallion until at five he made fore side saddles were invented, and the custom originated in Europe, not a world's record. A year ago last March, when some

on the western prairies. This is made blain by illuminated manuscripts of the fourteenth century in the British Museum, depicting women enjoying the pastime of the chase seated square-ly astride that horses.

A year ago last March, when some Harvester yearlings were on sale at auction in Milwaukee, Geers made a trip from Memphis in bitter cold wea-ther and paid \$1100 for Sir Harvester, whose dam is by McKinney. He broke the colt that spring, and now he is a real trotter working a mile during the real trotter, working a mile during the Cleveland meeting in 2.18% and a quarter in .32% with ease. Previous to this mile Sir Harvester had shown Enumerating the new fashions of Richard's reign, an old historian, T. \$193, and at that time Geers refused Rossii, observes: After the Cloveland workout Geers said: "That is all ne will do just now. He has shown me he is a great colt, and I shall ship him to Kentucky,

"Likewise noble ladies then used high heads and cornets, and robes with heads and cornets, and robes with long trains, and reats, or side saddles, on their horses, by the example of the respectable Queen Anne, daughter of the King of Bohemia, who first intro-duced the custom into this kingdom; for, before, women of every rank rode as men do." Geoffrey Chaucet, who wrote at this time describes a women rider as how

and I shall ship him to Kentucky, where he will run in a blue grass pad-dock until fail. He is engaged in some stakes for two-year-olds, but I do not favor racing trotters at that age and never will do it with my own." It is interesting to learn that in the case of a colt that shows so much and which Geers owns, the great driv-er has had nothing to do with the Geoffrey Chaucei, who wrote at this time, describes a woman rider as hav-ing on her feet "a paire of spurres sharpe." The Duke of Newcastle in his famous work on horsemanship, published in 1555, speaks of women riding astride at that period and the vencrable John Lawrence, writing at the close of the eighteenth century, states that at an early period of his own life two Young women of good family in England "were in the con-stant habit of riding about the coun-try in their smart doeskins, great coates and flapped beaver hats." However extensively the example of er has had nothing to do with the youngster's development. John Benyon, Geers' assistant, has looked after that, and when I asked Geers about the matter, he said: "Well, Benyon is a first-class mair, and in the core of matter, he said: "Well. Benyon is a first-class mail, and in the case of a colt trotter, it is much better to let one man do all the driving, because he is used to the colt and the colt is used to him. I have not pulled a line over Sir Harvester this year except once, and then Benyon was obliged to be away for a counte of days However extensively the example of the Bohemian Queen was followed, it

be away for a couple of days. "I did not speed him any, either-just let him square away for a piece is thus apparent that the mode of fe-male equestrianism to which the pres-ent Queen of England objects con-tinued to prevail, to some extent at least, until the last century, if, indeed, so I could see his gait from the sulky. He pleased me, and now he had shown me a mile in 2.15 would not be hard for him with a little more work. I am go-ing to turn him cut until fall."

The Beach n

HE frock on the figure standing to the left is of a grayish blue silk, made with the two flounces of chiffon on the skirt, which are very fashionable this season. The kimona blouse has a vest of white tulle, while tulle frills finish the elbow sleeves and are used for the upstanding collar. The girdle is of a deep shade of blue silk. The hat is of white hemp, faced with grayish blue silk, and trimmed with white roses, while a bow of the same material as the girdle is very becomingly placed under the rather flared brim in back.

The dress on the girl reclining in the chair is of gray voile, on which large red dots are embroidered. It is made very simply, black silk being used for the sash and the band edging the neck, while white silk is used for the ruffles around the neck and sleeves. The one mark of originality on this gown is shown in the sleeves, which are of plain gray voile, in contrast to the dotted voile.

A very picturesque hat is shown on the middle figure, being of coffee colored straw, made in a poke shape. Red roses encircle the crown, and black velvet streamers extend down below the waist line in back.

THE TORONTO SUNDAY WORLD

JULY 27 1913

Once upon a time Ferdinand Public 'Phone to spread the dismal breathed right into Adele's translucent Tidings.

In the meantime the elated Lover had loped all the way to the Univer-sity Club to spring it in the Navajos Listener those three Words which hold all Records as monosyllabic Trouble-Makers. and receive their Felicitations

They have a harmless look on the Printed Page, but when pulled at the Psychological turn of the Road, they become the Funeral Knell of Bachelor Freedom and a Prelude of cutting the

Spring on whatever has been put by. The Serpent, operating in the guise of Lover in a Serge Suit, had lured, cajoled, wheedled, and finessed until the poor trembling Child, only twenty-four years of Age, was alone with him in what the Landscaper had worked off on her Papa as a Formal Garden. They stood chinghed there is the duil

They stood clinched there in the dull Sunset Glow, and a Pergola for a Background. It was all very Belasco and in strict compliance with the League Rules laid down by W. Somerset Maugham.

ABOUT A GRASSHOPPER.

Once upon a time there was a grasshopper, long, slim, and green, sitting on a stump by a cow-path leading up a hill. He was thinking hard.

"Look!" said he. "Here have I lived and fiddled all my life. All the rest fiddle, too, so no one takes a bit of notice of my fiddling. I shall not stay here any longer, but shall go where no one else fiddles. Then I shall be heard, and get some praise for my music." The true flowers, not borne by all the species, are lestled at the centre He set off without a word to his friends, and jumped thru the bars at the foot of the hill, into a corn-field. of the corymb and are apt to be overlooked alongside of their more showy

known as the garden party. A garden party is nothing more or less than an afternoon reception, con-ducted in the lovely environment of blooming flowers, velvety lawns, and leafy trees. Where brilliant sunshine and gorgeous floral displays are typi-cal of summer days, it is a pity that the mistresses of handsome town and country homes do not more frequently amuse their friends at these afternoon fetes. With nature herself as an ideal background for lovely gowns and simple festivity, it is extremely surprising that a host-over the camp fire perhaps is fried ess, whose good fortune includes a

becomes a difficult and clumsy affair if prolonged into the night, with ancing, etc. Special diversion need not be pro-wided for guests at a garden party. But if the grounds include a good croquet lawn or tennis court, this should be put in order for those game. Music adds greatly to the success of one of these outdoor fetes. An guitars is lovely in the open air, and becomes a difficult and clumsy affair if for a king. The camp fire should be made an hour before meal time, so as to in-sure a god bed of coals. Potatoes and green sweet corn may be roast-ball party. The boy himself and his eight boy friends made up the "base-ball nine." The invitations were sent out on cards the size of baseball score cards. Upon one corner of the card appeared a picture of an inch thick slice of these outdoor fetes. An guitars is lovely in the open air, and guitars is lovely in the open air, and can be stationed on the veranda or mecreted amid the shrubs. The majority of guests at a gar-den party may prefer to be constantly moving about, and to take their re-freshments as they stand, but chairs

moving about, and to take their re-freshments as they stand, but chairs disposed in grups under the shade of trees or lawn tents, with rugs spread here and there under the chairs, are certainly conducive to com-fort and sociability. ed. This was followed by running races and athletic games. The successful contestants were awarded medals. The medals, too, were an invention of the hostess, and more than delighted the youngsters. They were made of hammered brass, mount

ed on a bright red silk badge Supper was served on the front lawn, where a miniature ball field was mapped out with chalk. Grass mats, upon which the little fellows might sit, were at the bases, and other positions on the field. Each boy The wise hostess not only puts her lawn in order, but she also has her house in order, so that, in the event of rain, with little trouble she can transpose her garden party into an afternoon at home, and send her guests away wholly satisfied with their entertainment, however unpro-pitious the weather may be. At a tennis party given last week by a Toronto hostess at her sum-mer home on the Island, a clever novelty was introduced into the sim-ple refreshments served. She served was assigned a place on the "team, and found his "mat" accordingly

The New Poet Laureate An Appreciation of the Poetry of Dr. Robert Bridges, ------ Newly Appointed Laureate----

By ANDREW RAE MACDONALD

In the very hour that Tennyson scholarly treatment has left every assed away, and Swinburne's enfceb-lyric indelibly stamped with his gen-ius. Many of the little gems hidden passed away, and swinournes enters led pen lost its favor with literary England, three small books of poems, privately printed, marked the arrival of a new poet, whom the late Edward Dowden, himself a prosedist of no lit- effort in his long narrative Dowden, himself a prosedist of no in-the merit, and one of the foremost critics of his time, heralded as the greatest lyricist in the field of English tation he has established in his lyric of Robert Bridges, the newly-ap-pointed poet laureate, be measured.

greatest lyricist in the field of English letters. And by these poems, rather than by the eight plays he has writ-ten, or his excellent critical study of the prosody of Milton, must the merit Productions, but they are a monument to his productivity, and fertility of po-etic conception. Charming tho they are, I am loath to leave the first sien-Of the same mid-Victorian epoch as poems in full.

Austin Dobson and Alfred Austin, his predecessor in the post to which he has been appointed, Dr. Bridges ex-hibits in his shorter poems little of the vapid utterance that characterized his contemporaries, and thruout the vol-

umes that have won him this signal recognition is a highly sustained dig-nity of diction, a happiness of simile wealth of imagination, and scholarly observance of She lightens on the comb Of leaden waves that roar And thrust their hurried foam scholarly observance of Upon the dusty shore. laws of rhyme and rhythm that Behind the western bars and

leads to a comparison of his poetic The shrouded day retreats, genius with that of Matthew Arnold. And unperceived the stars

As with Arnold, however, the chas-tity of his form leads in places to a halting rhythm, a seeming absence of rhythmic syllables, and the swinging address the second seco cadences of metre that forms the one reproach that the most carping critic may bring against Dr. Bridges' work. He is at once the confirere of Keats in his love of beauty, and a co-worker with Swinburne in his love of love. The wood is bare: a river mist steeping But while Swinburne's pages riot in passion, Dr. Bridges has found a pur-The trees that winter's chill of life bereaves; more spiritual love an ideal-that Only their stiffened boughs he immortalizes. silence, weeping Nature is the true field of the new Over their fallen leaves; laureate, as witness the following stanzas from what is possibly his That lie upon the dank earth brown from what is possibly and rotten. best known lyric: Miry and matted in the soaking wet; "There is a hill beside the silver Forgotten with the spring, that is forgotten By them that can forget. THE VOICE OF NATURE.

"We stood in silence then by the "We stood in silence then by the open window; in silence as one does when there are the many things one dare not say. The sparrows were chat-tering loudly in the ivy. Around the house the swifts were chasing each other with joyous screams, exulting in their power of wing, rejoicing in the cloudless sky Again and again they appeared, then disappeared; now flying high above the laburnum trees. now flying low across the purple iris. Even there in that room we could hear the purr of the wind in their wings as they swept by.

as they swept by. "Somewhere in the quickset hedge robin was singing; the deep-throated blackbird made his sudden flights. We blackbird made his sudden flights. We could hear his notes like water drop-ping in a well. Beyond the orchard where the spinney lies. I saw the sharp blue spurt of a pigeon from the wood and in the eim tree over by the gate a dove sat cooing her three plaintive notes.

There is continual confusion be reen the names and identities of Mr. Winston Churchill, whose novel "The Inside of The Cup," was reviewed recently on this page, and the Right Hon. Winston Spencer Churchill, Nor is the confusion lessoned when one remembers that both are novelists, and both politicians. This recently led a British journal to soundly rate Mr. British Churchill for action in-

Academy. Had he pursued the naval career there might have been still turther ground for confusion with Britons Viking son, the first lord of the admiralty. It is curious, too, that Army and Name date the set of the sky, the gas gen-

novel of revolution; and in 1901 the American continued with "The Crisir."

a man to find it These were the sounds to which, when I was a boy at home and now, during these four years we have lived in Brauningham I have list-ened with such thankfulness, such un questioning delight. They have been to me the very voice of nature singing, as we sing in the choir on Sunday, to the glory of God. Yet, whereas, our efforts are poor, tho they may not be vain, this choir of birds in the hedge-rows has not one note which does not

There is nothing in Dr. Bridges' than the late Alfred Austin; on whose shorter poems of which he may be brow the laurel crown set so uncomred, for his careful selection and fortably.

"The Prodigal had returned. "Father," he said, "are you going to kill the fatted calf?" She was an up-to-date young lady and at once became interested. "And why do they boil engines?" she in-"No," responded the Old Man, look. quired again. ing the youth over carefully. "No, I'll let you live. But I'll put you to work and train some of that fat off you." "To make the engine tender," politely replied the resourceful guide. * NATURE'S GARDEN * BLUEWEED AND HAWKWEED The blue-weed, or viper's bugloss, spreads very rapidly, but both from report and observation. I have found <text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text> Here and there amid the blooms of deeper blue may be seen a spike of very pale blue or white flowers. This

such charm, such an but hope that aureate will not Dr. Bridges will ch has bas

ment of 47 feet in circumference and a height of nearly 100 feet. The wood of this tree, which was used by Solomon in the erection of his wonderful temple, has a sweet odor, is very hard, and seldom de-cays. It is interesting to note that the American College at Beirut has adouted a coder tree as the works. "The Old Adam," by Arnold Bennett, continues the adventures of "Denry"— Edward Henry Machin, who has become a prosperous alderman of his native town. Of a sudden the old spirit that re-sents a quiet and humdrum life breaks out and Alderman Machin sets out on a course of adventure in London, then to New York, and back to London again. This book has all the humor of Ben-nett's lighter efforts, and the delicate re-alistic touch of his more important books. It is published by Bell and Cockburn. adopted a cedar tree as the symbol of the college, and has pictured it on

their seal.

"I cannot truthfully say that I believe in fairles, but the fairy story is a thing I feel sure the world could ill do without. I am no high-churchman, yet I have al-ways believed in symbols, especi-ally for the minds of children. Un-less you train the eye to an ideal of beauty, it is apt to see nothing but ugliness when it comes to know the thing that is real. I cannot think why this should be so, and it is with much regret that I admit it. Perhaps it is the stain of the sin of origin left cling-ing in the mind, and if that be so, then doubly is it the duty of every parent to train in his child the parent to train in his child the power of seeing beauty every-where. So, when it comes to the realities in life it will be able to see them in their true proportion.

hand as f v.as helping myself to sal. "'Say a prayer for local showers. Daddy,' said she." The vicar says that "The sorrows of this life are lessons. I hold no sym-pathy with those who regard them as a chastisement." One day the angel of death visited that home, and to the singing of summer birds the spirit of Georgina took its flight Sneaking of see them in their true proportion. "I always used to tell Diana, as I myself and many another has been told, that when the birds lifted up their heads after drink-they it was to give thanks to the Almighty for the quenching of their thirst. For many, many years I know she believed that this was true, and then one day, when she was in her teens, she came to me and said— "Daddy—when a bird pute Georgina took its flight. Speaking of this event the vicar says: "Doubtless when greatly you receive you greatly give; and from Georgina I had received so much. Women are no less wonderful, because a man does not understand them. I have never understood them at all, perhaps, be-cause they know so little about them-

came to me and said-"Daddy-when a bird puts back its head after it's been drinking, it's to let the water run down its throat." "Yes,' said I. "You told me it was saying grace, Daddy." "Yes,' said I. "Well-it isn't half so nice now that I know it's only the water running down its throat." "Would it have been nice at all if you'd known that all along?" I asked her. "She sat and looked at me for selves. But Georgina had been very wonderful to me. So much had she made herself one with the interests of my life, that at times I would feel as if in her I were looking on at myself, could almost criticise my actions, pass-ing judgment upon them from those very things she did herself. . . This is the miracle which Love can make between a man and a woman. God is between a man and a woman. God is Love- it were the same to say that God is understanding. We often knew, each of us, what the other was going to say. I know she read my thoughts as easily as I could think them. Some little weakness—and how many all of us have—and I would see her eyes turn away without looking at me, rather than let me know she had seen. A thousand times I have not recognized it was a weakness until the moment "She sat and looked at me for quite a long while, and then at last she put out both her hands. "I believe old people are very wise," said she. And I was only fifty then."

little moral and philosophical reflections, that it seems to me more like a prose poem, an idyll that you can read it was a weakness until the momen when I saw the turning of her head. and re-read with pleasure and profit. The illustrations by Charles Robinand re-read with pleasure and profit. The illustrations by Charles Robin-son contribute very largely to the charm of the book. These are numer-ous dainty little pen and ink sketches sprinkled with lavish generosity thru-out the pages. '

out the pages. The narrator is the Vicar of Bram-lingham, who, with his wife, Georginā, a quaint and gentle lady, occupies a quiet country living in England. The vicar keeps a note-book in which he writes down his observations of things outdoors and the thoughts to which they give rise. It is this note-book

But Stopford was only was waiting for him on the platform human: that any man should take her was unbearable of Monte Carlo station.

And with her. Mimosa.

CHAPTER XXIII

Events had moved quickly during Stopford's absence from Monte Carlo. Clio de Fontaigne was full of news, anxious to tell it, bubbling with excitement like a child. To her surprise and disappointment, Stopford night, but I rather expected to find hardly seemed interested. She real- you kicking your heels outside my ized he was tired and wanted a rest, but she was impatient to tell him all that had happened, and all she hoped tell you what I've done, what's hapwas going to happen.

She was a true woman, and even commonplace one in that she enjoyed Her behaviour was a little the management of other people's love certing. She yawned repeatedly, as if affairs as much or more than the mismanagement of her own.

Perhaps she was not seriously troubled as to who won Mimosa as altered her mind, and that she would long as some one won her, and took Turning, she smiled at Stopford. her away from Varles.

In spite of her cunning, her cleverness, her knowledge of the world and men never to marry the woman they of men, she was at heart quite a love. It would not be quite-nice, ch?" child. That was what made her fascinating-the eternal spirit of to talk nonsense. Her nerves youth, the kind, but careless, heart.

"Make hay while the sun shines: weep with the rain." That is wise as a lover," Clio continued unconphilosophy.

Stopford did not find it easy to re-

hours. Sea, sky, flowers, mountains Mimosa yourself, what are you going and palm-trees went to his head like to do with her?" The woman he loved was by wine. there was method in her cruelty.

in a pale yellow kimona.

And a miracle had happened. She was no longer unapproachable, eyes were full of dreams still, Her She must be disposed of before Lady Hetherington and Major Rawton come but cut. There are only you-and Captain Smith walked Clio lit another cigarette. "Thanks," with a light step; she talked easily and naturally. She laughed—and the

she said dryly, "but I want Captain Smith for myself." "You . . do you mean that he that you-love one another?"

Clio snapped her fingers, that was the only reply he obtained.

"She has not accepted Oscar Sorral -Baron Estine?" "Not yet. Were you blind last night? Couldn't you see the change in her?' Stopford nodded. "Oh yes, I saw the change. It was as if she were really beginning to live for the first time." "A narrow escape from death. Mr.

Varles is not the only thief in the hotel now. Capt. Smith and I have been playing his own game. The night you left us on board the yacht Varles drank a lot of wine— and won a lot of money, by the way—

most of it was mine. It was about five a.m. in the morning when Capt. Smith helped him upstairs to his room here. He found the precious drug which Varles used on Mimosa. Your suspicions were correct. He took all the drug he could find to his own room and filled the botties with a harmless

stuff-principally burnt sugar and wa-At the same time he gave Varles a stiff dose of his own vile mixture. But the man was too drunk to know what he was taking. Next day his mind was a blank.'

"Then Mimosa's innocence can proved?" Stopford cried excitedly. "Perhaps, perhaps not." Clio replied ynically. "That she's no more a thief cynically.

drug it has no volition of its own, is to any suggestion which may open come from another and stronger brain. When the effect wears off, the subject who has been drugged has no rec

tion whatever of what she has done during the period she was under its influence. Alcohol, you know, has that effect in a minor degree, upon lots of people. There is nothing very re-markable about it, except that this particular drug leaves the brain sponsive to other influences. It's like a sensitive instrument, to be played upon by the hands of a cunning artist '

"You say that for three days Varles has not given her any of the drug?" "Only sugar and water," Clio replied drowsily. "I put Mimosa on her guard, told her to obey Varles, and that no harm would come to her. You have seen the difference. Slowly she is be-ginning to realize her danger. It will take weeks, months, to restore her to proper health. Capt. Smith says her emory will never be restored.

"I don't think I should care for you as a lover," Clio continued uncon-ternedly. "I like to picture a lover cernedly. "I like to picture a lover Stopford was striding up and down the room now, incapable of hiding his excitement. "Surely Varles has acted as a man who takes what he wants in face of overwhelming opposition. excitement. member the past sixty or seventy Anyway, if you don't want criminally. He must be exposed."

Clio scoffed at him. "British sense "Thet's where I want your help." for them.'

n't remember, she'd only know she was told. To start with, what she was told. To start with, that she was a thief. Heaven knows what else Varles might not tell her in order to hurt and, perhaps, destroy her."

Stopford flung himself down on the chair again and looked at Clic had picked up a mirror from the table and was rearranging her hair.

"What are you going to do?" he ask-

She shrugged her shoulders. "What are you and Baron Estine going to do? You are the most interested people. Of course, Estine knows nothing; like all men, he's blind where his passions are concerned. But probably he'll find out when he's been married to Mimosa a few months." to do?" few months." Clio turned round and faced Stop-

ford. "Then you must. my friend."

Stopford groaned. He wished Clic de Fontaigne were a manher so. "Don't you understand I've given my word to Lady Hetherington? I can't break it. She trusts me. Moreover, if I did asy her to release me. Id have to tell her the reason, and _____" "Yes, go on."

"She's a woman. She's only human. ton or Mimosa? "You mean she might revenge herself on Mimosa?"

Stopford said nothing.

Clic strolled into the dining-room and changed her stockings, talking banalities to Stopford thru the open door. Then she slipped off her kimona, put on her dress and, while her maid fastcan save her.' ened it up, ro-entered the boudoir and continued chattering. at her with haggard eyes.

Again silence. Stopford was mysti-led. It seemed to him as if Clio de Fontaigne and Captain Smith were playing some incomprehensible game. He began to lose his tempr.

"Will you tell me what you mean to do?

Captain Smith yawned. "I don't mind When the old boat's had a coat of paint, been overhauled and done-up generally. I'm going to sail away again. I'm going back to Eldorado, and I'm taking Clio de Fontaigne with me. Now, what are you going to do? Are you going to your El Dorado with Mimosa, or back to London with Lady Hetherington?"

Stopford put down his cigar and folded his arms. This was the riddle of which Clio had warned hi n. He ooked at Captain Smith. The latter net his gaze, but the expression on his face was that of a sphinx.

"I love Mimosa." he said simply. "That's no answer," Smith rasped.

The silence was broken by the sound of oars musically splashing on the water. Muffled voices drifted faintly thru the open port-holes. Then a cry, something like the cry of a wild sea-bird. Stopford rose to his feet; to his and Stopford rose to his rest, when heated imagination it sounded like neated imagination help. When he sat Mimosa crying for help. When h down again he had made up his That cry had answered the riddle for

"I'm going to save her." he said uletly. "I'm going to marry her." quietly. Captain Smith rose and held out his great brown paw. "Lord Hetherington congratulates you!"

Again the silence was broken by a cry. A human cry, there was no doubt of that now. At the same moment Vibart came scuttling down the stairs. "Stopford-Captain Smith, come up on deck quickly. Something's wrong." Smith was the first to reach the deck. Vibart was pointing across the harbor towurds the open sea. A small steam-yacht was creeping quietly out,

dense masses of black smoke from her funnel. Smith's stentorian voice rang out a

sharp order. The watch came smartly to his side.

"I saw her getting up steam about seven this evening, sir. Ten minutes ago, just after our dingey left, I saw a small boat pulled out to her from the far side of the narbor. She kept in the shadows it struck me she was a

Ephraim (from the country)-" say, cousin, this livin' in th' city Agonized Chorus: "But, think of ain't what it's cracked up to be when We can't go back; our wives you have t' make your flower garden on th' dinner table!"

Why Hospitals Use **Metal Ceilings**

Firstly :- They are easy to keep clean and absolutely sanitary. Dust and dirt will not collect to form cobwebs, which retain germs and microbes, menacing the health of all occupants of the room.

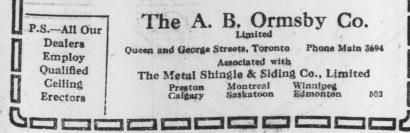

Secondly :- There are no cracks (as in plaster ceilings), nor will the ceiling crumble and pieces fall off.

Thirdly :-- The rooms can be fumigated-the ceilings and walls washed with soap and water or disinfectant without injuring them in the least.

Fourthly :-- When finished in white, Preston Ceilings brighten a room by distributing the light evenly.

Preston Ceilings are used in Hospitals, Hotels, Churches, Restaurants, Public Buildings, and are the ideal and economical ceilings for bathrooms and kitchens.

What these rooms look like when finished with our ceilings, you can see for yourself. Write or phone for a copy of the booklet with these views.

The Reverend: "But, my dear friend, what good do you get from the use of all this shocking profanity?" The Ribald: "Strike me purple! D'you coves want to make a matter uv profit and blanky lorse out er everything?"-Sydney Bulletin.

No Brutality for Him. ' "Prize fighting is a dangerous game!" "Seems so." "I would rathen see my son dead than to see him indulging in such a sport." "Let's see—didn't your son get both legs broken and his spine dislocated last year?" "That was at football. I hope you do not think I would permit him to en- gage in a prize fight."—Houston Post. No Wonder. "Now, doctoo." said the suffragette. "there's one thing you must admit. A woman docsn't grow warped and bidebound so culckly as a man Her	library and sweath said: "I should like 'The Red Boat.' please." The librarian diligently searched the catalog. and then replied: "I don't think we have such a book." Flushing a bit, she inquired: "May the title be 'The Scarlet Yacht'?" Again he looked, with the same re- sult. Then with her pretty fingers she went into her beg, consulted a slip of paper, and said: "Oh. I beg pardon. I mean the 'Rubiyat.'"-London Opinion. Taking a Chance.

Rochester Rider Instantly Killed at Motorcycle Races ×

B. WILSON, SPEED DEMON, **CRASHES INTO THE FENCE** AND IS INSTANTLY KILLED

Rochester Amateur Rider at Ontario Motorcycle Championships Fails to Make Turn While Traveling Fifty Miles an Hour and His Skull Is Fractured.

By Staff Reporter.

EXHIBITION GROUNDS, July 26.—The excellent card of races at the Ontario motor-cycle championships here this afternoon was marred by a fatality, when B. Wilson of Rochester, an amateur rider, took a header into the fence on the second turn, while travelling at 50 miles an hour.

The rider, while new to the track, was making excellent Small Field Hampers the Te-time, but did not allow enough for the turn and shot with terrible cumsehs and Montrealers force into the fence, completely demolishing it for 25 feet.

A fractured skull resulted in almost instant death. The St. John's Ambulance Corps was on hand to render first aid, but could do nothing for the unfortunate man.

The sad occurrence cast a gloom over the large assemblage,

and the final event on the card was cancelled. Wilson was about 30 years of age, and his family are said to be well-to-do residents of Rochester. About ten years ago Canadians' team for the leadership of

the young man had a shooting gallery on Queen street, near Teraulay. His friends who accompanied him from Rochester are

anxious to return with the body today.

BOUTS FOR LANGFORD.

SAN FRANCISCO, July 26 .-

Sam Langford, the negro heavy-weight pugilist, who arrived here

recently from Australia, accom-panied by Jack Reav, an Aus-tralian lightweight, left today for New York, where Liey say they both have matches, Langford said

his eastern bout was scheduled for Aug. 20, and Reav's for Aug. 27. Neither knows who his opponent

FRENCH TEAM LEAVES FIELD LIFTING THEIR CAPS AND BOWING

Nationals Refuse to Play Wh en Humphrey Puts Cattarinch Off the Field For Hooking-Penalties Came Thick and Fast-French Were Leading.

(By a Staff Reporter.) SCARBORO BEACH, July 26.—The rap that R. J. Fleming, the alleged lacrosse mogul, handed the Big Four League, was clearly indicated by the League, was clearly indicated by the slim.crowd here this afternoon. To-ronto's and Nationals, the two tail-enders, are the attraction. No more than 200 people were in the grand stand, and there were about 300 oc-cupying the Turkish bath seats. R. J. Fleming may have imagined he was doing a big thing for clean la-crosse, when he refused to allow his hired men to work iast Saturday, but, was tooling a big thing for clean la-crosse, when he refused to allow his hired men to work last Saturday, but, by so doing, he put the great To-rontos many notches lower in the estimation of the people, even the fol-lowers of the Blue Shirts. The day was ideal for the game, except that the sun was a little too hot, there was, however, a refreshing breeze. It was a nip and tuck stryggle right from the start. Nationals' line up was practically the same as at the other games, but Torontos had three changes. Longfellow, who was hurt by Yeaman, several weeks ago, was again replaced by Braden, and Dan-deno and Stagg were replaced by Barry, an old Shamrock man, and Munro, who hails from Gait. The line up: Toronto-goal, Holmes; point, Har-shaw; coverpoint, Barry', 1st defence, Powers: 2nd defence, Stagg; 3rd. de-fence. T. Fitzgerald; centre, Braden; 3rd home, Bandenc; 2nd home, Doni-hee: 1st home, Barnett; outside home, Warwick; inside home, Kalls. Nationals-goal, L'Heureux; point, Cattarinch: coverpoint, Clement; Ist defence, Duckett: 2nd defence, Warwick; and bome, Cattarinch, Clement; Ist defence, Duckett: 2nd defence, Marwick; and barroa di Barnett; outside home, Warwick; and the me, Barnett; outside home, Warwick; and barneo do Barnett; outside home, Warwick; and barneo do Barnett; outside home, Warwick; and defence, Duckett: 2nd defence, Martinelie 2 and for the game of the proper the ball was defence. T. Fitzgerald; centre, Braden; Braden and Gauthier were banched for scrapping, and Fitzgerald and Dulude plunged into the game, Nationals press-ed after the draw, but Powers intercepted a pass Munro rushed in with the ball. but Kalls lost it while trying to dodge Cattarinch. Nationals began to take life in an easy fashion, playing rag around midfeld, but Fitzgerald broke up their game. Both teams began to rough it up a bit and seconds.

Cattarinich; coverpoint, Clement; Ist defence, Duckett; 2nd defence, Lachapelle; 3rd defence C. Beganne; centre, Degray; 3rd home Gauthier; Ist home Duckett; 2nd defence, Strange to say Toronte and Humphrey penalized the fast that it was hard to Strange to say Toronte and 2nd home, Dusseault; 1st home,

2nd home, Dusseault; Ist home, Pitre; outside home, Lamereaux; in-side home, Boulaine. Referee, Billy McIntyre. Judge of play, Tom Humphrey. First Quarter Torontos secured on the face-off and pressed, but Clement saved. Petrie rushed back and Barry was given his first chance to distinguish himself, tak-ing the bail from him. Torontos made a tornific attack on the Nationals' defence. ing the ball from hlm. foronasi defence, terrific attack on the Nationals' defence, and L'Heureux stopped a couple of hot ones. The Blue Shirts secured again, and at mid-field Muroe shot wild, but Kalls returned from behind. Munroe dodged Duckett and scored. Time 4.23. Terrates 1, Nationals 0. ing the ball from him. Torontos made a terrific attack on the Nationals' defence. and L'Heureux stopped a couple of hot ones. The Blue Shirts secured again, and at mid-field Munroe shot wild, but Kalls returned from behind. Munroe dodged Duckett and scored. Time 4.23. Torontos 1, Nationals 20. On the face-off Nationals got posses-sion and bored in, Lamereoux scoring. Time 15 seconds. Torontos 1, Nationals 1. Time 15 seconds. Torontos 1, Nationals 1. There were plenty of thrilling plays. The feams kept up a lightning pace, the ard - hearted in hadling the visitors. The checking was very close. Torontos shot time after time on the Nationals goal, but L'Heureux was the usual jinx. Powers, Harshaw and Company were given lots of work looking after the tricky home of the Frenchman. War-wick was benched for stick holding and Spellen replaced him. Dandeno is also in the game at centre. The is seconds. The ans set up assed before the grand-stand. Humphreys may have been a lit-tle hard-hearted in hadling the visitors. but he was certainl right when he bench-ed Cattarinich for sawing Donihee across the face with his stick when the Toronto boy attempted to dodge him. INTERNATIONAL LEAGUE SCORES. Jersey Clty ... 0 0 0 3 0 1 0 0 1-5 5 3 Rochester 0 0 0 2 0 2 2 1 *-7 9 1

and Humphrey penalized the players so fast that it was hard to keep count. Strange to say, Torontos were treated a little more kindly in this respect than a few weeks ago. On one occasion Na-tionals only had nine men to Toronto's

in the first game of the double-header, the Toronto came strongly at the finish. The game was lost however, in the early stages, thru poor twirling and ragged fielding. Maxwell, who lasted but one innings, warmed up during the intermission, and was selected to pitch the second came, with Graham catching. Aitchison and Higgins were in the points for Newark. Toronto Pro. Rider Wins Beyond this the batting order was unchanged. The line-up:

Toronto-Newark-McConnell, 2b. Dalton, rf. O'Hara, lf. Gagnier, ss. W. Zimmerman, If. Shultz. cf. Northen, rf. Swacina, 1b. . Bradley, 3b. Collins, cf. H. Bradley, 1b. Tooley, 3b. Holly, ss. Getz, 2b. 300 Stillson Wrenches to be clear-ed out this week. Look at these Guaranteed Pattern. Genuine.

By James J. Corbett, Former Heavyweight Champion of the World. Writen for The Sunday World. foolish boy to risk his hard-earned laurels if not in the best of condition. NEW YORK, July 26.-If the latest ccounts of the recent international laurels if not in the best of condition. While, like every other lover of the sport, I am anxious to see Coulon de-fend the title at the earliest pos-sible date, I would hate like the Dick-ens to see him come into the ring in bantam-weight contest between Char-ley. Ledoux and "Kid" Williams are no shape to do himself justice.

hey Ledoux and "Kid" Williams are true the litle foreigner was given a pretty rough deal. Press reports say that Williams had the better of the bout for eight rounds, and from that on, and until the fatal sixteenth, the Frenchman held the upper hand. In the sixteenth round Williams hooked his left to Ledoux' body. The French-man held his hand to his croin and Mike Glover is the young man's name, and he has been cleaning up in this neighborhood the last few months. Mike is a welterweight who can se no good reason why he shouldn't be man held his hand to his groin and claimed he had been hit foul. Williams declared the champion. Among his most recent victims was Gus Platts, followed up his advantage with two the Englishman, who came to this country too show the Americans how nore to the same place putting Ledoux to the floord Referee Eyton immedi-ately, and without counting the ten required by the rules, declared Wil-liams the winner. to box. Gus arrived here heralded as the best of the weight the old country has produced in years. Glover had no trouble to convince Mr. Platts that he doesn't belong.

According to Glover's manager, a gentleman with the euphonic monaker of Clarence Gillespie, the Boston boy, is anxious to box any legitimate wel-terweight in the country

liams the winner. Ledoux, protesting, was carried from the ring and later, upon examination by physicians, was found to have been badly injured by the "Kid's" foul blows. Eyton, to justify his decision, said that Ledoux "quit." Seems to me this calls for an in-vestigation by Tom McCarey, in whose arena the bout was fought. A boy so badly hurt by a foul blow that he was forced to take to his bed certainly should not be accused of quitting. This is not the first time complaint has terweight in the country, over any distance, and at any weight from 140 to 145, ringside. Which shows that Mike is a liberal-minded young man and not inclined to fight over a pound or two.

is not the first time complaint has been made that Referee Eyton runs things to suit himself and without re-Glover has already issued challenges Glover has already issued challenges to a number of the leading welters of the country, but complains that the stars are afraid to meet him. Mike has even been so bold as to throw down the gauntlet to Packey McFar-land and Mike Gibbons, and will allow the latter to weigh 145 ringside. Which things to suit himself and without re-gard for the rules supposed to govern s boxing contests. Several times he has stopped bouts when there ap-peared to be no excuse for his actions. Tom O'Rourke has always claimed t that Evton overstepped his authority in stopping the McCarty-Palzer fight, that Palzer was not hurt and was in shape to continue the battle a O'Rourke's claim has since been borne out by the testimony of other eye-witnesses of that bout. Ledoux Got a Shabby Deal. It is a shame that a visitor to our country should be given such shabby treatment as Ledoux received at Ey-ton's hands. We have heard of in-stances where American fighters have been given the worst of it in England, but this is the first time within my knowledge that a foreign boxer has h not been accorded fair treatment on this side. land and Mike Gibbons, and will allow the latter to weigh 145 ringside. Which is perfectly safe for the Bostonian, by the way, as Gibbons could not very well do that weight without cutting off a limb or two. On the other hand the offer to McFarland is an exceedingly liberal one as Mike agrees to make 140 for the Chicagoan. There is little charge of Gloves and

There is little chance of Glover get-ting Packey right away. A little later on, perhaps, but not just now. For the next few months McFarland will be busily engaged trying to convince Willie Ritchie that he (Packey) is the legitimate and logical contender for the championship, and therefore will have no time to waste on westlers, no matter how soft they look. Bigger game is in sight, and Packey is a good If McCarey does not take steps to hunter.

prevent the possible recurrence of such an official break in the future he is a different type of man from what I think he is. The least he could do it would do, it would seem to me, would be to offer a purse for the boys to meet again—and take good care that both are protected by the referee.

Speaking of bantam-weight boxers,

The Knockers Busy Again. That story about Joe Rivers quitting to Willie Ritchie may or may not have some foundation in truth, but the yarn about Ritchie wanting to quit, and Rivers beating him to it, is the fun-niest thing I've read in a long time.

io, it would seem to me, would the end offer a purse for the boys to meet again—and take good care that both are protected by the referee.
It was bad enough to rob Ledoux of a decision, to which he was justly entitled as a result of Williams' fould the set thing I've read in a long time. According to the latest dream Willie was in bad shape during the early rounds and showed signs of the white feather. As far as that goes the dentities thing include as a reward for his questionable victory over Ledoux. As I said above the very least McCarey could do would be to offer Charley another battle
about Ritchie wanting to quit, is the funning to quit, and instead of "laying down" Willies the promotion of the rules been in the rules been is no fighting until he had instead of "laying down" Willies and instead of "laying down" willies a many and instead of "laying down" willies and instead and wanted to qu

Hobberlin's Semi-Annual Sale Tailoring Has Captured the Men Folk Event... Special Selling All Day Monday We have the confidence of Toronto's best citizens-business, professional and private. They know our ability to give them the highest class service in made-to-measure tailoring. No house the wide Dominion over has on its staff cutters and designers more skilled and competent than are to be found within the walls of this largest of tailoring

houses. Rather, none are just quite as good The "cheap and nasty" is unknown here. Quality is the ruling passion in the making of every garment.

Why these Reductions then? Here's the Answer.

Just part of our policy. Each season's goods must be cleared out within the season. In the short space of a few weeks we will clean up the whole of present stock, including Fancy Worsteds, Cheviots, Tweeds, Homespuns and Halifax Weaves. The sooner you come, the wider the choice.

Moved to Larger Office. A. F. Webster & Co., general steam-thip agents, who have for over 20 years occupied the office, at the northeast corner of King and Yonge streets, have moved to a larger and finer office at 53 Yonge street, where they will be in a much better position to handle the rapidly increasing business of ocean travel.

that former terror was in the bantam class—excepting that the "Kid" does class—excepting that the "Kid" does not carry that terrible wallop that made Terry famous in a few short months. But at the same time I am an admirer of Johnny Coulon and a believer in fair play and feel that the time for his return to active ring work should be left to the champion's own judgment. He knows his condition better than anyone else, and should

better than anyone else, and should know soon whether he will be able to fight again or not. If he finds that he can't round into condition to defend advertising purposes alone. It would attract more attention to the International League than to either of the big leagues. The whole country would be interested in the outcome, and no one he can't round into condition to defend the championship Coulon will prob-ably retire and let the rest of the youngsters fight for the title. But until that time he should be left alone. Coulon's Great Record. Coulon has been fighting for nine years and worked hard to get where he is Williams is only a herinner in would watch the result with greater interest than the powers of the two major leagues. Barrow's theory appears a most sound on >. So far it is only theory.

is. Williams is only a beginner in

the very least McCarey could do would be to offer Charley another battle with Williams. Had the rules been lived up to in the recent match Le-doux should have been declared the winner, and as such entitled to the match with Campi was in 1908 away has been thrown away. All his money has been thrown away. There is absolutely no sentiment in is history. As for Rivers' "dogging" it, I don't know. It is easy enough for some sore head to circulate a yarn about a

There is absolutely no schilment in baseball. Not a rival manager would give Frank Chance a worn out bat bag if he thought it would serve later to help the "peerless leader" win a game boxer quitting under punishment, and help the "poerless leader" win a game from him. It is almost impossible to dig major league class from the bush-es. Talent has to be developed. There is a dearth of material—not enough good players to go round. And. na-turally, minor league clubs with some-thing to sell profer to do business turally, minor league clubs with some-thing to sell prefer to do business with the successful major outfits. not because the market is any better, but because of the fact that their stars are more likely to be turned back again at some sort of sound profit.

at some sor. of sound profit. The principles of organized baseball are quite sound, and just enough. But there are too many loopholes for evas-ion. Even the roster limits are not conscientiously observed. In spite of the National Commission's vigilance wholesale "farming" continues. Every big league club has a raft of embryo stars "covered up" as an emergency reserve. Nothing can be done to stop it. Players who might help the weak-er clubs are kept on the benches of the fag contenders, or planted out somewhere in such a manner that they are safe from the dragnet of rivals. May Solve Baseball's Big Puzzle. If it could be proven by fair trial that Ed Barrow's idea is practical then would be solved not only one of the greatest puzzles of the promoters, but one of the greatest ills of the law. HAS NEW SCHEME

then would be solved not only one of the greatest puzzles of the promoters, but one of the greatest ills of the lay-ers as well. By the same stroke would be cancelled the necessary evil of the reserve clause, which has threatened congressional investigation of baseball as a trust. Easeball contracts as at present constituted are illegal. They are not equitable A player may be discharged on ten days' notice; he is bound for athletic's life to the club with which he signs thru the instru-ment of reserve. That no greater in-

ment of reserve. That no greater in-justices result is due largely to the troad-mindedness of the National Commission. Yct in spite of all injustices exist.

Take the case of any star ball player who is so unfortunate as to be a member of a poor club. Rucker, of Brooklyn, for the past five years is a fitting example. Brooklyn could not afford to pay him as much as could anord to pay him as much as could— say—New York. There was absolutely no hope for the future. Bound hand and foot to the Dodgers no ray of world's Series sunshine broke thru to heer him

cheer him. It should be the best thing in the world for players if they were put up to be drawn each season. There would be far more novelty to the life, a better chance of general advance-ment in salary, because of changing interest of fandom, and less likelihood of discontent in the ranks. It might come hard at first to give up old idols of years. We all would grieve to see of years. We all would grieve to see the gallant Matty go to Chicago. But we might learn after a while to tolerate We might learn siter a while to tolerate a Hans Wagner or Johnny Evers in his stead. Of course the main objection to such a plan would come from the champions who consider the world's series prize theirs by right of habit Connie Mack and John McGraw should not be expected to go into ecstasies that these crafy pilots could prove that these crafy pilots could prove their true worth by sitting in at the oraw and by namering home their ideas to a new brood of athletics each spring. As a pure sporting proposition the new order of things would give the

first true line on real managerial abili ty. Even balanced fields would elim-inate the element of luck.
